Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu) for details).

KU’s academic units are listed on the left. If you’re not sure where your major is, start with Liberal Arts & Sciences.
KU Core

KU Core Curriculum

Effective Fall 2013, the KU Core is the university-wide curriculum all incoming freshmen will complete. The KU Core integrates with the degree requirements of the various majors offered at KU. In some cases, degree-specific requirements can simultaneously be used to complete the KU Core. The KU Core spans the entire undergraduate experience and comprises three general education goals and three advanced education goals. General education goals and are best met during the first two years of university study.

- Critical Thinking and Quantitative Literacy
- Written & Oral Communication
- Breadth of Knowledge

Advanced education goals can naturally incorporate coursework and other educational experiences done as part of a student’s major(s), minor(2), or experiences as an upperclassman.

- Culture & Diversity
- Social Responsibility & Ethics
- Integration & Creativity

Students may follow individual paths through the KU Core, meeting milestones in different ways.

To learn more about the KU Core Curriculum Committee, the faculty and student committee that establishes and oversees KU Core requirements, please see the University Core Curriculum Committee policy.

By completing the KU Core, the successful graduate will

- Acquire essential skills
- Build a broad background of knowledge
- Have a stronger appreciation for cultural and global diversity
- Cultivate ethical integrity
- Generate the capacity and opportunity to blend and create ideas

Fulfilling the KU Core

Fulfilling the KU Core requires 12 units across the six education goals. A KU Core unit can be

- A single approved course (3-5 hours)
- An approved educational experience
- An approved combination or partnership of course work and experiences

Text Only description of the Distribution of the 12 units (p. 11).

To view a list of courses and experiences approved to meet the learning outcomes of the KU Core Curriculum, click here (http://kucore.ku.edu).

Urban Planning (p. 90)
- Master of Urban Planning (p. 93)

Introduction

The School of Architecture, Design and Planning offers undergraduate and graduate degree programs for students interested in a variety of design-based professions. The School's three departments-Architecture, Design and Urban Planning-share this common dedication to the professional education of students. Degree programs in all three departments emphasize the mastery of appropriate skills, technologies and bodies of knowledge as well as the development of critical thinking and creative problem-solving abilities. Our faculty are dedicated to educating students who will excel in their professional paths or career lines.

The School's students share a common interest, as well, in the design and construction of buildings, environments, objects and visual forms of communication. They take courses that incorporate knowledge and theory related to sustainability and sustainable design, to human wellness and the creation of healthy environments, places and lifestyles, and to the design of client- or user-oriented buildings, places, objects and communications. They have many unique opportunities for interdisciplinary course work, service learning and study abroad in the School's degree programs.

Facilities

The School of Architecture, Design and Planning is at the western end of Jayhawk Boulevard on the Lawrence campus. It occupies several large adjacent buildings with additional facilities in Lawrence and Kansas City.

The school has been headquartered in Marvin Hall since its founding. The main administrative offices are there along with the departmental offices for Architecture, Design and Urban Planning. The Architectural Resource Center and Hatch Reading Room are in Marvin Hall along with 18 design studios, several classrooms, offices for architecture and planning faculty, woodworking and metal shops, three computer labs, and critique spaces on each floor. A covered building yard is situated on the south side of the building.

Snow Hall, directly across Jayhawk Boulevard from Marvin Hall, contains 6 architecture studios and a number of faculty and staff offices. An open-access computer lab and a well-equipped model-building shop are in Snow Hall, along with a large critique and display area for student work.

Snow Hall, formerly known as Broadcasting Hall when it housed the campus radio station, is just behind Marvin Hall. It includes four architectural design studios, an acoustics lab, a computer lab, an HVAC lab, a laser-cutter lab, display and critique areas, and several faculty offices.

The school's Design-Build Center is in the East Hills Industrial Park on Highway K-10 in East Lawrence. This 63,000-square-foot, open-span building acquired in 2009 is the site of design-build studios, including the internationally acclaimed Studio 804. It includes studio design spaces, offices, conference areas, shop facilities, and large assembly areas for indoor construction of modular buildings.

Since 1987, the school has supported an urban design studio and a public education and community outreach center in Kansas City. The two programs operate together in the Kansas City Design Center at 1020 Baltimore Avenue in the heart of downtown Kansas City. This large street-front location includes working space for an entire architectural design studio as well as offices for instructors, exhibitions areas, and conference and meeting spaces for events that include community partners and sponsors.

The 130,000-square-foot Art and Design Building, next to Marvin Hall, houses the main design department programs, including studios and classrooms. The building also houses the 2,100-square-foot Art and Design Gallery, which features new exhibits every two weeks and is an important component of the teaching mission. Each major program offers all students spacious work areas and a range of equipment, from traditional to the newest digital technology. Students have access to multipurpose computer labs with the most commonly used current software for photography, animation, CAD, 3-D modeling, video production, desktop publishing, scanning, illustration, large- and medium-format plotters, and color and black-and-white laser printers. Unique satellite computer areas are dedicated to each major area. Students have access to a traditional film Photography Lab, which includes a dark room for black-and-white photography as well as a digital processing lab with dedicated spaces for video and digital image production and an equipment checkout facility. The 6,400-square-foot Common Shop includes a range of woodworking equipment, a plastic vacuum former, metal-working equipment, and classroom space. All computer and photo
labs and the common shop have professionally trained technical support staff.

The historic Chamney Farm, on the western edge of the Lawrence campus, is the site of the school’s Center for Design Research, an award-winning building that connects a converted native limestone farmhouse and 19th-century restored barn. Corporate-sponsored projects are supervised by design faculty and executed by graduate students and advanced undergraduates. This fully equipped facility has become a connection between the academic and professional worlds of design as well as a focus for collaborations among applied design areas and other KU units.

The Helen Foresman Spencer Museum of Art houses the only comprehensive art collection in Kansas. Collections are particularly noteworthy in medieval art, 17th- and 18th-century German and Austrian painting, sculpture, American painting, prints, American photography, Japanese art of the Edo period, textiles (especially quilts), and decorative arts. Spencer Museum sponsors exhibitions, lectures, films, workshops, and activities that support curricular instruction in the arts. Another important resource is the Murphy Art and Architecture Library, with 150,000 volumes and 600 current journals documenting design, and architecture from all cultures, from antiquity to the present.

School of Architecture, Design and Planning
Marvin Hall
1465 Jayhawk Blvd., Room 206
Lawrence, KS 66045-7626
Phone: 785-864-4281
Fax: 785-864-5393
archku@ku.edu
http://www.sadp.ku.edu/

Undergraduate Programs
Degree programs available to entering first-year students include a 5-year professional Master of Architecture (p. 49); a professional Bachelor of Fine Arts (p. 81) in design with concentrations in Environmental Design, Illustration and Animation, Industrial Design, Photo Media, and Visual Communication Design. The Bachelor of Arts in Architectural Studies (p. 54), a preprofessional degree, is also available to entering first-year students.

Admission
Information on undergraduate admission standards and requirements, as well as application procedures and deadlines, is found on the Department of Architecture and Department of Design pages. Visit the Office of Admissions (http://admissions.ku.edu) for information about admission to KU. Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions. Students who plan to transfer into programs and need advising assistance should contact the Architecture Admissions Office (http://www.sadp.ku.edu/architecture/admissions/undergrad) at 785-864-3167 or the Design Admissions Office (http://design.ku.edu/ApplytoKU) at 785-864-2073.

Advising
In addition to advising and academic assistance from KU offices, the school has individual advisors for each student. Advisors are available throughout the course of study by appointment, and students are expected to see their advisors at enrollment times. For architecture advising information, students should contact Barb Seba at 785-864-5130. For design advising information (http://design.ku.edu/advising), contact Samantha Raines at sraines@ku.edu or 785-864-2959.

University Honors Program
The school encourages qualified students to participate in the University Honors Program (http://www.honors.ku.edu). Students should be aware that the course load for professional architecture and design degrees may make it difficult to participate in the Honors Program.

Graduate Programs
Graduate programs include

• Master of Architecture (p. 63) (M.Arch.), a 3-year professional degree for students already holding bachelor’s degrees in any field;
• Master of Arts in Architecture (p. 65) (M.A.)–Academic/Research Track;
• Master of Arts in Architecture (p. 66) (M.A.)–Architectural Management Track;
• Doctor of Philosophy in Architecture (p. 68) (Ph.D.);
• Master of Arts (p. 87) (M.A.) in Design with a concentration in Design Management;
• Master of Arts (p. 89) (M.A.) in Design with a concentration in Environmental Design;
• Master of Arts (p. 89) (M.A.) in Design with a concentration in Interaction Design; and
• Master of Urban Planning (p. 93) (M.U.P.).

Undergraduate Scholarships and Financial Aid
Awards and scholarships are available to students at all year levels. All students who wish to be considered for KU financial aid or for the scholarships available within the school must complete applications with Financial Aid and Scholarships (http://financialaid.ku.edu).

Graduate Fellowships and Assistantships
For information about graduate assistantships, contact the School of Architecture, Design and Planning (http://www.sadp.ku.edu).

Visit the Graduate Studies website for information about funding opportunities (http://www.graduate.ku.edu/03-07_student_funding.shtml) for graduate students at KU.

Financial Aid and Scholarships (http://financialaid.ku.edu) administers grants, loans, and need-based financial aid.

Undergraduate University Regulations
For information about university regulations, see Regulations (p. 12) or visit the University of Kansas Policy Library (http://www.policy.ku.edu).

Absences
A student with excessive absences may be withdrawn from the course by the dean.
Credit/No Credit

A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. Students must submit a form in 205 Marvin during the two week period designated by the University in order to elect a course for Credit/No Credit. For more information, visit the KU Policy Library (https://documents.ku.edu/policies/governance/USRR.htm#art2sect2).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Credit/No Credit is allowed for electives not in the major. It is not allowed for required courses or electives in the major.

ARCH 690 and ARCH 691 can only be taken for Credit/No Credit.

Graduation with Distinction and Highest Distinction

Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. The list is compiled each spring and includes July, December, and May graduates.

Honor Roll (Dean’s List)

Students in the upper 10 percent of undergraduate student body who have completed at least 14 hours for architecture students and at least 12 hours for design students with letter grades are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

Independent Study Through KU Continuing Education

Students may take 9 hours of elective credit in Independent Study courses offered through KU Continuing Education.

Maximum and Minimum Semester Enrollment

No student may enroll in more than 19 credits without the approval of the department. No more than 15 hours for architecture students and no more than 9 hours for design students may be taken in summer session.

Prerequisites and Corequisites

The school strictly enforces prerequisites for all courses. Students enrolled in a course without successfully completing the appropriate prerequisites may be administratively dropped without notice in the first weeks of the semester.

Probation

Master of Architecture (5-year) and B.A. in Architectural Studies

Probation

Student records are reviewed after each semester. A student is placed on probation if the KU semester or cumulative grade-point-average is below 2.0. Students placed on probation are sent a letter stating the length of probation and the requirements for being returned to good standing.

Continued on Probation

A student on probation may be continued on probation for one more semester if the following KU semester and cumulative grade-point-averages show considerable improvement, but the semester or cumulative grade-point-average is lower than 2.0.

Dismissal

A student may be dismissed for poor scholarship if any of the following situations apply:

1. Fall and spring KU semester or cumulative grade-point-averages are below 2.0 with no considerable improvement.
2. The student has been placed on probation and has failed to meet the conditions required to return to good standing.
3. The student has repeatedly failed to make progress toward graduation.

Reinstatement

Appeals for reinstatement may be submitted to the department’s probation committee, 206 Marvin Hall. A student reinstated has one semester to return to good standing.

Good Standing

Students with KU semester and cumulative grade-point-averages of 2.0 or above are in good standing.

B.F.A. in Design

Probation

A student is placed on probation after completing a semester at KU without a 2.0 grade-point average. Students placed on probation are informed of their probationary terms and must have a mandatory advising meeting with a departmental advisor. For admissions purposes, students with strong portfolios may be admitted on a probationary basis if their grades or ACT scores are not strong enough.

Continued on Probation

A student on probation may be continued on probation for an additional semester if the student’s cumulative grade-point average shows considerable improvement.

Dismissal

A failure to raise the grade-point average above 2.0 in a semester while on probation may be grounds for dismissal. Students may also be dismissed by the Department of Design chair at any time for excessive absences or for failing to make progress toward the degree.

Good Standing

Students with KU semester and cumulative grade-point-averages of 2.0 or above are in good standing.

Required Work in Residence

Architecture Students

All architecture students must complete 30 hours of KU work. Architecture students who have grade-point averages of 2.0 in total and in residence hours may take up to 12 of the final 30 hours in nonresident study. Such an enrollment requires prior approval by petition and excludes fifth-year studios.
Design Students
Six of the final 30 hours may be taken for nonresident credit, with advance permission. Nonresident credit may fill only elective requirements not in the major field of study.

Transfer of Credit
CredTran (http://admissions.ku.edu/%7Eadmiss/credit/transfer) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Architecture Students
Only grades of C- or higher are accepted in transfer credit toward a degree. Architecture students who wish to transfer design courses may do so only upon submission of a portfolio of work done in such courses. Placement in the professional curriculum is based on completed course work, a review of the comprehensive portfolio of prior work in architecturally oriented courses, and on a space-available basis. The student must conform to the work in residence requirements stated above.

Design Students
Only grades of C or higher in general course work are accepted as transfer credit toward degrees. Grades for studio related course work must be B or higher for transfer credit. Applicants with a lapse of four or more years since their last full-time enrollment may not expect studio credits to be accepted for transfer.

Graduate University Regulations
For information about university regulations, see Regulations (p. 12) or visit the University of Kansas Policy Library (http://www.policy.ku.edu).

Credit/No Credit
The Credit/No Credit option is not authorized for graduate students’ enrollments, including, but not limited to, courses taken to fulfill the research skills requirements, undergraduate deficiencies, etc.

Master of Architecture (2 & 3-year)

Probation
Student records are reviewed after each semester. A student is placed on probation if the KU cumulative grade-point-average is below 3.0. Students placed on probation are sent a letter stating the length of probation and the requirements for being returned to good standing.

Continued on Probation
A student on probation may be continued on probation for one more semester if the cumulative grade-point-averages show considerable improvement, but the semester or cumulative grade-point-average is lower than 3.0.

Dismissal
A student may be dismissed for poor scholarship if any of the following situations apply:
1. Cumulative grade-point-averages are below 3.0 with no considerable improvement.
2. The student has been placed on probation and has failed to meet the conditions required to return to good standing.

3. The student has repeatedly failed to make progress toward graduation.

Good Standing
Graduate Students with KU cumulative grade-point-averages of 3.0 or above are in good standing.

Architecture Courses
ARCH 100. Architectural Foundations I. 4 Hours.
An introductory design studio directed toward the development of spatial thinking and the skills necessary for the analysis and design of architectural space and form. This course is based on a series of exercises that include direct observation: drawing, analysis and representation of the surrounding world, and full-scale studies in the making of objects and the representation of object and space. Students are introduced to different descriptive and analytical media and techniques of representation to aid in the development of critical thought. These include freehand drawing, orthographic projection, paraline drawing, basic computer skills, and basic materials investigation. Prerequisite: Approval from the Dean of the School of Architecture and Urban Planning. LAB.

ARCH 101. Architectural Foundations II. 6 Hours.
A continuation of ARCH 100 with major emphasis on the design relationships among people, architectural space, and the environment. The course is based on a series of exercises leading to the understanding of architectural enclosure as mediating between people and the outside world. Issues of scale, light, proportion, rhythm, sequence, threshold, and enclosure are introduced in relation to the human body, as well as in relation to architectural form, environment, and social and psychological factors. Students will engage in drawing, perspective projection, model building, and basic computer graphics. Prerequisite: ARCH 100. LAB.

ARCH 103. Introduction to Architecture. 3 Hours.
An introduction to the study and practice of architecture. This course aims at orienting the student to the various disciplinary facets which make up the total architectural curriculum as well as to the various professional roles which architects can be expected to perform. Architectural study is seen as both an art and a science, and architectural practice is seen as a complex, interdisciplinary professional activity. Presentations by guest lecturers are included. Discussions required for, and only open to, B.A. in Architectural Studies students. LEC.

ARCH 104. Principles of Modern Architecture. 3 Hours.
A lecture course covering the emergence of technological, theoretical and aesthetic principles of modern design beginning with the socio-cultural impact of industrialization and the crisis in architecture at the end of the 19th century. Attention is given to functionalist theory, mechanical analogies and the so-called machine aesthetic of 1910-1930 and to the precedents of important design principles of modern architecture, including modular coordination, the open plan, interlocking universal space, unadorned geometry, structural integrity, programmatic and tectonic expression, efficiency and transparency and briefly explores their development in post-war and late 20th century examples. LEC.

ARCH 105. B.A. Architectural Studies Seminar. 1 Hour.
The seminar provides a discussion section that supplements the lectures presented in ARCH 103. The course must be taken concurrently with ARCH 103 and is open only to students in the B.A. in Architectural Studies Program, or with approval by the School of Architecture and Urban Planning. SEM.

ARCH 106. B.A. Architectural Studies Seminar II. 1 Hour.
This seminar provides a discussion section that supplements the lectures presented in the lectures of ARCH 104. The course must be taken
ARCH 502; or consent of instructor. LEC.

An introductory design studio directed toward the development of spatial thinking and the skills necessary for the analysis and design of architectural space and form. This course is based on a series of exercises that include direct observation: drawing, analysis and representation of the surrounding world, and full-scale studies in the making of objects and the representation of object and space. Students are introduced to different descriptive and analytical media and techniques of representation to aid in the development of critical thought. These include freehand drawing, orthographic projection, paraline drawing, basic computer skills, and basic materials investigation. Prerequisite: Approval from the Dean of the School of Architecture and Urban Planning. LAB.

A continuation of ARCH 108 with major emphasis on the design relationships among people, architectural space, and the environment. The course is based on a series of exercises leading to the understanding of architectural enclosure as mediating between people and the outside world. Issues of scale, light, proportion, rhythm, sequence, threshold, and enclosure are introduced in relation to the human body, as well as in relation to architectural form, environment, and social and psychological factors. Students will engage in drawing, perspective projection, model building, and computer graphics. Prerequisite: ARCH 100 or ARCH 108. LAB.

ARCH 152. Professional Practice I. 1 Hour.
This course will introduce students to the history and nature of the architecture profession and its relationship to education, internship, registration and certification. The various roles which architects are expected to perform and the ethical standards they are expected to uphold are explored in the context of different models of practice. Prerequisite: Must be admitted to M.Arch 5-year program, Arch Studies Program or approval by the School of Architecture and Urban Planning. LEC.

ARCH 200. Architectural Foundations III. 6 Hours.
A continuation of ARCH 101 with a series of studio exercises following a succession based on analysis, form, and syntax, with an emphasis on the communication of architectural ideas. Students explore plan, section, and spatial organization, spatial sequence, structure and materiality in relation to human dwelling and the building site. The course aims for student integration of these issues into building designs that require the organization of multiple spaces. Students will consider natural forces as they both shape and affect buildings, including gravity, wind, light, heat, sound, and fluids. Precedent studies, direct observation, building analysis, and site analysis are significant aspects of the semester. Prerequisite: ARCH 101. LAB.

ARCH 205. Natural Forces. 3 Hours.
The course advances empirical understanding of natural forces as they both shape and affect buildings, including gravity, wind, light, heat, sound, and fluids. This course emphasizes the development of conceptual thinking and problem solving skills through sensory-based demonstrations, lectures, and laboratory experimentation. The course will emphasize concepts of PHSX 114 as they relate to the built environment. The course will require freehand drawing, physical, model-building and the application of Photoshop and InDesign software programs. Tutorials and workshop sessions will introduce and require use of other computer software applications. Prerequisite: PHSX 114 and either ARCH 109 or ARCH 502; or consent of instructor. LEC.

ARCH 208. Architectural Design I. 6 Hours.
The second year studios are responsible for introducing students to the basic form determinants of architecture—from limited scope exercises to complete building designs within the natural environment. Using diagrams and sketches, plans, sections, elevations and models, students explore the spatial ordering of human activity, the analysis of site, sound, light and air modulation, simple environmental controls and energy conservation, basic framing systems, volumetric organization and the materials of building skins and envelopes in the design of small buildings. Prerequisite: ARCH 109. LAB.

ARCH 209. Architectural Design II. 6 Hours.
A continuation of ARCH 208 with an emphasis on the synthesis of basic form determinants, including the completion of a design project of a medium-sized, multi-storied public building in the urban environment containing a variety of spaces and spans. This project will enable students to demonstrate competence in basic architectural design, act as a summation of the variety of smaller design exercises undertaken through the year, and prepare students for the third year focus on the materials and methods of building construction. Prerequisite: ARCH 208. LAB.

ARCH 280. Design Workshop I: Visual Narratives. 3 Hours.
This lab-based course will develop the skills and understanding necessary to visually communicate compelling narratives of complex data and situations. Students will engage in hand-sketching and diagramming as well as utilizing digital tools designed to facilitate clear and persuasive data display. Environmental scales ranging from settlement patterns down to product interface will be addressed. Students will learn the visualization pipeline, processing data for visualization, visual representations, the design of interaction in visualization systems, and the impact of perception. Students will also develop the skills necessary to solve visualization problems and critique and evaluate information visualization. This material will be covered through class discussions, readings, and a number of assignments and projects. The assignments and large group project will provide students with practical experience in the construction of visual narratives. LEC.

ARCH 281. Design Workshop II: Design Thinking. 3 Hours.
This course aims to enhance student’s abilities to apply concepts and methods associated with design thinking with an emphasis on ill-structured problem-solving and human-centered design. Students will gain exposure to design thinking processes including forecasting, scenario planning and various forms of analysis all of which help shape a robust problem statement that forward design innovation. This material will be covered through class discussions, readings, and a number of assignments and projects. Students will have the opportunity to develop their design-thinking competence through their final project which may be at the level of models, product, spatial, building and/or community designs. LEC.

ARCH 310. Computer Applications. 3 Hours.
The course will immerse students in the exploration of the generation, manipulation, and production of graphic images through the use of computers. The goal of the course is to help reach an understanding of computers that allows for future growth in an environment in constant change, and to provide an overview of what is currently possible. The format of the course will be a combination of lectures and workshops. The lectures will introduce students to theoretical and application-oriented topics. Group discussions will focus on the computer as a conceptual construct, the computability of design, and computers as design partners. The workshops will provide students with hands-on experience. The vehicles used for these investigations will be desktop publishing, paint, and drafting tools. As resources become available this list will be augmented. LEC.
ARCH 359. Special Problems. 1-3 Hours.
Special problems in architecture. The study of a particular problem in architecture involving individual research and presentation. Conferences and reports. (May be taken for Credit/No Credit.) Prerequisite: Student must submit to his or her faculty advisor, in advance, a statement of the problem he or she wishes to pursue, the methodology he or she plans to use in the program, and the objectives of the special problems. He or she must also be in agreement with the faculty member he or she proposes as instructor for the course. IND.

ARCH 360. Introduction to Landscape Architecture. 3 Hours.
This course situates landscape architecture in a broad cultural and social context with the intention of developing skills in critical thinking about the role of exterior place-making in the built environment. Lectures and assigned readings will explore central issues in the history and theory of landscape architecture and look at key sites and their designers. Other topics will include environmental attitudes and perception, the human experience of place, and ideas of nature. LEC.

ARCH 380. Design Workshop III: Ideas and Methods in Planning and Design. 3 Hours.
This course focuses on design methods, ideas and approaches at the city, neighborhood and community levels. The course will introduce approaches to urban design and planning which are responsive to social, environmental and ecological issues. The goal is to develop core competencies in design thinking such as analyzing specific problems and developing possible design interventions by understanding relevant theories and analyzing case studies. Students will critically analyze past and current urban trends through case studies to inform design ideas for more equitable and sustainable communities. This material will be covered through class discussions, readings, and a number of design-oriented team projects and assignments. LEC.

ARCH 381. Design Workshop V: Designing Sustainable Futures. 3 Hours.
This problem-based service-learning course aims to enhance students’ abilities to apply the concepts and methods associated with effective and facilitative leadership focused upon sustainable design problems. This material will be covered through class discussions, readings, and design-oriented team projects. Students learn core competencies such as analyzing organizational problems and goals, strategic planning, intervention, and evaluation. In the service-learning component, students apply these skills to issues that matter to them and to the communities they serve to generate design solutions for their client’s consideration. These projects may be at the level of interaction models, product, spatial, building and/or community designs. LEC.

ARCH 408. Architectural Design III. 6 Hours.
A continuation of ARCH 209 with an increased emphasis on building construction and systems as form determinants. Work will focus on medium scale, multi-storey non-residential buildings developed to an appropriate level of technical resolution as evidenced in clear schematic wall sections and structural proposals. Prerequisite: ARCH 209. LAB.

ARCH 409. Architectural Design IV. 6 Hours.
A workshop-based course with an emphasis on materiality and construction of building assemblies through hands-on activities. Development of craft, process, collaboration and technical documentation skills will be the primary objective of the course. Prerequisite: ARCH 209. LAB.

ARCH 480. Senior Seminar. 3 Hours.
This seminar will expose students to normative and critical approaches in the profession of architecture. Through field trips, attendance at juries, readings, and presentations by architects and designers, they are to develop an understanding of the precedence, theories, and practices of the profession. This is the capstone course for the B.A. in Architectural Studies. Prerequisite: ARCH 381. LEC.

ARCH 502. Accelerated Design I. 6 Hours.
The first of three accelerated design studios, this course emphasizes the design relationships among people, architectural space, and the environment. Issues of shelter, light, sequence and threshold are considered in relation to physical, psychological and sociological factors. Offered only in the summer. Prerequisite: Undergraduate degree and permission of the Dean of Architecture and Urban Planning. LAB.

ARCH 503. Accelerated Design II. 6 Hours.
The second of three accelerated design studios, this course emphasizes construction and technology as expressive mediators in the relationship between human dwelling and site. Students will consider natural forces as they both shape and affect buildings, including gravity, wind, light, heat, sound and fluids. Prerequisite: ARCH 502 and/or permission of the Dean of the School of Architecture and Urban Planning. Corequisite: ARCH 626. LAB.

ARCH 504. Accelerated Design III. 6 Hours.
The third of three accelerated design studios, this course focuses on the integration of material learned in previous studios with urban-based design problems of increasing scale and complexity within the frameworks of sustainability and universal design. Students will demonstrate an ability to use research and critical thinking skills, including the use of case precedents, and the ability to integrate various building systems in building design. Prerequisite: ARCH 503 (see studio grading policy) or permission of the Dean of the School of Architecture and Urban Planning. Corequisite: ARCH 627. LAB.

ARCH 505. Accelerated Design IV. 6 Hours.
Graduate studio emphasizing urban context and design theories. Students will undertake specialized research projects. Prerequisite: ARCH 504 (see studio grading policy) or permission of the Dean of the School of Architecture and Urban Planning. Corequisite: ARCH 690. LAB.

ARCH 510. Problems in Computer Applications. 3 Hours.
The study of a particular problem in architecture involving the application of computer-aided design and analysis techniques. Individual or group tutorials. Prerequisite: Consent of instructor based on the student’s advance submission of a written proposal outlining the plan of study. Completion of one course in computer programming and/or specific experience in writing original computer programs. LEC.

ARCH 515. Building Information Modeling. 3 Hours.
This course will expose students to building information modeling: a digital representation of the building process that facilitates exchange and interoperability of information in digital format. The focus will be on the software’s potential for reducing the information loss that occurs during each handoff of the project during the traditional delivery method. Possibilities for integrated practice including lifecycle costing and knowledge management are discussed. LEC.

ARCH 516. Portfolio Development. 3 Hours.
The aim of the course is to teach practical presentation skills using computer software, in addition to graphic design theories and strategies. This course will provide an opportunity for students to design and produce a design portfolio appropriate for internship and/or graduate school applications. LEC.

ARCH 520. Architectural Acoustics. 3 Hours.
An introduction to the physics of sound. Objective and subjective evaluation and control of sound as applied to architectural spaces. Room shaping, mechanical and electrical system noise and vibration control, and electro-acoustic sound reinforcement. Prerequisite: PHSX 114 and ARCH 626 or equivalent, or consent of instructor. LEC.
ARCH 521. Electro-Acoustical Systems. 3 Hours.
A study of electro-acoustic sound reinforcement and reproduction systems for buildings. Prerequisite: PHSX 212, or consent of instructor. LEC.

ARCH 524. Structures I. 4 Hours.
The fundamental principles of structural behavior including stress and deformation in structural components and systems. Open to architecture students only. Prerequisite: PHSX 114. LEC.

ARCH 530. Environmental Systems I. 3 Hours.
This introductory course addresses human needs and comfort in relation to the natural and man-made environments. Specific topics include: climate and weather; environmental health; indoor air quality; thermal comfort; passive and active systems and design strategies for heating, ventilating, and air-conditioning; plumbing; noise control; building management systems; and life safety systems. Prerequisite: PHSX 114. LEC.

ARCH 531. Environmental Systems II. 3 Hours.
This course addresses human needs and comfort in relation to the natural and man-made environments. Specific topics include: daylighting, electrical lighting systems, building acoustics, electrical power distribution systems, alternative energy sources, communication systems, and transportation systems. Prerequisite: ARCH 530. LEC.

The first unit of the two-part survey history course explores the historical changes of architecture in relation to civilizational change, techno-spatial experiments and town-building efforts, from the earliest evidence of human dwelling to the beginning of the industrial revolution. Emphasis is on the architecture as an integrated development of commercial, technological, and ideological transfers among different regions, nascent religious groups and evolving political enterprises. In regard to the geographical and geopolitical regions, the course includes South and Central America, Europe, Classical Greece and Italy, Asia Minor, North Africa and Asia. LEC.

ARCH 541. Global History of Architecture II: From Industrial Revolution to Present (1700 CE-Present). 3 Hours. AE42.
The second unit of study of the two-part survey history course offers a global perspective of the development of modern architecture from the industrial revolution to contemporary times. This course traces the genealogy of modern architecture to its multiple roots in European enlightenment, global dissemination of industrial knowledge, invention of new building materials and techniques, and development of architectural theory. Emphasis is on the historical context of how the diverse approaches of architects from different regions create variations of formal expressions, spatial program and theoretical underpinning, and thus create multiple meanings and images of modern architecture. Prerequisite: ARCH 340 or ARCH 540 or ARCH 640 or consent of instructor. LEC.

ARCH 542. History of Architecture III: Modern. 3 Hours.
A continuation of ARCH 541, History of Architecture II, covers the period from around 1800 to the present. Particular emphasis is placed on the major cultural shifts that have impacted architectural representation and have contributed to its differentiation as Modern, not only in Europe, North and South America but also with examples in India and Pakistan. Weekly lectures and readings including original sources. Supplementary readings and/or assignments may be assigned. Prerequisite: ARCH 341 or ARCH 541 or ARCH 641 or consent of instructor. LEC.

ARCH 552. Ethics and Leadership in Professional Practice. 3 Hours.
This course takes the perspective that architectural design is inherently an ethical act. Through this lens, students will learn the essentials of office practices, the many definitions of client and their roles in the design process, the legal responsibilities of the profession, the importance of continuous professional development and the obligation the profession has to provide civic leadership in regard to the built and natural environment. LEC.

ARCH 550. Site Design. 3 Hours.
This course introduces concepts of architectural context and site through a combination of lectures and field studies. Natural, social and built systems are presented using a range of perspectives, including holistic ones. Students will develop visual and written skills of analysis through specific site analytic and design techniques. Application exercises and ongoing analysis assignments are required. Restricted to 3.5 and 5 year Master of Architecture students. Prerequisite: ARCH 109 for undergraduate students. LEC.

ARCH 570. Contemporary Issues Seminar I. 1 Hour.
A series of seminars on contemporary issues facing the profession. LEC.

ARCH 571. Contemporary Issues Seminar II. 1 Hour.
These seminars will consist of three to four guest lecturers each semester. All students enrolled in this course will attend the same lecture as ARCH 572. Topics will be selected to reflect major issues covered in the course work, or contemporary issues facing the profession. LEC.

ARCH 572. Contemporary Issues Seminar III. 1 Hour.
These seminars will consist of three to four guest lecturers each semester. All students enrolled in this course will attend the same lecture with ARCH 571. Topics will be selected to reflect major issues covered in the course work, or contemporary issues facing the profession. LEC.

ARCH 573. Financial and Economic Issues in Architecture Management. 3 Hours.
This course will focus on the fundamentals of accounting, macroeconomics and the construction industry, and concepts related to the development and implementation of a strategic business plan. LEC.

ARCH 574. Organizational Issues in Architecture Management. 3 Hours.
Topics that will be covered in this course include the organization of a professional practice, personnel management, and the development of effective communication skills. LEC.

ARCH 575. Architecture Management: Managing a CAD System. 3 Hours.
This course covers the various procedures involved in managing a CAD system within a design organization. It also explores the different applications and uses of current CAD technology. Topics to be addressed include: selecting a system; billing CAD services; support services and personnel; marketing CAD; customization, file management, menus and script files; AutoLisp Programming; and integrating CAD with other programs. Prerequisite: An introductory CAD class or permission of the instructor. LEC.

ARCH 576. Project Delivery in Architecture Management. 3 Hours.
Conventional methods for project delivery will be reviewed along with design/build, fast-track, and other techniques. The relationship of the architect and development will also be explored, as will the relationship of project development to urban design concepts. LEC.

ARCH 577. Marketing Architectural Services. 3 Hours.
The emphasis of this course will be on the development and implementation of a marketing plan, techniques related to the marketing of specific projects, and the relationship of marketing to other components of a firm. LEC.
ARCH 578. Legal Issues in Architectural Management. 3 Hours.
A course designed to familiarize the student with legal considerations related to a professional practice. Case studies and selected readings will serve as the basis for discussion of registration, contracts, business formation, taxes, employment practices, copyright, and patent law. In addition, the course will draw upon the knowledge and experience of members of the professional community. LEC.

ARCH 600. Special Topics in Architecture: ______. 3 Hours.
This course is for the study of architectural topics on a one time or experimental basis in response to changing needs and/or resources in the Program. It may be offered concurrently by different instructors under different subtitles as announced in the Timetable. May be repeated for credit. Prerequisite: Variable. IND.

ARCH 601. Design Research. 3 Hours.
This course will examine issues in architectural research. It will provide an overview of graduate level studies with regard to definitions, methods, skills, and techniques. The course will consist of lectures, seminars, readings and guest presentations. The class will enable students to make informed judgments about matters of quality and quantity on architectural issues. Students will be expected to formulate sensible systems of classification for their chosen material. Students will be expected to formulate sensible systems of classification for their chosen material. Students will be expected to produce papers and essays, make sample research proposals, and other research based assignments. Limited to students in M. Arch Program with Undergraduate status. Prerequisite: ARCH 608. LEC.

ARCH 608. Architectural Design V. 6 Hours.
A continuation of previous studio coursework with an emphasis on the programming and design of individual urban buildings with culture, context and precedent as major form determinants. Clear development and integration of structural, mechanical and life safety systems will be a focus of the course. The concepts of integrated practice and building information modeling will be introduced. Prerequisite: ARCH 408 and ARCH 409; or ARCH 301 or ARCH 504 or ARCH 505; or ARCH 604. LAB.

ARCH 609. Comprehensive Studio. 9 Hours.
A culmination of all previous design study with emphasis given to the individual student’s demonstration of synthesis of all previously learned design skills. These include program analysis, site design, structure, formal composition, materials and methods of construction, technical development of building fabric, environmental systems, code and zoning compliance, and principles of sustainability. Students should also demonstrate an appropriate awareness of history, theory, and culture. The level of project development should be demonstrated by technically precise drawings and will researched written documentation in addition to other means of representation. Prerequisite: ARCH 608 and successful completion of all other required professional courses through the semester with ARCH 608. LAB.

ARCH 610. Computers and Project Development. 3 Hours.
This course introduces one to the use of computers in project development (final and execution drawings, specifications). Initiates advanced computer aided design systems. Emphasis is to be on CAD potential in generating complex representation; lectures and laboratory work on extent and limits of CAD systems in design; familiarizes with software and hardware (basic training, plotting, etc.); encourages the use of CAD process for exploration (three-dimensional representation); introduces editing and report preparation. Lectures on computers and profession. No computer language is taught in this course. Prerequisite: ARCH 310 or introductory CAD course. LEC.

ARCH 613. Visual Thinking Studio I. 3 Hours.
An intensive course covering the graphics topics described in ARCH 113 and ARCH 114. Graduate level course that supplements the core syllabus or ARCH 102 with weekly seminars, expanded reading lists, and additional classroom assignments. Prerequisite: Undergraduate degree in area other than architecture with three credits in calculus, four credits in physics, three semesters of English, and/or permission of the Dean of the School of Architecture and Urban Planning. LAB.

ARCH 614. Freehand Drawing. 3 Hours.
Open to all SAPD non-graduating students interested in enhancing current freehand drawing skills, generally in the architectural realm. While a broad range of expression and graphic materials is explored, emphasis is on drawing as a notational skill, the instrument of creative expression for professional purposes as well as for lifelong artistic fulfillment. Prerequisite: Consent of instructor. LAB.

ARCH 615. Intensive Graphics II. 3 Hours.
Open to students with intermediate level graphic skills. Course will be designed to deal with all aspects of graphic communication for designers in the different stages of the architectural process. This would include sketching, drafting, lettering, rendering, modelmaking, photographic and slide presentation, reproduction, brochure, etc. Prerequisite: Consent of instructor. LAB.

ARCH 616. Advanced Architectural Presentation Techniques. 3 Hours.
An advanced studio course intended for students who have a working knowledge of basic presentation techniques wishing to refine their existing skills and experiment with new techniques. The course will review basic techniques and explore new ones through a series of lectures and these techniques will be put to use in the concurrent development of complete presentations of architecturally significant buildings. The lectures and studio work will be supplemented by slide presentations, demonstrations, guest lecturers, and field trips. Not intended as a remedial course or substitute for ARCH 615. Prerequisite: Consent of instructor. LEC.

ARCH 618. Architectural Photography. 3 Hours.
A basic course in black and white photography intended to enable the student to utilize photography routinely as a medium for visualization, documentation and presentation of images useful for design. It is organized in relation to the controls of the roll film camera so that assignments reinforce the understanding of this tool and its creative possibilities. Experiences include making photograms, developing black and white films, printing black and white images, mounting and presenting prints, photocopying, photographing buildings and architectural models, photomontage, high contrast graphics effects and an introduction to color materials. Enough technical information is included for the student to pursue black and white photography on his/her own to the desired level of proficiency. LAB.

ARCH 619. Advanced Architectural Photography. 3 Hours.
An advanced course in photography specifically dealing with the skills and techniques of the professional architectural photographer. Students will use and experiment with large format photography, manipulation of the exposure and development process, special developers and processes; negative retouching, specialized film and their application, simulation, model photography, and photographic rendering. Brochure development, marketing services, and professional ethics will also be discussed. Prerequisite: ARCH 618 or equivalent, submission of a brochure, and consent of instructor. LAB.

ARCH 622. Material Investigations. 3 Hours.
This course will provide opportunities for students to learn about research methods in the realm of architectural materials. The course will have two concurrent phases: the first phase will consist of a series of field trips to
materials manufacturers, fabricators and distributors in the Lawrence, Topeka and Kansas City area. The purpose of these trips is to see, first-hand, how materials are developed and made, and to understand the research involved in their development. The second phase will consist of a self-directed research project based on the students’ natural curiosity about a particular material or process. The project will have three components: 1) a research agenda, rigorously developed and executed; and 2) a “built” component, with actual materials, executed by the students’ own hands and financial resources; and 3) final documentation of the research project. LEC.

ARCH 623. Building Practicum. 3 Hours.
The building technology practicum is offered as a course that will afford students a “real world” experience outside of the academic setting. Students can bring their own project proposals to the practicum committee or faculty members on the committee can suggest local preservation efforts, including planning and administration, or actual physical implementation of such projects. It could also be in the interest of some students to develop skills in a specific area, i.e. model building, architectural photography, historic reconstruction, or technical documentation. Those interested in specific areas will need to work closely with the practicum committee to develop a working list of goals and objectives. Students can elect to work individually or in teams, can work outside of the semester schedule with grades assigned at the completion of the project, and will be bound by a contract approved by the practicum committee. LEC.

ARCH 624. Structures II. 3 Hours.
A continuation of ARCH 524, with focus on applying learned principles to basic contemporary structural systems such as concrete, steel, and wood framing systems. Open to architecture students only. Prerequisite: ARCH 524 or ARCH 620 and ARCH 621. LEC.

ARCH 625. Analysis and Design of Structures for Architects. 3 Hours.
Analysis of statically indeterminate beams and frames. Fundamentals of structural design in concrete and steel. Open to architecture students only. Prerequisite: ARCH 624. LEC.

ARCH 626. Building Technology I: Construction Systems and Assemblies. 3 Hours.
This course is an introduction to the materials, processes and craft of construction. Along with presenting the information required for understanding the basic principles and appropriate application and performance of construction systems and assemblies, the course also provides a conceptual framework to bridge between the physical conditions of construction and the more abstract processes of design. Teaching method includes modeling and hands-on building experiences. Prerequisite: ARCH 200 or ARCH 209 or Corequisite: ARCH 408 or ARCH 409 or ARCH 503. LEC.

ARCH 627. Building Technology II: Culture of Building Technology. 3 Hours.
A continuation of ARCH 626. Introduction to industrialized production. A consideration of the detailed sub-systems and cultural practices that comprise the built environment, and the factors responsible for their design and installation. Includes discussion of building codes, mechanisms of failure, and materials selection. Lectures and demonstrations by the instructors and visitors, films, slide projections, quizzes and written examinations. A student should demonstrate an understanding of elementary systems of construction and be able to relate this understanding to the design process. Prerequisite: ARCH 626. LEC.

ARCH 628. Structure in Nature and Architecture. 3 Hours.
The course deals with the historical development of structure, first in nature and then in architecture. In nature, the course discusses the evolution of structural materials, systems, connections and anchorage (foundations) in geological structure, botanical structure, endoskeleton structure, exoskeleton structure and insect architecture. The course then analyzes the growth of structure from anthropological structure through ancient and medieval structure to modern architecture. In these broad architectural periods in world history, the course examines the structural materials, structural behavior and construction of some of the important buildings that helped to define and delineate the architecture of their time. This course helps students to understand structural systems and their behavior, in a non-mathematical way, by relating the structural principles involved to our common experience of the world around us. The course will have every student do a research project on an assigned topic in geological structure, botanical structure, exoskeleton structure, insect architecture or anthropological structure. LEC.

ARCH 629. Listening to Architecture. 3 Hours.
This course has the objectives of introducing the art and science of “listening” to architectural spaces; exploring, from both historical and current viewpoints, how proper acoustical conditions have and can be realized within the aesthetic and functional parameters of the particular architectural space; understanding the importance of building acoustics in architectural design; obtaining the ability to discuss building acoustics with the proper use of acoustical terms and descriptions; and understanding the basics of how sound behaves in an enclosed architectural space. The course will include several visits to existing architectural spaces that have specific acoustical requirements and interesting acoustical characteristics. LEC.

ARCH 630. Theory and Context of Architecture. 3 Hours.
An examination of architectural theories that understand the designed environment as a cultural medium and product of a sociocultural process that expresses values and ideas. Understanding of these theories will be enhanced through the analysis of paradigmatic buildings, urban form and ideologies that have influenced architectural culture. LEC.

ARCH 631. Issues in Contemporary Architecture. 3 Hours.
This class focuses the student on directed readings and provides the student the opportunity to select a topic for the semester’s duration. With a very crammed schedule, the student is given a venue to concentrate on issues that they wish to pursue. A seminal reading is provided to the class, at the beginning of the semester, and this reading forms the basis of the semester’s discussion. The selected reading is “current” and is the device used to distribute other readings pertinent to the author’s argument. The basis of selection is related to current thought and discourse affecting the evolving nature of architectural culture. Class discussion may include slides, videos, sound tapes, etc. These are intended to complement the assigned readings. LEC.

ARCH 632. Contemporary French Architecture. 3 Hours.
This course introduces the student to contemporary trends in French architecture. Social, technological, economic, and theoretical perspectives will be investigated, and the work of the major French architects of the latter half of the twentieth century will be studied in depth. This course supplements the Paris studio program. LEC.

ARCH 635. Visualizing Airflow In and Around Buildings. 3 Hours.
It is often difficult to predict the way certain environmental design features will perform if not built and tested which can be costly and time consuming. This course will analyze the performance of such designs in an efficient and cost effective manner within a visual medium using computational fluid dynamics (CFD). CFD will provide a visual understanding of airflow behavior in and around buildings. In addition, thermal comfort and air quality will be investigated in this animated environment. The culmination of the course will be an analysis of a portion of one’s studio design project. Prerequisite: ARCH 530. LEC.
ARCH 636. Art of Architectural Machines. 3 Hours.
This course emphasizes architectural trends of the twentieth century, which have been influenced by significant technological advances. The purpose of the course is to familiarize the student with the achievements and failures of architectural concepts that were influenced by modern technology. Examples will be drawn primarily from buildings and architects in Western Europe and North America. LEC.

ARCH 637. Architecture and Cosmos. 3 Hours.
Idea of symmetry, harmony, proportion, and ideal form have long been used by architectural theorists and practitioners as a way of translating a traditional knowledge of the world into architectural form. Such traditional knowledge is embedded in the mathematics of Pythagoras, the philosophy of Plato, and the four part study of the cosmos (known in Western thought as "the quadrivium"—arithmetic, geometry, music, and astronomy). This course will entail the study of selected readings in this intellectual tradition as well as the analysis of buildings as they relate to the concepts learned through this study. Prerequisite: ARCH 641, History of Architecture II: Renaissance, or consent of instructor. LEC.

ARCH 638. Architecture, Art and Science. 3 Hours.
This course explores the relationship between architecture and the liberal arts and sciences through the principle of isomorphic correspondence—a term from Gestalt psychology to describe similar structures occurring in different media. Emphasis on the historical connections to music and on aesthetic principles on the natural sciences. Prerequisite: Six hours of architectural history or consent of instructor for non-majors. LEC.

ARCH 639. Current/Historical Directions in Architecture. 2-3 Hours.
A study of contemporary or historical trends in architecture which relate to the development of individual or broad philosophies of architecture. LEC.

ARCH 648. Historic Preservation. 3 Hours.
The focus of this course is on the development of concepts and practices of retrieving, recycling, and curating the built environment from the mid-nineteenth century to the present. After a series of introductory readings and discussions, students are encouraged to investigate particular environmental, technological, social, or ideological questions of their choice, focusing on structures that demonstrate persistence over great distances and, co-existing with this persistence, ability to accommodate changes over time. LEC.

ARCH 650. Architect-Led Design-Build. 1 Hour.
This is a 5-week course covering an introduction to the design-build method of project delivery, highlighting the role of architect as leader of the design-build team. The course covers team structure; ethical issues; forming a design-build firm; project management; licensing, corporate and insurance issues; public design-build laws and bridging. LEC.

ARCH 651. Advanced Design-Build for Architects. 2 Hours.
This is a 10-week course covering a more advanced examination of the design-build method of project delivery, highlighting the role of architect as leader of the design-build team. The course covers team structure; ethical issues; forming a design-build firm; project management; licensing, corporate and insurance issues; public design-build laws and bridging; as well as history, architect-as-prime contractor, architect-as-subcontractor, business issues and marketing, bonding, design-build contracts, cost estimating and OSHA, risks and legal liabilities. LEC.

ARCH 652. Architect-Client Relations. 1 Hour.
The intent of this five-week course is to provide a forum for the examination of varied aspects of the architect-client relationship. Components of this relationship will be explored both from the point of view of the practicing architect and of the project owner or client. LEC.

ARCH 653. Non-Traditional Careers in Architecture. 1 Hour.
The intent of this five-week course is to provide a forum for the examination of the wide range of career options that are open to architects. The positive impact, to both the built environment and society as a whole that architects in alternative roles are ideally suited to provide, will be explored. LEC.

ARCH 654. Ethics in Architectural Practice. 1 Hour.
This course is designed to develop an understanding of the underpinnings of ethical reasoning including the structure and vocabulary of moral argumentation; apply this knowledge to common ethical issues confounding contemporary architects, demonstrated through presentations and interaction with leading Kansas City architects, interactive analysis of case studies, participatory discussions, reading comprehension and analytical writing. LEC.

ARCH 658. Programming and Pre-Design Issues. 3 Hours.
This course will introduce the concepts, methods, techniques, and information used by the architect to establish the parameters of a project, prior to entering the formal design process. The course will introduce the student to the social, technical, leagan and economic dimensions of architectural programming,. The content will introduce the core competencies in programming, site, and environmental analysis required by the profession. Programming theory, research techniques, information analysis, evaluation of significance, and creative synthesis of the multivalent factors acting upon the pre-design process of project definition will be covered. Exercises may include programming and analysis of projects and sites assigned in the Architectural Design Studio sequence. Prerequisite: ARCH 408 and ARCH 409 or ARCH 504. LEC.

ARCH 661. Eighteenth to Twentieth Century American Landscape Design. 3 Hours.
This course will explore eighteenth, nineteenth, and twentieth-century American landscape design including gardens, estates, rural cemeteries, campuses, suburbs, urban parks, and national parks, as well as the beginnings of landscape architecture as a profession. Topics of inquiry will include European contributions in landscape theory, practice, and aesthetics, and American adaptations in response to climatic, social, and political differences. An important focus will be whether one can look at a designed landscape and see the expression of an attitude toward nature. LEC.

ARCH 662. Twentieth Century American Landscape. 3 Hours.
The purpose of this course is to investigate the relationships between the American culture and the resulting built and natural landscape. Issues of building types, public places, and land use arrangements will be studied from a socio-historical perspective. (Same as UBPL 662.) LEC.

ARCH 663. Darwin, Humboldt, and Changing Ideas in Landscape Architecture. 3 Hours.
The seminar explores the influence of the natural historians Alexander von Humboldt and Charles Darwin on American writings in landscape architecture in the late 19th and early 20th centuries. The original texts of Humboldt (including Aspects of Nature and Cosmos) and Darwin (including On the Origin of Species and Insectivorous Plants), will be studied in conjunction with significant authors in landscape architecture including A. J. Downing, George Perkins Marsh, Frederick Law Olmsted, Horace William Shaler Cleveland, Mariana Griswold van Rensselaer, Jens Jensen, Garrett Eckbo, Daniel Kiley, and James C. Rose. The emerging ideas of conservation and ecology found in these works will also be examined. LEC.

ARCH 665. History of Urban Design. 3 Hours.
An exploration of the evolution of cities through the cultural and spatial development of human settlement patterns. The role of cities in the transformations of human culture from tribal communities to post industrial
society is defined in terms of the historical origins of urban institutions and functions and their transformation into spatial structure and physical form.

ARCH 670. Spreadsheet Applications. 1 Hour.
This course will focus on the application of electronic spreadsheets in the management of project fees, company staffing, and business cash flow. Topics covered include spreadsheet linkage, creation of lookup tables, data consolidation, writing macros and charting results. LEC.

ARCH 671. Database Management. 1 Hour.
This course focuses on the development of database applications to track the information generated during the normal course of business operations. Topics include database design, table creation, queries, forms, reports, and macros. LEC.

ARCH 672. Project Management Software. 1 Hour.
This course uses software packages to manage a simulated design project. The topics in this section include creating tasks and linkages, assigning and managing resources, monitoring a project and creating reports. LEC.

ARCH 673. Presentation Tools. 1 Hour.
This course covers the use of various software packages in the development of on-screen and hard-copy presentations. Topics include presentation design, importing graphics, output strategies, and communications techniques. LEC.

ARCH 674. Electronic Communication. 1 Hour.
This course focuses on the use of electronic data communications in operating a design organization. Topics include use of the Internet, electronic research, telecommunication technologies and remote access. LEC.

ARCH 675. Graphics Packages. 1 Hour.
This course focuses on the development of graphic images. Students are taught to generate vector-based graphics and bit-mapped images that can be incorporated into various software packages. LEC.

ARCH 676. Facility Management: Tools and Techniques. 3 Hours.
The application of Information Technology to Facility Management has changed a formerly basement operation into a center of corporate support. In this course, we explore the use of Computer Aided Facility Management (CAFM) software and its application to real world facility management. LEC.

ARCH 677. Construction Cost Estimating for Architects. 1 Hour.
The main objective of this course is to introduce and inform the student of the processes involved in construction estimating. This course will focus on commercial construction and the fundamentals of estimating a commercial project. This course will acquaint the student with quantity surveying, costing methods, types of estimates, estimating software, the construction estimating process, and estimating the various parts of a project. LEC.

ARCH 678. Construction Project Management for Architects. 1 Hour.
The main objective of this course is to introduce and inform the student of the processes involved in construction project management. This course will focus on commercial construction and the fundamentals of managing a commercial project. The course will acquaint the student with transferring a project from the estimating stage to actual construction, the buyout process, contracts, purchase orders, responsibilities of project managers, responsibilities of superintendents, planning and scheduling, management of changes in a project, financial reporting, accounting processes, payment procedures, and the close-out process in construction. LEC.

ARCH 680. Building with Intelligence. 3 Hours.
This course is intended to be a broad course introducing basis concepts of sustainable design. It will introduce broad outlines of many of the crucial issues facing us in the next few decades. This course identifies how we can re-imagine the relationship between human beings and living systems. The order of the course will begin at a broad overview of our environmental dilemma, then focus upon community issues and end with a close look at green buildings and their systems. This course will include a series of lectures, required reading with written responses, visits to local examples of sustainable buildings and the development of research projects. LEC.

ARCH 681. Defining Community. 3 Hours.
This course explores how a neighborhood is sustainable, or is not. Imbedded in our built landscape are constructs, which once revealed, offer us insight into a community’s values and underlying intentions. We will engage neighborhoods in Lawrence, Kansas, and other community neighborhoods. This seminar course will provide a format for discussion and testing observations of patterns in neighborhoods. Our intent will be to describe the detailed patterns for neighborhoods, houses, and gardens, thereby increasing an understanding of how people inform and are informed by their neighborhoods. This course will include a series of lectures, required reading with written responses, visits to a variety of neighborhoods and the development of research projects. LEC.

ARCH 690. Architecture Study Abroad. 3-6 Hours.
May be repeated up to a maximum of 9 credits. Students participate in a study abroad program approved by the Architecture Chair. Students will be evaluated upon a submitted journal, sketchbook, or equivalent assignments assigned by the instructor. Graded on a satisfactory/fail basis. IND.

ARCH 691. Architecture Practicum. 6 Hours.
Based upon the student’s approved proposal, each student will explore the process of creating the built environment by working in a setting that is intended to provide a new perspective for that student. The range of venues may include non-profit organizations, research settings, hands on-building experiences, and other professional settings as approved by the instructor. Students evaluation will include an assessment by the supervisor in the practicum settings as well as on a final paper using appropriate graphics to illustrate key points. Graded on a satisfactory/fail basis. IND.

ARCH 692. Documentation. 3 Hours.
Students will document their experience in ARCH 690 or another approved study abroad program. This is intended as a critical reflection upon the student’s experience and is additional documentation produced beyond the work done for the study abroad credit. The final product will include a written paper, using appropriate graphics to illustrate key points. IND.

ARCH 693. Workplaces. 3 Hours.
This course is about the design of places where people work. The workplace is important for many reasons. Not only do we spend a considerable amount of our waking life there, but our work often becomes one of the central features of our life. In some senses it can be considered to be a homelike activity; people often identify with their work and personalize their workplaces and make them responsive to their daily life needs. Workplaces are also social places where people meet and interact. And, of course they are also places of work, where they must respond to work needs and be conducive to efficient and productive work activities. This course will raise questions about how to design good workplaces. LEC.
ARCH 694. Homeplaces. 3 Hours.
Architects design buildings and spaces which they hope will contribute to making significant, enriching, and rewarding places. The quality of places, however, is not identical to the quality of buildings which contribute to them. This course will explore ways in which physical environments, in this case, houses can become and be experienced as rich and embraced homeplaces. It will look at the various processes through which residents, dwellers, designers, real-estate agents, builders, and others are involved with home environments. Implications for design and production processes will be investigated with reference to particular case studies. LEC.

ARCH 697. The Making of Place in an Aging Society. 3 Hours.
This course explores both theoretical and applied perspectives as to how design at the scales of settlement, neighborhood, building and room enables enhanced quality of life for society’s elderly and their families. Discussion will center on readings, case studies and lecture material, with a focus on arriving at a critical understanding of how built fabric choreographs the aging experience. Prerequisite: Graduate standing or consent of instructor. LEC.

ARCH 700. Directed Readings in Architecture:. 1-3 Hours.
Individual study of special topics and problems. May be repeated for credit. Prerequisite: Graduate standing. RSH.

ARCH 701. Introduction to Graduate Studies. 3 Hours.
This course will examine issues in architectural research. It will provide an overview of graduate level studies with regard to definitions, methods, skills, and techniques. The course will consist of lectures, seminars, readings and guest presentations. The class will enable students to make informed judgments about matters of quality and quantity on architectural issues. Students will be expected to formulate sensible systems of classification for their chosen material. Students will be expected to produce papers and essays, make sample grant applications, and thesis formulations. Prerequisite: Students must be admitted to the 3.5 or 5 year Master of Architecture Professional plan and have successfully completed ARCH 409 or ARCH 608. LEC.

ARCH 706. Thesis or Project Definition. 1 Hour.
Seminar oriented to the clarification of the thesis or project problem and to the development of the thesis or project proposal. Prerequisite: Graduate standing. RSH.

ARCH 707. Furniture Design and Production. 3 Hours.
The object of this course is an intensive examination of the aesthetic problems of perceiving and making quality objects. Students will be expected to engage in a series of short-term, limited scope design exercises and experiments of an architectural nature. LEC.

ARCH 720. Architectural Acoustics. 3 Hours.
An introduction to the physics of sound. Objective and subjective evaluation and control of sound as applied to architectural spaces. Room shaping, mechanical and electrical system noise and vibration control, and electro-acoustic sound reinforcement. Prerequisite: PHSX 114 and ARCH 626 or equivalent, or consent of instructor. LEC.

ARCH 721. Electro-Acoustical Systems. 3 Hours.
A study of electro-acoustic sound reinforcement and reproduction systems for buildings. Prerequisite: PHSX 212, or consent of instructor. LEC.

ARCH 730. The Environmental Psychology of Health and Well-Being. 3 Hours.
This seminar examines the theories and understandings that address the health and well-being outcomes resulting from the complexity of interaction between human beings, their behavior, and designed systems or objects and how this varies across the life course. Environmental stimulation, orientation, control, restoration and their relationship to health outcomes through mediating concepts including stress, place identity and person-environment fit will be addressed. Students will engage in several research/assessment projects through the semester. Participation in class discussion will be an essential component of the class. Prerequisite: Graduate status or consent of the instructor. LEC.

ARCH 731. Architecture of Health. 3 Hours.
This is a seminar that will focus on the architectural dimensions of health and wellness. The course will investigate the ways the environment contributes to the well being (physical, emotional, spiritual) of people. The history of healthcare environments will be explored to show how healthcare environments have evolved to meet changing medical protocols and environmental technologies. A range of contemporary building types will be studied, from critical-care hospitals to assisted-living residences and health spas. Students will research bibliographic sources, prepare case studies of existing health and wellness environments and prepare preliminary planning and design proposals for an environment that human well being. LEC.

ARCH 732. Environmental Pattern Languages. 3 Hours.
An introduction to the theory of pattern languages with particular emphasis on the work of Christopher Alexander; analysis of its relationships to other architectural theories; exploration of its implications for architectural practice. LEC.

ARCH 733. Analogous Thinking in Design. 3 Hours.
This seminar will seek analogs in psychology, medicine, biology, anthropology, and other disciplines; analogs that can serve to develop problem-solving and problem-solving skills in design. Practice sessions in morphological analysis, synectics, bisociation, and triadization will link rigorous research to methods of application. LEC.

ARCH 735. Graduate Seminar in Environmental Systems. 3 Hours.
The intention of this seminar is to provide a substantive overview of the literature and themes in environmental systems. It will serve to introduce students to skills required to conduct research in environmental systems. In addition, the course will entail discussions of students’ works in progress, peer review sessions, and completion of a conference paper. LEC.

ARCH 754. Design Ethics. 3 Hours.
This seminar will explore both Western and Eastern concepts of ethics and morality through readings, papers, discussion, and guest speakers. The role of ethics in providing guideposts for social and societal responsibility in design will be developed. LEC.

ARCH 762. Urban Design Studies. 3 Hours.
Seminar concerned with the factors, processes, techniques, and current issues in urban design practice. LEC.

ARCH 765. Theory of Urban Design. 3 Hours.
An examination of the relationship between architecture and urban planning through contemporary interpretations of future urban form and the determinants of the location, spatial structure, growth and decline of cities. Foundations for an interdisciplinary synthesis are examined in an attempt to bridge the hiatus between large-scale architectural design and incremental adjustments to urban dynamics. LEC.

ARCH 770. Contemporary Issues Seminar I. 1 Hour.
A series of seminars on contemporary issues facing the profession. LEC.

ARCH 771. Contemporary Issues Seminar II. 1 Hour.
These seminars will consist of three to four guest lecturers each semester. All students enrolled in this course will attend the same lecture as ARCH 772. Topics will be selected to reflect major issues covered in the course work, or contemporary issues facing the profession. LEC.
ARCH 772. Contemporary Issues Seminar III. 1 Hour.
These seminars will consist of three to four guest lecturers each semester. All students enrolled in this course will attend the same lecture with ARCH 771. Topics will be selected to reflect major issues covered in the course work, or contemporary issues facing the profession. This course will be graded Satisfactory/Unsatisfactory. LEC.

ARCH 773. Financial and Economic Issues in Architecture Management. 3 Hours.
This course will focus on the fundamentals of accounting, macroeconomics and the construction industry, and concepts related to the development and implementation of a strategic business plan. LEC.

ARCH 774. Organizational Issues in Architecture Management. 3 Hours.
Topics that will be covered in this course include the organization of a professional practice, personnel management, and the development of effective communication skills. LEC.

ARCH 775. Architecture Management: Managing a CAD System. 3 Hours.
This course covers the various procedures involved in managing a CAD system within a design organization. It also explores the different applications and uses of current CAD technology. Topics to be addressed include: selecting a system; billing CAD services; support services and personnel; marketing CAD: customization, file management, menus and script files; AutoLisp Programming; and integrating CAD with other programs. Prerequisite: An introductory CAD class or permission of the instructor. LEC.

ARCH 776. Project Delivery in Architecture Management. 3 Hours.
Conventional methods for project delivery will be reviewed along with design/build, fast-track, and other techniques. The relationship of the architect and development will also be explored, as will the relationship of project development to urban design concepts. LEC.

ARCH 777. Marketing Architectural Services. 3 Hours.
The emphasis of this course will be on the development and implementation of a marketing plan, techniques related to the marketing of specific projects, and the relationship of marketing to other components of a firm. LEC.

ARCH 778. Legal Issues in Architecture Management. 3 Hours.
A course designed to familiarize the student with legal considerations related to professional practice. Case studies and selected readings will serve as the basis for discussion of registration, contracts, business formation, taxes, employment practices, copyright, and patent law. In addition, the course will draw upon the knowledge and experience of members of the professional community. LEC.

ARCH 790. Architectural Study Abroad: ____. 1-3 Hours.
Organized field visits and study of selected architectural and urban sites abroad. Pre- and post-travel readings on themes selected to supplement and reinforce thesis or project research or areas of concentration. Students will be expected to maintain a diary and/or sketch book and submit a final paper. Prerequisite: Graduate standing and permission of instructor. FLD.

ARCH 799. Independent Study. 1-3 Hours.
May be repeated for credit up to a total of nine (9) credits. Prerequisite: Graduate standing and consent of instructor. IND.

ARCH 800. Special Topics in Architecture: ____. 1-3 Hours.
Advanced or experimental courses on specialized topics representing unique or changing needs and resources in the graduate program in architecture. LEC.

ARCH 801. Urban and Community Issues I. 6 Hours.
A workshop-based course involving approved self and group directed investigations into issues of urban and community design with a focus on problem-setting, discovery and analysis. Prerequisite: Successful completion of ARCH 609 and consent of the Architecture Program Chair. LAB.

ARCH 802. Urban and Community Issues II. 6 Hours.
Continuation of the critical and rigorous investigations into issues of urban and community design with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 801. LAB.

ARCH 803. Design-Build and Materiality I. 6 Hours.
A workshop-based course involving approved self and group directed investigations into issues of design-build and/or materiality with a focus on problem-setting, discovery and analysis. Prerequisite: Successful completion of ARCH 609 or ARCH 704 and consent of the Architecture Program Chair. LAB.

ARCH 804. Design-Build and Materiality II. 6 Hours.
Continuation of the critical and rigorous investigations into issues of design-build and/or materiality with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 803. LAB.

ARCH 805. Architectural Technology I. 6 Hours.
A workshop-based course involving approved self and group directed investigations into issues of building technology with a focus on problem-setting, discovery and analysis. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Successful completion of ARCH 609 and consent of the Architecture Program Chair. LAB.

ARCH 806. Architectural Technology II. 6 Hours.
Continuation of the critical and rigorous investigations into issues of building technology with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 805. LAB.

ARCH 807. Healthy and Sustainable Environments I. 6 Hours.
A workshop-based course involving approved self and group directed investigations into healthy and sustainable environments with a focus on problem-setting, discovery and analysis. Prerequisite: Successful completion of ARCH 609 and consent of the Architecture Program Chair. LAB.

ARCH 808. Healthy and Sustainable Environments II. 6 Hours.
Continuation of the critical and rigorous investigations into healthy and sustainable environments with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 807. LAB.

ARCH 809. Building Typology I. 6 Hours.
A workshop-based course involving approved self and group directed investigations into a particular building type with a focus on problem-setting, discovery and analysis. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Successful completion of ARCH 609 and consent of the Architecture Program Chair. LAB.

ARCH 810. Building Typology II. 6 Hours.
Continuation of the critical and rigorous investigations into a particular building type with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 809. LEC.

ARCH 811. Architectural Investigation I. 6 Hours.
A workshop-based course involving approved self and group directed investigations in a particular area of architectural investigation with a focus on problem-setting, discovery and analysis. Prerequisite: Successful completion of ARCH 609 and consent of the Architecture Program Chair. LAB.
ARCH 812. Architectural Investigation II. 6 Hours.
Continuation of the critical and rigorous investigations in a particular area of architectural investigation with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 811. LAB.

ARCH 830. Designing Healthy Places and Communities. 3 Hours.
This seminar investigates the research-based evidence regarding health outcomes at four different levels of dwelling: settlement, institution, home, and proximate. Research domains that will be explored include how the urban fabric impacts active living; the role of public parks in urban health; environmental factors on health outcomes in hospitals and workplaces; environmental pathogens in the home; and ergonomic health. Healthy design will be understood as an important variable impacting people’s health by: increasing physical activity; reducing injury; improving air and water quality; minimizing environmental degradation; decreasing mental health stresses; and strengthening social fabric. Environmental assessment audits appropriate at various scales as well as space syntax as an analytic tool will be introduced and utilized. Participation in class discussion will be an essential component of the class. The semester will include a problem-based service-learning project requiring application of research in a real-life setting and active student reflection. Prerequisite: Graduate status or consent of the instructor. LEC.

ARCH 850. Special Topics in Management/Practice: ______. 2-3 Hours.
Advanced or experimental courses on specialized topics representing unique or changing needs and resources in the management/practice option. IND.

ARCH 852. Ethics and Leadership in Professional Practice. 3 Hours.
This course takes the perspective that architectural design is inherently an ethical act. Through this lens, students will learn the essentials of office practices, the many definitions of client and their roles in the design process, the legal responsibilities of the profession, the importance of continuous professional development and the obligation the profession has to provide civic leadership in regard to the built and natural environment. LEC.

ARCH 858. Architectural Management Systems. 3 Hours.
Graduate course that investigates current issues in construction technologies and management techniques. LEC.

ARCH 899. Thesis or Project Research. 1-6 Hours.
Independent study, research and project work leading to the submission of a master’s thesis or master’s project. May be repeated for credit. Note: In some cases a Comprehensive Oral Examination Option may be substituted. Prerequisite: Permission of the Architecture Program Chair. THE.

ARCH 930. Doctoral Seminar I. 1 Hour.
The purpose of this discussion-based seminar is to explore issues of architectural research from a variety of perspectives. May be repeated up to a maximum of two (2 credits). Prerequisite: Admission to the Ph.D. in Architecture Program or consent of the Architecture Program Chair. LEC.

ARCH 931. Theories of Architectural Inquiry. 3 Hours.
This course will introduce the doctoral student to the major historical and theoretical foundations of architectural research. Architectural inquiry will be defined from diverse and distinct perspectives, and it will be assumed that buildings should be viewed as physical and cultural artifacts, as elements within larger social, natural and urban contexts, and as products of design and fabrication processes. The course will be a seminar format in which students will contribute to the discussions through independent research and critical analyses of the assigned readings and lectures. Prerequisite: Admission to the Ph.D. in Architecture Program or consent of the Architecture Program Chair. LEC.

ARCH 951. Methods of Inquiry in Architectural Research. 3 Hours.
This course will provide students a foundation in methods of inquiry in researching the built environment. The purpose is to train students in developing research strategies applicable to the areas of design-fabrication processes, dwelling and community, and health and sustainability. Students will be exposed to a variety of methods of inquiry drawn from a number of disciplines. Through critical reading and content analysis, students will consider the value of scholarly research, learn to develop research questions, understand the nature of evidence, and the writing, presentation and illustration of scholarship. The course will be a seminar format in which students will contribute to the discussions through independent research and critical analyses of the assigned readings and lectures. Prerequisite: Admission to the Ph.D. in Architecture Program or consent of the Architecture Program Chair. LEC.

ARCH 958. Research Practicum Preparation. 1 Hour.
In this course, the students will frame a research question and develop a research proposal. The course is intended to serve as preparation for ARCH 959. Prerequisite: ARCH 931 and ARCH 951. RSH.

ARCH 959. Research Practicum. 4 Hours.
This is a research project undertaken and completed under the supervision of the student’s major professor. The student designs, executes, and completes a small scale research project and produces a document of publishable quality within his/her area of inquiry. The project is intended to serve as a pilot study leading towards the dissertation. Prerequisite: ARCH 958. RSH.

ARCH 999. Doctoral Dissertation. 1-9 Hours.
Individual research work. A minimum of nine credits is required for the degree. May be repeated for credit. Prerequisite: Successful completion of the Comprehensive Oral Examination. THE.

Design Courses

ADS 320. Hallmark Symposium Series. 1 Hour.
Visiting professionals discuss various aspects of Design based upon their own special areas of expertise. The series is mandatory for all Design majors. Design majors must repeat this course at least 4 times for a total of 4 credit hours for graduation. Graded on a satisfactory/unsatisfactory basis. Open to all University wide students. LEC.

ADS 340. History and Philosophy of Design. 3 Hours.
Survey of design history from 1800 to present with emphasis on graphics, architecture, industrial and interior design movements, individuals and their influences. Prerequisite: BDS 102. LEC.

ADS 530. Intra Design Problems: ______. 3 Hours.
A collaborative studio across all Design Department areas of study. Students of the different areas will be organized into work groups and conduct in-depth research, investigate new problem solving methodologies, develop new applications and working knowledge of specialized subjects. Prerequisite: Junior level or higher standing in Design or Architecture or permission of the instructor. LAB.

ADS 531. Internship. 3 Hours.
Students develop professional skills and problems solving with an applied and relevant design employer’s office. Supervision by faculty and a professional designer, designated and approved by the faculty in the area is mandatory. Graded on a Satisfactory/Unsatisfactory basis. May be repeated twice for credit. Prerequisite: Junior level or higher standing in the Design Department. FLD.

ADS 532. Study Abroad: ______. 3 Hours.
Students will participate in a Design focused study abroad program. The student will be required to attend group meetings prior to the trip along with development of research topics of interest. Simple documentation
would be required - sketchbook/journal responding to day-to-day
iterative and other events, following the trip and presented for a grade.
Prerequisite: Junior level or higher standing in Design or with permission
of the instructor. Corequisite: ADS 533. LAB.

**ADS 533. Study Abroad Documentation. 3 Hours.**
Consists of research work prior to the trip as well as follow-up and
required studio work due after return. A portfolio of work will be required
for a grade. Course will also fulfill Design-specific requirements or studio
credits for other majors. Areas may designate specific Design courses as
substitutions for this course. Prerequisite: Junior level or higher standing
in Design or with permission of the instructor. Corequisite: ADS 532. LEC.

**ADS 560. Topics in Design: _____, 3 Hours.**
A study of different topics in different semesters in a special area of
interest to a staff member and suitable qualified students. May be
repeated for credit. Prerequisite: Junior standing in department or
permission of instructor. LAB.

**ADS 570. Design Seminar. 3 Hours.**
Comprehensive examination of a complex design problem from the point
of view of the various specializations. Prerequisite: Junior standing in
department. LEC.

**ADS 580. Special Problems in Design. 1-6 Hours.**
A study of current problems in design or crafts with an emphasis on
research. Special problems proposals must be discussed with and
approved by the instructor and advisor prior to enrollment in the course.
A student may not take more than six credit hours of special problems in
any one semester. Prerequisite: Junior standing in department. IND.

**ADS 710. Advanced Human Factors in Interaction Design. 3 Hours.**
The study of human factors principles and guidelines are fundamental
to interaction design. In this course, these principles will be illustrated
and applied to real-world design projects/problems. Human physical
and cognitive capabilities, computer-human interface and systems
properties, interaction design methods, and the physical and socio-cultural
environment will be considered. Fundamental issues in human-centered
systems, basic research methods, including statistics and literature
searches, will be included. Open to all university students. Graduate
students will meet concurrently with INDD 510 and receive additional
coursework. LEC.

**ADS 712. Design Strategies and Methods. 3 Hours.**
This course will cover the principles of design thinking, design processes,
design strategies and methods, including techniques and tools for the
development of human-technology interfaces. Abstract through concrete
representation methods and techniques will be applied to interaction
design projects/problems. Information collection and analysis methods,
scenario and prototyping methods, evaluation methods (empirical),
creativity methods, and task-oriented method (non-empirical) will also be
considered. Methods common to design-related disciplines in the social
sciences, business, architecture, communication studies and engineering
are integrated. Graduate students will meet concurrently with INDD 512
and receive additional work. Prerequisite: Consent of instructor for all non-
design students. LEC.

**ADS 714. Designing Business Services and Consumer Experiences. 3 Hours.**
Business products, services and environments are often intermingled
in ways that require more holistic ways of thinking and development. A
challenge of service innovation is to design with an understanding of the
many dimensions of human experience and satisfaction. This course
elaborates how, where, when, and why design can enhance the value
of business services. Theory, methods, and practice aspects of services
design are presented. LEC.

**ADS 720. Graduate Seminar in Design. 1 Hour.**
Comparative studies of various areas of specialization in design. Repeat
for credit to a maximum of six credit hours. LEC.

**ADS 730. Directed Reading in Design. 1-3 Hours.**
Research reading and presentation of reports on specific subjects related
to the students major area of specialization. Required of all graduate
students. RSH.

**ADS 740. Special Problems in Design. 1-6 Hours.**
An in-depth study of current problems in design or crafts with an emphasis
on research. Special problems proposals must be discussed with and
approved by the instructor and graduate advisor prior to enrollment in the
course. RSH.

**ADS 745. Branding and Design. 3 Hours.**
A rapidly changing marketplace demands business strategy that is
rooted in the dynamics of human culture, society, and psychology.
Design thinking directly engages such factors and is, thus, well suited
to help organizations formulate effective, versatile and strategic brands.
This class focuses on strategic design analysis as a means to promote
innovation in core brand development and extension into new applications
and product categories. By aligning design with engineering, marketing,
advertising, packaging, and service, business can innovate new
sources of market value and deliver a more powerful brand messages.
Prerequisite: Consent of instructor for all non-design students. LEC.

**ADS 750. Design Management. 3 Hours.**
Design Management has been described as "applied innovation" or
the methodical capturing of talent and resources available inside and
outside an organization to create valuable new offerings, brands, and
business models. This course explores the design functions in business
as a means to solve difficult challenges and develop new market-facing
opportunities. Subjects include brand value creation, differentiation,
coordination, and transformation. Numerous cases will be discussed.
LEC.

**ADS 751. Creating Design Scenarios and Simulations. 3 Hours.**
Most organizations are imaginatively challenged and experience difficulty
innovating and marketing new concept offerings. Conventional methods
spotting and validating new opportunities often lack the persuasive power
necessary for change to occur. Scenario-based design and simulation
offers ways to vividly representing a future that is different from the past.
This course presents theory, methods and practice aspects of design
scenario construction and simulation. LEC.

**ADS 760. Design and Strategic Innovation. 3 Hours.**
As companies struggle with the demands of increasing consumer, intense
competition and downward price pressures, there is a corresponding
increase in the demand for more innovative business models and higher-
value offerings. These forces have significantly broadened the strategic
scope of design. Advanced, multi-disciplinary design teams are being
engaged early to help guide new business and product development
efforts. Why, where, when, and how this is done in order to deliver on the
promise of innovation is the subject of this course. Prerequisite: ADS 750
or with consent of instructor. LEC.

**ADS 765. Interaction Design. 3 Hours.**
Interaction Design is about creating products, services or environments
that offer significant experiential value to people and economic value to
organizations. This course engages the comprehensive subject of design
for human experience. Building on the gamut of human factors and design
methods knowledge, this offers hands-on experience in the research,
analysis, modeling and simulation of original and experientially compelling
design solutions. Prerequisite: ADS 710, ADS 712 or with consent of
instructor. LEC.
ADS 770. Design Cognition. 3 Hours.
In a science of design, the study of "human designers" is as important as the study of designed artifacts or design tools. Since the beginning of research in Design Cognition, many empirical studies have opened up our understanding of human designers and the ways they design. While design is largely a mental activity, it interacts strongly with heterogeneous external representations. It encompasses problem definition and solving, analogical reasoning, mental imaging, and other mental processes. It requires team coordination and is situated in a cultural milieu that defines roles and modes of behavior. As such, distributed cognition, situated cognition, and social cognition - all have become relevant to the understanding of design cognition. The structure of a design task, the mental representation of design form and behavior, the structure of design teams, and the associated concepts of design cognition will be the subject of the course. LEC.

ADS 810. Orientation Seminar. 1 Hour.
Studies directed to development of a thesis plan. Required of all graduate students. Offered in fall semester only. Graded S or F. LEC.

ADS 850. Studio Teaching Practice. 1 Hour.
Graduate students only. Must hold an assistant instructor or teaching appointment. Credit earned does not satisfy any credit requirement for a degree. Graded S or U. FLD.

ADS 860. Graduate Synthesis and Applications Seminar. 1 Hour.
Group discussion and presentations on timely industry topics. Topics will be substantial, bridging relevant program subjects and professional area boundaries. May be repeated for up to six credit hours in subsequent semesters. LEC.

ADS 861. Thesis Research Seminar. 1 Hour.
Approaches to producing original design research. Methods, resources, topics and projects are discussed and evaluated. May be repeated for up to six credit hours in subsequent semesters. LEC.

ADS 890. Thesis. 1-8 Hours.
For guidance refer to Design department graduate guidelines. THE.

BDS 100. Design Dialogues. 3 Hours.
Design, like almost every industry, profession, school or major on campus, is forever being changed by technology, it’s reach, global access, and social innovation. From the basics of how to think like a designer or how to design a better presentation in PowerPoint to how design can be situated in businesses and organizations to create innovative new products, services or social change. The ultimate goal is that by the end of this course students will know how design contributes to contemporary society and how they might use this understanding throughout their life in little and big ways. Open to all majors. Corequisite: BDS 102 (for Design majors only). LEC.

BDS 101. Design Thinking and Making I. 3 Hours.
This is a course for all Design Department majors, to introduce them to creative problem solving; and the fundamentals of two, three and four-dimensional design. Drawing, photography, 2D and 3D models are used in this course as a means of design thinking to visually represent problems and solutions. Students must receive at least a grade of C- (1.7) in this course to continue in the Design program. Prerequisite: Must be admitted into the Design Department or receive instructor permission. Corequisite: BDS 103. LAB.

BDS 102. Design Thinking and Making II. 3 Hours.
This is a course for all Design Department majors and serves as a continuation of BDS 101 with a greater emphasis on examining the relationships between design and other systems: environment, society and culture, and technology and economics. One and a half hours of lecture and six hours of studio-lab per week. Students must receive at least a grade of C- (1.7) in this course to continue in their Design program. Prerequisite: Must be admitted into the Design Department and have completed BDS 101 and BDS 103 with at least a grade of C- (1.7) or equivalent course work, or receive instructor permission. LAB.

BDS 103. Drawing for Design. 3 Hours.
This course will focus on drawing as a tool of communication through freehand exercises that explore observation and perception, form and proportion, dimensional illusion and expressive characteristics using a variety of materials and media. Some identified sections of this course will also use two-and three-dimensional modeling software. Students must receive at least a grade of C- (1.7) in this course to continue in their Design program. Prerequisite: Must be admitted into the Design Department or receive instructor permission. Corequisite: BDS 101. LAB.

ENVD 200. Fundamentals of Environmental Design. 3 Hours.
Introduction to fundamentals and processes involved in developing design concepts in the unit scale interior environment that may include residential or small scale commercial spaces. The studio focuses on developing design vocabulary, graphic representations, space planning, furniture and furnishings. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102 and ENVD 202. Corequisite: ENVD 203. Prerequisite or corequisite: ENVD 212. or permission of instructor. LAB.

ENVD 203. Materials and Sustainability. 3 Hours.
Study and analyze building materials, furniture and furnishings through investigation into their physical and technical characteristics, limitations, and applications. The course also introduces the sustainability issues that relate to the selections and specifications that impact the environment, energy use and limited resources. It covers various agencies and organizations that develop guidelines on materials, resources, building practices, processes and systems that support sustainable design. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102 and ENVD 202. Corequisite: ENVD 200 or permission of the instructor. LAB.

ENVD 204. Fundamentals of Interior Design. 3 Hours.
This first interior design studio will introduce the principles and elements of interior design, including design composition, space planning, furniture layout, color, and finish materials. It will also provide the direction and opportunity for the student to apply basic design and drawing skills developed in the Foundation courses to meet project program requirements in a series of projects of increasing complexity. Students will be expected to produce process diagrams, plans, elevations, models and finish boards. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102 and BDS 103 or permission of instructor. Corequisite: ENVD 212. or permission of instructor. LAB.

ENVD 212. Drawing for Environmental Design. 3 Hours.
Introduction to visualization tools in applications to interior environments using freehand sketching and computer aided design. The class focuses on vocabulary and theories of different drawing systems and develops external representations. It encompasses problem definition and solving, analogical reasoning, mental imaging, and other mental processes.
the next course in the sequence. Prerequisite: BDS 102 and BDS 103 or permission of instructor. LAB.

ENVD 304. Environmental Topics. 3 Hours.
This studio focuses on topics that relate to specific environments that may include retailing, hospitality, health care, restaurants, or work space strategies in offices. Students conduct research, explore ideas and generate concepts at a more complex scale level. Emphasis will be placed on understanding of users’ operational needs, company brand or image, adjacencies, spatial analyses, understanding of material and their applications, environmental factors, codes and regulations that impact the planning and selections. Related issues include lighting, furniture systems analysis and their applications, and custom casework design. Depending on availability, studio may work with other studio in Architecture or other discipline within the department on joint projects. This class may be repeated for credit. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ENVD 200 or permission of instructor. LAB.

ENVD 305. Research and Programming. 3 Hours.
Examining and analyzing essential information necessary to determine the clients’ present and future operational requirements and the space, facilities, and services required for support. Establishing pre-planning concepts and guidelines on building and space utilization. Effort is directed toward developing space into a functional, flexible, and aesthetic environment in which to work. Study includes the use of questionnaires, organization charts, space study and standards, space projections, space tabulations, and space distribution using interaction, blocking, and layering diagrams. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ENVD 200, ENVD 304 and MATH 101 or permission of instructor. LAB.

ENVD 408. Integrated Senior Problems I. 3 Hours.
This class provides individual students with the opportunity to develop a project of choice based on the individual’s interest and design philosophy and incorporates the skills acquired from the integrated curriculum. Students will conduct initial research and data collection to develop a program that includes the schematic and preliminary design development. Projects may include corporate offices, retailing, health care, hospitality and restaurants, exhibitions, residential design, or specialty interior products. Effort will focus on the investigation of a component within a large or complex project. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ENVD 304 and ENVD 305. LAB.

ENVD 410. Integrated Senior Problems II and Specification. 3 Hours.
A continuation of ENVD 408 that focuses on further design development leading to final design solutions and explores in detail the design of the total environment. The use of materials and their limitations, sustainability, environmental factors, technology, graphics and signage, custom design casework and interior products, applicable codes and standards, budget, and construction document production are all part of the investigations. Final results may include a set of drawings, working drawings, detail drawings, 4D models and/or multi-media presentations. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ENVD 408. LAB.

ENVD 413. Portfolio and Professional Practice. 3 Hours.
There are two different components to this class. The first is to develop the student’s graduating portfolio that relates to the individual’s professional practice of a design office including office personnel and organization, scheduling, fee structures, contracts, billing, marketing and professional ethics. The course will include lectures, guest speakers, and field trips. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ENVD 304 and ENVD 305. LAB.

ENVD 715. Interior Design. 2-6 Hours.
Individual research. Prerequisite: INTD 606 or equivalent. RSH.

ENVD 815. Interior Design. 2-6 Hours.
Continuation of INTD 715. RSH.

ILLU 205. Drawing Media for Illustration. 3 Hours.
Exploration of problems in drawing for various reproduction processes. Emphasis on perspective, head drawing, the clothed and nude figure, nature illustration, perspective, and environments. Various drawing media and materials are explored. Required for Illustration majors as a pre-review course. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 101 or permission of instructor. LAB.

ILLU 305. Image Making. 3 Hours.
Concentrated study in developing methodologies for producing contemporary illustration. Emphasis is placed on concept development, composition exploration, value and color studies, and reference creation. Required for Illustration majors as a pre-review course. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102. LAB.

ILLU 315. Introduction to Illustration. 3 Hours.
Concentrated study in developing skills and techniques with media and materials that are employed in producing contemporary illustration. Continued emphasis on methods of research and idea generation. For majors only. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C+ (2.3) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 305 and/or permission of instructor. Corequisite: ILLU 405. LAB.

ILLU 405. Drawing Media for Illustration II. 3 Hours.
Students will explore various drawing and painting media to continue developing their mastery of representational imagery for illustration. Reference collecting, model making, and the creating of photographic reference material will be addressed. Emphasis on mark making, value and color relationships, and placing the figure in an environment is also covered. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C+ (2.3) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 205 or permission of instructor. Corequisite: ILLU 315 or permission of instructor. LAB.

ILLU 410. Fundamentals of Animation. 4 Hours.
Concentrated study in developing skills and techniques with digital media and materials employed in producing basic contemporary animation. Development of concept, script, storyboard, and use of audio, music and sound effects are part of this animation experience. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 315 and ILLU 405 and/or permission of instructor. Corequisite: ILLU 415. LAB.
ILLU 415. Illustration Concepts. 3 Hours.
Focus of this course is to learn how to think visually. Concentrated study on developing different forms of concepts for illustration. Continued development of technical skills and visual literacy to gain insight on how to make images that communicate unique ideas clearly. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 305 and ILLU 315. Corequisite: ILLU 410. LAB.

ILLU 425. Concept Art. 3 Hours.
Introductory exploration of the process, skills and concepts necessary for successful concept art character design and effective blending of matte painting and film. Drawing will be of primary concern for this course, yet exploring digital means of character development will also be introduced. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 410 and ILLU 415 and/or permission of instructor. Corequisite: ILLU 435. LAB.

ILLU 435. Sequential and Narrative Illustration. 4 Hours.
Exploration of thematic illustration through the development of a series of images based on a topic or story. Aspects of continuity, consistency, storytelling, pacing, editing, packaging and a holistic method of developing illustration are addressed. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 415 and ILLU 410. Corequisite: ILLU 425. LAB.

ILLU 445. Advanced Concept Art. 3 Hours.
Continuation in exploration of the process, skills and concepts for successful concept art character design, along with continued development of digital characters and 3D modeling. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 425 and ILLU 435 and/or permission of instructor. LAB.

ILLU 510. Animation. 3 Hours.
Continued development of concepts, scripts, storyboards, and use of audio, music and sound effects in the production of a one to three minute animated film. Prerequisite: ILLU 410 or permission of instructor. LAB.

ILLU 535. Promotion and Marketing for Illustration. 4 Hours.
Focus will be on preparation for entering the profession. Development and completion of a self-promotion and marketing package will supplement and support the senior portfolio. Contemporary business practices and legal issues will be addressed. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 410 and/or permission of instructor. LAB.

ILLU 703. Illustration. 3-6 Hours.
LAB.

ILLU 825. Illustration. 2-6 Hours.
Individual research. RSH.

INDD 212. Drawing for Industrial Design. 3 Hours.
This course will focus on drawing as a tool of communication through a variety of exercises that explore observation and perception, form and proportion, dimensional illusion and expressive characteristics using a variety of materials and media. This course will also use two- and three-dimensional modeling software necessary for all Industrial Designers. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 101 and BDS 103. Corequisite: BDS 102. LAB.

INDD 284. Basic Industrial Design Studio. 3 Hours.
Course introduces tools, techniques and processes used in the professional practice of Industrial Design. Learning is through a series of short, focused projects. Techniques in drawing, computer modeling, physical modeling, and presentation are demonstrated and developed. Strategies to improve creativity are explored, while addressing market and production considerations. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102 and INDD 212. LAB.

INDD 302. Intermediate Industrial Design Studio. 3 Hours.
Course introduces tools, techniques and processes used in the professional practice of Industrial Design. Learning is through a series of short, focused projects. Techniques in drawing, computer modeling, physical modeling, and presentation are demonstrated and developed. Strategies to improve creativity are explored, while addressing market and production considerations. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: INDD 284. LAB.

INDD 378. Problems in Industrial Design: ______. 3 Hours.
Individual and/or group research projects in one of several specific design areas which will be identified on a semester by semester basis. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. May be repeated for credit. Prerequisite: Eligibility for INDD 302 or permission of instructor. LAB.

INDD 446. Advanced Industrial Design Studio. 3 Hours.
Continuation of INDD 284 and 302 but encompassing design problems of greater complexity including group research and problem solving assignments in advanced product and service design. Advanced techniques in problem solving, concept communication, visualization, and overall design expression will be demonstrated and explored. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: INDD 302. LAB.

INDD 448. Professional Industrial Design Studio Practices. 3 Hours.
Continuation of Industrial Design studios, projects are longer requiring a high level of demonstrated design ability for successful completion. Issues regarding professional ethics, accountability, and responsibility to public and client are discussed and implemented. Professional design, presentation, and visualization skills will be demonstrated and explored. Finished designs will include full production technical specifications. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: INDD 446. LAB.

INDD 508. Materials and Processes. 3 Hours.
A study of modern materials, manufacturing processes, and construction methods applicable to the fields of industrial design and interior design. Design analysis of existing products, furniture, building components, and storage systems. Design assignments in furniture, storage systems, and interior space arrangements with emphasis on materials and construction. Field trips to area manufacturing and design facilities. Prerequisite: Permission of instructor. LEC.
INDD 510. Human Factors in Design. 3 Hours.
Introduction to the field of human factors (ergonomics) appropriate to industrial, interior, and visual design. Human capabilities, human-machine interfaces and system properties, and the environment are considered, a micro-computer laboratory is integrated into the course. Open to all university students. Prerequisite: Consent of instructor for non-art and non-design majors. Corequisite: BDS 102. LEC.

INDD 512. Methods in Design. 3 Hours.
Introduction to the study of methods of designing common to industrial, interior, and visual design. Evaluation methods (semantic differential), creativity methods (scenario writing), and task-oriented method: (PERT/CPM) will be considered in relation to design problems. Open to non-design students. Prerequisite and/or Corequisite: INDD 302 for industrial design majors or ENVD 200 for environmental design majors respectively. Consent of instructor for all other students. LEC.

INDD 555. Portfolio. 3 Hours.
Work directed toward maximizing the quality and effectiveness of the individual student's professional portfolio. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite or Corequisite: INDD 448. LEC.

INDD 580. Senior Industrial Design Studio. 3 Hours.
Course requires the accomplishment of a comprehensive, independent research, design, and development project appropriate to the field of industrial design, the depth and complexity of which are commensurate with expectations for entry-level professionals. The nature and scope of the project, as well as details of anticipated accomplishment must be outlined by the student and approved by the instructor prior to the beginning of the second week of classes. This course requires completion of all research and basic problem solving. In INDD 581 students will complete their projects and present their final thesis. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Both fall and spring enrollment required. Prerequisite: INDD 448. LAB.

INDD 581. Senior Industrial Design Studio II. 3 Hours.
This course is the counterpart to INDD 580. This course focuses on the preliminary design phases of the project, final design development and refinement, detail technical specifications, renderings, physical and computer modeling, and a written documented report of the project. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Both fall and spring enrollment required. Prerequisite: INDD 580. LAB.

INDD 715. Industrial Design. 2-6 Hours.
Research-oriented advanced study in industrial design. Prerequisite: Graduate major in industrial design or consent of instructor. RSH.

INDD 815. Industrial Design. 2-6 Hours.
Prerequisite: INDD 715. RSH.

PHMD 101. Fundamentals of Photography. 3 Hours. GE3H.
Open to students of all disciplines and experience levels, this course provides an introduction to the medium and language of photography. Basic camera operation, workflow, and digital/analog printing methods are explored, accompanied by lectures, readings, and discussions regarding the historical and theoretical concerns of the medium. A digital camera with full manual controls is required - RAW capable preferred. Open to students of all disciplines and experience levels. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. LAB.

PHMD 201. Photography I. 4 Hours.
The first of the two-part foundational Photography sequence, this majors-only course provides students with a rigorous immersion into the formal, technical, and conceptual concerns and challenges of photography by way of the view camera. Embracing both the wet and digital darkrooms, students shoot and develop sheet film that is then utilized to produce both traditional and digital prints. Intermediate digital editing methods are introduced and explored. View cameras are provided. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 101, BDS 102, and permission of instructor. LAB.

PHMD 202. Photography II. 4 Hours.
The second of the two-part foundational Photography sequence, this advanced course builds upon PHMD 201 with additional emphasis on color, RAW workflow, and advanced methods for digital capture, manipulation, editing, and compositing. Additionally, students work extensively with large-format inkjet printers to create custom ICC printing profiles. A digital SLR (RAW capable) camera with full manual controls is required. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 201 and permission of instructor. LAB.

PHMD 210. Understanding Photographs. 3 Hours.
Understanding Photographs is a lecture-based course that focuses on developing a critical understanding of how images, paired with culture and society, generate meaning in both the historical and contemporary contexts. Open to students of all disciplines and experience level. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. LEC.

PHMD 301. Lighting Studio. 3 Hours.
Lighting Studio is a fundamental course in awareness, modification, and control of light. Students work extensively with strobe and continuous light sources. Principles of natural and artificial light are introduced, explored, and applied through hands on assignments both in and out of the studio environment. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 202 or permission of instructor. LAB.

PHMD 302. The Moving Image. 3 Hours.
This course serves as an introduction to the principles and challenges of photography as a time-based medium. Fundamental concepts of production are introduced and explored through hands-on exercises, class presentations and discussions, lectures, critiques, and individual and group projects. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 202 or permission of instructor. LAB.

PHMD 315. Experimental Processes. 3 Hours.
Experimental Processes is an introduction to the understanding and production of image-based works utilizing experimental approaches and alternative processes in an interdisciplinary environment. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 202 or permission of instructor. LAB.
PHMD 402. Photo Media Seminar. 3 Hours.
This upper-level seminar is focused primarily on the development of independent and collaborative projects through on-going group critique with an emphasis on research and analysis. Learning is focused on personal development and other issues relevant to contemporary photographic practice through assigned readings, presentations, and group discussion. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. May be repeated for credit. Prerequisite: PHMD 202 or instructor permission. LAB.

PHMD 500. Portfolio. 3 Hours. AE61.
Taken the final semester of study, this course guides students through the research, preparation, and refinement of a final portfolio and appropriate supplemental materials. Methods and strategies of presentation and dissemination are discussed and explored. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 402 or instructor permission. LAB.

PHMD 501. Advanced Lighting Studio. 3 Hours.
A continuation of the skills and principles discussed in PHMD 301. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 301. LAB.

PHMD 502. Advanced Moving Image. 3 Hours.
A continuation of the skills and principles discussed in PHMD 302. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 302. LAB.

PHMD 515. Advanced Experimental Processes. 3 Hours.
A continuation of the skills and principles covered in PHMD 315. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 315. LAB.

PHMD 560. Special Topics in Photo Media: _____. 3 Hours.
Special topics courses in Photo Media vary by instructor and provide additional opportunities for interdisciplinary research and advanced special education. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. May be repeated for credit. Prerequisite: PHMD 202 or permission of instructor. LAB.

VISC 177. First Year Seminar:. 3 Hours.
Graphic design is everywhere, on everything we see, touching everything we do, on everything we buy. Graphic design is a popular art and a practical art, an applied art and an ancient art. Simply put, it is the art of visualizing ideas and it is a way of thinking. In this class we will explore principles of Graphic Design: how to identify them, how to be more savvy consumers of them and how to use them for good and not for evil. You will learn to look at your visual environment with designer’s eyes to discern "good design" from "bad design", while putting powerful design principles into practice in your own careers, communities and classrooms. LEC.

VISC 201. Visual Communication Design. 3 Hours.
Presentation of fundamental concepts of visual and non-visual communication. Exploration of various theories of visual perception and visual communication with emphasis on reading visual images for meaning and making meaning through the construction of visual images and typography. A special laboratory section will include design thinking and making strategies and processes which are common to visual communication design from the handmade to the computer. This course is for non-Visual Communication majors. Prerequisite and/or Corequisite: BDS 102. LAB.

VISC 202. Elements of Typography. 3 Hours.
Introduces the discipline, function, and tradition of typography as it relates to visual/verbal communication. Emphasis is on interrelationships of letter, word, line and page. Projects examine two-dimensional typographic space, sequence and information hierarchy. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102. Corequisite: VISC 204. LAB.

VISC 204. Principles of Visual Communication. 3 Hours.
Visual communication problems involving the student in the translation of verbal concepts and design theory into visual images. This course focuses on the process of defining problems, gathering information, and formulating clear, powerful, and persuasive visual statements. Introduction to methods of research, idea generation, and image making will be an integral part of this course. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102. Corequisite: VISC 202. LAB.

VISC 302. Typographic Systems. 3 Hours.
Further exploration of typographic form and manipulation of variables which affect content; stresses the importance of typographic composition as an integral component of visual communication design. Projects examine advanced structures of typographic space, work-image structure, and typographic details and aesthetic. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 202, VISC 204, and permission of instructor. Corequisite: VISC 304. LAB.

VISC 304. Designing Understanding. 3 Hours.
Exploration of the relationships among people, places, and the visual objects and information they use. Attention on the different roles of the designer as observer, empathizer, communicator and experience builder. Introduction to information design processes and procedures of understanding by ordering data into useful and persuasive information tools and experiences. Various methodologies will be explored for visualizing information for clarity, resonance, and editorial voice with special attention to the relationships among audience and context in the creation of meaning. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 202, VISC 204, and permission of instructor. Corequisite: VISC 302. LAB.

VISC 310. Letterpress. 3 Hours.
This course concentrates on the traditional methods of hand typesetting, using the Department of Design’s collection of lead and wood type. Learn how to use a pica rule, composing stick, leading, spacing material, the California Job Case, mix ink and operate a Vandercook proof press and CP or Goldering platen. Be inspired by visits to Special Collections. Emphasis will be placed on the acquisition of skills and the creative use of type and images. Open to all majors. Prerequisite: VISC 201 or VISC 202 or permission of the instructor. LAB.
VISC 402. Designer as Author. 3 Hours.
Building from the structures and approaches of VISC 302, the course is a research-based examination of traditional, non-traditional and expressive uses of the typographic medium. Projects emphasize the student as both content generator as well as designer and include development of text + image narrative, word as image and typographic “voice” while further refining technical proficiency. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 302 and VISC 304. Corequisite: VISC 404. LAB.

VISC 404. Designing for Social Interactions. 3 Hours.
Introduces the discipline of designing for dynamic media (i.e., internet, on screen, multi-media.) Emphasis will be placed on concept development and on the fundamental principles of information hierarchy, user experience, navigation strategies, site development and site architecture. Projects, lectures and tutorials will provide a working knowledge of current tools and techniques, while exploring the issues of narrative structure, rhythm, space, animation, sound, and video. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 302 and VISC 304. Corequisite: VISC 402. LAB.

VISC 410. Letterpress II. 3 Hours.
Artists’ books are books created as original works of art that push the boundaries of the traditional book. This course will focus on the interdependence of form and content through studio work, readings, and the examination of historical and contemporary models. Students will explore a wide range of book structures from basic to innovative. Final outcomes will combine images, hand set type, and digital processes to create both one-of-a-kind, and limited edition artists’ books. VISC 310 Letterpress I is recommended, but not required. Open to all majors. Prerequisite: VISC 201 or VISC 202, or permission of the instructor. LAB.

VISC 414. Publication and Editorial. 4 Hours.
Exploration of topics dealing intensively with editorial concept and format organization. Projects stress advanced problems in the integration of text and image through the development of complex and variable structures. Emphasis on thorough researching of content and audience as well as understanding of production/execution implications of solutions. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 402, VISC 404. LAB.

VISC 415. Motion Graphics. 3 Hours.
Introduction to the elements, principles and history of motion design. Emphasis on the conceptualization, planning and storyboarding of time-based media with respect to some specific, clearly stated aesthetic and/or communicative purpose. Students will examine methods for synthesizing still moving imagery, typography and audio, in motion, using Adobe After Effects in combination with other software such as Final Cut Pro, Illustrator and Photoshop. Prerequisite: VISC 201, ARCH 108 or VISC 202. LAB.

VISC 420. Exhibition Design. 3 Hours.
This course will explore how exhibitions are conceptualized, designed and made. It will look at the role of curators, exhibition designers, graphic designers as well as the audience of cultural institutions. Open to all majors. Prerequisite: VISC 201, ARCH 108 or VISC 202. LEC.

VISC 425. Environmental Graphics. 3 Hours.
This course will examine core principles and practices of environmental graphic design. Many of these concepts will be concerned with the visual aspects of wayfinding, communicating identity and information, and shaping the idea of place. Some of the topics discussed will include: signage, exhibit design, identity graphics, pictogram design, mapping, civic design and themed environments. Prerequisite: VISC 201 or VISC 304. LEC.

VISC 435. Book Arts. 3 Hours.
Producing books in editions is a complex undertaking. Students work in teams to create or compile content of their choosing, then edit, design, and bind their own books in a small edition. The class combines both traditional letterpress technology and digital interface for the creation of text and image. Each student receives two copies of the team’s final book, one copy is archived in Special Collections at the Spencer Research Library. This class is required for the completion of the Book Arts Certificate. Open to all majors. Prerequisite: VISC 201 or VISC 202, or permission of the instructor. LAB.

VISC 440. Bookstructures and Papermaking. 3 Hours.
Students will learn to make a variety of book structures and enclosures, from historical to contemporary. Prototypes and models, as well as comprehensive notes and instructions will provide the student with a library of bindings for future reference. Students will document paper that is made in class and create a record for themselves, other students, and the Department of Design. Open to all majors. Prerequisite: VISC 201 or VISC 202 or permission of the instructor. LAB.

VISC 455. Designing Information. 3 Hours.
Making preliminary visualizations, models, and prototypes. Examines words, diagrams, type, and sequencing to restructure messages so that they tell a story more effectively. Editing images to make messages clear, unambiguous and understandable by their intended audience(s). Designing the appearance of an information product so that users can find what they want and understand it when they get there. Open to all Design majors. Prerequisite: VISC 201 or VISC 304 or permission of the instructor. LAB.

VISC 520. Designing for Change. 4 Hours. AE61.
Exploration of branding, service and interaction design opportunities that respond to real-life complexity: audiences, systems and contexts. Introduces business and design thinking strategies associated with brand development and the idea that design plays a vital role in our local, national, and global society and well-being. Emphasis on the methods of thinking and research which precede the making of design as well as the importance of writing and verbal presentation to the visual communication design profession. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 414 or permission of the instructor. LAB.

VISC 525. Senior Problems. 4 Hours.
Goal-oriented graphic design problem-solving with emphasis on research, analysis, and synthesis of complex visual problems. Will allow for in-depth study of professional design issues and topics; provides a forum for multi-disciplinary collaboration with related professional disciplines. May be repeated for credit. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 520 or permission of instructor. LAB.

VISC 530. Portfolio. 3 Hours.
Instruction in the organization and presentation of a professional quality visual portfolio. Readings, feedback and online collaborations will focus on the development of a focused portfolio consistent with the individual student’s pursuits. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade
of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite or Corequisite: VISC 520 or permission of instructor. LEC.

**VISC 534. Portfolio Development. 3 Hours.**
This course will provide design and non-design majors instruction in the organization and presentation of a professional quality visual portfolio. Readings, feedback and online collaborations will focus on the development of a focused portfolio consistent with the individual student’s pursuits. Graded on a satisfactory/unsatisfactory basis. LEC.

**VISC 560. Special Topics in Visual Communication: _____ 3 Hours.**
A study of different topics in different semesters in a special area of visual communication. Entry by permission of instructor. May be repeated for credit. LAB.

**VISC 701. Visual Communication. 3 Hours.**
Presentation of fundamental concepts of visual and non-visual communication. Exploration of various theories of visual perception and visual communication with emphasis on reading visual images for meaning and making meaning through the construction of visual images and typography. A special laboratory section will include design thinking and making strategies and processes which are common to visual communication design from the handmade to the computer. Prerequisite: Permission of the instructor. LAB.

**VISC 704. Designing Understanding. 3 Hours.**
Exploration of the relationships among people, places, and the visual objects and information they use. Attention on the different roles of the designer as observer, empathizer, communicator and experience builder. Introduction to information design processes and procedures of understanding by ordering data into useful and persuasive information tools and experiences. Various methodologies will be explored for visualizing information for clarity, resonance, and editorial voice with special attention to the relationships among audience and context in the creation of meaning. Prerequisite: Permission of the instructor. LAB.

**VISC 706. Graphics. 3-6 Hours.**
LAB.

**VISC 710. Letterpress. 3 Hours.**
This introductory course in letterpress will instruct the student in methods for printing from moveable type and other type-high surfaces. The discipline will be explored from a historic as well as artistic perspective. Emphasis will be placed on the acquisition of skills and vocabulary, and the creative use of type and techniques. Prerequisite: Permission of the instructor. LAB.

**VISC 714. Designing for Social Interactions. 3 Hours.**
Introduces the discipline of designing for dynamic media (i.e., internet, on screen, multi-media.) Emphasis will be placed on concept development and on the fundamental principles of information hierarchy, user experience, navigation strategies, site development and site architecture. Projects, lectures and tutorials will provide a working knowledge of current tools and techniques, while exploring the issues of narrative structure, rhythm, space, animation, sound, and video. Prerequisite: Permission of the instructor. LAB.

**VISC 715. Motion Graphics. 3 Hours.**
Introduction to the elements, principles and history of motion design. Emphasis on the conceptualization, planning and storyboard of time-based media with respect to some specific, clearly stated aesthetic and/or communicative purpose. Students will examine methods for synthesizing still moving imagery, typography and audio, in motion, using Adobe After Effects in combination with other software such as Final Cut Pro, Illustrator and Photoshop. Prerequisite: Permission of the instructor. LAB.

**VISC 720. Exhibition Design. 3 Hours.**
This course will explore how exhibitions are conceptualized, designed and made. It will look at the role of curators, exhibition designers, graphic designers as well as the audience of cultural institutions. Open to all majors. Prerequisite: Permission of the instructor. LAB.

**VISC 725. Environmental Graphics. 3 Hours.**
This course will examine core principles and practices of environmental graphic design. Many of these concepts will be concerned with the visual aspects of wayfinding, communicating identity and information, and shaping the idea of place. Some of the topics discussed will include: signage, exhibit design, identity graphics, pictogram design, mapping, civic design and themed environments. Prerequisite: Permission of the instructor. LAB.

**VISC 735. Books Art. 3 Hours.**
Combines wide range of traditional letterpress and digital processes for type and image for individually determined student book projects. Projects will culminate in a small printed and bound edition. Prerequisite: Permission of the instructor. LAB.

**VISC 740. Bookstructures and Papermaking. 3 Hours.**
This course will seek to acquaint the student with the origins of the book, paper, and pre-paper writing surfaces. Prototypes and models, as well as comprehensive notes and instructions will provide the student with a library of structures and variations for future reference. Students will document paper that is made in class and create a record for themselves, other students, and the School of Design. Prerequisite: Permission of the instructor. LAB.

**VISC 755. Designing Information. 3 Hours.**
Making preliminary visualizations, models, and prototypes. Examines words, diagrams, type, and sequencing to restructure messages so that they tell a story more effectively. Editing images to make messages clear, unambiguous and understandable by their intended audience(s). Designing the appearance of an information product so that users can find what they want and understand it when they get there. Open to all Design majors. Prerequisite: Permission of the instructor. LAB.

**VISC 760. Designing for Change. 3 Hours.**
Exploration of branding, service and interaction design opportunities that respond to real-life complexity: audiences, systems and contexts. Introduces business and design thinking strategies associated with brand development and the idea that design plays a vital role in our local, national, and global society and well-being. Emphasis on the methods of thinking and research which precede the making of design as well as the importance of writing and verbal presentation to the visual communication design profession. Prerequisite: Permission of the instructor. LAB.

**VISC 815. Graphics. 2-6 Hours.**
Individual research. RSH.

**Urban Planning Courses**

**UBPL 200. Sustainability and Society. 3 Hours. GE11/GE3S.**
This course will introduce the concept of sustainability, examining its early iterations, recent applications, and possible future transformations. Critical analysis of sustainability as a concept and societal goal will be a course cornerstone. We will examine two contemporary social issues that are relevant to students at the University of Kansas. Social science perspectives will be emphasized, but, because sustainability necessitates an interdisciplinary perspective, the course will consider the contributions of a wide range of disciplines to these issues. LEC.

**UBPL 300. Planning the American City. 3 Hours.**
A broad introduction to the field of urban planning as a technical profession, a process of decision-making, and a governmental function.
The multi-disciplinary nature of planning as an area for professional practice in the geographical, socio-economic and political contexts of the U.S. is stressed. We will explore the promise and limitations of planning in the context of mitigating and adapting to climate change. The course is intended for both the student who is considering planning as a major field of study and the student with primary interest in a related field who would like a working knowledge of past and current planning in the U.S. LEC.

UBPL 502. Special Topics in Urban Planning: ______. 1-6 Hours.
Intended for undergraduate individual or group projects/research in an urban planning topic. LEC.

UBPL 522. History of the American City I. 3 Hours.
This course examines the evolution of American cities from their European antecedents through the late 20th Century, from the urban planning perspective. It focuses on the changing spatial forms and functions of American cities and how these changes relate to socioeconomic and political aspects of urbanization as well as changes in technology. Emphasis is placed on analyzing the relationships between historical development patterns and the current range of problems facing most U. S. cities. (Same as UBPL 722 but gives undergraduate credit.) LEC.

UBPL 538. Environmental Planning Techniques. 3 Hours.
The course covers a variety of topics within environmental planning. Each topic is examined with respect to the scope of the issues, the methods of analyzing and/or measuring those issues, and the ways planners can address those issues in order to avoid or mitigate environmental problems. LEC.

UBPL 565. Introduction to Sustainable Land Use Planning. 3 Hours.
This course introduces students to the issues that planners and decision makers face as they strive to protect environmental resources, especially within the context of land use planning. Emphasis will be placed on the theoretical and policy considerations that guide the work of environmental planners. LEC.

UBPL 662. Twentieth Century American Landscape. 3 Hours.
The purpose of this course is to investigate the relationships between the American culture and the resulting built and natural landscape. Issues of building types, public places, and land use arrangements will be studied from a socio-historical perspective. (Same as ARCH 662.) LEC.

UBPL 701. Directed Readings. 1-6 Hours.
Designed to meet the needs of students whose study in urban planning cannot be met with the present courses. Prerequisite: Consent of instructor. RSH.

UBPL 705. Economic Analysis for Planners. 3 Hours.
An introduction to the concepts and analytical techniques of economics that are most relevant to urban planners. The first part of the course is devoted to microeconomic theory, welfare economics, and the role of the government in the economy. The remainder covers public finance, investment analysis, and methods of determining the allocation of public resources (such as benefit-cost analysis). LEC.

UBPL 710. Introduction to Housing Policy. 3 Hours.
Designed to provide an introduction to the various methods used by the public sector in order to intervene in the housing market. Many different programs are used by governments at all levels to serve many different housing goals. This course will examine many of these programs in an effort to understand what they are supposed to accomplish and how well they work. In all cases, the objective of the course is to train planners so that they have a firm understanding of housing programs that exist now as well as a grasp of the methods used to select housing strategies for implementation by the public sector. LEC.

UBPL 714. Local Economic Development Planning. 3 Hours.
This course provides a broad overview of local economic development planning. Emphasis is on the role of the practitioner and the various activities that can be pursued to encourage and enhance the economic base of a locality. The objectives of the course are to answer the questions: who are economic development planners; what backgrounds and interests do they have; what types of activities do they perform and initiate to encourage and enhance economic development; and how do they decide upon which activities to pursue? Prerequisite: UBPL 764 or permission of instructor. LEC.

UBPL 715. Community“ in Neighborhood Planning and Design. 3 Hours.
This course provides a place-centered approach for understanding and applying the idea of community to local neighborhood planning. The course explores social theories of community and how these have influenced prescriptive models for neighborhood development and design. The course also evaluates the interplay of social, environmental, and economic forces at the neighborhood level and their relationship to community development and well-being. LEC.

UBPL 716. Community and Neighborhood Revitalization. 3 Hours.
The course examines the fields of community development and the revitalization of urban neighborhoods. In the course, students study the theories of community redevelopment as well as the methods of analysis guiding the planning of neighborhoods. The course also reviews the many programs that exist to assist the neighborhood revitalization process and looks at the literature evaluating the implementation of these programs. As an implementation course, students complete a project that calls for them to apply the knowledge learned to real world setting. Prerequisite: UBPL 764 or permission of the professor. LEC.

UBPL 722. History of the American City II. 3 Hours.
This course examines the evolution of American cities from their European antecedents through the late 20th Century, from the urban planning perspective. It focuses on the changing spatial forms and functions of American cities and how these changes relate to socioeconomic and political aspects of urbanization as well as changes in technology. Emphasis is placed on analyzing the relationships between historical development patterns and the current range of problems facing most U. S. cities. (Same as UBPL 522 but gives graduate credit.) LEC.

UBPL 730. Plans and Planning Processes. 3 Hours.
This course is about how to create plans and put the pieces of cities together in a sustainable manner, balancing the competing values of economy, ecology, equity, and livability. It introduces students to the planning process in the U.S., what makes great plans, the basic implementation tools for planning (zoning, capital improvement plans, engineering standards, and subdivision regulations.) We will learn about the Comprehensive Plan along with specialized plans for transportation, housing, land use, and the environment. LEC.

UBPL 735. Site Planning and Design. 3 Hours.
Site planning is the arrangement of elements (buildings, landscaping, parking, open space) on particular pieces of property. This class focuses on the site planning process and the implementation of site design standards through regulations. We will delve into the elements and principles of design and ask these big questions: What makes great public spaces? What makes great neighborhoods? What makes great streets? What can we do to steer development in the direction of greatness? LEC.

UBPL 736. Planning Institutions. 3 Hours.
This course explores the legal principles underlying the institutions, practices and processes of city planning. Subjects to be discussed include zoning, eminent domain, subdivision regulation, transfer of development rights, environmental regulation, growth management, and other planning
mechanisms used to guide urban growth and control the use of land. Students should emerge from the course with a solid understanding of both the logic and routine practice of planning in a procedural and institutional context. LEC.

UBPL 737. NEPA Environmental Assessments. 3 Hours. This course provides an understanding of how to effectively manage and conduct environmental assessments as required by the National Environmental Protection Act (NEPA). Topics include the history and intent of NEPA; the steps, players and assessment types; techniques used to balance environmental concerns with the social and economic considerations; and the role of the courts and environmental advocacy groups in challenging NEPA assessment findings. The course also addresses the role of leadership, conflict resolution, and consensus building in managing environmental assessments. Case studies are used to examine different assessment types and process approaches. LEC.

UBPL 738. Environmental Planning Techniques. 3 Hours. The course covers a variety of topics within environmental planning. Each topic is examined with respect to the scope of the issues, the methods of analyzing and/or measuring those issues, and the ways planners can address those issues in order to avoid or mitigate environmental problems. LEC.

UBPL 739. Issues in Growth Management. 3 Hours. This course examines various aspects of growth management including its history, legal foundations, and application at different levels of government. Growth management not only means dealing with the rapid growth of cities, it also includes managing slow growth, no growth, and negative growth with the ultimate goal being sustainability. Impacts on affordable housing, economic development, social equity, transpiration, and environmental conservation are also explored. LEC.

UBPL 741. Quantitative Methods I. 3 Hours.
Introduction to quantitative techniques utilized in planning analysis. Introduction to inferential statistics, computer programming, and the use of statistical packages. LEC.

UBPL 742. Quantitative Methods II. 3 Hours. Advanced study in planning techniques in the areas of population forecasting, analysis of variance, and regression. The course makes extensive use of microcomputers. Prerequisite: UBPL 741 or consent of instructor. LEC.

UBPL 746. GIS Applications for Design and Planning. 3 Hours. This course will explore a range of Geographic Information Systems (GIS) applications for students in architecture and planning. It will be structured as a workshop, starting with a review of basic GIS concepts and procedures. Different digital data sources will be explored, along with file sharing (import and export) capabilities. The focus will be on applications at different scales using projects in architecture, site planning, environmental planning, urban analysis, and regional analysis. Three dimensional analysis will also be introduced. Each student will develop a final project as a synthesis of earlier exercises and as an application relevant to their individual professional interests. LEC.

UBPL 750. Introduction to Transportation Planning. 3 Hours. This course is a survey course covering multiple modes of transportation (planes, trains, buses, automobiles, bicycles, and walking). The field of transportation planning is examined within a policy analysis framework. Knowing the policy context and understanding how decisions are made will assist transportation planners in understanding the world in which they operate. In addition to the policy context, this course will focus on the technical knowledge transportation planners are expected to know like federal requirements, traffic modeling, and specific topics like bicycle and pedestrian planning and traffic calming. LEC.

UBPL 755. Planning Intercity Transportation Systems. 3 Hours. This course explores the supply and demand of intercity multimodal movement of people and goods from megaregional to global scales. Students will learn the characteristics and performance of rail, aviation, and marine travel, the nuts and bolts of supply provision, effects of intercity connections on communities, and mechanisms for planning at across state and national borders. LEC.

UBPL 756. Travel Demand Forecasting Methods. 3 Hours. The course is intended to provide a working knowledge of analytical transportation planning; it emphasizes two elements. One emphasis is to describe the fundamental principles of transportation planning through the review of transportation modeling theory and practice. The second emphasis is to work with the TransCad model. Students learn how to use these models by running TransCad (GIS based modeling software), building a transportation model, and using it to forecast future transportation conditions. Prerequisite: UBPL 750 or consent of instructor. LEC.

UBPL 757. Transportation Planning Implementation. 3 Hours. A variety of transportation implementation methods and strategies are explored. Project management with an emphasis on finance is the major focus of this course. This is a significant responsibility of transportation planners, consisting of several key steps including project initiating, planning, execution, and control. Other techniques included in this course deal with air quality conformity, congestion management, environmental reviews, developing performance measures, scenario testing, highway capacity analysis and micro-simulation modeling, and executing public involvement programs. LEC.

UBPL 758. Public Transit. 3 Hours. This course familiarizes students with core concepts and practices in public provision of local transit systems from high-capacity heavy rail to on-the-fly demand response. Course modules examine modes, system design, planning issues, organizational relationships inherent to public transit, and technical operations. The course concludes with an examination of comprehensive transit systems. LEC.

UBPL 760. Historic Preservation Planning. 3 Hours. In addition to studying the history of the preservation movement in the United States, the course will discuss preservation at the state and local level, preservation at the private level, ordinance creation, legal aspects of preservation, technical issues and contemporary issues and controversies in the field of preservation. Projects will deal with philosophic and current issues in preservation. LEC.

UBPL 761. Historic Preservation Economics. 3 Hours. This course considers the economic strategies for the historic preservation of the built environment. Topics include investment tax credits, tax increment financing and tax abatement, bond issues, historic preservation grants, and revolving funds. Students will analyze case studies and meet guest speakers who make preservation projects work. Class projects may include market analyses, economic feasibility studies, rehabilitation/redevelopment plans, and technical research papers. LEC.

UBPL 762. Sustainability and the Future of the Built Environment. 3 Hours. This course critically examines the evolving relationship between rehabilitation preservation, and new construction in creating a sustainable built environment in the United States during the twenty-first century. Some observers insist that we cannot build our way to sustainability, but instead must conserve our way to it. What is the appropriate balance of rehabilitation and new construction in creating sustainable built environment? What is the appropriate role of planning and design professionals in this movement? What knowledge and skills will be necessary? The course surveys the contemporary discussion about
defining and evaluating a sustainable built environment as well as the economic and social requirements for creating a sustainable society. LEC.

UBPL 763. Professional Practice. 3 Hours.
This course seeks to provide students with both skills and evaluative frameworks to enhance their work as practicing planners. We will focus specifically on issues related to ethics, citizen participation, dispute resolution, and management. Considerable attention will be paid to "real life" lessons. Prerequisite: UBPL 741 and UBPL 815. LEC.

UBPL 764. Real Estate Development I. 3 Hours.
This course is designed to provide a working knowledge of the mechanics of real estate investment analysis. As a planning course, the emphasis is placed upon the process as performed by the practicing planner working with the public sector. This means that the course covers much of the same material that is normally included in a real estate development course in a business school. However, this material is augmented with the study of techniques used to achieve public sector goals. Among the topics covered in the course are: the calculation of return on investment in real estate; the financing of real estate development; the various forms of property ownership; and the implications of tax laws upon the rehabilitation of historic properties and the provision of low-income housing. Prerequisite: Knowledge of spreadsheet software on a personal computer. LEC.

UBPL 765. Introduction to Sustainable Land Use Planning. 3 Hours.
This course introduces students to the issues that planners and decision makers face as they strive to promote sustainability, especially within the context of land use planning. Emphasis will be placed on the theoretical and policy considerations that guide the work of planners. LEC.

UBPL 766. Real Estate Development II. 3 Hours.
This course extends the study of real estate development planning begun in UBPL 764: Real Estate Development Planning I. The course will examine various forms of public-private participation in the real estate development process. Advanced study of various public sector programs to guide and direct the real estate development process will be undertaken, including the use of tax credits for affordable housing and for historic preservation. Projects developed within the region will be examined to illustrate the application of these techniques. Prerequisite: Successful completion of UBPL 764 or permission of instructor. LEC.

UBPL 773. Environmental Planning Implementation. 3 Hours.
This course emphasizes the details of successful implementation of environmental plans. While the particular focus (land, water, energy, etc.) may vary, the techniques and processes studied will be broadly applicable. Students will develop environmental plans using real-world data. Prerequisite: UBPL 765, UBPL 738, or consent of instructor. LEC.

UBPL 802. Special Topics: _____, 1-6 Hours.
This course is intended to afford the opportunity for individual or group projects/research in an urban planning topic. RSH.

UBPL 806. Thesis - Graduate Research. 1-6 Hours.
Independent study and research related to the master’s thesis. Prerequisite: Consent of instructor. THE.

UBPL 815. History and Theory of Planning. 3 Hours.
The course serves as an introduction to the history of city planning and "how to plan" in general. Planners are particularly concerned with future consequences of current action. In looking to the future, knowing past history is a good place to start. Also, planning theorists have thought deeply about how best to plan and their thoughts and advice can serve planners and decision-makers well when they are facing unknowns. LEC.

UBPL 816. Politics and Planning. 3 Hours.
Planners operate within a highly technical yet political environment. Planners often try to bring consensus and action-taking to communities but the very structure of our democracy promotes conflict and stalemate. Understanding how power, structures and agencies influence policy-making will help planners become savvier as they balance their roles as advisors, educators, facilitators, advocates, and administrators. This class explores the trials, tribulations, and triumphs of planners as they deal with politics. LEC.

UBPL 850. Urban and Regional Theory. 3 Hours.
The course explores the forces that shape the structure and function of cities and regions, drawing upon insights from planning, geography, economics, sociology, demography, and political science. Special attention is paid to theories that can be applied by urban planners to improve the economic performance, quality of life, and social equity of urban areas. Topics covered include the origin and development of cities, agglomeration economies, location theory, central place, mix-and-share analysis, economic base, input-output, labor markets, urban models, regional development planning, globalization, high technology, urban poverty, and problems of regional governance. Prerequisite: UBPL 741 and UBPL 815. LEC.

Department of Architecture

Introduction

Architecture is inherently an interdisciplinary field of study, integrating knowledge from art, science, and the humanities. As a method of practice, it is a complex, collaborative, professional activity aimed at improving the quality of life for people and the planet. The discipline requires creative, critical, agile, and integrative thinking. Architecture deals with highly complex problems and aims to solve them not only competently, but in a way that ennobles society. The curriculum responds to these considerations by offering a series of overlapping sequences in professional and academic course work.

Mission

The Department of Architecture engages in progressive knowledge generation, dissemination, and application through its core activities of teaching, scholarship, and service to enhance the quality of life for people and the planet. The department furthers this mission by offering 4 degrees:

- The Master of Architecture (an NAAB-accredited professional degree);
- The Bachelor of Arts in Architectural Studies (a pre-professional program); and
- 2 post-professional graduate degrees,
  - the Master of Arts in Architecture
  - the Ph.D. in Architecture

Undergraduate Programs

Master of Architecture Program (5-year)

“In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (http://www.naab.org) (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master
of Architecture, and the Doctor of Architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards. Master’s degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.”

— National Architectural Accrediting Board

Prospective students who apply for admission to the accredited 5-year degree program and are accepted through the undergraduate admissions process are admitted directly into the Master of Architecture program. These students pay undergraduate tuition through the first 4 years and are considered graduate students for the final year. Students holding a baccalaureate degree apply through graduate admissions and enter a 3-plus-year program (those holding a preprofessional degree in architecture receive advanced standing and usually complete the degree in 2 years plus 1 summer).

Bachelor of Arts in Architectural Studies

The Department of Architecture offers a Bachelor of Arts in Architectural Studies degree. This program combines a liberal arts education with the study of the historical and theoretical content of architecture. This four-year degree program requires a minimum of 124 credit hours. Students considering a B.A. degree in other areas as a double major with the B.A. in Architectural Studies should consult the College of Liberal Arts and Sciences for advising, because other B.A. degrees may have different elective requirements for graduation.

Students considering the B.A. in Architectural Studies must understand that this is not the professional degree for architectural practice. It is not designed to prepare the student either for architectural registration or for entry into the architecture profession. It is specifically designed for students seeking exposure to the conceptual content of architecture within a liberal arts framework. The curriculum is a powerful platform from which to pursue graduate education.

Graduate Programs

The Department of Architecture offers 4 distinct plans for graduate study:

1. A Master of Architecture (M.Arch.), a 3-year professional degree for students already holding bachelor’s degrees in any field (those with architecture degrees are considered for advanced placement);
2. A Master of Arts in Architecture (M.A.) — Academic/Research Track for students interested in the study of architecture from an academic and scholarly perspective;
3. A Master of Arts in Architecture (M.A.) — Architectural Management Track for students interested in management issues confronting contemporary professional architecture practice; and
4. A Doctor of Philosophy in Architecture (Ph.D.) for students interested in engaging in robust, innovative inquiry that adds to the body of knowledge in architecture and its related fields.

Of these 3 degree programs, only the 3-year Master of Architecture is a professional degree. The other degrees are post-professional degrees that do not place the student on the path for architectural registration. Students seeking a career change into a professional curriculum, should apply for admission to the 3-year M.Arch. degree.

Courses

ARCH 100. Architectural Foundations I. 4 Hours.
An introductory design studio directed toward the development of spatial thinking and the skills necessary for the analysis and design of architectural space and form. This course is based on a series of exercises that include direct observation: drawing, analysis and representation of the surrounding world, and full-scale studies in the making of objects and the representation of object and space. Students are introduced to different descriptive and analytical media and techniques of representation to aid in the development of critical thought. These include freehand drawing, orthographic projection, paraline drawing, basic computer skills, and basic materials investigation. Prerequisite: Approval from the Dean of the School of Architecture and Urban Planning. LAB.

ARCH 101. Architectural Foundations II. 6 Hours.
A continuation of ARCH 100 with major emphasis on the design relationships among people, architectural space, and the environment. The course is based on a series of exercises leading to the understanding of architectural enclosure as mediating between people and the outside world. Issues of scale, light, proportion, rhythm, sequence, threshold, and enclosure are introduced in relation to the human body, as well as in relation to architectural form, environment, and social and psychological factors. Students will engage in drawing, perspective projection, model building, and basic computer graphics. Prerequisite: ARCH 100. LAB.

ARCH 103. Introduction to Architecture. 3 Hours.
An introduction to the study and practice of architecture. This course aims at orienting the student to the various disciplinary facets which make up the total architectural curriculum as well as to the various professional roles which architects can be expected to perform. Architectural study is seen as both an art and a science, and architectural practice is seen as a complex, interdisciplinary professional activity. Presentations by guest lecturers are included. Discussions required for, and only open to B.A. in Architectural Studies students. LEC.

ARCH 104. Principles of Modern Architecture. 3 Hours.
A lecture course covering the emergence of technological, theoretical and aesthetic principles of modern design beginning with the socio-cultural impact of industrialization and the crisis in architecture at the end of the 19th century. Attention is given to functionalist theory, mechanical analogies and the so-called machine aesthetic of 1910-1930 and to the precedents of important design principles of modern architecture, including modular coordination, the open plan, interlocking universal space, unadorned geometry, structural integrity, programmatic and tectonic expression, efficiency and transparency and briefly explores their development in post-war and late 20th century examples. LEC.

ARCH 105. B.A. Architectural Studies Seminar. 1 Hour.
The seminar provides a discussion section that supplements the lectures presented in ARCH 103. The course must be taken concurrently with ARCH 103 and is open only to students in the B.A. in Architectural Studies Program, or with approval by the School of Architecture and Urban Planning. SEM.

ARCH 106. B.A. Architectural Studies Seminar II. 1 Hour.
This seminar provides a discussion section that supplements the lectures presented in the lectures of ARCH 104. The course must be taken concurrently with ARCH 104 and is open only to students in the B.A. in Architectural Studies program, or with consent of the Dean of the School of Architecture and Urban Planning. LEC.

An introductory design studio directed toward the development of spatial thinking and the skills necessary for the analysis and design
of architectural space and form. This course is based on a series of exercises that include direct observation: drawing, analysis and representation of the surrounding world, and full-scale studies in the making of objects and the representation of object and space. Students are introduced to different descriptive and analytical media and techniques of representation to aid in the development of critical thought. These include freehand drawing, orthographic projection, paraline drawing, basic computer skills, and basic materials investigation. Prerequisite: Approval from the Dean of the School of Architecture and Urban Planning. LAB.

A continuation of ARCH 108 with major emphasis on the design relationships among people, architectural space, and the environment. The course is based on a series of exercises leading to the understanding of architectural enclosure as mediating between people and the outside world. Issues of scale, light, proportion, rhythm, sequence, threshold, and enclosure are introduced in relation to the human body, as well as in relation to architectural form, environment, and social and psychological factors. Students will engage in drawing, perspective projection, model building, and basic computer graphics. Prerequisite: ARCH 100 or ARCH 108. LAB.

ARCH 152. Professional Practice I. 1 Hour.
This course will introduce students to the history and nature of the architecture profession and its relationship to education, internship, registration and certification. The various roles which architects are expected to perform and the ethical standards they are expected to uphold are explored in the context of different models of practice. Prerequisite: Must be admitted to M.Arch 5-year program, Arch Studies Program or approval by the School of Architecture and Urban Planning. LEC.

ARCH 200. Architectural Foundations III. 6 Hours.
A continuation of ARCH 101 with a series of studio exercises following a succession based on analysis, form, and syntax, with an emphasis on the communication of architectural ideas. Students explore plan, section, and spatial organization, spatial sequence, structure and materiality in relation to human dwelling and the building site. The course aims for student integration of these issues into building designs that require the organization of multiple spaces. Students will consider natural forces as they both shape and affect buildings, including gravity, wind, light, heat, sound, and fluids. Precedent studies, direct observation, building analysis, and site analysis are significant aspects of the semester. Prerequisite: ARCH 101. LAB.

ARCH 205. Natural Forces. 3 Hours.
The course advances empirical understanding of natural forces as they both shape and affect buildings, including gravity, wind, light, heat, sound, and fluids. This course emphasizes the development of conceptual thinking and problem solving skills through sensory-based demonstrations, lectures, and laboratory experimentation. The course will emphasize concepts of PHSX 114 as they relate to the built environment. The course will require freehand drawing, physical, model-building and the application of Photoshop and InDesign software programs. Tutorials and workshop sessions will introduce and require use of other computer software applications. Prerequisite: PHSX 114 and either ARCH 109 or ARCH 502; or consent of instructor. LEC.

ARCH 208. Architectural Design I. 6 Hours.
The second year studios are responsible for introducing students to the basic form determinants of architecture—from limited scope exercises to complete building designs within the natural environment. Using diagrams and sketches, plans, sections, elevations and models, students explore the spatial ordering of human activity, the analysis of site, sound, light and air modulation, simple environmental controls and energy conservation, basic framing systems, volumetric organization and the materials of building skins and envelopes in the design of small buildings. Prerequisite: ARCH 109. LAB.

ARCH 209. Architectural Design II. 6 Hours.
A continuation of ARCH 208 with an emphasis on the synthesis of basic form determinants, including the completion of a design project of a medium-sized, multi-storied public building in the urban environment containing a variety of spaces and spans. This project will enable students to demonstrate competence in basic architectural design, act as a summation of the variety of smaller design exercises undertaken through the year, and prepare students for the third year focus on the materials and methods of building construction. Prerequisite: ARCH 208. LAB.

ARCH 280. Design Workshop I: Visual Narratives. 3 Hours.
This lab-based course will develop the skills and understanding necessary to visually communicate compelling narratives of complex data and situations. Students will engage in hand-sketching and diagramming as well as utilizing digital tools designed to facilitate clear and persuasive data display. Environmental scales ranging from settlement patterns down to product interface will be addressed. Students will learn the visualization pipeline, processing data for visualization, visual representations, the design of interaction in visualization systems, and the impact of perception. Students will also develop the skills necessary to solve visualization problems and critique and evaluate information visualization. This material will be covered through class discussions, readings, and a number of assignments and projects. The assignments and large group project will provide students with practical experience in the construction of visual narratives. LEC.

ARCH 281. Design Workshop II: Design Thinking. 3 Hours.
This course aims to enhance student’s abilities to apply concepts and methods associated with design thinking with an emphasis on ill-structured problem-solving and human-centered design. Students will gain exposure to design thinking processes including forecasting, scenario planning and various forms of analysis all of which help shape a robust problem statement that forward design innovation. This material will be covered through class discussions, readings, and a number of assignments and projects. Students will have the opportunity to develop their design-thinking competence through their final project which may be at the level of models, product, spatial, building and/or community designs. LEC.

ARCH 310. Computer Applications. 3 Hours.
The course will immerse students in the exploration of the generation, manipulation, and production of graphic images through the use of computers. The goal of the course is to help reach an understanding of computers that allows for future growth in an environment in constant change, and to provide an overview of what is currently possible. The format of the course will be a combination of lectures and workshops. The lectures will introduce students to theoretical and application-oriented topics. Group discussions will focus on the computer as a conceptual construct, the computability of design, and computers as design partners. The workshops will provide students with hands-on experience. The vehicles used for these investigations will be desktop publishing, paint, and drafting tools. As resources become available this list will be augmented. LEC.

ARCH 359. Special Problems. 1-3 Hours.
Special problems in architecture. The study of a particular problem in architecture involving individual research and presentation. Conferences and reports. (May be taken for Credit/No Credit.) Prerequisite: Student must submit to his or her faculty advisor, in advance, a statement of the problem he or she wishes to pursue, the methodology he or she plans to
use in the program, and the objectives of the special problems. He or she must also be in agreement with the faculty member he or she proposes as instructor for the course. IND.

ARCH 360. Introduction to Landscape Architecture. 3 Hours.
This course situates landscape architecture in a broad cultural and social context with the intention of developing skills in critical thinking about the role of exterior place-making in the built environment. Lectures and assigned readings will explore central issues in the history and theory of landscape architecture and look at key sites and their designers. Other topics will include environmental attitudes and perception, the human experience of place, and ideas of nature. LEC.

ARCH 380. Design Workshop III: Ideas and Methods in Planning and Design. 3 Hours.
This course focuses on design methods, ideas and approaches at the city, neighborhood and community levels. The course will introduce approaches to urban design and planning which are responsive to social, environmental and ecological issues. The goal is to develop core competencies in design thinking such as analyzing specific problems and developing possible design interventions by understanding relevant theories and analyzing case studies. Students will critically analyze past and current urban trends through case studies to inform design ideas for more equitable and sustainable communities. This material will be covered through class discussions, readings, and a number of design-oriented team projects and assignments. LEC.

ARCH 381. Design Workshop V: Designing Sustainable Futures. 3 Hours.
This problem-based service-learning course aims to enhance students’ abilities to apply the concepts and methods associated with effective and facilitative leadership focused upon sustainable design problems. This material will be covered through class discussions, readings, and design-oriented team projects. Students learn core competencies such as analyzing organizational problems and goals, strategic planning, intervention, and evaluation. In the service-learning component, students apply these skills to issues that matter to them and to the communities they serve to generate design solutions for their client’s consideration. These projects may be at the level of interaction models, product, spatial, building and/or community designs. LEC.

ARCH 408. Architectural Design III. 6 Hours.
A continuation of ARCH 209 with an increased emphasis on building construction and systems as form determinants. Work will focus on medium scale, multi-storey non-residential buildings developed to an appropriate level of technical resolution as evidenced in clear schematic wall sections and structural proposals. Prerequisite: ARCH 209. LAB.

ARCH 409. Architectural Design IV. 6 Hours.
A workshop based course with an emphasis on materiality and construction of building assemblies through hands-on activities. Development of craft, process, collaboration and technical documentation skills will be a primary objective of the course. Prerequisite: ARCH 209. LAB.

ARCH 480. Senior Seminar. 3 Hours.
This seminar will expose students to normative and critical approaches in the profession of architecture. Through field trips, attendance at juries, readings, and presentations by architects and designers, they are to develop an understanding of the precedence, theories, and practices of the profession. This is the capstone course for the B.A. in Architectural Studies. Prerequisite: ARCH 381. LEC.

ARCH 502. Accelerated Design I. 6 Hours.
The first of three accelerated design studios, this course emphasizes the design relationships among people, architectural space, and the environment. Issues of shelter, light, sequence and threshold are considered in relation to physical, psychological and sociological factors. Offered only in the summer. Prerequisite: Undergraduate degree and permission of the Dean of Architecture and Urban Planning. LAB.

ARCH 503. Accelerated Design II. 6 Hours.
The second of three accelerated design studios, this course emphasizes construction and technology as expressive mediators in the relationship between human dwelling and site. Students will consider natural forces as they both shape and affect buildings, including gravity, wind, light, heat, sound and fluids. Prerequisite: ARCH 502 and/or permission of the Dean of the School of Architecture and Urban Planning. Corequisite: ARCH 626. LAB.

ARCH 504. Accelerated Design III. 6 Hours.
The third of three accelerated design studios, this course focuses on the integration of material learned in previous studios with urban-based design problems of increasing scale and complexity within the frameworks of sustainability and universal design. Students will demonstrate an ability to use research and critical thinking skills, including the use of case precedents, and the ability to integrate various building systems in building design. Prerequisite: ARCH 503 (see studio grading policy) or permission of the Dean of the School of Architecture and Urban Planning. Corequisite: ARCH 627. LAB.

ARCH 505. Accelerated Design IV. 6 Hours.
Graduate studio emphasizing urban context and design theories. Students will undertake specialized research projects. Prerequisite: ARCH 504 (see studio grading policy) or permission of the Dean of the School of Architecture and Urban Planning. Corequisite: ARCH 690. LAB.

ARCH 510. Problems in Computer Applications. 3 Hours.
The study of a particular problem in architecture involving the application of computer-aided design and analysis techniques. Individual or group tutorials. Prerequisite: Consent of instructor based on the student’s advance submission of a written proposal outlining the plan of study. Completion of one course in computer programming and/or specific experience in writing original computer programs. LEC.

ARCH 515. Building Information Modeling. 3 Hours.
This course will expose students to building information modeling: a digital representation of the building process that facilitates exchange and interoperability of information in digital format. The focus will be on the software’s potential for reducing the information loss that occurs during each handoff of the project during the traditional delivery method. Possibilities for integrated practice including lifecycle costing and knowledge management are discussed. LEC.

ARCH 516. Portfolio Development. 3 Hours.
The aim of the course is to teach practical presentation skills using computer software, in addition to graphic design theories and strategies. This course will provide an opportunity for students to design and produce a design portfolio appropriate for internship and/or graduate school applications. LEC.

ARCH 520. Architectural Acoustics. 3 Hours.
An introduction to the physics of sound. Objective and subjective evaluation and control of sound as applied to architectural spaces. Room shaping, mechanical and electrical system noise and vibration control, and electro-acoustic sound reinforcement. Prerequisite: PHSX 114 and ARCH 626 or equivalent, or consent of instructor. LEC.

ARCH 521. Electro-Acoustical Systems. 3 Hours.
A study of electro-acoustic sound reinforcement and reproduction systems for buildings. Prerequisite: PHSX 212, or consent of instructor. LEC.
ARCH 524. Structures I. 4 Hours.
The fundamental principles of structural behavior including stress and deformation in structural components and systems. Open to architecture students only. Prerequisite: PHSX 114. LEC.

ARCH 530. Environmental Systems I. 3 Hours.
This introductory course addresses human needs and comfort in relation to the natural and man-made environments. Specific topics include: climate and weather; environmental health; indoor air quality; thermal comfort; passive and active systems and design strategies for heating, ventilating, and air-conditioning; plumbing; noise control; building management systems; and life safety systems. Prerequisite: PHSX 114. LEC.

ARCH 531. Environmental Systems II. 3 Hours.
This course addresses human needs and comfort in relation to the natural and man-made environments. Specific topics include: daylighting, electrical lighting systems, building acoustics, electrical power distribution systems, alternative energy sources, communication systems, and transportation systems. Prerequisite: ARCH 530. LEC.

The first unit of the two-part survey history course explores the historical changes of architecture in relation to civilizations, change, technological, and ideological transfers among different regions, nascent religious groups and evolving political enterprises. In regard to the geographical and geopolitical regions, the course includes South and Central America, Europe, Classical Greece and Italy, Asia Minor, North Africa and Asia. LEC.

ARCH 541. Global History of Architecture II: From Industrial Revolution to Present (1700 CE-Present). 3 Hours. AE42.
The second unit of study of the two-part survey history course offers a global perspective of the development of modern architecture from the industrial revolution to contemporary times. This course traces the genealogy of modern architecture to its multiple roots in European enlightenment, global dissemination of industrial knowledge, invention of new building materials and techniques, and development of architectural theory. Emphasis is on the historical context of how the diverse approaches of architects from different regions create variations of formal expressions, spatial program and theoretical underpinning, and thus create multiple meanings and images of modern architecture. Prerequisite: ARCH 340 or ARCH 540 or ARCH 640 or consent of instructor. LEC.

ARCH 542. History of Architecture III: Modern. 3 Hours.
A continuation of ARCH 541, History of Architecture II, covers the period from around 1800 to the present. Particular emphasis is placed on the major cultural shifts that have impacted architectural representation and have contributed to its differentiation as Modern, not only in Europe, North and South America but also with examples in India and Pakistan. Weekly lectures and readings including original sources. Supplementary readings and/or assignments may be assigned. Prerequisite: ARCH 341 or ARCH 541 or ARCH 641 or consent of instructor. LEC.

ARCH 552. Ethics and Leadership in Professional Practice. 3 Hours.
This course takes the perspective that architectural design is inherently an ethical act. Through this lens, students will learn the essentials of office practices, the many definitions of client and their roles in the design process, the legal responsibilities of the profession, the importance of continuous professional development and the obligation the profession has to provide civic leadership in regard to the built and natural environment. LEC.

ARCH 560. Site Design. 3 Hours.
This course introduces concepts of architectural context and site through a combination of lectures and field studies. Natural, social and built systems are presented using a range of perspectives, including holistic ones. Students will develop visual and written skills of analysis through specific site analytic and design techniques. Application exercises and ongoing analysis assignments are required. Restricted to 3.5 and 5 year Master of Architecture students. Prerequisite: ARCH 109 for undergraduate students. LEC.

ARCH 570. Contemporary Issues Seminar I. 1 Hour.
A series of seminars on contemporary issues facing the profession. LEC.

ARCH 571. Contemporary Issues Seminar II. 1 Hour.
These seminars will consist of three to four guest lecturers each semester. All students enrolled in this course will attend the same lecture as ARCH 572. Topics will be selected to reflect major issues covered in the course work, or contemporary issues facing the profession. LEC.

ARCH 572. Contemporary Issues Seminar III. 1 Hour.
These seminars will consist of three to four guest lecturers each semester. All students enrolled in this course will attend the same lecture with ARCH 571. Topics will be selected to reflect major issues covered in the course work, or contemporary issues facing the profession. LEC.

ARCH 573. Financial and Economic Issues in Architecture Management. 3 Hours.
This course will focus on the fundamentals of accounting, macroeconomics and the construction industry, and concepts related to the development and implementation of a strategic business plan. LEC.

ARCH 574. Organizational Issues in Architecture Management. 3 Hours.
Topics that will be covered in this course include the organization of a professional practice, personnel management, and the development of effective communication skills. LEC.

ARCH 575. Architecture Management: Managing a CAD System. 3 Hours.
This course covers the various procedures involved in managing a CAD system within a design organization. It also explores the different applications and uses of current CAD technology. Topics to be addressed include: selecting a system; billing CAD services; support services and personnel; marketing CAD; customization, file management, menus and script files; AutoLisp Programming; and integrating CAD with other programs. Prerequisite: An introductory CAD class or permission of the instructor. LEC.

ARCH 576. Project Delivery in Architecture Management. 3 Hours.
Conventional methods for project delivery will be reviewed along with design/build, fast-track, and other techniques. The relationship of the architect and development will also be explored, as will the relationship of project development to urban design concepts. LEC.

ARCH 577. Marketing Architectural Services. 3 Hours.
The emphasis of this course will be on the development and implementation of a marketing plan, techniques related to the marketing of specific projects, and the relationship of marketing to other components of a firm. LEC.

ARCH 578. Legal Issues in Architectural Management. 3 Hours.
A course designed to familiarize the student with legal considerations related to a professional practice. Case studies and selected readings will serve as the basis for discussion of registration, contracts, business formation, taxes, employment practices, copyright, and patent law. In
addition, the course will draw upon the knowledge and experience of members of the professional community. LEC.

ARCH 600. Special Topics in Architecture: ____, 3 Hours.
This course is for the study of architectural topics on a one time or experimental basis in response to changing needs and/or resources in the Program. It may be offered concurrently by different instructors under different subtitles as announced in the Timetable. May be repeated for credit. Prerequisite: Variable. IND.

ARCH 601. Design Research. 3 Hours.
This course will examine issues in architectural research. It will provide an overview of graduate level studies with regard to definitions, methods, skills, and techniques. The course will consist of lectures, seminars, readings and guest presentations. The class will enable students to make informed judgments about matters of quality and quantity on architectural issues. Students will be expected to formulate sensible systems of classification for their chosen material. Students will be expected to formulate sensible systems of classification for their chosen material. Students will be expected to produce papers and essays, make sample research proposals, and other research based assignments. Limited to students in M. Arch Program with Undergraduate status. Prerequisite: ARCH 608. LEC.

ARCH 608. Architectural Design V. 6 Hours.
A continuation of previous studio coursework with an emphasis on the programming and design of individual urban buildings with culture, context and precedent as major form determinants. Clear development and integration of structural, mechanical and life safety systems will be a focus of the course. The concepts of integrated practice and building information modeling will be introduced. Prerequisite: ARCH 408 and ARCH 409; or ARCH 301 or ARCH 504 or ARCH 505; or ARCH 604. LAB.

ARCH 609. Comprehensive Studio. 9 Hours.
A culmination of all previous design study with emphasis given to the individual student’s demonstration of synthesis of all previously learned design skills. These include program analysis, site design, structure, formal composition, materials and methods of construction, technical development of building fabric, environmental systems, code and zoning compliance, and principles of sustainability. Students should also demonstrate an appropriate awareness of history, theory, and culture. The level of project development should be demonstrated by technically precise drawings and will researched written documentation in addition to other means of representation. Prerequisite: ARCH 608 and successful completion of all other required professional courses through the semester with ARCH 608. LAB.

ARCH 610. Computers and Project Development. 3 Hours.
This course introduces one to the use of computers in project development (final and execution drawings, specifications). Initiates advanced computer aided design systems. Emphasis is to be on CAD potential in generating complex representation; lectures and laboratory work on extent and limits of CAD systems in design; familiarizes with software and hardware (basic training, plotting, etc.); encourages the use of CAD process for exploration (three-dimensional representation); introduces editing and report preparation. Lectures on computers and profession. No computer language is taught in this course. Prerequisite: ARCH 310 or introductory CAD course. LEC.

ARCH 613. Visual Thinking Studio I. 3 Hours.
An intensive course covering the graphics topics described in ARCH 113 and ARCH 114. Graduate level course that supplements the core syllabus or ARCH 102 with weekly seminars, expanded reading lists, and additional classroom assignments. Prerequisite: Undergraduate degree in area other than architecture with three credits in calculus, four credits in physics, three semesters of English, and/or permission of the Dean of the School of Architecture and Urban Planning. LAB.

ARCH 614. Freehand Drawing. 3 Hours.
Open to all SADP non-graduating students interested in enhancing current freehand drawing skills, generally in the architectural realm. While a broad range of expression and graphic materials is explored, emphasis is on drawing as a notational skill, the instrument of creative expression for professional purposes as well as for lifelong artistic fulfillment. Prerequisite: Consent of instructor. LAB.

ARCH 615. Intensive Graphics II. 3 Hours.
Open to students with intermediate level graphic skills. Course will be designed to deal with all aspects of graphic communication for designers in the different stages of the architectural process. This would include sketching, drafting, lettering, rendering, modelmaking, photographic and slide presentation, reproduction, brochure, etc. Prerequisite: Consent of instructor. LAB.

ARCH 616. Advanced Architectural Presentation Techniques. 3 Hours.
An advanced studio course intended for students who have a working knowledge of basic presentation techniques wishing to refine their existing skills and experiment with new techniques. The course will review basic techniques and explore new ones through a series of lectures and these techniques will be put to use in the concurrent development of complete presentations of architecturally significant buildings. The lectures and studio work will be supplemented by slide presentations, demonstrations, guest lecturers, and field trips. Not intended as a remedial course or substitute for ARCH 615. Prerequisite: Consent of instructor. LEC.

ARCH 618. Architectural Photography. 3 Hours.
A basic course in black and white photography intended to enable the student to utilize photography routinely as a medium for visualization, documentation and presentation of images useful for design. It is organized in relation to the controls of the roll film camera so that assignments reinforce the understanding of this tool and its creative possibilities. Experiences include making photograms, developing black and white film, printing black and white images, mounting and presenting prints, photocopying, photographing buildings and architectural models, photomontage, high contrast graphics effects and an introduction to color materials. Enough technical information is included for the student to pursue black and white photography on his/her own to the desired level of proficiency. LAB.

ARCH 619. Advanced Architectural Photography. 3 Hours.
An advanced course in photography specifically dealing with the skills and techniques of the professional architectural photographer. Students will use and experiment with large format photography, manipulation of the exposure and development process, special developers and processes; negative retouching, specialized film and their application, simulation, model photography, and photographic rendering. Brochure development, marketing services, and professional ethics will also be discussed. Prerequisite: ARCH 618 or equivalent, submission of a brochure, and consent of instructor. LAB.

ARCH 622. Material Investigations. 3 Hours.
This course will provide opportunities for students to learn about research methods in the realm of architectural materials. The course will have two concurrent phases: the first phase will consist of a series of field trips to materials manufacturers, fabricators and distributors in the Lawrence, Topeka and Kansas City area. The purpose of these trips is to see, first-hand, how materials are developed and made, and to understand the research involved in their development. The second phase will consist of a self-directed research project based on the students’ natural curiosity about a particular material or process. The project will have three
components: 1) a research agenda, rigorously developed and executed; and 2) a "built" component, with actual materials, executed by the students' own hands and financial resources; and 3) final documentation of the research project. LEC.

ARCH 623. Building Practicum. 3 Hours.
The building technology practicum is offered as a course that will afford students a "real world" experience outside of the academic setting. Students can bring their own project proposals to the practicum committee or faculty members on the committee can suggest local preservation efforts, including planning and administration, or actual physical implementation of such projects. It could also be in the interest of some students to develop skills in a specific area, i.e. model building, architectural photography, historic reconstruction, or technical documentation. Those interested in specific areas will need to work closely with the practicum committee to develop a working list of goals and objectives. Students can elect to work individually or in teams, can work outside of the semester schedule with grades assigned at the completion of the project, and will be bound by a contract approved by the practicum committee. LEC.

ARCH 624. Structures II. 3 Hours.
A continuation of ARCH 524, with focus on applying learned principles to basic contemporary structural systems such as concrete, steel, and wood framing systems. Open to architecture students only. Prerequisite: ARCH 524 or ARCH 620 and ARCH 621. LEC.

ARCH 625. Analysis and Design of Structures for Architects. 3 Hours.
Analysis of statically indeterminate beams and frames. Fundamentals of structural design in concrete and steel. Open to architecture students only. Prerequisite: ARCH 624. LEC.

ARCH 626. Building Technology I: Construction Systems and Assemblies. 3 Hours.
This course is an introduction to the materials, processes and craft of construction. Along with presenting the information required for understanding the basic principles and appropriate application and performance of construction systems and assemblies, the course also provides a conceptual framework to bridge between the physical conditions of construction and the more abstract processes of design. Teaching method includes modeling and hands-on building experiences. Prerequisite: ARCH 200 or ARCH 209 or Corequisite: ARCH 408 or ARCH 409 or ARCH 503. LEC.

ARCH 627. Building Technology II: Culture of Building Technology. 3 Hours.
A continuation of ARCH 626. Introduction to industrialized production. A consideration of the detailed sub-systems and cultural practices that comprise the built environment, and the factors responsible for their design and installation. Includes discussion of building codes, mechanisms of failure, and materials selection. Lectures and demonstrations by the instructors and visitors, films, slide projections, quizzes and written examinations. A student should demonstrate an understanding of elementary systems of construction and be able to relate this understanding to the design process. Prerequisite: ARCH 626. LEC.

ARCH 628. Structure in Nature and Architecture. 3 Hours.
The course deals with the historical development of structure, first in nature and then in architecture. In nature, the course discusses the evolution of structural materials, systems, connections and anchorage (foundations) in geological structure, botanical structure, endoskeleton structure, exoskeleton structure and insect architecture. The course then analyzes the growth of structure from anthropological structure through ancient and medieval structure to modern architecture. In these broad architectural periods in world history, the course examines the structural materials, structural behavior and construction of some of the important buildings that helped to define and delineate the architecture of their time. This course helps students to understand structural systems and their behavior, in a non-mathematical way, by relating the structural principles involved to our common experience of the world around us. The course will have every student do a research project on an assigned topic in geological structure, botanical structure, exoskeleton structure, insect architecture or anthropological structure. LEC.

ARCH 629. Listening to Architecture. 3 Hours.
This course has the objectives of introducing the art and science of "listening" to architectural spaces; exploring, from both historical and current viewpoints, how proper acoustical conditions have and can be realized within the aesthetic and functional parameters of the particular architectural space; understanding the importance of building acoustics in architectural design; obtaining the ability to discuss building acoustics with the proper use of acoustical terms and descriptions; and understanding the basics of how sound behaves in an enclosed architectural space. The course will include several visits to existing architectural spaces that have specific acoustical requirements and interesting acoustical characteristics. LEC.

ARCH 630. Theory and Context of Architecture. 3 Hours.
An examination of architectural theories that understand the designed environment as a cultural medium and product of a sociocultural process that expresses values and ideas. Understanding of these theories will be enhanced through the analysis of paradigmatic buildings, urban form and ideologies that have influenced architectural culture. LEC.

ARCH 631. Issues in Contemporary Architecture. 3 Hours.
This class focuses the student on directed readings and provides the student the opportunity to select a topic for the semester's duration. With a very crammed schedule, the student is given a venue to concentrate on issues that they wish to pursue. A seminal reading is provided to the class, at the beginning of the semester, and this reading forms the basis of the semester's discussion. The selected reading is "current" and is the device used to distribute other readings pertinent to the author's argument. The basis of selection is related to current thought and discourse affecting the evolving nature of architectural culture. Class discussion may include slides, videos, sound tapes, etc. These are intended to complement the assigned readings. LEC.

ARCH 632. Contemporary French Architecture. 3 Hours.
This course introduces the student to contemporary trends in French architecture. Social, technological, economic, and theoretical perspectives will be investigated, and the work of the major French architects of the latter half of the twentieth century will be studied in depth. This course supplements the Paris studio program. LEC.

ARCH 635. Visualizing Airflow In and Around Buildings. 3 Hours.
It is often difficult to predict the way certain environmental design features will perform if not built and tested which can be costly and time consuming. This course will analyze the performance of such designs in an efficient and cost effective manner within a visual medium using computational fluid dynamics (CFD). CFD will provide a visual understanding of airflow behavior in and around buildings. In addition, thermal comfort and air quality will be investigated in this animated environment. The culmination of the course will be an analysis of a portion of one's studio design project. Prerequisite: ARCH 530. LEC.

ARCH 636. Art of Architectural Machines. 3 Hours.
This course emphasizes architectural trends of the twentieth century, which have been influenced by significant technological advances. The purpose of the course is to familiarize the student with the achievements and failures of architectural concepts that were influenced by modern
technology. Examples will be drawn primarily from buildings and architects in Western Europe and North America. LEC.

ARCH 637. Architecture and Cosmos. 3 Hours.
Ideas of symmetry, harmony, proportion, and ideal form have long been used by architectural theorists and practitioners as a way of translating a traditional knowledge of the world into architectural form. Such traditional knowledge is embedded in the mathematics of Pythagoras, the philosophy of Plato, and the four part study of the cosmos (known in Western thought as “the quadrivium”—arithmetic, geometry, music, and astronomy). This course will entail the study of selected readings in this intellectual tradition as well as the analysis of buildings as they relate to the concepts learned through this study. Prerequisite: ARCH 641, History of Architecture II: Renaissance, or consent of instructor. LEC.

ARCH 638. Architecture, Art and Science. 3 Hours.
This course explores the relationship between architecture and the liberal arts and sciences through the principle of isomorphic correspondence—a term from Gestalt psychology to describe similar structures occurring in different media. Emphasis on the historical connections to music and on aesthetic principles on the natural sciences. Prerequisite: Six hours of architectural history or consent of instructor for non-majors. LEC.

ARCH 639. Current/Historical Directions in Architecture. 2-3 Hours.
A study of contemporary or historical trends in architecture which relate to the development of individual or broad philosophies of architecture. LEC.

ARCH 648. Historic Preservation. 3 Hours.
The focus of this course is on the development of concepts and practices of retrieving, recycling, and curating the built environment from the mid-nineteenth century to the present. After a series of introductory readings and discussions, students are encouraged to investigate particular environmental, technological, social, or ideological questions of their choice, focusing on structures that demonstrate persistence over great distances and, co-existing with this persistence, ability to accommodate changes over time. LEC.

ARCH 650. Architect-Led Design-Build. 1 Hour.
This is a 5-week course covering an introduction to the design-build method of project delivery, highlighting the role of architect as leader of the design-build team. The course covers team structure; ethical issues; forming a design-build firm; project management; licensing, corporate and insurance issues; public design-build laws and bridging. LEC.

ARCH 651. Advanced Design-Build for Architects. 2 Hours.
This is a 10-week course covering a more advanced examination of the design-build method of project delivery, highlighting the role of architect as leader of the design-build team. The course covers team structure; ethical issues; forming a design-build firm; project management; licensing, corporate and insurance issues; public design-build laws and bridging; as well as history, architect-as-prime contractor, architect-as-subcontractor, business issues and marketing, bonding, design-build contracts, cost estimating and OSHA, risks and legal liabilities. LEC.

ARCH 652. Architect-Client Relations. 1 Hour.
The intent of this five-week course is to provide a forum for the examination of varied aspects of the architect-client relationship. Components of this relationship will be explored both from the point of view of the practicing architect and of the project owner or client. LEC.

ARCH 653. Non-Traditional Careers in Architecture. 1 Hour.
The intent of this five week course is to provide a forum for the examination of the wide range of career options that are open to architects. The positive impact, to both the built environment and society as a whole that architects in alternative roles are ideally suited to provide, will be explored. LEC.

ARCH 654. Ethics in Architectural Practice. 1 Hour.
This course is designed to develop an understanding of the underpinnings of ethical reasoning including the structure and vocabulary of moral argumentation; apply this knowledge to common ethical issues confounding contemporary architects, demonstrated through presentations and interaction with leading Kansas City architects, interactive analysis of case studies, participatory discussions, reading comprehension and analytical writing. LEC.

ARCH 655. Programming and Pre-Design Issues. 3 Hours.
This course will introduce the concepts, methods, techniques, and information used by the architect to establish the parameters of a project, prior to entering the formal design process. The course will introduce the student to the social, technical, legal and economic dimensions of architectural programming. The content will introduce the core competencies in programming, site, and environmental analysis required by the profession. Programming theory, research techniques, information analysis, evaluation of significance, and creative synthesis of the multivalent factors acting upon the pre-design process of project definition will be covered. Exercises may include programming and analysis of projects and sites assigned in the Architectural Design Studio sequence. Prerequisite: ARCH 408 and ARCH 409 or ARCH 504. LEC.

ARCH 661. Eighteenth to Twentieth Century American Landscape Design. 3 Hours.
This course will explore eighteenth, nineteenth, and twentieth-century American landscape design including gardens, estates, rural cemeteries, campuses, suburbs, urban parks, and national parks, as well as the beginnings of landscape architecture as a profession. Topics of inquiry will include European contributions to landscape theory, practice, and aesthetics, and American adaptations in response to climatic, social, and political differences. An important focus will be whether one can look at a designed landscape and see the expression of an attitude toward nature. LEC.

ARCH 662. Twentieth Century American Landscape. 3 Hours.
The purpose of this course is to investigate the relationships between the American culture and the resulting built and natural landscape. Issues of building types, public places, and land use arrangements will be studied from a socio-historical perspective. (Same as UBPL 662.) LEC.

ARCH 663. Darwin, Humboldt, and Changing Ideas in Landscape Architecture. 3 Hours.
The seminar explores the influence of the natural historians Alexander von Humboldt and Charles Darwin on American writings in landscape architecture in the late 19th and early 20th centuries. The original texts of Humboldt (including Aspects of Nature and Cosmos) and Darwin (including On the Origin of Species and Insectivorous Plants), will be studied in conjunction with significant authors in landscape architecture including A. J. Downing, George Perkins Marsh, Frederick Law Olmsted, Horace William Shaler Cleveland, Mariana Griswold van Rensselaer, Jens Jensen, Garrett Eckbo, Daniel Kiley, and James C. Rose. The emerging ideas of conservation and ecology found in these works will also be examined. LEC.

ARCH 665. History of Urban Design. 3 Hours.
An exploration of the evolution of cities through the cultural and spatial development of human settlement patterns. The role of cities in the transformations of human culture from tribal communities to post industrial society is defined in terms of the historical origins of urban institutions and functions and their transformation into spatial structure and physical form. LEC.

ARCH 670. Spreadsheet Applications. 1 Hour.
This course will focus on the application of electronic spreadsheets in the management of project fees, company staffing, and business cash flow.
ARCH 671. Database Management. 1 Hour.
This course focuses on the development of database applications to track the information generated during the normal course of business operations. Topics include database design, table creation, queries, forms, reports, and macros. LEC.

ARCH 672. Project Management Software. 1 Hour.
This course uses software packages to manage a simulated design project. The topics in this section include creating tasks and linkages, assigning and managing resources, monitoring a project and creating reports. LEC.

ARCH 673. Presentation Tools. 1 Hour.
This course covers the use of various software packages in the development of on-screen and hard-copy presentations. Topics include presentation design, importing graphics, output strategies, and communications techniques. LEC.

ARCH 674. Electronic Communication. 1 Hour.
This course focuses on the use of electronic data communications in operating a design organization. Topics include use of the Internet, electronic research, telecommunication technologies and remote access. LEC.

ARCH 675. Graphics Packages. 1 Hour.
This course focuses on the development of graphic images. Students are taught to generate vector-based graphics and bit-mapped images that can be incorporated into various software packages. LEC.

ARCH 676. Facility Management: Tools and Techniques. 3 Hours.
The application of Information Technology to Facility Management has changed a formerly basement operation into a center of corporate support. In this course, we explore the use of Computer Aided Facility Management (CAFM) software and its application to real world facility management. LEC.

ARCH 677. Construction Cost Estimating for Architects. 1 Hour.
The main objective of this course is to introduce and inform the student of the processes involved in construction estimating. This course will focus on commercial construction and the fundamentals of estimating a commercial project. This course will acquaint the student with quantity surveying, costing methods, types of estimates, estimating software, the construction estimating process, and estimating the various parts of a project. LEC.

ARCH 678. Construction Project Management for Architects. 1 Hour.
The main objective of this course is to introduce and inform the student of the processes involved in construction project management. This course will focus on commercial construction and the fundamentals of managing a commercial project. The course will acquaint the student with transferring a project from the estimating stage to actual construction, the buyout process, contracts, purchase orders, responsibilities of project managers, responsibilities of superintendents, planning and scheduling, management of changes in a project, financial reporting, accounting processes, payment procedures, and the close-out process in construction. LEC.

ARCH 680. Building with Intelligence. 3 Hours.
This course is intended to be a broad course introducing basis concepts of sustainable design. It will introduce broad outlines of many of the crucial issues facing us in the next few decades. This course identifies how we can re-imagine the relationship between human beings and living systems. The order of the course will begin at a broad overview of our environmental dilemma, then focus upon community issues and end with a close look at green buildings and their systems. This course will include a series of lectures, required reading with written responses, visits to local examples of sustainable buildings and the development of research projects. LEC.

ARCH 681. Defining Community. 3 Hours.
This course explores how a neighborhood is sustainable, or is not. Imbedded in our built landscape are constructs, which once revealed, offer us insight into a community’s values and underlying intentions. We will engage neighborhoods in Lawrence, Kansas, and other community neighborhoods. This seminar course will provide a format for discussion and testing observations of patterns in neighborhoods. Our intent will be to describe the detailed patterns for neighborhoods, houses, and gardens, thereby increasing an understanding of how people inform and are informed by their neighborhoods. This course will include a series of lectures, required reading with written responses, visits to a variety of neighborhoods and the development of research projects. LEC.

ARCH 690. Architecture Study Abroad. 3-6 Hours.
May be repeated up to a maximum of 9 credits. Students participate in a study abroad program approved by the Architecture Chair. Students will be evaluated upon a submitted journal, sketchbook, or equivalent assignments assigned by the instructor. Graded on a satisfactory/fail basis. IND.

ARCH 691. Architecture Practicum. 6 Hours.
Based upon the student’s approved proposal, each student will explore the process of creating the built environment by working in a setting that is intended to provide a new perspective for that student. The range of venues may include non-profit organizations, research settings, hands-on building experiences, and other professional settings as approved by the instructor. Students evaluation will include an assessment by the supervisor in the practicum settings as well as on a final paper using appropriate graphics to illustrate key points. Graded on a satisfactory/fail basis. IND.

ARCH 692. Documentation. 3 Hours.
Students will document their experience in ARCH 690 or another approved study abroad program. This is intended as a critical reflection upon the student’s experience and is additional documentation produced beyond the work done for the study abroad credit. The final product will include a written paper, using appropriate graphics to illustrate key points. IND.

ARCH 693. Workplaces. 3 Hours.
This course is about the design of places where people work. The workplace is important for many reasons. Not only do we spend a considerable amount of our waking life there, but our work often becomes one of the central features of our life. In some senses it can be considered to be a homelike activity; people often identify with their work and personalize their workplaces and make them responsive to their daily life needs. Workplaces are also social places where people meet and interact. And, of course they are also places of work, where they must respond to work needs and be conducive to efficient and productive work activities. This course will raise questions about how to design good workplaces. LEC.

ARCH 694. Homeplaces. 3 Hours.
Architects design buildings and spaces which they hope will contribute to making significant, enriching, and rewarding places. The quality of places, however, is not identical to the quality of buildings which contribute to them. This course will explore ways in which physical environments, in this case, houses can become and be experienced as rich and embraced homeplaces. It will look at the various processes through which residents, dwellers, designers, real-estate agents, builders, and others are involved with home environments. Implications for design and production...
ARCH 697. The Making of Place in an Aging Society. 3 Hours.
This course explores both theoretical and applied perspectives as to how design at the scales of settlement, neighborhood, building and room enables enhanced quality of life for society’s elderly and their families. Discussion will center on readings, case studies and lecture material, with a focus on arriving at a critical understanding of how built fabric choreographs the aging experience. Prerequisite: Graduate standing or consent of instructor. LEC.

ARCH 700. Directed Readings in Architecture: 1-3 Hours.
Individual study of special topics and problems. May be repeated for credit. Prerequisite: Graduate standing. RSH.

ARCH 701. Introduction to Graduate Studies. 3 Hours.
This course will examine issues in architectural research. It will provide an overview of graduate level studies with regard to definitions, methods, skills, and techniques. The course will consist of lectures, seminars, readings and guest presentations. The class will enable students to make informed judgments about matters of quality and quantity on architectural issues. Students will be expected to formulate sensible systems of classification for their chosen material. Students will be expected to produce papers and essays, make sample grant applications, and thesis formulations. Prerequisite: Students must be admitted to the 3.5 or 5 year Master of Architecture Professional plan and have successfully completed ARCH 409 or ARCH 608. LEC.

ARCH 706. Thesis or Project Definition. 1 Hour.
Seminar oriented to the clarification of the thesis or project problem and to the development of the thesis or project proposal. Prerequisite: Graduate standing. RSH.

ARCH 707. Furniture Design and Production. 3 Hours.
The object of this course is an intensive examination of the aesthetic problems of perceiving and making quality objects. Students will be expected to engage in a series of short-term, limited scope design exercises and experiments of an architectural nature. LEC.

ARCH 720. Architectural Acoustics. 3 Hours.
An introduction to the physics of sound. Objective and subjective evaluation and control of sound as applied to architectural spaces. Room shaping, mechanical and electrical system noise and vibration control, and electro-acoustic sound reinforcement. Prerequisite: PHSX 114 and ARCH 626 or equivalent, or consent of instructor. LEC.

ARCH 721. Electro-Acoustical Systems. 3 Hours.
A study of electro-acoustic sound reinforcement and reproduction systems for buildings. Prerequisite: PHSX 212, or consent of instructor. LEC.

ARCH 730. The Environmental Psychology of Health and Well-Being. 3 Hours.
This seminar examines the theories and understandings that address the health and well-being outcomes resulting from the complexity of interaction between human beings, their behavior, and designed systems or objects and how this varies across the life course. Environmental stimulation, orientation, control, restoration and their relationship to health outcomes through mediating concepts including stress, place identity and person-environment fit will be addressed. Students will engage in several research/assessment projects through the semester. Participation in class discussion will be an essential component of the class. Prerequisite: Graduate status or consent of the instructor. LEC.

ARCH 731. Architecture of Health. 3 Hours.
This is a seminar that will focus on the architectural dimensions of health and wellness. The course will investigate the ways the environment contributes to the well being (physical, emotional, spiritual) of people. The history of healthcare environments will be explored to show how healthcare environments have evolved to meet changing medical protocols and environmental technologies. A range of contemporary building types will studied, from critical-care hospitals to assisted-living residences and health spas. Students will research bibliographic sources, prepare case studies of existing health and wellness environments and prepare preliminary planning and design proposals for an environment that human well being. LEC.

ARCH 732. Environmental Pattern Languages. 3 Hours.
An introduction to the theory of pattern languages with particular emphasis on the work of Christopher Alexander; analysis of its relationships to other architectural theories; exploration of its implications for architectural practice. LEC.

ARCH 733. Analogous Thinking in Design. 3 Hours.
This seminar will seek analogs in psychology, medicine, biology, anthropology, and other disciplines; analogs that can serve to develop problem-seeking and problem-solving skills in design. Practice sessions in morphological analysis, synectics, bisociation, and triadization will link rigorous research to methods of application. LEC.

ARCH 735. Graduate Seminar in Environmental Systems. 3 Hours.
The intention of this course is to provide a substantive overview of the literature and themes in environmental systems. It will serve to introduce students to skills required to conduct research in environmental systems. In addition, the course will entertain discussions of students’ works in progress, peer review sessions, and completion of a conference paper. LEC.

ARCH 754. Design Ethics. 3 Hours.
This seminar will explore both Western and Eastern concepts of ethics and morality through readings, papers, discussion, and guest speakers. The role of ethics in providing guideposts for social and societal responsibility in design will be developed. LEC.

ARCH 762. Urban Design Studies. 3 Hours.
Seminar concerned with the factors, processes, techniques, and current issues in urban design practice. LEC.

ARCH 770. Contemporary Issues Seminar I. 1 Hour.
A series of seminars on contemporary issues facing the profession. LEC.

ARCH 771. Contemporary Issues Seminar II. 1 Hour.
These seminars will consist of three to four guest lecturers each semester. All students enrolled in this course will attend the same lecture as ARCH 772. Topics will be selected to reflect major issues covered in the course work, or contemporary issues facing the profession. LEC.

ARCH 772. Contemporary Issues Seminar III. 1 Hour.
These seminars will consist of three to four guest lecturers each semester. All students enrolled in this course will attend the same lecture with ARCH 771. Topics will be selected to reflect major issues covered in the course work, or contemporary issues facing the profession. This course will be graded Satisfactory/Unsatisfactory. LEC.
ARCH 773. Financial and Economic Issues in Architecture Management. 3 Hours.
This course will focus on the fundamentals of accounting, macroeconomics, and the construction industry, and concepts related to the development and implementation of a strategic business plan. LEC.

ARCH 774. Organizational Issues in Architecture Management. 3 Hours.
Topics that will be covered in this course include the organization of a professional practice, personnel management, and the development of effective communication skills. LEC.

ARCH 775. Architecture Management: Managing a CAD System. 3 Hours.
This course covers the various procedures involved in managing a CAD system within a design organization. It also explores the different applications and uses of current CAD technology. Topics to be addressed include: selecting a system; billing CAD services; support services and personnel; marketing CAD; customization, file management, menus and script files; AutoLisp Programming; and integrating CAD with other programs. Prerequisite: An introductory CAD class or permission of the instructor. LEC.

ARCH 776. Project Delivery in Architecture Management. 3 Hours.
Conventional methods for project delivery will be reviewed along with design/build, fast-track, and other techniques. The relationship of the architect and development will also be explored, as will the relationship of project development to urban design concepts. LEC.

ARCH 777. Marketing Architectural Services. 3 Hours.
The emphasis of this course will be on the development and implementation of a marketing plan, techniques related to the marketing of specific projects, and the relationship of marketing to other components of a firm. LEC.

ARCH 778. Legal Issues in Architecture Management. 3 Hours.
A course designed to familiarize the student with legal considerations related to professional practice. Case studies and selected readings will serve as the basis for discussion of registration, contracts, business formation, taxes, employment practices, copyright, and patent law. In addition, the course will draw upon the knowledge and experience of members of the professional community. LEC.

ARCH 790. Architectural Study Abroad: ______. 1-3 Hours.
Organized field visits and study of selected architectural and urban sites abroad. Pre- and post-travel readings on themes selected to supplement and reinforce thesis or project research or areas of concentration. Students will be expected to maintain a diary and/or sketch book and submit a final paper. Prerequisite: Graduate standing and permission of instructor. FLD.

ARCH 799. Independent Study. 1-3 Hours.
May be repeated for credit up to a total of nine (9) credits. Prerequisite: Graduate standing and consent of instructor. IND.

ARCH 800. Special Topics in Architecture: ______. 1-3 Hours.
Advanced or experimental courses on specialized topics representing unique or changing needs and resources in the graduate program in architecture. LEC.

ARCH 801. Urban and Community Issues I. 6 Hours.
A workshop-based course involving approved self and group directed investigations into issues of urban and community design with a focus on problem-setting, discovery and analysis. Prerequisite: Successful completion of ARCH 609 and consent of the Architecture Program Chair. LAB.

ARCH 802. Urban and Community Issues II. 6 Hours.
Continuation of the critical and rigorous investigations into issues of urban and community design with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 801. LAB.

ARCH 803. Design-Build and Materiality I. 6 Hours.
A workshop-based course involving approval self and group directed investigations into issues of design-build and/or materiality with a focus on problem-setting, discovery and analysis. Prerequisite: Successful completion of ARCH 609 or ARCH 704 and consent of the Architecture Program Chair. LAB.

ARCH 804. Design-Build and Materiality II. 6 Hours.
Continuation of the critical and rigorous investigations into issues of design-build and/or materiality with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 803. LAB.

ARCH 805. Architectural Technology I. 6 Hours.
A workshop-based course involving approved self and group directed investigations into issues of building technology with a focus on problem-setting, discovery and analysis. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Successful completion of ARCH 609 and consent of the Architecture Program Chair. LAB.

ARCH 806. Architectural Technology II. 6 Hours.
Continuation of the critical and rigorous investigations into issues of building technology with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 805. LAB.

ARCH 807. Healthy and Sustainable Environments I. 6 Hours.
A workshop-based course involving approved self and group directed investigations into healthy and sustainable environments with a focus on problem-setting, discovery and analysis. Prerequisite: Successful completion of ARCH 609 and consent of the Architecture Program Chair. LAB.

ARCH 808. Healthy and Sustainable Environments II. 6 Hours.
Continuation of the critical and rigorous investigations into healthy and sustainable environments with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 807. LAB.

ARCH 809. Building Typology I. 6 Hours.
A workshop-based course involving approved self and group directed investigations into a particular building type with a focus on problem-setting, discovery and analysis. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Successful completion of ARCH 609 and consent of the Architecture Program Chair. LAB.

ARCH 810. Building Typology II. 6 Hours.
Continuation of the critical and rigorous investigations into a particular building type with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 809. LEC.

ARCH 811. Architectural Investigation I. 6 Hours.
A workshop-based course involving approved self and group directed investigations in a particular area of architectural investigation with a focus on problem-setting, discovery and analysis. Prerequisite: Successful completion of ARCH 609 and consent of the Architecture Program Chair. LAB.

ARCH 812. Architectural Investigation II. 6 Hours.
Continuation of the critical and rigorous investigations in a particular area of architectural investigation with an increasing focus on synthesis and evaluation. Prerequisite: ARCH 811. LAB.

ARCH 830. Designing Healthy Places and Communities. 3 Hours.
This seminar investigates the research-based evidence regarding health outcomes at four different levels of dwelling: settlement, institution, home and proximate. Research domains that will be explored include how the
urban fabric impacts active living; the role of public parks in urban health; environmental factors on health outcomes in hospitals and workplaces; environmental pathogens in the home; and ergonomic health. Healthy design will be understood as an important variable impacting people’s health by: increasing physical activity; reducing injury; improving air and water quality; minimizing environmental degradation; decreasing mental health stresses; and strengthening social fabric. Environmental assessment audits appropriate at various scales as well as space syntax as an analytic tool will be introduced and utilized. Participation in class discussion will be an essential component of the class. The semester will include a problem-based service-learning project requiring application of research in a real-life setting and active student reflection. Prerequisite: Graduate status or consent of the instructor. LEC.

ARCH 850. Special Topics in Management/Practice: _____, 2-3 Hours. Advanced or experimental courses on specialized topics representing unique or changing needs and resources in the management/practice option. IND.

ARCH 852. Ethics and Leadership in Professional Practice. 3 Hours. This course takes the perspective that architectural design is inherently an ethical act. Through this lens, students will learn the essentials of office practices, the many definitions of client and their roles in the design process, the legal responsibilities of the profession, the importance of continuous professional development and the obligation the profession has to provide civic leadership in regard to the built and natural environment. LEC.

ARCH 858. Architectural Management Systems. 3 Hours. Graduate course that investigates current issues in construction technologies and management techniques. LEC.

ARCH 899. Thesis or Project Research. 1-6 Hours. Independent study, research and project work leading to the submission of a master’s thesis or master’s project. May be repeated up to a maximum of two (2 credits). Prerequisite: Admission to the Ph.D. in Architecture Program or consent of the Architecture Program Chair. LEC.

MASTER OF ARCHITECTURE (5-YEAR)

Master of Architecture (Track I: 5+ Year Program)

The Master of Architecture is an NAAB-accredited professional degree program and is an essential aspect of preparing for the professional practice of architecture. Graduates of this program who complete a recognized internship program (such as the Intern Development Program) and successfully complete the Architectural Registration Examination are able to become licensed architects.

Track I is designed for students entering from high school or transferring from another undergraduate program. The curriculum is designed so as to be completed within 5 calendar years, but to do so demands sustained concentration and focus. We highly recommend that students consider leveraging the available time by planning to spend one summer between their first and fourth years in residence in Lawrence, taking a studio and another course.

The 180 credit curriculum is divided into three segments: Foundations, Core and Professional Options.

The Foundations segment involves three foundation design studios and three introductory lecture courses examining the discipline of architecture. A unique aspect of our program is that immediately upon commencing their studies at KU, first year students enter into architecture-specific design studios and are immediately ensconced in the program’s culture.

The Core is a five-semester sequence that addresses the wide range of skills and understanding required for the practice of architecture, including history and theory, technology, professional practice, and integrating this knowledge within design projects of increasing scale and complexity. The core culminates in a comprehensive studio experience in which students demonstrate their readiness to enter the profession of architecture.

Professional Options. The architecture profession has become an extremely diverse field. Seeking to provide our students the greatest opportunity within that diversity, the final year of the curriculum allows a student to explore a more-focused professional option of their choosing. This experience allows students to craft an area of specialization or a
domain of architecture that may otherwise be addressed superficially within a professional curriculum. Currently students are investigating design-build processes, researching sustainable design practices, pursuing healthcare and urban design as areas of specialization and engaging in service-learning opportunities around the globe.

Within the 180 credits required to graduate, students will also have a study abroad experience and complete coursework in a variety of other academic disciplines. Students will be exposed to the social sciences, the physical sciences, the humanities and the arts. Study abroad options currently include spending a semester in Denmark, Germany, England, or Australia, travel to Siena and Berlin, a technology and culture tour of Italy and France, travel to South America or working in an international architecture office in Paris.

Career Opportunities

The M.Arch. is a NAAB accredited professional degree. The following options are open to students after they complete it:

1. Graduates may seek to refine and augment their professional capabilities through experience in an office under a licensed architect. Such experience qualifies the graduate for admission to the appropriate examination for licensing and practice as an architect or may precede admission to graduate school. Increasingly, graduates are finding alternative career options, including work in urban design, design-build firms, interior design, historic preservation, and many others.

2. Qualified students may pursue graduate study in Ph.D. in architecture programs or in areas related to architecture and environmental design, such as urban planning, law, psychology, social welfare, public administration, or business.

Professional Registration and Licensing

Although state laws vary, professional registration as an architect in Kansas involves completion of three aspects: receiving an accredited professional degree (such as the M.Arch.), completion of internship requirements (for information on the Intern Development Program, see www.ncarb.org) and successful completion of all sections of the Architectural Registration Examination (http://www.ncarb.org) (ARE). Upon successful completion of these three aspects, the applicant may use the title “architect” and may practice as an architect, either as an individual or as a licensed professional in an office under a licensed architect. Such experience qualifies the graduate for admission to the appropriate examination for licensing and practice as an architect.

Applications

Applications for fall semester should be submitted during the student’s senior year in high school. The priority application deadline is November 1, and the final application deadline is February 1. Completed applications are reviewed, and applicants are notified of their admission status. A complete application includes sixth-semester transcript, rank in class, ACT scores, and a list of courses in progress. Applications received after February 1 are considered but are less likely to be accepted due to space limitations.

Transfer students should apply by October 1 for the spring semester and by the priority deadline of November 1 for the summer and fall terms. The final application deadline is February 1. Space limitations apply to transfer students. Transfer applications received after February 1 are likely to be denied for reasons not connected with the applicant’s academic qualifications. The School of Architecture, Design and Planning encourages applications from women and members of minority groups.

High School Students

High school students are encouraged to apply for admission if they have a cumulative GPA of at least 3.2 and have a minimum ACT of 23 or a minimum SAT of 1050 and if they will meet the following preparation requirements by the time they graduate:

- 3 or more years of math ending with calculus (preferred),
- 3 or more years of natural science including physics,
- 3 or more art/drawing classes. Art/drawing classes are preferred over additional drafting or technical courses (1 semester of drafting is adequate),
- 2 or more years of foreign language (recommended).

Although students who do not meet these minimum thresholds may apply to the Department of Architecture, they are encouraged to enroll in the College of Liberal Arts and Sciences for a preliminary year of study.

Within the 180 credits required to graduate, students will also have a study abroad experience and complete coursework in a variety of other academic disciplines. Students will be exposed to the social sciences, the physical sciences, the humanities and the arts. Study abroad options currently include spending a semester in Denmark, Germany, England, or Australia, travel to Siena and Berlin, a technology and culture tour of Italy and France, travel to South America or working in an international architecture office in Paris.

Undergraduate Admission

First-year and transfer students may be admitted to the 5-year Master of Architecture degree program. Contact:

University of Kansas
Michael Swann, Associate Dean,
School of Architecture, Design and Planning (http://www.sadp.ku.edu)
Marvin Hall
1465 Jayhawk Blvd., Room 206
Lawrence, KS 66045-7626
archku@ku.edu

For undergraduate applications, write to:

KU Office of Admissions (http://admissions.ku.edu)
KU Visitor Center

1502 Iowa St.
Lawrence, KS 66044-7576
785-864-3911
adm@ku.edu
**Transfer Students**

Transfer students may be admitted, if space is available, and if they have an overall grade-point average of 3.0.

**International Students**

The School of Architecture, Design and Planning admits only exceptional students from other countries. Standards for admission are set according to the traditions and grading policies of those countries. In some countries, for example, the grade of A is almost never given, while in other countries the A grade is more frequently seen. The number of students admitted depends on the space available on February 1.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

**Master of Architecture Degree Requirements**

Credit hours in the 5-year Master of Architecture curriculum are distributed as follows:

- **Design/Synthesis** 61
- **Architecture Support Courses** 58
- **Architecture Electives** 15
- **General Education Courses** 46

Students must maintain a 2.0 grade-point average to remain in good standing and to graduate.

The core of the curriculum is a sequence of design studios composing approximately 1/3 of the total degree requirements. Students complete sequences in graphics, structures, building construction, environmental technology, and architectural history and meet a study abroad requirement. Course work in site planning, urban design, and professional practice completes the professional content.

In addition to professional courses, students are expected to complete course work in a variety of academic disciplines, reflecting the interdisciplinary nature of architecture. These general education requirements include course work in mathematics, physics, English, communication, humanities and Western civilization, fine arts, and the natural and social sciences.

In the final year of the program, students participate in a chosen year-long professional option. Options are defined by faculty strengths and the emerging needs of the profession. They offer students the opportunity to focus in a particular area of interest that is one of the professional choices or specializations available after graduation. These currently include Design-Build, Health and Wellness, Globalized Practice, Urban Design, and Architectural Investigations.

- Students in the Design-Build option participate in our national award-winning Studio 804, where they collaboratively design and build a sustainable house for moderate-income families.
- Students in the Health and Wellness option are expected to complete a 7-month professional work experience in an architectural firm engaged in design for health followed by a service-learning studio.
- Globalized Practice introduces students to the increasingly multinational nature of architectural practice; students are placed in an internship abroad for a semester followed by a competition studio in the final semester.
- Those in the Urban Design option participate in the fifth year in the Kansas City Urban Design Studio in downtown Kansas City, Missouri, offered with Kansas State University.

**Requirements and Policies**

**Distribution Courses**

**Oral Communication (3)**

Select one of the following: 3

- COMS 130 Speaker-Audience Communication
- COMS 230 Fundamentals of Debate
- PHIL 148 Reason and Argument
- PHIL 310 Introduction to Symbolic Logic

**Western Civilization (6)**

- HWC 204 Western Civilization I 3
- HWC 205 Western Civilization II 3

**Environmental and Social Sciences (6)**

- EVRN 148 Scientific Principles of Environmental Studies 3
- GEOG 102 Principles of Human Geography 3

**Natural Sciences (3)**

Select one of the following: 3

- BIOL 100 Principles of Biology
- BIOL 116 Introduction to Evolutionary Biology
- GEOL 101 The Way The Earth Works
- GEOL 105 History of the Earth
- GEOL 121 Prehistoric Life: DNA to Dinosaurs

**Fine Arts (9)**

Select one of the following: 3

- HA 265 Introduction to Asian Art
- HA 266 The Visual Arts of East Asia
- HA 267 Art and Culture of Japan
- HA 268 Art and Culture of China
- HA 269 Art and Culture of Korea

Select one of the following: 3

- MUSC 136/336 Masterworks of Music 3
  - 3 hours of performance

**Electives (9)**

Selected outside of architecture 9

**Study Abroad Requirement**

Students must fulfill a 9-credit-hour study abroad requirement. This requirement gives students an experience completely different from their previous educational careers and provides some preparation for the increasingly globalized architectural profession. There are several ways in which students may meet this requirement:

1. Participation in any of the school’s academic-year or semester study abroad programs in Germany, England, Denmark, and Australia automatically fulfills the study abroad requirement; however, to fulfill the total degree requirements, students must complete an additional 9 hours of electives.
2. Participation in any school-directed short-term study abroad program, usually in the summer (but including any during regular semesters), meets the requirement. These programs vary from 3 to
9 credit hours, and several may be combined (not necessarily in the same semester) to total 9 hours.

3. Participation in any university-sponsored study abroad programs or programs at other college-level institutions approved by KU for transfer credit meets the requirement. These programs, including summer programs, vary from 3 to 6 credit hours and may be combined with one another or with school-directed programs (including ARCH 692) to total 9 hours.

4. Enrollment in ARCH 691 (3-6 hours) meets the requirement. The practicum component is one option for earning a portion of the 9 hours. Students who choose this option are required, through special scholarship programs, to take advantage of short-duration, intensive study abroad experiences (e.g., Western Civilization London Spring Break, 2-week summer programs, etc.) to earn a minimum of 3 hours in a study abroad experience to complete the 9-hour requirement. Note: ARCH 691 requires approval of the student's proposal by the architecture chair.

5. International students, for whom enrollment in the school is already a study abroad experience, automatically meet the requirement; however, to fulfill the total degree requirements, they may need to complete an additional 9 hours of electives.

All students are encouraged to meet with their faculty advisors by the end of the second year to begin planning to fulfill the study abroad requirement.

This is an ambitious program of study, averaging 17 credit hours a semester, plus a summer of study abroad. Given the number of general education hours in the fourth and fifth years, it is highly recommended that students either

1. attempt to enter with advanced-placement credit for general education courses such as calculus, physics, environmental studies, or geography and/or
2. plan to take 6 hours of general education requirements during a summer (this may be completed at a local community college).

In addition to the 5-year course of study outlined above, there is a 12-semester curriculum sequence that averages 15 credit hours a semester. It serves students interested in semester or academic-year study abroad opportunities or students who want to take more time to complete the program.

**Portfolio Requirement**

All students must maintain a record of work as they proceed through the program. This must be in the form of an 8½" x 11" portfolio (exceptions to the required format may be approved by the faculty) and must include examples of at least one major project from each semester of the design sequence, starting with the foundations studios in the first year. It is recommended that all major projects be included in the portfolio as well as selected examples of work from support and elective courses such as building technology, construction documents, and photography. The portfolio is a prerequisite for advancement in the studio course sequence and may be requested by the studio critic on the first day of class.

**Studio Grading Policy**

Work evaluated as “satisfactory” is graded C. Work evaluated as “more than satisfactory” is graded B. Work evaluated as “exceptional” is graded A. Work evaluated as “less than satisfactory” is graded D. Work evaluated as “failing” is graded F. Information on the studio grade appeal procedure is available in the architecture department office.

If a student receives a grade of D in a design studio in any semester, he or she is placed on notice by the school, regardless of overall grade-point average. To be removed from this status, the student must perform satisfactory work in the next semester of design. If in any subsequent semester the student receives another grade of D, he or she must repeat that studio before advancing in the sequence. If the student receives a grade of D in 2 consecutive studios, he or she must repeat the entire design year in which the first D was given.

**Probation/Dismissal Policy**

Student records are reviewed after each semester. A student is placed on probation if the KU semester or cumulative grade-point average is below 3.0. Students placed on probation are sent a letter stating the length of probation and the requirements for being returned to good standing. A student on probation may be continued on probation for one more semester if the following KU semester and cumulative grade-point averages show considerable improvement, but the cumulative grade-point-average is lower than 3.0. A student may be dismissed for poor scholastic performance if any of the following situations apply:

1. Fail and spring KU semester or cumulative grade-point averages are below 3.0 with no considerable improvement.
2. The student has been placed on probation and has failed to meet the conditions required to return to good standing.
3. The student has repeatedly failed to make progress toward graduation.

**Reinstatement**

Appeals for reinstatement may be submitted to the department’s probation committee, 206 Marvin Hall. A student reinstated has one semester to return to good standing.

**Good Standing**

Students with KU semester and cumulative grade-point-averages of 3.0 or above are in good standing.

**Honor Roll**

Students enrolled in at least 14 graded hours per semester will be considered for Architecture’s Honor Roll distinction each semester. The top 10% of the enrolled undergraduate class will qualify for the status of Honor Roll. This distinction is placed on the student’s KU transcript.

**Computer Requirement**

All third-year students and above in the Master of Architecture program must supply a computer for digitally based architectural studios. Students must follow a checklist of minimum hardware- and software-requirements when they purchase a computer. The specifications for architectural studio computing are on the school’s website (http://www.sadp.ku.edu).

**Substitution of Courses**

A student who wishes to select certain courses not in the prescribed curriculum may petition through the chair at the department office. Petitions for substitution of courses are considered at any time except after the beginning of the student’s last semester.

**Credit for ROTC Courses**

Students may enter the Reserve Officers Training Corps to train for commissions as regular or reserve officers. An allowance of 6 hours of military science, aerospace studies, or naval science may be substituted for free electives in the M.Arch. program. A student who enters one of the
ROTCl programs but discontinues military training and does not receive a commission may not apply credits for ROTC courses toward a degree in architecture. If a student does not receive a commission because of circumstances beyond his or her control (such as a medical discharge), he or she may use ROTC credits as part of the requirements for the degree as indicated above.

Activity Courses
The School of Architecture, Design and Planning does not accept physical education activity courses for fulfilling graduation requirements.

Studio Enrollment/Selection Process
KU’s online enrollment system allows students in each year level to enroll in an order based on the number of college credit hours completed (then by grade-point average, then by age). To eliminate the disadvantage that this imposes on some students in the selection of their studio instructor and to discourage students from repeating the same instructor for design studio, the architecture department has developed alternative processes for studio enrollment, which are used at the department’s discretion.

Career Opportunities
The M.Arch. is a NAAB accredited professional degree. The following options are open to students after they complete it:

1. Graduates may seek to refine and augment their professional capabilities through experience in an office under a licensed architect. Such experience qualifies the graduate for admission to the appropriate examination for licensing and practice as an architect or may precede admission to graduate school. Increasingly, graduates are finding alternative career options, including work in urban design, design-build firms, interior design, historic preservation, and many others.

2. Qualified students may pursue graduate study in Ph.D. in architecture programs or in areas related to architecture and environmental design, such as urban planning, law, psychology, social welfare, public administration, or business.

Professional Registration and Licensing
Although state laws vary, professional registration as an architect in Kansas involves completion of three aspects: receiving an accredited professional degree (such as the M.Arch.), completion of internship requirements (for information on the Intern Development Program, see www.ncarb.org (http://www.ncarb.org) (ARE). Upon successful completion of all sections of the Architectural Registration Examination (http://www.ncarb.org) (ARE), the applicant may use the title “architect” and may practice as an architect, either as an individual or as a licensed professional in an office performing professional services.

Prescribed Curriculum
Master of Architecture (5-year)
A total of 180 credit hours is required. Substitutions in the prescribed curriculum may be made only by petition to the department.

Students are in Undergraduate Status for enrollment first 4 years and begin Graduate Status enrollment the final year of this program.

**Bachelor of Arts in Architectural Studies**

**Architectural Studies, The B.A. Path**

The B.A. in Architectural Studies is designed to serve as a platform or foundational degree for students who plan to specialize in architecture and other disciplines that focus on the design, planning and construction of the built environment. It exposes students to ideas and practices currently followed in all of the School’s design disciplines and it focuses on many of the business, communications and organizational skills that are not covered in the technical requirements of the graduate curricula. Students at KU who start in the B.A. in Architectural Studies, co-enroll in graduate professional degrees and take courses that count toward the B.A. and the graduate professional degree.

Some students may opt to complete the 124-credit B.A. without continuing and completing the additional year (or two) required to finish one of the professional degree paths. The four-year, 124-credit course of study that leads to a Bachelor of Arts (B.A.) in Architectural Studies prepares students for graduate education in many other fields such as law, business, government, facility management, and public administration that are enhanced by a broad knowledge of architecture. It also prepares them for work in a number of fields related to architecture.

Students who complete the B.A. and later wish to become licensed architects may pursue a professionally accredited Master of Architecture degree. This educational path may include KU’s accredited M.Arch III or it may include a three-year M.Arch III at one of the many other architecture schools that offer this graduate professional degree.

NOTE: Students admitted to the B.A. Architectural Studies degree prior to 2014 must follow the 4-year, 124-credit curriculum in place at the time of their admission. (see the KU Academic Catalog for 2013).

**Undergraduate Admission**

First-year and transfer students may be admitted to the B.A. in architectural studies degree program. Contact:

University of Kansas  
Michael Swann, Associate Dean,  
School of Architecture, Design and Planning (http://www.sadp.ku.edu)  
Marvin Hall  
1465 Jayhawk Blvd., Room 206  
Lawrence, KS 66045-7626  
archku@ku.edu

For undergraduate applications, write to:  
KU Office of Admissions (http://admissions.ku.edu)  
KU Visitor Center  
1502 Iowa St.

**Application**

Applications for fall semester should be submitted during the student’s senior year in high school. The priority application deadline is **November 1**, and the final application deadline is **February 1**. Completed applications are reviewed, and applicants are notified of their admission status. A complete application includes sixth-semester transcript, rank in class, ACT scores, and a list of courses in progress. Applications received after February 1 are considered but are less likely to be accepted due to space limitations.

Transfer students should apply by **October 1** for the spring semester and by the priority deadline of **November 1** for the summer and fall terms. The final application deadline is **February 1**. Space limitations apply to transfer students. Transfer applications received after February 1 are likely to be denied for reasons not connected with the applicant’s academic qualifications. The School of Architecture, Design and Planning encourages applications from women and members of minority groups.

**High School Students**

High school students are encouraged to apply for admission if they have a cumulative GPA of at least 3.2 and have a minimum ACT of 23 or a minimum SAT of 1050 and if they will meet the following preparation thresholds by the time they graduate:

- 3 or more years of math ending with calculus (preferred).  
- 3 or more years of natural science including physics,  
- 3 or more art/drawing classes. Art/drawing classes are preferred over additional drafting or technical courses (1 semester of drafting is adequate),  
- 2 or more years of foreign language (recommended).

Although students who do not meet these minimum thresholds may apply to the Department of Architecture, they are encouraged to enroll in the College of Liberal Arts and Sciences for a preliminary year of study.

During the first semester of this preliminary year, students should complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 105</td>
<td>Introduction to Topics in Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 115</td>
<td>Calculus I</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>ARCH 103</td>
<td>Introduction to Architecture</td>
<td>3</td>
</tr>
<tr>
<td>Electives</td>
<td></td>
<td>6</td>
</tr>
</tbody>
</table>

During the second semester, students should complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHSX 114</td>
<td>College Physics I</td>
<td>1-4</td>
</tr>

<td>3</td>
</tr>
<tr>
<td>ARCH 540</td>
<td>Global History of Architecture I: Origins to Industrial Revolution (3500 BCE-1700 CE)</td>
<td>3</td>
</tr>
<tr>
<td>Electives</td>
<td></td>
<td>6</td>
</tr>
</tbody>
</table>

Students already at the University of Kansas may apply to the B.A. in Architectural Studies program by February 1 for admission the following fall. Students must have a cumulative college GPA of 3.0 or higher and

**Total Hours: 180**
space must be available to be admitted to the B.A. in Architectural Studies program.

**Transfer Students**

Transfer students may be admitted, if space is available, if they have an overall grade-point average of 3.0.

**International Students**

The School of Architecture, Design and Planning admits only exceptional students from other countries. Standards for admission are set according to the traditions and grading policies of those countries. In some countries, for example, the grade of A is almost never given, while in other countries the A grade is more frequently seen. The number of students admitted depends on the space available on February 1.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

**Requirements for the B.A. in Architectural Studies**

A minimum of 124 hours is required, including 45 hours of courses numbered 300 or above.

**Requirements and Policies**

**Probation/Dismissal Policy**

Student records are reviewed after each semester. A student is placed on probation if the KU semester or cumulative grade-point average is below 2.0. Students placed on probation are sent a letter stating the length of probation and the requirements for being returned to good standing. A student on probation may be continued on probation for one more semester if the following KU semester and cumulative grade-point averages show considerable improvement, but the cumulative grade-point-average is lower than 2.0. A student may be dismissed for poor scholastic performance if any of the following situations apply:

1. Fall and spring KU semester or cumulative grade-point averages are below 2.0 with no considerable improvement.
2. The student has been placed on probation and has failed to meet the conditions required to return to good standing.
3. The student has repeatedly failed to make progress toward graduation.

**Reinstatement**

Appeals for reinstatement may be submitted to the department’s probation committee, 206 Marvin Hall. A student reinstated has one semester to return to good standing.

**Good Standing**

Students with KU semester and cumulative grade-point-averages of 2.0 or above are in good standing.

**Honor Roll**

Students enrolled in at least 14 graded hours per semester will be considered for Architecture’s Honor Roll distinction each semester. The top 10% of the enrolled undergraduate class will qualify for the status of Honor Roll. This distinction is placed on the student’s KU transcript.

**Computer Requirement**

All third-year students and above in the Master of Architecture program must supply a computer for digitally based architectural studios. Students must follow a checklist of minimum hardware- and software-requirements when they purchase a computer. The specifications for architectural studio computing are on the school’s website (http://www.sadp.ku.edu).

**Substitution of Courses**

A student who wishes to select certain courses not in the prescribed curriculum may petition through the chair at the department office. Petitions for substitution of courses are considered at any time except after the beginning of the student’s last semester.

**Credit for ROTC Courses**

Students may enter the Reserve Officers Training Corps to train for commissions as regular or reserve officers. An allowance of 6 hours of military science, aerospace studies, or naval science may be substituted for free electives in the M.Arch. program. A student who enters one of the ROTC programs but discontinues military training and does not receive a commission may not apply credits for ROTC courses toward a degree in architecture. If a student does not receive a commission because of circumstances beyond his or her control (such as a medical discharge), he or she may use ROTC credits as part of the requirements for the degree as indicated above.

**Activity Courses**

The School of Architecture, Design and Planning does not accept physical education activity courses for fulfilling graduation requirements.

### Bachelor of Architectural Studies and Undergraduate Certificate conferred

**B.A. Architectural Studies - Master of Architecture**

#### Architectural Studies, The B.A. Path

**The B.A. – M.Arch. Path**

The B.A.-M.Arch. path at the University of Kansas is designed to give students seeking a professional, accredited Master of Architecture degree the skills in design, visualization, and technology that are required in a professional architecture degree. It also provides formal, advanced instruction in the communication, business, organizational and interpersonal skills that have become especially important in the 21st century.

Students who pursue the 173-credit, six-year B.A.-M.Arch. path of study receive a B.A. in Architectural Studies, an Undergraduate Certificate in one of KU’s specialized programs (Leadership, Entrepreneurship, Research, etc) and a professional accredited Master of Architecture degree. Approximately one-third of the credits in this path focus on the B.A. degree core and the KU Core Curriculum and the remaining two-thirds involve professional course work.

Years 1 through 3 include studios, workshops and courses that focus on architecture, design and planning while students are also completing the KU Core. Years 4 through 6 focus on the design/synthesis and technical support classes that are central to the accredited professional degree.

The B.A.-M.Arch. path is highly appropriate for students who intend to become practicing architects and also have multiple academic interests or believe they may be interested in pursuing more than one professional degree.

### Undergraduate Admission

First-year and transfer students may be admitted to the B.A. in architectural studies degree program. Contact:

University of Kansas

Master of Architecture conferred.

B.A. Architectural Studies - M.A. Environmental Design

The B.A. – M.A. Design Path

In a highly competitive economy where the success of a building such as a stadium, restaurant, retail boutique, museum or theater rests as much on the user’s experience as it does on a building’s performance, cost or look, the successful design of interior environments is critical. Traditional approaches in interior design and interior architecture lack the specialized and technology-based focus on individual experience that an environmental design degree path offers through the special fusion of course work in architecture, interior design and interaction design.

The B.A. – M.A. Environmental Design degree path is offered by the School’s Architecture and Design departments. It allows architecture students to combine the skills and knowledge obtained in the Architectural Studies degree core with basic interior design and interior architecture skills and techniques offered in professional enrichment classes.

Students complete a rigorous sequence of courses in interaction design that includes the research skills needed to design extraordinary spaces that respond to the needs and perceptions of different individuals. In addition, they are trained to use emerging technologies to customize environments for different purposes.

Students in this degree path also have the opportunity to develop leadership and entrepreneurial skills in one of KU’s Undergraduate Certificate Programs and, more importantly, they go well beyond the basic professional practice training found in a traditional interior design or interior architecture degree with specialized course work in design management.

In addition to the challenges offered by this rigorous sequence of courses, students can participate in professional internships and they have the opportunity to engage in research projects conducted within the School’s highly recognized Center for Design Research. Within this 154-credit degree path, the B.A. is awarded by the Architecture Department and the NASAD-accredited M.A. in Environmental Design is awarded by the Department of Design.

Undergraduate Admission

First-year and transfer students may be admitted to the B.A. in architectural studies degree program. Contact:

Application

Applications for fall semester should be submitted during the student’s senior year in high school. The priority application deadline is November 1, and the final application deadline is February 1. Completed applications are reviewed, and applicants are notified of their admission status. A complete application includes sixth-semester transcript, rank in class, ACT scores, and a list of courses in progress. Applications received after February 1 are considered but are less likely to be accepted due to space limitations.

Transfer students should apply by October 1 for the spring semester and by the priority deadline of November 1 for the summer and fall terms. The final application deadline is February 1. Space limitations apply to transfer students. Transfer applications received after February 1 are likely to be denied for reasons not connected with the applicant’s academic qualifications. The School of Architecture, Design and Planning encourages applications from women and members of minority groups.

High School Students

High school students are encouraged to apply for admission if they have a cumulative GPA of at least 3.2 and have a minimum ACT of 23 or a minimum SAT of 1050 and if they will meet the following preparation thresholds by the time they graduate:

• 3 or more years of math ending with calculus (preferred),
• 3 or more years of natural science including physics,
• 3 or more art/drawing classes. Art/drawing classes are preferred over additional drafting or technical courses (1 semester of drafting is adequate),
• 2 or more years of foreign language (recommended).

Although students who do not meet these minimum thresholds may apply to the Department of Architecture, they are encouraged to enroll in the College of Liberal Arts and Sciences for a preliminary year of study.
During the first semester of this preliminary year, students should complete:

- MATH 105 or MATH 115: Introduction to Topics in Mathematics 3
- ENGL 101: Composition 3
- ARCH 103: Introduction to Architecture 3
- Electives 6

During the second semester, students should complete:

- PHSX 114: College Physics I 1-4
- ENGL 102: Critical Reading and Writing 3
- ARCH 540: Global History of Architecture I: Origins to Industrial Revolution (3500 BCE-1700 CE) 3
- Electives 6

Students already at the University of Kansas may apply to the B.A. in Architectural Studies program by February 1 for admission the following fall. Students must have a cumulative college GPA of 3.0 or higher and space must be available to be admitted to the B.A. in Architectural Studies program.

**Transfer Students**

Transfer students may be admitted, if space is available, if they have an overall grade-point average of 3.0.

**International Students**

The School of Architecture, Design and Planning admits only exceptional students from other countries. Standards for admission are set according to the traditions and grading policies of those countries. In some countries, for example, the grade of A is almost never given, while in other countries the A grade is more frequently seen. The number of students admitted depends on the space available on February 1.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

**M.A. Design (Environmental Design) conferred.**

**B.A. Architectural Studies - M.U.P. Plan**

Urban Planning, the B.A. – M.U.P Path
Urban planners work with civic leaders, residents and businesses to develop new solutions to community problems. They help leaders envision the direction their community will grow and find the right balance of new development and services, environmental protection, and innovative change.

Urban planners are trained to protect the environment, to create housing for people, to preserve historic buildings and places, to design public spaces, to develop alternative transportation choices, to foster economic development and to craft healthy communities. Good urban planning creates communities that offer better choices for living. Planners help people make their communities more convenient, healthful, efficient, fair and attractive. Good planning improves the welfare of people and communities in the present and for the future.

The B.A.-M.U.P. degree path is offered jointly by the Architecture and Urban Planning departments. It includes the basic elements of the B.A.--studies, workshops, certificate program, basic professional and general enrichment electives and the KU Core Curriculum, along with core courses in planning history, theory and methods as well as specialized classes in environmental planning, housing and development planning, land use planning and urban design, and transportation planning.

The Master of Urban Planning (M.U.P.) degree is the normal academic qualification for those who wish to become professional planners. An M.U.P. degree opens doors to careers in environmental conservation, housing, economic development, historic preservation, real estate development, and many other areas. State, city and local governments as well as private companies and nonprofit agencies employ planners. There are planning jobs in such areas as health care delivery, criminal justice, education, public finance and law.

Students in the B.A.-M.U.P. track have the opportunity to shorten the usual 6-year period required to complete a bachelor's degree and the M.U.P. by one full year of study. Students who achieve a GPA of 3.25 by the end of their third year of study, and complete the appropriate B.A. requirements shown in the B.A.-M.U.P. Plan will spend their fourth year in the B.A. degree completing the first year of courses required in the M.U.P. These urban Planning classes are used to satisfy remaining undergraduate requirements so that students receive the B.A. degree at the end of their fourth year. This also allows students to finish the second and final year of M.U.P. work in their fifth year at KU, when they would also be awarded the accredited M.U.P. degree.

### Undergraduate Admission

Master of Urban Planning degree conferred.

B.A. Architectural Studies - M.C.M. Plan

The B.A. – M.C.M. Path
The rise of the design-build approach in the production of buildings has made architectural training as well as a solid grounding in business essential educational elements in the Construction Management profession. The leadership of complex design-build teams that involve architects, engineers, clients, building contractors, building systems experts, and multiple consultants involves knowledge of the many subfields that inform the building process as well as advanced interpersonal and communication skills.

At the same time, the constant emergence of new design and construction technologies, the development and use of new building materials and the application of new performance and sustainability standards highlight the need for architectural training in the development of professional construction managers.

The B.A. – M.C.M. degree path at KU is a cooperative program involving the SADP Architecture Department and the Department of Civil, Environmental and Architectural Engineering in KU’s School of Engineering. It allows architecture students to enroll in construction management courses while they are completing studios, workshops and

other courses required in the Architectural Studies degree core. The 154-credit path draws heavily on courses in both schools that directly address the issues described above.

B.A. –M.C.M. students begin with the Architectural Studies core, and move quickly into professional enrichment courses in Construction Management. They must complete one of KU’s Undergraduate Certificate Programs (including programs in Leadership and Entrepreneurship) as part of the degree path and they have sufficient general enrichment electives to include a minor in Business as well.

**Undergraduate Admission**

First-year and transfer students may be admitted to the B.A. in architectural studies degree program. Contact:

University of Kansas  
Michael Swann, Associate Dean,  
School of Architecture, Design and Planning (http://www.sadp.ku.edu)  
Marvin Hall  
1465 Jayhawk Blvd., Room 206  
Lawrence, KS 66045-7626  
archku@ku.edu

For undergraduate applications, write to:  
KU Office of Admissions (http://admissions.ku.edu)  
KU Visitor Center  
1502 Iowa St.  
Lawrence, KS 66044-7576  
785-864-3911  
adm@ku.edu

**Application**

Applications for fall semester should be submitted during the student’s senior year in high school. The priority application deadline is **November 1**, and the final application deadline is **February 1**. Completed applications are reviewed, and applicants are notified of their admission status. A complete application includes sixth-semester transcript, rank in class, ACT scores, and a list of courses in progress. Applications received after February 1 are considered but are less likely to be accepted due to space limitations.

Transfer students should apply by **October 1** for the spring semester and by the priority deadline of **November 1** for the summer and fall terms. The final application deadline is **February 1**. Space limitations apply to transfer students. Transfer applications received after February 1 are likely to be denied for reasons not connected with the applicant’s academic qualifications. The School of Architecture, Design and Planning encourages applications from women and members of minority groups.

**High School Students**

High school students are encouraged to apply for admission if they have a cumulative GPA of at least 3.2 and have a minimum ACT of 23 or a minimum SAT of 1050 and if they will meet the following preparation thresholds by the time they graduate:

- 3 or more years of math ending with calculus (preferred),
- 3 or more years of natural science including physics,
- 3 or more art/drawing classes. Art/drawing classes are preferred over additional drafting or technical courses (1 semester of drafting is adequate),
- 2 or more years of foreign language (recommended).

Although students who do not meet these minimum thresholds may apply to the Department of Architecture, they are encouraged to enroll in the College of Liberal Arts and Sciences for a preliminary year of study.

During the first semester of this preliminary year, students should complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 105</td>
<td></td>
</tr>
<tr>
<td>or MATH 115</td>

<tr>
<td>ENGL 101</td>
<td></td>
</tr>
<tr>
<td>ARCH 103</td>
<td></td>
</tr>
<tr>
<td>Electives</td>
<td>6</td>
</tr>
</tbody>
</table>

During the second semester, students should complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHSX 114</td>
<td></td>
</tr>
<tr>
<td>ENGL 102</td>
<td></td>
</tr>
<tr>
<td>ARCH 540</td>
<td></td>
</tr>
<tr>
<td>Electives</td>
<td>6</td>
</tr>
</tbody>
</table>

Students already at the University of Kansas may apply to the B.A. in Architectural Studies program by February 1 for admission the following fall. Students must have a cumulative college GPA of 3.0 or higher and space must be available to be admitted to the B.A. in Architectural Studies program.

**Transfer Students**

Transfer students may be admitted, if space is available, if they have an overall grade-point average of 3.0.

**International Students**

The School of Architecture, Design and Planning admits only exceptional students from other countries. Standards for admission are set according to the traditions and grading policies of those countries. In some countries, for example, the grade of A is almost never given, while in other countries the A grade is more frequently seen. The number of students admitted depends on the space available on February 1.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Master of Architecture (3-year)

Master of Architecture 3-year

Students who have completed or are completing a bachelor’s degree and who wish to pursue professional careers as licensed architects may apply for admission to this program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor Architecture, Master of Architecture and the Doctor of Architecture. A program may be granted a 6-year, 3-year or 2-year term of accreditation, depending on the extent of its conformity with established educational standards.

Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

This Master of Architecture degree is accredited by the National Architectural Accrediting Board (NAAB). Students who have completed previous course work in an approved NAAB architecture curriculum or a pre-professional architectural degree program may achieve advanced standing. All requests for advanced standing are evaluated using the minimum qualifications for graduate study at KU, the student performance criteria established by NAAB, and procedures approved by the architecture graduate studies committee. This degree requires a sequence of 6 semesters and 2 summers of architectural design studio/synthesis experiences, each of which is accompanied by associated professional graduate courses, constituting a total of 118 credit hours. The program also has a required study abroad component, planned to occur during a student’s second summer.

There are 4 typical entry points to this curriculum:

1. Students without backgrounds in architecture who hold bachelor’s degrees in non-design-oriented disciplines enter the first year of the curriculum which begins in the summer session. The first year of the curriculum is 2 academic semesters and 2 summer sessions. The total number of credit hours required is 118.

2. Students without backgrounds in architecture who hold bachelor’s degrees in a design discipline usually begin course work with the fall semester of the first year. Other curricular requirements may potentially be waived after a careful vetting of the student’s educational background. The total number of credit hours required for graduation is likely to be approximately 109.

3. Students with a pre-professional degree in architecture, such as a Bachelor of Arts in Architectural Studies, are likely to be placed in the second year of the curriculum if they have background in design studio. This is commonly referred to as the 4+2 option. Students interested in being placed in this way should make this clear in their statements. These students normally are asked to complete four studios (synthesis experiences), a study abroad summer experience, and architecture support courses whose number and content are determined on a case-by-case basis. The total number of credit hours required for graduation depends on the student’s previous preparation and is highly variable, but is likely to
be approximately 75 hours.

4. Students who already possess an accredited professional Bachelor of Architecture degree generally enter a three-semester program that requires a study abroad experience during a summer session as well as the final year of the curriculum. The total number of credit hours required for graduation depends on the student’s previous preparation and is highly variable, but a minimum of 36 hours is required.

Joint 3-Year M.Arch.-B.S. in Architectural Engineering Option

This program is for students who have completed all requirements for the Bachelor of Science (B.S.) degree in architectural engineering. (See specific degree requirements in the Department of Civil, Environmental, and Architectural Engineering (p. 553) section of the online catalog.) The B.S. in architectural engineering is an ABET-accredited professional degree that requires a minimum of 5 years and 164 credit hours to complete.

Architectural engineering students who wish to complete an accredited Master of Architecture degree in addition to the B.S. in architectural engineering should apply for admission to the school’s 3-year M.Arch. program by February 1 of the final year in architectural engineering. The application includes the completed application form and appropriate fee, a statement of purpose, and a portfolio of work. Assuming good performance in previous design studios, students are likely to receive advanced placement into the M.Arch. curriculum (normally into the second year of study).

Dual Master of Architecture and Master of Business Administration Degree Program

The Master of Business Administration/Master of Architecture dual degree program is designed particularly for students intending to pursue leadership opportunities in architecture, development, or construction. The M.B.A./M.Arch. program requires 4 years of study, 1 year less than it would take to earn each degree separately.

Students completing the dual degree program earn an M.B.A. from the KU School of Business (http://www.business.ku.edu) and an M.Arch. from the KU School of Architecture, Design and Planning (http://www.sadp.ku.edu). Students complete 112 credits in the 3-year Master of Architecture program and 37 credits in the School of Business. Prospective dual degree students must already be students in the Master of Architecture program and must apply and be accepted by the School of Business. New students must complete the first year of the architecture curriculum before starting the M.B.A. curriculum and must declare their intention before completing the second year of the architecture curriculum.

For information, consult the school websites and program chairs. See also the Master of Business Administration (p. 227) section of the online catalog.

Joint Master of Architecture and Master of Urban Planning

This joint degree combines in a 4-year program the normal 2-year Master of Urban Planning (p. 93) degree and the 3-year M.Arch. degree, both offered through the School of Architecture, Design and Planning. The program is intended for students interested in careers in urban design. A total of 133 credit hours is required, comprising 39 hours in urban planning and 94 hours in architecture. Applicants must meet admission requirements of both the Department of Architecture and the Department of Urban Planning. Students pursuing the M.Arch. may apply to the joint degree program during, but not after, the second year of study. Students pursuing the M.U.P. may apply to the joint degree program during, but not after, the first year of study.

Graduate Admission

Regardless of background or career goals, a person whose previous records indicate the ability to succeed with advanced work may be admitted to one of the graduate programs. Admission requires a bachelor’s degree and a grade-point average of 3.0 from KU or another accredited institution or foreign university with substantially equivalent requirements for the bachelor’s degree. The academic background is reviewed before a student without a bachelor’s degree is admitted as a degree-seeking graduate student at KU. A complete application for admission consists of the following materials:

1. Graduate application (http://www.graduate.ku.edu).
2. One unofficial transcript where the undergraduate degree is confirmed and one copy of the transcript where any graduate degree/credit was earned (if applicable).
3. Three letters of recommendation from persons qualified to comment on the applicant’s intellectual abilities and probable success in graduate study.
4. Application fee, nonrefundable check or money order payable to the University of Kansas (See Admission in the Graduate Studies (p. 2059) section of the online catalog for further information).
5. Evidence of language proficiency if the native tongue is not English, including
   a. A degree from an English-language college or university or
   b. Receipt of official copy of applicant’s proficiency scores achieved not more than 2 years before the semester of admission: IELTS scores: minimum overall score 6.5 with no part score below 6.0; TOEFL scores (iBT): all part scores at least 23; TOEFL scores (CBT): all part scores at least 23 and essay score of at least 5; TOEFL scores (paper): all part scores at least 57 and essay score of at least 5.
6. A statement of interest indicating the applicant’s career goals and the relationship of these goals to the specific option chosen (Those seeking advanced placement in the M.Arch. program should make this clear in this statement.).
7. A portfolio of work demonstrating the candidate’s strengths. Examples may include design or creative work and writing samples. The portfolio is limited to 10 megabytes (not zipped) in PDF format. Upload under other documents.
8. Graduate Record Examination (GRE) test results.
9. For international students, a financial statement showing minimum financial support for the first year of study (see the admissions page on the school’s website (http://www.sadp.ku.edu)).

Submit your graduate application and upload all application materials online (http://www.graduate.ku.edu). Please contact the Admissions Coordinator if you have any questions:

Master of Architecture Degree Requirements

M.Arch. Curriculum (3-year)

The curriculum is designed in 3 parts. The first 2 semesters plus 2 summer sessions offer an accelerated education in the foundations of architecture as a professional discipline. The second academic year emphasizes professional development, with the comprehensive studio as a capstone experience. The third and final year offers students a choice of options for an inquiry of enhanced depth typical in graduate education. This allows students to develop a specialization by the time they complete the professional degree. The timing of course offerings is subject to change. Please visit the school’s website (http://www.sadp.ku.edu) for the most current information.

Master of Arts in Architecture: Academic-Research Track

Introduction

The post-professional M.A. in Architecture offers 2 distinct programs. The architectural management program (p. 66) is oriented to the administration and practice of architecture and related disciplines. The research-based academic program is offered on the Lawrence campus. It is for the student who is interested in exploring various approaches in analyzing the built environment. A student with an undergraduate degree in architecture or a related discipline may enter this course of study. To receive the master’s degree, each student must complete an academic or design-related project or must take a comprehensive examination at the end of the plan of study.

This program is for the student who is interested in the study of architecture from an academic and scholarly perspective. A student who wishes to pursue graduate study in architecture at KU must submit a statement of intent detailing academic interests and career goals. Students from this program have established a strong academic tradition and won honors in national research competitions. The key to their success has been the careful selection of research topics and the ways these topics have paralleled the academic and professional interests of the architecture faculty.

For students admitted to the academic/research program at the master’s level in architecture in Lawrence, a total of 36 credit hours of course work is required. Each student must enroll in a 3-hour course dealing with research methods.

In addition to the core courses, each student must complete a minimum of 15 graduate credit hours in a concentration. With the consent of the student’s advisor and the approval of the graduate studies committee, the student may take a maximum of 12 hours of graduate credit in course work outside the School of Architecture, Design and Planning. 6 hours in the 36-hour course of study are composed of course work in which the student prepares a written project or thesis, or in additional course work in the student’s concentration to prepare for a final written examination.

Graduate Admission

Regardless of background or career goals, a person whose previous records indicate the ability to succeed with advanced work may be admitted to one of the graduate programs. Admission requires a bachelor’s degree and a grade-point average of 3.0 from KU or another accredited institution or foreign university with substantially equivalent requirements for the bachelor’s degree. The academic background is reviewed before a student without a bachelor’s degree is admitted as a degree-seeking graduate student at KU. A complete application for admission consists of the following materials:

1. Graduate application (http://www.graduate.ku.edu);
2. One unofficial transcript where the undergraduate degree is confirmed and one copy of the transcript where any graduate degree/credit was earned (if applicable);
3. Three letters of recommendation from persons qualified to comment on the applicant’s intellectual abilities and probable success in graduate study;
4. Application fee, nonrefundable check or money order payable to the University of Kansas (See Admission in the Graduate Studies section of the online catalog for further information);
5. Evidence of language proficiency if the native tongue is not English, including
   a. A degree from an English-language college or university or
   b. Receipt of official copy of applicant’s proficiency scores achieved not more than 2 years before the semester of admission:
      - IELTS scores: minimum overall score 6.5 with no part score below 6.0
      - TOEFL scores (iBT): all part scores at least 23
      - TOEFL scores (paper): all part scores at least 57 and essay score of at least 5;
6. A statement of interest indicating the applicant’s career goals and the relationship of these goals to the specific option chosen (Those seeking advanced placement in the M.Arch. program should make this clear in this statement.);
7. Graduate Record Examination (GRE) test results.
8. For international students, a financial statement showing minimum financial support for the first year of study (see the admissions page on the school’s website (http://www.sadp.ku.edu)).

Submit your graduate application and upload all application materials online (http://www.graduate.ku.edu). Please contact the Admissions Coordinator if you have any questions:

The University of Kansas  
Department of Architecture  
Marvin Hall  
1465 Jayhawk Blvd., Room 206  
Lawrence, KS 66045-7626

Be sure to check the school’s website (http://www.sadp.ku.edu) for updates to the admission process or requirements.

Following is a selected list of recently offered courses in each of the 4 concentrations. Students should consult the most current course listing of the architecture department to determine which courses will be offered each semester.

History/Theory
- Architectural History
- History of Urban Design
- Space and Poverty
- Theorizing Vernacular Architecture
- 20th Century American Landscapes

Technology/Practice
- Design Thinking
- Electro-Acoustics
- Facility Management: Tools & Techniques
- Graduate Seminar in Environmental Systems
- Integrated Materials, Structures, and Systems
- Visualizing Airflow

Design/Methods
- Computer Applications
- Building Information Modeling

- Portfolio Development
- Architectural Morphology
- Geographical Information Systems

Urban/Social Issues
- Architecture of Health
- Environmental Psychology of Health & Wellbeing
- Healthy Buildings, Healthy Communities
- Homeplaces
- The Making of Place in an Aging Society
- Socialist Cities

Master of Arts in Architecture: Architectural Management Track

The post-professional M.A. in Architecture offers 2 distinct programs. The architectural management program is oriented to the administration and practice of architecture and related disciplines. It is offered on the KU Edwards Campus (http://edwardscampus.ku.edu) in Overland Park. Classes in this program are intended to

1. Provide students with the skills and knowledge necessary to become effective participants in the management of a design organization;
2. Provide information about the management of planning, design, and construction projects; and
3. Expose students to management issues facing the design professions.

The curriculum draws on the disciplines of business management, planning, computer science, law, and architecture to expose students to fundamental concepts of management as they relate to the business of architecture. A total of 36 credit hours of course work is required. The curriculum consists of required courses in Financial and Economic Issues, Organizational Issues, Project Delivery, Law and the Design Professions, Marketing, and Contemporary Issues in Architectural Management. Students may enroll in 9 to 12 hours of graduate credit outside the required courses in the architectural management curriculum. Three to six hours in the 36-hour course of study are fulfilled in the preparation of a written project or thesis, or in additional course work in an area of management to prepare for a final written examination.

Graduate Admission

KU Edwards Campus

The architectural management post-professional program is offered on the KU Edwards Campus (http://edwardscampus.ku.edu) in Kansas City. This course of study focuses on management issues in the practice of architecture. It is designed for working professionals and structured to be completed on a part-time basis.

Graduate Admission

Regardless of background or career goals, a person whose previous records indicate the ability to succeed with advanced work may be admitted to one of the graduate programs. Admission requires a bachelor's degree and a grade-point average of 3.0 from KU or another accredited institution or foreign university with substantially equivalent
The requirements for the bachelor’s degree. A complete application for admission consists of the following materials:

Lawrence, KS 66045-7626

Be sure to check the school’s website (http://www.sadp.ku.edu) for updates to the admission process or requirements.

The Curriculum
The requirements for the degree comprise 36 credit hours, distributed as follows:

Contemporary Issues Seminars (3 credit hours)

These seminars consist of three to four guest lecturers each semester. All students enrolled in these courses attend the same lectures. Topics are selected to reflect current problems facing the design professions. Students typically enroll in ARCH 770 the first semester, ARCH 771 the second semester, and ARCH 772 the third semester. Students must complete all of the following:

ARCH 770 Contemporary Issues Seminar I (1)
ARCH 771 Contemporary Issues Seminar II (1)
ARCH 772 Contemporary Issues Seminar III (1)

Basic Architectural Management Classes (15 credit hours)

Students must complete all of the following:

ARCH 773 Financial and Economic Issues (3). Focuses on the Fundamentals of financial planning and budgeting for a design firm. Covers the development and implementation of a business plan and emphasizes the application of financial control techniques to the management of design organizations.

ARCH 774 Organizational Issues (3). Covers the organization of a professional practice, personnel management issues, and the development of effective communication skills. Case studies and class exercises are used to develop an understanding of the stages in the growth of an organization, the role of management in successful firms, and the responsibility of the individual in the organization.

ARCH 776 Project Delivery (3). Conventional methods for project delivery are reviewed, along with design-build, fast-track, and other approaches. Team building techniques and the relationship of the design professional to the development process are also explored. The effective management of time, project scheduling, and delegation of authority are covered.

ARCH 777 Marketing of Professional Services (3). Emphasizes the development and implementation of a marketing plan, techniques related to the marketing of specific types of projects, and the relationship of marketing to other components of a firm.

ARCH 778 Design Professional and the Law (3). Covers legal doctrines relating to owners, design professionals, and contractors. Also emphasizes sources of the law; forms of association and agency; contracts, duties and obligations of the design professional, owner and contractor; and related legal topics.

Electives (12-15 credit hours)
Students must complete 12 to 15 credit hours of elective course work dealing with related areas of management. These courses can include more specialized seminars and classes in Architectural Management that are offered periodically but are not part of the regular curriculum. Recently offered electives in Architectural Management include:

Advanced Marketing in Architecture
Architecture-Client Relations
Architect-Led Design-Build
Bidding and Estimating for Architects
Construction Management for Architects
Electronic Communications
Facilities Management: Tools and Techniques
Non-Traditional Careers in Architecture
Project Management Software

Classes can also be selected from other graduate programs such as Construction Management, Engineering Management, and Business Administration at the KU Edwards Campus, or they may be taken from appropriate graduate programs on the main campus in Lawrence. The Architectural Management Program may also accept up to 6 hours of graduate courses taken at another institution, depending on their applicability to the curriculum.

Completion Requirements (3-6 credit hours)
Students have two options to complete the program: a research project or a comprehensive examination.

Option 1: The Comprehensive Examination. Upon completion of the Contemporary Issues Seminars, the Basic Architectural Management Classes, and...
Elective Classes (12-15 credit hours), students may take a two-part comprehension of the core curriculum and understanding of an area of specialized knowledge developed through elective classes.

**Option 2: The Research Project.** The student enrolls in ARCH 706 Thesis or Project Definition (1 credit hour) and develops a proposal for a research project.

The proposal is submitted to a faculty adviser and committee for review. Once the proposal is accepted, the student may begin working on the project for credit.

Students may propose research related to current work experience or responsibilities, or they may choose to explore new areas of interest. The research project usually emphasizes the application of management techniques to the practice of architecture or design. Students receive up to 6 hours of credit for completing the research project option.

**Doctor of Philosophy in Architecture**

**Introduction**

Architecture is inherently an interdisciplinary field of study, integrating knowledge from art, science, and the humanities. As a method of practice, it is a complex, collaborative, professional activity aimed at improving the quality of life for people and the planet. The discipline requires creative, critical, agile, and integrative thinking. Architecture deals with highly complex problems and aims to solve them not only competently, but in a way that ennobles society. The curriculum responds to these considerations by offering a series of overlapping sequences in professional and academic course work.

The Ph.D. in Architecture educates students to become more valuable to society through academic, business, and government organizations that require greater artistic, scientific, and investigative skills. It offers candidates opportunities to develop and deepen their education in 3 important ways:

- Enhancing research and analytical skills with rigorous methods of inquiry and synthesis;
- Acquiring advanced knowledge specific to their area(s) of inquiry through comprehensive scholarly investigations and distinguished documentation; and
- Developing the ability to communicate knowledge in a clear and eloquent manner.

To realize this goal, the faculty has made a commitment to create, along with doctoral students, a climate in which scholarship and creativity can flourish. Underlying the advanced study of architecture at KU is an ethic regarding architectural inquiry and architectural practice; one that sustains the question, “What ought we do as architects and researchers to enhance the quality of life on this planet?” Examples of inquiry at KU that exemplify this underlying question are

- Progressive models of practice embracing evidence-based design and design-build practices;
- Affordable housing with a sensitive aesthetic;
- Material investigations to create more affordable and sustainable building practices;
- Rigorous evaluations of built artifacts to inform better design practice;
- Translation of empirical findings of person-place interaction research into design guidelines; and
- Critical perspectives on human settlement patterns.

Our research is founded on an ethical position. We are not involved in research simply to generate knowledge for its own sake but rather to improve the human condition through more thoughtful built form. The overall focus is on developing understanding that may inform the critical delivery processes by which humane architecture is created.

**Note:** Contact your department or program for more information about the Research and Skills and Responsible Scholarship requirement for doctoral students.

**Graduate Admission**

Regardless of background or career goals, a person whose previous records indicate the ability to succeed with advanced work may be admitted to the Ph.D., Architecture. Admission requires a bachelor’s degree and a grade-point average of 3.0 from KU or another accredited institution or foreign university with substantially equivalent requirements for the bachelor’s degree. The academic background is reviewed before a student without a bachelor’s degree is admitted as a degree-seeking graduate student at KU. A complete application for admission consists of the following materials:

1. Graduate application (http://www.graduate.ku.edu).
2. Curriculum Vitae or resume.
3. A statement of interest outlining reasons for pursuing the Ph.D. (not to exceed 1500 words).
4. 1 unofficial copy of the transcript where the undergraduate degree was confirmed and 1 copy of the transcript where any graduate degree/credit was earned.
5. 3 letters of recommendation from persons qualified to comment on the applicant’s intellectual abilities and probable success in graduate study.
6. Application fee, nonrefundable check or money order payable to the University of Kansas (See Admission in the Graduate Studies (p. 2059) section of the online catalog for further information).
7. Evidence of language proficiency if the native tongue is not English, including
   a. A degree from an English-language college or university or
   b. Receipt of official copy of applicant’s proficiency scores achieved not more than 2 years before the semester of admission:
      - IELTS scores: minimum overall score 6.5 with no part score below 6.0;
      - TOEFL scores (iBT): all part scores at least 23;
      - TOEFL scores (CBT): all part scores at least 23 and essay score of at least 5;
      - TOEFL scores (paper): all part scores at least 57 and essay score of at least 5,
8. One research-informed writing sample (example: published article, manuscript, report, thesis) (limited to 10 megabytes). Upload under “other documents.”
9. Exhibit of work illustrating the applicant’s interests and abilities in areas related to the design disciplines (limited to 10 megabytes, not zipped, in PDF format).
10. Graduate Record Examination (GRE) test results.
11. For international students, a financial statement showing minimum financial support for the first year of study (see the admissions page on the school’s website (http://www.sadp.ku.edu)).

Submit your graduate application and upload all application materials online (http://www.graduate.ku.edu). Please contact the Admissions Coordinator if you have any questions:

The University of Kansas
Department of Architecture
Marvin Hall
1465 Jayhawk Blvd., Room 206
Lawrence, KS 66045-7626

Be sure to check the school’s website (http://www.sadp.ku.edu) for updates to the admission process or requirements.

Ph.D. Degree Requirements

General Plan of Study

The Ph.D. in Architecture degree program is carefully crafted to allow students to engage in rewarding and potentially revolutionary scholarly investigation steeped in an atmosphere of rigorous academic pursuit. The 49-credit-hour curriculum is divided into three parts: foundation, concentrations, and advanced study. In the foundation, students must take the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCH 930</td>
<td>1</td>
</tr>
<tr>
<td>ARCH 931</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 951</td>
<td>3</td>
</tr>
<tr>
<td>Research Skills</td>
<td>3</td>
</tr>
<tr>
<td>Advanced Methods</td>
<td>3</td>
</tr>
<tr>
<td>ARCH 958</td>
<td>1</td>
</tr>
<tr>
<td>ARCH 959</td>
<td>4</td>
</tr>
</tbody>
</table>

Concentrations are major (12 credit hours minimum) and minor (9 credit hours minimum) curricula developed by the student in concert with the major professor. The student becomes a candidate upon passing the comprehensive examination. As a candidate, the student enters the advanced studies portion of the curriculum and begins work on the dissertation. The student must be continuously enrolled, including summer sessions, until all requirements for the degree are completed. A minimum of 9 dissertation credit hours is required for the degree. What follows under “Degree Plan” is a sample plan of study.

<table>
<thead>
<tr>
<th>Year 1</th>
<th>Fall</th>

Graduate Certificate Program in Facilities Management

Overview

The graduate certificate in facilities management, based at the KU Edwards Campus (http://edwardscampus.ku.edu) in Overland Park, offers a structured program that addresses the graduate educational needs of facility managers. This 15-credit-hour program keeps practicing professional facility managers abreast of the most innovative developments in each area of facilities management and helps students acquire more specialized knowledge in areas important to their careers.

The curriculum consists of 15 hours of course work divided into 3 components: a required 3-credit-hour course on Facility Management: Issues and Overview; 9 hours of specialized 1-credit-hour workshops that cover trends and innovations in each of the principal knowledge areas identified by the International Facility Management Association; and a 3-credit-hour Capstone Seminar focused on solving multidisciplinary facility problems.

Admission

The graduate certificate in facility management program is offered on the KU Edwards Campus (http://edwardscampus.ku.edu) in Kansas City. This course of study focuses on management issues in the practice of facility management. It is designed for working professionals and structured to be completed on a part-time basis.

Regardless of background or career goals, a person whose previous records indicate the ability to succeed with advanced work may be admitted to the Graduate Certificate in Facility Management. Admission requires a bachelor’s degree and a grade-point average of 3.0 from KU or another accredited institution or foreign university with substantially equivalent requirements for the bachelor’s degree. A complete application for admission consists of the following materials:

1. Graduate application (http://www.graduate.ku.edu).
2. One unofficial transcript where the undergraduate degree is confirmed and one copy of the transcript where any graduate degree/credit was earned (if applicable).
3. Application fee, nonrefundable check or money order payable to the University of Kansas (See Admission in the Graduate Studies section of the online catalog for further information).
4. Evidence of language proficiency if the native tongue is not English, including...
a. A degree from an English-language college or university or
b. Receipt of official copy of applicant’s proficiency scores
achieved not more than 2 years before the semester of
admission:IELTS scores: minimum overall score 6.5 with no
part score below 6.0;
TOEFL scores (iBT): all part scores at least 23;
TOEFL scores (paper): all part scores at least 57 and essay
score of at least 5.

5. A statement of interest indicating the applicant’s career goals and
the relationship of these goals to the specific option chosen.

6. For international students, a financial statement showing minimum
financial support for the first year of study (see the admissions page
on the school’s website [http://www.sadp.ku.edu]).

Submit your graduate application and upload all application materials
online (http://www.sadp.ku.edu). Please contact the Admissions
Coordinator if you have any questions:

The University of Kansas
Department of Architecture
Marvin Hall
1465 Jayhawk Blvd., Room 206
Lawrence, KS 66045-7626

Be sure to check the school’s website (http://www.sadp.ku.edu) for
updates to the admission process or requirements.

Graduate Certificate Program in Facilities Management

The Curriculum

The 15 credits of course work that make up this program are divided into
three components: an Introduction, a Core of workshops, and a Capstone,
research-based seminar.

Component 1: Introduction to the Program (3 credits)

An introductory, 3-credit, semester-long class provides a starting point.
Focused on current issues and comprehensive in its coverage of the
various areas that are generally included within Facility Management, this
course helps to establish a common base of knowledge for participants
from the four groups mentioned above. It provides a useful context for
the highly focused technical workshops that constitute the Core of the
program. This common introductory course is described as follows.

Facility Management: Issues and Overview (3 credits).

This class is designed to cover emerging issues that are affecting
the practice of Facility Management (globalism, increased security
concerns, breakthroughs in building technologies, etc.) and how they
influence the critical areas of Facility Management, such as planning,
project management, business procedures, and facility operation and
maintenance. The course runs an entire semester with 15 three-hour
sessions, each meeting one evening per week at the Edwards Campus.
The class involves numerous guest speakers and students are assigned
readings, team-based projects, and other directed learning activities.

Component 2: The Core of the Program (9 credits)

Individuals in this program will already have varying degrees of
experience in the management of facilities. As noted above, some
will have general business backgrounds while others may have more
specialized training in engineering or architecture and others might be
more proficient in construction, interior design or safety and security
issues. To accommodate these differences in training, background and
experience and to allow for constant updating of the more specialized
content of this program, the central or Core component of the curriculum
consists of 9 different categories of workshops, each of which addresses
important topics within one of the principal knowledge areas that make up
a standard Facility Management degree.

Because students in the program have experience in Facility
Management, they are not required to cover all 9 of the different topical
workshops. Instead, they may select a mix of workshops that meet their
own specific needs and even substitute other appropriate graduate-level
classes in order to meet the 9-credit Core requirement.

Two or three of these one-credit, five-week workshops are offered each
semester. The entire set of 9 workshops is offered over a four-semester
period and the cycle is repeated every two years. The focus or subject
matter of the workshops in each of the 9 categories may change each
time they are offered, depending upon the recommendations of the
program’s professional advisory committee, faculty availability and
expertise, and student demand. The goal of each workshop is to build
upon basic practical knowledge within each category and to address
specific Facility Management challenges, practices and problems that are
affected by emerging issues in the profession. For example, Workshop
G: Planning and Project Management could cover methods of forecasting
and managing space usage the first time it is offered and, the next time
it is taught, it might focus on new software packages that are useful in
managing small internal construction projects. The idea is to craft each of
the workshops to current topics and local demand.

The nine categories of topical workshops are listed below.

Workshop A: Operational and Maintenance Issues (1 credit).
This workshop may cover topics related to:
1) life safety and security issues and crisis management;
2) building systems and maintenance assessment; and
3) building information modeling, computer-aided facility maintenance.

Workshop B: Business Issues (1 credit).
This workshop may cover topics related to:
1) organizational issues for facility managers;
2) human resources issues; and
3) risk management, contracts and other legal issues.

Workshop C: Real Estate and Property Issues (1 credit).
This workshop may cover topics related to:
1) site planning, analysis and selection;
2) real estate development and planning; and
3) master planning.

Workshop D: Financial Issues (1 credit).
This workshop may cover topics related to:
1) financial analysis of facility decisions (e.g., life cycle costing, etc.);
2) budgeting procedures and techniques for facilities offices; and
3) constructing and implementing a business plan for facilities.

Workshop E: Human and Environmental Factors (1 credit).
This workshop may cover topics related to:
1) the impact of facilities/environments on individual and group
performance, behavior and satisfaction;
2) environmental health and safety issues, regulation and liability; and
3) facility needs of diverse user groups.
Workshop F: Facility Assessment (1 credit).
This workshop may cover topics related to:
1) the application of research skills in solving facility problems;
2) post-occupancy facility evaluation; and
3) presentation, interpretation and evaluation of research/assessment results.

Workshop G: Planning and Project Management (1 credit).
This workshop may cover topics related to:
1) general project management procedures, issues and software;
2) facility documentation, inventory, forecasting and programming; and
3) linking facility plans to larger business plans.

Workshop H: Communication Techniques (1 credit).
This workshop may cover topics related to:
1) effective personal and professional communication skills;
2) the use of current electronic communication media; and
3) interpersonal communication, conflict resolution and group communication.

Workshop I: Technological Innovation (1 credit).
This workshop may cover topics related to:
1) recent advances in intelligent building systems;
2) the achievement of sustainability through intelligent building systems and appropriate building materials; and
3) the promotion of health and wellness through design and technological innovation.

Component 3: The Culmination of the Program (3 credits)

Following or concurrent with the completion of the Core workshop requirement, participants in the program will complete a Capstone Seminar in which they will have an opportunity to use, in a highly integrated and very practical fashion, the knowledge, methods and techniques covered in the Introduction and Core of the program.

Capstone Seminar: Solving Facility Problems (3 credits)
This final class is led by an instructor who will work with each participant to identify, focus and carry out a contained individualized project that uses information, most likely collected from the student’s place of employment, to solve a facility problem using the formal methods, strategies and knowledge covered in the Core of the program. The product will be a professional report, presented within the seminar. In some cases, these integrative capstone research projects might be carried out by teams, particularly if they have a high degree of complexity and a significant breadth of managerial and planning issues.

Additional Available Courses
A variety of other courses closely related to the Core workshops listed above are offered regularly on the Lawrence Campus and, through various graduate programs, at the Edwards Campus. Each semester, the School of Architecture and Urban Planning schedules a dozen or more elective classes, many of which carry graduate credit and focus on such topics as Intelligent Building Systems, Laboratory Design, Lighting Systems, Building Acoustics, Power Systems and the like. Some of these courses are also offered in the evening. Students may request to substitute courses such as these, where appropriate, for Core workshop credits in the Graduate Certificate Program in Facility Management. Similarly, a number of classes are offered each semester in the Architectural Management program at the Edwards Campus including courses in Project Management, Legal Issues, Financial Management, Construction Management, Construction Bidding and Estimating, and the like. These classes may also be substituted for Core workshop credits in the Certificate Program, where appropriate and with permission. Other Edwards Campus classes in graduate programs ranging from Engineering Management to Communications and Public Administration may also be available on a permission basis and may be substituted for Certificate Program requirements, if appropriate.

Please Note: The Office of Graduate Studies at the University of Kansas does not allow courses taken at other institutions to be applied toward the requirements of a graduate certificate program.

Department of Design

Introduction
The Department of Design advances the professional work of thoughtful, creative, and meaningful design to delight, inspire, and serve the needs of people. Design is the planning that lays the basis for creation and development of every object or system people use. Design programs train students to be problem solvers who consider the aesthetic, functional, and user-focused aspects of an object or a process. This requires considerable integrative research, thought, modeling, interactive adjustments, and redesign.

KU is an accredited institutional member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Undergraduate Programs
The department offers a professional B.F.A. degree program with concentrations in
- Environmental Design,
- Illustration and Animation,
- Industrial Design,
- Photo Media,
- Visual Communication Design.

Courses for Nonmajors
Students in other KU schools may enroll in design courses for credit, subject to the availability of classroom space, with the permission of the instructor of the course.

Course Policies
To get the most out of the courses and grow as a young designer, students need to approach the course work with a serious attitude and a willingness to work beyond just doing what is asked. Design is a very competitive and challenging profession, but for those who find a way to be engaged with the work and enjoy being challenged, the demands are well worth meeting and the rewards are truly fulfilling. Courses are taught with this philosophy as a backdrop. Students are expected to commit themselves and to work hard, every day, not just for better grades, but for the enjoyment that the work brings and the creative growth and skill development that comes with it.

Attendance
Students are required to attend class. Please be in class on time and remain for the entire period. Attendance will be taken at the beginning of each class period. Three “late” marks will equal one absence. Leaving
class early will be counted the same as arriving late. A total of 3 absences will be allowed for any reason. More than 3 absences will be grounds for being dropped from the course. If it is necessary for you to be absent more than 3 classes for any reason, including medical condition, you are advised to withdraw from the class.

In the event of any absence, students are still responsible for obtaining all information and materials from the class period and completing all assignments on time. It is your sole responsibility to find out about any new work assigned during your absence.

Religious Holidays
If any scheduled course meeting conflicts with mandated religious observance, the student must notify the instructor prior to the day of the observance that the student will be absent.

Expected Workload
Throughout the semester students are required to work a minimum of 3 hours of homework per credit hour per week outside of class on their projects (3 hour studio will have a minimum of 9 hours of homework per week). Many students will find that they will need to spend even more time per week to complete the work.

Students should be aware that not all project work can be done at home or at their convenience. They should also be aware that expecting to work a full-time or near full-time job (over 20 hrs. per week) will most likely have a negative impact on their performance and grade. Studio course projects require a great deal of time in order to develop and complete. It is very difficult to try and balance both a full-time job and a full load of studio classes.

Participation
Design does not happen in a vacuum. Clear verbal skills are important in communicating ideas to clients and design team members. For all critiques, students are expected to come prepared to present their concepts, discuss how the form of their design supports their concept, and describe how they arrived at their ideas. Providing comments to their peers is a privilege. Students will benefit from both giving and receiving feedback—students do not have to “like” another’s work, but they must provide insightful commentary in a courteous and productive manner.

Students are required to turn their mobile phones to silent and refrain from surfing the web, updating their Facebook page (or any social media), checking email, text messaging, etc. during class, lectures, and demos. Students may use these devices only during designated break times.

Professionalism
Lack of professionalism can effect a student’s grade and could lower their grade by one full letter grade.

• attend class on time and stay throughout the whole class period
• prepare for every class
• participate in classroom discussions and critiques
• maintain a positive and open-minded attitude
• demonstrate deliberate self-disciplined and timely work habits
• progressively strive for and achieve the highest standards of quality

Plagiarism
If a student tries to copy someone’s work or take someone’s idea and pass it off as their own they will suffer the penalties as outlined in the KU Student Code of Rights and Responsibilities.

All work that students hand in for a course must be made and created by them, over the course of this semester, exclusively for the course in question.

Academic Conduct
Students should adhere to the rules as listed in the Student Disruptive Conduct policy as found in the student handbook (http://www.studenthandbook.ku.edu/codes.shtml).

Disabilities (ADA)
The Academic Achievement and Access Center (AAAC) coordinates academic accommodations and services for all eligible KU students with disabilities. If you have a disability for which you wish to request accommodations and have not contacted the AAAC, please do so as soon as soon as possible. They are located in 22 Strong Hall and can be reached at 785-864-4064 (V/TTY). Information about their services can be found at http://www.disability.ku.edu. Please contact the instructor privately in regard to your needs in the course.

Late Projects
All projects and assignments are due on the date set by the instructor. All projects are due at the start of class. Late projects will be penalized by lowering the project grade by one full letter grade for each day that it is late. After three days, late projects will no longer be accepted and a grade of F will be assigned.

Grade Requirements
If a course is required under the majors studies section on the degree check sheet students must receive a grade of C (2.0) or better to continue on to the next course in the sequence. A grade of C- (1.7) or lower will require them to repeat this course. In most cases these courses are only offered once a year. Students in the Department of Design must maintain a cumulative 2.0 GPA to graduate with a degree in Design.

Graduate Programs
The department offers the following graduate degree programs:

• Master of Arts (M.A.) in Design with a concentration in Design Management
• Master of Arts (M.A.) in Design with a concentration in Environmental Design
• Master of Arts (M.A.) in Design with a concentration in Interaction Design

Please visit the Graduate Studies (http://www.graduate.ku.edu) website for more information.

Courses
ADS 320. Hallmark Symposium Series. 1 Hour.
Visiting professionals discuss various aspects of Design based upon their own special areas of expertise. The series is mandatory for all Design majors. Design majors must repeat this course at least 4 times for a total of 4 credit hours for graduation. Graded on a satisfactory/unsatisfactory basis. Open to all University wide students. LEC.
ADS 340. History and Philosophy of Design. 3 Hours.
Survey of design history from 1800 to present with emphasis on graphics, architecture, industrial and interior design movements, individuals and their influences. Prerequisite: BDS 102. LEC.

ADS 530. Intra Design Problems: ______. 3 Hours.
A collaborative studio across all Design Department areas of study. Students of the different areas will be organized into work groups and conduct in-depth research, investigate new problem solving methodologies, develop new applications and working knowledge of specialized subjects. Prerequisite: Junior level or higher standing in Design or Architecture or permission of the instructor. LAB.

ADS 531. Internship. 3 Hours.
Students develop professional skills and problems solving with an applied and relevant design employer's office. Supervision by faculty and a professional designer, designated and approved by the faculty in the area is mandatory. Graded on a Satisfactory/Unsatisfactory basis. May be repeated twice for credit. Prerequisite: Junior level or higher standing in the Design Department. FLD.

ADS 532. Study Abroad: ______. 3 Hours.
Students will participate in a Design focused study abroad program. The student will be required to attend group meetings prior to the trip along with development of research topics of interest. Simple documentation would be required - sketchbook/journal responding to day-to-day itinerary and other events, following the trip and presented for a grade. Prerequisite: Junior level or higher standing in Design or with permission of the instructor. Corequisite: ADS 533. LAB.

ADS 533. Study Abroad Documentation. 3 Hours.
Consists of research work prior to the trip as well as follow-up and required studio work due after return. A portfolio of work will be required for a grade. Course will also fulfill Design-specific requirements or studio credits for other majors. Areas may designate specific Design courses as substitutions for this course. Prerequisite: Junior level or higher standing in Design or with permission of the instructor. Corequisite: ADS 533. LAB.

ADS 560. Topics in Design: ______. 3 Hours.
A study of different topics in different semesters in a special area of interest to a staff member and suitable qualified students. May be repeated for credit. Prerequisite: Junior standing in department or permission of instructor. LAB.

ADS 570. Design Seminar. 3 Hours.
Comprehensive examination of a complex design problem from the point of view of the various specializations. Prerequisite: Junior standing in department. LEC.

ADS 580. Special Problems in Design. 1-6 Hours.
A study of current problems in design or crafts with an emphasis on research. Special problems proposals must be discussed with and approved by the instructor and advisor prior to enrollment in the course. A student may not take more than six credit hours of special problems in any one semester. Prerequisite: Junior standing in department. IND.

ADS 710. Advanced Human Factors in Interaction Design. 3 Hours.
The study of human factors principles and guidelines are fundamental to interaction design. In this course, these principles will be illustrated and applied to real-world design projects/problems. Human physical and cognitive capabilities, computer-human interface and systems properties, interaction design methods, and the physical and socio-cultural environment will be considered. Fundamental issues in human-centered systems, basic research methods, including statistics and literature searches, will be included. Open to all university students. Graduate students will meet concurrently with INDD 510 and receive additional coursework. LEC.

ADS 712. Design Strategies and Methods. 3 Hours.
This course will cover the principles of design thinking, design processes, design strategies and methods, including techniques and tools for the development of human-technology interfaces. Abstract through concrete representation methods and techniques will be applied to interaction design projects/problems. Information collection and analysis methods, scenario and prototyping methods, evaluation methods (empirical), creativity methods, and task-oriented method (non-empirical) will also be considered. Methods common to design-related disciplines in the social sciences, business, architecture, communication studies and engineering are integrated. Graduate students will meet concurrently with INDD 512 and receive additional work. Prerequisite: Consent of instructor for all non-design students. LEC.

ADS 714. Designing Business Services and Consumer Experiences. 3 Hours.
Business products, services and environments are often intermingled in ways that require more holistic ways of thinking and development. A challenge of service innovation is to design with an understanding of the many dimensions of human experience and satisfaction. This course elaborates how, where, when, and why design can enhance the value of business services. Theory, methods, and practice aspects of services design are presented. LEC.

ADS 720. Graduate Seminar in Design. 1 Hour.
Comparative studies of various areas of specialization in design. Repeat for credit to a maximum of six credit hours. LEC.

ADS 730. Directed Reading in Design. 1-3 Hours.
Research reading and presentation of reports on specific subjects related to the students major area of specialization. Required of all graduate students. RSH.

ADS 740. Special Problems in Design. 1-6 Hours.
An in-depth study of current problems in design or crafts with an emphasis on research. Special problems proposals must be discussed with and approved by the instructor and graduate advisor prior to enrollment in the course. RSH.

ADS 745. Branding and Design. 3 Hours.
A rapidly changing marketplace demands business strategy that is rooted in the dynamics of human culture, society, and psychology. Design thinking directly engages such factors and is, thus, well suited to help organizations formulate effective, versatile and strategic brands. This class focuses on strategic design analysis as a means to promote innovation in core brand development and extension into new applications and product categories. By aligning design with engineering, marketing, advertising, packaging, and service, business can innovate new sources of market value and deliver a more powerful brand messages. Prerequisite: Consent of instructor for all non-design students. LEC.

ADS 750. Design Management. 3 Hours.
Design Management has been described as "applied innovation" or the methodical capturing of talent and resources available inside and outside an organization to create valuable new offerings, brands, and business models. This course explores the design functions in business as a means to solve difficult challenges and develop new market-facing opportunities. Subjects include brand value creation, differentiation, coordination, and transformation. Numerous cases will be discussed. LEC.

ADS 751. Creating Design Scenarios and Simulations. 3 Hours.
Most organizations are imaginatively challenged and experience difficulty innovating and marketing new concept offerings. Conventional methods spotting and validating new opportunities often lack the persuasive power necessary for change to occur. Scenario-based design and simulation
offers ways to vividly representing a future that is different from the past. This course presents theory, methods and practice aspects of design scenario construction and simulation. LEC.

ADS 760. Design and Strategic Innovation. 3 Hours.
As companies struggle with the demands of increasing consumer, intense competition and downward price pressures, there is a corresponding increase in the demand for more innovative business models and highervalue offerings. These forces have significantly broadened the strategic scope of design. Advanced, multi-disciplinary design teams are being engaged early to help guide new business and product development efforts. Why, where, when, and how this is done in order to deliver on the promise of innovation is the subject of this course. Prerequisite: ADS 750 or with consent of instructor. LEC.

ADS 765. Interaction Design. 3 Hours.
Interaction Design is about creating products, services or environments that offer significant experiential value to people and economic value to organizations. This course engages the comprehensive subject of design for human experience. Building on the gamut of human factors and design methods knowledge, this offers hands-on experience in the research, analysis, modeling and simulation of original and experientially compelling design solutions. Prerequisite: ADS 710, ADS 712 or with consent of instructor. LEC.

ADS 770. Design Cognition. 3 Hours.
In a science of design, the study of “human designers” is as important as the study of designed artifacts or design tools. Since the beginning of research in Design Cognition, many empirical studies have opened up our understanding of human designers and the ways they design. While design is largely a mental activity, it interacts strongly with heterogeneous external representations. It encompasses problem definition and solving, analogical mappings, mental imaging and other mental processes. It requires team coordination and is situated in a cultural milieu that defines roles and modes of behavior. As such, distributed cognition, situated cognition, and social cognition - all have become relevant to the understanding of design cognition. The structure of a design task, the mental representation of design form and behavior, the structure of design teams, and the associated concepts of design cognition will be the subject of the course. LEC.

ADS 810. Orientation Seminar. 1 Hour.
Studies directed to development of a thesis plan. Required of all graduate students. Offered in fall semester only. Graded S or F. LEC.

ADS 850. Studio Teaching Practice. 1 Hour.
Graduate students only. Must hold an assistant instructor or teaching appointment. Credit earned does not satisfy any credit requirement for a degree. Graded S or U. FLF.

ADS 860. Graduate Synthesis and Applications Seminar. 1 Hour.
Group discussion and presentations on timely industry topics. Topics will be substantial, bridging relevant program subjects and professional area boundaries. May be repeated for up to six credit hours in subsequent semesters. LEC.

ADS 861. Thesis Research Seminar. 1 Hour.
Approaches to producing original design research. Methods, resources, topics and projects are discussed and evaluated. May be repeated for up to six credit hours in subsequent semesters. LEC.

ADS 890. Thesis. 1-8 Hours.
For guidance refer to Design department graduate guidelines. THE.

BDS 100. Design Dialogues. 3 Hours.
Design, like almost every industry, profession, school or major on campus, is forever being changed by technology, it's reach, global access, and social innovation. From the basics of how to think like a designer or how to design a better presentation in powerpoint to how design can be situated in businesses and organizations to create innovative new products, services or social change. This course will give students an awareness of design in our everyday world; an understanding of some of the cultural, theoretical, conceptual, and practical issues related to design and designing. The ultimate goal is that by the end of this course students will know how design contributes to contemporary society and how they might use this understanding throughout their life in little and big ways. Open to all majors. Corequisite: BDS 102 (for Design majors only). LEC.

BDS 101. Design Thinking and Making I. 3 Hours.
This is a course for all Design Department majors, to introduce them to creative problem solving; and the fundamentals of two, three and four-dimensional design. Drawing, photography, 2D and 3D models are used in this course as a means of design thinking to visually represent problems and solutions. Students must receive at least a grade of C- (1.7) in this course to continue in the Design program. Prerequisite: Must be admitted into the Design Department or receive instructor permission. Corequisite: BDS 103. LAB.

BDS 102. Design Thinking and Making II. 3 Hours.
This is a course for all Design Department majors and serves as a continuation of BDS 101 with a greater emphasis on examining the relationships between design and other systems: environment, society and culture, and technology and economics. One and a half hours of lecture and six hours of studio-lab per week. Students must receive at least a grade of C- (1.7) in this course to continue in their Design program. Prerequisite: Must be admitted into the Design Department and have completed BDS 101 and BDS 103 with at least a grade of C- (1.7) or equivalent course work, or receive instructor permission. LAB.

BDS 103. Drawing for Design. 3 Hours.
This course will focus on drawing as a tool of communication through freehand exercises that explore observation and perception, form and proportion, dimensional illusion and expressive characteristics using a variety of materials and media. Some identified sections of this course will also use two-and three-dimensional modeling software. Students must receive at least a grade of C- (1.7) in this course to continue in their Design program. Prerequisite: Must be admitted into the Design Department or receive instructor permission. Corequisite: BDS 101. LAB.

ENVD 200. Fundamentals of Environmental Design. 3 Hours.
Introduction to fundamentals and processes involved in developing design concepts in the unit scale interior environment that may include residential or small scale commercial spaces. The studio focuses on developing design vocabulary, graphic representations, space planning, furniture and furnishings. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C- (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102 and ENVD 202. Corequisite: ENVD 203. Prerequisite or corequisite: ENVD 212. or permission of instructor. LAB.

ENVD 203. Materials and Sustainability. 3 Hours.
Study and analyze building materials, furniture and furnishings through investigation into their physical and technical characteristics, limitations, and applications. The course also introduces the sustainability issues that relate to the selections and specifications that impact the environment, energy use and limited resources. It covers various agencies and organizations that develop guidelines on materials, resources, building practices, processes and systems that support sustainable design. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C- (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102
and ENVD 202. Corequisite: ENVD 200 or permission of the instructor. LAB.

ENVD 204. Fundamentals of Interior Design. 3 Hours.
This first interior design studio will introduce the principles and elements of interior design, including design composition, space planning, furniture layout, color, and finish materials. It will also provide the direction and opportunity for the student to apply basic design and drawing skills developed in the Foundation courses to meet project program requirements in a series of projects of increasing complexity. Students will be expected to produce process diagrams, plans, elevations, models and finish boards. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102 and BDS 103 or permission of instructor. Corequisite: ENVD 212. or permission of instructor. LAB LAB.

ENVD 212. Drawing for Environmental Design. 3 Hours.
Introduction to visualization tools in applications to interior environments using freehand sketching and computer aided design. The class focuses on vocabulary and theories of different drawing systems and develops basic CAD skills using Autocad and related software to generate 3D digital modeling, scene descriptions and view manipulations. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102 and BDS 103 or permission of instructor. LAB.

ENVD 304. Environmental Topics. 3 Hours.
This studio focuses on topics that relate to specific environments that may include retailing, hospitality, health care, restaurants, or work space strategies in offices. Students conduct research, explore ideas and generate concepts at a more complex scale level. Emphasis will be placed on understanding of users' operational needs, company brand or image, adjacencies, spatial analyses, understanding of material and their applications, environmental factors, codes and regulations that impact the planning and selections. Related issues include lighting, furniture systems analysis and their applications, and custom casework design. Depending on availability, studio may work with other studio in Architecture or other discipline within the department on joint projects. This class may be repeated for credit. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ENVD 200 or permission of instructor. LAB.

ENVD 305. Research and Programming. 3 Hours.
Examine and analyzing essential information necessary to determine the clients’ present and future operational requirements and the space, facilities, and services required for support. Establishing pre-planning concepts and guidelines on building and space utilization. Effort is directed toward developing space into a functional, flexible, and aesthetic environment in which to work. Study includes the use of questionnaires, organization charts, space study and standards, space projections, space tabulations, and space distribution using interaction, blocking, and layering diagrams. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ENVD 200, ENVD 304 and MATH 101 or permission of instructor. LAB.

ENVD 408. Integrated Senior Problems I. 3 Hours.
This class provides individual students with the opportunity to develop a project of choice based on the individual’s interest and design philosophy and incorporates the skills acquired from the integrated curriculum. Students will conduct initial research and data collection to develop a program that includes the schematic and preliminary design development. Projects may include corporate offices, retailing, health care, hospitality and restaurants, exhibitions, residential design, or specialty interior products. Effort will focus on the investigation of a component within a large or complex project. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ENVD 304 and ENVD 305. LAB.

ENVD 410. Integrated Senior Problems II and Specification. 3 Hours.
A continuation of ENVD 408 that focuses on further design development leading to final design solutions and explores in detail the design of the total environment. The use of materials and their limitations, sustainability, environmental factors, technology, graphics and signage, custom design casework and interior products, applicable codes and standards, budget, and construction document production are all part of the investigations. Final results may include a set of drawings, working drawings, detail drawings, 4D models and/or multi-media presentations. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ENVD 408. LAB.

ENVD 413. Portfolio and Professional Practice. 3 Hours.
There are two different components to this class. The first is to develop the student’s graduating portfolio that relates to the individual’s professional interest. The second is the standards associated with the professional practice of a design office including office personnel and organization, scheduling, fee structures, contracts, billing, marketing and professional ethics. The course will include lectures, guest speakers, and field trips. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ENVD 304 and ENVD 305. LAB.

ENVD 715. Interior Design. 2-6 Hours.
Individual research. Prerequisite: INTD 606 or equivalent. RSH.

ENVD 815. Interior Design. 2-6 Hours.
Continuation of INTD 715. RSH.

ILLU 205. Drawing Media for Illustration. 3 Hours.
Exploration of problems in drawing for various reproduction processes. Emphasis on perspective, head drawing, the clothed and nude figure, nature illustration, perspective, and environments. Various drawing media and materials are explored. Required for Illustration majors as a pre-review course. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 101 or permission of instructor. LAB.

ILLU 305. Image Making. 3 Hours.
Concentrated study in developing methodologies for producing contemporary illustration. Emphasis is placed on concept development, composition exploration, value and color studies, and reference creation. Required for Illustration majors as a pre-review course. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102. LAB.

ILLU 315. Introduction to Illustration. 3 Hours.
Concentrated study in developing skills and techniques with media and materials that are employed in producing contemporary illustration. Continued emphasis on methods of research and idea generation. For majors only. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C+ (2.3)
or higher to continue on to the next course in the sequence. Prerequisite: ILLU 305 and/or permission of instructor. Corequisite: ILLU 405. LAB.

ILLU 405. Drawing Media for Illustration II. 3 Hours.
Students will explore various drawing and painting media to continue developing their mastery of representational imagery for illustration. Reference collecting, model making, and the creating of photographic reference material will be addressed. Emphasis on mark making, value and color relationships, and placing the figure in an environment is also covered. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 205 or permission of instructor. Corequisite: ILLU 315 or permission of instructor. LAB.

ILLU 410. Fundamentals of Animation. 4 Hours.
Concentrated study in developing skills and techniques with digital media and materials employed in producing basic contemporary animation. Development of concept, script, storyboard, and use of audio, music and sound effects are part of this animation experience. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 205 or permission of instructor. Corequisite: ILLU 405 or permission of instructor. LAB.

ILLU 415. Illustration Concepts. 3 Hours.
Focus of this course is to learn how to think visually. Concentrated study on developing different forms of concepts for illustration. Continued development of technical skills and visual literacy to gain insight on how to make images that communicate unique ideas clearly. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 305 and ILLU 405 or/and permission of instructor. Corequisite: ILLU 415. LAB.

ILLU 425. Concept Art. 3 Hours.
Introductory exploration of the process, skills and concepts necessary for successful concept art character design and effective blending of matte painting and film. Drawing will be of primary concern for this course, yet exploring digital means of character development will also be introduced. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 410 and ILLU 415 or/and permission of instructor. Corequisite: ILLU 435. LAB.

ILLU 435. Sequential and Narrative Illustration. 4 Hours.
Exploration of thematic illustration through the development of a series of images based on a topic or story. Aspects of continuity, consistency, storytelling, pacing, editing, packaging and a holistic method of developing illustration are addressed. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 415 and ILLU 410. Corequisite: ILLU 425. LAB.

ILLU 445. Advanced Concept Art. 3 Hours.
Continuation in exploration of the process, skills and concepts for successful concept art character design, along with continued development of digital characters and 3D modeling. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 425 and ILLU 435 or/and permission of instructor. LAB.

ILLU 510. Animation. 3 Hours.
Continued development of concepts, scripts, storyboards, and use of audio, music and sound effects in the production of a one to three minute animated film. Prerequisite: ILLU 410 or permission of instructor. LAB.

ILLU 535. Promotion and Marketing for Illustration. 4 Hours.
Focus will be on preparation for entering the profession. Development and completion of a self-promotion and marketing package will supplement and support the senior portfolio. Contemporary business practices and legal issues will be addressed. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: ILLU 445. LAB.

ILLU 703. Illustration. 3-6 Hours.
LAB.

ILLU 825. Illustration. 2-6 Hours.
Individual research. RSH.

INDD 212. Drawing for Industrial Design. 3 Hours.
This course will focus on drawing as a tool of communication through a variety of exercises that explore observation and perception, form and proportion, dimensional illusion and expressive characteristics using a variety of materials and media. This course will also use two- and three-dimensional modeling software necessary for all Industrial Designers. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 101 and BDS 103. Corequisite: BDS 102. LAB.

INDD 284. Basic Industrial Design Studio. 3 Hours.
Course introduces tools, techniques and processes used in the professional practice of Industrial Design. Learning is through a series of short, focused projects. Techniques in drawing, computer modeling, physical modeling, and presentation are demonstrated and developed. Strategies to improve creativity are explored, while addressing market and production considerations. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102 and INDD 212. LAB.

INDD 302. Intermediate Industrial Design Studio. 3 Hours.
Course introduces tools, techniques and processes used in the professional practice of Industrial Design. Learning is through a series of short, focused projects. Techniques in drawing, computer modeling, physical modeling, and presentation are demonstrated and developed. Strategies to improve creativity are explored, while addressing market and production considerations. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: INDD 284. LAB.

INDD 378. Problems in Industrial Design: ______. 3 Hours.
Individual and/or group research projects in one of several specific design areas which will be identified on a semester by semester basis. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. May be repeated for credit. Prerequisite: Eligibility for INDD 302 or permission of instructor. LAB.

INDD 446. Advanced Industrial Design Studio. 3 Hours.
Continuation of INDD 284 and 302 but encompassing design problems of greater complexity including group research and problem solving assignments in advanced product and service design. Advanced techniques in problem solving, concept communication, visualization,
and overall design expression will be demonstrated and explored. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: INDD 446. LAB.

**INDD 448. Professional Industrial Design Studio Practices. 3 Hours.**
Continuation of Industrial Design studios, projects are longer requiring a high level of demonstrated design ability for successful completion. Issues regarding professional ethics, accountability, and responsibility to public and client are discussed and implemented. Professional design, presentation, and visualization skills will be demonstrated and explored. Finished designs will include full production technical specifications. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: INDD 446. LAB.

**INDD 508. Materials and Processes. 3 Hours.**
A study of modern materials, manufacturing processes, and construction methods applicable to the fields of industrial design and interior design. Design analysis of existing products, furniture, building components, and storage systems. Design assignments in furniture, storage systems, and interior space arrangements with emphasis on materials and construction. Field trips to area manufacturing and design facilities. Prerequisite: Permission of instructor. LEC.

**INDD 510. Human Factors in Design. 3 Hours.**
Introduction to the field of human factors (ergonomics) appropriate to industrial, interior, and visual design. Human capabilities, human-machine interfaces and system properties, and the environment are considered, a micro-computer laboratory is integrated into the course. Open to all university students. Prerequisite: Consent of instructor for non-art and non-design majors. Corequisite: BDS 102. LEC.

**INDD 512. Methods in Design. 3 Hours.**
Introduction to the study of methods of designing common to industrial, interior, and visual design. Evaluation methods (semantic differential), creativity methods (scenario writing), and task-oriented method: (PERT/CPM) will be considered in relation to design problems. Open to non-design students. Prerequisite and/or Corequisite: INDD 302 for industrial design majors or ENVD 200 for environmental design majors respectively. Consent of instructor for all other students. LEC.

**INDD 555. Portfolio. 3 Hours.**
Work directed toward maximizing the quality and effectiveness of the individual student’s professional portfolio. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite or Corequisite: INDD 448. LEC.

**INDD 580. Senior Industrial Design Studio. 3 Hours.**
Course requires the accomplishment of a comprehensive, independent research, design, and development project appropriate to the field of industrial design, the depth and complexity of which are commensurate with expectations for entry-level professionals. The nature and scope of the project, as well as details of anticipated accomplishment must be outlined by the student and approved by the instructor prior to the beginning of the second week of classes. This course requires completion of all research and basic problem solving. In INDD 581 students will complete their projects and present their final thesis. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Both fall and spring enrollment required. Prerequisite: INDD 448. LAB.

**INDD 581. Senior Industrial Design Studio II. 3 Hours.**
This course is the counterpart to INDD 580. This course focuses on the preliminary design phases of the project, final design development and refinement, detail technical specifications, renderings, physical and computer model building, and a written documented report of the project. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Both fall and spring enrollment required. Prerequisite: INDD 580. LAB.

**INDD 715. Industrial Design. 2-6 Hours.**
Research-oriented advanced study in industrial design. Prerequisite: Graduate major in industrial design or consent of instructor. RSH.

**INDD 815. Industrial Design. 2-6 Hours.**
Prerequisite: INDD 715. RSH.

**PHMD 101. Fundamentals of Photography. 3 Hours. GE3H.**
Open to students of all disciplines and experience levels, this course provides an introduction to the medium and language of photography. Basic camera operation, workflow, and digital/analog printing methods are explored, accompanied by lectures, readings, and discussions regarding the historical and theoretical concerns of the medium. A digital camera with full manual controls is required - RAW capable preferred. Open to students of all disciplines and experience levels. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. LAB.

**PHMD 201. Photography I. 4 Hours.**
The first of the two-part foundational Photography sequence, this majors-only course provides students with a rigorous immersion into the formal, technical, and conceptual concerns and challenges of photography by way of the view camera. Embracing both the wet and digital darkrooms, students shoot and develop sheet film that is then utilized to produce both traditional and digital prints. Intermediate digital editing methods are introduced and explored. View cameras are provided. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 101, BDS 102, and permission of instructor. LAB.

**PHMD 202. Photography II. 4 Hours.**
The second of the two-part foundational Photography sequence, this advanced course builds upon PHMD 201 with additional emphasis on color, RAW workflow, and advanced methods for digital capture, manipulation, editing, and compositing. Additionally, students work extensively with large-format inkjet printers to create custom ICC printing profiles. A digital SLR (RAW capable) camera with full manual controls is required. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 201 and permission of instructor. LAB.

**PHMD 210. Understanding Photographs. 3 Hours.**
Understanding Photographs is a lecture-based course that focuses on developing a critical understanding of how images, paired with culture and society, generate meaning in both the historical and contemporary contexts. Open to students of all disciplines and experience level. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. LEC.

**PHMD 301. Lighting Studio. 3 Hours.**
Lighting Studio is a fundamental course in awareness, modification, and control of light. Students work extensively with strobe and continuous light
sources. Principles of natural and artificial light are introduced, explored, and applied through hands-on assignments both in and out of the studio environment. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 202 or permission of instructor. LAB.

PHMD 302. The Moving Image. 3 Hours.
This course serves as an introduction to the principles and challenges of photography as a time-based medium. Fundamental concepts of production are introduced and explored through hands-on exercises, class presentations and discussions, lectures, critiques, and individual and group projects. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 202 or permission of instructor. LAB.

PHMD 315. Experimental Processes. 3 Hours.
Experimental Processes is an introduction to the understanding and production of image-based works utilizing experimental approaches and alternative processes in an interdisciplinary environment. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 202 or permission of instructor. LAB.

PHMD 402. Photo Media Seminar. 3 Hours.
This upper-level seminar is focused primarily on the development of independent and collaborative projects through on-going group critique with an emphasis on research and analysis. Learning is focused on personal development and other issues relevant to contemporary photographic practice through assigned readings, presentations, and group discussion. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. May be repeated for credit. Prerequisite: PHMD 202 or permission of instructor. LAB.

PHMD 500. Portfolio. 3 Hours. AE61.
Taken the final semester of study, this course guides students through the research, preparation, and refinement of a final portfolio and appropriate supplemental materials. Methods and strategies of presentation and dissemination are discussed and explored. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 402 or instructor permission. LAB.

PHMD 501. Advanced Lighting Studio. 3 Hours.
A continuation of the skills and principles discussed in PHMD 301. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 301. LAB.

PHMD 502. Advanced Moving Image. 3 Hours.
A continuation of the skills and principles discussed in PHMD 302. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 302. LAB.

PHMD 515. Advanced Experimental Processes. 3 Hours.
A continuation of the skills and principles covered in PHMD 315. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: PHMD 315. LAB.

PHMD 560. Special Topics in Photo Media: ______. 3 Hours.
Special topics courses in Photo Media vary by instructor and provide additional opportunities for interdisciplinary research and advanced specialized study. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. May be repeated for credit. Prerequisite: PHMD 202 or permission of instructor. LAB.

VISC 177. First Year Seminar:. 3 Hours.
Graphic design is everywhere, on everything we see, touching everything we do, on everything we buy. Graphic design is a popular art and a practical art, an applied art and an ancient art. Simply put, it is the art of visualizing ideas and it is a way of thinking. In this class we will explore principles of Graphic Design: how to identify them, how to be more savvy consumers of them and how to use them for good and not for evil. You will learn to look at your visual environment with designer’s eyes to discern “good design” from “bad design”, while putting powerful design principles into practice in your own careers, communities and classrooms. LEC.

VISC 201. Visual Communication Design. 3 Hours.
Presentation of fundamental concepts of visual and non-visual communication. Exploration of various theories of visual perception and visual communication with emphasis on reading visual images for meaning and making meaning through the construction of visual images and typography. A special laboratory section will include design thinking and making strategies and processes which are common to visual communication design from the handmade to the computer. This course is for non-Visual Communication majors. Prerequisite and/or Corequisite: BDS 102. LAB.

VISC 202. Elements of Typography. 3 Hours.
Introduces the discipline, function, and tradition of typography as it relates to visual/verbal communication. Emphasis is on interrelationships of letter, word, line and page. Projects examine two-dimensional typographic space, sequence and information hierarchy. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102. Corequisite: VISC 204. LAB.

VISC 204. Principles of Visual Communication. 3 Hours.
Visual communication problems involving the student in the translation of verbal concepts and design theory into visual images. This course focuses attention on the process of defining problems, gathering information, and formulating clear, powerful, and persuasive visual statements. Introduction to methods of research, idea generation, and image making will be an integral part of this course. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: BDS 102. Corequisite: VISC 202. LAB.

VISC 302. Typographic Systems. 3 Hours.
Further exploration of typographic form and manipulation of variables which affect content; stresses the importance of typographic composition as an integral component of visual communication design. Projects examine advanced structures of typographic space, work-image structure, and typographic details and aesthetic. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C+ (2.3) or higher to continue on to the next course in the sequence. Prerequisite: VISC 202, VISC 204, and permission of instructor. Corequisite: VISC 304. LAB.
VISC 304. Designing Understanding. 3 Hours.
Exploration of the relationships among people, places, and the visual objects and information they use. Attention on the different roles of the designer as observer, empathizer, communicator and experience builder. Introduction to information design processes and procedures of understanding by ordering data into useful and persuasive information tools and experiences. Various methodologies will be explored for visualizing information for clarity, resonance, and editorial voice with special attention to the relationships among audience and context in the creation of meaning. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C+ (2.3) or higher to continue on to the next course in the sequence. Prerequisite: VISC 202, VISC 204, and permission of instructor. Corequisite: VISC 302. LAB.

VISC 310. Letterpress. 3 Hours.
This course concentrates on the traditional methods of hand typesetting, using the Department of Design’s collection of lead and wood type. Learn how to use a pica rule, composing stick, leading, spacing material, the California Job Case, mix ink and operate a Vandercook proof press and CP or Goding platen. Be inspired by visits to Special Collections. Emphasis will be placed on the acquisition of skills and the creative use of type and images. Open to all majors. Prerequisite: VISC 201 or VISC 202 or permission of the instructor. LAB.

VISC 402. Designer as Author. 3 Hours.
Building from the structures and approaches of VISC 302, the course is a research-based examination of traditional, non-traditional and expressive uses of the typographic medium. Projects emphasize the student as both content generator as well as designer and include development of text + image narrative, word as image and typographic “voice” while further refining technical proficiency. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 302 and VISC 304. Corequisite: VISC 404. LAB.

VISC 404. Designing for Social Interactions. 3 Hours.
Introduces the discipline of designing for dynamic media (i.e., internet, on screen, multi-media.) Emphasis will be placed on concept development and on the fundamental principles of information hierarchy, user experience, navigation strategies, site development and site architecture. Projects, lectures and tutorials will provide a working knowledge of current tools and techniques, while exploring the issues of narrative structure, rhythm, space, animation, sound, and video. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 302 and VISC 304. Corequisite: VISC 402. LAB.

VISC 410. Letterpress II. 3 Hours.
Artists’ books are books created as original works of art that push the boundaries of the traditional book. This course will focus on the interdependence of form and content through studio work, readings, and the examination of historical and contemporary models. Students will explore a wide range of book structures from basic to innovative. Final outcomes will combine images, hand set type, and digital processes to create both one-of-a-kind, and limited edition artists’ books. VISC 310 Letterpress I is recommended, but not required. Open to all majors. Prerequisite: VISC 201 or VISC 202, or permission of the instructor. LAB.

VISC 414. Publication and Editorial. 4 Hours.
Exploration of topics dealing intensively with editorial concept and format organization. Projects stress advanced problems in the integration of text and image through the development of complex and variable structures. Emphasis on thorough researching of content and audience as well as understanding of production/execution implications of solutions. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 402, VISC 404. LAB.

VISC 415. Motion Graphics. 3 Hours.
Introduction to the elements, principles and history of motion design. Emphasis on the conceptualization, planning and storyboarding of time-based media with respect to some specific, clearly stated aesthetic and/or communicative purpose. Students will examine methods for synthesizing still moving imagery, typography and audio, in motion, using Adobe After Effects in combination with other software such as Final Cut Pro, Illustrator and Photoshop. Prerequisite: VISC 201, ARCH 108 or VISC 202. LAB.

VISC 420. Exhibition Design. 3 Hours.
This course will explore how exhibitions are conceptualized, designed and made. It will look at the role of curators, exhibition designers, graphic designers as well as the audience of cultural institutions. Open to all majors. Prerequisite: VISC 201, ARCH 108 or VISC 202. LEC.

VISC 425. Environmental Graphics. 3 Hours.
This course will examine core principles and practices of environmental graphic design. Many of these concepts will be concerned with the visual aspects of wayfinding, communicating identity and information, and shaping the idea of place. Some of the topics discussed will include: signage, exhibit design, identity graphics, pictogram design, mapping, civic design and themed environments. Prerequisite: VISC 201 or VISC 304. LEC.

VISC 435. Book Arts. 3 Hours.
Producing books in editions is a complex undertaking. Students work in teams to create or compile content of their choosing, then edit, design, and bind their own books in a small edition. The class combines both traditional letterpress technology and digital interface for the creation of text and image. Each student receives two copies of the team’s final book, one copy is archived in Special Collections at the Spencer Research Library. This class is required for the completion of the Book Arts Certificate. Open to all majors. Prerequisite: VISC 201 or VISC 202, or permission of the instructor. LAB.

VISC 440. Bookstructures and Papermaking. 3 Hours.
Students will learn to make a variety of book structures and enclosures, from historical to contemporary. Prototypes and models, as well as comprehensive notes and instructions will provide the student with a library of bindings for future reference. Students will document paper that is made in class and create a record for themselves, other students, and the Department of Design. Open to all majors. Prerequisite: VISC 201 or VISC 202 or permission of the instructor. LAB.

VISC 455. Designing Information. 3 Hours.
Making preliminary visualizations, models, and prototypes. Examines words, diagrams, type, and sequencing to restructure messages so that they tell a story more effectively. Editing images to make messages clear, unambiguous and understandable by their intended audience(s). Designing the appearance of an information product so that users can find what they want and understand it when they get there. Open to all Design majors. Prerequisite: VISC 201 or VISC 304 or permission of the instructor. LAB.

VISC 520. Designing for Change. 4 Hours. AE61.
Exploration of branding, service and interaction design opportunities that respond to real-life complexity: audiences, systems and contexts. Introduces business and design thinking strategies associated with brand
development and the idea that design plays a vital role in our local, national, and global society and well-being. Emphasis on the methods of thinking and research which precede the making of design as well as the importance of writing and verbal presentation to the visual communication design profession. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 414 or permission of the instructor. LAB.

VISC 525. Senior Problems. 4 Hours.
Goal-oriented graphic design problem-solving with emphasis on research, analysis, and synthesis of complex visual problems. Will allow for in-depth study of professional design issues and topics; provides a forum for multi-disciplinary collaboration with related professional disciplines. May be repeated for credit. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite: VISC 520 or permission of instructor. LAB.

VISC 530. Portfolio. 3 Hours.
Instruction in the organization and presentation of a professional quality visual portfolio. Readings, feedback and online collaborations will focus on the development of a focused portfolio consistent with the individual student’s pursuits. If this course is required under the major studies section on the degree requirement sheet, students must receive a grade of C (2.0) or higher to continue on to the next course in the sequence. Prerequisite or Corequisite: VISC 520 or permission of instructor. LAB.

VISC 534. Portfolio Development. 3 Hours.
This course will provide design and non-design majors instruction in the organization and presentation of a professional quality visual portfolio. Readings, feedback and online collaborations will focus on the development of a focused portfolio consistent with the individual student’s pursuits. Graded on a satisfactory/unsatisfactory basis. LEC.

VISC 560. Special Topics in Visual Communication: _____, 3 Hours.
A study of different topics in different semesters in a special area of visual communication. Entry by permission of instructor. May be repeated for credit. LAB.

VISC 701. Visual Communication. 3 Hours.
Presentation of fundamental concepts of visual and non-visual communication. Exploration of various theories of visual perception and visual communication with emphasis on reading visual images for meaning and making meaning through the construction of visual images and typography. A special laboratory section will include design thinking and making strategies and processes which are common to visual communication design from the handmade to the computer. Prerequisite: Permission of the instructor. LAB.

VISC 704. Designing Understanding. 3 Hours.
Exploration of the relationships among people, places, and the visual objects and information they use. Attention on the different roles of the designer as observer, empathizer, communicator and experience builder. Introduction to information design processes and procedures of understanding by ordering data into useful and persuasive information tools and experiences. Various methodologies will be explored for visualizing information for clarity, resonance, and editorial voice with special attention to the relationships among audience and context in the creation of meaning. Prerequisite: Permission of the instructor. LAB.

VISC 706. Graphics. 3-6 Hours.
LAB.

VISC 710. Letterpress. 3 Hours.
This introductory course in letterpress will instruct the student in methods for printing from moveable type and other type-high surfaces. The discipline will be explored from a historic as well as artistic perspective. Emphasis will be placed on the acquisition of skills and vocabulary, and the creative use of type and techniques. Prerequisite: Permission of the instructor. LAB.

VISC 714. Designing for Social Interactions. 3 Hours.
Introduces the discipline of designing for dynamic media (i.e., internet, on screen, multi-media.) Emphasis will be placed on concept development and on the fundamental principles of information hierarchy, user experience, navigation strategies, site development and site architecture. Projects, lectures and tutorials will provide a working knowledge of current tools and techniques, while exploring the issues of narrative structure, rhythm, space, animation, sound, and video. Prerequisite: Permission of the instructor. LAB.

VISC 715. Motion Graphics. 3 Hours.
Introduction to the elements, principles and history of motion design. Emphasis on the conceptualization, planning and storyboarding of time-based media with respect to some specific, clearly stated aesthetic and/or communicative purpose. Students will examine methods for synthesizing still moving imagery, typography and audio, in motion, using Adobe After Effects in combination with other software such as Final Cut Pro, Illustrator and Photoshop. Prerequisite: Permission of the instructor. LAB.

VISC 720. Exhibition Design. 3 Hours.
This course will explore how exhibitions are conceptualized, designed and made. It will look at the role of curators, exhibition designers, graphic designers as well as the audience of cultural institutions. Open to all majors. Prerequisite: Permission of the instructor. LAB.

VISC 725. Environmental Graphics. 3 Hours.
This course will examine core principles and practices of environmental graphic design. Many of these concepts will be concerned with the visual aspects of wayfinding, communicating identity and information, and shaping the idea of place. Some of the topics discussed will include: signage, exhibit design, identity graphics, pictogram design, mapping, civic design and themed environments. Prerequisite: Permission of the instructor. LAB.

VISC 735. Books Art. 3 Hours.
Combines wide range of traditional letterpress and digital processes for type and image for individually determined student book projects. Projects will culminate in a small printed and bound edition. Prequisite: Permission of the instructor. LAB.

VISC 740. Bookstructures and Papermaking. 3 Hours.
This course will seek to acquaint the student with the origins of the book, paper, and pre-paper writing surfaces. Prototypes and models, as well as comprehensive notes and instructions will provide the student with a library of structures and variations for future reference. Students will document paper that is made in class and create a record for themselves, other students, and the School of Design. Prerequisite: Permission of the instructor. LAB.

VISC 755. Designing Information. 3 Hours.
Making preliminary visualizations, models, and prototypes. Examines words, diagrams, type, and sequencing to restructure messages so that they tell a story more effectively. Editing images to make messages clear, unambiguous and understandable by their intended audience(s). Designing the appearance of an information product so that users can find and make sense of the ideas that the product presents. Students will create a small printed edition. Prerequisite: Permission of the instructor. LAB.

VISC 760. Designing for Change. 3 Hours.
Exploration of branding, service and interaction design opportunities that respond to real-life complexity: audiences, systems and contexts. Introduces business and design thinking strategies associated with brand...
development and the idea that design plays a vital role in our local, national, and global society and well-being. Emphasis on the methods of thinking and research which precede the making of design as well as the importance of writing and verbal presentation to the visual communication design profession. Prerequisite: Permission of the instructor. LAB.

VISC 815. Graphics. 2-6 Hours. Individual research. RSH.

Bachelor of Fine Arts in Design

Undergraduate Advising

Students admitted to the B.F.A. degree program are advised by the Coordinator of Undergraduate Student Services. After a student has completed the 9 hours of Basic Design Studies courses, he or she is advised and mentored by faculty member(s) in the major field.

Check sheets describing each program in detail are available from the main design office (http://design.ku.edu/checksheets), 205 Marvin Hall, 785-864-1578. Students are encouraged to seek advice from any faculty member in a specific area of interest.

Undergraduate Admission

Freshman Students

First-year students interested in design should enter the department directly. All design applicants must answer 3 essay questions and submit a digital portfolio (on a CD or flash drive) of 10 to 20 images, including a color inventory sheet. See the department website (http://design.ku.edu/admission-requirements) for details.

Applications must be submitted online through the Office of Admissions. All final high school transcripts must be sent to Admissions. The essays, portfolio, and inventory sheet should be mailed directly to the department by the indicated application deadline (http://design.ku.edu/admission-requirements).

Transfer Students

Students with fewer than 9 hours in studio courses equivalent to the Basic Design Studies courses must enroll in the Foundation studios (BDS courses). Students who wish to transfer 9 or more credit hours in art and design studio courses may be requested to submit examples of their work to the chair for evaluation before enrollment. Portfolios should represent all college-level studio experiences and must contain original examples of drawings and designs. Paintings, sculpture, and other three-dimensional work should be submitted as PDFs or JPGs on a CD or flash drive.

Possible receipt of advanced-standing credit is decided by review of portfolio work representing all courses for which advanced standing is to be considered. A catalog description and syllabus for each course must accompany the portfolio. Consideration for advanced standing is based on the nature and quality of work in courses for which it is sought. Prospective transfer students must submit applications and portfolios the spring semester prior to the fall term for which they are seeking admission.

Applications with a lapse of 3 or more years since their last full-time enrollment may not be able to apply studio credits toward advanced standing or transfer credit.

Change of School Students

Students may apply to the department from other KU schools if they have B (3.0) average or higher. They must also pass a portfolio and essay review. Admission is highly competitive. All design applicants must answer 3 essay questions and submit a digital portfolio (on a CD or flash drive) of 10 to 20 images, including a color inventory sheet. See the department website (http://design.ku.edu/admission-requirements) for details.

- Students with more than 24 hours of college level credit must have at least a 3.0 cumulative GPA on a 4.0 point scale at a college or university.
- Students with less than 24 hours of college level credit will be evaluated on the freshmen requirements (http://design.ku.edu/admission-requirements).

The department encourages all transfer students to follow the full 4-year program. Change of school students are considered for admission and will be placed accordingly. Change of school students with fewer than 9 hours in studio courses equivalent to the Basic Design Studies courses must enroll in the Foundation studios (BDS courses).

Re-Admit Students

Students may be re-admitted to the department if they have B (3.0) average or higher. They must also pass a portfolio and essay review. Admission is highly competitive. All design applicants must answer 3 essay questions and submit a digital portfolio (on a CD or flash drive) of 10 to 20 images, including a color inventory sheet. See the department website (http://design.ku.edu/admission-requirements) for details.
• Students with more than 24 hours of college level credit must have at least a 3.0 cumulative GPA on a 4.0 point scale at a college or university.

• Students with less than 24 hours of college level credit will be evaluated on the freshmen requirements (http://design.ku.edu/admission-requirements).

Applications must be submitted online through the Office of Admissions (http://admissions.ku.edu/?initial=transfers). All transcripts from previously attended institutions must be sent to Admissions. The essays, portfolio, and inventory sheet should be mailed directly to the department by the indicated application deadline (http://design.ku.edu/admission-requirements).

The department encourages all re-admit students to follow the full 4-year program. Re-admit students are considered for admission and will be placed accordingly.

Re-admit students with fewer than 9 hours in studio courses equivalent to the Basic Design Studies courses must enroll in the Foundation studios (BDS courses). Students who wish to transfer 9 or more credit hours in art and design studio courses may be requested to submit examples of their work to the chair for evaluation before enrollment. Portfolios should represent all college-level studio experiences and must contain original examples of drawings and designs. Paintings, sculpture, and other three-dimensional work should be submitted as PDFs or JPGs on a CD or flash drive.

Possible receipt of advanced-standing credit is decided by review of portfolio work representing all courses for which advanced standing is to be considered. A catalog description and syllabus for each course must accompany the portfolio. Consideration for advanced standing is based on the nature and quality of work in courses for which it is sought. Prospective readmit students must submit applications and portfolios the spring semester prior to the fall term for which they are seeking admission.

Applicants with a lapse of 3 or more years since their last full-time enrollment may not be able to apply studio credits toward advanced standing or credit.

Restrictions on Admission
By permission of the Kansas Board of Regents, application for admission or transfer to the Department of Design may be refused if the available instructional space does not allow the addition of more students. Students may be denied admission to the department if they do not meet the academic requirements and/or do not pass the portfolio review. It is recommended that students apply before the indicated deadline.

Undergraduate

Requirements for Graduation
Degrees from the Department of Design and the School of Architecture, Design and Planning are conferred on candidates who have satisfactorily completed the necessary course requirements.

Students must complete the total hours required for the degree; 45 credit hours must be in junior/senior-level courses, numbered 300 and above. At least 30 hours must be in residence to receive a degree from the department and KU. Only 3 hours of activity and/or performance work will count toward the degree.

English
At least 9 hours of English composition and literature are required of all design students, consisting of:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 101</td>
<td>Composition</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 102</td>
<td>Critical Reading and Writing</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 203</td>
<td>Topics in Reading and Writing:</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 209</td>
<td>Introduction to Fiction</td>
<td></td>
</tr>
<tr>
<td>ENGL 210</td>
<td>Introduction to Poetry</td>
<td></td>
</tr>
<tr>
<td>ENGL 211</td>
<td>Introduction to the Drama</td>
<td></td>
</tr>
</tbody>
</table>

Some areas require additional course work in English. Students must enroll continuously in ENGL 101 or ENGL 102, as appropriate, until completed. When the requirement is reduced, due to an ACT/SAT score or an AP exemption, students must substitute these hours in liberal arts electives.

Remedial Courses
Remedial courses listed in the catalog and Schedule of Classes are numbered below 100. Such courses include, but are not limited to, MATH 2. If such courses are required for a student they will have to pass the course(s), however, the remedial course(s) do not count toward graduation in design and may not be counted as distribution courses.

First-Year Preparation: Basic Design Studies
A minimum of 9 hours in Basic Design Studies courses is required before a student may enter a major program in the sophomore year. The 9 hours are composed of Design Thinking and Making I and II and Drawing for Design (BDS) studios. These specified prerequisites must be completed before enrollment in advanced design studio courses.

The typical first year enrollment below should be followed for two semesters, unless specific requirements for a degree program are different (16 hours each semester):

| Studio (3) | Elective       | 3     |
| Hallmark Symposium Series (2) |                  | 2     |
| English (6) | Composition    | 3     |
| ENGL 102 | Critical Reading and Writing | 3     |
| History of art (6) | Introduction to Western Art History | 3     |
| History of art elective | 3     |
| Liberal arts (6) | Required electives | 6     |

KU Core & Liberal Arts Requirements
All design majors must take at least the following courses in the College of Liberal Arts and Sciences:
ENGL 101  Composition (GE21)                           3
ENGL 102  Critical Reading and Writing (GE21)           3
Select one of the following:                            3
    ENGL 203  Topics in Reading and Writing: _____ (GE11)  
    ENGL 209  Introduction to Fiction (GE11)             
    ENGL 210  Introduction to Poetry (GE11)              
    ENGL 211  Introduction to the Drama (GE11)           
ENGL to be determined by the area                      3
Arts & Humanities course - HA preferred (GE3H)         3
Social Sciences courses (GE3S)                         3
Natural Science courses (GE3N)                         3
FIN 101  Personal Finance (GE12)                        3
or MATH 101  College Algebra                           
COMS 130  Speaker-Audience Communication (GE22)         3
or JOUR 150  Stand and Deliver                         
SOC 104  Elements of Sociology (GE41)                   3
Social Responsibility & Ethics (GE5)                    3
History of art:                                        
    HA 100/300  Introduction to Western Art History (GE42)  3
ADS 340  History and Philosophy of Design              3
Additional hours of art history                        6

Concentration-specific CLAS requirements are listed with the course work in more detail.

Programs
The Department of Design offers the B.F.A. in design with concentrations in

• Environmental Design,
• Illustration and Animation,
• Industrial Design,
• Photo Media, and
• Visual Communication Design.

All program requirements are 124 credit hours and normally can typically be completed in 8 semesters (4 years).

Concentrations
Environmental Design
The Environmental Design program focuses on preparing designers with the critical thinking and technical skills that integrate architecture/interior architecture, environmental graphics, furniture/casework and product design with traditional interior design practice for the design of the total built environment. Studio project experiences may include simple residential, retailing, hospitality, health care, as well as complex corporate offices functional types. The program provides for collaboration through teamwork opportunities in which students work on joint projects with other disciplines within the School of Architecture, Design and Planning.

A total of 125 hours is required for the degree, including 65 hours in design as follows:

Foundation (9)
BDS 101  Design Thinking and Making I                   3
BDS 102  Design Thinking and Making II                  3

Studio Requirements (12)
VISC 201  Visual Communication Design                   3
PHMD Photo Media elective                                
Select one of the following INDD electives:              3
    INDD 508  Materials and Processes                    
    INDD 510  Human Factors in Design                   
    INDD 512  Methods in Design                         
VISC 425  Environmental Graphics (or VISC Elective)     3

Major Studies (34)
ARCH 108  Architectural Foundations I                   4
ENVD 200  Fundamentals of Environmental Design          3
ENVD 212  Drawing for Environmental Design              3
ENVD 203  Materials and Sustainability                  
ENVD 304  Environmental Topics (option to repeat for credit)  3
ENVD 305  Research and Programming                      3
ENVD 408  Integrated Senior Problems I                  3
ENVD 410  Integrated Senior Problems II and Specification 3
ENVD 413  Portfolio and Professional Practice          3
Select two of the following courses for a total of 6 credits:  6
    ENVD 304  Environmental Topics                      
    ARCH 694  Homeplaces                                 
    ENVD 304  Environmental Topics                      
    or ARCH 731  Architecture of Health                  
    or INDD 508  Materials and Processes                  
    or INDD 510  Human Factors in Design                  
    or INDD 512  Methods in Design                        
    VISC 425  Environmental Graphics (or VISC Elective)   
    ADS 560  Topics in Design: _____                     

Professional Studies (10)
ADS 320  Hallmark Symposium Series (1 credit hour, 4 semesters)  4
Select two from the following:                           6
    ADS 530  Intra Design Problems: _____                 
    ADS 531  Internship                                  
    ADS 560  Topics in Design: _____ (OR)                
    ADS 532  Study Abroad: _____ (and ADS 533 Study Abroad Documentation)  3

KU CORE & Liberal Arts (60)
English: Basic requirements                              9
Select one of the following:                             3
    ENGL 351  Fiction Writing I                          
    or ENGL 353  Screenwriting I                         
    or ENGL 360  Advanced Composition: _____             
    or ENGL 361  Professional Writing: _____            
    or ENGL 362  Foundations of Technical Writing       
COMS 130  Speaker-Audience Communication (GE22)         3
or JOUR 150  Stand and Deliver                          
Arts & Humanities course (GE3H)                         3
Natural Sciences Course (GE3N)                          3
MATH 101  College Algebra (GE12)                        3
PSYC 104  General Psychology (GE3S)                    3
SOC 104  Elements of Sociology (or other GE41 course)   3
The Illustration & Animation program prepares students to develop and refine methodologies in image making while acquiring an effective use of visual language, and problem solving skills. Technical skills and techniques, as well as a refined understanding of composition, color and value are developed through the introduction and exploration of traditional and contemporary media. Business and legal issues of the industry are addressed that prepare students for numerous professional options that include print media, book publishing, motion graphics, entertainment, gallery installation, fashion, toys and games, and surface design.

The number of students admitted in the fall is based on resources (space and number of faculty members).

First-year Checkpoint / Entrance to the Second Year Studios

Beyond first-year studies there is a maximum of 20 seats available for degree-seeking Illustration & Animation majors each year. There are typically two students vying for every one available position. In order to arrive at an impartial means of entry, all first year students declaring Illustration & Animation as their major are ranked according to their cumulative GPA. The first 18 students on the list are allowed first opportunity to enroll in ILLU 305 (Image Making), the first of the two-part second-year foundational sequence. Enrollment for ILLU 305 is done ONLY during the Spring Advising & Enrollment period (for the following Fall term) and entry into the course is based solely on cumulative GPA standings. In order to qualify, students must have successfully completed BDS 101 and 103 (or their equivalents) and be enrolled in (or have completed) BDS 102 and ILLU 205 (or their equivalent) at the time of Spring Advising and Enrollment. Students will also enroll in VISC 201 (Visual Communication).

Note: ILLU 205 Drawing Media for Illustration should be taken in the spring semester of the freshman year.

A total of 124 credit hours is required for the degree, including 67 hours in art and design courses, as follows:

Foundation (9)
- BDS 101 Design Thinking and Making I 3
- BDS 102 Design Thinking and Making II 3
- BDS 103 Drawing for Design 3
- or ART 101 Drawing I

Studio Requirements (12)

VISC 201 Visual Communication Design 3
PHMD Elective 3
DRWG 213 Life Drawing I 3
PNTG 263 Painting I 3

Major Studies (37) 1
- ILLU 205 Drawing Media for Illustration 3
- ILLU 305 Image Making 3
- ILLU 315 Introduction to Illustration 3
- ILLU 405 Drawing Media for Illustration II 3
- ILLU 410 Fundamentals of Animation 4
- ILLU 415 Illustration Concepts 3
- ILLU 425 Concept Art 3
- ILLU 435 Sequential and Narrative Illustration 4
- ILLU 510 Animation (or Visual Art Elective (300+)) 4
- ILLU 445 Advanced Concept Art 3
- ILLU 535 Promotion and Marketing for Illustration 4

Professional Studies (10)
- ADS 320 Hallmark Symposium Series (1 credit hour, 4 semesters) 4

Select two from the following: 6
- ADS 530 Intra Design Problems: _____
- ADS 531 Internship
- ADS 560 Topics in Design: _____
- VISC 530 Portfolio
- ART 300 & 500: Special Topic in VA
- ADS 532 Study Abroad: _____ (and ADS 533 Study Abroad Documentation)

KU Core & Liberal Arts (57)

English: Basic requirements 9
- COMS 130 Speaker-Audience Communication 3
- or JOUR 150 Stand and Deliver

Arts & Humanities course (GE3H) This requirement should be fulfilled by an HA elective.
- Natural Sciences course (GE3N) 3
- FIN 101 Personal Finance (GE12) 3
- or MATH 101 College Algebra

Social Sciences course (GE3S) 3
- History of Art/Architecture/Design:
- SOC 104 Elements of Sociology (or other GE14 course) 3
- Social Responsibility & Ethics (GE5) 3
- HA 100/300 Introduction to Western Art History 3
- ADS 340 History and Philosophy of Design 3
- HA electives
- Academic concentration (9 hours at the 300+ level, no Design or Visual Art) 9

General electives 9

1 To enroll in Illustration and Animation courses in this category, students must pass a review and go through checkpoints. For more information, refer to the undergraduate degree and review requirements on the Design website.
Industrial Design

Graduates of KU’s Industrial Design program are particularly attractive to potential employers because of our well rounded and rigorous curriculum. Our students find career opportunities in a wide variety of disciplines including product design, furniture design, exhibit design, package design, human factors, design research and product planning. The variety of products and systems that fall within the potential scope of an industrial designer’s work is extremely broad. Examples range from household appliances to aircraft interiors and from furniture to major electronics equipment, transportation vehicles, and myriad other product areas.

A total of 124 hours is required for the degree, including 67 hours in design, as follows:

Photo Media

The Photo Media program at the University of Kansas is dedicated to evaluating and redefining the medium of photography. Through in-depth instruction, students develop a diverse technical skillset, becoming proficient in both analog and digital practices. The program encourages a strong work ethic, and places emphasis on visual literacy. Graduates of the Photo Media program at the University of Kansas leave with exceptional visual communication skills, fully prepared to successfully engage in a wide range of possible careers in lens-based media.

The number of students admitted in the fall is based on resources (space and number of faculty members).

First-year Checkpoint / Entrance to the Second Year Studios

Beyond first-year studies there is a maximum of 20 seats available for degree-seeking Photo Media majors each year. There are typically two students vying for every one available position. In order to arrive at an impartial means of entry, all first year students declaring Photo Media as their major are ranked according to their cumulative GPA. The first 18 students on the list are allowed first opportunity to enroll in PHMD 201 (Photography I), the first of the two-part second-year foundational sequence. Enrollment for PHMD 201 is done only during the Spring Advising & Enrollment period (for the following Fall term) and entry into the course is based solely on cumulative GPA standings. In order to qualify, students must have successfully completed BDS 101 and 103 (or their equivalents) and be enrolled in (or have completed) BDS 102 and PHMD 101 (or their equivalent) at the time of Spring Advising and Enrollment.

A total of 124 hours is required for the degree, including 67 hours in design, as follows:

Visual Communication Design

Visual Communication Designers shape the information that everybody sees, uses and experiences. The Visual Communication Design program at KU prepares students for current professional demands and provides students with the fundamental design thinking, making and process skills required to build a rewarding career and facilitate life-long learning. Career options for visual communication designers include a wide range of areas such as traditional print media, magazine and book design, corporate marketing communications, branding, packaging design, exhibition and environmental design, motion graphic design, website design, interface design and more.

The number of students admitted in the fall is based on resources (space and number of faculty members).

First-year Checkpoint / Entrance to the Second Year Studios

Beyond first-year studies there is a maximum of 40 seats available for degree-seeking Visual Communication Design majors each year. There are typically two students vying for every one available position. In order to arrive at an impartial means of entry, all first year students declaring Visual Communication as their major are ranked according to their cumulative GPA. The first 36 students on the list are allowed first opportunity to enroll in VISC 202 (Elements of Typography) and VISC 204 (Principles of Visual Communication), the first of the two-part second-year sequence. Enrollment for VISC 202 & 204 is done ONLY during the Spring Advising & Enrollment period (for the following Fall term) and entry into the course is based solely on cumulative GPA standings. In order to qualify, students must have successfully completed BDS 101 and 103 (or their equivalents) and be enrolled in (or have completed) BDS 102 at the time of Spring Advising and Enrollment.

Visual Communication Design Track

A total of 124 credit hours is required for the degree, including 67 hours in design courses, as follows:

Foundation (9)
BDS 101 Design Thinking and Making I 3
BDS 102 Design Thinking and Making II 3
BDS 103 Drawing for Design 3

Studio Requirements (15)
ILLU 205 Drawing Media for Illustration (or Drawing Elective) 3
PHMD 101 Fundamentals of Photography (or Photo Media elective) 3

3 studio elective courses in Design, Architecture, or Visual Art 9

Major Studies (33) 1
VISC 202 Elements of Typography 3
VISC 204 Principles of Visual Communication 3
VISC 302 Typographic Systems 3
VISC 304 Designing Understanding 3
VISC 402 Designer as Author 3
VISC 404 Designing for Social Interactions 3
VISC 414 Publication and Editorial 4
VISC 520 Designing for Change 4
VISC 525 Senior Problems 4
VISC 530 Portfolio 3

Professional Studies (10)
ADS 320 Hallmark Symposium Series (1 credit hour, 4 semesters) 4

Select two from the following: 6
ADS 530 Intra Design Problems: _____
ADS 531 Internship
ADS 560 Topics in Design: _____
ADS 532 Study Abroad: _____ (and ADS 533 Study Abroad Documentation)

KU Core & Liberal Arts (57)

English: Basic requirements 9
COMS 130 Speaker-Audience Communication (GE22) 3
or JOUR 150 Stand and Deliver

Arts & Humanities course (GE3H) 3
Natural Sciences course (GE3N) 3
FIN 101 Personal Finance (GE12) 3
or MATH 101 College Algebra

Social Sciences course (GE3S) 3
SOC 104 Elements of Sociology (or other GE41 course) 3
Social Responsibility & Ethics (GE5) 3

History of Art/Architecture/Design:
HA 100/300 Introduction to Western Art History 3
ADS 340 History and Philosophy of Design 3
HA 580 History of Photography 3

Academic concentration (9 hours at the 300+ level, no Design or Visual Art) 9

General electives 9

1 To enroll in Photo Media courses in this category, students must pass a review and go through checkpoints. For more information, refer to the undergraduate degree and review requirements on the Design website.

4 additional PHMD courses 300+
PHMD 301 or PHMD 501
PHMD 302 or PHMD 502
PHMD 402
PHMD 560

Professional Studies (10)
ADS 320 Hallmark Symposium Series (1 credit hour, 4 semesters) 4

Select two from the following: 6
ADS 530 Intra Design Problems: _____
ADS 531 Internship
ADS 560 Topics in Design: _____
ADS 532 Study Abroad: _____ (and ADS 533 Study Abroad Documentation)
COMS 130 Speaker-Audience Communication (GE22) 3
or JOUR 150 Stand and Deliver
Natural Sciences course (GE3N) 3
FIN 101 Personal Finance (GE12) 3
or MATH 101 College Algebra
Social Sciences course (GE3S) 3
SOC 104 Elements of Sociology (or other GE41 course) 3
Social Responsibility & Ethics (GE5) 3
History of Art/Architecture/Design:
HA 100/300 Introduction to Western Art History 3
ADS 340 History and Philosophy of Design 3
HA electives 3
Academic concentration (9 hours at the 300+ level, no Design or Visual Art) 9
General electives 9

1 To enroll in Visual Communication courses in this category, students must pass a review and go through checkpoints. For more information, refer to the undergraduate degree and review requirements on the Design website.

The design department offers 3 Master of Arts degrees, which share a core curriculum.

The M.A. in **Design Management** educates students in the theory, methods, and practices relevant to managing design in an organizational and business context. The program gives students the requisite knowledge to augment their professional skills and abilities, perform as effective design managers, and advance their careers.

The M.A. in **Environmental Design** educates students in the theory, methods, and practices of design for the built environment. This program prepares students for professional practice in integrated multi-disciplinary design practice.

The M.A. in **Interaction Design** educates students in the theory, methods, and practices of interaction design. It gives students the requisite professional knowledge, skills, and abilities to perform as interaction designers.

KU is an accredited institutional member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

### Master of Arts in Design with Concentration in Design Management

The Department of Design advances the professional work of thoughtful, creative, and meaningful design to delight, inspire, and serve the needs of people. Design is the planning that lays the basis for creation and development of every object or system people use. Design programs train students to be problem solvers who consider the aesthetic, functional, and user-focused aspects of an object or a process. This requires considerable integrative research, thought, modeling, interactive adjustments, and redesign.

The M.A in Design with a concentration in **Design Management** explores in depth the design function in business as an important integrative, and often interdisciplinary, area. The curriculum couples a rigorous, practical understanding of business with design’s natural capacity for handling diverse input, creative problem-solving, and human-centered understanding.

The Design Management program is for prospective students who already hold design-related baccalaureate degrees and are seeking specialized study in management. Applicants should have at least 2 years of full-time professional work experience in design or a design-related field.

The master’s student in design management should demonstrate an advanced ability to solve design problems, manage teams and processes, communicate clearly, and produce excellent goal-directed outcomes. The graduate will have completed significant course work and a thesis that documents independent discovery and research and will have passed an oral examination on that work. For more information about the program M.A in Design Management (http://design.ku.edu/ma-design-management-0).

#### M.A. in Design Management Admission

By permission of the Kansas Board of Regents, application for admission to graduate programs in the Department of Design may be refused if available instructional space does not allow addition of more students. The application deadline for Fall is **April 1** and **October 1** for Spring.

A departmental graduate faculty committee reviews transcripts and evaluates applications to determine admission qualifications. Applicants to the M.A. programs must have undergraduate and/or professional backgrounds judged by the Graduate Faculty to be appropriate preparation for the specialization selected.

A complete application for admission consists of the following materials:

1. Graduate application (http://www.graduate.ku.edu) and application fee (See Admission in the Graduate Studies (p. 2059) section of the online catalog for further information);
2. 1 unofficial copy of the transcript from all colleges or universities attended, showing receipt of a bachelor’s degree, and 1 unofficial copy of the transcript showing any graduate degree or credit earned;
3. 3 letters of recommendation from people in a position to comment on your abilities and performance;
4. Statement of design philosophy and approach;
5. A portfolio of your design work, or if your previous degree was not in a design related discipline, samples of written work or other creative artifacts you have produced. Portfolio should represent the scope of your experience, knowledge, skills, and abilities to date. Please include documentation of each project: the challenge it was intended to address, the process involved, your role and the role of others in its execution. Please upload your portfolio digitally under “other documents” during the online application process. The portfolio is limited to 10 megabytes (not zipped) in PDF format;
6. For international students, a financial statement showing minimum financial support for the first year of study (see the Admissions page on the school's website (http://www.sadp.ku.edu)).
7. Evidence of language proficiency if the native tongue is not English.
adjustments, and redesign.

ELECTIVES OUTSIDE OF ART AND DESIGN (5)

Master of Arts in Design with Concentration in Environmental Design

The Department of Design advances the professional work of thoughtful,
believable, and meaningful design to delight, inspire, and serve the needs
of people. Design is the planning that lays the basis for creation and
development of every object or system people use. Design programs
train students to be problem solvers who consider the aesthetic,
functional, and user-focused aspects of an object or a process. This
requires considerable integrative research, thought, modeling, interactive
adjustments, and redesign.

The concentration in Environmental Design educates students and
develops their competency in design solutions that will enhance and
improve the experience of the “user” occupant of both the interior
and exterior built environment. Theory, method, and practice of this
integrated discipline approach create a basis for effective research and
conceptualization of design ideas for public and private spaces.

The M.A in Environmental Design further provides the student with
the opportunity to develop projects that integrate architecture, interior
spaces and graphics in a multi-disciplinary approach that is common
in today’s practice. The program aims to provide a broad based design
experience that involves the analyses of building systems, circulation,
spatial experiences, materials, furniture, lighting, use of graphics and
advanced digital technology. Students develop specific experience within
an environment that may involve strategically focused project types such
as retail, hospitality, health care, mixed use development, sport facilities,
etc. where integration of multi-disciplinary design is interdependent and
plays an important role in users’ interactions with the built environment.

The design department offers 3 Master of Arts degrees, which share a
core curriculum.

The M.A in Design Management educates students in the theory,
methods, and practices relevant to managing design in an organizational
and business context. The program gives students the requisite
knowledge to augment their professional skills and abilities, perform as
effective design managers, and advance their careers.

The M.A in Environmental Design educates students in the theory,
methods, and practices of design for the built environment. This program
prepares students for professional practice in integrated multi-disciplinary
design practice.

The M.A. in Interaction Design educates students in the theory,
methods, and practices of interaction design. It gives students the
requisite professional knowledge, skills, and abilities to perform as
interaction designers.

KU is an accredited institutional member of the National Association of
Schools of Art and Design (http://nasad.arts-accredit.org). The entrance
and graduation requirements in this catalog conform to the published
guidelines of that organization.

M.A. in Environmental Design Admission

By permission of the Kansas Board of Regents, application for admission
to graduate programs in the Department of Design may be refused if
available instructional space does not allow addition of more students.
The application deadline for Fall is April 1 and October 1 for Spring.

A departmental graduate faculty committee reviews transcripts and
evaluates applications to determine admission qualifications. Applicants
to the M.A. programs must have undergraduate and/or professional
backgrounds judged by the Graduate Faculty to be appropriate
preparation for the specialization selected.

A complete application for admission consists of the following materials:

1. Graduate application (http://www.graduate.ku.edu) and application
fee (See Admission in the Graduate Studies (p. 2059) section of the
online catalog for further information);
2. 1 unofficial copy of the transcript from all colleges or universities attended, showing receipt of a bachelor’s degree, and 1 unofficial copy of the transcript showing any graduate degree or credit earned;

3. 3 letters of recommendation from people in a position to comment on your abilities and performance;

4. Statement of design philosophy and approach;

5. A portfolio of your design work, or if your previous degree was not in a design related discipline, samples of written work or other creative artifacts you have produced. Portfolio should represent the scope of your experience, knowledge, skills, and abilities to date. Please include documentation of each project: the challenge it was intended to address, the process involved, your role and the role of others in its execution. Please upload your portfolio digitally under “other documents” during the online application process. The portfolio is limited to 10 megabytes (not zipped) in PDF format;

6. For international students, a financial statement showing minimum financial support for the first year of study (see the Admissions page on the school’s website (http://www.sadp.ku.edu)).

7. Evidence of language proficiency if the native tongue is not English.

8. Graduate Record Examination (GRE) test results.

Submit your graduate application and application materials online (http://www.graduate.ku.edu). Please contact the Admissions Coordinator if you have any questions:

### Master of Arts in Design with Concentration in Interaction Design

The Department of Design advances the professional work of thoughtful, creative, and meaningful design to delight, inspire, and serve the needs of people. Design is the planning that lays the basis for creation and development of every object or system people use. Design programs train students to be problem solvers who consider the aesthetic, functional, and user-focused aspects of an object or a process. This requires considerable integrative research, thought, modeling, interactive adjustments, and redesign.

**Interaction Design** involves researching and fashioning products, services, and systems that are useful, useable, and desirable. Interaction design offers a human-centered approach to innovation, creatively mediating how businesses engage with customers and how brands and organizations can become more relevant in the marketplace. Broadly speaking, interaction design defines the contextual behavior of artifacts, environments, and systems.

The Interaction Design program is for prospective students who already hold design-related baccalaureate degrees and are seeking advanced study in a versatile, rapidly growing professional design discipline. Applicants should have at least 2 years of full-time professional work experience in design or a design-related field.

The master’s student in interaction design should demonstrate the ability to conduct original design research, translate research insights into design input, and produce an interactive artifact of relevance and quality. The graduate will have completed significant course work and a thesis that documents independent discovery and research and will have passed an oral examination on that work. For more information about the program M.A in Interaction Design. (http://design.ku.edu/ma-interaction-design)

The design department offers 3 Master of Arts degrees, which share a core curriculum.

The M.A. in **Design Management** educates students in the theory, methods, and practices relevant to managing design in an organizational and business context. The program gives students the requisite knowledge to augment their professional skills and abilities, perform as effective design managers, and advance their careers.

The M.A. in **Environmental Design** educates students in the theory, methods, and practices of design for the built environment. This program
prepares students for professional practice in integrated multi-disciplinary design practice.

The M.A. in Interaction Design educates students in the theory, methods, and practices of interaction design. It gives students the requisite professional knowledge, skills, and abilities to perform as interaction designers.

KU is an accredited institutional member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Department of Urban Planning

Introduction

The KU Urban Planning program emphasizes policy planning and analysis within the context of urban or urbanizing environments. Policies affecting urban issues are formulated at all levels of government--federal, state, regional, and local--as well as in the private sector. The MUP program is geared towards meeting the needs for public planning policy in all these forums.

Courses

UBPL 200. Sustainability and Society. 3 Hours. GE11/GE3S.
This course will introduce the concept of sustainability, examining its early iterations, recent applications, and possible future transformations. Critical analysis of sustainability as a concept and societal goal will be a course cornerstone. We will examine two contemporary social issues that are relevant to students at the University of Kansas. Social science perspectives will be emphasized, but, because sustainability necessitates an interdisciplinary perspective, the course will consider the contributions of a wide range of disciplines to these issues. LEC.

UBPL 300. Planning the American City. 3 Hours.
A broad introduction to the field of urban planning as a technical profession, a process of decision-making, and a governmental function. The multi-disciplinary nature of planning as an area for professional practice in the geographical, socio-economic and political contexts of the U.S. is stressed. We will explore the promise and limitations of planning in the context of mitigating and adapting to climate change. The course is intended for both the student who is considering planning as a major field
of study and the student with primary interest in a related field who would like a working knowledge of past and current planning in the U.S. LEC.

**UBPL 502. Special Topics in Urban Planning: _____, 1-6 Hours.**
Intended for undergraduate individual or group projects/research in an urban planning topic. LEC.

**UBPL 522. History of the American City I. 3 Hours.**
This course examines the evolution of American cities from their European antecedents through the late 20th Century, from the urban planning perspective. It focuses on the changing spatial forms and functions of American cities and how these changes relate to socioeconomic and political aspects of urbanization as well as changes in technology. Emphasis is placed on analyzing the relationships between historical development patterns and the current range of problems facing most U. S. cities. (Same as UBPL 722 but gives undergraduate credit.) LEC.

**UBPL 538. Environmental Planning Techniques. 3 Hours.**
The course covers a variety of topics within environmental planning. Each topic is examined with respect to the scope of the issue, the methods of analyzing and/or measuring those issues, and the ways planners can address those issues in order to avoid or mitigate environmental problems. LEC.

**UBPL 565. Introduction to Sustainable Land Use Planning. 3 Hours.**
This course introduces students to the issues that planners and decision makers face as they strive to protect environmental resources, especially within the context of land use planning. Emphasis will be placed on the theoretical and policy considerations that guide the work of environmental planners. LEC.

**UBPL 662. Twentieth Century American Landscape. 3 Hours.**
The purpose of this course is to investigate the relationships between the American culture and the resulting built and natural landscape. Issues of building types, public places, and land use arrangements will be studied from a socio-historical perspective. (Same as ARCH 662.) LEC.

**UBPL 701. Directed Readings. 1-6 Hours.**
Designed to meet the needs of students whose study in urban planning cannot be met with the present courses. Prerequisite: Consent of instructor. RSH.

**UBPL 705. Economic Analysis for Planners. 3 Hours.**
An introduction to the concepts and analytical techniques of economics that are most relevant to urban planners. The first part of the course is devoted to microeconomic theory, welfare economics, and the role of the government in the economy. The remainder covers public finance, investment analysis, and methods of determining the allocation of public resources (such as benefit-cost analysis). LEC.

**UBPL 710. Introduction to Housing Policy. 3 Hours.**
Designed to provide an introduction to the various methods used by the public sector in order to intervene in the housing market. Many different programs are used by governments at all levels to serve many different housing goals. This course will examine many of these programs in an effort to understand what they are supposed to accomplish and how well they work. In all cases, the objective of the course is to train planners so that they have a firm understanding of housing programs that exist now as well as a grasp of the methods used to select housing strategies for implementation by the public sector. LEC.

**UBPL 714. Local Economic Development Planning. 3 Hours.**
This course provides a broad overview of local economic development planning. Emphasis is on the role of the practitioner and the various activities that can be pursued to encourage and enhance the economic base of a locality. The objectives of the course are to answer the questions: who are economic development planners; what backgrounds and interests do they have; what types of activities do they perform and initiate to encourage and enhance economic development; and how do they decide upon which activities to pursue? Prerequisite: UBPL 764 or permission of instructor. LEC.

**UBPL 715. Community** in Neighborhood Planning and Design. 3 Hours.
This course provides a place-centered approach for understanding and applying the idea of community to neighborhood planning. The course explores social theories of community and how these have influenced prescriptive models for neighborhood development and design. The course also evaluates the interplay of social, environmental, and economic forces at the neighborhood level and their relationship to community development and well-being. LEC.

**UBPL 716. Community and Neighborhood Revitalization. 3 Hours.**
The course examines the fields of community development and the revitalization of urban neighborhoods. In the course, students study the theories of community redevelopment as well as the methods of analysis guiding the planning of neighborhoods. The course also reviews the many programs that exist to assist the neighborhood revitalization process and looks at the literature evaluating the implementation of these programs. As an implementation course, students complete a project that calls for them to apply the knowledge learned to real world setting. Prerequisite: UBPL 764 or permission of the professor. LEC.

**UBPL 722. History of the American City II. 3 Hours.**
This course examines the evolution of American cities from their European antecedents through the late 20th Century, from the urban planning perspective. It focuses on the changing spatial forms and functions of American cities and how these changes relate to socioeconomic and political aspects of urbanization as well as changes in technology. Emphasis is placed on analyzing the relationships between historical development patterns and the current range of problems facing most U. S. cities. (Same as UBPL 522 but gives graduate credit.) LEC.

**UBPL 730. Plans and Planning Processes. 3 Hours.**
This course is about how to create plans and put the pieces of cities together in a sustainable manner, balancing the competing values of economy, ecology, equity, and livability. It introduces students to the planning process in the U.S., what makes great plans, the basic implementation tools for planning (zoning, capital improvement plans, engineering standards, and subdivision regulations.) We will learn about the Comprehensive Plan along with specialized plans for transportation, housing, land use, and the environment. LEC.

**UBPL 735. Site Planning and Design. 3 Hours.**
Site planning is the arrangement of elements (buildings, landscaping, parking, open space) on particular pieces of property. This class focuses on the site planning process and the implementation of site design standards through regulations. We will delve into the elements and principles of design and ask these big questions: What makes great public spaces? What makes great neighborhoods? What makes great streets? What can we do to steer development in the direction of greatness? LEC.

**UBPL 736. Planning Institutions. 3 Hours.**
This course explores the legal principles underlying the institutions, practices and processes of city planning. Subjects to be discussed include zoning, eminent domain, subdivision regulation, transfer of development rights, environmental regulation, growth management, and other planning mechanisms used to guide urban growth and control the use of land. Students should emerge from the course with a solid understanding of both the logic and routine practice of planning in a procedural and institutional context. LEC.
UBPL 737. NEPA Environmental Assessments. 3 Hours.
This course provides an understanding of how to effectively manage and conduct environmental assessments as required by the National Environmental Protection Act (NEPA). Topics include the history and intent of NEPA; the steps, players and assessment types; techniques used to balance environmental concerns with the social and economic considerations; and the role of the courts and environmental advocacy groups in challenging NEPA assessment findings. The class also addresses the role of leadership, conflict resolution, and consensus building in managing environmental assessments. Case studies are used to examine different assessment types and process approaches. LEC.

UBPL 738. Environmental Planning Techniques. 3 Hours.
The course covers a variety of topics within environmental planning. Each topic is examined with respect to the scope of the issues, the methods of analyzing and/or measuring those issues, and the ways planners can address those issues in order to avoid or mitigate environmental problems. LEC.

UBPL 739. Issues in Growth Management. 3 Hours.
This course examines various aspects of growth management including its history, legal foundations, and application at different levels of government. Growth management not only means dealing with the rapid growth of cities, it also includes managing slow growth, no growth, and negative growth with the ultimate goal being sustainability. Impacts on affordable housing, economic development, social equity, transpiration, and environmental conservation are also explored. LEC.

UBPL 741. Quantitative Methods I. 3 Hours.
Introduction to quantitative techniques utilized in planning analysis. Introduction to inferential statistics, computer programming, and the use of statistical packages. LEC.

UBPL 742. Quantitative Methods II. 3 Hours.
Advanced study in planning techniques in the areas of population forecasting, analysis of variance, and regression. The course makes extensive use of microcomputers. Prerequisite: UBPL 741 or consent of instructor. LEC.

UBPL 746. GIS Applications for Design and Planning. 3 Hours.
This course will explore a range of Geographic Information Systems (GIS) applications for students in architecture and planning. It will be structured as a workshop, starting with a review of basic GIS concepts and procedures. Different digital data sources will be explored, along with file sharing (import and export) capabilities. The focus will be on applications at different scales using projects in architecture, site planning, environmental planning, urban analysis, and regional analysis. Three dimensional analysis will also be introduced. Each student will develop a final project as a synthesis of earlier exercises and as an application relevant to their individual professional interests. LEC.

UBPL 750. Introduction to Transportation Planning. 3 Hours.
This course is a survey course covering multiple modes of transportation (planes, trains, buses, automobiles, bicycles, and walking). The field of transportation planning is examined within a policy analysis framework. Knowing the policy context and understanding how decisions are made will assist transportation planners in understanding the world in which they operate. In addition to the policy context, this course will focus on the technical knowledge transportation planners are expected to know like federal requirements, traffic modeling, and specific topics like bicycle and pedestrian planning and traffic calming. LEC.

UBPL 755. Planning Intercity Transportation Systems. 3 Hours.
This course explores the supply and demand of intercity multimodal movement of people and goods from megaregional to global scales. Students will learn the characteristics and performance of rail, aviation, and marine travel, the nuts and bolts of supply provision, effects of intercity connections on communities, and mechanisms for planning at across state and national borders. LEC.

UBPL 756. Travel Demand Forecasting Methods. 3 Hours.
The course is intended to provide a working knowledge of analytical transportation planning; it emphasizes two elements. One emphasis is to describe the fundamental principles of transportation planning through the review of transportation modeling theory and practice. The second emphasis is to work with the TransCad model. Students learn how to use these models by running TransCad (GIS based modeling software), building a transportation model, and using it to forecast future transportation conditions. Prerequisite: UBPL 750 or consent of instructor. LEC.

UBPL 757. Transportation Planning Implementation. 3 Hours.
A variety of transportation implementation methods and strategies are explored. Project management with an emphasis on finance is the major focus of this course. This is a significant responsibility of transportation planners, consisting of several key steps including project initiating, planning, execution, and control. Other techniques included in this course deal with air quality conformity, congestion management, environmental reviews, developing performance measures, scenario testing, highway capacity analysis and micro-simulation modeling, and executing public involvement programs. LEC.

UBPL 758. Public Transit. 3 Hours.
This course familiarizes students with core concepts and practices in public provision of local transit systems from high-capacity heavy rail to on-the-fly demand response. Course modules examine modes, system design, planning issues, organizational relationships inherent to public transit, and technical operations. The course concludes with an examination of comprehensive transit systems. LEC.

UBPL 760. Historic Preservation Planning. 3 Hours.
In addition to studying the history of the preservation movement in the United States, the course will discuss preservation at the state and local level, preservation at the private level, ordinance creation, legal aspects of preservation, technical issues and contemporary issues and controversies in the field of preservation. Projects will deal with philosophic and current issues in preservation. LEC.

UBPL 761. Historic Preservation Economics. 3 Hours.
This course considers the economic strategies for the historic preservation of the built environment. Topics include investment tax credits, tax increment financing and tax abatement, bond issues, historic preservation grants, and revolving funds. Students will analyze case studies and meet guest speakers who make preservation projects work. Class projects may include market analyses, economic feasibility studies, rehabilitation/redevelopment plans, and technical research papers. LEC.

UBPL 762. Sustainability and the Future of the Built Environment. 3 Hours.
This course critically examines the evolving relationship between rehabilitation preservation, and new construction in creating a sustainable built environment in the United States during the twenty-first century. Some observers insist that we cannot build our way to sustainability, but instead must conserve our way to it. What is the appropriate balance of rehabilitation and new construction in creating sustainable built environment? What is the appropriate role of planning and design professionals in this movement? What knowledge and skills will be necessary? The course surveys the contemporary discussion about defining and evaluating a sustainable built environment as well as the economic and social requirements for creating a sustainable society. LEC.
Understanding how power, structures and agencies influence policy-making will help planners become savvier as they balance their roles as advisors, educators, facilitators, advocates, and administrators. This class explores the trials, tribulations, and triumphs of planners as they deal with politics.

UBPL 850. Urban and Regional Theory. 3 Hours.
This course explores the forces that shape the structure and function of cities and regions, drawing upon insights from planning, geography, economics, sociology, demography, and political science. Special attention is paid to theories that can be applied by urban planners to improve the economic performance, quality of life, and social equity of urban areas. Topics covered include the origin and development of cities, agglomeration economies, location theory, central place, mix-and-share analysis, economic base, input-output, labor markets, urban models, regional development planning, globalization, high technology, urban poverty, and problems of regional governance. Prerequisite: UBPL 741 and UBPL 815. LEC.

Master of Urban Planning
The Master of Urban Planning (M.U.P.) is a graduate professional degree that prepares students for careers in urban planning. It is the normal academic qualification for various planning and planning-related positions. The M.U.P. degree is accredited by the Planning Accreditation Board. The program places strong emphasis on policy planning and analysis in the context of urban or urbanizing environments. The program is geared toward meeting the need for planning policy on urban issues at any level of government — federal, state, regional, and local — or outside the governmental arena.

3 major areas of knowledge are necessary for competence in policy planning:

1. History and theory, which provide the conceptual framework of social, economic, and political environments within which public policy is formed;
2. Quantitative methods, which provide the skills necessary to define and analyze problems through data manipulation; and
3. Specialty areas, which provide focused information and skills in environmental planning, housing and development planning, land use planning and urban design, and transportation planning specializations.

Baccalaureate Preparation
A good undergraduate education in almost any discipline is acceptable preparation. Undergraduate preparation in the social sciences, engineering, business, or architecture is closely related to the direction and content of the M.U.P. program at KU. Students pursuing the bachelor of architectural studies may apply for a joint M.U.P. degree during their junior year.

Admission
Persons whose previous records indicate ability to succeed with advanced work may be admitted to graduate studies through the Department of Urban Planning. Ordinarily, admission requires a bachelor's degree and a grade-point average of approximately B from KU or another institution with substantially equivalent requirements for the bachelor's degree. The student's academic background is reviewed before an applicant without a bachelor's degree is admitted as a degree-seeking student at
KU. Admission decisions are based on the information supplied in the application materials.

A complete application consists of the following:

- A completed graduate application (http://www.graduate.ku.edu) submitted online (see Admission in the Graduate Studies (p. 2059) section of the online catalog);
- A statement of the applicant’s career goals and substantive interests in urban planning and rationale for undertaking graduate study in urban planning at KU;
- 1 copy of transcripts from all colleges or universities attended;
- 3 reference forms or letters of recommendation from persons qualified to comment on the applicant’s academic abilities and probable success in graduate study;
- Scores from the Graduate Record Examination;
- Test of English as a Foreign Language (TOEFL) or IELTS scores, if the student’s native language is not English; and
- Application fee submitted with online application.

Application deadlines are July 1 for fall and December 1 for spring admission. Candidates are urged to submit applications as early as possible. It may take several weeks to obtain all the materials required for an application file. International applicants must apply by June 1 for fall and November 1 for spring admission.

Applications for financial aid generally are considered early in the spring. In some cases, there is a February 15 application deadline. Students seeking scholarship funding must submit their scores from the Graduate Record Examination.

Submit your graduate application (http://www.graduate.ku.edu) and application fee online. Other requested application materials may be submitted online with the application or mailed to:

The University of Kansas
Department of Urban Planning
Marvin Hall
1465 Jayhawk Blvd., Room 317
Lawrence, KS 66045

M.U.P. Degree Requirements
All students must complete 48 credit hours, which normally involves 4 semesters of full-time study.* The required courses are

*Students completing the 5-year B.A.-M.U.P. track within the School of Architecture, Design and Planning must complete 30 credits following completion of the B.A. portion of the track.

Specializations
The curriculum requires each student to specialize in one of the following substantive areas:

- Housing and development planning,
- Sustainable land use planning, and
- Transportation planning.

The student should declare a specialization by the third semester of the course of study. In each specialization, the student must complete one course each in theory and policy, methods, and implementation. The minimum number of credit hours for the major area depends on whether the student pursues the thesis or the non-thesis option. For the thesis option, the student takes at least 9 hours in the major area. For the non-thesis option, the student takes at least 12 hours in the major area.

The specialty courses are as follows:

### Housing and Development Planning

**Theory and Policy (3)**
- UBPL 710 Introduction to Housing Policy 3

**Methods (3)**
- UBPL 764 Real Estate Development I 3

**Implementation (3)**
- UBPL 716 Community and Neighborhood Revitalization 3

**Supplementary Courses (9)**
- UBPL 760 Historic Preservation Planning 3
- UBPL 768 Real Estate Development II 3
- UBPL 802 Special Topics: ______ 3

### Sustainable Land Use Planning

**Theory and Policy (3)**
- UBPL 765 Introduction to Sustainable Land Use Planning 3

**Methods (6)**
- UBPL 735 Site Planning and Design 3
- UBPL 738 Environmental Planning Techniques 3

**Implementation (3)**
- UBPL 773 Environmental Planning Implementation 3

**Supplementary Courses (9)**
- UBPL 730 Plans and Planning Processes 3
- UBPL 762 Sustainability and the Future of the Built Environment 3
- UBPL 764 Real Estate Development I 3

### Transportation Planning

**Theory and Policy (3)**
- UBPL 750 Introduction to Transportation Planning 3

**Methods (3)**
- UBPL 756 Travel Demand Forecasting Methods 3

**Implementation (3)**
- UBPL 757 Transportation Planning Implementation 3

**Supplementary Courses (12)**
Free Electives
Besides the specialty courses, thesis students must take 3 additional credit hours, and non-thesis students must take 9 additional credit hours of elective courses; 6 of these hours may be outside the School of Architecture, Design and Planning.

Thesis Option
The thesis provides an opportunity for the student to apply individual research skills in the context of her or his interest. The thesis is a continuation of the student’s course of study rather than a separate academic effort. The format, medium, and focus of the thesis vary with the problem addressed. 6 hours of academic credit are given for the thesis. A student desiring to prepare a thesis must develop, with the assistance of a faculty advisor, a thesis proposal to be submitted to the faculty thesis committee no later than the first day of classes of the semester before the semester in which the student plans to graduate. The committee’s approval is required before the student may pursue the thesis option. A final general examination on the thesis and course work is held.

Non-thesis Option
The comprehensive examination may be taken as an alternative to the thesis. The examination provides a learning experience that encourages the student to synthesize the knowledge gained through course work and tests the student’s competence as a generalist/specialist planner. The examination consists of the student responding to a scenario or case study in which one is asked to synthesize knowledge gained in one’s course work and apply it within a particular context. No academic credit is given for the examination.

M.U.P. Curriculum
A total of 48 semester hours is required. Students typically complete the degree within 2 years.

Total Hours: 48

Master of Urban Planning and Bachelor of Arts in Architectural Studies
This program leads to the Bachelor of Arts in architectural studies and the Master of Urban Planning; it combines 6 years into 5 years of study. A total of 154 credit hours is required, composed of 39 hours in urban planning and 115 hours in architectural studies.

Students wishing to pursue this option must apply during the third year of study. Students must meet all the required courses for the bachelor degree and have a minimum 3.25 grade-point average. In the fourth year of undergraduate study, a student takes the same courses as a first-year graduate student. The student may submit Graduate Record Examination scores during the junior year but must submit GRE test results in the senior year. If the student has completed all first-year planning courses and been accepted for admission by the end of the fourth year of study, the student officially enters the graduate program to pursue the second year of study toward the completion of the Master of Urban Planning degree.

Master of Urban Planning and Master of Architecture
This joint degree combines in a 4-year program the normal 2-year M.U.P. degree and the 3-year M.Arch. degree, both offered through the School of Architecture, Design and Planning. The program is intended for students interested in careers in urban design. A total of 133 credit hours is required, comprising 39 hours in urban planning and 94 hours in architecture.

Applicants must meet admission requirements of both the Department of Architecture and the Department of Urban Planning. Students pursuing the M.Arch. may apply to the joint degree program during, but not after, the second year of study. Students pursuing the M.U.P. may apply to the joint degree program during, but not after, the first year of study.

Master of Urban Planning and M.A. in American Studies
This joint degree combines in a 2½-year program the normal 2-year M.U.P. degree offered through the School of Architecture, Design and Planning and the normal 1-year M.A. degree in American studies offered through the College of Liberal Arts and Sciences. The program is designed for students interested in careers in policy planning and research involving the arts, social planning, cultural activities and facilities, and historic preservation.

Contact the Department of American Studies or the Department of Urban Planning for information about degree requirements.

Master of Urban Planning and M.A. in Geography
This joint degree combines in a 3-year program the 2-year M.U.P. degree offered through the School of Architecture, Design and Planning and the normal 1½-year M.A. degree in geography offered through the College
of Liberal Arts and Sciences. The program is designed for students interested in careers in policy planning and research involving GIS cartography, environmental planning, and land use planning.

Contact the Department of Geography or the Department of Urban Planning for information about degree requirements.

**Master of Urban Planning and Master of Public Administration**

This joint degree combines in a 3-year program the M.U.P. degree offered in the School of Architecture, Design and Planning and the Master of Public Administration degree offered through the College of Liberal Arts and Sciences. The program is intended for students interested in careers in urban policy planning and urban management.

Contact the Department of Public Administration or the Department of Urban Planning for information about degree requirements.

**Master of Urban Planning and Juris Doctor**

The joint Juris Doctor /Master of Urban Planning program is open to those who have earned baccalaureate degrees and whose undergraduate records indicate that they have the capacity to complete the law and urban planning programs. Applicants must meet the admission requirements of the School of Law and of the Department of Urban Planning. Applicants should apply and be admitted to each school separately before they enter the first year of the program. The Law School Admission Test is the required entrance examination for the law school; the Graduate Record Examination is required for the Department of Urban Planning. A student who decides to enter the program while enrolled in the first year of the J.D. or M.U.P. curriculum must obtain approval from the School of Law and the Department of Urban Planning as soon as possible. No student may enter the joint degree program after completing more than 4 full semesters in the law school or 3 full semesters in the Department of Urban Planning.

A total of 115 credit hours is required for the joint degree, comprising 39 hours in urban planning and 76 hours in law. The joint degree program can be completed in 4 years. To pursue the degrees separately would require 5 years. For information on the combined program, consult the School of Law and the Department of Urban Planning.
Arts (in CLAS)

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu) for details). Other years' catalogs» (http://catalog.ku.edu/archive)

Dance (p. 130)
- Bachelor of Fine Arts in Dance (p. 133)
- Bachelor of Arts in Dance (p. 134)
- Minor in Dance (p. 135)

Film and Media Studies (p. 136)
- Bachelor of Arts and Bachelor of General Studies in Film and Media Studies (p. 142)
- Minor in Film and Media Studies (p. 144)
- Master of Arts in Film and Media Studies (p. 144)

- Master of Arts in Theatre (p. 155)
- Master of Fine Arts in Theatre Design-Scenography Concentration (p. 156)
- Doctor of Philosophy in Theatre (p. 157)

Visual Art (p. 158)
- Bachelor of Fine Arts in Visual Art (p. 169)
- Bachelor of Fine Arts in History of Art (p. 169)
- Bachelor of Arts in Visual Art (p. 173)
- Bachelor of Art Education in Visual Art Education (p. 174)
- Master of Fine Arts in Visual Art (p. 175)
- Master of Arts in Visual Art Education (p. 176)

Introduction

The School of the Arts in the College of Liberal Arts and Sciences is composed of 4 departments:
- Dance (p. 130)
- Film and Media Studies (p. 136),
- Theatre (p. 147), and
- Visual Art (p. 158).

The school acquaints students with the arts as an important field of a liberal culture, either as members of a discriminating public or as trained practitioners. It prepares students for careers in dance, film and media, theatre, and visual art and promotes scholarship and research in the arts. It offers curricula for teachers of art in public schools and institutions of higher education.

The school makes a substantial contribution to the cultural life of the campus, community, and state by providing a center for the best of theatre and dance performance and the exhibition of works of art and film.

Undergraduate Degree Requirements

Undergraduate Degree Programs

- The degree of Bachelor of Arts (B.A.) is granted with majors in dance, film and media studies, theatre, and visual art.
- The degree of Bachelor of Fine Arts (B.F.A.) is granted with majors in dance, history of art, theatre design, and visual art.
- The degree of Bachelor of General Studies (B.G.S.) is granted with majors in film and media studies and theatre.
- The Bachelor of Art Education (B.A.E.) offers a major in art education.

Requirements for Graduation

All undergraduate degrees from the University of Kansas require completion of the KU Core Curriculum. In addition to the KU Core, students must satisfy the degree specific and major requirements of the degree they are pursuing.

Degrees from the School of the Arts are conferred on candidates who have satisfactorily completed a minimum of 120 credit hours for the B.A., B.G.S., and B.F.A. degrees, including required subjects. The B.A.E. degree requires additional hours in student teaching, internship, and graduate credit for Kansas licensure and therefore requires a minimum of 139 hours.

45 credit hours must be in junior/senior-level courses, numbered 300 and above. 2.0 grade-point averages in KU courses and in junior/senior hours in the major are required for graduation. 4 hours of the total in each case except B.A.E. degrees may be in physical education activity courses. Art appreciation courses are not accepted toward art history requirements for students majoring in any field of art or design. HA 100 and HA 300 are not accepted toward any requirement for students majoring in any field of art or design.

Remedial Courses

Remedial courses listed in the catalog and Schedule of Classes are numbered below 100. Such courses include, but are not limited to, ENGL 50 and MATH 2. Such courses do not count toward graduation in the School of the Arts and may not be counted as distribution courses.

Facilities

Art and Design Building

View a slide show in the School of the Arts brochure.

The 130,000-square-foot Art and Design Building houses all major art and design programs, including studios and offices. The building houses the 2,100-square-foot Art and Design Gallery (http://art.ku.edu/about/art_design_gallery.shtml); this space features new exhibitions every 2 weeks and serves as an important component of the teaching mission. Each major program offers all students spacious work areas and a range of equipment, from traditional to the newest digital technology. Students have access to multiplatform computer labs with the most commonly used current software for photography, animation, CAD, 3-D, video
production, desktop publishing, scanning, illustration, large- and medium-format plotters, and color and black-and-white laser printers. Unique satellite computer areas are dedicated to textiles, metalsmithing and jewelry, expanded media, and printmaking. Students have access to a traditional Photography Laboratory, including a dark room for black-and-white photography, a digital processing lab, dedicated spaces for project photography, and an equipment checkout facility. The 6,400-square-foot Common Shop includes a range of woodworking equipment, a plastic vacuum former, metalworking equipment, and classroom space. All labs and the shop have technical support staff.

There are 3 large, well-equipped painting studios. The print studios consist of 8,000 square feet of workspaces and a dedicated computer lab for serigraphy, lithography, and intaglio. The intaglio studio has 5 presses and a separate acid room. The lithography studio has 3 presses and various sizes of stones. The serigraphy studio has 12 printing stations, a separate wash-out room, and a large exposure unit, available for a variety of photo-based processes. The sculpture studio is divided into 5 general work areas with appropriate equipment: woodworking, metal fabrication, foundry, an open courtyard, and individual studios. The foundry contains equipment necessary for casting with a variety of kilns, 3 gas-fired furnaces, and an overhead crane. There is an induction furnace with a lift-swing unit for bronze and a tilt box unit for iron and steel.

The 3,800-square-foot metalsmithing and jewelry studio has 8 rooms with separate areas for soldering, metalsmithing, plating/electro-forming, a finishing room, casting, gas and TIG welding, enameling, and a student-operated supply store. Matrix GemVision computer software is available for students to develop 3-dimensional jewelry models. The ceramics area includes 5,300 square feet of studio space in the Art and Design building as well as separate west campus Chamney barn facilities. Kilns include salt, soda, cross-draft wood, anagama wood-fired, raku, an electric test kiln, and several kinds of gas and electric kilns. The textile design area has separate weaving, screen-printing, sewing, and dye areas. The weaving studios are equipped with 4-, 8-, and 16-harness floor looms and two 16-harness AVL compu-dobby looms. The sewing area includes traditional machines, sergers, and a computer-aided embroidery machine. The textile Mac computer lab offers numerous software applications specific to weaving and surface design including jacquard weaving CAD software.

Murphy Hall

Murphy Hall houses all major theatre programs and facilities (http://theatre.ku.edu/about/facilities.shtml) for University Theatre (http://www.kutheatre.com) productions. Crafton-Preyer Theatre is a large proscenium theatre seating 1,181. It is equipped with a full-stage turntable, a hydraulic orchestra pit elevator, cutting-edge lighting and sound control equipment, and a recently renovated counterfeit line system. William Inge Memorial Theatre is a 50-foot by 50-foot black box theatre with flexible seating for approximately 120. It is also equipped with excellent lighting and sound control equipment. Well-equipped shops for scenery, costume, and props construction, as well as a lighting maintenance laboratory serve the production areas. Crafton-Preyer is also used as Stage Too! The audience is built onto the large stage of the theatre for a more intimate setting. 4 main studios are used as rehearsal halls and classrooms. The Thomas Gorton Music and Dance Library is in Murphy Hall.

Oldfather Studios

Programs in film and media studies are housed in the 18,000-square-foot Oldfather Studios, a fully equipped film and video production facility (http://film.ku.edu/~film/about/facilities.shtml) featuring a soundstage, sound and editing suites, screening rooms and classrooms. In these contemporary workspaces, students have the opportunity to plan, produce, and edit film and video using current technologies.

Robinson Center

The dance department is housed in Robinson Center, which contains 3 large, well-equipped dance studios. One of the studios converts into the Elizabeth Sherbon Theatre, an informal, black box theatre. Dance students have performance opportunities (http://dance.ku.edu/performance_opportunities) with the University Dance Company (http://www.ku.edu/404.php), New Dance, and in School of Music and Department of Theatre productions. The Thomas Gorton Music and Dance Library is in Murphy Hall.

Spencer Museum of Art

The Helen Foresman Spencer Museum of Art (http://www.spencerart.ku.edu) is regarded as one of the most innovative university museums and has long been considered one of the top teaching museums in the country. 5 galleries display selections from the permanent collection of more than 36,000 works of art. Areas of special strength include medieval art; European and American paintings, sculpture, and prints; photography; Japanese Edo-period paintings and prints; 20th-century Chinese paintings; and an ethnographic collection that includes 10,000 Native American, African, Latin American, and Australian works. Spencer Museum sponsors exhibitions, lectures, films, workshops, and activities that support curricular instruction in the arts. The also museum houses the Kress Foundation Department of Art History and the Murphy Art and Architecture Library, with more than 170,000 volumes and 600 current journals documenting the visual arts, design, and architecture from all cultures, from antiquity to the present.

Lied Center

The Lied Center of Kansas (http://www.lied.ku.edu) is a multipurpose performing arts facility with a 2,000-seat performing arts hall. It offers outstanding presentations of music, dance, and theatre, as well as lectures by artists and scholars. The Lied Center is a major regional presenter and provider of performing arts. The Department of Visual Art, Spencer Museum of Art, Hall Center for the Humanities, and the Lied Center present active visiting artist programs.

Undergraduate Programs

- The Department of Dance (p. 130) offers the Bachelor of Fine Arts degree and the Bachelor of Arts in Dance degree.
- The departments of Film and Media Studies (p. 136) and Theatre (p. 147) offer Bachelor of Arts and Bachelor of General Studies degrees.
- The Department of Visual Art (p. 158) offers the Bachelor of Fine Arts degree, the Bachelor of Arts degree, and the Bachelor of Art Education degree.
- The program leading to the Bachelor of Fine Arts degree in theatre design is offered cooperatively by the School of the Arts and the Department of Theatre (p. 147).

Courses for Nonmajors

Students in other KU schools may enroll in dance, film and media studies, theatre, and visual art courses for credit, subject to the availability of instructional time and the completion of necessary prerequisites. Qualifications are determined by course instructors.
Minors in dance, film and media studies, and theatre are offered for students in other disciplines.

**University Honors Program**

The school encourages qualified undergraduates to participate in the University Honors Program (http://www.honors.ku.edu).

**Art Exhibitions**

A number of exhibitions are sponsored by the Department of Visual Art. These are shown in department galleries and the Kansas Union. Each year, there are exhibitions of work by students in the school, representing the disciplines of art and design.

**Performances**

The University Dance Company (http://www.ku.edu/students/orgs/University_10366.html) performs a varied repertoire of ballet, modern, and jazz dance. It presents 2 major programs on campus each year as well as numerous presentations on tour.

The University Theatre (http://www.kutheatre.com) gives students a chance to act in, direct, design, and crew theatre productions. Each year, the University Theatre mounts about 8 fully staged productions. Students gain experience in children’s theatre, musicals, operas, and a range of classical and contemporary plays.

**Graduate Programs**

The School of the Arts is part of the College of Liberal Arts and Sciences (called the College or CLAS). The College is KU’s largest academic unit with more than 50 departments and programs. Graduate programs in the liberal arts and sciences include disciplines in the arts, humanities, social and behavioral sciences, and natural and mathematical sciences, as well as many interdisciplinary degree programs where often highly diverse disciplines come together to offer students a unique graduate experience. Each graduate program’s page contains program-specific information about admission, course curriculum, and faculty mentors.

The College’s participation in graduate education reflects a long and distinguished commitment to higher learning and research across the liberal arts and sciences. The College takes full advantage of KU’s role as an international research institution to ensure that the knowledge imparted to students is current and that they learn the skills of inquiry and critical evaluation. Graduate students are central to the research and teaching missions of the College. They are also the next generation of scholars who will make contributions to our communities and the production of knowledge for many years to come.

**It is the students’ responsibility to become thoroughly acquainted with all requirements for the degree programs in which they plan to participate.** These include the university requirements for graduate studies at KU outlined in the Graduate Studies (p. 2059) section of the online catalog, as well as the requirements of CLAS outlined in this section. Additionally, students are responsible for understanding the requirements that are unique to individual graduate programs outlined in both the graduate handbooks of individual academic units and the Departments & Programs sections of the online catalog.

In general, the student is subject to the regulations in force at the time of admission as a degree-seeking student. If degree requirements change, the student may opt to follow the new requirements or to continue under the regulations in force at the time of admission. Any student readmitted 10 years or more after his or her initial term as a degree-seeking student must fulfill the requirements in effect on the date of readmission to the graduate program.

**School of the Arts Graduate Degrees**

The School of the Arts offers graduate programs in 3 departments. The Master of Arts (M.A.) degree can be earned in film and media studies, theatre, and visual art education. The Master of Fine Arts degree is offered in visual art and in theatre design with a concentration in scenography. For students whose academic and professional goals can best be achieved through investigations at the interface of 2 or more disciplines, the School of the Arts offers master’s degree programs in interdisciplinary studies.

The School of the Arts offers the Doctor of Philosophy degree in film and media studies and theatre.

**Art Exhibitions**

A number of exhibitions are sponsored by the Department of Visual Art. These are shown in department galleries and the Kansas Union. Each year, there are exhibitions of work by students in the school, representing the disciplines of art and design.

**Performances**

The University Dance Company (http://www.ku.edu/404.php) performs a varied repertoire of ballet, modern, and jazz dance. It presents 2 major programs on campus each year as well as numerous presentations on tour.

The University Theatre (http://www.kutheatre.com) gives students a chance to act in, direct, design, and crew theatre productions. Each year, the University Theatre mounts about 8 fully staged productions. Students gain experience in children’s theatre, musicals, operas, and a range of classical and contemporary plays.

**Degree Requirements**

Requirements for the completion of master’s and doctoral degrees in the College are governed by department- or program-specific policy, College policies and procedures, Graduate Studies policies, and the University Senate Rules and Regulations.

Information on degree requirements presented in this section are limited to the most frequently consulted policies and key milestones in the graduate career. Students will find additional information under the KU Policy Library (http://www.policy.ku.edu/office.shtml/#16), the Graduate Studies (p. 2059) and College’s graduate regulations sections of the online catalog, the academic unit’s handbook, and the University of Kansas Rules and Regulations (p. 12).

**Master’s Degree Requirements**

**Coursework**

Coursework requirements for the Master’s degree are established and tracked by the department or program, and their completion verified and approved by the College. Please consult with your advisor, the academic unit’s graduate handbook, and the relevant Departments & Programs section of the online catalog for further information on specific courses or course sequences required for the degree.
Thesis

Final Examination
A final general examination in the major subject is required. The examination is held during the semester of the student's final enrollment in course work and, in the case of thesis students, when the thesis has been substantially completed. In thesis programs, an oral thesis defense may be one of the degree requirements. Such a defense may be offered in addition to, or in conjunction with, the required general examination in the major field. Students earning a master's thesis degree must have completed at least 1 hour of thesis enrollment before the master's degree can be awarded. See also Master's Degree Requirements (p. 2059), M.A. and M.S. Degrees, in the Graduate Studies section of the online catalog.

Doctor of Philosophy Degree Requirements

Coursework
Coursework requirements for the doctoral degree are established and tracked by the department or program, and their completion verified and approved by the College. Please consult with your advisor, the academic unit’s graduate handbook, and the relevant Departments & Programs section of the online catalog for further information on specific courses or course sequences required for the degree.

Research Skills and Responsible Scholarship
Graduate Studies requires that all doctoral students meet the Research Skills and Responsible Scholarship requirement before proceeding to the Comprehensive Exam. Specific requirements are determined by each department or program in consultation with Graduate Studies. Information on these requirements is contained in the department or program’s approved research skills requirement plan. Consult with your advisor and the Departments & Programs section of the online catalog for further information.

Residency
Two semesters, which may include one summer session, must be spent in resident study at KU. The College requires that residency be fulfilled before the comprehensive oral examination is scheduled. For more information on residency requirements, please see the Graduate Studies section (p. 2059) of the online catalog.

Comprehensive Oral Examination
The comprehensive oral examination covers the major field and any outside work for which the academic unit wishes to hold the student responsible. The examination is expected to be broader than a mere defense of the dissertation proposal.

The student must be enrolled the semester or summer session in which he or she completes the comprehensive oral examination. This enrollment may count toward the post-comprehensive enrollment requirements as described in Graduate Studies’ Candidacy for Doctoral Degree policy. If more than 5 years elapses between the completion of the comprehensive exam and degree completion, the student may be required to retake the oral comprehensive.

More information about comprehensive exam requirements may be found in the Graduate Studies section (p. 2059) of the online catalog.

Dissertation and Final Exam
Completion of the dissertation is the culminating phase of a doctoral program, marked by the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the dissertation is followed promptly by the final oral examination. Refer to the Graduate Studies section (p. 2059) of the online catalog for further information on the regulations governing the final oral examination, including committee composition and attendance regulations.

Ceremonies
At the end of each spring semester, the College holds a master’s hooding ceremony and Graduate Studies organizes the annual doctoral hooding ceremony. The School of the Arts hosts a separate ceremony for SOTA graduates. University Commencement information is available in the KU Commencement section of the KU website.

Attendance at these ceremonies is optional. Please consult the COGA website for more information.

The School of the Arts (http://sota.ku.edu) is home to four departments: dance, film and media studies, theatre, and visual art. It is housed within the College of Liberal Arts and Sciences, the broadest and most diverse academic unit on campus.

Students in the School of the Arts create, perform, and interpret works of art that contribute to our culture and history. As part of the College, students have access to ideas across the spectrum of arts, humanities, sciences and mathematics, social and behavioral sciences, and international studies. This partnership offers fresh possibilities for collaboration, paving the way for innovations and ideas.

Students interested in pursuing an undergraduate major or minor in the School of the Arts should contact the School of the Arts advisor at 785-864-3500 to schedule an advising appointment.

Graduate Advising
Advising of graduate students is primarily conducted within the graduate programs by program staff members and the individual faculty members who act as mentors and advisors. Students are encouraged to work with the director of graduate studies in their program regarding course selections and individual program requirements to ensure that all program milestones are reached as expected by the program faculty and the College. The graduate studies director or coordinator is also responsible for the regular assessment of students in the program and can address questions regarding a student’s progress toward the degree.

Students seeking information on specific policy or procedures should review the relevant content in the KU Policy Library (http://www.policy.ku.edu/office.shtml/#16) as well as the College and Graduate Studies (p. 2059) sections and the relevant Department or Program section of the online catalog. The College Office of Graduate Affairs (http://clas.ku.edu/coga), 108 Strong Hall, coga@ku.edu, is also available for assistance.
Students who have completed all degree requirements and are preparing to graduate are encouraged to schedule a Graduation Appointment with the College Office of Graduate Affairs.

Undergraduate University Regulations

For information about university regulations, see Regulations (p. 12) or visit the University of Kansas Policy Library (http://www.policy.ku.edu).

Credit/No Credit

A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (https://documents.ku.edu/policies/governance/USRR.htm#art2sect2).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Incompletes

The letter I indicates incomplete work, such as may be completed without re-enrollment in the course. The letter I should not be used when a definite grade can be assigned for the work done. It is not given for the work of a student in any course except to indicate that some part of the work has, for reasons beyond the student’s control, not been done, while the rest has been satisfactorily completed. At the time an I is reported on the electronic roster, the character and amount of work needed, as well as the date required for completion and lapse grade if further work is not completed by this date, should be indicated.

A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed 1 calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule automatically converts to a grade of F or U, or the lapse grade assigned by the course instructor, and appears on the student’s record.

Extensions to the time limit may be granted by the dean’s representative upon submission of a petition from the student containing the endorsement of the course instructor who assigned the I grade, or the department chairperson if the instructor is unavailable. After the I grade is converted to a grade of F or U, the grade may only be changed in accordance with USRR Article II, Section 3 (https://documents.ku.edu/policies/governance/USRR.htm#art2sect3).

Probation and Dismissal

Students may be dismissed at any time by the dean for excessive absences or for failure to make satisfactory progress in their studies. A student not on probation who fails to earn a grade-point average of at least 2.0 in any semester is placed on probation for the following semester. At the end of the semester in which the student has been on probation, he or she is removed from probation if the grade-point average for the semester is at least 2.0, with a minimum course load of 12 hours and a cumulative grade-point average of 2.0. A student whose course load is fewer than 12 hours or whose cumulative grade-point average is below 2.0 continues on probation even if the semester grade-point average is 2.0 or above. At the end of the semester in which the student has been on probation, he or she is dismissed for poor scholarship if the grade-point average for the semester is below 2.0. A student who has been dismissed for poor scholarship is not eligible to enroll again at any time, except with the special permission of the chair of the department. A reinstated student is placed on final probation. If the student fails to achieve a minimum grade-point average of 2.0 for the semester, he or she is dismissed, and readmission is not granted. Students who take courses at other institutions during the suspension may receive credit for such work only if it meets the approval of the department in which the student is doing major work.

Required Work in Residence

6 of the final 30 hours may be taken for nonresident credit, with advance permission. Nonresident credit may fill only elective requirements not in the major field of study.

Transfer of Credit

Only grades of C or higher are accepted as transfer credit toward degrees. Applicants with a lapse of 4 or more years since their last full-time enrollment may not expect studio credits in visual art to be accepted for transfer.

CredTran (http://admissions.ku.edu/apply/credits) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Graduate University Regulations

The pursuit of graduate study in the College of Liberal Arts and Sciences at KU is governed by department- or program-specific policy, College policies and procedures, Graduate Studies policies, and University Senate Rules and Regulations. Information on the most frequently consulted policies is contained in this section. Students should also consult the academic unit’s handbook, Graduate Studies and College sections of the KU Policy Library, and the Graduate Studies and University of Kansas Regulations sections of the online catalog.

Academic and Research Integrity

The College of Liberal Arts and Sciences strictly enforces KU and College policies on academic and scholarly misconduct. Academic integrity requires honest performance of academic and research responsibilities by students. These include, but are not limited to, ethical preparation of assignments, reports, and research papers; completion of examinations; ethical treatment of human and animal subjects; execution of administrative requirements; and a sincere and conscientious effort by students to abide by the policies set forth by instructors and research advisors.

Enrollment

Full-time, Half-Time and Part-Time Enrollment

Graduate Studies defines full-time enrollment as 9 credit hours in Fall or Spring semester and 6 hours in the summer session. Maximum enrollment for graduate students, except in rare instances, is 16 hours in Fall or Spring semester and 9 hours in the summer session. Please see the Full-time Enrollment for Graduate Students policy in the Graduate Studies (p. 2059) section of the online catalog and the KU Policy Library (http://www.policy.ku.edu/office.shtml/#16) for more information on
what constitutes full-time, half-time, and part-time enrollment, including variations on this policy for GTA/GRA/GA appointments and active duty military. At a minimum, all graduate students should be continuously enrolled in the Fall and Spring semesters while completing the credit hours required for the fulfillment of their degrees. Please consult the Graduate Studies (p. 2059) section of the online catalog and the KU Policy Library (http://www.policy.ku.edu/office.shtml/#16) for other enrollment regulations.

Continuous Enrollment for Master’s Students

All master’s students in the College who have completed the required coursework for their degrees must be continuously enrolled in the Fall and Spring semesters until all remaining requirements for the degree, including thesis when applicable, are completed. No enrollment is required during the summer session unless it is the semester during which the student will graduate, in which case enrollment is required. Certain academic units have rules governing summer enrollment.

Post-Comprehensive Enrollment for Doctoral Students

After passing the Comprehensive Oral Exam, doctoral candidates must be continuously enrolled. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester and 3 hours a summer session. At least one of these hours must be in dissertation or approved dissertation equivalent coursework.

In addition, the College requires a period of at least 5 months to elapse between the comprehensive oral exam and the final exam. Students that have completed all degree requirements before completing 18 hours are still required to continue enrollment until this 5-month requirement has been met.

Upon completion of the 18-hour requirement, a student’s level of enrollment should reflect as accurately as possible the faculty time he or she utilizes. This may be as little as one hour per semester.

Special enrollment requirements apply to those with GTA/GRA/GA appointments. Please consult the Graduate Studies (p. 2059) section of the online catalog and the KU Policy Library (http://www.policy.ku.edu/office.shtml/#16).

Lapses in Enrollment

Generally, no student is allowed to enroll after the first 4 weeks of a semester or the first 2 weeks of a summer session. If a student does not intend to enroll, he or she must determine the appropriate course of action in consultation with the department or program.

The student may elect to Voluntarily Discontinue from the program, and must inform the department or program in writing of this decision, which will in turn file the necessary forms with the College. This option requires the student to seek re-admission to the program if they choose to return at a future date. They remain eligible to seek admission to another department or program in the College.

The student may also petition for a Leave of Absence of up to one calendar year. If granted, the Leave of Absence maintains the student’s place in the program. Leave of Absence petitions must be filed by the department or program and provide evidence of the department or program’s endorsement of the student’s petition. Students interested in this option should begin by consulting with their advisor.

The time spent on Leave of Absence does not count toward the student’s time to degree, and therefore does not shorten the time available to complete their degree requirements. Similarly, if a student that has elected to Voluntarily Discontinue subsequently returns to the program, the time that has elapsed since his or her last enrollment does not count toward the time to degree.

Students who fail to enroll without completing the Voluntary Discontinuance process or without being granted a Leave of Absence are reviewed by the College Office of Graduate Affairs and the students’ academic units for possible dismissal. Any time that accrues during these lapses of enrollment in which the student does not occupy any approved enrollment category (e.g., Enrolled, Voluntarily Discontinued, On Leave) is counted toward the time to degree.

Students on an international student visa should consult with the International Programs office prior to any change in enrollment status.

Please see Graduate Studies policies governing Leave of Absence and Voluntary Discontinuance in the Graduate Studies (p. 2059) section of the online catalog and in the KU Policy Library (http://www.policy.ku.edu/office.shtml/#16).

Dual Enrollments

Students enrolled in two schools or working on two degrees at the same time must complete the work for both degrees. Courses may not be counted toward both degrees, except in the joint degree programs that have been established (e.g., M.P.A./J.D., M.A. in Economics/J.D., M.B.A./M.A. in Area Studies, etc.). Please refer to the Combined Degrees in the Graduate Studies (p. 2059) section of the online catalog for a complete list of approved joint degree programs.

Examinations

Students must be enrolled during the semester in which they complete their oral comprehensive or final examinations. Additionally, no graduate student will be allowed to take oral comprehensive or final examinations, or to go forward with a thesis or dissertation defense, if a waiting grade (WG) placeholder or an incomplete (I) grade is listed on the student’s transcript.

University Regulations on Grading

Article II of the University Senate Rules and Regulations provides detailed information on regulations governing the grading of graduate coursework. Students should also consult the Graduate Studies (p. 2059) section of the online catalog and the KU Policy Library (http://www.policy.ku.edu/office.shtml/#16) for more information on the Grading Policy.

The following are of particular relevance for graduate students in the College:

Passing Grades for Graduate Coursework

Only courses graded C or above are considered passing and may be counted for graduate credit. Courses graded C-, D or F may not be used to fulfill degree requirements.

Incomplete (I) and Waiting Grades (WG)

Incomplete (I) grades are used to note, temporarily, that students have been unable to complete a portion of the required course work during that semester due to circumstances beyond their control. Incomplete work must be completed and assigned an A-F or S/U grade within the time...
period prescribed by the course instructor. After one calendar year from the original grade due date, an Incomplete (I) grade will automatically convert to a grade of F or U, or the lapsed grade assigned by the course instructor.

Waiting Grades (WG) are placeholders and should only be used in rare instances when, for reasons beyond his or her control, an instructor is not able to assign a course grade by the deadline.

Credit/No Credit (CR/NC)
Graduate students may select the Credit/No Credit option only for those courses that do not fulfill a degree requirement. This includes courses used to fulfill the Research Skills and Responsible Scholarship requirement. Students should consult with their advisor prior to electing the CR/NC option.

College-Specific Grading Policy
Plus/Minus (+/-) Grades
Plus/minus (+/-) grades may be used in the College. The plus or minus sign describes intermediate levels of performance between a maximum of A and a minimum of F. Intermediate grades are calculated as 0.3 units above or below the corresponding letter grade.

Participation (P) Grades
Use of the Participation (P) grade is restricted in the College. It is only approved for a limited number of courses for which special permission has been sought. When permission is granted, it is only used to indicate participation in thesis, dissertation, or research enrollments (related to thesis or dissertation), or in the first semester enrollment of a two-semester sequence course. In any semester, the instructor may elect to assign a letter grade of A, B, C, D, or F when evidence about performance is available. A letter grade (A, B, C, D, or F) must be assigned in the last semester of enrollment to characterize the quality of the final product.

A-F or S/U grades are used in all other courses, including those that are repeated across semesters. The latter include courses in which students are collecting, assembling, or analyzing data; reviewing a research or scholarly literature; creating portfolios; or writing theses or dissertations (e.g., research, thesis, and dissertation hours). Students in these courses are expected to develop plans of study with their instructors and to contact these instructors throughout the semester to discuss their progress or changes in their plans. Instructors assign grades each semester based on the quantity and quality of the work students complete that semester. The grades that students receive in the last semester of these courses (e.g., for completing data analyses and literature reviews, exhibiting portfolios, defending theses or dissertations) apply only to that semester.

If a department or program has a course for which the P grading system may be more appropriate than the A-F or S/U grading system, it must seek special approval from the College.

Incompletes (I) and Waiting Grades (WG)
The College does not allow graduate students to take oral comprehensive or final examinations or to go forward with a thesis or dissertation defense if a waiting grade (WG) or an incomplete (I) grade is listed on the student’s transcript.

Probation and Dismissal Guidelines
To be in good standing, a student must maintain a 3.0 cumulative grade-point average and be making satisfactory progress toward the degree, as determined by the department or program.

If the grade-point average falls below 3.0, the department or program notifies the student in writing that they are being recommended for probation and outlines the expectations of the graduate program and the College that the student must meet to return to good standing. This is followed by a letter from the College confirming their probationary status.

When the rationale for probation is based on grade-point average, a student is typically placed on probation for 1 academic semester. If the cumulative grade-point average has not risen to 3.0 at the end of that semester, the student can either be dismissed or be allowed to continue on probation, depending on the department or program’s assessment of the student’s progress.

Students may also be placed on probation for failing to make satisfactory progress toward the degree. This may include, but is not limited to, failed exams or failure to make adequate and timely progress on the dissertation or thesis.

A graduate student is dismissed upon recommendation of the student's department or program. This typically occurs when a student fails to raise the grade point average to 3.0 after one or more semesters of probation, or otherwise fails to meet the terms of the probationary period. Academic dismissal should occur before a semester begins. If a student is dismissed during the semester, the dismissal is effective only at the end of the semester in which the department or program gives notification of dismissal. The department or program will notify the student in writing of the reasons for their dismissal. This will be followed by a letter from the College confirming the dismissal from the program and from the College.

In cases when a student’s grade point average is so low that their ability to ever achieve the 3.0 grade-point average required for graduation is in serious doubt, the department or program should move to dismissal. If they wish to allow the student to continue, they must petition the College on the student’s behalf.

A student who has been dismissed from a graduate department or program in the College is not eligible for readmission to graduate study in any department or program in the College of Liberal Arts and Sciences.

Time Limits
The University and the College have established time limits governing various stages of the graduate student career.

Maximum Time to Count Required Course Work
Courses completed at the University of Kansas, or transfer credits from another university, are valid for a period of 10 years. Courses that were completed more than 10 years before the scheduling of the final defense may not be used to fulfill graduate degree requirements in the College of Liberal Arts and Sciences.

With the endorsement of their graduate programs, students may petition the College to accept out-of-date course work to fulfill the requirements for their graduate degrees, provided they are able to justify why this course work meets the current standards of scholarship in the discipline.
Maximum Time to Submit Thesis or Dissertation

Students must make all final revisions and file the final version of the thesis or dissertation manuscript to UMI/ProQuest within six months of the date of final presentation and/or defense of the thesis or dissertation work. Until the final manuscript of a thesis or dissertation is filed, the student must be enrolled in accordance with enrollment policy. Graduate students in the College who do not file the final manuscript within the six-month time limit must enroll in 3 hours a semester until the thesis or dissertation is completed and filed.

Maximum Time to Complete the Degree

Graduate Studies has established time limits on master’s and doctoral degree completion. Please see Graduate Studies policies on Doctoral Program Time Constraints and Master’s Program Time Constraints in the Graduate Studies (p. 2059) sections of the online catalog and in the KU Policy Library (http://www.policy.ku.edu/office.shtml/#16) for full details.

Master’s degree students have a total of seven calendar years, excluding any periods of absence due to an approved leave of absence or voluntary discontinuation from a program, in which to complete the work for a master’s degree.

Doctoral degree students have a total of eight calendar years, excluding any periods of absence due to an approved leave of absence or voluntary discontinuation from a program, to complete the Ph.D. This includes students who enter with a master’s degree from an institution other than KU and bachelor’s degree holders who bypass the master’s and are admitted directly to a Ph.D. program.

Students who complete the master’s degree at KU and subsequently begin doctoral studies have 10 years to complete both degrees.

A time limit extension may be granted by the College. All extension petitions require the department to prepare and file a Graduate Degree Completion Agreement, which must then be approved by a designated subcommittee of the Committee on Graduate Studies. Per Graduate Studies policy, extensions may be granted for up to one year. However, additional time may be requested in the Completion Agreement. If the Completion Agreement is approved, subsequent petitions will receive an expedited review.

Academic units may set their own, more rigorous time limits. Consult with your advisor and review your academic unit’s handbook and the relevant Departments and Programs section of the online catalog for program-specific information, requirements, and restrictions.

Graduation

All graduate students must be enrolled the semester they complete all degree requirements.

Graduate Studies establishes an early deadline for degree completion for each semester and summer session, usually occurring at the end of the first 2 weeks of a semester or the end of the first week of summer session. If the student meets all degree requirements including the submission of all required documentation by this date, they are not required to enroll for that semester.

The final Graduate Application for Graduation Deadline is set by the Registrar for each semester. Please consult the official Academic Calendar for specific dates. To be eligible for graduation, an application for degree must be submitted and all degree requirements met by this deadline. This includes the submission of all required documentation to the College Office of Graduate Affairs. See the Graduation section of the COGA (http://clas.ku.edu/coga/graduation) website for more information.

Undergraduate Graduation with Honors

Undergraduates may earn honors upon graduation in 3 ways. The student may graduate with distinction or highest distinction, earn departmental honors in the major, or complete the University Honors Program (http://www.honors.ku.edu). It is possible to earn honors in 1 of these areas, any combination of them, or all 3. The award of honors is noted on the student’s transcript and in the Commencement program. Distinction and highest distinction are noted on the diploma.

Graduation with Distinction or Highest Distinction

The top 10 percent of each year’s graduating class is designated as graduating with distinction. Of these, the top one-third is designated as graduating with highest distinction. To be eligible, students must have completed at least 60 credit hours, graded A through F, in residence at KU. See Required Work in Residence below.

Graduation with Departmental Honors

Most departments and programs allow qualified majors to work toward graduation with departmental honors. Graduation with departmental honors is awarded in recognition of exceptional performance in the major, completion of a program of independent research or an alternative project, and a strong overall academic record.

In addition to the requirements of individual departments and programs (which must be approved by the College committee on undergraduate studies and advising), the College requires the following for graduation with departmental honors:

1. Candidates must declare the intention to work for departmental honors with the appropriate departmental honors coordinator(s) no later than the time of enrollment for the final undergraduate semester, but sooner if required by the department(s). Copies of the intent form should be returned to College Student Academic Services.

2. At the end of the final undergraduate semester, the candidate must have achieved an overall grade-point average of at least 3.25 and a grade-point average of at least 3.5 in the major. Both overall and major grade-point averages include work completed at other institutions, as well as at KU. No minimum grade-point average is required to declare candidacy for graduation with departmental honors unless specified by the department.

3. Each candidate’s departmental honors work must include independent research or an acceptable alternative project. The results of research are presented in a form appropriate to the requirements of the major department. Equivalents to the independent research component are established by approved departmental honors programs. In courses meeting the independent research requirement, the candidate must earn a grade of B or higher. Successful completion of all departmental honors requirements must be certified to the departmental honors coordinator(s) by a panel composed of at least three members of the College faculty who have read the report of the independent research and heard the oral presentation, where required.
Petitions
A department or program may petition to award graduation with departmental honors to deserving students who, for good reason, do not meet every College and departmental requirement. Send petitions to the committee on undergraduate studies and advising, College Student Academic Services (http://collegesas.ku.edu).

Late Completion of Honors Requirement
Requirements for graduation with honors may be completed after the date on which certifications are requested from departments. In fact, requirements—for example, the completion of an honors thesis for which the credit hours are not needed to graduate—may be completed after a student has graduated. When a candidate finishes all requirements, departments must notify College Student Academic Services (http://collegesas.ku.edu) in writing.

University Honors Program
The University Honors Program (http://www.honors.ku.edu) provides opportunities for outstanding and creative undergraduate students in all schools at KU to develop their full potential during their undergraduate years. The Honors Program brings talented students together in honors classes and seminars to benefit from mutual interests and association. It brings students and faculty members together in a teaching and research environment that ensures high academic achievement and standards. The program also coordinates merit-based scholarship opportunities for qualified students, including KU awards such as the University Scholars Program, and Undergraduate Research Awards. The Honors Student Association and the Honors Ambassador Program provide opportunities for student leadership.

In general, honors classes are small, oriented to discussion, and taught by full-time members of the faculty. Most honors courses fulfill requirements and deal with introductory fundamentals and principles, but they are likely to do so in more depth than their non-honors equivalents. Honors courses are distinguished by the energetic atmosphere and critical thinking generated by the students in them and the faculty members who teach them.

Honors students are interested in expanding their knowledge and take a broad range of liberal arts and sciences courses. This is true of students in the professional schools (architecture, engineering, business, etc.) as well as students in the College of Liberal Arts and Sciences. Honors program advisors typically recommend that students explore their interests through the broad curriculum choices KU has to offer.

A first-year, semester-long tutorial experience provides an introduction to an academic area of study in an informal setting that allows students to get to know one another and the instructor. The tutorial explores the research methods of a discipline and acquaints the student with the research resources at KU. Honors advising is personalized in meetings with honors staff, faculty fellows, and specially selected advisors from across the university. The program’s advising committee facilitates early and frequent contact with academic advisors in the students’ areas of interest. Honors students benefit from priority enrollment, which provides flexibility in planning one’s academic curriculum.

The program does not require a minimum number of honors courses a semester. However, students in the program quickly discover that honors courses engage the intellect, hold the interest, and create the enthusiasm for learning they seek at a university. Students in the professional schools are particularly encouraged to seek out honors course opportunities early, while their curricula still have breadth and flexibility.

Honors students are strongly encouraged to include research, study abroad experiences, internships, and community service in their academic programs. Consult Honors Program staff about applying these activities toward completion of honors requirements.

Admission
Students with strong high school curricula and excellent academic records are encouraged to apply to the University Honors Program. Admission is highly competitive. Although no ACT/SAT composite score or high school grade-point average guarantees that a student will or will not be admitted to the University Honors Program, this year’s average ACT composite for accepted students is a 32.4, and the average unweighted GPA for an accepted student is 3.96. Applications are evaluated on the basis of high school curriculum, grades, an essay, activities, and standardized test scores. Applications from first- and second-year students currently attending KU, as well as incoming transfer students, are evaluated on the basis of college course work, an essay, and college activities. Review of applications begins in October and continues through April. Send inquiries to the University Honors Program, 1506 Engel Road, Lawrence, KS 66045-3845. View further information and the online application (http://www.honors.ku.edu).

Completion of the Program
Students graduate from the program by completing 8 honors units and the first-year, semester-long tutorial. The 8 units must be completed as follows:

1. 6 honors courses (may include graduate-level courses numbered 700 and above).
2. 1 out-of-classroom experience such as study abroad, departmental honors, documented research experience, approved and documented internship experience, or approved and documented community service.
3. The eighth unit may be from either category 1 or category 2. Students also must maintain a minimum 3.25 grade-point average.

Nunemaker Center
This unique building, with its modern architectural design, is the home of the Honors Program, near the Daisy Hill residence halls at 15th Street and Engel Road. The Honors Program is home to several faculty fellows who serve the program and bring additional resources to the program to complement the full-time staff. Faculty fellows are available for advising, consultation about majors and careers, guiding research projects, and work with the Honors Council to develop programmatic initiatives.

Students are encouraged to take advantage of the spaces available at Nunemaker, including several classrooms and study areas, a kitchen, comfortable lounges that include 2 fireplaces, and wireless Internet access. Nunemaker also serves as a gallery for undergraduate art. The center is open days and evenings.

View Honors (http://catalog.dept.ku.edu/201314/schools/clas/honors) courses in the online catalog.

Graduate Awards
The College of Liberal Arts and Sciences offers several awards to recognize outstanding graduate students, faculty service, teaching excellence, and exemplary advising. Below, you will find a brief
description of each award. More specific information about eligibility and the call for nominations each year can be found on the College’s website under Faculty Awards (http://clas.ku.edu/resources/faculty-staff/awards) and Graduate Student Awards (http://clas.ku.edu/resources/faculty-staff/awards).

Graduate Student Awards

Howard J. Baumgartel Peace and Justice Award
This is an annual award to support a graduate student in the College or the School of Business for thesis or dissertation research whose interests, achievements, and talents are in the peace and justice field.

Outstanding Thesis/Research Project Award
The Committee on Graduate Studies in the College has established 2 annual awards for students receiving a master’s degree. The awards carry a $500 stipend. Students are nominated for the award by their advisors. Each department may nominate one master’s student for each award.

Graduate Faculty Awards
Byron A. Alexander/John C. Wright Graduate Mentor Awards
Graduate students (current or those who have graduated since May of the calendar year prior to the award deadline) may nominate any tenured or tenure-track faculty member in the College of Liberal Arts and Sciences who has served as an outstanding mentor.

Career Achievement Teaching Award
This annual award recognizes a retired faculty member in the College of Liberal Arts and Sciences who has made a significant contribution to the teaching of College students at either the undergraduate or graduate level and who has distinguished him/herself through excellence in teaching. The award amount is $1,000.

Dance Courses

DANC 101. Ballet I. 1.5 Hour.
Classical and modern approaches to the language of ballet for beginners. May be repeated for credit. Does not count toward the dance major requirements. ACT.

DANC 102. Ballet II. 1.5 Hour.
Classical and modern approaches to the language of ballet for experienced beginners. May be repeated for credit. Does not count toward the dance major requirements. Prerequisite: DANC 101 or consent of instructor. ACT.

DANC 103. Modern I. 1.5 Hour.
Dance technique for beginners with precedents in the movement vocabularies of Isadora Duncan, Martha Graham, Doris Humphrey, Merce Cunningham, and the seminal choreographers of modern dance. May be repeated for credit. Does not count toward the dance major requirements. Prerequisite: DANC 101 or consent of instructor. ACT.

DANC 104. Modern II. 1.5 Hour.
Dance technique for experienced beginners with precedents in the movement vocabularies of Isadora Duncan, Martha Graham, Doris Humphrey, Merce Cunningham, and the seminal choreographers of modern dance. May be repeated for credit. Does not count toward the dance major requirements. Prerequisite: DANC 103 or permission of instructor. ACT.

DANC 105. Jazz I. 1.5 Hour.
Dance technique for beginners based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for credit. Does not count toward the dance major requirements. ACT.

DANC 106. Jazz II. 1.5 Hour.
Dance technique for experienced beginners based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for credit. Does not count toward the dance major requirements. Prerequisite: DANC 105 or consent of instructor. ACT.

DANC 108. Pas de Deux. 1 Hour.
The elements of classical ballet partnering (pas de deux) are explored. These elements include supported poses, turns, lifts, and their coordination between the partners. For men only. Women enroll in Pointe and Pas de Deux, DANC 307. May be repeated for credit. ACT.

DANC 109. Men’s Ballet. 2 Hours.
An introduction to classical ballet focusing on the particular requirements of the male ballet technique including leaps, turns, batterie, and their presentation. May be repeated for credit. ACT.

DANC 125. Movement Efficiency for Athletes. 3 Hours.
A course designed to improve athletic performance potential by improving initiation and follow-through of movement; improving coordination, timing, and ease of action; and reducing the risk of injury through better technique. Students will learn how to apply the basic principles of Rudolf Laban and Irmgard Barteneff to the specialized movement skills of various sports. Students will also learn to develop individualized warm-ups and drills to improve performance. Prerequisite: Participation in team sports, dance, martial arts, other skilled sport movement, or consent of instructor. ACT.

DANC 150. Dance Improvisation. 2 Hours.
Developing skills in perception and the rapid translation of ideas into dance. Central to the course will be exposure to a variety of stimuli from music and the visual arts, to nature and people on the streets. Prerequisite: DANC 104 or consent of instructor. ACT.

DANC 177. First Year Seminar: ____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Dance. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

DANC 201. Ballet III. 1-2 Hours.
Classical and modern approaches to the language of ballet for intermediate dancers. May be repeated for variable credit. Prerequisite: DANC 102 or consent of instructor. LAB.

DANC 203. Modern III. 1-2 Hours.
Dance technique for intermediate dancers with precedents in the movement vocabularies of Isadora Duncan, Martha Graham, Doris Humphrey, Merce Cunningham, and the seminal choreographers of modern dance. May be repeated for variable credit. Prerequisite: DANC 104 or consent of instructor. LAB.

DANC 205. Jazz III. 1-2 Hours.
Dance technique for intermediate dancers based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for variable credit. Prerequisite: DANC 105 or consent of instructor. LAB.

DANC 210. Rhythms and Structures of Music. 1 Hour.
An introduction to the analysis and use of rhythms and the compositional forms of music for dance. LEC.
DANC 220. Dance Performance. 1 Hour.
A dance repertory and performance class with emphasis on developing skills for performing ballet, modern, jazz, historic, and/or forms of theatrical dance. May be repeated for credit. Prerequisite: 200- or 300-level dance technique course. ACT.

DANC 230. Introduction to African Dance Theatre. 2 Hours. NW.
An introduction to the general techniques of non-verbal theatrical conventions in African cultures. Practical training in movement vocabulary will be supplemented by lectures on the "text" of performance. (Same as AAAS 334 and THR 226.) LEC.

DANC 240. Introduction to Classical East Indian Dance. 3 Hours.
Classical East Indian dance has an extensive movement vocabulary that emphasizes the coordination of rhythmic foot patterns with intricate hand gestures. Students will learn the mudras (hand gestures) and their significance and integration within each dance. Readings will include excerpts from the Natya Sastra and other treatises of East Indian dance and culture. LEC.

DANC 250. Choreography: Structured Solos. 2 Hours.
Movement studies for solo figure based on exploration of the fundamental ingredients of dance (space, time, weight, and energy flow) and how to organize them into short compositional forms such as ABA, verse/refrain, or narrative. Prerequisite: DANC 150 and DANC 203 or consent of instructor. LAB.

DANC 260. Musical Theatre Dance. 2 Hours.
This course focuses on the dance and movement vocabulary uniquely associated with musical theatre productions, as well as a variety of popular dance styles from the 1920s to the present. Performance techniques for the stage are emphasized. ACT.

DANC 301. Ballet IV. 1-3 Hours.
Classical and modern approaches to the language of ballet for advanced dancers. May be repeated for variable credit. Prerequisite: DANC 202 or consent of instructor. LAB.

DANC 303. Modern IV. 1-3 Hours.
Dance technique for advanced dancers with precedents in the movement vocabularies of Isadora Duncan, Martha Graham, Doris Humphrey, Merce Cunningham, and the seminal choreographers of modern dance. May be repeated for variable credit. Prerequisite: DANC 203 or consent of instructor. LAB.

DANC 305. Jazz IV. 3 Hours.
Dance technique for advanced dancers based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for credit. Prerequisite: DANC 205 or consent of instructor. LAB.

DANC 307. Pointe and Pas de Deux. 2 Hours.
An introduction to pointe and classical partnering work for the intermediate/advanced female ballet dancer, with equal emphasis on pointe technique and style, and on classical repertory for couples. May be repeated for credit. Prerequisite: DANC 201 or consent of instructor. LAB.

DANC 308. Pas de Deux. 1 Hour.
The exploration of classical ballet partnering (pas de deux) including supported poses, lifts, turns, and their coordination between the partners. For men only. Women enroll in Pointe and Pas de Deux, DANC 307. May be repeated for credit. Prerequisite: DANC 108, DANC 201, or permission of instructor. LAB.

DANC 309. Men’s Ballet. 2 Hours.
A continuation of the study of male classical ballet technique including leaps, turns, batterie, and their presentation. May be repeated for credit. Prerequisite: DANC 109, DANC 201, or permission of instructor. LAB.

DANC 310. Music for Dance. 3 Hours.
An examination of music as accompaniment for dance in both classroom and performance settings. Students will listen and analyze music from various historic periods to develop the skills necessary to select music appropriate for choreography. They will learn techniques for working with accompanists and composers. Prerequisite: DANC 210 or consent of instructor. LEC.

DANC 320. University Dance Company. 0-1 Hours.
A dance repertory, performance and production class. Emphasis is on the development of skills for performing and/or producing dance concerts. Admission by audition only. May be repeated for credit. IND.

DANC 325. Movement Efficiency for Athletes. 3 Hours.
A course designed to improve athletic performance potential by improving initiation and follow-through of movement; improving coordination, timing, and ease of action; and reducing the risk of injury through better technique. Students will learn how to apply the basic principles of Rudolf Laban and Irmgard Bartenieff to the specialized movement skills of various sports. Students also will learn to develop individualized warm-ups and drills to improve performance. Prerequisite: Participation in team sports, dance, martial arts, other skilled sport movement, or consent of instructor. ACT.

DANC 330. Approaches to World Dance. 3 Hours. HL AE42.
This course examines dance forms from throughout the world and how they relate to the times and cultures in which they evolved. Dance forms such as African, East Indian classical, European court dance, ballet, modern, and jazz will be studied through readings, master classes, live performances, videotapes, and films. Prerequisite: 200-level English course. LEC.

DANC 350. Choreography: Group Forms. 3 Hours.
In-depth development of movement themes for duet, trio, and larger groups. At least one concert length work with plans for presentation to an audience will be required. Prerequisite: DANC 250 or consent of instructor. LAB.

DANC 375. Ideokinesis. 3 Hours. H.
Basic concepts of neuromuscular and skeletal education through the use of specific imagery (ideokinesis). Based on the work of Mabel Todd, Lulu Sweigard, and Irmgard Bartenieff, the emphasis is on body connectedness and dynamic alignment. The aim is to realize full movement potential in the most efficient way through intrinsic body awareness. Injury prevention is addressed by introducing principles of conditioning (strength, flexibility, endurance) and factors leading to injury such as muscular imbalances or postural deviations. LEC.

DANC 420. Introduction to Videography and Website Design for Dance. 3 Hours. H.
This is a hands-on course exploring digital video technology for dance. Students are introduced to video and website production as well as the time management skills necessary to engage the multi-faceted project that is dance video. We will cover video techniques for recording dance; video editing; collaborating with national and international sites and artists; and self-promotion and marketing strategies with video and websites. The final project will be the creation of a video website for each student. No previous video editing experience is required. Prerequisite: Basic computer literacy. LEC.

DANC 430. Dance for Children. 3 Hours.
Methods and materials for teaching creative dance and the fundamentals of dance technique to children. Lessons are prepared and tested in the classroom and then presented to elementary school children. Prerequisite: DANC 203 or consent of instructor. LEC.
DANC 440. Introduction to Classical East Indian Dance. 3 Hours. NW AE42.
Classical East Indian dance has an extensive movement vocabulary that emphasizes the coordination of rhythmic foot patterns with intricate hand gestures. Students will learn the mudras (hand gestures) and their significance and integration within each dance. Readings will include excerpts from the Natya Sastra and other treatises of East Indian dance and culture. LEC.

DANC 450. Environmental Choreography. 3 Hours.
Designing dances for non-traditional performing spaces both indoors and outdoors. Students analyze how different natural and built environments can affect the gesture, space, time, and overall structure of a dance composition as well as the relationship between performers and spectators. Prerequisite: DANC 350 or consent of instructor. LAB.

DANC 460. Dance History: Research and Reconstruction. 3 Hours. HL AE42 / H.
Through research and reconstruction, students will examine major topics in dance history, such as the meaning and function of dance in pre-industrial societies, communal and court dance in Europe from the 14th to the 19th centuries, and the transformation and development of dance as a theatre art in the modern world. Texts by dance historians and treatises by dancing masters will be supplemented by readings from fields, such as anthropology, philosophy, art history, and literature, that indicate the different ways of approaching the history of dance. LEC.

DANC 470. Renaissance and Baroque Dance. 3 Hours.
Students will analyze, interpret, reconstruct, and perform historic dance forms, such as the galliard and minuet, by working with treatises of Renaissance and Baroque dancing masters, scholarly studies, and other documentary materials. The dance forms will be studied in relation to the music, visual arts, and literature of the period. LEC.

DANC 475. Performing Arts Administration Dancers. 3 Hours.
Designed to provide an overview of key areas in performing arts administration, including professional speaking and writing, grant writing and development, publicity and marketing strategies, developing relationships with presenters and funders, and audience education. Through readings, class discussion, guest lectures with professionals from the field, and projects based on real-life scenarios, students will develop tools to further their careers as choreographers and performers. This focused study also provides individuals with the direction and means to employ their training in the field of performing arts administration and management at many different levels. This course prepares dance students for their entry into the professional arts marketplace. LEC.

DANC 480. Movement for Older Adults. 3 Hours.
This course is designed to increase knowledge and understanding of the movement problems experienced by older adults and to develop the student’s ability to create movement interventions to address these concerns. Prerequisite: Open to juniors and seniors only. LEC.

DANC 490. Introduction to Flamenco Dance Technique. 3 Hours. AE42/GE3H.
Using the basic compas (rhythmic structures) of Flamenco, we will explore the different components of flamenco dance technique: floreo (spiraling fingers), brazo (arm movements), palmas (rhythmic hand-clapping), marcaje (marking, or movement through space), vueltas (turns) and zapateado (footwork). We will cultivate an awareness of flamenco’s unique posture, learn the structure of the different rhythmic forms and introduce the possibilities for personal expression and improvisation. LEC.

DANC 498. Directed Study in: _____. 1-3 Hours.
Investigation of a special topic or project in aesthetics, dance history, movement analysis, production, or a creative project. A maximum of six hours may be counted toward graduation. Prerequisite: At least seven hours of credit in dance courses. IND.

DANC 530. Practicum in: _____. 1 Hour.
Supervised experience in teaching beginning level dance technique in the style of ballet, jazz, or modern dance. Different approaches are analyzed, discussed, and tested in the studio. Prerequisite: Intermediate level of dance technique in the style of the practicum. FLD.

DANC 540. Field Experience in Dance Teaching. 1-3 Hours.
Teaching ballet, modern, or jazz dance technique to children or adults with faculty supervision in an academic or community program. Prerequisite: DANC 530 and consent of instructor. FLD.

DANC 550. Senior Project. 3 Hours. AE61.
In-depth research project in dance theory or history, or choreography project involving the complete development and presentation of a dance idea. Prerequisite: Performance option: DANC 320, DANC 350, DANC 450, THF 220 or THF 224, and permission of the dance division. Research option: DANC 340, DANC 370, DANC 375, DANC 460, and permission of the dance division. IND.

DANC 580. Special Topics in Dance. 1-3 Hours.
A study of current developments in dance with an emphasis on performance or research. May be repeated for credit. Prerequisite: Junior or senior standing and consent of instructor. IND.

DANC 598. Seminar in Dance. 3 Hours.
Special studies in dance. May be repeated for credit. Prerequisite: Junior or senior standing and consent of instructor. LEC.

DANC 735. Analysis, Criticism, and Choreography. 3 Hours.
The choreographic approaches of outstanding dance masters of the past (for example, Marius Petipa and Isadora Duncan) and present (for example, Martha Graham and Merce Cunningham) will be analyzed in terms of their handling of gesture, time, space, structure, and meaning. Students will be expected to seek out and study readings, photographs, and films in order to do written and performance projects based on the choreographic principles of old and new masters in ballet and modern dance. Prerequisite: A course in dance choreography or consent of instructor. LEC.

DANC 740. Introduction to Laban Movement. 3 Hours.
This course will introduce both the theoretical and physical applications of Laban Movement Analysis: Effort/Shape Notation (a notation system recording changes in movement qualities with respect to time, weight, space, and energy flow); Space harmony (a system that describes human movement in relation to space); Bartenieff Movement Fundamentals (a series of basic exercises to integrate and facilitate the neuromuscular connections within the body); and Laban Movement Analysis to the fields of anthropology, dance, human development, industrial efficiency, the performing arts, physical education, physical therapy, and psychology will be introduced. LAB.

DANC 742. Laban Movement Observation, Analysis, and Notation. 3 Hours.
Two systems of symbolic movement notation will be used in this course: Rudolf Laban’s Effort/Shape Writing and his system of Labanotation. Several applications of Laban’s notational systems will be studied as they appear in cross-cultural, developmental, psychological, and sociological research. Emphasis will be placed on refining the student’s ability to perceive, describe, and note human movement of all kinds from everyday gestures to highly trained movement skills. Prerequisite: DANC 740 or consent of instructor. LAB.
DANC 780. Movement for Older Adults. 3 Hours.
This course is designed to increase knowledge and understanding of
the movement problems experienced by older adults and to develop
the student's ability to create movement interventions to address these
concerns. Prerequisite: Open to graduate students in any field of study.
LEC.

DANC 898. Directed Study in: _____ 1-3 Hours.
Directed study in some aspect of aesthetics, dance history, movement
analysis, production, or an advanced creative project. Prerequisite:
Consent of instructor. IND.

Film and Media Studies Courses

FMS 100. Introduction to the Film Medium. 3 Hours. HL / H.
Study of film as a visual art. Focus on communicative transaction between
film viewer and film maker. Learning to read basic signs, syntaxes, and
structures of cinematic language. Direct analysis of selected films. LEC.

FMS 177. First Year Seminar: _____ 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing
current issues in Film and Media Studies. Course is designed to
meet the critical thinking learning outcome of the KU Core. First-Year
Seminar topics are coordinated and approved by the Office of First-Year
Experience. Prerequisite: First-time freshman status. LEC.

FMS 200. Film and Media Aesthetics. 3 Hours. HL GE3H / H.
An introduction to film and media aesthetics, including basic film/media
theories and their practical applications. Students will be introduced to
the concepts of time, space, composition, movement, editing, light, color,
and sound. A key feature of the course will be a practical emphasis on
learning how to see creatively by applying elements of design, camera
lens and sound recording principles. Examples of these aspects of film
and associated media will be examined and discussed in depth. Should
be taken before or concurrently with FMS 275 or FMS 276. LEC.

FMS 204. Study Abroad Topics in: _____ 1-6 Hours. H.
This course is designed for the study of special topics in Film at the
freshman/sophomore level. Credit for coursework must be arranged
through the Office of KU Study Abroad. May be repeated for credit if
content varies. LEC.

FMS 273. Basic Screenwriting. 3 Hours. H.
An introduction to the craft and principles of screenwriting, from inspiration
to writing a complete first act. Emphasis on factors relevant to the creation
of a treatment and a screenplay. Prerequisite: Consent of instructor. LEC.

FMS 275. Basic Video Production. 3 Hours. H.
Theory and practice of video production with emphasis on preproduction
planning, scripting, directing, lighting, camera operation and audio.
Lecture-laboratory. Prerequisite: FMS 100, completion of or concurrent
enrollment in FMS 200, and consent of instructor. LEC.

FMS 276. Basic Film Production. 3 Hours. H.
An introduction to 16mm film techniques and structures, requiring
construction of brief, individually produced fictive-narrative films employing
classical continuity. Lecture-laboratory. Prerequisite: FMS 100 and
consent of instructor. LEC.

FMS 302. Undergraduate Studies Seminar in: _____ 1-3 Hours. H.
Course organized any given semester to examine a particular studies
topic or to take advantage of special competence by an individual
faculty member. Topics change as needs and resources develop. Class
discussion, readings, and individual projects. LEC.

FMS 303. Undergraduate Production Seminar in: _____ 1-3 Hours. H.
Course organized any given semester to study a particular production
topic or to take advantage of special competence by an individual

FMS 304. Study Abroad Topics: _____ 1-6 Hours. H.
This course is designed for the study of special topics in Film at the junior/
senior level. Credit for course work must be arranged through the Office of
KU Study Abroad. May be repeated for credit if content varies. LEC.

FMS 307. Undergraduate Film/Media Internship. 1-6 Hours. H.
Supervised study with an approved film/media company or project. May
be repeated for credit. No more than six hours may be applied to the
B.A. or B.G.S. degrees. Graded on a satisfactory/unsatisfactory basis.
Prerequisite: Consent of instructor and at least seven hours credit in the
department. FLD.

FMS 310. History of the Silent Film. 3 Hours. H.
A survey of the artistic, economic and sociological development of the
narrative cinema with emphasis on the American studio system, German
LEC.

FMS 311. History of the American Sound Film. 3 Hours. HL / H.
A study of the artistic, economic, and sociological development of the
American sound film with emphasis on the studio system, major directors,
genres, and the impact of television. Analysis of selected films. LEC.

FMS 312. History of the International Sound Film to 1950. 3 Hours. H.
A survey of the artistic, economic, and sociological development of the
international sound film 1929 to 1950. Emphasis on European National
Cinemas. LEC.

FMS 313. History of the International Sound Film Post 1950. 3 Hours.
H.
A survey of the artistic, economic, and sociological development of the
international sound film from 1950 to the present. Emphasis on Free
Cinema, New Wave, and other emerging post-war cinemas. LEC.

FMS 314. History of African-American Images in Film. 3 Hours. HL
AE41 / H.
A history and critical assessment of the diverse images of African-
Americans in American cinema and the impact of those images on
American society. Screenings of feature and independent films, including
those by African-Americans. LEC.

FMS 315. Survey of Japanese Film. 3 Hours. NW AE42 / H.
This course surveys the major developments in and critical approaches
to twentieth-century Japanese film. Focusing mostly on narrative films,
Survey of Japanese Film introduces students to basic methodological
issues in Japanese film history, especially questions of narrative, genre,
stardom, and authorship. We examine Japanese cinema as an institution
located within specific contexts focusing on the ways in which this
institution shapes gender, class, ethnic, and national identities. This
course examines how patterns of distribution, exhibition, and reception
have influenced film aesthetics and film style over the last century.
Through secondary readings, lectures, and discussions students critically
examine how Japanese cinema as an institution both responds to and
intervenes in the social, cultural, and political history of twentieth century
Japan. The course is offered at the 300 and 700 levels, with additional
assignments at the 700 level. (Same as EALC 315.) LEC.

FMS 316. Cinemas of the Southern Cone: Argentina, Chile, and
Uruguay. 3 Hours. AE41 / H.
This course will examine the cinemas of three neighboring South
American countries to find similar themes and some differences between
them historically, politically, and culturally. Themes will include: gender
and nation, political repression during dictatorship, globalization and
the cinema, youth culture in the Southern Cone, and representations
of race and ethnicity, immigration and identity in contemporary cinema. Other themes in common are financing issues, such as co-production agreements, film production under the regional trade pact Mercosur and issues of circulation, distribution and marketing of national films. Most films will be feature length narrative, but a few documentaries will be shown. May be taken as FMS 716, but with additional requirements. LEC.

FMS 317. Race and the American Documentary. 3 Hours. H.
This course surveys a range of documentaries in which race is a key part. There are two class objectives: the first is to broaden the students’ knowledge of American social history and culture, especially around issues of identity, representation and race. The second is to heighten the students’ critical skills as viewers of films in general. A complete film or portion is screened at each class session, preceded by an introductory lecture, and a follow-up discussion. Readings from a variety of scholarly texts are excerpted for student review prior to a particular class. LEC.

FMS 318. Anti-war Film. 3 Hours. H.
An overview and exploration of the history of anti-war film and media themes to show how attitudes regarding war and political policy can be affected by positive and negative depictions of conflict. Course includes analysis of selected films. LEC.

FMS 320. Adaptation from Stage to Screen. 3 Hours. H.
In an increasingly global media economy, adaptation study offers an enterprising model for the cross-pollination of texts across historical, national, and cultural boundaries. Although this course focuses more specifically on adaptations and adaptation processes involving theatrical events and cinematic properties, this larger view should be kept in mind. The course will consist of readings, screenings, and presentations by faculty in the Department Film and Media Studies and the Department of Theatre addressing theoretical issues, case studies, and intertextual considerations, and an historical overview of theatre-film interaction. LEC.

FMS 345. New Media and Society. 3 Hours. H.
Students will be introduced to major themes and debates in digital media studies and apply critical approaches for understanding new media practices, technologies, and theories. In addition to readings and lectures, students will engage in a variety of digital activities and participate in production-oriented projects. By the end of this course students will gain a foundational understanding of historical and emerging relationships between new media (internet, cell phones, digital games, etc.) and society, acquire key digital skills, and experience a variety of new media texts and services. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. LEC.

FMS 373. Intermediate Screenwriting. 3 Hours. H.
Emphasis on writing a full-length screenplay. Explores genre, character, dialogue, and the development of a personal writing style. Prerequisite: FMS 273 and consent of instructor (students will be selected based on writing samples). LEC.

FMS 374. Animation. 3 Hours. H.
A survey that combines animation history, theory, and production by examining animated works of all kinds and exploring various styles utilizing both hands-on techniques and digital animation programs. Lecture-laboratory. LEC.

FMS 375. Intermediate Video Production. 3 Hours. H.
Theory and practice of longer-form video production with emphasis on scripting, talent coordination and editing in preproduction, production and postproduction. Lecture-laboratory. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 376. Cinematography. 3 Hours. H.
Theory and practice of cinematography, with emphasis on creation of film, video, and digital imagery. Prerequisite: FMS 275 or FMS 276, and consent of instructor. LEC.

FMS 377. Post-Production. 3 Hours. H.
Students become familiar with techniques and processes in film and video post-production including, but not limited to, editing, sound, post-production management, marketing, and distribution. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 380. American Popular Culture of: _____. 3 Hours. HL / H.
An interdisciplinary examination of popular cultural forms and their relationships with the social, political and economic dynamics of America, with emphasis on film, media, music, literature (including magazines and newspapers) and the graphic arts. The decade or other specific topic to be studied changes as needs and resources develop. May be repeated for credit for different decades or topics. LEC.

FMS 401. Undergraduate Professional Development Seminar. 1 Hour. H.
Provides an overview of opportunities for professional development in Film and Media Studies, and helps students plan goals for their education through an understanding of professional practices. The course also covers practical exercises in professional development, including writing resumes, finding internships and entry-level work, and other aspects of establishing a career in Film and Media Studies. Prerequisite: FMS 275 or equivalent. Open to FMS Majors only. Graded satisfactory/unsatisfactory. LEC.

FMS 407. Undergraduate Film/Media Service Learning Internship. 1-6 Hours. H.
Supervised study with an approved government agency, established non-profit organization, school, or community-based partner to produce a professional-level film and/or media project in the public interest. Community work should meet the needs of the community-based organization and the education goals set by the student, instructor, and community based partner; be in direct service, indirect service, policy analysis, research, and/or advocacy work; engage the student with individuals or communities of need and with issues related to social justice, community development, and/or access to resources. May be repeated for credit. No more than six hours may be applied to the B.A. or B.G.S. degrees. Graded satisfactory/unsatisfactory. Prerequisite: Consent of instructor and at least 22 credit hours in the department. FLD.

FMS 410. Race, Class, and Gender in Visual Culture. 3 Hours. H.
Examines the way in which race, class, and gender are represented through visual culture, historically and in the present. The study of visual culture analyzes the way in which visual images communicate systems of beliefs, contribute to identity formation, and have an influence on our thinking about race, class, and gender. Course looks at visual objects, i.e., film, television, photography, art, advertisements, and theatre as well as visual practices, i.e., in public and private spaces. LEC.

FMS 411. Television Studies. 3 Hours. H.
A historical, theoretical and critical survey of U.S. television from 1945 to the present from the public’s perspective, with emphasis on the early influences of radio (e.g., Federal regulation and sponsorship), film and theatre; TV’s rapid rise as the U.S. public’s prime source of entertainment, news and information; TV’s rise as a key cultural, economic and political phenomenon; TV’s more recent accommodations to the forces of globalization, new technologies/media, and new business models through convergence. Discussion and screening of representative TV texts as seen against the backdrop of the theories and critical views of TV scholars ranging from Raymond Williams and John Fiske to Henry Jenkins. LEC.
FMS 412. Cyberculture Studies. 3 Hours. H.
Historically there has been a tendency to approach new media technologies and their proliferation as either utopic or dystopic. Cyberculture studies has been no exception. Students will work toward a comprehensive understanding of cyberculture as emergent computer networks forming around and constructing entertainment, knowledge, business, community, and identity. Cyberculture will be examined as the constant (re)organizing of virtual and physical relationships as well as the reorganization of media production, distribution and consumption. The variety of opportunities for computer-mediated human interaction such as social networks, virtual worlds, blogs, and games will be examined as cyberculture transposes online and offline relationships and practices. LEC.

FMS 413. Asian Media Studies. 3 Hours. H.
This course examines new and emerging media in East Asia and how the media industries of East Asia function. Using recent scholarship and industry data on contemporary cyberculture, music studies, and television industries of East Asia we examine how such factors as globalization, post-colonialism, censorship, emerging technology, and national media legislation affect regional and transnational media industries in Japan, South Korea, and Mainland China/Taiwan/Hong Kong. (Same as EALC 413.) LEC.

FMS 414. Kansas Art, History, and Popular Culture. 3 Hours. H.
An overview of the art and cultural history of Kansas (and Kansas City) from territorial days to the present. Emphasis is placed on key issues, figures and events. A general familiarity with American history is recommended. May be taken as FMS 714, but with additional requirements. (Same as HA 584.) LEC.

FMS 475. Advanced Video Production. 3 Hours. H.
Special projects in video production, using both studio and remote locations. Prerequisite: FMS 375 and consent of instructor. LEC.

FMS 477. Sound Design. 3 Hours. H.
Students will study and produce film and video work with an emphasis on sound design theory and practice. Course projects consist of several short works in response to readings and screenings, which include a survey of sound in cinema, internet and radio. Students will also become conversant with related equipment, software and techniques. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 478. Experimental Production. 3 Hours. H.
Students will produce experimental film and video projects, including installation art and performance art pieces, in both collaborative and a cumulative production modes. Practical production aspects of historical experimental works will be studied, with emphasis on creation of works inspired by these earlier artists and their work. Unorthodox video and film production concepts and modes will also be studied and used in the creation of original works. The incorporation of experimental elements in the creation of mainstream works, and the creation of such projects, will also be a key area of study and experimentation. By pushing their individual creative limits, students will gain an appreciation for the experimental film and video genre, as well as an expansion of their production skills. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 479. Broadcast Documentary Production. 3 Hours. H.
This is a hands-on production course in which students will research, plan and produce short-form non-fiction documentaries. The class is dedicated to training young professionals in the principles, skills, techniques, habits and practices of documentary production. We will focus also on the aesthetics of our craft and the documentary form. The objective is to ground students in the fundamental skills of good non-fiction storytelling-conceptualization, research, story structure, theme development, writing, producing and directing. The goal is the production of several short-form compositions (videos) where storytelling is employed to communicate a concept or idea effectively. Students will form into teams to research, develop and produce a course-long short-form documentary. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 480. Music Video Production. 3 Hours. H.
This course will cover elements of the history, aesthetics, and business of music video and music video production. Students will view and discuss many different types of music videos, and will learn how to classify and critique these videos in a professional manner. Students will gain familiarity with the genres, themes, forms, and iconography of music video; an understanding of the place of music video in media culture; an exploration of the ideological, cultural, and historical contexts of music video; and an ability to create or assist in the creation of professional-quality music videos. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 498. Honors Seminar. 2-6 Hours. AE61 / H.
Study may be directed toward either (a) reading for integration of knowledge and insight in film and media, or (b) original research (i.e., investigation of a specific problem in film and media). Six hours maximum credit. Prerequisite: Consent of Departmental Honors Coordinator. LEC.

FMS 499. Directed Study in Film. 1-6 Hours. AE61 / H.
Investigation of a special topic or project selected by the student with advice, approval, and supervision by an instructor. Such study may take the form of directed reading or special research. Individual reports and conferences. A maximum of six hours credit may be counted toward a degree. Prerequisite: At least seven hours credit in the department and consent of instructor. IND.

FMS 530. Classical Film/Media Theory. 3 Hours. H.
Comprehensive examination of most significant theories and theorists of film. Organized around specific questions, e.g., what qualities make film art unique, and how is film related to other visual and literary arts? Class discussion, individual projects. Prerequisite: FMS 100 or equivalent (determined by instructor). LEC.

FMS 531. Contemporary Concepts in Media Studies. 3 Hours. H.
This course emphasizes a theoretical understanding of media and media production skills. It is a critical cultural study of the media, focusing on the relationships between media representations and society. Students explore different conceptual perspectives on the role and power of visual media in society in influencing social values, political beliefs, identities and behaviors; analyze specific media texts, such as film and television shows; and examine the dynamics of how class, gender, generation, and race influence the production and reception of media. LEC.

FMS 540. Cuban Cinema. 3 Hours. H.
This course explores Cuban cinema from 1959 to the present day. Special attention is paid to the representations of Cuban history, cultural politics, and the political-economic conditions of production in Cuba. In addition, the Cuban-American community and their contributions or reactions to Cuban film are discussed. Through readings, lectures, discussion, and viewing Cuban films, the class examines a variety of topics related to Cuban cinema, history, and contemporary concerns. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level. Prerequisite: Junior standing. LEC.

FMS 541. Asian Film. 3 Hours. NW AE42 / H.
Seminar on various national film cultures of East and Southeast Asia. Representative films are studied from formal, stylistic, and socio-historic perspectives. Addresses the impact of key cultural, economic, and political issues on each film industry. Class discussion, reports, and individual research papers. The course is offered at the 500 and 800
levels, with additional assignments at the 800 level. (Same as EALC 541.) Prerequisite: Junior status. LEC.

FMS 542. Latin American Film. 3 Hours. H.
The course explores the national cinemas and film industries of various nations in Latin America, as well as films made by Indigenous and Chicano/a filmmakers. Films are analyzed both as artistic works (formal qualities, cinematic styles, and influences) and as documents that provide windows to the socio-historical context of the nation. The course focuses on the political-economic factors surrounding the production of Latin American national cinema (the role of the state, coproductions, film markets). Prerequisite: Junior status. May be taken as FMS 842. There will be additional requirements for graduate students taking FMS 842. LEC.

FMS 543. Contemporary Japanese Film. 3 Hours. NW AE42 / H.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We survey recent industrial and stylistic trends as well as key critical debates. Class discussion, reports, and individual research papers. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as EALC 543.) Prerequisite: Junior status. LEC.

FMS 544. African Film. 3 Hours. NW / H.
A critical study of Africa and its peoples as depicted in films. The aesthetic, cultural, economic, political, historical, and ideological aspects of African films are examined. (Same as AAAS 555.) LEC.

FMS 585. Capstone in Film and Media Studies. 3 Hours. H.
This course integrates the knowledge and skills acquired across the curriculum of Film Media Studies including primarily academic studies, but also production and other related disciplines to enable the student to demonstrate achievement through the production of a major creative research project. Prerequisite: Must be admitted to the Film and Media Studies B.A. or B.G.S. degree. Must have completed one FMS production course. Must have Departmental permission to enroll. LEC.

FMS 592. Documentary Film and Video. 3 Hours. H.
An historical and theoretical survey of that major genre of film and video typically termed "documentary." The course will trace the main historical developments from documentary’s beginnings through contemporary innovations. Prerequisite: FMS 100 and FMS 310, FMS 311, or consent of instructor. LEC.

FMS 593. Experimental Film and Video. 3 Hours. H.
A history of experimental film and video through an examination of major artists, movements, theories, and films/tapes. Prerequisite: FMS 100 and FMS 310, or consent of instructor. LEC.

FMS 620. International Women Filmmakers. 3 Hours. H.
This course examines films made by women around the world. Mainstream and independent fiction, documentary, and experimental works will be screened and discussed. The objectives of the course are: 1) to learn the variety of films made by women and the conditions of their production, distribution reception. 2) to interrogate the idea of women’s cinema as ‘counter-cinema’. We will acquire tools for analyzing films in terms of economic, aesthetic, cultural, and political circumstance by women of different countries, classes, races, ethnicities, genders, and sexual preferences. LEC.

FMS 621. American Film Criticism. 3 Hours. H.
An analysis of the evolution, methods and impact of American film criticism as practiced by such critics as James Agee, Robert Warshow, Andrew Sarris, John Simon, Pauline Kael, Stanley Kauffman, and Dwight Macdonald. Prerequisite: FMS 310 or FMS 311. LEC.
addition to the lecture sessions taught in tandem with FMS 316, additional research component, lecture presentation, and class meeting are also required. LEC.

FMS 717. Race and the American Documentary. 3 Hours.
This course will survey a range of documentaries in which race is a key part of the film’s text. There are two class objectives: to broaden the student’s knowledge of American social history and culture, especially around issues of identity, representation and race, and to heighten the student’s ability as a critical viewer of films. This course will include: film viewing, scholarly readings, and lectures. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. LEC.

FMS 718. Anti-war Films. 3 Hours.
An overview and exploration of the history of the portrayal of anti-war film and media themes to show how anti-war attitudes and political policy can be affected by positive and negative depictions of conflict. Analysis of selected films. FMS 318 and FMS 718 will meet concurrently, though separate consultations and specific research assignments for FMS 718 are also required. LEC.

FMS 743. Contemporary Japanese Film. 3 Hours.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We will survey recent industrial and stylistic trends as well as key critical debates. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as EALC 743.) SEM.

FMS 745. New Media and Society. 3 Hours.
Students will be introduced to major themes and debates in digital media studies and apply critical approaches for understanding new media practices, technologies, and theories. In addition to readings and lectures, students will engage in a variety of digital activities and participate in production-oriented projects. By the end of the course students will gain a foundational understanding of historical and emerging relationships between new media (internet, cell phones, digital games, etc.) and society, acquire key digital skills, and experience a variety of new media texts and services. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. LEC.

FMS 773. Problems in Intermediate Screenwriting. 3 Hours.
The principles of screenwriting are developed through scene writing and analysis culminating in the writing and structuring of a full-length, three act screenplay. In addition to the class sessions taught with FMS 373 Intermediate Screenwriting, separate consultations and specific research assignments for graduate students in FMS 773 are also required. LEC.

FMS 774. Animation. 3 Hours.
A survey that combines animation history, theory, and production by examining animated works of all kinds and exploring various styles utilizing both hands-on techniques and digital animation programs. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Lecture-laboratory LEC.

FMS 775. Problems in Intermediate Video Production. 3 Hours.
Theory and practice of multiple-camera video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation, and audio. In addition to the class sessions taught with FMS 375 Intermediate Video Production, separate consultations and specific research assignments for graduate students in FMS 775 are also required. Lecture-laboratory. LEC.

FMS 776. Problems in Cinematography. 3 Hours.
Theory and practice of cinematography, with emphasis on creation of film, video, and digital imagery. FMS 776 meets concurrently with FMS 376; students enrolled in the graduate-level course will have separate consultations and specific research assignments. Lecture-laboratory. Prerequisite: Consent of instructor and FMS 675 or FMS 676. LEC.

FMS 777. Post-Production. 3 Hours.
Students will become familiar with techniques and processes in film and video post-production including, but not limited to, editing, sound, post-production management, marketing, and distribution. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Prerequisite: Consent of instructor. LEC.

FMS 800. Introduction to Graduate Study in Film/Media. 3 Hours.
Major emphasis is placed upon the principles of research, bibliographical data, and research methods useful in film and television. The course should be taken at the beginning of the graduate student’s program. LEC.

FMS 801. Professional Development Seminar. 1 Hour.
Preparation and training for faculty careers in film and related fields, including research skills and methods, responsible scholarship, teaching, and service. Other topics vary from semester to semester. May be repeated for credit. SEM.

FMS 802. Master's Projects. 3-6 Hours.
Advanced creative projects which may be elected by master's degree candidates in lieu of thesis. RSH.

FMS 810. Development of the Silent Film. 3 Hours.
Intensive study of the artistic, economic, and sociological development of the silent narrative film with emphasis on the evolution of the American studio system, German Expressionism, and Soviet Expressive Realism. LEC.

FMS 811. Development of the American Sound Film. 3 Hours.
Intensive study of the artistic, economic, and sociological development of the American sound film with emphasis on the studio system, major directors, genres, and the impact of television. LEC.

FMS 813. Development of the International Sound Film. 3 Hours.
Intensive study of the artistic, economic, and sociological development of the international sound film with emphasis on the cinemas of England, France, Italy, Germany, Sweden, and Eastern Europe. LEC.

FMS 814. Development of African-American Images in Film. 3 Hours.
A history and critical assessment of the development of diverse images of African-Americans in American cinema and the impact of those images of American society. Screenings of feature and independent films, including those by African-Americans. In addition to the lecture/screening sessions taught in tandem with FMS 314, a separate discussion section and specific research assignments for graduate students enrolled in FMS 814 are also required. LEC.

FMS 840. Cuban Cinema. 3 Hours.
This course explores Cuban cinema from 1959 to the present day. Special attention will be paid to the representations of Cuban history, cultural politics, and the political-economic conditions of production in Cuba. In addition, the Cuban-American community and their contributions or reactions to Cuban film will be discussed. Through readings, lectures, discussion, and viewing Cuban films, the class will examine a variety of topics related to Cuban cinema, history, and contemporary concerns. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level. LEC.

FMS 841. Asian Film. 3 Hours.
Seminar on various national film cultures of East and Southeast Asia. Representative films are studied from formal, stylistic, and socio-historic
perspectives. Addresses the impact of key cultural, economic and political issues on each film industry. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level. (Same as EALC 841.) SEM.

FMS 842. Latin American Film. 3 Hours.
The course explores the national cinemas and film industries of various nations in Latin America, as well as films made by indigenous and Chicano/a filmmakers. Films are analyzed both as artistic works (formal qualities, cinematic styles, and influences) and as documents that provide windows to the socio-historical context of the nation. The course focuses on the political-economic factors surrounding the production of Latin American national cinema (the role of the state, co-productions, film markets). LEC.

FMS 862. Survey of Film and Media History. 3 Hours.
This seminar will be primarily international in scope and will concentrate on the following: technological and production issues relating to the transition in 1927-1931 of silent to sound film; the constructions of national identity, including those of recently emerging cultures; a comparison and contrast of the censorial agencies in America and abroad; and current revisionist perspectives on received film and media history. SEM.

FMS 863. Survey of Documentary and Experimental Film and Media. 3 Hours.
Surveys the important historical and theoretical issues pertinent to both the documentary and experimental approaches as expressed in film, video and new technologies. Includes major documentary and experimental genres, directors, national schools, artistic movements, and landmark works. Screenings reflect a chronology from origins to present-day. LEC.

FMS 864. Classical Film and Media Theory. 3 Hours.
This seminar is a comprehensive survey of the major classical film and media theories and theorists, such as Munsterberg, Eisenstein, Arnheim, Bazin, and Adorno. Organized around specific questions, e.g.: What qualities differentiate film and media from other art and communications forms? What qualities do film and media share with other art and communication forms? What qualities differentiate film from other forms of media such as television? Readings from primary sources stressed. Class discussion, individual research papers. SEM.

FMS 865. Contemporary Film and Media Theory. 3 Hours.
This seminar is a study of the theories applied to the study of film and media since the 1970s moving through structuralism, and into the posts: -structuralism, -modernism, -colonialism, and beyond. Within these broad paradigms some of the theories examined in depth are cinesemiotics, Marxism, cinematic apparatus, feminist film theory, reception theory, new media and virtual reality. SEM.

FMS 875. Problems in Advanced Video Production. 3 Hours.
Special projects in video production, using both studio and remote locations. In addition to the class sessions taught with FMS 475 Advanced Video Production, separate consultations and specific research assignments for graduate students in FMS 875 are also required. Prerequisite: FMS 775 or consent of instructor. LEC.

FMS 880. Development of American Popular Culture in the: _____ 3 Hours.
Intensive interdisciplinary examination of popular culture forms and their relationships with the social, political, and economic dynamics of America in a specific decade, with emphasis on film, broadcasting, theatre, music literature (including magazines and newspapers), and the graphic arts. Decade to be studied changes as resources and needs develop. LEC.

FMS 887. Film and the Public. 3 Hours.
A study of the actual and implied responsibilities of film and video to the public, as seen in regulations, self-regulatory codes, and the critical literature of the field. Prerequisite: Consent of instructor. LEC.

FMS 888. Special Problems in Film History and Criticism. 1-4 Hours.
FMS 895. Intensive Film Project Seminar. 1-4 Hours.
The student plans and executes an intensive special project which requires the professional skills of investigation and performance appropriate to radio, television and/or film. May be repeated for credit up to a maximum of six credit hours. (This seminar is to the special project program what "thesis" is to the traditional program.) RSH.

FMS 897. Practicum in Film. 1-3 Hours.
Various approaches to the illustration of principles of production in film and/or video through the supervision of laboratory exercises and subsequent evaluation by the Theatre and Film graduate faculty. FLD.

FMS 898. Investigation and Conference (for Master's Students). 1-8 Hours.
Directed research and experimentation in film or media. Limited to eight hours credit toward the Master's degree. RSH.

FMS 899. Master's Thesis. 1-6 Hours.
The.

FMS 902. Film Seminar in: _____ 3 Hours.
A graduate seminar devoted to selected historical, theoretical, or critical issues. Prerequisite: Consent of instructor. LEC.

FMS 998. Investigation and Conference (for Doctoral Students). 1-8 Hours.
RSH.

FMS 999. Doctoral Dissertation. 1-12 Hours.

Theatre Courses

THR 100. Introduction to the Theatre. 3 Hours. HL GE3H / H.
Designed to help students by means of experience with theatre as well as study about it to achieve an understanding of its cultural role in contemporary society, to develop a sensitive and informed appreciation of its art, and to make it an integral part of their cultural lives. Lectures, discussion groups, special interest groups, theatre attendance. LEC.

THR 101. Theatre Practicum I. 1 Hour. H.
Involvement in theatre performance and/or production. One acting role in a University Theatre production or classroom project plus one crew assignment, or two crew assignments qualify for credit. May be repeated for credit. This course will be graded satisfactory/unsatisfactory. ACT.

THR 105. Improvisation. 3 Hours. H.
Designed to free the beginning actor physically, vocally, and emotionally. Beginning with basic physical action and sense memory exercises performed by individuals, the work will progress to pair and small-group improvisations in preparation for scene work. Open to freshmen and sophomores only. LEC.

THR 106. Acting I. 3 Hours. HL GE3H / H.
Fundamental techniques in acting. Practice in character creation, body language, and effective stage speech. LEC.

THR 111. Make-Up. 1 Hour. H.
The techniques in application of make-up for specific characterizations, both straight and character. Study of the structure of the face and hands for stage make-up. Should be taken concurrently with THR 106, if possible. LEC.
THR 116. Scenographic Techniques. 3 Hours. H.
Emphasis on drafting, model building, and presentational techniques for
the theatrical designer or art director. Some work in computer drafting for
the designer-technician. Lecture and laboratory periods. LEC.

THR 177. First Year Seminar: ______. 3 Hours. HT GE11.
A limited-enrollment, seminar course for first-time freshmen, organized
around current issues in Theatre. May not contribute to major
requirements in theatre. First year seminar topics are coordinated and
approved through the Office of First Year Experiences. Prerequisite: First-
year freshman status. LEC.

THR 201. Theatre Practicum II. 1 Hour. H.
Involvement in theatre performance and/or production. One acting
role in a University Theatre production or classroom project plus one
crew assignment, or two crew assignments qualify for credit. May be
repeated for credit. This course will be graded satisfactory/unsatisfactory.
Prerequisite: THR 101. ACT.

THR 204. Study Abroad Topics in: ______. 1-6 Hours. H.
This course is designed for the study of special topics in Theatre at the
freshman/sophomore level. Credit for coursework must be arranged
through the Office of KU Study Abroad. May be repeated for credit if
content varies. LEC.

THR 206. Acting II. 3 Hours. H.
The study of roles and scenes from plays. Practice in character analysis,
creation of roles, rehearsal of scenes, and ensemble work. Prerequisite:
THR 108. LEC.

THR 209. Play Reading for Performance. 3 Hours. H.
This course is designed to prepare students for upper-level courses in
theatre by developing and enhancing their ability to read plays. Close
reading of plays introduces students to a variety of different dramatic
genres and theatrical styles. Emphasis is placed on comprehension and
analysis of dramatic literature for theatrical performance. LEC.

THR 210. Musical Performance for the Actor I. 3 Hours. H.
Beginning Studies in Musical Theatre Performance: practical application
of voice, acting and movement techniques for musical theatre, solo and
group performance. LEC.

THR 212. Beginning Voice and Speech for Actors. 3 Hours. H.
A foundation course; introduction to phonetics; training in Standard
American Stage Speech; articulation skills; resonance and voice
placement. LEC.

THR 213. Movement I: The Acting Instrument. 3 Hours. H.
A foundational course in discovering ease and efficient use of the body
in a performance context, developing non-verbal communication and
partnering skills, and establishing the connection of movement to voice
production. Trains actors in proper warm-up technique, alignment and
balance, physical safety, and basic tumbling skills. LEC.

THR 215. Approaching Design. 3 Hours. HL GE3H / H.
Conceptualization and visualization of the elements involved in creative
design for theatre, dance, television, and film. LEC.

THR 216. Scenic Production. 2 Hours. H.
Introduction to the planning, construction, and mounting of scenery for
theatre, television, and film. Concentration on the technical organization
of scenic production. Lecture, discussion, and laboratory periods. LEC.

THR 220. Costume Production. 2 Hours. H.
Introduction to techniques of costume construction, including study of
fabrics, color, fundamentals of pattern making, and draping of
costumes for theatre, television, and film. Concentration on the technical
organization of costume production. Lecture, discussion, and laboratory
periods. LEC.

THR 224. Lighting Production. 2 Hours. H.
Introduction to the planning and execution of lighting for theatre,
television, and film. Concentration organized any given semester to study
particular subject matter or to take advantage of special competence by
an individual faculty member. Topics change as needs and resources
develop. Class discussion, readings, and individual projects. LEC.

THR 226. Introduction to African Dance Theatre. 2 Hours. NW / H.
Introduction to the general techniques of non-verbal theatrical
conventions in African cultures. Practical training in movement vocabulary
supplemented by lectures on the "text" of performance. There will be an
end of semester "studio performance." (Same as AAAS 334 and DANC
230.) LEC.

THR 301. Theatre Practicum III. 1 Hour. H.
Involvement in theatre performance and/or production. One acting
role in a University Theatre production or classroom project plus one
crew assignment, or two crew assignments qualify for credit. May be
repeated for credit. This course will be graded satisfactory/unsatisfactory.
Prerequisite: THR 201. ACT.

THR 302. Undergraduate Seminar in: ______. 3 Hours. H.
Course organized any given semester to study a particular subject
matter or to take advantage of special competence by an individual
faculty member. Topics change as needs and resources develop. Class
discussion, readings, and individual projects. LEC.

THR 303. Summer Theatre. 1-6 Hours. H.
Provides experience in a wide range of theatre activity related to the
summer theatre production or productions. Work may include activity
in the following areas: acting, directing, design, technical theatre, voice
and/or movement. Specialized skills are developed through individual
classes, production preparation and performance. Prerequisite: Consent
of instructor. ACT.

THR 304. Study Abroad Topics in: ______. 1-6 Hours. H.
This course is designed for the study of special topics in Theatre at the
junior/senior level. Credit for coursework must be arranged through the
Office of KU Study Abroad. May be repeated for credit if content varies.
LEC.

THR 305. Honors Seminar in: ______. 3 Hours. H.
Special topics seminar serving students enrolled in the University
Honors Program. Course organized any given semester to study a
particular subject matter or to take advantage of special competence by
an individual faculty member. Topics change as needs and resources
develop. Prerequisite: Students must be enrolled in the University Honors
Program. LEC.

THR 306. Acting III. 3 Hours. H.
Advanced projects in acting. Character and scene analysis, scoring the
role, rehearsal, and performance. Prerequisite: THR 206. LEC.

THR 307. Undergraduate Theatre Internship. 1-3 Hours. AE61 / H.
Supervised study with an approved theater company or project. May be
repeated for credit. No more than six hours may be applied to the B.A. or
B.G.S. degrees. This course will be graded satisfactory/unsatisfactory.
Prerequisite: Consent of instructor and at least seven hours credit in the
department. FLD.

THR 308. Script Analysis. 3 Hours. H.
This course provides knowledge and methods enabling students to
conduct in-depth study of dramatic scripts. Emphasis is given to the
analysis skills appropriate to practitioners of stage and screen arts. LEC.
THR 310. Musical Performance for the Actor I. 3 Hours. H.
Intermediate Studies in Musical Theatre Performance: practical application of voice, acting and movement techniques for musical theatre, solo and group performance. Prerequisite: THR 106 and THR 210. LEC.

THR 312. Acting with an Accent. 3 Hours. H.
A performance class for actors using monologues and scenes involving the use of accents and dialects. The course will also provide instruction in many of the most used American regional, British regional dialects, and foreign language accents. Prerequisite: THR 212, or by permission of instructor after the student demonstrates an ability in the International Phonetic Alphabet. LEC.

THR 313. Movement II: Physical Characterization. 3 Hours. H.
The study of diverse physical acting techniques, and an investigation into creating a character through manipulation of the acting instrument. Actor training in performance neutrality, mask work, age, and gender distinctions. Prerequisite: THR 213 and permission of instructor. LEC.

THR 316. Beginning Scene Design. 3 Hours. H.
Study of scenic design process with beginning problems in textual analysis, style, historical research, and preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 116 and THR 215, or permission of instructor. LEC.

THR 320. Beginning Costume Design. 3 Hours. H.
Study of the costume design process with beginning problems in textual analysis, style, historical research, and preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 215. LEC.

THR 324. Beginning Lighting Design. 3 Hours. H.
Study of the lighting design process with beginning problems in textual analysis, style, historical research, with preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 116 and THR 215, or permission of instructor. LEC.

THR 326. African Theatre and Drama. 3 Hours. NW / H/W.
A study of the origin and development of continental African theatre and its affinity to the Levant. Traditional, colonial and contemporary dramatic theories and experiments will be examined in play selections. (Same as AAAS 355.) LEC.

THR 327. African-American Theatre and Drama. 3 Hours. AE41 / H.
A historical study of Black Theatre in the U.S.A. from its African genesis to its contemporary Americanness. Epochs in African-American dramaturgy will be critically examined. (Same as AAAS 356.) LEC.

THR 380. Popular Culture: _____ 3 Hours. HL GE3H / H.
Interdisciplinary examination of popular culture oriented around a specific genre or theme. Objects of study may include popular forms of live performance such as musicals or vaudeville, as well as media-based performances (radio, television, film, internet). Specific topic to be studied changes as needs and resources develop. May be repeated for credit for different topics. LEC.

THR 401. Stage Management and Assistant Direction. 1 Hour. H.
 Majors are assigned to stage manage or assistant direct a University Theatre production, or to take related workshops in stage management or assistant directing. May be repeated for credit. This course will be graded satisfactory/unsatisfactory. ACT.

THR 404. Children and Drama. 3 Hours. HL / H.
Exploration of forms, methods, and materials appropriate for development of elementary-age children in dramatic arts. LEC.

THR 405. Children and Media. 3 Hours. H.
The applied study of child development theories and research methods on the influences and effects of television and related visual media on childhood in the contexts of families, schools, and society. (Same as ABSC 405 and PSYC 405.) LEC.

THR 406. Audition Techniques. 3 Hours. H.
This course prepares students for all types of audition experiences. It includes study in techniques of prepared auditions, cold readings, interviews, and the musical audition for actors. Emphasis is placed upon developing resumes and photo portfolios as well as concentrated study in professional contracts, unions, and agent acquisition. Prerequisite: THR 206. LEC.

THR 410. Musical Performance for the Actor III. 3 Hours. H.
Advanced Studies in Musical Theatre Performance: practical application of voice, acting and movement techniques for musical theatre, solo and group performance. Prerequisite: THR 106, THR 210, and THR 310. LEC.

THR 413. Stage Combat Skills. 3 Hours. U.
Study of the illusion of violence in a dramatic context and the special skills necessary for creating believable and safe stage fights. Actor training in armed and unarmed combat, including one or more of the following: rapier and dagger, broadsword, and quarter staff. Prerequisite: THR 313 and permission of instructor. LEC.

THR 416. Design Forum. 3 Hours. U.
Depending on student qualifications and specialization, focus is on scenic, costume, and/or lighting design. Special attention placed on developing collaborative awareness and the conceptual and presentation skills that underlie and inform the design process. Prerequisite: THR 316 or THR 320 or THR 324. LEC.

THR 429. Postcolonial Theatre and Drama. 3 Hours. NW AE42/GE3H / H.
The course develops an understanding of the postcolonial concept and its different manifestations in theatre and drama across nations and cultures. It approaches postcolonialism as a way of reading theatre, and as a genre within theatre by exploring how the "colonial project" has reconfigured the concept, content, and context of theatre in both colonized and colonizing cultures. In addition to the study of postcolonial playwrights and their works, the course is also an introduction to postcolonial theory and its critics. (Same as AAAS 429.) LEC.

THR 445. Teaching Theatre in the Middle/Secondary Schools. 3 Hours. H.
Study of philosophy and methods appropriate to teaching improvisation, acting, stagecraft, directing, playwriting, dramatic literature, and theatre history in middle/secondary schools. Includes curriculum development, instructional and evaluative strategies, and management of co-curricular theatre programs. Prerequisite: Consent of instructor. LEC.

THR 498. Honors Seminar. 2-6 Hours. AE61 / H.
Study may be directed toward either (1) reading for integration of knowledge and insight in theatre or (2) original research, i.e., investigation of a specific problem in theatre. Six hours maximum credit, which may be distributed through four semesters. Prerequisite: Consent of Departmental Honors Committee. IND.

THR 499. Directed Study in Theatre. 1-6 Hours. AE61 / H.
Investigation of a special topic or project selected by the student with advice, approval, and supervision by an instructor. Such study may take the form of directed reading or special research. Individual reports and conferences. A maximum of six hours credit may be counted toward a degree. Prerequisite: At least seven hours credit in the department and consent of instructor. IND.
THR 501. Colloquium on American Theatre. 1 Hour. U.
A series of fourteen weekly lecture/discussions led by invited guests both from the university and outside it on various topics central to the study of theatre. The first four meetings, led by the course coordinator, are a brief survey of the history of theatre in America and a preparation for the ten lecture/discussions to follow. LEC.

THR 506. Acting for the Camera. 3 Hours. H.
A study of acting techniques appropriate to the requirements of the camera. Emphasis is placed on developing audition skills necessary to compete for roles in dramatic features, corporate videos, and commercials. Actors acquire skills essential to the transition from stage to camera. Prerequisite: Permission of instructor. LEC.

THR 508. Fundamentals of Directing. 3 Hours. H.
Offered as a first course in play directing. Designed primarily for theatre majors and secondary education majors in language arts with a theatre and drama concentration. The content is principally descriptive in nature with some practical experience. Lecture and laboratory periods. Prerequisite: THR 308. LEC.

THR 509. Dramatic Script Writing. 3 Hours. H.
Study and practice in the fundamental techniques of dramatic writing and the application of such techniques most specifically to theatre. Open upon consent of instructor to students who have completed one course in advanced composition and one course in the theory or history of drama. LEC.

THR 512. A Vocal Approach to the Classics. 3 Hours. H.
This is an advanced voice and speech course for actors aiming to further increase their command over tone, rhythm, pacing, and diction. Their range and power will be extended. Through discovery of the demands of a variety of classical texts, the actor will be challenged both in verse and in prose to develop the skills necessary to fully interpret that material. Prerequisite: THR 212. LEC.

THR 516. Scenic Painting Techniques. 3 Hours. H.
Study of painting equipment, tools, pigments, binders, and vehicles, and their relationship to the surfaces to be painted. Instruction in basic painting techniques. Prerequisite: THR 115 and THR 215. LEC.

THR 517. Computer-Aided Design. 3 Hours. U.
Study of new media in theatre and film/video production, primarily computer technologies and methods for the theatrical designer or art director. Emphasis on computer 3-D modeling and color rendering. Prerequisite: THR 116, THR 215, or permission of instructor. LEC.

THR 518. Scenography and the Classic Script. 3 Hours. H.
Holistic production design, including lighting, scenery, and costumes, for classic theatre scripts. Contrasts historical styles of production with styles for contemporary spaces and audiences. Projects tailored to the needs and level of the students. Prerequisite: Consent of instructor. LEC.

THR 519. Scenography and the Modern Script. 3 Hours. H.
Holistic production design, including lighting, scenery, and costumes, for modern theatre scripts. Examines modern styles of production. Projects tailored to the needs and level of the students. Prerequisite: Consent of instructor. LEC.

THR 520. History of Period Style I. 3 Hours. H.
A survey of Western style from ancient Egypt to the Restoration. Focus is placed on developing a comprehensive understanding of the stylistic relationships between art, architecture, clothing, decor, manners, and social and political history. Prerequisite: Nine hours in theatre/design/technical courses or consent of instructor. LEC.

THR 521. History of Period Style II. 3 Hours. H.
Continuation of THR 520, from the Restoration to the present day. Prerequisite: Nine hours in theatre/design/technical courses or consent of instructor. LEC.

THR 525. History of Theatre. 3 Hours. H.
Study of developments in world theatre and drama from the ancient world to the eighteenth century. LEC.

THR 526. History of Theatre II. 3 Hours. H.
Study of developments in world theatre and drama since the eighteenth century. LEC.

THR 527. Asian Theatre and Performance. 3 Hours. NW / H.W.
A survey of traditional and modern theatre and performance in Asia, with greatest attention given to India, China, and Japan. A study of plays, dramatic genres, history, conventions of play production, acting styles and other performance forms. (Same as EALC 527.) LEC.

THR 528. History of U.S. Theatre and Drama. 3 Hours. H.
Historical approach to the development of theatre and performing arts in the United States. LEC.

THR 529. Race and the American Theatre. 3 Hours. U.
The representation(s) of race in significant texts and performance styles in American theatre analyzed according to political ideologies, dramatic movements and the impact of these factors on the representation of the “other” in the theatre. (Same as AAAS 585 and AMS 529.) LEC.

THR 550. Applied and Interactive Theatre. 3 Hours. H.
This course is an exploration of interactive drama techniques and practices of the evolving field of applied theatre. The tools of applied theatre serve varied purposes and are being used around the world for community-building, personal empowerment, to address social and political issues, and to strengthen communication skills. The class will work specifically on community-based dialogue and classroom situations that students and professors encounter in their daily lives. LEC.

THR 599. Special Topics in Scenography. 1-6 Hours. U.
Individual studio activity. Course content to be determined by the student under the supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: Permission of instructor. IND.

THR 603. Theatre for Young Audiences. 3 Hours. U.
A survey of theories, history, literature, criticism, production methods, and audience research about theatre performed by adults for children and adolescents. Emphasis is on child development and community outreach. Prerequisite: THR 308 or consent of instructor. LEC.

THR 604. Drama with Young People. 1-3 Hours. U.
A laboratory experience in developing and conducting improvisational drama workshops with children or adolescents in local schools. Includes readings by leading theorists and practitioners. Prerequisite: Actors cast in current KU Theatre for Young People production, or THR 404, or consent of instructor. LEC.

THR 609. Play Directing. 3 Hours. H.
Readings, lectures, and practice dealing with the relationship between actor and director. Prerequisite: THR 508. LEC.

THR 617. Computer-Aided Design II. 3 Hours. U.
Continuation of THR 517. Emphasis on computer-generated images as scenic media in production situations. Prerequisite: THR 517, or permission of instructor. LEC.

THR 618. Scenography and the Musical Theatre. 3 Hours. H.
Holistic production design, including lighting, scenery, and costumes, for musical theatre, opera, and dance. Examines development and changes in design styles in the evolution of musical theatre, opera, and dance and...
the special requirements of these forms. Projects tailored to the needs and level of the students. Prerequisite: Consent of instructor. LEC.

THR 619. Scenography and the Contemporary Script. 3 Hours. H.
Holistic production design, including lighting, scenery, and costumes, for contemporary scripts. Examines contemporary episodic scripts written for the stage that are based on a filmic structure, the special problems of these kinds of scripts, and the respective problems of designing for theatre and film. Projects tailored to the needs and level of the students. Prerequisite: Consent of instructor. LEC.

THR 620. Scenography and the Experimental Production. 3 Hours. H.
Holistic production design, including lighting, scenery, and costumes, for experimental scripts/scenarios. Examines experimental approaches to a variety of script/scenarios, including mixed-media production. Projects tailored to the needs and level of the students. Prerequisite: Consent of instructor. LEC.

THR 626. Myth and the Dramatist. 3 Hours. U.
This seminar critically explores myths in dramatic literature from ancient to contemporary times, using select authors from different cultures. Analysis of the works will be based on both conventional and post-structuralist theories and specific emphasis will be on myths that have been adapted cross-culturally and/or in different time perspectives. LEC.

THR 702. Graduate Seminar in: _____. 3 Hours.
Course organized any given semester to study particular subject matter or to take advantage of special competency by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. LEC.

THR 703. Directed Readings in Theatre. 1-3 Hours.
Research reading and presentation of reports on specific subjects related to the students major area of specialization. May be repeated up to a total of six credits on petition. Required of all MFA Scenography students. IND.

THR 704. Study Abroad Topics in: _____. 1-6 Hours.
This course is designed for the study of special topics in Theatre. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

THR 707. Theatre Internship. 3-12 Hours.
Study with an approved theatre company. Emphasis may be in one or all of the following areas: acting, directing, stage management, technical theatre, promotion management. No more than six hours may be applied to an M.A. degree. Course will be graded satisfactory/unsatisfactory. Prerequisite: Consent of instructor. FLD.

THR 709. Advanced Dramatic Script Writing. 3 Hours.
The purpose of this course is to permit selected students, by consent of instructor, to develop or continue dramatic writing projects in theatre, film, television, and radio under the individual supervision of the instructor. LEC.

THR 711. Styles of Acting: Shakespearean. 3 Hours.
An approach to acting styles of the period, based on a study of the art, customs, spirit, and the theatre of the times applied to scene studies taken from the works of Shakespeare. Prerequisite: THR 106 and THR 206 or consent of instructor. LEC.

THR 713. Styles of Acting: Restoration and 18th Century English. 3 Hours.
An approach to acting styles of the period, based on a study of the art, customs, spirit, and the theatre of the times applied to scene studies taken from the works of English Restoration dramatists and those 18th century English playwrights writing in the Restoration mode. Prerequisite: THR 106 and THR 206 or consent of instructor. LEC.

THR 715. Problems and Techniques of Direction. 3 Hours.
Practical experience in directing. Prerequisite: THR 609. RSH.

THR 719. M.F.A. Production Seminar. 3 Hours.
To be taken by M.F.A. candidates during those semesters in which they are assigned to design one or more elements in a production to be mounted on one of our stages. Weekly critique and discussion of solutions to practical design problems from conception through execution. May be repeated for a total of no more than six hours credit. Prerequisite: Consent of instructor. IND.

THR 725. Russian Theatre and Drama from Stanislavski and Chekhov to the Present. 3 Hours.
A study of the development of Russian theatre and dramatic literature from 1898 to the present. Lectures and readings in English. (Same as SLAV 562.) LEC.

THR 800. Introduction to Graduate Study in Theatre. 3 Hours.
Major emphasis is placed upon the principles of research, bibliographical data, and research methods useful in theatre and performance studies. The course should be taken at the beginning of the graduate student’s program. LEC.

THR 801. Professional Development Seminar. 1 Hour.
Preparation for faculty careers in theatre and related fields, including issues of research, teaching, and service. At least three hours per semester will be devoted to training in responsible scholarship. May be repeated for credit. RSH.

THR 802. Master’s Projects. 3-6 Hours.
Advanced creative projects which may be elected by master’s degree candidates in lieu of thesis. RSH.

THR 803. Summer Theatre: Graduate. 1-3 Hours.
Provides graduate level experience in a wide range of theatre activity related to the summer theatre production or productions. Work may include activity in the following areas: acting, directing, design, technical theatre, voice and/or movement. Specialized skills are developed through individual classes, production preparation, and performance. Prerequisite: Consent of instructor. FLD.

THR 815. Advanced Play Production. 1-3 Hours.
Individually supervised directing of theatre pieces for public presentation. In special cases credit may be given for musical direction, choreography, or stage management. Prerequisite: THR 715. FLD.

THR 817. Theory of Acting and Directing. 3 Hours.
Readings, lectures, discussions and papers on acting and directing theory; is concerned with the divergence between presentational and representational acting methods and the emergence of directing art. Prerequisite: THR 609 or THR 715. LEC.

THR 819. Advanced M.F.A. Production Seminar. 3 Hours.
Continuation of THR 719, but production design assignments will be more complex and larger in scope. May be repeated for maximum of six hours credit. Prerequisite: Six hours of THR 719 and consent of instructor. IND.

THR 826. Seminar in African Theatre. 3 Hours.
a study of developments in African theatre in the 20th Century focusing on themes, concepts, styles, and critical perspectives. The course will investigate the idea of an "African theatre" and identify different periods and movements within national and international contexts. The analysis of representative works and authors will be grounded within appropriate theoretical frameworks. LEC.

THR 828. Seminar in American Theatre and Drama to 1895. 3 Hours.
Intensive investigation of selected topics. Individual study emphasized. LEC.
**THR 829. Seminar in American Theatre and Drama from 1895. 3 Hours.**
Intensive investigation of selected topics. Individual study emphasized. LEC.

**THR 898. Investigation and Conference (for Master’s Students). 1-8 Hours.**
Directed research and experimentation in theatre. Limited to eight hours credit toward the Master’s degree. RSH.

**THR 899. Master’s Thesis. 1-6 Hours.**
THE.

**THR 901. Theatre Seminar in: ______. 3 Hours.**
A graduate seminar devoted to selected historical, theoretical, or critical issues in theatre. Prerequisite: Consent of instructor. LEC.

**THR 914. Theories of Race and Performance. 3 Hours.**
Theories of Race and Performance is an inter-textual graduate course that explores interdisciplinary scholarship on race and performance. It seeks to translate these theories into practical application in various visual, audio and performance texts in popular culture. The course is divided into modules aimed at gaining an understanding of the shifting meaning of race over time and its relationship to ethnicity, gender, sexuality, class, nation, and power. How do we perform our identities? How is race constructed and maintained through performance? To begin to answer these questions, we will examine the ways in which racial identities are created through performance. SEM.

**THR 915. Modern Theatre and Drama. 3 Hours.**
A study of the movements in playwriting and theatrical production in Europe and America from the mid-19th century to World War II. Prerequisite: THR 525 and THR 526 or comparable courses. LEC.

**THR 916. Postmodern Theatre and Drama. 3 Hours.**
A study of developments in Europe and American playwriting, directing, acting, and design from World War II to the present. SEM.

**THR 917. Dramatic Theory I. 3 Hours.**
A survey of dramatic theory from Plato to Lessing. LEC.

**THR 918. Dramatic Theory II. 3 Hours.**
A survey of dramatic theory from Lessing to Langer. LEC.

**THR 919. Dramatic Theory Seminar. 3 Hours.**
Study in depth of selected theorists. Offered as determined by faculty availability and student interest. LEC.

**THR 920. Practicum in Criticism. 3 Hours.**
Contemporary approaches to theatre and drama criticism. Emphasis on actual practice, using a variety of critical methods. FLD.

**THR 922. Theatre Historiography. 3 Hours.**
This course focuses on the advanced study of research methods, subjects, interpretative paradigms, theoretical frameworks, and philosophies of history employed in contemporary approaches to writing and teaching theatre history. Prerequisite: THR 525 and THR 526 or equivalent. LEC.

**THR 998. Investigation and Conference (for Doctoral Students). 1-8 Hours.**
RSH.

**THR 999. Doctoral Dissertation. 1-12 Hours.**
THE.

---

**Visual Art Courses**

**ADSC 177. First Year Seminar: ______. 3 Hours. GE11 / U.**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Advanced Design Studies College. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

**ADSC 560. Topics in Design: ______. 1-3 Hours.**
A study of different topics in different semesters in a special area of interest to a staff member and suitable qualified students. May be repeated for credit. Prerequisite: Junior standing in department. LAB.

**ADSC 580. Special Problems in Design. 1-6 Hours.**
A study of current problems in design or crafts with an emphasis on research. Special problems proposals must be discussed with and approved by the instructor and advisor prior to enrollment in the course. A student may not take more than six credit hours of special problems in any one semester. Prerequisite: Junior standing in department. IND.

**ADSC 810. Orientation Seminar. 1 Hour.**
Studies directed to development of a thesis plan. Required of all graduate students. Offered in fall semester only. Graded S or F. LEC.

**ART 101. Drawing I. 3 Hours. GE3H.**
Basic problems in drawing. LAB.

**ART 102. Drawing II. 3 Hours.**
Continuation of ART 101. Prerequisite: ART 101. LAB.

**ART 103. Art Concepts and Practice. 3 Hours. U.**
A companion course to ART 104. Lecture and studio experiences across disciplines emphasizing conceptual fundamentals, technical/skill development, visual sensibility, critical thinking and professional topics in art. LEC.

**ART 104. Art Principles and Practice. 3 Hours. U.**
A companion course to ART 103. Lecture and studio experiences across disciplines emphasizing conceptual fundamentals, technical/skill development, visual sensibility, critical thinking and professional topics in art. LEC.

**ART 120. Fundamentals of Drawing and Painting. 3 Hours.**
Open to all university students. Specifically for students with limited or no previous experience. An exploration of basic technical and expressive possibilities in drawing and painting; may include field trips, films, visiting lecturers. Six hours scheduled studio activity and three hours outside work weekly. LAB.

**ART 121. Fundamentals of Printmaking. 3 Hours.**
Open to all university students. Specifically for students with limited or no previous experience. An exploration of basic technical and expressive possibilities in printmaking, including woodcut, etching, lithography and silk screen; may include field trips, films, visiting lecturers. Six hours scheduled studio activity and three hours outside work weekly. LAB.

**ART 122. Fundamentals of Sculpture. 3 Hours.**
Open to all university students. Specifically for students with limited or no previous experience. An exploration of basic technical and expressive possibilities in sculpture; may include field trips, films, visiting lecturers. Six hours scheduled studio activity and three hours outside work weekly. LAB.

**ART 123. Fundamentals of Expanded Media. 3 Hours. GE3H / U.**
Open to all university students. Specifically for students with limited or no previous experience. An exploration of basic technical and expressive possibilities in Expanded Media, including Installation, Performance, Video and other Digital technologies; may include field trips, films, and/or visiting lecturers. Six hours scheduled studio activity and three hours outside work weekly. LAB.
ART 130. Fundamentals of Fiber Forms. 3 Hours. U.
Open to all university students. Studio exploration of fibers as an art form and means of personal expression. Emphasis is placed on three-dimensional objects. A variety of interlacement, construction, and dye techniques are introduced. LAB.

ART 131. Fundamentals of Ceramics. 3 Hours.
Open to all university students. Specifically for students with limited or no previous experience. An introduction to ceramics including throwing, handbuilding, glazing, firing, and related activities. LAB.

ART 132. Fundamentals of Metalsmithing/Jewelry. 3 Hours. GE3H.
Open to all university students. Specifically for students with limited or no previous experience. A comprehensive study of the field of jewelry and metalsmithing with an emphasis on the tools, processes, and techniques used in the design and fabrication of objects from metals such as aluminum, brass, copper, bronze, silver and related materials. Studio experience will include lectures, slide presentations, demonstrations, visiting artist, and student projects. LAB.

ART 133. Fundamentals of Fibers. 3 Hours. GE3H / U.
Open to all university students. Studio exploration of fibers as an art form and means of personal expression. A variety of dyeing, construction, and surface embellishment techniques will be introduced. LAB.

ART 177. First Year Seminar: _____ 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Art. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ART 201. Color Theory. 3 Hours.
An introduction to the basic color theories and their application. Presentation of the relationship between pigment and light, and of additive and subtractive color mixing. Prerequisite: ART 101, and ART 103 or ART 104. LAB.

ART 300. Special Topics in Visual Art: _____. 1-3 Hours.
Course to be offered in related areas of research, mixed media or interdisciplinary exploration. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Visual Art courses, or permission of instructor. LAB.

ART 305. Visual Language. 3 Hours. H.
This course explores visual language and its relationship to cultural meaning. We examine the ways that cultural expression both influences and is influenced by artistic expression. An investigation of artistic practice and its basic elements and principles is used to demonstrate the connections between visual perception and the interpretation of visual experience. Examples from the arts and popular culture are used to illustrate the ways that we create meaning from the things we see. This course is open to all university students. Prerequisite: ENGL 101 and ENGL 102 or equivalent, or completion of the KU Core Written Communication requirements (Goal 2.1). LEC.

ART 310. Build Smart. 3 Hours. U.
Introduction to the experience and culture of building projects by hand. Students analyze and determine the best ways to build. Students also become familiar with tools, machines, building practices and material necessary for wood and steel fabrication. Prerequisite: ART 103, ART 104, or permission of the instructor. LEC.

ART 375. Directed Readings in Visual Art. 1-3 Hours. U.
Directed reading in specific areas of visual art. May be repeated for credit in subsequent semesters. Prerequisite: ART 102, ART 103 and ART 104; and six hours of Visual Art courses, or permission of instructor. IND.

ART 395. Study Abroad Topics in: _____. 1-6 Hours. H.
This course is designed for the study of special topics in Visual Art. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. Open to all students. LEC.

ART 500. Advanced Special Topics in Visual Art: _____. 1-4 Hours.
Course to be offered in related areas of research, mixed media or interdisciplinary exploration. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Visual Art courses, or permission of instructor. LEC.

ART 540. Professional Activities Seminar. 3 Hours.
Comprehensive development of skills and strategies needed to pursue a career as a professional studio artist. Prerequisite: Twenty-four hours of departmental electives or permission of instructor. LEC.

ART 575. Advanced Directed Reading in Visual Art. 1-3 Hours.
Directed reading in specific areas of visual art. May be repeated for credit in subsequent semesters. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Visual Art courses, or permission of instructor. IND.

ART 590. Internship in Visual Art. 1-3 Hours. U.
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded on a satisfactory/unsatisfactory basis, according to the written recommendation provided by the internship supervisor to the faculty advisor. Prerequisite: ART 102, ART 103, and ART 104; and fifteen hours of Visual Art courses; and prerequisite of instructor. FLD.

ART 595. Advanced Study Abroad Topics in: _____. 1-6 Hours. H.
This course is designed for the study of special topics in Visual Art at the senior/graduate level. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. Open to seniors and graduate level students. LEC.

ART 598. Special Topics: Studio Theory and Criticism. 3 Hours.
Lecture, discussion, and supervised research in current topics related to contemporary studio theory and criticism. May be repeated for credit as topics vary. This course will be counted as free electives in course distribution. Prerequisite: Eighteen hours of departmental electives. LEC.

Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Visual Art courses; and permission of instructor. Does not fulfill ART 695/ART 696 requirement. IND.

ART 695. Directed Study I. 3 Hours.
Individual studio activity under direction of faculty advisor; capstone experience. Prerequisite: Thirty hours of departmental electives, consent of department, and permission of instructor. IND.

ART 696. Directed Study II. 4 Hours. AE61.
Continuation of ART 695; capstone experience. May be repeated for credit in subsequent semesters. Prerequisite: ART 695 and permission of instructor. IND.
ART 801. Directed Study III. 2-5 Hours.
Individual studio activity under the direction of faculty member. May be repeated for credit in subsequent semesters. Prerequisite: Permission of graduate director and enrollment in the Visual Art MFA program. RSH.

ART 802. Directed Study IV. 2-5 Hours.
Continuation of Directed Study III. Prerequisite: Enrollment in the Visual Art MFA Program. RSH.

ART 803. Directed Study V. 2-5 Hours.
Continuation of Directed Study IV. Prerequisite: Enrollment in the Visual Art MFA Program. RSH.

ART 805. Graduate Studio. 1-3 Hours.
Individual graduate studio research in visual art. Course content to be determined by the student under the supervision of a graduate faculty member. May be repeated for credit. Prerequisite: Graduate standing in The School of The Arts and permission of the instructor. RSH.

ART 861. Directed Reading in Visual Art. 1-3 Hours.
Research reading and presentation of reports on specific subjects related to the student's major area of specialization. Prerequisite: Enrollment in the MFA Program in the Department of Visual Art. RSH.

ART 877. Graduate Seminar. 3 Hours.
The graduate seminar emphasizes professional preparation for contemporary artists focusing on writing skills, oral presentations, critiques of individual creative research/artwork, critical thinking about and visual analysis of current art forms and contemporary approaches to the teaching of studio art. Prerequisite: Admission to the Graduate Program in Visual Art. SEM.

ART 896. Special Topics: Studio Theory and Criticism. 3 Hours.
Lecture, discussion, and supervised research in current topics related to contemporary studio theory and criticism. May be repeated for credit as topics vary. This course will be counted as a graduate level elective in course and credit distribution. LEC.

ART 899. Graduate Seminar. 1 Hour.
Weekly discussion of issues and/or work in art. (Graded on a satisfactory/ or F basis.) Repeat for credit in subsequent semesters. SEM.

ART 906. Graduate Studio. 1-3 Hours.
Individual graduate studio research in visual art. Course content to be determined by the student under the supervision of a graduate faculty member. May be repeated for credit. Prerequisite: ART 805 and permission of the instructor. RSH.

Original research in visual art culminating in a thesis exhibition. May be repeat for credit. Prerequisite: Thirty-six credit hours of graduate credit and permission of the graduate review committee. THE.

CER 177. First Year Seminar: _____, 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Ceramics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

CER 208. Ceramics I. 3 Hours.
The development of form and surface through the use of handbuilding and wheel thrown techniques. Stoneware and Raku are explored. Prerequisite: ART 102 and ART 104. LAB.

CER 300. Special Topics in Ceramics: _____, 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

CER 301. Ceramics II. 3 Hours.
A continuation of ART 131 and/or CER 208 with emphasis in firing low temperature ceramics. An introduction to glaze formulation and firing procedures through the use of earthenware and low temperature talc bodies. Prerequisite: ART 131 or CER 208. LAB.

CER 402. Ceramics III. 3 Hours.
A study of high fire ceramics using stoneware and porcelain. The development of ceramic forms and shapes utilizing traditional and nontraditional techniques such as salt glaze, wood firing, oxidation, and reductions. Prerequisite: ART 131 or CER 208. LAB.

CER 500. Advanced Special Topics Ceramics: _____, 1-4 Hours. U.
Course to be offered in an area of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Ceramics courses, or permission of instructor. LEC.

CER 504. Kilns. 3 Hours.
The principles in kiln design, including up-draft, down-draft, cross-draft, and electric kilns, and burner technology. Prerequisite: CER 301. LEC.

CER 505. Clay and Glaze Formulation. 3 Hours.
Formulation of the various clay bodies and glazes associated with ceramics. Prerequisite: CER 301. LEC.

CER 506. Production. 6 Hours.
Procedures, techniques, problems, and solutions for setting up and operating a production pottery studio, including the development of ceramic forms and glazes related to marketability and design and mold production for industry. May be repeated for credit. Prerequisite: CER 301 and CER 302. LAB.

CER 515. Advanced Ceramics I. 3-6 Hours. AE61.
Development of individual direction in ceramics based on experience, research, and skills acquired in previous courses; capstone experience. May be repeated for credit. Prerequisite: CER 301 and CER 402. LAB.

CER 520. Advanced Ceramics II. 3-6 Hours. AE61 / U.
Continuation of CER 515; capstone experience. May be repeated for credit. Prerequisite: CER 515. LAB.

CER 590. Internship in Ceramics. 1-3 Hours. U.
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded on a satisfactory/unsatisfactory basis, according to the written recommendation provided by the internship supervisor to the faculty advisor. Prerequisite: ART 102, ART 103, and ART 104; and fifteen hours of Visual Art courses; and permission of instructor. FLD.

CER 599. Individual Studies in Ceramics. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Ceramics courses or permission of instructor. IND.

CER 715. Ceramics. 2-6 Hours.
Individual research. Prerequisite: CER 515 or equivalent. RSH.

CER 725. Glass. 2-6 Hours.
Individual research. Prerequisite: Approval of instructor. RSH.
CER 815. Ceramics. 2-6 Hours.
Continuation of CER 805. RSH.

CER 825. Glass. 2-6 Hours.
Individual research. Prerequisite: Approval of instructor. RSH.

DRWG 177. First Year Seminar: ____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Drawing. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

DRWG 203. Drawing III. 3 Hours.
Advanced problems in drawing. Prerequisite: ART 102. LAB.

DRWG 213. Life Drawing I. 3 Hours.
Figure drawing. Prerequisite: ART 102 and ART 103 or ART 104. LAB.

DRWG 300. Special Topics in Drawing: ____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

DRWG 304. Drawing IV. 3 Hours.
Continuation of DRWG 203. Prerequisite: DRWG 203. LAB.

DRWG 314. Life Drawing II. 3 Hours.
Continuation of DRWG 213. Prerequisite: DRWG 213. LAB.

DRWG 318. Life Drawing II, Honors. 3 Hours.
Figure drawing, a continuation of DRWG 213. Prerequisite: DRWG 213; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

DRWG 335. Special Topics in Drawing: ____. 3 Hours.
Course to be offered in area of special interest to individual faculty, and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: DRWG 203, or DRWG 213, or permission of instructor. LAB.

DRWG 500. Advanced Special Topics in Drawing: ____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Drawing courses, or permission of instructor. LEC.

DRWG 505. Drawing V. 3 Hours.
Continuation of DRWG 304. Prerequisite: DRWG 304. LAB.

DRWG 506. Drawing VI. 3 Hours.
Continuation of DRWG 505. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 505. LAB.

DRWG 515. Life Drawing III. 3 Hours.
Continuation of DRWG 314. Prerequisite: DRWG 314. LAB.

DRWG 516. Life Drawing IV. 3 Hours.
Continuation of DRWG 515. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 515. LAB.

DRWG 518. Life Drawing III, Honors. 3 Hours.
Figure drawing, a continuation of DRWG 314 or DRWG 318. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 314 or DRWG 318; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

DRWG 519. Life Drawing IV, Honors. 3 Hours.
Figure drawing, a continuation of DRWG 515 or DRWG 518. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 515 or DRWG 518; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

DRWG 535. Special Topics in Drawing: ____. 3 Hours.
Course to be offered in area of special interest to individual faculty, and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: 12 hours of drawing and permission of instructor. LAB.

DRWG 599. Individual Studies in Drawing. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Drawing courses, or permission of instructor. IND.

DRWG 807. Drawing VII. 3 Hours.
Individual research in drawing. Prerequisite: DRWG 506. RSH.

DRWG 817. Life Drawing V. 3 Hours.
Individual research in figure drawing. Prerequisite: DRWG 516. RSH.

DRWG 908. Drawing VIII. 3 Hours.
Continuation of DRWG 807. Prerequisite: DRWG 807. RSH.

DRWG 918. Life Drawing VI. 3 Hours.
Continuation of DRWG 817. Prerequisite: DRWG 817. RSH.

EXM 177. First Year Seminar: ____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Expanded Media. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

EXM 274. Expanded Media. 3 Hours. U.
Beginning course to introduce the fundamental concepts, strategies, and technologies that comprise the Expanded Media area of the Department of Visual Art: Installation, Performance, and Digital Image. Emphasis is placed on forming ideas and strategies, and creating artwork that considers the core connections within Expanded Media: time, space, the body, the viewer, and society at large. Computer-based technologies and time-based media that are inherent to Expanded Media practice support studio assignments. Coursework includes the investigation and discussion of historic precedents and the development of an appropriate critical dialogue with which to discuss their work. Prerequisite: ART 102, ART 103, and ART 104. LAB.

EXM 300. Special Topics in Expanded Media: ____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

EXM 301. The Digital Image I. 3 Hours.
Introduction to various still digital processes and skills that encourage the use of digital imagery within a variety of other media. Focus on content issues as they relate to development of artwork incorporating digital imagery. LAB.

EXM 302. Performance Art I. 3 Hours. U.
An introduction to the understanding and production of performance art. Students gain proficiency in conceptualization and production
of performance time-based art in an Interdisciplinary art-making environment. Prerequisite: ART 102, ART 103, and ART 104. LAB.

**EXM 303. Intermedia I. 3 Hours.**
An introduction to the use/ handling and integration of diverse, new and traditional materials, techniques and processes. Problems will involve strategies for discovering and managing combinations of drawn, painted, digital and constructed forms. Studio sessions will include research, lecture, demos, and guest speakers. Prerequisite: Permission of instructor. LAB.

**EXM 307. Installation Art I. 3 Hours. U.**
An introduction to the understanding and production of installed art environments using a variety of media and approaches to art-making. Students gain proficiency in conceptualization and production of installation art in an interdisciplinary art-making environment. Prerequisite: ART 102, ART 103, and ART 104. LAB.

**EXM 314. Alternative Approaches in Photography I. 3 Hours. U.**
An introduction to the understanding and production of art-making using alternative approaches in photography. Students gain proficiency in conceptualization and production of artwork using alternative approaches in photography in an interdisciplinary art-making environment. Prerequisite: ART 102, ART 103, and ART 104. LAB.

**EXM 326. Video and Time-Based Media I. 3 Hours. U.**
An introduction to the understanding and production of video and time-based art. Students gain proficiency in conceptualization and production of video and time-based art in an interdisciplinary art-making environment. Prerequisite: ART 102, ART 103, and ART 104. LAB.

**EXM 350. Advanced Special Topics in Expanded Media: _____ 1-4 Hours. U.**
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

**EXM 351. The Digital Image I. 3 Hours.**
Continuation of EXM 301. The Digital Image I. May be repeated for credit. LAB.

**EXM 353. Intermediate Expanded Media. 3 Hours.**
Continuation of EXM 303. Intermediate I. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

**EXM 354. Alternative Approaches in Photography II. 3 Hours. U.**
Continuation of EXM 314. Prerequisite: EXM 314. LAB.

**EXM 356. Video and Time-Based Media II. 3 Hours. U.**
Continuation of EXM 326. Prerequisite: EXM 326. LAB.

**EXM 355. Intermediate Expanded Media. 3 Hours.**
Continuation of Expanded Media studio research. Prerequisite: Two (200- and/or 300-level) Expanded Media courses. LAB.

**EXM 356. Intermediate Expanded Media, Honors. 3 Hours.**
Continuation of Expanded Media studio research. Prerequisite: Two (200- and/or 300-level) Expanded Media courses; membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department. LAB.

**EXM 357. Advanced Expanded Media. 3 Hours.**
Continuation of EXM 355. May be repeated for credit. Prerequisite: EXM 355 or EXM 356. LAB.

**EXM 358. Advanced Expanded Media, Honors. 3 Hours.**
Continuation of EXM 356. May be repeated for credit. Prerequisite: EXM 356 or EXM 358; membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department. LAB.

**EXM 3541. Graduate Performance Art. 3 Hours.**
Students will gain proficiency in conceptualization and production of performance time-based art in an interdisciplinary art-making environment. Prerequisite: Permission of instructor. LAB.

**EXM 3542. Graduate Installation Art. 3 Hours.**
Advanced problems toward the creation of environments using a variety of media including traditional and non-traditional approaches to art-making. Prerequisite: Permission of instructor. LAB.

**EXM 3543. Graduate: The Digital Image. 3 Hours.**
Advanced work focusing on content issues as they relate to development of artwork incorporating digital imagery. Prerequisite: Permission of instructor. LAB.

**EXM 3545. Graduate Intermedia. 3 Hours.**
Advanced work in the use/handling and integration of diverse, new and traditional materials, techniques and processes. Advanced problems will involve strategies for discovering and managing combinations of drawn, painted, digital, and constructed forms. Studio sessions will include research, lecture, demos, and guest speakers. Prerequisite: Permission of instructor. LAB.

**EXM 3546. Graduate Expanded Media V. 3 Hours.**
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor. LAB.

**EXM 3573. Performance Art II. 3 Hours. U.**
Continuation of EXM 302. Prerequisite: EXM 302. LAB.

**EXM 3574. Performance Art II, Honors. 3 Hours. U.**
Continuation of EXM 302. Prerequisite: EXM 302; and membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department. LAB.

**EXM 3577. Installation Art II. 3 Hours. U.**
Continuation of EXM 307. Prerequisite: EXM 307. LAB.

**EXM 3578. Installation Art II, Honors. 3 Hours. U.**
Continuation of EXM 307. Prerequisite: EXM 307; and membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department. LAB.

**EXM 3599. Individual Studies in Expanded Media. 1-6 Hours. AE61 / U.**
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Expanded Media courses, of permission of instructor. IND.

**EXM 3846. Graduate Expanded Media VI. 3 Hours.**
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor. LAB.

**EXM 3946. Graduate Expanded Media VII. 3 Hours.**
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor. LAB.

**METL 177. First Year Seminar: _____ 3 Hours. GE11 / U.**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Metalsmithing/Jewelry. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.
METL 211. Jewelry. 3 Hours. GE3S.
Introduction to metalsmithing and jewelry design, materials and processes. Student projects explore the joining, forming, and surface embellishment of metals such as copper, brass, bronze, and sterling. Prerequisites: ART 102 and ART 104. LAB.

METL 300. Special Topics in Metalsmithing: ____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

METL 301. Introduction to Casting for Jewelry. 3 Hours.
Introduction to casting and mold making processes used for jewelry and small sculpture. Students explore various methods and materials for creating models for casting in bronze or silver including wax carving, wax modeling, and the use of natural and synthetic materials as models. Models are cast using centrifugal and vacuum casting processes. Basic mold making in clay and silicone are also explored. Prerequisite: ART 132 or METL 211. LAB.

METL 302. Professional Practices. 3 Hours.
The development of a portfolio including designing, rendering, and model making for future projects. Photographing completed objects and discussing professional aspects of the jewelry/metalsmithing field. Prerequisite: Six hours of metalsmithing. LAB.

METL 360. Holloware. 3 Hours.
Problems related to specific smithing techniques such as raising, stretching, shell structures and seam fabrications. Metal manipulation on a large scale. Prerequisite: METL 301. LAB.

METL 362. Metalsmithing. 6 Hours.
Advanced metalworking with an emphasis on the refinement of design and techniques. Processes may include linkage, marriage of metals, metal inlays, hinge and catch fabrication. Prerequisite: METL 301. LAB.

METL 364. Enameling. 6 Hours.
Problems of basic and advanced enameling as applied to jewelry design and metalsmithing objects. Exploration of major enameling techniques: such as limoges, cloissoné, champelle, and bassetaille. Prerequisite: Six hours of metalsmithing or consent of instructor. LAB.

METL 500. Advanced Special Topics in Metalsmithing: ____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

METL 501. Seminar. 3 Hours.
Lectures and demonstrations on techniques of contemporary interest outside of typical classroom activity. Prerequisite: Six hours of metalsmithing. LEC.

METL 503. Gemology. 3 Hours. H.
Students study the optical and physical characteristics of gemstones in order to identify them using gemological instruments. This laboratory and discussion class explores related topics including the principles of optics that support this methodology, history and geographical distribution of gemstones, gemstone cutting and pearl farming, the history of DeBeers and the development of the world demand for diamond, quality analysis of diamond, colored gemstones and pearls, including the history of diamond grading, the development and identification of synthetics, imitations and laboratory enhancements as well as the use of gemstones in designing jewelry. Prerequisite: ART 132. LAB.

METL 504. A History of Jewelry. 3 Hours. H.
This course explores the history from Sumeria to the 21st century of the use of metals and gemstones in the creation of decorative art for personal adornment. Students explore the evolution of the role of jewelry in ancient culture and modern society and survey individuals whose ideas and work influenced generations of goldsmiths and jewelers around the globe. The class studies primitive tools and modern manufacturing techniques, the history of gemstone cutting and setting and the origin and development of gemstones as symbols. Prerequisite: ART 132. LEC.

METL 505. Digital Jewelry Design I. 3 Hours. H.
Matrix is a 3-D CAD program based on Rhino developed by Rhino, specifically for jewelry design. The goal of this course is to instruct beginners in the Matrix design program. Students learn to transform their 2-D designs from their sketchbooks into 3-D models in Matrix, which can be milled in wax, and cast in metal. Students also learn how to render their 3-D Matrix models to appear as if they were a finished object. The class time is structured as a combination of instructor-led tutorials and working labs. Prerequisite: ART 132. LAB.

METL 506. Digital Jewelry Design II. 3 Hours. H.
The second semester of Matrix increases the operating and design skills building on the knowledge of DG I. The focus of the class is producing wax models on the Revo Digital Mill.Digi II covers the advanced modeling skills including T-spline and Rhino. Students also learn how to make a customized tool path for Revo C mill program and how to solve milling problems. Students also learn how to convert Rhino files to produce a 3D print for outsourcing to other 3D modeling programs. Prerequisite: ART 132, METL 301, METL 505. LAB.

METL 515. Advanced Metals I. 6 Hours. AE61.
Emphasis on individual design aesthetic through intensive designing, rendering, and modelmaking as preparation for fabricated pieces of jewelry, holloware, and/or small objects; capstone experience. Prerequisite: METL 362. LAB.

METL 520. Advanced Metals II. 6 Hours. AE61 / U.
Continuation of METL 515; capstone experience. This course requires a final presentation of a complete portfolio including resume, renderings and photographs of the finished work. Prerequisite: METL 515. LAB.

METL 590. Internship in Metalsmithing/Jewelry. 1-3 Hours. U.
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded on a satisfactory/unsatisfactory basis, according to the written recommendation provided by the internship supervisor to the faculty advisor. Prerequisite: ART 102, and ART 103, and ART 104; and fifteen hours of Visual Art Courses; and permission of instructor. FLD.

METL 599. Individual Studies in Metalsmithing/Jewelry. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Metalsmithing/Jewelry courses, or permission of instructor. IND.

METL 715. Metals/Jewelry. 2-6 Hours.
Individual research. Prerequisite: METL 515 or equivalent. RSH.

METL 815. Metals/Jewelry. 2-6 Hours.
Continuation of METL 715. RSH.
PNTG 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Painting. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

PNTG 263. Painting I. 3 Hours.
Basic problems in painting. Prerequisite: ART 102, and ART 103 or ART 104. LAB.

PNTG 300. Special Topics in Painting: ______. 1-4 Hours.
Course to be offered in area of studio activity of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

PNTG 337. Watercolor. 3 Hours.
Sessions deal with the preparation of watercolor paints and equipment, but the main emphasis is placed on relational concepts affecting tone, structure, and unity in work. While the students are expected to explore some of the traditional approaches to watercolor, they also are encouraged to work with new and innovative ones. May be repeated for credit. Prerequisite: PNTG 263 or permission of instructor. LAB.

PNTG 338. Landscape Painting. 3 Hours.
An introduction to landscape painting. Considerable work is done out-of-doors. Emphasis is placed upon experiencing the environment and the development of individual approach. May be repeated for credit. Prerequisite: PNTG 263 and permission of instructor. LAB.

PNTG 364. Painting II. 3 Hours.
Continuation of PNTG 263. Prerequisite: PNTG 263. LAB.

PNTG 368. Painting II, Honors. 3 Hours.
Continuation of PNTG 263. Prerequisite: PNTG 263; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PNTG 500. Advanced Special Topics in Painting: ______. 1-4 Hours.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Painting courses, or permission of instructor. LAB.

PNTG 565. Painting III. 3 Hours.
Continuation of PNTG 364. Prerequisite: PNTG 364. LAB.

PNTG 566. Painting IV. 3 Hours.
Continuation of PNTG 565. May be repeated for credit. Prerequisite: PNTG 565. LAB.

PNTG 567. Painting III, Honors. 3 Hours.
Continuation of PNTG 364 or PNTG 368. Prerequisite: PNTG 364 or PNTG 368; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PNTG 569. Painting IV, Honors. 3 Hours.
Continuation of PNTG 565 or PNTG 568. Prerequisite: PNTG 565 or PNTG 568; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PNTG 585. The Figure I. 3 Hours.
The figure and its environment in various media. Prerequisite: DRWG 314 and PNTG 364. LAB.

PNTG 586. The Figure II. 3 Hours.
Continuation of PNTG 585. May be repeated for credit. Prerequisite: PNTG 585. LAB.

PNTG 588. The Figure I, Honors. 3 Hours.
The figure and its environment in various media. Prerequisite: DRWG 314 or DRWG 318 and PNTG 364 and PNTG 368; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PNTG 589. The Figure II, Honors. 3 Hours.
Continuation of PNTG 585 or PNTG 588. May be repeated for credit. Prerequisite: PNTG 585 or PNTG 588; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PNTG 599. Individual Studies in Painting. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Painting courses, or permission of instructor. IND.

PNTG 667. Painting V. 3 Hours.
Continuation of PNTG 566. Prerequisite: PNTG 566. LAB.

PNTG 668. Painting VI. 3 Hours.
Continuation of PNTG 667. May be repeated for credit in subsequent semesters. Prerequisite: PNTG 667. LAB.

PNTG 687. The Figure III. 3 Hours.
Continuation of PNTG 585. Prerequisite: PNTG 585. LAB.

PNTG 688. The Figure IV. 3 Hours.
Continuation of PNTG 687. May be repeated for credit. Prerequisite: PNTG 687. LAB.

PNTG 869. Painting VII. 3 Hours.
Individual research in painting. Prerequisite: PNTG 668. RSH.

PNTG 889. The Figure V. 3 Hours.
Individual research in the figure and its environment in various media. Prerequisite: PNTG 688. RSH.

PNTG 970. Painting VIII. 3 Hours.
Continuation of PNTG 869. Prerequisite: PNTG 869. RSH.

PNTG 990. The Figure VI. 3 Hours.
Continuation of PNTG 889. Prerequisite: PNTG 889. RSH.

PRNT 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Printmaking. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

PRNT 223. Intaglio I. 3 Hours.
Introduction to intaglio. Prerequisite: ART 102, and ART 103 or ART 104. LAB.

PRNT 224. Relief I. 3 Hours.
Introduction to relief printing. Prerequisite: ART 102, and ART 103 or ART 104. LAB.

PRNT 233. Lithography I. 3 Hours.
Introduction to lithography. Prerequisite: ART 102, and ART 103 or ART 104. LAB.
PRNT 243. Serigraphy I. 3 Hours.
Introduction to serigraphy. Prerequisite: ART 102, and ART 103 or ART 104. LAB.

PRNT 300. Special Topics in Printmaking: ____. 3 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

PRNT 324. Intaglio II. 3 Hours.
Continuation of PRNT 223. Prerequisite: PRNT 223, or permission of instructor. LAB.

PRNT 325. Relief II. 3 Hours.
Continuation of PRNT 224. Prerequisite: PRNT 224, or permission of instructor. LAB.

PRNT 328. Intaglio II, Honors. 3 Hours.
Continuation of PRNT 223. Prerequisite: PRNT 223; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PRNT 329. Relief II, Honors. 3 Hours.
Continuation of PRNT 224. Prerequisite: PRNT 224; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PRNT 334. Lithography II. 3 Hours.
Continuation of PRNT 233. Prerequisite: PRNT 233 or permission of instructor. LAB.

PRNT 338. Lithography II, Honors. 3 Hours.
Continuation of PRNT 233. Prerequisite: PRNT 233; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PRNT 344. Serigraphy II. 3 Hours.
Continuation of PRNT 243. Prerequisite: PRNT 243 or permission of instructor. LAB.

PRNT 348. Special Problems in Printmaking--Color Printing in Relief and Intaglio. 3 Hours.
Multiple block and plate printing in color. (This course is not regularly offered. The current Schedule of Classes should be consulted.) Prerequisite: PRNT 222 and permission of instructor. LAB.

PRNT 349. Serigraphy II, Honors. 3 Hours.
Continuation of PRNT 243. Prerequisite: PRNT 243; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PRNT 500. Advanced Special Topics in Printmaking: ____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Printmaking courses, or permission of instructor. LEC.

PRNT 523. Printmaking III A (Intaglio). 3 Hours.
Prerequisite: PRNT 522 or permission of instructor. LAB.

PRNT 524. Printmaking III B (Lithography). 3 Hours.
Prerequisite: PRNT 523 or permission of instructor. LAB.

PRNT 525. Printmaking III C (Serigraphy). 3 Hours.
Prerequisite: PRNT 524 or permission of instructor. LAB.

PRNT 526. Printmaking IV A (Intaglio). 3 Hours.
Prerequisite: PRNT 523 or permission of instructor. LAB.

PRNT 527. Printmaking IV B (Lithography). 3 Hours.
Prerequisite: PRNT 524 or permission of instructor. LAB.

PRNT 528. Printmaking IV C (Serigraphy). 3 Hours.
Prerequisite: PRNT 525 or permission of instructor. LAB.

PRNT 599. Individual Studies in Printmaking. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Printmaking courses, or permission of instructor. IND.

PRNT 662. Printmaking V. 3 Hours.
Individual research in printmaking. Prerequisite: PRNT 526 or PRNT 527 or PRNT 528. LAB.

PRNT 663. Printmaking VI. 3 Hours.
Continuation of PRNT 662. Prerequisite: PRNT 662. LAB.

PRNT 802. Special Problems in Printmaking. 3 Hours.
Individual research in printmaking; course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: PRNT 579 and permission of instructor. RSH.

PRNT 827. Printmaking VII. 3 Hours.
Continuation of PRNT 826. Prerequisite: PRNT 826. LAB.

PRNT 928. Printmaking VIII. 3 Hours.
Continuation of PRNT 927. Prerequisite: PRNT 827. LAB.

SCUL 177. First Year Seminar: ____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Sculpture. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

SCUL 253. Sculpture I. 3 Hours.
Introduction to sculpture. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor. LAB.

SCUL 300. Special Topics in Sculpture: _____. 1-4 Hours. LAB.
Course to be offered in an area of studio activity of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor. LAB.

SCUL 349. Metal and Glass Casting. 3 Hours.
A course in foundry techniques as related to sculpture. Both traditional and experimental procedures for casting bronze, aluminum, and iron sculpture will be explored. May be repeated for credit. Prerequisite: SCUL 253. LAB.

SCUL 350. Direct Metal Fabrication. 3 Hours.
The course will present a variety of techniques for fabricating metal sculpture. Oxyacetylene and electric arc welding processes will be included. May be repeated for credit. Prerequisite: SCUL 253. LAB.
SCUL 354. Sculpture II. 3 Hours.
Continuation of SCUL 253. Prerequisite: SCUL 253. LAB.

SCUL 355. Sculpture III. 3 Hours.
Continuation of SCUL 354. Prerequisite: SCUL 354. LAB.

SCUL 358. Sculpture II, Honors. 3 Hours.
Continuation of SCUL 253. Prerequisite: SCUL 253; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the Department. LEC.

SCUL 359. Sculpture III, Honors. 3 Hours.
Continuation of SCUL 354 or SCUL 358. Prerequisite: SCUL 354 or SCUL 358; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the Department. LEC.

SCUL 500. Advanced Special Topics in Sculpture: ____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Sculpture courses, or permission of instructor. LEC.

SCUL 556. Sculpture IV. 3 Hours.
Continuation of SCUL 355. May be repeated for credit. Prerequisite: SCUL 355. LAB.

SCUL 558. Sculpture IV, Honors. 3 Hours.
Continuation of SCUL 355 or SCUL 359. May be repeated for credit. Prerequisite: SCUL 355 or SCUL 359; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

SCUL 592. Individual Studies in Sculpture. 1-6 Hours. AE1 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours can apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Sculpture courses, or permission of instructor. IND.

SCUL 657. Sculpture V. 3 Hours.
Continuation of SCUL 556. Prerequisite: SCUL 556. LAB.

SCUL 658. Sculpture VI. 3 Hours.
Continuation of SCUL 657. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 657. LAB.

SCUL 804. Special Problems in Sculpture. 3 Hours.
Individual research in sculpture; course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 559 and permission of instructor. RSH.

SCUL 859. Sculpture VII. 3 Hours.
Individual research in sculpture. Prerequisite: SCUL 658. RSH.

SCUL 905. Special Problems in Sculpture. 3 Hours.
Individual research in sculpture; course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 804 and permission of instructor. RSH.

SCUL 960. Sculpture VIII. 3 Hours.
Continuation of SCUL 859. Prerequisite: SCUL 859. RSH.

TD 130. Introduction to Weaving. 3 Hours.
Specifically for students with limited or no previous experience. Application to art and design principles to four-harness loom structures. Emphasis on the use of color and texture in loom controlled and weaver controlled techniques. Counts only as a studio elective or general elective for a B.F.A. in Art or Design. LAB.

TD 133. Introduction to Fibers. 3 Hours.
Studio exploration of fibers as an art and design form. Techniques include dyeing, spinning yarn, soft sculpture, embellishment, crochet. Open to all university students. LAB.

TD 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Textile Design. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

TD 300. Special Topics in Textiles/Fibers: ____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor. LEC.

TD 313. Fiber Forms. 3 Hours.
Studio exploration of fibers as an art form. Techniques include feltmaking, papermaking, basketry, and dyeing. Prerequisite: ART 101, and ART 130 or ART 133. LAB.

TD 314. Introduction to Weaving. 3 Hours. U.
Application of art and design principles to four-harness loom structures. Emphasis on the use of color and texture in loom controlled and weaver controlled techniques. Prerequisite: ART 101, and ART 130 or ART 133. LAB.

TD 315. Textile Handprinting and Resist Processes. 3 Hours. U.
Fundamentals of resist and dye techniques on textiles: batik, tie-dye, discharge, and direct application. Prerequisite: ART 101, and ART 130 or ART 133. LAB.

TD 316. Screenprinting Textiles. 3 Hours.
Design problems in textile printing with emphasis on screenprinting and photo techniques. Prerequisite: ART 101, and ART 130 or ART 133. LAB.

TD 401. Weave Structures. 3 Hours. U.
Continuation of TD 314. Research and analysis of multiple-harness weave structures. Weave drafts. Design problems to develop the use of color, form, and surface in simple and compound weaves. Prerequisite: TD 314. LAB.

TD 402. Techniques in Weaving. 3 Hours. U.
Development of individual art and design concepts in relation to woven structures and/or forms. Emphasis on weaver-controlled techniques used to create images and composition. Prerequisite: TD 314. LAB.

TD 403. Intermediate Textile Printing. 3 Hours.
Individual problems in textile printing and dyeing processes. Prerequisite: TD 316. LAB.

TD 404. Surface Design. 3 Hours.
Textile pattern design for art and/or industry. Prerequisite: Twelve hours in Visual Art or Design, or permission of the instructor. LAB.

TD 414. Experimental Concepts in Weaving. 3 Hours.
Experimentation with resist dyeing, painted warps and/or "Fiber Forms" techniques in woven structures. Individual research and development of thematic concepts. Prerequisite: TD 313, and TD 301 or TD 302. LAB.

TD 500. Advanced Special Topics in Textiles/Fibers: ____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit.
Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Textiles/Fibers courses, or permission of instructor. LEC.

**TD 503. Advanced Surface Design/Screenprinting. 1-6 Hours. U.**
Directed study of advanced surface design and screenprinting methods. May be repeated for credit. Prerequisite: TD 403. IND.

**TD 504. History of Textiles, Lecture. 3 Hours.**
Study of historical textiles, their design development, and the techniques employed. Prerequisite: Junior standing in department or permission of instructor. LEC.

**TD 506. Advanced Fiber Forms. 1-6 Hours. U.**
Directed study of three-dimensional and off-loom methods and techniques. May be repeated for credit. Prerequisite: TD 401 and TD 402. IND.

**TD 514. Advanced Techniques in Weaving. 1-6 Hours. U.**
Directed study of advanced loom-controlled and weaver-controlled methods. May be repeated for credit. Prerequisite: TD 401 and TD 402. IND.

**TD 515. Advanced Textiles/Fibers I. 3-6 Hours. AE61.**
Development of individual direction in textiles based on experience, research, and skills acquired in preceding courses; capstone experience. Prerequisite: Twenty-four credits in Textiles/Fibers and consent of instructor. LAB.

**TD 520. Advanced Textiles/Fibers II. 3-6 Hours. AE61.**
Continuation of TD 515, capstone experience. Prerequisite: TD 515. LAB.

**TD 590. Internship in Textiles/Fibers. 1-3 Hours. U.**
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded on a satisfactory/unsatisfactory basis, according to the written recommendation provided by the internship supervisor to the faculty advisor. Prerequisite: ART 102, ART 103, and ART 104; and fifteen hours of Visual Art courses, FLD.

**TD 599. Individual Studies in Textiles/Fibers. 1-6 Hours. AE61 / U.**
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours can apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Textiles/Fibers courses, or permission of instructor. IND.

**TD 715. Textile Design in Weaving, Printing, and Dyeing. 2-6 Hours. U.**
Individual research. Prerequisite: TD 520 or TD 525 or equivalent. RSH.

**TD 750. Graduate Seminar. 0.5 Hours.**
Discussion of issues and/or work in textiles. Graded on satisfactory/unsatisfactory basis. LEC.

**TD 815. Textile Design in Weaving, Printing, and Dyeing. 2-6 Hours.**
Continuation of TD 715. RSH.

**VAE 100. Introduction to the Profession of Art Education. 3 Hours.**
This course is designed to acquaint students with the profession of art education by helping to increase an awareness of the role and characteristics of an effective art teacher. Large and small group activities and assignments are dispersed throughout the semester to facilitate these outcomes. Students are involved in observation of and participation with art teachers and pupils in the public school classrooms, which complement course activities and assignments. VAE 100 is a professional course. LEC.

**VAE 130. Art and Design in Daily Life. 3 Hours. U.**
The course aims to develop students’ appreciation of designed objects in contemporary life whether they are historical icons or everyday items in the immediate environment. The instructional materials and activities assist students in acquiring the knowledge and skills for critically analyzing, discussing, and evaluating objects. Course content is interdisciplinary with a focus on design history. The class is open to all students and is relevant to those who have taken classes in art, design, architecture, and art history. Not open to students with credit in VAE 530. LEC.

**VAE 177. First Year Seminar: _____, 3 Hours. GE11 / U.**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Visual Art Education. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

**VAE 300. Special Topics in Visual Art Education: _____, 1-4 Hours. U.**
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor. LEC.

**VAE 320. Instruction and Curriculum I. 3 Hours.**
This methods course provides an overview of the professional practices of K-12 art educators. Course content deals with the art education program, K-12, in relationship to the rest of the curriculum. This encompasses goals, objective sequence, courses offered at various levels, finance, staffing and administration. Prerequisite: Junior standing or consent of the instructor. LEC.

**VAE 325. Education in Multicultural Society. 2 Hours.**
The course is designed to provide the student with an awareness of and sensitivity to the concept of multicultural education. Topics related to the rationale for and processes of providing a multicultural perspective within the schools will be addressed. Field experiences will be structured to provide students with opportunities to observe the diversity within our society. LEC.

**VAE 330. Fundamentals of Art. 3 Hours.**
An introduction to art designed for the general university student. Designed to facilitate understanding and viewing works of art. Basic information including elements and principles of art, materials and techniques used by artists, and the function of art in society. LEC.

**VAE 341. Instructional Strategies in Art for Elementary Classroom Teachers. 2 Hours.**
Child growth and development in art. Materials as they relate to a sequential art education curriculum in the elementary school. Prerequisite: Admission to the School of Education or the education division of the graduate school. LEC.

**VAE 395. Community Collaborations in Art Education. 3 Hours. U.**
A focused examination of existing community organizations, models, and resources alongside collaborative strategies for working with these entities to achieve common goals for art education. Students in this class will learn of collaborative community models, explore entrepreneurial and other educational initiatives that contribute to the general purpose of art education, and recognize the role of families and other community members in contributing to the arts. LEC.

**VAE 410. Instruction and Curriculum II. 3 Hours.**
This methods course provides an overview of the professional practices of K-12 art educators. Course content deals with the art education program, K-12, in relationship to the rest of the curriculum. This encompasses goals, objective sequence, courses offered at various levels, finance,
staffing and administration. Prerequisite: Junior standing or consent of the instructor. LEC.

**VAE 420. Artistic Media and Processes in Art Education. 3 Hours.**
Building on course content in VAE 320, this course concentrates on instructional strategies and presentation models in art education. Students examine and explore the media appropriate to teaching art in various settings and levels as well as how art program budgets are derived and impact overall curriculum development. Prerequisite: VAE 320 or permission of instructor. LEC.

**VAE 497. Independent Study. 1-3 Hours.**
Only one enrollment permitted each semester; a maximum of four hours will apply toward the bachelor's degree. Prerequisite: Recommendation of advisor and consent of instructor. IND.

**VAE 500. Student Teaching. 6 Hours. AE61.**
A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Admission to the student teaching program. FLD.

**VAE 520. Instructional Technology in Art Education. 3 Hours.**
This course addresses technology that is pertinent to professional art educators. Students use technology to develop a professional portfolio and technology-related resources for teaching art in PreK-12 schools and community settings. LEC.

**VAE 530. Art and Design in Daily Life. 3 Hours.**
The course aims to develop students' appreciation of designed objects in contemporary life whether they are historical icons or everyday items in the immediate environment. The instructional materials and activities will assist students in acquiring the knowledge and skills for critically analyzing, discussing, and evaluating objects. Course content is interdisciplinary with a focus on design history. The class is open to all students and is relevant to those who have taken classes in art, design, architecture, and art history. Not open to students with credit in VAE 130. LEC.

**VAE 596. Practicum in Teaching Art. 2 Hours.**
A supervised art teaching practicum in which students will learn to employ different teaching strategies with children pre-school through high school in the school or museum setting. Prerequisite: VAE 320, VAE 410, VAE 795 or consent of instructor. LEC.

**VAE 598. Special Course: _____. 1-5 Hours.**
A special course of study to meet current needs of education students; primarily for undergraduates. LEC.

**VAE 599. Community Based Project in Art Education. 1-6 Hours. AE61 / U.**
Individual activity and project that serves as an alternate capstone experience to VAE 500 (Student Teaching). Will involve the development of an independent, community-based arts education project developed by the student under the supervision of a VAE faculty member. Prerequisite: Forty credits of Visual Art, fifteen credits of Visual Art Education Courses, and permission of the instructor. IND.

**VAE 600. Evaluation and Measurement in Art Education. 3 Hours.**
An introduction to the concepts and skills for the development and implementation of evaluation procedures for art education. Topics will include the development of student evaluation, the relationship between instructional objectives and evaluation, various evaluation techniques for art education, grading, and providing grades and feedback to students, parents, and schools. Prerequisite: VAE 320 and VAE 410. LEC.

**VAE 680. Internship in Teaching Art. 5-16 Hours.**
A supervised internship experience leading to initial art teacher certification. The student assumes the total professional role as a teacher of art in an approved school setting. LEC.

**VAE 698. Education of Women in the Arts. 2-3 Hours.**
This course will examine the education of women in the arts at all levels of schooling (preschool, primary, secondary, and university) and in nonformal settings (art clubs, women's leagues, tutoring, etc.). The intent is to further a historical and contemporary based understanding of gender characteristics and discrimination as they affect the education of women in the arts. Students enrolled in three hours credit will be required to write a case study on the education of a woman artist. LEC.

**VAE 710. Assessment in Art Education. 3 Hours.**
The course is designed to introduce students to evaluation procedures in art education as they apply to public school teaching K-12. The material will incorporate methods of evaluating student learning in art, the effectiveness of instruction, the designing of instruments, grading procedures including the provision of feedback to students, parents, and schools. Concepts and skills for both formative and summative evaluation will be related to the development of objectives, instruction, and curriculum development as a whole. LEC.

**VAE 716. Teaching Art: _____. 1-4 Hours.**
Instructional techniques, methodology, materials, and evaluation. Processes for the specific art area named. May be repeated for credit in different media. LEC.

**VAE 750. Introduction to Art Museum Education. 1-4 Hours.**
This course provides a general overview to the museum education field. Course readings include current ideas and issues on learning, art education, criticism, the museum in education, and museum education practices. LEC.

**VAE 774. Art for Exceptional Children. 2 Hours.**
A study of the psychology, philosophy, content, and media in art expression and its relationship to mental and creative growth with exceptional children. Prerequisite: SPED 741, which may be taken concurrently. LEC.

**VAE 780. Internship in Teaching Art. 9 Hours.**
A supervised internship experience leading to initial art teacher certification. The student assumes the total professional role as a teacher of art in an approved school setting. LEC.

**VAE 790. Applications of Technology in Art Education. 1-3 Hours.**
The course is designed to provide students with the skills necessary for using and assessing the impact of microcomputers, video recorders, and other technological developments in art education. Prerequisite: TL 601 or equivalent. LEC.

**VAE 798. Special Course: _____. 1-5 Hours.**
A special course of study to meet current needs of education professionals; primarily for graduate students. LEC.

**VAE 800. Visual Art Education Curriculum Development. 1-3 Hours.**
A study of research, resources, and media as they relate to learning goals in a sequential art curriculum for use by teachers. The amount of credit reflects the extent of the curriculum being developed and the amount of work involved in the development process. LEC.

**VAE 825. Seminar in: _____. 1-4 Hours.**
LEC.

**VAE 830. Seminar in: _____. 1-4 Hours.**
LEC.
VAE 842. Teaching Art Criticism. 3 Hours.
An examination of the four phases of art criticism (description, analysis, interpretation and judgment) will be followed by practice in using these phases in the development of effective art curriculum for all developmental levels. Prerequisite: PRE 702 and PRE 704 or equivalents. LEC.

VAE 850. Aesthetics, the Arts and Education. 3 Hours.
Theoretical introduction to the problems involved in teaching critical appreciation of the arts; examination of materials from aesthetics, art history, and criticism. LEC.

VAE 869. History of Art Education. 3 Hours.
A study of the historical development of art education. Prerequisite: Nine hours of education. LEC.

VAE 875. Research in Art Education. 3 Hours.
This course examines the issues and procedures commonly used to conduct research in art education in preparation for students’ graduate theses or projects. Research methods are adapted and applied to students’ professional needs and interests in the form of a research proposal. LEC.

VAE 890. Preparation for the M.A. Examination. 1 Hour.
An independent reading course in preparation for the M.A. Examination. The grade will be an S or U, as determined by the performance on the examination. The examination will be evaluated separately. Prerequisite: Permission of the instructor. LEC.

VAE 895. Field Experience in: ____. 1-6 Hours.
Supervised and directed experiences in selected professional settings and cooperating agencies. Prerequisite: Permission of instructor. FLD.

VAE 897. Independent Study. 1-4 Hours.
Prerequisite: Consent of advisor and instructor. RSH.

VAE 898. Master’s Project. 1-4 Hours.
RSH.

VAE 899. Master’s Thesis. 1-6 Hours.
THE.

VAE 900. Supervision and Evaluation of Visual Arts Programs. 3 Hours.
A study of the administration of school, museum, and community arts education programs. Topics will include curriculum development, personnel supervision, finance, and the quantitative and qualitative evaluation of arts programs. Prerequisite: TL 703 or equivalent. LEC.

VAE 929. Research in Art Education. 3 Hours.
An examination of research methodology in visual arts education. Emphasis will be on philosophical, historical, qualitative, and quantitative research development. LEC.

VAE 949. Artistic Learning and Development. 3 Hours.
Research from psychology, sociology, and anthropology will be examined for its implications for the artistic development of the child. Topics include cross-cultural and age comparisons of children’s graphic symbol development, aesthetic judgments, and perceptual skills. Prerequisite: PRE 702 and PRE 704 or equivalents. LEC.

VAE 995. Field Experience in: ____. 1-5 Hours.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. LEC.

VAE 996. College Teaching Experience in: ____. 2 Hours.
To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate’s committee. RSH.

VAE 997. Individual Study. 1-4 Hours.
Prerequisite: Prior graduate course work in the area of study and consent of instructor. RSH.

VAE 998. Seminar in: ____. 1-4 Hours.
LEC.

VAE 999. Doctoral Dissertation. 1-15 Hours.
THE.

Department of Dance

Dance Undergraduate Programs

The Department of Dance offers the Bachelor of Arts in Dance and the Bachelor of Fine Arts in Dance degrees. A minor in dance is available to students in all majors.

Courses

DANC 101. Ballet I. 1.5 Hour.
Classical and modern approaches to the language of ballet for beginners. May be repeated for credit. Does not count toward the dance major requirements. ACT.

DANC 102. Ballet II. 1.5 Hour.
Classical and modern approaches to the language of ballet for experienced beginners. May be repeated for credit. Does not count toward the dance major requirements. Prerequisite: DANC 101 or consent of instructor. ACT.

DANC 103. Modern I. 1.5 Hour.
Dance technique for beginners with precedents in the movement vocabularies of Isadora Duncan, Martha Graham, Doris Humphrey, Merce Cunningham, and the seminal choreographers of modern dance. May be repeated for credit. Does not count toward the dance major requirements. ACT.

DANC 104. Modern II. 1.5 Hour.
Dance technique for experienced beginners with precedents in the movement vocabularies of Isadora Duncan, Martha Graham, Doris Humphrey, Merce Cunningham, and the seminal choreographers of modern dance. May be repeated for credit. Does not count toward the dance major requirements. ACT.

DANC 105. Jazz I. 1.5 Hour.
Dance technique for beginners based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for credit. Does not count toward the dance major requirements. ACT.

DANC 106. Jazz II. 1.5 Hour.
Dance technique for experienced beginners based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for credit. Does not count toward the dance major requirements. Prerequisite: DANC 105 or consent of instructor. ACT.
DANC 108. Pas de Deux. 1 Hour.
The elements of classical ballet partnering (pas de deux) are explored. These elements include supported poses, turns, lifts, and their coordination between the partners. For men only. Women enroll in Pointe and Pas de Deux, DANC 307. May be repeated for credit. ACT.

DANC 109. Men's Ballet. 2 Hours.
An introduction to classical ballet focusing on the particular requirements of the male ballet technique including leaps, turns, batterie, and their presentation. May be repeated for credit. ACT.

DANC 125. Movement Efficiency for Athletes. 3 Hours.
A course designed to improve athletic performance potential by improving initiation and follow-through of movement; improving coordination, timing, and ease of action; and reducing the risk of injury through better technique. Students will learn how to apply the basic principles of Rudolf Laban and Irmgard Bartenieff to the specialized movement skills of various sports. Students will also learn to develop individualized warm-ups and drills to improve performance. Prerequisite: Participation in team sports, dance, martial arts, other skilled sport movement, or consent of instructor. ACT.

DANC 150. Dance Improvisation. 2 Hours.
Developing skills in perception and the rapid translation of ideas into dance. Central to the course will be exposure to a variety of stimuli from music and the visual arts, to nature and people on the streets. Prerequisite: DANC 104 or consent of instructor. ACT.

DANC 177. First Year Seminar: ____, 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Dance. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

DANC 201. Ballet III. 1-2 Hours.
Classical and modern approaches to the language of ballet for intermediate dancers. May be repeated for variable credit. Prerequisite: DANC 102 or consent of instructor. LAB.

DANC 203. Modern III. 1-2 Hours.
Dance technique for intermediate dancers with precedents in the movement vocabularies of Isadora Duncan, Martha Graham, Doris Humphrey, Merce Cunningham, and the seminal choreographers of modern dance. May be repeated for variable credit. Prerequisite: DANC 104 or consent of instructor. LAB.

DANC 205. Jazz III. 1-2 Hours.
Dance technique for intermediate dancers based on elements of Latino, African, popular and classical jazz dance forms. May be repeated for variable credit. Prerequisite: DANC 105 or consent of instructor. LAB.

DANC 210. Rhythms and Structures of Music. 1 Hour.
An introduction to the analysis and use of rhythms and the compositional forms of music for dance. LEC.

DANC 220. Dance Performance. 1 Hour.
A dance repertoire and performance class with emphasis on developing skills for performing ballet, modern, jazz, historic, and/or forms of theatrical dance. May be repeated for credit. Prerequisite: 200- or 300-level dance technique course. ACT.

DANC 230. Introduction to African Dance Theatre. 2 Hours. NW.
An introduction to the general techniques of non-verbal theatrical conventions in African cultures. Practical training in movement vocabulary will be supplemented by lectures on the "text" of performance. (Same as AAAS 334 and THR 226.) LEC.

DANC 240. Introduction to Classical East Indian Dance. 3 Hours.
Classical East Indian dance has an extensive movement vocabulary that emphasizes the coordination of rhythmic foot patterns with intricate hand gestures. Students will learn the mudras (hand gestures) and their significance and integration within each dance. Readings will include excerpts from the Natya Sastra and other treatises of East Indian dance and culture. LEC.

DANC 250. Choreography: Structured Solos. 2 Hours.
Movement studies for solo figure based on exploration of the fundamental ingredients of dance (space, time, weight, and energy flow) and how to organize them into short compositional forms such as ABA, verse/refrain, or narrative. Prerequisite: DANC 150 and DANC 203 or consent of instructor. LEC.

DANC 260. Musical Theatre Dance. 2 Hours.
This course focuses on the dance and movement vocabulary uniquely associated with musical theatre productions, as well as a variety of popular dance styles from the 1920s to the present. Performance techniques for the stage are emphasized. ACT.

DANC 301. Ballet IV. 1-3 Hours.
Classical and modern approaches to the language of ballet for advanced dancers. May be repeated for variable credit. Prerequisite: DANC 202 or consent of instructor. LAB.

DANC 303. Modern IV. 1-3 Hours.
Dance technique for advanced dancers with precedents in the movement vocabularies of Isadora Duncan, Martha Graham, Doris Humphrey, Merce Cunningham, and the seminal choreographers of modern dance. May be repeated for variable credit. Prerequisite: DANC 203 or consent of instructor. LAB.

DANC 305. Jazz IV. 3 Hours.
Dance technique for advanced dancers based on elements of Latino, African, and classical jazz dance forms. May be repeated for credit. Prerequisite: DANC 205 or consent of instructor. LAB.

DANC 307. Pointe and Pas de Deux. 2 Hours.
An introduction to pointe and classical partnering work for the intermediate/advanced female ballet dancer, with equal emphasis on pointe technique and style, and on classical repertory for couples. May be repeated for credit. Prerequisite: DANC 201 or consent of instructor. LAB.

DANC 308. Pas de Deux. 1 Hour.
The exploration of classical ballet partnering (pas de deux) including supported poses, lifts, turns, and their coordination between the partners. For men only. Women enroll in Pointe and Pas de Deux, DANC 307. May be repeated for credit. Prerequisite: DANC 108, DANC 201, or permission of instructor. LAB.

DANC 309. Men’s Ballet. 2 Hours.
A continuation of the study of male classical ballet technique including leaps, turns, batterie, and their presentation. May be repeated for credit. Prerequisite: DANC 109, DANC 201, or permission of instructor. LAB.

DANC 310. Music for Dance. 3 Hours.
An examination of music as accompaniment for dance in both classroom and performance settings. Students will listen and analyze music from various historic periods to develop the skills necessary to select music appropriate for choreography. They will learn techniques for working with accompanists and composers. Prerequisite: DANC 210 or consent of instructor. LEC.

DANC 320. University Dance Company. 0-1 Hours.
A dance repertoire, performance and production class. Emphasis is on the development of skills for performing and/or producing dance concerts. Admission by audition only. May be repeated for credit. IND.
DANC 325. Movement Efficiency for Athletes. 3 Hours.
A course designed to improve athletic performance potential by improving initiation and follow-through of movement; improving coordination, timing, and ease of action; and reducing the risk of injury through better technique. Students will learn how to apply the basic principles of Rudolf Laban and Irmgard Barteneff to the specialized movement skills of various sports. Students also will learn to develop individualized warm-ups and drills to improve performance. Prerequisite: Participation in team sports, dance, martial arts, other skilled sport movement, or consent of instructor. ACT.

DANC 330. Approaches to World Dance. 3 Hours. HL AE42.
This course examines dance forms from throughout the world and how they relate to the times and cultures in which they evolved. Dance forms such as African, East Indian classical, European court dance, ballet, modern, and jazz will be studied through readings, master classes, live performances, videotapes, and films. Prerequisite: 200-level English course. LEC.

DANC 350. Choreography: Group Forms. 3 Hours.
In-depth development of movement themes for duet, trio, and larger groups. At least one concert length work with plans for presentation to an audience will be required. Prerequisite: DANC 250 or consent of instructor. LAB.

DANC 375. Ideokinesis. 3 Hours. H.
Basic concepts of neuromuscular and skeletal education through the use of specific imagery (ideokinesis). Based on the work of Mabel Todd, Lulu Sweigard, and Irmgard Barteneff, the emphasis is on body connectedness and dynamic alignment. The aim is to realize full movement potential in the most efficient way through intrinsic body awareness. Injury prevention is addressed by introducing principles of conditioning (strength, flexibility, endurance) and factors leading to injury such as muscular imbalances or postural deviations. LEC.

DANC 420. Introduction to Videography and Website Design for Dance. 3 Hours. H.
This is a hands-on course exploring digital video technology for dance. Students are introduced to video and website production as well as the time management skills necessary to engage the multi-faceted project that is dance video. We will cover video techniques for recording dance; video editing; collaborating with national and international sites and artists; and self-promotion and marketing strategies with video and websites. The final project will be the creation of a video website for each student. No previous video editing experience is required. Prerequisite: Basic computer literacy. LEC.

DANC 430. Dance for Children. 3 Hours.
Methods and materials for teaching creative dance and the fundamentals of dance technique to children. Lessons are prepared and tested in the classroom and then presented to elementary school children. Prerequisite: DANC 203 or consent of instructor. LEC.

DANC 440. Introduction to Classical East Indian Dance. 3 Hours. NW AE42.
Classical East Indian dance has an extensive movement vocabulary that emphasizes the coordination of rhythmic foot patterns with intricate hand gestures. Students will learn the mudras (hand gestures) and their significance and integration within each dance. Readings will include excerpts from the Natya Sastra and other treatises of East Indian dance and culture. LEC.

DANC 450. Environmental Choreography. 3 Hours.
Designing dances for non-traditional performing spaces both indoors and outdoors. Students analyze how different natural and built environments can affect the gesture, space, time, and overall structure of a dance composition as well as the relationship between performers and spectators. Prerequisite: DANC 350 or consent of instructor. LAB.

DANC 460. Dance History: Research and Reconstruction. 3 Hours. HL AE42 / H.
Through research and reconstruction, students will examine major topics in dance history, such as the meaning and function of dance in pre-industrial societies, communal and court dance in Europe from the 14th to the 19th centuries, and the transformation and development of dance as a theatre art in the modern world. Texts by dance historians and treatises by dancing masters will be supplemented by readings from fields, such as anthropology, philosophy, art history, and literature, that indicate the different ways of approaching the history of dance. LEC.

DANC 470. Renaissance and Baroque Dance. 3 Hours.
Students will analyze, interpret, reconstruct, and perform historic dance forms, such as the galliard and minuet, by working with treatises of Renaissance and Baroque dancing masters, scholarly studies, and other documentary materials. The dance forms will be studied in relation to the music, visual arts, and literature of the period. LEC.

DANC 475. Performing Arts Administration Dancers. 3 Hours.
Designed to provide an overview of key areas in performing arts administration, including professional speaking and writing, grant writing and development, publicity and marketing strategies, developing relationships with presenters and funders, and audience education. Through readings, class discussion, guest lectures with professionals from the field, and projects based on real-life scenarios, students will develop tools to further their careers as choreographers and performers. This focused study also provides individuals with the direction and means to employ their training in the field of performing arts administration and management at many different levels. This course prepares dance students for their entry into the professional arts marketplace. LEC.

DANC 480. Movement for Older Adults. 3 Hours.
This course is designed to increase knowledge and understanding of the movement problems experienced by older adults and to develop the student’s ability to create movement interventions to address these concerns. Prerequisite: Open to juniors and seniors only. LEC.

DANC 490. Introduction to Flamenco Dance Technique. 3 Hours. AE42/GE3H.
Using the basic compás (rhythmic structures) of Flamenco, we will explore the different components of flamenco dance technique: flocero (spiral fingers), brazaño (arm movements), palmas (rhythmic hand-clapping), maraje (marking, or movement through space), vueltas (turns) and zapateado (footwork). We will cultivate an awareness of flamenco’s unique posture, learn the structure of the different rhythmic forms and introduce the possibilities for personal expression and improvisation. LEC.

DANC 498. Directed Study in :_____. 1-3 Hours.
Investigation of a special topic or project in aesthetics, dance history, movement analysis, production, or a creative project. A maximum of six hours may be counted toward graduation. Prerequisite: At least seven hours of credit in dance courses. IND.

DANC 530. Practicum in :_____. 1 Hour.
Supervised experience in teaching beginning level dance technique in the style of ballet, jazz, or modern dance. Different approaches are analyzed, discussed, and tested in the studio. Prerequisite: Intermediate level of dance technique in the style of the practicum. FLD.

DANC 540. Field Experience in Dance Teaching. 1-3 Hours.
Teaching ballet, modern, or jazz dance technique to children or adults with faculty supervision in an academic or community program. Prerequisite: DANC 530 and consent of instructor. FLD.
DANC 550. Senior Project. 3 Hours. AE61.
In-depth research project in dance theory or history, or choreography project involving the complete development and presentation of a dance idea. Prerequisite: Performance option: DANC 320, DANC 350, DANC 450, THF 220 or THF 224, and permission of the dance division. Research option: DANC 340, DANC 370, DANC 375, DANC 460, and permission of the dance division. IND.

DANC 580. Special Topics in Dance. 1-3 Hours.
A study of current developments in dance with an emphasis on performance or research. May be repeated for credit. Prerequisite: Junior or senior standing and consent of instructor. IND.

DANC 598. Seminar in Dance. 3 Hours.
Special studies in dance. May be repeated for credit. Prerequisite: Junior or senior standing and consent of instructor. LEC.

DANC 735. Analysis, Criticism, and Choreography. 3 Hours.
The choreographic approaches of outstanding dance masters of the past (for example, Marius Petipa and Isadora Duncan) and present (for example, Martha Graham and Merce Cunningham) will be analyzed in terms of their handling of gesture, time, space, structure, and meaning. Students will be expected to seek out and study readings, photographs, and films in order to do written and performance projects based on the choreographic principles of old and new masters in ballet and modern dance. Prerequisite: A course in dance choreography or consent of instructor. LEC.

DANC 740. Introduction to Laban Movement. 3 Hours.
This course will introduce both the theoretical and physical applications of Laban Movement Analysis: Effort/Shape Notation (a notation system recording changes in movement qualities with respect to time, weight, space, and energy flow); Space harmony (a system that describes human movement in relation to space); Bartenieff Movement Fundamentals (a series of basic exercises to integrate and facilitate the neuromuscular connections within the body); and Laban Movement Analysis to the fields of anthropology, dance, human development, industrial efficiency, the performing arts, physical education, physical therapy, and psychology will be introduced. LAB.

DANC 742. Laban Movement Observation, Analysis, and Notation. 3 Hours.
Two systems of symbolic movement notation will be used in this course: Rudolf Laban's Effort/Shape Writing and his system of Labanotation. Several applications of Laban's notational systems will be studied as they appear in cross-cultural, developmental, psychological, and sociological research. Emphasis will be placed on refining the student's ability to perceive, describe, and notate human movement of all kinds from everyday gestures to highly trained movement skills. Prerequisite: DANC 740 or consent of instructor. LAB.

DANC 780. Movement for Older Adults. 3 Hours.
This course is designed to increase knowledge and understanding of the movement problems experienced by older adults and to develop the student's ability to create movement interventions to address these concerns. Prerequisite: Open to graduate students in any field of study. LEC.

DANC 898. Directed Study in: _____. 1-3 Hours.
Directed study in some aspect of aesthetics, dance history, movement analysis, production, or an advanced creative project. Prerequisite: Consent of instructor. IND.

Bachelor of Fine Arts in Dance

Dance Undergraduate Programs

The Department of Dance offers the Bachelor of Arts in Dance and the Bachelor of Fine Arts in Dance degrees. A minor in dance is available to students in all majors.

Bachelor of Fine Arts in Dance Degree Requirements

The B.F.A. requires an audition for entry; however, students enrolled in the B.A. program may audition at the end of each academic year. In order to be considered for a scholarship or entry directly into the B.F.A. program, incoming students MUST audition in person or online via Acceptd (https://app.getacceptd.com/kudance).

The curriculum leading to the B.F.A. focuses on technique, choreography, and performance. It prepares students for professional careers or further academic study in dance. Entrance into the B.F.A. program is provisional during the first year. After evaluation of the year's work and approval by the faculty, a student is fully accepted into the B.F.A. program.

B.F.A. majors receive integrated training in ballet, modern, and jazz dance technique. They also take courses in choreography, dance theory, history, dance science, and pedagogy. Other B.F.A. courses include flamenco, performing arts administration, classical East Indian dance, conditioning and injury prevention for dancers, and musical theatre dance. Students must complete a senior project in performance and/or choreography. B.F.A. majors have a variety of performance opportunities as members of the University Dance Company (http://www.ku.edu/students/orgs/University_10366.html). A total of 120 credit hours is required.

General Education Requirements (0)

In addition to degree and major requirements, all students must complete the KU Core.

Majors must complete 33 hours of courses in the following areas.

Dance Technique (33) 33

Majors must complete 33 hours of courses in the following areas. Majors must have at least 6 hours of technique at the 300 level in ballet and modern and 3 hours at the 300 level in jazz.

<table>

**Bachelor of Arts in Dance**

**Bachelor of Arts in Dance Degree Requirements**

The B.A. in Dance at the University of Kansas does not require an audition. Instead, all students must pass a technical and academic evaluation at the end of their sophomore year. However, to be considered for a scholarship, a prospective or transfer student must audition. The B.A. in dance offers comprehensive technical training, built on a solid liberal arts foundation, which allows students to double-major or to pursue graduate study in any number of fields.

The curriculum leading to the B.A. in dance offers integrated training in ballet, modern, and jazz dance techniques, as well as courses in dance improvisation and composition, history and philosophy of dance, Laban Movement Analysis, dance science, music for dance, creative dance for children, dance production, and independent study options. An audition is required for admission to the B.A. program in dance. The program prepares students for professional careers in dance or for further academic study. The senior project may involve research in any of the above areas or choreography and performance culminating in a senior recital. Students are expected to take technique classes appropriate to their level of training each semester they are enrolled. A total of 120 credit hours is required.

**Bachelor of Arts in Dance Course Requirements**

**General Education Requirements (0)**

Completion of the KU Core (See KU Core)

Completion of the College BA degree specific requirements (see College BA requirements)

**Dance Technique (16)**

Students may choose 16 hours from among the following, but must take at least the following: One semester of level III in jazz. Two semesters of level III in ballet and two semesters of level III in modern. Courses may be taken twice for full credit and may be taken for variable credit thereafter.

- DANC 102: Ballet II
- DANC 104: Modern II
- DANC 106: Jazz II
- DANC 201: Ballet III
- DANC 203: Modern III
- DANC 205: Jazz III
- DANC 301: Ballet IV
- DANC 303: Modern IV (Jazz IV, Satisfied by the following:)
- DANC 305: Jazz IV

**Dance Performance (2)**

University Dance Company. Satisfied by 2 hours of the following:

- DANC 320: University Dance Company

**Dance Composition (10)**

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 81 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 47 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Graduation Plan**

With careful planning and commitment to a full-time course load, you can graduate in 4 years. For details please consult the department.
Majors must complete courses as specified in each of the following areas.

- **DANC 150** DANCE Improvisation  
- **DANC 250** Choreography: Structured Solos  
- **DANC 350** Choreography: Group Forms  
- **DANC 450** Environmental Choreography

**Pedagogy (4)**

- **DANC 430** Dance for Children 3
- **DANC 530** Practicum in: _____ 1

**Dance Studies (16)**

Majors must complete courses as specified in each of the following areas.

- **DANC 330** Approaches to World Dance 3
- **DANC 375** Ideokinesis 3

Students must select 10 hours from the following:

- **DANC 210** Rhythms and Structures of Music
- **DANC 230** Introduction to African Dance Theatre
- **DANC 260** Musical Theatre Dance
- **DANC 420** Introduction to Videography and Website Design for Dance
- **DANC 440** Introduction to Classical East Indian Dance
- **DANC 460** Dance History: Research and Reconstruction
- **DANC 475** Performing Arts Administration Dancers
- **DANC 490** Introduction to Flamenco Dance Technique

**Senior Project (3)**

Satisfied by completion of 3 hours of the following:

- **DANC 550** Senior Project 3

**Minor in Dance**

**Dance Undergraduate Programs**

The Department of Dance offers the Bachelor of Arts in Dance and the Bachelor of Fine Arts in Dance degrees. A minor in dance is available to students in all majors.

**Requirements for the Minor in Dance**

**Open to all KU students**

**Dance Minor Course Requirements**

Students selecting this minor must complete the following requirements:

- **Dance Technique (8)**
  Satisfied by 8 hours from the following: 8
  - **DANC 102** Ballet II
  - **DANC 104** Modern II
  - **DANC 106** Jazz II
  - **DANC 201** Ballet III
  - **DANC 203** Modern III
  - **DANC 205** Jazz III
  - **DANC 260** Musical Theatre Dance
  - **DANC 301** Ballet IV
  - **DANC 303** Modern IV
  - **DANC 305** Jazz IV

- **Dance Minor Required Electives (12)**
  Satisfied by 12 hours from the following: 12
  - **DANC 150** Dance Improvisation
  - **DANC 210** Rhythms and Structures of Music
  - **DANC 230** Introduction to African Dance Theatre
  - **DANC 250** Choreography: Structured Solos
  - **DANC 330** Approaches to World Dance
  - **DANC 375** Ideokinesis
  - **DANC 420** Introduction to Videography and Website Design for Dance
  - **DANC 440** Introduction to Classical East Indian Dance
  - **DANC 460** Dance History: Research and Reconstruction
  - **DANC 475** Performing Arts Administration Dancers
  - **DANC 490** Introduction to Flamenco Dance Technique

**Minor Hours & Minor GPA**

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

- **Minor Hours**
  Satisfied by 20 hours of minor courses.

- **Minor Hours in Residence**
  Satisfied by a minimum of 9 junior/senior hours of KU resident credit in the minor.

**Graduation Plan**

With careful planning and commitment to a full-time course load, you can graduate in 4 years. Please contact the department for details.
Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Department of Film and Media Studies

Why study film and media?
The Department of Film and Media Studies unites the inquiry of the academic with the practice and technique of the artist. Scholars and filmmakers work and study together in an environment of mutual encouragement and collegiality.

Undergraduate Programs
The department offers Bachelor of Arts and Bachelor of General Studies degrees, as well as a minor in film and media studies.

Courses for Nonmajors
The department offers many courses open to nonmajors who wish to learn more about film and media, including but not limited to:

<table>
<thead>
<tr>

</tbody>
</table>

These 5 courses also fulfill a College principal course requirement.

Graduate Programs
The department offers graduate programs culminating in a Master of Arts degree in Film and Media Studies and/or a Doctor of Philosophy degree in Film and Media Studies.

Courses
FMS 100. Introduction to the Film Medium. 3 Hours. HL / H.
Study of film as a visual art. Focus on communicative transaction between film viewer and film maker. Learning to read basic signs, syntaxes, and structures of cinematic language. Direct analysis of selected films. LEC.

FMS 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Film and Media Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

FMS 200. Film and Media Aesthetics. 3 Hours. HL GE3H / H.
An introduction to film and media aesthetics, including basic film/media theories and their practical applications. Students will be introduced to the concepts of time, space, composition, movement, editing, light, color, and sound. A key feature of the course will be a practical emphasis on learning how to see creatively by applying elements of design, camera lens and sound recording principles. Examples of these aspects of film and associated media will be examined and discussed in depth. Should be taken before or concurrently with FMS 275 or FMS 276. LEC.

FMS 204. Study Abroad Topics in: _____. 1-6 Hours. H.
This course is designed for the study of special topics in Film at the freshman/sophomore level. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

FMS 273. Basic Screenwriting. 3 Hours. H.
An introduction to the craft and principles of screenwriting, from inspiration to writing a complete first act. Emphasis on factors relevant to the creation of a treatment and a screenplay. Prerequisite: Consent of instructor. LEC.

FMS 275. Basic Video Production. 3 Hours. H.
Theory and practice of video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation and audio. Lecture-laboratory. Prerequisite: FMS 100, completion of or concurrent enrollment in FMS 200, and consent of instructor. LEC.

FMS 276. Basic Film Production. 3 Hours. H.
An introduction to 16mm film techniques and structures, requiring construction of brief, individually produced fictive-narrative films employing classical continuity. Lecture-laboratory. Prerequisite: FMS 100 and consent of instructor. LEC.

FMS 302. Undergraduate Studies Seminar in: _____. 1-3 Hours. H.
Course organized any given semester to examine a particular studies topic or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. LEC.

FMS 303. Undergraduate Production Seminar in: _____. 1-3 Hours. H.
Course organized any given semester to study a particular production topic or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. LEC.

FMS 304. Study Abroad Topics in: _____. 1-6 Hours. H.
This course is designed for the study of special topics in Film at the junior/senior level. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

FMS 307. Undergraduate Film/Media Internship. 1-6 Hours. H.
Supervised study with an approved film/media company or project. May be repeated for credit. No more than six hours may be applied to the B.A. or B.G.S. degrees. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor and at least seven hours credit in the department. FLD.

FMS 310. History of the Silent Film. 3 Hours. H.
A survey of the artistic, economic and sociological development of the narrative cinema with emphasis on the American studio system, German Expressionism, and Soviet Expressive Realism. Analysis of selected films. LEC.

FMS 311. History of the American Sound Film. 3 Hours. H.
A study of the artistic, economic, and sociological development of the American sound film with emphasis on the studio system, major directors, genres, and the impact of television. Analysis of selected films. LEC.

FMS 312. History of the International Sound Film to 1950. 3 Hours. H.
A survey of the artistic, economic, and sociological development of the international sound film 1929 to 1950. Emphasis on European National Cinemas. LEC.
FMS 313. History of the International Sound Film Post 1950. 3 Hours. H.
A survey of the artistic, economic, and sociological development of the international sound film from 1950 to the present. Emphasis on Free Cinema, New Wave, and other emerging post-war cinemas. LEC.

FMS 314. History of African-American Images in Film. 3 Hours. HL AE41 / H.
A history and critical assessment of the diverse images of African-Americans in American cinema and the impact of those images on American society. Screenings of feature and independent films, including those by African-Americans. LEC.

FMS 315. Survey of Japanese Film. 3 Hours. NW AE42 / H.
This course surveys the major developments in and critical approaches to twentieth-century Japanese film. Focusing mostly on narrative films, Survey of Japanese Film introduces students to basic methodological issues in Japanese film history, especially questions of narrative, genre, stardom, and authorship. We examine Japanese cinema as an institution located within specific contexts focusing on the ways in which this institution shapes gender, class, ethnic, and national identities. This course examines how patterns of distribution, exhibition, and reception have influenced film aesthetics and style over the last century. Through secondary readings, lectures, and discussions students critically examine how Japanese cinema as an institution both responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as EALC 315.) LEC.

FMS 316. Cinemas of the Southern Cone: Argentina, Chile, and Uruguay. 3 Hours. AE41 / H.
This course will examine the cinemas of three neighboring South American countries to find similar themes and some differences between them historically, politically, and culturally. Themes will include: gender and nation, political repression, and globalization and the cinema, youth culture in the Southern Cone, and representations of race and ethnicity in contemporary cinema. Other themes in common are financing issues, such as coproduction agreements, film production under the regional trade pact Mercosur and issues of circulation, distribution and marketing of national films. Most films will be feature length narrative, but a few documentaries will be shown. May be taken as FMS 716, but with additional requirements. LEC.

FMS 317. Race and the American Documentary. 3 Hours. H.
This course surveys a range of documentaries in which race is a key part. There are two class objectives: the first is to broaden the students’ knowledge of American social history and culture, especially around issues of identity, representation and race. The second is to heighten the students’ critical skills as viewers of films in general. A complete film or portion is screened at each class session, preceded by an introductory lecture, and a follow-up discussion. Readings from a variety of scholarly texts are excerpted for student review prior to a particular class. LEC.

FMS 318. Anti-war Film. 3 Hours. H.
An overview and exploration of the history of anti-war film and media themes to show how attitudes regarding war and political policy can be affected by positive and negative depictions of conflict. Course includes analysis of selected films. LEC.

FMS 320. Adaptation from Stage to Screen. 3 Hours. H.
In an increasingly global media economy, adaptation study offers an enterprising model for the cross-pollination of texts across historical, national, and cultural boundaries. Although this course focuses more specifically on adaptations and adaptation processes involving theatrical events and cinematic properties, this larger view should be kept in mind. The course will consist of readings, screenings, and presentations by faculty in the Department Film and Media Studies and the Department of Theatre addressing theoretical issues, case studies, and intertextual considerations, and an historical overview of theatre-film interaction. LEC.

FMS 345. New Media and Society. 3 Hours. H.
Students will be introduced to major themes and debates in digital media studies and apply critical approaches for understanding new media practices, technologies, and theories. In addition to readings and lectures, students will engage in a variety of digital activities and participate in production-oriented projects. By the end of this course students will gain a foundational understanding of historical and emerging relationships between new media (internet, cell phones, digital games, etc.) and society, acquire key digital skills, and experience a variety of new media texts and services. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. LEC.

FMS 373. Intermediate Screenwriting. 3 Hours. H.
Emphasis on writing a full-length screenplay. Explores genre, character, dialogue, and the development of a personal writing style. Prerequisite: FMS 273 and consent of instructor (students will be selected based on writing samples). LEC.

FMS 374. Animation. 3 Hours. H.
A survey that combines animation history, theory, and production by examining animated works of all kinds and exploring various styles utilizing both hands-on techniques and digital animation programs. Lecture-laboratory. LEC.

FMS 375. Intermediate Video Production. 3 Hours. H.
Theory and practice of longer-form video production with emphasis on scripting, talent coordination and editing in preproduction, production and postproduction. Lecture-laboratory. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 376. Cinematography. 3 Hours. H.
Theory and practice of cinematography, with emphasis on creation of film, video, and digital imagery. Prerequisite: FMS 275 or FMS 276, and consent of instructor. LEC.

FMS 377. Post-Production. 3 Hours. H.
Students become familiar with techniques and processes in film and video post-production including, but not limited to, editing, sound, post-production management, marketing, and distribution. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 380. American Popular Culture of: _____. 3 Hours. HL / H.
An interdisciplinary examination of popular cultural forms and their relationships with the social, political and economic dynamics of America, with emphasis on film, media, music, literature (including magazines and newspapers) and the graphic arts. The decade or other specific topic to be studied changes as needs and resources develop. May be repeated for credit for different decades or topics. LEC.

FMS 401. Undergraduate Professional Development Seminar. 1 Hour. H.
Provides an overview of opportunities for professional development in Film and Media Studies, and helps students plan goals for their education through an understanding of professional practices. The course also covers practical exercises in professional development, including writing resumes, finding internships and entry-level work, and other aspects of establishing a career in Film and Media Studies. Prerequisite: FMS 275 or equivalent. Open to FMS Majors only. Graded satisfactory/unsatisfactory. LEC.
FMS 407. Undergraduate Film/Media Service Learning Internship. 1-6 Hours. H.
Supervised study with an approved government agency, established non-profit organization, school, or community-based partner to produce a professional-level film and/or media project in the public interest. Community work should meet the needs of the community-based organization and the education goals set by the student, instructor, and community based partner; be in direct service, indirect service, policy analysis, research, and/or advocacy work; engage the student with individuals or communities of need and with issues related to social justice, community development, and/or access to resources. May be repeated for credit. No more than six hours may be applied to the B.A. or B.G.S. degrees. Graded satisfactory/unsatisfactory. Prerequisite: Consent of instructor and at least 22 credit hours in the department. FLD.

FMS 410. Race, Class, and Gender in Visual Culture. 3 Hours. H.
Examines the way in which race, class, and gender are represented through visual culture, historically and in the present. The study of visual culture analyzes the way in which visual images communicate systems of beliefs, contribute to identity formation, and have an influence on our thinking about race, class, and gender. Course looks at visual objects, i.e., film, television, photography, art, advertisements, and theatre as well as visual practices, i.e., in public and private spaces. LEC.

FMS 411. Television Studies. 3 Hours. H.
A historical, theoretical and critical survey of U.S. television from 1945 to the present from the public's perspective, with emphasis on the early influences of radio (e.g., Federal regulation and sponsorship), film and theatre; TV's rapid rise as the U.S. public's prime source of entertainment, news and information; TV's rise as a key cultural, economic and political phenomenon; TV's more recent accommodations to the forces of globalization, new technologies/media, and new business models through convergence. Discussion and screening of representative TV texts as seen against the backdrop of the theories and critical views of TV scholars ranging from Raymond Williams and John Fiske to Henry Jenkins. LEC.

FMS 412. Cyberculture Studies. 3 Hours. H.
Historically there has been a tendency to approach new media technologies and their proliferation as either utopic or dystopic. Cyberculture studies has been no exception. Students will work toward a comprehensive understanding of cyberculture as emergent computer networks forming around and constructing entertainment, knowledge, business, community, and identity. Cyberculture will be examined as the constant (re)organizing of virtual and physical relationships as well as the reorganization of media production, distribution and consumption. The variety of opportunities for computer-mediated human interaction such as social networks, virtual worlds, blogs, and games will be examined as cyberculture transposes online and offline relationships and practices. LEC.

FMS 413. Asian Media Studies. 3 Hours. H.
This course examines new and emerging media in East Asia and how the media industries of East Asia function. Using recent scholarship and industry data on contemporary cyberculture, music studies, and television industries of East Asia we examine how such factors as globalization, post-colonialism, censorship, emerging technology, and national media legislation affect regional and transnational media industries in Japan, South Korea, and Mainland China/Taiwan/Hong Kong. (Same as EALC 413.) LEC.

FMS 414. Kansas Art, History, and Popular Culture. 3 Hours. H.
An overview of the art and cultural history of Kansas (and Kansas City) from territorial days to the present. Emphasis is placed on key issues, figures and events. A general familiarity with American history is recommended. May be taken as FMS 714, but with additional requirements. (Same as HA 584.) LEC.

FMS 475. Advanced Video Production. 3 Hours. H.
Special projects in video production, using both studio and remote locations. Prerequisite: FMS 375 and consent of instructor. LEC.

FMS 477. Sound Design. 3 Hours. H.
Students will study and produce film and video work with an emphasis on sound design theory and practice. Course projects consist of several short works in response to readings and screenings, which include a survey of sound in cinema, internet and radio. Students will also become conversant with related equipment, software and techniques. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 478. Experimental Production. 3 Hours. H.
Students will produce experimental film and video projects, including installation art and performance art pieces, in both collaborative and a collaborative production modes. Practical production aspects of historical experimental works will be studied, with emphasis on creation of works inspired by these earlier artists and their work. Unorthodox video and film production concepts and modes will also be studied and used in the creation of original works. The incorporation of experimental elements in the creation of mainstream works, and the creation of such projects, will also be a key area of study and experimentation. By pushing their individual creative limits, students will gain an appreciation for the experimental film and video genre, as well as an expansion of their production skills. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 479. Broadcast Documentary Production. 3 Hours. H.
This is a hands-on production course in which students will research, plan and produce short-form non-fiction documentaries. The class is dedicated to training young professionals in the principles, skills, techniques, habits and practices of documentary production. We will focus also on the aesthetics of our craft and the documentary form. The objective is to ground students in the fundamental skills of good non-fiction storytelling-conceptualization, research, story structure, theme development, writing, producing and directing. The goal is the production of several short-form compositions (videos) where storytelling is employed to communicate a concept or idea effectively. Students will form into teams to research, develop and produce a course-long short-form documentary. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 480. Music Video Production. 3 Hours. H.
This course will cover elements of the history, aesthetics, and business of music video and music video production. Students will view and discuss many different types of music videos, and will learn how to classify and critique these videos in a professional manner. Students will gain familiarity with the genres, themes, forms, and iconography of music video; an understanding of the place of music video in media culture; an exploration of the ideological, cultural, and historical contexts of music video; and an ability to create or assist in the creation of professional-quality music videos. Prerequisite: FMS 275 and consent of instructor. LEC.

FMS 498. Honors Seminar. 2-6 Hours. AE61 / H.
Study may be directed toward either (a) reading for integration of knowledge and insight in film and media, or (b) original research (i.e., investigation of a specific problem in film and media). Six hours maximum credit. Prerequisite: Consent of Departmental Honors Coordinator. LEC.

FMS 499. Directed Study in Film. 1-6 Hours. AE61 / H.
Investigation of a special topic or project selected by the student with advice, approval, and supervision by an instructor. Such study may take the form of directed reading or special research. Individual reports and conferences. A maximum of six hours credit may be counted toward a
degree. Prerequisite: At least seven hours credit in the department and consent of instructor. IND.

FMS 530. Classical Film/Media Theory. 3 Hours. H.
Comprehensive examination of most significant theories and theorists of film. Organized around specific questions, e.g., what qualities make film art unique, and how is film related to other visual and literary arts? Class discussion, individual projects. Prerequisite: FMS 100 or equivalent (determined by instructor). LEC.

FMS 531. Contemporary Concepts in Media Studies. 3 Hours. H.
This course emphasizes a theoretical understanding of media and media production skills. It is a critical cultural study of the media, focusing on the relationships between media representations and society. Students explore different conceptual perspectives on the role and power of visual media in society in influencing social values, political beliefs, identities and behaviors; analyze specific media texts, such as film and television shows; and examine the dynamics of how class, gender, generation, and race influence the production and reception of media. LEC.

FMS 540. Cuban Cinema. 3 Hours. H.
This course explores Cuban cinema from 1959 to the present day. Special attention is paid to the representations of Cuban history, cultural politics, and the political-economic conditions of production in Cuba. In addition, the Cuban-American community and their contributions or reactions to Cuban film are discussed. Through readings, lectures, discussion, and viewing Cuban films, the class examines a variety of topics related to Cuban cinema, history, and contemporary concerns. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level. Prerequisite: Junior standing. LEC.

FMS 541. Asian Film. 3 Hours. NW AE42 / H.
Seminar on various national film cultures of East and Southeast Asia. Representative films are studied from formal, stylistic, and socio-historic perspectives. Addresses the impact of key cultural, economic, and political issues on each film industry. Class discussion, reports, and individual research papers. The course is offered at the 500 and 800 levels, with additional assignments at the 800 level. (Same as EALC 541.) Prerequisite: Junior status. LEC.

FMS 542. Latin American Film. 3 Hours. H.
The course explores the national cinemas and film industries of various nations in Latin America, as well as films made by Indigenous and Chicano/a filmmakers. Films are analyzed both as artistic works (formal qualities, cinematic styles, and influences) and as documents that provide windows to the socio-historical context of the nation. The course focuses on the political-economic factors surrounding the production of Latin American national cinema (the role of the state, coproductions, film markets). Prerequisite: Junior status. May be taken as FMS 842. There will be additional requirements for graduate students taking FMS 842. LEC.

FMS 543. Contemporary Japanese Film. 3 Hours. NW AE42 / H.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We survey recent industrial and stylistic trends as well as key critical debates. Class discussion, reports, and individual research papers. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as EALC 543.) Prerequisite: Junior status. LEC.

FMS 544. African Film. 3 Hours. NW / H.
A critical study of Africa and its peoples as depicted in films. The aesthetic, cultural, economic, political, historical, and ideological aspects of African films are examined. (Same as AAAS 555.) LEC.

FMS 585. Capstone in Film and Media Studies. 3 Hours. H.
This course integrates the knowledge and skills acquired across the curriculum of Film Media Studies including primarily academic studies, but also production and other related disciplines to enable the student to demonstrate achievement through the production of a major creative research project. Prerequisite: Must be admitted to the Film and Media Studies B.A. or B.G.S. degree. Must have completed one FMS production course. Must have Departmental permission to enroll. LEC.

FMS 592. Documentary Film and Video. 3 Hours. H.
An historical and theoretical survey of that major genre of film and video typically termed “documentary.” The course will trace the main historical developments from documentary’s beginnings through contemporary innovations. Prerequisite: FMS 100 and FMS 310, FMS 311, or consent of instructor. LEC.

FMS 593. Experimental Film and Video. 3 Hours. H.
A history of experimental film and video through an examination of major artists, movements, theories, and films/tapes. Prerequisite: FMS 100 and FMS 310, or consent of instructor. LEC.

FMS 620. International Women Filmmakers. 3 Hours. H.
This course examines films made by women around the world. Mainstream and independent fiction, documentary, and experimental works will be screened and discussed. The objectives of the course are: 1) to learn the variety of films made by women and the conditions of their production, distribution reception. 2) to interrogate the idea of women’s cinema as ‘counter-cinema’. We will acquire tools for analyzing films in terms of economic, aesthetic, cultural, and political circumstance by women of different countries, classes, races, ethnicities, genders, and sexual preferences. LEC.

FMS 621. American Film Criticism. 3 Hours. H.
An analysis of the evolution, methods and impact of American film criticism as practiced by such critics as James Agee, Robert Warshow, Andrew Sarris, John Simon, Pauline Kael, Stanley Kauffman, and Dwight Macdonald. Prerequisite: FMS 310 or FMS 311. LEC.

FMS 673. Problems in Basic Screenwriting. 3 Hours. U.
The principles of screenwriting are developed through scene writing and analysis culminating in the writing and structure of a full-length, three-act screenplay. In addition to the class sessions taught with FMS 273 Basic Screenwriting, separate consultations and specific research assignments for graduate students in FMS 673 are also required. LEC.

FMS 675. Problems in Basic Video Production. 3 Hours. U.
Theory and practice of single-camera video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation and audio. In addition to the class sessions taught with FMS 275 Basic Video Production, separate consultations and specific research assignments for graduate students in FMS 675 are also required. Lecture-laboratory. LEC.

FMS 676. Problems in Basic Film Production. 3 Hours. U.
An introduction to 16mm film techniques and structures, requiring construction of brief, individually produced fictive-narrative films employing classical continuity. In addition to the class sessions taught with FMS 276 Basic Film Production, separate consultations and specific research assignments for graduate students in FMS 676 are also required. Lecture-laboratory. LEC.

FMS 702. Graduate Seminar in: ____. 1-3 Hours.
Topics change as needs and resources develop. Class discussion, reports, and individual projects. SEM.
FMS 704. Study Abroad Topics in: __________. 1-6 Hours.
This course is designed for the study of special topics in Film. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

FMS 707. Film/Media Internship. 3-12 Hours.
Study with an approved film or media company. Emphasis may be in one or all of the following areas: acting, directing, or promotion management. No more than six hours may be applied to an M.A. degree. Course will be graded satisfactory/unsatisfactory. Prerequisite: Consent of instructor. LEC.

FMS 714. Kansas Art, History and Popular Culture. 3 Hours.
An overview of the art and cultural history of Kansas (and Kansas City) from territorial days to the present. Emphasis is placed on key issues, figures and events. A general familiarity with American history is recommended. In addition to the lecture sessions taught in tandem with FMS 414, additional research component, lecture presentation, and class meeting are also required. LEC.

FMS 715. Survey of Japanese Film. 3 Hours.
This course surveys the major developments in patterns of distribution, exhibition, and reception and their influence on film aesthetics in twentieth century Japanese film. Through secondary readings, lectures, and discussions students will examine how Japanese cinema, as an institution, responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as EALC 715.) LEC.

FMS 716. Cinemas of the Southern Cone: Argentina, Chile, and Uruguay. 3 Hours.
This course will examine the cinemas of three neighboring South American countries to find similar themes and some differences between them historically, politically, and culturally. Themes will include: gender and nation, political repression during dictatorship, globalization and the cinema, youth culture in the Southern Cone, and representations of race and ethnicity, immigration and identity in contemporary cinema. In addition to the lecture sessions taught in tandem with FMS 316, additional research component, lecture presentation, and class meeting are also required. LEC.

FMS 717. Race and the American Documentary. 3 Hours.
This course will survey a range of documentaries in which race is a key part of the film’s text. There are two class objectives: to broaden the student’s knowledge of American social history and culture, especially around issues of identity, representation and race, and to heighten the student’s ability as a critical viewer of films. This course will include: film viewing, scholarly readings, and lectures. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. LEC.

FMS 718. Anti-war Films. 3 Hours.
An overview and exploration of the history of the portrayal of anti-war film and media themes to show how anti-war attitudes and political policy can be affected by positive and negative depictions of conflict. Analysis of selected films. FMS 318 and FMS 718 will meet concurrently, though separate consultations and specific research assignments for FMS 718 are also required. LEC.

FMS 743. Contemporary Japanese Film. 3 Hours.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We will survey recent industrial and stylistic trends as well as key critical debates. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as EALC 743.) SEM.

FMS 745. New Media and Society. 3 Hours.
Students will be introduced to major themes and debates in digital media studies and apply critical approaches for understanding new media practices, technologies, and theories. In addition to readings and lectures, students will engage in a variety of digital activities and participate in production-oriented projects. By the end of this course students will gain a foundational understanding of historical and emerging relationships between new media (internet, cell phones, digital games, etc.) and society, acquire key digital skills, and experience a variety of new media texts and services. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. LEC.

FMS 773. Problems in Intermediate Screenwriting. 3 Hours.
The principles of screenwriting are developed through scene writing and analysis culminating in the writing and structuring of a full-length, three act screenplay. In addition to the class sessions taught with FMS 373 Intermediate Screenwriting, separate consultations and specific research assignments for graduate students in FMS 773 are also required. LEC.

FMS 774. Animation. 3 Hours.
A survey that combines animation history, theory, and production by examining animated works of all kinds and exploring various styles utilizing both hands-on techniques and digital animation programs. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Lecture-laboratory LEC.

FMS 775. Problems in Intermediate Video Production. 3 Hours.
Theory and practice of multiple-camera video production with emphasis on preproduction planning, scripting, directing, lighting, camera operation, and audio. In addition to the class sessions taught with FMS 375 Intermediate Video Production, separate consultations and specific research assignments for graduate students in FMS 775 are also required. Lecture-laboratory. LEC.

FMS 776. Problems in Cinematography. 3 Hours.
Theory and practice of cinematography, with emphasis on creation of film, video, and digital imagery. FMS 776 meets concurrently with FMS 376; students enrolled in the graduate-level course will have separate consultations and specific research assignments. Lecture-laboratory. Prerequisite: Consent of instructor and FMS 675 or FMS 676. LEC.

FMS 777. Post-Production. 3 Hours.
Students will become familiar with techniques and processes in film and video post-production including, but not limited to, editing, sound, post-production management, marketing, and distribution. This course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Prerequisite: Consent of instructor. LEC.

FMS 800. Introduction to Graduate Study in Film/Media. 3 Hours.
Major emphasis is placed upon the principles of research, bibliographical data, and research methods useful in film and television. The course should be taken at the beginning of the graduate student’s program. LEC.

FMS 801. Professional Development Seminar. 1 Hour.
Preparation and training for faculty careers in film and related fields, including research skills and methods, responsible scholarship, teaching, and service. Other topics vary from semester to semester. May be repeated for credit. SEM.

FMS 802. Master’s Projects. 3-6 Hours.
Advanced creative projects which may be elected by master’s degree candidates in lieu of thesis. RSH.
FMS 810. Development of the Silent Film. 3 Hours.
Intensive study of the artistic, economic, and sociological development of the silent narrative film with emphasis on the evolution of the American studio system, German Expressionism, and Soviet Expressive Realism. LEC.

FMS 811. Development of the American Sound Film. 3 Hours.
Intensive study of the artistic, economic, and sociological development of the American sound film with emphasis on the studio system, major directors, genres, and the impact of television. LEC.

FMS 813. Development of the International Sound Film. 3 Hours.
Intensive study of the artistic, economic, and sociological development of the international sound film with emphasis on the cinemas of England, France, Italy, Germany, Sweden, and Eastern Europe. LEC.

FMS 814. Development of African-American Images in Film. 3 Hours.
A history and critical assessment of the development of diverse images of African-Americans in American cinema and the impact of those images of American society. Screenings of feature and independent films, including those by African-Americans. In addition to the lecture/screening sessions taught in tandem with FMS 314, a separate discussion section and specific research assignments for graduate students enrolled in FMS 814 are also required. LEC.

FMS 840. Cuban Cinema. 3 Hours.
This course explores Cuban cinema from 1959 to the present day. Special attention will be paid to the representations of Cuban history, cultural politics, and the political-economic conditions of production in Cuba. In addition, the Cuban-American community and their contributions or reactions to Cuban film will be discussed. Through readings, lectures, discussion, and viewing Cuban films, the class will examine a variety of topics related to Cuban cinema, history, and contemporary concerns. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level. LEC.

FMS 841. Asian Film. 3 Hours.
Seminar on various national film cultures of East and Southeast Asia. Representative films are studied from formal, stylistic, and socio-historic perspectives. Addresses the impact of key cultural, economic and political issues on each film industry. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level. (Same as EALC 841.) SEM.

FMS 842. Latin American Film. 3 Hours.
The course explores the national cinemas and film industries of various nations in Latin America, as well as films made by indigenous and Chicano/a filmmakers. Films are analyzed both as artistic works (formal qualities, cinematic styles, and influences) and as documents that provide windows to the socio-historical context of the nation. The course focuses on the political-economic factors surrounding the production of Latin American national cinema (the role of the state, co-productions, film markets). LEC.

FMS 862. Survey of Film and Media History. 3 Hours.
This seminar will be primarily international in scope and will concentrate on the following: technological and production issues relating to the transition in 1927-1931 of silent to sound film; the constructions of national identity, including those of recently emerging cultures; a comparison and contrast of the censorial agencies in America and abroad; and current revisionist perspectives on received film and media history. SEM.

FMS 863. Survey of Documentary and Experimental Film and Media. 3 Hours.
Surveys the important historical and theoretical issues pertinent to both the documentary and experimental approaches as expressed in film, video and new technologies. Includes major documentary and experimental genres, directors, national schools, artistic movements, and landmark works. Screenings reflect a chronology from origins to present-day. LEC.

FMS 864. Classical Film and Media Theory. 3 Hours.
This seminar is a comprehensive survey of the major classical film and media theories and theorists, such as Munsterberg, Eisenstein, Arnhem, Bazin, and Adorno. Organized around specific questions, e.g.; What qualities differentiate film and media from other art and communications forms? What qualities do film and media share with other art and communication forms? What qualities differentiate film from other forms of media such as television? Readings from primary sources stressed. Class discussion, individual research papers. SEM.

FMS 865. Contemporary Film and Media Theory. 3 Hours.
This seminar is a study of the theories applied to the study of film and media since the 1970s moving through structuralism, and into the posts: - structuralism, -modernism, -colonialism, and beyond. Within these broad paradigms some of the theories examined in depth are cinemiatrics, Marxism, cinematic apparatus, feminin film theory, reception theory, new media and virtual reality. SEM.

FMS 875. Problems in Advanced Video Production. 3 Hours.
Special projects in video production, using both studio and remote locations. In addition to the class sessions taught with FMS 475 Advanced Video Production, separate consultations and specific research assignments for graduate students in FMS 875 are also required. Prerequisite: FMS 775 or consent of instructor. LEC.

FMS 880. Development of American Popular Culture in the: ___. 3 Hours.
Intensive interdisciplinary examination of popular culture forms and their relationships with the social, political, and economic dynamics of America in a specific decade, with emphasis on film, broadcasting, theatre, music literature (including magazines and newspapers), and the graphic arts. Decade to be studied changes as resources and needs develop. LEC.

FMS 887. Film and the Public. 3 Hours.
A study of the actual and implied responsibilities of film and video to the public, as seen in regulations, self-regulatory codes, and the critical literature of the field. Prerequisite: Consent of instructor. LEC.

FMS 888. Special Problems in Film History and Criticism. 1-4 Hours. RSH.

FMS 895. Intensive Film Project Seminar. 1-4 Hours.
The student plans and executes an intensive special project which requires the professional skills of investigation and performance appropriate to radio, television and/or film. May be repeated for credit up to a maximum of six credit hours. (This seminar is to the special project program what “thesis” is to the traditional program.) RSH.

FMS 897. Practicum in Film. 1-3 Hours.
Various approaches to the illustration of principles of production in film and/or video through the supervision of laboratory exercises and subsequent evaluation by the Theatre and Film graduate faculty. FLD.

FMS 898. Investigation and Conference (for Master’s Students). 1-8 Hours.
Directed research and experimentation in film or media. Limited to eight hours credit toward the Master’s degree. RSH.

FMS 899. Master’s Thesis. 1-6 Hours.
THE.

FMS 902. Film Seminar in: ____. 3 Hours.
A graduate seminar devoted to selected historical, theoretical, or critical issues. Prerequisite: Consent of instructor. LEC.
FMS 998. Investigation and Conference (for Doctoral Students). 1-8 Hours.
RSH.

FMS 999. Doctoral Dissertation. 1-12 Hours.
THE.

Bachelor of Arts and Bachelor of General Studies in Film and Media Studies

Why study film and media?
The Department of Film and Media Studies unites the inquiry of the academic with the practice and technique of the artist. Scholars and filmmakers work and study together in an environment of mutual encouragement and collegiality.

First-Year Preparation
Students considering a major in film and media studies should enroll in FMS 100 and complete all courses required for admission to the major within the first 3 semesters.

Admission to the Major

Admission Requirements

Courses Required
Introduction to the Film Medium. Satisfied by:
FMS 100 Introduction to the Film Medium 3
Film and Media Aesthetics. Satisfied by:
FMS 200 Film and Media Aesthetics 3
American Popular Culture of: _____ . Satisfied by:
FMS 380 American Popular Culture of: _____ 3

Admission GPA
Satisfied by a minimum GPA of 2.5 on a 4.0 scale in required admission courses designated above. University Course Repeat Policy will apply.

Apply to the Major

Application Term
Students should apply to the major during the semester in which major admission criteria will be completed; normally no later than 60 hours, or for transfer students, during the initial term at KU. Application to this major after completion of 60 hours, or the initial KU term for transfer students, will likely delay graduation.

Application Process
Students with the film and media studies interest code who are enrolled in the second admissions class are contacted by the department and invited to a major admissions orientation mid-semester. Attendance at an orientation is necessary to be admitted to the film and media studies department. Admission occurs at the end of the semester once the 2.5 grade-point average in FMS 100, FMS 200, and FMS 380 is confirmed.

Film and Media Studies Programs
Film/video production experience is provided through course work at Oldfather Studios. B.A. and B.G.S. requirements are quite different, so it is important to check with a department advisor. The B.A. in film and media studies introduces students to the overall field of film and media studies and prepares them for graduate study. The B.G.S. in film and media studies prepares students broadly in film/video production.

Requirements for the B.A. Major

Film and Media Studies Core Knowledge and Skills (16)

Majors must complete the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

Capstone: (3)
FMS 585 Capstone in Film and Media Studies 3

Film and Media Electives (6)

Satisfied by 6 hours from courses in the Film & Media Studies department (any course with an FMS prefix) 6

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:
Major Hours
Satisfied by 37 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major, of which 8 must be at the junior/senior (300+) level.

Major Junior/Senior Hours
Satisfied by a minimum of 22 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Graduation Plan
With careful planning and commitment to a full-time course load, you can graduate in 4 years. For details please consult the department.

Requirements for the B.G.S. Major

Film and Media Studies Core Knowledge and Skills (16)
Majors must complete a course in each of the following areas:

Departmental Honors
An undergraduate interested in honors in film and media studies must present a written declaration of intention to the department’s honors coordinator as early as possible in the junior or senior year. The following are required:

1. A grade-point average at the time of declaration and at graduation of at least 3.25 overall and 3.5 in film and media studies courses.
2. Six hours in FMS 498 Honors Seminar. Enrollment in this course must be approved by the honors coordinator. Students in the honors seminar work under the direction of one instructor for each semester. The instructor conducts an examination at the end of each semester’s work and assigns a grade. Credit only is given to students who complete the work assigned for any semester but do not complete the requirements for honors. Students may change area of interest or instructor at the beginning of a semester with the consent of the honors coordinator.
3. Satisfactory performance in a final oral examination given approximately one month before graduation.
Minor in Film and Media Studies

Why study film and media?
The Department of Film and Media Studies unites the inquiry of the academic with the practice and technique of the artist. Scholars and filmmakers work and study together in an environment of mutual encouragement and collegiality.

Requirements for the Minor

Students selecting this minor must complete the following:

FMS 100 Introduction to the Film Medium 3
FMS 380 American Popular Culture of: _______ 3
Film History. Satisfied by one of the following: 3
  FMS 310 History of the Silent Film
  FMS 311 History of the American Sound Film
  FMS 312 History of the International Sound Film to 1950
  FMS 313 History of the International Sound Film Post 1950
  FMS 314 History of African-American Images in Film

Theory and Criticism. Satisfied by one of the following: 3
  FMS 530 Classical Film/Media Theory
  FMS 531 Contemporary Concepts in Media Studies

Film and Video. Satisfied by one of the following: 3
  FMS 592 Documentary Film and Video
  FMS 593 Experimental Film and Video

Film Studies. Satisfied by one of the following: 3
  FMS 302 Undergraduate Studies Seminar in: _______
  FMS 542 Latin American Film
  FMS 621 American Film Criticism

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the minor.

Master of Arts in Film and Media Studies

Why study film and media?
The Department of Film and Media Studies unites the inquiry of the academic with the practice and technique of the artist. Scholars and filmmakers work and study together in an environment of mutual encouragement and collegiality.

Graduate Admission

Graduate Admission Criteria

M.A. Degree

To be admitted, a student ordinarily is expected to have a Graduate Record Examination score of at least 160 (verbal), 144 (quantitative), and 4.5 analytical writing.

Ph.D. Degree

To be admitted, a student ordinarily is expected to have a Graduate Record Examination score of at least 160 (verbal), 144 (quantitative), and 4.5 analytical writing. Applicants also must have a grade-point average of at least 3.2 for undergraduate and at least 3.5 for graduate work, and a master's degree acceptable to the graduate faculty. Deficiencies in a student's background may require make-up work.

How to Apply (Graduate Level)

Deadlines

To apply for admission in the fall term, please submit all application materials for admission no later than

• January 1 to be considered for funding
• February 15 to be considered without funding

The department does not admit new students in the spring or summer terms.

Online Submission of Application and Fee
Submit your application fee and graduate application online (http://www.graduate.ku.edu).

Application Materials
Graduate Record Examination scores should be sent directly from the Educational Testing Service. For routing, the institution code is 6871; the department code is 4505. Check with your GRE Examination Center (http://www.ets.org/gre) to be certain your scores will arrive at KU by the application deadline.

The items listed below should be submitted online with the application and/or mailed to this address:

The University of Kansas
Department of Film and Media Studies
Attn: Graduate Secretary
Oldfather Studios
1621 W. 9th St.
Lawrence, KS 66044-2488

• An official transcript, sent directly to KU, from every previous college or university attended (copies issued to students are not accepted).
• 3 recent letters of recommendation, 2 of which should be from your current or former teachers. Each letter of recommendation must be accompanied by Graduate Letter of Recommendation Form. Completed letters with accompanying forms may be sent directly to the department by your recommenders, uploaded with your application, or included (in signed and sealed envelopes) with the rest of the materials you send us.
• A current résumé of academic and artistic experiences.
• A statement of personal goals that explains why you want to pursue graduate study.
• A writing sample (no more than 15 pages) that demonstrates your ability to theorize, analyze, and synthesize scholarly information. (Please do not send theses, DVDs, CDs, jump drives, or videotapes.)
• International students must provide TOEFL scores (http://policy.ku.edu/graduate-studies/english-proficiency-international-students) and the international I-20 Request Form.

M.A. Degree Requirements

The Master of Arts in film and media is an academic degree, but students are expected to complete 6 hours in film and video production. All M.A. students must write a thesis as the culmination of the degree.

To be admitted, a student ordinarily is expected to have a Graduate Record Examination score of at least 160 (verbal), 144 (quantitative), and 4.5 analytical writing.

To complete the M.A., the student must sustain a grade-point average of 3.0 or higher through 33 graduate credit hours.

Requirements for the M.A. in Film and Media Studies

A total of 33 hours is required.

- International students must provide TOEFL scores (http://policy.ku.edu/graduate-studies/english-proficiency-international-students) and the international I-20 Request Form.

Ph.D. Degree Requirements

The Ph.D. is an academic degree, but students are expected to complete 6 hours in film and video production.

To be admitted, a student ordinarily is expected to have a Graduate Record Examination score of at least 160 (verbal), 144 (quantitative), and 4.5 analytical writing. The applicant also must have a grade-point average of at least 3.2 for undergraduate and at least 3.5 for graduate work and a master’s degree acceptable to the graduate faculty. Deficiencies in background may require make-up work.

Ph.D. Degree in Film and Media Studies

The degree requires 60 hours not including language proficiency. Please meet with your advisor or graduate director each semester to assess your progress.

Core Requirements

24 hours of core courses are required. Doctoral students in film and media studies must take a core of courses aimed at strengthening methodological, historical, and theoretical grounding. 1 course must be taken in non-Western/indigenous film; 2 graduate-level production courses are required, and 2 courses in FMS 902 Film Seminar are mandatory.

Elective Requirements

9 hours of electives are required. Elective courses focus on the academic study of history, international cinema, popular culture, and film criticism. These courses are selected with a graduate advisor to reflect the student’s special interest. The advisor may increase the number of hours, depending on the student’s academic needs.

Production Requirements

6 hours of production courses are required. Production courses give students an understanding of the production process in making film, video, or animation pieces. On graduation, doctoral students can perform as competent artisans in addition to research scholars. Production courses are selected with a graduate advisor to reflect the student’s specific interest. The advisor may increase the number of hours, depending on the student’s academic needs.

Secondary Field Requirements

9 hours of secondary field courses at the graduate level from outside the Department of Film and Media Studies, are chosen to assist the student in writing the dissertation. They are related to the student’s proposed area of specialization. Examples include English; history; women, gender, and sexuality studies; American studies; education; and social welfare.

Research Skills and Responsible Scholarship Requirements

KU requires all doctoral students to meet the Research Skills requirement before proceeding to comprehensive exams. Compliance with this policy requires all graduate students to receive training in responsible scholarship pertinent to the field of research and obtain research skills pertinent to the doctoral level of research in their field(s). Research Skills requirements may be satisfied by taking either FMS 902 : Research Methods and Applications of New Media or FMS 902 : Visual Methods. Students may also elect to demonstrate proficiency in one foreign language for conducting research.
Comprehensive Examination
2 publishable papers are due at the time of the examination. The examination includes written responses to questions in history, theory, production, and literature/criticism, followed by an oral examination.

Dissertation
18 hours of dissertation credit are required. The finished dissertation must constitute a palpable contribution to knowledge in the candidate’s chosen field. After its completion, an oral defense must be held no less than 4 weeks before the graduation deadline. The committee consists of 1 chair, 3 departmental members, and an outside member.

| FMS 897   | Practicum in Film | 3 |

Department of Theatre

KU Theatre: A Family of Students, Artists, Scholars, and Arts Professionals
The Department of Theatre offers outstanding theatre training in a liberal arts context. Our undergraduate programs are grounded in the philosophy that good theatre artists are thinking theatre artists. Our students work intensively on acquiring theatre skills and knowledge in our classrooms, studios, and laboratories. They receive small-school individual attention while benefiting from big-school academic choices and a vast array of programs. KU theatre students often undertake secondary study in areas such as business, journalism, art, and English. The Department of Theatre is internationally recognized for its graduate education. Our M.A. and Ph.D. programs are unique for combining intensive study of theatre and performance with the production training necessary for theatre careers in higher education. Our groundbreaking M.F.A. in Scenography is unique for having an integrated approach to scenic, lighting, and costume design that prepares artists for professional and academic careers.

Home of the University Theatre
Classroom meets the stage in the University Theatre, a leading arts program serving the KU and Lawrence communities. KU Theatre students, faculty, and professional staff work together to create up to ten fully produced shows each year, from dramas to musicals to opera. In our fully-equipped facilities students engage in all aspects of production onstage and backstage. Production continues year round with the Kansas Summer Theatre program.

Highly Qualified Faculty Scholars and Artists
The faculty of the Department of Theatre are creative artists and researchers working in the areas of theatre stagecraft, performance, design, dramatic literature, dramaturgy, pedagogy, as well as the historical, literary, and cultural study of theatre and performance. Our faculty include award-winning teachers and internationally recognized scholars and artists working in professional theatre, authoring books and establishing research and outreach programs.

Support for Students
The Department of Theatre offers students financial aid in the form of dozens of scholarships, awards, and teaching assistantships each year to graduate and undergraduate students. A strong community of support is found in the Friends of the Theatre (FROTH), a community group dedicated to enhancing the mission of the University Theatre. Once students graduate our program they join a wide network of theatre Alumni and Professional Advisors.

Undergraduate Programs
The department offers Bachelor of Arts and Bachelor of General Studies degrees, as well as a minor in theatre. The program leading to the Bachelor of Fine Arts degree in theatre design is offered cooperatively by the Department of Visual Art and the Department of Theatre.

Undergraduates may choose from 5 emphases: the B.A. or B.G.S with an emphasis in Theatre, Culture, and Society; the B.A. or B.G.S. with an emphasis in Performance; and a B.F.A. in Theatre Design. The concentration in Theatre, Culture, and Society acquaints students with the overall field of theatre and prepares them for possible graduate study. The concentration in Performance prepares students for professional
work in theatre and for M.F.A. study in acting or directing. The B.F.A in
Theatre Design is intended as general preparation for the professional
designer of scenery, costumes or lighting working in theatre and/or film or
as preparation for graduate studies.

The B.A., B.G.S. and B.F.A. requirements are quite different, so it is
important to consult with a department advisor. Theatre production
experience is provided through coursework in conjunction with the
University Theatre Program.

Courses for Nonmajors
The department offers many courses (including KU Core fulfillment) open
to non-majors who wish to learn more about theatre, including but not
limited to:

<table>

Graduate Programs
The Department of Theatre offers graduate programs leading to a Master
of Arts degree in theatre studies and a Doctor of Philosophy degree in
theatre. In collaboration with the Department of Visual Art, the Department
of Theatre also offers a Master of Fine Arts degree in theatre design with
a concentration in scenography.

Courses
THR 100. Introduction to the Theatre. 3 Hours. HL GE3H / H.
Designed to help students by means of experience with theatre as
well as study about it to achieve an understanding of its cultural role in
contemporary society, to develop a sensitive and informed appreciation
of its art, and to make it an integral part of their cultural lives. Lectures,
discussion groups, special interest groups, theatre attendance. LEC.

THR 101. Theatre Practicum I. 1 Hour. H.
Involvement in theatre performance and/or production. One acting role
in a University Theatre production or classroom project plus one crew
assignment, or two crew assignments qualify for credit. May be repeated
for credit. This course will be graded satisfactoy/unsatisfactory. ACT.

THR 105. Improvisation. 3 Hours. H.
Designed to free the beginning actor physically, vocally, and emotionally.
Beginning with basic physical action and sense memory exercises
performed by individuals, the work will progress to pair and small-group
improvisations in preparation for scene work. Open to freshmen and
sophomores only. LEC.

THR 106. Acting I. 3 Hours. HL GE3H / H.
Fundamental techniques in acting. Practice in character creation, body
language, and effective stage speech. LEC.

THR 111. Make-Up. 1 Hour. H.
The techniques in application of make-up for specific characterizations,
both straight and character. Study of the structure of the face and hands
for stage make-up. Should be taken concurrently with THR 106, if
possible. LEC.

THR 116. Scenographic Techniques. 3 Hours. H.
Emphasis on drafting, model building, and presentational techniques for
theatrical designer or art director. Some work in computer drafting for
the designer-technician. Lecture and laboratory periods. LEC.

THR 177. First Year Seminar: ______. 3 Hours. HT GE11.
A limited-enrollment, seminar course for first-time freshmen, organized
around current issues in Theatre. May not contribute to major
requirements in theatre. First year seminar topics are coordinated and
approved through the Office of First Year Experiences. Prerequisite: First-
time freshman status. LEC.

THR 201. Theatre Practicum II. 1 Hour. H.
Involvement in theatre performance and/or production. One acting
role in a University Theatre production or classroom project plus one
crew assignment, or two crew assignments qualify for credit. May be
repeated for credit. This course will be graded satisfactory/unsatisfactory.
Prerequisite: THR 101. ACT.

THR 204. Study Abroad Topics in: ______. 1-6 Hours. H.
This course is designed for the study of special topics in Theatre at the
freshman/sophomore level. Credit for coursework must be arranged
through the Office of KU Study Abroad. May be repeated for credit if
content varies. LEC.

THR 206. Acting II. 3 Hours. H.
The study of roles and scenes from plays. Practice in character analysis,
creation of roles, rehearsal of scenes, and ensemble work. Prerequisite:
THR 106. LEC.

THR 209. Play Reading for Performance. 3 Hours. H.
This course is designed to prepare students for upper-level courses in
theatre by developing and enhancing their ability to read plays. Close
reading of plays introduces students to a variety of different dramatic
genres and theatrical styles. Emphasis is placed on comprehension and
analysis of dramatic literature for theatrical performance. LEC.

THR 210. Musical Performance for the Actor I. 3 Hours. H.
Beginning Studies in Musical Theatre Performance: practical application
of voice, acting and movement techniques for musical theatre, solo and
group performance. LEC.

THR 212. Beginning Voice and Speech for Actors. 3 Hours. H.
A foundation course; introduction to phonetics; training in Standard
American Stage Speech; articulation skills; resonance and voice
placement. LEC.

THR 213. Movement I: The Acting Instrument. 3 Hours. H.
A foundational course in discovering ease and efficient use of the body
in a performance context, developing non-verbal communication and
partnering skills, and establishing the connection of movement to voice
production. Trains actors in proper warm-up technique, alignment and
balance, physical safety, and basic tumbling skills. LEC.

THR 215. Approaching Design. 3 Hours. HL GE3H / H.
Conceptualization and visualization of the elements involved in creative
design for theatre, dance, television, and film. LEC.

THR 216. Scenic Production. 2 Hours. H.
Introduction to the planning, construction, and mounting of scenery for
theatre, television, and film. Concentration on the technical organization of
scenic production. Lecture, discussion, and laboratory periods. LEC.

THR 220. Costume Production. 2 Hours. H.
Introduction to techniques of costume construction, including study of
fabrics, color, fundamentals of pattern making, and draping of
costumes for theatre, television, and film. Concentration on the technical
organization of costume production. Lecture, discussion, and laboratory
periods. LEC.

THR 224. Lighting Production. 2 Hours. H.
Introduction to the planning and execution of lighting for theatre,
television, and film. Concentration organized any given semester to study
particular subject matter or to take advantage of special competence by
an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. LEC.

THR 226. Introduction to African Dance Theatre. 2 Hours. NW / H. Introduction to the general techniques of non-verbal theatrical conventions in African cultures. Practical training in movement vocabulary supplemented by lectures on the "text" of performance. There will be an end of semester "studio performance." (Same as AAAS 334 and DANC 230.) LEC.

THR 301. Theatre Practicum III. 1 Hour. H. Involvement in theatre performance and/or production. One acting role in a University Theatre production or classroom project plus one crew assignment, or two crew assignments qualify for credit. May be repeated for credit. This course will be graded satisfactory/unsatisfactory. Prerequisite: THR 201. ACT.

THR 302. Undergraduate Seminar in: ____, 3 Hours. H. Course organized any given semester to study a particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. LEC.

THR 303. Summer Theatre. 1-6 Hours. H. Provides experience in a wide range of theatre activity related to the summer theatre production or productions. Work may include activity in the following areas: acting, directing, design, technical theatre, voice and/or movement. Specialized skills are developed through individual classes, production preparation and performance. Prerequisite: Consent of instructor. ACT.

THR 304. Study Abroad Topics in: ____, 1-6 Hours. H. This course is designed for the study of special topics in Theatre at the junior/senior level. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

THR 305. Honors Seminar in: ____, 3 Hours. H. Special topics seminar serving students enrolled in the University Honors Program. Course organized any given semester to study a particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Prerequisite: Students must be enrolled in the University Honors Program. LEC.

THR 306. Acting III. 3 Hours. H. Advanced projects in acting. Character and scene analysis, scoring the role, rehearsal, and performance. Prerequisite: THR 206. LEC.

THR 307. Undergraduate Theatre Internship. 1-3 Hours. AE61 / H. Supervised study with an approved theater company or project. May be repeated for credit. No more than six hours may be applied to the B.A. or B.G.S. degrees. This course will be graded satisfactory/unsatisfactory. Prerequisite: Consent of instructor and at least seven hours credit in the department. FLD.

THR 308. Script Analysis. 3 Hours. H. This course provides knowledge and methods enabling students to conduct in-depth study of dramatic scripts. Emphasis is given to the analysis skills appropriate to practitioners of stage and screen arts. LEC.

THR 310. Musical Performance for the Actor II. 3 Hours. H. Intermediate Studies in Musical Theatre Performance: practical application of voice, acting and movement techniques for musical theatre, solo and group performance. Prerequisite: THR 106 and THR 210. LEC.

THR 312. Acting with an Accent. 3 Hours. H. A performance class for actors using monologues and scenes involving the use of accents and dialects. The course will also provide instruction in many of the most used American regional, British regional dialects, and foreign language accents. Prerequisite: THR 212, or by permission of instructor after the student demonstrates an ability in the International Phonetic Alphabet. LEC.

THR 313. Movement II: Physical Characterization. 3 Hours. H. The study of diverse physical acting techniques, and an investigation into creating a character through manipulation of the acting instrument. Actor training in performance neutrality, mask work, age, and gender distinctions. Prerequisite: THR 213 and permission of instructor. LEC.

THR 316. Beginning Scene Design. 3 Hours. H. Study of scenic design process with beginning problems in textual analysis, style, historical research, and preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 116 and THR 215, or permission of instructor. LEC.

THR 320. Beginning Costume Design. 3 Hours. H. Study of the costume design process with beginning problems in textual analysis, style, historical research, and preliminary and finished methods of design presentation. Concentration on developing fundamental design skills and awareness. Prerequisite: THR 116 and THR 215, or permission of instructor. LEC.

THR 326. African Theatre and Drama. 3 Hours. NW / H/W. A study of the origin and development of continental African theatre and its affinity to the Levant. Traditional, colonial and contemporary dramatic theories and experiments will be examined in play selections. (Same as AAAS 355.) LEC.

THR 327. African-American Theatre and Drama. 3 Hours. AE41 / H. A historical study of Black Theatre in the U.S.A. from its African genesis to its contemporary Americaness. Epochs in African-American dramaturgy will be critically examined. (Same as AAAS 356.) LEC.

THR 380. Popular Culture: ____, 3 Hours. HL GESH / H. Interdisciplinary examination of popular culture oriented around a specific genre or theme. Objects of study may include popular forms of live performance such as musicals or vaudeville, as well as media-based performances (radio, television, film, internet). Specific topic to be studied changes as needs and resources develop. May be repeated for credit for different topics. LEC.

THR 401. Stage Management and Assistant Direction. 1 Hour. H. Majors are assigned to stage manage or assistant direct a University Theatre production, or to take related workshops in stage management or assistant directing. May be repeated for credit. This course will be graded satisfactory/unsatisfactory. ACT.

THR 404. Children and Drama. 3 Hours. HL / H. Exploration of forms, methods, and materials appropriate for development of elementary-age children in dramatic arts. LEC.

THR 405. Children and Media. 3 Hours. H. The applied study of child development theories and research methods on the influences and effects of television and related visual media on childhood in the contexts of families, schools, and society. (Same as ABSC 405 and PSYC 405.) LEC.

THR 406. Audition Techniques. 3 Hours. H. This course prepares students for all types of audition experiences. It includes study in techniques of prepared auditions, cold readings,
interviews, and the musical audition for actors. Emphasis is placed upon developing resumes and photo portfolios as well as concentrated study in professional contracts, unions, and agent acquisition. Prerequisite: THR 206. LEC.

THR 410. Musical Performance for the Actor III. 3 Hours. H.
Advanced Studies in Musical Theatre Performance: practical application of voice, acting and movement techniques for musical theatre, solo and group performance. Prerequisite: THR 106, THR 210, and THR 310. LEC.

THR 413. Stage Combat Skills. 3 Hours. U.
Study of the illusion of violence in a dramatic context and the special skills necessary for creating believable and safe stage fights. Actor training in armed and unarmed combat, including one or more of the following: rapier and dagger, broadsword, and quarter staff. Prerequisite: THR 313 and permission of instructor. LEC.

THR 416. Design Forum. 3 Hours. U.
Depending on student qualifications and specialization, focus is on scenic, costume, and/or lighting design. Special attention placed on developing collaborative awareness and the conceptual and presentation skills that underlie and inform the design process. Prerequisite: THR 316 or THR 320 or THR 324. LEC.

THR 429. Postcolonial Theatre and Drama. 3 Hours. NW AE42/GE3H / H.
The course develops an understanding of the postcolonial concept and its different manifestations in theatre and drama across nations and cultures. It approaches postcolonialism as a way of reading theatre, and as a genre within theatre by exploring how the "colonial project" has reconfigured the concept, content, and context of theatre in both colonized and colonizing cultures. In addition to the study of postcolonial playwrights and their works, the course is also an introduction to postcolonial theory and its critics. (Same as AAAS 429.) LEC.

THR 445. Teaching Theatre in the Middle/Secondary Schools. 3 Hours. H.
Study of philosophy and methods appropriate to teaching improvisation, acting, stagecraft, directing, playwriting, dramatic literature, and theatre history in middle/secondary schools. Includes curriculum development, instructional and evaluative strategies, and management of co-curricular theatre programs. Prerequisite: Consent of instructor. LEC.

THR 498. Honors Seminar. 2-6 Hours. AE61 / H.
Study may be directed toward either (1) reading for integration of knowledge and insight in theatre or (2) original research, i.e., investigation of a specific problem in theatre. Six hours maximum credit, which may be distributed through four semesters. Prerequisite: Consent of Departmental Honors Committee. IND.

THR 499. Directed Study in Theatre. 1-6 Hours. AE61 / H.
Investigation of a special topic or project selected by the student with advice, approval, and supervision by an instructor. Such study may take the form of directed reading or special research. Individual reports and conferences. A maximum of six hours credit may be counted toward a degree. Prerequisite: At least seven hours credit in the department and consent of instructor. IND.

THR 501. Colloquium on American Theatre. 1 Hour. U.
A series of fourteen weekly lecture/discussions led by invited guests both from the university and outside it on various topics central to the study of theatre. The first four meetings, led by the course coordinator, are a brief survey of the history of theatre in America and a preparation for the ten lecture/discussions to follow. LEC.

THR 506. Acting for the Camera. 3 Hours. H.
A study of acting techniques appropriate to the requirements of the camera. Emphasis is placed on developing audition skills necessary to compete for roles in dramatic features, corporate videos, and commercials. Actors acquire skills essential to the transition from stage to camera. Prerequisite: Permission of instructor. LEC.

THR 508. Fundamentals of Directing. 3 Hours. H.
Offered as a first course in play directing. Designed primarily for theatre majors and secondary education majors in language arts with a theatre and drama concentration. The content is principally descriptive in nature with some practical experience. Lecture and laboratory periods. Prerequisite: THR 308. LEC.

THR 509. Dramatic Script Writing. 3 Hours. H.
Study and practice in the fundamental techniques of dramatic writing and the application of such techniques most specifically to theatre. Open upon consent of instructor to students who have completed one course in advanced composition and one course in the theory or history of drama. LEC.

THR 512. A Vocal Approach to the Classics. 3 Hours. H.
This is an advanced voice and speech course for actors aiming to further increase their command over tone, rhythm, pacing, and diction. Their range and power will be extended. Through discovery of the demands of a variety of classical texts, the actor will be challenged both in verse and in prose to develop the skills necessary to fully interpret that material. Prerequisite: THR 212. LEC.

THR 516. Scenic Painting Techniques. 3 Hours. H.
Study of painting equipment, tools, pigments, binders, and vehicles, and their relationship to the surfaces to be painted. Instruction in basic painting techniques. Prerequisite: THR 115 and THR 215. LEC.

THR 517. Computer-Aided Design. 3 Hours. U.
Study of new media in theatre and film/video production, primarily computer technologies and methods for the theatrical designer or art director. Emphasis on computer 3-D modeling and color rendering. Prerequisite: THR 116, THR 215, or permission of instructor. LEC.

THR 518. Scenography and the Classic Script. 3 Hours. H.
Holistic production design, including lighting, scenery, and costumes, for classic theatre scripts. Contrasts historical styles of production with styles for contemporary spaces and audiences. Projects tailored to the needs and level of the students. Prerequisite: Consent of instructor. LEC.

THR 519. Scenography and the Modern Script. 3 Hours. H.
Holistic production design, including lighting, scenery, and costumes, for modern theatre scripts. Examines modern styles of production. Projects tailored to the needs and level of the students. Prerequisite: Consent of instructor. LEC.

THR 520. History of Period Style I. 3 Hours. H.
A survey of Western style from ancient Egypt to the Restoration. Focus is placed on developing a comprehensive understanding of the stylistic relationships between art, architecture, clothing, decor, manners, and social and political history. Prerequisite: Nine hours in theatre/design/technical courses or consent of instructor. LEC.

THR 521. History of Period Style II. 3 Hours. H.
Continuation of THR 520, from the Restoration to the present day. Prerequisite: Nine hours in theatre/design/technical courses or consent of instructor. LEC.

THR 525. History of Theatre. 3 Hours. H.
Study of developments in world theatre and drama from the ancient world to the eighteenth century. LEC.
THR 526. History of Theatre II. 3 Hours. H.
Study of developments in world theatre and drama since the eighteenth century. LEC.

THR 527. Asian Theatre and Performance. 3 Hours. NW / H/W.
A survey of traditional and modern theatre and performance in Asia, with greatest attention given to India, China, and Japan. A study of plays, dramatic genres, history, conventions of play production, acting styles and other performance forms. (Same as EALC 527.) LEC.

THR 528. History of U.S. Theatre and Drama. 3 Hours. H.
Historical approach to the development of theatre and performing arts in the United States. LEC.

THR 529. Race and the American Theatre. 3 Hours. U.
The representation(s) of race in significant texts and performance styles in American theatre analyzed according to political ideologies, dramatic movements and the impact of these factors on the representation of the "other" in the theatre. (Same as AAAS 585 and AMS 529.) LEC.

THR 550. Applied and Interactive Theatre. 3 Hours. H.
This course is an exploration of interactive drama techniques and practices of the evolving field of applied theatre. The tools of applied theatre serve varied purposes and are being used around the world for community-building, personal empowerment, to address social and political issues, and to strengthen communication skills. The class will work specifically on community-based dialogue and classroom situations that students and professors encounter in their daily lives. LEC.

THR 599. Special Topics in Scenography. 1-6 Hours. U.
Individual studio activity. Course content to be determined by the student under the supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: Permission of instructor. IND.

THR 603. Theatre for Young Audiences. 3 Hours. U.
A survey of theories, history, literature, criticism, production methods, and audience research about theatre performed by adults for children and adolescents. Emphasis is on child development and community outreach. Prerequisite: THR 308 or consent of instructor. LEC.

THR 604. Drama with Young People. 1-3 Hours. U.
A laboratory experience in developing and conducting improvisational drama workshops with children or adolescents in local schools. Includes readings by leading theorists and practitioners. Prerequisite: Actors cast in current KU Theatre for Young People production, or THR 404, or consent of instructor. LEC.

THR 609. Play Directing. 3 Hours. H.
Readings, lectures, and practice dealing with the relationship between actor and director. Prerequisite: THR 508. LEC.

THR 617. Computer-Aided Design II. 3 Hours. U.
Continuation of THR 517. Emphasis on computer-generated images as scenic media in production situations. Prerequisite: THR 517, or permission of instructor. LEC.

THR 618. Scenography and the Musical Theatre. 3 Hours. H.
Holistic production design, including lighting, scenery, and costumes, for musical theatre, opera, and dance. Examines development and changes in design styles in the evolution of musical theatre, opera, and dance and the special requirements of these forms. Projects tailored to the needs and level of the students. Prerequisite: Consent of instructor. LEC.

THR 619. Scenography and the Contemporary Script. 3 Hours. H.
Holistic production design, including lighting, scenery, and costumes, for contemporary scripts. Examines contemporary episodic scripts written for the stage that are based on a filmic structure, the special problems of these kinds of scripts, and the respective problems of designing for theatre and film. Projects tailored to the needs and level of the students. Prerequisite: Consent of instructor. LEC.

THR 620. Scenography and the Experimental Production. 3 Hours. H.
Holistic production design, including lighting, scenery, and costumes, for experimental scripts/scenarios. Examines experimental approaches to a variety of script/scenarios, including mixed-media production. Projects tailored to the needs and level of the students. Prerequisite: Consent of instructor. LEC.

THR 626. Myth and the Dramatist. 3 Hours. U.
This seminar critically explores myths in dramatic literature from ancient to contemporary times, using select authors from different cultures. Analysis of the works will be based on both conventional and post-structuralist theories and specific emphasis will be on myths that have been adapted cross-culturally and/or in different time perspectives. LEC.

THR 702. Graduate Seminar in: ____, 3 Hours.
Course organized any given semester to study particular subject matter or to take advantage of special competency by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. LEC.

THR 703. Directed Readings in Theatre. 1-3 Hours.
Research reading and presentation of reports on specific subjects related to the students major area of specialization. May be repeated up to a total of six credits on petition. Required of all MFA Scenography students. IND.

THR 704. Study Abroad Topics in: ______, 1-6 Hours.
This course is designed for the study of special topics in Theatre. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

THR 707. Theatre Internship. 3-12 Hours.
Study with an approved theatre company. Emphasis may be in one or all of the following areas: acting, directing, stage management, technical theatre, promotion management. No more than six hours may be applied to an M.A. degree. Course will be graded satisfactory/unsatisfactory. Prerequisite: Consent of instructor. FLD.

THR 709. Advanced Dramatic Script Writing. 3 Hours.
The purpose of this course is to permit selected students, by consent of instructor, to develop or continue dramatic writing projects in theatre, film, television, and radio under the individual supervision of the instructor. LEC.

THR 711. Styles of Acting: Shakespearean. 3 Hours.
An approach to acting styles of the period, based on a study of the art, customs, spirit, and the theatre of the times applied to scene studies taken from the works of Shakespeare. Prerequisite: THR 106 and THR 206 or consent of instructor. LEC.

THR 713. Styles of Acting: Restoration and 18th Century English. 3 Hours.
An approach to acting styles of the period, based on a study of the art, customs, spirit, and the theatre of the times applied to scene studies taken from the works of English Restoration dramatists and those 18th century English playwrights writing in the Restoration mode. Prerequisite: THR 106 and THR 206 or consent of instructor. LEC.

THR 715. Problems and Techniques of Direction. 3 Hours.
Practical experience in directing. Prerequisite: THR 609. RSH.

THR 719. M.F.A. Production Seminar. 3 Hours.
To be taken by M.F.A. candidates during those semesters in which they are assigned to design one or more elements in a production to be mounted on one of our stages. Weekly critique and discussion of solutions to practical design problems from conception through execution. May be
repeated for a total of no more than six hours credit. Prerequisite: Consent of instructor. IND.

THR 725. Russian Theatre and Drama from Stanislavski and Chekhov to the Present. 3 Hours.
A study of the development of Russian theatre and dramatic literature from 1898 to the present. Lectures and readings in English. (Same as SLAV 562.) LEC.

THR 800. Introduction to Graduate Study in Theatre. 3 Hours.
Major emphasis is placed upon the principles of research, bibliographical data, and research methods useful in theatre and performance studies. The course should be taken at the beginning of the graduate student’s program. LEC.

THR 801. Professional Development Seminar. 1 Hour.
Preparation for faculty careers in theatre and related fields, including issues of research, teaching, and service. At least three hours per semester will be devoted to training in responsible scholarship. May be repeated for credit. RSH.

THR 802. Master's Projects. 3-6 Hours.
Advanced creative projects which may be elected by master’s degree candidates in lieu of thesis. RSH.

THR 803. Summer Theatre: Graduate. 1-3 Hours.
Provides graduate level experience in a wide range of theatre activity related to the summer theatre production or productions. Work may include activity in the following areas: acting, directing, design, technical theatre, voice and/or movement. Specialized skills are developed through individual classes, production preparation, and performance. Prerequisite: Consent of instructor. FLD.

THR 815. Advanced Play Production. 1-3 Hours.
Individually supervised directing of theatre pieces for public presentation. In special cases credit may be given for musical direction, choreography, or stage management. Prerequisite: THR 715. FLD.

THR 817. Theory of Acting and Directing. 3 Hours.
Readings, lectures, discussions and papers on acting and directing theory; is concerned with the divergence between presentational and representational acting methods and the emergence of directing art. Prerequisite: THR 609 or THR 715. LEC.

THR 819. Advanced M.F.A. Production Seminar. 3 Hours.
Continuation of THR 719, but production design assignments will be more complex and larger in scope. May be repeated for a total of no more than six hours credit. Prerequisite: Six hours of THR 719 and consent of instructor. IND.

THR 826. Seminar in African Theatre. 3 Hours.
A study of developments in African theatre in the 20th Century focusing on themes, concepts, styles, and critical perspectives. The course will investigate the idea of an "African theatre" and identify different periods and movements within national and international contexts. The analysis of representative works and authors will be grounded within appropriate theoretical frameworks. LEC.

THR 828. Seminar in American Theatre and Drama to 1895. 3 Hours.
Intensive investigation of selected topics. Individual study emphasized. LEC.

THR 829. Seminar in American Theatre and Drama from 1895. 3 Hours.
Intensive investigation of selected topics. Individual study emphasized. LEC.

THR 898. Investigation and Conference (for Master’s Students). 1-8 Hours.
Directed research and experimentation in theatre. Limited to eight hours credit toward the Master’s degree. RSH.

THR 899. Master’s Thesis. 1-6 Hours.
THE.

THR 901. Theatre Seminar in: ______. 3 Hours.
A graduate seminar devoted to selected historical, theoretical, or critical issues in theatre. Prerequisite: Consent of instructor. LEC.

THR 914. Theories of Race and Performance. 3 Hours.
Theories of Race and Performance is an inter-textual graduate course that explores interdisciplinary scholarship on race and performance. It seeks to translate these theories into practical application in various visual, audio and performance texts in popular culture. The course is divided into modules aimed at gaining an understanding of the shifting meaning of race over time and its relationship to ethnicity, gender, sexuality, class, nation, and power. How do we perform our identities? How is race constructed and maintained through performance? To begin to answer these questions, we will examine the ways in which racial identities are created through performance. SEM.

THR 915. Modern Theatre and Drama. 3 Hours.
A study of the movements in playwriting and theatrical production in Europe and America from the mid-19th century to World War II. Prerequisite: THR 525 and THR 526 or comparable courses. LEC.

THR 916. Postmodern Theatre and Drama. 3 Hours.
A study of developments in Europe and American playwriting, directing, acting, and design from World War II to the present. SEM.

THR 917. Dramatic Theory I. 3 Hours.
A survey of dramatic theory from Plato to Lessing. LEC.

THR 918. Dramatic Theory II. 3 Hours.
A survey of dramatic theory from Lessing to Langer. LEC.

THR 919. Dramatic Theory Seminar. 3 Hours.
Study in depth of selected theorists. Offered as determined by faculty availability and student interest. LEC.

THR 920. Practicum in Criticism. 3 Hours.
Contemporary approaches to theatre and drama criticism. Emphasis on actual practice, using a variety of critical methods. FLD.

THR 922. Theatre Historiography. 3 Hours.
This course focuses on the advanced study of research methods, subjects, interpretative paradigms, theoretical frameworks, and philosophies of history employed in contemporary approaches to writing and teaching theatre history. Prerequisite: THR 525 and THR 526 or equivalent. LEC.

THR 998. Investigation and Conference (for Doctoral Students). 1-8 Hours.
RSH.

THR 999. Doctoral Dissertation. 1-12 Hours.
THE.

Bachelor of Arts and Bachelor of General Studies in Theatre

Department of Theatre B.A. and B.G.S. students work intensively on acquiring theatre skills and knowledge in classrooms, studios, and laboratories. Undergraduates pursuing the B.A. or B.G.S. may choose from two emphases: Theatre, Culture, and Society or Performance.
The Performance concentration prepares theatre majors for a career as a professional actor. Through small-class studio courses and department productions, our program provides talented performing artists with a solid foundation in acting, movement, voice and speech, improvisation, and musical theatre.

The Theatre, Culture and Society concentration is designed for students interested in studying the cultural and social underpinnings of theatre and performance along with courses in acting, directing and design and with participation in University Theatre production. The TCS concentration provides the critical, analytical, and historical education that is the foundation of a liberal arts degree.

Both the Bachelor of Arts (B.A.) and Bachelor of General Studies (B.G.S.) require 40 hours. The primary distinctions between the B.A. and the B.G.S. degree are the foreign language requirement (required of the B.A. but not the B.G.S.) and 18 hours junior/senior concentration or minor (required for the B.G.S but not the B.A.).

There are no major admission requirements for the B.A. or B.G.S. in Theatre.

Students considering a theatre major should enroll in THR 106 and THR 101 and complete all 100- and 200-level courses in the first 2 years of study. It is imperative that theatre students earn practicum credit (THR101, 201, 301) early in their careers at KU.

Requirements for the B.A. and B.G.S. Major

Both the B.A. and B.G.S. require 40 hours. The distinction between the B.G.S. degree and the B.A. degree is found in College of Liberal Arts and Sciences requirements.

Theatre, Culture, and Society Emphasis

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours

Satisfied by 40 hours of major courses.

Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

1 Other THR courses (such as special topics) not listed among the electives above are normally eligible as substitutes with advisor’s permission.

Departmental Honors

An undergraduate interested in honors in theatre must present a written declaration of intention to the department’s honors coordinator as early as possible in the junior or senior year. The following are required:

1. A grade-point average at the time of declaration and at graduation of at least 3.25 overall and 3.5 in theatre courses.
2. A maximum of 6 hours in THR 498 Honors Seminar. Enrollment in this course must be approved by the honors coordinator. Students in the honors seminar work under the direction of one instructor for each semester. The instructor conducts an examination at the end of each semester’s work and assigns a grade. Credit only is given to students who complete the work assigned for any semester but do not complete the requirements for honors. Students may change area of interest or instructor at the beginning of a semester with the consent of the honors coordinator.
3. Satisfactory performance in a final oral examination given approximately one month before graduation.

Bachelor of Fine Arts in Theatre Design

Bachelor of Fine Arts (B.F.A.) in Theatre Design is intended as general preparation for the professional designer of scenery, costumes or lighting working in theatre and/or film or as preparation for graduate studies. Students learn through small-class studio courses, laboratories, and involvement in productions in the University Theatre. The degree is offered cooperatively by the Department of Theatre and Department of Visual Arts. Student in the B.F.A. Theatre Design take 69 hours in the Departments of Theatre, Visual Art, and Art History in addition to the KU Core and electives.

B.F.A. in Theatre Design Degree Requirements

The program leading to the B.F.A. degree in theatre design is offered cooperatively by the School of the Arts and the Department of Theatre. It requires 6 hours of foundational coursework, 63 additional hours in the major, and completion of the KU Core, as well as additional general electives, for a total of 120 hours.

Graduation Plan

With careful planning and commitment to a full-time course load, you can graduate in 4 years. Please consult the department for details.
The University of Kansas

THR 525  History of Theatre
THR 526  History of Theatre II

Theatre Design Concentration
THR 116  Scenographic Techniques  3
THR 316  Beginning Scene Design  3
THR 320  Beginning Costume Design  3
THR 324  Beginning Lighting Design  3

Theatre design electives from an approved list  9

History of Art:
HA 150  Western Art History I: Ancient Through Medieval Art
HA 151  Western Art History II: Renaissance to Contemporary Art

History of art or architecture electives

General Electives

• Additional credit hours of general electives are needed to meet the minimum total hours required for graduation.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 69 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://www.collegesas.ku.edu/GPAcalculator.shtml).

Minor in Theatre

The Department of Theatre welcomes non-majors who wish to learn more about acting, drama, design, theatre history, and technical theatre through the completion of a minor. Students minoring in theatre are welcome to audition for department productions and serve on backstage technical crews.

Requirements for the Minor

A minimum of 18 hours is required for the minor; 12 hours must be numbered 300 and above.

Theatre Minor Course Requirements

Minors must complete each of the following:

Theatre Core Knowledge and Skills (12)
Minors must complete courses in each of the following core areas:

Theatre Practicum I. Satisfied by:
THR 101  Theatre Practicum I  1
Acting I. Satisfied by:
THR 106  Acting I  3
Theatre Production. Satisfied by completion of one of the courses:
THR 216  Scenic Production
THR 220  Costume Production
THR 224  Lighting Production
Select two of the following:

History of Theatre I. Satisfied by:
THR 525  History of Theatre
History of Theatre II. Satisfied by:
THR 526  History of Theatre II
History of U.S. Theatre and Drama. Satisfied by:
THR 528  History of U.S. Theatre and Drama

Theatre Required Electives (6)
Satisfied by 2 courses (6 hours) from the following*:  6
THR 302  Undergraduate Seminar in: _____
THR 326  African Theatre and Drama
THR 327  African-American Theatre and Drama
THR 404  Children and Drama
THR 405  Children and Media
THR 527  Asian Theatre and Performance
THR 528  History of U.S. Theatre and Drama
THR 529  Race and the American Theatre
THR 603  Theatre for Young Audiences
THR 626  Myth and the Dramatist
THR 725  Russian Theatre and Drama from Stanislavsky and Chekhov to the Present

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all departmental courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://www.collegesas.ku.edu/GPAcalculator.shtml).

Master of Arts in Theatre

The Master of Arts in Theatre Studies helps students to begin developing a broad, comparative grasp of the major methods, approaches and protocols currently used in both the study and practice of theatre and related art forms. Special emphasis is placed on (1) an analytic
understanding of specific episodes in the history of theatre and similar 
genres of enactment, (2) the ability to grasp the assumptions and practical 
protocols that are or have been influential in the creation of theatrical art, 
and (3) the capacity to examine and appreciate the way theatre influences 
and is influenced by the context in which it occurs.

By virtue of its broad regard for the way context and live performance 
interact, the M.A. helps to prepare students for leadership roles in 
community and regional arts organizations, especially when course work 
is complemented by a thesis about the arts in community. Several states 
regard an M.A. in theatre to be a creditable enhancement of a teacher’s 
qualifications in grades K-12. In addition, the focus on those assumptions 
and history that shape theatre studies and production provide students 
with a strong transition to a Ph.D. program.

Graduate Admission

To be admitted, a student ordinarily is expected to have a Graduate 
Record Examination score of at 148 (verbal), 144 (quantitative), and 4.5 
(analytical writing). Students who took the GRE before the implementation 
of the analytical writing section (i.e., before October 2002) will be 
expected to have an analytical score of 600 or above.

How to Apply

To apply for Fall admission, please submit all application materials no 
later than: January 1 (to be considered for admission with financial 
support) or February 15 (for admission consideration without financial 
support). The Department does not admit new students for the Spring or 
Summer terms.

Please visit the Department of Theatre (http://www.theatre.ku.edu) for 
more information about graduate application materials required.

M.A. Degree Requirements

The Master of Arts in theatre is an academic degree, but students are 
expected to complete 6 hours in theatrical production. All M.A. students 
must write a thesis as the culmination of the degree.

To complete the M.A., the student must sustain a grade-point average of 
3.0 or higher through 33 graduate credit hours.

Requirements for the M.A. in Theatre

A total of 33 hours is required.

General Theatre Studies (15)

Select 15 hours of courses from graduate offerings in theatre history, dramatic literature, history and criticism: Of these 15 hours, up to 6 may be graduate courses from other areas such as film and media studies; child psychology; American studies; African and African-American studies; women, gender, and sexuality studies; developmental psychology; English; and pertinent offerings from language and culture programs.

Completion of the Degree (3)

An oral examination structured around a thesis based on scholarly and/or creative research:

| THR 899 | Master's Thesis | 3 |

All courses should be selected in consultation with the advisor.

Master of Fine Arts in Theatre Design-Scenography Concentration

The M.F.A. in Scenography is a three-year integrated program of study leading to a Master of Fine Arts degree, the terminal degree for professionals working in design for theatre, film, and television. Scenography classes are at the core of the curriculum and students will develop a portfolio in a wide variety of theatrical and performance genres. Students will design in both the large Crafton-Preyer proscenium stage and the William Inge Memorial theatre (black box). Opportunities exist to work with new technologies in theatre design, including Virtual Realities.

To be admitted, a prospective M.F.A. candidate must have a cumulative undergraduate GPA of at least 3.0 on a 4.0 scale and submit a design portfolio with work record and three letters of recommendation.

Visit the Department of Theatre (http://theatre.ku.edu) for more information about application materials required.

M.F.A. in Theatre Design with a Concentration in Scenography Degree Requirements

Scenography classes are at the core of the curriculum. While in the program, students will design at least 4 realized productions in the University Theatre program. They will do at least 1 lighting, 1 costume and 1 scenic design, and preferably a combination of 2 or all design areas for 1 production. Design assignments, made by the scenography faculty, will be based on the students’ experience and interests (i.e., a student with little experience in lighting design will be given a less challenging project in the smaller theatre).

Students work with the KU Theatre’s professional staff in the realization of their designs. Successful scenography students at the University of Kansas have come from a variety of backgrounds, including theatre, art and design, illustration and architecture. Students with deficiencies in
theatre production, theatre and/or art history, and painting and drawing may be required to take undergraduate courses in these areas, which could result in a longer program.

To complete the M.F.A., the student must sustain a grade-point average of 3.0 or higher through 60 graduate credit hours. The following guidelines govern the distribution of hours:

**Core Requirement (3)**

- THR 703 Directed Readings in Theatre 3

**Concentration Requirements (57)**

- THR 518 Scenography and the Classic Script 3
- THR 519 Scenography and the Modern Script 3
- THR 618 Scenography and the Musical Theatre 3
- THR 619 Scenography and the Contemporary Script 3
- THR 620 Scenography and the Experimental Production 3
- THR 719 M.F.A. Production Seminar (3 hour course taken 2 times) 6
- THR 801 Professional Development Seminar 1
- THR 802 Master’s Projects 6
- THR 819 Advanced M.F.A. Production Seminar 3
- THR 819 Advanced M.F.A. Production Seminar 3
- THR 898 Investigation and Conference (for Master’s Students) 6
- THR 899 Master’s Thesis 2
- Electives: no limit, but a minimum of 15 hours for a total of 60 hours 15

**Doctor of Philosophy in Theatre**

The purpose of the Ph.D. in Theatre is to develop leaders in the areas of both studies and practice. The curriculum requires an intense exposure to critical theory, history and historiography, and the craft and art of performance, especially directing. The majority of graduates become teachers in higher education, artists or both. Recent and former students from the M. A. and Ph.D. programs work or have worked across a wide array of academic and artistic settings, including Southern Methodist University, The Ohio State University System, Chapman College, Washburn University, CBS, Disney Productions, University of Costa Rica, University of Minnesota (Morehead), Southern Illinois University, University of Georgia, Texas Christian University, University of Minnesota (Duluth), University of Arizona, and Converse College.

Applicants for the Ph.D. program in Theatre must hold the M.A. or M.F.A. in theatre or a related field. To be admitted, a student will ordinarily be expected to have a Graduate Record Examination score of at least 148 (verbal), 144 (quantitative), and 4.5 (analytical writing). Students who took the GRE before the implementation of the analytical writing section (i.e., before October 2002) will be expected to have an analytical score of 600 or above. Applicants should also have a grade-point average of at least 3.2 for undergraduate and at least 3.5 for graduate work; and a master’s degree acceptable to the graduate faculty. Deficiencies in a student’s background may necessitate remedial courses. These courses do not count toward the degree requirements.

Visit the Department of Theatre (http://theatre.ku.edu) for more information about application materials required.

To apply for Fall admission into the Ph.D. program, please submit all application materials no later than: January 1 (to be considered for admission with financial support) or February 15 (for admission consideration without financial support.). The Department does not admit new students for the Spring or Summer terms.

**Ph.D. Degree Requirements**

The Ph.D. is an academic degree, but students must demonstrate competence in at least 1 production area. Normally the Ph.D. requires 60 hours not including Research Skills and Responsible Scholarship requirements. All courses must be chosen in consultation with an advisor.

**Core Requirements**

12 hours of core courses are required. In consultation with an advisor, students choose from departmental courses in theatre history, dramatic literature, theory, and criticism.

**Elective Requirements**

9 hours of electives are required. Elective courses focus on the academic study of theatre/performance history, theory, and related methodologies. Courses are selected with a graduate advisor to reflect the student’s special interest. Some courses may be taken outside theatre, for example in film and media studies, English, American studies, African and African-American studies, and history.

**Secondary Field Requirements**

Students choose 9 hours at the graduate level from outside the department to assist them in writing the dissertation. Courses are related to the student’s proposed specialization. (See examples under Elective Requirements.)

**Production Courses**

6 hours of production courses are required. To become competent artists as well as developing research scholars, students choose a sequence of graduate courses in either scenography or directing.

**Research Skills and Responsible Scholarship**

Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed under Degree Requirements in Graduate Studies section of the online catalog.

**Comprehensive Examination**

The comprehensive examination (6 credit hours) is an essential element of the doctoral program, providing an opportunity for students to focus and consolidate the diverse strands of their graduate course work, to demonstrate competence for teaching in particular subject areas, and to establish a strong foundation for moving on to the dissertation. It consists of 3 parts:

1. A written examination, which covers 4 or 5 areas of expertise. Ordinarily, each area corresponds to a member of the student’s committee.
2. Submission of 2 publishable papers of article length (5,000 to 8,000 words) that demonstrate the student’s ability to research and write original scholarship at a level appropriate to the field. Publishable papers may be revised versions of papers submitted in KU courses. Publishable papers must be submitted on the first day of the written examination.
3. An oral examination, given 2 to 4 weeks after the written examination. The oral examination lasts about 90 minutes and may revisit material covered in the written examination, the publishable papers, and/or other material as deemed appropriate by the committee. While preparing for the examination, students may enroll twice in THR 998 Investigation and Conference (for Doctoral Students).

Dissertation

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled in one or more hours of dissertation or programmatically equivalent coursework that both moves the student towards degree completion and reflects, as accurately as possible, the candidate’s demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester and 3 hours a summer session.

Department of Visual Art

Introduction

The University of Kansas is a member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of those organizations.

Undergraduate Programs

Advanced Placement in Art and Design

Students who score 3, 4, or 5 on the CEEB Advanced Placement Examination may receive up to 3 credit hours in art studio electives. Advanced placement credit does not exempt students from foundations requirements.

Advising

Students admitted to work toward B.F.A., B.A., or B.A.E. degrees are advised by the advising specialist until foundations courses are complete, usually two semesters. After a student has completed 12 hours of foundations courses, he or she is advised by faculty members in their chosen concentration. Check sheets describing each program in complete detail are available from the Art and Design office, 300 Art and Design Building, or online (http://art.ku.edu). History of Art, information is available from the Kress Foundation Department of Art History (http://www2.ku.edu/~kuarthis). Students are encouraged to seek advice from any faculty member in a specific area of interest.

Students are expected to spend time outside of class working in the studio. For each credit hour in class another three hours of work will be expected outside of class time. It is normally expected that for 3 credit hours of studio a student will spend 9-15 hours per week working and studying for the entire 15 weeks during the semester.

Graduate Programs

The Department of Visual Art offers graduate programs leading to the Master of Fine Arts degree in visual art. Concentrations include ceramics, drawing and painting, expanded media, fibers, metalsmithing and jewelry, printmaking, and sculpture. A Master of Arts degree in visual art education and graduate licensure in art education are also available through the Department of Visual Art.

Courses

ADSC 177. First Year Seminar: _____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Advanced Design Studies College. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ADSC 560. Topics in Design: _____. 1-3 Hours.
A study of different topics in different semesters in a special area of interest to a staff member and suitable qualified students. May be repeated for credit. Prerequisite: Junior standing in department. LAB.

ADSC 580. Special Problems in Design. 1-6 Hours.
A study of current problems in design or crafts with an emphasis on research. Special problems proposals must be discussed with and approved by the instructor and advisor prior to enrollment in the course. A student may not take more than six credit hours of special problems in any one semester. Prerequisite: Junior standing in department. IND.

ADSC 810. Orientation Seminar. 1 Hour.
Studies directed to development of a thesis plan. Required of all graduate students. Offered in fall semester only. Graded S or F. LEC.

ART 101. Drawing I. 3 Hours. GE11 / U.
Basic problems in drawing. LAB.

ART 102. Drawing II. 3 Hours.
Continuation of ART 101. Prerequisite: ART 101. LAB.

ART 103. Art Concepts and Practice. 3 Hours. U.
A companion course to ART 104. Lecture and studio experiences across disciplines emphasizing conceptual fundamentals, technical/skill development, visual sensibility, critical thinking and professional topics in art. LEC.

ART 104. Art Principles and Practice. 3 Hours. U.
A companion course to ART 103. Lecture and studio experiences across disciplines emphasizing conceptual fundamentals, technical/skill development, visual sensibility, critical thinking and professional topics in art. LEC.

ART 120. Fundamentals of Drawing and Painting. 3 Hours.
Open to all university students. Specifically for students with limited or no previous experience. An exploration of basic technical and expressive possibilities in drawing and painting; may include field trips, films, visiting lecturers. Six hours scheduled studio activity and three hours outside work weekly. LAB.

ART 121. Fundamentals of Printmaking. 3 Hours.
Open to all university students. Specifically for students with limited or no previous experience. An exploration of basic technical and expressive possibilities in printmaking, including woodcut, etching, lithography and silk screen; may include field trips, films, visiting lecturers. Six hours scheduled studio activity and three hours outside work weekly. LAB.

ART 122. Fundamentals of Sculpture. 3 Hours.
Open to all university students. Specifically for students with limited or no previous experience. An exploration of basic technical and expressive possibilities in three-dimensional form and space, including sculpture, modeling, carving, and construction; may include field trips, films, visiting lecturers. Six hours scheduled studio activity and three hours outside work weekly. LAB.
ART 123. Fundamentals of Expanded Media. 3 Hours. GE3H / U.
Open to all university students. Specifically for students with limited or no previous experience. An exploration of basic technical and expressive possibilities in Expanded Media, including Installation, Performance, Video and other Digital technologies; may include field trips, films, and/ or visiting lecturers. Six hours scheduled studio activity and three hours outside work weekly. LAB.

ART 130. Fundamentals of Fiber Forms. 3 Hours. U.
Open to all university students. Studio exploration of fibers as an art form and means of personal expression. Emphasis is placed on three-dimensional objects. A variety of interlacement, construction, and dye techniques are introduced. LAB.

ART 131. Fundamentals of Ceramics. 3 Hours.
Open to all university students. Specifically for students with limited or no previous experience. An introduction to ceramics including throwing, handbuilding, glazing, firing, and related activities. LAB.

ART 132. Fundamentals of Metalsmithing/Jewelry. 3 Hours. GE3H.
Open to all university students. Specifically for students with limited or no previous experience. A comprehensive study of the field of jewelry and metalsmithing with an emphasis on the tools, processes, and techniques used in the design and fabrication of objects from metals such as aluminum, brass, copper, bronze, sterling and related materials. Studio experience will include lectures, slide presentations, demonstrations, visiting artist, and student projects. LAB.

ART 133. Fundamentals of Fibers. 3 Hours. GE3H / U.
Open to all university students. Studio exploration of fibers as an art form and means of personal expression. A variety of dyeing, construction, and surface embellishment techniques will be introduced. LAB.

ART 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Art. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ART 201. Color Theory. 3 Hours.
An introduction to the basic color theories and their application. Presentation of the relationship between pigment and light, and of additive and subtractive color mixing. Prerequisite: ART 101, and ART 103 or ART 104. LAB.

ART 300. Special Topics in Visual Art: ______. 1-4 Hours.
Course to be offered in related areas of research, mixed media or interdisciplinary exploration. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LAB.

ART 305. Visual Language. 3 Hours. H.
This course explores visual language and its relationship to cultural meaning. We examine the ways that cultural experience both influences and is influenced by artistic expression. An investigation of artistic practice and its basic elements and principles is used to demonstrate the connections between visual perception and the interpretation of visual experience. Examples from the arts and popular culture are used to illustrate the ways that we create meaning from the things we see. This course is open to all university students. Prerequisite: ENGL 101 and ENGL 102 or equivalent, or completion of the KU Core Written Communication requirements (Goal 2.1). LEC.

ART 310. Build Smart. 3 Hours. U.
Introduction to the experience and culture of building projects by hand. Students analyze and determine the best ways to build. Students also become familiar with tools, machines, building practices and material necessary for wood and steel fabrication. Prerequisite: ART 103, ART 104, or permission of the instructor. LEC.

ART 375. Directed Readings in Visual Art. 1-3 Hours. U.
Directed reading in specific areas of visual art. May be repeated for credit in subsequent semesters. Prerequisite: ART 102, ART 103 and ART 104; and six hours of Visual Art courses, or permission of instructor. IND.

ART 395. Study Abroad Topics in: ______. 1-6 Hours. H.
This course is designed for the study of special topics in Visual Art. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. Open to all students. LEC.

ART 500. Advanced Special Topics in Visual Art: ______. 1-4 Hours.
Course to be offered in related areas of research, mixed media or interdisciplinary exploration. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Visual Art courses, or permission of instructor. LEC.

ART 540. Professional Activities Seminar. 3 Hours.
Comprehensive development of skills and strategies needed to pursue a career as a professional studio artist. Prerequisite: Twenty-four hours of departmental electives or permission of instructor. LEC.

ART 575. Advanced Directed Reading in Visual Art. 1-3 Hours.
Directed reading in specific areas of visual art. May be repeated for credit in subsequent semesters. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Visual Art courses, or permission of instructor. IND.

ART 590. Internship in Visual Art. 1-3 Hours. U.
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded on a satisfactory/unsatisfactory basis, according to the written recommendation provided by the internship supervisor to the faculty advisor. Prerequisite: ART 102, ART 103, and ART 104; and fifteen hours of Visual Art courses; and prerequisite of instructor. FLD.

ART 595. Advanced Study Abroad Topics in: ______. 1-6 Hours. H.
This course is designed for the study of special topics in Visual Art at the senior/graduate level. Credit for course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. Open to seniors and graduate level students. LEC.

ART 598. Special Topics: Studio Theory and Criticism. 3 Hours.
Lecture, discussion, and supervised research in current topics related to contemporary studio theory and criticism. May be repeated for credit as topics vary. This course will be counted as free electives in course distribution. Prerequisite: Eighteen hours of departmental electives. LEC.

Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Visual Art courses; and permission of instructor. Does not fulfill ART 695/ART 696 requirement. IND.

ART 695. Directed Study I. 3 Hours.
Individual studio activity under direction of faculty advisor; capstone experience. Prerequisite: Thirty hours of departmental electives, consent of department, and permission of instructor. IND.
ART 696. Directed Study II. 4 Hours. AE61.
Continuation of ART 695; capstone experience. May be repeated for credit in subsequent semesters. Prerequisite: ART 695 and permission of instructor. IND.

ART 801. Directed Study III. 2-5 Hours.
Individual studio activity under the direction of faculty member. May be repeated for credit in subsequent semesters. Prerequisite: Permission of graduate director and enrollment in the Visual Art MFA program. RSH.

ART 802. Directed Study IV. 2-5 Hours.
Continuation of Directed Study III. Prerequisite: Enrollment in the Visual Art MFA Program. RSH.

ART 803. Directed Study V. 2-5 Hours.
Continuation of Directed Study IV. Prerequisite: Enrollment in the Visual Art MFA Program. RSH.

ART 805. Graduate Studio. 1-3 Hours.
Individual graduate studio research in visual art. Course content to be determined by the student under the supervision of a graduate faculty member. May be repeated for credit. Prerequisite: Graduate standing in The School of The Arts and permission of the instructor. RSH.

ART 861. Directed Reading in Visual Art. 1-3 Hours.
Research reading and presentation of reports on specific subjects related to the student’s major area of specialization. Prerequisite: Enrollment in the MFA Program in the Department of Visual Art. RSH.

ART 877. Graduate Seminar. 3 Hours.
The graduate seminar emphasizes professional preparation for contemporary artists focusing on writing skills, oral presentations, critiques of individual creative research/artwork, critical thinking about and visual analysis of current art forms and contemporary approaches to the teaching of studio art. Prerequisite: Admission to the Graduate Program in Visual Art. SEM.

ART 898. Special Topics: Studio Theory and Criticism. 3 Hours.
Lecture, discussion, and supervised research in current topics related to contemporary studio theory and criticism. May be repeated for credit as topics vary. This course will be counted as a graduate level academic elective in course and credit distribution. LEC.

ART 899. Graduate Seminar. 1 Hour.
Weekly discussion of issues and/or work in art. (Graded on a satisfactory/ or F basis.) Repeat for credit in subsequent semesters. SEM.

ART 906. Graduate Studio. 1-3 Hours.
Individual graduate studio research in visual art. Course content to be determined by the student under the supervision of a graduate faculty member. May be repeated for credit. Prerequisite: ART 805 and permission of the instructor. RSH.

Original research in visual art culminating in a thesis exhibition. May be repeated for credit. Prerequisite: Thirty-six credit hours of graduate credit and permission of the graduate review committee. THE.

CER 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Ceramics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

CER 208. Ceramics I. 3 Hours.
The development of form and surface through the use of handbuilding and wheel thrown techniques. Stoneware and Raku are explored. Prerequisite: ART 102 and ART 104. LAB.

CER 300. Special Topics in Ceramics: ______. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

CER 301. Ceramics II. 3 Hours.
A continuation of ART 131 and/or CER 208 with emphasis in firing low temperature ceramics. An introduction to glaze formulation and firing procedures through the use of earthenware and low temperature talc bodies. Prerequisite: ART 131 or CER 208. LAB.

CER 402. Ceramics III. 3 Hours.
A study of high fire ceramics using stoneware and porcelain. The development of ceramic forms and shapes utilizing traditional and nontraditional techniques such as salt glaze, wood firing, oxidation, and reductions. Prerequisite: ART 131 or CER 208. LAB.

CER 500. Advanced Special Topics Ceramics: ______. 1-4 Hours. U.
Course to be offered in an area of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Ceramics courses, or permission of instructor. LEC.

CER 504. Kilns. 3 Hours.
The principles in kiln design, including up-draft, down-draft, cross-draft, and electric kilns, and burner technology. Prerequisite: CER 301. LEC.

CER 505. Clay and Glaze Formulation. 3 Hours.
Formulation of the various clay bodies and glazes associated with ceramics. Prerequisite: CER 301. LEC.

CER 506. Production. 6 Hours.
Procedures, techniques, problems, and solutions for setting up and operating a production pottery studio, including the development of ceramic forms and glazes related to marketability and design and mold production for industry. May be repeated for credit. Prerequisite: CER 301 and CER 302. LAB.

CER 515. Advanced Ceramics I. 3-6 Hours. AE61.
Development of individual direction in ceramics based on experience, research, and skills acquired in previous courses; capstone experience. May be repeated for credit. Prerequisite: CER 301 and CER 402. LAB.

CER 520. Advanced Ceramics II. 3-6 Hours. AE61 / U.
Continuation of CER 515; capstone experience. May be repeated for credit. Prerequisite: CER 515. LAB.

CER 590. Internship in Ceramics. 1-3 Hours. U.
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded on a satisfactory/unsatisfactory basis, according to the written recommendation provided by the internship supervisor to the faculty advisor. Prerequisite: ART 102, ART 103, and ART 104; and fifteen hours of Visual Art courses; and permission of instructor. FLD.

CER 599. Individual Studies in Ceramics. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Ceramics courses or permission of instructor. IND.

CER 715. Ceramics. 2-6 Hours.
Individual research. Prerequisite: CER 515 or equivalent. RSH.
CER 725. Glass. 2-6 Hours.
Individual research. Prerequisite: Approval of instructor. RSH.

CER 815. Ceramics. 2-6 Hours.
Continuation of CER 805. RSH.

CER 825. Glass. 2-6 Hours.
Individual research. Prerequisite: Approval of instructor. RSH.

DRWG 177. First Year Seminar: _____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Drawing. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

DRWG 203. Drawing III. 3 Hours.
Advanced problems in drawing. Prerequisite: ART 102. LAB.

DRWG 213. Life Drawing I. 3 Hours.
Figure drawing. Prerequisite: ART 102 and ART 103 or ART 104. LAB.

DRWG 300. Special Topics in Drawing: _____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LAB.

DRWG 304. Drawing IV. 3 Hours.
Continuation of DRWG 203. Prerequisite: DRWG 203. LAB.

DRWG 314. Life Drawing II. 3 Hours.
Continuation of DRWG 213. Prerequisite: DRWG 213. LAB.

DRWG 318. Life Drawing II, Honors. 3 Hours.
Figure drawing, a continuation of DRWG 213. Prerequisite: DRWG 213; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

DRWG 335. Special Topics in Drawing: _____. 3 Hours.
Course to be offered in area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: DRWG 203, or DRWG 213, or permission of instructor. LAB.

DRWG 500. Advanced Special Topics in Drawing: _____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Drawing courses, or permission of instructor. LEC.

DRWG 505. Drawing V. 3 Hours.
Continuation of DRWG 304. Prerequisite: DRWG 304. LAB.

DRWG 506. Drawing VI. 3 Hours.
Continuation of DRWG 505. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 505. LAB.

DRWG 515. Life Drawing III. 3 Hours.
Continuation of DRWG 314. Prerequisite: DRWG 314. LAB.

DRWG 516. Life Drawing IV. 3 Hours.
Continuation of DRWG 515. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 515. LAB.

DRWG 518. Life Drawing III, Honors. 3 Hours.
Figure drawing, a continuation of DRWG 314 or DRWG 318. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 314 or DRWG 318; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

DRWG 519. Life Drawing IV, Honors. 3 Hours.
Figure drawing, a continuation of DRWG 515 or DRWG 518. May be repeated for credit in subsequent semesters. Prerequisite: DRWG 515 or DRWG 518; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

DRWG 535. Special Topics in Drawing: _____. 3 Hours.
Course to be offered in area of special interest to individual faculty, and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: 12 hours of drawing and permission of instructor. LAB.

DRWG 599. Individual Studies in Drawing. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Drawing courses, or permission of instructor. IND.

DRWG 807. Drawing VII. 3 Hours.
Individual research in drawing. Prerequisite: DRWG 506. RSH.

DRWG 817. Life Drawing V. 3 Hours.
Individual research in figure drawing. Prerequisite: DRWG 516. RSH.

DRWG 908. Drawing VIII. 3 Hours.
Continuation of DRWG 807. Prerequisite: DRWG 807. RSH.

DRWG 918. Life Drawing VI. 3 Hours.
Continuation of DRWG 817. Prerequisite: DRWG 817. RSH.

EXM 177. First Year Seminar: _____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Expanded Media. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

EXM 274. Expanded Media. 3 Hours. U.
Beginning course to introduce the fundamental concepts, strategies, and technologies that comprise the Expanded Media area of the Department of Visual Art: Installation, Performance, and Digital Image. Emphasis is placed on forming ideas and strategies, and creating artwork that considers the core connections within Expanded Media: time, space, the body, the viewer, and society at large. Computer-based technologies and time-based media that are inherent to Expanded Media practice support studio assignments. Coursework includes the investigation and discussion of historic precedents and the development of an appropriate critical dialogue with which to discuss their work. Prerequisite: ART 102, ART 103, and ART 104. LAB.

EXM 300. Special Topics in Expanded Media: _____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

EXM 301. The Digital Image I. 3 Hours.
Introduction to various still digital processes and skills that encourage the use of digital imagery within a variety of other media. Focus on content issues as they relate to development of artwork incorporating digital imagery. LAB.
EXM 302. Performance Art I. 3 Hours. U.
An introduction to the understanding and production of performance art. Students gain proficiency in conceptualization and production of performance time-based art in an Interdisciplinary art-making environment. Prerequisite: ART 102, ART 103, and ART 104. LAB.

EXM 303. Intermedia I. 3 Hours.
An introduction to the use/handling and integration of diverse, new and traditional materials, techniques and processes. Problems will involve strategies for discovering and managing combinations of drawn, painted, digital and constructed forms. Studio sessions will include research, lecture, demos, and guest speakers. Prerequisite: Permission of instructor. LAB.

EXM 307. Installation Art I. 3 Hours. U.
An introduction to the understanding and production of installed art environments using a variety of media and approaches to art-making. Students gain proficiency in conceptualization and production of installation art in an interdisciplinary art-making environment. Prerequisite: ART 102, ART 103, and ART 104. LAB.

EXM 314. Alternative Approaches in Photography I. 3 Hours. U.
An introduction to the understanding and production of art-making using alternative approaches in photography. Students gain proficiency in conceptualization and production of artwork using alternative approaches in photography in an interdisciplinary art-making environment. Prerequisite: ART 102, ART 103, and ART 104. LAB.

EXM 326. Video and Time-Based Media I. 3 Hours. U.
An introduction to the understanding and production of video and time-based art. Students gain proficiency in conceptualization and production of video and time-based art in an interdisciplinary art-making environment. Prerequisite: EXM 274. LAB.

EXM 500. Advanced Special Topics in Expanded Media: ______. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

EXM 501. The Digital Image II. 3 Hours.
Continuation of EXM 301, The Digital Image I. May be repeated for credit. LAB.

EXM 503. Intermedia II. 3 Hours.
Continuation of EXM 303, Intermedia I. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

EXM 514. Alternative Approaches in Photography II. 3 Hours. U.
Continuation of EXM 314. Prerequisite: EXM 314. LAB.

EXM 526. Video and Time-Based Media II. 3 Hours. U.
Continuation of EXM 326. Prerequisite: EXM 326. LAB.

EXM 535. Intermediate Expanded Media. 3 Hours.
Continuation of Expanded Media studio research. Prerequisite: Two (200- and/or 300-level) Expanded Media courses. LAB.

EXM 536. Intermediate Expanded Media, Honors. 3 Hours.
Continuation of Expanded Media studio research. Prerequisite: Two (200- and/or 300-level) Expanded Media courses; membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department. LAB.

EXM 537. Advanced Expanded Media. 3 Hours.
Continuation of EXM 535. May be repeated for credit. Prerequisite: EXM 535 or EXM 536. LAB.

EXM 538. Advanced Expanded Media, Honors. 3 Hours.
Continuation of EXM 536. May be repeated for credit. Prerequisite: EXM 535 or EXM 536; membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department. LAB.

EXM 541. Graduate Performance Art. 3 Hours.
Students will gain proficiency in conceptualization and production of performance time-based art in an interdisciplinary art-making environment. Prerequisite: Permission of instructor. LAB.

EXM 542. Graduate Installation Art. 3 Hours.
Advanced problems toward the creation of environments using a variety of media including traditional and non-traditional approaches to art-making. Prerequisite: Permission of instructor. LAB.

EXM 543. Graduate: The Digital Image. 3 Hours.
Advanced work focusing on content issues as they relate to development of artwork incorporating digital imagery. Prerequisite: Permission of instructor. LAB.

EXM 544. Graduate Intermedia. 3 Hours.
Advanced work in the use/handling and integration of diverse, new and traditional materials, techniques and processes. Advanced problems will involve strategies for discovering and managing combinations of drawn, painted, digital, and constructed forms. Studio sessions will include research, lecture, demos, and guest speakers. Prerequisite: Permission of instructor. LAB.

EXM 546. Graduate Expanded Media V. 3 Hours.
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor. LAB.

EXM 573. Performance Art II. 3 Hours. U.
Continuation of EXM 302. Prerequisite: EXM 302. LAB.

EXM 574. Performance Art II, Honors. 3 Hours. U.
Continuation of EXM 302. Prerequisite: EXM 302; and membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department. LAB.

EXM 577. Installation Art II. 3 Hours. U.
Continuation of EXM 307. Prerequisite: EXM 307. LAB.

EXM 578. Installation Art II, Honors. 3 Hours. U.
Continuation of EXM 307. Prerequisite: EXM 307; and membership in the University Honors Program or 3.25 minimum cumulative grade point average with permission of the department. LAB.

EXM 599. Individual Studies in Expanded Media. 1-6 Hours. AE61 / U.
Individual studio activity: capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Expanded Media courses, of permission of instructor. IND.

EXM 846. Graduate Expanded Media VI. 3 Hours.
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor. LAB.

EXM 946. Graduate Expanded Media VII. 3 Hours.
Continuation of Expanded Media studio research. Prerequisite: Permission of instructor. LAB.

METL 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Metalsmithing/Jewelry. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year
Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

METL 211. Jewelry. 3 Hours. GE3S.
Introduction to metalsmithing and jewelry design, materials and processes. Student projects explore the joining, forming, and surface embellishment of metals such as copper, brass, bronze, and sterling. Prerequisites: ART 102 and ART 104. LAB.

METL 300. Special Topics in Metalsmithing: ______. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

METL 301. Introduction to Casting for Jewelry. 3 Hours.
Introduction to casting and mold making processes used for jewelry and small sculpture. Students explore various methods and materials for creating models for casting in bronze or silver including wax carving, wax modeling, and the use of natural and synthetic materials as models. Models are cast using centrifugal and vacuum casting processes. Basic mold making in clay and silicone are also explored. Prerequisite: ART 132 or METL 211. LAB.

METL 302. Professional Practices. 3 Hours.
The development of a portfolio including designing, rendering, and model making for future projects. Photographing completed objects and discussing professional aspects of the jewelry/metalsmithing field. Prerequisite: Six hours of metalsmithing. LAB.

METL 360. Holloware. 3 Hours.
Problems related to specific smithing techniques such as raising, stretching, shell structures and seam fabrications. Metal manipulation on a large scale. Prerequisite: METL 301. LAB.

METL 362. Metalsmithing. 6 Hours.
Advanced metalworking with an emphasis on the refinement of design and techniques. Processes may include linkage, marriage of metals, metal inlays, hinge and catch fabrication. Prerequisite: METL 301. LAB.

METL 364. Enameling. 6 Hours.
Problems of basic and advanced enameling as applied to jewelry design and metalsmithing objects. Exploration of major enameling techniques: such as limoges, cloissoné, champlevé, and bassetteaille. Prerequisite: Six hours of metalsmithing or consent of instructor. LAB.

METL 500. Advanced Special Topics in Metalsmithing: ______. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

METL 501. Seminar. 3 Hours.
Lectures and demonstrations on techniques of contemporary interest outside of typical classroom activity. Prerequisite: Six hours of metalsmithing. LEC.

METL 503. Gemology. 3 Hours. H.
Students study the optical and physical characteristics of gemstones in order to identify them using gemological instruments. This laboratory and discussion class explores related topics including the principles of optics that support this methodology, history and geographical distribution of gemstones, gemstone cutting and pearl farming, the history of DeBeers and the development of the world demand for diamond, quality analysis of diamond, colored gemstones and pearls, including the history of diamond grading, the development and identification of synthetics, imitations and laboratory enhancements as well as the use of gemstones in designing jewelry. Prerequisite: ART 132. LAB.

METL 504. A History of Jewelry. 3 Hours. H.
This course explores the history from Sumeria to the 21st century of the use of metals and gemstones in the creation of decorative art for personal adornment. Students explore the evolution of the role of jewelry in ancient culture and modern society and survey individuals whose ideas and work influenced generations of goldsmiths and jewelers around the globe. The class studies primitive tools and modern manufacturing techniques, the history of gemstone cutting and setting and the origin and development of gemstones as symbols. Prerequisite: ART 132. LEC.

METL 505. Digital Jewelry Design I. 3 Hours. H.
Matrix is a 3-D CAD program based on Rhino developed by Rhino, specifically for jewelry design. The goal of this course is to instruct beginners in the Matrix design program. Students learn to transform their 2-D designs from their sketchbooks into 3-D models in Matrix, which can be milled in wax, and cast in metal. Students also learn how to render their 3-D Matrix models to appear as if they were a finished object. The class time is structured as a combination of instructor-led tutorials and working labs. Prerequisite: ART 132. LAB.

METL 506. Digital Jewelry Design II. 3 Hours. H.
The second semester of Matrix increases the operating and design skills building on the knowledge of DG I. The focus of the class is producing wax models on the Revo Digital Mill.Digi II covers the advanced modeling skills including T-spline and Rhino. Students also learn how to make a customized tool path for Revo C mill program and how to solve milling problems. Students also learn how to convert Rhino files to produce a 3D print for outsourcing to other 3D modeling programs. Prerequisite: ART 132, METL 301, METL 505. LAB.

METL 515. Advanced Metals I. 6 Hours. AE61.
Emphasis on individual design aesthetic through intensive designing, rendering, and modelmaking as preparation for fabricated pieces of jewelry, holloware, and/or small objects; capstone experience. Prerequisite: METL 362. LAB.

METL 520. Advanced Metals II. 6 Hours. AE61 / U.
Continuation of METL 515; capstone experience. This course requires a final presentation of a complete portfolio including resume, renderings and photographs of the finished work. Prerequisite: METL 515. LAB.

METL 590. Internship in Metalsmithing/Jewelry. 1-3 Hours. U.
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded on a satisfactory/unsatisfactory basis, according to the written recommendation provided by the internship supervisor to the faculty advisor. Prerequisite: ART 102, and ART 103, and ART 104; and fifteen hours of Visual Art Courses; and permission of instructor. FLD.

METL 599. Individual Studies in Metalsmithing/Jewelry. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Metalsmithing/Jewelry courses, or permission of instructor. IND.

METL 715. Metals/Jewelry. 2-6 Hours.
Individual research. Prerequisite: METL 515 or equivalent. RSH.
METL 815. Metals/Jewelry. 2-6 Hours.
Continuation of METL 715. RSH.

PNTG 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Painting. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

PNTG 263. Painting I. 3 Hours.
Basic problems in painting. Prerequisite: ART 102, and ART 103 or ART 104. LAB.

PNTG 300. Special Topics in Painting: ______. 1-4 Hours.
Course to be offered in area of studio activity of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

PNTG 337. Watercolor. 3 Hours.
Sessons deal with the preparation of watercolor paints and equipment, but the main emphasis is placed on relational concepts affecting tone, structure, and unity in work. While the students are expected to explore some of the traditional approaches to watercolor, they also are encouraged to work with new and innovative ones. May be repeated for credit. Prerequisite: PNTG 263 or permission of instructor. LAB.

PNTG 338. Landscape Painting. 3 Hours.
An introduction to landscape painting. Considerable work is done out-of-doors. Emphasis is placed upon experiencing the environment and the development of individual approach. May be repeated for credit. Prerequisite: PNTG 263 and permission of instructor. LAB.

PNTG 364. Painting II. 3 Hours.
Continuation of PNTG 263. Prerequisite: PNTG 263. LAB.

PNTG 366. Painting IV. 3 Hours.
Continuation of PNTG 364. Prerequisite: PNTG 364 or PNTG 368. LAB.

PNTG 369. Painting IV, Honors. 3 Hours.
Continuation of PNTG 364 or PNTG 368. Prerequisite: PNTG 364 or PNTG 368; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. IND.

PNTG 500. Advanced Special Topics in Painting: ______. 1-4 Hours.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Painting courses, or permission of instructor. LAB.

PNTG 569. Painting IV, Honors. 3 Hours.
Continuation of PNTG 565 or PNTG 568. Prerequisite: PNTG 565 or PNTG 568; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.
PRNT 233. Lithography I. 3 Hours.
Introduction to lithography. Prerequisite: ART 102, and ART 103 or ART 104. LAB.

PRNT 243. Serigraphy I. 3 Hours.
Introduction to serigraphy. Prerequisite: ART 102, and ART 103 or ART 104. LAB.

PRNT 300. Special Topics in Printmaking: ______. 3 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; or permission of instructor. LEC.

PRNT 324. Intaglio II. 3 Hours.
Continuation of PRNT 223. Prerequisite: PRNT 223, or permission of instructor. LAB.

PRNT 325. Relief II. 3 Hours.
Continuation of PRNT 224. Prerequisite: PRNT 224, or permission of instructor. LAB.

PRNT 328. Intaglio II, Honors. 3 Hours.
Continuation of PRNT 223. Prerequisite: PRNT 223; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PRNT 329. Relief II, Honors. 3 Hours.
Continuation of PRNT 224. Prerequisite: PRNT 224; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PRNT 334. Lithography II. 3 Hours.
Continuation of PRNT 233. Prerequisite: PRNT 233 or permission of instructor. LAB.

PRNT 338. Lithography II, Honors. 3 Hours.
Continuation of PRNT 233. Prerequisite: PRNT 233; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PRNT 344. Serigraphy II. 3 Hours.
Continuation of PRNT 243. Prerequisite: PRNT 243 or permission of instructor. LAB.

PRNT 348. Special Problems in Printmaking--Color Printing in Relief and Intaglio. 3 Hours.
Multiple block and plate printing in color. (This course is not regularly offered. The current Schedule of Classes should be consulted.) Prerequisite: PRNT 223 and permission of instructor. LAB.

PRNT 349. Serigraphy II, Honors. 3 Hours.
Continuation of PRNT 243. Prerequisite: PRNT 243; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

PRNT 500. Advanced Special Topics in Printmaking: ______. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Printmaking courses, or permission of instructor. LEC.

PRNT 523. Printmaking III A (Intaglio). 3 Hours.
Prerequisite: PRNT 324 or permission of instructor. LAB.

PRNT 524. Printmaking III B (Lithography). 3 Hours.
Prerequisite: PRNT 334 or permission of instructor. LAB.

PRNT 525. Printmaking III C (Serigraphy). 3 Hours.
Prerequisite: PRNT 344 or permission of instructor. LAB.

PRNT 526. Printmaking IV A (Intaglio). 3 Hours.
Prerequisite: PRNT 523 or permission of instructor. LAB.

PRNT 527. Printmaking IV B (Lithography). 3 Hours.
Prerequisite: PRNT 524 or permission of instructor. LAB.

PRNT 528. Printmaking IV C (Serigraphy). 3 Hours.
Prerequisite: PRNT 525 or permission of instructor. LAB.

PRNT 599. Individual Studies in Printmaking. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours may apply toward the bachelor’s degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Printmaking courses, or permission of instructor. IND.

PRNT 662. Printmaking V. 3 Hours.
Individual research in printmaking. Prerequisite: PRNT 526 or PRNT 527 or PRNT 528. LAB.

PRNT 663. Printmaking VI. 3 Hours.
Continuation of PRNT 662. Prerequisite: PRNT 662. LAB.

PRNT 802. Special Problems in Printmaking. 3 Hours.
Individual research in printmaking: course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: PRNT 579 and permission of instructor. RSH.

PRNT 827. Printmaking VII. 3 Hours.
Continuation of PRNT 827. Prerequisite: PRNT 827. LAB.

SCUL 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Sculpture. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

SCUL 253. Sculpture I. 3 Hours.
Introduction to sculpture. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor. LAB.

SCUL 300. Special Topics in Sculpture: ______. 1-4 Hours.
Course to be offered in an area of studio activity of specific interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor. LAB.

SCUL 349. Metal and Glass Casting. 3 Hours.
A course in foundry techniques as related to sculpture. Both traditional and experimental procedures for casting bronze, aluminum, and iron sculpture will be explored. May be repeated for credit. Prerequisite: SCUL 253. LAB.
SCUL 350. Direct Metal Fabrication. 3 Hours.
The course will present a variety of techniques for fabricating metal sculpture. Oxyacetylene and electric arc welding processes will be included. May be repeated for credit. Prerequisite: SCUL 253. LAB.

SCUL 354. Sculpture II. 3 Hours.
Continuation of SCUL 253. Prerequisite: SCUL 253. LAB.

SCUL 355. Sculpture III. 3 Hours.
Continuation of SCUL 354. Prerequisite: SCUL 354. LAB.

SCUL 358. Sculpture II, Honors. 3 Hours.
Continuation of SCUL 253. Prerequisite: SCUL 253; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

SCUL 359. Sculpture III, Honors. 3 Hours.
Continuation of SCUL 354 or SCUL 358. Prerequisite: SCUL 354 or SCUL 358; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

SCUL 500. Advanced Special Topics in Sculpture: _____, 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Sculpture courses, or permission of instructor. LEC.

SCUL 556. Sculpture IV. 3 Hours.
Continuation of SCUL 355. May be repeated for credit. Prerequisite: SCUL 355. LAB.

SCUL 558. Sculpture IV, Honors. 3 Hours.
Continuation of SCUL 354 or SCUL 358. May be repeated for credit. Prerequisite: SCUL 354 or SCUL 358; membership in the University Honors Program or 3.25 minimum cumulative grade-point average; and permission of the department. LEC.

SCUL 599. Individual Studies in Sculpture. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours can apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Sculpture courses, or permission of instructor. IND.

SCUL 657. Sculpture V. 3 Hours.
Continuation of SCUL 556. Prerequisite: SCUL 556. LAB.

SCUL 658. Sculpture VI. 3 Hours.
Continuation of SCUL 657. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 657. LAB.

SCUL 804. Special Problems in Sculpture. 3 Hours.
Individual research in sculpture: course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 559 and permission of instructor. RSH.

SCUL 859. Sculpture VII. 3 Hours.
Individual research in sculpture. Prerequisite: SCUL 658. RSH.

SCUL 905. Special Problems in Sculpture. 3 Hours.
Individual research in sculpture: course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters. Prerequisite: SCUL 804 and permission of instructor. RSH.

SCUL 960. Sculpture VIII. 3 Hours.
Continuation of SCUL 859. Prerequisite: SCUL 859. RSH.

TD 130. Introduction to Weaving. 3 Hours.
Specifically for students with limited or no previous experience. Application to art and design principles to four-harness loom structures. Emphasis on the use of color and texture in loom controlled and weaver controlled techniques. Counts only as a studio elective or general elective for a B.F.A. in Art or Design. LAB.

TD 133. Introduction to Fibers. 3 Hours.
Studio exploration of fibers as an art and design form. Techniques include dyeing, spinning yarn, soft sculpture, embellishment, crochet. Open to all university students. LAB.

TD 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Textile Design. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

TD 300. Special Topics in Textiles/Fibers: ______. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor. LEC.

TD 313. Fiber Forms. 3 Hours.
Studio exploration of fibers as an art form. Techniques include feltmaking, papermaking, basketry, and dyeing. Prerequisite: ART 101, and ART 130 or ART 133. LAB.

TD 314. Introduction to Weaving. 3 Hours. U.
Application of art and design principles to four-harness loom structures. Emphasis on the use of color and texture in loom controlled and weaver controlled techniques. Prerequisite: ART 101, and ART 130 or ART 133. LAB.

TD 315. Textile Handprinting and Resist Processes. 3 Hours. U.
Fundamentals of resist and dye techniques on textiles: batik, tie-dye, discharge, and direct application. Prerequisite: ART 101, and ART 130 or ART 133. LAB.

TD 316. Screenprinting Textiles. 3 Hours.
Design problems in textile printing with emphasis on screenprinting and photo techniques. Prerequisite: ART 101, and ART 130 or ART 133. LAB.

TD 401. Weave Structures. 3 Hours. U.
Continuation of TD 314. Research and analysis of multiple-harness weave structures. Weave drafts. Design problems to develop the use of color, form, and surface in simple and compound weaves. Prerequisite: TD 314. LAB.

TD 402. Techniques in Weaving. 3 Hours. U.
Development of individual art and design concepts in relation to woven structures and/or forms. Emphasis on weaver-controlled techniques used to create images and composition. Prerequisite: TD 314. LAB.

TD 403. Intermediate Textile Printing. 3 Hours.
Individual problems in textile printing and dyeing processes. Prerequisite: TD 316. LAB.

TD 404. Surface Design. 3 Hours.
Textile pattern design for art and/or industry. Prerequisite: Twelve hours in Visual Art or Design, or permission of the instructor. LAB.

TD 414. Experimental Concepts in Weaving. 3 Hours.
Experimentation with resist dyeing, painted warps and/or "Fiber Forms" techniques in woven structures. Individual research and development of thematic concepts. Prerequisite: TD 313, and TD 301 or TD 302. LAB.
TD 500. Advanced Special Topics in Textiles/Fibers: ____. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Textiles/Fibers courses, or permission of instructor. LEC.

TD 503. Advanced Surface Design/Screenprinting. 1-6 Hours. U.
Directed study of advanced surface design and screenprinting methods. May be repeated for credit. Prerequisite: TD 403. IND.

TD 504. History of Textiles, Lecture. 3 Hours.
Study of historical textiles, their design development, and the techniques employed. Prerequisite: Junior standing in department or permission of instructor. LEC.

TD 506. Advanced Fiber Forms. 1-6 Hours. U.
Directed study of three-dimensional and off-loom methods and techniques. May be repeated for credit. Prerequisite: TD 313. IND.

TD 514. Advanced Techniques in Weaving. 1-6 Hours. U.
Directed study of advanced loom-controlled and weaver-controlled methods. May be repeated for credit. Prerequisite: TD 401 and TD 402. IND.

TD 515. Advanced Textiles/Fibers I. 3-6 Hours. AE61.
Development of individual direction in textiles based on experience, research, and skills acquired in preceding courses; capstone experience. Prerequisite: Twenty-four credits in Textiles/Fibers and consent of instructor. LAB.

TD 520. Advanced Textiles/Fibers II. 3-6 Hours. AE61.
Continuation of TD 515, capstone experience. Prerequisite: TD 515. LAB.

TD 590. Internship in Textiles/Fibers. 1-3 Hours. U.
Practical experience in the use of artistic skills in approved and supervised academic or professional settings. May be repeated for credit; no more than six hours may be applied to the B.A. or B.F.A. degree. Credit hours are graded on a satisfactory/unsatisfactory basis, according to the written recommendation provided by the internship supervisor to the faculty advisor. Prerequisite: ART 102, ART 103, and ART 104; and fifteen hours of Visual Art courses. FLD.

TD 599. Individual Studies in Textiles/Fibers. 1-6 Hours. AE61 / U.
Individual studio activity; capstone experience. Course content to be determined by the student under supervision of a faculty member. May be repeated for credit in subsequent semesters; a maximum of nine hours can apply toward the bachelor's degree. Prerequisite: ART 102, ART 103, and ART 104; and twelve hours of Textiles/Fibers courses, or permission of instructor. IND.

TD 715. Textile Design in Weaving, Printing, and Dyeing. 2-6 Hours.
Individual research. Prerequisite: TD 520 or TD 525 or equivalent. RSH.

TD 750. Graduate Seminar. 0.5 Hours.
Discussion of issues and/or work in textiles. Graded on satisfactory/unsatisfactory basis. LEC.

TD 815. Textile Design in Weaving, Printing, and Dyeing. 2-6 Hours.
Continuation of TD 715. RSH.

VAE 100. Introduction to the Profession of Art Education. 3 Hours.
This course is designed to acquaint students with the profession of art education by helping to increase an awareness of the role and characteristics of an effective art teacher. Large and small group activities and assignments are dispersed throughout the semester to facilitate these outcomes. Students are involved in observation of and participation with art teachers and pupils in the public school classrooms, which complement course activities and assignments. VAE 100 is a professional course. LEC.

VAE 130. Art and Design in Daily Life. 3 Hours. U.
The course aims to develop students’ appreciation of designed objects in contemporary life whether they are historical icons or everyday items in the immediate environment. The instructional materials and activities assist students in acquiring the knowledge and skills for critically analyzing, discussing, and evaluating objects. Course content is interdisciplinary with a focus on design history. The class is open to all students and is relevant to those who have taken classes in art, design, architecture, and art history. Not open to students with credit in VAE 530. LEC.

VAE 177. First Year Seminar: _______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Visual Art Education. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

VAE 300. Special Topics in Visual Art Education: _______. 1-4 Hours. U.
Course to be offered in an area of special interest to individual faculty and qualified students. (This course is not regularly offered. The current Schedule of Classes should be consulted.) May be repeated for credit. Prerequisite: ART 102, ART 103, and ART 104, or permission of instructor. LEC.

VAE 320. Instruction and Curriculum I. 3 Hours.
This methods course provides an overview of the professional practices of K-12 art educators. Course content deals with the art education program, K-12, in relationship to the rest of the curriculum. This encompasses goals, objective sequence, courses offered at various levels, finance, staffing and administration. Prerequisite: Junior standing or consent of the instructor. LEC.

VAE 325. Education in Multicultural Society. 2 Hours.
The course is designed to provide the student with an awareness of and sensitivity to the concept of multicultural education. Topics related to the rationale for and processes of providing a multicultural perspective within the schools will be addressed. Field experiences will be structured to provide students with opportunities to observe the diversity within our society. LEC.

VAE 330. Fundamentals of Art. 3 Hours.
An introduction to art designed for the general university student. Designed to facilitate understanding and viewing works of art. Basic information including elements and principles of art, materials and techniques used by artists, and the function of art in society. LEC.

VAE 341. Instructional Strategies in Art for Elementary Classroom Teachers. 2 Hours.
Child growth and development in art. Materials as they relate to a sequential art education curriculum in the elementary school. Prerequisite: Admission to the School of Education or the education division of the graduate school. LEC.

VAE 395. Community Collaborations in Art Education. 3 Hours. U.
A focused examination of existing community organizations, models, and resources alongside collaborative strategies for working with these entities to achieve common goals for art education. Students in this class will learn of collaborative community models, explore entrepreneurial and other educational initiatives that contribute to the general purpose of art education, and recognize the role of families and other community members in contributing to the arts. LEC.
VAE 410. Instruction and Curriculum II. 3 Hours.
This methods course provides an overview of the professional practices of K-12 art educators. Course content deals with the art education program, K-12, in relationship to the rest of the curriculum. This encompasses goals, objective sequence, courses offered at various levels, finance, staffing and administration. Prerequisite: Junior standing or consent of the instructor. LEC.

VAE 420. Artistic Media and Processes in Art Education. 3 Hours.
Building on course content in VAE 320, this course concentrates on instructional strategies and presentation models in art education. Students examine and explore the media appropriate to teaching art in various settings and levels as well as how art program budgets are derived and impact overall curriculum development. Prerequisite: VAE 320 or permission of instructor. LEC.

VAE 497. Independent Study. 1-3 Hours.
Only one enrollment permitted each semester; a maximum of four hours will apply toward the bachelor’s degree. Prerequisite: Recommendation of advisor and consent of instructor. IND.

VAE 500. Student Teaching. 6 Hours. AE61.
A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Admission to the student teaching program. FLD.

VAE 520. Instructional Technology in Art Education. 3 Hours.
This course addresses technology that is pertinent to professional art educators. Students use technology to develop a professional portfolio and technology-related resources for teaching art in PreK-12 schools and community settings. LEC.

VAE 530. Art and Design in Daily Life. 3 Hours.
The course aims to develop students’ appreciation of designed objects in contemporary life whether they are historical icons or everyday items in the immediate environment. The instructional materials and activities will assist students in acquiring the knowledge and skills for critically analyzing, discussing, and evaluating objects. Course content is interdisciplinary with a focus on design history. The class is open to all students and is relevant to those who have taken classes in art, design, architecture, and art history. Not open to students with credit in VAE 130. LEC.

VAE 596. Practicum in Teaching Art. 2 Hours.
A supervised art teaching practicum in which students will learn to employ different teaching strategies with children pre-school through high school in the school or museum setting. Prerequisite: VAE 320, VAE 410, VAE 795 or consent of instructor. LEC.

VAE 598. Special Course: ____. 1-5 Hours.
A special course of study to meet current needs of education students; primarily for undergraduates. LEC.

VAE 599. Community Based Project in Art Education. 1-6 Hours.
AE61 / U.
Individual activity and project that serves as an alternate capstone experience to VAE 500 (Student Teaching). Will involve the development of an independent, community-based arts education project developed by the student under the supervision of a VAE faculty member. Prerequisite: Forty credits of Visual Art, fifteen credits of Visual Art Education Courses, and permission of the instructor. IND.

VAE 600. Evaluation and Measurement in Art Education. 3 Hours.
An introduction to the concepts and skills for the development and implementation of evaluation procedures for art education. Topics will include the development of student evaluation, the relationship between instructional objectives and evaluation, various evaluation techniques for art education, grading, and providing grades and feedback (to) students, parents, and schools. Prerequisite: VAE 320 and VAE 410. LEC.

VAE 680. Internship in Teaching Art. 5-16 Hours.
A supervised internship experience leading to initial art teacher certification. The student assumes the total professional role as a teacher of art in an approved school setting. LEC.

VAE 698. Education of Women in the Arts. 2-3 Hours.
This course will examine the education of women in the arts at all levels of schooling (preschool, primary, secondary, and university) and in nonformal settings (art clubs, women’s leagues, tutoring, etc.). The intent is to further a historical and contemporary based understanding of gender characteristics and discrimination as they affect the education of women in the arts. Students enrolled in three hours credit will be required to write a case study on the education of a woman artist. LEC.

VAE 710. Assessment in Art Education. 3 Hours.
The course is designed to introduce students to evaluation procedures in art education as they apply to public school teaching K-12. The material will incorporate methods of evaluating student learning in art, the effectiveness of instruction, the designing of instruments, grading procedures including the provision of feedback to students, parents, and schools. Concepts and skills for both formative and summative evaluation will be related to the development of objectives, instruction, and curriculum development as a whole. LEC.

VAE 716. Teaching Art: ____. 1-4 Hours.
Instructional techniques, methodology, materials, and evaluation. Processes for the specific art area named. May be repeated for credit in different media. LEC.

VAE 750. Introduction to Art Museum Education. 1-4 Hours.
This course provides a general overview to the museum education field. Course readings include current ideas and issues on learning, art education, criticism, the museum in education, and museum education practices. LEC.

VAE 774. Art for Exceptional Children. 2 Hours.
A study of the psychology, philosophy, content, and media in art expression and its relationship to mental and creative growth with exceptional children. Prerequisite: SPED 741, which may be taken concurrently. LEC.

VAE 780. Internship in Teaching Art. 9 Hours.
A supervised internship experience leading to initial art teacher certification. The student assumes the total professional role as a teacher of art in an approved school setting. LEC.

VAE 790. Applications of Technology in Art Education. 1-3 Hours.
The course is designed to provide students with the skills necessary for using and assessing the impact of microcomputers, video recorders, and other technological developments in art education. Prerequisite: TL 601 or equivalent. LEC.

VAE 798. Special Course: ____. 1-5 Hours.
A special course of study to meet current needs of education professionals; primarily for graduate students. LEC.

VAE 800. Visual Art Education Curriculum Development. 1-3 Hours.
A study of research, resources, and media as they relate to learning goals in a sequential art curriculum for use by teachers. The amount of credit reflects the extent of the curriculum being developed and the amount of work involved in the development process. LEC.

VAE 825. Seminar in: ____. 1-4 Hours.
LEC.
VAE 830. Seminar in: ______. 1-4 Hours. LEC.

VAE 842. Teaching Art Criticism. 3 Hours. An examination of the four phases of art criticism (description, analysis, interpretation and judgment) will be followed by practice in using these phases in the development of effective art curriculum for all developmental levels. Prerequisite: PRE 702 and PRE 704 or equivalents. LEC.

VAE 850. Aesthetics, the Arts and Education. 3 Hours. Theoretical introduction to the problems involved in teaching critical appreciation of the arts; examination of materials from aesthetics, art history, and criticism. LEC.

VAE 869. History of Art Education. 3 Hours. A study of the historical development of art education. Prerequisite: Nine hours of education. LEC.

VAE 875. Research in Art Education. 3 Hours. This course examines the issues and procedures commonly used to conduct research in art education in preparation for students' graduate theses or projects. Research methods are adapted and applied to students' professional needs and interests in the form of a research proposal. LEC.

VAE 890. Preparation for the M.A. Examination. 1 Hour. An independent reading course in preparation for the M.A. Examination. The grade will be an S or U, as determined by the performance on the examination. The examination will be evaluated separately. Prerequisite: Permission of the instructor. LEC.

VAE 895. Field Experience in: ______. 1-6 Hours. Supervised and directed experiences in selected professional settings and cooperating agencies. Prerequisite: Permission of instructor. FLD.

VAE 897. Independent Study. 1-4 Hours. Prerequisite: Consent of advisor and instructor. RSH.

VAE 898. Master's Project. 1-4 Hours. RSH.

VAE 899. Master's Thesis. 1-6 Hours. THE.

VAE 900. Supervision and Evaluation of Visual Arts Programs. 3 Hours. A study of the administration of school, museum, and community arts education programs. Topics will include curriculum development, personnel supervision, finance, and the quantitative and qualitative evaluation of arts programs. Prerequisite: TL 703 or equivalent. LEC.

VAE 929. Research in Art Education. 3 Hours. An examination of research methodology in visual arts education. Emphasis will be on philosophical, historical, qualitative, and quantitative research development. Prerequisite: PRE 715 or equivalent. LEC.

VAE 949. Artistic Learning and Development. 3 Hours. Research from psychology, sociology, and anthropology will be examined for its implications for the artistic development of the child. Topics include cross-cultural and age comparisons of children's graphic symbol development, aesthetic judgments, and perceptual skills. Prerequisite: PRE 702 and PRE 704 or equivalents. LEC.

VAE 995. Field Experience in: ______. 1-5 Hours. Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. LEC.

VAE 996. College Teaching Experience in: ______. 2 Hours. To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate's committee. RSH.

VAE 997. Individual Study. 1-4 Hours. Prerequisite: Prior graduate course work in the area of study and consent of instructor. RSH.

VAE 998. Seminar in: ______. 1-4 Hours. LEC.

VAE 999. Doctoral Dissertation. 1-15 Hours. THE.

Bachelor of Fine Arts in Visual Art

First-Year Preparation: Foundations

A minimum of 12 hours in foundations courses is required before a student may enroll in further studio classes for a B.F.A., B.A., or B.A.E. degree:

- **ART 101** Drawing I 3
- **ART 102** Drawing II 3
- **ART 103** Art Concepts and Practice 3
- **ART 104** Art Principles and Practice 3

Additional specified prerequisites must be completed before enrollment in advanced visual art studio courses.

The foundations enrollment should be followed for 2 semesters (15 hours each semester):

Bachelor of Fine Arts in Visual Art Degree Requirements

The Department of Visual Art offers the B.F.A. in visual art, including the areas of ceramics, drawing, expanded media, metal smithing/jewelry, painting, printmaking, sculpture, and textiles/fibers. A total of 120 hours is required for the degree, including 45 junior/senior hours (courses
numbered 300 or higher). 30 of these 45 junior/senior hours must be taken in residence at the University of Kansas. In addition to the 12-hour foundations requirement, a minimum of 48 hours in departmental courses is required, including 2 semesters of directed study.

The Department of Visual Art reserves the right to retain examples of student work and to use images of student work on internet websites and for university publication purposes.

**B.F.A. Major Requirements**

**General Option**

General Education Requirements
Completion of KU Core Requirements (see KU Core)
BFA-specific requirements
Writing Requirement - ENGL 101 and ENGL 102, or placement in and completion of ENGL 102/105 and an additional Goal 2, Outcome 1 course.

**Foundations Studies (12)**
- ART 101: Drawing I (3)
- ART 102: Drawing II (3)
- ART 103: Art Concepts and Practice (3)
- ART 104: Art Principles and Practice (3)

**History of Art (9)**
- HA 150: Western Art History I: Ancient Through Medieval Art (fall only) (3)
- HA 151: Western Art History II: Renaissance to Contemporary Art (spring only) (3)

Non-Western history of art (3)

**HA 300+ level elective (6)**
BFA General students must choose one of the following courses covering art history from 1900-1945:
- HA 380: American History of Photography (3)
- or HA 580: History of Photography (3)
- or HA 453: Progression of Modernism (3)
- or HA 571: Modern Sculpture (3)
- or HA 583: Modern Art of the 1900s (3)
- or HA 588: Modern and Contemporary Visual Arts of Japan (3)

**School of the Arts Elective (3)**
Satisfied by one course from the Dance (DANC), Film & Media Studies (FMS), Theatre (THR), or Visual Art (ART, CER, EXM, METL, PRNT, PRNT, SCUL, TD, VAE) department.

**Electives**
- Additional credit hours of general electives are needed to meet the minimum total hours required for graduation.

**Major Requirements - General Option**

The general option requires 49 major hours, including a minimum of 15 junior/senior hours in the major, a minimum of 15 major hours in residence, and a minimum 2.0 KU junior/senior grade-point average in the major.

**Visual Art Core Courses (18)**
Select one course in 5 of the following areas:

<table>
<thead>
<tr>
<th>Area</th>
<th>Course</th>

</tr>
</tbody>
</table>

**Ceramics Option**

General Education Requirements
Completion of KU Core Requirements (see KU Core)
BFA-specific requirements
Writing Requirement – ENGL 101 and 102, or placement in and completion of ENGL 102/105 and an additional Goal 2 Outcome 1 course.

Foundations Studies (12)
ART 101 Drawing I 3
ART 102 Drawing II 3
ART 103 Art Concepts and Practice 3
ART 104 Art Principles and Practice 3

History of Art (15)
HA 150 Western Art History I: Ancient Through Medieval Art 3
(fall only - HA 150 must be taken before HA 151)
HA 151 Western Art History II: Renaissance to Contemporary Art 3
(spring only)

School of the Arts Elective (3)
Satisfied by 1 course (3 hours) from the Dance (DANC), Film & Media Studies (FMS), Theatre (THR), or Visual Art (ART, CER, EXM, METL, PNTG, PRNT, SCUL, TD, VAE) department.

Electives Additional credit hours of general electives are needed to meet the minimum total hours required for graduation.

Major Requirements - Ceramics Option
The ceramics option requires 48 major hours, including a minimum of 24 junior/senior hours in the major, a minimum of 15 major hours in residence, and a minimum 2.0 KU junior/senior grade-point average in the major.

Ceramics (27)
ART 131 Fundamentals of Ceramics 3
or CER 208 Ceramics I 3
CER 301 Ceramics II 3
CER 402 Ceramics III 3
CER 504 Kilns 3
CER 505 Clay and Glaze Formulation 3
CER 515 Advanced Ceramics I 6
CER 520 Advanced Ceramics II 6

Studio Electives (21)
Select 21 hours

Additional Required Visual Art and Design Electives (6)
(6 hours, not counted toward major)
PHMD elective 3
SCUL 253 Sculpture I 3
or SCUL 349 Metal and Glass Casting

Metalsmithing/Jewelry Option
General Education Requirements
Completion of KU Core Requirements (see KU Core)
BFA-specific requirements

Metalsmithing/Jewelry (39)
ART 132 Fundamentals of Metalsmithing/Jewelry 3
or METL 211 Jewelry 3
METL 301 Introduction to Casting for Jewelry (ART 132 then METL 301 must be completed before taking further METL classes) 3
METL 302 Professional Practices 3
METL 360 Holloware 3
METL 362 Metalsmithing 6
METL 364 Enameling 6
METL 501 Seminar 3
METL 515 Advanced Metals I 6
METL 520 Advanced Metals II 6

Studio Electives (9)
Satisfied by completing 9 hours of coursework with subject code (ART, CER, EXM, METL, PNTG, PRNT, SCUL, TD, VAE, PHMD, INTD, ILLU, INDD, BDS, VISC, ADS) 9

Textiles/Fibers Option
General Education Requirements
Completion of KU Core (see KU Core)
BFA-specific requirements
Writing Requirement – ENGL 101 and 102, or placement in and completion of ENGL 102/105 and an additional Goal 2 Outcome 1 course.

Foundations Studies (12)
- ART 101 Drawing I 3
- ART 102 Drawing II 3
- ART 103 Art Concepts and Practice 3
- ART 104 Art Principles and Practice 3

Additional Foundation Requirements (9 hours, not counted toward major) (9)
- ART 130 Fundamentals of Fiber Forms 3
  or ART 133 Fundamentals of Fibers 3
- TD 314 Introduction to Weaving 3
- TD 315 Textile Handprinting and Resist Processes 3

History of Art (12)
- HA 150 Western Art History I: Ancient Through Medieval Art 3
  (fall only - HA 150 must be taken before HA 151)
- HA 151 Western Art History II: Renaissance to Contemporary Art 3

Non-Western history of art 3

HA Elective 3

School of the Arts Elective (DANC, FMS, THR course) (3) 3

Major Requirements - Textiles/Fibers Option

The textiles/fibers option requires 48 major hours, including a minimum of 30 junior/senior hours in the major, a minimum of 15 major hours in residence, and a minimum 2.0 KU junior/senior grade-point average in the major.

Intermediate Textiles/Fibers Courses (12)
- TD 313 Fiber Forms (required) 3
- TD 316 Screenprinting Textiles (required) 3
- TD 401 Weave Structures 3
  or TD 402 Techniques in Weaving 3
  or TD 403 Intermediate Textile Printing 3
  or TD 404 Surface Design 3
  or TD 414 Experimental Concepts in Weaving 3
- TD 401 Weave Structures 3
  or TD 402 Techniques in Weaving 3
  or TD 403 Intermediate Textile Printing 3
  or TD 404 Surface Design 3
  or TD 414 Experimental Concepts in Weaving 3

Advanced Textiles/Fibers Courses (18) 18
- TD 504 History of Textiles, Lecture 3
- TD 515 Advanced Textiles/Fibers I (Students may sub 3 hours of TD 515 for one of the Textile concentrations listed below) 3
  or TD 503 Advanced Surface Design/Screenprinting 3
  or TD 506 Advanced Fiber Forms 3
  or TD 514 Advanced Techniques in Weaving 3

Bachelor of Fine Arts in History of Art

First-Year Preparation

A minimum of 12 hours in foundations courses is required before a student may enroll in further studio classes for a B.F.A., B.A., or B.A.E. degree:

- ART 101 Drawing I 3
- ART 102 Drawing II 3
- ART 103 Art Concepts and Practice 3
- ART 104 Art Principles and Practice 3

Additional specified prerequisites must be completed before enrollment in advanced visual art studio courses.

The foundations enrollment should be followed for 2 semesters (15 hours each semester):

Foundations (12)
- ART 101 Drawing I 3
- ART 102 Drawing II 3
- ART 103 Art Concepts and Practice 3
- ART 104 Art Principles and Practice 3

English (6)
- ENGL 101 Composition 3
- ENGL 102 Critical Reading and Writing 3
  or placement in and completion of ENGL 102/105 and an additional Goal 2 Outcome 1 course.

History of Art (6)
- HA 150 Western Art History I: Ancient Through Medieval Art 3
- HA 151 Western Art History II: Renaissance to Contemporary Art 3

Bachelor of Fine Arts in History of Art Degree Requirements

A major in the history of art is available to candidates for the B.F.A. degree. This major combines a 30-hour concentration in art history with 18 hours of studio training (beyond the 12 hours of foundation courses). A total of 120 hours is required for the degree, including 45 junior/senior hours (courses numbered 300 or higher). 30 of these 45 junior/senior
hours must be taken in residence at the University of Kansas. The B.A. and B.G.S. degrees (p. 152) are offered by the College of Liberal Arts and Sciences.

## Requirements for the B.F.A. Degree

### Major Program Courses (48)

**History of art:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HA 150</td>
<td>Western Art History I: Ancient Through Medieval Art</td>
<td>3</td>
</tr>
<tr>
<td>HA 151</td>
<td>Western Art History II: Renaissance to Contemporary Art</td>
<td>3</td>
</tr>
</tbody>
</table>

Select at least one course at or above the 200 level in each of the following five categories: 15

1. Ancient or medieval art;
2. Renaissance or baroque art;
3. Modern art, which includes 19th- and 20th-century art, American art, and history of photography. HA 261 does not fulfill requirement;
4. East Asian;
5. Non-Western (East Asian or African).

**History of art electives** 9

**Electives in art and design:** Satisfied by completing 18 hours of coursework with subject code (ART, CER, EXM, METL, PNTG, PRNT, SCUL, TD, VAE, PHMD, INTD, ILLU, INDD, BDS, VISC, ADS) 18

### General Education Courses (0)

Completion of KU Core Requirements. (see KU Core section of the catalog)

Advising
Beginning with the first year, all students intending to become visual art education majors should be advised by faculty in the Department of Visual Art. Consult the department for assignment to an advisor.

Undergraduate Admission
Students who wish to teach art should seek admission to the School of the Arts by submitting a portfolio. Applicants should also consult the Department of Visual Art for assignment of an advisor and requirement information. In the first 2 years, students enroll as art education majors in prerequisites. These prerequisites are necessary for admission to the VAE professional sequence in the junior year:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 101</td>
<td>College Algebra (or higher)</td>

<tr>
<td>HA 151</td>
<td>Western Art History II: Renaissance to Contemporary Art</td>
<td>3</td>
</tr>
</tbody>
</table>

Students must apply for admission to the professional sequence upon completing the first semester of the sophomore year. Transfer students with more than 45 hours must apply the first semester at KU. Students may not enroll in the professional sequence before formal approval by VAE. Admission to the professional sequence is based on the following minimum criteria:

1. Cumulative grade-point average of 2.5.
2. Grade-point average of 2.75 in required course work.
3. Minimum scores on the Pre-Professional Skills Test of 172 on the writing test, 173 on the reading test, and 172 on the mathematics test.
4. Successful completion of the application form (typed).
5. Satisfactory faculty evaluations in the areas relevant to visual art education including art and history of art. Each applicant’s applied instructor must complete a special recommendation form.
6. No grade lower than a C in any course in the professional education sequence.

Recommendation for Student Teaching and Internship
The capstone experience of student teaching and internship in art education requires a strong knowledge base particularly in certain content areas. Academic performance in content areas is a predictor of success in this capstone experience. Therefore, it is strongly recommended that students have a minimum grade of B– in all visual art education classes and an academic record with a grade-point average of at least 3.0 in the following areas: visual art education, the history of art, studio art, and education.

Note: Students must complete the student teaching experience with grades of C or higher to continue with their internships.

Note: To be licensed as an art teacher in Kansas, a student must fill out an application, pay a fee, pass all 3 parts of the Pre-Professional Skills Test and the Professional Knowledge component of the National Teachers’ Examination, and complete other specified academic degree requirements. Information is available in 211 J.R. Pearson Hall.

Students who do not meet all criteria may be admitted to the professional sequence on a provisional basis and may enroll in a maximum of 5
credit hours of professional sequence courses during the first term of
the junior year. Students assigned provisional status must complete
all requirements by the end of that term. Candidates are reviewed for
admission twice a year. The deadline for all applications is March 1
for fall or October 1 for spring, by 5 p.m. Submit applications to visual
art education, 300 Art and Design Building. Students who are denied
admission may reapply for the next deadline but must resubmit a
complete application. Students who transfer into the program with more
than 45 credit hours may be admitted to the professional sequence on a
provisional basis but must complete this application by the first deadline
that occurs during their residence at KU. They also must register for
classes that fulfill any deficiencies they might have on arrival at KU.

On admission to the professional sequence, students enroll as visual art
education majors (code AEPS-BAE) and identify their emphases in studio
art. The emphasis must be one in which KU offers the B.F.A. Students
must select appropriate courses in the emphasis in consultation with
the visual art education advisor. To enter the final year of the extended
program, the student must be admitted to Graduate Studies (http://
www.graduated.ku.edu). Regular admission requires a cumulative grade-
point average of 3.0 or higher in the baccalaureate degree curriculum.
Students with cumulative undergraduate grade-point averages of 2.75
may be admitted on probation.

Requirements for the B.A.E. Degree

The Bachelor of Art Education degree requires a minimum of 125 credit
hours distributed among general studies, the major, and professional
education. 45 of the 125 undergraduate credit hours must be taken at the
junior/senior level (courses numbered 300 or higher). 30 of the 45 junior/
senior hours must be taken in residence at the University of
Kansas. The program requires either VAE 500 (Student Teaching), which
leads to PreK-12 licensure, or VAE 599 (Community Based Project in Art
Education), which completes the degree without licensure eligibility.

VAE 520 Instructional Technology in Art Education 3

Visual Art (33)

ART 101 Drawing I 3
ART 102 Drawing II 3
ART 103 Art Concepts and Practice 3
ART 104 Art Principles and Practice 3

(When completing the area requirements below, with the exception of
PNTG 263, which is a specific course requirement, any courses with
the following prefixes may be taken: CER, METL, SCUL, EXM, TD,
and for courses in photography, PHMD or ART may apply.)

Ceramics 3
Metalsmithing/Jewelry 3
PNTG 263 Painting I 3
Expanded Media 3
Photography 3
Sculpture 3
Textiles 3

History of Art (12)

HA 150 Western Art History I: Ancient Through Medieval
(Fulfills KU Core Goal 3, Arts/Humanities) 3
HA 151 Western Art History II: Renaissance to
Contemporary Art 3
Non-Western history of art chosen from: HA 266, HA 267, HA 268, or
HA 269 (Fulfills KU Core Goal 4, LO 2) 3
Contemporary art history at the junior/senior level, chosen from:
HA 565, HA 566, HA 567, HA 571 3

Area of Emphasis (9)

Studio art study in 1 area selected from those offered for the B.F.A. in
visual art, design, or history of art (9) Must be taken at the 300 level
or above. (The selected area may be chosen using courses with one
of the following prefixes: DRWG, PNTG, PRNT, SCUL, EXM, METL,
TD, CER, ART, HA, PHMD, ADS, ILLU, INDD, VISG. The following
combinations of areas are also acceptable: DRWG and PNTG; ILLU
and VISG; ART with any of the following: DRWG, PNTG, PRNT,
SCUL, EXM, CER, TD, METL, PHMD. For questions, please consult
with visual art education advisor.)

Additional Non-Licensure Option Elective (3)

Students completing the B.A.E. Degree without licensure must also
take an additional elective at the junior/senior level (3) in any area
in order to meet the University’s minimum junior/senior hour requirement
for degree completion.

Master of Fine Arts in Visual Art

The Department of Visual Art has been authorized by the University and
the Kansas Board of Regents to offer the Master of Fine Arts (M.F.A.) in
Visual Art. The Department of Visual Art offers graduate programs leading
to the Master of Fine Arts degree in studio art. Concentrations include
ceramics, drawing and painting, expanded media, metalsmithing and
jewelry, printmaking, sculpture, and textiles and fibers. The MFA degree in
the Department of Visual Art is a terminal professional studio degree. The program’s goals are to develop each student’s critical thinking and studio skills so that they have the necessary tools and experience to pursue a career as a studio artist and to otherwise participate in the creative community both on a regional and national level.

Introduction

The University of Kansas is a member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of those organizations.

Graduate Admission - M.F.A.

To be admitted, students must have undergraduate backgrounds judged by the graduate faculty to be appropriate preparation for the specific specialization selected for graduate study. A strong preference exists for applicants whose undergraduate backgrounds are in visual art.

Departmental faculty selection and review committees evaluate each applicant’s transcripts, portfolios, and letters of recommendation to determine their qualifications for admission. The committees expect applicants to have the B.F.A. degree or equivalent experience. In general, committees expect applicants to present about 70 hours of undergraduate credit in studio or related professional courses including about 36 hours of studio credit in a major area, to have maintained an undergraduate overall grade-point average of 3.0 on a 4.0 scale and in the proposed major, and to have had a minimum of 9 hours of credit in art history. The department encourages full-time residence.

Application to the program is competitive, by permission of the Kansas Board of Regents application for admission to graduate programs in Visual Art may be refused if available instructional space does not allow for addition of more students. The deadline for fall admission is January 15.

Submit your graduate application (http://www.graduate.ku.edu) and fee online, print it, and send it along with

1. official transcript of all college and university coursework,
2. statement of purpose,
3. letters of recommendation,
4. digital portfolio,
5. printed image index,
6. application form for financial aid,
7. statement of financial resources (international students) and
8. proof of proficiency in English (international students)

in 1 envelope to the department:

The University of Kansas
Department of Visual Art
Director of Graduate Studies
Art and Design Bldg.
1467 Jayhawk Blvd., Room 300
Lawrence, KS 66045-7531

M.F.A. in Visual Art Degree Requirements

Concentrations in Ceramics, Drawing and Painting, Expanded Media, Fibers, Metalsmithing and Jewelry, Printmaking, and Sculpture

The graduate program consists of 60 semester hours of graduate credit, including thesis exhibition, in courses approved by the graduate director and the graduate thesis committee. A student may concentrate in one or more specializations. When the student has completed 2 semesters, the faculty selection and review committee reviews the student’s work. The graduate director gives the student a written assessment of progress, signed by the committee. At the end of the third semester, the same committee conducts a thesis review that determines whether the student is prepared to begin thesis work, needs additional coursework, or is to be dropped from the program.

Upon approval by the review committee, the candidate begins work toward the thesis. Students not receiving approval may continue to work toward the next review unless denied by the committee. A student who is approved for thesis work may enroll in Thesis in Art. Before thesis enrollment, the student selects a graduate thesis committee consisting of 3 members of the graduate art faculty. The committee advises the student, conducts regularly scheduled reviews of the work, and determines whether the requirements for the thesis have been completed. The graduate director must approve the membership of the graduate thesis committee.

The final departmental requirements are

1. A thesis exhibition of the student’s work,
2. An oral examination, and

The thesis folio includes a statement written by the candidate concerning the work and a visual record of the exhibition. The department reserves the option of selecting and retaining one example of each graduate student’s work. Upon enrolling, the student automatically accepts these requirements and conditions.

Master of Arts in Visual Art Education

The Department of Visual Art has been authorized by the University and the Kansas Board of Regents to offer the Master of Arts (M.A.) in Visual Art Education. The Visual Art Education graduate program strives to advance students’ understanding of art education with a complement of courses that explores historical studies of art education, art criticism, studio work, and aesthetics. An important goal of the curriculum is the development of a broad perspective of art education through multicultural studies, cognitive approaches in teaching and learning, assessment in teaching, and technological issues that arise in contemporary society.
Students' programs are tailored to their interests for specialties in areas such as studio, art history, evaluation, and others.

**Introduction**

The University of Kansas is a member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of those organizations.

**Graduate Admission - M.A. Visual Art Education**

**Application deadlines:**
- December 1 - Spring admission
- May 1 - Fall admission

**Admission requirements for regular status:**

1. Entrance into the M.A. degree program requires a bachelor’s degree, from an accredited institution, which encompasses a minimum of 40 semester hours in fine arts studio (courses in drawing, painting, sculpture, design, printmaking, ceramics, metalsmithing/jewelry, weaving, lettering, commercial art, graphic design, constructive design, etc.), 9 hours in history of art, and 8 hours in visual art education. Applicants must have an overall undergraduate grade-point average of at least 3.0 on a 4-point scale.

2. 1 official transcript.

3. A minimum of 3 letters of recommendation from former or current instructors and/or those able to recommend the applicant on the basis of professional experience (e.g., principals, supervisors, or former employers). The letters of recommendation must address the applicant’s potential to take initiative as a graduate student and ability to be a self-starter.

Submit your graduate application (http://www.graduated.ku.edu) and fee online, then print a copy and send it along with:

- 1 official transcript of all college and university coursework,
- Graduate Student Information Questionnaire,
- 3 letters of recommendation,
- Graduate Licensure applicants only, Praxis I test scores
- statement of financial resources (international students) and
- proof of proficiency in English (international students)

in one envelope to the department:

The University of Kansas
Visual Art Education
Director of Graduate Studies
Art and Design Bldg.
1467 Jayhawk Blvd., Room 300
Lawrence, KS 66045-7531

**M.A. in Visual Art Education**

The graduate program includes advanced professional and scholarly study for art educators and teaching licensure for those with baccalaureate degrees in other fields who wish to enter art education licensure typically also requires collateral undergraduate study) and advanced study for individuals in related disciplines. Details may be found in the Visual Art Education M.A. handbook, available from the Department of Visual Art (http://art.ku.edu).

**M.A. Degree Requirements**

At least 15 and no more than 18 hours in visual art education are required. The remainder of the coursework can be in related fields such as history of art, education, psychology, etc. This emphasis is appropriate for the student desiring to improve his or her fine arts knowledge and research skills in art education.

**Thesis Option**

The student completes 9 credit hours of core courses (VAE 800, VAE 869, and VAE 875), additional elective hours, and an independent experimental, descriptive, historical, or philosophical investigation of a topic related to visual art education. A total of 30 credit hours is required.

**Project Option**

The student completes 9 credit hours of core courses (VAE 800, VAE 869, and VAE 875), and additional elective hours. A substantial application of theory, principles, and/or products of visual art education in a pedagogical setting must be documented. A total of 30 credit hours is required.

**Examination Option**

Students take a total of 37 credit hours in required core courses (including VAE 875 Research in Art Education) and elective courses with 36 credit hours in regularly scheduled classes. Students also take a 1-credit-hour course, VAE 890 Preparation for the M.A. Examination, devoted to preparing for a written final examination. Preparation for the examination occurs during the first half of the semester and provides the basis for the course grade. The written examination, taken during the second half of the semester, requires students to demonstrate their knowledge of current issues in the field. If the written exam is deemed unsatisfactory by a majority of the student’s committee, the student will be required to retake the exam. The exact content and format of the second examination will be determined by the student’s committee members.

**Graduate Licensure in Art Education**

Students who seek to be art teachers in public schools (PreK-12) may obtain licensure as part of the M.A. degree. The licensure track is for individuals with especially strong academic and artistic backgrounds who have completed baccalaureate degrees in studio art, design, art history, or other art-related fields. Coursework is taken at the undergraduate and graduate levels. Upon completion, individuals are recommended by the university for PreK-12 art licensure in Kansas and have earned a significant amount of credit required for the M.A. in Visual Art Education. Prospective students must meet all application requirements for the master’s degree to be considered for licensure in art. For further information, contact the Department of Visual Art (http://art.ku.edu) at 785-864-4401.
Business

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor [http://www.advising.ku.edu] for details). Other years’ catalogs [http://catalog.ku.edu/archive].

Bachelor of Science in Business (p. 218)
Bachelor of Business Administration (p. 224)
Minor in Business (p. 226)
Master of Business Administration (p. 227)
Master of Accounting (p. 233)
Master of Science in Business (p. 235)
Doctor of Philosophy in Business (p. 235)

Introduction

In the School of Business, students acquire a rigorous education that prepares them for positions in a dynamic and competitive global environment.

The University of Kansas School of Business is accredited by the Association to Advance Collegiate Schools of Business International [http://www.aacsb.edu].

Undergraduate Programs

The school offers the Bachelor of Science (p. 218) degree in business on the Lawrence campus and the Bachelor of Business Administration (p. 224) on the KU Edwards Campus.

The undergraduate curriculum develops a foundation for lifelong education and growth. The strength of the program is based not only on the quality of the professional course offerings but also on the offerings of other KU divisions, particularly in the social sciences, natural sciences, and humanities. Students acquire a foundation education in business and management with emphasis on analytical skills and obtain a liberal arts and sciences education from their work outside the school.

The school offers advanced electives in various areas of business. Seven undergraduate majors are available:

• Accounting.
• Business administration.
• Finance.
• Information systems.
• Management and leadership.
• Marketing.
• Supply chain management.

Business concentrations may be earned in entrepreneurship, information systems, international business, and human resources. The baccalaureate programs in the School of Business, and independently the accounting program, are accredited by the Association to Advance Collegiate Schools of Business [http://www.aacsb.edu].

Resources and Opportunities

Study Abroad

The school encourages students to incorporate study abroad into their programs. Student and Academic Services can help students plan study to meet KU requirements while they are abroad. The school works with students and the KU Office of Study Abroad to select programs and courses appropriate to their interests and majors. Contact the Office of Study Abroad [http://www.studyabroad.ku.edu], 108 Lippincott Hall, 785-864-3742.

Job Shadowing

One on One, Jayhawks on the Job, allows business students to shadow a business professional during the course of a workday. The program offers students a daylong experience that enhances their understanding of a particular field and the business world, allows an opportunity for students to learn more about themselves and refine their career goals, and provides an opportunity for students to network with business professionals.

Internship Program

Internships offer students the opportunity to build on, apply, and assess the concepts that are developed through the curriculum and to further professional growth through meaningful real-world job experiences. The internship experience provides many benefits, from enhancing your knowledge of an industry or business field to increasing confidence in yourself and your abilities. Internships offer an opportunity to improve your professional skills, familiarize yourself with the business environment, network with business professionals, and refine your personal and career goals and aspirations. The school representative must approve the internship work experience. Not all positions qualify for internship credit.

Library Resources

The Anschutz Library offers a closed reserve service and reference services including a small print collection. The large collection in Watson Library offers additional reference and research materials. The business/economics bibliographer in the reference department can help business students use the library system. Spencer Research Library has an excellent collection on the history of economic thought and a special collection of business papers and records.

Computer Resources

Wagnon Computer Laboratory

The Wagnon Laboratory in Summerfield Hall is available to business undergraduate and graduate students for classroom assignments and individual research projects. About 46 computers and 30 software programs are available.

Harper Computing Classroom

Equipped with 34 PCs, the Harper room is intended for teaching classes that make heavy use of computers.

Faculty

The school’s faculty consists of 58 professors drawn from first-rank universities throughout the nation. The faculty enjoys a national reputation for research productivity and teaching success.
Graduate Programs

Four graduate degree programs are offered:

- Master of Business Administration (p. 227).
- Master of Science (p. 235).
- Master of Accounting (p. 233).
- Doctor of Philosophy (p. 235).

Four degree programs are offered jointly with other departments:

- Combined MBA/J.D. with the School of Law.
- MBA/Pharm.D. in Pharmacy.
- MBA/Master’s in Management from ESC Clermont in France.
- MBA with a concentration in petroleum management with the School of Engineering.

General admission requirements and the content of each of these programs are discussed on their pages of the online catalog.

Resources and Opportunities

Equipped with 34 PCs, the Harper room is intended for teaching classes that make heavy use of computers.

Faculty

The school’s faculty consists of 58 professors drawn from first-rank universities throughout the nation. The faculty enjoys a national reputation for research productivity and teaching success.

Undergraduate Advising

The Student and Academic Services (http://www.business.ku.edu/undergrad/current/advising) office, 206 Summerfield Hall, helps students meet their academic goals. Students should take primary responsibility for their academic careers by consulting SAS, becoming familiar with the undergraduate curriculum and graduation requirements, and complying with all guidelines. Advisors help students choose classes and make efficient progress towards graduation. For information, see the school’s website (http://www.business.ku.edu).

Mandatory Advising

Once a student is admitted to the School of Business, he or she must meet with a business advisor at least once a semester. A business advising hold is placed on admitted students’ enrollment each semester and released after the student meets with the advisor.

Graduate Advising

The MBA office in Summerfield Hall coordinates advising for MBA and M.S. students. The MAcc office coordinates advising for MAcc students, and the doctoral office coordinates advising for Ph.D. students. Staff members advise students about program requirements, course prerequisites, and program planning. Students based at the KU Edwards Campus typically receive advising sessions over the phone and by email. Advising sessions are optional.

Undergraduate Scholarships and Financial Aid

The school awards scholarships to current business students annually. The online application (http://www.business.ku.edu) is available during spring semester. Scholarships generally are awarded in midsummer.

To be considered for need-based scholarships, file the Free Application for Federal Student Aid (http://www.fafsa.gov) (FAFSA) by March 1. A few scholarships are available for incoming first-year students. High school students interested in majoring in business should contact Financial Aid and Scholarships (http://financialaid.ku.edu), Strong Hall, 1450 Jayhawk Blvd., Room 50, Lawrence, KS 66045-7518, 785-864-4700, for information about federal- and state-funded financial aid programs.
Graduate Fellowships and Assistantships
For information about graduate assistantships, contact the School of Business (http://www.business.ku.edu).

Visit the Graduate Studies website for information about funding opportunities (http://www.graduate.ku.edu/03-07_student_funding.shtml) for graduate students at KU.

Financial Aid and Scholarships (http://financialaid.ku.edu) administers grants, loans, and need-based financial aid.

Undergraduate University Regulations
For information about university regulations, see Regulations (p. 12) or visit the University of Kansas Policy Library (http://policy.ku.edu).

Business Honor Code
Students taking any business course must sign a pledge of academic honesty at the end of all examinations. Upon application to the school, each student must electronically sign an honor code form, available from the School of Business (http://www.business.ku.edu).

Change of School
Admission is competitive. Applications are due February 15 for fall or summer admission and September 15 for spring admission.

Credit/No Credit
A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (http://policy.ku.edu).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Credit/No Credit is allowed for electives only. Required professional (business and economics) course and PSYC 104 may not be taken for Credit/No Credit.

Graduation with Distinction and Highest Distinction
Undergraduates whose KU professional grade-point averages rank in the upper 10 percent of their graduating class graduate with distinction. The upper 3 percent of those awarded distinction graduate with highest distinction.

Honor Roll
Undergraduates with grade-point averages of 3.5 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean’s list in fall and spring. An honor roll notation appears on the transcript.

Maximum and Minimum Semester Enrollment
No student may enroll for more than 20 hours a semester, or more than 9 hours in a summer session without permission from an undergraduate advisor.

Nonresidence Study Before the Last 30 Hours
Before the last 30 hours required for the degree, students may, under certain conditions, take courses at other institutions and transfer the credit to KU. Before enrolling in a nonresidence course, check on how your courses will transfer to KU (http://admissions.ku.edu/~admiss/credit/transfer) or complete KU’s standard form, Request for Tentative Evaluation of Transfer Credit, in your dean’s office or in College Student Academic Services for students in the College. After completing the course work, you must request that an official transcript be sent to the Office of Admissions (http://admissions.ku.edu), KU Visitor Center, 1502 Iowa St., Lawrence, KS 66044-7576, 785-864-3911. For transcripts to be official, they must be mailed from the college or university directly to KU. Faxed transcripts are not accepted for posting of transfer credit.

Nonresidence credit includes all credits from another college or university taken after initial enrollment at KU, military service courses, and other undergraduate course work not formally offered in the Schedule of Classes (http://www.classes.ku.edu).

Majors must submit the Request for Tentative Evaluation of Transfer Credit form before they enroll.

Prerequisites and Corequisites
The student is responsible for checking course prerequisites before enrollment. Course rosters are checked before the start of each semester and again after the last day to add classes online. Students who are enrolled in a course without its prerequisites are administratively dropped without notice during the first four weeks of the semester.

Probation
Placed on Probation
An undergraduate student whose cumulative grade-point average, either overall or at KU (in all courses or professional courses), is lower than 2.2 is placed on probation for the following semester.

Continued on Probation
A student on probation is continued on probation for one more semester if the KU semester grade-point average is at least 2.2, but the cumulative grade-point average, either overall or at KU (in all courses or professional courses), is lower than 2.2.

Returned to Good Standing
A student on probation is returned to good standing if the cumulative grade-point average, both overall and at KU (in all courses or professional courses), is at least 2.2.

Dismissed
A student on probation is dismissed for failure to earn a KU grade-point average of at least 2.2 (in all courses and professional courses) in the next semester of enrollment, or if after two consecutive semesters on probation, the cumulative grade-point average, either overall or at KU (in all courses and professional courses), is not at least 2.2. Students are readmitted through the competitive admission process. Those students...
are dropped from all courses for the next semester and must complete a Change of School form.

Required Work in Residence

No baccalaureate degree is granted to a student who has not completed at least 30 semester credit hours of residence courses at KU. No exceptions are granted.

To earn a bachelor’s degree from KU, you must complete the last 30 hours of credit for the degree by resident study. You may petition the dean for a waiver.

After admission to the school, written advance permission of the director of undergraduate programs is required for work taken at another institution to be applied to a student’s degree. Nonresident credits may fill only elective requirements. They may not be used for courses specifically required for graduation.

Transfer of Credit

CredTran (http://admissions.ku.edu/~admiss/credit/transfer) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Courses completed at other institutions are accepted to fulfill graduation requirements (e.g., in place of specifically prescribed courses), only if they are substantially equivalent as indicated by course description, hours of credit, and prerequisites. For professional courses not listed on CredTran (http://admissions.ku.edu/~admiss/credit/transfer), the student must submit a petition along with a course syllabus to the School of Business. Petition forms are available from Student and Academic Services, 206 Summerfield Hall.

Only transfer grades of C or higher apply toward graduation from the School of Business at KU.

Graduate University Regulations

For information about university regulations, see Regulations (p. 12) or visit the University of Kansas Policy Library (http://policy.ku.edu).

Business Honor Code

Students taking any business course must sign a pledge of academic honesty at the end of all examinations. Upon application to the school, each student must electronically sign an honor code form, available from the School of Business (http://www.business.ku.edu).

Credit/No Credit

A Credit/No Credit option is allowed for electives only. Required professional (business and economics) course and PSYC 104 may not be taken for Credit/No Credit.

Business Career Services

The Business Career Services Center (http://www.business.ku.edu/careers) (BCSC) provides a variety of resources including recruiting (on-campus interviews) for full-time and internship positions facilitated through KU Career Connections/Symplicity, an online job and internship database; individual career advising; and a variety of workshops and events—to name a few.

Other BCSC services include

- Individual career advising with trained counselors.
- Business career fair.
- Résumé review.
- Mock interviews and interview preparation assistance.
- Workshops on various career-related topics.
- Online resource libraries.
- Salary information.

The faculty and career services staff are committed to providing a strong student-oriented program to help students develop career objectives and target job opportunities. The BCSC cannot guarantee jobs, but it will make every effort to bring together the job-seeking candidate and potential employers in accordance with their needs, abilities, and interests. Business graduates have been successful in finding employment in their areas of interest. Positions have been available nationwide, regardless of academic area or business degree.

Students are encouraged to register with the BCSC as early as possible. An early start can mean wider access to potential employment opportunities. Registrants’ may include one or more résumés in a web-based database, allowing access by the BCSC and employers. This allows the BCSC to perform résumé referrals quickly and companies to conduct their own résumé searches. Students can update their résumés at any time from any Internet-linked computer.

Statistics on graduates are collected each semester. Information on the number of degrees granted, percentage of graduates employed, and average starting salaries can be found on the School of Business website (http://www.business.ku.edu).

Contact the BCSC for more information at 785-864-5591, fax: 785-864-5078, bscsc@ku.edu.

Courses

ACCT 200. Fundamentals of Financial Accounting. 4 Hours. GE12. Accounting 200 is an introduction to the concepts of business and the measurement systems used to control and evaluate business activities. This course is designed to be of interest to all students regardless of discipline. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1. LEC.

ACCT 201. Managerial Accounting I. 3 Hours. A continuation of Financial Accounting I. A study of concepts of materials, labor, and overhead control; budget administration; cost accounting systems including standard costing; full costing and direct costing; income determination; differential costing; break-even analysis; accounting statement analysis; and use of return on investment as a basis for management decisions. Prerequisite: ACCT 200. LEC.
ACCT 205. Survey of Accounting. 3 Hours.
This course is an introduction to financial and managerial accounting. It will introduce the concepts of business and the measurement systems used to control and evaluate business activities. It will also explore product costing systems and the use of accounting data as a basis for management planning and decision making. (Not open to students with credit in ACCT 200.) Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1. LEC.

ACCT 300. Special Topics in Accounting: _____, 1-5 Hours.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of accounting topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor. LEC.

ACCT 303. Introduction to the Accounting Profession. 1 Hour.
This course will focus on Accounting as a profession. Prospective and current accounting students will be exposed to a variety of topics. These include, but are not limited to, career options in Accounting, the CPA exam, ethics in the profession, current issues in Accounting, professional standards, the Accounting major, and the five-year Accounting program. Prerequisite: ACCT 200 or coenrollment in ACCT 200. LEC.

ACCT 311. Information Systems for Accountants. 3 Hours.
This course provides an overview of how to understand, analyze, and control computerized information systems, and is designed to provide the computer tools and knowledge so that today’s business or accounting student will be tomorrow’s successful and complete manager, consultant, accountant, and/or auditor. The topics covered in this course will include computer technology, internal control in a computer environment, computer auditing, systems analysis and design, database systems, networking, electronic commerce, and specific systems applications. Hands-on experience will be obtained through projects and various software packages. This course will count as an advanced business elective. Prerequisite: ACCT 201 and IST 202 or IST 301. Enrollment restricted. LEC.

ACCT 320. Intermediate Accounting I. 3 Hours.
A study of generally accepted accounting principles (GAAP) underlying the preparation and interpretation of general-purpose financial statements with emphasis on the principles of revenue recognition, matching revenues and related costs, and the determination of proper balance sheet valuations of assets and liabilities. The asset side of the balance sheet is the primary emphasis though the entire financial statements are used in examples throughout the course. Prerequisite: ACCT 201. Prerequisite or Corequisite: ACCT 303. LEC.

ACCT 321. Intermediate Accounting for Finance. 3 Hours.
An intermediate accounting course with emphasis on interpretation of general-purpose financial statements and the related disclosure notes. Includes understanding interrelationships among the various financial statements and analyzing the effects of transactions on the financial statements. Common and significant accounts/transactions will be analyzed, especially those relating to the financing and equity sections of the financial statements. Not open to students with credit in ACCT 320 or ACCT 323 or ACCT 410 or ACCT 411. Prerequisite: FIN 310 or FIN 311. Enrollment restricted. LEC.

ACCT 323. Intermediate Accounting I, Honors. 3 Hours.
Interpretation and application of financial accounting standards, with an emphasis on U.S. Generally Accepted Accounting Principles (GAAP) and ancillary treatment of International Financial Reporting Standards (IFRS). General coverage of all financial statements, with specific attention placed upon the balance sheet. A primary focus of the course is on the comprehension of foundational principles, concepts, and theories underlying financial reporting. Only open to students admitted to the University Honors Program, the School of Business Honors Program, or by consent of the instructor. Prerequisite: ACCT 201. Prerequisite or Corequisite: ACCT 303. LEC.

ACCT 325. Managerial Accounting II. 3 Hours.
An analysis of cost systems and their application in the determination, analysis and control of manufacturing and distribution costs. Emphasis is on managerial planning and control. Prerequisite: ACCT 201. Enrollment restricted. LEC.

ACCT 326. Managerial Accounting II, Honors. 3 Hours.
Honors treatment of this course involves an analysis of cost systems and their application in the determination analysis and control of manufacturing and distribution costs. Emphasis is on managerial planning and control. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisites: ACCT 201. Enrollment restricted LEC.

ACCT 330. Introduction to Taxation. 3 Hours.
A study of the major concepts related to taxation with emphasis on the federal income tax for individuals including the implications of being a sole proprietor, partner of a partnership, and a corporate shareholder. Major topics covered include: different types of taxes; formation of the tax law; gross income; deductions; the tax formula; tax credits; filing status; tax treatment for capital gains and losses; and selected nontaxable transactions. Prerequisite: ACCT 320 or ACCT 323. Enrollment restricted. LEC.

ACCT 331. Introduction to Taxation, Honors. 3 Hours.
Honors treatment of this course is a study of the major concepts related to taxation with emphasis on the federal income tax for individuals including the implications of being a sole proprietor, partner of a partnership, and a corporate shareholder. Major topics covered include: different types of taxes; formation of the tax law; gross income; deductions; the tax formula; tax credits; filing status; tax treatment for capital gains and losses; and selected nontaxable transactions. Prerequisite: ACCT 320 or ACCT 323. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.

ACCT 335. Introduction to Income Tax. 3 Hours.
An introduction to basic concepts of income tax and how the tax law is formed. While tax problems of an individual are considered, emphasis is placed on tax factors to consider when conducting a business either as a single proprietor, corporation, or partnership. Not open to students with credit in ACCT 330 or ACCT 331. This course is for non-accounting majors. Prerequisite: ACCT 201. Enrollment restricted. LEC.

ACCT 400. Special Topics in Accounting: _____, 1-5 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of accounting topics not covered by established courses. Prerequisite: Determined for each topic by the instructor. Enrollment restricted. LEC.

ACCT 410. Intermediate Accounting II. 3 Hours.
A continuation of the study of generally accepted accounting principles (GAAP) underlying the preparation and interpretation of general-purpose financial statements. The focus of this course is on the liability and equity sections of the balance sheet, including such topics as loans, bonds, leases, pensions, accounting for income taxes, equity transactions, employee stock options, earnings per share, and cash flows. Application of many of the authoritative accounting pronouncements is illustrated. Prerequisite: ACCT 320 or ACCT 323. Enrollment restricted. LEC.

ACCT 411. Intermediate Accounting II, Honors. 3 Hours.
Honors treatment of this course is a continuation of the study of generally accepted accounting principles (GAAP) underlying the preparation and...
interpretation of general-purpose financial statements. The focus of this course is on the liability and equity sections of the balance sheet, including such topics as loans, bonds, leases, pensions, accounting for income taxes, equity transactions, employee stock options, earnings per share, and cash flows. Application of many of the authoritative accounting pronouncements is illustrated. Prerequisite: ACCT 320 or ACCT 323. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.

ACCT 500. Individual Research in Accounting: ____, 1-5 Hours. Individual study of selected topics in business not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311, SCM 310 or SCM 311; approval of the Area Director. Enrollment restricted. LEC.

ACCT 515. Accounting Professional Communications, 3 Hours. This course is designed to improve the professional communications skills of students interested in pursuing careers in accounting. Topics covered include communication styles, communication approaches for different styles, listening skills, client interactions, appropriate communication channels, receiving feedback, and presentation skills. Graded on satisfactory/unsatisfactory basis. Prerequisite: ACCT 599 or ACCT 799. Enrollment restricted. LEC.

ACCT 543. Introduction to Auditing, 3 Hours. The fundamental concepts of audit risk, evidence accumulation and materiality are applied to financial statement audits using established accounting principles as the criterion for evaluating fair presentation. Audit objectives and procedures are studied in relation to the opinion which the auditor expresses on clients' financial statements. Financial statement audits are compared with other types of engagements performed by public accountants, and with other types of audits, such as compliance and operational audits. Prerequisite: ACCT 311 and ACCT 410 or ACCT 411. Enrollment restricted. LEC.

ACCT 544. Introduction to Auditing, Honors. 3 Hours. Honors treatment of this course involves the fundamental concepts of audit risk, evidence accumulation and materiality are applied to financial statement audits using established accounting principles as the criterion for evaluating fair presentation. Audit objectives and procedures are studied in relation to the opinion which the auditor expresses on clients' financial statements. Financial statement audits are compared with other types of engagements performed by public accountants, and with other types of audits, such as compliance and operational audits. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: ACCT 311 and ACCT 410 or ACCT 411. LEC.

ACCT 545. Advanced Taxation, 3 Hours. Introduction to taxation for corporations, partnerships, S corporations and limited liability companies. The course will also include coverage of property transactions, methods of accounting, tax-related investment decisions, and selected tax issues. Prerequisite: ACCT 330 or ACCT 331. Enrollment restricted. LEC.

ACCT 599. Internship in Accounting, 1-3 Hours. Internships provide opportunities for students to combine their academic education with a meaningful experience in the business world. Accounting internships allow students to explore career pathways in accounting, further their professional growth, expand professional networks, and increase the relevancy of their academic course work. The internship course combines job-related activities of the accounting internship position with a set of academic requirements. These requirements include academic assignments as well as a pre- and post-internship seminar held in the semester before and after the semester in which the internship occurs. Internships for credit must be approved by the Director of the Internship Program prior to the internship experience. Students may not receive more than three hours of internship credit from ACCT 599. ACCT 599 may count as an Accounting elective for students majoring in Accounting. Prerequisite: Approval of the internship; two of the following: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311, SCM 310 or SCM 311. Enrollment restricted. LEC.

ACCT 701. Financial Accounting, 2 Hours. Financial accounting provides information to decision-makers external to the business, such as investors and lenders. The course describes the process through which economic information is captured, validated, and distributed externally in the form of financial statements. It also covers the contents of the major financial statements, focusing on how the various accounts are defined and measured and how the information can be used by external decision-makers. Enrollment restricted. LEC.

ACCT 702. Managerial Accounting, 2 Hours. Managerial accounting provides information to decision-makers within the business, such as supervisors and executives. The course describes the process through which economic information is captured and distributed internally as budgets and other reports. It also covers various uses of managerial accounting information for internal decision-making. These uses include planning for profitable operations, determining costs of products and services, and evaluating performance within an organization. Not open to MAcc students or students with credit in ACCT 325. Prerequisite: ACCT 701. Enrollment restricted. LEC.

ACCT 705. Financial Statement Presentation and Analysis II, 2 Hours. This course covers topics in intermediate-level financial accounting and financial statement analysis. Accounting topics are taught from an external decision-maker's perspective. The course is intended to help students read and understand complex financial statements, and to extract key financial information from a mass of detail. Topics will vary over time but can include financial reporting of various liabilities, derivatives and hedging, investments and acquisitions. Topics also can include forecasting financial statements, and valuation of common stock using accounting data. Not open to MAcc students or students with credit in ACCT 320 or ACCT 323, ACCT 410 or ACCT 411, ACCT 721, or ACCT 722. Prerequisite: ACCT 701. Enrollment restricted. LEC.

ACCT 706. Business Taxation, 3 Hours. An introduction to basic concepts of income tax law with emphasis on business taxation. The factors to consider when conducting a business as a single proprietorship, corporation, S corporation, or partnership are analyzed. Prerequisite: ACCT 701 or equivalent. Enrollment restricted. LEC.

ACCT 708. Accounting and Finance for Professionals, 3 Hours. This course is an introduction to financial and managerial accounting. It also serves as a bridge to basic financial decision-making. It will introduce the concepts of business and the measurement systems used to control and evaluate business activities. It will also explore costing systems and the use of accounting data as a basis for management planning and decision making, using basic tools such as return on investment. Not open to School of Business students. LEC.

ACCT 720. Financial Statement Analysis, 2 Hours. This course covers topics in financial accounting and financial statement analysis. Accounting topics are taught from an external decision-maker's perspective. The course is intended to help students read and understand complex financial statements, and to extract key financial information from a mass of detail. Topics will vary over time but can include analyses of cash flows, quality and persistence of earnings, income recognition,
restructuring, other special charges and off-balance sheet financing. Not open to MAcc students or students with credit in ACCT 320 or ACCT 323, ACCT 410 or ACCT 411, ACCT 721, or ACCT 722. Prerequisite: ACCT 701 or ACCT 810. Enrollment restricted. LEC.

ACCT 721. Advanced Accounting. 3 Hours. A series of topics related mainly to financial accounting for corporations. Includes accounting for acquisitions and consolidations, asset impairments and derivative instruments. Also includes accounting for partnership equity. Prerequisite: Permission of the instructor. Enrollment restricted. LEC.

ACCT 722. Researching Financial Accounting Issues. 3 Hours. This course is intended to help students understand how perceived financial reporting problems are addressed via the financial standard setting process. This includes the roles of standard setting agencies, accounting theory, and political and economic pressures. The course also considers the potentially opposing reporting preferences of managers, investors and analysts. Topics will vary over time but can include convergence of U.S. and international standards, recent and proposed changes to standards, and underlying trends in standard setting (such as increased use of fair value measurements, and principles-based standards). Prerequisite: Admission to the MAcc program. Enrollment restricted. LEC.

ACCT 724. Accounting Theory. 3 Hours. This course examines the economic drivers, competing interests, and regulatory institutions that determine accounting policy choice and the societal role of accounting. By the end of the course, students will have developed a cognitive framework that will enable them to identify and understand the forces that shape financial reporting, firms' reporting decisions, the behavior of financial regulatory bodies, interactions among agents in the capital markets, the behavior of public accounting firms, as well as other relevant issues. The end-goal of this course is to develop in the participants a more advanced and sophisticated perspective of the economic, political, ethical, and social role of accounting. Prerequisite: ACCT 410 or ACCT 411. Enrollment restricted. LEC.

ACCT 726. Advanced Managerial Accounting - Quantitative and Economic Topics. 3 Hours. Through judicious use of quantitative methods including statistical decision theory, this course provides a conceptual analysis of several prominent managerial accounting topics. This course is intended to assist both public accountants and management accountants to understand management decision-making processes and information requirements thereof. Prerequisite: Admission to the MAcc program. Enrollment restricted. LEC.

ACCT 731. Tax Research. 3 Hours. A course designed to develop one's ability to use the research tools available and provide comprehensive coverage of the many aspects of tax research. Emphasis is placed on locating authorities, solving tax problems, and communicating the results. Prerequisite: Admission to the MAcc program. Corequisite: ACCT 545. Enrollment restricted. LEC.

ACCT 732. Taxation for Business Entities. 4 Hours. A study of federal income taxation for corporations, subchapter S corporations, and partnerships. The tax problems associated with formation, operation, distributions, redemptions, reorganizations, and selected special topics will be analyzed. Prerequisite: ACCT 545 and admission to MAcc. Prerequisite or concurrent enrollment in ACCT 731. Enrollment restricted. LEC.

ACCT 733. Tax Planning. 3 Hours. A study of the fundamentals of Federal estate and gift taxation, the income taxation of estates and trusts, and various aspects of family tax planning. Prerequisite: ACCT 545 and admission to the MAcc program. Enrollment restricted. LEC.

ACCT 741. Fraud Examination and Forensic Accounting. 3 Hours. Explores various academic approaches to fraud to include factors learned from other disciplines such as sociology and psychology. Students will review the vast body of knowledge gained by practitioners throughout the world and will attempt to apply these factors to the prevention of financial statement and occupational (employee) fraud. Some of the topics covered include: skimming transactions, identity fraud, computer schemes, money laundering, bribery and kickbacks, and corporate espionage. Prerequisite: ACCT 543 or ACCT 544 or permission of instructor. Enrollment restricted. LEC.

ACCT 742. Advanced Auditing. 3 Hours. Current auditing philosophy, standards, techniques, and professional judgment are extensively investigated and related to auditing activities. Special emphasis is given to the design of audit programs in relation to the client's system of internal control and the effect of such factors as relative risk and materiality. Other topics include auditors' legal liability, professional ethics, the impact of electronic data processing and statistical techniques, and the preparation of auditors' reports and qualifications therein. Prerequisite: Admission to the MAcc program. Enrollment restricted. LEC.

ACCT 743. Accounting Information System Risks and Controls. 3 Hours. Students learn how to perform the risk assessments that auditors use to plan a top-down, risk-based assurance engagement. Using auditing standards and internal control frameworks as a guide, students learn how auditors (a) evaluate market conditions, industry practices, and client business activities to assess the risk of financial misstatement, (b) search potential misstatements by analyzing patterns of fluctuations in related financial statement accounts, and (c) assess the effectiveness of internal controls that protect technology-driven financial reporting processes from errors and irregularities. Prerequisite: Admission to the MAcc program. Enrollment restricted. LEC.

ACCT 745. Specialized Accounting Practices. 3 Hours. This course is an extension of the study of basic financial accounting practices to include specialized industries that have particular or varied forms of GAAP applications and reporting which are not normally covered in basic financial accounting courses. Topics include accounting for banking, retail, insurance, not-for-profit entities, oil and gas, and financial institutions. Typically, this course should be taken by students in the audit track of the MAcc Program. Prerequisite: Admission to the MAcc program. Enrollment restricted. LEC.

ACCT 746. International Financial Reporting Standards I. 2 Hours. International Financial Reporting Standards (IFRS) have become commonplace in nearly every country in the world. Even in the US, the SEC has sanctioned the use of IFRS for reporting purposes by a specific classification of exchange-listed corporations. In addition, the SEC has made a consistent attempt to converge US and international standards since the beginning of the 21st century. There is no question that US GAAP-trained accountants require a working knowledge of international financial reporting standards. LEC.

ACCT 747. International Financial Reporting Standards II. 1 Hour. This course will follow an independent study model with students identifying IFRS topics they wish to study further. Having successfully mastered the basic IFRS materials offered in IFRS I, this course will allow students an opportunity to explore a specific IFRS topic of interest with an in-depth research paper. Topics must be approved in advance. Students will interact with the professor to determine appropriate research material and obtain guidance to their research, the paper and their conclusions.
Students are encouraged to work at their own pace in order to obtain the best possible outcome from their research activity. Graded on satisfactory/unsatisfactory basis. Enrollment restricted. LEC.

ACCT 799. Internship in Accounting. 1-3 Hours.
Internships provide opportunities for students to combine their academic education with a meaningful experience in the business world. Accounting internships allow students to explore career pathways in accounting, further their professional growth, expand professional networks, and increase the relevancy of their academic coursework. The internship course combines job-related activities of the accounting internship position with a set of academic requirements. These requirements include academic assignments as well as a pre- and post-internship seminar held in the semester before and after the semester in which the internship occurs. Internships for credit must be approved by the Director of the Internship Program prior to the internship experience. Students may not receive more than three hours of internship credit. Enrollment restricted and by permission only. FLD.

ACCT 810. Accounting and Financial Management. 4 Hours.
Accounting and Financial Management introduces foundation concepts and analytical tools from accounting and finance and applies them to financial decision making. Topics include accounting information systems, financial statements, financial statement analysis, cash flows, operating and financial risks, valuation of real and financial assets, and the cost of capital. This course is open only to students in the full-time MBA program. LEC.

ACCT 895. Graduate Seminar in Accounting: ______. 0.5-5 Hours.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted. LEC.

ACCT 898. Independent Study for Master’s Students. 1-6 Hours.
Individual study of selected current problems in the field of accounting to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment. RSH.

ACCT 925. Seminar in Contemporary Accounting Theory II. 3 Hours.
(S) Continuation of BUS 740 with emphasis upon the economic and social factors affecting the development of accounting thought. Each student will make both oral and written presentations of his/her original investigation and analysis of contemporary controversial issues. Prerequisite: Consent of PhD advisor. LEC.

ACCT 927. Seminar in Management Accounting. 3 Hours.
(V) The objective of this course is to foster a student’s conception and resolution of substantive issues in the management accounting area. Thus, the course will provide exposure to selected contemporary research topics. Representative topics that will be discussed are: concept of information, information economics, accounting information for planning and control, design of accounting information systems, variance analysis, and cost allocations. Prerequisite: Consent of PhD advisor. LEC.

ACCT 995. Doctoral Seminar in Accounting: _____. 2-5 Hours.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor. LEC.

ACCT 997. Directed Research in Accounting. 1-5 Hours.
Students will research selected topics in the field of business administration under the direction of a graduate faculty member. Students are expected to report the results of their research by writing a publishable-quality scholarly article. Graded on satisfactory/unsatisfactory basis. Prerequisite: Approval required from supervising graduate faculty member. RSH.

ACCT 998. Independent Study for Doctoral Students. 1-5 Hours.
Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Student must submit written statement of proposed project. Prerequisite: Approval required from supervising faculty member and PhD Team. RSH.

ACCT 999. Doctoral Dissertation. 1-12 Hours.
(V) Individual research work. THE.

BBA 301. Managerial Economics. 3 Hours.
This course uses economic theory and methodology to understand and improve managerial decision making. The focus is on the role of markets in determining business and individual opportunities to create value, the behavior of individual markets reacting to supply and demand forces, and the consequences of alternative market structures and business policies. Course content includes demand, production, cost analysis, supply and demand analysis, price and non-price modes of competition, market structure, and economic efficiency. Prerequisite: Principles of Microeconomics and Principles of Macroeconomics. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 302. Legal Aspects of Business. 3 Hours. GE11.
A course designed to acquaint the student with the basic principles of law that are applicable to business transactions in the modern business world and the legal systems. Prerequisite: Junior standing (60 hours completed). Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 303. Organizational Behavior. 3 Hours.
This course serves as an introduction to the study of individual and group behavior within the context of an organization. An objective may be the development of the student’s potential for becoming an effective organization member and manager of people. Experiential learning methods are utilized to involve the student actively. A wide variety of topics and theories may be covered, generally including motivation, leadership, job design, group dynamics, and formal organizational structure and process. Prerequisite: Completion of General Psychology. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 304. Marketing. 3 Hours.
A study of marketing from the point of view of the business firm. Topics include the structure of the marketing system, the nature of marketing management, consumer behavior, marketing research, product policy, channels of distribution policy, and analytical techniques useful to marketing management. Prerequisite: Completion of Principles of Microeconomics, Financial Accounting, and General Psychology. Prior completion or co-enrollment in the required statistics course. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 305. Management Science and Operations Management. 3 Hours.
Introduces some of the most widely used models from management science in business decision making. Topics include decision making under uncertainty, resource allocation models, and production and operations management. Prerequisite: Completion of Introduction to Business Computing and the required statistics course. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.
BBA 306. Finance. 3 Hours.
This course consists of the analysis of problems relating to estimating the financial needs of an enterprise and to evaluating the alternative means of providing and utilizing both temporary and permanent capital. The relationship of current financial decisions with financial policy is analyzed from the viewpoint of management and the stockholder. Prerequisite: Prior Completion of Financial Accounting and prior completion or enrollment of the required statistics course. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 307. Introduction to International Business. 3 Hours. AE42.
This course provides an overview of the key concepts, analytical frameworks and institutions that underlie international business. Particular attention is paid to the cultural and social diversity present in the world as well as the economic theories that explain the benefits of trade and underpin the agreements governing such international transactions. Prerequisite: Principles of Macroeconomics and admission to the BBA program. LEC.

BBA 308. Business Policy and Strategy. 3 Hours. AE61.
This course exposes students to the role of general management in complex organizations. The cases, conceptual materials, and projects are selected to provide students with opportunities to analyze and formulate strategic decisions that allow businesses to create and sustain competitive advantages. Knowledge and skills gained in previous business courses, including marketing, finance, and quantitative methods, will be applied to problems associated with the totality of organizational strategic activity. Prerequisite: BBA 303, BBA 304, BBA 305, and BBA 306. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 401. Marketing Management and Strategy. 3 Hours.
This course builds upon the principles of marketing introduced in BBA 304 (Marketing) by further developing concepts in such areas as product management, pricing, distribution, promotion, market segmentation, product positioning, and strategic marketing planning. The primary focus of the course is the integration of these concepts to achieve specific marketing and segment goals and objectives. An important component of the course is the application of concepts to realistic marketing problems through the use of comprehensive marketing simulations or in-depth cases that capture the dynamics of the marketing environment. Prerequisite: BBA 304. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 402. Human Resources Management. 3 Hours.
This course addresses the ways that firms manage employment relationships, including staffing, training and development, compensation, performance appraisal, labor-management relations, employment law, career management, and job design. Upon completion of the course, students will be able to identify and address these topics from a general management perspective. Prerequisite: BBA 303. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 403. Ethical Decision Making in Business. 3 Hours. AE51.
This course is designed to provide students with: (a) a grounding in the psychological and philosophical foundations of business ethics; (b) the ability to recognize ethical problems; (c) an exposure to many of the ethically sensitive issues facing corporations and managers in business today (e.g., layoffs, outsourcing, employee whistle-blowing, employee privacy, employee health and safety, marketing and advertising, environmental issues, discrimination, and the global responsibilities of business); and (d) the tools for analyzing and reaching closure on ethical problems. Students will study the role of ethics in the relation of business to employees, consumers, and society. Students in this course will have the opportunity to engage in stimulating class discussions, justify ethical positions in case study analyses, investigate ethical issues in their own future professional lives, and develop and present their solutions for typical ethical problems faced by managers in organizations. Prerequisite: BBA 303. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 404. Entrepreneurship. 3 Hours.
In this course the student examines the disciplines which comprise the critical success factors in entrepreneurship and develops a fundamental understanding of the basic skill set required to manage his/her own business. Learning will be achieved by both study and discussion of key entrepreneurial business issues as well as the critical appraisal of new venture business plans as presented in the text. Readings in entrepreneurship and case studies, contained in the text as well as in video presentations, will be used to illustrate the essential entrepreneurial management issues. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 405. Introduction to Supply Chain Management. 3 Hours.
This course introduces the student to supply chain management. Students are presented the key concepts of supply chain management, the application of these concepts and are provided with the managerial knowledge of supply chain management through class discussions and case studies. Students discover the impact of information technologies, strategic alliances and logistics on supply chain management and the performance implication of supply chain management. Prerequisite: BBA 304, BBA 305, and BBA 306. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 406. Advanced Finance - Principle and Applications. 3 Hours.
This course covers the theory and professional practice in three areas of finance. (1) The processes investors follow in selecting where to place their savings are detailed. (2) The investment and financing issues faced by firms are investigated. (3) The financial intermediaries that facilitate the flow of funds between investors and firms are studied. Prerequisite: BBA 306. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 407. Information Systems Technology Elective: _____. 3 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of information systems technology topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 408. Accounting Elective: _____. 3 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of accounting topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. LEC.

BBA 410. Project Management. 3 Hours.
This course develops a systems view of business so students can more effectively integrate project management into their business strategy. A common language and knowledge of project management concepts, principles and practices is developed. Students develop an understanding of what project management involves, how it relates to other functional management areas, and its role in an organization’s structure and leadership. Topics are covered in the order they appear in the project lifecycle starting with project selection and bidding and ending with project acceptance and close out. Topics covered in this course include: the importance and role of project management, the contextual nature of projects, logistics issues in project management, and the E-business impact on project management. Prerequisite: BBA 303. Enrollment restricted to student admitted to the BBA program. LEC.
BBA 500. Individual Research in Business. 1-5 Hours.
Individual study of selected topics in business not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: Approval of proposed plan of study by the instructor. Enrollment restricted to students admitted to the Bachelor of Business Administration Major. Enrollment restricted. RSH.

BE 301. Managerial Economics. 3 Hours.
This course uses economic theory and methodology to understand and improve managerial decision making. The focus is on the role of markets in determining business and individual opportunities to create value, the behavior of individual markets reacting to supply and demand forces, and the consequences of alternative market structures and business policies. Course content includes demand, production, cost analysis, supply and demand analysis, price and non-price modes of competition, market structure, and economic efficiency. Not open for credit to students in ECON 524. Prerequisite: ECON 142 and ECON 144. LEC.

BE 302. Managerial Economics, Honors. 3 Hours.
Honors treatment of this course includes uses of economic theory and methodology to understand and improve managerial decision making. The focus is on the role of markets in determining business and individual opportunities to create value, the behavior of individual markets reacting to supply and demand forces, and the consequences of alternative market structures and business policies. Course content includes demand, production, cost analysis, supply and demand analysis, price and non-price modes of competition, market structure, and economic efficiency. Not open for credit to students in ECON 524. Prerequisite: ECON 142 and ECON 144. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.

BE 701. Business Economics. 2 Hours.
This course uses economic theory and methodology to understand and improve managerial decision making. The focus is on the role of markets in determining business and individual opportunities to create value, the behavior of individual markets reacting to supply and demand forces, and the consequences of alternative market structures and business policies. Course content includes demand, production, cost analysis, supply and demand analysis, price and non-price modes of competition, market structure, and economic efficiency. Enrollment restricted. LEC.

BE 709. Independent Study for Master’s Students. 1-6 Hours.
A variable-topic course open to graduate and selected undergraduate students meeting the requirements established by faculty members offering the course. Prerequisite: Determined by the instructor. Enrollment restricted. LEC.

BE 801. Advanced Managerial Economics. 3 Hours.
(F) This course is designed primarily for doctoral candidates in business administration. It will provide a rigorous analytical approach to developing and understanding an integrated economic model of the business firm and its environment. The student will be expected to learn the theory and understand how it can be applied to solve problems in business. Upon completion of the course the student should also possess an understanding of how economic analysis relates to and can be used in his/her own field of research. Masters students may enroll with consent of instructor. LEC.

BLAW 300. Special Topics in Business Law: ______. 1-5 Hours.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of business law topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor. LEC.
BLAW 301. Legal Aspects of Business. 3 Hours. GE11/GE3S.
A course designed to acquaint the student with the basic principles of law that are applicable to business transactions in the modern business world and the legal systems. Prerequisite: Junior standing (60 hours completed). LEC.

BLAW 302. Legal Aspects of Business, Honors. 3 Hours. GE11/GE3S.
Honors treatment of this course involves acquainting students with the basic principles of law that are applicable to business transactions in the modern business world and the legal systems. Prerequisite: Junior standing (60 hours completed). Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.

BLAW 400. Special Topics in Business Law: ______. 1-5 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of business law topics not covered by established courses. Prerequisite: Determined for each topic by the instructor. Enrollment restricted. LEC.

BLAW 500. Individual Research in Business Law. 1-5 Hours.
Individual study of selected topics in business law not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: BLAW 301 or BLAW 302; 3.0 professional grade point average and approval of proposed plan of study by the instructor. Enrollment restricted. LEC.

BLAW 505. Legal Aspects of the Management Process. 3 Hours.
A course designed to acquaint students with the basic principles of agency relationships, such as partnerships, limited liability companies, and corporations, with special emphasis on the problems encountered by managers and directors in operating a corporation. The course should acquaint a student with how to create and operate a corporation in light of current federal and state enactments. Prerequisite: BLAW 301 or BLAW 302. Enrollment restricted. LEC.

BLAW 510. Legal Aspects of Real Property Transactions. 3 Hours.
This course will address legal matters of concern to property owners, real estate agents and brokers, developers, renters, property managers, contractors, architects, planners, and lenders regarding real estate transactions. Concentrating on the general subjects of (1) the nature of real property, (2) transfer and financing of real estate, (3) land use and regulations, and (4) landlord and tenant relations, the course will address specific topics such as estates and interests in land, forms of ownership, agency and brokerage, and tax attributes of real estate investments, and will consider pertinent statutes and legal documents frequently used in real estate transactions. Prerequisite: BLAW 301 or BLAW 302. Enrollment restricted. LEC.

BLAW 515. Commercial Law. 3 Hours.
An advanced course in legal aspects of business with emphasis on the Uniform Commercial Code. Prerequisite: BLAW 301 or BLAW 302. Enrollment restricted. LEC.

BLAW 525. Negotiations and Dispute Settlement. 3 Hours.
This course will involve the study of the theory and practice of dispute resolution and negotiation in business mediation (facilitated negotiation). Conflict resolution in the workplace, including grievance procedures, will be considered. Students are required to apply concepts studied through role playing simulations. (Same as MGMT 525.) Prerequisite: MGMT 310 or MGMT 311 and BE 301 or BE 302. Enrollment restricted. LEC.

BLAW 701. Introduction to the Legal Environment of Business. 2 Hours.
A course focused on understanding legal rights and duties and ethical responsibilities in the business environment and identifying and addressing legal risks in business decision making. This is an introductory course which includes an overview of several foundational areas of law that are highly relevant to business. LEC.

BLAW 702. Legal Aspects of Business Transactions: Contracts and Torts. 2 Hours.
A course focused primarily on principles of contract and tort law. Contract law and tort law serve as the foundation for many other areas of law that are relevant in the business environment. Prerequisite: BLAW 301 or BLAW 302 or BLAW 701. LEC.

BLAW 703. Legal Aspects of Business Organizations. 3 Hours.
A course focused on the legal attributes of different forms of business organizations, such as partnerships, limited liability companies, and corporations. This course includes a study of the basic principles of agency law. It explores the rights and responsibilities of people and entities (such as partners, stockholders, directors, officers, contractors, employers, and employees) functioning in the organizational environment. Also considered are the interests of third parties, including the public, which brings into focus related topics, such as securities regulations, ethics, and corporate social responsibility. Not open to students with credit in BLAW 505. Prerequisite: BLAW 301 or BLAW 302 or BLAW 701. LEC.

BLAW 704. Commercial Law. 3 Hours.
An examination of the Uniform Commercial Code and related legal topics, such as bankruptcy and property law. Not open to students with credit in BLAW 515. Prerequisite: BLAW 301 or BLAW 302 or BLAW 701. LEC.

BLAW 748. Negotiation and Dispute Resolution. 3 Hours.
This course will include a study of the theory and practice of negotiation and dispute resolution in business contexts. It will focus on the use of alternatives to litigation, such as various forms of arbitration, mediation, and, especially, negotiation. In addition to emphasizing negotiation as a means of resolving disputes, attention will be directed at negotiation of transactions. Appreciation of concepts will be promoted through role play simulations. Not open to students with credit in BLAW 525 or MGMT 525. (Same as MGMT 748.) LEC.

BLAW 895. Graduate Seminar in Business Law: ______. 0.5-5 Hours.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted. LEC.

BLAW 898. Independent Study for Master’s Students. 1-6 Hours.
Individual study of selected current problems in the field of business law to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment. Enrollment restricted. RSH.

BUS 101. Business Majors, Careers and Professional Skills. 3 Hours.
This course acquaints students with the nature of business majors and careers. With this knowledge, students can explore, engage and implement their academic and career interests within business. Students are introduced to the curricula requirements, expectations of business students, possible career paths, and the necessary professional skills in the business environment. Prerequisite: Open only to students with fewer than 60 hours. LEC.
BUS 105. Business Writing. 3 Hours. GE21.
This course explores the theory and practice of written communication in business. Students learn strategies for writing clearly, effectively, and in a professional tone and format within different business contexts that require both expositive and persuasive writing styles. This course focuses entirely on the writing process, including developing ideas, organizing, drafting, revising, and editing. Classes provide students multiple opportunities to write drafts, receive feedback, and revise their work. This is done in the context of analyzing, discussing, and critiquing different forms of business writing. Prerequisite: Goal 2, Outcome 1. LEC.

BUS 110. The First Year Business Experience I. 1 Hour.
This course is designed to connect students to life at KU and to opportunities within the School of Business. Students will learn academic success, personal success in the transition to college, opportunities for leadership development, problem solving, decision making, and business professionalism. Students will also be provided opportunities to create lasting connections with School of Business staff, advisors, and faculty. Experiential learning activities outside of the classroom will be integrated into the course. This course is offered in the fall term only. Enrollment restricted. LEC.

BUS 120. First Year Business Experience II. 1 Hour.
This course will enable students to begin to explore major options in the Business School and career paths in the business world. Topics such as available majors, business professionalism, resumes, cover letters, internships, and team dynamics will be covered. Students will also be provided opportunities to create lasting connections with School of Business staff, advisors, and faculty. Experiential learning activities outside of the classroom will be integrated into the course. This course is offered in the fall term only. Enrollment restricted. LEC.

BUS 200. Business Leadership Seminar. 1 Hour.
This course provides students with structured opportunities to engage in active career and major exploration, support leadership development, build professional skills, and promote self-discovery. The class is held for one hour a week and additional out-of-class activities are required. May be taken more than once; total credit not to exceed four hours. Prerequisite: Admission to the Business Leadership Program. Enrollment is restricted. LEC.

BUS 210. The Second Year Business Experience I. 1 Hour.
This course is designed to connect students to life at KU and to opportunities within the School of Business. Students will learn academic success, personal success in the transition to college, opportunities for leadership development, problem solving, decision making, and business professionalism. Students will also be provided opportunities to create lasting connections with School of Business staff, advisors, and faculty. Experiential learning activities outside of the classroom will be integrated into the course. This course is offered in the fall term only. Enrollment restricted. LEC.

BUS 220. The Second Year Business Experience II. 1 Hour.
This course will enable students to begin to explore major options in the Business School and career paths in the business world. Topics such as available majors, business professionalism, resumes, cover letters, internships, and team dynamics will be covered. Students will also be provided opportunities to create lasting connections with School of Business staff, advisors, and faculty. Experiential learning activities outside the classroom will be integrated into the course. This course is offered in the spring term only. Enrollment restricted. LEC.

BUS 300. Special Topics in Business: ______. 1-5 Hours.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of business topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor. LEC.

BUS 303. Career Planning and Job-Search Strategies. 1 Hour.
This course will introduce students to the fundamentals of organizing a personal employment search strategy. Emphasis will be placed on the assessment of individual goals and talents, job markets, evaluation, and employment search strategies. It is highly recommended that students take this course during their junior year. Course is graded satisfactory/unsatisfactory. Course counts as an activity course. Prerequisite: Junior standing (60 hours completed). LEC.

BUS 305. Information Sources for Business Research. 1 Hour.
This course is intended to prepare you for the rapidly changing environment of business information retrieval, using both print and electronic information sources. Course sessions will cover both (1) the conceptual analysis, selection, and use of business information sources and (2) research strategies and techniques in locating information on your topic. The course will focus on your ability to develop critical thinking skills in researching your topic throughout the semester. LEC.

BUS 330. Directed Study in Business Topics. 1-3 Hours.
Individual study of selected topics in business administration not otherwise available to non-business majors. Topics selected will be determined by special interest and objectives of the student in consultation with the faculty member who will supervise the directed study or research. Prerequisite: 3.0 grade-point average, major in a field other than business administration and/or accounting, and permission of instructor offering the directed study and of the director of the undergraduate program. IND.

BUS 399. Internship in Business. 1 Hour.
Internships provide opportunities for students to integrate their academic education with a meaningful experience in the business world. Internships allow students to further their professional growth, explore career pathways, expand professional networks, and increase the relevancy of their academic course work. The internship course combines job-related activities of the internship position with a set of academic requirements. These requirements include academic assignments as well as a pre- and post-internship seminar held in the semester before and after the semester in which the internship occurs. Internships for credit must be approved by the coordinator of the internships prior to the internship experience. BUS 399 is limited to one (1) credit hour per offering, but students may count a maximum of two (2) cumulative credit hours of BUS 399 toward degree requirements. Internships must satisfy specific criteria in order to qualify for academic credit. Contact the Business Career Services Center in 125 Summerfield for information regarding the process of having an internship evaluated for academic credit. Prerequisite: Approval of the internship; two of the following: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311, SCM 310 or SCM 311. Enrollment restricted. LEC.

BUS 400. Special Topics in Business: ______. 1-5 Hours.
A special variable-topic seminar open to seniors and graduate students meeting the requirements established by the faculty members offering the particular seminar. Its purpose is to allow the occasional offering of management-related topics not adequately covered in any regular course available to students of the School of Business. Prerequisite: Determined for each topic by instructor. Enrollment restricted. LEC.
BUS 500. Individual Research in Business. 1-5 Hours.  
Individual study of selected topics in business not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and SCM 310 or SCM 311; 3.0 professional grade point average and approval of proposed plan of study by the instructor. Enrollment restricted. IND.

BUS 706. Professional Development Skills I. 0.5 Hours.  
A series of workshops for graduate business students which provide foundation and supplemental skill development in such areas as leadership training, career development, communications, negotiations, ethical behavior, technology, business writing, and market-based thinking. Graded on satisfactory/unsatisfactory basis. Open only to full time MBA students. FLD.

BUS 707. Professional Development Skills II. 1 Hour.  
This two day session is a total immersion into successful presentations. Participants learn new ways to develop a winning presentation strategy; learn and practice a proven organizational method; and get valuable individual tips on how to successfully deliver the right message. Each participant delivers four short presentations to the class. Each of those four presentations is video recorded (for the participants use) and the instructor provides private, one-on-one feedback and coaching after each presentation. A continuation of MGMT 706 Professional Development Skills I. Graded on satisfactory/unsatisfactory basis. Prerequisite: BUS 706 or consent of department. FLD.

BUS 795. Special Topics in Business: ______. 2-5 Hours.  
A variable-topic course open to graduate and selected undergraduate students meeting the requirements established by faculty members offering the course. Prerequisite: Determined by the instructor. Enrollment restricted. LEC.

BUS 801. Professional Development Skills. 0.5 Hours.  
A series of workshops for graduate business students which provide foundation and supplemental skill development in such areas as leadership training, career development, communications, negotiations, ethical behavior, technology, business writing, and market-based thinking. Graded on satisfactory/unsatisfactory basis. This course is open only to students in the full-time MBA program. LEC.

BUS 810. Application and Integration Course. 1 Hour.  
The course provides an active learning opportunity to complement classroom learning. Many different enrichment activities can be used to provide an opportunity to apply classroom knowledge to specific situations. Some examples of possible enrichment activities include, but are not limited to case competitions, community consulting activities, communication skills workshops, leadership and team building exercises, intensive simulation. The principal objectives of the course are to enhance "doing" skills and help students turn classroom knowledge into action, to emphasize collaboration and team initiatives, to develop collaborative and cooperative behaviors, and to develop an understanding of how "failure" can ultimately be the best learning tool. Topics will vary depending on the enrichment activity. This course may be repeated for credit. This course is open only to students in the full-time MBA program. LEC.

BUS 825. Internship Program. 1 Hour.  
The Internship Program provides a continuous learning opportunity between the first and second year of MBA studies which compliments the comprehensive, research based in class learning with a full immersion clinical experience. The principal objectives of the course are to acquire a meaningful work related education, witnessing how the classroom instruction translates to practical applications and to develop interpersonal and executional skills. This course provides clinical applications of business problem solving and consulting. The course links the models and theories studied in the classroom with field applications to solve real business problems requiring real time analysis, consideration of practical alternative strategies, determination of sales and profit implications of the recommended course of action. A principal objective is for the student to acquire first-hand industry knowledge and witness varying client management styles. Topics include consulting processes and successful consultant characteristics, hypothesis generation, problem identification and differentiation of root cause vs. symptom, application of market research methods, solution modeling, and presentation of solution. This course is open only to students in the full-time MBA program. LEC.

BUS 840. MBA Co-Op Program. 2 Hours.  
MBA students enrolled in the optional 4th semester of their MBA studies which extends the comprehensive, research based in-class learning into a full immersion clinical experience. The principal objectives of the course are to acquire a meaningful work related education, witnessing how the class instruction translates to practical applications and to develop interpersonal and executional skills in a real-world environment. This course provides clinical applications of business problem solving and consulting. The course links the models and theories studied in the classroom with field applications to solve real business problems requiring real time analysis, consideration of practical alternative strategies, determination of sales, and profit implications of the recommended course of action. A principal objective is for the student to acquire first-hand industry knowledge and witness varying client management styles. Topics include application of consulting processes and identification of consultant characteristics, application of problem identification and differentiation of root cause vs. symptom, application of market research methods, and presentation of solutions. This course is open only to students in their 4th semester of the full-time MBA program. LEC.

BUS 898. Professional Development Skills. 1-6 Hours.  
This course provides foundation and supplemental skill development in such areas as career development, leadership training, and business communications. Graded on satisfactory/unsatisfactory basis. By permission only. LEC.

BUS 899. Master’s Thesis. 3-6 Hours.  
(V) Individual research work. Approval of faculty supervisor required. THE.

BUS 901. Research Issues in Business Administration. 2 Hours.  
(FS) A core course for Ph.D. students (with the exception of Finance and Management) majoring in business administration. Provides a workshop format for discussion of the currently prevalent research methodologies and problems being addressed in the areas of accounting, finance, human resources management, information systems, marketing, decision sciences, organizational behavior, and strategic management. All Ph.D. students and faculty are encouraged to attend workshops of interest. Prerequisite: Admission to the Ph.D. program. LEC.

BUS 902. Teaching Seminar. 1 Hour.  
(F) The objective of this course is to improve the teaching effectiveness of the participants. Highly effective teachers demonstrate their teaching techniques and discuss the reasons underlying their actions. School of Business Ph.D. students are required to take this seminar during the first semester in which they are the instructor of record for a course. LEC.

BUS 903. Responsible Conduct of Research. 2 Hours.  
The major objectives of this doctoral level course on the responsible conduct of research are to build students’ abilities to analyze ethical issues, and to expose students in advance to various issues that may arise while engaging in the research endeavor. Issues will be covered that arise in such areas as research design, data collection and management,
the use of human subjects, data analysis, authorship, publication, peer review, and other aspects of professional practice. LEC.

DSCI 202. Statistics. 4 Hours.
An introduction to statistical inference techniques with emphasis on the application of these techniques to decision making in a firm. Topics include probability theory, random variables, probability distribution functions, estimation, test of hypothesis, regression, correlation, and introduction to statistical process control. Prerequisite: MATH 115. Corequisite: IST 202 (formerly IST 301). LEC.

DSCI 300. Special Topics in Decision Science: ___. 1-5 Hours.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of decision science topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor. LEC.

DSCI 302. Quantitative Methods and Data Analysis. 3 Hours.
This course will cover quantitative methods and techniques of data analysis that are useful in solving common problems that arise in all the functional areas of business. Upon completion of this course, given a business problem, students will be expected to know how to formulate a mathematical model which is appropriate to the problem, to fit the model to available data, and to interpret the model results to derive actionable insights. Examples of quantitative methods and data analysis that may be taught include: multiple regression, analysis of variance, statistical process control, linear programming, non-linear optimization and decision making under uncertainty. Prerequisite: MATH 115 and DSCI 202 (formerly DSCI 301.) LEC.

DSCI 400. Special Topics in Decision Sciences: ___. 1-5 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of decision science topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted. LEC.

DSCI 405. Advanced Production and Operations Management. 4 Hours.
A further study of problems encountered in production from a managerial perspective employing the methodology of management science. Topics included in the course are location of facilities, design of product lines, replacement of facilities, quality control, production planning, production and inventory control, and scheduling. This course is in the Management Science and Operations Management area. Prerequisite: SCM 310 or SCM 311. Enrollment restricted. LEC.

DSCI 410. Advanced Management Science. 3 Hours.
Decision making under uncertainty and resource allocation models were introduced in DSCI 310. These topics will be covered in greater depth in this course. Applications of these models to complex problems in business will be emphasized. Cases illustrating the use of these models will also be covered. This course is in the Management Science and Operations Management area. Prerequisite: SCM 310 or SCM 311. Enrollment restricted. LEC.

DSCI 500. Individual Research in Decision Sciences. 1-5 Hours.
Individual study of selected topics in decision sciences not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and SCM 310 or SCM 311; 3.0 professional grade point average and approval of proposed plan of study by the instructor. Enrollment restricted. LEC.

DSCI 701. Statistical Decision Making. 2 Hours.
This course provides an introduction to data gathering and analysis with an emphasis on problem solving for decision making and process improvement in a business setting. The role of numerical data in the understanding of business problems and in the evaluation of planned improvements is studied, along with the study of variation commonly occurring in business processes and methods of reducing this variation. Statistical software is used to supplement data analysis and aid in the problem solving. Topics covered may include statistical methods such as exploratory data analysis, graphical analysis, stratification analysis, confidence intervals, correlation, linear regression, and control charts. Enrollment restricted. LEC.

DSCI 710. Business Forecasting Methods and Applications. 3-4 Hours.
A survey of forecasting methods and application. Essential concepts underlying these methods are discussed, including cost and performance characteristics. Criteria for selection of appropriate methods are developed. Issues concerning effective utilization for forecasting in several corporate planning situations are considered. Prerequisite: IST 701. Enrollment restricted. LEC.

DSCI 715. Managing for Quality Improvement. 3 Hours.
This course will take a closer look at various aspects of the total quality theory and its practices. Particular attention will be paid to the foundations of total quality theory including Deming’s 14 principles of management and key tenants of Juran and Crosby. Additional topics include an examination of the continual improvement process in theory and action, strategies for getting started, and issues to address during a transformation into a total quality model of operation. Prerequisite: DSCI 702. Enrollment restricted. LEC.

DSCI 720. Operations Management. 2 Hours.
This course is a survey of the strategic concepts and techniques used in managing the operations function in both the manufacturing and the service sectors. The course has the following principal objectives: to identify different kinds of operations problems and understand their impact on business and to apply basic operations analysis techniques to provide business solutions and to find improvement strategies. Topics covered include process and cycle time analysis, capacity planning, service operation and waiting line management, sales and operations planning, inventory management, and constraint management. Prerequisite: DSCI 701 or DSCI 810. Enrollment restricted. LEC.

DSCI 730. Managing Customer Focused Enterprises. 2 Hours.
An introduction to management principles supporting the concept that a primary goal of a business is to meet the needs of its customers. To accomplish this goal, organizations must design, build, and deliver products and services that meet customer needs in a resource effective manner. Topics covered include process and cycle time analysis, capacity planning, service operation and waiting line management, sales and operations planning, inventory management, and constraint management. Prerequisite: DSCI 701 or DSCI 810. Enrollment restricted. LEC.

DSCI 740. Seminar in Decision Sciences: ___. 3 Hours.
This course will cover theories of decision making under uncertainty and competition. Examples of topics that may be covered are Bayesian decision theory, game theory, habitual domain theory for forming winning strategies and effective decision making. Automated aids for decision making such as expert systems may also be covered. Prerequisite: DSCI 701 and DSCI 702, or consent of instructor. Enrollment restricted. LEC.
DSCI 744. Statistical Process Control and Improvement. 2-3 Hours.
This course deals with process improvement through the reduction and control of variation in business organizations. The result of reduced variation is an improvement of integral organizational functions, a reduction of costs, and a minimization of defects in the market place. Data driven improvement is emphasized. Topics covered include advanced discussion of using control charts for process improvement, and the use of designed experiments in process improvement. Particular emphasis will be given to methods used to analyze a given process, to the use of statistical tools to stabilize an entire process, to understand the natural variability in process output and to reducing process variation. Prerequisite: DSCI 701. Enrollment restricted. LEC.

DSCI 746. Contemporary Issues in Operations Management. 3 Hours.
This course will examine the major manufacturing and the operating strategies used by firms today. A partial list of these strategies include quality improvement, theory of constraints, just-in-time, and manufacturing planning and control systems. Pros and cons of each strategy will be discussed. Implementation issues will also be discussed. Prerequisite: DSCI 702. Enrollment restricted. LEC.

DSCI 795. Special Topics Decision Science: ____. 2-5 Hours.
A variable-topic course open to graduate and selected undergraduate students meeting the requirements established by faculty members offering the course. Prerequisite: Determined by the instructor. Enrollment restricted. LEC.

DSCI 810. Statistics and Decision Tools. 3 Hours.
This course covers basic statistical tools for solving problems in organizations. The principal objectives of the course are to learn a strategy to solve organizational problems, to learn some data gathering and data analysis techniques, to learn how to interpret data and understand variation in data, and to learn how to reduce variation in organizational processes and output. Course content includes data gathering and problem analysis tools, probability distributions and features of distributions (means, standard deviations, Normal distribution, and Binomial distribution), stratification analysis, Pareto analysis, correlation, confidence intervals, simple hypothesis testing, linear regression, and analysis of variance. This course is open only to students in the full-time MBA program. LEC.

DSCI 895. Graduate Seminar in Decision Sciences: ____. 0.5-5 Hours.
A variable-topics seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted. LEC.

DSCI 898. Independent Study for Master’s Students. 1-6 Hours.
Individual study of selected current problems in the field of decision science to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment. RSH.

DSCI 920. Probability for Business Research. 4 Hours.
(F) This course covers the basic theory of probability and its use for research in the business disciplines. The course is designed primarily for Ph.D. students in the business school. Prerequisite: Doctoral standing and two semesters of calculus, or consent of instructor. LEC.

DSCI 921. Statistics for Business Research. 4 Hours.
(S) This course covers the basic theory of statistics and its use for research in the business disciplines. The course is designed primarily for Ph.D. students in the School of Business. Prerequisite: DSCI 920. LEC.

DSCI 922. Advanced Regression. 3 Hours.
This course presents various statistical tools for undertaking quantitative research in business. The regression model under the full ideal conditions is discussed, along with methodological issues that arise when these ideal conditions are violated, as often occurs in business research. A high degree of theoretical rigor is maintained, along with an emphasis on practical applications through the use of assignments that require data analysis. Prerequisite: DSCI 921 or consent of instructor. LEC.

DSCI 934. Seminar in Probability and Statistics: ____. 3 Hours.
(V) This course will cover advanced topics in probability and statistics with application to various business disciplines. Topics covered may vary and will depend on the instructor. Examples of topics that may be covered are time series models, stochastic processes, uncertainty in artificial intelligence, multivariate statistics, etc. Prerequisite: DSCI 920 and DSCI 921, or consent of instructor. LEC.

DSCI 935. Seminar in Optimization: ____. 3 Hours.
(V) This course will cover basic and advanced topics in optimization theory and applications. Examples of topics that may be covered are linear programming, nonlinear programming, dynamic programming, multiple-criteria decision making, habitual domain theory for forming winning strategies and effective decision making and game theory. Prerequisite: Linear algebra and real analysis or consent of instructor. LEC.

DSCI 936. Management Science Research Seminar. 1 Hour.
The seminar will discuss current research in management science topics such as artificial intelligence, statistics, optimization, decision making, decision support systems, and production/operations management. Topics covered will reflect the research interests of the instructor and participants. Participants are required to lead the discussion for at least one paper of their choice. Graded on a satisfactory/unsatisfactory basis. LEC.

DSCI 995. Doctoral Seminar in Decision Sciences: ____. 2-5 Hours.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor. LEC.

DSCI 997. Directed Research in Decision Science. 1-5 Hours.
Students will research selected topics in the field of business administration under the direction of a graduate faculty member. Students are expected to report the results of their research by writing a publishable-quality scholarly article. Graded on satisfactory/unsatisfactory basis. Prerequisite: Approval required from supervising graduate faculty member. RSH.

DSCI 998. Independent Study for Doctoral Students. 1-5 Hours.
Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Student must submit written statement of proposed project. Prerequisite: Approval required from supervising faculty member and PhD Team. RSH.

DSCI 999. Doctoral Dissertation. 1-12 Hours.
(V) Individual research work. THE.

ENTR 300. Special Topics in Entrepreneurship: ____. 1-5 Hours. LEC.

ENTR 301. Starting Your Own Business. 3 Hours. AE51.
In this course the student examines the disciplines which comprise the critical success factors in entrepreneurship and develops a fundamental understanding of the basic skill set required to manage his/her own business. The course will emphasize the Entrepreneurial Process in which each of the following disciplines will be introduced so that the
student understands meaning, interrelationship and the application of the subject matter. First the student will be introduced to entrepreneurship and the personal attributes which historically have produced successful entrepreneurs. Further, the student will learn how to evaluate business opportunities via Feasibility Analysis which encompasses industry and competitor analysis, developing an effective business model, building a new venture team, developing an effective marketing plan, assessing the new ventures financial strengths and preparing the proper ethical and legal foundation for the new business. Finally, on completion of the course the student will possess a beginning comprehension for getting financing for the new venture and preparing for the challenges of business growth. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1. LEC.

ENTR 302. Financing Your Own Business. 3 Hours.
This course introduces the non-business student to the language of business, accounting, and its applications in the financial management of new and small business environments. Students will learn how to account for the various activities of the start-up and early stage new venture as well as the importance, utility and construction of financial statements. Further, students will acquire the ability to construct financial projections for a start-up firm and monitor the financial performance of the growing business with a focus on cash flow management. Finally, students will be introduced to various remedies in the event that performance does not meet expectations. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1. LEC.

ENTR 303. Marketing Your Own Business. 3 Hours.
This course focuses on the marketing development of new business ideas for small businesses including creating an environment conducive to innovation, recognizing business opportunities, assessing the industry and its potential customer segments, barriers to entry and competitive set. In addition, students will acquire an understanding of the primary marketing tools available to the entrepreneur to drive customer awareness, initial and repeat purchase and the ability to fully integrate each of those tools into a cohesive, integrated marketing plan, all on an extremely limited budget as typifies start up businesses. Upon successful completion of the course, students will understand how to plan an entrepreneurial marketing program, implement it and evaluate its performance. This includes market analysis, segmentation, the marketing mix of product, price, promotion and distribution and marketing strategy, both long term and annually. Prerequisite: ENTR 301 and ENTR 302. LEC.

ENTR 304. Launching Your Own Business. 3 Hours.
This course provides the student with an opportunity to prepare a complete go-to-market business plan for a new venture which leverages the students’ major area of study so that following graduation the student has the option of pursuing self employment in the launch of their own business. The students’ expertise from their area of major study will be combined with the entrepreneurial skills acquired from the prior three courses in this Certificate sequence. Ideally, this course will originate from the students’ school of origin, either selected from a roster of existing qualifying courses or independent study with a faculty member in the students’ field of major study. In the event that the students’ school of major study cannot provide the teaching resources for independent study, it will be provided by the School of Business, Center for Entrepreneurship. If the faculty at the students’ school of origin wants to develop a specific course which complies the Certificate requirements, course preparation funding has been arranged via a grant from the Kauffman Foundation. Prerequisite: ENTR 303. LEC.

ENTR 400. Special Topics in Entrepreneurship: _____. 1-5 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of entrepreneurship topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted. LEC.

ENTR 410. Introduction to Entrepreneurship. 3 Hours.
In this course the student examines the disciplines which comprise the critical success factors in entrepreneurship and develops a fundamental understanding of the basic skill set required to manage his/her own business. Learning will be achieved by both study and discussion of key entrepreneurial business issues as well as the critical appraisal of new venture business plans as presented in the text. Readings in entrepreneurship and case studies, contained in the text as well as in video presentations, will be used to illustrate the essential entrepreneurial management issues. Enrollment restricted. LEC.

ENTR 430. Entrepreneurship and Innovation in the Corporate Environment. 3 Hours.
This course explores challenges to entrepreneurship and innovation in large established organizations and how entrepreneurial principles can be applied to drive competitive advantage. Applications include exploration and development of new products, business processes, markets, customers, and organizational structures. The course emphasizes experiential learning through the study of large companies that have successfully implemented entrepreneurial practices. Enrollment restricted. LEC.

ENTR 450. New Venture Creation/Business Plan Development. 3 Hours.
This course builds upon the foundation created by the Introduction to Entrepreneurship course. It will provide the student with two learning opportunities: first, it details the critical success factors of starting a new venture, growing it and finally harvesting it profitably; secondly, this course will provide hands-on instruction regarding the development of a complete and compelling business plan. Students will work as teams on the development of a business plan for the purposes of commercializing an innovative business concept or KU lab-sourced technology. These student teams will also present and defend their business plans at various venues including intercollegiate competitions for the purposes of improving their team interaction skills, their presentation capabilities. Prerequisite: ENTR 410. Enrollment restricted. LEC.

ENTR 470. Entrepreneurial Marketing. 3 Hours.
The course focuses on the development of new business ideas for new or established organizations, creating an environment conducive to innovation, recognizing business opportunities, assessing the industry, potential customers, market segment, barriers to entry and competitor set. The development of each of these subjects will lead to a feasibility analysis which each student will prepare for his/her chosen new venture. This course will also examine the development of the optimal sales and distribution. Additionally, the course will provide an understanding of how to translate the product/service idea to the business concept and marketing positioning. Lastly, students will acquire an understanding of the primary marketing tools available to the entrepreneur to drive customer awareness, initial and repeat purchase and the ability to fully integrate each of those tools into a cohesive, integrated marketing communications program. Prerequisite: ENTR 410 and MKTG 310 or MKTG 311. Enrollment restricted. LEC.

ENTR 480. Management of Small Business. 3 Hours.
This course looks at the unique aspects of owning and managing a small business, family business or franchise, with the owners having close control over operations and management decisions. Students will examine the startup options of buying, starting, or franchising; operations and human resources management; the unique factors of the family business; marketing, including setting prices, choosing a location, developing competitive advantage, positioning, and promotion with limited
ENTR 490. Entrepreneurship in Practice. 3 Hours.
The purpose of this course is to provide a forum for collaborative learning in entrepreneurship and allow students to apply the models and theories learned in previous courses in practical applications to actual entrepreneurial challenges. This course will further unlock and engage the entrepreneurial mindset, better equipping students to a variety of stimuli will be employed to generate discussion including: development of an actual start up business, an online new venture simulation game, analysis of entrepreneurially focused business cases, and development of an entrepreneurial business case. In this course students will learn the many facets of running an entrepreneurial business and what it takes for a business to succeed. Prerequisite: ENTR 410 (MGMT 475) or instructor approval. Enrollment restricted. LEC.

ENTR 500. Individual Research in Entrepreneurship: _____ 1-5 Hours.
Individual study of selected topics in entrepreneurship not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Enrollment restricted. RSH.

ENTR 701. Starting Your Own Business. 3 Hours.
In this course the student examines the disciplines which comprise the critical success factors in entrepreneurship and develops a fundamental understanding of the basic skill set required to manage his/her own business. The course will emphasize the Entrepreneurial Process in which each of the following disciplines will be introduced so that the student understands meaning, interrelationship and the application of the subject matter. First the student will be introduced to entrepreneurship and the personal attributes which historically have produced successful entrepreneurs. Further, the student will learn how to evaluate business opportunities via Feasibility Analysis which encompasses industry and competitor analysis, developing an effective business model, building a new venture team, developing an effective marketing plan, assessing the new venture’s financial strengths and preparing the proper ethical and legal foundation for the new business. Finally, on completion of the course the student will possess a beginning comprehension for getting financing for the new venture and preparing for the challenges of business growth. Not open to students in the School of Business. LEC.

ENTR 702. Financing Your Own Business. 3 Hours.
This course introduces the non-business student to the language of business, accounting, and its applications in the financial management of new and small business environments. Students will learn how to account for the various activities of the start-up and early stage new venture as well as the importance, utility and construction of financial statements. Further, students will acquire the ability to construct financial projections for a start-up firm and monitor the financial performance of the growing business with a focus on cash flow management. Finally, students will be introduced to various remedies in the event that performance does not meet expectations. Not open to students in the School of Business. LEC.

ENTR 703. Marketing Your Own Business. 3 Hours.
This course focuses on the marketing development of new business ideas for small businesses including creating an environment conducive to innovation, recognizing business opportunities, assessing the industry and its potential customer segments, barriers to entry and competitive set. In addition, students will acquire an understanding of the primary marketing tools available to the entrepreneur to drive customer awareness, initial and repeat purchase and the ability to fully integrate each of those tools into a cohesive, integrated marketing plan, all on an extremely limited budget as typifies start up businesses. Upon successful completion of the course, students will understand how to plan an entrepreneurial marketing program, implement it and evaluate its performance. This includes market analysis, segmentation, the marketing mix of product, price, promotion and distribution and marketing strategy, both long term and annually. Not open to students in the School of Business. LEC.

ENTR 704. Launching Your Own Business. 3 Hours.
This course provides the student with an opportunity to prepare a complete go-to-market business plan for a new venture which leverages the students’ major area of study so that following graduation the student has the option of pursuing self employment in the launch of their own business. The students’ expertise from their area of major study will be combined with the entrepreneurial skills acquired from the prior three courses in this Certificate sequence. Ideally, this course will originate from the students’ school of origin, either selected from a roster of existing qualifying courses or independent study with a faculty member in the students’ field of major study. In the event that the students’ school of major study cannot provide the teaching resources for independent study, it will be provided by the School of Business, Center for Entrepreneurship. If the faculty at the students’ school of origin wants to develop a specific course which completes the Certificate requirements, course preparation funding has been arranged via a grant from the Kauffman Foundation. Not open to students in the School of Business. Prerequisite: ENTR 703. LEC.

ENTR 750. New Venture Creation/Business Plan Development. 4 Hours.
The purpose of this course is to provide a forum for collaborative learning in entrepreneurship and allow students to apply the models and theories learned in previous courses in practical applications to actual entrepreneurial challenges. This course will further unlock and engage the entrepreneurial mindset, better equipping students to a variety of stimuli will be employed to generate discussion including: development of an actual start up business, an online new venture simulation game, analysis of entrepreneurially focused business cases, and development of an entrepreneurial business case. In this course students will learn the many facets of running an entrepreneurial business and what it takes for a business to succeed. Prerequisite: ENTR 410 (MGMT 475) or instructor approval. Enrollment restricted. LEC.

ENTR 755. New Venture Creation/Business Plan Development. 4 Hours.
This course will focus on identifying and evaluating the business opportunity, the strategies to be developed and implemented as well as entrepreneurial capabilities required for marketplace success. Development of a robust and compelling business concept will be emphasized. Analyses of the industry, competition, the new business points of strategic leverage, creation of an effective business model and funding strategies will be studied. Financing the new venture, sourcing and structuring the required deal capital will be explored and attention to managing rapid growth and exit strategies will be provided. This course is not open to students with credit in ENTR 450. LEC.

ENTR 830. New Venture Practicum. 3 Hours.
This course in entrepreneurship shows the student how to start, grow and harvest a business. Students learn how diverse business disciplines integrate to form an optimal go-to-market plan for a given new business opportunity which maximizes likelihood of success and investor return. They learn how to commercialize a technological or social business opportunity and apply the models and theories acquired from other classes to clinical practice. Topics include identifying new venture opportunities, writing the business plan, validating the market opportunity, developing the business model and go-to-market strategy, preparing financial projections and new venture valuations, raising equity capital, understanding deal structures and terms, negotiating the term sheet, raising debt capital, and presenting the business plan to investors. This course is open to those with admission to a graduate business program. LEC.

ENTR 895. Graduate Seminar Entrepreneurship: ______. 0.5-5 Hours.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor. LEC.

ENTR 898. Independent Study for Master’s Students. 1-6 Hours.
Individual study of selected current problems in the field of entrepreneurship to be adapted to the special interests and objectives of the students and conducted through extensive reading and research.
FIN 101. Personal Finance. 3 Hours. GE11/GE12.
This course will provide the tools to help you better understand and improve the financial decisions you’ll make throughout your life. You will learn how to analyze the financial effects of spending and investing decisions and how to use credit well, including credit cards. You will develop an understanding of the basics of mortgages, purchase (rent) versus lease (buy) decisions, savings, investments, and insurance. You will acquire an appreciation of the time value of money that provides a foundation for reasonable financial planning. Given the basic tools and terminology you’ll learn, the course will help you develop solutions to various practical financial problems that you will face. Not open to students who have taken FIN 301. This course is open to all university students. LEC.

FIN 300. Special Topics in Finance: _____, 1-5 Hours.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of finance topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor. LEC.

FIN 301. Personal Finance. 3 Hours. GE11/GE12.
This course will provide the tools to help you better understand and improve the financial decisions you’ll make throughout your life. You will learn how to analyze the financial effects of spending and investing decisions and how to use credit well, including credit cards. You will develop an understanding of the basics of mortgages, purchase (rent) versus lease (buy) decisions, savings, investments, and insurance. You will acquire an appreciation of the time value of money that provides a foundation for reasonable financial planning. Given the basic tools and terminology you’ll learn, the course will help you develop solutions to various practical financial problems that you will face. Not open to students who have taken FIN 101. This course is open to all university students. LEC.

FIN 302. Finance Scholars I: Introduction to Financial Institutions. 1 Hour.
This course acquaints students with the financial institutions. Topics include a review of major international, national, regional money center institutions, investment management and other related institutions. The management and key revenue generators for these institutions will also be discussed. Enrollment restricted. LEC.

FIN 303. Finance Scholars II: Financial Careers and Institutions. 1 Hour.
This course acquaints students with the careers in financial institutions. Topics include: careers in major international, national, and regional money center institutions; ethical issues related to financial careers; a comparison of recruiting practices in investment banks, investment management, and corporate finance positions. Placement and recruiting practices in those institutions would be reviewed. Enrollment restricted. LEC.

FIN 305. Survey of Finance. 3 Hours.
The purpose of this course is to help the student develop a basic understanding of Finance. Topics covered include (1) financial instruments and the markets in which they are traded, (2) financial planning and analysis, (3) the cost and time-value of money, and (4) the fundamentals of investor decision-making. (Not open to students with credit in FIN 310.) Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1 and ACCT 200 or ACCT 205. LEC.

FIN 310. Finance. 3 Hours.
This course consists of the analysis of problems relating to estimating the financial needs of an enterprise and to evaluating the alternative means of providing and utilizing both temporary and permanent capital. The relationship of current financial decisions with financial policy is analyzed from the viewpoint of management and the stockholder. Prerequisite: Prior completion of ACCT 200; prior completion or co-enrollment in DSCI 202 or DSCI 301. LEC.

FIN 311. Finance, Honors. 3 Hours.
Honors treatment of this course consists of the analysis of problems relating to estimating the financial needs of an enterprise and to evaluating the alternative means of providing and utilizing both temporary and permanent capital. The relationship of current financial decisions with financial policy is analyzed from the viewpoint of management and the stockholder. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: Prior completion of ACCT 200; prior completion or co-enrollment in DSCI 202 or DSCI 301. LEC.

FIN 400. Special Topics in Finance: _____, 1-5 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of finance topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted. LEC.

FIN 410. Investment Theory and Applications. 3 Hours.
This course emphasizes the theoretical and practical aspects of investments. Financial instruments such as common stocks, bonds, options, futures, and mutual funds are analyzed in a theoretical context using efficient market theory, capital market theory, option pricing, and stock valuation models. Experience in practical applications is generally obtained through the use of case studies. Prerequisite: FIN 310 or FIN 311. Enrollment restricted. LEC.

FIN 411. Investment Theory and Applications, Honors. 3 Hours.
Honors treatment of this course emphasizes the theoretical and practical aspects of investments. Financial instruments such as common stocks, bonds, options, futures, and mutual funds are analyzed in a theoretical context using efficient market theory, capital market theory, option pricing, and stock valuation models. Experience in practical applications is generally obtained through the use of case studies. Prerequisite: FIN 310 or FIN 311. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.

FIN 415. Corporate Finance. 3 Hours.
Building on the concepts of present value, the focus of this course is on the theory of and methods for corporate asset selection. The course includes coverage of important technical issues such as risk analysis, evaluation of mutually exclusive projects, capital rationing, and leasing. Some attention usually will be devoted to the topic of project financing. Prerequisite: FIN 310 or FIN 311. Enrollment restricted. LEC.

FIN 416. Corporate Finance, Honors. 3 Hours.
Honors treatment of this course builds on the concepts of present value. The focus of this course is on the theory of and methods for corporate asset selection. The course includes coverage of important technical issues such as risk analysis, evaluation of mutually exclusive projects, capital rationing, and leasing. Some attention usually will be devoted to the topic of project financing. Prerequisite: FIN 310 or FIN 311. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.
FIN 417. Business Valuation. 3 Hours.
Apply finance principles to measure and manage the value of companies using a professional’s step-by-step approach. In this course, students estimate free cash flows, economic value added, and cost of capital. They also forecast accounting statements, compare absolute and relative valuation techniques, and evaluate restructuring opportunities and potential flexibility options. Prerequisite: FIN 415 or FIN 416. Enrollment restricted. LEC.

FIN 420. International Finance. 3 Hours.
The economic determinants of exchange rates are discussed. This is followed by an examination of the financing problems faced by the multinational corporation and the international portfolio manager, arising from the international nature of their environment. Topics include spot, forward, futures, and options markets in foreign currency, international risk management, purchasing power parity, interest rate parity, covered interest arbitrage, and contemporary issues in international financial management. Prerequisite: FIN 310 or FIN 311. Enrollment restricted. LEC.

FIN 425. Futures and Options. 3 Hours.
This course examines the use of forwards, futures, SWAPs options, and related financial derivatives for hedging arbitrage, and speculative purposes in the global environment. The course focuses on understanding how firms can manage interest rate risk, exchange rate risk, and commodity price risk using these derivatives. The emphasis is on understanding the motivation issues, and the techniques behind financial engineering with these derivatives, as practiced by firms and individuals to maximize value in global markets. Prerequisite: FIN 310 or FIN 311. Enrollment restricted. LEC.

FIN 430. Financial Markets and Intermediaries. 3 Hours.
Explores the financial institutions that create credit and liquidity for businesses and other borrowers, the financial instruments that facilitate credit and liquidity creation, and the markets in which those instruments are sold or traded. Special emphasis is paid to commercial banks, but non-depository intermediaries such as finance companies, mortgage banks, insurance companies and investment banks are also discussed. Presents and analyzes the workings of money markets, bond markets, commercial loan markets, mortgage markets and foreign exchange markets. Throughout the course, the determination of interest rates, as well as the sources and implications of credit risk, liquidity risk and interest rate risk, are central to the discussion. The course closes with an introduction to risk management at financial intermediaries using on-balance sheet (e.g., loan underwriting, asset-liability management) and off-balance sheet (e.g., asset securitization, interest rate, foreign exchange and credit derivatives) tools. Prerequisite: FIN 310 or FIN 311. Enrollment restricted. LEC.

FIN 435. Commercial Bank Management. 3 Hours.
An in-depth study of commercial banking. The primary focus is the value maximization of the bank, given the legal, technological, macro-economics, and competitive constraints facing bank managers. The course emphasizes bank investment decisions (e.g., underwriting loans), financing decisions (e.g., generating deposits, capital adequacy), and risk-management decisions (hedging interest rate risk, credit risk, liquidity risk, and foreign exchange risk). Ongoing changes in financial markets, information technology, and government regulations, and the importance of these changes for banking business strategies, are stressed throughout the course. Prerequisite: FIN 430 or co-enrollment in FIN 430. Enrollment restricted. LEC.

FIN 440. Insurance. 3 Hours.
The central focus of study is on the role of insurance in business and society. The approach is, in general, from the standpoint of the person confronted with problems of risk management and loss prevention in coping with insurable (pure) risk situations. The course is designed to further the ability of the student to analyze and evaluate programs undertaken to control the loss of income which results from the destruction of property values. Prerequisite: FIN 310 or FIN 311. Enrollment restricted. LEC.

FIN 445. Fixed Income. 3 Hours.
This course is an introduction to bond markets and bond derivatives. Bonds and associated financial derivatives include securities that promise a fixed income stream and by extension all securities whose valuation and hedging are related to interest rates. The objective of this course is to provide students with a guide to financial markets, institutions and instruments associated with debt funds and help them to understand the determinants of the general level and structure of interest rates. The focus of this course is on the concepts and tools that are useful to understand and interpret real world issues related to debt markets. Prerequisite: FIN 415 or FIN 416. Enrollment restricted LEC.

FIN 450. Applied Portfolio Management, Honors. 4 Hours.
Honors treatment of this course provides the student with practical portfolio experience. Students actually and collectively manage funds in an endowment account of the benefit of the University and the School of Business. Experienced instructors, speakers, and financial analysts from Wall Street give the class a hands-on real life experience in analyzing and managing securities. The student will be familiarized with many different applied valuation procedures such as cash flows and growth models in an event driven context, as well as market capitalization techniques. Individual securities and stock options are analyzed on a continuing basis. Prerequisite: FIN 410 or FIN 411. Enrollment by application only. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.

FIN 454. Portfolio Strategy. 3 Hours.
Investors construct portfolios by choosing allocations across asset classes and by selecting funds or managers within each asset class. This course will (1) examine methods to forecast return and risk across asset classes, including fixed income, equities, real assets, venture capital, buyouts, and hedge fund strategies, (2) describe ways to evaluate the performance of fund managers relative to appropriate benchmarks, and (3) consider optimal allocations among fund managers in various asset classes. Prerequisite: FIN 410 or FIN 411. Enrollment restricted. LEC.

FIN 460. Financial Modeling and Risk Analysis. 3 Hours.
An introduction to the concepts, methodologies, and applications of risk analysis and modeling. This course is designed primarily to develop practical modeling skills with spreadsheet software. To accomplish this, material from across the finance discipline will be covered as well as material from the supply chain management discipline. Examples from corporate finance, investments, financial derivatives, real estate, personal finance, and supply chain management methods will be used to demonstrate modeling. (Same as SCM 418.) Prerequisite: FIN 310 or FIN 311. Enrollment restricted. LEC.

FIN 462. Mergers and Acquisitions. 3 Hours.
This is a course about corporate “deals” - corporate transactions that change who owns a business or who controls it. Naturally, the course covers classical mergers and acquisitions, including the financial, strategic and regulatory issues. However, it also covers corporate governance and control, IPO’s (initial public offerings), financial distress, and venture capital and private equity. Finally, deals require deal-makers - the investment bankers. We'll touch on aspects of investment banking, an industry that majors in finance and MBA’s often work in or have contact with. Prerequisite: FIN 310 or FIN 311. Enrollment restricted. LEC.
FIN 464. Security Analysis. 3 Hours.
A purpose of this course is to offer a well-rounded exposure to the theory and practice of security analysis. The course emphasizes the usefulness of sound investment theory as a backdrop for understanding asset pricing in dynamic financial markets. The course forms a bridge between a student’s initial exposure to investment theory and the practice of stock selection and active portfolio management. Prerequisite: FIN 410 or FIN 411. Enrollment restricted. LEC.

FIN 466. Entrepreneurial Finance. 3 Hours.
The entrepreneurial finance course will focus on valuing and financing young high-growth potential private companies (startup-ups). The objective is for the students to learn how to make investment and financing decisions (and how to distinguish good from bad investments) in an environment characterized by very high degrees of uncertainty and information asymmetry. We will address this topic from two distinct perspectives: the perspective of users (entrepreneurs) and suppliers (venture capitalists and other private equity investors) of capital. In the beginning of the semester we will first take the perspective of the individual entrepreneur (or manager). We will focus on identifying good ideas (evaluating projects using different valuation techniques), separating them from bad ideas, and placing a quantitative value on these opportunities. This part will review different valuation methods used to value start-up companies. We will also deal with issues such as forecasting cash flows of a start-up firm and ways to grow the firm using internal resources. Then we will turn our attention to the next step in the entrepreneurial process - raising capital to take advantage of good opportunities. Specifically we will consider venture capital (independent venture capitalists, angels, and corporate venture capitalists) as a source of financing for start-ups. This part will provide overview of the venture capital industry (players, organizational forms, contracting) and introduce students to the challenges of structuring venture capital deals. In addition, we will cover other ways of raising capital to aid the growth of the entrepreneurial firm. The focus will be on the private debt market as well as other alternative sources of financing for start-up firms (SBA loans, SBICs, mezzanine financing, L/Cs, etc.). Finally, we will study the ways to harvest the ventures (IPOs, acquisitions, LBOs). Prerequisite: FIN 415 or FIN 416. Enrollment restricted. LEC.

FIN 468. Corporate Financial Policy. 3 Hours.
The course will have three primary objectives. First, students will review basic valuation methods, including instruction on the location of relevant resources. Some advanced valuation techniques will be examined, e.g., APV, multiples and capital cash flow. Finally, students will work to apply these techniques to particular corporate financial decisions. Prerequisite: FIN 415 or FIN 416. Enrollment restricted. LEC.

FIN 492. Honors Topics and Problems in Finance: __________. 1-5 Hours.
This honors topics seminar is open only to students meeting the requirements established by faculty members offering the course. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.

FIN 500. Individual Research in Finance. 1-5 Hours.
Individual study of selected topics in finance not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: Approval of proposed plan of study by the instructor. Enrollment restricted. LEC.

FIN 600. Advanced Portfolio Management. 3 Hours.
This course is designed to give students increased practical portfolio experience. Students actually and collectively manage funds in an endowed account of the benefit of the University and the School of Business. Students will analyze portfolio decisions and determine the risk/reward profile of the portfolio. The student will apply many different valuation models to current and potential equity holdings in the portfolio. Individual securities and stock options are analyzed on a continuing basis. Enrollment restricted. LEC.

FIN 701. Financial Management. 2 Hours.
This course provides an overview of the problems associated with the financial management of business firms. The focus is on the practices followed by managers in raising and investing capital so as to maximize value. Prerequisite: ACCT 701. LEC.

FIN 702. Business Finance for Supply Chain Management. 2 Hours.
Adopting the perspective of the CFO, this course focuses on the problems and opportunities, analytic methods, and solutions in the businesses’ (1) working capital management, (2) long-term capital investments, and (3) financing. The unifying theme involves balancing expected return and risk in order to maximize the financial value of the enterprise. LEC.

FIN 710. Investments I. 2 Hours.
This course covers financial instruments and markets used by investment professionals and the key concepts used in the construction and management of equity portfolios. Emphasis is placed on understanding and managing investment risk, on the concept of market efficiency, and the role of financial markets and institutions in shaping the investment environment. Topics include financial instruments; financial markets and institutions; risk and return; portfolio optimization; asset pricing models; and behavioral finance. Prerequisite: FIN 701. Enrollment restricted. LEC.

FIN 711. Investments II. 2 Hours.
This course covers bonds, bond markets, options, futures, and derivative securities. Emphasis is placed on the features, risks and valuation of fixed income and derivative securities. Topics include types of bonds and bond terminology; valuation of bonds; derivatives including options, futures and swaps; and risk, return and diversification. Prerequisite: FIN 710. Enrollment restricted. LEC.

FIN 712. Business Investment. 2 Hours.
This course examines the tools for assessing the value of projects and capital investments, and the use of these tools in financial decision-making in public and private corporations. Topics to be covered include estimating the cost of capital, computing and discounting projected cash flows, capital budgeting, real options, and the intersection between business investment and strategy. Prerequisite: FIN 701. Enrollment restricted. LEC.

FIN 713. Business Financing. 2 Hours.
This course examines how firms finance their projects and investments, and how those corporate financing decisions impact firm value. Topics covered include capital structure, payout policy, security issuance, mergers and acquisitions, and corporate governance. Prerequisite: FIN 712. Enrollment restricted. LEC.

FIN 715. Real Estate Investment Analysis. 2 Hours.
This course stresses the practical applications of real estate analysis that can be drawn from theoretical foundations to assist the real estate manager in long-range planning. Particular emphasis is placed on real estate valuation, financing, conveyance, tax consequences of ownership and the role of government in real estate. Prerequisite: FIN 701. LEC.

FIN 720. Advanced Investments. 2 Hours.
This course covers asset pricing models used by investment professionals to evaluate the performance of actively managed portfolios, such as mutual funds and hedge funds. Emphasis is placed on understanding managerial risk-taking and risk-adjusted performance. Topics include the Capital Asset Pricing Model (CAPM); multi-factor models; statistical analysis of portfolio returns; benchmark portfolios; the risk and
assessments of portfolio performance; and the theory of active portfolio management. Prerequisite: FIN 711. Enrollment restricted. LEC.

FIN 721. Fixed Income. 2 Hours.
This course covers bond markets, bond portfolios, and bond derivatives. Bonds and associated financial derivatives include securities that promise a fixed income stream and by extension all securities whose valuation and hedging are related to interest rates. The objective of this course is to provide students with a guide to financial markets, institutions and instruments associated with bond funds and help them to understand the determinants of the general level and structure of interest rates. Prerequisite: FIN 711. Enrollment restricted. LEC.

FIN 725. Business Valuation. 2 Hours.
This course applies finance principles to measure and manage the company value. In this course students estimate free cash flows, economic value added, and cost of capital. They forecast accounting statements and compare absolute and relative valuation techniques. Prerequisite: FIN 701 or ACCT 810 and ACCT 720. Enrollment restricted. LEC.

FIN 731. Applied Portfolio Management Seminar. 2 Hours.
This course provides the student with practical portfolio experience. Students actually and collectively manage funds in an endowment account for the benefit of the University and the School of Business. Instructors, speakers, and financial analysts from Wall Street give the class experience in analyzing and managing securities. The class covers different applied valuation procedures such as discounted free cash flow models and relative valuation. Individual securities and stock options are analyzed on a continuing basis for inclusion or exclusion in the portfolio. Prerequisite: FIN 711. Enrollment restricted. LEC.

FIN 732. Derivatives Strategies. 2 Hours.
This course covers the use of derivative securities for hedging, arbitrage and speculative purposes. The emphasis is on understanding the motivation, mechanics, valuation, and management techniques behind financial engineering, as practiced by firms and investors to maximize value. Topics can vary but can include swaps, securitization, options properties and trading strategies, portfolio risk management and hedging with options, value-at-risk, real options, and corporate risk management policies such as operational risk and enterprise risk Management. Prerequisite: FIN 711. Enrollment restricted. LEC.

FIN 733. Alternative Investment Strategies. 2 Hours.
This course provides an in-depth understanding of the hedge fund industry and investment strategies. Students will learn how hedge funds are structured, managed, regulated and marketed. Experienced instructors and industry participants will provide current case studies illustrating the primary hedge fund investment strategies, their drivers of return and primary risk attributes. In addition, the course will consider hedge funds from an investor’s perspective and examine fund selection criteria, due diligence and performance measurement. Prerequisite: FIN 711. Enrollment restricted. LEC.

FIN 735. International Finance. 2 Hours.
Markets for foreign exchange and foreign exchange derivatives are examined. This is followed by an exploration of financial decisions faced by multinational corporations and international portfolio managers, and how such decisions are affected by global economics conditions and various international risk factors. Topics can include managing foreign exchange exposure, financing the global firm, foreign direct investment and political risk, multinational capital budgeting, and international portfolio theory and diversification. Prerequisite: FIN 701 or ACCT 810. Enrollment restricted. LEC.

FIN 750. Entrepreneurial Finance. 2 Hours.
This course focuses on the financing of new ventures. It will alternately take the view of (a) the entrepreneurs that create new firms, (b) venture capitalists, and (c) the limited partners and angel investors that provide funding. Key learning objectives include identifying the various financing options for new ventures, and their costs and benefits; understanding the cash flow and control provisions of a term sheet; understanding incentives and conflicts of interest among entrepreneurs, venture capitalists and limited partners; and valuing ventures over their lifecycle. Topics may vary but can include term sheets, venture capital, angel investors, crowdfunding, international venture capital, corporate venture capital, mezzanine financing, and exit strategies (acquisition, buyout, public offering). Prerequisite: FIN 701 or ACCT 810. Enrollment restricted. LEC.

FIN 751. Entrepreneurial Finance II. 2 Hours.
The course focuses on valuing and financing young high-growth potential private companies. A mixture of lectures and cases is used to expose students to various topics in entrepreneurial finance. Topics include financing start-ups through private debt and government sources, mezzanine financing, using strategic alliances as an alternative way to fund start-ups, overview of venture capital in developed countries and emerging markets, harvesting the new ventures through an initial public offering, merger, or a buyout, and the challenges associated with each exit venue. This course is not open to students with credit in FIN 466. Prerequisite: FIN 701. LEC.

FIN 760. Risk Analysis. 2-3 Hours.
An introduction to the concepts, methodologies, and applications of risk analysis and modeling. This course is designed primarily to develop practical modeling skills with spreadsheet software. To accomplish this, material from across the finance discipline will be covered. Examples from corporate finance, investments, financial derivatives, real estate, and personal finance will be used to demonstrate modeling. Prerequisite: DSCI 701 and FIN 701. Enrollment restricted. LEC.

FIN 795. Special Topics in Finance: ______. 2-5 Hours.
A variable-topic course open to graduate and selected undergraduate students meeting the requirements established by faculty members offering the course. Prerequisite: Determined by the instructor. Enrollment restricted. LEC.

FIN 820. Macroeconomics and Financial Markets. 3 Hours.
This course explores the national and global macro economies and the influence of financial markets on decision-making by firms and individuals. Understanding, analyzing, and forecasting economic indicators are key aspects of this course. The objectives of this course are to understand economic indicators and observe their impacts on national and global economies, to appreciate how financial markets aggregate economic information into interest rates and securities prices and thus influence decision-making by firms and individuals, to use data to construct forward-looking economic models, to understand and use economic indicators in short-run business decision-making and long-run business planning, and to appreciate how government policies can enhance or impair the functioning of markets and the behavior of firms and individuals. Topics in the course include economic growth, employment and labor markets, inflation, exchange rates, monetary policy, fiscal policy, capital markets, credit markets, economic indicators, trend analysis and forecasts, the language of the economics, and the financial press. This course is open only to students in the full-time MBA program. LEC.

FIN 821. Business Investment and Valuation. 3 Hours.
This course explores how businesses evaluate investment opportunities and deploy capital to enhance firm value. Principal objectives include identification of incremental cash flows and growth options generated by business investment, application of discounted cash flow techniques to
evaluate investment opportunities and firms, understanding of alternative valuation techniques and their use in the analysis of real options, understanding interactions between a firm's financing structure and its investment policies, and identification of managerial incentives and how a firm's governance structure affects investment policy and firm valuation. Topics include incremental cash flow identification, discounted cash flow techniques, real options analysis, leverage, cost of capital, corporate governance. Prerequisite: ACCT 810. This course is open only to students in the full-time MBA program. LEC.

FIN 830. Investments. 3 Hours. This course introduces theoretical concepts and analytical tools essential to investment management by individual investors and portfolio managers. The goal of this class is to provide MBA students with a structure to address investment problems in a systematic manner. Topics include factors that affect security risk and return, portfolio theory, valuation and selection of financial instruments such as bonds, common stocks, and options, asset allocation in a portfolio framework, and performance evaluation of portfolios and portfolio managers. Principal objectives are to apply financial theory and develop analytical models that explain security risk and return in a portfolio framework, to explain risks and returns associated with alternative asset allocation strategies, to evaluate the performance of portfolios and portfolio managers, and to value securities such as bonds, stocks, and options. Prerequisite: FIN 821. This course is open only to students in the full-time MBA program. LEC.

FIN 831. Financing Business Growth. 3 Hours. This course evaluates alternative means of financing business operations and capital investment. The principal objectives are to evaluate the effects of alternative financial structures on a firm's risk, cost of capital, and valuation; to understand how young entrepreneurial firms raise capital from financiers and financial markets, including sources such as angel investors, bank loans, venture capital, private equity, and initial public offerings; to understand how mature firms raise capital via seasoned equity issuance, corporate bonds, and leases, and how financial terms affect mergers and acquisitions, and to appreciate how firms engage in financial restructuring, including bankruptcy, subsequent to financial distress. Topics include leverage and financial risk, venture capital, private equity, public equity, bond financing, leasing, financial distress. Prerequisite: FIN 821. This course is open only to students in the full-time MBA program. LEC.

FIN 832. Derivatives and Risk Management. 3 Hours. This course focuses on understanding how firms manage interest rate risk, exchange rate risk, and commodity price risk using derivative instruments such as forwards, futures, swaps, and options. The emphasis is on the motivation, issues, and techniques behind financial engineering with these derivatives, as practiced by firms and individuals to maximize value in global markets. The principal objectives are to identify sources of risk to businesses and financial institutions, including commodity price risk, interest rate risk, and exchange rate risk; to understand institutional features and pricing of derivative instruments such as forwards, futures, swaps, and options; to use derivative instruments and other risk management tools to hedge financial and operational risks for both financial and non-financial firms and to appreciate the limitations of risk management and hazards such as "model risk" and counterparty risk. Topics include financial and operating risk assessment; valuation of forwards, futures, swaps, and options; use of derivative instruments and other risk management tools to hedge financial and operational risk; limitations and hazards of risk management. Prerequisite: FIN 821. This course is open only to students in the full-time MBA program. LEC.

FIN 840. Applied Portfolio Management. 4 Hours. This course provides the student with practical portfolio experience. Students actually and collectively manage funds in an endowment account for the benefit of the University and the School of Business. Experienced instructors, speakers, and financial analysts from Wall Street give the class a hands-on real life experience in analyzing and managing securities. The student will be familiarized with many different applied valuation procedures such as cash flows and growth models in an event driven context, as well as market capitalization techniques. Individual securities and stock options are analyzed on a continuing basis for inclusion or exclusion in the portfolio. Prerequisite: FIN 410 or FIN 411 or FIN 710 or ACCT 810. Enrollment by application only. LEC.

FIN 895. Graduate Seminar in Finance. 0.5-5 Hours. A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted. LEC.

FIN 898. Independent Study for Master’s Students. 1-6 Hours. Individual study of selected current problems in the field of finance to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment. RSH.

FIN 901. Current Research in Finance. 2 Hours. This course provides a seminar format for a discussion of the currently prevalent research topics, methods, and problems being addressed in the area of finance. All first year PhD students in finance will enroll in this course their first semester in the doctoral program. LEC.

FIN 918. Macroeconomics for Research in Business. 3 Hours. (S) This course is designed primarily for doctoral candidates in business administration. The basic Classical and Keynesian macroeconomic models are explored, along with extensions of these models. Concentration is placed on the role of monetary, fiscal, and trade policies, and the dialogues concerning stabilization policy, the unemployment-inflation tradeoff, wealth effects, rational expectations, and international policy issues. The focus is on a comparative static analysis of equilibrium, and the stability of equilibrium. Prerequisite: ECON 522 and MATH 115 and (MATH 116 or MATH 121), or consent of instructor. LEC.

FIN 937. Seminar in Business Finance. 3 Hours. This course is designed to develop the students' analytical abilities. Course material is of a theoretical and empirical nature. Advanced topics in financial management of business firms are covered. Special emphasis is given to long-term financing topics. Prerequisite: FIN 705 (BUS 751) and FIN 706 (BUS 752). LEC.

FIN 938. Seminar in Investments. 3 Hours. A study of advanced topics in investments, capital markets, and portfolio theory. Special emphasis is given to the theory of efficient markets. The course is designed to cover recent analytical and empirical literature in the investment area. Prerequisite: FIN 710 (BUS 753). LEC.

FIN 939. Seminar in Financial Institutions. 3 Hours. A survey of the academic literature in financial institutions. The reading list will vary depending on the instructor. May include both seminal theoretical papers and/or recent empirical studies on the role and importance of financial institutions in market economies. Prerequisite: Consent of Instructor. LEC.
FIN 995. Doctoral Seminar in Finance: ____. 2-5 Hours.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor. LEC.

FIN 997. Directed Research in Finance. 1-5 Hours.
Students will research selected topics in the field of business administration under the direction of a graduate faculty member. Students are expected to report the results of their research by writing a publishable-quality scholarly article. Graded on satisfactory/unsatisfactory basis. Prerequisite: Approval required from supervising graduate faculty member. RSH.

FIN 998. Independent Study for Doctoral Students. 1-5 Hours.
Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Student must submit written statement of proposed project. Prerequisite: Approval required from supervising faculty member and PhD Team. RSH.

FIN 999. Doctoral Dissertation. 1-12 Hours.
(V) Individual research work. THE.

IBUS 300. Special Topics in International Business: ____. 1-5 Hours.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of international business topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor. LEC.

IBUS 400. Special Topics in International Business: ____. 1-5 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of international business topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted. LEC.

IBUS 410. Introduction to International Business. 3 Hours. AE42.
This course provides an overview of the international business environment and explores its implications for firms and managers. Students will analyze the political, economic, legal and socio-cultural forces that shape the conduct of business in and across divergent cultural and institutional settings and examines theories and trends in international trade and investment from the perspective of a manager doing business across borders. Prerequisite: ECON 144. Enrollment restricted or permission of the instructor. LEC.

IBUS 415. Business in Latin America. 3 Hours.
This course analyzes the unique aspects of the Latin American business environment and the major managerial issues that are likely to confront firms and individuals doing business in the region. The first part of the course develops analytic skills for assessing country environments. The second part of the course focuses on making corporate and managerial decisions in the Latin American context. Prerequisite or Co-requisite: IBUS 410 or permission of the instructor. Enrollment restricted. LEC.

IBUS 425. Business in China. 3 Hours.
This course analyzes the unique aspects of the Chinese business environment and the major managerial issues that are likely to confront firms and individuals doing business in the country. The first part of the course develops knowledge about the country and skills for assessing it as a place for business. The second part of the course focuses on the performance of key management functions in the Chinese context such as marketing, finance, supply chain and human resource management. Prerequisite or Co-requisite: IBUS 410 or permission of the instructor. Enrollment restricted. LEC.

IBUS 462. Comparative and Cross-Cultural Management. 3 Hours.
This course examines in depth how culture, in all its aspects, is the major determinant of successful organizational performance and management practices in the global workplace. This is accomplished by comparing and contrasting various cultural norms and values, and demonstrating how those differences impact business in the areas of communication (verbal and nonverbal), relationship building, the role of the manager, the functioning of teams and group dynamics, negotiation, conflict resolution, and decision making. Students will also examine the influences of culture on legal and governmental considerations in business, organization structures and corporate culture. The basis for cultural norms and comparisons used in this course are drawn from all areas of the world. The emphasis is on developing the awareness and skills necessary for managing multicultural diversity in both domestic and international settings. Prerequisite or Co-requisite: MGMT 310 or MGMT 311 or permission of the instructor. Enrollment restricted. LEC.

IBUS 480. International Management. 3 Hours. AE42.
This course provides an overview of the essential managerial issues that firms and individuals will confront and must master to successfully operate in the international business setting. This is accomplished by introducing the student to an array of practical concepts, analytical frameworks and vital managerial techniques that will be useful to the international manager. Specific topics covered include the role of culture in global business, ethics and social responsibility in a multicultural setting, strategy development and organizational structure models for multinational operations, methods for analyzing and evaluating potential foreign markets and modes for foreign market entry. Also covered is the impact of a global scope of operations on basic management functions including marketing, finance, supply chain and human resource management. Prerequisite or Co-requisite: MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and FIN 310 or FIN 311 or permission of the instructor. Enrollment restricted. LEC.

IBUS 500. Individual Research in International Business. 1-5 Hours.
Individual study of selected topics in international business not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and FIN 310 or FIN 311 or permission of the instructor. Enrollment restricted. LEC.

IBUS 700. Managing in a Global Environment. 1 Hour.
This course focuses on economic, social, and political trends in the global environment and examines their implications for national and regional competitiveness. Extensive use will be made of guest speakers from other departments and local companies. Flexibility in format is required to accommodate instructional methods that will include lectures, discussions, cases, and simulations. Graded on a satisfactory/unsatisfactory basis. LEC.

IBUS 701. International Business. 2 Hours.
This course aims to provide an understanding of the basic concepts, institutions, and practices of international business, and their implications for business decision making. Topics include the causes and consequences of globalization, the political, economic, legal and socio-cultural differences across countries, and the institutional arrangements governing cross-border flows of trade, investment and intellectual property. Enrollment restricted. LEC.

This course provides students an opportunity to learn about business in a particular foreign country. Students will travel to the country of interest to visit a variety of companies and meet with their managers to learn
about the unique opportunities and challenges faced by companies operating in that country. Company visits will be selected to include both manufacturing and services firms and to reflect a variety of ownership structures (foreign subsidiaries, locally-owned companies, joint-ventures, etc.). Lectures from faculty at a Chinese host institution will provide specific information on the local business environment and cultural, historical and institutional context. Prerequisite: IBUS 701 or IBUS 820 and IBUS 720. (Please note: This course involves travel abroad and required PRIOR completion of both IBUS 701 and IBUS 720.) Enrollment restricted. LEC.

This course provides students an opportunity to learn about business in Latin America by observing it in practice. Students will travel to a Latin American country to visit a variety of companies and meet with their managers to learn about the unique opportunities and challenges faced by companies operating in Latin America. Company visits will be selected to include both manufacturing and services firms and to reflect a variety of ownership structures (foreign subsidiaries, locally-owned companies, joint-ventures, etc.). Lectures from faculty at a Latin American host institution will provide specific information on the local business environment and cultural, historical and institutional context. Prerequisite: IBUS 701 or IBUS 820 and IBUS 721. (Please note: This course involves travel abroad and required PRIOR completion of both IBUS 701 and IBUS 721.) Enrollment restricted. LEC.

IBUS 742. Business Practices in India. 2-3 Hours.
The class will expose you to economic, political and cultural aspect of this growing market and the impact rapid growth and economic transformation are having on Indian businesses. We will visit businesses, cultural centers and educational institutions in India. Industry leaders and experts will make presentations in India. Enrollment restricted. LEC.

This course provides students an opportunity to learn about business in China by observing it in practice. Students will travel to China to visit a variety of companies and meet with their managers to learn about the unique opportunities and challenges faced by companies operating in China. Company visits will be selected to include both manufacturing and services firms and to reflect a variety of ownership structures (foreign subsidiaries, locally-owned companies, joint-ventures, etc.). Lectures from faculty at a Chinese host institution will provide specific information on the local business environment and cultural, historical and institutional context. Prerequisite: Determined for each topic by instructor. LEC.

IBUS 720. Business in China. 2 Hours.
The course analyzes the unique aspects of the Chinese business environment and the major managerial issues that are likely to confront firms conducting business in the country. The first part of the course reviews the country’s geography, history and culture, and examines its contemporary political process, economic structure, financial system, and legal and social institutions. The second part of the course examines important strategic and operational issues such as market entry, contract negotiation, supply chain management, marketing strategies and techniques, and human resource management. Prerequisite: IBUS 701 or IBUS 820. Enrollment restricted. LEC.

IBUS 721. Business in Latin America. 2 Hours.
This course analyzes the business environment of Latin America and the managerial practices that have evolved in this unique context. Using cases, readings, lectures and videos, the course seeks to cover a broad set of countries, industries and companies as it examines the conduct and performance of business in Latin America. Prerequisite: IBUS 701 or IBUS 820. Enrollment restricted. LEC.

IBUS 722. Business in India: Understanding the Indian Paradox. 2-3 Hours.
The class will use a mix of lectures, guest speakers, cases and assignments to understand the context and contemporary practice of business in India. Topical industries/issues will be covered in the course. The course deals with the challenges related to consumer diversity, human resources, political environment and infrastructure. Unique Indian business practices and models used in rural marketing and supply-chain management will be examined. Enrollment restricted. LEC.

IBUS 730. International Business Strategy. 2 Hours.
This course examines the important managerial issues arising from a firm’s expansion into the international arena and introduces analytical frameworks and management techniques that are essential for an international manager. Specific topics covered include foreign market entry decisions, strategies and organizational structures for managing a multinational corporation, and management of various functional areas (such as production, marketing, finance and human resources) in an international setting. Prerequisite: MGMT 704 and IBUS 701 or IBUS 820. Enrollment restricted. LEC.

IBUS 731. Comparative and Cross-Cultural Management. 2 Hours.
This course explores how culture, in all of its aspects, is a major determinant of organizational practices and performance. We analyze how and why organizational communication and practices vary from one culture to another, as well as why certain values and cultural contexts might make particular management styles more successful than others. Finally, we will investigate the possibilities for transferring certain practices between cultures. Prerequisite: IBUS 701 or IBUS 820. Enrollment restricted. LEC.

IBUS 745. Graduate Seminar in International Business. 0.5-5 Hours.
A variable-topic seminar opens only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted. LEC.

IBUS 898. Independent Study for Master’s Students. 1-6 Hours.
Individual study of selected current problems in the field of business management to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment. RSH.

IBUS 950. Research in International Management and Strategy. 3 Hours.
This seminar surveys the literature, classic and contemporary, that forms the theoretical basis of the international business field. Topics
covered include but are not limited to: (1) institutional issues such as the international framework of trade and investment, crosscountry governance differences, and the role of NGOs; (2) firm-level strategic issues such as choice of market entry modes, international entrepreneurship, and management of multinational enterprises; and (3) group- and individual-level organizational issues such as international staffing and cross-cultural management. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

**IST 202. Introduction to Information Systems. 3 Hours.**

This course introduces essential components of information systems from an organizational perspective. The course covers the role of information systems in organizations, the technical foundations of information systems, the design and management of information systems, and the effect of information systems on organizations. The course also exposes students to software tools used to solve business problems. Prerequisite: ACCT 201 or coenrollment in ACCT 200. LEC.

**IST 205. Survey of Information Systems. 3 Hours.**

This course focuses on the use of information systems in business. Topics will include components of information systems, types of information systems, development of information systems, and uses and benefits of information systems. Relevant technology issues such as security, privacy and ethics will also be introduced. In addition to content on information systems, the course will cover the basic principles of Microsoft Office. (Not open to students with credit in IST 202 or IST 301.) Prerequisite: ENGL 101 and MATH 101. LEC.

**IST 312. Information Systems for Managers. 3 Hours.**

This course provides an overview of how to understand, analyze, and design computerized information systems, and is designed to provide the computer tools and knowledge so that today's business student will be tomorrow's successful and complete manager and/or consultant. The topics covered in this course include computer technology, internal control in a computer environment, strategic information systems planning, systems analysis and design, database systems, networking, and various software packages. This course will count as an advanced business elective. Not open to students with credit in ACCT 311. Prerequisite: ACCT 201 and IST 202 or IST 301. Enrollment restricted. LEC.

**IST 320. Fundamentals of Software Development. 3 Hours.**

This course provides an introduction to software development concepts and techniques. Students will develop an understanding of the software development process through hands-on programming assignments and projects. The course emphasizes problem solving, initiative, and teamwork within an information systems framework. Prerequisite: IST 202 or IST 301. Enrollment restricted. LEC.

**IST 325. Systems Analysis and Design. 3 Hours.**

This will take students through the entire systems development life cycle from the first contact with a customer through analysis and design to the implementation of the customer’s system. It will introduce the student to the field of systems analysis and design, basic systems analysis tools, and the procedures for conducting systems analysis. Topics covered will include the role of the systems analyst in the organization, concepts, philosophies and trends in systems analysis and design, and tools and techniques for such analysis. Prerequisite: IST 202 or IST 301. Enrollment restricted. LEC.

**IST 326. Database Management Systems. 3 Hours.**

This course introduces the fundamental concepts and implementation of the database development process and relational database systems. The student will be exposed to database development issues, SQL methodology, and entity-relationship models. Prerequisite: IST 202 or IST 301. Enrollment restricted. LEC.

**IST 330. Fundamentals of Business Computer Networking. 3 Hours.**

This course introduces business students to the terms and concepts of networking in the business environment. This course balances practical application and network theory. It examines common architecture models, transmission media, network topologies, and protocols in both local area network (LAN) and wide area network (WAN) environments. The course also delves into the operating characteristics of the Internet and various applicable protocol suites. Conceptual learning is supported by team exercises and projects. Prerequisite: IST 202 or IST 301. Prerequisite or Corequisite: IST 320. Enrollment restricted LEC.

**IST 335. Information Security. 3 Hours.**

This course provides an introduction to a wide range of topics associated with managing the security of information systems and related data in a business environment. Topics addressed include cryptography and security of operating systems, databases, networks. . . both wired and wireless, and telecommunications systems. Security issues are examined related to application development and to the use of the Internet as a business medium. Other elements of security are reviewed: physical security, disaster recovery and business resumption planning, change control, and so forth. On successful completion of the course, each student will be better able to: a. Understand and appreciate risks associated with business information systems infrastructures and the dynamic nature of these threats. b. Evaluate various risks associated with information systems. c. Envision controls that might mitigate these risks. d. Possess the ability to effectively articulate the threats and need for appropriate controls to others, be they higher management, peers, or subordinates. Prerequisite: IST 202 or IST 301. Enrollment restricted. LEC.

**IST 400. Special Topics in Information Systems Technology: _____ 1-5 Hours.**

This is a variable-topic seminar. Its purpose is to allow the occasional offering of information systems technology topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted. LEC.

**IST 401. Management of Integrated Information Systems/ERP. 3 Hours.**

This course provides an introduction to Enterprise resource planning (ERP) systems. We explore process integration of business-wide functions (controlling, production planning, demand management, sales and distribution) as required and supported by ERP implementations. The objectives of the course include: (1) understanding processes and data needs of different business functions; (2) understanding alternative information systems solutions and the challenges of independent information systems and; (3) understanding ERP systems as solutions to business process integration. (Same as SCM 404.) Prerequisite: IST 202 or IST 301. Enrollment restricted. LEC.

**IST 405. Contemporary Information Technology Topics. 3 Hours.**

This course examines a wide range of innovative information technologies (IT) which have both technical and strategic implications for businesses. These IT innovations affect all functions of businesses. Topics include Web 2.0, Web 3.0, next generation Web, social networking technology, virtual world, pervasive computing, ubiquitous computing, unified communications (unification), IT utility, on-demand computing, grid computing, Web services, service-orientation architecture, business intelligence, data mining, search technology and applications (Google), next generation Web search, virtualization (server, hardware), storage fabrics, open source, IT outsourcing, personal technology, healthcare IT, green IT, security and privacy, Internet policy, regulation global control, and the gap between IT and business (goals and strategies). This course
is available to all undergraduate and graduate students in the business school. Prerequisite: IST 202 or IST 301. Enrollment restricted. LEC.

IST 410. IT Project Management. 3 Hours.
This course provides initial exposure to concepts related to the project management discipline generally, while focusing on management of information technology projects in particular. The course is organized to emphasize core project management knowledge areas developed by the Project Management Institute, and it stresses the benefits of a disciplined, formal project management methodology. Students completing the course will gain an appreciation for the complex nature of projects and be better prepared to be an effective member of project teams encountered in many types of organizations. Prerequisite: IST 202 or IST 301. Enrollment restricted. LEC.

IST 492. Honors Topics and Problems in Information Systems and Technology: _______. 1-5 Hours.
This honors topic seminar is open only to students meeting the requirements established by faculty members offering the course. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.

IST 500. Individual Research in Information Systems Technology. 1-5 Hours.
Individual study of selected topics in information systems technology not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and SCM 310 or SCM 311; approval of the Area Director. Enrollment restricted. LEC.

IST 701. Managerial Information Systems. 2 Hours.
This course provides a broad, managerial level introduction to fundamental information technology concepts and terminology and the application of those concepts in business organizations. It addresses a variety of topics including: the Internet, intranets, and extranets; relational database theory; hardware, software, and networking concepts; the system development life cycle, project management; eBusiness/ eCommerce; knowledge management; enterprise resource planning; ethical considerations related to information technology advances; and organizational considerations related to information systems. The course focuses on the knowledge and expertise required for managers to successfully leverage information systems assets in a business setting. LEC.

IST 702. Systems Development. 3 Hours.
This course focuses on the practical issues of system development. A main objective of the course is to teach students system development through programming projects. In addition, the course examines the software engineering issues involved in system development, including usability and design issues, and alternative systems development processes. To enhance the quality of the system developed, the course also looks into software testing and evaluation issues. This course is not open to students with credit in IST 320. Prerequisite: IST 202 or IST 301 or IST 701 or concurrent enrollment in IST 701. Enrollment restricted. LEC.

IST 704. Database Management. 3 Hours.
This course provides insight to the managerial and organizational issues that surround the development and implementation of database systems in organizations. Students will undertake a project that allows them to experience the database development process while learning and practicing modern data modeling techniques. Students will also study the value that databases have to the organization and the impact that databases have on decision-making processes. Students also will study strategic issues that impact database development and will research the latest advances in database management systems and other emerging technology to gain insight on how these advances will impact the future of database development. This course is not open to students with credit in IST 326. Prerequisite: IST 202 or IST 301 or IST 701. Enrollment restricted. LEC.

IST 706. Systems Analysis and Design. 3 Hours.
This course develops skills with regard to the Analysis and Design activities typically encountered in an organizational software development environment. It emphasizes structured project planning, analysis and design techniques, including Project Estimation Methods, Data Flow Diagrams, Entity-Relationship Diagrams, and the application of CASE (Computer-Aided Software Engineering) Tools. The teaching methods will combine classroom experience with an analysis and design case study using role-play techniques to simulate an actual analysis and design scenario. This course is not open to students with credit in IST 325. Prerequisite: IST 202 or IST 301 or IST 701. Enrollment restricted. LEC.

IST 708. Strategic Information Systems Planning. 3 Hours.
This course has two objectives. The first objective is to give graduate students an understanding of the need for high level IT strategy in organizations. This is accomplished through case analysis, the experiential learning of strategic concepts and through interaction with IT executives. IT strategy is explored at the executive levels of an organization. The second objective of the course is to give students experience working on projects/research and presenting materials as is done in developing IT strategy for real organizations. Prerequisite: IST 202 or IST 301 or IST 701. Enrollment restricted. LEC.

IST 709. Business Computer Networking. 3 Hours.
This course will introduce, at a managerial rather than highly technical level, a range of topics associated with security of information systems and related data in a business environment. Topics addressed include selected cryptography concepts and the security of operating systems, databases, networks–both wired and wireless, and telecommunications systems. The course also considers security issues related to application development, including management of the change control process, and to the use of the Internet as a business medium. Students will also address physical security, disaster recovery, business resumption planning, and managerial planning and techniques involved in creating a security conscious organization. This course is not open to students with credit in IST 335. Prerequisite: IST 701. Enrollment restricted. LEC.

IST 712. Information Security. 3 Hours.
This course will introduce, at a managerial rather than highly technical level, a range of topics associated with security of information systems and related data in a business environment. Topics addressed include selected cryptography concepts and the security of operating systems, databases, networks–both wired and wireless, and telecommunications systems. The course also considers security issues related to application development, including management of the change control process, and to the use of the Internet as a business medium. Students will also address physical security, disaster recovery, business resumption planning, and managerial planning and techniques involved in creating a security conscious organization. This course is not open to students with credit in IST 335. Prerequisite: IST 701. Enrollment restricted. LEC.

IST 715. E-Commerce: An Integrative Perspective. 3 Hours.
This course examines how organizations and individuals exploit the Internet and other emerging information technology to conduct business in an information era. This course combines practice and theory to examine successes, failures, and common practices when using information technology for e-commerce activities. Prerequisite: IST 202 or IST 301 or IST 701. Enrollment restricted. LEC.

IST 720. Developments in Software Technology. 3 Hours.
This course is an introduction to object-oriented (OO) technology and the object paradigm. We explore the object paradigm, its benefits
and limitations. Specifically, we study a state-of-art technique for OO modeling. We also apply this technique to the analysis and design of a system, and implement the concepts with OO programming. Students will gain practical experience in OO analysis, design, and implementation through projects with an OO programming language. Prerequisite: IST 702. Enrollment restricted. LEC.

IST 725. Contemporary Information Technology Topics. 3 Hours.
This course examines a wide range of innovative information technologies (IT) which have both technical and strategic implications for businesses. These IT innovations affect all functions of businesses. Topics include Web 2.0, next generation Web, social networking technology, virtual world, pervasive computing, ubiquitous computing, unified communications (unification), IT utility, on-demand computing, grid computing, Web services, service-oriented architecture, business intelligence, data mining, search technology and applications (Google), storage fabrics, open source, IT outsourcing, personal technology, healthcare IT, green IT, security and privacy, Internet policy, regulation, global control, and the gap between IT and business (goals and strategies). This course is not open to students with credit in IST 405. Prerequisite: IST 202 or IST 301 or IST 701. LEC.

IST 730. IT Project Management. 3 Hours.
This course provides initial exposure to concepts related to the project management discipline generally, while focusing on management of information technology projects in particular. The course is organized to emphasize core project management knowledge areas developed by the Project Management Institute, and it stresses the benefits of a disciplined, formal project management methodology. Students completing the course will gain an appreciation for the complex nature of projects and be better prepared to be an effective member of project teams encountered in many types of organizations. This course is not open to students with credit in IST 410. Prerequisite: IST 202 or IST 301 or IST 701. LEC.

IST 799. Internship in Information Systems. 1-3 Hours.
Internships provide opportunities for students to combine their academic education with a meaningful experience in the business world. Accounting internships allow students to explore career pathways in accounting, further their professional growth, expand professional networks, and increase the relevancy of their academic coursework. The internship course combines job-related activities of the accounting internship position with a set of academic requirements. These requirements include academic assignments as well as a pre- and post-internship seminar held in the semester before and after the semester in which the internship occurs. Internships for credit must be approved by the Director of the Internship Program prior to the internship experience. Students may not receive more than three hours of internship credit. Enrollment restricted and by permission only. LEC.

IST 895. Graduate Seminar Information Systems: _____. 0.5-5 Hours.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted. LEC.

IST 898. Independent Study for Master’s Students. 1-6 Hours.
(V) Individual study of selected current problems in the field of information systems to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment. RSH.

IST 996. Doctoral Seminar in Information Systems: _____. 2-5 Hours.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor. LEC.

IST 997. Directed Research in Information Systems. 1-5 Hours.
Students will research selected topics in the field of business administration under the direction of a graduate faculty member. Students are expected to report the results of their research by writing a publishable-quality scholarly article. Graded on satisfactory/unsatisfactory basis. Prerequisite: Approval required from supervising graduate faculty member. RSH.

IST 998. Independent Study for Doctoral Students. 1-5 Hours.
Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Prerequisite: Approval required from supervising faculty member and PhD Team. RSH.

IST 999. Doctoral Dissertation. 1-12 Hours.
(V) Individual research work. THE.

MGMT 300. Special Topics in Management: _____. 1-5 Hours.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of management topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor. LEC.

MGMT 305. Survey of Management and Leadership. 3 Hours.
This course is designed to acquaint students with traditional business management ideas, recent management thinking, and the contemporary application of both to the management functions of planning, organizing, leading and controlling. A survey of a wide variety of topics is offered, generally including goal setting, strategy formulation and implementation, managerial decision making, structure and design of organizations, corporate culture, organizational change and development, human resources management, managing diversity, leading, motivation, communication, teamwork, quality control, management control systems, operations and service management, entrepreneurship and small business management, managerial ethics, corporate social responsibility, and management in the global environment. (Not open to students with credit in MGMT 310 or MGMT 311.) Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1. LEC.

MGMT 310. Organizational Behavior. 3 Hours.
This course serves as an introduction to the study of individual and group behavior within the context of an organization. An objective may be the development of the student’s potential for becoming an effective organization member and manager of people. Experiential learning methods are utilized to involve the student actively. A wide variety of topics and theories may be covered, including motivation, leadership, job design, group dynamics, and formal organizational structure and process. Prerequisite: PSYC 104. LEC.

MGMT 311. Organizational Behavior, Honors. 3 Hours.
This course serves as an introduction to the study of individual and group behavior within the context of an organization. An objective may be the development of the student’s potential for becoming an effective organization member and manager of people. Experiential learning methods are utilized to involve the student actively. A wide variety of topics and theories may be covered, generally including motivation, leadership, job design, group dynamics, and formal organizational structure and process. Honors students will be held to especially high expectations in terms of analyzing, evaluating, and creating, with
systematic and continuous emphasis on personal and professional development. Only open to students admitted to the University Honors Program, the School of Business Honors Program, or by consent of the instructor. Prerequisite: PSYC 104. LEC.

MGMT 400. Special Topics in Management: _____. 1-5 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of management topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted. LEC.

MGMT 405. Ethical Decision Making in Business. 3 Hours. AE51.
This course is designed to provide students with: (a) a grounding in the psychological and philosophical foundations of business ethics; (b) the ability to recognize ethical problems; (c) an exposure to many of the ethically sensitive issues facing corporations and managers in business today (e.g., layoffs, outsourcing, employee whistle-blowing, employee privacy, employee health and safety, marketing and advertising, environmental issues, discrimination, and the global responsibilities of business); and (d) the tools for analyzing and reaching closure on ethical problems. Students will study the role of ethics in the relation of business to employees, consumers, and society. Students in this course will have the opportunity to engage in stimulating class discussions, justify ethical positions in case study analyses, investigate ethical issues in their own future professional lives, and develop and present their solutions for typical ethical problems faced by managers in organizations. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted. LEC.

MGMT 410. Human Resources Management. 3 Hours.
This course addresses the ways that firms manage employment relationships, including staffing, training and development, compensation, performance appraisal, labor-management relations, employment law, career management, and job design. Upon completion of the course, students will be able to identify and address these topics from a general management perspective. Prerequisite: MGMT 310 or MGMT 311. Sports Management majors may petition for entry to the course with completion of the following prerequisite: MGMT 305, ECON 142, and an introductory statistics course (DSCI 202 or DSCI 301), HSES 310, MATH 365, PSYC 300). Enrollment restricted. LEC.

MGMT 413. Recruiting and Selecting Effective Employees. 3 Hours.
What makes for a great employee? The answer will depend on the fit between the person and the organization. One size does not fit all. This course covers policies and procedures for recruitment, selection and staffing to enhance organizational effectiveness. Students learn about individual differences, how to measure these differences, and how to ensure the organization’s recruitment and selection processes are reliable, valid, legal and “fair.” Topics will include (i) conducting a job analysis for creating job descriptions, (ii) recruiting candidates, and (iii) setting up selection procedures through initial screening and resume review, the employment interview, general and specific ability tests, personality tests, assessment centers, performance tests, integrity testing, and drug testing. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted. LEC.

MGMT 416. Training, Development, and Management Careers for Individuals and Organizations. 3 Hours.
The course introduces students to effective approaches for developing training and career management processes that support continuous learning and organizational adaptation. Topics include analyzing training needs, developing training with clear objectives, evaluating outcomes rigorously, and individual and organizational strategies for careers and work/life balance. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted. LEC.

MGMT 419. Managing Performance and Compensation. 3 Hours.
This course focuses on principles and practices in designing and administering performance management and reward systems. Employee performance measurement at both the individual and group levels is reviewed. Using performance measurement information for administrative decision-making and employee development is discussed. The impact of reward systems on employee recruitment, satisfaction and individual and firm-level performance is examined, including establishing pay structures, individual and group-based pay-for-performance plans, executive pay issues, government influences, and employee benefits. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted. LEC.

MGMT 431. Legal Environment for Managing Employees. 3 Hours.
The focus of this course is how the legal environment affects the management of employees. The topics covered include laws on employment discrimination, employment-at-will, and negligent hiring, the Occupational Safety and Health Act, the National Labor Relations Act, the Fair Labor Standards Act, and the Family and Medical Leave Act. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted. LEC.

MGMT 434. International Human Resource Management. 3 Hours.
Whether a company has a domestic or an international footprint, there is little doubt that it is impacted by global competition for markets and for talent. This course increases students’ understanding of core HRM activities as they are conducted in a global context. These activities include staffing, performance management, training and development, compensation, and labor relations. These topics are examined in the light of cultural and institutional differences. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted. LEC.

MGMT 437. Developing Management Skills. 3 Hours.
This course enhances leadership and other people-related skills of students in order to strengthen their capacity to manage others effectively. The course begins by focusing on self-awareness and self-management. Students also learn systems for classification of people on the basis of personality, behavior and attitudes. Other topics covered include communication skills, time management, techniques for controlling stress, problem solving, reading people’s emotions and intentions more effectively, effective team leadership, coaching and counseling, delegation and empowerment, conflict resolution, motivation, and effective discipline techniques. The focus of the course is on skill acquisition and development. Other pedagogy involves readings, personality and behavior inventories, role-playing, and case analyses. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted. LEC.

MGMT 455. The Role of the General Manager: Leadership and Management. 3 Hours.
The course focuses on the principles and methods that general managers use to implement strategies, both at the business unit and corporate levels. While stressing the complex nature of the general manager’s job, the organization’s mission, environment, technology, and strategy are discussed as the primary drivers of designing effective organization structures, processes, and management systems. Change processes for realigning the organization’s strategy, structure, processes, and culture are further emphasized, highlighting the role of the general manager as the architect of change. Topics covered include: organization design, transaction costs, behavior and output control; strategic leadership; design of information and reward systems; organizational change and cultural change processes. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted. LEC.

MGMT 470. Leadership in Business Organizations. 3 Hours.
This course provides the opportunity to learn and practice the behaviors common to business leaders; these include establishing direction, aligning others behind that direction, motivating and inspiring, and generally
promoting organizational change and transformation. Experiential learning will be used to develop skills by having students lead learning teams through a variety of classroom-based exercises and one service learning project of their choosing. Creation of a personal leadership development plan will be a major component of a portfolio of assessments, analyses, and reflections that the student will build throughout the course. A key goal will be establishing a leadership development mindset that will drive students’ future personal and professional development efforts. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted. LEC.

MGMT 472. Project Management. 3 Hours.
The purpose of this course is to examine business from a project management perspective, to develop a systems view of business rather than a functional view and to lay the foundation for future leaders to more effectively integrate project management into their business strategy. Further, to establish a common language for and a common knowledge of project management concepts, principles, and practices. This course is intended to help students gain an understanding of what project management involves, how it relates to other functional management areas, and its role in an organization’s structure and leadership. This course is made up of topical lectures, article/video analysis, open discussion, in-class experiential exercises and a team-based outside class project. In order to foster good project management habits, topics will be covered in the order they appear in the project lifecycle starting with project selection and bidding and ending with project acceptance and close out. Topics covered in this course include: the importance and role of project management, the contextual nature of projects, logistics issues in project management, and the E-business impact on project management. Prerequisite: MGMT 310 or MGMT 311 and SCM 310 or SCM 311. Enrollment restricted. LEC.

MGMT 485. Business Consulting. 4 Hours.
Business Consulting teaches the skills necessary to become consummate consultants and presents students with live projects incorporating real business challenges requiring real time analysis, consideration of practical alternative strategies, exploration of sales and profit implications of the selected strategy and delivery of a full rationalized recommendation to real clients. Prerequisite: MGMT 310 or MGMT 311. Enrollment restricted. LEC.

MGMT 492. Honors Topics and Problems in Management: ___. 1-5 Hours.
This honors topics seminar is open only to students meeting the requirements established by faculty members offering the course. Open only to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.

The course exposes the student to the role of general management in complex organizations. The cases, conceptual materials, and projects are selected to provide the student with decision-making opportunity in major areas of managerial concern: environmental opportunities and constraints, formulation of business policy, and policy implementation mechanisms. Knowledge and skills gained in previous business courses, including marketing, finance, and quantitative methods, will be applied to problems associated with the totality of organizational activity. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: FIN 310 or FIN 311; MGMT 310 or MGMT 311; MKTG 310 or MKTG 311 and SCM 310 or SCM 311 and Senior standing (90 hours completed). LEC.

MGMT 500. Individual Research in Management. 1-5 Hours.
Individual study of selected topics in management not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the reading and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and SCM 310 or SCM 311; 3.0 professional grade point average and approval of proposed plan of study by the instructor. Enrollment restricted. LEC.

MGMT 525. Negotiations and Dispute Settlement. 3 Hours.
This course involves the study of the theory and practice of dispute resolution and negotiation in business mediation (facilitated negotiation). Conflict resolution in the workplace, including grievance procedures, will be considered. Students are required to apply concepts studied through role playing simulations. (Same as BLAW 525.) Prerequisite: MGMT 310 or MGMT 311 and BE 301 or BE 302. Enrollment restricted. LEC.

MGMT 701. Organizational Behavior. 2 Hours.
This course focuses on human behavior in organizations. It helps the student learn to think systemically and critically about organizations, to appreciate knowledge building in the organization sciences, and to apply that knowledge in the work setting. Topics covered may include: individual differences and motivation, work and group design, leading and decision making, organization design and culture, and organization change and development. LEC.

MGMT 704. Strategic Management. 2 Hours.
Strategic Management has as its primary objective the development of an understanding of the role of general management from both a conceptual and operating standpoint. The course is based on the strategic management framework emphasizing the evaluation of an organization’s strategic situation and the formulation of viable alternative strategies required to deal with the challenges facing the organization. Attention is focused on the development of organizational objectives and the formulation of strategies at the business and operating levels. Prerequisite: MGMT 701, FIN 701, and MKTG 701. Enrollment restricted. LEC.

MGMT 705. Ethical Decision Making in Business. 2 Hours.
This course is designed to provide students with: (a) a grounding in the psychological and philosophical foundations of business ethics; (b) the ability to recognize ethical problems; (c) an exposure to many of the ethically sensitive issues facing corporations and managers today in each of the functional areas of business (management, accounting, finance, information systems, and marketing); and (d) the tools for analyzing and reaching closure on ethical problems. Students will study the role of ethics in the relation to the individual, manager, organization, and global business environment. Students in this course will have the opportunity to engage in stimulating class discussions, justify ethical positions in case study analyses, investigate ethical issues in their own future professional lives, and develop and present their solutions for typical ethical problems faced by managers in organizations after fully exploring the ethical dimensions of both sides of a given issue. Prerequisite: MGMT 701. Enrollment restricted. LEC.
MGMT 710. Leadership Philosophy and Practice. 2 Hours.
This course emphasizes an exploration of ideas about leadership that are practice-oriented. The material covered is based primarily on ethnographic and clinical inquiry rather than social scientific research. A central theme of this material, some of which is philosophical in nature, is the focus on learning and the role of reflection in both the leadership process itself and in the process of developing leaders. Varieties of topics are covered, including foresight, intuition, practical reason, critical thinking, reflective practice, and ethical judgment. A key goal is to move the student into a position where he or she can begin to take control of their own leadership development process. The course is structured so as to give students the opportunity to reflect on their experiences, analyze those experiences using the conceptual material, and then enter into systematic dialogue on these issues with other students and the instructor. The ultimate product of this learning process is the creation of a detailed personal leadership development plan. Prerequisite: MGMT 701. Enrollment restricted. LEC.

MGMT 711. Human Resources Management. 2 Hours.
The purpose of this course is to acquaint students with the rationale and tools for creating a sustainable competitive advantage through human resources. The management of human resources - people and their human capital - is approached from the perspective of the practicing manager as opposed to that of the human resources specialist. The major topics covered include staffing, training and development, performance management, compensation and benefits, job design, facets of employment law, and employee (labor-management) relations. Prerequisite: BE 701, DSCI 701 and MGMT 701. Enrollment restricted. LEC.

MGMT 712. Economic, Environment, and Social Sustainability in Business. 2 Hours.
This course introduces students to conducting business and pursuing organizational goals sustainably. It includes principles (scientific, economic, and cultural) to guide decision-making for sustainability, metrics to assess sustainability [e.g. the integrated or triple bottom line], and the application of sustainability concepts to business functions. Aspects of global environmental sustainability [energy, water, agriculture, resource use and waste] are considered. The use of cases, discussion of best practices, and attention to relevant skills help students gain familiarity with sustainable business practices and develop their capabilities to contribute to firm efforts to operate more sustainably. Enrollment restricted. LEC.

MGMT 713. Managing People: Applications and Skills. 2 Hours.
The goal of this course is to increase the capacity of the student to manage others effectively. It begins by focusing on self-awareness and self-management. Students also learn systems for classification of people on the basis of behavior and attitudes. Topics covered may include time management, problem solving, reading people, coaching and counseling, delegation and empowerment, conflict resolution, motivation and discipline. The focus is on skill acquisition and the learning approaches including readings, inventories, role playing and case analysis. Prerequisite: MGMT 701. Enrollment restricted. LEC.

MGMT 715. Management of Organizations. 3 Hours.
This course examines the evolving concept of management and explores various theories and methods for managing organizations. This course has three purposes: (1) to provide access to important ideas and issues facing general managers, (2) to help the students integrate their knowledge and expand their vision about managing organizations, and (3) to provide a forum for discussion of the issues, challenges, and opportunities lying ahead in a career in management. Prerequisite: MGMT 701. LEC.

MGMT 716. Organizational Change and Development. 3 Hours.
This course examines the mechanisms the organization uses to respond to and initiate changes in its internal and external environments. Specific processes include organization development (OD), intervention theory and research, organizational effectiveness, a variety of proactive change strategies, and the role of the change agent. Prerequisite: MGMT 701. LEC.

MGMT 722. Corporate Strategy. 2 Hours.
The objective of this course is to help students build an understanding of how competitive strategy may lead to the creation and persistence of competitive advantage in diversified firms. In contrast to the core Strategic Management (MGMT 704) course, which is designed to address how firms develop competitive advantage in a single market, this course analyzes how advantage can be created through the configuration and coordination of activities across multiple markets. Examples of corporate strategies include vertical integration, cooperative alliances, corporate diversification, mergers and acquisitions, and so forth. Prerequisite: MGMT 704 or MGMT 830. Enrollment restricted. LEC.

MGMT 723. Advanced Topics in Management of Organizations: _____. 2-5 Hours.
A study of advanced topics in various subfields of Management of Organizations. The course focus, content, and approach will depend upon the particular topics to be covered. Repeatable for different topics. Prerequisite: Variable. LEC.

MGMT 724. Competitive Analysis and Strategy. 2 Hours.
Competitive Analysis and Strategy deals with issues of competition and the formulation of competitive strategy towards creating long-term economic value. This course develops a framework for evaluating industry structures and understanding the dynamics of competition, combining rigor with relevance and applicability. Topics covered include nature of markets and competition, economic value creation, analysis of industries, customers and competitors, identification of capabilities and core competencies, alternative positioning strategies that create value in different environments and factors that lead to the erosion of competitive advantage. In addition, discussion will center around how firms can achieve “dynamic fit,” developing a self-renewing organization that encourages entrepreneurial behavior critical to the formulation and implementation of value creating strategies. LEC.

MGMT 725. Strategic Management of Technological Innovation. 2 Hours.
This course focuses on the dynamics of industries driven by technological innovation. It strives to help students think strategically about appraising and managing technological innovation and new product deployment. Specific topics covered include how innovations emerge, their type and pattern of diffusion, and their meaning to businesses and society. In-depth coverage is given to dominant designs and industry standards, decisions on entry timing of new technologies, resource allocation among multiple attractive innovation projects, and capturing the value created by innovations. Prerequisite: MGMT 704 or MGMT 830. Enrollment restricted. LEC.

MGMT 726. Management of Technology II: Technology and Operations. 2 Hours.
Management of Technology - II: Technology and Operations will focus on the role of technology in management of operations of a company. Research and Development, New Product Development, Operations and the linkages among them will be detailed. Key organizational issues such as business processes, core process designs, and organization of RD and scientific laboratories will be discussed. Information technology as a source of organizational change and adaptation will be summarized. Topics covered include: RD strategy, alliances and management; new
product development; QFD, benchmarking, and early manufacturing involvement; methods to speed up cycle time, concurrent engineering, outsourcing and lead user analysis; manufacturing flexibility, strategy and value chain analysis; Business Processes, core process design; organization of RD laboratories and new venture departments; IT and reengineering. LEC.

MGMT 727. Strategy Implementation. 2 Hours.
The course focuses on the principles and methods of implementing strategies, both at the business unit and corporate levels. Strategy is discussed as the primary driver of organization structure, processes, systems, culture and skills in successful organizations. The role of the general manager as the architect of implementation is highlighted. Topics covered include: different forms of structure, behavior and output controls; organization design, information systems design, reward systems and organizational culture. Prerequisite: MGMT 704 or MGMT 830. Enrollment restricted. LEC.

MGMT 728. Managing Strategic Direction and Change. 2 Hours.
This course focuses on executive actions needed to create and sustain high performance of firms. The vision, credibility, and human skills that executives need to set strategic direction are explored extensively. A major part of the course covers strategic and organizational change practices that can be used to motivate employees to alter their patterns of behavior to meet the shifting needs of the firm's strategy. Emphasis is placed on theories of effective change implementation, mutual engagement and shared diagnosis, organizational redesign, reinforcing new behaviors, organizational culture and change, and the political dynamics of strategic change. Prerequisite: MGMT 704 or MGMT 830. Enrollment restricted. LEC.

MGMT 729. Applied Strategic Management. 2 Hours.
Theories, concepts, and principles of Strategic Management will be applied to a specific industry or industries to enable better understanding of both the industry(ies) and how strategies are developed and perform in that industry. Each student will research a firm in the industry with the objective of uncovering its historical and projected strategic approach to the industry and present the findings to the class. Research materials will include both hard copy and on-line business reference material developed through on-line information searches. Field projects may be required depending upon availability of sites. Projects would then require travel to the site at other than regular class times. See the instructor for details. Prerequisite: Completion of MGMT 704 or equivalent and possession of on line information search skills for LEXIS/NEXIS and other electronic information sources, in addition to traditional library research skills. LEC.

MGMT 730. Business and Social Problems. 3 Hours.
An investigation into the obligations of business as a corporate citizen with special attention paid to current and topical problems. Topics discussed include the efficiency of business as an agent of social change, public expectations for the role of business, and the adequacy of business's performance. Not open to students with credit in MGMT 486. LEC.

MGMT 732. Recruiting and Selecting Effective Employees. 2 Hours.
Building on selected fundamental principles from psychology, economics, and sociology, this course emphasizes the importance of sound measurement practices for the acquisition of effective human talent by organizations. Topics covered include job analysis for selection procedure development, legal and fairness issues, recruitment, initial screening, employment testing, and the employment interview. Prerequisite: MGMT 701 or MGMT 810. Enrollment restricted. LEC.

MGMT 733. Advanced Methods for Selecting Employees. 2 Hours.
This course follows logically from MGMT 732 Recruiting and Selecting Effective Employees, and covers advanced personnel selection procedures including the following: job knowledge tests; cognitive ability tests; personality assessment; integrity testing; performance tests; assessment centers; drug testing. Prerequisite: MGMT 732. LEC.

MGMT 734. Compensation and Rewards. 2 Hours.
This course focuses on principles, policies and practices in designing and administering compensation and reward systems. It covers frameworks and applications useful for achieving organizational effectiveness through pay systems that help promote a competent and committed workforce. Topics include: developing pay structures, formulating and implementing pay level strategies, assessing and managing employee performance, pay-for-performance issues, legal issues, executive compensation and employee benefits. Prerequisite: MGMT 701 or MGMT 810. Enrollment restricted. LEC.

MGMT 735. Compensating and Rewarding Employees: Alternative Approaches. 2 Hours.
The primary focus of this course is on "alternative" compensation and reward systems. After first discussing the factors motivating firms to adopt alternative approaches to pay, these alternative systems will be critically examined. Discussion will focus on: skills/knowledge-based plans; team-based plans; gainsharing/efficiency-based plans; profit-sharing and employee stock ownership plans; market-based (economic value added) plans; and, alternative recognition systems (e.g., spot bonus plans; non-cash awards). Prerequisite: MGMT 701. LEC.

MGMT 736. Developing People and Careers. 2 Hours.
This course is designed with an emphasis on effective talent management for practicing managers and includes individual and organizational perspectives. Topics include assessing training needs; designing, developing, delivering and evaluating training and development investments; and career management planning, strategies and progression, including succession planning. Prerequisite: MGMT 701 or MGMT 810. Enrollment restricted. LEC.

MGMT 737. Career Development and Management. 2 Hours.
This course investigates careers from individual and organizational perspectives with an emphasis on the implications of the current business environment. The organizational perspective includes career planning and pathing, the integration of career systems with other human resource programs, and the nature of the employee-employer relationship. The individual perspective includes career management strategies and skills to cope in the workplace, career theories, and balancing work and non-work. Prerequisite: MGMT 701. LEC.

MGMT 738. Appraising and Managing Employee Performance. 2 Hours.
This course covers the measurement/appraisal of employee performance at the individual and small work group/team levels, and the use of appraisal information in administrative decision-making, employee coaching, employee counseling, and individual/team performance improvement. Prerequisite: MGMT 701 or MGMT 810. Enrollment restricted. LEC.

MGMT 739. International Human Resources Management. 2 Hours.
This course introduces students to the major issues associated with managing people in the context of the global marketplace. The focus is on understanding human resource issues that are unique to international business and strategies for effectively addressing them. These issues include staffing, performance management, compensation and labor relations. These topics are considered in the context of factors such as culture, socio-politics, legal regulations, and education. Prerequisite: MGMT 701 or MGMT 810. Enrollment restricted. LEC.

MGMT 740. Legal Environment for Managing Employees. 2 Hours.
This course examines the legal environment as it affects the management of employees. The focus is on an understanding of employment law
MGMT 744. Managing Human Resources in a Union Environment. 2 Hours.
This course examines managing employees in the context of a labor union. The focus is on the creation of mutual gains and the avoidance of an adversary relationship. A major issue is how human resources can be used for a firm’s competitive advantage in a union context. Topics covered include strategies for dealing with unions, the negotiation of agreements, productivity enhancement, contract administration, and dispute resolution. LEC.

MGMT 745. Advanced Seminar in Human Resources: ______. 2-5 Hours.
A study of advanced topics in various subfields of Human Resources. The course focus, content, and approach will depend upon the particular topics to be covered. Repeatable for different topics. Prerequisite: To be determined by instructor. LEC.

MGMT 748. Negotiation and Dispute Resolution. 3 Hours.
This course will include a study of the theory and practice of negotiation and dispute resolution in business contexts. It will focus on the use of alternatives to litigation, such as various forms of arbitration, mediation, and, especially, negotiation. In addition to emphasizing negotiation as a means of resolving disputes, attention will be directed at negotiation of transactions. Appreciation of concepts will be promoted through role play simulations. Not open to students with credit in BLAW 525 or MGMT 525. (Same as BLAW 748.) LEC.

MGMT 750. Special Topics in Management: ______. 2-5 Hours.
A variable-topic course open to graduate and selected undergraduate students meeting the requirements established by faculty members offering the course. Prerequisite: Determined by the instructor. Enrollment restricted. LEC.

MGMT 810. Managing People. 3 Hours.
This course addresses topics, challenges and processes associated with business-related people issues. The principal objectives are to increase understanding of human and group behavior in organizations; to learn how to effectively motivate and lead individuals and groups; to increase effectiveness in managing oneself and others in team settings; and to increase understanding of human resource (HR) policies and practices that help create and sustain competitive advantage through people. Course topics include individual differences, motivation, groups, leadership, strategic HR, employment law, staffing, compensation, performance management, and training and development. This course is open only to students in the full-time MBA program. LEC.

MGMT 820. Business Law and Ethics. 3 Hours.
This course has two purposes: to explore the relationship between law and business and provides a foundation for further understanding of business relevant laws and to address ethical decision-making and the management of ethics in the workplace. Topics include classifications of law, federalism, court systems, civil judicial process, alternative dispute resolution, ethical analysis tools, recognition of ethical issues, organizational dimensions that impact ethical behavior, and the management of ethical responsibilities in a global business environment. This course is open only to students in the full-time MBA program. LEC.

MGMT 830. Global Strategic Management. 3 Hours.
Global Strategic Management is a capstone Strategic Management course infused with applications to global business. The principal objectives of the course are to learn the basics of strategic decision making and how strategy integrates functional area policies in organizations; to understand how industries affect firm strategies; to understand how firms develop resources and capabilities for competitive advantage; to examine key strategic decisions or areas such as vertical integration, diversification, technology and market entry; and to understand how globalization affects core aspects of strategic business decisions. Topics include firm strategy, industry analysis, resources and capabilities, cost and differentiation advantage, organizing for competitive advantage, strategic change, technology-based competition, multinational strategy, vertical integration, and diversification. This course is open only to students in the full-time MBA program. LEC.

MGMT 831. Consulting Practicum. 3 Hours.
This course provides clinical applications of business problem solving and consulting. The course objectives are to link models and theories with field applications to solve real business problems; to acquire first-hand industry knowledge and witness varying client management styles; to learn time management skills and acquire a practical ‘tool kit’ for diverse business problem solving; to apply problem solving techniques in both corporate and client consulting environments; and to enhance team interaction and leadership capabilities. Topics include consulting processes and successful consultant characteristics, hypothesis generation, problem identification and differentiation of root cause vs. symptom, market research methods, solution modeling, prep and presentation of solution, keys to consulting effectiveness. This course is open to those with admission to a graduate business program. LEC.

MGMT 885. Business Consulting. 4 Hours.
Through experiential learning using live consulting assignments, students will achieve understanding clarity of the linkage between models and theories studied in the classroom and application in the field; direct interaction with clients at sophisticated corporate organizations; and first hand experience in addressing significant business challenges with impactful and strategically correct solutions. Students will enhance their team and leadership skill capabilities through interaction with other team members. This course is not open to students with credit in MGMT 485. LEC.

MGMT 895. Graduate Seminar in Management: _____. 0.5-5 Hours.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted. LEC.

MGMT 898. Independent Study for Master’s Students. 1-6 Hours.
Individual study of selected current problems in the field of business management to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment. RSH.

MGMT 901. Current Research in Management. 1 Hour.
This course provides a workshop format for a discussion of the currently prevalent research topics, methods, and problems being addressed in the areas of human resources management, organizational behavior, and strategic management. All first year PhD students in HRM, OB, and SM will typically enroll in this course their first and second semesters in the doctoral program. Students will enroll in this course with their respective faculty advisors, who will work out a schedule of research seminars that each student must attend and participate in during the semester. Prerequisite: Admission to the School of Business PhD Program in HRM, OB, or SM, or permission of the Management Area Director. LEC.
MGMT 905. Philosophy of the Behavioral and Organizational Sciences. 3 Hours.
An advanced introduction to the philosophy of science relevant to the behavioral and organizational sciences. Introduces the student to contemporary philosophical thought concerning the nature of scientific knowledge and its acquisition. Students will be exposed to classic works in the 20th century movement of thought in the philosophy of science and the philosophy of social science. Subject matter will include the study of logical positivism, anti‐positivist responses such as falsificationism, epistemological anarchism, and Kuhnian relativism, to contemporary neo‐pragmatist, postmodernist, and constructivist developments related to the indeterminacy of knowledge. The method of the course is philosophical; critical thinking, critical discussion, and dialectical exchange will be encouraged. The course is oriented to the interests of social scientists, rather than philosophers. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MGMT 906. Behavioral Research Methods. 4 Hours.
This course is designed to develop in students an ability to analyze research reports critically and to provide skills in designing, performing, and reporting original behavioral research. Methodologies ranging from naturalistic field studies to laboratory experiments are reviewed along with various data collection strategies. Students prepare and defend an original research proposal. Recommended to be taken early in the program for Human Resource Management, Organizational Behavior, and Strategic Management doctoral students. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MGMT 916. Seminar in Organization Theory. 3 Hours.
This course provides an advanced survey of theories about organizations as entities, their properties, and major processes. Topics include structures, structural change, organizational forms, decentralization, effectiveness, adoption and diffusion processes, concepts and theories of processes, interdependence and recent developments in organizational design and change. Major organization theories are also covered. Students are expected to write a serious research paper. This course is primarily for School of Business Ph.D. students but other advanced graduate students may enroll with the permission of the instructor. Prerequisite: Doctoral standing or masters students with at least one undergraduate or M.B.A. level behavioral science course or consent of instructor. LEC.

MGMT 950. Personnel Selection and Effective Work Performance. 3 Hours.
This seminar focuses on staffing organizations to produce effective performance of work. It covers work performance, recruitment, and virtually all aspects of personnel selection. Topics include but are not limited to the following: measurement issues (reliability, validity, decision-making strategies); validity generalization; legal issues (discrimination, adverse impact); job and work analysis; evaluation of job applicant training and work experience; weighted application blanks and biodata; ability testing; personality assessment; performance tests and assessment centers; other methods of assessment (integrity testing, drug testing, graphology). Typically reading assignments include a substantial textbook plus articles from research journals (e.g., Journal of Applied Psychology, Personnel Psychology). Typically students are required to write a substantial paper on a major aspect of personnel selection approved by the Professor. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MGMT 951. Training, Developing, and Managing Careers in Organizations. 3 Hours.
This seminar focuses on the development and maintenance of human capital and career management. A multi‐level perspective is adopted and issues are considered from individual and organizational perspectives within the context of an HR system addressing contemporary workplace challenges. Theoretical and empirical readings will be drawn from OB, HR, and other relevant social sciences. Topics and themes include the processes of (a) training design, from needs assessment, through development, delivery and evaluation, and (b) career development and management. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MGMT 952. Strategic Human Resource Management. 3 Hours.
This seminar focuses on macro-level perspectives on managing people for organizational effectiveness. Theoretical and empirical readings will be drawn from the OB, HR, strategy and other relevant literatures (e.g., services marketing) that explore themes related to: (a) human/ social capital and firm success; (b) employee attitudes/behavior and firm success; (c) HR policies/practices and firm success; and (d) contingency perspectives applied to the above, including factors such as national culture, industry, competitive strategy and employee groups. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MGMT 953. Designing Effective Work Environments in Organizations. 3 Hours.
This seminar focuses on conceptual and empirical research in organizational behavior that seeks to understand how to achieve organizational effectiveness through establishing positive conditions for employees to flourish. The implications of these conditions for the motivation and ethical behavior of individuals will be discussed. Readings will address the following topics: Person‐Organization Fit, Work Design, Work Teams, Leadership, Psychological Engagement, Decision‐Making, Ethics, and Cross-cultural Dimensions of organization behavior or of the preceding topics. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MGMT 954. Individual and Interactionist Perspectives of Organizations. 3 Hours.
This seminar focuses on conceptual and empirical research in organizational behavior that seeks to understand how the interaction between individuals and organizational facets influences their sense-making and identity. The implications of these processes for employees’ well-being, performance, and careers will be discussed. Readings will address the following topics: Social Cognitive Theory, Self-efficacy, Employee Attachment and Job Attitudes, Individual Differences, Careers, Employee Well-being, Emotions, Attribution Theory, Sense-making processes, Identity, Organizational Culture, and Cross-cultural Dimensions/Globalization. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MGMT 955. Creativity, Innovation, and Change in Organizations. 3 Hours.
This seminar focuses on theoretical and empirical research that seeks to understand the behavioral aspects of creativity and innovation in organizations. Central to this understanding is how organizations develop and change over time. Readings will include articles on the following topics: Expectancy theory, Goal setting, Intrinsic Motivation, Creativity, Innovation, Organizational Development, Learning, and Change Processes, Power and Politics, Organizational Citizenship Behaviors; and Cross-Cultural Dimensions. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.
MGMT 956. Economic Theories of Strategic Management. 3 Hours.
This seminar surveys the scholarly literature in Strategic Management that is based on economic modeling of human and firm behavior. Topics include but are not limited to Industrial Organization Economics, Transaction Costs Economics, Property Rights Theory, Agency Theory, Resource-Based View and Dynamic Capabilities, and Real Options Theory. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MGMT 957. Behavioral Theories of Strategic Management. 3 Hours.
This seminar surveys the scholarly literature in Strategic Management that is based on behavioral, psychological and sociological theories. Topics include but are not limited to the Behavioral Theory of the Firm, Behavioral Models of Strategic Decision Making, Strategy Formation, Strategic Leadership including CEO’s, Boards and Top Management Teams, Organizational Demography, Cognition in Strategic Decision Making, Power Politics in Strategy Development. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MGMT 995. Doctoral Seminar in Management: ____. 2-5 Hours.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor. LEC.

MGMT 997. Directed Research in Management. 1-5 Hours.
Students will research selected topics in the field of management under the direction of a graduate faculty member. Students are expected to report the results of their research by writing a publishable-quality scholarly article. Graded on satisfactory/unsatisfactory basis. Prerequisite: Approval required from supervising graduate faculty member. RSH.

MGMT 998. Independent Study for Doctoral Students. 1-5 Hours.
Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Student must submit written statement of proposed project. Prerequisite: Approval required from supervising faculty member and PhD Team. RSH.

MGMT 999. Doctoral Dissertation. 1-12 Hours.
(V) Individual research work. THE.

MKTG 300. Special Topics in Marketing: _____. 1-5 Hours.
This is a variable-topic course open to undergraduates meeting the prerequisites for the specific topic being offered. Its purpose is to allow the occasional offering of marketing topics not covered by established courses. Enrollment is not limited to School of Business students. Prerequisite: Determined for each topic by instructor. LEC.

MKTG 305. Survey of Marketing. 3 Hours.
This course introduces the student to marketing from the perspective of the business firm. Topics included are the marketing system, consumer and industrial behavior, market segmentation and positioning, product policy, channels of distribution, pricing strategy, sales management, and marketing communications. (Not open to students with credit in MKTG 310 or MKTG 311.) Prerequisite: ENGL 101 and MATH 101. LEC.

MKTG 310. Marketing. 3 Hours.
A study of marketing from the point of view of the business firm. Topics include the structure of the marketing system, the nature of marketing management, consumer behavior, marketing research, product policy, channels of distribution policy, and analytical techniques useful to marketing management. Prerequisite: Completion of ECON 142, ACCT 200, and PSYC 104. Prior completion or co-enrollment in DSCI 202 or DSCI 301. LEC.

MKTG 311. Marketing, Honors. 3 Hours.
Honors treatment of this course involves a study of marketing from the point of view of the business firm. Topics include the nature of marketing management, consumer behavior, marketing research, product policy, channels of distribution policy, marketing communications, pricing, and analytical techniques relevant to marketing management. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: Completion of ECON 142, ACCT 200, and PSYC 104. Prior completion or co-enrollment in DSCI 202 or DSCI 301. LEC.

MKTG 400. Special Topics in Marketing: ____. 1-5 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of marketing topics not covered by established courses. Prerequisite: Determined for each topic by instructor. LEC.

MKTG 411. Introduction to Consumer Behavior. 3 Hours.
A study of the buyer’s information acquisition, evaluation, purchasing, and post-purchasing evaluation process. Emphasis is placed upon social psychological theories and their implications on the understanding and prediction of consumers’ behavior. The student, from the standpoint of the marketing manager, will apply behavioral science concepts to the problems of planning, pricing, and promotion decisions. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted. LEC.

MKTG 412. Introduction to Consumer Behavior, Honors. 3 Hours.
Honors treatment of this course involves study of the buyer’s information acquisition, evaluation, purchasing, and post-purchasing evaluation process. Emphasis is placed upon social psychological theories and their implications on the understanding and prediction of consumers’ behavior. The student, from the standpoint of the marketing manager, will apply behavioral science concepts to the problems of planning, pricing, and promotion decisions. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: MKTG 310 or MKTG 311. LEC.

MKTG 415. Marketing Research for Managers. 3 Hours.
This course introduces the student to the fundamentals of marketing research and analytical approaches to marketing problems. The material is presented from an applied point of view and is designed to familiarize the student with those aspects of marketing research with which the marketing manager is likely to interact. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted. LEC.

MKTG 420. Integrated Marketing Communications. 3 Hours.
This course will deal with the use of advertising, personal selling, sales promotion, and public relations as elements in a promotional program. The perspective of the course will be distinctly managerial. Therefore, the emphasis will be upon the efficient use of an organization’s resources to accomplish communication goals through effective promotional strategy. A good part of the course will be spent examining the communication process; the nature of the receiver and how information is processed; determination of promotional objectives; promotional budget; media decisions, and measuring the effectiveness of the promotional campaigns. The goal of the course is to enable the students to better evaluate and devise a marketing communications program for any given product, service, or idea. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted. LEC.

MKTG 425. Sales Force Management. 3 Hours.
This course, as an advanced marketing elective, is designed to integrate sales force planning into the marketing planning process; to present the necessary tools and skills needed for developing and evaluating a competitive sales function; and to analyze the components of the sales function from a managerial perspective. Specifically, topics include strategic sales planning, forecasting, quotas and compensation plans,
selection and training, time and territory management, motivation, and performance analysis. Pedagogical methods for the course include: lecture, case study, role-playing, micro-computer simulations, and spreadsheet analyses. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted. LEC.

**MKTG 430. New Product Management. 3 Hours.**
This course deals with the strategies, techniques, and methods used to develop and market a new product. An important aspect of the course deals with anticipating and managing change that can affect a firm’s marketing opportunities and response. Also emphasized is the need for a disciplined process of development. Subjects examined include innovative thinking, identification, and development of marketing opportunities, marketing mix strategies, and implementation. Prerequisite: MKTG 310, MKTG 311 or consent of instructor. Enrollment restricted. LEC.

**MKTG 435. Marketing Strategy. 3 Hours.**
The emphasis of this course is strategic marketing analysis and planning. Concepts and methods for the strategic analysis of product-market definition, segmentation, product positioning, and new product planning are examples of individual subjects that are covered. However, the primary objective is to integrate various topics into a strategic planning framework. An important component of the course is the application of concepts to realistic marketing problems through the use of comprehensive marketing simulations or in-depth cases that capture the dynamics of the marketing environment. Students will learn how to identify markets, assess company strengths and weaknesses, target market segments, analyze competition, and develop specific functional strategies in such areas as product development, pricing, distribution, and promotion. Prerequisite: MKTG 411 or MKTG 412 and MKTG 415. Enrollment restricted. LEC.

**MKTG 440. Global Marketing. 3 Hours.**
Today businesses compete in a global environment. As such, marketing managers must recognize the global nature of their markets and must develop the knowledge background, sensitivity, and skills required to successfully operate in this dynamic setting. This course examines the array of activities required to select, gain entry, and compete in a location other than the “home” country. Also examined is the influence that culture, environment, government regulation, and economic systems can have upon marketing mix decisions (product, price, promotion, distribution) related to localization, standardization, and local adaptation. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted. LEC.

**MKTG 445. Services Marketing. 3 Hours.**
This course prepares students for careers, which will entail managing businesses in the service sector. This sector includes accounting management consulting, engineering services, environmental services, health care, research, architectural, hotel and restaurant, charitable, and many others. It provides the foundation a student needs so that he or she can move beyond providing technical support to the client and towards managing and developing the business. For a marketing or management student, it provides the foundation they need to be able to find a job, hit the ground running, and advance in a marketing (management) position with companies in the service sector. Prerequisite: MKTG 310 or MKTG 311. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. LEC.

**MKTG 450. Internet Marketing. 3 Hours.**
This course examines how the power of today’s digital technologies can be harnessed to enhance and deploy the marketing function. The course begins with an overview of the key forces shaping the digital environment. It then examines several topics that define and characterize marketing in this new environment. Illustrative topics include web business models, traffic driving strategies, one-to-one marketing, personalization, closed-loop marketing, online support, dynamic pricing, channel redesign, and m-commerce. Throughout, emphasis is placed on linking key concepts to best practices in the field. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted. LEC.

**MKTG 455. Pricing. 3 Hours.**
The primary objective of this course is to examine the concepts and tools required to effectively manage the pricing function. Both strategic and tactical aspects of pricing will be covered with a view to identify profit-boosting practices across a range of professional contexts - as product managers, business unit managers, management consultants, and entrepreneurs. Prerequisite: MKTG 310 or MKTG 311. Enrollment restricted. LEC.

**MKTG 460. Practicum in Promotional Plan Development. 3 Hours.**
The course is an experiential approach to promotional campaign development with an emphasis on promotional strategy as a single component of the total marketing strategy. Student teams work with actual businesses to address the business’s individual marketing needs. Students conduct environmental and industry analysis and primary and secondary market research to identify target markets, develop a marketing strategy, promotional objectives, product positioning, brand development and ROI measures for a promotional strategy. Students then complete media planning, creative execution, and budgeting and present the project to the business. Prerequisite: MKTG 310 or MKTG 311 and at least two of the following three courses: MKTG 411 or MKTG 412, MKTG 415 or MKTG 416, or MKTG 435. Enrollment restricted. LEC.

**MKTG 465. Customer Relationship Management. 3 Hours.**
This course offers a comprehensive introduction to the strategy and tactics of customer relationship management (CRM). Particular emphasis is given toward identifying the key strategic principles inherent in the customer-centric focus that underlies a successful CRM program. Topics include: Fundamentals of CRM strategy, marketing metrics, customer profitability analysis, choice modeling, techniques for evaluating model performance and applications of CRM to marketing campaign management. Students will be instructed on how to implement the CRM techniques using various software tools and real-world data. (Same as SCM 425.) Prerequisite: MKTG 310 or MKTG 311; SCM 310 or SCM 311. Enrollment restricted. LEC.

**MKTG 500. Individual Research in Marketing. 1-5 Hours.**
Individual study of selected topics in marketing not otherwise available to the student. Topics selected to be determined by the special interests and objectives of the student in consultation with a faculty member who will supervise the readings and research. Prerequisite: FIN 310 or FIN 311, MGMT 310 or MGMT 311, MKTG 310 or MKTG 311 and SCM 310 or SCM 311; 3.0 professional grade point average and approval of proposed plan of study by the instructor. Enrollment restricted. LEC.
MKTG 701. Marketing Management. 2 Hours.
This course examines the marketing function of the firm, primarily from a managerial perspective. The topics examined include: marketing concepts, segmentation, and decisions related to positioning, products, pricing, distribution, and promotion. LEC.

MKTG 702. New Product Management. 3 Hours.
The course is designed to develop an understanding for the need for a disciplined process of development, and to follow the basic steps of opportunity identification, testing, and implementation. It deals with the strategies, techniques, and methods used to develop and market a new product or service. The emphasis is on "learning by doing." The course will focus on the enhancement of innovative thinking, the identification and development of marketing opportunities, entry strategies; and developing the marketing mix for the new product. Not open to students with credit in MKTG 430. Prerequisite: ACCT 702 or MKTG 701 or permission of instructor. Enrollment restricted. LEC.

MKTG 706. Strategic Marketing Planning and Decision-Making. 3 Hours.
This course is a capstone marketing course designed around a strategic marketing planning approach with a clear emphasis upon how to do strategic analysis and planning. Methods for the strategic analysis of business units, product-market definition, segmentation, positioning, and new product planning are examples of topics that will be covered. However, the primary course objective is to integrate the various methods and topics into a strategic planning framework which should enable participants to formulate alternative market planning strategies; to translate organizational mission strategies into the marketing plan; and to conceptualize the formulation, integration, implementation, and control of long-range and short-range planning. Not open to students with credit in MKTG 435. Prerequisite: ACCT 702 or MKTG 701. Enrollment restricted. LEC.

MKTG 707. Metrics and Statistics in Marketing Research. 3 Hours.
An analysis of selected statistical and mathematical techniques that are currently being applied or are potentially applicable to the solution of marketing problems. Extensive use is made of actual studies that have utilized these techniques. Prerequisite: MKTG 415 or MKTG 416 or ACCT 702 or MKTG 701. Enrollment restricted. LEC.

MKTG 709. Sales Force Management. 3 Hours.
In many industries, the sales force is the primary vehicle for taking the product to market. The main objective of this course is to expose students to the concepts, tools, and techniques required to effectively manage this important function. Since the use of personal selling is generally more pronounced within industrial markets, this course will first analyze issues unique to industrial marketing. Topics here include industrial buying behavior, segmentation strategies for industrial markets, life cycle strategies, and managing the pricing function for industrial products. Using this foundation, the next part of the course will cover issues specific to the management of the sales force such as structuring the sales force, sizing the sales force, demand estimation, quota setting, and sales force compensation. Finally, the last part of the course will focus on skills required for professional selling such as handling objections and closing the sales call. Not open to students with credit in MKTG 425. LEC.

MKTG 710. Internet Marketing. 3 Hours.
The internet and digital technologies continue to profoundly impact all aspects of the marketing function. The broad objectives of this course are to better understand how digital technologies create value for customers and profits for companies. Special emphasis will be placed on new opportunities afforded by digital technologies. Specific topics include personalization, closed-loop marketing, online communities, new pricing formats, harnessing dispersed competence, and formulating win-win marketing strategies. Not open to students with credit in MKTG 450. Prerequisite: MKTG 701. Enrollment restricted. LEC.

MKTG 711. Pricing Strategies and Tactics. 3 Hours.
In this course, students are first exposed to the various viewpoints that govern pricing. After introducing pricing as an integral part of the marketing decision process, the course will develop an appreciation of the various tools (for example, consumer behavior and game theory) used to arrive at competitive pricing strategies. Cases will be used to illustrate both the tools and resulting strategies. Illustrative topics include: Value-based pricing, price matching guarantees, predatory pricing, behavioral pricing, interaction of pricing with channel decisions, bundling, and online auctions. While using various methods, care will be taken to differentiate long-term strategies and short-term tactics used by firms. Overall, students will be able to create effective pricing strategies and also understand how pricing policy fits into the overall marketing function of the organization. Not open to students with credit in MKTG 455. Prerequisite: MKTG 701. Enrollment restricted. LEC.

MKTG 712. Services Marketing. 3 Hours.
Unique characteristics associated with services (e.g., intangibility, perishability, and real-time production) necessitate use of a different set of concepts, methods, and frameworks for their effective management. This broad course is designed to fill the knowledge-gap between managing products and managing services. Sample topics covered in this course include managing customer expectations, customer satisfaction measurement, managing service demand, mobilizing people for breakthrough service, managing service recovery, relationship marketing, customer lifetime value analysis, and managing services in a global context. Not open to students with credit in MKTG 445. Prerequisite: MKTG 701. Enrollment restricted. LEC.

MKTG 713. Database Marketing. 3 Hours.
This course introduces the theory and practical implementation of customer relationship management (CRM) strategies using marketing databases. Topics include: fundamentals of CRM strategy, RFM analysis, LTV metrics, logit models, decision tress, techniques for evaluating model performance (e.g., lift charts, ROC) and applications to campaign management. In keeping with the hands-on nature of the course, students will be instructed on how to implement the CRM techniques using various software tools. Not open to students with credit in MKTG 465/SCM 425. Prerequisite: MKTG 704. Enrollment restricted. LEC.

MKTG 714. Discovering & Evaluating New Product Opportunities. 2 Hours.
Rapid shifts in technology and consumer preferences make new products critical to a firm’s portfolio. This course highlights the value of a disciplined approach in bringing new products and services to market. Specific topics covered include models for opportunity identification, understanding customer preferences and perceptions, and gauging market demand. Multidimensional scaling, factor analysis, clustering, preference regression and conjoint analysis are some techniques used in this course. Prerequisite: MKTG 701 or MKTG 810. Enrollment restricted. LEC.

MKTG 715. Consumer Behavior. 2 Hours.
This course is designed to review behavioral science concepts applicable to understanding behavior of consumers in the marketplace. It investigates the specific processes of consumer decision-making and purchasing, and the implications these have for marketing strategy. Topics covered include: effect of internal and external factors on consumer decision making, information processing, learning and memory, attitude formation and change, postpurchase behavior, ethical/social issues, effects on marketing strategy. Prerequisite: MKTG 701. Enrollment restricted. LEC.
MKTG 716. Global Marketing. 2 Hours.
This course is designed to provide a set of conceptual and managerial tools to students for undertaking marketing of products and services on a global scale. The topics covered in the course include economic and financial dimensions in global marketing, social and cultural aspects of the global market environment, regional market characteristics, political and legal issues in global marketing. A significant portion of the course is devoted to the study of competitive analysis and competitive strategy for the global markets, marketing information systems, various strategies for entering global markets, organization, planning and control of global marketing, and marketing mix decisions (product, price, promotion, and distribution) in a global setting. Prerequisite: IBUS 701 and MKTG 701. Enrollment restricted. LEC.

MKTG 717. Integrated Marketing Communications. 2 Hours.
The goal of this course is to enable the student to evaluate and devise a product/service marketing communications program. Emphasis will be placed on the efficient use of resources to accomplish communication goals through effective promotional strategy involving advertising, personal selling, sales promotion and publicity. Topics covered include the communication process, determination of promotional objectives, promotional budgeting, media planning, measuring effectiveness and ethical issues. Prerequisite: MKTG 701. Enrollment restricted. LEC.

MKTG 721. Advanced Topics in Managing Products and Brands. 2 Hours.
This course is designed to explore various marketing issues in managing a portfolio of products in a global marketplace, across multiple product lines. While the course will review marketing strategies concerning pricing, promotions, product liability, and protection of intellectual property rights, it will especially focus on such concepts as brand identity/personality brand extension/leveraging, co-branding, brand loyalty, brand equity, product and brand strategies over the lifecycle of products and brands, and organizational requirements for building successful brands. Prerequisite: MKTG 701 or MKTG 810. Enrollment restricted. LEC.

MKTG 722. Marketing Strategy. 2 Hours.
The emphasis of this course is strategic marketing analysis and planning. Topics examined include (a) Situation and SWOT analyses and how these lead to an understanding of the firm’s sustainable competitive advantage, (b) methods for the identification of segmentation within consumer and business markets, (c) the selection of target segments based upon competitive advantage and value, (d) positioning and differentiation within target segments, and (e) the development of brand strategy and action plans based upon segmentation positioning and differentiation. An important component of the course is the application of concepts to realistic marketing problems that captures the dynamics of marketing environments. Prerequisite: MKTG 701 or MKTG 810. Enrollment restricted. LEC.

MKTG 723. Marketing Research. 2 Hours.
This course engages students in a broad examination of marketing research as practiced in marketing organizations today. Topics include defining business problems and establishing research objectives, choosing among research approaches (survey, qualitative, and secondary designs), gathering data (questionnaires, focus groups/interviews, and online), analyzing research data, and generating actionable results for business decision-making. The emphasis is on practical applications for the marketing professional. Prerequisite: DSCI 701 and DSCI 810. Enrollment restricted. LEC.

MKTG 724. Pricing of Products and Services. 2 Hours.
The objective of this course is to prepare students for addressing strategic and tactical pricing issues and identifying profit-boosting changes in pricing practices. Pricing issues will be examined from various perspectives (e.g., product managers, business unit managers, management consultants, and entrepreneurs). The course will focus on teaching key economic, analytical and behavioral concepts associated with costs, customer behavior and competition. The course will employ economic, analytical, and behavioral concepts to illustrate how pricing decisions can be deployed to capture additional value. It will cover basic topics such as measurement of price sensitivity, segmented pricing, role of costs, and life cycle pricing as well as advanced topics such as dynamic pricing, pricing structures, and pricing under competition. Prerequisite: MKTG 701 or MKTG 810. Enrollment restricted. LEC.

MKTG 810. Marketing Management. 3 Hours.
This course is designed to equip students with basic concepts associated with the marketing function. Principal objectives are to discuss the role of marketing in an organization, to describe the processes of buyer behavior and the impact of these processes on marketing decisions, to develop an understanding of approaches used to segment markets and factors influencing the selection of target markets, and to develop an understanding of elements of the marketing mix (product, price, communications, channels) and factors affecting decisions in these areas. This course is open only to students in the full-time MBA program. LEC.

MKTG 895. Graduate Seminar in Marketing: ______. 0.5-5 Hours.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Enrollment restricted. LEC.

MKTG 898. Independent Study for Master’s Students. 1-6 Hours.
(V) Individual study of selected current problems in the field of business management to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment. RSH.

MKTG 950. Advanced Marketing Research. 3 Hours.
This course deals with measurement tools typically used in marketing such as conjoint analysis, multi-dimensional scaling, questionnaire construction, formative and causal indicators of constructs, scale development and testing, reliability and validity issues, and design of complex lab and field experiments. The goal of the course is to equip students with measurement tools to conduct research in academic and applied settings. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MKTG 951. Consumer Behavior. 3 Hours.
This seminar provides an overview of the current theories and methodological approaches associated with consumer behavior research. Main topics of the course include attention and information search, consumer memory structure, consumer knowledge, inference making, motivation/goal, consumer attitude and persuasion, judgment and decision making, self-perception and regulation, culture’s influence on consumer behavior, and affect/emotion/mood. The content will be based on literature from multiple disciplines including marketing, psychology, sociology, and economics. Students will be required to critically analyze and synthesize the literature, with a view to formulate research proposals on issues that interest them. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MKTG 952. Introduction to Marketing Models. 3 Hours.
There is a rich tradition of using models to represent and analyze various marketing phenomena. An illustrative list of topics include: examining first-mover advantages, understanding response to price, analyzing new pricing formats, compensation design, interaction between marketing investments and stock market response, consumer surplus analysis,
allocation of marketing resources, and decision support systems. Against this backdrop, the objectives of this course are two-fold: (i) to provide a non-technical overview of various modeling approaches employed in marketing, and (ii) apply one or more of these approaches to generate new research. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MKTG 953. Marketing Communications. 3 Hours.
This course focuses on fundamentals of marketing communications with a heavy emphasis on message-memory. Some of the topics covered in this course include memory (e.g., elderly adults). Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MKTG 954. Pricing and Strategy. 3 Hours.
This seminar exposes students to the various analytical approaches to understand and model pricing phenomena by examining the classic as well as contemporary works on pricing. The students will learn how to model strategic interactions in the marketplace using game theory and other analytical tools as well as theories such as auction theory, prospect theory, and mental accounting. Some of the topics covered in this course include price discrimination mechanisms, price as a competitive tool (e.g., entry deterrence), price as a promotional strategy, role of price in channel structure and strategy, and effect of price on consumer choice. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MKTG 955. Product Management. 3 Hours.
This course focuses on understanding products and the product development process. Readings are drawn from the literature in marketing, management, decision theory and psychology. Some topics covered in the course include creation and diffusion of innovations, modeling consumers’ perceptions and preferences, brand equity and branding, entry order, sales forecasting, and global product development. Prerequisite: Admission to the Doctoral Program or graduate standing and permission of the instructor. LEC.

MKTG 995. Doctoral Seminar in Marketing: _____. 2-5 Hours.
A variable topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. Prerequisite: Consent of instructor. LEC.

MKTG 997. Directed Research in Marketing. 1-5 Hours.
Students will research selected topics in the field of business administration under the direction of a graduate faculty member. Students are expected to report the results of their research by writing a publishable-quality scholarly article. Graded on satisfactory/unsatisfactory basis. Prerequisite: Approval required from supervising graduate faculty member. RSH.

MKTG 998. Independent Study for Doctoral Students. 1-5 Hours.
Individual study of selected current problems in the field of business administration to be adapted to the special interests and objectives of the students and conducted through extensive reading and research. Student must submit written statement of proposed project. Prerequisite: Approval required from supervising faculty member and PhD Team. RSH.

MKTG 999. Doctoral Dissertation. 1-12 Hours.
(V) Individual research work. THE.

MSCM 820. Marketing Intelligence. 3 Hours.
This course is an introduction to marketing research. The emphasis will be on providing an understanding of the value of marketing research and the tools to engage in the process. The objectives are to understand research planning, types of research and design, to determine appropriate sampling, data collections methods and research methodologies, to understand, apply and interpret fundamental concepts of data analysis and analysis software. Topics covered will include the research process, understanding data sources, qualitative research, measurement and scaling issues, questionnaire design, analysis of data, and the research report. Prerequisite: DSCI 810. This course is open only to students in the full-time MBA program. LEC.

MSCM 830. Understanding Customers. 3 Hours.
This course is designed to review behavioral science concepts applicable to understanding behavior of consumers in the marketplace. It investigates the specific processes of consumer decision making and purchasing, and the implications these have for marketing strategy. The course will cover the internal and external factors that affect consumer decision-making processes; the steps consumers go through before, during and following the purchase decision; theories of attitude formation, methods of attitude-measurement and attitude change. Topics include the effect of external factors (cultures, social class, reference groups, family), effect of internal factors (needs, motives, personality), the extended decision-making process, information processing, learning and memory, attitude formation and change, low-involvement decision making, post-purchase behavior, ethical/social issues, effects on marketing strategy. Prerequisite: MSCM 820. This course is open only to students in the full-time MBA program. LEC.

MSCM 831. Distribution Channels and Global Operations. 3 Hours.
This course addresses the theory and practice of designing distribution channels and global supply chains. The objectives of the course are to provide an understanding of different channels of distribution and the complexities of global operations along with their associated risks and rewards. The course will address topics in transportation, fulfillment, and facility location to support global supply chains. It will develop the ability to design logistics systems and formulate integrated supply chain strategy. The topics also include channels of distribution, warehousing, and global operations management. Prerequisite: SCM 820. This course is open only to students in the full-time MBA program. LEC.

MSCM 832. Marketing Services and Managing Customer Relationships. 3 Hours.
This course is designed to fill the knowledge gap between managing products and managing services. It will help students understand the unique needs and challenges faced by service companies (and those manufacturing companies that rely on services for their differential advantage) in a complex global environment. The primary objective is to provide a set of conceptual and managerial tools for effective management and marketing of services. Broad topics include services characteristics, managing customer expectations, understanding service consumption behavior, service strategy, segmentation positioning, creating service offerings, service quality, managing demand for services, service pricing. Topics pertaining to customer relationships include acquiring and retaining customers, customer profitability lifetime value, customer satisfaction measurement, relationship marketing, and service recovery. Topics pertaining to managing service employees include empowering service employees, employees as living brands; globalization of services; and ethical issues in services marketing. Prerequisite: MSCM 820. This course is open only to students in the full-time MBA program. LEC.

MSCM 835. Survey of Decision Making in Business. 3 Hours.
An introduction to decision making under the uncertainty encountered in business and in everyday life. Covers selected topics in probability, statistics, economics, and operations research, and their application to complex problems in financial management, marketing, operations management, supply chain management, and quality management; as well as risks affecting everyday life, such as personal decisions in regard to career, marriage, and wealth management. (Not open to students
SCM 310. Management Science and Operations Management. 3 Hours.
Introduces some of the most widely used models from management science in business decision making. Topics include decision making under uncertainty, resource allocation models, and production and operations management. (Formerly DSCI 310). Prerequisite: Prior completion or co-enrollment in DSCI 202 or DSCI 301 and IST 202 or IST 301.LEC.

SCM 311. Management Science and Operations Management, Honors. 3 Hours.
Honors treatment of this course introduces some of the most widely used models from management science in business decision making. Topics include decision making under uncertainty, resource allocation models, and production and operations management. Only open to students admitted to the University Honors Program, the Business Honors Program, or permission of the instructor. Prerequisite: Prior completion or co-enrollment in DSCI 202 or DSCI 301 and IST 202 or IST 301. LEC.

SCM 400. Special Topics in Supply Chain Management: _____. 3 Hours.
This is a variable-topic seminar. Its purpose is to allow the occasional offering of supply chain management topics not covered by established courses. Prerequisite: Determined for each topic by instructor. Enrollment restricted. LEC.

SCM 401. Introduction to Supply Chain Management. 3 Hours.
This course introduces the student to supply chain management. Students are presented the key concepts of supply chain management, the application of these concepts and are provided with the managerial knowledge of supply chain management through class discussions and case studies. Students discover the impact of information technologies, strategic alliances and logistics on supply chain management and the performance implication of supply chain management. Prerequisite: SCM 310 or SCM 311, FIN 310 or FIN 311, and MKTG 310 or MKTG 311. Enrollment restricted. LEC.

SCM 402. Procurement and Supplier Management. 3 Hours.
This course involves the study of supply management. Topics covered include the purchasing process, the role of the procurement function within the company, and the evaluation, selection and development of suppliers. The course is also designed to emphasize the importance of negotiations and managing contracts. Prerequisite: SCM 401. Enrollment restricted. LEC.

SCM 403. Logistics, Transportation and Warehouse Management. 3 Hours.
This course discusses the area of physical distribution management of supply chains. Attention is given to managerial responsibilities such as network design, transportation methods, inventory management, warehousing, packaging, and materials handling. Prerequisite: SCM 401. Enrollment restricted. LEC.

SCM 404. Management of Integrated Information System/ERP. 3 Hours.
This course provides an introduction to Enterprise resource planning (ERP) systems. We will evaluate the functions, processes and data requirements of business functions in an integrated framework. The objectives of the course include (1) understanding data needs of different business functions; (2) understanding alternative information systems solutions and the problems in independent information systems and; (3) understanding ERP systems as solutions to integration. (Same as IST 401.) Prerequisite: IST 202 or IST 301. Enrollment restricted LEC.

SCM 410. Capstone in Supply Chain Management. 3 Hours.
Integrating and apply the theories, concepts, and methods taken in previous supply chain management courses through the use of readings, case studies, projects, and industry speakers. Prerequisite: SCM 401 and IST 202 or IST 301. Enrollment restricted. LEC.

SCM 415. Data Analysis and Forecasting. 3 Hours.
This course is concerned with the analysis and interpretation of data encountered in business and economics. One goal of the course is to develop skills in the analysis of data that can be used to solve problems students are likely to encounter on the job. The course attempts to develop an attitude toward data analysis that can be usefully applied in a wide variety of real life situations. A variety of statistical tools are covered. In particular, the multiple regress model is covered with an emphasis on how the model can be used in situations involving economic data. Data analysis techniques are illustrated with examples and case studies using computers. This course is in the management sciences and operations management area. Prerequisite: SCM 310 or SCM 311. Enrollment restricted. LEC.

SCM 416. Supply Chain Modeling and Optimization. 3 Hours.
Design, develop, and use computer decision models for analysis of supply chain operations; computer intensive coursework emphasizing spreadsheet applications. Prerequisite: SCM 401. Enrollment restricted. LEC.

SCM 418. Modeling and Risk Analysis. 3 Hours.
An introduction to the concepts, methodologies, and applications of risk analysis and modeling. This course is designed primarily to develop practical modeling skills with spreadsheet software. To accomplish this, material across the finance discipline will be covered as well as material from the supply chain management discipline. Examples from corporate finance, investments, financial derivatives, real estate, personal finance, and supply chain management methods will be used to demonstrate modeling. (Same as FIN 460.) Prerequisite: FIN 310 or FIN 311. Enrollment restricted. LEC.

SCM 420. Customer Focused Operations Service Management. 3 Hours.
The purpose of this course is to build the conceptual framework which drives an organization striving to operate in a customer-focused mode. This requires an integration of basic principles of marketing and operations in order to define the value-added in each of an organization’s products and/or services, to use this information to define the value-added in work, and to use this definition to improve the actual work. To do this effectively, requires leadership, empowerment, focused data, and a system view. The basic principles of each requirement will be discussed as well as their integration into a unified whole. Prerequisite: SCM 310 or SCM 311 and MKTG 310 or MKTG 311. Enrollment restricted. LEC.

SCM 425. Customer Relationship Management. 3 Hours.
This course introduces the theory and practical implementation of customer relationship management (CRM) strategies using marketing databases. Topics include: fundamentals of CRM strategy, RFM analysis, LTV metrics, logit models, decision tress, hazard models techniques for evaluating model performance (e.g., lift charts, ROC) and applications to campaign management. In keeping with the hands-on nature of the course, students will be instructed on how to implement the CRM techniques using various software tools. (Same as MKTG 465.) Prerequisite: MKTG 310 or MKTG 311; SCM 310 or SCM 311. Enrollment restricted. LEC.

SCM 500. Individual Research in Supply Chain Management. 1-5 Hours.
Individual study of selected topics in supply chain management not otherwise available to the student. Topics selected to be determined by
SCM 701. Introduction to Supply Chain Management. 2 Hours.
This overview course covers a wide set of topics to develop a strategic view of supply chain management and to illustrate its interdisciplinary nature. The course has the following principal objectives: to introduce the strategic and operating issues and decisions involved in managing the operational and supply chain processes within and across firms; to understand the global and interdisciplinary nature of supply chain management; to understand the concept of supply chain coordination by managing information and inventory. Topics covered in the course include supply chain functions, forecasting and demand management, inventory management, managing information flows in supply chains, globalization and outsourcing, and supply chain technologies. Prerequisite/Co-requisite: SCM 701. Enrollment restricted. LEC.

SCM 702. Procurement and Supplier Management. 2-3 Hours.
This course involves the study of supply management. Topics covered include the purchasing process, the role of the procurement function within the company, and the evaluation, selection and development of suppliers. The course is also designed to emphasize the importance of negotiation and managing contracts. Prerequisite: SCM 701. Enrollment restricted to Fort Leavenworth officers. LEC.

SCM 703. Transportation, Logistics Systems. 2-3 Hours.
This course discusses the area of physical distribution management of supply chains. Attention is given to managerial responsibilities such as network design, transportation methods, inventory management, warehousing, packaging and materials handling. Prerequisite/Co-requisite: SCM 701. Enrollment restricted to Fort Leavenworth officers. LEC.

SCM 704. Information Systems for Supply Chain Management. 2-3 Hours.
This course provides an introduction to Enterprise Resource Planning (ERP) systems. We will evaluate the functions processes and data requirements of business functions in an integrated framework. The objectives of the course include (1) understanding data needs of different business functions; (2) understanding alternative information systems solutions and the problems in independent information systems; and (3) understanding (ERP) systems as solution to integration. Prerequisite: SCM 701. Enrollment restricted to Fort Leavenworth officers. LEC.

SCM 710. Capstone in Supply Chain Management. 2-3 Hours.
Integrating and applying the theories, concepts, and methods taken in previous supply chain management courses through the use of readings, case studies, project and industry speakers. Prerequisite: SCM 701. Enrollment restricted to Fort Leavenworth officers. LEC.

SCM 720. Procurement and Supplier Management. 2 Hours.
This course provides the students with an understanding of procurement, strategic sourcing and supplier management. The course has the following principal objectives: to introduce the basic concepts, terminology, tools of purchasing; to provide a conceptual framework of the trends and developments in global sourcing; to understand the techniques of negotiations; and to develop understanding of supplier relationship management. Topics covered in the course include purchasing process, policy, and procedures, purchasing law and ethics, supply management, supplier selection and evaluation, supplier relations management, global sourcing, and negotiations. Prerequisite: SCM 701 or SCM 820. Enrollment restricted. LEC.

SCM 721. Logistics and Distribution Management. 2 Hours.
This course addresses the theory and practice of designing distribution channels and logistics systems. The course has the following principal objectives: to understand how logistics management generates value to customers; to establish a sound foundation in transportation, fulfillment, and facility location to support global supply chains; and to develop the ability to design logistics systems and formulate integrated supply chain strategy, so that all components are not only internally synchronized but also tuned to fit corporate strategy, competitive realities and market needs. Topics covered include transportation fulfillment, inventory management, facility location, warehousing, and global logistics. Prerequisite: SCM 701 or SCM 820. Enrollment restricted. LEC.

SCM 722. Information Systems for Supply Chain Management. 2 Hours.
This course examines information technology (IT) applications in the field of supply chain management, focusing on such issues as the breadth of IT tools and products available to support the planning, implementation and operation of supply chains, the process by which specific applications are selected by companies, and the implementation process. Among the other topics addressed in the course are the integration of IT systems between internal and external supply chain partners and the IT problems typically facing a company post acquisition. Prerequisite: SCM 701 or SCM 820. Enrollment restricted. LEC.

SCM 723. Lean Six Sigma. 2 Hours.
This course addresses the theory and practice of continuous process improvement through lean thinking and six sigma quality improvement. The course has the following principle objectives: to understand the process associated with continuous improvement in manufacturing and service organizations; to understand common tools that are useful in continuous improvement in manufacturing and service organizations; and to gain experience in the practice of continuous improvement. Topics covered include using the scientific method in continuous improvement; tools to understand and reduce variability like control charts, capability analysis, stratification analysis, Pareto analysis, etc; and tools to implement lean thinking like Kanban (pull systems), Takt time (process pacing to customer demand), one piece flow, Jodoka (error proofing), Heijunka (product leveling). Prerequisite: DSCI 701 or DSCI 810. Enrollment restricted. LEC.

SCM 820. Operations and Supply Chain Management. 3 Hours.
This introductory course covers a wide set of topics to develop both strategic and analytical skills in supply chain management. The course will provide a conceptual framework and a set of analytical tools to analyze, coordinate, and improve organizational processes. Objectives of the course include an introduction to the strategic and operating issues and decisions involved in managing the operational and supply chain processes within and across firms; an understanding of the concept of supply chain coordination by managing information and inventory; and to develop a basic understanding of purchasing, supplier relationship management, and outsourcing. Topics include process and cycle time analysis, lean/JIT production system, six sigma, inventory management, managing information flows in supply chains, and purchasing and supply management. This course is open only to students in the full-time MBA program. LEC.

SCM 895. Graduate Seminar in Supply Chain Management: ___.
0.5-5.5 Hours.
A variable-topic seminar open only to graduate students meeting the requirements established by faculty members offering the course. LEC.

SCM 898. Independent Study for Master’s Students. 1-6 Hours.
Individual study of selected current problems in the field of supply chain management to be adapted to the special interests and objectives of
the students and conducted through extensive reading and research. Students must have at least a 3.0 grade point average and be in good academic standing in a graduate business program and must submit a written statement of the proposed project approved by a supervisory faculty member prior to enrollment. RSH.

Bachelor of Science in Business

Since its founding in 1924, the School of Business at the University of Kansas has been committed to shaping tomorrow’s business leaders. The business school holds the gold standard of accreditation in business education, the Association to Advance Collegiate Schools of Business (http://catalog.ku.edu/business/bs/http:///www.aacsb.edu), for both the school and its accounting programs. With its focus on teaching and research, the KU School of Business bridges theory and practice to know where business is going. Learn more at business.ku.edu.

Undergraduate Admission to the School of Business

There are two paths for admission to the School of Business:

1. Freshman admission
2. Competitive admission (standard process)

Freshman Admission

Incoming freshmen are eligible for direct entry to the School of Business. Students must meet all three of the following requirements:

• Achieve 25 or higher ACT composite score (or 1150 or higher SAT in critical reading and math),
• Earn 3.25 or higher high school GPA, and
• Indicate a business major on the application to KU.

BUS 110, BUS 120, BUS 210, and BUS 220 - These courses are designed to connect students to life at KU and to opportunities within the School of Business. Students will learn academic success, personal success in the transition to college, opportunities for leadership development, problem solving, decision making, and business professionalism. Students will also be provided opportunities to create lasting connections with School of Business staff, advisors, and faculty. Experiential learning activities outside of the classroom will be integrated into the course.

Note: Freshman admission is not an option for students who change their major to business or pre-business after enrollment at KU. Students admitted as freshmen must complete the same degree requirements as students who go through the competitive admission process.

Competitive Admission

Students going through the competitive admission process should apply during the semester in which they will complete the minimum requirements for admission. Applicants satisfying these requirements are ranked by academic merit and their professional résumés, then considered for admission to the School of Business based on rank and available space.

Apply online (http://www.business.ku.edu). The deadline is September 15 for spring admission or February 15 for fall admission. Applicants who are not currently KU students must first apply to KU and submit official transcripts for all previous colleges and universities attended to the Office of Admissions (http://admissions.ku.edu) along with the application.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Prebusiness Preparation

Students planning to enter the School of Business as juniors should work toward completing pre-admission requirements during the first two years. Every student contemplating a major in the school should enroll in a mathematics course during the first semester at KU. It is highly recommended that students complete PSYC 104. Students must take the following courses before admission to the school:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 200</td>
<td>Fundamentals of Financial Accounting</td>
<td>4</td>
</tr>
<tr>
<td>ACCT 201</td>
<td>Managerial Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>IST 202</td>
<td>Introduction to Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>DSCI 202</td>
<td>Statistics</td>
<td>4</td>

<tr>
<td>ECON 142</td>
<td>Principles of Microeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 144</td>
<td>Principles of Macroeconomics</td>
<td>3</td>
</tr>
</tbody>
</table>

See the Office of Admissions (http://admissions.ku.edu) for more information.

Minimum Requirements

To satisfy minimum standards for admission to the School of Business, a student must

1. Complete 60 college credit hours including ACCT 200, ACCT 201, IST 202, DSCI 202, ECON 142, and ECON 144 (or their equivalents). It is strongly recommended that PSYC 104 and a Culture and Society (SC) course also be completed.

2. Achieve a minimum grade-point average of 2.5 in
   a. all course work,
   b. all professional course work (business and economics),
   c. all KU course work, and
   d. all KU professional course work.

Because admission is competitive, students who meet the minimum admission standards may not be admitted.

Guaranteed admission to the School of Business is possible when achievement of a grade-point average of 3.0 in all professional course work (business and economics) has been met at the time of application (in addition to the minimum requirements listed above).

Transfer Students

Transfer students may find it to their advantage to enter KU before the junior year, because some required courses may be available only at KU. Students attending Kansas community colleges should consult their advisors and a KU School of Business advisor about course equivalents and articulation agreements to ensure progress toward the degree. The Office of Admissions provides a guide (http://admissions.ku.edu/~admiss/credit/transfer) to how classes at your current or former school transfer to KU. You must submit official transcripts of course work completed.
to the Office of Admissions (http://admissions.ku.edu) before a final determination can be made.

At least 30 hours of junior/senior professional course work must be completed at KU (courses in residence) for the student to be eligible for graduation. As of fall 2008, only transfer grades of C or higher apply toward graduation from the KU School of Business.

64-Hour Rule
A maximum of 64 hours of community college course work can be applied toward a KU business degree. All subsequent credit hours earned at a community college or other 2-year institution add an equivalent number of hours to the 120-hour minimum required to graduate.

10-Year Rule
Transfer business credits are limited to a 10-year span in which they can be considered equivalent to a KU School of Business course and satisfy any corresponding requirement. This 10-year limit begins on the date of completion of the credit. After 10 years, transfer business credits are treated as elective business credit, and a course repeat or update may be necessary.

Tentative Evaluation of Credit
Before enrolling in a non-KU course, students must submit KU’s standard Request for Tentative Evaluation of Credit form to Student and Academic Services (http://www.business.ku.edu/undergrad/current/advising) for approval.

Readmission
Students must submit an application for readmission to KU if their lapse in attendance is one semester or more. See the Office of Admissions for more information. Students may be readmitted to the School of Business if they left the school in good standing and it has been less than 5 years since they last attended.

5-Year Rule
If a student does not complete the business degree within 5 years of last attendance, the student must reapply through the competitive admission process. Students also must complete degree requirements in effect at the time of readmission to the business school regardless of the initial program.

Dismissal
Students who have been dismissed from the school must reapply through the competitive admission process.

Bachelor of Science in Business Degree Requirements
The School of Business offers a Bachelor of Science in Business (B.S.B.) with majors in accounting, business administration, finance, information systems, management and leadership, marketing, and supply chain management. Each major consists of the following components: general education courses, core business classes, international dimension requirement, major courses, and advanced business electives. Degree requirements are subject to change. It is the student’s responsibility to stay informed of requirements. To receive the B.S. in business degree, a student must complete the degree requirements in effect at the time he or she is admitted to the school.

General Education Requirements
In addition to the university’s Core requirements, all business majors are required to take:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 115</td>
<td>Calculus I</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 121</td>
<td>Calculus I</td>
<td>3</td>
</tr>
<tr>
<td>PSYC 104</td>
<td>General Psychology</td>
<td>3</td>
</tr>
</tbody>
</table>

Natural Science with lab

Requirements for All Majors

International Dimension Requirement
The International Dimension Requirement (IDR) is required of all students graduating from the KU School of Business. To complete the IDR, students must choose one of the following options:

Option 1. Foreign Language
Complete through the fourth level (intermediate II) of courses in a modern foreign language or earn equivalent proficiency as determined by the appropriate language department. International students who have completed the English proficiency requirement through the Applied English Center (http://www.aec.ku.edu) may use this to fulfill Option 1.

Option 2. International Studies
6 credit hours of courses completed in one or a combination of the following categories:

1. (a) Study abroad credit hours from any study abroad program approved by KU.

2. (b) Contemporary regional/international studies/international business courses must be selected from a list available online (http://www.business.ku.edu/Undergraduate-Advising) and may be double-counted to meet General Education requirements. Courses in this category may be doubled-counted toward the corresponding business major and/or concentration.

Core Courses and Capstone Course
After admission to the School of Business, all majors must complete the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BE 301</td>
<td>Managerial Economics</td>
<td>3</td>
</tr>
<tr>
<td>BLAW 301</td>
<td>Legal Aspects of Business</td>
<td>3</td>
</tr>

Majors
Within the Bachelor of Science in Business degree, students may earn major(s) in accounting, business administration, finance, information systems, management and leadership, marketing, or supply chain
management. In addition to the core courses and capstone course, students must complete the core courses for the major.

Program guides are available on the school's website (http://www.business.ku.edu/academics).

**Accounting Major**

The KU accounting program develops students with superior management and accounting skills and a well-rounded education in the liberal arts. This program produces qualified graduates who are responsive to the needs of the profession in academia, government, industry, and public accounting. The primary objectives are to produce entrepreneurs with a fundamental understanding of accounting, provide an adequate foundation for graduate study in accounting, and provide an adequate foundation for securing positions in private accounting and industry. Those seeking positions in public accounting may need 150 hours of college credit (state requirements vary) and should consider the Master of Accounting program.

All accounting majors must complete 6 hours of advanced business electives. ABE courses are numbered 320 and higher and have prerequisites.

The accounting major must complete the following core courses with a grade-point average of at least 2.5:

**Accounting (25)**

Advanced business electives 6

**Business Administration Major**

This major offers a broad interdisciplinary approach. Discovering solutions to complex problems in a globalized marketplace requires a multidisciplinary and integrated approach. The major prepares students for a variety of job markets and career paths. The program is flexible, allowing students to develop in-depth skills in such areas as accounting, business law, finance, information systems, management and leadership, marketing, and supply chain management.

This major changes the way students learn by shifting the emphasis from the traditional, discipline-based approach to a more comprehensive, integrative approach to business problems and opportunities. Students acquire the skills, attitudes, and flexibility needed to be competitive in a global marketplace. Students can expect to live in a dynamic world where a series of career changes over a lifetime is probable and where change and the unknown are inevitable. In such a world, proficiency in a number of related disciplines becomes a survival tool.

Creativity is enhanced by knowledge of related disciplines, and new insights are gained by applying the methods of one discipline to another. This program offers students the academic tools and interdisciplinary perspective that allow them to prosper in a business environment. Concentrations in entrepreneurship, human resource management, information systems, international business, and supply chain management are available.

The major requires 21 hours of advanced business credit from courses numbered 320 or above. The 21 hours must be distributed across at least three prefixes, with a minimum of 3 hours in each of the three prefixes selected: ACCT, BLAW, DSCI, ENTR, FIN, IBUS, IST, MGMT, MKTG, and SCM.

The student must satisfy all business graduation requirements for the B.S. and have a grade-point average of at least 2.2 in the 21 advanced business credit hours selected for the major.

**Finance Major**

Students with finance majors often pursue careers in commercial or investment banking or become internal financial managers for corporations or government entities. The program is concerned with such areas as

1. Investments and asset pricing—the behavior and determinants of security prices, including stocks, bonds, options, and futures;
2. Corporate finance—the financing and investment decisions of firms;
3. Corporate governance—how best to govern corporations while enhancing both corporate accountability and the creation of wealth;
4. The management and regulation of financial institutions; and
5. International finance.

Majors also take courses in accounting, economics, and the liberal arts. The finance major must complete the following core courses with a grade-point average of at least 2.5:

**Finance (24)**

**Information Systems Major**

The information systems major exposes students to a range of studies focused on the effective use of information technologies in settings typical of business, governmental, and not-for-profit organizations. Students gain a comprehensive understanding of specific technologies as well as an appreciation of challenges involved with the application of such technologies in dynamic environments. The major equips graduates with both technical and managerial skill sets needed to begin careers in major business and governmental entities or with major information systems consulting firms.

The information systems major must complete the following core courses with a grade-point average of at least 2.5:

**Information Systems (21)**

Management and Leadership Major

The management and leadership major gives students the knowledge and skills to be successful leaders and managers of people and organizations. Students learn to design and modify organizational structure, strategy, and processes to enhance organization performance in a socially and ethically responsible manner. They learn how to influence and direct change through a better understanding of organization politics, vision, and values. Students learn to influence and lead others effectively through skill development in communication, motivation, and conflict resolution. They develop self-awareness and an appreciation for individual differences, leading to more successful work relations. They learn to lead and follow in team settings and to use team-based problem-solving skills. Students learn to create competent and committed teams and organizations through the use of effective systems for employee hiring, development, compensation, and performance management. They also learn about the challenges of competing globally, including how to adapt organizational structures, processes, and functions such as production, marketing, finance, and human resources so that they function more effectively cross-culturally. Student learning is enhanced through supporting activities such as clubs, consulting projects, case competitions, and study abroad opportunities.

The management and leadership major must complete the following core courses with a grade-point average of at least 2.5:

Management and Leadership (21)

- MGMT 410 Human Resources Management 3
- MGMT 437 Developing Management Skills 3
- MGMT 455 The Role of the General Manager: Leadership and Management 3
- IBUS 480 International Management 3

Select three of the following:

- Courses at the 400 level or above with ENTR, MGMT, or IBUS as a prefix 9
- BLAW 505 Legal Aspects of the Management Process

Marketing Major

The marketing major gives students the concepts and tools needed to succeed as marketing managers skilled in the creation, evaluation, and refinement of marketing programs that lead to valuable exchanges between channel partners, firms, and customers. Core concepts and tools are primarily provided through four required foundation courses: Marketing Management, Consumer Behavior, Marketing Research, and Marketing Strategy. The major offers numerous electives to reflect the breadth of the marketing function and to allow students to tailor their programs to individual preferences and career goals. Such opportunities as the marketing club, consulting projects, case competitions, and study abroad further enhance the learning experience.

The marketing major must complete the following core courses with a grade-point average of at least 2.5:

Marketing (21)

- MKTG 411 Introduction to Consumer Behavior 3
- MKTG 415 Marketing Research for Managers 3
- MKTG 435 Marketing Strategy 3
- MKTG 400 or higher electives 12

Supply Chain Management Major

Supply chain management professionals integrate the flow of materials, finances, and information from suppliers, manufacturers, wholesalers, distributors, and retailers to the final consumer and back again. The major gives students the basic skills to do this work. The demand for professionals in the field is rapidly growing as firms realize improved efficiency from good SCM practices. The field continues to evolve to become a proactive, strategic enterprise, often with global partners. Students typically have opportunities for internships and other experiential activities with businesses while they are in the program. The major offers a set of required core courses and electives.

The supply chain management major must complete the following core courses with a grade-point average of at least 2.5:

Supply Chain Management (21)

- SCM 401 Introduction to Supply Chain Management 3
- SCM 402 Procurement and Supplier Management 3
- SCM 403 Logistics, Transportation and Warehouse Management 3
- SCM 404 Management of Integrated Information System/ERP 3
- SCM-related electives 9

Business Concentrations

Students may choose to complete a business concentration. Concentrations require a minimum of 12 hours and are available in entrepreneurship, information systems, international business, and human resources. For specific concentration requirements, see the school's website (http://www.business.ku.edu).

C.P.A. Certification

For more information on requirements to sit for the C.P.A. examination and to qualify for the certificate and permit to practice with reduced experience, visit the CPA Requirements page (http://www.business.ku.edu/masters/accounting/cpa). See also the Master of Accounting (p. 233) section of the online catalog.

</table>

This chart depicts the approximate order in which students complete the requirements for a B.S. in Business degree.

**Graduation Requirements**

**Hours Required for Graduation**

A minimum of 120 credit hours is required for graduation. Of the 120 hours, a student must earn at least 45 junior/senior hours and 30 residency hours (business and economics completed at KU after admission to the school). At least 50 percent of all professional course work must be completed at KU for the student to be eligible for graduation.

- The 120-hour minimum to graduate is increased by the following:
  - More than 4 hours in physical education courses (HSES 112 and below).
  - More than 4 hours of music organization courses.
  - Any repeated courses for which a student has already received credit.
  - All subsequent credits earned at a community college or other 2-year institution after a student has completed a total of 64 community college credit hours.

**Grade-Point Average Required for Graduation**

To be eligible to graduate from the School of Business with any major, a student must earn a grade-point average of 2.2 in

1. Total hours attempted from all schools (including Independent Study through KU Continuing Education),
2. All professional (business and economics) courses attempted from all schools,
3. Total hours attempted at KU, and
4. All professional hours attempted at KU.

Accounting, finance, information systems, management and leadership, marketing, and supply chain management majors also must earn minimum grade-point averages of 2.5 in their respective core courses.

**Independent Study Through KU Continuing Education**

After admission to the school, students may complete up to 30 hours of Independent Study through KU Continuing Education. Prior approval from the school is recommended.
Entrepreneurship Certificate

The Certificate in Entrepreneurship is a series of new courses designed to help undergraduates and graduate students start, finance, plan, and launch their own business in their major or favorite subject. You will learn how to be your own boss, realize your dream job and acquire wealth by becoming an entrepreneur with the following courses:

ENTR 301. Starting Your Own Business. 3 Hours. AE61.
In this course the student examines the disciplines which comprise the critical success factors in entrepreneurship and develops a fundamental understanding of the basic skill set required to manage his/her own business. The course will emphasize the Entrepreneurial Process in which each of the following disciplines will be introduced so that the student understands meaning, interrelationship and the application of the subject matter. First the student will be introduced to entrepreneurship and the personal attributes which historically have produced successful entrepreneurs. Further, the student will learn how to evaluate business opportunities via Feasibility Analysis which encompasses industry and competitor analysis, developing an effective business model, building a new venture team, developing an effective marketing plan, assessing the new ventures financial strengths and preparing the proper ethical and legal foundation for the new business. Finally, on completion of the course the student will possess a beginning comprehension for getting financing for the new venture and preparing for the challenges of business growth. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1. LEC.

ENTR 302. Financing Your Own Business. 3 Hours.
This course introduces the non-business student to the language of business, accounting, and its applications in the financial management of new and small business environments. Students will learn how to account for the various activities of the start-up and early stage new venture as well as the importance, utility and construction of financial statements. Further, students will acquire the ability to construct financial projections for a start-up firm and monitor the financial performance of the growing business with a focus on cash flow management. Finally, students will be introduced to various remedies in the event that performance does not meet expectations. Prerequisite: Goal 1, Outcome 2 and Goal 2, Outcome 1. LEC.

ENTR 303. Marketing Your Own Business. 3 Hours.
This course focuses on the marketing development of new business ideas for small businesses including creating an environment conducive to innovation, recognizing business opportunities, assessing the industry and its potential customer segments, barriers to entry and competitive set. In addition, students will acquire an understanding of the primary marketing tools available to the entrepreneur to drive customer awareness, initial and repeat purchase and the ability to fully integrate each of those tools into a cohesive, integrated marketing plan, all on an extremely limited budget as typifies start up businesses. Upon successful completion of the course, students will understand how to plan an entrepreneurial marketing program, implement it and evaluate its performance. This includes market analysis, segmentation, the marketing mix of product, price, promotion and distribution and marketing strategy, both long term and annually. Prerequisite: ENTR 301 and ENTR 302. LEC.

ENTR 304. Launching Your Own Business. 3 Hours.
This course provides the student with an opportunity to prepare a complete go-to-market business plan for a new venture which leverages the students’ major area of study so that following graduation the student has the option of pursuing self employment in the launch of their own business. The students’ expertise from their area of major study will be combined with the entrepreneurial skills acquired from the prior three courses in this Certificate sequence. Ideally, this course will originate from the students’ school of origin, either selected from a roster of existing qualifying courses or independent study with a faculty member in the students’ field of major study. In the event that the students’ school of major study cannot provide the teaching resources for independent study, it will be provided by the School of Business, Center for Entrepreneurship. If the faculty at the students’ school of origin wants to develop a specific course which completes the Certificate requirements, course preparation funding has been arranged via a grant from the Kauffman Foundation. Prerequisite: ENTR 303. LEC.

ENTR 701. Starting Your Own Business. 3 Hours.
In this course the student examines the disciplines which comprise the critical success factors in entrepreneurship and develops a fundamental understanding of the basic skill set required to manage his/her own business. The course will emphasize the Entrepreneurial Process in which each of the following disciplines will be introduced so that the student understands meaning, interrelationship and the application of the subject matter. First the student will be introduced to entrepreneurship and the personal attributes which historically have produced successful entrepreneurs. Further, the student will learn how to evaluate business opportunities via Feasibility Analysis which encompasses industry and competitor analysis, developing an effective business model, building a new venture team, developing an effective marketing plan, assessing the new venture’s financial strengths and preparing the proper ethical and legal foundation for the new business. Finally, on completion of the course the student will possess a beginning comprehension for getting financing for the new venture and preparing for the challenges of business growth. Not open to students in the School of Business. LEC.

ENTR 702. Financing Your Own Business. 3 Hours.
This course introduces the non-business student to the language of business, accounting, and its applications in the financial management of new and small business environments. Students will learn how to account for the various activities of the start-up and early stage new venture as well as the importance, utility and construction of financial statements. Further, students will acquire the ability to construct financial projections for a start-up firm and monitor the financial performance of the growing business with a focus on cash flow management. Finally, students will be introduced to various remedies in the event that performance does not meet expectations. Not open to students in the School of Business. LEC.

ENTR 703. Marketing Your Own Business. 3 Hours.
This course focuses on the marketing development of new business ideas for small businesses including creating an environment conducive to innovation, recognizing business opportunities, assessing the industry and its potential customer segments, barriers to entry and competitive set. In addition, students will acquire an understanding of the primary marketing tools available to the entrepreneur to drive customer awareness, initial and repeat purchase and the ability to fully integrate each of those tools into a cohesive, integrated marketing plan, all on an extremely limited budget as typifies start up businesses. University Honors Program

Prebusiness majors who meet admission requirements for the University Honors Program (http://www.honors.ku.edu) are strongly encouraged to participate in it. Its small, challenging classes provide an excellent opportunity for business majors to develop a strong base in liberal arts and sciences. Because its requirements fit well with the school’s distribution requirements, the program fits easily into the normal 4-year program.

Undergraduate Business Honors Program

The Business Honors Program allows an elite cadre of undergraduate business school students to participate in a special set of enrichments. Graduating with business honors requires that the students admitted to the programs complete at least 12 hours of business honors classes. They will also be expected to be deeply involved in the life of the school, routinely assuming leadership positions and taking advantage of experiential learning opportunities.

Dean’s Certificate in International Business

This certificate is awarded to undergraduates who achieve a superior level of expertise in international business. Dean’s certificate forms may be obtained from Student and Academic Services (http://www.business.ku.edu/undergrad/current/advising). Requirements are

- Advanced foreign language study through Intermediate II (as defined by the relevant department) and the business language course where available (prerequisites may apply).
- Standardized foreign language proficiency test with a score of Intermediate High or above.
- 2 area studies courses (an approved list of courses is available on the school’s website) focusing on a single geographic area related to language competency completed with a B or higher in each course (cannot be double-counted with general education requirements).
- At least 3 advanced international business electives completed with a B or higher in each course.
- A study abroad experience or an internationally oriented internship specifically approved for this certificate in the geographic area corresponding to the language and area study courses.

Bachelor of Business Administration

Business Administration B.B.A.

The Bachelor of Business Administration (BBA) exposes students to a broad range of topics such as business law, economics, finance, management, marketing and international business. The accredited BBA program curriculum provides a strong professional education within a broad liberal arts context.

Program outcomes include strong verbal and written communication skills, an aptitude for technology, data analysis proficiency, a global perspective on business and the ability to maintain good professional relationships. Flexible course schedules make it easy for full-time employees to earn their degrees as part-time students.

Accredited

The KU School of Business is proud to be accredited by the Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/accreditation). AACSB accreditation is the gold standard of quality in the world of business education.

Requirements

Ideal candidates are individuals wanting to gain business theory, practical knowledge and professional skills in preparation for careers as business leaders. Those interested should have earned an associate’s degree or equivalent credit hours and are looking to complete requirements for a bachelor’s degree.

This program is funded by the Education and Research Triangle (http://edwardscampus.drupal.ku.edu/johnson-county-education-research-triangle) initiative.

B.B.A. Admission

Admission is competitive. Students should apply during the semester in which they will complete the minimum requirements for admission and after gaining admission to KU. The application is available on the Edwards Campus website (http://www.business.ku.edu/edwards-campus-bba). Deadlines are December 1 for spring, May 1 for summer, and July 1 for fall entry. Students who meet the minimum admission standards are not guaranteed admission.

Minimum Requirements

The minimum requirements for competitive admission are as follows:

1. Complete 60 or more credit hours, which must include the following courses (or their equivalents):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 101</td>

</table>
2. Achieve a minimum grade-point average of 2.5 in
   a. all course work.
   b. all professional course work (business and economics).
   c. all KU course work.
   d. all KU professional course work.

3. After admission to KU (http://admissions.ku.edu/apply), submit the B.B.A. application and a professional résumé by the application deadline.

### Transfer Students

Transfer students may find it to their advantage to enter KU before the junior year, because some required courses may be available only at KU. Students attending Kansas community colleges should consult their advisors and a KU School of Business advisor about course equivalents and articulation agreements to ensure progress toward the degree. The Office of Admissions provides a guide (http://admissions.ku.edu/~admiss/credit/transfer) to how classes at your current or former school transfer to KU. You must submit official transcripts of course work completed to the Office of Admissions (http://admissions.ku.edu) before a final determination can be made.

At least 30 hours of junior/senior professional course work must be completed at KU (courses in residence) for the student to be eligible for graduation. As of fall 2008, only transfer grades of C or higher apply toward graduation from the KU School of Business.

### 64-Hour Rule

A maximum of 64 hours of community college course work can be applied toward a KU business degree. All subsequent credit hours earned at a community college or other 2-year institution add an equivalent number of hours to the 120-hour minimum required to graduate.

### 10-Year Rule

Transfer business credits are limited to a 10-year span in which they can be considered equivalent to a KU School of Business course and satisfy any corresponding requirement. This 10-year limit begins on the date of completion of the credit. After 10 years, transfer business credits are treated as elective business credit, and a course repeat or update may be necessary.

### Tentative Evaluation of Credit

Before enrolling in a non-KU course, students must submit KU’s standard Request for Tentative Evaluation of Credit form to Student and Academic Services (http://www.business.ku.edu/undergrad/current/advising) for approval.

### Readmission

Students must submit an application for readmission to KU if their lapse in attendance is one semester or more. See the Office of Admissions (http://admissions.ku.edu) for more information. Students may be readmitted to the School of Business if they left the school in good standing and it has been less than 5 years since they last attended.

### Bachelor of Business Administration Degree Requirements

#### KU Edwards Campus

This program for students who want to attain practical knowledge, business theory, and professional skills in preparation for careers as business leaders. It covers a broad range of topics including business law, economics, finance, management and leadership, marketing, and international business. Calculus is not required.

Offered exclusively at the KU Edwards Campus (http://edwardscampus.ku.edu), 12600 Quivira Rd., Overland Park, KS 66213, this program responds to the needs and goals of nontraditional part-time students. In addition to the 39 credit hours listed below, School of Business graduation requirements apply. Contact Chris Claussen, 913-897-8419, for information and advising.

Graduation Requirements

Grade-Point Average Required for Graduation
To be eligible to graduate from the School of Business, a student must earn a grade-point average of 2.2 in:

1. Total hours attempted from all schools (including Independent Study through KU Continuing Education),
2. All professional (business and economics) courses attempted from all schools,
3. Total hours attempted at KU, and
4. All professional hours attempted at KU.

B.B.A. candidates must achieve a 2.5 grade-point average in the 21 credit hours that include BBA 307, BBA 308, and the 5 BBA electives.

Transfer Credit
At least 30 hours of junior/senior professional course work must be completed at KU (courses in residence) for the student to be eligible for graduation. As of fall 2008, only transfer grades of C or higher apply toward graduation from the KU School of Business.

64-Hour Rule
A maximum of 64 hours of community college course work can be applied toward a KU business degree. All subsequent credit hours earned at a community college or other 2-year institution add an equivalent number of hours to the 120-hour minimum required to graduate.

10-Year Rule
Transfer business credits are limited to a 10-year span in which they can be considered equivalent to a KU School of Business course and satisfy any corresponding requirement. This 10-year limit begins on the date of completion of the credit. After ten years, transfer business credits are treated as elective business credit, and a course repeat or update may be necessary.

Tentative Evaluation of Credit
Before enrolling in a non-KU course, students must submit KU’s standard Request for Tentative Evaluation of Credit form to Student and Academic Services (http://www.business.ku.edu/undergrad/current/advising) for approval.

Independent Study Through KU Continuing Education
After admission to the school, students may complete up to 30 hours of Independent Study (http://www.independentstudy.ku.edu) through KU Continuing Education. Prior approval from the school is recommended.

University Honors Program
Prebusiness majors who meet admission requirements for the University Honors Program (http://www.honors.ku.edu) are strongly encouraged to participate in it. Its small, challenging classes provide an excellent opportunity for business majors to develop a strong base in liberal arts and sciences. Because its requirements fit well with the school’s distribution requirements, the program fits easily into the normal 4-year program.

Undergraduate Business Honors Program
The Business Honors Program allows an elite cadre of undergraduate business school students to participate in a special set of enrichments. Graduating with business honors requires that the students admitted to the programs complete at least 12 hours of business honors classes. They will also be expected to be deeply involved in the life of the school, routinely assuming leadership positions and taking advantage of experiential learning opportunities.

Dean’s Certificate in International Business
This certificate is awarded to undergraduates who achieve a superior level of expertise in international business. Dean’s certificate forms may be obtained from Student and Academic Services (http://www.business.ku.edu/undergrad/current/advising). Requirements are:

- Advanced foreign language study through Intermediate II (as defined by the relevant department) and the business language course where available (prerequisites may apply).
- Standardized foreign language proficiency test with a score of Intermediate High or above.
- Two area studies courses (an approved list of courses is available on the school’s website) focusing on a single geographic area related to language competency completed with a B or higher in each course (cannot be double-counted with general education requirements).
- At least three advanced international business electives completed with a B or higher in each course.
- A study abroad experience or an internationally oriented internship specifically approved for this certificate in the geographic area corresponding to the language and area study courses.

Minor in Business

Introduction
In the School of Business, students acquire a rigorous education that prepares them for positions in a dynamic and competitive global environment.

The University of Kansas School of Business is accredited by the Association to Advance Collegiate Schools of Business International (http://www.aacsb.edu).

Requirements for the Minor in Business
The business minor program complements nonbusiness majors by providing a general overview of accounting, information systems, finance, management and leadership, marketing, and decision sciences.

The minor requires completion of 18 hours (6 courses) with a cumulative grade-point average of 2.0 or higher in these courses. All business minor courses must be taken for a grade; credit/no credit is not permitted.

Students must declare the business minor by completing the declaration of minor form (http://www.business.ku.edu/undergrad/minor/declare) and are strongly encouraged to do so as early as possible.

ACCT 205 Survey of Accounting
or ACCT 200 Fundamentals of Financial Accounting
The Master of Business Administration program is open to graduates from a school or areas other than business administration. It also provides an opportunity for continued study in management for graduates from a school or department of business. The only prerequisite coursework is college algebra or its equivalent.

**Admission to MBA Programs**

MBA programs are open to those who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records, scores on the required standardized examination, and prior work experience indicate that they have the capability to complete the program. Admission to all programs in business is reviewed by the MBA Admissions Committee.

Applicants for MBA graduate programs must take the Graduate Management Admission Test (http://www.mba.com/mba) administered by Pearson VUE. The GMAT is administered in most foreign countries and by appointment at designated testing centers throughout the United States. The test typically is taken during the academic year before the term for which admission is sought. MBA/J.D. applicants must take the GMAT; the Law School Admission Test is not accepted in lieu of the GMAT.

Students whose native language is not English or who have not completed a degree from a college or university in the United States, Great Britain, Canada, or Australia must also have a score of at least 600 for the MBA program on the Test of English as a Foreign Language. A minimum score of 57 on each of the three sections of the TOEFL is required. For students taking the computerized version of the TOEFL, an overall score of 250 is required, with a minimum score of 23 on each of the 3 sections of the test.

All applications for admission to the MBA programs must include:

1. Graduate application (http://www.graduate.ku.edu);
2. 3 essays;
3. An official transcript from each college or university that conferred a degree;
4. 2 letters of recommendation from faculty members and/or employers;
5. Scores on the GMAT and scores on the TOEFL if required;
6. A $65 nonrefundable application fee; and
7. A current résumé.

Completed applications are reviewed by the MBA committee and action is taken on them on a rolling basis. Each applicant is notified by email of the action taken on his or her application.

Admission to any graduate program in business is subject to and in accordance with all rules and regulations of the University of Kansas. See Admission in the Graduate Studies (http://catalog.ku.edu/201314/schools/gs/admission) section of the online catalog for more information.

Submit your graduate application online (http://www.graduate.ku.edu). Send original transcripts of all completed college and university coursework and all other requested application materials to the School of Business MBA Office:

The University of Kansas
School of Business
MBA Admissions Coordinator
Summerfield Hall
1300 Sunnyside Ave., Room 124
Lawrence, KS 66045-7543
MBA Admission

The MBA Admissions Committee reviews all applications. The required and preferred criteria are:

1. Baccalaureate degree from an accredited college or university or the equivalent. Specific coursework in business administration is not required.
2. Proficiency in mathematics at the college algebra level
3. 2 years of work experience preferred.
4. A $65 nonrefundable application fee.
5. Selection is based on high promise of success in graduate study in business administration, as indicated by a combination of
   a. Prior academic performance;
   b. Scores on the Graduate Management Admission Test (GMAT);
   c. Scores on the Test of English as a Foreign Language, if appropriate;
   d. Prior work experience;
   e. 2 letters of recommendation from employers or professors;
   f. A current résumé
   g. Evidence of leadership

Submit your graduate application online (http://www.graduate.ku.edu). Send official transcripts of all completed college and university coursework and all other requested application materials to the School of Business MBA Office.

Combined Degrees

Combined MBA and JD

This program combines in 4 years of study the 3-year Juris Doctor (p. 760) program offered by the School of Law (http://www.law.ku.edu) and the Full-Time MBA program offered by the School of Business. It entails 40 hours of MBA coursework and 76 hours of law coursework. It is for students who plan to engage in corporate law practice or enter business using law training as background. It offers training in the convergent fields of business management and law.

Students must meet the admission requirements of each school and should be admitted by both the School of Law and the School of Business before entering the second year. The Law School Admission Test and the Graduate Management Admission Test are required. A student who decides to enter the program after beginning the first year in the School of Law or in the MBA program should discuss the plan with the associate dean or program director of each school as early as possible. No student may be admitted to the joint program after completing more than two full semesters in either the JD or the MBA curriculum. Diplomas are awarded concurrently by each school at the conclusion of the joint degree program requirements.

The joint MBA/JD is open to those who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records indicate that they have the capability to complete both programs. All students in the combined program must complete a minimum of 40 credit hours of graduate work in business.

The School of Business follows general Graduate Studies regulations requiring a 3.0 cumulative grade-point average for all coursework counted toward any master’s degree. The School of Law requires a minimum cumulative grade-point average of 2.0 (C) in all law school work. Grades received in any law courses credited toward fulfillment of the MBA degree requirements are incorporated into the MBA grade-point average, which ultimately must be 3.0 for the awarding of the MBA degree.

Dual MBA and M.Arch. Degree Program

The Master of Business Administration/Master of Architecture dual degree program is designed particularly for students intending to pursue leadership opportunities in architecture, development, or construction. Students completing the dual degree program earn an MBA from the KU School of Business (http://www.business.ku.edu) and an M.Arch. from the KU School of Architecture, Design and Planning (http://www.sadp.ku.edu).

Students complete 106 credit hours in the Master of Architecture (p. 10) program and 34 credit hours in the School of Business. Prospective dual degree students must already be students in the Master of Architecture program and must apply and be accepted by the School of Business. New students must complete the architecture curriculum before starting the MBA curriculum and must declare their intention before completing the first year of the architecture curriculum. Typically, the MBA is completed during the final year of study. Degrees are granted concurrently.

Combined MBA and Pharm.D.

This dual degree program allows students to earn an MBA from the School of Business (http://www.business.ku.edu) and a Doctor of Pharmacy (p. 2005) from the School of Pharmacy (http://www.pharm.ku.edu) by extending their professional graduate study. The MBA/Pharm.D. program is tethered to the Working Professional Program at the Edwards Campus. Students take 32 hours to complete the MBA portion of this dual degree. Students gain competence and expertise in the complementary fields of business management and pharmacy. It is particularly appropriate for those intending to manage a retail or health-system pharmacy or assume a leadership role in the pharmaceutical industry or in managed health care.

Prospective students must submit an application and be accepted to the School of Pharmacy first. Pharmacy students are recommended to the MBA program by the Associate Dean of Pharmacy. Students must meet the prerequisites of and be accepted by both schools. Degrees are granted concurrently.

MBA with a Concentration in Petroleum Management

The MBA program with a concentration in petroleum management is offered full time on the Lawrence campus. This is a specially designed course of study. It meets the requirements of active-duty U.S. Naval Supply Corps officers who usually are assigned to billets requiring this training upon completion of study at KU. Other students interested in the intersection of the management of fuels and business are also encouraged to participate in this program. Students typically take a minimum of 68 hours of coursework during this two-year program, including MBA courses and engineering courses.

Master of Business Administration

The Master of Business Administration degree program meets the educational needs of persons seeking positions with managerial responsibilities in both the public and the private sectors. KU’s program emphasizes broad concepts of business administration but
provides options for graduate certificates in specific areas of business management.

KU offers two MBA programs: one for full-time students, who take their courses on the Lawrence campus, and one for working professional students, who take courses in the evenings at the KU Edwards Campus (http://edwardscampus.ku.edu) in Overland Park. The two programs are tailored to meet the different needs of students. Full-time students typically are committed to a career change. Working professional students generally seek to enhance their career paths while remaining fully employed.

Full-Time MBA Degree Program

The full-time MBA program features an emphasis on cohort learning. The community building begins with orientation and is integrated throughout the program. The Full-Time MBA program in Lawrence requires 50 credit hours over 16 months. An optional fourth semester is offered. Students are admitted to the program only once a year in the fall semester. Requirements are designed for a person holding a baccalaureate degree in any field, with no specific course requirements in business and related areas. Transfer credit is not accepted to this program.

The 50 hours in the MBA program consist of 31 credit hours in ten core classes, seven credit hours of application classes, and 12 credit hours of specialized track classes. Prior to the beginning of the second semester, students select a track of either Finance or Marketing/Supply Chain Management.

Working Professional MBA Degree Program

KU Edwards Campus

The Working Professional MBA program in Kansas City is located at 12600 Quivira Rd., Overland Park. The Working Professional MBA program at the KU Edwards Campus requires a total of 42 credit hours. All classes in the Working Professional program are 2 hours. The credits are allocated as follows: 24 hours of 12 core classes, 8 hours of advanced core classes, and one completed certificate program or other electives to total 42 credit hours. Core and Advanced Core Classes cannot be waived or substituted. Up to 6 hours may be transferred in as elective content if pre-approved by the MBA team.

Certificate Programs

Certificates in business at the graduate level offer an opportunity to pursue a specific skill set in an in-depth and focused manner.

MBA Certificates are designed to work in tandem with the Working Professional MBA program, but may also be taken as a “stand-alone.” Some certificates require a previous MBA or specific course prerequisites. Others may be taken with only a bachelor’s degree. Prerequisites for each certificate program vary and must be taken in addition to the concentration courses.

Current students in the MBA program are encouraged, but not required, to complete a certificate. Certificates provide official recognition on their transcript of an area of study. All of these certificates require 10 credit hours for completion.

Human Resources Management

- The increase in the importance of intellectual and human capital for business success has elevated the value of effective people management. The goal of this certificate is to provide depth and breadth of knowledge in policies and practices in the core areas of HRM: Staffing, performance management, compensation, rewards and training and development. The certificate will also build competence in HRM in the global arena.

The completion of this business certificate program affords students a record of an academic accomplishment in the Human Resources Management area. This certificate is open to current MBAs, MBA alumni, and others not currently pursuing an MBA. An accredited bachelor’s degree is necessary for admission.

Prerequisite courses for the HRM concentration: MGMT 711 Human Resources Management or MGMT 810 Managing People or equivalent MBA level HR course.

Required Courses

MGMT 732 - Recruiting and Selecting Effective Employees
MGMT 734 - Compensation and Rewards
MGMT 738 - Developing People and Careers
MGMT 740 - Appraising and Managing Employee Performance
MGMT 741 - International Human Resources Management

Faculty Coordinator

James Guthrie
jguthrie@ku.edu

Admission Deadline

One month prior to the semester start: July 10th for August or December 10th for January start.

Application Requirements

- Online Application Data Form (http://www.graduate.ku.edu/apply)
- $30 application fee, payable online
- Official Transcript (if current KU MBA student, an Advising Report from “KYOU” may be uploaded)
- Essay - What is your Rationale for attaining this Certificate? (for non-KU MBAs only)
- Letter from your Advisor acknowledging your participation in the certificate program (for current or former KU MBA students, a permission letter will be provided for you)

International Business Management

Managing operations in a global environment differs from that of a single country perspective. Global businesses must simultaneously cope with management issues in multiple markets and multiple constituencies. Students engaged in the International Business certificate will learn to address differing cultural values in human resources, marketing and other areas. Students will also be able to participate in a short-term study abroad class.

The completion of a business certificate program in International Business affords students a record of an academic accomplishment in the International Business Management area. This certificate is open to current MBAs, MBA alumni, and others not currently pursuing an MBA. An accredited bachelors degree is necessary for admission.

Prerequisites for the International Business Certificate include: IBUS 701 International Business, IBUS 820 International Business, MGMT 704 Strategic Management or equivalent MBA level course. Two courses in this certificate are offered as electives in other certificates, MGMT 741 International Human Resources Management and FIN 735 International Finance. MKTG 716 is offered as part of the Advanced Core in Marketing. These courses have separate pre-requisites that must be followed.

Required Courses

IBUS 730 - International Business Strategy
IBUS 731 - Comparative and Cross-Cultural Management

Choose three of the following courses:

IBUS 720 - Business in China
IBUS 721 - Business in Latin America
IBUS 740 - Business Practices in China (Involves study abroad and requires IBUS 720 as a prerequisite)
IBUS 741 - Business Practices in Latin America (Involves study abroad and requires IBUS 721 as a prerequisite)
IBUS 895 - Graduate Seminar in International Business: (Topic)
FIN 735 - International Finance
MGMT 741 - International Human Resources Management
MKTG 716 - Global Marketing

Faculty Coordinator

Dennis Karney
dkarney@ku.edu
**Admission Deadline**

One month prior to the semester start: July 10th for August or December 10th for January start.

**Application Requirements**

- Online Application Data Form (http://www.graduate.ku.edu/apply)
- $30 application fee, payable online
- Official Transcript (if current student, an Advising Report from “KYOU” may be uploaded)
- Essay - What is your Rationale for attaining this Certificate? (for non-KU MBAs only)
- Current KU Students: A letter from your Advisor acknowledging your participation in the certificate program (for current MBA students, a permission letter will be provided for you)

**Investments**

- The investment certificate will provide students a broad understanding of many different financial instruments and markets. Topics range from start-up financing through alternative investments such as hedge funds and derivatives and everything in between. Evaluation of investment decisions and risk management are important topics covered for each investment type. The investment certificate covers topics in portfolio management, security analysis and other financial services.

The completion of a business certificate program affords students a record of an academic accomplishment in the Investments area. This certificate is open only to current MBAs and MBA alumni.

Several courses in this certificate are offered as electives in other certificates, FIN 735 International Finance is offered in the International Business Management certificate, FIN 750 Entrepreneurial Finance, FIN 725 Business Valuation, FIN 735 International Finance, FIN 732 Derivative Strategies and FIN 731 Applied Portfolio Management Seminar are also offered in the Valuation certificate. Pre-requisites for individual courses must be followed.

**Required Courses**

FIN 720 - Advanced Investments

FIN 721 - Fixed Income

Choose three of the following courses:

FIN 725 - Business Valuation

FIN 731 - Applied Portfolio Management Seminar

FIN 732 - Derivative Strategies

FIN 733 - Alternative Investment Strategies

FIN 735 - International Finance

FIN 750 - Entrepreneurial Finance

**Faculty Coordinator**

Christopher Anderson
cwanderson@ku.edu

---

**Marketing**

- Companies rely on customers as the foundation of their business. In this certificate students will learn how to discover what customers want, how to evaluate new opportunities, and effective means of reaching new customers. Marketing research tools provide students an opportunity to learn the latest research and how to evaluate the effectiveness of marketing campaigns.

The completion of a business certificate program affords students a record of an academic accomplishment in the Marketing area. This certificate is open to current MBAs, MBA alumni, and others not currently pursuing an MBA. A bachelors degree is necessary for admission.

**Required Courses**

MKTG 714 – Discovering and Evaluating New Product Opportunities

MKTG 721 - Advanced Topics in Managing Products and Brands

MKTG 722 - Marketing Strategy

MKTG 723 - Marketing Research

MKTG 724 - Pricing of Products and Services

**Faculty Coordinator**

Sanjay Mishra
smishra@ku.edu

---

**Admission Deadline**

One month prior to the semester start: July 10th for August or December 10th for January start.

**Application Requirements**

- Online Application Data Form (http://www.graduate.ku.edu/apply)
- $30 application fee, payable online
- Official Transcript (if current student, an Advising Report from “KYOU” may be uploaded)
- Essay - What is your Rationale for attaining this Certificate? (for non-KU MBAs only)
• Current KU Students: A letter from your Advisor acknowledging your participation in the certificate program (for current MBA students, a permission letter will be provided for you)

**Strategic Management**

• Understanding of strategic management enables students to be successful in top management positions in organizations or in running their own businesses. Students learn critical skills in understanding industries and global competition, developing sustainable competitive advantages, recognizing business opportunities and understanding how technology affects competition. Students completing the certificate will have strong strategic thinking skills and will be able to develop strategic plans that will make their organizations more successful and thus advancing their careers.

The completion of a business certificate program affords students a record of an academic accomplishment in the Strategic Management area. This certificate is open to current MBAs, MBA alumni, and others not currently pursuing an MBA. A bachelors degree is necessary for admission.

**Faculty Coordinator**

Vince Barker
vbarker@ku.edu

**Admission Deadline**

One month prior to the semester start: July 10th for August or December 10th for January start.

**Application Requirements**

• Online Application Data Form (http://www.graduate.ku.edu/apply)
• $30 application fee, payable online
• Official Transcript (if current student, an Advising Report from “KYOU” may be uploaded)
• Essay - What is your Rationale for attaining this Certificate? (for non-KU MBAs only)
• Current KU Students: A letter from your Advisor acknowledging your participation in the certificate program (for current MBA students, a permission letter will be provided for you)

**Supply Chain Management**

• Supply Chain strategies are the critical to efficient organizations. Effective market coverage and availability of products at the right locations are key components of business success. A certificate in supply chain management provides a student with a broad understanding of the issues and key technical tools in logistics, scheduling and multi-national topics to manage a supply chain.

The completion of a business certificate program affords students a record of an academic accomplishment in the Supply Chain Management area. This certificate is open to current MBAs, MBA alumni, and others not currently pursuing an MBA. A bachelors degree is necessary for admission.

**Admission Deadline**

One month prior to the semester start: July 10th for August or December 10th for January start.

**Application Requirements**

• Online Application Data Form (http://www.graduate.ku.edu/apply)
• $30 application fee, payable online
• Official Transcript (if current student, an Advising Report from “KYOU” may be uploaded)
• Essay - What is your Rationale for attaining this Certificate? (for non-KU MBAs only)
• Current KU Students: A letter from your Advisor acknowledging your participation in the certificate program (for current MBA students, a permission letter will be provided for you)

**Valuation**

• The understanding of valuation is an important topic in corporate finance, investment management, real estate, banking and many other areas of financial services. Students will learn a variety of valuation techniques for different types of assets, such as equity valuation, valuation effects of mergers and acquisitions, real estate valuation, fixed income valuation, derivative value. In addition to valuation theory, students will have many opportunities to apply the theories in practice.

The completion of a business certificate program affords students a record of an academic accomplishment in the Valuation area. This certificate is open only to current MBAs and MBA alumni.

Several courses in this certificate are offered as electives in other certificates. FIN 735 International Finance, FIN 750 Entrepreneurial Finance, FIN 732 Derivative Strategies, and FIN 731 Applied Portfolio Management Seminar.
Required Courses
ACCT 720 - Financial Statement Analysis
FIN 725 - Business Valuation

Choose three of the following courses:
FIN 732 Derivatives and Risk Management
FIN 731 Applied Portfolio Management Seminar
FIN 735 - International Finance
FIN 750 - Entrepreneurial Finance

Master of Accounting

Introduction
In the School of Business, students acquire a rigorous education that prepares them for positions in a dynamic and competitive global environment.

The University of Kansas School of Business is accredited by the Association for the Advancement of Collegiate Schools of Business International (http://www.aacsb.edu).

Baccalaureate Preparation
The Master of Accounting program offers a 1-year degree for students with baccalaureate degrees in accounting equivalent to that required for accreditation by the AACSBl. Deficiencies in the undergraduate program result in additional hours being required for the degree.

Admission to Master’s Programs
All graduate programs are open to those who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records, scores on the required standardized examination, and prior work experience indicate that they have the capability to complete the program. Admission to all programs in business is limited on the basis of space, facilities, faculty, and other resources.

Applicants for all graduate programs must take the Graduate Management Admission Test (http://www.mba.com/mba) given by Pearson VUE. The GMAT is administered in most foreign countries and by appointment at designated testing centers throughout the United States. The test is typically taken during the academic year before the term for which admission is sought. MBA/JD applicants must take the GMAT; the Law School Admission Test is not accepted in lieu of the GMAT.

Students whose native language is not English or who have not completed a degree from a college or university in the United States, Great Britain, Canada, or Australia must also have a score of at least 570 (600 for the MBA program) on the Test of English as a Foreign Language. A minimum score of 57 on each of the three sections of the TOEFL is required. For students taking the computerized version of the TOEFL, an overall score of 230 is required (250 for the MBA program), with a minimum score of 23 on each of the 3 sections of the test.

All applications for admission to the MBA, M.S., or MAcc programs must include:
1. Graduate application (http://www.graduate.ku.edu);
2. 3 essays;
3. 1 official transcript of each college and university record;
4. 2 letters of recommendation from faculty members and/or employers;
5. Scores on the GMAT and scores on the TOEFL if required;
6. A $65 nonrefundable application fee;
7. A current résumé; and
8. A signed academic honor code statement.

Completed applications are reviewed by committee, and action is taken on them periodically throughout the year. Each applicant is notified by letter of the action taken on his or her application.

All admissions to any graduate program in business are subject to and in accordance with all rules and regulations. See Admission in the Graduate Studies (p. 2059) section of the online catalog for more information.

Submit your graduate application online (http://www.graduate.ku.edu). Send original transcripts of all completed college and university coursework and all other requested application materials to the school:

The University of Kansas School of Business
MAcc Applications
Summerfield Hall, Room 350
1300 Sunnyside Ave.
Lawrence, KS 66045-7534

Master of Accounting
The Master of Accounting offers students an opportunity to study accounting topics in greater detail than at the undergraduate level. MAcc students must complete a track in one of 4 areas:
• Advisory and Consulting Services (ACS)
• Assurance
• Corporate
To receive a well-rounded business education, students take electives in other business areas such as business law, information systems, and finance. In addition, the program gives students the opportunity to improve writing, oral presentation, and interpersonal skills needed for a successful career in accounting and information systems.

**MAcc Degree Requirements**

1. Candidates for the MAcc degree who have undergraduate degrees in accounting from KU or other schools with equivalent undergraduate accounting programs must complete at least 30 semester credit hours of course work. Students may count 6 hours of credit at the 500-600 level toward the MAcc degree provided that the credit is not applied to the undergraduate degree.
2. Candidates with undergraduate degrees in business without an accounting major must complete additional hours of undergraduate accounting classes.
3. Candidates without undergraduate degrees in business or accounting must complete additional hours of core/business and undergraduate accounting classes.

**MAcc Requirements**

Required for students with undergraduate accounting or business degrees:

**Tracks**

Students must choose a track from one of the following areas:

### Advisory and Consulting Services (ACS)

**Required:**
- ACCT 743 Accounting Information System Risks and Controls 3
- IST 730 IT Project Management 3
- MGMT 885 Business Consulting 4
  or MGMT 831 Consulting Practicum

Select at least three of the following:
- ACCT 741 Fraud Examination and Forensic Accounting
- ACCT 895 Graduate Seminar in Accounting: _____ (International Financial Reporting Standards I)
- ACCT 895 Graduate Seminar in Accounting: _____ (Accounting Professional Ethics)
- ACCT 895 Graduate Seminar in Accounting: _____ (Internal Audit)
- IST 704 Database Management
- IST 706 Systems Analysis and Design
- IST 708 Strategic Information Systems Planning
- IST 709 Business Computer Networking
- IST 712 Information Security
- IST 725 Contemporary Information Technology Topics
- IST 895 Graduate Seminar Information Systems: _____
- FIN 895 Graduate Seminar in Finance: _____ (Corporate Valuation)

### Corporate

**Required:**
- ACCT 721 Advanced Accounting 3
- ACCT 743 Accounting Information System Risks and Controls 3
- FIN 895 Graduate Seminar in Finance: _____ (Corporate Valuation) 3

Select at least two of the following:
- ACCT 722 Researching Financial Accounting Issues
- ACCT 724 Accounting Theory
- ACCT 726 Advanced Managerial Accounting - Quantitative and Economic Topics
- ACCT 741 Fraud Examination and Forensic Accounting
- ACCT 745 Specialized Accounting Practices
- ACCT 895 Graduate Seminar in Accounting: _____ (International Financial Reporting Standards I)
- ACCT 895 Graduate Seminar in Accounting: _____ (Accounting Professional Ethics)
- ACCT 895 Graduate Seminar in Accounting: _____ (Internal Audit)

Select at least one of the following:
- IST 706 Systems Analysis and Design
- IST 725 Contemporary Information Technology Topics
- IST 730 IT Project Management
- IST 895 Graduate Seminar Information Systems: _____ (ERP Systems)

### Tax

**Required:**
- ACCT 545 Advanced Taxation 3
The Master of Science degree program is for students who have completed a baccalaureate degree in business or a related degree as prescribed by the Association to Advance Collegiate Schools of Business and want to do concentrated study in a specific business area. Deficiencies in a student’s undergraduate program result in additional hours being required for the degree. These are determined before or at the time of initial enrollment.

A concentration in supply chain management is offered. Supply chain management is only available to U.S. Army majors, or major-eligible captains stationed at Fort Leavenworth in Leavenworth, Kan. The program is lock-step, 24 credit hours from KU and must be completed in 2 semesters. Six hours of credit are afforded students from concurrent course work at Command and General Staff College.

Baccalaureate Preparation

The Master of Science in business requires a baccalaureate degree in business equivalent to that required for accreditation by the American Assembly of Collegiate Schools of Business. Deficiencies in the undergraduate program result in additional hours being required for the degree. A concentration in supply chain management is offered.

Admission to Master’s Programs

All graduate programs are open to those who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records, scores on the required standardized examination, and prior work experience indicate that they have the capability to complete the program. Admission to all programs in business is limited on the basis of space, facilities, faculty, and other resources.

Students whose native language is not English or who have not completed a degree from a college or university in the United States, Great Britain, Canada, or Australia must also have a score of at least 570 (600 for the M.B.A. program) on the Test of English as a Foreign Language. A minimum score of 57 on each of the three sections of the TOEFL is required. For students taking the computerized version of the TOEFL, an overall score of 230 is required (250 for the M.B.A. program), with a minimum score of 23 on each of the 3 sections of the test.

All applications for admission to the M.S. programs must include

1. Graduate application (http://www.graduate.ku.edu);
2. 1 official transcript of each college and university record;
3. Scores on the TOEFL if required;
4. A current résumé; and

Completed applications are reviewed by committee, and action is taken on them periodically throughout the year. Each applicant is notified by Graduate Studies of the action taken on his or her application.

All admissions to any graduate program in business are subject to and in accordance with all rules and regulations. See Admission (p. 2059) in the Graduate Studies section of the online catalog for more information.

Submit your graduate application online (http://www.graduate.ku.edu). Send original transcripts of all completed college and university course work and all other requested application materials to the school:

Summerfield Hall
1300 Sunnyside Ave., Room 124
Lawrence, KS 66045-7534

M.S. Degree Requirements

Candidates must complete a minimum of 30 semester hours of graduate credit. Students must fulfill the following requirements:

1. Earn credit in required courses toward a concentration in Supply chain management.
2. Complete a capstone course.
3. Pass a comprehensive examination in the concentration, prepared and evaluated by at least three Graduate Faculty members in the area.

Undergraduate prerequisites that were not completed during the undergraduate program must be taken during initial enrollment and do not count toward fulfillment of the degree requirement of 30 hours.

Financial Aid

Students admitted to the Ph.D. program receive financial assistance. Contingent on satisfactory progress and availability of funds, the school provides financial assistance to most students for the first 4 years of their
programs. Financial assistance is available in varying degrees through assistantships, fellowships, grants, loans, and employment.

**Assistantships**

During the first year, most doctoral students are appointed as research or teaching assistants. Many doctoral students also receive dissertation fellowships while writing their dissertations. During 2012-13, a graduate teaching assistantship paid about $1,800 a month, and a 50-percent-time graduate research assistantship paid about $1,800 a month plus tuition and fees. Appointment as a graduate teaching assistant at 40-percent time or more entitles the student to a 100-percent tuition waiver.

For non-native speakers of English, appointment as a graduate teaching assistant is only made after the student passes the SPEAK test or the Test of Spoken English administered by KU’s Applied English Center (http://www.aec.ku.edu).

**Fellowships and Grants**

The School of Business has been successful in nominating doctoral students for fellowships and grants from sources outside the school. Business students have received awards from the Richard D. Irwin Foundation, Kauffman Foundation, the American Institute of Certified Public Accountants, Beta Gamma Sigma, the American Accounting Association, Accounting Doctoral Scholars, and KU. Several dissertation fellowships normally are awarded annually. These awards allow the student to receive support for a semester while working on his or her dissertation.

The School of Business maintains active files on these and other sources of fellowships and grants, recommends qualified students for the awards, and works closely with students in submitting application materials.

Visit the Graduate Studies website for information about other funding opportunities (http://www.graduate.ku.edu/03-07_student_funding.shtml) for graduate students at KU.

**Financial Aid and Scholarships** (http://financialaid.ku.edu)

**Strong Hall**

1450 Jayhawk Blvd., Room 50

Lawrence, KS 66045-7518

785-864-4700

**Ph.D. Admission**

The applicant must hold at least a bachelor’s degree from an accredited college or university. No specific undergraduate preparation in business is required.

The applicant must demonstrate competence as a scholar through a high level of previous academic performance and high percentile scores on the Graduate Management Admission Test or Graduate Record Examination. Scores may not be older than five years at the time of application. In addition, international applicants must present high scores on the Test of English as a Foreign Language, or IELTS.

Finally, the applicant must demonstrate the ability for doctoral study in business, either by a record of achievement in previous professional or academic experience, including research and scholarship, or through letters of recommendation and a personal interview.

These requirements are intended only as suggestions for minimum admission standards. They should not be construed as a guarantee of admission to the Ph.D. program.

A $65 nonrefundable application fee, payable to the University of Kansas, must accompany all applications.

Submit your graduate application online (http://www.graduate.ku.edu).

**Doctor of Philosophy in Business**

The program is designed for students who wish to become scholar-teachers. It develops the capacity for original research and effective teaching by providing mastery of the knowledge in a particular field, a thorough understanding of research methodology, the ability to communicate effectively, and the motivation for continuing self-education. Students must specialize in a concentration and develop a broad knowledge of other areas of business and their interrelationships in the management function.

As of fall 2013, 42 students were enrolled in the Ph.D. program. The program will continue to be limited in size so each student can work closely with faculty members to receive substantial individual attention.

**Ph.D. Degree Requirements**

By the end of the third semester of the aspirant’s program (excluding summer sessions), an aspirant must complete the following qualifier requirements. All aspirants must demonstrate some proficiency in doing original research of publishable quality and some proficiency in teaching.

**Human Resources Management, Organizational Behavior, and Strategic Management**

Ph.D. students must take the following:

- MGMT 905 Philosophy of the Behavioral and Organizational Sciences: 3
- MGMT 906 Behavioral Research Methods: 4
- MGMT 916 Seminar in Organization Theory: 3
- Select one of the following in microeconomic theory: 3
- BE 917 Advanced Managerial Economics
- BE 701 Business Economics
- ECON 700 Survey of Microeconomics

**Finance**

Ph.D. students must take the following:

2-course sequence in probability and statistical methods. Satisfied by the following, or equivalent courses in other departments:

- DSCI 920 Probability for Business Research: 8
- & DSCI 921 and Statistics for Business Research

Finance students must also take one course in regression:

- DSCI 922 Advanced Regression: 3

**Accounting, Decision Sciences, Information Systems, and Marketing**

Ph.D. students must take the following:

2-course sequence in probability and statistical methods. Satisfied by the following, or equivalent courses in other departments:
These courses should be completed in the first 2 years of a student’s program. In addition, students must take area-specific core courses defined by their area group. At or before the end of the aspirant’s third semester in the program, a qualifier assessment team, composed of five faculty members, holistically determines whether or not a student continues in the program.

The aspirant for the Ph.D. in business administration must have an area of concentration, supporting areas, and preparation in research methodology.

**Concentration**

Each aspirant, with the assistance of her or his faculty advisor and the area faculty, selects an area of concentration from the traditional business disciplines of accounting, finance, human resources management, decision sciences, marketing, organizational behavior, and strategic management. An aspirant also may propose an interdisciplinary concentration that is a combination of these disciplines, or may include emphases such as international business, law, and economics. The aspirant must take at least five advanced courses in the concentration. These courses may include those offered outside the School of Business.

**Supporting Areas**

Course work in the area of concentration is supplemented and strengthened by study in one or two supporting areas. A supporting area is one that supplements and complements the concentration. The aspirant satisfies the supporting area requirement by taking at least 4 advanced courses in the supporting areas (at least 2 courses in each of 2 supporting areas or at least 4 courses in 1 supporting area). Courses recommended for preparation for the qualifier assessment may not be included in satisfying the supporting area requirement.

**Probation and Dismissal Guidelines**

To be in good standing, a student must maintain a 3.0 cumulative grade-point average; if the grade-point average falls below 3.0, the student is placed on probation. This is followed by a letter to the student confirming the probation and explaining the student’s options.

A student is placed on probation for 1 academic semester. If the cumulative grade-point average has not risen to 3.0 in the next semester of enrollment (excluding summers), the student can either be dismissed or allowed to continue on probation. Continued probation requires the area director for the student’s concentration to write a letter to the Ph.D. team explaining why the student should be allowed to continue.

A graduate student can be dismissed on recommendation of the area director for the student’s concentration. Usually a graduate student is dismissed because of a low grade-point average; however, failure of examinations or failure to make satisfactory progress toward the degree is also cause for dismissal. Academic dismissal should occur before a semester begins; but if a student is dismissed during the semester, the dismissal is effective only at the end of the semester in which the Ph.D. team gives notification of dismissal.

**Research Methodology**

When preparing for the qualifier assessment, area groups should ensure that the student’s program includes adequate preparation in research methodology.

**Responsible Scholarship**

Students in the first year must enroll in BUS 903 Responsible Conduct of Research. This course builds students’ abilities to analyze ethical issues and introduces students to various issues that may arise while engaging in the research endeavor.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

**Teaching**

Students enroll in BUS 902 Teaching Seminar during the first semester in which they teach independently. Before the completion of the Ph.D. program, all students also must have teaching experience equivalent to teaching at least 2 undergraduate courses independently in 2 different semesters.

**Examinations**

To advance to candidacy, the student must pass a written-oral comprehensive examination in the concentration. Finally, the student must pass an oral defense of the dissertation research proposal and the dissertation.
Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu) for details).

Introduction
The primary mission of the School of Education (http://www.soe.ku.edu) is to prepare educators as leaders. Within the university, the School of Education serves Kansas, the nation, and the world by

1. Preparing individuals to be leaders and practitioners in education and related human-service fields,
2. Expanding and deepening understanding of education as a fundamental human endeavor, and
3. Helping society define and respond to its educational responsibilities and challenges.

To accomplish this mission, the School of Education

1. Offers an extensive curriculum leading to academic degrees and professional licensure,
2. Requires faculty and students to engage in scholarship, and
3. Provides a range of professional services to schools, other institutions, and individuals.

The components of preparing educators as leaders that frame this mission for our initial programs are

1. Research and best practice,
2. Content and pedagogical knowledge, and
3. Professionalism.

These three themes build our conceptual framework.

Mission Statement
View the mission statement (http://www.soe.ku.edu/about) of the School of Education.

Undergraduate Degree Programs

Degree and Licensure Requirements for Teacher Education Students
 Completion of the Teacher Education Program requires 4 years. After completing a minimum of 120 approved hours and the requirements for the specific teacher licensure program, the student receives a bachelor’s degree and is eligible for a Kansas teaching license.

Majors are available in the following teaching fields:

- Unified Early Childhood (Birth-Grade 3)
- Elementary (K-6)
- Secondary English (6-12)
- Middle Mathematics (5-8)
- Secondary History and Government (6-12)
- Middle Science (5-8)
- Foreign languages (Chinese, French, German, Japanese, Latin, Russian, Spanish) (PreK-12)
- Health and Physical Education (PreK-12)

Endorsements are available in the following areas:

- English for Speakers of Other Languages (ESOL)
- Special Education
Graduate Degree Programs

Master’s Degree Programs

Master’s degrees are granted on satisfactory completion of not less than 1 academic year, or its equivalent, of graduate study. The school provides 3 options for the master’s degree:

- The thesis option,
- The project option, and
- A minimum 36-credit-hour study option.

At least 20 of the credit hours required for master’s programs must be in regular course work, as contrasted with independent study and similar enrollments. Students pursuing the 36-credit program option must have 26 hours in regular course work. All master’s programs require a graduate class in research and evaluation methods, successfully completed during the first 12 hours. As part of the requirement for the degree, the candidate must pass a final oral or written examination. A candidate’s advisor and two additional members of the Graduate Faculty constitute the examining committee for the thesis or project options. The department prepares and evaluates the written examination for the credit-hour degree option.

To ensure continuity of progress and currency of knowledge, there is a 7-year time limit for completion of master’s degree requirements. The Graduate Division has the authority to grant a 1-year extension for compelling reasons, on recommendation of the department/committee. If more than 8 years are requested, the appropriate appeals body of the school considers petitions for further extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant further extensions.

Note: Because substantive and procedural differences exist among the programs, some may have more stringent policies on time extensions. Students should inquire about the specific policies in effect in the department or program in which they intend to study.

Note: To be eligible for the degree, a student pursuing the thesis option must deposit signed title and acceptance pages and a signed ETD Release form and complete all other requirements before the degree requirements submission deadline in the graduate academic calendar. Graduate Studies establishes the degree submission deadline each year. Please see the Graduate Studies website for more information.

Master of Arts

A candidate for the Master of Arts degree completes work both in education and in a teaching area (other than physical education). For students who choose the thesis or project option, a minimum of 30 hours of graduate credit is required for this degree, of which no fewer than 10 and no more than 15 hours must be earned in the teaching area. Some work must be elected in at least 2 of the approved graduate program areas in the School of Education. The candidate must complete a thesis related to the teaching area (6 hours maximum credit applicable to degree requirements) or complete the nonthesis option by enrolling in Master’s Project (4 hours applicable to degree requirements). While enrolled, the candidate submits a research paper related to the teaching area to the advisor. Check with the department for specific course requirements for the 36-hour master’s degree option.

Master of Science

A candidate for the degree of Master of Science in Counseling Psychology earns a concentration in mental health counseling. A minimum of 60 credit hours is required for this degree, about 50 of which...
are prescribed, with the rest made up of electives approved by the student's advisor. The candidate must complete a Master's Thesis (3 hours maximum credit applicable to degree requirements), or complete a Master's Project (3 hours applicable to degree requirements), or complete a written comprehensive examination. Check with the department for specific course requirements for the 60-hour master's degree.

**Master of Science in Education**

A candidate for the degree of Master of Science in Education selects 1 of the program areas as a concentration for graduate study. A minimum of 30 credit hours is required, of which no fewer than 10 hours must be in the concentration. Credit in Thesis or Master's Project may not be included in these 10 hours. The candidate must elect course work in at least 2 graduate program areas outside the major concentration. Normally, these courses would be in the School of Education. The candidate must complete a thesis in the concentration (6 hours maximum credit applicable to degree requirements) or complete the nonthesis option by enrolling in Master's Project (4 hours applicable to degree requirements). While enrolled, the candidate submits a research paper related to the specialization to the advisor. Check with the department for specific course requirements for the 36-hour master's degree option.

**Specialist in Education Degree Program**

The Specialist in Education program consists of 2 years of full-time graduate study (about 70 semester credit hours) followed by a third year of internship. Students completing the program are licensed for early childhood through grade 12 if they obtain 100 hours of applied experience with young children and their families in practica or internship.

**Doctoral Degree Programs**

**Doctoral Degree Admission Policies**

The application for admission to graduate studies and the Graduate Division of the School of Education (http://www.soe.ku.edu) for doctoral study must specify the major program area. Materials included with the application form usually consist of:

1. Official transcripts of undergraduate- and graduate-level courses indicating grade-point average,
2. Letters of recommendation and/or survey-type evaluation forms from previous instructors and professional colleagues,
3. Personal statements about professional goals,
4. Representative writings and/or other media samples related to the proposed area,
5. A résumé of professional experience, and
6. Scores from the verbal, quantitative, and writing sections of the Graduate Record Examination.

Each department in the Graduate Division has determined the specific information and scores required for admission. Contact the graduate advisor of the department that offers the major for instructions about completing the application for admission.

In general, applicants with 3.5 grade-point averages on a 4.0 scale for the first 30 graduate-level hours (e.g., master's degree), scores at the 50th percentile across the 3 GRE subtests, and validated strengths on the additional indicators are viable candidates for admission. However, this profile is intended only as an example and should not be construed as a guarantee of admission to a doctoral program. Several programs have limited student admissions because of the need to balance faculty resources with the demands of maintaining high-quality teaching, scholarship, and professional service activities.

Departments offering doctoral programs may recommend provisional admission of a student who has not met the criteria or prerequisites to do advanced graduate-level work. Provisional admission requires the satisfactory completion (e.g., with a 3.5 grade-point average) of 12 or more hours in regularly scheduled graduate courses, at least half of which must come from core areas. After the completion of the provisional program, the department recommends to the Graduate Division that the student:

1. Be transferred to regular status or
2. Be allowed to continue for another 9 hours or
3. Be dropped from the program.

**Doctor of Education**

The Doctor of Education is awarded upon completion of 3 years of advanced training in both the theory and the practice of education. It is a professional degree intended primarily for practitioners in education rather than for researchers, for whom the Ph.D. is the appropriate degree plan. The Ed.D. is offered in curriculum and instruction, educational administration, higher education, and special education.

**Advisory Committee**

A student admitted to study for the Ed.D. is considered an aspirant for the degree until the comprehensive examination has been passed. After passing this examination, the student is considered a candidate for the degree. Each student must have an advisory committee of at least 3 members of the Graduate Faculty. One member of the committee serves as the chair. The student meets with this committee before completing 12 hours of course work to plan and approve formally an appropriate program leading to the Ed.D. The approved program, signed by members of the committee and the student, is placed in the student's file in the School of Education Graduate Division office.

**Requirements**

Students must acquaint themselves thoroughly with departmental requirements for the degree, which may be in addition to general requirements and those of the School of Education. Consistent with Graduate Studies' general regulations, it is each student's responsibility to know and observe all university, school, departmental, and academic program regulations and procedures relating to the graduate program. In no case will a regulation be waived or an exception be granted because a student pleads ignorance of, or contends he or she was not informed of, requirements, regulations, procedures, or deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

1. **Time Limit**
   To ensure continuity of progress and currency of knowledge, doctoral degree students normally complete all requirements for the degree in 8 years after first enrollment in a program leading directly to a doctoral degree. Coursework submitted to complete doctoral degree requirements must be completed within school or departmental time limits or extensions thereto. The Graduate Division has the authority to grant a 1 year extension of the normal 8-year time limit for compelling reasons, on the written advice of the dissertation committee. If more than 9 years are requested, the appropriate appeals body of the school considers petitions for extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant further
extensions. There is a 10-year limit on combined master's and doctoral degree programs.

**Note:** Because substantive and procedural differences exist among the programs, some may have more stringent policies on time extensions. Students should inquire about the specific policies in effect in the department or program in which they intend to study.

A Leave of Absence may be granted upon request to the graduate program in advance of leave. A leave of absence may be granted in extraordinary circumstances (e.g. cases of illness, emergency, financial hardship, military leave), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals. Appropriate documentation related to these extraordinary circumstances may be requested from the student directly. Evidence of progress towards degree will also be a determining factor in the decision to grant an exception. The time taken for a leave of absence does not count against the student’s time to degree. However, if the total time for the leave extends more than 5 years, the student will lose his/her place in the program and must reapply for admission.

2. **Period of Continuous Study**

The student must spend the equivalent of 3 academic years, including the time spent attaining the master’s degree, in a period of continuous study at this or another approved university. During the time the student is engaged in the Ed.D. program at KU, 1 of the following options must be satisfied:

a. 2 consecutive semesters, 1 of which may be a summer session, of full-time enrollment in regularly scheduled courses normally at the program’s home campus. (Full time equals 9 hours in fall or spring and 6 hours in summer.)

b. 2 consecutive semesters of at least 6 hours and an adjacent summer session of at least 3 hours, all in regularly scheduled courses at the program’s home campus.

c. 3 consecutive semester enrollments (excluding summer session) of at least 6 hours each in regularly scheduled courses on the program’s home campus.

d. 18 hours taken during the period encompassed by 2 consecutive summer sessions with enrollment in each of the four semesters: summer, fall, spring, summer.

e. 27 hours taken during any 5 consecutive semesters (including summer sessions) with enrollment in each semester. During this period, the student must be employed full-time in a field directly related to the student’s academic major.

These options include the following stipulations:

- Only course work taken after the first year of graduate study, that is, after the master’s degree or its equivalent, may satisfy the period-of-continuous-study requirement.

- Dissertation, individual study, field experience, and off-campus practicum hours may not be included in the stated minimal requirements.

- For all enrollments of 8 hours or more, 1 course may be taken away from the program’s home campus, e.g., on the KU Edwards Campus, if need can be demonstrated from a scheduling standpoint.

For options (b), (c), and (d), at least quarter-time, appropriately related, professional involvement on or off campus is required. The period of continuous study is not merely a requirement measured in hours of enrollment or of credit in courses counted toward a degree but may include other academic and professional activities appropriate to the field of study.

The student, with the help of the advisory committee, must file in the Graduate Division office a period-of-continuous-study plan congruent with School of Education requirements before the beginning of the formal period of continuous study. This plan may be filed as a part of the overall program plan.

The period-of-continuous-study requirement for the Ed.D. ensures a minimum period of bona fide on-campus study and related academic and professional involvement. Because of the particular professional nature of the degree, appropriately related professional endeavors may include off-campus activities. However, the credit-hour elements of the requirement must be fulfilled by course work on the program’s home campus. (Note the exceptions above.) Exceptional circumstances or plans must be approved in advance on an individual basis by petition to the Graduate Division of the School of Education.

3. **Program Area**

All candidates for the Ed.D. must complete a minimum of 27 credit hours in their major area, excluding credits used to fulfill Research Skills, Dissertation, and the doctoral practicum requirements. Coursework completed at KU or at another institution as part of a previous graduate degree, cannot be used to meet the credit hour requirements for this degree.

4. **Research Skills**

Upon admission to doctoral study, students who have not completed a research and evaluation methods course for the education master’s degree must take the course, e.g., PRE 715, during the first doctoral enrollment. The course used to fulfill this requirement, whether taken at KU or at another institution, does not count toward any doctoral requirements.

Before being admitted to the comprehensive examination, students must present satisfactory evidence that they possess the professional research skills of advanced practitioners in their concentrations by meeting the following research skills requirements: Complete a minimum of 9 hours of graduate study in 1 or more supporting areas that develop skills relevant to understanding, promoting, and evaluating professional practice. Supporting areas may include statistics, assessment and evaluation, qualitative methods, or historical or philosophical methods. Up to 6 hours, excluding credit hours for the required master’s course in research methods and evaluation, whether taken at KU or elsewhere, may be waived using prior B-level or higher graduate course work. Research skills requirements vary among programs to meet the individual needs of students. The student must secure the most recent information on research skills requirements from the appropriate department.

The research skills requirements chosen by the student must be approved and passed upon by the advisory committee. The chair must file the results in the School of Education Graduate Division office on the appropriate form so that they may be recorded on the student’s permanent record.

**Responsible Conduct of Research:** All students must satisfy departmental and university requirements regarding the responsible conduct of research. Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship (https://documents.ku.edu/policies/Graduate_Studies/Research_Skills_and_Responsible_Scholarship.htm) are listed in the KU Policy Library.
5. Doctoral Practicum Enrollment

Ed.D. aspirants must complete at least 1 structured 3-credit-hour practicum in a supervised internship setting. A description of the practicum prepared by the student and approved by the advisory committee must be filed with the department and the graduate records office. Specific requirements for this practicum experience are available from students' departments.

6. Comprehensive Examination

The comprehensive examination should be scheduled after the student has completed the research skills requirements and all, or a major portion, of the course work for the concentration. The department must request the School of Education Graduate Division office to schedule the comprehensive examination. This request must be made at least two weeks before the date of the written portion of the examination.

The examining committee must consist of at least 5 members (usually including the advisory committee). All must be graduate faculty, and 3 of the 5 must be regular faculty from the student's home department.

The student passes the comprehensive examination if a majority of the official examining committee (including the chair) approves the student's performance. The grade on this examination is Honors, Satisfactory, or Unsatisfactory. If the aspirant fails the comprehensive examination, he or she may be allowed, upon the department's recommendation, to repeat it, but it may not be taken more than 3 times. In any case, the student may not repeat the oral examination until at least 90 days have elapsed since the last unsuccessful attempt.

Note: Students in Ed.D. programs must pass both written and oral components of the comprehensive examination. Satisfactory performance on the written component must be attained before the oral component may be attempted. To fail either component is to fail the examination. All members of the student's comprehensive examination committee are involved in the evaluation process. The written component of the comprehensive examination, like the oral, focuses on advanced knowledge in the major and any appropriately related areas. The focus of the examination is the ability to relate this knowledge to tasks and problems faced by practitioners. The duration of the entire written component of the comprehensive examination is to be a minimum of 16 hours. If a student passes the written component but fails the oral, the examining committee determines whether both components or only the oral must be repeated, after the minimum 90-day interim period.

7. Dissertation Committee and Proposal

Doctoral aspirants may begin work on the dissertation after they complete the equivalent of one full-time semester of doctoral study in regular student status and may use their research practicum experience in preparation for the dissertation. However, students may first enroll in dissertation credit hours only during the semester in which they take their comprehensive examinations. Dissertation hours taken during that semester count toward the minimum of 12 hours of dissertation enrollment only if the examinations are passed during that same semester.

Upon passing the comprehensive examination, the aspirant becomes a candidate for the Doctor of Education degree. Based on recommendations of the candidate's department, the Graduate Division designates the candidate's dissertation committee at this time. The dissertation proposal committee must consist of at least 3 members (usually including the advisory committee) and may include members from other departments and, on occasion, from outside the university. All committee members are to be members of the graduate faculty. A committee member from outside the university becomes an ad hoc member of the graduate faculty. The dissertation proposal must be read by all members of the dissertation committee. One copy of the approved dissertation proposal, signed by all members of the dissertation committee, must be submitted (with the appropriate form) to the School of Education Graduate Division office.

8. Continuous Enrollment

After passing the comprehensive examination, the candidate must be continuously enrolled, including summer sessions, until the degree is completed. Each enrollment must reflect as accurately as possible the candidate's demands on faculty time and university facilities. A student must be continuously enrolled in accordance with the following schedule: Until the degree is completed or until 18 post-comprehensive hours have been completed (whichever comes first), the student must enroll for a minimum of 6 hours a semester and 3 hours during summer session. Students who have not completed the degree after completing 18 hours of post-comprehensive enrollment must continue to enroll for the amount of credit that best reflects their demands on faculty time and university resources each semester and each summer session until they pass the final oral examination.

Post-comprehensive enrollment may include enrollment during the semester or summer session in which the comprehensive examination has been passed. Students may enroll for dissertation hours as well as other courses when the examination is taken. Students who do not pass the examination cannot apply dissertation hours to degree requirements. The candidate may petition the School of Education Graduate Division for a leave of absence during the period between the comprehensive examination and the final oral examination. Again, specific degree programs may have more stringent rules than general requirements.

9. Dissertation

The candidate must present a dissertation that exhibits the application of existing knowledge in the major field of professional study. Ed.D. candidates may satisfy the dissertation requirement by completing a comprehensive, critical assessment of the relevant literature on a major educational issue or problem. This study should demonstrate the application of existing knowledge to the author's area of professional practice. Various styles and formats for theses and dissertations are acceptable. The format and style of a student's thesis or dissertation is left to the discretion of the student and the advisor, but format and style options may be constrained or dictated by the policy of the department from which the student is to receive the degree. The dissertation is prepared under the direction of the dissertation committee. The minimum number of dissertation hours in the Ed.D program is 12. Instructions regarding the proper form of the final document may be obtained from the School of Education Graduate Division office.

10. Final Oral Examination

When the dissertation has been tentatively accepted by the dissertation committee, the chair of the dissertation committee may request the School of Education Graduate Division office to schedule the final oral examination. This request must be made at least two weeks before the desired examination date. At least five months must have elapsed between the successful completion of the comprehensive examination and the date of the final oral examination. Upon approval by the Graduate Division, the final oral examination is scheduled at the time and the place designated in the request and publicly announced. Although the dissertation committee is responsible for the certification of the candidate, any
member of the Graduate Faculty may be present at the examination and may participate in the questioning. The official examining committee consists of at least five members, including the dissertation committee. At least one member must be from a department other than the candidate’s major department. This member is called the Outside committee member and represents Graduate Studies.

The final examination must be partly oral and may be wholly so. The examination covers the dissertation and the concentration. The candidate passes the final examination if a majority of the official examining committee (including the chair) approves the candidate’s performance. When the final oral examination has been passed, the dissertation committee reports a grade of Honors, Satisfactory, or Unsatisfactory. Candidates who fail the final oral examination may be allowed to repeat it upon the recommendation of the dissertation committee.

11. **Dissertation Copies**

When the final oral examination has been passed and the dissertation has been signed by the members of the dissertation committee, a title page and acceptance page with original signatures and the ETD Release form are to be delivered to the Graduate Division so that completion of degree requirements may be officially certified.

### Doctor of Philosophy with a Major in Education

The Doctor of Philosophy degree is awarded for mastering a field of scholarship, learning the methods of investigation appropriate to that field, and completing a substantial piece of original research. The degree is intended to produce highly competent scholars who are prepared to be university faculty members and other professionals, to conduct and evaluate original research, to teach at the college/university level, and to provide discipline-related leadership to the field and to the public. The Ph.D. is offered in all education graduate programs.

Although the courses and the research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The aspirant for the Ph.D. is expected to be a well-educated person and should have acquired a broad base of general knowledge, both as preparation for more advanced work and as a means of knowing how the concentration is related to other fields of human thought.

### Advisory Committee

A student admitted to study for the Ph.D. is known as an aspirant for the degree until the comprehensive examination has been passed. After passing this examination, the student is known as a candidate for the degree. Each student must have an advisory committee consisting of at least three members of the Graduate Faculty. One member of the committee serves as the chair. One member must be from the graduate department representing the student’s minor area if the student’s program or department requires a minor area. The student meets with this committee before completing 12 hours of course work to plan and approve formally an appropriate program leading to the Ph.D. The approved program, signed by members of the committee and the student, is placed in the student’s file in the School of Education Graduate Division office.

### Requirements

Students must acquaint themselves thoroughly with departmental requirements for the degree, which may be in addition to general requirements and those of the School of Education. Consistent with Graduate Studies’ general regulations, it is the student’s responsibility to know and observe all university, school, departmental, and academic program regulations and procedures relating to the graduate program. In no case will a regulation be waived or an exception be granted because a student pleads ignorance of, or contends that he or she was not informed of, requirements, regulations, procedures, or deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

1. **Time Limit**

   To ensure continuity of progress and currency of knowledge, doctoral degree students normally complete all requirements for the degree in 8 years after first enrollment in a program leading directly to a doctoral degree. Coursework submitted to complete doctoral degree requirements must be completed within school or departmental time limits or extensions thereto. The Graduate Division has the authority to grant a 1-year extension of the normal 8-year time limit for compelling reasons, on the written advice of the dissertation committee. If more than 9 years are requested, the appropriate appeals body of the school considers petitions for extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant further extensions. There is a 10-year limit on combined master’s and doctoral degree programs.

   **Note:** Because substantive and procedural differences exist among the programs, some may have more stringent policies on time extensions. Students should inquire about the specific policies in effect in the department or program in which they intend to study.

A Leave of Absence may be granted upon request to the graduate program in advance of leave. A leave of absence may be granted in extraordinary circumstances (e.g., cases of illness, emergency, financial hardship, military leave), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals. Appropriate documentation related to these extraordinary circumstances may be requested from the student directly. Evidence of progress towards degree will also be a determining factor in the decision to grant an exception. The time taken for a leave of absence does not count against the student’s time to degree. However, if the total time for the leave extends more than 5 years, the student will lose his/her place in the program and must reapply for admission.

2. **Resident Study**

   The student must spend the equivalent of 3 academic years, including the time spent attaining the master’s degree, in resident study at this or another approved university. Because general requirements do not specify a minimum number of hours for the degree, no transfer of credits is appropriate. Departments do, however, consider relevant prior graduate work in setting up programs of study leading to the doctorate.

   **Residence Requirement.** 2 semesters (which may include 1 summer session), usually consecutive, must be spent in resident study at KU. The period of resident study may begin with the student’s first semester of doctoral study but it must be completed prior to the semester in which the comprehensive exams are taken. Residence is not merely a period measured in hours. During this period the student must be involved full time in academic pursuits, which may include up to half-time on-campus teaching or research, or under certain circumstances, a greater percentage of research if it is directed specifically toward the student’s degree objectives. Such activities permit commensurate decreases in the hourly enrollment minima. The student must continue to be enrolled in at least 6 hours under any special conditions. Increased research involvement must
be fully supported and documented by the dissertation advisor as contributing to the student’s dissertation. The research work must be performed under the direct supervision of the student’s advisor, if on campus, or with adequate liaison, if off campus. Special circumstances such as internal employment for more than half time as a teaching or research assistant, or as another type of university employee, must have advance approval on an individual basis by petition to the Graduate Division of the School of Education. The student, with the help of the advisory committee, must file in the Graduate Division office a residence plan congruent with School of Education requirements before the beginning of the formal residence period. This plan may be filed as a part of the overall program plan. Because residence is not merely a requirement measured in hours of enrollment or of credit in courses toward a degree, the plan may include other academic and professional activities appropriate to the field of study.

**Note:** Hourly enrollment requirements must be met through courses at the program’s home campus, and if appropriate internal employment is not involved, at least 9 hours must be in regularly scheduled courses.

### 3. Program Area

In applying for doctoral study, the student specifies a program area in which formal classes and research work are to be done and in which she or he expects to become a scholar. A minimum of 36 credit hours is required in the major area, excluding credits used to fulfill research skills and the dissertation requirements. The doctoral core requirement (EDUC 800) may be included as part of the major if it is consistent with the student’s area of study and if doing so is supported by the student’s department and doctoral committee. Fifty-percent of the student’s major must be 800-level or above (18 credit hours). The program must include at least 6 credit hours outside of the student’s home department, not including courses required to fulfill the student’s research skills component or the doctoral core (EDUC 800).

**Note:** Course work completed at KU or at another institution as part of a previous graduate degree, cannot be used to meet the credit hour requirements for this degree. Upon admission to doctoral study, students who have not completed a research and evaluation methods course for the education master’s degree must take the course, e.g. PRE 715, during the first doctoral enrollment. The course taken to fulfill this requirement, whether taken at KU or at another institution, does not count toward any doctoral requirements.

### 4. Core Requirement

All students are required to complete EDUC 800: Education as a Field of Scholarship, in their first year of doctoral enrollment.

### 5. Teaching Experience

In addition to the requirements above, the student must satisfactorily complete at least 1 semester of supervised college teaching experience under the direction of a KU faculty member. This may be completed during the semester in which the student takes the comprehensive examination, but ordinarily it should be completed before admission to the comprehensive examination.

### 6. Research Skills

Before being admitted to the comprehensive examination, the student must have completed the research skills requirements established for the degree. Specific research skills requirements vary with department and program, but all reflect the expectation of a significant research skills component distinct from the dissertation but strongly supportive of it. The Ph.D. research skills requirement includes completion of at least 12 graduate hours relevant to the aspirant’s research: statistics, measurement and assessment, qualitative methods, historical and philosophical methods, or foreign language (a reading knowledge in one foreign language is equivalent to 6 hours of credit). Up to 6 hours, excluding credit hours for the required master’s course in research methods and evaluation, whether taken at KU or elsewhere, may be waived using prior B-level or higher graduate course work. A statement concerning specific research skills should be secured from the student’s major department. At least 9 of the 12 credit hours must be 800 level or above. The 12 credit hours cannot include PRE 715 or its program equivalent. When the student has met the requirements for research skills, the committee chair must report this to the Graduate Division on the appropriate form, certifying that the student is prepared to proceed to the comprehensive oral examination. If a program requires research skills that are tested separately rather than integrally with the program, the completion of each requirement should be reported immediately to the Graduate Division so that it may be recorded on the student’s permanent record.

Some commonly used skills are listed under Doctoral Degree Requirements, Doctor of Philosophy (p. 2059), Research Skills and Responsible Scholarship in the Graduate Studies section of the online catalog.

**Responsible Conduct of Research:** All students must satisfy departmental and university requirements regarding the responsible conduct of research. In order to meet this requirement, students are required to complete EDUC 800 Education as a Field of Scholarship, in their first years of doctorate enrollment.

### 7. Comprehensive Examination

When a Ph.D. aspirant has completed the major portion of the course work at a satisfactory level and has completed the research skills requirement and all other departmental requirements prerequisite to the comprehensive examination, the department asks the School of Education Graduate Division office to schedule the comprehensive examination. This request must be made at least 2 weeks before the date of the written portion of the examination. Students must be enrolled when they take the exam. The examining committee must consist of at least 5 members (usually including the advisory committee). All must be graduate faculty, and 3 of the 5 must be regular faculty from the student’s home department. The comprehensive examination consists of both written and oral parts and covers the major area pursued by the student, as well as the minor area, if one is required by the student’s program. The student passes the comprehensive examination if a majority of the official examining committee (including the chair) approves the student’s performance. The grade on this examination is Honors, Satisfactory, or Unsatisfactory. An aspirant who receives a grade of Unsatisfactory may be allowed, upon the recommendation of the department, to repeat it, but it may not be taken more than 3 times. The aspirant may not repeat the oral examination until at least 90 days have elapsed since the last unsuccessful attempt.

**Note:** Students in Ph.D. education programs must pass both written and oral components of the comprehensive examination. Satisfactory performance on the written component must be attained before the oral component may be attempted. To fail either component is to fail the examination. All 5 members of the student’s comprehensive examination committee are involved in the evaluation process. The written component of the comprehensive examination, like the oral, focuses on advanced knowledge in the major and any appropriate related areas. To pass, the student must be evaluated as having responded satisfactorily to questions in the major areas. If a student fails any portion of the written
comprehensive component, a failure of the examination is recorded. The examining committee determines if the entire written component of the examination, or only the failed portion(s), must be retaken. The entire written component lasts a minimum of 16 hours. If a student passes the written component but fails the oral, the examining committee determines if both components or only the oral must be repeated, after the minimum 90-day interim period.

8. Dissertation Committee and Proposal
Doctoral aspirants may begin work on the dissertation after they complete the equivalent of one full-time semester of doctoral study in regular student status and may use their research practicum experience in preparation for the dissertation. However, students may first enroll in dissertation credit hours only during the semester in which they take their comprehensive examinations. Dissertation hours taken during that semester count toward the minimum of 18 hours of dissertation credit only if the examinations are passed during that same semester.

Upon passing the comprehensive examination, the aspirant becomes a candidate for the Ph.D. The Graduate Division, using the recommendations of the candidate’s department, designates the dissertation committee at this time. This committee consists of at least 3 members (usually including the advisory committee) and may include members from outside the university. All committee members are to be members of the Graduate Faculty. A committee member from outside the university becomes an Ad Hoc member of the Graduate Faculty.

The dissertation proposal must be read by all members of the dissertation committee. One copy of the approved dissertation proposal, signed by all members of the dissertation committee, must be submitted (with the appropriate form) to the School of Education Graduate Division office.

9. Continuous Enrollment
After passing the comprehensive examination, the candidate must be continuously enrolled, including summer sessions, until the degree is completed. A student must be continuously enrolled in accordance with the following schedule: Until the degree is completed or until 18 post-comprehensive hours have been completed (whichever comes first), the student must enroll for at least 6 hours a semester and 3 hours a summer session. Students who have not completed the degree after completing 18 hours of post-comprehensive enrollment must continue to enroll for the amount of credit that best reflects their demands on faculty time and university resources each semester and each summer session until they pass the final oral examination.

Post-comprehensive enrollment may include enrollment during the semester or summer session in which the comprehensive examination has been passed. Students may enroll for dissertation hours as well as other courses when the examination is taken. Students who do not pass the examination cannot apply dissertation hours to degree requirements. Under certain conditions, the candidate may petition the School of Education Graduate Division for a leave of absence during the period between the comprehensive examination and the final oral examination.

10. Dissertation
The candidate must present a dissertation showing the results of original research. The dissertation for the Ph.D. considers applied or basic concerns and results in conclusions that have broad theoretical implications. Various styles and formats for theses and dissertations are acceptable. The format and style of a student’s thesis or dissertation is left to the discretion of the student and the advisor, but format and style options may be constrained or dictated by Graduate Studies policies. The dissertation is prepared under the direction of the dissertation committee. The norm for dissertation enrollment is about 24 credit hours. The minimum number of dissertation hours in the Ph.D. program is 18. Instructions regarding the proper form of the final document may be obtained from the School of Education Graduate Division office.

11. Final Oral Examination
When the dissertation has been tentatively accepted by the dissertation committee, the chair of the dissertation committee may request the School of Education Graduate Division office to schedule the final oral examination. This request must be made at least two weeks before the desired examination date. At least five months must have elapsed between the successful completion of the comprehensive examination and the date of the final oral examination.

The examining committee must consist of at least five members (usually including the advisory committee). All must be graduate faculty, and three of the five must be regular faculty from the students home department.

The final examination must be partly oral and may be wholly so. The examination covers the dissertation and the candidate’s concentration area and, if appropriate, minor area. The candidate passes the final examination if a majority of the official examining committee members (including the chair) approves the candidate’s performance. When the final oral examination has been passed, the dissertation committee reports a grade of Honors, Satisfactory, or Unsatisfactory. Candidates who fail the final oral examination may be allowed to repeat it upon the recommendation of the dissertation committee.

12. Dissertation Copies
When the final oral examination has been passed and the dissertation has been signed by the members of the dissertation committee, a title page and acceptance page with original signatures and ETD Release form are to be delivered to the Graduate Division so that completion of degree requirements may be officially certified.

Licensure: Added Endorsements
At least 8 hours of the required course work must be completed at KU if it is to be the recommending institution for adding endorsements to the teaching license. For information about adding endorsements, contact the School of Education at 785-864-3726.

Undergraduate Programs
The School of Education offers programs that lead to teacher licensure in health & physical education, unified early childhood and at the elementary, middle, and secondary levels, as well as nonlicensure options in athletic training, community health, sport management or exercise science (pre-physical therapy, cardiac rehabilitation, and strength and conditioning).

Students planning to teach must complete programs composed of 3 major parts: General Education (requirements completed primarily in the first 2 years), Major (content areas in which students are specializing), and Professional Education (course work that helps them to understand students as learners and to communicate knowledge effectively).

On admission, students who plan to major in health and physical education report to the Department of Health, Sport, and Exercise Sciences (p. 418). Students who plan to teach all other subjects and in elementary education and unified early childhood are in the Department
of Curriculum and Teaching (p. 301). Course requirements for each of the three parts of the Teacher Education Programs are listed under departmental headings.

University Honors Program
The school encourages qualified students to participate in the University Honors Program (http://www.honors.ku.edu).

Data from the Title II Report
The Title II Report (http://www.soe.ku.edu/about/accreditation) provides information about the performance of KU School of Education teacher education program students on required state examinations. This data is part of the Title II report required by the federal government. 98 percent of KU teacher education students passed the required state licensure examinations in academic year 2009-10.

Special Programs and Facilities
The School of Education provides these programs and facilities for students, faculty, and, in many cases, the public. Most facilities offer graduate students opportunities for assistantship, laboratory, and research experiences related to their programs of study. Contact the individual programs for information.

Applied Physiology Laboratory and Fitness Evaluation Clinic
This teaching and research laboratory in stress physiology, Robinson Center, 1301 Sunnyside Ave., Room 101, Lawrence, KS 66045-7520, assesses physical function through physiological tests. Fitness parameters of physical education majors and students in health, sport, and exercise sciences classes are assessed routinely. Demonstrations of physiological and biochemical concepts are performed for exercise physiology classes. Research on the physiological ramifications of exercise stress is conducted. Graduate and undergraduate students assist in service and research projects.

Beach Center on Disability
The Beach Center, Haworth Hall, 1200 Sunnyside Ave., Room 3136, Lawrence, KS 66045-7566, is funded by the National Institute for Disability and Rehabilitation Research, Office of Special Education and Rehabilitative Services, U.S. Department of Education. It is the only federally funded center in the nation conducting research with families with disabilities. The center is involved in research and training projects addressing family well-being across the life span. Projects are guided by six fundamental beliefs about families: positive contributions, great expectations, full citizenship, choices, inherent strengths, and relationships.

Center for Economic Education
The center, 431 J.R. Pearson Hall, works to increase the economic literacy of pre-service and in-service teachers through credit and noncredit teaching and consultation in economic education. It maintains a library of current materials on economic/consumer education.

Center for Educational Testing and Evaluation
The center, 735 J.R. Pearson Hall, engages in research and service in educational assessment and program evaluation. Issues in educational testing are studied and projects are designed and carried out to examine school effectiveness, personnel/student evaluation, and policy implications of educational testing and assessment. There are opportunities for assistantships for interested and qualified students.

Center for Psychoeducational Services
CPS, 130 J.R. Pearson Hall, is a training site for students in the Department of Psychology and Research in Education. CPS is staffed by student clinicians in school psychology and counseling psychology who earn credit while they gain practical experience working directly with clients. CPS is a self-sustaining, nonprofit agency.

Center for Research on Learning
The center, 521 J.R. Pearson Hall, conducts research centered on solving problems that limit individuals' quality of life and their ability to learn and perform in school, work, home, or the community. It serves as the parent organization for 7 research institutes: Advanced Learning Technologies (ALTEC), Division of Adult Studies, e-Learning Design Lab, Institute for Health and Disability Policy Studies, Institute for Research on Adolescent Learning, Kansas Coaching Project, Professional Development Research Institute, and Transition Coalition.

Advanced Learning Technology in Education
The Advanced Learning Technologies project at the KU Center for Research on Learning, 239 J.R. Pearson Hall, uses the most advanced and innovative technologies available to improve teaching and learning. Faculty and students in ALTEC come from a range of disciplines and programs, including the School of Education, the School of Journalism and Mass Communications, the School of Engineering, the School of Music, and the School of the Arts. This collection of talent gives ALTEC broad capabilities including advanced networking and telecommunication expertise, instructional design, data harvesting and warehousing, distance education experience, and programming.

ALTEC is committed to developing new technologies to empower learners of all types and ages and to redefining the learning experience through innovative resources. ALTEC partners with those who recognize the tremendous capabilities available through electronic strategies for dissemination, communication, and collaboration. They provide support in the development of the initiative, interpreting the intent of the content authors with the latest in design, development, and delivery. ALTEC maintains its partnership with an individual project by contributing specific resources required through the phases of implementation, including design, development, maintenance, and evaluation.

Institute for Educational Research and Public Service
The Institute for Educational Research and Public Service, 320 J.R. Pearson Hall, serves both the School of Education faculty members and the state of Kansas. This institute has a two-fold mission. The first part of this mission is to provide faculty with infrastructure support for its research. The support includes assistance with identifying funding sources, proposal development, and grant administration. The second part of the institute’s mission is to help schools and other educational agencies respond to initiatives that are educationally beneficial to the state and that contribute to the teaching, research, and service missions of the school. The institute also houses the Assembly of Equity Programs, TRIO programs, and the Kansas Enrichment Network. At the heart of these programs lies an interest in promoting educational opportunity for youth and young adults in the state.
Kinesiology/Biomechanics Laboratory

The laboratory, Robinson Center, 1301 Sunnyside Ave., Room 101, Lawrence, KS 66045-7520, analyzes human motion. The primary emphasis is on computer-aided cinematographical analysis, but other research tools such as electromyography (EMG), electrogoniometry, stroboscopy, and force plates are used. Major attention is given to the study of efficient movement techniques, equipment design, strength, flexibility, and body types.

Learning Resource and Technology Center

The center, 110 J.R. Pearson Hall, serves faculty and students of the school and the public. Its resources include the Curriculum Laboratory, professional books and journals, K-12 textbooks, curriculum guides and course outlines from school districts throughout the country, selected reference and reserve materials, and mediated instructional packages for pre-service and in-service teacher education. It supports teaching, research, and service involving educational applications of media and microcomputers. Teacher education students develop skills in operating media equipment and producing materials to support their teaching. A representative cross section of instructional equipment found in schools is available, along with emerging technologies used in distance learning and interactive video instruction. The center offers production support for instructional materials and research support for design, evaluation, use, and dissemination of instructional technology.

Microcomputer Laboratories

Microcomputer laboratories in Joseph R. Pearson Hall and Robinson and Dole Centers prepare students to use computers in administrative, instructional, and research applications. The laboratories offer a range of equipment found in schools, including PC and Macintosh computers. Computers are networked to KU’s backbone and resources such as scanners, laser printers, CD-ROM, CD, and DVD players. The laboratories contain application, programming, data management, data analysis, and instructional software that can be used for all grade levels and disciplines.

School of Education Student Organization

Reach to Teach is open to all students interested in careers in education. Information is available in the Welcome Center, 208 J.R. Pearson Hall.

Graduate Programs

To facilitate preparation for specific types of professional service and teaching, graduate study in education has been organized into the program areas encompassed by these departments:

- Curriculum and Teaching (p. 301) includes programs in curriculum and instruction, including the fields relating to elementary and secondary education.
- Educational Leadership and Policy Studies (p. 406) comprises programs in educational administration, social and cultural studies in education, higher education, and educational technology.
- Health, Sport, and Exercise Sciences (p. 418) offers areas of study in exercise science, health science, pedagogy, and sports studies.
- Psychology and Research in Education (p. 439) offers programs in counseling psychology, school psychology, and educational psychology and research.
- Special Education (p. 458) conducts graduate degree programs in autism spectrum disorders, early childhood unified, high-incidence disabilities, low-incidence/significant intellectual disabilities, and secondary transition education and services.

Further information on graduate study may be found on the departmental sections of the online catalog.

Most graduate students are expected to complete work in education areas other than their program areas, as well as in liberal arts or other noneducation areas. The amount of such work depends on the degree sought and the major area. A student must be enrolled for the period during which the comprehensive or final examination is taken. Full-time graduate student enrollment in the School of Education is 9 graduate credit hours or the equivalent.

Special Programs and Facilities

The School of Education provides these programs and facilities for students, faculty, and, in many cases, the public. Most facilities offer graduate students opportunities for assistantship, laboratory, and research experiences related to their programs of study. Contact the individual programs for information.

Applied Physiology Laboratory and Fitness Evaluation Clinic

This teaching and research laboratory in stress physiology, Robinson Center, 1301 Sunnyside Ave., Room 101, Lawrence, KS 66045-7520, assesses physical function through physiological tests. Fitness parameters of physical education majors and students in health, sport, and exercise sciences classes are assessed routinely. Demonstrations of physiological and biochemical concepts are performed for exercise physiology classes. Research on the physiological ramifications of exercise stress is conducted. Graduate and undergraduate students assist in service and research projects.

Beach Center on Disability

The Beach Center, Haworth Hall, 1200 Sunnyside Ave., Room 3136, Lawrence, KS 66045-7566, is funded by the National Institute for Disability and Rehabilitation Research, Office of Special Education and Rehabilitative Services, U.S. Department of Education. It is the only federally funded center in the nation conducting research with families with members with disabilities. The center is involved in research and training projects addressing family well-being across the life span. Projects are guided by six fundamental beliefs about families: positive contributions, great expectations, full citizenship, choices, inherent strengths, and relationships.

Center for Economic Education

The center, 431 J.R. Pearson Hall, works to increase the economic literacy of pre-service and in-service teachers through credit and noncredit teaching and consultation in economic education. It maintains a library of current materials on economic/consumer education.

Center for Educational Testing and Evaluation

The center, 735 J.R. Pearson Hall, engages in research and service in educational assessment and program evaluation. Issues in educational testing are studied and projects are designed and carried out to examine school effectiveness, personnel/student evaluation, and policy implications of educational testing and assessment. There are opportunities for assistantships for interested and qualified students.
Center for Psychoeducational Services

CPS, 130 J.R. Pearson Hall, is a training site for students in the Department of Psychology and Research in Education. CPS is staffed by student clinicians in school psychology and counseling psychology who earn credit while they gain practical experience working directly with clients. CPS is a self-sustaining, nonprofit agency.

Center for Research on Learning

The center, 521 J.R. Pearson Hall, conducts research centered on solving problems that limit individuals’ quality of life and their ability to learn and perform in school, work, home, or the community. It serves as the parent organization for 7 research institutes: Advanced Learning Technologies (ALTEC), Division of Adult Studies, e-Learning Design Lab, Institute for Health and Disability Policy Studies, Institute for Research on Adolescent Learning, Kansas Coaching Project, Professional Development Research Institute, and Transition Coalition.

Advanced Learning Technology in Education

The Advanced Learning Technologies project at the KU Center for Research on Learning, 239 J.R. Pearson Hall, uses the most advanced and innovative technologies available to improve teaching and learning. Faculty and students in ALTEC come from a range of disciplines and programs, including the School of Education, the School of Journalism and Mass Communications, the School of Engineering, the School of Music, and the School of the Arts. This collection of talent gives ALTEC broad capabilities including advanced networking and telecommunications expertise, instructional design, data harvesting and warehousing, distance education experience, and programming.

ALTEC is committed to developing new technologies to empower learners of all ages and to redefining the learning experience through innovative resources. ALTEC partners with those who recognize the tremendous capabilities available through electronic strategies for dissemination, communication, and collaboration. They provide support in the development of the initiative, interpreting the intent of the content authors with the latest in design, development, and delivery. ALTEC maintains its partnership with an individual project by contributing specific resources required through the phases of implementation, including design, development, maintenance, and evaluation.

Institute for Educational Research and Public Service

The Institute for Educational Research and Public Service, 320 J.R. Pearson Hall, serves both the School of Education faculty members and the state of Kansas. This institute has a two-fold mission. The first part of this mission is to provide faculty with infrastructure support for its research. The support includes assistance with identifying funding sources, proposal development, and grant administration. The second part of the institute’s mission is to help schools and other educational agencies respond to initiatives that are educationally beneficial to the state and that contribute to the teaching, research, and service missions of the school. The institute also houses the Assembly of Equity Programs, TRIO programs, and the Kansas Enrichment Network. At the heart of these programs lies an interest in promoting educational opportunity for youth and young adults in the state.

Kinesiology/Biomechanics Laboratory

The laboratory, Robinson Center, 1301 Sunnyside Ave., Room 101, Lawrence, KS 66045-7520, analyzes human motion. The primary emphasis is on computer-aided cinematographical analysis, but other research tools such as electromyography (EMG), electrogoniometry, stroboscopy, and force plates are used. Major attention is given to the study of efficient movement techniques, equipment design, strength, flexibility, and body types.

Learning Resource and Technology Center

The center, 110 J.R. Pearson Hall, serves faculty and students of the school and the public. Its resources include the Curriculum Laboratory, professional books and journals, K-12 textbooks, curriculum guides and course outlines from school districts throughout the country, selected reference and reserve materials, and mediated instructional packages for pre-service and in-service teacher education. It supports teaching, research, and service involving educational applications of media and microcomputers. Teacher education students develop skills in operating media equipment and producing materials to support their teaching. A representative cross section of instructional equipment found in schools is available, along with emerging technologies used in distance learning and interactive video instruction. The center offers production support for instructional materials and research support for design, evaluation, use, and dissemination of instructional technology.

Microcomputer Laboratories

Microcomputer laboratories in Joseph R. Pearson Hall and Robinson and Dole Centers prepare students to use computers in administrative, instructional, and research applications. The laboratories offer a range of equipment found in schools, including PC and Macintosh computers. Computers are networked to KU’s backbone and resources such as scanners, laser printers, CD-ROM, CD, and DVD players. The laboratories contain application, programming, data management, data analysis, and instructional software that can be used for all grade levels and disciplines.

School of Education Student Organization

Reach to Teach is open to all students interested in careers in education. Information is available in the Welcome Center, 208 J.R. Pearson Hall.

Undergraduate Advising

Early in the first year, prospective students in all areas should make appointments with a pre-education advisor at the Advising Center (http://soe.ku.edu/advising) in 208 J.R. Pearson Hall (Welcome Center) to ensure fulfillment of admission requirements and to plan efficient programs of study. Education staff members advise pre-education students individually and in group sessions.

Walk-in appointments are available through the Welcome Center (http://soe.ku.edu/advising), 208 J.R. Pearson Hall. Call 785-864-9616 to make an appointment to meet with an advisor.

Graduate Advising

Graduate advising is done at the department and program level. For more information, please contact the director of graduate studies in your department or program.

All education students have a graduate advisor and should know and be in contact with the advisor to whom they have been assigned. Students who are unsure of their advisor should contact their academic department or an advisor for information.
Undergraduate Scholarships and Financial Aid

In addition to scholarships and financial aid administered by Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml), the school administers a number of special scholarships. Online applications are available in early December each year. The deadline is mid-February; contact the school (http://www.soe.ku.edu) for the specific date.

Graduate Fellowships and Assistantships

For information about graduate assistantships, contact the School of Education (http://www.soe.ku.edu).

Visit the Graduate Studies website for information about funding opportunities (http://www.graduate.ku.edu/funding-opportunities) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml) administers grants, loans, and need-based financial aid.

Undergraduate University Regulations

For information about university regulations, see Regulations (p. 12) or visit the University of Kansas Policy Library (http://www.policy.ku.edu).

Absences

A student with excessive absences may be withdrawn from the course by the dean.

Change of School

To change from one school to another, you must submit a Change of School form in the dean’s office of the school you plan to enter. Follow the deadlines on the form.

- Students are admitted to C&T programs once a year; online applications are due September 16 for spring semester.
- Students are admitted to the HSES teaching and community health programs once a year; online applications are due February 4 for next fall semester.
- Students are admitted to the HSES athletic training program once a year; online applications are due February 4 and paper applications are due May 1 for fall semester.
- Students are admitted to HSES exercise science and sport management programs twice a year; applications are due February 4 for fall and September 16 for spring semester.

Consult the School of Education Welcome Center, 208 J.R. Pearson Hall, 785-864-3726, for information.

Course Substitutions

Course substitutions in any program may require approval of the advisor, department, and associate dean. In addition, some requests must be approved by the school curriculum committee. Approval requires submission of a written petition initiated by the student and approved by the advisor. The associate dean communicates the action taken to the advisor and the student. A copy is placed in the student’s file.

Credit/No Credit

A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (https://documents.ku.edu/policies/governance/USRR.htm#art2sec12).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Students planning to enter education programs who are not formally admitted to the school are strongly discouraged from taking any course required for graduation for Credit/No Credit.

Any course not required for graduation and up to 6 hours of courses required for graduation may be taken for Credit/No Credit. No more than 6 hours of courses required for graduation may be taken for Credit/No Credit.

Graduation with Distinction and Highest Distinction

Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. Grade-point averages are based on total credits (KU and transfer credit). To be considered for distinction, students must have completed a minimum of 75 hours at KU. The list is compiled each spring and includes July, December, and May graduates.

Honor Roll

Students with grade-point averages of 3.75 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

Maximum and Minimum Semester Enrollment

A 12-hour enrollment is a minimum full-time enrollment. Enrollment for more than 19 hours during fall or spring semesters or more than 9 hours during the summer session requires special permission from the associate dean and is not considered unless the student has demonstrated academic ability and has the advisor’s approval.

Maximum Community College Credit Allowed

A maximum of 64 community college hours may be counted toward a student’s degree.

Probation

Placed on Probation

Students must maintain a minimum cumulative grade-point average of at least 2.75. Students whose cumulative grade-point averages are below 2.75 at the end of any semester are placed on academic probation.

Dismissed

If at the end of the following semester (spring or fall) the cumulative grade-point average is not 2.75 or above, the student is dismissed.
from the school. Those students are dropped from all courses for the next semester and required to complete a Change of School form to enroll. They are not allowed to enroll in any courses restricted to School of Education students until they are reinstated. Students admitted provisionally who don’t fulfill specified criteria for admission revert to the school in which they were previously enrolled. In these cases, only courses restricted for School of Education students are dropped from the student’s schedule.

Readmission after Dismissal

Programs are subject to change. Within 1 year of dismissal, if the cumulative grade-point average is at least 2.75, students are readmitted to the program to which they had been admitted. After 1 year, students who wish to follow the program to which they had been admitted must submit a petition to the associate dean. If the petition is denied, students must follow the current program (if different from the one to which they had been admitted).

Required Work in Residence

To be eligible for the B.S.E. degree, a student must complete at least 30 hours at KU at least 30 hours after being admitted to the school. Up to 6 hours of work done at another institution may be accepted as part of the last 30 hours. Before enrolling in a nonresident course, the student should complete a Request for Tentative Evaluation of Credit in 208 J.R. Pearson Hall. After completing the course, the student must request that an official transcript be sent to KU.

Transfer of Credit

CredTran (http://admissions.ku.edu/apply/credits) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Courses completed at other institutions are accepted to fulfill graduation requirements (e.g., in place of specifically prescribed courses), only if they are substantially equivalent as indicated by course description. At least 62 hours must be completed at an upper-division institution.

Graduate University Regulations

For information about university regulations, see Regulations (p. 12) or visit the University of Kansas Policy Library (http://www.policy.ku.edu).

Credit/No Credit

The Credit/No Credit option is authorized for graduate students. For graduate students, the grade of CR will be received for grades of C and above, and the grade of NC (no credit) will be received for grades of C- and below.

As outlined in USRR 2.2.7.6, no course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree or a graduate certificate. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

Please see the Research Skills and Responsible Scholarship policy for more information.

Master’s Degree Programs

Master’s degrees are granted on satisfactory completion of not less than 1 academic year, or its equivalent, of graduate study. The school provides 3 options for the master’s degree:

- The thesis option,
- The project option, and
- A minimum 36-graduate-credit-hour study option.

At least 20 of the credit hours required for master’s programs must be in regular course work, as contrasted with independent study and similar enrollments. Students pursuing the 36-hour program option must have 26 hours in regular course work. All master’s programs require a graduate class in research and evaluation methods, successfully completed during the first 12 hours. As part of the requirement for the degree, the candidate must pass a final oral or written examination. A candidate’s advisor and two additional members of the Graduate Faculty constitute the examining committee for the thesis or project options. The department prepares and evaluates the written examination for the credit-hour degree option.

To ensure continuity of progress and currency of knowledge, there is a 7-year time limit for completion of master’s degree requirements. The Graduate Division has the authority to grant a 1 year extension for compelling reasons, on recommendation of the department/committee. If more than 8 years are requested, the appropriate appeals body of the school considers petitions for further extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant further extensions.

Note: Because substantive and procedural differences exist among the programs, some may have more stringent policies on time extensions. Students should inquire about the specific policies in effect in the department or program in which they intend to study.

Note: To be eligible for the degree, a student pursuing the thesis option must deposit signed title and acceptance pages and a signed ETD Release form and complete all other requirements before the degree requirements submission deadline in the graduate academic calendar. Graduate Studies establishes the degree submission deadline each year. Please see the Graduate Studies website for more information.

Master of Arts

A candidate for the Master of Arts degree completes work both in education and in a teaching area (other than physical education). For students who choose the thesis or project option, a minimum of 30 hours of graduate credit is required for this degree, of which no fewer than 10 and no more than 15 hours must be earned in the teaching area. Some work must be elected in at least 2 of the approved graduate program areas in the School of Education. The candidate must complete a thesis related to the teaching area (6 hours maximum credit applicable to degree requirements) or complete the nonthesis option by enrolling in Master’s Project (4 hours applicable to degree requirements). While enrolled, the candidate submits a research paper related to the teaching area to the advisor. Check with the department for specific course requirements for the 36-hour master’s degree option.

Master of Science

A candidate for the degree of Master of Science in Counseling Psychology earns a concentration in mental health counseling. A minimum of 60 credit hours is required for this degree, about 50 of which are prescribed, with the rest made up of electives approved by the student’s advisor. The candidate must complete a Master’s Thesis (3
hours maximum credit applicable to degree requirements), or complete a Master’s Project (3 hours applicable to degree requirements), or complete a written comprehensive examination. Check with the department for specific course requirements for the 60-hour master’s degree.

**Master of Science in Education**

A candidate for the degree of Master of Science in Education selects 1 of the program areas as a concentration for graduate study. A minimum of 30 credit hours is required, of which no fewer than 10 hours must be in the concentration. Credit in Thesis or Master’s Project may not be included in these 10 hours. The candidate must elect course work in at least 2 graduate program areas outside the major concentration. Normally, these courses would be in the School of Education. The candidate must complete a thesis in the concentration (6 hours maximum credit applicable to degree requirements) or complete the nonthesis option by enrolling in Master’s Project (4 hours applicable to degree requirements). While enrolled, the candidate submits a research paper related to the specialization to the advisor. Check with the department for specific course requirements for the 36-hour master’s degree option.

**Specialist in Education Degree Program**

The Specialist in Education program consists of 2 years of full-time graduate study (about 70 semester credit hours) followed by a third year of internship. Students completing the program are licensed for early childhood through grade 12 if they obtain 100 hours of applied experience with young children and their families in practica or internship.

**Doctoral Degree Programs**

**Doctoral Degree Admission Policies**

The application for admission to graduate studies and the Graduate Division of the School of Education for doctoral study must specify the major program area. Materials included with the application form usually consist of:

1. Official transcripts of undergraduate- and graduate-level courses indicating grade-point average,
2. Letters of recommendation and/or survey-type evaluation forms from previous instructors and professional colleagues,
3. Personal statements about professional goals,
4. Representative writings and/or other media samples related to the proposed area,
5. A résumé of professional experience, and
6. Scores from the verbal, quantitative, and writing sections of the Graduate Record Examination.

Each department in the Graduate Division has determined the specific information and scores required for admission. Contact the graduate advisor of the department that offers the major for instructions about completing the application for admission.

In general, applicants with 3.5 grade-point averages on a 4.0 scale for the first 30 graduate-level hours (e.g., master’s degree), scores at the 50th percentile across the 3 GRE subtests, and validated strengths on the additional indicators are viable candidates for admission. However, this profile is intended only as an example and should not be construed as a guarantee of admission to a doctoral program. Several programs have limited student admissions because of the need to balance faculty resources with the demands of maintaining high-quality teaching, scholarship, and professional service activities.

Departments offering doctoral programs may recommend provisional admission of a student who has not met the criteria or prerequisites to do advanced graduate-level work. Provisional admission requires the satisfactory completion (e.g., with a 3.5 grade-point average) of 12 or more hours in regularly scheduled graduate courses, at least half of which must come from core areas. After the completion of the provisional program, the department recommends to the Graduate Division that the student:

1. Be transferred to regular status or
2. Be allowed to continue for another 9 hours or
3. Be dropped from the program.

**Doctor of Education**

The Doctor of Education is awarded upon completion of 3 years of advanced training in both the theory and the practice of education. It is a professional degree intended primarily for practitioners in education rather than for researchers, for whom the Ph.D. is the appropriate degree plan. The Ed.D. is offered in curriculum and instruction, educational administration, higher education, and special education.

**Advisory Committee**

A student admitted to study for the Ed.D. is considered an aspirant for the degree until the comprehensive examination has been passed. After passing this examination, the student is considered a candidate for the degree. Each student must have an advisory committee of at least 3 members of the Graduate Faculty. One member of the committee serves as the chair. The student meets with this committee before completing 12 hours of course work to plan and approve formally an appropriate program leading to the Ed.D. The approved program, signed by members of the committee and the student, is placed in the student’s file in the School of Education Graduate Division office.

**Requirements**

Students must acquaint themselves thoroughly with departmental requirements for the degree, which may be in addition to general requirements and those of the School of Education. Consistent with Graduate Studies’ general regulations, it is each student’s responsibility to know and observe all university, school, departmental, and academic program regulations and procedures relating to the graduate program. In no case will a regulation be waived or an exception be granted because a student pleads ignorance of, or contends he or she was not informed of, requirements, regulations, procedures, or deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

1. **Time Limit**

   To ensure continuity of progress and currency of knowledge, doctoral degree students normally complete all requirements for the degree in 8 years after first enrollment in a program leading directly to a doctoral degree. Coursework submitted to complete doctoral degree requirements must be completed within school or departmental time limits or extensions thereto. The Graduate Division has the authority to grant a 1 year extension of the normal 8-year time limit for compelling reasons, on the written advice of the dissertation committee. If more than 9 years are requested, the appropriate appeals body of the school considers petitions for extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant further extensions. There is a 10-year limit on combined master’s and doctoral degree programs.
Note: Because substantive and procedural differences exist among the programs, some may have more stringent policies on time extensions. Students should inquire about the specific policies in effect in the department or program in which they intend to study. A Leave of Absence may be granted upon request to the graduate program in advance of leave. A leave of absence may be granted in extraordinary circumstances (e.g., cases of illness, emergency, financial hardship, military leave), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals. Appropriate documentation related to these extraordinary circumstances may be requested from the student directly. Evidence of progress towards degree will also be a determining factor in the decision to grant an exception. The time taken for a leave of absence does not count against the student’s time to degree. However, if the total time for the leave extends more than 5 years, the student will lose his/her place in the program and must reapply for admission.

2. Period of Continuous Study
The student must spend the equivalent of 3 academic years, including the time spent attaining the master’s degree, in a period of continuous study at this or another approved university. During the time the student is engaged in the Ed.D. program at KU, 1 of the following options must be satisfied:

- 2 consecutive semesters, 1 of which may be a summer session, of full-time enrollment in regularly scheduled courses normally at the program’s home campus. (Full time equals 9 hours in fall or spring and 6 hours in summer: 2 consecutive semesters of at least 6 hours and an adjacent summer session of at least 3 hours, all in regularly scheduled courses at the program’s home campus. 3 consecutive semester enrollments (excluding summer session) of at least 6 hours each in regularly scheduled courses on the program’s home campus. 18 hours taken during the period encompassed by 2 consecutive summer sessions with enrollment in each of the four semesters: summer, fall, spring, summer: 27 hours taken during any 5 consecutive semesters (including summer sessions) with enrollment in each semester. During this period, the student must be employed full-time in a field directly related to the student’s academic major. Only course work taken after the first year of graduate study, that is, after the master’s degree or its equivalent, may satisfy the period-of-continuous-study requirement.

- Dissertation, individual study, field experience, and off-campus practicum hours may not be included in the stated minimal requirements. For all enrollments of 8 hours or more, 1 course may be taken away from the program’s home campus, e.g., on the KU Edwards Campus, if need can be demonstrated from a scheduling standpoint.

Program Area
All candidates for the Ed.D. must complete a minimum of 27 credit hours in their major area, excluding credits used to fulfill Research Skills, Dissertation, and the doctoral practicum requirements. coursework completed at KU or at another institution as part of a previous graduate degree, cannot be used to meet the credit hour requirements for this degree.

3. Research Skills
Upon admission to doctoral study, students who have not completed a research and evaluation methods course for the education master’s degree must take the course, e.g., PRE 715, during the first doctoral enrollment. The course used to fulfill this requirement, whether taken at KU or at another institution, does not count toward any doctoral requirements.

Before being admitted to the comprehensive examination, students must present satisfactory evidence that they possess the professional research skills of advanced practitioners in their concentrations by meeting the following research skills requirements: Complete a minimum of 9 hours of graduate study in 1 or more supporting areas that develop skills relevant to understanding, promoting, and evaluating professional practice. Supporting areas may include statistics, assessment and evaluation, qualitative methods, or historical or philosophical methods. Up to 6 hours, excluding credit hours for the required master’s course in research methods and evaluation, whether taken at KU or elsewhere, may be waived using prior B-level or higher graduate course work. Research skills requirements vary among programs to meet the individual needs of students. The student must secure the most recent information on research skills requirements from the appropriate department.

The research skills requirements chosen by the student must be approved and passed upon by the advisory committee. The chair must file the results in the School of Education Graduate Division office on the appropriate form so that they may be recorded on the student’s permanent record.

Responsible Conduct of Research: All students must satisfy departmental and university requirements regarding the responsible conduct of research. Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Campus policies are listed in the KU Policy Library.

4. Doctoral Practicum Enrollment
Ed.D. aspirants must complete at least 1 structured 3-credit-hour practicum in a supervised internship setting. A description of the practicum prepared by the student and approved by the advisory committee must be filed with the department and the graduate records office. Specific requirements for this practicum experience are available from students’ departments.

5. Comprehensive Examination
The comprehensive examination should be scheduled after the student has completed the research skills requirements and all, or a major portion, of the course work for the concentration. The department must request the School of Education Graduate Division office to schedule the comprehensive examination. This request must be made at least two weeks before the date of the written portion of the examination.

The examining committee must consist of at least 5 members (usually including the advisory committee). All must be graduate faculty, and 3 of the 5 must be regular faculty from the student’s home department.

The student passes the comprehensive examination if a majority of the official examining committee (including the chair) approves the student’s performance. The grade on this examination is Honors, Satisfactory, or Unsatisfactory. If the aspirant fails the comprehensive examination, he or she may be allowed, upon the department’s recommendation, to repeat it, but it may not be taken more than 3 times. In any case, the student may not repeat the oral examination until at least 90 days have elapsed since the last unsuccessful attempt.

Note: Students in Ed.D. programs must pass both written and oral components of the comprehensive examination. Satisfactory performance on the written component must be attained before the oral component may be attempted. To fail either component is to fail the examination. All members of the student’s comprehensive examination committee are involved in the evaluation process. The written component of the comprehensive examination, like the oral, focuses on advanced knowledge in the major and any appropriately
related areas. The focus of the examination is the ability to relate this knowledge to tasks and problems faced by practitioners. The duration of the entire written component of the comprehensive examination is to be a minimum of 16 hours. If a student passes the written component but fails the oral, the examining committee determines whether both components or only the oral must be repeated, after the minimum 90-day interim period.

6. Dissertation Committee and Proposal

Doctoral aspirants may begin work on the dissertation after they complete the equivalent of one full-time semester of doctoral study in regular student status and may use their research practicum experience in preparation for the dissertation. However, students may first enroll in dissertation credit hours only during the semester in which they take their comprehensive examinations. Dissertation hours taken during that semester count toward the minimum of 12 hours of dissertation enrollment only if the examinations are passed during that same semester.

Upon passing the comprehensive examination, the aspirant becomes a candidate for the Doctor of Education degree. Based on recommendations of the candidate’s department, the Graduate Division designates the candidate’s dissertation committee at this time. The dissertation proposal committee must consist of at least 3 members (usually including the advisory committee) and may include members from other departments and, on occasion, from outside the university. All committee members are to be members of the graduate faculty. A committee member from outside the university becomes an ad hoc member of the graduate faculty. The dissertation proposal must be read by all members of the dissertation committee. One copy of the approved dissertation proposal, signed by all members of the dissertation committee, must be submitted (with the appropriate form) to the School of Education Graduate Division office.

7. Continuous Enrollment

After passing the comprehensive examination, the candidate must be continuously enrolled, including summer sessions, until the degree is completed. Each enrollment must reflect as accurately as possible the candidate’s demands on faculty time and university facilities. A student must be continuously enrolled in accordance with the following schedule: Until the degree is completed or until 18 post-comprehensive hours have been completed (whichever comes first), the student must enroll for a minimum of 6 hours a semester and 3 hours during summer session. Students who have not completed the degree after completing 18 hours of post-comprehensive enrollment must continue to enroll for the amount of credit that best reflects their demands on faculty time and university resources each semester and each summer session until they pass the final oral examination.

Post-comprehensive enrollment may include enrollment during the semester or summer session in which the comprehensive examination has been passed. Students may enroll for dissertation hours as well as other courses when the examination is taken. Students who do not pass the examination cannot apply dissertation hours to degree requirements. The candidate may petition the School of Education Graduate Division for a leave of absence during the period between the comprehensive examination and the final oral examination. Again, specific degree programs may have more stringent rules than general requirements.

8. Dissertation

The candidate must present a dissertation that exhibits the application of existing knowledge in the major field of professional study. Ed.D. candidates may satisfy the dissertation requirement by completing a comprehensive, critical assessment of the relevant literature on a major educational issue or problem. This study should demonstrate the application of existing knowledge to the author’s area of professional practice. Various styles and formats for theses and dissertations are acceptable. The format and style of a student’s thesis or dissertation is left to the discretion of the student and the advisor, but format and style options may be constrained or dictated by the policy of the department from which the student is to receive the degree. The dissertation is prepared under the direction of the dissertation committee. The minimum number of dissertation hours in the Ed.D program is 12. Instructions regarding the proper form of the final document may be obtained from the School of Education Graduate Division office.

9. Final Oral Examination

When the dissertation has been tentatively accepted by the dissertation committee, the chair of the dissertation committee may request the School of Education Graduate Division office to schedule the final oral examination. This request must be made at least two weeks before the desired examination date. At least five months must have elapsed between the successful completion of the comprehensive examination and the date of the final oral examination. Upon approval by the Graduate Division, the final oral examination is scheduled at the time and the place designated in the request and publicly announced. Although the dissertation committee is responsible for the certification of the candidate, any member of the Graduate Faculty may be present at the examination and may participate in the questioning.

The final oral examination must be partly oral and may be wholly so. The examination covers the dissertation and the concentration. The candidate passes the final examination if a majority of the official examining committee (including the chair) approves the candidate’s performance. When the final oral examination has been passed, the dissertation committee reports a grade of Honors, Satisfactory, or Unsatisfactory. Candidates who fail the final oral examination may be allowed to repeat it upon the recommendation of the dissertation committee.

10. Dissertation Copies

When the final oral examination has been passed and the dissertation has been signed by the members of the dissertation committee, a title page and acceptance page with original signatures and the ETD Release form are to be delivered to the Graduate Division so that completion of degree requirements may be officially certified.

Doctor of Philosophy with a Major in Education

The Doctor of Philosophy degree is awarded for mastering a field of scholarship, learning the methods of investigation appropriate to that field, and completing a substantial piece of original research. The degree is intended to produce highly competent scholars who are prepared to be university faculty members and other professionals, to conduct and evaluate original research, to teach at the college/university level, and to provide discipline-related leadership to the field and to the public. The Ph.D. is offered in all education graduate programs.

Although the courses and the research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an
isolated event in the enterprise of learning. The aspirant for the Ph.D. is expected to be a well-educated person and should have acquired a broad base of general knowledge, both as preparation for more advanced work and as a means of knowing how the concentration is related to other fields of human thought.

Advisory Committee
A student admitted to study for the Ph.D. is known as an aspirant for the degree until the comprehensive examination has been passed. After passing this examination, the student is known as a candidate for the degree. Each student must have an advisory committee consisting of at least three members of the Graduate Faculty. One member of the committee serves as the chair. One member must be from the graduate department representing the student’s minor area if the student’s program or department requires a minor area. The student meets with this committee before completing 12 hours of course work to plan and approve formally an appropriate program leading to the Ph.D. The approved program, signed by members of the committee and the student, is placed in the student’s file in the School of Education Graduate Division office.

Requirements
Students must acquaint themselves thoroughly with departmental requirements for the degree, which may be in addition to general requirements and those of the School of Education. Consistent with Graduate Studies’ general regulations, it is the student’s responsibility to know and observe all university, school, departmental, and academic program regulations and procedures relating to the graduate program. In no case will a regulation be waived or an exception be granted because a student pleads ignorance of, or contends that he or she was not informed of, requirements, regulations, procedures, or deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

1. Time Limit
To ensure continuity of progress and currency of knowledge, doctoral degree students normally complete all requirements for the degree in 8 years after first enrollment in a program leading directly to a doctoral degree. Coursework submitted to complete doctoral degree requirements must be completed within school or departmental time limits or extensions thereto. The Graduate Division has the authority to grant a 1-year extension of the normal 8-year time limit for compelling reasons, on the written advice of the dissertation committee. If more than 9 years are requested, the appropriate appeals body of the school considers petitions for extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant further extensions. There is a 10-year limit on combined master’s and doctoral degree programs.

Note: Because substantive and procedural differences exist among the programs, some may have more stringent policies on time extensions. Students should inquire about the specific policies in effect in the department or program in which they intend to study. A Leave of Absence may be granted upon request to the graduate program in advance of leave. A leave of absence may be granted in extraordinary circumstances (e.g. cases of illness, emergency, financial hardship, military leave), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals. Appropriate documentation related to these extraordinary circumstances may be requested from the student directly. Evidence of progress towards degree will also be a determining factor in the decision to grant an exception. The time taken for a leave of absence does not count against the student’s time to degree. However, if the total time for the leave extends more than 5 years, the student will lose his/her place in the program and must reapply for admission.

2. Resident Study
The student must spend the equivalent of 3 academic years, including the time spent attaining the master’s degree, in resident study at this or another approved university. Because general requirements do not specify a minimum number of hours for the degree, no transfer of credits is appropriate. Departments do, however, consider relevant prior graduate work in setting up programs of study leading to the doctorate.

Residence Requirement. 2 semesters (which may include 1 summer session), usually consecutive, must be spent in resident study at KU. The period of resident study may begin with the student’s first semester of doctoral study but it must be completed prior to the semester in which the comprehensive exams are taken. Residence is not merely a period measured in hours. During this period the student must be involved full time in academic pursuits, which may include up to half-time on-campus teaching or research, or under certain circumstances, a greater percentage of research if it is directed specifically toward the student’s degree objectives. Such activities permit commensurate decreases in the hourly enrollment minima. The student must continue to be enrolled in at least 6 hours under any special conditions. Increased research involvement must be fully supported and documented by the dissertation advisor as contributing to the student’s dissertation. The research work must be performed under the direct supervision of the student’s advisor, if on campus, or with adequate liaison, if off campus. Special circumstances such as internal employment for more than half time as a teaching or research assistant, or as another type of university employee, must have advance approval on an individual basis by petition to the Graduate Division of the School of Education. The student, with the help of the advisory committee, must file in the Graduate Division office a residence plan congruent with School of Education requirements before the beginning of the formal residence period. This plan may be filed as a part of the overall program plan. Because residence is not merely a requirement measured in hours of enrollment or of credit in courses toward a degree, the plan may include other academic and professional activities appropriate to the field of study.

Note: Hourly enrollment requirements must be met through courses at the program’s home campus, and if appropriate internal employment is not involved, at least 9 hours must be in regularly scheduled courses.

3. Program Area
In applying for doctoral study, the student specifies a program area in which formal classes and research work are to be done and in which she or he expects to become a scholar. A minimum of 36 credit hours is required in the major area, excluding credits used to fulfill research skills and the dissertation requirements. The doctoral core requirement (EDUC 800) may be included as part of the major if it is consistent with the student’s area of study and if doing so is supported by the student’s department and doctoral committee. Fifty-percent of the student’s major must be 800-level or above (18 credit hours). The program must include at least 6 credit hours outside of the student’s home department, not including courses required to fulfill the student’s research skills component or the doctoral core (EDUC 800).
Note: Course work completed at KU or at another institution as part of a previous graduate degree, cannot be used to meet the credit hour requirements for this degree. Upon admission to doctoral study, students who have not completed a research and evaluation methods course for the education master’s degree must take the course, e.g. PRE 715, during the first doctoral enrollment. The course taken to fulfill this requirement, whether taken at KU or at another institution, does not count toward any doctoral requirements.

4. Core Requirement
All students are required to complete EDUC 800: Education as a Field of Scholarship, in their first year of doctoral enrollment.

5. Teaching Experience
In addition to the requirements above, the student must satisfactorily complete at least 1 semester of supervised college teaching experience under the direction of a KU faculty member. This may be completed during the semester in which the student takes the comprehensive examination, but ordinarily it should be completed before admission to the comprehensive examination.

6. Research Skills
Before being admitted to the comprehensive examination, the student must have completed the research skills requirements established for the degree. Specific research skills requirements vary with department and program, but all reflect the expectation of a significant research skills component distinct from the dissertation but strongly supportive of it. The Ph.D. research skills requirement includes completion of at least 12 graduate hours relevant to the aspirant’s research: statistics, measurement and assessment, qualitative methods, historical and philosophical methods, or foreign language (a reading knowledge in one foreign language is equivalent to 6 hours of credit). Up to 6 hours, excluding credit hours for the required master’s course in research methods and evaluation, whether taken at KU or elsewhere, may be waived using prior B-level or higher graduate course work. A statement concerning specific research skills should be secured from the student’s major department. At least 9 of the 12 credit hours must be 800 level or above. The 12 credit hours cannot include PRE 715 or its program equivalent.

When the student has met the requirements for research skills, the committee chair must report this to the Graduate Division on the appropriate form, certifying that the student is prepared to proceed to the comprehensive oral examination. If a program requires research skills that are tested separately rather than integrally with the program, the completion of each requirement should be reported immediately to the Graduate Division so that it may be recorded on the student’s permanent record.

Some commonly used skills are listed under Doctoral Degree Requirements, Doctor of Philosophy, Research Skills and Responsible Scholarship in the Graduate Studies section of the online catalog.

Responsible Conduct of Research: All students must satisfy departmental and university requirements regarding the responsible conduct of research. In order to meet this requirement, students are required to complete EDUC 800 Education as a Field of Scholarship, in their first years of doctorate enrollment.

7. Comprehensive Examination
When a Ph.D. aspirant has completed the major portion of the course work at a satisfactory level and has completed the research skills requirement and all other departmental requirements prerequisite to the comprehensive examination, the department asks the School of Education Graduate Division office to schedule the comprehensive examination. This request must be made at least 2 weeks before the date of the written portion of the examination. Students must be enrolled when they take the exam. The examining committee must consist of at least 5 members (usually including the advisory committee). All must be graduate faculty, and 3 of the 5 must be regular faculty from the student’s home department.

The comprehensive examination consists of both written and oral parts and covers the major area pursued by the student, as well as the minor area, if one is required by the student’s program. The student passes the comprehensive examination if a majority of the official examining committee (including the chair) approves the student’s performance. The grade on this examination is Honors, Satisfactory, or Unsatisfactory. An aspirant who receives a grade of Unsatisfactory may be allowed, upon the recommendation of the department, to repeat it, but it may not be taken more than 3 times. The aspirant may not repeat the oral examination until at least 90 days have elapsed since the last unsuccessful attempt. Note: Students in Ph.D. education programs must pass both written and oral components of the comprehensive examination. Satisfactory performance on the written component must be attained before the oral component may be attempted. To fail either component is to fail the examination. All 5 members of the student’s comprehensive examination committee are involved in the evaluation process. The written component of the comprehensive examination, like the oral, focuses on advanced knowledge in the major and any appropriate related areas. To pass, the student must be evaluated as having responded satisfactorily to questions in the major areas. If a student fails any portion of the written comprehensive component, a failure of the examination is recorded. The examining committee determines if the entire written component of the examination, or only the failed portion(s), must be retaken. The entire written component lasts a minimum of 16 hours. If a student passes the written component but fails the oral, the examining committee determines if both components or only the oral must be repeated, after the minimum 90-day interim period.

8. Dissertation Committee and Proposal
Doctoral aspirants may begin work on the dissertation after they complete the equivalent of one full-time semester of doctoral study in regular student status and may use their research practicum experience in preparation for the dissertation. However, students may first enroll in dissertation credit hours only during the semester in which they take their comprehensive examinations. Dissertation hours taken during that semester count toward the minimum of 18 hours of dissertation credit only if the examinations are passed during that same semester.

Upon passing the comprehensive examination, the aspirant becomes a candidate for the Ph.D. The Graduate Division, using the recommendations of the candidate’s department, designates the dissertation committee at this time. This committee consists of at least 3 members (usually including the advisory committee) and may include members from outside the university. All committee members are to be members of the Graduate Faculty. A committee member from outside the university becomes an Ad Hoc member of the Graduate Faculty.

The dissertation proposal must be read by all members of the dissertation committee. One copy of the approved dissertation proposal, signed by all members of the dissertation committee, must be submitted (with the appropriate form) to the School of Education Graduate Division office.

9. Continuous Enrollment
After passing the comprehensive examination, the candidate must be continuously enrolled, including summer sessions, until the degree is completed. A student must be continuously enrolled in accordance with the following schedule: Until the degree is completed or until 18 post-comprehensive hours have been completed (whichever comes first), the student must enroll for at least 6 hours a semester and 3 hours a summer session. Students who have not completed the degree after completing 18 hours of post-comprehensive enrollment must continue to enroll for the amount of credit that best reflects their demands on faculty time and university resources each semester and each summer session until they pass the final oral examination.

Post-comprehensive enrollment may include enrollment during the semester or summer session in which the comprehensive examination has been passed. Students may enroll for dissertation hours as well as other courses when the examination is taken. Students who do not pass the examination cannot apply dissertation hours to degree requirements. Under certain conditions, the candidate may petition the School of Education Graduate Division for a leave of absence during the period between the comprehensive examination and the final oral examination.

10. Dissertation

The candidate must present a dissertation showing the results of original research. The dissertation for the Ph.D. considers applied or basic concerns and results in conclusions that have broad theoretical implications. Various styles and formats for theses and dissertations are acceptable. The format and style of a student’s thesis or dissertation is left to the discretion of the student and the advisor, but format and style options may be constrained or dictated by Graduate Studies policies. The dissertation is prepared under the direction of the dissertation committee. The norm for dissertation enrollment is about 24 credit hours. The minimum number of dissertation hours in the Ph.D. program is 18. Instructions regarding the proper form of the final document may be obtained from the School of Education Graduate Division office.

11. Final Oral Examination

When the dissertation has been tentatively accepted by the dissertation committee, the chair of the dissertation committee may request the School of Education Graduate Division office to schedule the final oral examination. This request must be made at least two weeks before the desired examination date. At least five months must have elapsed between the successful completion of the comprehensive examination and the date of the final oral examination.

The examining committee must consist of at least five members (usually including the advisory committee). All must be graduate faculty, and three of the five must be regular faculty from the students home department.

The final examination must be partly oral and may be wholly so. The examination covers the dissertation and the candidate’s concentration area and, if appropriate, minor area. The candidate passes the final examination if a majority of the official examining committee members (including the chair) approves the candidate’s performance. When the final oral examination has been passed, the dissertation committee reports a grade of Honors, Satisfactory, or Unsatisfactory. Candidates who fail the final oral examination may be allowed to repeat it upon the recommendation of the dissertation committee.

12. Dissertation Copies

When the final oral examination has been passed and the dissertation has been signed by the members of the dissertation committee, a title page and acceptance page with original signatures and ETD Release form are to be delivered to the Graduate Division so that completion of degree requirements may be officially certified.

Licensure: Added Endorsements

At least 8 hours of the required course work must be completed at KU if it is to be the recommending institution for adding endorsements to the teaching license. For information about adding endorsements, contact the School of Education at 785-864-3726.

University Career Center

The University Career Center (http://www.kucareerhawk.com/s/762/start.aspx), 110 Burge Union, 785-864-3624, provides career counseling and services for all KU students, including students in the School of Education.

Curriculum and Teaching Courses

C&T 100. Introduction to the Education Profession. 3 Hours.

This course is designed to acquaint students with the profession of education by helping to increase an awareness of the role and characteristics of an effective teacher. Large and small group activities and assignments are dispersed throughout the semester to facilitate these outcomes. Students will be involved in observation of and participation with teachers and pupils in public school classrooms, which complement course activities and assignments. Students will work with a mentor pre-service teacher from the KU School of Education to provide discussions about each of the course objectives. CT 100 is a pre-professional course. Successful completion of the course does not guarantee eventual admission to the School of Education’s Teacher Education Program. LEC.

C&T 200. Making Connections Between Schools and Community. 3 Hours.

This course is designed to increase the students’ awareness of learning in the classroom and to familiarize them with the role of the school and the community. Institutions and resources that support children and families will be addressed through large and small group sessions and field experiences. Emphasis is given to the diverse nature of schools, communities, and their populations. In addition, the course will acquaint students with the School of Education programs, admissions procedures, and curriculum offerings. Successful completion of this course does not guarantee eventual admission of the School of Education’s Teacher Education Program. Prerequisite: Successful completion of CT 100. LEC.

C&T 235. Multicultural Education. 3 Hours. AE41.

The course is designed to provide the student with an awareness of and sensitivity of the concept of multicultural education. Topics related to the rationale for and processes of providing a multicultural perspective within the schools will be addressed. Field experiences will be structured to provide students with opportunities to observe the diversity within the educational setting. LEC.

C&T 322. Curriculum and the Learner in the Elementary School. 3 Hours.

Building on the experiences in CT 100 and CT 200, this course will focus on the learner in the elementary setting. Learning occurs as a result of interaction among learners, teacher and subject matter in the classroom within a school in a community. The impact of the interactions of these students of learning of young children is studied in this course. Emphasis is given to the factors that influence curriculum decision-making, and methods that are considered in elementary grades curriculum and how it
C&T 324. Curriculum Learner in the Middle School and High School. 3 Hours.
Building on experiences in CT 100 and CT 200, this course will focus on the learner within the high school setting. Learning occurs in a classroom within a school in a community, and the nature and structure of these settings as well as their impact on learning is studied in this course. Emphasis is given to the curriculum, the factors that influence the curriculum, and the ways that goals for high school students are reflected in the high school curriculum. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 330. Instructional Approaches for ESOL Learners in the Elementary/Early Childhood Classroom. 3 Hours.
Teaching English as a Second or Additional Language/Bilingual Education is designed to provide preservice elementary teachers with an understanding of the history and methodology of teaching English to speakers of other languages, both as a foreign language and as an additional language within American English settings. Future ESL/EFL/EB teachers will be prepared to develop the investigative, decision-making, and reflective teaching skills needed to work with English language learners of elementary age, to impart language instruction in the appropriate context. Emphasis is placed on developing a clear understanding of who English language learners are; what programs and services are or should be available to the ESOLs/EBs; the critical pedagogical aspects of teaching ESL/EFL/EB; and the preparation of teaching materials for classroom use. Prerequisite: Admission to the teacher education program. LEC.

C&T 331. Instructional Approaches for ESOL Learners in the Middle/Secondary Classroom. 3 Hours.
This course is designed to provide preservice middle/secondary discipline specific teachers with an understanding of the history and methodology of teaching English to speakers of other languages, both as a foreign language and as an additional language within American English settings. Future ESL/EFL/EB teachers will be prepared to develop the investigative, decision-making, and reflective teaching skills needed to work with English language learners of all ages, and to impart language instruction in the appropriate context. Emphasis is placed on developing a clear understanding of who English language learners are; what programs and services are or should be available to the ESOLs/EBs; the critical pedagogical aspects of teaching ESL/EFL/EB; and the preparation of teaching materials for classroom use. Prerequisite: Admission to the teacher education program. LEC.

C&T 335. Curriculum and Instruction in Middle and Secondary History and Government Classrooms. 3 Hours.
The purpose of this course is to help prepare students to teach social studies in the middle and secondary grades. Prerequisite: Admission to the teacher education program. LEC.

C&T 344. Children’s Literature in the Elementary School. 2 Hours.
A study of literature (poetry, folk literature, fiction, and nonfiction) appropriate for elementary school children with a focus on contemporary children’s books. Emphasis will be on selection of literature based on child development, literary quality, curriculum, and pluralism and the engagement of children in literature experiences from the interactive, reader response, and critical perspectives. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 347. Social Studies in the Elementary Classroom. 3 Hours.
A study of curricula, instructional strategies, and classroom organization for social studies education K-6. Emphasis is placed on the effective implementation of social studies programs in classroom settings.

C&T 349. Science in the Elementary Classroom. 3 Hours.
In this course, you will develop an understanding of how children learn science and why science education is important. You will examine effective approaches to teaching, instructional materials, and student assessment and will learn how to plan and implement a science unit. The course will emphasize a guided-inquiry approach to science instruction appropriate for the abilities and interests of children in grades K-6. Prerequisite: Admission to the School of Education.

C&T 350. Instructional Approaches for ESOL Learners in the Elementary/Early Childhood Classroom. 3 Hours.
This course is a study of the curriculum, instructional strategies, and classroom organization for mathematics in grades K-6. Emphasis is placed on the effective implementation of mathematics programs in classroom settings. Prerequisite: Admission to the School of Education.

C&T 351. Mathematics for the Elementary Classroom. 3 Hours.
This course is designed to provide preservice middle/secondary discipline specific teachers with an understanding of the history and methodology of teaching mathematics in grades K-6. Emphasis is delivered. Prerequisite: Admission to the School of Education in elementary, middle, or secondary, or the Unified Early Childhood programs.

C&T 352. Literacy Instruction in the Primary Grades (K-3). 3 Hours.
This course is intended to develop the attitudes, knowledge, and skills necessary to effectively instruct primary grades (K-3) children through the development of literacy skills: reading, writing, listening, speaking, and handwriting. The major goals of this course are for the prospective teacher to develop an understanding of literacy development of the primary-grades child, current literacy theories, and the ability to work with a number of approaches to promote literacy learning and a positive attitude toward literacy in all primary-grades students who may have different needs due to language, culture, learning challenges, and/or differing stages of development. This course is to be taken concurrently with CT 353, Literacy Practicum in the Primary Grades. Prerequisite: Admission to the Teacher Education Program.

C&T 353. Literacy Practicum in the Primary Grades. 1 Hour.
This supervised practicum is intended to allow the pre-service teacher to apply the knowledge gained in CT 352, Literacy Instruction in the primary grades (K-3), by teaching children in the primary grades. To be taken concurrently with CT 352 Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 354. Literacy Instruction in the Intermediate Grades. 2 Hours.
This course is intended to develop the attitudes, knowledge, and skills necessary to effectively instruct intermediate-grades children (4-6) through the development of literacy skills: reading, writing, listening, speaking, and spelling. The major goals of this course are for the prospective teacher to develop an understanding of literacy development of the intermediate-grades child, current literacy theories, and the ability to work with a number of approaches to promote literacy learning and a positive attitude toward literacy in all intermediate-grades students who may have different needs due to language, culture, learning challenges, and/or differing stages of development. Prerequisite: Admission to the Teacher Education Program. This course is to be taken concurrently with CT 355, Literacy Practicum in the Intermediate Grades. LEC.

C&T 355. Literacy Practicum in the Intermediate Grades (4-6). 1 Hour.
This supervised practicum is intended to allow the preservice teacher to apply the knowledge gained in CT 354, Literacy Instruction in the intermediate grades (4-6), by teaching children in the intermediate grades. To be taken concurrently with CT 354. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 359. Basic Processes of Reading. 1 Hour.
An introduction to reading in relation to specific areas of art, music and health and physical education. Focus on specialized vocabulary and literature related to each area. Introduction of specific strategies to teach vocabulary and comprehension and to integrated units of study.
Prerequisite: Admission to certification program in music education, art education, health education, or physical education. LEC.

C&T 360. Knowing and Learning in Mathematics and Science. 3 Hours.
This course focuses on issues of what it means to learn and know science and mathematics. What are the standards for knowing we will use? How is knowing and learning structured and how does what we know change and develop? For the science and mathematics educator, what are the tensions between general, cross-disciplinary characterizations of knowing (e.g., intelligence) and the specifics of coming to understand powerful ideas in mathematics and science? What are the links between knowing and developing in learning theory, and the content and evolution of scientific ideas. Also, current issues and tensions in education will be discussed, especially as it relates to mathematics and science instruction. LEC.

C&T 366. Classroom Interactions in Mathematics and Science. 3 Hours.
To make prospective teachers aware of multiple models of teaching (including direct instruction, inquiry teaching and use of small groups); the advantages, disadvantages and uses of each; and what each model requires of teachers. To allow prospective teachers to explore ways of probing student understanding through authentic assessment, evaluating student understanding through student artifacts, and enhancing student understanding through lesson plans built around models of how people learn. To make prospective teachers aware of equity and diversity issues in classroom teaching and ways of ensuring that all students have an opportunity to learn. To make students aware of the proficiencies for licensure recognized by UKanTeach and Kansas State Board of Education and facilitate students' demonstration and documentation of these through their development of a professional portfolio. To develop students' capacity to identify and evaluate best teaching practices as presented in research literature. Prerequisite: CT 360. LEC.

C&T 420. Teaching Kansas Government and Contemporary Public Policy Issues: ___. 3 Hours.
A study of the constitution, organization, functions, and processes of Kansas government, of contemporary public policy issues with local, state and national implications, and of strategies for teaching these in middle and secondary classrooms. Prerequisite: Admission to the School of Education and POLS 110. LEC.

C&T 421. Economics for Elementary Teachers. 3 Hours.
The focus of this course is to introduce and develop understanding of economic concepts and principles in those preparing to teach elementary education. This course presents students primarily with basic economic content and, secondarily, with information on developmentally appropriate economics for elementary age students. Emphasis will be placed on micro and macroeconomic concepts, including the economic problem, resources, scarcity, economic decision-making, opportunity cost, economic systems, price, exchange and money, markets, supply and demand, production, market failures and the role of government, and international trade. Open only to School of Education students enrolled in the elementary education program. LEC.

C&T 422. Teaching Economics and Secondary Social Studies. 2 Hours.
The purpose of the course is to prepare secondary social studies education students to teach the major economic concepts, issues and systems in the United States and other nations in preparation for teacher licensure in the State of Kansas. Prerequisite: Admission to the Secondary History and Government teacher education licensure program. LEC.

C&T 430. Teaching Literature for Young Adults. 3 Hours.
Teaching literature (novel, short story, poetry, drama, nonfiction) suitable for students in the middle school, the junior high school, and the senior high school. Ethnic literature, censorship, bibliographies, and other relevant sources of information about books for young adults will be studied. Prerequisite: Admission to the School of Education. LEC.

C&T 441. Teaching Social Studies in the Middle/Secondary Schools. 3 Hours.
Study of curriculum development and instructional strategies appropriate for teaching social studies in grades 5-12. Prerequisite: CT 323 or CT 324 or permission of instructor. LEC.

C&T 448. Reading and Writing Across the Curriculum. 3 Hours.
Content area teachers do far more than impart information to students. They play an important role in guiding middle/secondary students as they use reading and writing as tools for learning. This course includes an overview of the state and national reading and writing scores of adolescents. Students will then be introduced to the basic processes or ways in which individuals may learn to read and write. The course continues with a focus on the instructional strategies and materials that promote the development of reading and writing in the context of teaching new information. Additionally, the course emphasizes the informal methods educators can use, on an on-going basis, to diagnose their students ability to comprehend content material. Finally, appropriate fix-up strategies will be modeled. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 460. Project Based Instruction in Mathematics and Science. 3 Hours.
This course will have three essential components. The first will be a theory driven perspective accounting for what we know of how people learn and how project-based instruction may be our best choice for bridging the gap between theory and practice. The second component will be a technological component that will assist the enrolled students in developing their own project-based unit. The third component will be a field component consisting of two parts: 1) observation of well-implemented project-based instruction in local schools and 2) implementation of project-based instruction with area high school students on a study trip to Flint Hills. Prerequisite: CT 360. LEC.

C&T 489. Advanced Teaching Practicum. 1 Hour.
This supervised practicum is intended to allow the pre-service teacher to apply knowledge gained in SPED 507; CT 448, ELPS 537; and CT 540, CT 541, CT 542, CT 543 and CT 544: Advanced (Content Area) Methods by teaching children in the middle/secondary grades. To be taken concurrently with SPED 507; CT 448, ELPS 537; and CT 540, CT 541, CT 542, CT 543 and CT 544: Advanced (Content Area) Methods. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 490. Student Teaching. 6 Hours.
A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Successful completion of fall practicum experiences and demonstration of appropriate professional dispositions. LEC.

C&T 491. TESOL Practicum for Kansas State Endorsement. 3 Hours.
The TESOL Practicum allows individuals to gain supervised experience in Teaching English to Speakers of Other Languages (TESOL) for a professional KSDE ESOL endorsement and advancement. Prerequisite: Completion of all TESOL endorsement courses. LEC.

C&T 494. Internship. 6 Hours.
A supervised internship experience leading to initial certification. The student assumes the total professional role as a teacher in an approved school setting, with level and subject area to be selected according to
the teaching field. Prerequisite: Successful completion of all practicum experiences and demonstration of appropriate professional dispositions. LEC.

C&T 495. Seminar: Developing the Teaching Portfolio. 3 Hours. This course serves to instruct students in the research, teaching, and writing components of developing a teaching portfolio. The seminar will provide a forum for discussion and deeper exploration into topics and issues related to working in the school setting, teaching, and developing a professional teaching philosophy. Course is graded on a satisfactory/fail basis. Prerequisite: Enrollment in Student Teaching or Internship during the Spring semester. LEC.

C&T 497. Independent Study in: ______. 1-2 Hours. Only one enrollment permitted each semester. A maximum of four hours will apply toward the bachelor’s degree. Prerequisite: Recommendation of advisor and consent of instructor. IND.

C&T 499. Bachelor’s Project. 4-6 Hours. A formal report of some aspect of the field experience that relates formal learning and in situ experience to program planning, implementation, and evaluation. Topic will be selected in consultation with the project advisor. Prerequisite: CT490 and CT 491 (CT 491 may be taken concurrently). IND.

C&T 500. Student Teaching in: ______. 1-6 Hours. A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: Admission to the Student Teaching program. FLD.

C&T 501. Student Teaching Practicum in: ______. 1-6 Hours. A supervised classroom teaching experience under the direction of an experienced teacher and in close relationship with a university supervisor. Prerequisite: Admission to the Graduate Certification Program and approval of advisor. FLD.

C&T 503. International Perspectives in Primary and Secondary Education. 3 Hours. This course is for an advanced undergraduate or graduate student seeking to gain experience in the preparation of resource materials for international education environments. The course is designed to provide focused study of curriculum development and instructional strategies appropriate for teaching in middle/secondary classrooms. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 509. Special Course: ______. 1-5 Hours. AE61. A special course of study to meet current needs of education students, primarily for undergraduates. LEC.

C&T 510. Curriculum and Instruction in Middle and Secondary Science Classrooms. 3 Hours. A study of philosophy, objectives, curriculum, instructional strategies, and evaluation in teaching foreign language at the K-12 levels. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 530. Curriculum and Instruction in Foreign Language Classrooms. 3 Hours. A study of philosophy, objectives, curriculum, instructional strategies, and evaluation in teaching foreign language at the K-12 levels. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 533. Curriculum and Instruction in Middle & Secondary English/Language Classrooms. 3 Hours. A study of philosophy, objectives, curriculum, instructional strategies, and evaluation in teaching English/Language Arts in grades 5-12. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 534. Curriculum and Instruction in Middle and Secondary Schools. 3 Hours. A study of philosophy, objectives, curriculum, instructional strategies, and evaluation in teaching English/Language Arts in grades 5-12. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 536. Special Course: ______. 1-5 Hours. AE61. A special course of study to meet current needs of education students, primarily for undergraduates. LEC.

C&T 537. Curriculum and Instruction in Middle and Secondary Science Classrooms. 3 Hours. The purpose of this course is to help you prepare to teach science in the middle and secondary grades. The instructor designed the class sessions and learning tasks to enable you to make progress toward achieving the Kansas Science Teaching Standards and Kansas Professional Education Standards. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 539. Curriculum and Instruction in Middle and Secondary Mathematics Classrooms. 3 Hours. This course is designed to provide focused study of curriculum development and instructional strategies appropriate for teaching mathematics in grades 5-12. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 540. Advanced Practices in Teaching English in the Middle and Secondary Schools. 3 Hours. The course is designed to provide continued study of curriculum development and instructional strategies appropriate for teaching English/Language Arts in grades 5-12 and as a final readiness for the undergraduate student teaching experience. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 541. Advanced Practices in Teaching Social Studies in Middle/Secondary Schools. 3 Hours. Advanced study of curriculum development and instructional strategies appropriate for teaching social studies in grades 6-12 and application of learning in a middle/secondary classroom. Prerequisite: CT 335; SPED 326 and, CT 324 LEC.

C&T 542. Advanced Practices in Teaching Science in the Middle and Secondary Schools. 3 Hours. This course is designed as a final readiness for the semester-long student teaching experience and the Kansas Performance Teaching Portfolio to be completed during that student teaching experience. The course deals with the analysis, adaptation, and application of varied instructional designs to implement curricula in specific science areas in grades 5-12. Prerequisite: Admission to the middle-level licensure program in science education at the undergraduate level or one of the graduate licensure programs in middle/secondary science. Successful completion of CT 537. LEC.

C&T 543. Advanced Practices in Teaching Mathematics in the Middle and Secondary Schools. 3 Hours. The course is designed to provide continued study of curriculum development and instructional strategies appropriate for teaching mathematics in grades 5-12 and as a final readiness for the undergraduate of GLP student teaching experience. Prerequisite: Admission to the middle-level licensure program in mathematics education at the undergraduate level or the GLP in middle or secondary mathematics. Successful completion of CT 539. LEC.

C&T 544. Advanced Practices: Siting Foreign Language Content, Dispositions, Skills and Tools Language Classroom. 3 Hours. This is an advanced Foreign Language methods course that focuses on the critical importance of the socio-linguistic environment of foreign language classrooms. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 598. Special Course: ______. 1-5 Hours. AE61. A special course of study to meet current needs of education students, primarily for undergraduates. LEC.

C&T 620. Teaching English as a Second Language/Bilingual Education. 3 Hours. The purpose of this course is to study the objectives and methods of ESL/Bilingual education. Students will examine methods and techniques of teaching: listening, speaking, reading, and writing in the ESL/Bilingual Education settings. The course will also emphasize the importance of culture in second language teaching, and self-evaluation of teaching
and instructional materials. Undergraduate course that will meet with CT 820 Teaching English as a Second Language/Bilingual Education. Prerequisite: Admission to the School of Education. LEC.

CT 621. Diagnosis and Remediation in Second Language Education. 3 Hours.
This course provides an overview of diagnostic techniques and instruments used to identify and remediate specific learning difficulties associated with normal second language development in the area of listening, speaking, reading, and writing. The course includes a review of research concerning assessment as it relates to error analysis in the second language context. Prerequisite: Admission to the School of Education. LEC.

CT 622. Second Language Acquisition. 3 Hours.
This course provides an intensive review of the theory and research base of second language acquisition. Particular attention is given to the influence of research trends in linguistics and psychology on second language education theory and practice. Current trends in second language education are examined in light of the historical theory base. Prerequisite: Admission to the School of Education. LEC.

CT 630. Understanding the Nature of Talent in Children and Youth. 3 Hours.
This course addresses the social, cognitive, affective, and other developmental aspects of talent as manifested in children and youth with high potential. The course provides an opportunity to examine characteristics, strengths, and needs of children and their families. The course focuses on the foundational aspects of gifted/talented education: educational and political history of the field, etiology of extraordinary potential, and identification and assessment techniques, instruments, and systems. Included in the course are relevant research, policies and regulations, services, and information resources. Prerequisite: SPED 325, SPED 425, SPED 431, SPED 725 or equivalent. LEC.

CT 631. Teaching for Talent Development. 3 Hours.
The course introduces key theories and basic principles of curriculum development and introduction for students with high potential and/or high achievement. Frameworks and models for modifying general education content, cognitive processes, and learning outcomes are applied to enhancing talent development. The course addresses affective considerations, peer relations, and working with families. Prerequisite: CT 630 or CT 730. LEC.

CT 649. An International Teaching Experience. 3 Hours.
This study abroad focuses on professional growth in teaching and understanding education based on an international experience. Students learn about curriculum and teaching from an international perspective, and engage in professional discussions with Italian teachers and administrators. Students engage in culturally responsive teaching in preschool-secondary settings, they participate in family and community activities/events, and they visit renowned museums and cities. Prerequisite: Application through the Office of Study Abroad and interview with the director. LEC.

CT 702. Alignment of Curriculum, Instruction, and Assessment. 3 Hours.
The course focuses on standards-based education reform and the relation between standards, curricula, assessments and instruction. Since the inception of No Child Left Behind in 2001, many classroom teachers have felt constricted by standards-based practices in the classroom. A significant emphasis of the course will be on the implications of high-stakes accountability. This course will explore the historical foundations of the standards movement as well as current research on connecting standards to instructional practices. The course also will explore ways in which teachers can be accountable to the standards without losing creativity in their individual classrooms. LEC.

CT 706. Social Studies in the Middle School. 3 Hours.
The purpose of this course is to offer preservice and practicing middle grades educators the following: (1) an overview of the historical and philosophical antecedents of social studies education; (2) a brief review of the developmental characteristics of early adolescence; (3) the specifics of a citizenship education program specifically designed for middle grades social studies; and (4) a range of time-tested ideas for challenging young adolescents with academic experiences that address their unique developmental profile and capture their imaginations for active, responsible citizenship. LEC.

CT 707. Project Based Instruction. 3 Hours.
This course will emphasize exploring, designing, and evaluating materials and pedagogy to work toward the design of project-based curriculum and instruction. Topics focus on the principles of project-based instruction as well as multiple models for its use in the classroom. LEC.

CT 708. Understanding Research in Education. 3 Hours.
This course introduces the concepts and skills involved in understanding and analyzing research in education and related areas. The course provides an overview of basic, general knowledge of various research methodologies. Students should expect to study much of this material in greater depth through additional course work before being fully prepared to conduct independent research. However, this course should enhance their ability to locate, read, comprehend, and critically analyze research articles and reports. Topics in the course include quantitative and qualitative methods and designs, historical and descriptive research, and program evaluation. (This course fulfills the requirement of a research methods course in the first 12 hours of graduate study.) LEC.

CT 709. Foundations of Curriculum and Instruction. 3 Hours.
Basic concepts and processes of curriculum and instruction, including theories, planning models, resources for decision-making, current trends, research, and proposals for improvement of curriculum and instruction. LEC.

CT 710. Writing, Language, and Learning. 3 Hours.
This course will situate issues about writing and learning in the context of more general inquiry about language and learning. We will read research related to classroom discourse and the teaching of writing in secondary classrooms. We will then connect this body of research to the teaching of English in middle/secondary classrooms. LEC.

CT 711. Teaching Young Adult Literature (Grades 7-12). 3 Hours.
A study of the characteristics of adolescents with respect to their interest and reading habits; criteria for choosing books for junior and senior high school in-class and out-of-class reading; selection of materials; methods for helping poor readers; literary discrimination and appreciation; censorship; ethnic literature; techniques for presenting literary selection in class. Wide reading among best of current and classical literature. LEC.

CT 730. Understanding Talent. 3 Hours.
This course addresses the social, cognitive, affective, and other developmental aspects of talent as manifested in children and youth with high potential. The course provides an opportunity to examine characteristics, strengths, and needs of these children and their families. The course focuses on the foundational aspects of gifted/talented education: educational and political history of the field, etiology of extraordinary potential, and identification and assessment techniques, instruments, and systems. Included in the course are relevant research, policies and regulations, services, and information resources. Prerequisite: SPED 425, SPED 431, SPED 725, or equivalent introductory course on exceptional children and youth. LEC.
C&T 731. Teaching for Talent Development. 3 Hours.
The course introduces key theories and basic principles of curriculum development and introduction for students with high potential and/or high achievement. Frameworks and models for modifying general education content, cognitive processes, and learning outcomes are applied to enhancing talent development. The course addresses affective considerations, peer relations, and working with families. Prerequisite: CT 644 or CT 730 or equivalent course on exceptional children and youth. LEC.

C&T 732. Teaching for Talent in General Education Settings. 3 Hours.
This course is for classroom teachers concerned about meeting the needs of students with high potential in their classrooms. Students will be introduced to various curriculum models and teaching strategies commonly employed in special programs for gifted/talented students. There will be opportunities to apply gifted education models to modify existing curriculum or to develop new curricula which enhances the abilities of all students. Prerequisite: CT 644 or CT 730 or equivalent introductory course on exceptional children and youth. LEC.

C&T 733. Practicum in Gifted and Talented Education. 1-10 Hours.
A course designed to provide experiences for students to work intensively and to teach identified gifted and high potential students in educational settings. Students will develop competencies relative to implementing individual group and individual education plans through a variety of instructional alternatives. Arranged service delivery options are possible. Prerequisite: CT 645, CT 731, CT 732, or equivalent course. FLD.

C&T 734. Integration of Instruction in the Elementary School. 2 Hours.
A study of the rationale for correlation instruction in language arts, reading, math, science, and social studies and practical strategies for integrating instruction throughout the elementary school curriculum. LEC.

C&T 738. Applied Research in the Classroom. 3 Hours.
This course is designed to facilitate the implementation and completion of an action research project during the internship experience. Prerequisite: Successful completion of student teaching. LEC.

C&T 739. Internship in Teaching: ___. 1-15 Hours.
A supervised internship experience leading to initial certification. The student assumes the total professional role as a teacher in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: CT 500 and CT 736 appropriate to the student’s teaching level and area, or equivalent. FLD.

C&T 740. Foundations of Reading: Process, Theory, and Instruction. 3 Hours.
It is the purpose of this course to introduce students to the foundations of the reading process, developmental levels, theory, models, and procedures at the emergent, elementary, and secondary levels. Elements of cultural, linguistic, and ethnic diversity that affect the reading process are included. Students work with research related to the reading process, remediation, and assessment. LEC.

C&T 741. Comprehension and Study Strategies for Use with Multiple Texts. 3 Hours.
It is the purpose of this course to examine research, theory, and practice in reading comprehension. Emphasis is placed on the application of strategies for various text types (expository, narrative, persuasive, and technical) for teaching reading comprehension and study skills across content areas in the K-12 classrooms. Prerequisite: CT 740 or permission of the instructor. LEC.

C&T 742. Language and Literature in the Reading Program. 3 Hours.
A study of linguistic and literary aspects of reading instruction, focusing on language and cognitive development as they relate to reading. Emphasis will be on approaches for differentiating reading instruction to provide for less proficient to gifted readers, research and issues related to reader response, techniques for assessing children’s reading attitudes and interests, procedures for selecting literature, and strategies for integrating literature into the elementary school reading program. Prerequisite: CT 740 or permission of instructor. LEC.

C&T 743. Writing and Spelling Development and Instruction. 3 Hours.
A study of the research base on writing, spelling, speaking, and listening for teaching the language arts; an overview of development in writing and spelling, the writing and spelling processes and instruction, and strategies for integrating the language arts. Prerequisite: Admission to a masters program within the School of Education, CT 740 or permission of the instructor. LEC.

C&T 744. Teaching Literature to Children. 3 Hours.
An opportunity to survey the broad range of trade books published for children; criteria for book selection; children’s reading interests and tastes; illustrations of children’s books; sources for selecting literature; poetry; the role of children’s literature in today’s elementary curriculum. LEC.

C&T 745. Reading and the English Language Learner. 3 Hours. LEC.

C&T 747. Reading Strategies for Expository Text. 3 Hours.
A study of the need of teaching reading in content areas, factors involved in the reading process, and basic and advanced reading and study skills to be taught. Teachers may concentrate upon the study of ways of teaching reading in one or more of the following: language arts, social studies, sciences, mathematics, art, music, home economics, industrial arts, business education, or physical education. Prerequisite: Admission to the Transition to Teaching Program. LEC.

C&T 748. Reading and Writing Across the Curriculum. 3 Hours.
In CT 748, preserve content teachers, who have had no previous literacy courses, are introduced to the basic processes of reading and to instructional strategies and materials that promote the development of reading, writing, and studying in the context of teaching new information. Additionally, we discuss the ways in which teachers diagnose, in an informal, on-going basis, their students’ abilities to comprehend the material they are teaching. LEC.

C&T 749. An International Teaching Experience. 3 Hours.
This study abroad focuses on professional growth in teaching and understanding education based on an international experience. Students learn about curriculum and teaching from an international perspective, and engage in professional discussions with Italian teachers and administrators. Students engage in culturally responsive teaching in preschool-secondary settings, they participate in family and community activities/events, and they visit renowned museums and cities. Prerequisite: Application through the Office of Study Abroad and interview with the director. LEC.

C&T 750. Connecting Research to Classroom Practice in Elementary Mathematics and Science. 3 Hours.
The primary purpose of this course is to examine current research on issues important to elementary mathematics and science programs. The course will explore issues important to the classroom practices of elementary mathematics and science teachers. Provides a broad background for understanding current issues related to elementary mathematics and science curriculum, instruction, and assessment. LEC.

C&T 752. Teaching Mathematics in the Urban Middle/Secondary School. 3 Hours.
The purpose of this course is to help urban teachers plan, organize, teach, and assess mathematics learning in the middle and secondary grades. The Kansas Teaching Standards (in Professional Education
and in Mathematics Teaching) identify the knowledge and abilities addressed in this course. The instructors designed the class sessions and learning tasks to enable participants to make progress toward achieving the Kansas Teaching Standards. It is the participant’s responsibility to acquire the knowledge and abilities and to demonstrate the progress being made toward meeting the Standards. A mathematics teaching portfolio is the tool used to document progress toward achieving the Standards. Prerequisite: Admission to the Transition to Teaching Program or permission of instructor. LEC.

C&T 753. Teaching Science in the Urban Middle/Secondary School. 3 Hours.
The purpose of this course is to help urban teachers plan, organize, teach, and assess science learning in the middle and secondary grades. The Kansas Teaching Standards (in Professional Education and in Science Teaching) identify the knowledge and abilities addressed in this course. The instructors designed the class sessions and learning tasks to enable participants to make progress toward achieving the Kansas Teaching Standards. It is the participant’s responsibility to acquire the knowledge and abilities and to demonstrate the progress being made toward meeting the Standards. A science teaching portfolio is the tool used to document progress toward achieving the Standards. Prerequisite: Admission to the Transition to Teaching Program or permission of instructor. LEC.

C&T 760. Modern Approaches to Elementary Social Studies. 3 Hours.
A study of the purpose, content, psychology, and materials and methods for teaching the social sciences in the elementary school. Emphasis on principles and procedures for combining the social studies with other areas of the curriculum in broad unit instruction. Prerequisite: Nine hours of Education including educational psychology. LEC.

C&T 762. Modern Approaches to Middle/Secondary Social Studies. 3 Hours.
The purpose of the course is to offer preservice and practicing K-12 social studies educators the following: (1) an overview of theoretical bases for social studies education and of the social studies and discipline specific curriculum standards; (2) a review of the major curricular and extracurricular K-12 social studies programs; (3) strategies for the design, implementation, and evaluation of social studies programs; and (4) experience with the design, implementation, and/or evaluation of a social studies program. Prerequisite: Nine hours of Education including educational psychology. LEC.

C&T 763. Economic Education. 2-3 Hours.
An examination of the concepts, theories, and resource materials utilized in teaching economics in the K-12 curriculum. Particular attention is given to the functional integration of economic concepts into the elementary and secondary social studies curriculum. The use of economic resource material is considered. Participants develop projects for use in their own classrooms. LEC.

C&T 764. Teaching Economics in: _____. 3 Hours.
A critical analysis of the relationship between economics and a designated school subject selected from history, geography, or consumer education; a determination of the economic concepts that can be appropriately integrated into the particular discipline; and a comprehensive search of the particular curriculum area to identify the most effective and efficient points at which the economic concepts can be integrated. Prerequisite: CT 763. LEC.

C&T 765. Teaching with Community, Contemporary, and Primary Resources. 3 Hours.
A practical course designed for grades 4-12 teachers who wish to utilize community-based, mass media, and/or primary resources. The course focuses on the use of community resources such as local historical societies, museums, and government agencies; on the use of mass media such as newspapers, magazines, organizations’ newsletters, television, and film; and on the use of primary resources such as artifacts, documents, recordings, and oral historians. Participants receive sample resources from each of the three areas along with accompanying activities. LEC.

C&T 797. Special Project in: _____. 2 Hours.
Implementation of the curriculum project planned in CT 734 or CT 735; implementation and assessment of the special project will occur during the internship. Prerequisite: CT 734, CT 735, and CT 736. RSH.

C&T 798. Special Course: _____. 1-5 Hours.
A special course of study to meet current needs of education professionals--primarily for graduate students. LEC.

C&T 800. Foundations of Curriculum Development. 3 Hours.
This course is designed for students to gain a functional understanding of the historical, philosophical, political, psychological, and cultural factors which affect the designing and implementation of curriculum at several levels: the individual classroom, the team, the school, the larger administrative unit, the state, and the nation. Prerequisite: CT 709 or permission of instructor. LEC.

C&T 801. Planning for School Improvement. 2-3 Hours.
The course will emphasize the latest research and practice related to school improvement. Students will function as a member of a school improvement team to assimilate and synthesize research and practice into the development, revision, and/or assessment of a school improvement plan for a specific school site. Corequisite: Enrollment in the summer institute on school improvement. LEC.

C&T 802. Curriculum Planning for Educational Settings. 3 Hours.
A focus on organizing and managing curriculum development in educational settings. Such curricular decisions as writing philosophies, setting goals and objectives, selecting and organizing content, and designing and monitoring evaluation procedures will be emphasized. Providing leadership for the collaborative process of curriculum planning in organizational settings will receive attention. Prerequisite: CT 709, admission to Building Principal Certification program, or permission of instructor. LEC.

C&T 803. Differentiating Curriculum and Instruction. 3 Hours.
This course is designed for educators interested in expanding curriculum and instruction to accommodate diverse learners in the classroom, K-12. Topics include: models, methods, and resources for differentiating curriculum and instruction, designing and modifying differentiated curriculum, evaluating student learning, and introducing students, parents and colleagues to differentiation. An evidence-based, practical course for teachers, administrators, and support personnel. Prerequisite: Admission to Graduate School. LEC.

C&T 804. Trends and Issues in Middle Level Education. 3 Hours.
Information from current research, area specialists and exemplary practitioners will be used to extend appropriate teaching strategies and supplement background knowledge on special topics related to social, emotional and physical development as it relates to the curricula and young adolescents. LEC.

C&T 805. Planning Instruction and Instructional Strategies in Urban Settings. 3 Hours.
This course will prepare students to become cognizant of the particular contextual variables that pertain to the urban setting, engage in instructional planning utilizing pertinent instructional strategies for urban classrooms. Students will become familiar with conceptual frameworks appropriate to education in the urban environment, review research
on education in the urban setting, and discuss goals and options for effectively coping with the demands of the urban classroom. FLD.

C&T 806. Instructional Strategies and Models. 3 Hours.
Analysis of models of teaching which represent distinct orientations toward students and how they learn. The application of these models is complemented by the study of research evidence on effective teaching strategies. Prerequisite: CT 709. LEC.

C&T 807. Multicultural Education. 3 Hours.
In order to provide the student with an understanding of multicultural education, the course will examine the effects of such issues as ethnicity in America, the melting pot theory, separatism, cultural pluralism, legal issues, and bilingual education upon the curriculum and instruction in today’s classrooms. It will include an evaluation of materials for bias and stereotypes. Field experiences are a part of this course. LEC.

C&T 808. Qualitative Research: Curriculum Inquiry. 3 Hours.
Curriculum Inquiry provides an opportunity to reflect, explore, understand, and broaden perspectives of curriculum through examining the theories, methodologies, strategies, and design of qualitative research. This course is designed to develop a common understanding of the major elements of qualitative research, while offering each student an opportunity to examine research topics and methods of personal interest, with particular attention to curricular issues. The course also includes practical experience with various modes of data collection and analysis. LEC.

C&T 809. Creative Thinking and Learning. 3 Hours.
This course provides an opportunity to investigate the nature of the creative process in educational settings. The knowledge base for the course builds from foundations of creativity, principles and theories of identifying and enhancing creative production, and affective learner variables. The course blends classic and contemporary works in creativity, and features the application of theories and models of the origins and development of creativity to promoting creative thinking and learning among children, youth and adults. Participants learn about, apply, and adapt techniques for defining and identifying creative potential and for encouraging creative thinking in educational settings. Prerequisite: Admission to graduate school. LEC.

C&T 810. Issues in Teaching Language Arts. 3 Hours.
A study of present curricula in junior and senior high school English and speech; current thinking in grammar and usage; language development in oral and written communication; problems of teaching reading and literature in the junior and senior high school; construction and reorganization of language arts courses. Students will be permitted to make an intensive study of an individual problem relating to more effective instruction in the language arts. LEC.

C&T 820. Teaching English as a Second Language/Bilingual Education. 3 Hours.
The purpose of this course is to study the objectives and methods of ESL/Bilingual education. Students will examine methods and techniques of teaching: listening, speaking, reading, and writing in the ESL/Bilingual Education settings. The course will also emphasize the importance of culture in second language teaching, and self-evaluation of teaching and instructional materials. Prerequisite or Corequisite: CT 709. LEC.

C&T 821. Diagnosis and Remediation in Second Language Education. 3 Hours.
This course provides an overview of diagnostic techniques and instruments used to identify and remediate specific learning difficulties associated with normal second language development in the area of listening, speaking, reading, and writing. The course includes a review of research concerning assessment as it relates to error analysis in the second language context. Corequisite: CT 820. LEC.

C&T 822. Second Language Acquisition. 3 Hours.
This course provides an intensive review of the theory and research base of second language acquisition. Particular attention is given to the influence of research trends in linguistics and psychology on second language education theory and practice. Current trends in second language education are examined in light of the historical theory base. Prerequisite: CT 820. LEC.

C&T 823. Developing Intercultural Awareness in the Second Language Classroom. 3 Hours.
This course includes the study of the interrelationship of language and culture and the use of multicultural training techniques to develop cultural awareness and positive attitudes in the second language classroom. Emphasis is on the integration of culture in the second language curriculum. Prerequisite: CT 820 or CT 803. LEC.

C&T 824. Problems in Second Language Instruction. 3 Hours.
This course presents a study of curricula and instruction in the second language setting at all levels with emphasis on educational research concerning these issues. Particular attention is given to developing competency in locating and utilizing sources of information and to preparing the research document. The course facilitates practical problem solving in the second language learning context. Prerequisite: CT 820. LEC.

C&T 825. Practicum in Teaching English as a Second Language/Bilingual Education. 3 Hours.
This course provides a supervised teaching experience in a setting appropriate to the goals of the prospective ESL/Bilingual teacher: elementary, secondary, or adult. Particular attention is given to lesson planning, classroom management, and the development of self-evaluation techniques. This course will also emphasize structured classroom observation prior to teaching and techniques for developing and maintaining positive working relationships with other professionals in the school setting. Prerequisite: CT 820, CT 821, and CT 822 or CT 824. FLD.

C&T 826. Language Analysis for Language Teachers. 3 Hours.
This course offers pre- and in-service teachers the basic foundations of language analysis necessary for the teaching of second/foreign languages. The course covers basic linguistic topics common to all human languages (grammatical, phonological, and semantic aspects) with the intent to help teachers understand and address common languages problems that students face when learning English as a second/foreign language. LEC.

C&T 827. Teaching Second/Foreign Language Pronunciation. 3 Hours.
The objective of this course is to give prospective language teachers the requisite theoretical and practical background for making decisions concerning pronunciation teaching. This course provides second and foreign language teachers with the necessary knowledge and skills to address the teaching of pronunciation in the foreign language classroom. After a review of theoretical and practical research dealing with universal human speech perception and production, implications for the design of appropriate strategies and lessons to teaching pronunciation, both at the segmental and suprasegmental levels, are addressed. Prerequisite: CT 444, CT 820/CT 822. LEC.

C&T 828. Language and Identity. 3 Hours.
This interdisciplinary seminar explores the interrelationship between language and identity, and the role of language in developing identities of second language learners. LEC.
C&T 830. Classroom Applications of Assessment Information. 1 Hour.
The primary purpose of this course is to examine classroom-based practices for identifying intellectual and creative potential in school-aged children and youth, and to apply that information to classroom instruction as well as to individual education planning. Particular attention is paid to populations who are traditionally underserved due to language status, ethnicity, socio-economic status, geography, or multiple exceptionality. Parent and student roles are also emphasized. An evidence-based practice course for teachers, administrators, and support personnel. Prerequisite: Admission to Graduate School. LEC.

C&T 831. Personal Dimensions of Talent. 1 Hour.
The course focuses on affective aspects of individuals with high potential. Particular attention is paid to populations who are traditionally underserved due to ethnicity, socio-economic status, geography, or multiple exceptionality. The course focuses on theories, models and methods for understanding and addressing the successful personal development of talented individuals, supporting families, and personal issues linked to high potential. An evidence-based practice course for teachers, administrators, and support personnel. Prerequisite: Admission to Graduate School in Education. LEC.

C&T 840. Emergent Literacy and Beginning Reading. 3 Hours.
A study of emergent literacy through the beginning stages of literacy development. Course content focuses on the history, theory, and research that supports instructional reading practices for children Pre-kindergarten through grade 2. Prerequisite: CT 740, CT 741, or permission of instructor. LEC.

C&T 841. Early Intervention in Reading Practicum. 3 Hours.
A case study approach to the instruction of children in need of early intervention in reading. Requires assessment, instruction, and case reports of tutored children. Prerequisite: CT 740, CT 741, CT 840, or permission of instructor. FLD.

C&T 842. Supporting Striving Readers: Adolescent through Adult. 3 Hours.
A study of the characteristics and multiple causes of reading and writing difficulties, principles and procedures for diagnosing and remediating reading difficulties, how to provide individual and group intervention strategies, communicate diagnostic information, and gain awareness of the impact of research on instructional decision-making for students with reading difficulties. Prerequisite: Admission to a masters program within the School of Education, CT 740, CT 741, CT 840, and CT 841, or permission of instructor. LEC.

C&T 843. Supporting Striving Readers Practicum. 3 Hours.
Case study approach to the treatment of pre-adolescent through adults with reading disabilities. Requires diagnostic testing of the learner, compilation of case study reports, and participating in staffing for the purpose of designing remedial reading programs. Students also participate in implementation of remedial programs with pre-adolescent through adults through tutoring in either a clinical setting or a public school setting. Prerequisite: Admission to a masters program within the School of Education, CT 740, CT 741, CT 840, CT 841, CT 842, or permission of instructor. LEC.

C&T 844. The Reading Program: Coordination and Supervision. 3 Hours.
An overview of the role of the reading coordinator/supervisor and that individual’s responsibility for the components of a balanced reading program. Emphasis will be given to assessment of the reading program, strategies for change, improving the reading program, in-service programs, working with other school personnel, providing services, and public relations. Prerequisite: CT 740, CT 741, CT 840, CT 841, CT 842, and CT 843. LEC.

C&T 845. Reading Specialist Internship. 1-2 Hours.
Supervised and directed experiences to develop the necessary instructional and leadership competencies of a reading specialist. Activities will include district and building level needs assessment, data analysis, professional development of teachers and paraprofessionals, and cooperative planning with teachers and administrators around issues of literacy instruction and achievement. Prerequisite: Completion (at the University of Kansas) of course requirements for the Reading Specialist program. The Reading Specialist course requirements may be a part of a graduate degree. FLD.

C&T 850. Seminar in Science and Mathematics Educational Research. 3 Hours.
The primary purpose of this course is to examine literature in science and mathematics education in order to better understand research in these fields from both a historical and contemporary perspective. The process of examining literature in these fields will be used to help understand how to plan, conduct, and evaluate research in science and math education. This course emphasizes both qualitative and quantitative research in science and math education. LEC.

C&T 851. Modern Approaches to Middle/Secondary School Mathematics. 3 Hours.
A study of aspects of curriculum and instruction in middle/secondary school mathematics programs, including research on teaching and learning mathematics. Prerequisite: Teaching experience in middle-level or high school mathematics or permission of instructor. LEC.

C&T 852. Instruction in Mathematics and Science. 3 Hours.
In this course, students will explore a variety of research-based instructional theories, models, and strategies for teaching and learning of mathematics and science. They will apply and evaluate the usage of one instructional strategy in an action research project in their classrooms. Prerequisite: CT 709. LEC.

C&T 853. Connecting Research to Classroom Practice in Middle/Secondary Science. 3 Hours.
This course will explore current research on issues important to middle and high school science teachers so they can use research to support and improve their classroom practice. Prerequisite: Teaching experience in middle level or high school science or permission of instructor. LEC.

C&T 854. Assessment and Evaluation in Science and Mathematics. 3 Hours.
The primary purpose of this course is to examine assessment and evaluation in science and mathematics, including assessment of students, teachers, schools, and educational programs. The course will examine technical characteristics of various assessment methods including both traditional and alternative methods. In addition and alternative methods. In addition, the course will analyze and discuss various controversial issues in assessment such as authentic assessment, and large scale assessment, and large scale assessments, assessment for accountability, and equity issues. LEC.

C&T 855. Curriculum in Science and Mathematics. 3 Hours.
A survey of the concepts and processes that provide the focus of modern science and mathematics curriculum will be central to the course. Students develop a standards-based framework for a school science or mathematics program. The course includes an analysis of national and state recommendations for the reform of science and mathematics education in the context of our state and local educational systems, which is applied by evaluating exemplary instructional materials and activities appropriate for classroom use. Prerequisite: CT 709. LEC.
C&T 856. Practicum in Science Education. 1-3 Hours.
Intensive supervised experience working with improvement of science curriculum and/or instruction in an educational setting. Credit in any one semester may range from one to three hours; and total credit may not exceed three hours. Prerequisite: Two graduate courses in science education and prior consent of practicum supervisor. FLD.

C&T 857. Practicum in Mathematics Education. 1-3 Hours.
Intensive supervised experience working with improvement of mathematics curriculum and/or instruction in an educational setting. Credit in any one semester may range from one to three hours; and total credit may not exceed three hours. Prerequisite: Two graduate courses in mathematics education and prior consent of practicum supervisor. FLD.

C&T 858. Connecting Research to Classroom Practice in Middle/Secondary Mathematics. 3 Hours.
This course will explore current research on issues important to middle and high school mathematics teachers so they can use research to support and improve their classroom practice. Prerequisite: Teaching experience in middle level or high school mathematics or permission of instructor. LEC.

C&T 859. Issues in Mathematics or Science Education: ____. 1-3 Hours.
A study of issues in a particular area of mathematics or science education. The course may be repeated for different topics. Prerequisite: Admission to graduate study. LEC.

C&T 860. Topics in Teaching and Learning Social Studies: ____. 3 Hours.
An examination of current topics and issues from social science perspectives. Special emphasis is given to effective integration of one of the social sciences, such as anthropology, geography, political science, science technology and society, and these topics affect issues of curriculum at both elementary and secondary levels. Students will need to confer with the instructor of record to determine which topic will be the current focus of the course. LEC.

C&T 861. Curriculum and Assessment in Social Studies Programs K-12. 3 Hours.
The purpose of the course is to offer preservice and practicing K-12 social studies educators the following: (1) an overview of theoretical bases for social studies education and of the social studies and discipline specific curriculum standards; (2) a review of the major curricular and extracurricular K-12 social studies programs; (3) strategies for the design, implementation, and evaluation of social studies programs; and (4) experience with the design, implementation, and/or evaluation of a social studies program. LEC.

C&T 862. Trends and Issues in Social Studies Instruction. 3 Hours.
A study of trends and issues relating to, and needed changes in the content, organization, emphasis, resources and equipment, methods, devices and evaluation in the social studies. Consideration of related problems such as achieving meaning and understanding, providing for individual differences, providing motivation, the cooperative assignment and socialized recitation. Students will be permitted to concentrate on those problems of particular interest to them. Prerequisite: Nine hours of Education including educational psychology. LEC.

C&T 863. Curriculum Development in Economic Education. 3 Hours.
Extension and application of economic concepts and theories through integration into the scope and sequence of the school curriculum. The process will include the development and field testing of a project that utilizes appropriate concepts, materials, community resources and techniques for integrating economics into the total curriculum. Prerequisite: CT 763. LEC.

C&T 864. International Issues in the K-12 Classroom. 3 Hours.
An examination of current international topics and issues from an economic education perspective. Special emphasis is given to effective integration of global topics and issues into the curriculum at both elementary and secondary levels. Students survey and analyze economic education resource materials and develop international lessons for use in their own classrooms. This course is offered during summer term, locally, and as a study abroad option. This course has been offered two times previously as TL 798-summer 1993 at the Regents Center and in Great Britain. LEC.

C&T 865. Practicum in Social Science Education. 3 Hours.
Intensive supervised experience working with improvement of social science curriculum and/or instruction in an educational setting. Credit in any one semester may range from one to three hours; and total credit may not exceed three hours. Prerequisite: Two graduate courses in social science education and prior consent of practicum supervisor. FLD.

C&T 866. Master's Thesis. 1-6 Hours.
The thesis. A master's thesis is a formal written account of the comprehensive research conducted by a graduate student. The thesis is an independent study by an individual student under the direction of a faculty advisor. The thesis must be approved by the candidate’s advisor and the department. The thesis must be completed within three years of the student’s initial registration. Prerequisite: Completion of all course work with at least a 3.0 GPA.

C&T 867. Practicum in Social Studies. 1-3 Hours.
Intensive supervised experience working with improvement of social studies curriculum and/or instruction in an educational setting. Credit in any one semester may range from one to three hours; and total credit may not exceed three hours. Prerequisite: Two graduate courses in social studies education and prior consent of practicum supervisor. FLD.

C&T 868. Connecting Research to Classroom Practice in Social Studies. 3 Hours.
The purpose of the course is to explore readings on effective practice and current research on issues important to social studies teachers. Knowledge gained from the exploration of readings will be used to develop a plan and implementation procedures for improving classroom practice. Prerequisite: Teaching experience in social studies education or permission of the instructor. LEC.

C&T 896. Seminar in: ____. 1-4 Hours.
LEC.

C&T 897. Independent Study. 1-4 Hours.
Prerequisite: Consent of advisor and instructor. RSH.

C&T 898. Master's Project. 1-4 Hours.
RSH.

C&T 899. Master's Thesis. 1-6 Hours.
The thesis. A master's thesis is a formal written account of the comprehensive research conducted by a graduate student. The thesis is an independent study by an individual student under the direction of a faculty advisor. The thesis must be approved by the candidate’s advisor and the department. The thesis must be completed within three years of the student’s initial registration. Prerequisite: Completion of all course work with at least a 3.0 GPA.

C&T 900. Current Trends & Issues in Curriculum & Instruction. 3 Hours.
The course, taught as a capstone seminar, will provide a review of current trends and issues in theories, practices, and events within curricular and instructional efforts in American education. Topics studied may include constructivism, connectivism in the digital age, contemporary theories and theorists such as Vygotsky, online instruction and the Internet's potential and growth, the new Cult of Efficiency, stigmatization and standardized testing, and charter schools. Student composition of each class will influence the final syllabus, which may include other topics reflective of student interests and goals. The class is designed for those in the final course phase of their doctoral studies. Students in their first or second semester of their programs will not be encouraged to enroll in the class. LEC.

C&T 901. Contemporary Research of Teaching Effectiveness. 3 Hours.
A review of recent research on the conceptualization, measurement, and improvement of teaching effectiveness. Particular attention is given to the history of efforts to improve teaching, to the reasons why such efforts have often been unsuccessful, and to the recent contributions of the "micro-criteria" approach to the problem. LEC.

C&T 903. Curriculum Supervision. 3 Hours.
An intensive study of the theoretical and research bases for curriculum supervision and improvement. Topics include models and practices in supervision and staff development, skills and instruments used in curriculum assessment, coordination of both human and material resources, and the dynamics of change strategies. LEC.

C&T 904. Philosophical Questions in Curriculum and Teaching. 3 Hours.
This course addresses philosophical questions pertaining to curriculum and teaching across a range of educational contexts. These questions center on epistemology, ethics, and the assumptions underlying
alternative approaches to research in education. Students completing this course should be able to engage in philosophical inquiry and apply relevant philosophical literature and principles to the examination of curriculum and teaching. LEC.

C&T 905. Teacher Education in the U.S.. 2 Hours.
A study of the development, issues, and programs for the preparation of teachers. Open to all regular graduate students. LEC.

C&T 906. Qualitative and Curriculum Inquiry: Analysis and Interpretation. 3 Hours.
Supports novice researchers in extending their understanding of the theoretical frameworks underlying qualitative research, qualitative methodologies, the research process and its relationships with curriculum inquiry. During the course we will discuss various forms of qualitative research methods, approaches to research, and perspectives in methodology relative to curriculum inquiry. We will explore the intertwining of data generation, analysis, and writing. In addition, we will focus on refining data generation techniques, strategies for data analysis, data interpretation, and various forms of reporting/writing. Prior coursework: Introduction to a graduate level qualitative research course or permission from the instructor. Prerequisite: Introduction to a graduate level qualitative research course or permission from the instructor. LEC.

C&T 907. Critical Pedagogies. 3 Hours.
This course examines the theories and practices of several educational orientations that comprise “critical pedagogy.” Students examine the historical roots and evolution of this broad orientation toward education. Recurring themes in the class are relations between knowledge and curriculum, the school and society, and teachers and students. Students completing the course should be able to analyze educational phenomena through a critical theoretical lens. Open to all doctoral students and advanced masters students with instructor permission. LEC.

C&T 910. Research Seminar in English Education. 3 Hours.
This course will focus on both the conduct and findings of research related to English/Language Arts Education. Its purpose will be to foster discussion among students concerning paradigms that have shaped the field of English/Language Arts as well as encourage critique of the ways in which these paradigms are enacted in research. In this course, each student will develop a reading list on a topic of interest related to research in English/Language Arts Education and/or pursue the writing of an individual research proposal. Prerequisite: Admission to master’s or doctoral program in CT, emphasis in English/Language Arts Education. LEC.

C&T 940. Evaluation of Research in Reading. 3 Hours.
LEC.

C&T 944. Diagnosis and Evaluation of Instruction in Higher Education. 2-3 Hours.
The course will focus on (1) a review of the practical and theoretical problems of developing, in institutions of higher education, programs for the diagnosis and/or evaluation of classroom instruction, including use of videotape feedback for diagnosis, and the development of surveys for evaluation for diagnosis of teaching, and (2) the importance of careful administrative and review procedures as the evaluation of teaching becomes more formal and consequential. Three hours of credit will be awarded to those enrolled in the laboratory section of the course. LEC.

C&T 951. Research and Evaluation in Mathematics and Science. 3 Hours.
This course introduces students to the processes of planning, conducting, and evaluating mathematics and science research and evaluation in education. This course emphasizes the methods and techniques used in both quantitative mathematics and science research and evaluation methodologies. Prerequisite: A PRE course in statistics. LEC.

C&T 960. Theory and Research in Social Studies Education. 3 Hours.
The purpose of this graduate level course is to stimulate and communicate systematic research and thinking in Social Studies Education. Its purpose is to foster the creation and exchange of ideas and research findings that will expand knowledge about purposes, conditions, and effects of schooling and education about society and social relations. LEC.

C&T 968. Readings in Economic Education Research. 3 Hours.
A survey of research in elementary, secondary, and higher education economic education. After initial, mutual readings, and discussions, class members will determine a list of broad research questions around which we will focus our readings. Each student is responsible for developing a reading list on one of the topics and reporting on selected readings. Class meetings will focus on summarizing and critiquing published research. Purpose of this course is to prepare doctoral students for comprehensive examinations and dissertation research. LEC.

C&T 994. Advanced Topics: ____. 1-3 Hours.
A special course of study to meet current needs of education professionals -- primarily for post-master’s level students. LEC.

C&T 995. Field Experience in: ____. 1-5 Hours.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agencies, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. FLD.

C&T 996. College Teaching Experience in: ____. 2 Hours.
To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester-long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or the member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate’s committee. FLD.

C&T 997. Individual Study. 1-4 Hours.
Prerequisite: Prior graduate course work in the area of study and consent of instructor. RSH.

C&T 998. Seminar in: ____. 1-4 Hours.
LEC.

C&T 999. Doctoral Dissertation. 1-15 Hours.
THE.

Deaf Education Courses

DE 702. Intermediate Signing Exact English. 3 Hours.
Intermediate vocabulary (700 words) for basic school routines and subjects will be taught using curricular materials to practice SEE 2 vocabulary and affix markers. Two college sign classes of any kind. LEC.

DE 717. Pidgin Sign English/American Sign Language. 3 Hours.
An intermediate level, educationally oriented vocabulary (450 words) taught in PSE/ASL. Comparison of literally and conceptually signed sentences. Prerequisite: Any sign course, admittance into Deaf Education Masters Program. LEC.
DE 808. Family Focus With Young Hearing-Impaired Children. 3 Hours.
Focus on the family as the primary teachers of deaf and hard-of-hearing infants and toddlers. The purpose of the class is twofold: to develop an understanding of the effect of deafness and to develop skills to deal with its intervention. Future teachers, early-childhood specialists, and related service providers will participate in discussion, simulations, and applied exercises in acquiring course competencies. Prerequisite: Sign class of any type. LEC.

Educ Leadership Policy Stds Courses

ELPS 200. Making Connections Between Schools and Community. 3 Hours.
This course is designed to increase the students' awareness of learning in the classroom and to familiarize them with the role of the school and the community. Institutions and resources that support children and families will be addressed through large and small group sessions and field experiences. Emphasis is given to the diverse nature of schools, communities, and their populations. In addition, the course will acclimate students with the School of Education programs, admissions procedures, and curriculum offerings. Successful completion of this course does not guarantee eventual admission of the School of Education's Teacher Education Program. Prerequisite: Successful completion of CT 100. LEC.

ELPS 250. Education and Society. 3 Hours. AE41/AE51.
This course provides students with an introduction to key ideas and socio-historical forces that have shaped the contemporary educational system in the United States, drawing upon the disciplines of the historical, philosophical, and social foundations of education. The development of school and community relations will be a point of emphasis. LEC.

ELPS 301. Educational Technology in Elementary-Middle Education. 3 Hours.
The focus of this course is on developing integration strategies and acquiring computer skills for using instructional technology and educational software, digital media, and information technologies appropriate to elementary and middle school teaching environments. Students will gain expertise in (a) the selection of appropriate instructional technologies and digital media for use in the classroom; (b) production of technology-based instructional materials; and (c) the evaluation and validation of a variety of electronic information sources. Prerequisite: Admission to the Teacher Education Program. LEC.

ELPS 302. Educational Technology in Middle/Secondary Education. 3 Hours.
The focus of this course is on developing integration strategies and acquiring computer skills for using instructional technology and educational software, digital media, and information technologies appropriate to middle school and high school teaching environments. Students will gain expertise in (a) the selection of appropriate instructional technologies and digital media for use in the classroom; (b) production of technology-based instructional materials; and (c) the evaluation and validation of a variety of electronic information sources. Prerequisite: Admission to the Teacher Education Program. LEC.

ELPS 437. Politics and Governance of Public Schools. 3 Hours.
This course introduces students not pursuing K-12 teaching or administrative positions to the organizational and legal foundations of the American educational system. LEC.

ELPS 450. Foundations of Education. 3 Hours.
A historical approach to the major social and philosophical foundations of American education, with an emphasis on the relation of educational theory to classroom practice. LEC.

ELPS 490. Senior Internship I. 4 Hours.
Supervised field experience in an on-site educational setting that provides the student an opportunity to study and participate in the professional activities of a designated educational setting with emphasis on the planning, implementation, and evaluation of such activities. Regular conferences with faculty to evaluate student progress will be scheduled. Prerequisite: Admission to the non-certificate baccalaureate program. LEC.

ELPS 491. Senior Internship II. 4 Hours.
Supervised field experience in an on-site educational setting with increasing emphasis placed on an integration of formal learning and in site experience. Regular conferences with faculty will be scheduled. Prerequisite: Admission to the non-certificate baccalaureate program. FLD.

ELPS 497. Independent Study in:. 1-2 Hours.
Only one enrollment permitted each semester. A maximum of four hours will apply toward the bachelor's degree. Prerequisite: Recommendation of advisor and consent of instructor. IND.

ELPS 537. The Governance and Organization of Schools. 3 Hours.
The course provides the prospective teacher with an overview of the legal foundations of the American educational system including the ways schools and school districts are organized and run; the role of various levels of government and various governmental and educational officials in controlling education; the rights of students and teachers; the terms, conditions, and responsibilities of teacher employment. Prerequisite: Admission to the Teacher Education Program. LEC.

ELPS 540. Ethics in Education. 3 Hours.
This course examines practices and policies occurring in k-12 and postsecondary educational institutions through the lenses provided by ethics. During the semester, we will read, discuss, and write about ethics in education from both theoretical and practical perspectives. Prerequisite: Junior standing or higher. The course is suitable for advanced undergraduate and master's degree seeking students. LEC.

ELPS 550. Childhood and Youth in America. 3 Hours.
A study of the changing role and character of childhood and youth as stages of life in the context of American educational and cultural history. LEC.

ELPS 598. Special Course:. 1-5 Hours.
A special course of study to meet current needs of education students, primarily for undergraduates. LEC.

ELPS 627. Growing Up in Urbanizing America. 3 Hours.
A study of the changing role and character of childhood and youth as stages of life in the context of American urban and social history, with particular attention to education and human development. Prerequisite: Junior standing or higher. LEC.

ELPS 652. Residential Staff Skill Enhancement and Administration. 2-3 Hours.
This special course of study in residential staff skill enhancement and administration is an exploration of concepts and skills necessary for becoming an effective paraprofessional staff member in a residential living unit. Each class session will include presentations and experiential learning on topics to develop or improve interpersonal skills and skill in dealing with special concerns. The course is required or recommended for all residence and scholarship hall staff and open to upperclass or graduate students interested in student personnel work. LEC.

ELPS 715. Understanding Research in Education. 3 Hours.
This course introduces the concepts and skills involved in understanding and analyzing research in education and related areas. The course
ELPS 750. Principalship. 3 Hours.
An introduction to the role, responsibilities, expectations and major duties of elementary, middle, and high school building administrators. Students are presented typical problems faced by school administrators through simulations and role playing and are expected, through reflection and discussion, to develop viable solutions. LEC.

ELPS 751. Educational Finance. 3 Hours.
A description and analysis of national, state, and local strategies for the financial support of education, utilizing social, economic, legal, and political frameworks. Particular attention to the principles of revenue acquisition and distribution at the local and state level for public school operations, with analysis of how these principles apply to Kansas. Designed for the wide variety of educational practitioners regardless of organizational and degree levels. Prerequisite: Admission to graduate study. LEC.

ELPS 752. Education Law. 3 Hours.
A study of legal principles and issues affecting educational policy making and practice with emphasis on student and teacher rights, equity, and the administration of schools. Prerequisite: Admission to graduate study. LEC.

ELPS 753. Introduction to Personnel Administration in Education. 3 Hours.
An overview of the theory and practice of personnel administration. The course focuses on the processes of recruitment, selection, training and development, evaluation, compensation, equal employment opportunity, and labor relations. LEC.

ELPS 754. Analysis of Administrative Problems. 3 Hours.
An introduction to various methods of problem identification; strategies of information gathering; schemes for the analysis of qualitative and quantitative data; models of problem resolution and decision making; and communication methods appropriate for differing audiences. Students will build basic computer, library, decision and communication skills useful in future administrative practice and subsequent coursework. LEC.

ELPS 755. Human Resource Management. 3 Hours.
An overview of the theory and practice of personnel administration. The course focuses on the processes of recruitment, selection, compensation, placement, and development of personnel in the school setting. LEC.

ELPS 756. Education in American Society. 3 Hours.
A study of the roles and goals of education in the United States, the interrelationships among schools and students, teachers, administrators, and parents, and the culture of schools. LEC.

ELPS 760. Integration of Educational Technology. 3 Hours.
This course focuses on strategies for integrating educational technology in K-12 schools, universities, government or industry. Topics include applying technology in: a) understanding basic technology operations b) planning and designing learning experiences, c) curriculum development, d) assessment and evaluation e) productivity and professional practices, and considering f) social, ethical, legal, and human issues. Students produce a comprehensive electronic portfolio that describes the theoretical perspectives that guide their technology integrations strategies and evidence that demonstrates their competencies. LEC.

ELPS 772. Philosophical Problems in Comparative Education. 3 Hours.
A study of significant philosophical problems encountered when comparing educational systems. Special emphasis on the implications of axiological analysis for educational theory and practice in different areas of the world. Relationships among the social sciences, philosophy, and the international or cross-cultural venture in education. The importance of systematic value-theory in comparative research and international education. LEC.

ELPS 773. School and Society in Comparative Education. 3 Hours.
Analysis of the role of social science in comparative education as perceived by different philosophies or schools of thought, such as Marxism, phenomenology, empiricism, pragmatism, and linguistic analysis. LEC.

ELPS 774. Modern Educational Theorists. 3 Hours.
An in-depth study of prominent European thinkers who have contributed to educational theory and practice (e.g., Rousseau, Pestalozzi, Herbert, Froebel, Montessori, Nietzsche, Freud, Piaget, Ortega Gasset, etc.). Prerequisite: ELPS 770 or ELPS 771 is recommended. LEC.

ELPS 777. Problems in Contemporary Educational Theory. 3 Hours.
Select explorations into such provocative and problematic trends in current educational theory as Marxism, behaviorism, phenomenology, existentialism, analytic philosophy, hedonism, nonverbal education, etc. Prerequisite: ELPS 770 or ELPS 771 is recommended. LEC.

ELPS 780. Introduction to Higher Education Administration. 3 Hours.
This course is designed for beginning master's degree students and for doctoral students who have had no previous administrative experience in college or university settings. Students will be introduced to the function and responsibilities of major administrative divisions of a college or university and to the major tasks of administration: planning, programming, budgeting, staffing, managing. An emphasis will be placed on current issues facing higher education and students will be introduced to the major journals of the field. As part of the course requirements, students will spend some time familiarizing themselves with one or more administrative offices on a college campus. Prerequisite: Admission to higher education at the graduate level. LEC.

ELPS 781. Student Affairs Administration in Higher Education. 3 Hours.
This course is designed to include the study of the history and development of student personnel services in higher education, the role and function of the student affairs administrator, contemporary issues and problems, and an understanding of the organization and role of student affairs administration within higher education settings. Prerequisite: Admission to the higher education program or permission of instructor. LEC.

ELPS 798. Special Course:. 1-5 Hours.
A special course of study to meet current needs of education professionals -- primarily for graduate students. LEC.

ELPS 810. Educational Media Development. 3 Hours.
Media surrounds today's learning environments. How can you effectively engage learners with multimedia, meaningful interactions, and motivational strategies? This course will take a hands-on practical approach to creating interactive educational multimedia products including, but not limited to, digital images, movies, podcast, Web publishing and educational games. Also, students will learn about the underlying learning theories of educational media development. LEC.
ELPS 811. Constructivist Learning Technologies. 3 Hours.
This course explores the design and use of new educational technologies to support constructivist learning. Throughout the course, students will (1) get hands-on experiences with emerging educational technologies, (2) examine how the underlying learning theories are reified into concrete learning environments, and (3) analyze how the affordances of new technologies (e.g., modeling and visualization) can facilitate the constructivist learning processes. This course is suitable for students who wish to develop greater knowledge about the ways emerging computer technologies can empower constructivist learning. Prerequisite: CT 770. LEC.

ELPS 812. Design of Educational Technology. 3 Hours.
This course introduces instructional design theory and production techniques for developing educational technology resources and systems. Students apply their understandings of design and education theories as they work in teams to develop real-world applications of educational technology for specific clients. LEC.

ELPS 820. Practicum in Educational Technology. 1-3 Hours.
Supervised practice in a media center in selection, classifying, designing, producing, and/or managing instructional materials. Prerequisite: CT 770 and CT 871. FLD.

ELPS 830. Foundations of Multicultural Education. 3 Hours.
This class provides students with an understanding of multicultural education as an instructional concept, educational reform movement, and systemic process meant to ensure educational equity for all people, especially those who have been inadequately served and/or historically discriminated against because of their racial/ethnic or linguistic backgrounds, gender or sexual orientation, socio-economic status, and special needs. Students will examine different theoretical approaches that inform the practice of multicultural education and explore the contributions of various social sciences to the field. LEC.

ELPS 831. Sociology of Education. 3 Hours.
This course will provide an introduction to the sociology of education. This course is designed to fulfill the doctoral core requirement for social, historical and philosophical foundations of education. Specific topics will include: conflict over the purposes of education; how those purposes are-or are not-translated into actual classroom life; how educational systems have developed historically, how status, and more specifically race, class and gender relations, affect student experiences; and contemporary policy and reform movements. LEC.

ELPS 832. History of Educational Thought. 3 Hours.
An examination of the major ideas that have shaped practice in the schools. Emphasis is placed on assisting the student with the development of a coherent and consistent personal philosophy of education upon which administrative practice can be based. LEC.

ELPS 833. Social Context of Urban Education. 3 Hours.
This course examines education in urban communities through the foundational disciplines of history, philosophy, and the social sciences. Particular attention is given to ways in which the changing social and political contexts of American cities affect the educational process. LEC.

ELPS 834. History and Philosophy of Education. 3 Hours.
A comprehensive study of influential persons and movements in the development of educational thought, Eastern and Western, from ancient times to the present. Emphasis on those ideas and historical roots which are relevant to contemporary issues in teaching and school administration. LEC.

ELPS 835. Philosophy of Education. 3 Hours.
An analytic inquiry into basic philosophical positions and issues relevant to education. The difference between ELPS 770 and ELPS 771 is that the latter is topically arranged and does not necessarily follow a historical sequence; it normally proceeds by problems and schools of thought. LEC.

ELPS 837. History of Education and Culture in America. 3 Hours.
A study of the relation between education and culture in America from colonial times to the present. American schools are considered in the wider context of cultural and social change. LEC.

ELPS 838. History of Childhood and Youth in America. 3 Hours.
An exploration of changing attitudes toward children and youth, their subjective experience, their impact on adults, and the conditions that shaped their development. Special attention will be given to the relationship between the changing nature of childhood as a social and cultural category and the development of the education profession. LEC.

ELPS 839. Historical Inquiry in Education. 3 Hours.
This course will provide an introduction to the methodology of historical research in education. This course is designed to fulfill the doctoral core requirement for research methods in education for students interested in doing this type of research. Specific topics will include: the historiography of education; working with primary and secondary documents; oral history as method and documentation; quantitative approaches to history; constructing historical narratives; the question of interpretation. LEC.

ELPS 850. Educational Facilities. 3 Hours.
A study of the principles and processes of developing functional educational facilities. Special emphasis placed on the educational planning that precedes and provides the basis for architectural planning. Among topics considered are plant utilization analysis, enrollment projections, site and equipment needs, fiscal and legal constraints, environmental factors, and the development of educational specifications. Designed for both building and central office level administrators. Prerequisite: Admission to graduate study. LEC.

ELPS 851. Supervision of Student Teaching. 2 Hours.
A study of the organization and functions of student-teaching programs. Emphasis on the development of effective interpersonal relationships among school administrators, cooperating teachers, university supervisors, and student teachers. Designed for both administrative and instructional personnel. Prerequisite: Admission to graduate study. LEC.

ELPS 852. School Resource Management. 3 Hours.
An examination of the sources and uses of fiscal resources in education including underlying concepts from economic theory, the impact of values on fiscal policy, state funding formulas, and school budgeting and accounting practices. LEC.

ELPS 853. Staff Evaluation and Development. 3 Hours.
An examination of current trends in personnel evaluation with a focus on clinical supervision and adult development. Students will participate in simulation exercises to develop skills in classroom observation, conferencing techniques, evaluation of teaching artifacts, and the construction of staff development plans. LEC.

ELPS 854. The Student in Society. 3 Hours.
A study of children and youth with particular emphasis on demographic characteristics of the population served by schools and implications of those characteristics for schools and schooling. LEC.

ELPS 855. Teacher Evaluation. 3 Hours.
Teacher Evaluation is based on clinical, empirical and theoretical information related to effective teacher evaluation behavior from the administrative perspective. It is intended to provide exposure to competencies essential to effective evaluation of teaching performance. Evaluation knowledge, skill and performance are acquired and developed through reading, discussion, active teaching of content related to teacher evaluation and practicing observation, recording and conferencing
skills. A variety of approaches is considered, but behaviorally-anchored measurement of teaching behavior is emphasized. Opportunities and needs for improvement are identified with the assistance of video-taped diagnosis of conferencing behavior. Prerequisite: Two of the following: ELPS 750, ELPS 752, ELPS 753, or CT 840. LEC.

ELPS 856. Law and Special Education. 3 Hours.
This course focuses on laws that apply to special education. The American legal system, particularly in respect to special education, the constitutional and statutory provisions of federal and state law and the judicial decisions interpreting those laws are reviewed. The course relates equal protection, procedural due process, and substantive due process doctrines to school practices affecting disabled children and examines the sex principles of P.L. 94-142 and similar principles in state legislation. This course is not the equivalent of or a substitute for ELPS 752. (Same as SPED 851.) Prerequisite: ELPS 750 or permission of instructor. LEC.

ELPS 857. Disabled Citizens, Public Policy and Policy Analysis. 3 Hours.
To train students to analyze public policy that affects disabled citizens, various models of analysis are brought to bear on federal policy (education, transportation, housing, institutionalization, protection and advocacy, medical assistance, employment, vocational rehabilitation and others). Not valid for core requirement in history and/or philosophy of education. (Same as SPED 852.) Prerequisite: ELPS 851 or permission of instructor. LEC.

ELPS 858. Professional Ethics, Public Values and Disabled Citizens. 3 Hours.
This course addresses the issues that professionals (educators, physicians, allied health providers, attorneys and others) and families of disabled people face in the context of public values and attitudes and rules of law. The issues include, without limitation, education, treatment and non-treatment. Not valid for core requirement in history and/or philosophy of education. (Same as SPED 853.) Prerequisite: ELPS 750, SPED 851, SPED 852 or permission of instructor. LEC.

ELPS 870. Philosophy of Education II. 3 Hours.
An exploration of select areas in philosophy, such as emphasis on value-theory or epistemology or metaphysics, and their implications for educational theory. Normally a limited number of authors will also be selected for monographic treatment. Prerequisite: ELPS 770 or ELPS 771 is recommended. LEC.

ELPS 871. Introduction to Qualitative Research. 3 Hours.
An introduction to the foundations of and techniques associated with qualitative research methods. Students will practice interview and participant observation skills and will analyze and interpret data. Additional topics include crafting qualitative research questions, ethics of fieldwork, and establishing trustworthiness of data. Common traditions of qualitative methods employed in education and other related fields will be introduced. LEC.

ELPS 880. The Community/Junior College. 3 Hours.
A survey of the history and development of the community/junior college. Particular emphasis will be given to the student, the faculty, the curricula, administration, and finance. The course is intended to provide a general understanding of the operation and concerns of today’s community/junior college for the current or potential community/junior college staff member. LEC.

ELPS 881. Seminar in Leadership. 3 Hours.
The purpose of this seminar is to explore leadership in education, particularly higher education, from a variety of perspectives. Readings come from a variety of disciplinary perspectives, such as sociology, organizational behavior, and psychology. We consider various aspects of leadership and analyze the leader from a symbolic perspective, as a manager of meaning and critical change agent. We then challenge ourselves to deconstruct our leadership realities with the help of several critical perspectives as we prepare to examine who the leaders are as well as who they will, and need to, be in the educational organizations of tomorrow. LEC.

ELPS 882. Higher Education in the United States. 3 Hours.
The purpose of the course is to acquaint students in higher education, and students from other areas who intend to work in the post-secondary setting, with the history, philosophy and development of higher education in the United States. The course focuses on three periods: 1) the founding of Harvard to 1965; 2) dissent, disruption, and change, 1965-1979; and 3) the future and crucial issues, the 1980’s. European higher education and its early influence on higher education in the United States is also examined. LEC.

ELPS 883. The College Student. 3 Hours.
The characteristics of college students; impact of college on student behavior, changing attitudes, values, beliefs, and the implications of recent research on traditional and new students for instructional and administrative practices. LEC.

ELPS 884. Research on College Students. 3 Hours.
Examination of the American college student from societal, development, research, and institutional perspectives and to review the policy implications of these findings for college and university administrators and faculty. Topics include research and theory concerning the college student experience, the diverse nature of the student body and its implications for institutional policy and practice, and formulation of individual philosophies and priorities applicable to working with college students. LEC.

ELPS 885. Assessment and Program Evaluation in Higher Education. 3 Hours.
Nature, objectives, and basic procedures of assessment and program evaluation as applied to the various aspects of higher education settings. In addition to basic procedures for evaluating programs, topics covered include accreditation, program review, benchmarking, student outcomes assessment, and evaluation of teaching in colleges and universities. Prerequisite: ELPS 715 or equivalent. LEC.

ELPS 886. Theory into Practice in Higher Education. 3 Hours.
This course is required as a final course for all master’s students in higher education. It is designed to prepare students for professional life after graduation. Using a case study approach, students will examine the reality of practice in a variety of higher educational settings including relevant political and ethical factors. Prerequisite: Higher education students in last semester of master’s coursework. LEC.

ELPS 893. Advanced Building Leadership Internship. 2 Hours.
Supervised and directed experiences to enhance the necessary leadership skills of a building/district leaders. Activities will include building/district level resource assessment, data analysis, professional development of teachers/principals (and district level professionals), and cooperative planning with teachers and administrators around responsibilities of curriculum, instruction, resource management and student achievement. Prerequisite: Completion (at the University of Kansas) of all certification program (MS/EdD) requirements for the Building/District Leadership Licenses. FLD.

ELPS 895. Internship. 1-5 Hours.
The on site development of the skills necessary to effectively function as a school building leader. Activities will be tailored to the needs of individual students in consultation with a university advisor and a field advisor. FLD.

ELPS 896. Seminar in:. 1-4 Hours.
ELPS 897. Independent Study. 1-4 Hours.
Prerequisite: Consent of advisor and instructor. IND.

ELPS 898. Master’s Project. 1-4 Hours.
RSH.

ELPS 899. Master’s Thesis. 1-6 Hours.
THE.

ELPS 948. Research in Education Policy and Leadership. 3 Hours.
This course is an introduction to methods of inquiry in education policy and leadership studies. It is designed to help doctoral students explore possible research interests, formulate research questions, and to review a rich variety of approaches to inquiry in the field of education. Specific topics include: interview- and observation-driven studies, ethnography, feminist and narrative methods, legal and historical methods, questionnaire-driven studies, quantitative evaluation studies, and studies using administrative and large national data sources. LEC.

ELPS 950. Educational Policy Making and Reform. 3 Hours.
An analysis of patterns of influence, organizations, and governmental agencies which impact education at the community, state and national levels. Particular emphasis is placed on analysis of policy development process and the relationship of policy to administration. Recommended to students in educational administration and higher education. LEC.

ELPS 951. Supervision of Instruction. 3 Hours.
A study of the principles and techniques necessary for coordinating, monitoring, and improving the educational programs of elementary and secondary schools. LEC.

ELPS 952. School Finance: Policy and Practice. 3 Hours.
The objective of this course is to understand the financial systems and mechanisms used by states in the funding of elementary and secondary education in the United States. In simple language, we will be concerned with five basic issues: (1) Where the money comes from; (2) How it is redistributed; (3) How it is spent; (4) The relative effectiveness of spending decisions including selected international comparisons; and (5) How the previous four financial activities participate in a common financial ecology. The course provides an overview of theory and concepts central to the understanding of school finance with an emphasis on policy issues. It also examines the mechanics of school finance funding in light of state policies. LEC.

ELPS 953. District Human Resource Management. 3 Hours.
An in-depth study of theory and research in personnel administration. The focus will be on current literature dealing with empirical assessments of personnel theory and techniques. Specific concepts to be considered include the following: educator characteristics, job analysis and design, personnel recruitment, selection and evaluation techniques, staffing and development, and labor relations. Prerequisite: ELPS 753 or its equivalent. LEC.

ELPS 954. Sociology of Educational Organizations. 3 Hours.
This class is an overview of basic and advanced sociological and political theories of organization, with specific application to issues and problems in K-12 education. It is designed for graduate students and practicing educational leaders and administrators who intend to utilize research on organizations in their studies of the governance of schools, the sociology and politics of education, and education policy. The topics covered include the origins and nature of modern bureaucracy, formal structure and function, organizational control, transaction cost economics, population ecology, resource dependence, the new institutionalism, organizational effectiveness and legitimacy, organizational culture, power and politics, and change. LEC.

ELPS 955. District Business Management. 3 Hours.
This course emphasizes skills for effective and efficient business and financial management of school districts in a Kansas or Missouri context. Basic topics include: Short range and long range financial planning, analysis of financial statements, budget preparation, fund accounting and financial reporting, contracting of services including transportation and food services, staff salaries and benefits and insurance. The course also includes a number of strategic methods for institutional planning including: Cost Benefit Analysis, Cost Effectiveness Analysis, and enrollment, revenue and expenditure forecasting techniques. Prerequisite: ELPS 952. LEC.

ELPS 956. District Leadership. 3 Hours.
The focus of the course is the role of the public school district superintendent. Organized study will include assigned readings, lectures, guest speakers, discussion, and the completion of a study project. The course will include consideration of such topics as boardmanship, community relations, district leadership, professional accountability, district maintenance and operations, professional employment and relationships with other agencies. The course is designed to serve the needs of those graduate students pursuing advanced study with the intention of completing requirements for district certification. Some students will also find the field appealing as an area for dissertation research. Prerequisite: Doctoral status in education administration or permission of instructor. LEC.

ELPS 957. Educational Policy, Ethics and Law. 3 Hours.
Course focuses on use of legal and moral reasoning in analysis of educational policy issues. Specific topics will vary depending on interests of instructor and students and current controversy. Examples of possible topics to be included: school desegregation, teacher collective bargaining, separation of church and school, equal educational opportunity. Prerequisite: ELPS 752, equivalent, or consent of instructor. LEC.

ELPS 958. American Educational Reform Movements: Past and Present. 3 Hours.
An examination of the origin, nature, and consequences of educational reform in the United States. The primary goal is to attain a balanced evaluation of current educational reform. LEC.

ELPS 959. Organization and Administration of Services for Exceptional Children. 3 Hours.
To aid administrators and prospective administrators responsible for organizing and administering programs of education for exceptional children, state and federal guidelines and regulations, legal aspects and financing of special education, planning a program, administering special services. (Same as SPED 971.) Prerequisite: Nine hours of Education including educational psychology and SPED 725. LEC.

ELPS 960. Specialist Project. 1-4 Hours.
RSH.

ELPS 970. Theory and Research in Administration. 3 Hours.
A survey of the theoretical and empirical literature in educational administration and the methods used to investigate these content areas. Major emphasis is devoted to developing research skills applicable in practice and to the identification of possible generic topics suitable for future dissertation work. LEC.

ELPS 971. Comparative Education. 2 Hours.
A factual, descriptive, and analytical study of national systems of formal education, or schooling, as exemplified in contemporary educational establishments. Organizational and administrative policies and teaching practices, with emphasis on Germany, France, England, U.S.S.R., People’s Republic of China and Japan. Other nations may be examined
ELPS 972. Educational Problems in Latin America. 3 Hours. Designed to meet the needs of students majoring in Latin American studies or interested in the area. Development of an awareness of the concept of cross-cultural confluence with Latin America as it relates to education. Survey of the main problems confronted by Latin American educational systems and examination of the difficulties experienced by North American educators when confronted with such problems. LEC.

ELPS 975. Education, Technology and Social Change. 3 Hours. This interdisciplinary course provides an opportunity to read, reflect upon, and discuss ideas drawn from the emerging field of Science and Technology Studies (STS) in connection with education. Its focus is the interrelationships between technology, society, and education (defined broadly to include non-school and adult learning settings). It explores how knowledge, expertise, and authority are constructed within and across social and cultural groups, with particular attention social and economic inequality. It also considers the relationship between emerging technologies, educational experiences and the nature of "the self" in society, among other issues. Prerequisite: Admission to ELPS doctoral program, or permission of instructor. LEC.

ELPS 980. Postsecondary Finance. 3 Hours. This course is designed for advanced doctoral students in higher education, particularly those who will be preparing unit budgets or budget presentations and those who make and implement fiscal policy (e.g., financial aid offers). The course material covers different types of college and university budgeting -- incremental, zero-based and formula -- and their impact on university revenues; statewide coordination and its impact on programs, program duplication and funding; retrenchment and quality issues; the legislative role in budget preparation; unified and comparative management systems (e.g., WICHE and NCHEMS); and the impact of federal contracting and student aid policies. LEC.

ELPS 981. Higher Education Law. 3 Hours. An overview of the developing law of higher education, with emphasis on and analysis of employer-employee relationships, student-faculty/administration relationships, and the impact of federal and state regulation on these relationships. LEC.

ELPS 982. Faculty in Higher Education. 3 Hours. This course considers the role and circumstances of faculty in higher education including variations among different types of institutions. Topics include the history and demographics of the professoriate, the academic work environment and labor market, the role of faculty in institutional governance and policy making, and the social and political context of academia. LEC.

ELPS 983. Curriculum Innovation in Higher Education. 3 Hours. A study of contemporary post-secondary curriculum with particular emphasis on the nature of curriculum, the organization and structure of academic programs, the nature of change in academic communities and exemplary innovative institutions. LEC.

ELPS 984. Teacher Education in the United States. 2 Hours. A study of the development, issues, and programs for the preparation of teachers. Open to all regular graduate students. LEC.

ELPS 985. Evaluations of Programs in Higher Education. 2 Hours. Nature, objectives, and basic procedures of evaluation as applied to the various aspects of higher education. Open to all regular graduate students. LEC.

ELPS 986. The Governance and Administration of Higher Education. 3 Hours. A theory-based course aimed at providing an understanding of the governance and administration of academic institutions -- particularly universities. Emphasis is directed toward an analysis of decision-making in these complex organizations. LEC.

ELPS 993. Advanced District Leadership Internship. 2 Hours. Supervised and directed experiences to enhance the necessary leadership skills of a building/district leaders. Activities will include building/district level resource assessment, data analysis, professional development of teachers/principals (and district level professionals), and cooperative planning with teachers and administrators around responsibilities of curriculum, instruction, resource management and student achievement. Prerequisite: Completion (at the University of Kansas) of all certification program (MS/EdD) requirements for the Building/District Leadership Licenses. FLD.

ELPS 994. Advanced Topics:. 1-3 Hours. A special course of study to meet current needs of education professionals -- primarily for post-master's level students. LEC.

ELPS 995. Field Experience in:. 1-5 Hours. Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experience will be prepared independently by the student, a representative of the cooperating agencies, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. FLD.

ELPS 996. College Teaching Experience in: ____. 2 Hours. To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester-long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or the member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate's committee. FLD.

ELPS 997. Individual Study. 1-4 Hours. Prerequisite: Prior graduate course work in the area of study and consent of instructor. RSH.

ELPS 998. Seminar in:. 1-4 Hours. LEC.

ELPS 999. Doctoral Dissertation. 1-15 Hours. THE.

Education Courses

EDUC 800. Education as a Field of Scholarship. 3 Hours. An intensive interdisciplinary examination of classic and current scholarship in education, for students in Ph.D. programs in the School of Education. It surveys the interdisciplinary range of scholarship and inquiry in education, as preparation for careers in research. The course features discussion of exemplary studies, both for their contributions to various fields, but also with regard to research methods, related ethical issues and the responsible conduct of research. Prerequisite: Admission to Ph.D. in Education Program. LEC.
Health Sport Exercise Sci Courses

HSES 104. Physical Activity in: _____ 0.5-1 Hours.
(An accurate description of the activity or activities will be given in the Timetable.) Graded on a satisfactory/unsatisfactory basis. ACT.

HSES 108. Basic Skill Instruction in: _____ 0.5-2 Hours.
(An accurate description of the activity or activities will be given in the Timetable.) ACT.

HSES 110. Intermediate Skill Instruction in: _____ 0.5-2 Hours.
(An accurate description of the activity or activities will be given in the Timetable.) ACT.

HSES 112. Advanced Skill Instruction in: _____ 0.5-2 Hours.
(An accurate description of the activity or activities will be given in the Timetable.) ACT.

HSES 200. Coaching Certification for Youth Sports. 2 Hours.
This course will examine theories, practices, methods and techniques used to coach youth sports. Emphasis will be upon training, conditioning, sports psychology, nutrition, organization and management as prescribed by the National Federation of Interscholastic Coaches’ Education Program. Students will have an opportunity to receive coaching certification. Prerequisite: Open to physical education majors, or by consent of instructor. Students must pass the National Federation of Interscholastic Coaches’ Education Program (NFICEP) examination before exiting the course. LEC.

HSES 201. Team Sports. 2 Hours.
This course will deal with Soccer, Touch Football, Basketball, Softball, and Volleyball. Practice in construction of lesson plans and unit plans, skill performance and peer teaching practicum are emphasized in each of the areas of team sports. Class meets three days per week with one hour being a laboratory session. Prerequisite: Basic fitness and knowledge of the activities. Open to HSES majors and minors, or by consent of instructor. LEC.

HSES 202. Individual and Dual Sports. 2 Hours.
Instruction and analysis in individual sports such as track and field, bowling or archery, and dual sports such as tennis, badminton or handball. Development of sport skills and rule knowledge are emphasized. Prerequisite: Basic fitness and knowledge of the activities. Prerequisite: Open to pre-HSES and HSES majors, or by consent of instructor. LEC.

HSES 204. Gymnastics. 2 Hours.
Instruction and analysis in the eleven gymnastics events for men and women. Skill performance, spotting and teaching techniques, lesson and unit plan construction, and teaching practicum constitute the basic focus of this course. Class meets three days per week with one hour being a laboratory session. Prerequisite: Basic fitness and gymnastics/tumbling experience. Open to HSES majors and minors, or by consent of instructor. LEC.

HSES 210. Instruction and Analysis in: _____ 1-16 Hours.
Study of the skills to be included in the instruction of the indicated activities and the analysis of skill performance involved. Presentation of instructional techniques and practice in construction of lesson and unit plans are included for each activity. Open to majors in physical education only. The activities included in the major program are as follows: (a) Swimming (b) Folk and Square Dance (c) Modern Dance and Women’s Gymnastics (d) Weight-Training and Men’s Gymnastics (e) Soccer-Speedball, Volleyball, Wrestling (f) Field Hockey, Soccer-Speedball, Volleyball (g) Golf, Tennis, Badminton, Archery (h) Basketball, Softball, Flag Football, Team Handball (i) Track and Field, Handball-Paddleball, Fencing. Prerequisite: Basic fitness and basic skill in the course activities shown through competency tests and/or credit in basic skill courses in the appropriate activity. LAB.

HSES 214. Physical Education Activities for Elementary School Children. 3 Hours.
This course will introduce the student to a variety of physical education activities that are appropriate for children in grades K-6. Age appropriate activities demonstrated in this course include: individual and group games, self testing games, stunts and tumbling experiences, physical fitness, modified sports, and movement exploration. Class participation will be expected for all students. Prerequisite: Open to pre-HPE and HPE majors. LEC.

HSES 218. Lifeguard Training. 2 Hours.
The course involves American Red Cross certification in lifeguarding which includes rescue techniques and safety procedures. It also includes first aid and CPR certifications. Each student will be asked to identify common hazards associated with various types of aquatic facilities and develop skills necessary to recognize a person in a distress or drowning situation and to effectively rescue that person. This course will help each student to understand the lifeguard/employer and lifeguard/patron relationship as well as provide explanations, demonstrations, practice and review of the rescue skills essential for lifeguards. Prerequisite: HSES 112 Advanced Skill Instruction in Swimming or consent of instructor. LEC.

HSES 220. Officiating of: _____ 1 Hour.
A study of the rules and techniques of officiating. Students will officiate during laboratory sessions. The activities offered in officiating are: basketball, football, gymnastics, softball, swimming, track and field, and volleyball. Prerequisite: Basic competency in the sport to be officiated, or consent of instructor. LEC.

HSES 222. Water Safety Instruction. 2 Hours.
This course is designed to train instructor candidates to teach American Red Cross Swimming and Water Safety courses. Through practice teaching sessions, students will plan and organize skill development utilizing the various educational methods and approaches applicable to swimming and water safety instruction. Students will also learn the correct swimming styles taught by the Red Cross. Prerequisite: HSES 112 Advanced Skill Instruction in Swimming or consent of instructor. LEC.

HSES 224. Lifeguard Training Instructor. 2 Hours.
This course is designed as a lecture/laboratory course, meeting for one hour three days per week. Each instructor candidate (student) will have an opportunity for skill development necessary to instruct American Red Cross Lifeguard Training courses. Through practice teaching sessions, emphasis will be placed on enforcing safety precautions, identifying errors, providing effective instruction, and skills correction. After successful completion of this course, the student will be certified to instruct the following American Red Cross Aquatic courses: (1) lifeguard training, (2) waterfront lifeguarding, (3) CPR for professional rescue, and (4) community first aid. Prerequisite: HSES 218 or lifeguard training. LEC.

HSES 236. Practicum in: _____ 1-3 Hours.
A description of the activities offered will be provided in the Timetable. Prerequisite: Consent of instructor. FLD.

HSES 240. The Coaching of Football. 2 Hours.
A complete study of the theoretical aspects of the fundamentals of football. Study of defensive and offensive tactics for each position. Prerequisite: Sophomore standing. LEC.

HSES 244. Introduction to Physical Education and Sport Studies. 3 Hours.
The study of the history, foundational concepts, and current principles of physical education and sport programs. LEC.
HSES 248. First Aid. 2 Hours.
This course is designed to teach emergency treatment of injuries, wounds, hemorrhage, burns, and poisoning. Emphasis is placed on the techniques of rescue breathing, CPR, and emergency bandaging. American Red Cross certification is included. LEC.

HSES 250. Introduction to Athletic Training. 3 Hours.
The introductory study of the prevention, immediate care, and treatment of athletic related injuries and illnesses. This course is designed for Athletic Training majors to cover the basic competencies of injury/illness recognition as well as discuss the various strategies for the prevention, evaluation, and care of injuries to the physically active. Prerequisite: Instructor consent and concurrent enrollment in HSES 251. LEC.

HSES 251. Introduction to Athletic Training Practicum. 1 Hour.
This course is designed to introduce the practical skills and psychomotor clinical competencies of the beginning student-athlete trainer. Emphasis will be placed on basic Athletic Training procedures including but not limited to preventative taping, bracing, and padding techniques as well as various other procedures and techniques related to the prevention, care, and management of athletic related injuries/illnesses. Prerequisite: Completed or enrolled in Human Anatomy, First Aid/CPR (or proof of current certification). Concurrent enrollment in HSES 250 or transfer credit. Open to Athletic Training majors only. LEC.

HSES 252. The Coaching of Basketball. 2 Hours.
Theory of basketball, including methods of teaching fundamentals; individual and team offense and defense; various styles of play and methods of coaching. Prerequisite: Sophomore standing. LEC.

HSES 260. Personal and Community Health. 3 Hours.
Emphasis on healthful and intelligent living and the application of the fundamental principles of health. LEC.

HSES 262. Life Skills Training for Intercollegiate Athletics. 2 Hours.
This course will focus on issues surrounding drug use, testing, and prevention in sports and will incorporate life skills training in the areas of career transition, stress and time management, performance enhancement, strategic learning skills, and the dynamics of communication and leadership. LEC.

HSES 264. The Coaching of Individual Sports. 2 Hours.
An analysis of coaching techniques and study of materials for the coaching of gymnastics, swimming, golf, tennis, and wrestling. LEC.

HSES 269. Introduction to Exercise Science. 3 Hours.
A study of the various components of physical fitness and the wellness and the implications for developing programs to promote good health and fitness. Lectures and laboratory sessions will be centered on practical knowledge and experiences designed to help individuals enhance their own health, as well as develop sound programs for others. The topics discussed include cardiovascular fitness, body composition, muscular strength, flexibility, evaluation of fitness components, training program design, nutrition, weight management, and facts and fallacies of nutrition and fitness. LEC.

HSES 289. Introduction to Sport Management. 3 Hours.
This course provides an overview of the field of sport management including the principles of leadership and management the fundamentals of personnel management, financial management, marketing, strategic planning, sport ethics, sport law, time management, stress management, facility management, and event management applied to sport settings. LEC.

HSES 290. Safety Education. 3 Hours.
A survey of safety problems as they exist in society today, with emphasis on preventive, corrective, and compensatory procedures. LEC.

Emphasis will be on instructional techniques that are used for the inclusion of all students in health and physical education learning experiences. Students will develop an understanding of how to deliver health and physical education activities that may be part of an individual education program. As a part of this course, a practicum experience of 30 hours in a public school adaptive physical education setting will be required. LEC.

HSES 305. Methods of Strength Training and Conditioning. 3 Hours.
This course will provide the students with the scientific principles and the hands-on experience to develop resistance exercise and related conditioning programs for a wide range of populations, including those focusing on general fitness, therapeutic rehabilitation and sport performance. Prerequisite: Anatomy, Physiology, admission to the Exercise Science or Athletic Training undergraduate programs, or permission of instructor. LEC.

HSES 308. Drugs and Diseases in Society. 3 Hours.
This course is an overview of human disease processes as well as legal and illegal use of drugs and narcotics for treatment or recreational purposes. Both communicable and degenerative diseases will be covered with regards to prevention, transmission, effects, management, and treatment. Legal drugs and illegal drugs will be discussed with regards to their treatment or abuse potential, legislative issues, and consumer education. Reflective thinking will be used to formulate improved perspectives on the roles of drugs and diseases in society. Prerequisite: Admission to Community Health Program or consent of instructor. LEC.

HSES 310. Research and Data Analysis in Health, Sport, and Exercise Sciences. 3 Hours.
This course provides formal instruction in the areas of test administration, general statistics, and basic research design. Emphasis will be placed upon the interpretation of statistical data, evaluation of data, and basic methodologies utilized in health, sport, and exercise sciences research. Data collection, analysis, and evaluation will be an integral part of the class. Prerequisite: Admission to the School of Education. LEC.

HSES 315. Health and Fitness Technology. 2 Hours.
The course will prepare health and physical education majors to use technology effectively to enhance teaching and learning. Students will explore the use of technology appropriate for communication, organization, instruction, and assessment in health and physical education classrooms. Prerequisite: Admission to the HPE Teacher Licensure Program. LEC.

HSES 320. Methods of Teaching Physical Education. 3 Hours.
This course provides a systematic approach to the development of effective teaching skills in physical education. Students receive practical and field experiences that enable them to observe and practice managerial, instructional, and interpersonal skills necessary to produce student learning in K-12 physical education classrooms. Prerequisite: Admission to the HSES Teacher Certification Program. LEC.

HSES 330. Principles of Nutrition and Health. 3 Hours.
This course will provide an introduction to the basic principles of nutrition, with an emphasis on application of these principles to improve overall health. Topics include: guidelines for a balanced diet, Index of Nutritional Quality, energy requirements and balance, weight management and obesity, nutritional quackery, sports nutrition, nutrition for children and elderly, and eating disorders. LEC.

HSES 340. Instructional Strategies in Motor Development. 2 Hours.
This course is designed to provide students with an examination of current theories of motor development throughout the life cycle. Emphasis is
HSES 341. Instructional Strategies in Physical Education for Elementary Classroom Teachers. 1 Hour.
The application of child growth and development principles to physical education. The use of materials as related to a sequential physical education curriculum in the elementary school will also be included. Prerequisite: Prior or concurrent enrollment in CT 322 or equivalent. LEC.

HSES 350. Care and Prevention of Athletic Injuries. 3 Hours.
The introductory study of the prevention, immediate care, and treatment of athletic related injuries and illnesses. This course is designed to cover the basic fundamentals of injury/illness recognition as well as discuss the various strategies for the prevention and care of injuries to the physically active. Prerequisite: Courses in Human Anatomy and First Aid. LEC.

HSES 351. Foundations of Athletic Training. 1 Hour.
This course is designed to introduce the practical skills and psychomotor clinical competencies of the beginning student-athletic trainer. Emphasis will be placed on basic athletic training procedures including but not limited to preventative taping, bracing, and padding techniques as well as various other procedures and techniques related to the prevention, care, and management of athletic related injuries/illnesses. Prerequisite: Human Anatomy, First Aid, concurrent enrollment in HSES 350. Open to Athletic Training majors only. LEC.

HSES 352. Therapeutic Modalities. 3 Hours.
This course presents the theoretical and physiological foundations of pain and inflammation. Discussion of therapeutic agents to treat pain and inflammation are presented along with progressive planning and implementation of a comprehensive treatment for injuries/illnesses sustained by physically active individuals. Prerequisite: Admission into the Athletic Training Education program and HSES 250 or the transfer equivalent. LEC.

HSES 353. Athletic Training Practicum I. 2 Hours.
This course provides a practical experience for the student-athletic trainer. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury/illness evaluation during their clinical and field experience. Specific skills addressed in HSES 352 will be practiced, applied, and mastered during this experience. Prerequisite: Admission to Athletic Training Education program and concurrent enrollment in HSES 352. FLD.

HSES 354. Lower Extremity Evaluation. 3 Hours.
This course provides a comprehensive study of the techniques used by the Athletic Trainer in regard to the assessment and evaluation of athletic injuries/illnesses of the lower extremity. Procedures for reporting and evaluating injuries/illnesses will be discussed so that appropriate injury management and referral may take place. The etiologic factors common to athletic injuries, as well as specific signs and symptoms of various athletic related pathological conditions will be discussed. Prerequisite: Admission to the Athletic Training Program, HSES 352, and HSES 353. LEC.

HSES 355. Athletic Training Practicum II. 2 Hours.
This course provides a practical experience for the student-athletic trainer. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury/illness evaluation during their clinical and field experience. Specific skills addressed in HSES 354 will be practiced, applied, and mastered during this experience. Prerequisite: Admission to Athletic Training Education program and concurrent enrollment in HSES 354. FLD.

HSES 358. Creative Movement and Dance Appreciation. 3 Hours.
An appreciation for dance will be developed through the study of the pioneers of dance and the critique of local dance performances. Students will experience the following types of dance: creative movement, basic rhythms, ballroom dance, and folk and square dance. Prerequisite: Admission to the School of Education. LEC.

HSES 359. Kinesiology. 3 Hours.
This course is designed primarily for students in the field of exercise science who already have taken an introductory course in human anatomy and who need a more detailed exposure to concepts of functional movement anatomy. This course will provide a detailed study of the skeletal and muscular systems to include identification of the origin, insertion, and action of the major muscles of the human body. Students will become proficient in the use of directional and movement terminology used to describe movement and be able to identify the plane/axis as well as the agonist and antagonist muscles involved in a movement. Prerequisite: A course in human anatomy, admission to School of Education. LEC.

HSES 365. Peer Health Education. 3 Hours.
The course is designed to train students in peer health education, as peer health educators in college settings, and as trainers, training adolescents in community health settings for grades 6-12 peer health education. Subject content and teaching methodologies will be emphasized in the ten content areas of health with special emphasis on alcohol, drugs, tobacco, stress reduction, mental health and human sexuality. Prerequisite: HSES 260 or instructor consent. LEC.

HSES 366. Sociology of Sport. 3 Hours.
A survey of the current literature concerning the scope of sociology in the sport, the interaction of people in sport, the social systems controlling sport, and the small group dynamics in sport. Prerequisite: Admission to Sport Management program or permission of instructor. LEC.

HSES 367. The Coaching of Volleyball. 2 Hours.
Theory of volleyball, including methods of teaching fundamentals, individual and team offense and defense. Various styles of play and methods of coaching. Efficient performance of the skills during game conditions will be emphasized. LEC.

HSES 368. The Coaching of Softball. 2 Hours.
Theory and fundamentals of coaching softball. Methods of coaching, as well as team offense, defense, and strategies will be stressed. Efficient performance of the skills during game conditions will be emphasized. Prerequisite: Consent of instructor. LEC.

HSES 369. Neuromuscular Exercise Physiology and Motor Control. 3 Hours.
This course explores the control of human movement from an exercise neurophysiology perspective. Emphasis will be placed on understanding the interactions between the nervous system and muscular systems in the control of muscle force/power production and the control of movement under a variety of contexts. These contexts include responses and adaptations to exercise training, the aging process, and in a variety of neuromuscular disorders. Prerequisite: BIOL 240 and BIOL 246. LEC.

HSES 370. Functional Movement Anatomy. 3 Hours.
This course will provide a detailed study of the techniques used by the Athletic Trainer in regard to the assessment and evaluation of athletic injuries/illnesses of the lower extremity. Procedures for reporting and evaluating injuries/illnesses will be discussed so that appropriate injury management and referral may take place. The etiologic factors common to athletic injuries, as well as specific signs and symptoms of various athletic related pathological conditions will be discussed. Prerequisite: Admission to the Athletic Training Program, HSES 352, and HSES 353. LEC.

HSES 371. The Coaching of Softball. 2 Hours.
Theory and fundamentals of coaching softball. Methods of coaching, as well as team offense, defense, and strategies will be stressed. Efficient performance of the skills during game conditions will be emphasized. Prerequisite: Consent of instructor. LEC.

HSES 372. Sociology of Sport. 3 Hours.
A survey of the current literature concerning the scope of sociology in sport, the interaction of people in sport, the social systems controlling sport, and the small group dynamics in sport. Prerequisite: Admission to Sport Management program or permission of instructor. LEC.

HSES 373. Sport Ethics. 3 Hours.
This course will help students develop their abilities to reason morally through an examination within competitive sports of ethical theories, moral values, intimidation, gamesmanship, and violence, eligibility, elimination, winning, commercialization, racial equity, performance-enhancing drugs, and technology. Students will develop a personal philosophy of sport and
learn how to apply a principled decision-making process to issues in sport. Prerequisite: Admission to Sport Management program or permission of instructor. LEC.

**HSES 382. Sport Facilities and Event Management. 3 Hours.**
This course will provide students with a solid grasp of the fundamental skills in sport facility and event management and the knowledge base to apply those skills in a real world environment. Students will learn about planning, designing and financing the construction of new sport facilities, sport facility management of regular and special events, sporting event planning and game day operations. Prerequisite: Admission to the Sport Management program or permission of instructor. LEC.

**HSES 384. Sport Law. 3 Hours.**
This course is intended to introduce undergraduate students to the major legal issues in amateur and professional sports including dispute resolution, tort law, contract law, constitutional law, statutory law, labor and antitrust law and intellectual law. Students will also learn about risk management, gender equity, the Americans with Disabilities Act and agency law and sports agents. Prerequisite: Admission to Sport Management program or permission of instructor. LEC.

**HSES 385. Psychological Aspects of Exercise. 3 Hours.**
This course is designed for students interested in optimizing motivation and adherence to exercise among individuals in a wide range of physical activity settings (e.g., health clubs, corporate fitness, and physical therapy/rehab). The course content will include a review of the literature highlighting the psychological benefits of exercise, the theoretical advances in understanding the psychological aspects influencing individuals' participation in physical activity, and an introduction to strategies and techniques for professionals attempting to foster motivation and adherence to exercise among their clients. Prerequisite: Admission to the Community Health program or instructor consent. LEC.

**HSES 390. The Coaching of Track and Field. 2 Hours.**
Designed to acquaint the student with the fundamentals of track and field athletics. LEC.

**HSES 395. Concepts in Health and Wellness. 3 Hours.**
This is designed as an introductory course into the profession of School and Community Health Education. Regardless of a person's areas of specialization in Health Education, there are commonalities shared by all of us who are charged with the responsibility of providing education about health. Course emphasis will focus on: defining health education; history of health education; roles and competencies of health educators; theoretical bases for the profession; planning, implementing, administering, and evaluating health programs; settings for health education; future issues. Prerequisite: HSES 260. LEC.

**HSES 403. Health Behavior Theory. 3 Hours.**
This class will be an introduction to the primary models and theories used in health behavior research and health promotion practice. These models and theories undergird the development of successful health-related programs and interventions, and will help guide educators in the development of innovative and effective programming. The course will cover individual, interpersonal, community-level, and ecological theories, and students will have the opportunity to apply these theories to health behaviors of interest. LEC.

**HSES 410. Program Design in Physical Education. 3 Hours.**
The study of physical education curriculum models and extraclass programs appropriate for students in grades PK-12. Students will receive practical and field experiences related to program design and implementation. They will learn techniques appropriate for program evaluation as well as the assessment of student sport skills and fitness. Prerequisite: Admission to the HSES Teacher Certification Program. LEC.

**HSES 418. Health Aspects of Aging. 3 Hours.**
This course will consist of a Holistic Health approach to the various components of the aging process. Special emphasis will be placed on the demographic aspects of aging; normal aging changes and deviations in the aging process (pathophysiology); the relationship between mental and physical health, and the implications for the promotion of risk reduction and prevention principles that can effectively improve the quality of life for older individuals. Prerequisite: A course in personal and community health. LEC.

**HSES 434. Consumer Health. 3 Hours.**
This course will be a comprehensive examination of the factors involved in the selection of health products and services. Topics of discussion will be: protection laws and services, fraudulent practices and products, consumerism, and traditional and alternative health care. There will also be an in-depth examination of how to assess and evaluate health based products that are available to consumers. Prerequisite: Admission to the Community Health Program or consent of instructor. LEC.

**HSES 440. Applied Sport and Performance Psychology. 3 Hours.**
This course will examine the psychological principles and techniques that are applied to improve sport performance and other fields of achievement (e.g., exercise and wellness, music, and academics). Special attention will be given to psychological aspects of injury and rehabilitation, psychological conditioning, psychological training methods, coaching philosophy, the social psychology of team members, and components of peak performances. LEC.

**HSES 453. Communicable and Degenerative Diseases. 3 Hours.**
This course is designed to introduce the student to the study of the basic concepts/principles of disease process. Special emphasis will be placed on the etiology, origin, symptoms, treatment, body defenses, primary prevention, host, agent, (microbes) and environmental factors affecting disease occurrence, prevention and control measures. Topical application of the fundamental concepts of microbiology in school/community health practice will be critically discussed. The natural history of disease and disease classification will be highlighted. Many disease topics (both communicable and chronic, degenerative diseases) will be discussed. Prerequisite: A course in personal and community health. LEC.

**HSES 455. Manual Therapy Techniques and Emergency Care Instructor Training. 3 Hours.**
The purpose of the course is to train students in a Manual Therapy Technique for use in the clinical setting. The course is also designed to certify students as instructors in American Red Cross First Aid, CPR and AED courses as well as instructors for the CPR/AED for the Healthcare Provider. Prerequisite: Completion of HSES 352, HSES 354, HSES 456 and HSES 459 or equivalency from an accredited Athletic Training Education Program or have current First Aid and CPR/AED for the Healthcare Provider certification. LEC.

**HSES 456. Upper Extremity Evaluation. 3 Hours.**
The comprehensive study of the techniques used by the Athletic Trainer in regard to the assessment and evaluation of athletic injuries/illnesses of the upper extremity, head, and spine. Procedures for evaluating and reporting injuries/illnesses will be discussed as well as etiological factors and common signs/symptoms of various related pathological conditions. The purpose of this course is to prepare students with the skills necessary to accurately recognize the signs/symptoms of injuries and conditions in order to determine the nature and severity of the problems as well as establishing a proper care plan and medical referral when appropriate. Prerequisite: Admission into the Athletic Training Education Program, HSES 354, and HSES 355. LEC.
HSES 457. Athletic Training Practicum III. 2 Hours.
This course provides a practical experience for the student-athletic trainer. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury assessment and evaluation through a variety of techniques during their clinical and field experience. Specific skills addressed in HSES 456 will be practiced, applied, and mastered during this experience. Prerequisite: Admission into the Athletic Training Education program and concurrent enrollment in HSES 456. LEC.

HSES 458. General Medical/Pharmacology. 2 Hours.
This course will cover the general medical conditions/illnesses and pharmacological considerations commonly encountered in the field of Athletic Training. Prerequisite: Admission into the Athletic Training Education Program, HSES 456, and HSES 457. LEC.

HSES 459. Rehabilitation. 3 Hours.
This course discusses the planning involved and the implementation of a comprehensive rehabilitation program for injuries/illnesses sustained by the competitive athlete. Prerequisite: Admission into the Athletic Training program, HSES 456, and HSES 457. LEC.

HSES 460. Athletic Training Practicum IV. 2 Hours.
This course provides a practical experience for the athletic training student. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills obtained during previous coursework as well as apply rehabilitation skills obtained in HSES 459. Prerequisite: Admission into the Athletic Training Education program, HSES 457, and concurrent enrollment in HSES 459. LEC.

HSES 461. Organization and Administration of Athletic Training. 2 Hours.
This course discusses the planning, coordinating, and supervising of all administrative components of an athletic training program. This includes public relations, athletic health counseling, and coach advisement about athletes’ health matters. Prerequisite: Admission to the Athletic Training Education program, HSES 459 and HSES 460, and concurrent enrollment in HSES 562. LEC.

HSES 462. Athletic Training Practicum V. 2 Hours.
This course will provide a practical hands-on experience for the athletic training students enrolled in HSES 561. Prerequisite: Admission into the Athletic Training Education Program and concurrent enrollment in HSES 561. LFLD.

HSES 463. Senior Capstone in Athletic Training. 2 Hours.
This course is designed to allow senior Athletic Training Students to review previous content and prepare for the BOC certification exam as well as explore areas of professional development. Prerequisite: Admission into the Athletic Training program, HSES 561, and HSES 562. LEC.

HSES 464. Athletic Training Practicum VI. 2 Hours.
This course will provide a culminating practical experience for the athletic training students enrolled in HSES 563. Prerequisite: Admission into the Athletic Training Education program and concurrent enrollment in HSES 536. LFLD.

HSES 465. Program Assessment and Evaluation. 3 Hours.
This course will offer an introduction and hands-on application of program assessment and evaluation techniques in health education. As health educators and program planners, we are required not only to develop innovative programs and interventions to address community- and school-based health concerns, but also to give evidence that our efforts are both adequate and effective. Successful program assessment and evaluation incorporate knowledge of basic research methods as well as the theoretical understanding of health behaviors. LEC.

HSES 466. Program Planning in Health Education. 3 Hours.
This course is designed to provide the students with an in-depth knowledge of proven health planning models that can be used for program development and intervention. Students will learn how to develop attainable program goals and objectives which will allow programs and interventions to evolve into useful forms of community based health education. Prerequisite: Students must be admitted to the School of Education and the Community Health Program. LEC.

HSES 470. Introduction to Biomechanics. 3 Hours.
The course is designed to cover a basic understanding of the anatomical and mechanical principles of human movement. Areas covered will be joint and segmental movement, muscle actions, time-displacement motion description, forces causing or inhibiting motion, and stability. Special attention will be given to the application of the theoretical concepts in movement activities. Prerequisite: Anatomy, admission to the Exercise Science program, or permission of instructor. LEC.

HSES 472. Exercise Physiology. 3 Hours.
A fundamental study of the physiological adjustments that occur within the body during exercise. The presentation of this material is particularly oriented toward a basic understanding of the physiological systems as they are affected by the activity of a normal coaching or teaching situation. The physiological values of exercise are also stressed. Prerequisite: Three hours of physiology. LEC.

HSES 473. Clinical Fitness Evaluation Techniques. 3 Hours.
This course will provide the student with the knowledge and skills to assess components of physical fitness in adults including cardiorespiratory fitness, body composition, strength, and flexibility. In addition, specific emphasis will be placed on the development of exercise and weight management prescriptions. Students completing the course will have the skills to take the Health Fitness Instructor Certification exam given by the American College of Sports Medicine. Prerequisite: Exercise physiology or equivalent. LEC.

HSES 474. Exercise Biochemistry. 3 Hours.
This course will examine the processes that underlies the use and production of energy for exercise. Topics that will be explored include glycojenolysis and glycolysis in muscle, cellular oxidation of pyruvate, lipid metabolism, metabolism of proteins and amino acids, molecular biology, neural and endocrine control of metabolism, and local fatigue during exercise. Emphasis will be placed on carbohydrates, protein, and lipid metabolism and the acute and chronic effects that exercise has on these processes. Prerequisite: HSES 472. LEC.

HSES 480. Physical Activity and Exercise Management Individuals with Disabilities. 3 Hours. AE41.
An in-depth study of how physical activity and exercise can be a part of the treatment plan for people who have chronic disease or a disability. A variety of physical activity and exercise intervention programs and models will be presented and discussed, as well as protocols for baseline testing and post-treatment testing. A portion of this course will focus on how physical activity and exercise can prevent motor functioning deterioration in people who have a disability or limited functional movement. Prerequisite: Admission to the School of Education Exercise Science or Athletic Training programs and a course in human anatomy and physiology, or consent of instructor. LEC.

HSES 482. Drugs in Society. 3 Hours.
This course is designed to provide an in-depth exposure to basic drug classification, pharmacological effects, causes of drug abuse to society,
common treatment modalities, and effective prevention/intervention strategies. In addition, consumer issues related to drug use, drug legislation, and drug education programs for school and community implementation will be discussed. Prerequisite: A course in personal and community health or consent of instructor. LEC.

HSES 483. Sport Finance and Economics. 3 Hours.
This course will help students gain an understanding of the critical importance of budgeting and financing sports-related industries based on sound financial principles and methods of financial control. Students will learn how economic principles shape the major national industry of sport. Prerequisite: Admission to Sport Management program or permission of instructor and completion of or concurrent registration in FIN 305 or FIN 310. LEC.

HSES 485. Sport Communication. 3 Hours.
This course examines the complex and evolving field of sport communication including personal, organizational, and external perspectives of sport communication. LEC.

HSES 486. Sport Marketing. 3 Hours.
This course is intended to provide undergraduate students with basic knowledge and competencies in definitions of marketing and sport marketing, understanding the unique aspects of sport marketing, marketing planning process, consumer demographics and psychographics, the marketing mix, segmentation and target marketing, marketing proposal preparation, sponsorship, endorsement, merchandising, fundraising, marketing goals and objectives, sport consumer and consumer behavior, industry segmentation, special events, ticket sales and their use in promotion, the role of the media, television marketing ratings and shares and venue and event marketing. The proposed content of this course will address each of these expectations. Prerequisite: Admission to the Sport Management program or permission of instructor. LEC.

HSES 487. Personnel Management in Sport. 3 Hours.
This course provides students with an overview of the requisite communication skills and concepts of leadership and management as they relate to sport managers. Students will learn how leadership and management practitioners, utilizing effective communication techniques, shape successful sport organizations. Additional emphasis will be placed on building and nurturing relationships with people as a key to effective management. Prerequisite: Admission to Sport Management program or permission of instructor. LEC.

HSES 488. Pre-Internship Seminar. 1 Hour.
This course will prepare students for their actual semester-long internship experience. Students will be provided with background information on available internship sites to assist in their site-selection decision. Students will learn about different management styles they may encounter, the traits and characteristics of effective and productive employees, common rules of the workplace and internship experiences of previous HSES Interns. Prerequisite: All HSES students must be in final semester prior to Internship. LEC.

HSES 489. Health and Human Sexuality. 3 Hours.
The course is designed to encompass the various components of human sexuality as well as to demonstrate applicable teaching techniques for sex education. Included in the content of the course are: human sexual response, sexually transmitted diseases, family planning, sex roles, rape, sexual preferences, and topics such as sexuality and the handicapped, sexuality and the mass media, and sexuality and the church. Teaching techniques such as values clarification, non-verbal communications, role playing, tape recordings, and problem solving are demonstrated with appropriate topics. LEC.

HSES 497. Independent Study. 1-3 Hours.
Only one enrollment permitted each semester; a maximum of six hours will apply toward the bachelor's degree. This course cannot be taken as a substitute for a required course. Prerequisite: Recommendation of advisor and consent of instructor and department chairperson. IND.

HSES 499. Internship in Sport Management. 2-16 Hours. AE61.
A full-time work experience in the sport industry (40 hours per week). This experience is actual work in a sport management setting in which management practices are applied. Student interns are directed and evaluated by a faculty member with appropriate supervision by an on-site professional. Student interns must keep an accurate accounting of hours with a performance work diary. Grades/credit for the internship are determined by a faculty member with input from the on-site supervisor. Prerequisite: Completion of all Sport Management coursework. Admission to the Sport Management Internship program. FLD.

HSES 500. Student Teaching in:______. 14 Hours. GE11.
A supervised teaching experience in an approved school setting, teaching physical education at the elementary level and health and physical education at the secondary level. The student must teach 8 weeks at the elementary level and 8 weeks at the secondary level. Prerequisite: A cumulative GPA of 2.75 or higher and admission to the HSES teacher certification program. FLD.

HSES 501. Seminar in Teaching Health and Physical Education. 2 Hours. AE61.
Student teachers will learn to analyze teaching styles and instructional methods that apply and/or relate to their student teaching experience. Discussions of various teaching practices will be facilitated by the university supervisor with input from the student teachers. Topics will include: curriculum, teaching methods, discipline, safety, equipment, and communicating with teachers, parents, and students. Prerequisite: Admission to the HSES Teacher Certification Program. LEC.

HSES 502. Camp Leadership and Counseling. 2 Hours.
Involves a complete study of the organization and administration of the various types of camps. It is designed to familiarize the student with camp leadership responsibilities; the development of the camp, the program involving camp crafts, outdoor cookery, hikes and outings, singing, and simple guidance of the individual camper. Prerequisite: General psychology plus three hours in sociology. LEC.

HSES 515. Assessment of Motor Development and Motor Control of Exceptional Children. 3 Hours.
Standardized motor assessment tools appropriate for use with exceptional children with motor difficulty will be critiqued and practiced. A battery of tests to measure developmental lag or structural deviation will be selected and administered to determine the motor control of exceptional children and the results will be interpreted. Prerequisite: Six hours of physical education course work. LEC.

HSES 528. Techniques of Athletic Training - 1 Lower Extremity. 3 Hours.
This course provides a comprehensive study of the techniques used by the Athletic Trainer in regard to the assessment and evaluation of athletic injuries/illnesses of the lower extremity, abdomen, and thorax, as well as the study of common illnesses/diseases that affect the physically active. Procedures for reporting and evaluating injuries/illnesses will be discussed so that appropriate injury management and referral may take place. The etiological factors common to athletic injuries, as well as specific signs and symptoms of various athletic related pathological conditions, will be discussed. Prerequisite: Human Anatomy, Human Anatomy Lab, Care and Prevention of Athletic Injuries, and admission to the Athletic Training Program. LEC.
HSES 529. Techniques of Athletic Training - II Upper Extremity. 3 Hours.
The comprehensive study of the techniques used by the Athletic Trainer in regard to the assessment and evaluation of athletic injuries/illnesses of the upper extremity, head, and spine. Procedures for evaluating and reporting injuries/illnesses will be discussed as well as etiological factors and common signs/symptoms of various related pathological conditions. The purpose of this course is to prepare students with the skills necessary to accurately recognize the signs/symptoms of injuries and conditions in order to determine the nature and severity of the problem as well as establishing a proper care plan and medical referral when appropriate. Prerequisite: HSES 528 Techniques of Athletic Training - I Lower Extremity. LEC.

HSES 565. Methods and Materials in Health Education. 3 Hours.
Emphasis is placed on the presentation and preparation of health topics along with the recommended resources and materials available. The teaching method is emphasized and student participation is stressed. Students will observe health teachers in the public schools and identify and discuss these methods as they relate to the methods present in the class. Prerequisite: Admission to HPED teacher certification program or consent of instructor. LEC.

HSES 573. Introduction to Health Education. 3 Hours.
This course will provide an overview of the various health education professions. Topics emphasized in the course are: the nature of health education, in-depth description of community health, the school health program, and identifying program and services of voluntary and services of voluntary and official health and welfare organizations. Prerequisite: Admission to the School of Education and the Community Health Program. LEC.

HSES 578. Health Internship Seminar. 2 Hours.
Students enrolled in the internship will learn how to analyze professional health environments, examine intervention programs, and understand models used to develop health based programs. Discussions surrounding the internship experience will be facilitated by the health education faculty. Topics will relate to all phases of the internship experience. The intent of this course is to better prepare the student for entering the health profession. Discussions will be held on conflict resolution in the work place, professional development, professional behavior and etiquette. Prerequisite: Concurrent enrollment in HSES 580 Internship in Health. LEC.

HSES 580. Internship in:_____. 2-16 Hours.
A supervised internship experience in an approved setting. The specific type of internship experience and the credits for that particular experience will be outlined in the appropriate program of the student. Prerequisite: Admission to a HSES Internship Program. FLD.

HSES 581. Athletic Training Practicum I: Recognition and Evaluation. 4 Hours.
This course provides a practical experience for the student-athletic trainer. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury/illness evaluation, and the management and treatment of athletic injuries through a variety of therapeutic modalities during their clinical and field experience. Specific skills addressed in HSES 529 and HSES 654 will be practiced, applied, and mastered during this experience. Prerequisite: HSES 581 and concurrent enrollment in HSES 529 and HSES 654. LEC.

HSES 583. Athletic Training Practicum III: Rehabilitation. 4 Hours.
This course provides a practical experience for the student-athletic trainer. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills of injury rehabilitation/reconditioning through a variety of therapeutic exercise techniques during their clinical and field experience. Specific skills addressed in HSES 529 will be practiced, applied, and mastered during this experience. Prerequisite: HSES 582 and concurrent enrollment in HSES 529. LEC.

HSES 584. Athletic Training Practicum IV: Senior Sport Experience. 4 Hours.
This course provides a culminating practical experience for the student-athletic trainer. Students gain experience through a hands-on approach via clinical settings and field experiences. Practical experiences are supervised by a Certified Athletic Trainer and provide opportunities for students to apply the knowledge and skills obtained during previous coursework as well as apply administrative and management skills obtained in HSES 585. This course is intended to allow the Senior student more freedom and responsibility in decision making regarding the health care of an athletic team. Prerequisite: HSES 583, concurrent enrollment in HSES 585. LEC.

HSES 598. Special Course:_____. 1-5 Hours.
A special course of study to explore current trends and issues in health and physical education - primarily for undergraduates. LEC.

HSES 605. Administering Health Related Programs. 3 Hours.
This course will consist of an analysis of administration as it relates to both school and community health programs. The focus will be on administrative models and techniques used to establish and maintain sound health programs in school and community settings. Prerequisite: Six hours of health education or consent of instructor. LEC.

HSES 671. Applied Biomechanics. 3 Hours.
This course will examine the qualitative biomechanical analysis of human movement directed towards the goals of performance improvement and injury prevention and rehabilitation. Specifically, this course will provide students with a basis knowledge of the biomechanical foundations of human movement, the knowledge and skills necessary to complete a systematic analysis and evaluation of human motor performance, and the ability to determine and provide interventions that are likely to improve movement in athletic, clinical, educational, and work environments. Prerequisite: A course in human anatomy, admission to the HSES Teacher Certification Program or consent of instructor. LEC.

HSES 714. Motor Development During Growth. 3 Hours.
Motor development in childhood and adolescence and its relationship to physical growth. Factors influencing motor learning and development will be explored. This course provides basic understanding of the neuromuscular changes and abilities of children and adolescents. Prerequisite: A course in kinesiology and anatomy. LEC.

HSES 715. Understanding Research in HSES. 3 Hours.
This course introduces the concepts and skills involved in understanding and analyzing research in education and related areas. The course
provides an overview of basic, general knowledge of various research methodologies. Students should expect to study much of this material in greater depth through additional work before being fully prepared to conduct independent research. However, this course should enhance their ability to locate, read, comprehend, and critically analyze research articles and reports. Topics in the course include quantitative and qualitative methods and designs, historical and descriptive research, and program evaluation. (This course fulfills the requirement of a research methods course in the first 12 hours of graduate study.) Prerequisite: Must be an admitted HSES graduate student. LEC.

HSES 730. Advanced Concepts in Nutrition. 3 Hours.
A study of the nutritional factors that affect health at all ages. Specific nutritional needs and effects of deficiency states on health will also be addressed. The course will also include the physiological and biochemical mechanisms involved in the use of nutrients for human growth and development as well as the production of energy through the metabolic process. Prerequisite: HSES 330 or equivalent experience and permission of instructor. LEC.

HSES 771. Internship in Exercise Science. 6 Hours.
A supervised internship experience in an approved exercise science setting. Students will gain experience through a hands-on approach via clinical and/or research settings. The specific type of internship experience will be agreed upon by the student and their academic advisor. Prerequisite: Successful completion of at least 24 graduate credit hours. LEC.

HSES 777. Practicum in Health Education and Wellness Promotion. 1-3 Hours.
This course is designed to provide practical community health experiences in health education and wellness promotion, including: assessment, planning, implementation and program evaluation. With approval of the instructor, students may choose their practicum focus in any of the ten content areas of health: mental and emotional, family living, growth and development, nutrition, personal health, alcohol tobacco and other drugs, communicable and chronic diseases, injury prevention and safety, consumer health and environmental health. Prerequisite: Enrolled in graduate school and consent of the instructor. LAB.

HSES 779. Physiology of Functional Aging. 3 Hours.
The course has been designed to address issues and concepts relating to the biological aging process as a foundation for physical performance, general fitness, and health status. The biological concepts are applied to the human physiological aging process and the systems involved as well as the possible interventions that may effect that process. The several theories associated with physiological aging are also addressed as related to the physiological systems and current research that may impact the understanding of these theories. Prerequisite: A course in basic biology. LEC.

HSES 780. Internship in Teaching Physical Education: _____ 1-16 Hours.
A supervised internship experience leading to initial physical education teacher certification. The student assumes the total professional role as a teacher of physical education in an approved school setting. FLD.

HSES 795. Traditions and Principles in Health Education. 3 Hours.
This course is designed to explore the philosophy and principles which provide the foundation of health education as an academic discipline. Specific topics include: history of the profession, theories of health behavior and behavior change, principles of learning applied to health communications, health promotion practices, professional preparation, and the integration of philosophical and ethical ideals into program planning and implementation. LEC.

HSES 798. Special Course: _____. 1-5 Hours.
A special course of in-depth study exploring current trends and issues in health and physical education - primarily for undergraduates. LEC.

HSES 801. Sport Facilities. 3 Hours.
The purpose of this course is to study current developments and trends in the financing, programming, design, and construction of facilities for intercollegiate athletics and professional sports. Prerequisite: Admitted to graduate school. A course in the administration/management of sport or consent of the instructor. LEC.

HSES 803. Health Behavior Theory. 3 Hours.
Given that theories of health behavior drive research and practice in health education, the purpose of this course is to familiarize students with the major theories and planning models related to health behavior change. Particular focus will be applied to the role of theory in health promotion and critical analysis of the application of theory to guide research practices. Prerequisite: Health major or consent of the instructor. LEC.

HSES 804. Sport Psychology. 3 Hours.
This course is designed to introduce students to the current research and theoretical perspectives in the sport psychology literature. Specifically, students will gain a broad understanding of the three major areas of sport psychology: social psychology (e.g., motivation), performance enhancement (e.g., mental skills training), and psycho-physiology (e.g., impact of anxiety on performance). Prerequisite: Admission in the health program or consent of the instructor. LEC.

HSES 805. Laboratory Experiments and Analysis--Exercise Physiology. 3 Hours.
Students will learn the techniques of operating various types of laboratory equipment and will conduct small-scale lab experiments in areas such as respiration, circulation, metabolism, strength, neuromuscular function, cardiac function, and body composition. Special emphasis will be placed on laboratory techniques of assessing physical fitness. Prerequisite: A course in exercise physiology. LAB.

HSES 806. Stress Management. 3 Hours.
The long range objectives of this course are to assist students in gaining stress management knowledge; to help them to formulate improved perspectives on various stress management techniques; and consequently apply the developing constructs in their lives with a sense of purpose and self-responsibility. Prerequisite: Two courses in health education or consent of instructor. LEC.

HSES 807. Current Literature in Exercise Physiology. 2 Hours.
A wide range of topics from the exercise physiology literature will be discussed. Instructor and students will present reports to the group centered on current research findings with discussion aimed at application of these results to physical exercise and training. Prerequisite: A basic course in exercise physiology or consent of instructor. LEC.

HSES 808. Biomechanics of Human Movement. 3 Hours.
This course will examine the movements and the structure and function of human beings by means of the methods of mechanics. An emphasis will be placed on the two primary goals of biomechanics: performance improvement and injury prevention and rehabilitation. Topics to be covered include the kinematics and kinetics of human movement, muscle mechanics, bone and joint mechanics, and the biomechanics of musculoskeletal injury. Prerequisite: Courses in calculus, physics, anatomy, and biomechanics, or consent of instructor. LEC.

HSES 810. Advanced Exercise Physiology. 3 Hours.
An advanced study of the physiological and biomechanical aspects of muscular, cardiovascular, and respiratory function as the human is engaging in exercise. The topics of energy metabolism, hormones, and
nutrition as related to exercise also are presented. Prerequisite: A basic course in exercise physiology. LEC.

HSES 812. Current Issues in Health. 3 Hours.
This course is designed to review and discuss current issues in various health related areas. The focus will be on relevant issues and topics that are guiding and directing the health profession. The range of topics discussed will vary from popular literature to scientific research and cover such areas as health education, community health, and health over the lifespan. Students in the course will be expected to report, discuss, and interact with each other concerning the issues as they are reported. Prerequisite: A graduate course in health or consent of the instructor. LEC.

HSES 814. Implementing Health Programs. 3 Hours.
The purpose of this course is to explore planning models used for designing, implementing and managing health promotion programs. Students will be trained to develop objectives, assess determinants, select methods and strategies, pre-test program materials, and adopt and implement promotional plans. Problem based and community based learning experiences will be provided. Prerequisite: A health major or permission from the instructor. LEC.

HSES 817. Practical Aspects of Aerobic and Resistance Training. 3 Hours.
This course will be a discussion of various concepts related to aerobic and resistance training. By the end of the semester, the student should be able to demonstrate an understanding of information presented in this course by achieving satisfactory evaluations of presentations, papers, and an examination of the following topics: energy metabolism, general adaptations of aerobic and resistance training, exercise techniques for aerobic and resistance training, periodization of training, testing and evaluation of aerobic and resistance training performance, and exercise prescription for aerobic and resistance training. Prerequisite: Undergraduate course in exercise physiology or consent of instructor. LEC.

HSES 818. Legal Aspects of Public Health Education. 3 Hours.
This course is designed to enhance understanding of the variety of legal issues which affect health educators and their audiences. Specifically, this course will survey federal, state, and local public health laws and regulations which may prescribe health education content and the health educator’s actions. Legislation will be analyzed and the practical impact of the health educator upon the legislative process will be emphasized. Prerequisite: A course in community health or consent of instructor. LEC.

HSES 823. Behavior Modification in Health and Exercise. 3 Hours.
This course will examine the behavioral principles that influence health and exercise practices. Theories of human behavior, reinforcement theory, and models of self-esteem will serve as the foundation for understanding behavior change. Society influences will be strongly emphasized. Course topics will include exercise determinants, motivation, media representation, negative behaviors, self-efficacy, social support, and effective promotion strategies. Prerequisite: Admitted to Graduate School or consent of instructor. LEC.

HSES 824. Epidemiology and Concepts of Disease Causation. 3 Hours.
This course involves the study of the etiology and natural history of infectious and non-infectious diseases including vector control, host defenses and resistance, investigation of disease outbreaks, mental health and public health. The course deals with detailed analytic and descriptive epidemiology and their implications for improving our understanding of health and diseases; epidemiologic consequences of nuclear war and retrospective and prospective approaches in epidemiological research. Contemporary developmental methods for disease prevention will be critically reviewed. Prerequisite: HSES 573, or equivalent, or consent of instructor. LEC.

HSES 825. Skeletal Muscle Physiology. 3 Hours.
This course will provide the student with an in-depth study of the structure and development, contractile mechanics, and neuromuscular system as it relates to the skeletal musculature. Structure and Development - muscle fiber, motor neuron, neuromuscular junction, muscle receptors, muscle formation, development of muscle innervation. Putting Muscles to Work - ion channels, pumps, and binding proteins, axoplasmic transport, resting and action potentials, neuromuscular transmission, muscle contraction, motor units, exercise, muscle metabolism. The Adaptable Neuromuscular System - fatigue, loss of muscle innervation, recovery of muscle innervation, neurotrophism, disuse, muscle training, injury and repair, aging. Prerequisite: HSES 810 or equivalent. LEC.

HSES 828. Sport Finance. 3 Hours.
A study of the principles and applications of finance and economics in the sport industry. Strategic financial planning as a part of management responsibilities is highlighted. Prerequisite: Admitted to Graduate School. LEC.

HSES 830. Socio-Cultural Dimensions of Sport. 3 Hours.
Current literature concerning the impact of American social values and cultural patterns of sport and physical activity will be studied. Critiques of related research involving sport and social institutions, and socio-cultural groups in sport will be emphasized. Prerequisite: A course in Sociology of Sport or consent of instructor. LEC.

HSES 831. Ethics in the Sport Industry. 3 Hours.
This course is designed to help students learn to make morally reasoned decisions in various sport settings. This course will help prepare students to respond more responsibly when faced with challenging ethical dilemmas and guide them in learning to serve as role models for ethical conduct. LEC.

HSES 832. Physical Education Instructional and Assessment Methods. 3 Hours.
The study of research-based instructional and assessment methods appropriate for PK-12 physical education. Managerial, instructional, and supervisory skills will be developed. Traditional and alternative assessment tools will be discussed. Readings, observations (live and video), and practice teaching will prepare students to complete a practical experience and an action research project in a PK-12 school. Prerequisite: Admission to Graduate School. LEC.

HSES 833. Public Health Aspects of Exercise. 3 Hours.
This course describes the timeline for physiologic adaptations to long-term physical activity. It describes the effects of physical activity on chronic disease. It describes, from a population perspective, the effects of physical activity on the health of the nation. Prerequisite: 12 hours of HSES courses, or equivalent, or consent of instructor. LEC.

HSES 836. Physical Education Curriculum Models. 3 Hours.
An examination of the elements and processes of curriculum construction in physical education for elementary, secondary, and post-secondary institution, and the institutional and professional issues that affect these processes. A study of contemporary curricula structures in regard to planning, implementation, and evaluation of K-12 curricula and professional preparation curricula in physical education programs. Prerequisite: A course in physical education curriculum, or equivalent. LEC.

HSES 840. Organizational Behavior in Sport. 3 Hours.
This course utilizes a micro perspective to analyze the behavior and culture within sport organizations. Specifically, the student will study and learn how to apply management and leadership theories that have the
potential to shape the work environment and will discuss how current topics in organizational behavior are particularly relevant to the sport industry. Prerequisite: Admitted to Graduate School. Consent of the instructor. LEC.

**HSES 842. Sports Marketing. 3 Hours.**
This course helps students gain a deeper understanding of sport marketing by examining in-depth the sport marketing mix of product, price, place, and promotion as well as marketing research, marketing strategy, market segmentation, branding, sponsorships, licensing, venue and event marketing, public relations, and global sport marketing. LEC.

**HSES 850. Analysis Techniques for Health, Sport, and Exercise Sciences Laboratory and Field Data. 3 Hours.**
Techniques for analyzing data gathered in Health, Sport, and Exercise Sciences laboratories and field studies will be presented in this course. Techniques for the recording of raw data, appropriate organization of raw data, selection of test for analysis of data, use of computer software, and computer programming for analysis and reporting results of the data will also be included. Prerequisite: PRE 710, PRE 720, or PRE 725. LEC.

**HSES 866. Contemporary Trends in Elementary and Secondary Physical Education. 3 Hours.**
An in-depth study into the research and other forms of literature will be made to study and examine the latest trends in elementary and secondary school physical education. Games, activities, dances, and rhythms will be presented and discussed relative to developmental levels of students grades K-12. Prerequisite: A methods course in teaching physical education or consent of instructor. LEC.

**HSES 872. Exercise and the Cardiovascular System. 3 Hours.**
This course will be a discussion of various concepts specifically related to exercise and the cardiovascular system. By the end of the semester, the student should be able to demonstrate an understanding of the interaction of exercise and cardiovascular system by achieving satisfactory evaluations on examinations, abstracts, and classroom presentations. The following topics will be discussed as they relate specifically to exercise: homeostasis and cardiovascular transport mechanisms, basic structure and function; characteristics of cardiac cells; the heart as a pump; the peripheral vascular system; vascular control; venous return and cardiac output; regulation of arterial pressure; cardiovascular responses to stress; and cardiovascular function in pathological situations. Prerequisite: Undergraduate course in exercise physiology or consent of instructor. LEC.

**HSES 880. Internship in Sport Management. 1-10 Hours.**
This course will provide for supervised and directed experiences in selected sport management settings. The graduate advisor will schedule observations of the internship, as well as regular conferences with the student. Written summaries and evaluations of the internship will be prepared by the student, the agency supervisor, and the university graduate faculty member. Prerequisite: Admission to the Graduate Program in Sport Management. FLD.

**HSES 884. Legal Aspects of Sport. 3 Hours.**
This course is intended to introduce graduate students to the basic concepts of the American legal system and the application of them to intercollegiate and professional sports. Particular emphasis will be given to risk management and preventive law. Other topics include: governance issues in intercollegiate and professional sports, contract law, employment discrimination, labor relations and collective bargaining, agency law and athlete agents, regulation of participation in intercollegiate and high school athletics, sport facility and event issues, participant liability issues, product liability issues, premises and spectator liability, participant violence in sports, and intellectual property law. Prerequisite: Admission to graduate program in School of Education LEC.

**HSES 890. Seminar in HSES. 3 Hours.**
This course is designed to provide a general research seminar learning experience for graduate students in HSES. In particular, students will learn about faculty research activities and interests from a variety of specialty areas both within KU and outside of KU. Through faculty and guest presentations, students will be exposed to a variety of design and methodologies used to conduct research in the specialty areas of HSES. LEC.

**HSES 892. Psychology of Physical Activity. 3 Hours.**
This course is designed for students interested in optimizing motivation and adherence to exercise among individuals in a wide range of physical activity settings (e.g., health clubs, corporate fitness, physical therapy). The course content includes a review of the literature highlighting the psychological benefits of exercise, the theoretical advances in understanding the psychological aspects of individuals’ participation in physical activity, and strategies and techniques for professionals attempting to foster motivation and adherence to exercise among their clients/members. Prerequisite: Admission in the health program or consent of the instructor. LEC.

**HSES 897. Independent Study. 1-4 Hours.**
Prerequisite: Consent of advisor and instructor. RSH.

**HSES 898. Master's Project. 1-4 Hours.**
RSH.

**HSES 899. Master's Thesis. 1-6 Hours.**
THE.

**HSES 905. Advanced Concepts in Health Education. 3 Hours.**
This course is designed as an in-depth study of the pedagogy of health education. It is concerned with the effects of various health education models, new materials, and innovative teaching techniques. The effectiveness of various media such as films, slides, transparencies, microcomputers, and assessment tools will be analyzed. Research concerning innovations in education will be investigated along with a study of future trends in the field. Timely issues of controversy about health education practices and the effectiveness of values clarification activities will also be discussed. LEC.

**HSES 906. Scientific Dimensions of Exercise and Health. 3 Hours.**
This course will include an in-depth examination of metabolic and endocrine principles as they relate to physical exercise and training. Specific topics will include: substrate utilization in exercise, metabolic controls, muscle biochemistry, body composition, nutritional aspects and hormonal influences in exercise. Both instructor and students will report on the most current literature relating to the topics. Prerequisite: Human biodynamics or a course in biochemistry. LEC.

**HSES 926. Grant and Research Proposal Writing. 3 Hours.**
This is a course for students to examine the sources and areas which provide financial support for research projects. The areas of study include types of research funding available on a local, state, and federal level, the elements and design of writing a proposal and strategies involved in securing financial support for research. A focus for the course will center upon preparing a research proposal for funding. Prerequisite: PRE 710. LEC.

**HSES 940. Biometrics Laboratory and Field Data. 3 Hours.**
This course focuses on the interdisciplinary nature of this relationship and reviews the physiological, sociological, psychological, and behavioral factors involved. Prerequisite: Fifteen hours of graduate
level course work in health or physical education and admission to health
or physical education doctoral program. LEC.

HSES 980. Advanced Topics: ______. 1-3 Hours.
A special course of study to meet current needs of education professionals -- primarily for post-master's level students. LEC.

HSES 981. Current Issues in Health and Physical Education. 3 Hours.
This course will explore the latest philosophical issues and controversies which are impacting the fields of health, physical education, and athletics. The student will explore the current and future ramifications of each issue and its potential effects on the profession. Prerequisite: Admission to the Health, Sport, and Exercise Sciences Doctoral Program. LEC.

HSES 990. Doctoral Seminar. 3 Hours.
This seminar based course will be designed to prepare the doctoral student for academic careers or careers in industry after they graduate. The topics covered will be promotion and tenure procedures and expectations, including but not limited to teaching, responsible conduct of research, professional ethics, historical ethical issues, evaluation of ethical dilemmas, and service expectations at research intensive institutions, regional comprehensive institutions and small liberal arts colleges. Industry career options will be discussed and guest speakers from various disciplines will be brought in to discuss options and expectations with this career path. Prerequisite: Doctoral student or permission of the instructor. LEC.

HSES 995. Field Experience in: ______. 1-5 Hours.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. FLD.

HSES 996. College Teaching Experience in: ______. 3 Hours.
To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate’s committee. FLD.

HSES 997. Individual Study. 1-4 Hours.
Prerequisite: Prior graduate course work in the area of study and consent of instructor. RSH.

HSES 999. Doctoral Dissertation. 1-15 Hours.
THE.

Psychology Research in Educ Courses

PRE 106. Multicultural Student Leadership Seminar. 2 Hours.
This course will introduce students of color to leadership theory and develop personal skills in the areas of organizational, career, and community leadership. Topics covered include public speaking, group process, time management, and discussion of the special challenges for leaders of color. Prerequisite: Must have taken Hawk Link PRE 101 and fewer than 60 hours credit from the University of Kansas. LEC.

PRE 210. Career and Life Planning: Decision-Making for College Students. 3 Hours.
The purpose of this course is to assist college students in career and life planning choices by first understanding the current theories of career decision-making and then by applying those theories to their own choices. The course will meet twice each week, the first being a lecture session, with the second session consisting of smaller groups of six to eight students. Students will be exposed to information related to the career development process, factors that affect the career choice process, knowledge of work environments, sex role socialization, career and decision making processes, and how to approach the job search. Experiential learnings will include exercises related to values clarification, self understanding, knowledge of interests, competencies and personality characteristics, decision making, use of career information, and implementing a plan of action. Weekly course assignments will include activities in class and homework units. Prerequisite: Enrollment in this course is limited to students with fewer than 60 hours of college credit. LEC.

PRE 305. Development and Learning of the Child. 3 Hours. GE3S.
An introduction to the study of children’s thinking, behavior, and development in school, home, and community settings. Classic and contemporary theories of developmental and educational psychology will be addressed; these theories will provide a foundation for thinking about important contemporary issues in child development. Specific topics covered will include research methods for studying children’s development, cognitive development, intelligence, language, emotional development, aggression, moral development, and family and peer relationships. Emphasis will be placed on the study of individuals and groups, describing the process of development, and considering educational implications of theory and research. LEC.

PRE 306. Development and Learning of the Adolescent. 3 Hours. GE3S.
An introduction to the psychological study of adolescents and their behavior in the middle and high school setting. Theories of learning, motivation, and physical, cognitive, emotional and social development and their relevance to educational processes in secondary schools will be examined. Emphasis will be placed on observing and studying individuals and groups and describing their characteristics and the process of development, as well as considering implications for instructional strategies appropriate at the secondary level. Prerequisite: Admission to the Teacher Education Program. LEC.

PRE 450. Introduction to Counseling Psychology. 3 Hours.
An historical and contemporary overview of the science and practice of counseling psychology, including trends in the roles and functions of counseling psychology practitioners, the research and scientific foundations of counseling practice, the psychological theories of counseling and psychotherapy that guide professional practice, and the ethical and professional issues confronting counseling practitioners. Prerequisite: PSYC 104. LEC.

PRE 455. Managing and Motivating Learners in the Pre K-6th Grade Classroom. 3 Hours.
This course is designed to help elementary preservice teachers organize an enriched learning environment and develop strategies for managing and motivating students to help them become better and more responsible learners. Prerequisite: CT 322, PRE 305 or equivalent. LEC.

PRE 456. Managing and Motivating Learners in the Middle and Secondary Classroom. 3 Hours.
This course is designed to help middle and secondary preservice teachers organize an enriched learning environment and develop strategies for managing and motivating students to help them become better and more responsible learners. Prerequisite: CT 324, PRE 306 or equivalent. LEC.

PRE 497. Independent Study. 1-2 Hours.
Only one enrollment permitted each semester, a maximum of four hours will apply toward the bachelor's degree. Graded on a satisfactory/
unsatisfactory basis. Prerequisite: Recommendation of advisor and consent of instructor. IND.

PRE 515. Research Methods for McNair Scholars. 3 Hours.
This course provides participants in the McNair Scholars program with an understanding of research methods appropriate to their field so they can write proposals for their summer research projects. Prerequisite: Acceptance into the McNair Scholars Program. LEC.

PRE 520. Classroom Assessment. 3 Hours.
This course is an introduction to the concepts and skills required to develop and evaluate various forms of formal and informal classroom assessments to determine student learning and teacher instructional effectiveness. LEC.

PRE 575. Internship Exploration. 1-5 Hours. AE61.
This course provides academic credit for a supervised practical experience in an occupational area of interest. In addition to the work-related activity, students will complete reading and writing assignments, participate in on-line discussion and create a final portfolio of internship accomplishments. Credit hours (1-5) are based on number of hours at internship site in agreement with instructor. Prerequisite: Secured internship of 8 hours per week or more for semester in which student will be enrolled in the course; permission from instructor. FLD.

PRE 580. Positive Psychology. 3 Hours.
An introduction to the core assumptions and research findings associated with human strengths and positive emotions. Also an exploration of interventions and applications informed by positive psychology in counseling and psychotherapy, and its application to school, work, family and other close relationships. (Same as PSYC 598.) Prerequisite: PSYC 104 or consent of instructor. LEC.

PRE 598. Special Course: ____. 1-5 Hours. AE61.
A special course of study to meet current needs of education students--primarily for undergraduates. LEC.

PRE 700. Advanced Educational Psychology: Development and Education of the Adolescent. 2-3 Hours.
An introduction, from a psychological perspective, to topics and problems in the development of adolescents and youth, with emphasis on application to educational issues. Note: To be offered annually. LEC.

PRE 702. Advanced Educational Psychology: The Development and Education of the Child. 3 Hours.
Study of children from a cognitive developmental perspective. Changes in children are examined in light of environmental influences including social factors, educational practices, and child-rearing as they interact with conditions internal to children. Key issues include the study of cognition, language, motives, social-emotional issues, the self, and the problem of developmental delays. A major concern is the role of adults in supporting positive development, particularly in educational settings. LEC.

PRE 703. Constructive Classroom Discipline. 3 Hours.
This course will examine concepts and techniques of constructive classroom management. Various theoretical orientations including humanism and behaviorism will be considered. Emphasis will be on the identification of strategies that teachers can use (1) to facilitate an environment that reduces the likelihood of misbehavior occurring, and (2) to cope constructively with individuals and groups of children to resolve difficulties that arise in the classroom. The class should have value to classroom teachers, school psychologists, counselors, and other school consultants. LEC.

PRE 704. Advanced Educational Psychology: Learning Processes in Education. 3 Hours.
A study of the mental processes that influence learning and comprehension. The scope of the course will include individuals at all developmental levels and in a variety of educational settings. Key issues include the study of language, memory, concepts, motivation and social factors affecting learning processes. LEC.

PRE 705. Human Development through the Lifespan. 3 Hours.
This course will cover the social, emotional, psychological, and cognitive changes that occur from conception through death. Methodological issues will also be addressed. Prerequisite: A graduate or undergraduate course in psychology. LEC.

PRE 710. Introduction to Statistical Analysis. 3 Hours.
Emphasis on the conceptual underpinnings of statistical analysis of educational data. Includes univariate and bivariate descriptive statistics, sampling distributions, statistical estimation, hypothesis testing and procedures in testing statistical hypothesis for one and two sample designs. Prerequisite: Concurrent enrollment in PRE 711 required, or with the permission of instructor on the basis of knowledge of statistical packages presented in PRE 711. LEC.

PRE 711. Lab for Introduction to Statistical Analysis. 1 Hour.
Creation and manipulation of data sets. Analysis of data with statistical packages, with an emphasis on descriptive statistics, graphical procedures, and univariate parametric methods. Graded on a satisfactory/fail basis. Prerequisite: Concurrent enrollment in PRE 710 or PRE 811 or with the permission of the instructor. LAB.

PRE 715. Understanding Research in Education. 3 Hours.
This course introduces the concepts and skills involved in understanding and analyzing research in education and related areas. The course provides an overview of basic, general knowledge of various research methodologies. Students should expect to study much of this material in greater depth through additional course work before being fully prepared to conduct independent research. However this course should enhance their ability to locate, read, comprehend, and critically analyze research articles and reports. Topics in the course include quantitative and qualitative methods and designs, historical and descriptive research, and program evaluation. (This course fulfills the requirement of a research methods course in the first 12 hours of graduate study.) LEC.

PRE 725. Educational Measurement. 3 Hours.
The course is an introduction to the application of the concepts of reliability, validity, and practicality to the development, selection, use, and interpretation of tests and other measuring instruments in the field of education. The concepts of norm referenced and criterion referenced tests; the interpretation and use of norms; standard scores, percentiles, quotients, and grade equivalents are among the topics covered. An understanding of the role of measurement in evaluation, diagnosis, selection and placement is included. LEC.

PRE 740. Counseling and Interviewing Skills. 3 Hours.
An experiential and performance based course having three major objectives: 1) the acquisition of basic counseling skills and strategies by means of microcounseling training; 2) learning to use these skills effectivley and appropriately in a simulated counseling session; 3) the students’ understanding of their personal characteristics and how these characteristics relate to functioning as an effective helping professional. This course should normally be taken at the earliest possible time in the student’s program. Open to counseling majors. Non-majors may be admitted only by permission of the instructor, if space permits. Prerequisite: Written consent of laboratory coordinator. LEC.
PRE 742. Counseling Theory and Techniques. 3 Hours.
An introductory examination of several major theories of counseling and therapy including psychodynamic views, person-centered, behavioral, and cognitive-behavioral approaches. Attention given to research reviews and factors various theories have in common. Designed for graduate students in counseling psychology or allied fields. Prerequisite: Graduate student status or permission of the instructor. LEC.

PRE 760. Ethics, Law, and Professional Issues in School Psychology. 3 Hours.
This course is intended to introduce the student to a) ethical principles, standards, and issues in the profession of psychology; b) legal issues involved in the practice of school psychology; c) problem-solving models to solve ethical and ethical-legal dilemmas; d) roles and functions of a school psychologist; and e) current topics in the field of school psychology. Prerequisite: Permission of the instructor. LEC.

PRE 770. Developmental Psychopathology: Diagnosis, Intervention, and Prevention. 3 Hours.
Foundations of child and adolescent psychopathology from a developmental and educational perspective. Classification, assessment, and etiology of clinical disorders. Examination of risk and protective factors associated with these various disorders. Coverage of empirically-based intervention strategies and prevention programs. Graduate student standing. LEC.

PRE 790. Research and Evaluation Proposal Development. 3 Hours.
A course for students designing a research or evaluation proposal leading to data collection. Specific topics considered include formulating a problem for study, reviewing the literature, and selecting appropriate research and evaluation designs, instrumentation, and data analysis issues. The goal of the course is to aid students in the preparation of research proposals at the master's level. LEC.

PRE 797. Independent Readings and Research in: ______. 1-3 Hours.
Opportunity for students to participate in supervised reading and research in special topics of interest (for which regularly scheduled courses are not given). Topics and credit are arranged by advisement: May not be used to substitute for regularly scheduled course offerings. Intended for students with appropriate undergraduate or graduate preparation but without extensive graduate course background in the area of proposed study. (Students with extensive graduate work should enroll in PRE 497; undergraduate students may enroll in PRE 497.) Graded on a satisfactory/unsatisfactory basis. RSH.

PRE 798. Special Course: ______. 1-5 Hours.
A special course of study to meet current needs of education professionals--primarily for graduate students. Course is graded on a satisfactory/fail basis. LEC.

PRE 800. Development during Youth and Adulthood. 3 Hours.
An examination from a life-span perspective of major issues affecting changes after adolescence. Topics include intelligence, identity, intimacy, the role of work, and moral concepts. Theoretical issues, research findings, and educational and social policy implications will be examined. Students will prepare papers on significant issues in the field and survey extensively the research and theoretical literature. Prerequisite: Prior enrollment in a course on naturalistic or experimental research methods. LEC.

PRE 803. Computer Applications for Statistical Analyses. 3 Hours.
Computer applications for a variety of statistical techniques. Emphasis may be with applications on microcomputers and/or mainframe. Prerequisite: PRE 810 or PRE 811 or equivalent course. LEC.

PRE 805. Individual Intelligence Testing. 1-3 Hours.
Supervised experience in the administration, scoring, and interpretation of the major individual intelligence tests for children, adolescents, and adults. Other areas to be covered in this course will include models of intelligence and factors influencing intelligence; measurement characteristics of instruments used to assess cognitive abilities; ethical and legal issues in the use of intelligence tests; and the use of cognitive assessments for identification and diagnosis. Prerequisite: Permission of instructor. LEC.

PRE 806. Issues in Human Growth and Development. 3 Hours.
An overview and analysis of selected issues in the field of human growth and development. The focus will be on current issues of a theoretical and methodological nature that affect the field of developmental psychology and applications to social and educational settings. Prerequisite: Prior completion of a course in developmental psychology. LEC.

PRE 807. Theories and Research in Human Learning. 3 Hours.
An overview of important models, principles and research findings related to the learning process. Attention is given to theories of learning and information processing which attempt to explain perceptual behavior, verbal learning and memory and social learning processes. Emphasis is placed on student development of research proposals in the area of human learning and achievement. Prerequisite: Permission of instructor. LEC.

PRE 810. Regression Analysis. 3 Hours.
Multiple correlation/regression techniques, including polynomials, analysis of interactions, dummy coding, non-orthogonal analysis of variance, and analysis of covariance. Prerequisite: PRE 710 or equivalent course. LEC.

PRE 811. Analysis of Variance. 3 Hours.
Analysis of variance techniques including one-way ANOVA, planned and post hoc comparisons, multway ANOVA, repeated measures ANOVA, and mixed designs. Prerequisite: PRE 710 and PRE 711. LEC.

PRE 812. Meta-Analysis. 3 Hours.
Statistical methods to summarize results from multiple studies. Prerequisite: PRE 811. LEC.

PRE 814. Nonparametric Statistics. 3 Hours.
Methods of analysis for nominal and ranked data, multiway contingency table analysis. Prerequisite: PRE 811. LEC.

PRE 816. Evaluating School Programs. 3 Hours.
Methods and procedures for evaluating educational programs. Attention is given to the development and evaluation of goals and objectives, creation of designs to monitor processes and outcomes, utilization of test and measurement systems for assessing outcomes, establishing evaluation standards and criteria, and application of statistical analyses. Prerequisite: PRE 710 or equivalent. LEC.

PRE 822. Educational Scales, Questionnaires, and Sampling. 3 Hours.
Development, construction, validation and scaling of noncognitive instruments including questionnaires, surveys, checklists, rating scales and unobtrusive measures. The sampling methodology is emphasized. Item construction and analysis and the development of subscales are stressed. Prerequisite: PRE 720 or PRE 725 and PRE 710. LEC.

PRE 830. Individual and Group Assessment. 3 Hours.
A consideration of basic concepts pertaining to selection and interpretation of both standardized and non-standardized assessment procedures and devices with attention given to communicating assessment information within the context of the counseling relationship. Prerequisite: PRE 725 or comparable undergraduate principles of measurement course. LEC.
PRE 835. Clinical Techniques in Academic Assessment and Intervention. 3 Hours.
Students will learn techniques of formal and informal assessment of academic skills in school-aged students. In addition, students will learn consultation and intervention approaches and strategies for use with students who have academic delays. This course has a field-based practicum component. Prerequisite: Graduate student standing in the School Psychology program and permission of instructor. LEC.

PRE 840. Guidance and Counseling in the Public Schools. 3 Hours.
This course is designed to provide information about the organization and administration of guidance and counseling programs in the public schools. Non-majors wishing to know more about the role of the counselor can be admitted with approval of the instructor. LEC.

PRE 842. Counseling Practicum (Elementary, Secondary, Counseling Psychology). 6 Hours.
This course is taken as one of the last courses in the master’s degree counseling program. The primary purpose of the course is for the student to develop individual counseling skills while functioning in a counseling setting. In addition to individual skills, students are also encouraged to participate in group counseling and other counseling related activities within the particular counseling setting. Students enroll in practicum for the level most closely related to their professional goals, i.e., elementary, secondary, counseling psychology. Graded on a satisfactory/fail basis. Prerequisite: PRE 740, PRE 742, and PRE 880, and prior or concurrent enrollment in PRE 830, PRE 840, PRE 844, and PRE 846. Pre-enrollment with practicum coordinator. Students currently on academic probation will not be allowed to enroll in practicum. LEC.

PRE 844. Theory of Group Counseling. 3 Hours.
Focuses on issues in group counseling. Topics covered are types of groups, theoretical orientation of groups, stages of group development, group leadership, selection of members, ethical issues, and effectiveness of groups. Prerequisite: Students must be admitted to the Program in Counseling Psychology. Nonmajors must have prior written consent of instructor. LEC.

PRE 846. Career Development. 3 Hours.
Stresses the importance of career development in education, with an emphasis on developmental life planning. Course includes topics such as delivery systems, utility of career development theory, sexism and racism in career development and counseling, the effects of sex role socialization, nature of the world of work, evaluation of career information, use of career information in individual and group counseling, and the role of empirical research in career development theory and practice. LEC.

PRE 850. Human Relationship Skills in the Classroom. 3 Hours.
The purpose of this course is to provide educators with an awareness and skill training in basic human relationship/communication skills. The course is focused on skills that provide educators with effective communication skills for working with students, educators, and parents. LEC.

PRE 855. Psychoeducational Clinic I: Assessment, Consultation, and Intervention. 3 Hours.
This is a practical course where students apply previous learning and gain experience in assessment and intervention with children, families, and school consultation. Team collaboration, peer review, and case conferences are essential elements of this course. Students work with clients in the on campus learning center under supervision. Topical seminars also are included throughout the semester. Prerequisite: Graduate student standing in the School Psychology program and permission of instructor. LEC.

PRE 860. Assessment of Behavior Problems and Personality. 3 Hours.
The purpose of this course is to examine appropriate assessment techniques for the evaluation of behavior problems. Interview procedures, behavioral observation strategies, behavior rating scales and checklists, self-report inventories, and rational theoretical techniques will be introduced. The intent is to place these assessment approaches in their theoretical contexts and to discuss how they could be used by pupil personnel specialists to understand the problem behavior and plan interventions to enhance students’ personal adjustment and achievement in the classroom. Prerequisite: PRE 770, graduate standing in the school of psychology program, or permission of instructor. LEC.

PRE 865. Psychoeducational Clinic 2: Assessment, Consultation, and Intervention. 3 Hours.
A continuation of School Psychology Clinic I where students will be performing the same activities at a higher level of autonomy and independence. Prerequisite: Graduate student standing in the School Psychology program, PRE 855, and permission of instructor. LEC.

PRE 870. Quantitative Methods for Research in Educational Policy and Leadership. 3 Hours.
This course addresses the conceptual basis of statistical analysis with an emphasis on applied data analysis. The use of descriptive statistics, distributions, graphic displays, hypothesis testing, group comparison, and analyses of relationships among variables to explore research questions in education will be covered. This course is designed specifically for Ed.D. students in the School of Education. Students in other degree programs may not enroll. Prerequisite: This course is open only to Ed.D. students in the School of Education. LEC.

PRE 871. Crisis and Disaster Counseling. 3 Hours.
This course provides advanced training in Crisis and Disaster Counseling to graduate students in the helping professions, providing students with the foundation, knowledge, and skills to effectively help those in crisis. Practical guidelines, specific intervention strategies, treatment principles, legal and ethical responsibilities, and self-care regarding crisis work will be discussed and integrated. Prerequisite: PRE 740 and PRE 742; or consent from instructor. LEC.

PRE 875. Individual and Cultural Differences in Counseling Psychology. 3 Hours.
Examines the role of culture in human behavior and its influence in counseling theories, practice, and research. The course will assist students develop multicultural awareness, understanding, and skills in working with people from diverse racial, social, cultural, and individual backgrounds. The course will provide opportunities for self examination of cultural assumptions/values in order to develop multicultural competence. Prerequisite: PRE 742 or equivalent. LEC.

PRE 880. Ethical and Legal Issues in Professional Psychology. 3 Hours.
An examination of legal, ethical, and professional standards and issues affecting the practice of professional psychology. Topics include legislative regulation of professional psychology, ethical standards and codes of conduct for psychology and related mental health professions, standards of professional practice, and issue of practice liability and risk management. LEC.

PRE 882. History and Systems of Psychology. 3 Hours.
A historical survey of the evolution of concepts, theories, and systems of thought in psychology with an emphasis on their relationship to contemporary issues in psychological theory, research, and practice. Prerequisite: Graduate standing in PRE or consent of the instructor. LEC.
PRE 885. Projective Assessment. 3 Hours.
The major goal of the course is to integrate information about a person from one or more projective tests into a useful summary. The projective assessment instruments to be used include the Rorschach (using the Exner system of scoring and interpretation), the Thematic Apperception Test, and projective drawings (e.g., Draw-A-Person test). Prerequisite: At least one graduate-level course in measurement and one graduate course in assessment plus consent of the instructor. LEC.

PRE 890. Diagnosis and Psychopathology. 3 Hours.
An examination of psychological disorders from a counseling psychology perspective that emphasizes strengths. The course will cover the current version of the Diagnostic and Statistical Manual (DSM), as well as alternative taxonomies, exploring personality as it ranges from normal personality styles to personality disorders, as well as Axis I disorders.
The emphasis is on identifying and assessing these phenomena and understanding possible behavioral and treatment implications.
Prerequisite: Degree seeking status in Counseling Psychology or consent of instructor. LEC.

PRE 893. Internship in School Counseling. 2 Hours.
Two consecutive enrollments covering a period of one academic year. During this time the student prepares a portfolio of skills competencies, classroom guidance programs presented, and other experiences appropriate to the student’s school level. Supervision will be conducted on an individual basis and will include a minimum of two site visits per semester.
Prerequisite: Must have school counseling position and a completed Masters degree from K.U. in School Counseling. FLD.

PRE 895. Field Experience in: ____. 1-5 Hours.
Supervised and directed experiences in selected educational or mental health settings. The campus-based instructor will schedule regular observations of the field experience and conferences with the student.
Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the campus-based instructor.
Open only to advanced students.
Field experience credit in any one semester may not exceed five hours, and total credit in this and additional field experience enrollments may not exceed eight hours.
Graded on a satisfactory/fail basis.
Prerequisite: PRE 842 and consent of the practicum coordinator. FLD.

PRE 896. Seminar in: ____. 1-3 Hours.
Prerequisite: Permission of instructor. LEC.

PRE 897. Independent Study. 1-4 Hours.
Graded on a satisfactory/unsatisfactory basis.
Prerequisite: Consent of advisor and instructor. RSH.

PRE 898. Master’s Project. 1-4 Hours.
Prerequisite: Prior or concurrent enrollment in PRE 710, PRE 715, or PRE 790. RSH.

PRE 899. Master’s Thesis. 1-6 Hours.
Prerequisite: Prior or concurrent enrollment in PRE 710. THE.

PRE 900. Legal, Ethical, and Professional Issues in Professional Psychology. 3 Hours.
This proseminar is designed to examine the major legal and ethical principles and areas of concern that affect professional psychology.
The course will also examine the historical development of professional psychology and current issues that affect the future direction of research and practice.
Prerequisite: Doctoral status in counseling, clinical, clinical child, or school psychology, or consent of the instructor. LEC.

PRE 901. Research Practicum in: ____. 1-3 Hours.
This course is designed to give students experience in conducting research. It is expected that students will take this course for at least two consecutive semesters.
Prerequisite: Doctoral student status in a program in the Department of Psychology and Research in Education. RSH.

PRE 902. Research Methodology in Education. 3 Hours.
An examination and study of the problems and procedures which relate to the validity of research methods.
Emphasis will be placed on reading the current literature on research methodology.
Students are required to develop a research proposal.
Prerequisite: PRE 811 and PRE 720 or PRE 725. LEC.

PRE 905. Multivariate Analysis. 3 Hours.
Multivariate analysis of variance, discriminant analysis, logistic regression, and exploratory factor analysis.
Prerequisite: PRE 810, PRE 811 and experience with a statistical software package. LEC.

PRE 906. Structural Equation Modeling I. 3 Hours.
The purpose of this course is to introduce students to Structural Equation Modeling (SEM).
Topics to be covered include matrix algebra, correlation/covariance, regression, Path analysis, exploratory and confirmatory factor analysis, full structural equation models and multi-group models.
Students will be exposed to the various statistical software programs available for SEM and will be expected to become proficient in utilizing EQS.
Prerequisite: PRE 710 or equivalent course. LEC.

PRE 907. The Psychology of Instruction and Human Learning. 4 Hours.
A study of research and theory in the areas of cognitive learning and of instruction, including such topics as motivation, problem solving, discovery learning, conceptualization, theory construction and task analysis.
Emphasis placed on independent learning experiences and field-based experimentation with pilot study.
Prerequisite: PRE 807 and PRE 715 or permission of instructor. LEC.

PRE 908. Structural Equation Modeling II. 3 Hours.
The purpose of this course is to introduce students to advanced topics in Structural Equation Modeling.
Topics to be covered include multi-level models, latent growth models, mixture models and approaches to handling missing and/or non-normal data.
Students will be exposed to the various statistical software programs and will be expected to become proficient in utilizing EQS.
Prerequisite: PRE 906 or equivalent course. LEC.

PRE 910. Practicum in School Psychology. 3 Hours.
Supervised practice in the application of psychological theory of educational problems.
Includes work useful with exceptional children as well as experience in the application of such areas as mental hygiene and learning theory to problems involving the total school population.
(See SPED 801.) Prerequisite: Permission of advisor and instructor. LEC.

PRE 911. Advanced Practicum in School Psychology. 3 Hours.
A continuation of PRE 910 with special emphasis on remedial techniques associated with learning difficulties.
(See SPED 802.) Prerequisite: PRE 910 and permission of advisor and instructor. LEC.

PRE 916. Educational Evaluation: Theory and Practice. 3 Hours.
The course will treat an intensive critical study of various views of evaluation as it exists opposite the experimental research process, emphasizing the operational definitions of objectives, existing models, taxonomies, and structure, and goals and methods of obtaining and summarizing evaluation data.
Prerequisite: PRE 710 and PRE 816 or equivalents or permission of instructor. LEC.
PRE 918. Seminar in Current Issues and Trends in: _____. 1-3 Hours.
An examination of selected current issues and trends. (This course fulfills
the requirement by the School of Education for a course in current issues
and trends.) Prerequisite: Doctoral student status in a program in the
Department of Psychology and Research in Education. LEC.

PRE 921. Theory and Applications of Educational Measurement. 3
Hours.
Application of theory including classical theories of reliability and validity,
latenet-trait theories, item sampling, and factor analysis to problems in
teachers' educational development and use in areas such as evaluation,
research, placement, and selection. Prerequisite: PRE 725 and PRE 811.
LEC.

PRE 922. Item Response Theory. 3 Hours.
Theoretical foundations and practical applications of item response theory
in educational measurement. Prerequisite: PRE 921. LEC.

PRE 923. Advanced Theory and Applications of Item Response
Theory. 3 Hours.
This course is designed to acquaint students with knowledge of advanced
theory and applications in the field of item response theory (IRT). Topics
to be covered include: advanced IRT models for dichotomous and
polytomous, multidimensional, rater effects, and testlet-based item
response data, estimation of parameters for these models and related
software, and goodness of fit tests. The course will also focus on some
advanced applications using these models, including test development,
test score equating, differential item functioning, scoring and score
reporting, Monte Carlo simulation studies, and innovative test designs.
Prerequisite: PRE 922 or equivalent course. LEC.

PRE 925. Computer Programming and Applications for Educational
Research, Measurement and Statistics. 3 Hours.
The purpose of this course is to provide advanced students in the areas
of educational research, psychometrics, and statistics with techniques
for computer programming, analysis, and carrying out research using
computer simulations. The topics covered are: Programming with Fortran
languages, data manipulation and management, analysis, simulation
of data according to statistical and psychometric models, numerical
techniques for matrix operations, sampling from distributions, solutions
for non-linear equations, and Markov-Chain Monte-Carlo techniques.
There are no prerequisites for this course, but those students who have
coursework through the multivariate statistics level will benefit most
from this course. Other suggested courses include those related to
psychological and educational measurement, classical test theory, item
response theory, and research methods. LEC.

PRE 926. Hierarchical Linear Modeling. 3 Hours.
This course provides students with an introductory background in the
basic principles and applications of hierarchical linear modeling (HLM).
The course will review both the conceptual issues and methodological
issues in using hierarchical linear modeling by working step-by-step with
real data sets. Prerequisite: PRE 810 Regression Analysis (formerly PRE
904). LEC.

PRE 931. Computer-Based Testing. 3 Hours.
Computer-based testing holds the promise of increasing test validity and
reliability while reducing the logistical problems associated with large-
scale assessment. This seminar will provide an overview of what we have
learned about administering tests on computer between the 1960s and
today. The focus will be on measurement issues, but depending on class
interest topics will vary. A prior course in item response theory is desirable
but not required. Prerequisite: PRE 725 or equivalent course. LEC.

PRE 932. Diagnostic Testing. 3 Hours.
There is a great demand for more useful, more actionable test scores.
Traditional large-scale group administered tests do not provide this kind
of information due to low reliabilities of, or high inter-correlations among,
sub-scores. This course will explore approaches used by individually
administered tests to provide diagnostic information, new psychometric
models that hold promise of providing better diagnostic information, and
implications for test design. A primary focus will be on how psychometric
models can be used with diagnostic subscores that are more reliable and
less correlated than traditional approaches. Prerequisite: PRE 922 or
equivalent course. LEC.

PRE 940. Advanced Studies in Educational Psychology and
Research. 3 Hours.
A course designed to offer a comprehensive view of the field of
educational psychology and research. The course will treat a series
of thematic areas with a focus on latest developments and emerging
theories in learning, development and quantitative methods. Intended for
post-master’s level students. Prerequisite: Prior graduate level course
work in development, learning, measurement, and statistics. LEC.

PRE 945. Clinical Supervision and Consultation. 3 Hours.
This course is designed to provide students with a knowledge foundation
of clinical supervision and consultation theories and models, modes/
formats of supervision, the supervisory/consulting relationship, legal and
ethical considerations in the provision of supervision/consultation, and
supervision research issues. Prerequisite: PRE 948. LEC.

PRE 947. Specialist Research. 1-4 Hours.
RSH.

PRE 948. Advanced Practicum I. 3 Hours.
Designed to be the initial advanced practicum for first year doctoral
students. Attention is directed to development of a broad range of basic
and advanced skills. Graded on a satisfactory/fail basis. Prerequisite: PRE
842 or equivalent. LEC.

PRE 949. Advanced Practicum II. 3 Hours.
Intensive counseling practice, including group and individual supervision,
that may be taken either through Counseling and Psychological Services
or an approved site outside of the university. Focus is on the acquisition
and demonstration of advanced counseling skills. Two consecutive
semesters (Fall, Spring) of enrollment are required of doctoral students.
Responsibility to the site is for a continuous nine months, with fall
semester responsibilities ending on the first day of spring semester
classes. A grade of incomplete will be granted at the end of the regular fall
graduation period, with the regular fall grade being granted after completion
of fall semester responsibilities. Graded on a satisfactory/fail basis.
Prerequisite: Satisfactory completion of PRE 948 and prior or concurrent
enrollment in PRE 951. LEC.

PRE 950. Cognitive Theory and Strategies in Counseling
Psychology. 3 Hours.
An examination of historical and contemporary cognitive theories and
strategies used in the practice of counseling psychology. Consideration
of theoretical positions and issues, research functions, assessment
strategies, and application of techniques. Prerequisite: PRE doctoral
student status or consent of instructor. LEC.

PRE 951. Psychodiagnostic Assessment. 3 Hours.
Survey of selected psychodiagnostic instruments currently in use and
their administration, scoring, and interpretation. Emphasis will also be
placed on the use of the clinical interview as an assessment tool, case
counselorization/diagnosis, and integrative report writing. Prerequisite:
Completion of PRE 830 and degree-seeking status in Counseling
Psychology or consent of instructor. LEC.
PRE 952. Advanced Counseling Theory and Research. 3 Hours.
An advanced treatment of theory, research, and practice issues central to Counseling Psychology. Topics include theoretical and research paradigms in Counseling Psychology; the relationship of theory and research to practice; and evidence on factors influencing counseling processes and outcomes. Prerequisite: Counseling Psychology doctoral student status or consent of instructor. LEC.

PRE 953. Interactional Perspectives on Counseling and Personality. 3 Hours.
A study of personality and therapeutic change from systems, interactional, and communications perspectives, with implications for research and assessment in counseling. Designed for graduate students at the specialist and doctoral levels. Prerequisite: Counseling Psychology doctoral student status or consent of instructor. LEC.

PRE 954. Vocational Psychology. 3 Hours.
A survey of the major career development theories in counseling psychology. Models and methods of career counseling will be reviewed and integrated from the different theoretical perspectives. The empirical support of each theory and needed research will be identified. The course will include presentation of theories of career development and their specific applicability in counseling. The career development of special groups (women, the culturally different, non-whites) will be studied as well as alternative methods of delivery in career development and counseling. Prerequisite: Completion of PRE 846 or equivalent, and Ph.D. degree-seeking status in Counseling Psychology or consent of instructor. LEC.

PRE 955. Research Methods in Counseling Psychology. 3 Hours.
This course is a foundational course in research methods and design in counseling psychology. The course covers (a) design type and threats to design validity, (b) the formulation of research problems, (c) research instrumentation/measures, (d) data analytic methods, (e) interpreting data, and (f) ethical issues, research integrity, and the responsible conduct of research. Prerequisite: PRE 710 and PRE 711 or equivalent. Doctoral student in Counseling Psychology or consent of instructor. LEC.

PRE 956. Theory of Couples and Family Counseling. 3 Hours.
A survey of the major career development theories in counseling psychology. Models and methods of career counseling will be reviewed and integrated from the different theoretical perspectives. The empirical support of each theory and needed research will be identified. The course will include presentation of theories of career development and their specific applicability in counseling. The career development of special groups (women, the culturally different, non-whites) will be studied as well as alternative methods of delivery in career development and counseling. Prerequisite: Completion of PRE 846 or equivalent, and Ph.D. degree-seeking status in Counseling Psychology or consent of instructor. LEC.

PRE 957. Therapeutic Intervention: Home and School. 3 Hours.
The course includes a review of literature and theory as well as supervised practice. Therapeutic intervention is broadly conceived, including individual and group counseling, and parent and teacher consultation. The importance of the family-school relationship is stressed. Prerequisite: Permission of instructor and completion of course on counseling. LEC.

PRE 980. Advanced Topics: ____. 1-3 Hours.
a special course of study to meet current need of education professionals--primarily for post-master’s level students. LEC.

PRE 990. Internship in Counseling Psychology. 1 Hour.
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved counseling psychology field setting. Supervision and directed experiences coordinated by the student’s adviser, the program training director, and internship setting supervisors. Required of all counseling psychology doctoral students. Prerequisite: Doctoral degree-seeking status in counseling psychology, completion of Ph.D. comprehensive examinations, and consent of counseling psychology faculty. FLD.

PRE 991. Ed.S. Internship. 1-5 Hours.
This course has two components: 1) a supervised experience as a practicing school psychologist, and 2) a group supervision class emphasizing case presentations and other integrative practice elements. The student functions as a provisionally certified school psychologist. Prerequisite: Completion of Ed.S. degree. FLD.

PRE 992. Ph.D. Internship in School Psychology. 5 Hours.
This is a one year, supervised experience in an approved setting. The structure and content of the experience follows guidelines of several professional organizations including The American Psychological Association and the National Association of School Psychologists. Prerequisite: Approval of School Psychology committee. FLD.

PRE 995. Field Experience in: ____. 1-5 Hours.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. FLD.

PRE 996. College Teaching Experience in: ____. 1-5 Hours.
To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate’s committee. FLD.

PRE 997. Individual Study. 1-4 Hours.
Prerequisite: Prior graduate course work in the area of study and consent of instructor. Course is graded on a satisfactory/fail basis. LEC.

PRE 998. Seminar in: _____. 1-4 Hours.
Course is graded on a satisfactory/fail basis. LEC.
PRE 999. Doctoral Dissertation. 1-15 Hours.
THE.

Special Education Courses

SPED 261. Families and Professional Partnerships. 3 Hours.
This course provides information on issues and practices related to working together in partnership with families of young children including those who have a young child with special needs. Emphasis will be placed on taking a family systems prospective and a family-centered approach to family support. Strategies for effective communication for the purpose of information sharing and collaborative planning with families are provided. Relevant current scientifically based evidence will be reviewed and discussed pertaining to these topics. LEC.

SPED 326. Teaching Exceptional Children and Youth in General Education. 3 Hours.
This course is designed for general education teacher trainees. It will provide them information about students with disabilities that they will have in their classrooms and the law governing special education and its implications for them as general educators. The course will address Individualized Educational Plans that are developed for students with disabilities and how general educators contribute to these plans. Students will learn about planning instruction that is differentiated to meet various learner needs, universal design principles and instructional tools, providing meaningful access to general education classrooms and curriculum for students with disabilities and designing and delivering appropriate accommodations and modifications to assist student learning. Prerequisite: Admission to the Teacher Education Program. LEC.

SPED 362. Introduction to Early Education and Early Childhood Special Education. 3 Hours.
This course is designed to provide an overview of the field of early education including early childhood education and early childhood special education. The historical, philosophical, research-base, policy and legal foundations for the field are discussed to provide the students with the knowledge to become an advocate for early learning opportunities (birth through grade 3) for all children and their families. LEC.

SPED 425. Introduction to Exceptional Children and Youth. 3 Hours.
Designed for regular education teacher trainees, those in training for support roles in public schools and/or residential facilities (music educators/therapists, speech clinicians, etc.), and others interested in providing services for exceptional children and youth. Emphasis on the learning and adjustment problems of exceptional children and youth. Includes fieldwork experiences in residential and/or public school settings. LEC.

SPED 431. Introduction to the Exceptional Child/Adolescent. 1 Hour.
The course is designed to provide the student with knowledge of and direct experiences within instructional settings that include one or more exceptional children. Structured experiences will be provided to (a) ensure mastery of skills in differentiating normal from atypical patterns of behavior in children or adolescents, (b) promote acquisition of skill in understanding the educational needs of exceptional learners as well as the procedures used to identify and provide instruction for them, (c) ensure the generalization of communication skills to the unique needs of exceptional learners in instructional settings, and (d) promote a positive attitude toward atypical students. LEC.

SPED 439. Student Teaching: Unified Early Childhood. 1-6 Hours.
A supervised student teaching experience leading to initial teaching licensure in Kansas Unified Early Childhood (birth through grade 3). The student assumes the professional role as a teacher in an approved inclusive early childhood infant/toddler or preschool. Prerequisite: Admission to the Unified Early Childhood program. Approved application of intent to student teach. LEC.

SPED 497. Independent Study. 1-2 Hours.
Only one enrollment permitted each semester, a maximum of four hours will apply toward a bachelor’s degree. Prerequisite: Recommendation of advisor and consent of instructor. IND.

SPED 500. Introduction to Sign Language. 3 Hours.
This is an introductory course in Sign Language and includes ASL and English sign vocabulary, a description of all manual sign systems, medical aspects of hearing loss, communication and language, and Deaf culture and community. LEC.

This course will cover the development of American Sign Language and its application within the Deaf Community. It is based on the functional-notational approach to learning sign language. This approach organizes language around communicative purposes of everyday interaction. LEC.

SPED 502. American Sign Language II (ASL II). 3 Hours.
This is the second level course in American Sign Language and its application within the Deaf Community. It is based on the functional-notational approach to learning sign language. This approach organizes language around communicative purposes of everyday interaction. Prerequisite: SPED 501. LEC.

SPED 503. American Sign Language III (ASL III). 3 Hours.
This is the third level course in American Sign Language. The primary objective of the American Sign Language III “Signing Naturally” Level 2 curriculum is for students to continue using the two basic language skills: visual listening and signing. Prerequisite: SPED 502. LEC.

SPED 504. American Sign Language IV (ASL IV). 3 Hours.
This is the fourth level course in American Sign Language. The primary objective of the American Sign Language IV “Signing Naturally” Level 3 curriculum is for students to continue using the two basic language skills -- visual listening and signing. Prerequisite: SPED 503. LEC.

SPED 506. Advanced Practices for Children with Disabilities in the Elementary General Education Classroom. 3 Hours.
This course is designed to enable novice teachers to master and apply the instructional and communicative skills that will facilitate appropriate and productive inclusion of children and youth with exceptionalities within general education classrooms and other school settings. Specific research-based strategies in curriculum content acquisition (content enhancements, learning strategies, classwide-peer tutoring), and specific research-based strategies in behavior management will be learned and applied to real teaching experiences. Novice teachers will learn about collaborative structures found in schools to support student learning in general education settings (co-teaching, collaborative consultation, teacher/student support teams) and roles and responsibilities of teachers within these structures. Prerequisite: Admission to the Teacher Education Program. LEC.

SPED 507. Advanced Practices for Children with Disabilities Middle/Secondary General Education Classroom. 3 Hours.
This course is designed to enable novice teachers to master and apply the instructional and communicative skills that will facilitate appropriate and productive inclusion of middle and secondary age students with disabilities within general education classrooms and other school settings. Specific research-based strategies in curriculum content acquisition (content enhancements, learning strategies, classwide-peer tutoring), and specific research-based strategies in behavior management will be learned and applied to real teaching experiences. Novice teachers will learn about collaborative structures found in schools to support student learning in general education settings (co-teaching,
collaborative consultation, teacher/student support teams) and roles and responsibilities of teachers within these structures. Prerequisite: Admission to the Teacher Education Program. LEC.

SPED 598. Special Course: ____. 1-5 Hours.
A special course of study designed to meet current needs of education students; primarily for undergraduates. LEC.

SPED 631. Characteristics of Students Needing an Adaptive Curriculum. 3 Hours.
This course is designed as an introduction to the definition, characteristics, causes, assessment, and specific remedial techniques for students needing an adaptive curriculum. The needs for specialized services to meet specific learning and/or behavioral needs will be presented. Students will learn about the history of serving children and youth with high incidence disabilities associated with specific learning, emotional/behavioral, mild mental retardation and a range of physical and health needs. Key individuals in the research of specific disabilities associated with these needs and how they helped expand our understanding of who these individuals are and how to address specific needs, will also be addressed. Learning characteristics will be addressed in relation to why and how specialized instruction can meet the learning and developmental needs of these individuals, specifically in the areas of instructional and assistive technology. LEC.

SPED 632. Characteristics of Students Needing a Functional Curriculum. 3 Hours.
This introductory course provides an overview of the characteristics of learners with significant support needs. Students will learn to define and understand various classification systems and the implications of: low-incidence disabilities, significant cognitive disability, various vision and/or hearing impairments, including deaf-blindness motor disabilities, and health impairments. Students will be introduced to various etiologies: pre-, peri-, and post-natal causes, syndromes and chromosomal disorders, and biomedical causes of severe disability. Additional content includes anatomy of sensory organs, interpretation of pertinent medical reports, assessment procedures, and in school settings considerations (e.g., orientation and mobility, cochlear implants, medications, tube feeding, physical therapy, occupational therapy). Prerequisite: An introductory course in special education. LEC.

SPED 633. Characteristics of Learners with Hearing Loss -- Deaf Studies. 3 Hours.
Deaf Studies is the basic characteristics course for both the Master’s degree in Deaf Education and for Kansas and Missouri endorsement in Deaf/HOH. The course includes medical aspects/etiology of hearing loss, history, pertinent laws, Deaf culture and community, issues in assessment and psychology, language and sign systems, multicultural education, multiple disabilities and hearing loss, and specific issues in the field. LEC.

SPED 635. Characteristics of Children and Youth with Disabilities: _____ 3 Hours.
Social, cognitive, emotional, and other developmental aspects associated with children and youth identified with learning disabilities, behavior disorders, and mental retardation are covered by this course. Characteristics, special needs, and service delivery approaches are compared and contrasted. Prerequisite: SPED 425 or SPED 725. LEC.

SPED 641. Methods & Assessment: Literacy Interventions Struggling Learners & Students with Disabilities. 3 Hours.
This course will provide in depth learning experiences targeting literacy; both reading and writing. Students will learn about assessment tools and assessment systems used in tiered support frameworks to determine the required intensity of literacy support and instruction needed by children/adolescents with adaptive special education needs, and will learn about evidence-based instructional approaches and curriculum developed for students with disabilities and struggling students in general. The course is intended for persons working toward the Kansas teaching license in teaching students needing an adapted curriculum. Prerequisite: SPED 730, admittance into the Adaptive program in the Department of Special Education, or permission of the instructor. LEC.

SPED 642. Methods and Assessment: Life Skills and Community-Based Instruction. 3 Hours.
This course will provide an overview of assessment and instructional practices contributing to community-referenced planning, community-based instruction and life skills instruction. Students will conduct ecological inventories and other student-referenced assessments, design community-based instructional programs, ecologically valid and age-appropriate to facilitate mastery of skills essential for community and social inclusions, explore best practices in community-based instructional programs, including family and student involvement, transportation, and administrative and policy support. Undergraduate students will be provided a model and extended scaffolding with a few sample case studies with which to work. Students who have completed SPED 642 cannot enroll in SPED 742. The course is intended for persons working toward the Kansas teaching license in teaching students needing a functional curriculum. Prerequisite: SPED 326. LEC.

SPED 644. Assessment and Instructional Methods I: Learners with Hearing Loss. 3 Hours.
This course will provide an introduction to appropriate instructional methodology for teaching students who are deaf or hard of hearing at the early childhood, elementary, and secondary levels. Upon completion students will be familiar with legal issues, teaming, assessment, IEP development, curriculum planning, instructional methods, and transition. LEC.

SPED 650. Constructing Early Childhood Curriculum. 3 Hours.
Students in this course will learn to design, implement and evaluate developmentally appropriate curricula and programs for children from birth through kindergarten. Issues of curriculum design and assessment are introduced as interrelated processes that include structuring learning environments and experiences that are responsive to children’s interests and abilities. Students analyze and evaluate curriculum that focuses on the five developmental domains a) social emotional development; b) cognitive development; c) language and communication development; d) adaptive behavior development; and e) gross and fine motor development and in addition the content domains of literacy, science, math, and fine art. Strategies for developing learning opportunities that are appropriate for young children, including children with special needs and children from diverse cultural, ethnic and linguistic backgrounds, will be explored. Prerequisite: Admission to School of Education UEC program. LEC.

SPED 660. Education of Children and Youth with Disabillities I: ____. 3 Hours.
This is a methods course that covers instructional approaches and procedures that offer developmentally appropriate, effective and inclusive early intervention for preschool and kindergarten age children who experience developmental delays, disabling conditions or who are at-risk for developmental problems and disabilities. It is directed toward: (a) “how” to teach, or the technical components of developing and delivering effective instruction that provide access to the general early childhood curriculum within recognized approaches to early childhood education for young children, and (b) the “what” to teach, or the selection of developmentally and individually appropriate child objectives as well as specific materials and specialized instructional approaches. The relationship of instructional planning to state and federal mandates will also be considered. The course is primarily intended for persons who are currently working toward certification in the ECSE program area.
Prerequisite: SPED 425 or SPED 725, and SPED 735, which can be taken concurrently. LEC.

SPED 661. Supporting Children with Significant Learning and Behavioral Challenges. 3 Hours.
Students in this course will gain knowledge of the causes, and intervention and support approaches for young children with multiple and significant disabilities including neurological impairments, physical disabilities, sensory impairments, significant developmental disabilities and challenging behavior. Emphasis is placed on environmental adaptations and direct instructional techniques to maximize independence as determined through systematic ecological inventories tailored to the individual child's strengths and needs. Information is also provided on assistive technology designed to provide appropriate supports. Functional behavioral assessment procedures, proactive intervention strategies, and developing collaborative support plans will be studied. Prerequisite: Admission to the Teacher Education Program. LEC.

SPED 663. Assessment Strategies in Early Education. 3 Hours.
Examines the practice of gathering information for the purpose of making individual referral and instructional decisions for infants, toddlers, and young children with and without special needs. Discusses effective informal assessment techniques and emphasizes an ecological approach to gathering information. Introduces standardized assessment and screening instruments and provides an overview of the purposes and limitations of such tests. Prerequisite: Admission to the Teacher Education Program. LEC.

SPED 664. Inclusive Strategies and Intervention for Infants and Toddlers. 3 Hours.
Emphasizes curriculum development and early intervention provision for infants and toddlers through the planning of appropriate learning experiences, the design of learning environments, developing Individual Family Service Plans (IFSP), promoting collaboration among families and the use of various methods of enhancing the child's development across the five (social-emotional, adaptive, cognitive, physical/movement, communication) development domains. The role of the educator/early interventionist in relation to the family and the child is examined. Curriculum resources and intervention strategies for infants and toddlers with special needs are reviewed with emphasis on interdisciplinary planning and implementation. Prerequisite: Admission to the Teacher Education Program. LEC.

SPED 665. Inclusive Strategies and Intervention for Preschoolers. 3 Hours.
Provides the opportunity for students to develop and evaluate inclusive environments for young children. This course emphasizes meeting the needs of all young children through an integrated approach to planning, implementing and assessing instruction in all areas; linking assessment information to individualized instruction; developing Individual Educational Plans (IEPs) and promoting collaboration among families, schools and communities. Service delivery systems and transitions between early childhood programs are reviewed in relation to curriculum. Curriculum development for early childhood content areas (literacy and language, numeracy, science, social studies, physical education and the arts) and domains (language, social/emotional, physical, and cognitive) will be explored. Prerequisite: Admission to the Teacher Education Program. LEC.

SPED 666. Field Experience Infant/Toddler. 1 Hour.
This supervised field experience is intended to allow the pre-service teacher to apply the knowledge gained in SPED 664 Inclusive Strategies and Intervention for Preschoolers, by working with infants and toddlers in early intervention settings/programs. To be taken concurrently SPED 665. Prerequisite: Admission to the Teacher Education Program. FLD.

SPED 668. Field Experience Infant/Toddler. 1 Hour.
This supervised field experience is intended to allow the pre-service teacher to apply the knowledge gained SPED 664 Inclusive Strategies and Intervention for Infants and Toddlers, by working with infants and toddlers in early intervention settings/programs. To be taken concurrently SPED 664. Prerequisite: Admission to the Teacher Education Program. FLD.

SPED 672. Field Experiences with Exceptional Children and Youth: ______. 3 Hours.
A course designed to provide experiences for students to participate with exceptional children in public schools and/or residential facilities and with professional personnel associated with the lives of exceptional students including special education teachers, child care workers, therapists, etc. Students will have opportunities to participate as aides, tutors, and instructors with individual and small groups of exceptional youth in one or more placements. Through weekly meetings with the instructor students are guided to relate their experiences to the needs and services for exceptional children and youth. Prerequisite: SPED 635. FLD.

SPED 675. Practicum with Children and Youth with Disabilities: ______. 1-10 Hours.
Intensive and direct teaching experiences with children and youth with disabilities in educational settings. The course is differentiated from SPED 775 through the amount of scaffolding undergraduate students will receive when demonstrating skill application (e.g., undergraduates report and receive feedback on practicum experiences on a more frequent basis, reduced data collection requirements, more emphasis on cooperating teacher providing guidance, etc.). This practicum is a requirement for provisional endorsement according to KSDE. Students who have completed SPED 675 cannot enroll in SPED 775 within the same curricular area. Prerequisite: SPED 326. LEC.

SPED 700. Introduction to Sign Language. 3 Hours.
This is an introductory course in Sign Language and includes ASL and English sign vocabulary, a description of all manual sign systems, medical aspects of hearing loss, communication and language, and Deaf culture and community. LEC.

SPED 701. American Sign Language I (ASL I). 3 Hours.
This course will cover the development of American Sign Language and its application within the Deaf Community. It is based on the functional-notational approach to learning sign language. This approach organizes language around communicative purposes of everyday interaction. LEC.

SPED 702. American Sign Language II (ASL II). 3 Hours.
This is the second level course American Sign Language and its application within the Deaf Community. It is based on the functional-notational approach to learning sign language. This approach organizes language around communicative purposes of everyday interaction. Prerequisite: SPED 701. LEC.

SPED 703. American Sign Language III (ASL III). 3 Hours.
This is the third level course in American Sign Language. The primary objective of the American Sign Language III “Signing Naturally” Level 2 curriculum is for students to continue using the two basic language skills: visual listening and signing. Prerequisite: SPED 702. LEC.

SPED 704. American Sign Language IV (ASL IV). 3 Hours.
This is the fourth level course in American Sign Language. The primary objective of the American Sign Language IV “Signing Naturally” Level 3 curriculum is for students to continue using the two basic language skills -- visual listening and signing. Prerequisite: SPED 703. LEC.
SPED 706. Advanced Practices for Children with Disabilities in the Elementary General Education Classroom. 3 Hours.
This course is designed to enable novice teachers to master and apply the instructional and communicative skills that will facilitate appropriate and productive inclusion of children and youth with exceptionalities within general education classrooms and other school settings. Specific research-based strategies in curriculum content acquisition (content enhancements, learning strategies, classwide-peer tutoring), and specific research-based strategies in behavior management will be learned and applied to real teaching experiences. Novice teachers will learn about collaborative structures found in schools to support student learning in general education settings (co-teaching, collaborative consultation, teacher/student support teams) and roles and responsibilities of teachers within these structures. Prerequisite: Admission to the Teacher Education Program. LEC.

SPED 707. Advanced Practices for Adolescents with Disabilities in the Middle/Secondary General Classroom. 3 Hours.
This course is designed to enable novice teachers to master and apply the instructional and communicative skills that will facilitate appropriate and productive inclusion of middle and secondary age students with disabilities within general education classrooms and other school settings. Specific research-based strategies in curriculum content acquisition (content enhancements, learning strategies, classwide-peer tutoring), and specific research-based strategies in behavior management will be learned and applied to real teaching experiences. Novice teachers will learn about collaborative structures found in schools to support student learning in general education settings (co-teaching, collaborative consultation, teacher/student support teams) and roles and responsibilities of teachers within these structures. Prerequisite: Admission to the Teacher Education Program. LEC.

SPED 708. Introduction to Hearing Impaired. 2 Hours.
A study of hearing defects and methods of diagnosis. The course also covers remedial work which teachers can use in treating such defects and meeting problems of hearing defective children. Prerequisite: Nine hours of education including educational psychology. LEC.

SPED 710. Methods of Teaching Language to the Deaf I. 3 Hours.
The effects of hearing loss on language acquisition and development. Systems for teaching language to individuals with hearing loss are introduced. Prerequisite: Course in normal language development and nine hours of education including educational psychology. LEC.

SPED 715. Understanding Research in Education. 3 Hours.
This course introduces concepts and skills involved in understanding and analyzing research in special education. The course provides an overview of basic, general knowledge of various research methodologies. In addition, this course will teach students to locate, read, comprehend, and critically analyze research articles and reports. Students will become familiar with the principles of educational research to become good "consumers" of this research. LEC.

SPED 717. Exceptional Children in Regular Classrooms. 3 Hours.
This course is designed to explore the relationship between regular and special education. Educational service delivery systems for exceptional children are identified and analyzed. Emphasis is placed upon procedures and services that regular class teachers can use to provide instructional services to exceptional children assigned to regular classrooms. Procedures for enabling normal children to understand and appreciate the interaction with children who exhibit physical and behavioral variance from established norms are conveyed. Especially for regular class teachers and students desiring a career in teaching exceptional children. Will be offered by designated area sections or as a general overview of several areas. LEC.

SPED 718. Instructional Planning for Children and Youth with Disabilities: ______. 1-3 Hours.
This course provides knowledge and skills to select, adapt, and sequence instructional methods and materials to facilitate general education curriculum mastery. LEC.

SPED 719. Learning and Technology. 1 Hour.
The central framework of "human learning" provides a context for understanding technology-based educational innovations. The lessons in this course explore how various "features of learning" and "features of technology" intersect. They discuss realistic options for improving the learning of students, and the learning of teachers, as they use technology in education. (Life-span range of levels.) LEC.

SPED 724. Data-Driven Instructional Decision Making. 1 Hour.
The lessons in this course present research-based methods for monitoring student behavior and academic progress. They explain how teachers may use this information to evaluate current and plan future instructional and behavioral interventions following a decision making model. It is also explored how computer and information management technology tools support and facilitate the collection, storage, and analysis of observational data. LEC.

SPED 725. Introduction to the Psychology and Education of Children and Youth with Disabilities. 3 Hours.
This course provides an overview of current practices in the identification, placement, and education of students with disabilities. This course emphasizes on patterns of social, cognitive, language, and physical development. Social, political, and economic advocacy issues are also addressed. Prerequisite: One course in Child Development. LEC.

SPED 726. Exceptionality and Technology. 1 Hour.
Technology has the potential to dramatically improve the education and quality of life for people with disabilities. This course presents you with a basic foundation for understanding technology in special education, a functional model for selecting the best technology applications for students with special needs, and strategies for applying your knowledge to practical situations. LEC.

SPED 727. Designing Instruction for Diverse Learners. 3 Hours.
This course explores design, development, and implementation of technology-based solutions for struggling learners in the preK-12 instructional environment. Throughout the course, students will (1) gain an understanding of the Principles of Universal Design for Learning, (2) examine how technology has and can be developed in a manner to meet multiple needs, especially those with disabilities, and (3) analyze how professionals can identify and assess what technology-based solution would meet the needs of a particular individual or group of individuals. LEC.

SPED 729. Introduction to Computing in Special Education. 3 Hours.
This course is designed to provide an introduction to basic concepts of computer literacy, with particular emphasis on the uses of microcomputers in educational settings for individuals with special needs. Topics include an overview of computing specific to the needs of individuals with special needs including: a) applications and the impact of computers on society; b) an introduction to computer hardware and associated concepts; c) introductory programming concepts; d) a survey of instructional and instructional-support applications of computers including examples of related software; e) software evaluation techniques; and f) an overview of resources in educational computing. Students will acquire hands-on operating experience with microcomputers through scheduled laboratory periods. LEC.
SPED 730. Characteristics, Methods & Assessment: Intro Struggling Learners & Students High- Incidence Disabilities. 3 Hours.
The course is designed as an introduction to the characteristics, assessment and identification process, and initial instructional and behavioral interventions needed in meeting the needs of students with high-incidence disabilities under the Kansas Adaptive Teacher Education Standards. The needs for specialized services to meet specific learning and/or behavioral needs will be presented. Frameworks for instruction and conceptualizing best practice will be introduced including the principles of Universal Design for Learning and the Multi-Tier System of Support. The role of the educator in identifying, understanding and implementing evidence-based practices is also examined. Curriculum resources and intervention strategies for students with high-incidence disabilities will be introduced with emphasis on tiered planning and implementation. The course is intended for persons working toward the Kansas teaching endorsement in the Special Education Adaptation Area. Prerequisite: Admittance into the Adaptive endorsement teacher education program in the Department of Special Education or permission of the instructor. LEC.

SPED 731. Supporting Children with Significant Learning and Behavioral Concerns. 3 Hours.
Students in this course will gain knowledge of the causes, and intervention and support approaches for young children birth through 5 years with significant support needs. These include young learners with multiple and significant disabilities including neurological impairments, physical disabilities, sensory impairments including dual sensory impairments, complex health care needs, significant developmental disabilities and challenging behavior. Emphasis is placed on environmental adaptations and direct instructional techniques to maximize independence as determined through systematic ecological inventories tailored to the individual child's strengths and needs. Information is also provided on assistive technology designed to provide appropriate supports. Functional behavioral assessment procedures, proactive intervention strategies, and developing collaborative support plans will be studied. Prerequisite: Admittance into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor. SPED 752 or its equivalent, SPED 734 or its equivalent, and SPED 755 or its equivalent. LEC.

SPED 733. Characteristics of Learners with Hearing Loss -- Deaf Studies. 3 Hours.
Deaf Studies is the basic characteristics course for both the Master's degree in Deaf Education and for Kansas and Missouri endorsement in Deaf/HOH. The course includes medical aspects/etiology of hearing loss, history, pertinent laws, Deaf culture and community, issues in assessment and psychology, language and sign systems, multicultural education, multiple disabilities and hearing loss, and specific issues in the field. LEC.

SPED 734. Inclusive Strategies and Intervention for Infants and Toddlers: ____. 3 Hours.
Emphasizes curriculum development and early intervention provision for infants and toddlers through the planning of appropriate learning experiences, the design of learning environments, developing Individual Family Service Plans (IFSP), promoting collaboration among families and the use of various methods of enhancing the child's development across the five (social-emotional, adaptive, cognitive, physical, communication) developmental domains. The role of the educator/early interventionist in relation to the family and the child is examined. Curriculum resources and intervention strategies for infants and toddlers with special needs are reviewed with emphasis on interdisciplinary planning and implementation. Prerequisite: Admittance into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor. LEC.

SPED 735. Characteristics of Children and Youth with Disabilities: ____. 3 Hours.
Social, cognitive, emotional, and other developmental aspects associated with children and youth identified with learning disabilities, behavior disorders, and mental retardation are covered by this course. Characteristics, special needs, and service delivery approaches are compared and contrasted. Prerequisite: SPED 425 or SPED 725. LEC.

SPED 738. Unified Early Childhood Applied Research. 1 Hour.
This seminar is designed to facilitate the UEC teacher candidate's completion of a Teaching Work Sample during the UEC Student Teaching experience. The purpose of the seminar together with the UEC student teaching experience is to provide the UEC teacher candidate with the opportunity to study and experience the fundamentals of teaching young children with and without disabilities with the aim of evolving a set of values, principles, and skills which will guide future early education teaching situations. Prerequisite: Admission to UEC Student Teaching. Corequisite: SPED 739 UEC Student Teaching. LEC.

SPED 739. Early Childhood Unified Student Teaching/Practicum. 1-6 Hours.
A supervised student teaching experience leading to initial teaching licensure in unified early childhood (birth through grade 3). The student assumes the total professional role as a teacher in an approved inclusive early childhood program to include infant/toddler, preschool or kindergarten. Prerequisite: Admission to UEC Student Teaching. Corequisite: SPED 738 UEC Unified Early Childhood Applied Research. FLD.

SPED 740. Managing Classroom Behavior of Exceptional Children and Youth. 3 Hours.
Designed to acquaint regular and special education teachers, principals, school psychologists, counselors, and speech pathologists with principles and application of classroom management techniques applicable to exceptional children and youth. Methods of changing inappropriate behaviors and prompting the acquisition of adaptive behaviors through positive management procedures will be stressed. Includes an introduction to behavior analysis. Prerequisite: SPED 425 or SPED 725. LEC.

SPED 741. Methods & Assessment: Literacy Interventions Struggling Learners & Students High- Incidence Disabilities. 3 Hours.
This course will provide in depth learning experiences targeting literacy; both reading and writing. Students will learn about assessment tools and assessment systems used in tiered support frameworks to determine the required intensity of literacy support and instruction needed by children/adolescents with adaptive special education needs, and will learn about evidence-based instructional approaches and curriculum developed for students with disabilities and struggling students in general. The course is intended for persons working toward the Kansas teaching license in teaching students needing an adapted curriculum. Prerequisite: SPED 730, admittance into the Adaptive program in the Department of Special Education, or permission of the instructor. LEC.

SPED 742. Methods and Assessment: Life Skills and Community-Based Instruction. 3 Hours.
This course will provide an overview of assessment and instructional practices contributing to community-referenced planning, community-based instruction, and life skills instruction. Students will conduct ecological inventories and other student-referenced assessments, design community-based instructional programs, ecologically valid and age-appropriate to facilitate mastery of skills essential for community and social inclusion, explore best practices in community based instructional programs, including family and student involvement, transportation, and administrative and policy support. Students who have completed SPED
742 cannot enroll in SPED 642. The course is intended for persons working toward the Kansas teaching license in teaching students needing a functional curriculum. Prerequisite: SPED 735, admittance into the Functional program in the Department of Special Education, or permission of the instructor. LEC.

SPED 743. Methods: Functional Behavioral Assessment, Positive Behavior Support and Classroom Management. 3 Hours.
This course provides a problem-solving approach and the framework for teaching and assessment strategies to develop pro-social behavior in students with disabilities and their typical peers in classrooms and whole school contexts. Students assess problem behavior, discover the functions of problem behavior, and learn pro-social alternatives in home, school, and community settings. Prerequisite: SPED 631 or SPED 731, and SPED 632 or SPED 732. LEC.

SPED 744. Assessment and Instructional Methods I: Learners with Hearing Loss. 3 Hours.
This course will provide an introduction to appropriate instructional methodology for teaching students who are deaf or hard of hearing at the early childhood, elementary, and secondary levels. Upon completion students will be familiar with legal issues, teaming, assessment, IEP development, curriculum planning, instructional methods, and transition. LEC.

SPED 745. Audiology and Aural Rehabilitation. 3 Hours.
This course will provide a broad overview of the components of an aural rehabilitation service delivery model including audiological diagnostics and assessment, selection and fitting of a variety of listening devices, and intervention strategies for auditory training and speech perception training. The emphasis of this course will be on the aural habilitation of children; therefore, each of the components of an aural (re)habilitation plan will be considered in relation to the needs of individual children and their families. LEC.

SPED 750. Curriculum and Methods in Early Childhood. 3 Hours.
This is a curriculum and methods course that addresses how to design, implement and evaluate developmentally appropriate curricula and programs for children from birth to six years of age. Issues of curriculum design and assessment are introduced as interrelated processes that include structuring learning environments and experiences that are responsive to children’s interests and abilities. Strategies for developing learning opportunities that are appropriate for young children, including children with special needs and children from diverse cultural, ethnic and linguistic backgrounds, will be explored. Students analyze and evaluate curriculum that focuses on facilitating progress in the domains of a) social emotional development; b) cognitive development; c) language and communication development; d) adaptive behavior development and e) gross and fine motor development. Students also analyze and evaluate curriculum standards and frameworks for the young child’s acquisition of concepts, skills and dispositions that support the development of early competencies and interest in literacy, mathematics, the sciences, social studies, the arts and individual and group sports. Prerequisite: Admission into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor. LEC.

This course is designed for teachers seeking the Adaptive certification to teach students with High-Incidence Disabilities (Adaptive). Students will learn how to select, administer, score, and interpret formal and informal assessments; make data-based instructional decisions for students with specific learning disabilities, with social and emotional needs and disorders in behavior, mild mental retardation, and/or who experience other chronic health impairments. Individually chosen and administered tests, as well as high-stakes assessments, and will be discussed. Prerequisite: SPED 631 or SPED 731. LEC.

SPED 752. Overview of Early Childhood and Early Childhood Special Education. 3 Hours.
The course serves as an introduction to the profession including historical, philosophical, social and psychological foundations, awareness of value, ethical and legal issues, staff relations and the importance of becoming an advocate for children and families. Students will analyze/interpret trends in early education, including diversity, early childhood special education, family centered practices, legislation, public policy, and developmentally appropriate practice. The two key professional organizations, National Association for the Education of Young Children (NAEYC) and Division of Early Childhood for the Council for Exceptional Children (DEC), recommended practices serve as the foundation for understanding the roles, knowledge and competencies of the early educator. Prerequisite: Admittance into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor. LEC.

SPED 753. Assessment in Early Education. 3 Hours.
This course examines the practice of gathering information for the purpose of making individual referral and instructional decisions for infants, toddlers, and young children with and without special needs. Discusses effective informal assessment techniques and emphasizes an ecological approach to gathering information. Introduces standardized assessment and screening instruments and provides an overview of the purposes and limitations of such tests. Prerequisite: Admittance into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor. LEC.

SPED 755. Inclusive Strategies and Interventions for Preschoolers: _____ . 3 Hours.
This is a methods course that covers instructional approaches and procedures that offer developmentally appropriate, effective and inclusive early intervention for preschool and kindergarten age children who experience developmental delays, disabling conditions or who are at-risk for developmental problems and disabilities. It is directed toward: (a) "how" to teach, or the technical components of developing and delivering effective instruction that provide access to the general early childhood curriculum within recognized approaches to early childhood education for young children, and (b) the "what" to teach, or the selection of developmentally and individually appropriate child objectives as well as specific materials and specialized instructional approaches. The relationship of instructional planning to state and federal mandates will also be considered. The course is primarily intended for persons who are currently working toward certification in the ECSE program area. Prerequisite: Admittance into the ECU - Birth through Kindergarten graduate initial licensure teacher education program in the Department of Special Education or permission of the instructor. SPED 752 (may be taken concurrently). LEC.

SPED 760. Introduction to Autism Spectrum Disorders. 3 Hours.
An introductory graduate-level course on autism spectrum disorders. It addresses characteristics of children and youth with autism spectrum disorders; trends and issues associated with autism spectrum disorders; and effective practices and strategies for structuring, managing, and promoting social skill development and social interactions among learners with autism spectrum disorders. LEC.
The purpose of this course is to provide an introduction to positive behavioral support (PBS). The lessons contained within this course include an overview of positive behavioral support, the basics of behavior, an introduction to specific positive behavioral support strategies, and a lesson on preventing problem behavior. LEC.

This course introduces current functional assessment methods that are used to build effective behavioral support plans. A strong functional assessment is at the heart of Positive Behavioral Support. After completing this course, you will have a better understanding of how to implement functional assessment methods in your classroom. LEC.

SPED 763. Development and Implementation of PBS Plans. 1 Hour.
A positive behavioral support plan (PBS) describes how features of the environment associated with problem behavior will be modified, what and how skills and strategies will be taught, and how individuals supporting a student will respond to both positive and problematic behavior. This course contains lessons on designing PBS plans, implementing PBS plans, and modifying and assessing PBS plans. LEC.

SPED 764. Intervention Strategies for PBS-I. 1 Hour.
The purpose of this course is to introduce interventions that can be used as part of a comprehensive positive behavioral support plan. An effective positive behavioral support plan contains multiple intervention strategies that address the function maintaining a student's problem behavior. This course contains lessons addressing setting events, antecedent interventions, replacing problem behavior, and consequence interventions. LEC.

SPED 765. Intervention Strategies for PBS-II. 1 Hour.
The purpose of this course is to introduce three types of interventions that can be used in positive behavioral support. An effective positive behavioral support plan contains multiple intervention strategies that address the function maintaining a student's problem behavior. This course contains a lesson on social skills education, crisis prevention, and interventions addressing physiological factors that influence a student's problem behavior. LEC.

SPED 766. Redesigning Environmental Systems. 1 Hour.
The purpose of this course is to describe how positive behavioral support can be used to redesign the environment at a systems level. Considering the larger issues within a system including the broader environment, the values and beliefs held by staff, policies and procedures that promote ongoing learning, and collaborative problem solving processes within a school will improve implementation of long-term positive behavioral support efforts. This course contains lessons on classroom management, staff development, and school-wide discipline. LEC.

SPED 767. Creating Positive Lifestyles through PBS. 1 Hour.
One of the most important outcomes of a positive behavioral support plan is an increase in the quality of life for both the student and everyone within the student's social network. The purpose of this course is to introduce topics related to creating positive lifestyles including person-centered planning, self-determination, and quality of life. LEC.

SPED 772. Participation with Children and Youth with Disabilities: _____. 3 Hours.
A course designed to provide field experiences with children and youth with disabilities in settings where educational services are provided. Students work directly with professionals such as special education teachers, general education teachers, therapists and other support personnel. Students participate as aides, tutors, and instructors with individual and small groups of children and youth. Ongoing meetings with supervisors are designed to facilitate both reflection and strategic learning. LEC.

SPED 774. Education of Secondary and Post-Secondary Level Exceptional Students: ___. 1-3 Hours.
A course based on the problems and needs of secondary and post-secondary level handicapped students with a focus on curriculum alternatives (academic and vocational), instructional planning options, instructional methods and materials and educational and community resources. The focus is on both mildly and moderately handicapped students. Prerequisite: Appropriate section of SPED 735 which may be taken concurrently. LEC.

SPED 775. Practicum with Children and Youth with Disabilities: _____. 1-10 Hours.
Intensive diverse and direct teaching experiences with children and youth with disabilities in educational settings. This practicum is a requirement for provisional endorsement according to KSDE. Students who have completed SPED 775 cannot enroll in SPED 675 within the same curricular area. Prerequisite: Varies by topic. LEC.

SPED 785. Application of Assessment Information for Exceptional Children and Youth. 3 Hours.
An analysis of information derived from assessment instruments and procedures appropriate to measuring the social and cognitive development of exceptional children and youth. Provides experiences in determining assessment data required in the development of individualized educational programs (IEP). Attention is also given to the design of informal assessment procedures, specific to the needs of exceptional children and youth. Experience is provided in the preparation and presentation of assessment data for use in instructional planning conferences. Prerequisite: An undergraduate or graduate course in educational measurement, and SPED 760. LEC.

SPED 793. Psychology of Deafness. 2 Hours.
Reviews of the literature pertaining to psychological evaluations of the deaf and hard of hearing. Divergent views of deafness, type and degree of deafness are considered. Prerequisite: SPED 791. LEC.

SPED 798. Special Course: _____. 1-5 Hours.
A special course designed to address topical issues. LEC.

SPED 800. Classroom Intervention for Language Disorders of Handicapped Learners. 3 Hours.
Emphasis is given to milestones in normal language acquisition and variations from norms demonstrated by handicapped learners. Attention is also given to theoretical approaches to language training, formal and informal language assessment techniques, and instructional methods. Students design individualized instructional plans for incorporating language into the daily curriculum for handicapped learners. Prerequisite: SPED 425 or SPED 725. LEC.

SPED 801. Practicum in School Psychology. 4 Hours.
Supervised practice in the application of psychological theory to educational problems. Includes work useful with exceptional children as well as experiences in the application of such areas as mental hygiene and learning theory to problems involving the total school population. (Same as PRE 910.) Prerequisite: Permission of advisor and instructor. FLD.

SPED 802. Advanced Practicum in School Psychology. 4 Hours.
A continuation of SPED 801 with special emphasis on remedial techniques associated with learning difficulties. (Same as PRE 911.) Prerequisite: SPED 801 and permission of advisor and instructor. FLD.
SPED 804. Designing Online Instruction for E-Learning Environments. 3 Hours.
The focus of the course is on the status of e-learning at the K-12 and postsecondary levels and the process of designing content for e-learning applications. Attention will be given to design features, content structuring, instructional management, evaluation, and collaboration in the process of working with technicians in the process of developing online curriculum and instruction. Prerequisite: None. A background in education is preferred. LEC.

SPED 805. Practicum in Individual Intelligence Testing. 4 Hours.
Practicum training, by arrangement, in administration and interpretation of test results for school situations with particular emphasis on the Stanford-Binet. Prerequisite: Permission of instructor. FLD.

SPED 809. Language Assessment and Instruction II: Learners with Hearing Loss. 3-6 Hours.
This course covers assessment and instruction of speech skills for students who are deaf or hard of hearing. A historical review of the emphasis placed on speech development in deaf students will be provided. Students will learn formal and informal methods of assessment, developmental order and classification systems for English language sounds, and visual, auditory, and tactile facilitation techniques. Auditory training programs and techniques will be emphasized. LEC.

SPED 810. Speech Assessment and Instruction III: Learners with Hearing Loss. 3-6 Hours.
The purpose of this course is to prepare students to provide effective language assessment and instruction to students who are deaf or hard of hearing. This course focuses on the effect of hearing loss on assessment, language and reading, communication options, and instructional strategies. LEC.

SPED 811. Methods of Teaching Elementary School Subjects to the Deaf. 3 Hours.
Focus is on development of skills in adapting materials and methods of teaching science, math, social studies, spelling, and writing to hearing impaired students. Emphasis is placed on problems, trends and procedures used in career education specifically for the hearing impaired. Prerequisite: SPED 711. LEC.

SPED 812. Instructional Approaches in Inclusive Elementary Settings. 2 Hours.
This advanced method course provides curriculum design and instructional procedures appropriate for students at the elementary and middle school levels, including functional academic, social, and home and community life skills. NOTE: This is a 2 credit course to be offered during the first 8 weeks of a semester. It will precede SPED 814 in the same semester. Prerequisite: SPED 614 or SPED 714: Learning Styles and Instructional Accommodations. LEC.

SPED 814. Instructional Approaches in Inclusive Secondary Settings. 2 Hours.
This advanced method course provides curriculum design and instructional procedures for students at the secondary level, including career preparation and transition from school to adult life in the community. Prerequisite: SPED 614 or SPED 714: Learning Styles and Instructional Accommodations. LEC.

SPED 839. Management Principles and Assessment Procedures for the Young or Severely Handicapped. 2-3 Hours.
Examines basic learning procedures and techniques that are essential to programming efforts with the severely or young handicapped. Includes assessment scales, writing instructional programs, measuring operant behavior and evaluating operant behavior. Task and concept analysis related to treatment programs. Prerequisite: Students in the Early Childhood for the Handicapped program must enroll in one hour of practicum, SPED 775. Students in the Severely Handicapped Program must have completed SPED 726. LEC.

SPED 840. Program Planning in Special Education-Early Childhood. 3 Hours.
This course is designed to provide knowledge and skills to implement federal and state development mandates for special education and related services programs for young children from birth to five. It covers procedures for developing, implementing, and evaluating (a) instructional accountability for these children’s participation in the general early childhood curriculum, (b) relationships between general and special early education personnel and programs; (c) roles and responsibilities; (d) interdisciplinary team planning including families; (e) coordinating, educating, and supervising paraeducators; and (f) general management responsibilities associated with instruction of young children with disabilities. Prerequisite: SPED 760 or SPED 860, which may be taken concurrently. LEC.

This course is designed for graduate students enrolled in the Masters of Science Program with an emphasis in school-age populations primarily with high mild disabilities or seeking to obtain a license to teach students needing an adapted curriculum in Kansas. Course experiences focus on how to identify and implement evidenced-based practices designed to increase the success of students with mild disabilities in mathematics, social studies, science, and language arts through their participation in general and special education classrooms primarily in grades 4-12. This course emphasizes practices associated with understanding and evaluating curricular demands, monitoring student progress in content-area courses, providing tiered supports and accommodations in teaching, using assessment and grading alternatives, and incorporating the principles of explicit and strategic instruction to design instruction that will promote and enhance content-area learning. The course is intended for persons working toward the Kansas teaching license in teaching students needing an adapted curriculum. Prerequisite: SPED 730, SPED 741, admittance into the High Incidence Disabilities program in the Department of Special Education, or permission of the instructor. LEC.

SPED 842. Advanced Methods: Strategies for Students with Significant Sensory, Motor, and Health Needs. 2 Hours.
In this course, students learn assessment techniques and instructional strategies for teaching learners with sensory and/or motor impairments and complex medical needs. Students will learn use of residual and alternative senses; proper positioning and transfer for students with motor impairments, nutrition, hydration, and medical monitoring, and seizure activity. Students will develop appropriate goals and objectives in the sensory and motor areas, incorporate related services into inclusive educational settings, embed sensory and motor skills training into the general education curriculum, adapt materials and apply assistive technologies. Prerequisite: SPED 632 or SPED 732, and SPED 742. LEC.

SPED 843. Advanced Methods&Assessment:Strategies for Students with Significant Behavior, Social&Emotional Need. 3 Hours.
This course is designed to introduce educators and related service professionals to prevention and intervention related to a broad range of antisocial, aggressive, and behavioral problems. Approaches focus on understanding and addressing the precipitating factors related to inappropriate behavior, short-term approaches for immediate crises, and problem-solving strategies for longer-term change. Course content will include antisocial, aggressive, and violent behavior; options for classroom interventions; school and system-oriented interventions, and ethical and legal issues involved in various prevention and intervention
approaches. Class work will focus on literature, research-based intervention approaches, and case work illustrating specific approaches and programs. Prerequisite: SPED 631 or SPED 731, SPED 741, and SPED 743. LEC.

SPED 844. Advanced Methods: Nonsymbolic and Symbolic Communication Assessment and Augmentation Strategies. 3 Hours. This advanced course examines current principles and practices in the development of multi-modal communication programs for students who do not spontaneously use speech for effective communication. It provides a framework upon which communication programming decisions can be based and interventions and strategies can be developed. Prerequisite: SPED 632 or SPED 732, and SPED 742. LEC.

SPED 850. Curriculum Planning for Exceptional Children and Youth. 3 Hours. Provides experiences in applying information on identifying learning and behavioral characteristics of exceptional children and youth. Practices in adapting curriculum materials to meet the needs of the handicapped. Prerequisite: SPED 725 and SPED 735. LEC.

SPED 851. Law and Special Education. 3 Hours. This course focuses on laws that apply to special education, especially “Individuals with Disabilities Education Act” and “No Child Left Behind Act.” The American legal system, particularly in respect to special education, the constitutional and statutory provisions of federal and state law, and judicial decisions interpreting those laws are reviewed. The course relates equal protection, procedural due process, and substantive due process doctrines to school practices affecting students with disabilities and examines the six principles of P. L. 94-142 and similar principles in state legislation. (Same as ELPS 856.) LEC.

SPED 852. Citizens with Disabilities, Public Policy, and Policy Analysis. 3 Hours. Students to analyze public policy that affects citizens with disabilities, various models of analysis are brought to bear on federal policy (e.g., education, transportation, housing, institutionalization, protection and advocacy, medical assistance, employment, vocational rehabilitation, and others). This course is not valid for core requirement in history and/or philosophy of education. (Same as ELPS 857.) Prerequisite: SPED 851 or permission of instructor. LEC.

SPED 853. Professional Ethics, Public Values, and Citizens with Disabilities. 3 Hours. This course addresses the issues that professionals (e.g., educators, physicians, allied health providers, attorneys, and others) and families of persons with disabilities face in the context of public values, attitudes, and rules of law. The issues include education, treatment and nontreatment. This course is not valid for core requirement in history and/or philosophy of education. (Same as ELPS 858.) Prerequisite: SPED 850, SPED 852 or permission of instructor. LEC.

SPED 854. Family and Interprofessional Collaboration in Special Education. 3 Hours. This course is designed to provide knowledge and skills to implement federal and state mandates for special education and related services programs as they relate to building and maintaining relationships with families of students with disabilities, and developing effective school programs. It covers procedures for developing, implementing, and evaluating (a) instructional accountability for special education students’ participation in district and state assessment; (b) relationships between general and special education personnel and programs; (c) roles and responsibilities; (d) interdisciplinary team planning including families; (e) coordinating, educating, and supervising paraeducators; and (f) general management responsibilities associated with instruction of children and youth with disabilities. Course topics will include collaboration in schools, community systems and families, historical perspectives of family life and school involvement, effective relationships between home, school, community, communication among professionals and with families, school-based programs, home-based programs, and multicultural considerations. Prerequisite: SPED 631 or SPED 731, or SPED 632 or SPED 732, or SPED 735. LEC.

SPED 856. Transition Education and Services from Childhood through Adulthood. 3 Hours. The purpose of this course is to provide a background in career development and transition education for persons with disabilities from middle school through adulthood. Emphasis is placed on IDEA requirements for transition services, career development and transition processes, transition services assessment, secondary special education curricular implications, career development and transition service needs, collaborative services in schools and communities to promote quality transition services, and issues and trends in transition education and services. LEC.

SPED 857. Vocational Training and Employment. 3 Hours. This course is designed to provide graduate students in special education and related areas with an overview of employment and vocational models for adolescents and young adults with disabilities. Emphasis is placed upon theory and practice related to career development, supported employment, working with businesses, and school and community vocational training models. Prerequisite: SPED 856 or SPED 858. LEC.

SPED 858. Assessment for Transition Planning. 3 Hours. This course is designed to provide a review of psychometric principles and their utility as a foundation for quality assessment in transition assessment and planning for youth with disabilities. Formal and informal assessments across a range of transition planning areas are reviewed and evaluated. Skills in curriculum-based assessment, rating scales, situational assessment, and functional assessment are emphasized. Prerequisite: SPED 856 or permission of instructor. LEC.

SPED 859. Interagency Services for Transition to Adulthood. 3 Hours. The purpose of this course is to provide an overview of interagency and community services and systems for adolescents and young adults with disabilities. Emphasis is placed on theory and practice related to interagency collaboration; systems change efforts in transition services; and state-of-art practices regarding supporting individuals with disabilities in community employment, living, socialization, community participation, and other areas of adult life. Prerequisite: SPED 856. LEC.

SPED 860. Education of Children and Youth with Disabilities II: Transition. 3 Hours. This course is designed to prepare students to implement specialized alternative strategies for individualized group instruction. Methods for developing and implementing overall treatment/educational programs, planning or selecting curriculum/service models for programs, and developing instructional materials are emphasized. Procedures for managing classroom staff and service resources, coordinating educational programs with families, other service personnel and program support staff, and monitoring overall program effectiveness are addressed. Prerequisite: SPED 760. LEC.

SPED 874. Planning for Adult Outcomes. 1-3 Hours. The problems, trends, issues, and procedures used in planning life skills, occupational and vocational skills, and transition from school to adult living for persons with disabilities. Separate sections will be organized by topics pertaining to career/vocational development, assessment, and transition programs and services. These will include: (a) transitions from early childhood to adulthood, (B) application of assessment information,
SPED 875. Practicum with Children and Youth with Disabilities: _____ 1-10 Hours.
This course is designed to provide intensive field work and direct teaching experiences with children and youth with disabilities in educational, residential, and clinical settings. Prerequisite: SPED 725. LEC.

SPED 879. Conferencing with Parents of Exceptional Children and Youth: _____ 3 Hours.
A course to develop knowledge and skills in the techniques of interviewing and conferencing, with special application to the professional, legal and ethical problems related to working with parents of exceptional children. Prerequisite: SPED 725 or SPED 775. LEC.

SPED 880. Coordination and Supervision of Services for Exceptional Children. 3 Hours.
An analysis of the role of the special education coordinator and supervisor. Particular attention will be given to: program development; planning, organizing, and delivering inservice training; personnel recruitment, selection, and evaluation; program management; and program evaluation. Students will relate the topical content to their specific area of expertise in special education. Prerequisite: SPED 425 or SPED 725 and six additional semester hours in special education. LEC.

SPED 890. Interdisciplinary Programming for Children and Youth with Disabilities. 3 Hours.
This course is designed to provide students a survey of disciplines which contribute to care and treatment of students with disabilities. Emphasis on professional roles, team participation, case management, and reporting and follow up. Disciplines include medicine, education, audiometry, psychology, speech pathology, occupational therapy, physical therapy, music therapy, and social work. Prerequisite: SPED 425 or SPED 725. LEC.

SPED 896. Capstone Adaptive Program Seminar. 3 Hours.
This course is designed to be a culminating experience for Adaptive Program students who choose to complete their masters programs with a comprehensive masters examination instead of one of the other program options (i.e., project or thesis). Students will complete this course during the final semester of their programs. Participants will review current issues, evidence-based practices, home-school considerations, state and federal regulations, and Kansas standards regarding appropriate education for students with mild to moderate disabilities (i.e., Adaptive category designation). The course is a prerequisite for the departmental comprehensive examination in the Adaptive area. LEC.

SPED 897. Independent Study. 1-4 Hours.
Prerequisite: Consent of advisor and instructor. RSH.

SPED 898. Master’s Project. 1-4 Hours.
RSH.

SPED 899. Master’s Thesis. 1-6 Hours.
THE.

SPED 910. Advanced Application of Behavioral Management Techniques to Exceptional Children and Youth. 3 Hours.
Theory and principles of behavioral analysis. Emphasis will be given to observation, measurement, recording, and visual display techniques. Other topics include maintenance and generalization of behavior change. Students will be provided experience in the design and carrying out of research studies related to exceptional children and youth using principles and methods of behavioral analysis. Prerequisite: SPED 425 or SPED 725 and SPED 839. LEC.

SPED 915. Advanced Curriculum Development for Children and Youth with Disabilities. 3 Hours.
This course is designed to provide principles of development, needs assessment, evaluation and dissemination applied to curriculum products. Analysis of organizational and conceptual features of major curriculum development projects for students with disabilities are addressed; participants design curriculum procedures. Prerequisite: Twelve semester hours in special education and a general curriculum course. LEC.

SPED 920. Management of Instructional Resources for Exceptional Children and Youth. 3 Hours.
Designed for individuals with responsibilities for the operation of instructional resource centers and educational programs serving exceptional children and youth. Experiences relate to: selection, acquisition, circulation, and management of special education instructional media/materials and the delivery of inservice training specific to their skills. Prerequisite: Professional preparation and/or experience in the Education of Exceptional Children and Youth and CI 616, Introduction to Educational Communications. LEC.

SPED 925. Medical Aspects of Handicapping Conditions. 3 Hours.
The organization of this course follows the chronology of an individual’s total development from genetic origin through fetal development, perinatal, infancy, childhood, and adolescence. Emphasis is given to etiology and implications of handicapping conditions on development. Attention is given to prevention, treatment, and habilitation or rehabilitation of various conditions. Prerequisite: SPED 725. LEC.

SPED 949. Specialist Research. 1-4 Hours.
RSH.

SPED 950. Civic Professionalism. 3 Hours.
This course is concerned with the relationship between professions and society in a democracy, and specifically, with the ethics and practices associated with the professions of education, special education, and other disability-related fields. Models of professionalism are compared and advantages of civic professionalism for individuals with disabilities and their families, the professions, and society as a whole are explored. Lessons drawn from disagreements over questions such as the nature and social consequences of the professions are used to broaden understanding of what professionalism could and should be in a democracy. Prerequisite: Admission to doctoral program. LEC.

SPED 970. Problems of Exceptionality: _____ 3 Hours.
An extensive analysis of the literature and research pertinent to issues in a given disability. Separate sections are organized for various disabilities. Students may enroll in more than one section as a part of a graduate program. Prerequisite: Three courses in special education or permission of instructor. LEC.

SPED 971. Organization and Administration of Services for Children and Youth with Disabilities. 3 Hours.
This course is designed to prepare administrators and prospective administrators for organizing and administering educational programs for students with disabilities. Major topics include a review of current trends in special education, state and federal guidelines and regulations, legal and financing aspects of special education, program planning, and administration of special services. (Same as ELPS 959.) Prerequisite: Nine hours of education including educational psychology and SPED 725. LEC.

SPED 972. Issues and Trends in Special Education I. 2 Hours.
This course is designed to assist first-year special education doctoral students organize and synthesize a conceptual and substantive map of the field of special education and introduce them to corresponding faculty research interests and resources. Emphasis is placed on the
academic writing expectations and resources of the field, university, and department, and on building a cohort of students to address common issues and to provide a foundation for peer support throughout the doctoral program. Prerequisite: Admission to special education doctoral program or permission of instructor. LEC.

SPED 973. Issues and Trends in Special Education II. 2 Hours.
This capstone seminar is designed to assist advanced doctoral students synthesize and evaluate information on a broad range of current and historically significant special education issues and trends in preparation for comprehensive examinations and future professional roles. Substantively, its primary focus is issues and trends that affect the entire field or cut across several areas of study and practice. Its secondary focus is significant issues and trends that affect particular categorical or functional sub-areas of study and practice within the field. Prerequisite: Completion of nine doctoral courses in special education, including 4 of 6 departmental Core courses. LEC.

SPED 974. Issues and Trends: Students with Learning Disabilities. 3 Hours.
This doctoral level course will explore current issues related to characteristics, educational methods and curricula, and questions, problems, concerns and movements connected to the education of children and youth with learning disabilities, emotional/behavioral disorders and autism spectrum disorders. Prerequisite: Doctoral program admission or permission of instructor. LEC.

SPED 975. Advanced Practicum with Children and Youth with Disabilities: _____. 1-10 Hours.
Advanced development of conceptual and practical field-based skills. Prerequisite: SPED 775. FLD.

SPED 977. Learning Disabilities/Behavior Disorders Issues II. 3 Hours.
This course is designed to provide students an opportunity to engage in an extensive analysis of the literature and research pertinent to critical issues in the field of learning and behavioral exceptionality. Prerequisite: SPED 970 LD/BD Issues I; SPED 972 Trends and Issues in Special Education I. LEC.

SPED 980. Advanced Topics: _____. 1-3 Hours.
A special course of study to meet current needs of education professionals -- primarily for post-master's level students. LEC.

SPED 981. Leadership and Systems Change. 3 Hours.
This course is designed to provide students with an overview of seminal leadership and systems change literature. Students analyze and apply the literature at the teacher, family, school building, district, state, and federal levels. Strategies for developing and mobilizing stakeholders to support the process of change will be covered. Prerequisite: Admission to doctoral program. LEC.

SPED 982. Preparing Future Faculty. 3 Hours.
This course is designed to give students an introduction and overview of academic life and the roles and responsibilities of an academic career. Its primary purpose is to help develop a realistic perspective of the expectations of academic life and the competencies required for a successful start in an academic career. Organized around the broad themes of understanding the academy, faculty life and work, and academic career paths, course content addresses the roles and responsibilities of faculty life in different types of institutions and the issues faculty face as they pursue their academic careers. The course offers an opportunity for students to critically review their doctoral program in the context of preparing them for a successful start in an academic career and to explore options for academic career choices. Prerequisite: Doctoral program admission. LEC.

SPED 983. Proposal Development. 3 Hours.
This course is designed to teach a broad array of strategies associated with the development of successful proposals that will generate funds to support programmatic work. Among the topics covered in this course are sources of funding, strategies for conceptualizing and writing proposals, collaboration strategies, proposal peer-review process, and integrating proposal development activities into other professional responsibilities. Prerequisite: Admission to doctoral program and PRE 710. LEC.

SPED 984. School Reform and School Community Partnerships. 3 Hours.
This is an interprofessional course in public policy and school reform that is concerned with current policy and systems transformations in education and child/family services, including educational, social and health service systems and the movement toward school-linked service integration strategies and family partnerships, called the "community school" movement. Issues connected with comprehensive school reform including the role of special education and mental health in this process will be emphasized. Particular emphasis will be placed on urban, multicultural issues affecting community schools. Prerequisite: Doctoral program admission or permission of instructor. LEC.

SPED 985. Naturalistic Research. 3 Hours.
This course is designed to develop skills in naturalistic or constructivist research, while situating it theoretically within the broader framework of modern and postmodern social inquiry, and exploring its social, political and ethical implications. The course develops students' skills in using this form of interpretive qualitative research, provides a theoretical framework for selecting inquiry paradigms, compares and contrasts positivist and constructivist inquiry, and reviews social and political implications of constructivist inquiry. Prerequisite: Six hours of statistics, measurement, and/or large or small group research design. LEC.

SPED 986. Trends and Issues Associated with Online Instruction. 3 Hours.
The course examines the opportunities, challenges, cautions, and demands of web-based instruction in higher education. It explores the policy implications of web-based instruction, development of collaborative teaching skills utilizing telecommunications resources, and the design and technical aspects of online instruction. Particular attention is given to the implications of online instruction for accommodating needs presented by diverse learners through strategies such as universal designs. Prerequisite: Admission to doctoral program or permission of instructor. LEC.

SPED 990. Small Sample Empirical Research Methods. 3 Hours.
This course provides a detailed examination of research methods for advancing knowledge and validating hypothetically useful treatments in situations in which sufficient sample sizes to conduct formal experiments are lacking, the question of interest is better addressed by multiple observations of treatment effects over time, and/or the question is best addressed by taking a variety of observations of a single unit of interest. Specifically, two small sample research methods will be examined in depth with examples and practical application experience: interrupted time series design for small samples ("single case" design), and Yin's empirical case study method. Prerequisite: Doctoral program admission or permission of instructor. LEC.

SPED 991. Family Outcomes in Special Education. 3 Hours.
This course focuses on analyzing and synthesizing research literature focusing on intermediate outcomes (e.g., family-professional partnerships) and long-term outcomes (e.g., family quality of life) related to families of children, youth, and adults with disabilities. Key family theories are discussed and applied in the development and implementation of interventions that have potential to increase intermediate and long-term
family outcomes. Prerequisite: Three courses in special education or permission of instructor. LEC.

SPED 992. Seminar in Early Childhood/Intervention. 3 Hours.
This seminar examines research to support evidence-based practices that currently exist in the areas of early intervention and early childhood special education. The primary objective is to learn how to read and critically analyze studies that form the evidence base for several early intervention and early childhood special education practices. Primary goals of the class include the development of skills for evaluating research studies in early intervention and early childhood special education, and increasing knowledge of evidence-based practices in the early intervention literature. Prerequisite: Three courses in special education or permission of instructor. LEC.

SPED 995. Field Experience in: _____ 1-5 Hours.
Supervised and directed experiences in selected educational settings. Instructors conduct regular observations and conference with students. Written summaries and evaluations of field experiences are prepared independently by the student, a representative of the cooperating agency, and the instructor. Open only to advanced students and field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. FLD.

SPED 996. College Teaching Experience. 2 Hours.
This course is designed to prepare students for college teaching. Enrolled students shall engage in semester-long, planned, instruction that includes college classroom teaching under supervision. Planning shall be done with a member of the faculty who will supervise the experience. FLD.

SPED 997. Individual Study. 1-4 Hours.
Prerequisite: Prior graduate course work in the area of study and consent of instructor. RSH.

SPED 998. Seminar in: _____ 1-4 Hours.
LEC.

SPED 999. Doctoral Dissertation. 1-15 Hours.
THE.

Department of Curriculum and Teaching

Curriculum and Teaching

The Department of Curriculum and Teaching (http://ct.soe.ku.edu) offers undergraduate programs that lead to teacher licensure in unified early childhood and at the elementary, middle, and secondary levels and a broad range of graduate professional programs in curriculum and instruction that promote the professional and intellectual development of practitioners and scholars in this field at all levels of education. The faculty is known for its field leadership and commitment to high-quality education for youth and adults in a variety of educational settings, innovative field-based research, and preparation of highly effective program graduates.

Curriculum and Teaching

Undergraduate Programs

The Academic Catalog is a guideline for policies and procedures in the School of Education. However, academic program requirements change. Students are strongly encouraged to check the school’s website (http://www.soe.ku.edu) and the department for the most current information.

This catalog is in effect for undergraduates admitted to the School of Education for 2014-15.

Students planning to teach must complete programs composed of 3 major parts:

- **General Education** (requirements completed primarily in the first two years),
- **Major** (content areas in which students are specializing), and
- **Professional Education** (course work that helps them to understand students as learners and to communicate knowledge effectively).

Non–Western Culture Requirement

The Kansas State Board of Education requires students seeking licensure to study both Western and non-Western cultures. To meet the non-Western culture requirement, students must complete at least one course classified as NW. This requirement also may count in the appropriate category (behavioral science, social sciences, or arts/humanities) of the general education requirements.

View the list of non-Western culture courses.

Undergraduate Advising

After undergraduate admission, advisors are assigned according to students’ intended licensure levels and teaching fields. The advisor’s name appears in each student’s letter of acceptance or is available from the SOE Advising Center.

Curriculum and Teaching

Graduate Programs

The department offers a broad range of graduate professional programs in curriculum and instruction. Students should contact the appropriate program advisor for specific program requirements. Information about the department faculty is in the Faculty/Staff section of the department’s website.

For complete program information, visit the Department of Curriculum and Teaching (http://ct.soe.ku.edu) or send an inquiry to ctedepartment@ku.edu.

**Note:** Degree requirements are subject to change. Prospective and current students should obtain the current degree requirements from the department.

Programs in curriculum and instruction prepare students to complete advanced degrees by addressing critical issues in learning, teaching, and curriculum, from local to global levels.

The **Master of Arts** with a major in education and **Master of Science in Education** are available for students who hold the bachelor’s degree and seek to advance their knowledge and skills in their professional areas or areas of interest. The **Doctor of Education** and **Doctor of Philosophy** with a major in curriculum and instruction are for students who plan to pursue employment at the college level or assume major leadership positions in schools.

An initial licensure program is also available to students who already hold the bachelor’s degree and want to teach foreign language, mathematics, or science. The **Graduate Licensure Program** combines graduate and undergraduate courses including a semester-long student teaching...
experience that helps students obtain the initial teaching license while completing the Master of Science in Education degree.

Graduate classes are taught on the main campus in Lawrence and on the KU Edwards Campus (http://edwardscampus.ku.edu) in Overland Park in suburban Kansas City about 40 miles from Lawrence. Master’s and doctoral students can expect to complete some graduate work on each campus.

Graduate Advising

When application materials are processed and program requirements are met, an advisor is assigned according to the student’s interest. Each student should consult the assigned advisor during each enrollment period.

Doctoral candidates should develop a program plan at the first enrollment or promptly thereafter. A copy of this program should be filed with the Graduate Division of the School of Education. Basic and applied research skills, including statistics, research design, and related requirements appropriate to the degree, are required for the Ph.D. and Ed.D. Specific descriptions of research options may be obtained from the department (http://ct.soe.ku.edu).

Curriculum and Teaching Courses

C&T 100. Introduction to the Education Profession. 3 Hours.
This course is designed to acquaint students with the profession of education by helping to increase an awareness of the role and characteristics of an effective teacher. Large and small group activities and assignments are dispersed throughout the semester to facilitate these outcomes. Students will be involved in observation of and participation with teachers and pupils in public school classrooms, which complement course activities and assignments. Students will work with a mentor pre-service teacher from the KU School of Education to provide discussions about each of the course objectives. Ct 100 is a pre-professional course. Successful completion of the course does not guarantee eventual admission to the School of Education’s Teacher Education Program. LEC.

C&T 200. Making Connections Between Schools and Community. 3 Hours.
This course is designed to increase the students’ awareness of learning in the classroom and to familiarize them with the role of the school and the community. Institutions and resources that support children and families will be addressed through large and small group sessions and field experiences. Emphasis is given to the diverse nature of schools, communities, and their populations. In addition, the course will acclimate students with the School of Education programs, admissions procedures, and curriculum offerings. Successful completion of this course does not guarantee eventual admission of the School of Education’s Teacher Education Program. Prerequisite: Successful completion of CT 100. LEC.

C&T 235. Multicultural Education. 3 Hours. AE41.
The course is designed to provide the student with an awareness of and sensitivity of the concept of multicultural education. Topics related to the rationale for and processes of providing a multicultural perspective within the schools will be addressed. Field experiences will be structured to provide students with opportunities to observe the diversity within the educational setting. LEC.

C&T 322. Curriculum and the Learner in the Elementary School. 3 Hours.
Building on the experiences in CT 100 and CT 200, this course will focus on the learner in the elementary setting. Learning occurs as a result of interaction among learners, teacher and subject matter in the classroom within a school in a community. The impact of the interactions of these students of learning of young children is studied in this course. Emphasis is given to the factors that influence curriculum decision-making, methods that are considered in elementary grades curriculum and how it is delivered. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 324. Curriculum Learner in the Middle School and High School. 3 Hours.
Building on experiences in CT 100 and CT 200, this course will focus on the learner within the high school setting. Learning occurs in a classroom within a school in a community, and the nature and structure of these settings as well as their impact on learning is studied in this course. Emphasis is given to the curriculum, the factors that influence the curriculum, and the ways that goals for high school students are reflected in the high school curriculum. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 330. Instructional Approaches for ESOL Learners in the Elementary/Early Childhood Classroom. 3 Hours.
Teaching English as a Second or Additional Language/Bilingual Education is designed to provide preservice elementary teachers with an understanding of the history and methodology of teaching English to speakers of other languages, both as a foreign language and as an additional language within American English settings. Future ESL/EFL/EB teachers will be prepared to develop the investigative, decision-making, and reflective teaching skills needed to work with English language learners of elementary age, and to impart language instruction in the appropriate context. Emphasis is placed on developing a clear understanding of who English language learners are; what programs and services are-or should be-available to the ESOLs/EBs; the critical pedagogical aspects of teaching ESL/EFL/EB; and the preparation of teaching materials for classroom use. Prerequisite: Admission to the teacher education program. LEC.

C&T 331. Instructional Approaches for ESOL Learners in the Middle/Secondary Classroom. 3 Hours.
This course is designed to provide preservice middle/secondary discipline specific teachers with an understanding of the history and methodology of teaching English to speakers of other languages, both as a foreign language and as an additional language within American English settings. Future ESL/EFL/EB teachers will be prepared to develop the investigative, decision-making, and reflective teachings skills needed to work with English language learners of all ages, and to impart language instruction in the appropriate context. Emphasis is placed on developing a clear understanding of who English language learners are; what programs and services are-or should be- available to the ESOLs/EBs; the critical pedagogical aspects of teaching ESL/EFL/EB; and the preparation of teaching materials for classroom use. Prerequisite: Admission to the teacher education program. LEC.

C&T 335. Curriculum and Instruction in Middle and Secondary History and Government Classrooms. 3 Hours.
The purpose of this course is to help prepare students to teach social studies in the middle and secondary grades. Prerequisite: Admission to the teacher education program. LEC.
C&T 344. Children's Literature in the Elementary School. 2 Hours.
A study of literature (poetry, folk literature, fiction, and nonfiction) appropriate for elementary school children with a focus on contemporary children's books. Emphasis will be on selection of literature based on child development, literary quality, curriculum, and pluralism and the engagement of children in literature experiences from the interactive, reader response, and critical perspectives. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 347. Social Studies in the Elementary Classroom. 3 Hours.
A study of curricula, instructional strategies, and classroom organization for social studies education K-6. Emphasis is placed on the effective implementation of social studies programs in classroom settings. Prerequisite: Admission to the School of Education in elementary, middle, or secondary, or the Unified Early Childhood programs. LEC.

C&T 349. Science in the Elementary Classroom. 3 Hours.
In this course, you will develop an understanding of how children learn science and why science education is important. You will examine effective approaches to teaching, instructional materials, and student assessment and will learn how to plan and implement a science unit. The course will emphasize a guided-inquiry approach to science instruction appropriate for the abilities and interests of children in grades K-6. Prerequisite: Admission to the School of Education. LEC.

C&T 351. Mathematics for the Elementary Classroom. 3 Hours.
This course is a study of the curriculum, instructional strategies, and classroom organization for mathematics in grades K-6. Emphasis is placed on the effective implementation of mathematics programs in classroom settings. Prerequisite: Admission to the School of Education. LEC.

C&T 352. Literacy Instruction in the Primary Grades (K-3). 3 Hours.
This course is intended to develop the attitudes, knowledge, and skills necessary to effectively instruct primary grades (K-3) children through the development of literacy skills: reading, writing, listening, speaking, spelling, and handwriting. The major goals of this course are for the prospective teacher to develop an understanding of literacy development of the primary-grades child, current literacy theories, and the ability to work with a number of approaches to promote literacy learning and a positive attitude toward literacy in all primary-grades students who may have different needs due to language, culture, learning challenges, and/or differing stages of development. This course is to be taken concurrently with CT 353, Literacy Practicum in the Primary Grades. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 353. Literacy Practicum in the Primary Grades. 1 Hour.
This supervised practicum is intended to allow the pre-service teacher to apply the knowledge gained in CT 352, Literacy Instruction in the primary grades (K-3), by teaching children in the primary grades. To be taken concurrently with CT 352. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 354. Literacy Instruction in the Intermediate Grades. 2 Hours.
This course is intended to develop the attitudes, knowledge, and skills necessary to effectively instruct intermediate-grades children (4-6) through the development of literacy skills: reading, writing, listening, speaking, and spelling. The major goals of this course are for the prospective teacher to develop an understanding of literacy development of the intermediate-grades child, current literacy theories, and the ability to work with a number of approaches to promote literacy learning and a positive attitude toward literacy in all intermediate-grades students who may have different needs due to language, culture, learning challenges, and/or differing stages of development. Prerequisite: Admission to the Teacher Education Program. This course is to be taken concurrently with CT 355, Literacy Practicum in the Intermediate Grades. LEC.

C&T 355. Literacy Practicum in the Intermediate Grades (4-6). 1 Hour.
This supervised practicum is intended to allow the preservice teacher to apply the knowledge gained in CT 354, Literacy Instruction in the intermediate grades (4-6), by teaching children in the intermediate grades. To be taken concurrently with CT 354. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 359. Basic Processes of Reading. 1 Hour.
An introduction to reading in relation to specific areas of art, music and health and physical education. Focus on specialized vocabulary and literature related to each area. Introduction of specific strategies to teach vocabulary and comprehension and to integrated units of study. Prerequisite: Admission to certification program in music education, art education, health education, or physical education. LEC.

C&T 360. Knowing and Learning in Mathematics and Science. 3 Hours.
This course focuses on issues of what it means to learn and know science and mathematics. What are the standards for knowing we will use? How is knowing and learning structured and how does what we know change and develop? For the science and mathematics educator, what are the tensions between general, cross-disciplinary characterizations of knowing (e.g. intelligence) and the specifics of coming to understand powerful ideas in mathematics and science? What are the links between knowing and developing in learning theory, and the content and evolution of scientific ideas. Also, current issues and tensions in education will be discussed, especially as it relates to mathematics and science instruction. LEC.

C&T 366. Classroom Interactions in Mathematics and Science. 3 Hours.
To make prospective teachers aware of multiple models of teaching (including direct instruction, inquiry teaching and use of small groups); the advantages, disadvantages and uses of each; and what each model requires of teachers. To allow prospective teachers to explore ways of probing student understanding through authentic assessment, evaluating student understanding through student artifacts, and enhancing student understanding through lesson plans built around models of how people learn. To make prospective teachers aware of equity and diversity issues in classroom teaching and ways of ensuring that all students have an opportunity to learn. To make students aware of the proficiencies for licensure recognized by UKanTeach and Kansas State Board of Education and facilitate students' demonstration and documentation of these through development of a professional portfolio. To develop students' capacity to identify and evaluate best teaching practices as presented in research literature. Prerequisite: CT 360. LEC.

C&T 420. Teaching Kansas Government and Contemporary Public Policy Issues. 3 Hours.
A study of the constitution, organization, functions, and processes of Kansas government, of contemporary public policy issues with local, state and national implications, and of strategies for teaching these in middle and secondary classrooms. Prerequisite: Admission to the School of Education and POLS 110. LEC.

C&T 421. Economics for Elementary Teachers. 3 Hours.
The focus of this course is to introduce and develop understanding of economic concepts and principles in those preparing to teach elementary education. This course presents students primarily with basic economic content and, secondarily, with information on developmentally appropriate economics for elementary age students. Emphasis will be placed on micro and macroeconomic concepts, including the economic problem, resources, scarcity, economic decision-making, opportunity cost, economic systems, price, exchange and money, markets, supply and demand, production, market failures and the role of government, and
international trade. Open only to School of Education students enrolled in the elementary education program. LEC.

C&T 422. Teaching Economics and Secondary Social Studies. 2 Hours.
The purpose of the course is to prepare secondary social studies education students to teach the major economic concepts, issues and systems in the United States and other nations in preparation for teacher licensure in the State of Kansas. Prerequisite: Admission to the Secondary History and Government teacher education licensure program. LEC.

C&T 430. Teaching Literature for Young Adults. 3 Hours.
Teaching literature (novel, short story, poetry, drama, nonfiction) suitable for students in the middle school, the junior high school, and the senior high school. Ethnic literature, censorship, bibliographies, and other relevant sources of information about books for young adults will be studied. Prerequisite: Admission to the School of Education. LEC.

C&T 441. Teaching Social Studies in the Middle/Secondary Schools. 3 Hours.
Study of curriculum development and instructional strategies appropriate for teaching social studies in grades 5-12. Prerequisite: CT 323 or CT 324 or permission of instructor. LEC.

C&T 448. Reading and Writing Across the Curriculum. 3 Hours.
Content area teachers do far more than impart information to students. They play an important role in guiding middle/secondary students as they use reading and writing as tools for learning. This course includes an overview of the state and national reading and writing scores of adolescents. Students will then be introduced to the basic processes or ways in which individuals may learn to read and write. The course continues with a focus on the instructional strategies and materials that promote the development of reading and writing in the context of teaching new information. Additionally, the course emphasizes the informal methods educators can use, on an on-going basis, to diagnose their students ability to comprehend content material. Finally, appropriate fix-up strategies will be modeled. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 460. Project Based Instruction in Mathematics and Science. 3 Hours.
This course will have three essential components. The first will be a theory driven perspective accounting for what we know of how people learn and how project-based instruction may be our best choice for bridging the gap between theory and practice. The second component will be a technological component that will assist the enrolled students in developing their own project-based unit. The third component will be a field component consisting of two parts: 1) observation of well-implemented project-based instruction in local schools and 2) implementation of project-based instruction with area high school students on a study trip to Flint Hills. Prerequisite: CT 360. LEC.

C&T 489. Advanced Teaching Practicum. 1 Hour.
This supervised practicum is intended to allow the pre-service teacher to apply knowledge gained in SPED 507; CT 448, ELPS 537; and CT 540, CT 541, CT 542, CT 543 and CT 544: Advanced (Content Area) Methods by teaching children in the middle/secondary grades. To be taken concurrently with SPED 507; CT 448, ELPS 537; and CT 540, CT 541, CT 542, CT 543 and CT 544: Advanced (Content Area) Methods. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 490. Student Teaching. 6 Hours.
A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field.
C&T 530. Curriculum and Instruction in Foreign Language Classrooms. 3 Hours.
A study of philosophy, objectives, curriculum, instructional strategies, and evaluation in teaching foreign language at the K-12 levels. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 533. Curriculum and Instruction in Middle & Secondary English/Language Arts Classrooms. 3 Hours.
This is an English/Language Arts methods course that focuses on curriculum development and instructional strategies appropriate for teaching English/Language Arts in grades 5-12. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 537. Curriculum and Instruction in Middle and Secondary Science Classrooms. 3 Hours.
The purpose of this course is to help you prepare to teach science in the middle and secondary grades. The instructor designed the class sessions and learning tasks to enable you to make progress toward achieving the Kansas Science Teaching Standards and Kansas Professional Education Standards. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 539. Curriculum and Instruction in Middle and Secondary Mathematics Classrooms. 3 Hours.
This course is designed to provide focused study of curriculum development and instructional strategies appropriate for teaching mathematics in grades 5-12. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 540. Advanced Practices in Teaching English in the Middle and Secondary Schools. 3 Hours.
The course is designed to provide continued study of curriculum development and instructional strategies appropriate for teaching English/Language Arts in grades 5-12 and as a final readiness for the undergraduate student teaching experience. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 541. Advanced Practices in Teaching Social Studies in Middle/Secondary Schools. 3 Hours.
Advanced study of curriculum development and instructional strategies appropriate for teaching social studies in grades 6-12 and application of learning in a middle/secondary classroom. Prerequisite: CT 335; SPED 326 and, CT 324 LEC.

C&T 542. Advanced Practices in Teaching Science in the Middle and Secondary Schools. 3 Hours.
This course is designed as a final readiness for the semester-long student teaching experience and the Kansas Performance Teaching Portfolio to be completed during that student teaching experience. The course deals with the analysis, adaptation, and application of varied instructional designs to implement curricula in specific science areas in grades 5-12. Prerequisite: Admission to the middle-level licensure program in science education at the undergraduate level or one of the graduate licensure programs in middle/secondary science. Successful completion of CT 537. LEC.

C&T 543. Advanced Practices in Teaching Mathematics in the Middle and Secondary Schools. 3 Hours.
The course is designed to provide continued study of curriculum development and instructional strategies appropriate for teaching mathematics in grades 5-12 and as a final readiness for the undergraduate of GLP student teaching experience. Prerequisite: Admission to the middle-level licensure program in mathematics education at the undergraduate level or the GLP in middle or secondary mathematics. Successful completion of CT 539. LEC.

C&T 544. Advanced Practices: Situating Foreign Language Content, Dispositions, Skills&Tools Language Classroom. 3 Hours.
This is an advanced Foreign Language methods course that focuses on the critical importance of the socio-linguistic environment of foreign language classrooms. Prerequisite: Admission to the Teacher Education Program. LEC.

C&T 598. Special Course: _____. 1-5 Hours. AES1.
A special course of study to meet current needs of education students, primarily for undergraduates. LEC.

C&T 620. Teaching English as a Second Language/Bilingual Education. 3 Hours.
The purpose of this course is to study the objectives and methods of ESL/Bilingual education. Students will examine methods and techniques of teaching: listening, speaking, reading, and writing in the ESL/Bilingual Education settings. The course will also emphasize the importance of culture in second language teaching, and self-evaluation of teaching and instructional materials. Undergraduate course that will meet with CT 820 Teaching English as a Second Language/Bilingual Education. Prerequisite: Admission to the School of Education. LEC.

C&T 621. Diagnosis and Remediation in Second Language Education. 3 Hours.
This course provides an overview of diagnostic techniques and instruments used to identify and remediate specific learning difficulties associated with normal second language development in the area of listening, speaking, reading, and writing. The course includes a review of research concerning assessment as it relates to error analysis in the second language context. Prerequisite: Admission to the School of Education. LEC.

C&T 622. Second Language Acquisition. 3 Hours.
This course provides an intensive review of the theory and research base of second language acquisition. Particular attention is given to the influence of research trends in linguistics and psychology on second language education theory and practice. Current trends in second language education are examined in light of the historical theory base. Prerequisite: Admission to the School of Education. LEC.

C&T 630. Understanding the Nature of Talent in Children and Youth. 3 Hours.
This course addresses the social, cognitive, affective, and other developmental aspects of talent as manifested in children and youth with high potential. The course provides an opportunity to examine characteristics, strengths, and needs of children and their families. The course focuses on the foundational aspects of gifted/talented education: educational and political history of the field, etiology of extraordinary potential, and identification and assessment techniques, instruments, and systems. Included in the course are relevant research, policies and regulations, services, and information resources. Prerequisite: SPED 325, SPED 425, SPED 431, SPED 725 or equivalent. LEC.

C&T 631. Teaching for Talent Development. 3 Hours.
The course introduces key theories and basic principles of curriculum development and introduction for students with high potential and/or high achievement. Frameworks and models for modifying general education content, cognitive processes, and learning outcomes are applied to enhancing talent development. The course addresses affective considerations, peer relations, and working with families. Prerequisite: CT 630 or CT 730. LEC.

C&T 649. An International Teaching Experience. 3 Hours.
This study abroad focuses on professional growth in teaching and understanding education based on an international experience. Students learn about curriculum and teaching from an international
perspective, and engage in professional discussions with Italian teachers and administrators. Students engage in culturally responsive teaching in preschool-secondary settings, they participate in family and community activities/events, and they visit renowned museums and cities. Prerequisite: Application through the Office of Study Abroad and interview with the director. LEC.

C&T 702. Alignment of Curriculum, Instruction, and Assessment. 3 Hours.
The course focuses on standards-based education reform and the relation between standards, curricula, assessments and instruction. Since the inception of No Child Left Behind in 2001, many classroom teachers have felt constricted by standards-based practices in the classroom. A significant emphasis of the course will be on the implications of high-stakes accountability. This course will explore the historical foundations of the standards movement as well as current research on connecting standards to instructional practices. The course also will explore ways in which teachers can be accountable to the standards without losing creativity in their individual classrooms. LEC.

C&T 706. Social Studies in the Middle School. 3 Hours.
The purpose of this course is to offer preservice and practicing middle grades educators the following: (1) an overview of the historical and philosophical antecedents of social studies education; (2) a brief review of the developmental characteristics of early adolescence; (3) the specifics of a citizenship education program specifically designed for middle grades social studies; and (4) a range of time-tested ideas for challenging young adolescents with academic experiences that address their unique developmental profile and capture their imaginations for active, responsible citizenship. LEC.

C&T 707. Project Based Instruction. 3 Hours.
This course will emphasize exploring, designing, and evaluating materials and pedagogy to work toward the design of project-based curriculum and instruction. Topics focus on the principles of project-based instruction as well as multiple models for its use in the classroom. LEC.

C&T 708. Understanding Research in Education. 3 Hours.
This course introduces the concepts and skills involved in understanding and analyzing research in education and related areas. The course provides an overview of basic, general knowledge of various research methodologies. Students should expect to study much of this material in greater depth through additional course work before being fully prepared to conduct independent research. However, this course should enhance their ability to locate, read, comprehend, and critically analyze research articles and reports. Topics in the course include quantitative and qualitative methods and designs, historical and descriptive research, and program evaluation. (This course fulfills the requirement of a research methods course in the first 12 hours of graduate study.) LEC.

C&T 709. Foundations of Curriculum and Instruction. 3 Hours.
Basic concepts and processes of curriculum and instruction, including theories, planning models, resources for decision-making, current trends, research, and proposals for improvement of curriculum and instruction. LEC.

C&T 710. Writing, Language, and Learning. 3 Hours.
This course will situate issues about writing and learning in the context of more general inquiry about language and learning. We will read research related to classroom discourse and the teaching of writing in secondary classrooms. We will then connect this body of research to the teaching of English in middle/secondary classrooms. LEC.

C&T 711. Teaching Young Adult Literature (Grades 7-12). 3 Hours.
A study of the characteristics of adolescents with respect to their interest and reading habits; criteria for choosing books for junior and senior high school in-class and out-of-class reading; selection of materials; methods for helping poor readers; literary discrimination and appreciation; censorship; ethnic literature; techniques for presenting literary selection in class. Wide reading among best of current and classical literature. LEC.

C&T 730. Understanding Talent. 3 Hours.
This course addresses the social, cognitive, affective, and other developmental aspects of talent as manifested in children and youth with high potential. The course provides an opportunity to examine characteristics, strengths, and needs of these children and their families. The course focuses on the foundational aspects of gifted/talented education: educational and political history of the field, etiology of extraordinary potential, and identification and assessment techniques, instruments, and systems. Included in the course are relevant research, policies and regulations, services, and information resources. Prerequisite: SPED 425, SPED 431, SPED 725, or equivalent introductory course on exceptional children and youth. LEC.

C&T 731. Teaching for Talent Development. 3 Hours.
The course introduces key theories and basic principles of curriculum development and introduction for students with high potential and/or high achievement. Frameworks and models for modifying general education content, cognitive processes, and learning outcomes are applied to enhancing talent development. The course addresses affective considerations, peer relations, and working with families. Prerequisite: CT 644 or CT 730 or equivalent introductory course on exceptional children and youth. LEC.

C&T 732. Teaching for Talent in General Education Settings. 3 Hours.
This course is designed for classroom teachers concerned about meeting the needs of students with high potential in their classrooms. Students will be introduced to various curriculum models and teaching strategies commonly employed in special programs for gifted/talented students. There will be opportunities to apply gifted education models to modify existing curriculum or to develop new curricula which enhances the abilities of all students. Prerequisite: CT 644 or CT 730 or equivalent introductory course on exceptional children and youth. LEC.

C&T 733. Practicum in Gifted and Talented Education. 1-10 Hours.
A course designed to provide experiences for students to work intensively and to teach identified gifted and high potential students in educational settings. Students will develop competencies relative to implementing individual group and individual education plans through a variety of instructional alternatives. Arranged service delivery options are possible. Prerequisite: CT 645, CT 731, CT 732, or equivalent course. FLD.

C&T 734. Integration of Instruction in the Elementary School. 2 Hours.
A study of the rationale for correlation instruction in language arts, reading, math, science, and social studies and practical strategies for integrating instruction throughout the elementary school curriculum. LEC.

C&T 738. Applied Research in the Classroom. 3 Hours.
This course is designed to facilitate the implementation and completion of an action research project during the internship experience. Prerequisite: Successful completion of student teaching. LEC.

C&T 739. Internship in Teaching: ______. 1-15 Hours.
A supervised internship experience leading to initial certification. The student assumes the total professional role as a teacher in an approved school setting, with level and subject area to be selected according to the teaching field. Prerequisite: CT 500 and CT 736 appropriate to the student’s teaching level and area, or equivalent. FLD.
C&T 740. Foundations of Reading: Process, Theory, and Instruction. 3 Hours.
It is the purpose of this course to introduce students to the foundations of the reading process, developmental levels, theory, models, and procedures at the emergent, elementary, and secondary levels. Elements of cultural, linguistic, and ethnic diversity that affect the reading process are included. Students work with research related to the reading process, remediation, and assessment. LEC.

C&T 741. Comprehension and Study Strategies for Use with Multiple Texts. 3 Hours.
It is the purpose of this course to examine research, theory, and practice in reading comprehension. Emphasis is placed on the application of strategies for various text types (expository, narrative, persuasive, and technical) for teaching reading comprehension and study skills across content areas in the K-12 classrooms. Prerequisite: CT 740 or permission of the instructor. LEC.

C&T 742. Language and Literature in the Reading Program. 3 Hours.
A study of linguistic and literary aspects of reading instruction, focusing on language and cognitive development as they relate to reading. Emphasis will be on approaches for differentiating reading instruction to provide for less proficient to gifted readers, research and issues related to reader response, techniques for assessing children’s reading attitudes and interests, procedures for selecting literature, and strategies for integrating literature into the elementary school reading program. Prerequisite: CT 740 or permission of instructor. LEC.

C&T 743. Writing and Spelling Development and Instruction. 3 Hours.
A study of the research base on writing, spelling, speaking, and listening for teaching the language arts; an overview of development in writing and spelling, the writing and spelling processes and instruction, and strategies for integrating the language arts. Prerequisite: Admission to a masters program within the School of Education, CT 740 or permission of the instructor. LEC.

C&T 744. Teaching Literature to Children. 3 Hours.
An opportunity to survey the broad range of trade books published for children; criteria for book selection; children’s reading interests and tastes; illustrations of children’s books; sources for selecting literature; poetry; the role of children’s literature in today’s elementary curriculum. LEC.

C&T 745. Reading and the English Language Learner. 3 Hours. LEC.

C&T 747. Reading Strategies for Expository Text. 3 Hours.
A study of the need of teaching reading in content areas, factors involved in the reading process, and basic and advanced reading and study skills to be taught. Teachers may concentrate upon the study of ways of teaching reading in one or more of the following: language arts, social studies, sciences, mathematics, art, music, home economics, industrial arts, business education, or physical education. Prerequisite: Admission to the Transition to Teaching Program. LEC.

C&T 748. Reading and Writing Across the Curriculum. 3 Hours.
In CT 748, preservice content teachers, who have had no previous literacy courses, are introduced to the basic processes of reading and to instructional strategies and materials that promote the development of reading, writing, and studying in the context of teaching new information. Additionally, we discuss the ways in which teachers diagnose, in an informal, on-going basis, their students’ abilities to comprehend the material they are teaching. LEC.

C&T 749. An International Teaching Experience. 3 Hours.
This study abroad focuses on professional growth in teaching and understanding education based on an international experience. Students learn about curriculum and teaching from an international perspective, and engage in professional discussions with Italian teachers and administrators. Students engage in culturally responsive teaching in preschool-secondary settings, they participate in family and community activities/events, and they visit renowned museums and cities. Prerequisite: Application through the Office of Study Abroad and interview with the director. LEC.

C&T 750. Connecting Research to Classroom Practice in Elementary Mathematics and Science. 3 Hours.
The primary purpose of this course is to examine current research on issues important to elementary mathematics and science programs. The course will explore issues important to the classroom practices of elementary mathematics and science teachers. Provides a broad background for understanding current issues related to elementary mathematics and science curriculum, instruction, and assessment. LEC.

C&T 752. Teaching Mathematics in the Urban Middle/Secondary School. 3 Hours.
The purpose of this course is to help urban teachers plan, organize, teach, and assess mathematics learning in the middle and secondary grades. The Kansas Teaching Standards (in Professional Education and in Mathematics Teaching) identify the knowledge and abilities addressed in this course. The instructors designed the class sessions and learning tasks to enable participants to make progress toward achieving the Kansas Teaching Standards. It is the participant’s responsibility to acquire the knowledge and abilities and to demonstrate the progress being made toward meeting the Standards. A mathematics teaching portfolio is the tool used to document progress toward achieving the Standards. Prerequisite: Admission to the Transition to Teaching Program or permission of instructor. LEC.

C&T 753. Teaching Science in the Urban Middle/Secondary School. 3 Hours.
The purpose of this course is to help urban teachers plan, organize, teach, and assess science learning in the middle and secondary grades. The Kansas Teaching Standards (in Professional Education and in Science Teaching) identify the knowledge and abilities addressed in this course. The instructors designed the class sessions and learning tasks to enable participants to make progress toward achieving the Kansas Teaching Standards. It is the participant’s responsibility to acquire the knowledge and abilities and to demonstrate the progress being made toward meeting the Standards. A science teaching portfolio is the tool used to document progress toward achieving the Standards. Prerequisite: Admission to the Transition to Teaching Program or permission of instructor. LEC.

C&T 760. Modern Approaches to Elementary Social Studies. 3 Hours.
A study of the purpose, content, psychology, and materials and methods for teaching the social sciences in the elementary school. Emphasis on principles and procedures for combining the social studies with other areas of the curriculum in broad unit instruction. Prerequisite: Nine hours of Education including educational psychology. LEC.

C&T 762. Modern Approaches to Middle/Secondary Social Studies. 3 Hours.
The purpose of the course is to offer preservice and practicing K-12 social studies educators the following: (1) an overview of theoretical bases for social studies education and of the social studies and discipline specific curriculum standards; (2) a review of the major curricular and extracurricular K-12 social studies programs; (3) strategies for the design, implementation, and evaluation of social studies programs; and (4) experience with the design, implementation, and/or evaluation of a social studies program. Prerequisite: Nine hours of Education including educational psychology. LEC.
C&T 763. Economic Education. 2-3 Hours.
An examination of the concepts, theories, and resource materials utilized in teaching economics in the K-12 curriculum. Particular attention is given to the functional integration of economic concepts into the elementary and secondary social studies curriculum. The use of economic resource material is considered. Participants develop projects for use in their own classrooms. LEC.

C&T 764. Teaching Economics in: ____, 3 Hours.
A critical analysis of the relationship between economics and a designated school subject selected from history, geography, or consumer education; a determination of the economic concepts that can be appropriately integrated into the particular discipline; and a comprehensive search of the particular curriculum area to identify the most effective and efficient points at which the economic concepts can be integrated. Prerequisite: CT 763. LEC.

C&T 765. Teaching with Community, Contemporary, and Primary Resources. 3 Hours.
A practical course designed for grades 4-12 teachers who wish to utilize community-based, mass media, and/or primary resources. The course focuses on the use of community resources such as local historical societies, museums, and government agencies; on the use of mass media such as newspapers, magazines, organizations' newsletters, television, and film; and on the use of primary resources such as artifacts, documents, recordings, and oral historians. Participants receive sample resources from each of the three areas along with accompanying activities. LEC.

C&T 797. Special Project in: ____, 2 Hours.
Implementation of the curriculum project planned in CT 734 or CT 735; implementation and assessment of the special project will occur during the internship. Prerequisite: CT 734, CT 735, and CT 736. RSH.

C&T 798. Special Course: ____, 1-5 Hours.
A special course of study to meet current needs of education professionals—primarily for graduate students. LEC.

C&T 800. Foundations of Curriculum Development. 3 Hours.
This course is designed for students to gain a functional understanding of the historical, philosophical, political, psychological, and cultural factors which affect the designing and implementation of curriculum at several levels: the individual classroom, the team, the school, the larger administrative unit, the state, and the nation. Prerequisite: CT 709 or permission of instructor. LEC.

C&T 801. Planning for School Improvement. 2-3 Hours.
The course will emphasize the latest research and practice related to school improvement. Students will function as a member of a school improvement team to assimilate and synthesize research and practice into the development, revision, and/or assessment of a school improvement plan for a specific school site. Corequisite: Enrollment in the summer institute on school improvement. LEC.

C&T 802. Curriculum Planning for Educational Settings. 3 Hours.
A focus on organizing and managing curriculum development in educational settings. Such curricular decisions as writing philosophies, setting goals and objectives, selecting and organizing content, and designing and monitoring evaluation procedures will be emphasized. Providing leadership for the collaborative process of curriculum planning in organizational settings will receive attention. Prerequisite: CT 709, admission to Building Principal Certification program, or permission of instructor. LEC.

C&T 803. Differentiating Curriculum and Instruction. 3 Hours.
This course is designed for educators interested in expanding curriculum and instruction to accommodate diverse learners in the classroom, K-12. Topics include: models, methods, and resources for differentiating curriculum and instruction, designing and modifying differentiated curriculum, evaluating student learning, and introducing students, parents and colleagues to differentiation. An evidence-based, practical course for teachers, administrators, and support personnel. Prerequisite: Admission to Graduate School. LEC.

C&T 804. Trends and Issues in Middle Level Education. 3 Hours.
Information from current research, area specialists and exemplary practitioners will be used to extend appropriate teaching strategies and supplement background knowledge on special topics related to social, emotional and physical development as it relates to the curricula and young adolescents. LEC.

C&T 805. Planning Instruction and Instructional Strategies in Urban Settings. 3 Hours.
This course will prepare students to become cognizant of the particular contextual variables that pertain to the urban setting, engage in instructional planning utilizing pertinent instructional strategies for urban classrooms. Students will become familiar with conceptual frameworks appropriate to education in the urban environment, review research on education in the urban setting, and discuss goals and options for effectively coping with the demands of the urban classroom. FLD.

C&T 806. Instructional Strategies and Models. 3 Hours.
Analysis of models of teaching which represent distinct orientations toward students and how they learn. The application of these models is complemented by the study of research evidence on effective teaching strategies. Prerequisite: CT 709. LEC.

C&T 807. Multicultural Education. 3 Hours.
In order to provide the student with an understanding of multicultural education, the course will examine the effects of such issues as ethnicity in America, the melting pot theory, separatism, cultural pluralism, legal issues, and bilingual education upon the curriculum and instruction in today’s classrooms. It will include an evaluation of materials for bias and stereotypes. Field experiences are a part of this course. LEC.

C&T 808. Qualitative Research: Curriculum Inquiry. 3 Hours.
Curriculum Inquiry provides an opportunity to reflect, explore, understand, and broaden perspectives of curriculum through examining the theories, methodologies, strategies, and design of qualitative research. This course is designed to develop a common understanding of the major elements of qualitative research, while offering each student an opportunity to examine research topics and methods of personal interest, with particular attention to curricular issues. The course also includes practical experience with various modes of data collection and analysis. LEC.

C&T 809. Creative Thinking and Learning. 3 Hours.
This course provides an opportunity to investigate the nature of the creative process in educational settings. The knowledge base for the course builds from foundations of creativity, principles and theories of identifying and enhancing creative production, and affective learner variables. The course blends classic and contemporary works in creativity, and features the application of theories and models of the origins and development of creativity to promoting creative thinking and learning among children, youth and adults. Participants learn about, apply, and adapt techniques for defining and identifying creative potential and for encouraging creative thinking in educational settings. Prerequisite: Admission to graduate school. LEC.

C&T 810. Issues in Teaching Language Arts. 3 Hours.
A study of present curricula in junior and senior high school English and speech; current thinking in grammar and usage; language development in oral and written communication; problems of teaching reading and literature in the junior and senior high school; construction and
reorganization of language arts courses. Students will be permitted to make an intensive study of an individual problem relating to more effective instruction in the language arts. LEC.

C&T 820. Teaching English as a Second Language/Bilingual Education. 3 Hours.
The purpose of this course is to study the objectives and methods of ESL/Bilingual education. Students will examine methods and techniques of teaching: listening, speaking, reading, and writing in the ESL/Bilingual Education settings. The course will also emphasize the importance of culture in second language teaching, and self-evaluation of teaching and instructional materials. Prerequisite or Corequisite: CT 709. LEC.

C&T 821. Diagnosis and Remediation in Second Language Education. 3 Hours.
This course provides an overview of diagnostic techniques and instruments used to identify and remediate specific learning difficulties associated with normal second language development in the area of listening, speaking, reading, and writing. The course includes a review of research concerning assessment as it relates to error analysis in the second language context. Corequisite: CT 820. LEC.

C&T 822. Second Language Acquisition. 3 Hours.
This course provides an intensive review of the theory and research base of second language acquisition. Particular attention is given to the influence of research trends in linguistics and psychology on second language education theory and practice. Current trends in second language education are examined in light of the historical theory base. Prerequisite: CT 820. LEC.

C&T 823. Developing Intercultural Awareness in the Second Language Classroom. 3 Hours.
This course includes the study of the interrelationship of language and culture and the use of multicultural training techniques to develop cultural awareness and positive attitudes in the second language classroom. Emphasis is on the integration of culture in the second language curriculum. Prerequisite: CT 820 or CT 803. LEC.

C&T 824. Problems in Second Language Instruction. 3 Hours.
This course presents a study of curricula and instruction in the second language setting at all levels with emphasis on educational research concerning these issues. Particular attention is given to developing competency in locating and utilizing sources of information and to preparing the research document. The course facilitates practical problem solving in the second language learning context. Prerequisite: CT 820. LEC.

C&T 825. Practicum in Teaching English as a Second Language/Bilingual Education. 3 Hours.
This course provides a supervised teaching experience in a setting appropriate to the goals of the prospective ESL/Bilingual teacher: elementary, secondary, or adult. Particular attention is given to lesson planning, classroom management, and the development of self-evaluation techniques. This course will also emphasize structured classroom observation prior to teaching and techniques for developing and maintaining positive working relationships with other professionals in the school setting. Prerequisite: CT 820, CT 821, and CT 822 or CT 824. FLD.

C&T 826. Language Analysis for Language Teachers. 3 Hours.
This course offers pre- and in-service teachers the basic foundations of language analysis necessary for the teaching of second/foreign languages. The course covers basic linguistic topics common to all human languages (grammatical, phonological, and semantic aspects) with the intent to help teachers understand and address common language problems that students face when learning English as a second/foreign language. LEC.

C&T 827. Teaching Second/Foreign Language Pronunciation. 3 Hours.
The objective of this course is to give prospective language teachers the requisite theoretical and practical background for making decisions concerning pronunciation teaching. This course provides second and foreign language teachers with the necessary knowledge and skills to address the teaching of pronunciation in the foreign/second language classroom. After a review of theoretical and practical research dealing with universal human speech perception and production, implications for the design of appropriate strategies and lessons to teaching pronunciation, both at the segmental and suprasegmental levels, are addressed. Prerequisite: CT 444, CT 820/CT 822. LEC.

C&T 828. Language and Identity. 3 Hours.
This interdisciplinary seminar explores the interrelationship between language and identity, and the role of language in developing identities of second language learners. LEC.

C&T 830. Classroom Applications of Assessment Information. 1 Hour.
The primary purpose of this course is to examine classroom-based practices for identifying intellectual and creative potential in school-aged children and youth, and to apply that information to classroom instruction as well as to individual education planning. Particular attention is paid to populations who are traditionally underserved due to language status, ethnicity, socio-economic status, geography, or multiple exceptionality. Parent and student roles are also emphasized. An evidence-based practice course for teachers, administrators, and support personnel. Prerequisite: Admission to Graduate School. LEC.

C&T 831. Personal Dimensions of Talent. 1 Hour.
The course focuses on affective aspects of individuals with high potential. Particular attention is paid to populations who are traditionally underserved due to ethnicity, socio-economic status, geography, or multiple exceptionality. The course focuses on theories, models and methods for understanding and addressing the successful personal development of talented individuals, supporting families, and personal issues linked to high potential. An evidence-based practice course for teachers, administrators, and support personnel. Prerequisite: Admission to Graduate School in Education. LEC.

C&T 840. Emergent Literacy and Beginning Reading. 3 Hours.
A study of emergent literacy through the beginning stages of literacy development. Course content focuses on the history, theory, and research that supports instructional reading practices for children Pre-kindergarten through grade 2. Prerequisite: CT 740, CT 741, or permission of instructor. LEC.

C&T 841. Early Intervention in Reading Practicum. 3 Hours.
A case study approach to the instruction of children in need of early intervention in reading. Requires assessment, instruction, and case reports of tutored children. Prerequisite: CT 740, CT 741, CT 840, or permission of instructor. FLD.

C&T 842. Supporting Striving Readers: Adolescent through Adult. 3 Hours.
A study of the characteristics and multiple causes of reading and writing difficulties, principles and procedures for diagnosing and remediating reading difficulties, how to provide individual and group intervention strategies, communicate diagnostic information, and gain awareness of the impact of research on instructional decision-making for students with reading difficulties. Prerequisite: Admission to a masters program...
within the School of Education, CT 740, CT 741, CT 840, and CT 841, or permission of instructor. LEC.

C&T 843. Supporting Striving Readers Practicum. 3 Hours.
Case study approach to the treatment of pre-adolescent through adults with reading disabilities. Requires diagnostic testing of the learner, compilation of case study reports, and participating in staffing for the purpose of designing remedial reading programs. Students also participate in implementation of remedial programs with pre-adolescent through adults through tutoring in either a clinical setting or a public school setting. Prerequisite: Admission to a masters program within the School of Education, CT 740, CT 741, CT 840, CT 841, CT 842, or permission of instructor. LEC.

C&T 844. The Reading Program: Coordination and Supervision. 3 Hours.
An overview of the role of the reading coordinator/ supervisor and that individual’s responsibility for the components of a balanced reading program. Emphasis will be given to assessment of the reading program, strategies for change, improving the reading program, in- service programs, working with other school personnel, providing services, and public relations. Prerequisite: CT 740, CT 741, CT 840, CT 841, CT 842, and CT 843. LEC.

C&T 845. Reading Specialist Internship. 1-2 Hours.
Supervised and directed experiences to develop the necessary instructional and leadership competencies of a reading specialist. Activities will include district and building level needs assessment, data analysis, professional development of teachers and paraprofessionals, and cooperative planning with teachers and administrators around issues of literacy instruction and achievement. Prerequisite: Completion (at the University of Kansas) of course requirements for the Reading Specialist program. The Reading Specialist course requirements may be a part of a graduate degree. FLD.

C&T 850. Seminar in Science and Mathematics Educational Research. 3 Hours.
The primary purpose of this course is to examine literature in science and mathematics education in order to better understand research in these fields from both a historical and contemporary perspective. The process of examining literature in these fields will be used to help understand how to plan, conduct, and evaluate research in science and math education. This course emphasizes both qualitative and quantitative research in science and math education. LEC.

C&T 851. Modern Approaches to Middle/Secondary School Mathematics. 3 Hours.
A study of aspects of curriculum and instruction in middle/secondary school mathematics programs, including research on teaching and learning mathematics. Prerequisite: Teaching experience in middle-level or high school mathematics or permission of instructor. LEC.

C&T 852. Instruction in Mathematics and Science. 3 Hours.
In this course, students will explore a variety of research-based instructional theories, models, and strategies for teaching and learning of mathematics and science. They will apply and evaluate the usage of one instructional strategy in an action research project in their classrooms. Prerequisite: CT 709. LEC.

C&T 853. Connecting Research to Classroom Practice in Middle/ Secondary Science. 3 Hours.
This course will explore current research on issues important to middle and high school science teachers so they can use research to support and improve their classroom practice. Prerequisite: Teaching experience in middle level or high school science or permission of instructor. LEC.

C&T 854. Assessment and Evaluation in Science and Mathematics. 3 Hours.
The primary purpose of this course is to examine assessment and evaluation in science and mathematics, including assessment of students, teachers, schools, and educational programs. The course will examine technical characteristics of various assessment methods including both traditional and alternative methods. In addition and alternative methods. In addition, the course will analyze and discuss various controversial issues in assessment such as authentic assessment, and large scale assessment, and large scale assessments, assessment for accountability, and equity issues. LEC.

C&T 855. Curriculum in Science and Mathematics. 3 Hours.
A survey of the concepts and processes that provide the focus of modern science and mathematics curricula will be central to the course. Students develop a standards-based framework for a school science or mathematics program. The course includes an analysis of national and state recommendations for the reform of science and mathematics education in the context of our state and local educational systems, which is applied by evaluating exemplary instructional materials and activities appropriate for classroom use. Prerequisite: CT 709. LEC.

C&T 856. Practicum in Science Education. 1-3 Hours.
Intensive supervised experience working with improvement of science curriculum and/or instruction in an educational setting. Credit in any one semester may range from one to three hours; and total credit may not exceed three hours. Prerequisite: Two graduate courses in science education and prior consent of practicum supervisor. FLD.

C&T 857. Practicum in Mathematics Education. 1-3 Hours.
Intensive supervised experience working with improvement of mathematics curriculum and/or instruction in an educational setting. Credit in any one semester may range from one to three hours; and total credit may not exceed three hours. Prerequisite: Two graduate courses in mathematics education and prior consent of practicum supervisor. FLD.

C&T 858. Connecting Research to Classroom Practice in Middle/ Secondary Mathematics. 3 Hours.
This course will explore current research on issues important to middle and high school mathematics teachers so they can use research to support and improve their classroom practice. Prerequisite: Teaching experience in middle level or high school mathematics or permission of instructor. LEC.

C&T 859. Issues in Mathematics or Science Education: ______. 1-3 Hours.
A study of issues in a particular area of mathematics or science education. The course may be repeated for different topics. Prerequisite: Admission to graduate study. LEC.

C&T 860. Topics in Teaching and Learning Social Studies: ______. 3 Hours.
An examination of current topics and issues from social science perspectives. Special emphasis is given to effective integration of one of the social sciences, such as anthropology, geography, political science, science technology and society, and these topics affect issues of curriculum at both elementary and secondary levels. Students will need to confer with the instructor of record to determine which topic will be the current focus of the course. LEC.

C&T 861. Curriculum and Assessment in Social Studies Programs K-12. 3 Hours.
The purpose of the course is to offer preservice and practicing K-12 social studies educators the following: (1) an overview of theoretical bases for social studies education and of the social studies and discipline specific curriculum standards; (2) a review of the major curricular and
extracurricular K-12 social studies programs; (3) strategies for the design, implementation, and evaluation of social studies programs; and (4) experience with the design, implementation, and/or evaluation of a social studies program. LEC.

C&T 862. Trends and Issues in Social Studies Instruction. 3 Hours.
A study of trends and issues relating to, and needed changes in the content, organization, emphasis, resources and equipment, methods, devices and evaluation in the social studies. Consideration of related problems such as achieving meaning and understanding, providing for individual differences, providing motivation, the cooperative assignment and socialized recitation. Students will be permitted to concentrate on those problems of particular interest to them. Prerequisite: Nine hours of Education including educational psychology. LEC.

C&T 863. Curriculum Development in Economic Education. 3 Hours.
Extension and application of economic concepts and theories through integration into the scope and sequence of the school curriculum. The process will include the development and field testing of a project that utilizes appropriate concepts, materials, community resources and techniques for integrating economics into the total curriculum. Prerequisite: CT 763. LEC.

C&T 864. International Issues in the K-12 Classroom. 3 Hours.
An examination of current international topics and issues from an economic education perspective. Special emphasis is given to effective integration of global topics and issues into the curriculum at both elementary and secondary levels. Students survey and analyze economic education resource materials and develop international lessons for use in their own classrooms. This course is offered during summer term, locally, and as a study abroad option. This course has been offered two times previously as TL 798-summer 1993 at the Regents Center and in Great Britain. LEC.

C&T 866. Connecting Research to Classroom Practice in Social Studies. 3 Hours.
The purpose of the course is to explore readings on effective practice and current research on issues important to social studies teachers. Knowledge gained from the exploration of readings will be used to develop a plan and implementation procedures for improving classroom practice. Prerequisite: Teaching experience in social studies education or permission of the instructor. LEC.

C&T 896. Seminar in: ______. 1-4 Hours.
LEC.

C&T 897. Independent Study. 1-4 Hours.
Prerequisite: Consent of advisor and instructor. RSH.

C&T 898. Master’s Project. 1-4 Hours.
RSH.

C&T 899. Master’s Thesis. 1-6 Hours.
THE.

C&T 900. Current Trends & Issues in Curriculum & Instruction. 3 Hours.
The course, taught as a capstone seminar, will provide a review of current trends and issues in theories, practices, and events within curricular and instructional efforts in American education. Topics studied may include constructivism, connectivism in the digital age, contemporary theories and theorists such as Vygotsky, online instruction and the Internet’s potential and growth, the new Cult of Efficiency, stigmatization and standardized testing, and charter schools. Student composition of each class will influence the final syllabus, which may include other topics reflective of student interests and goals. The class is designed for those in the final course phase of their doctoral studies. Students in their first or second semester of their programs will not be encouraged to enroll in the class. LEC.

C&T 901. Contemporary Research of Teaching Effectiveness. 3 Hours.
A review of recent research on the conceptualization, measurement, and improvement of teaching effectiveness. Particular attention is given to the history of efforts to improve teaching, to the reasons why such efforts have often been unsuccessful, and to the recent contributions of the “micro-criteria” approach to the problem. LEC.

C&T 903. Curriculum Supervision. 3 Hours.
An intensive study of the theoretical and research bases for curriculum supervision and improvement. Topics include models and practices in supervision and staff development, skills and instruments used in curriculum assessment, coordination of both human and material resources, and the dynamics of change strategies. LEC.

C&T 904. Philosophical Questions in Curriculum and Teaching. 3 Hours.
This course addresses philosophical questions pertaining to curriculum and teaching across a range of educational contexts. These questions center on epistemology, ethics, and the assumptions underlying alternative approaches to research in education. Students completing this course should be able to engage in philosophical inquiry and apply relevant philosophical literature and principles to the examination of curriculum and teaching. LEC.

C&T 905. Teacher Education in the U.S.. 2 Hours.
A study of the development, issues, and programs for the preparation of teachers. Open to all regular graduate students. LEC.

C&T 906. Qualitative and Curriculum Inquiry: Analysis and Interpretation. 3 Hours.
Supports novice researchers in extending their understanding of the theoretical frameworks underlying qualitative research, qualitative methodologies, the research process and its relationship with curriculum inquiry. During the course we will discuss various forms of qualitative research methods, approaches to research, and perspectives in methodology relate to curriculum inquiry. We will explore the intertwining of data generation, analysis, and writing. In addition, we will focus on refining data generation techniques, strategies for data analysis, data interpretation, and various forms of reporting/writing. Prior coursework: Introduction to a graduate level qualitative research course or permission from the instructor. Prerequisite: Introduction to a graduate level qualitative research course or permission from the instructor. LEC.

C&T 907. Critical Pedagogies. 3 Hours.
This course examines the theories and practices of several educational orientations that comprise "critical pedagogy." Students examine the historical roots and evolution of this broad orientation toward education. Recurring themes in the class are relations between knowledge and curriculum, the school and society, and teachers and students. Students completing the course should be able to analyze educational phenomena through a critical theoretical lens. Open to all doctoral students and advanced masters students with instructor permission. LEC.

C&T 910. Research Seminar in English Education. 3 Hours.
This course will focus on both the conduct and findings of research related to English/Language Arts Education. Its purpose will be to foster discussion among students concerning paradigms that have shaped the field of English/Language Arts as well as encourage critique of the ways in which these paradigms are enacted in research. In this course, each student will develop a reading list on a topic of interest related to research in English/Language Arts Education and/or pursue the writing of an individual research proposal. Prerequisite: Admission to master’s or
doctoral program in CT, emphasis in English/Language Arts Education. LEC.

C&T 940. Evaluation of Research in Reading. 3 Hours.
LEC.

C&T 944. Diagnosis and Evaluation of Instruction in Higher Education. 2-3 Hours.
The course will focus on (1) a review of the practical and theoretical problems of developing, in institutions of higher education, programs for the diagnosis and/or evaluation of classroom instruction, including use of videotape feedback for diagnosis, and the development of surveys for evaluation for diagnosis of teaching, and (2) the importance of careful administrative and review procedures as the evaluation of teaching becomes more formal and consequential. Three hours of credit will be awarded to those enrolled in the laboratory section of the course. LEC.

C&T 951. Research and Evaluation in Mathematics and Science. 3 Hours.
This course introduces students to the processes of planning, conducting, and evaluating mathematics and science research and evaluation in education. This course emphasizes the methods and techniques used in both quantitative mathematics and science research and evaluation methodologies. Prerequisite: A PRE course in statistics. LEC.

C&T 960. Theory and Research in Social Studies Education. 3 Hours.
The purpose of this graduate level course is to stimulate and communicate systematic research and thinking in Social Studies Education. Its purpose is to foster the creation and exchange of ideas and research findings that will expand knowledge about purposes, conditions, and effects of schooling and education about society and social relations. LEC.

C&T 968. Readings in Economic Education Research. 3 Hours.
A survey of research in elementary, secondary, and higher education economic education. After initial, mutual readings, and discussions, class members will determine a list of broad research questions around which we will focus our readings. Each student is responsible for developing a reading list on one of the topics and reporting on selected readings. Class meetings will focus on summarizing and critiquing published research. Purpose of this course is to prepare doctoral students for comprehensive examinations and dissertation research. LEC.

C&T 994. Advanced Topics: _____, 1-3 Hours.
A special course of study to meet current needs of education professionals -- primarily for post-master’s level students. LEC.

C&T 995. Field Experience in: _____, 1-5 Hours.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agencies, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. FLD.

C&T 996. College Teaching Experience in: _____, 2 Hours.
To meet the college teaching experience requirement for doctoral programs, a student shall engage in a semester-long, planned, instructional activity that shall include college classroom teaching under supervision. Planning shall be done with the advisor and/or the member of the faculty who will supervise the experience. The activity shall be done under the supervision of a member of the University of Kansas faculty or by an individual or individuals designated by the candidate’s committee. FLD.

C&T 997. Individual Study. 1-4 Hours.
Prerequisite: Prior graduate course work in the area of study and consent of instructor. RSH.

C&T 998. Seminar in: _____, 1-4 Hours.
LEC.

C&T 999. Doctoral Dissertation. 1-15 Hours.
THE.

Deaf Education Courses

DE 702. Intermediate Signing Exact English. 3 Hours.
Intermediate vocabulary (700 words) for basic school routines and subjects will be taught using curricular materials to practice SEE 2 vocabulary and affix markers. Two college sign classes of any kind. LEC.

DE 717. Pidgin Sign English/American Sign Language. 3 Hours.
An intermediate level, educationally oriented vocabulary (450 words) taught in PSE/ASL. Comparison of literally and conceptually signed sentences. Prerequisite: Any sign course, admittance into Deaf Education Masters Program. LEC.

DE 808. Family Focus With Young Hearing-Impaired Children. 3 Hours.
Focus on the family as the primary teachers of deaf and hard-of-hearing infants and toddlers. The purpose of the class is twofold: to develop an understanding of the effect of deafness and to develop skills to deal with its intervention. Future teachers, early-childhood specialists, and related service providers will participate in discussion, simulations, and applied exercises in acquiring course competencies. Prerequisite: Sign class of any type. LEC.

Educ Leadership Policy Stds Courses

ELPS 200. Making Connections Between Schools and Community. 3 Hours.
This course is designed to increase the students’ awareness of learning in the classroom and to familiarize them with the role of the school and the community. Institutions and resources that support children and families will be addressed through large and small group sessions and field experiences. Emphasis is given to the diverse nature of schools, communities, and their populations. In addition, the course will acclimate students with the School of Education programs, admissions procedures, and curriculum offerings. Successful completion of this course does not guarantee eventual admission of the School of Education’s Teacher Education Program. Prerequisite: Successful completion of CT 100. LEC.

ELPS 250. Education and Society. 3 Hours. AE41/AE51.
This course provides students with an introduction to key ideas and socio-historical forces that have shaped the contemporary educational system in the United States, drawing upon the disciplines of the historical, philosophical, and social foundations of education. The development of school and community relations will be a point of emphasis. LEC.

ELPS 301. Educational Technology in Elementary-Middle Education. 3 Hours.
The focus of this course is on developing integration strategies and acquiring computer skills for using instructional technology and educational software, digital media, and information technologies appropriate to elementary and middle school teaching environments. Students will gain expertise in (a) the selection of appropriate instructional technologies and digital media for use in the classroom; (b) production of technology-based instructional materials; and (c) the evaluation and validation of a variety of electronic information sources. Prerequisite: Admission to the Teacher Education Program. LEC.
ELPS 302. Educational Technology in Middle/Secondary Education. 3 Hours.
The focus of this course is on developing integration strategies and acquiring computer skills for using instructional technology and educational software, digital media, and information technologies appropriate to middle school and high school teaching environments. Students will gain expertise in (a) the selection of appropriate instructional technologies and digital media for use in the classroom; (b) production of technology-based instructional materials; and (c) the evaluation and validation of a variety of electronic information sources. Prerequisite: Admission to the Teacher Education Program. LEC.

ELPS 437. Politics and Governance of Public Schools. 3 Hours.
This course introduces students not pursuing K-12 teaching or administrative positions to the organizational and legal foundations of the American educational system. LEC.

ELPS 450. Foundations of Education. 3 Hours.
A historical approach to the major social and philosophical foundations of American education, with an emphasis on the relation of educational theory to classroom practice. LEC.

ELPS 490. Senior Internship I. 4 Hours.
Supervised field experience in an on-site educational setting that provides the student an opportunity to study and participate in the professional activities of a designated educational setting with emphasis on the planning, implementation, and evaluation of such activities. Regular conferences with faculty to evaluate student progress will be scheduled. Prerequisite: Admission to the non-certificate baccalaureate program. LEC.

ELPS 491. Senior Internship II. 4 Hours.
Supervised field experience in an on-site educational setting with increasing emphasis placed on an integration of formal learning and in site experience. Regular conferences with faculty will be scheduled. Prerequisite: Admission to the non-certificate baccalaureate program. FLD.

ELPS 497. Independent Study in. 1-2 Hours.
Only one enrollment permitted each semester. A maximum of four hours will apply toward the bachelor’s degree. Prerequisite: Recommendation of advisor and consent of instructor. IND.

ELPS 537. The Governance and Organization of Schools. 3 Hours.
The course provides the prospective teacher with an overview of the legal foundations of the American educational system including the ways schools and school districts are organized and run; the role of various levels of government and various governmental and educational officials in controlling education; the rights of students and teachers; the terms, conditions, and responsibilities of teacher employment. Prerequisite: Admission to the Teacher Education Program. LEC.

ELPS 540. Ethics in Education. 3 Hours.
This course examines practices and policies occurring in K-12 and postsecondary educational institutions through the lenses provided by ethics. During the semester, we will read, discuss, and write about ethics in education from both theoretical and practical perspectives. Prerequisite: Junior standing or higher. The course is suitable for advanced undergraduate and master’s degree seeking students. LEC.

ELPS 550. Childhood and Youth in America. 3 Hours.
A study of the changing role and character of childhood and youth as stages of life in the context of American educational and cultural history. LEC.

ELPS 598. Special Course: 1-5 Hours.
A special course of study to meet current needs of education students, primarily for undergraduates. LEC.

ELPS 627. Growing Up in Urbanizing America. 3 Hours.
A study of the changing role and character of childhood and youth as stages of life in the context of American urban and social history, with particular attention to education and human development. Prerequisite: Junior standing or higher. LEC.

ELPS 652. Residential Staff Skill Enhancement and Administration. 2-3 Hours.
This special course of study in residential staff skill enhancement and administration is an exploration of concepts and skills necessary for becoming an effective paraprofessional staff member in a residential living unit. Each class session will include presentations and experiential learning on topics to develop or improve interpersonal skills and skill in dealing with special concerns. The course is required or recommended for all residence and scholarship hall staff and open to upperclass or graduate students interested in student personnel work. LEC.

ELPS 715. Understanding Research in Education. 3 Hours.
This course introduces the concepts and skills involved in understanding and analyzing research in education and related areas. The course provides an overview of basic, general knowledge of various research methodologies. Students should expect to study much of this material in greater depth through additional course work before being prepared to conduct independent research. However, this course should enhance their ability to locate, read, comprehend, and critically analyze research articles and reports. Topics in the course include quantitative and qualitative methods and designs, historical and descriptive research, and program evaluation. Prerequisite: Admission to graduate standing in the School of Education. LEC.

ELPS 750. Principalship. 3 Hours.
An introduction to the role, responsibilities, expectations and major duties of elementary, middle, and high school building administrators. Students are presented typical problems faced by school administrators through simulations and role playing and are expected, through reflection and discussion, to develop viable solutions. LEC.

ELPS 751. Educational Finance. 3 Hours.
A description and analysis of national, state, and local strategies for the financial support of education, utilizing social, economic, legal, and political frameworks. Particular attention to the principles of revenue acquisition and distribution at the local and state level for public school operations, with analysis of how these principles apply to Kansas. Designed for the wide variety of educational practitioners regardless of organizational and degree levels. Prerequisite: Admission to graduate study. LEC.

ELPS 752. Education Law. 3 Hours.
A study of legal principles and issues affecting educational policy making and practice with emphasis on student and teacher rights, equity, and the administration of schools. Prerequisite: Admission to graduate study. LEC.

ELPS 753. Introduction to Personnel Administration in Education. 3 Hours.
An overview of the theory and practice of personnel administration. The course focuses on the processes of recruitment, selection, training and development, evaluation, compensation, equal employment opportunity, and labor relations. LEC.

ELPS 754. Analysis of Administrative Problems. 3 Hours.
An introduction to various methods of problem identification; strategies of information gathering; schemes for the analysis of qualitative and quantitative data; models of problem resolution and decision making; and
ELPS 755. Human Resource Management. 3 Hours.  
An overview of the theory and practice of the management, recruitment, selection, compensation, placement, and development of personnel in the school setting. LEC.

ELPS 757. Education in American Society. 3 Hours.  
A study of the roles and goals of education in the United States, the interrelationships among schools and students, teachers, administrators, and parents, and the culture of schools. LEC.

ELPS 760. Integration of Educational Technology. 3 Hours.  
This course focuses on strategies for integrating educational technology in K-12 schools, universities, government or industry. Topics include applying technology in: a) understanding basic technology operations b) planning and designing learning experiences, c) curriculum development, d) assessment and evaluation e) productivity and professional practices, and considering f) social, ethical, legal, and human issues. Students produce a comprehensive electronic portfolio that describes the theoretical perspectives that guide their technology integrations strategies and evidence that demonstrates their competencies. LEC.

ELPS 772. Philosophical Problems in Comparative Education. 3 Hours.  
A study of significant philosophical problems encountered when comparing educational systems. Special emphasis on the implications of axiological analysis for educational theory and practice in different areas of the world. Relationships among the social sciences, philosophy, and the international or cross-cultural venture in education. The importance of systematic value-theory in comparative research and international education. LEC.

ELPS 773. School and Society in Comparative Education. 3 Hours.  
Analysis of the role of social science in comparative education as perceived by different philosophies or schools of thought, such as Marxism, phenomenology, empiricism, pragmatism, and linguistic analysis. LEC.

ELPS 774. Modern Educational Theorists. 3 Hours.  
An in-depth study of prominent European thinkers who have contributed to educational theory and practice (e.g., Rousseau, Pestalozzi, Herbert, Froebel, Montessori, Nietzsche, Freud, Piaget, Ortega Gasset, etc.). Prerequisite: ELPS 770 or ELPS 771 is recommended. LEC.

ELPS 777. Problems in Contemporary Educational Theory. 3 Hours.  
Select explorations into such provocative and problematic trends in current educational theory as Marxism, behaviorism, phenomenology, existentialism, analytic philosophy, hedonism, nonverbal education, etc. Prerequisite: ELPS 770 or ELPS 771 is recommended. LEC.

ELPS 780. Introduction to Higher Education Administration. 3 Hours.  
This course is designed for beginning master’s degree students and for doctoral students who have had no previous administrative experience in college or university settings. Students will be introduced to the function and responsibilities of major administrative divisions of a college or university and to the major tasks of administration: planning, programming, budgeting, staffing, managing. An emphasis will be placed on current issues facing higher education and students will be introduced to the major journals of the field. As part of the course requirements, students will spend some time familiarizing themselves with one or more administrative offices on a college campus. Prerequisite: Admission to study in higher education at the graduate level. LEC.

ELPS 781. Student Affairs Administration in Higher Education. 3 Hours.  
This course is designed to include the study of the history and development of student personnel services in higher education, the role and function of the student affairs administrator, contemporary issues and problems, and an understanding of the organization and role of student affairs administration within higher education settings. Prerequisite: Admission to the higher education program or permission of instructor. LEC.

ELPS 789. Special Course:. 1-5 Hours.  
A special course of study to meet current needs of education professionals -- primarily for graduate students. LEC.

ELPS 810. Educational Media Development. 3 Hours.  
Media surrounds today’s learning environments. How can you effectively engage learners with multimedia, meaningful interactions, and motivational strategies? This course will take a hands-on practical approach to creating interactive educational multimedia products including, but not limited to, digital images, movies, podcast, Web publishing and educational games. Also, students will learn about the underlying learning theories of educational media development. LEC.

ELPS 811. Constructivist Learning Technologies. 3 Hours.  
This course explores the design and use of new educational technologies to support constructivist learning. Throughout the course, students will (1) get hands-on experiences with emerging educational technologies, (2) examine how the underlying learning theories are reified into concrete learning environments, and (3) analyze how the affordances of new technologies (e.g., modeling and visualization) can facilitate the constructivist learning processes. This course is suitable for students who wish to develop greater knowledge about the ways emerging computer technologies can empower constructivist learning. Prerequisite: CT 770. LEC.

ELPS 812. Design of Educational Technology. 3 Hours.  
This course introduces instructional design theory and production techniques for developing educational technology resources and systems. Students apply their understandings of design and education theories as they work in teams to develop real-world applications of educational technology for specific clients. LEC.

ELPS 820. Practicum in Educational Technology. 1-3 Hours.  
Supervised practice in a media center in selection, classifying, designing, producing, and/or managing instructional materials. Prerequisite: CT 770 and CT 871. FLD.

ELPS 830. Foundations of Multicultural Education. 3 Hours.  
This class provides students with an understanding multicultural education as an instructional concept, educational reform movement, and systemic process meant to ensure educational equity for all people, especially those who have been inadequately served and/or historically discriminated against because of their racial/ethnic or linguistic backgrounds, gender or sexual orientation, socio-economic status, and special needs. Students will examine different theoretical approaches that inform the practice of multicultural education and explore the contribution of various social sciences to the field. LEC.

ELPS 831. Sociology of Education. 3 Hours.  
This course will provide an introduction to the sociology of education. This course is designed to fulfill the doctoral core requirement for social, historical and philosophical foundations of education. Specific topics will include: conflict over the purposes of education; how those purposes are or are not-translated into actual classroom life; how educational systems have developed historically, how status, and more specifically race, class
ELPS 832. History of Educational Thought. 3 Hours.
An examination of the major ideas that have shaped practice in the schools. Emphasis is placed on assisting the student with the development of a coherent and consistent personal philosophy of education upon which administrative practice can be based. LEC.

ELPS 833. Social Context of Urban Education. 3 Hours.
This course examines education in urban communities through the foundational disciplines of history, philosophy, and the social sciences. Particular attention is given to ways in which the changing social and political contexts of American cities affect the educational process. LEC.

ELPS 834. History and Philosophy of Education. 3 Hours.
A comprehensive study of influential persons and movements in the development of educational thought. Eastern and Western, from ancient times to the present. Emphasis on those ideas and historical roots which are relevant to contemporary issues in teaching and school administration. LEC.

ELPS 835. Philosophy of Education. 3 Hours.
An analytic inquiry into basic philosophical positions and issues relevant to education. The difference between ELPS 770 and ELPS 771 is that the latter is topically arranged and does not necessarily follow a historical sequence; it normally proceeds by problems and schools of thought. LEC.

ELPS 837. History of Education and Culture in America. 3 Hours.
A study of the relation between education and culture in America from colonial times to the present. American schools are considered in the wider context of cultural and social change. LEC.

ELPS 838. History of Childhood and Youth in America. 3 Hours.
An exploration of changing attitudes toward children and youth, their subjective experience, their impact on adults, and the conditions that shaped their development. Special attention will be given to the relationship between the changing nature of childhood as a social and cultural category and the development of the education profession. LEC.

ELPS 839. Historical Inquiry in Education. 3 Hours.
This course will provide an introduction to the methodology of historical research in education. This course is designed to fulfill the doctoral core requirement for research methods in education for students interested in doing this type of research. Specific topics will include: the historiography of education; working with primary and secondary documents; oral history as method and documentation, qualitative approaches to history; constructing historical narratives; the question of interpretation. LEC.

ELPS 850. Educational Facilities. 3 Hours.
A study of the principles and processes of developing functional educational facilities. Special emphasis placed on the educational planning that precedes and provides the basis for architectural planning. Among topics considered are plant utilization analysis, enrollment projections, site and equipment needs, fiscal and legal constraints, environmental factors, and the development of educational specifications. Designed for both building and central office level administrators. Prerequisite: Admission to graduate study. LEC.

ELPS 851. Supervision of Student Teaching. 2 Hours.
A study of the organization and functions of student-teaching programs. Emphasis on the development of effective interpersonal relationships among school administrators, cooperating teachers, university supervisors, and student teachers. Designed for both administrative and instructional personnel. Prerequisite: Admission to graduate study. LEC.

ELPS 852. School Resource Management. 3 Hours.
An examination of the sources and uses of fiscal resources in education including underlying concepts from economic theory, the impact of values on fiscal policy, state funding formulas, and school budgeting and accounting practices. LEC.

ELPS 853. Staff Evaluation and Development. 3 Hours.
An examination of current trends in personnel evaluation with a focus on clinical supervision and adult development. Students will participate in simulation exercises to develop skills in classroom observation, conferencing techniques, evaluation of teaching artifacts, and the construction of staff development plans. LEC.

ELPS 854. The Student in Society. 3 Hours.
A study of children and youth with particular emphasis on demographic characteristics of the population served by schools and implications of those characteristics for schools and schooling. LEC.

ELPS 855. Teacher Evaluation. 3 Hours.
Teacher Evaluation is based on clinical, empirical and theoretical information related to effective teacher evaluation behavior from the administrative perspective. It is intended to provide exposure to competencies essential to effective evaluation of teaching performance. Evaluation knowledge, skill and performance are acquired and developed through reading, discussion, active teaching of content related to teacher evaluation and practicing observation, recording and conferencing skills. A variety of approaches is considered, but behaviorally-anchored measurement of teaching behavior is emphasized. Opportunities and needs for improvement are identified with the assistance of video-taped diagnosis of conferencing behavior. Prerequisite: Two of the following: ELPS 750, ELPS 752, ELPS 753, or CT 840. LEC.

ELPS 856. Law and Special Education. 3 Hours.
This course focuses on special education. The American legal system, particularly in respect to special education, the constitutional and statutory provisions of federal and state law and the judicial decisions interpreting those laws are reviewed. This course is the equivalent of or a substitute for ELPS 752. (Same as SPED 851.) Prerequisite: SPED 750 or permission of instructor. LEC.

ELPS 857. Disabled Citizens, Public Policy and Policy Analysis. 3 Hours.
The American legal system, particularly in respect to special education, the constitutional and statutory provisions of federal and state law and the judicial decisions interpreting those laws are reviewed. This course is the equivalent of or a substitute for ELPS 752. (Same as SPED 851.) Prerequisite: SPED 851 or SPED 750 or permission of instructor. LEC.

ELPS 858. Professional Ethics, Public Values and Disabled Citizens. 3 Hours.
To train students to analyze public policy that affects disabled citizens, various models of analysis are brought to bear on federal policy (education, transportation, housing, institutionalization, protection and advocacy, medical assistance, employment, vocational rehabilitation and others). Not valid for core requirement in history and/or philosophy of education. (Same as SPED 852.) Prerequisite: SPED 851 or SPED 750 or permission of instructor. LEC.

ELPS 870. Philosophy of Education II. 3 Hours.
An exploration of select areas in philosophy, such as emphasis on value-theory or epistemology or metaphysics, and their implications for
ELPS 871. Introduction to Qualitative Research. 3 Hours.
An introduction to the foundations of and techniques associated with qualitative research methods. Students will practice interview and participant observation skills and will analyze and interpret data. Additional topics include crafting qualitative research questions, ethics of fieldwork, and establishing trustworthiness of data. Common traditions of qualitative methods employed in education and other related fields will be introduced. LEC.

ELPS 880. The Community/Junior College. 3 Hours.
A survey of the history and development of the community/junior college. Particular emphasis will be given to the student, the faculty, the curricula, administration, and finance. The course is intended to provide a general understanding of the operation and concerns of today's community/junior college for the current or potential community/junior college staff member. LEC.

ELPS 881. Seminar in Leadership. 3 Hours.
The purpose of this seminar is to explore leadership in education, particularly higher education, from a variety of perspectives. Readings come from a variety of disciplinary perspectives, such as sociology, organizational behavior, and psychology. We consider various aspects of leadership and analyze the leader from a symbolic perspective, as a manager of meaning and critical change agent. We then challenge ourselves to deconstruct our leadership realities with the help of several critical perspectives as we prepare to examine who the leaders are as well as who they will, and need to, be in the educational organizations of tomorrow. LEC.

ELPS 882. Higher Education in the United States. 3 Hours.
The purpose of the course is to acquaint students in higher education, and students from other areas who intend to work in the post-secondary setting, with the history, philosophy and development of higher education in the United States. The course focuses on three periods: 1) the founding of Harvard to 1965; 2) dissent, disruption, and change, 1965-1979; and 3) the future and crucial issues, the 1980's. European higher education and its early influence on higher education in the United States is also examined. LEC.

ELPS 883. The College Student. 3 Hours.
The characteristics of college students; impact of college on student behavior, changing attitudes, values, beliefs, and the implications of recent research on traditional and new students for instructional and administrative practices. LEC.

ELPS 884. Research on College Students. 3 Hours.
Examination of the American college student from societal, development, research, and institutional perspectives and to review the policy implications of these findings for college and university administrators and faculty. Topics include research and theory concerning the college student experience, the diverse nature of the student body and its implications for institutional policy and practice, and formulation of individual philosophies and priorities applicable to working with college students. LEC.

ELPS 885. Assessment and Program Evaluation in Higher Education. 3 Hours.
Nature, objectives, and basic procedures of assessment and program evaluation as applied to the various aspects of higher education settings. In addition to basic procedures for evaluating programs, topics covered include accreditation, program review, benchmarking, student outcomes assessment, and evaluation of teaching in colleges and universities. Prerequisite: ELPS 715 or equivalent. LEC.

ELPS 886. Theory into Practice in Higher Education. 3 Hours.
This course is required as a final course for all master's students in higher education. It is designed to prepare students for professional life after graduation. Using a case study approach, students will examine the reality of practice in a variety of higher educational settings including relevant political and ethical factors. Prerequisite: Higher education students in last semester of master's coursework. LEC.

ELPS 893. Advanced Building Leadership Internship. 2 Hours.
Supervised and directed experiences to enhance the necessary leadership skills of a building/district leaders. Activities will include building/district level resource assessment, data analysis, professional development of teachers/principals (and district level professionals), and cooperative planning with teachers and administrators around responsibilities of curriculum, instruction, resource management and student achievement. Prerequisite: Completion (at the University of Kansas) of all certification program (MS/EdD) requirements for the Building/District Leadership Licenses. FLD.

ELPS 895. Internship. 1-5 Hours.
The on site development of the skills necessary to effectively function as a school building leader. Activities will be tailored to the needs of individual students in consultation with a university advisor and a field advisor. FLD.

ELPS 896. Seminar in: 1-4 Hours.
LEC.

ELPS 897. Independent Study. 1-4 Hours.
Prerequisite: Consent of advisor and instructor. IND.

ELPS 898. Master's Project. 1-4 Hours.
RSH.

ELPS 899. Master's Thesis. 1-6 Hours.
THE.

ELPS 948. Research in Education Policy and Leadership. 3 Hours.
This course is an introduction to methods of inquiry in education policy and leadership studies. It is designed to help doctoral students explore possible research interests, formulate research questions, and to review a rich variety of approaches to inquiry in the field of education. Specific topics include: interview- and observation-driven studies, ethnography, feminist and narrative methods, legal and historical methods, questionnaire-driven studies, quantitative evaluation studies, and studies using administrative and large national data sources. LEC.

ELPS 950. Educational Policy Making and Reform. 3 Hours.
An analysis of patterns of influence, organizations, and governmental agencies which impact education at the community, state and national levels. Particular emphasis is placed on analysis of policy development process and the relationship of policy to administration. Recommended to students in educational administration and higher education. LEC.

ELPS 951. Supervision of Instruction. 3 Hours.
A study of the principles and techniques necessary for coordinating, monitoring, and improving the educational programs of elementary and secondary schools. LEC.

ELPS 952. School Finance: Policy and Practice. 3 Hours.
The objective of this course is to understand the financial systems and mechanisms used by states in the funding of elementary and secondary education in the United States. In simple language, we will be concerned with five basic issues: (1) Where the money comes from; (2) How it is redistributed; (3) How it is spent; (4) The relative effectiveness of spending decisions including selected international comparisons; and (5) How the previous four financial activities participate in a common financial ecology. The course provides an overview of theory and concepts central to the understanding of school finance with an emphasis on policy issues.
It also examines the mechanics of school finance funding in light of state policies. LEC.

ELPS 953. District Human Resource Management. 3 Hours.
An in-depth study of theory and research in personnel administration. The focus will be on current literature dealing with empirical assessments of personnel theory and techniques. Specific concepts to be considered include the following: educator characteristics, job analysis and design, personnel recruitment, selection and evaluation techniques, staffing and development, and labor relations. Prerequisite: ELPS 753 or its equivalent. LEC.

ELPS 954. Sociology of Educational Organizations. 3 Hours.
This class is an overview of basic and advanced sociological and political theories of organization, with specific application to issues and problems in K-12 education. It is designed for graduate students and practicing educational leaders and administrators who intend to utilize research on organizations in their studies of the governance of schools, the sociology and politics of education, and education policy. The topics covered include the origins and nature of modern bureaucracy, formal structure and function, organizational control, transaction cost economics, population ecology, resource dependence, the new institutionalism, organizational effectiveness and legitimacy, organizational culture, power and politics, and change. LEC.

ELPS 955. District Business Management. 3 Hours.
This course emphasizes skills for effective and efficient business and financial management of school districts in a Kansas or Missouri context. Basic topics include: Short range and long range financial planning, analysis of financial statements, budget preparation, fund accounting and financial reporting, contracting of services including transportation and food services, staff salaries and benefits and insurance. The course also includes a number of strategic methods for institutional planning including: Cost Benefit Analysis, Cost Effectiveness Analysis, and enrollment, revenue and expenditure forecasting techniques. Prerequisite: ELPS 952. LEC.

ELPS 956. District Leadership. 3 Hours.
The focus of the course is the role of the public school district superintendent. Organized study will include assigned readings, lectures, guest speakers, discussion, and the completion of a study project. The course will include consideration of such topics as boardmanship, community relations, district leadership, professional accountability, district maintenance and operations, professional employment and relationships with other agencies. The course is designed to serve the needs of those graduate students pursuing advanced study with the intention of completing requirements for district certification. Some students will also find the field appealing as an area for dissertation research. Prerequisite: Doctoral status in education administration or permission of instructor. LEC.

ELPS 957. Educational Policy, Ethics and Law. 3 Hours.
Course focuses on use of legal and moral reasoning in analysis of educational policy issues. Specific topics will vary depending on interests of instructor and students and current controversy. Examples of possible topics to be included: school desegregation, teacher collective bargaining, separation of church and school, equal educational opportunity. Prerequisite: ELPS 752, equivalent, or consent of instructor. LEC.

ELPS 958. American Educational Reform Movements: Past and Present. 3 Hours.
An examination of the origin, nature, and consequences of educational reform in the United States. The primary goal is to attain a balanced evaluation of current educational reform. LEC.

ELPS 959. Organization and Administration of Services for Exceptional Children. 3 Hours.
To aid administrators and prospective administrators responsible for organizing and administering programs of education for exceptional children, state and federal guidelines and regulations, legal aspects and financing of special education, planning a program, administering special services. (Same as SPED 971.) Prerequisite: Nine hours of Education including educational psychology and SPED 725. LEC.

ELPS 960. Specialist Project. 1-4 Hours.

ELPS 970. Theory and Research in Administration. 3 Hours.
A survey of the theoretical and empirical literature in educational administration and the methods used to investigate these content areas. Major emphasis is devoted to developing research skills applicable in practice and to the identification of possible generic topics suitable for future dissertation work. LEC.

ELPS 971. Comparative Education. 2 Hours.
A factual, descriptive, and analytical study of national systems of formal education, or schooling, as exemplified in contemporary educational establishments. Organizational and administrative policies and teaching practices, with emphasis on Germany, France, England, U.S.S.R., People’s Republic of China and Japan. Other nations may be examined on an individual project basis. The difference between ELPS 971 and ELPS 772 is the philosophical emphasis of the latter. LEC.

ELPS 972. Educational Problems in Latin America. 3 Hours.
Designed to meet the needs of students majoring in Latin American studies or interested in the area. Development of an awareness of the concept of cross-cultural confluence with Latin America as it relates to education. Survey of the main problems confronted by Latin American educational systems and examination of the difficulties experienced by North American educators when confronted with such problems. LEC.

ELPS 975. Education, Technology and Social Change. 3 Hours.
This interdisciplinary course provides an opportunity to read, reflect upon, and discuss ideas drawn from the emerging field of Science and Technology Studies (STS) in connection with education. Its focus is the interrelationships between technology, society, and education (defined broadly to include non-school and adult learning settings). It explores how knowledge, expertise, and authority are constructed within and across social and cultural groups, with particular attention social and economic inequality. It also considers the relationship between emerging technologies, educational experiences and the nature of “the self” in society, among other issues. Prerequisite: Admission to ELPS doctoral program, or permission of instructor. LEC.

ELPS 980. Postsecondary Finance. 3 Hours.
This course is designed for advanced doctoral students in higher education, particularly those who will be preparing unit budgets or budget presentations and those who make and implement fiscal policy (e.g., financial aid offers). The course material covers different types of college and university budgeting -- incremental, zero-based and formula -- and their impact on university revenues; statewide coordination and its impact on programs, program duplication and funding; retrenchment and quality issues; the legislative role in budget preparation; unified and comparative management systems (e.g., WICHE and NCHEMS); and the impact of federal contracting and student aid policies. LEC.

ELPS 981. Higher Education Law. 3 Hours.
An overview of the developing law of higher education, with emphasis on and analysis of employer-employee relationships, student-faculty/ administration relationships, and the impact of federal and state regulation on these relationships. LEC.
ELPS 982. Faculty in Higher Education. 3 Hours.
This course considers the role and circumstances of faculty in higher education, including variations among different types of institutions. Topics include the history and demographics of the professoriate, the academic work environment and labor market, the role of faculty in institutional governance and policy making, and the social and political context of academia. LEC.

ELPS 983. Curriculum Innovation in Higher Education. 3 Hours.
A study of contemporary post-secondary curriculum with particular emphasis on the nature of curriculum, the organization and structure of academic programs, the nature of change in academic communities and exemplary innovative institutions. LEC.

ELPS 984. Teacher Education in the United States. 2 Hours.
A study of the development, issues, and programs for the preparation of teachers. Open to all regular graduate students. LEC.

ELPS 985. Evaluations of Programs in Higher Education. 2 Hours.
Nature, objectives, and basic procedures of evaluation as applied to the various aspects of higher education. Open to all regular graduate students. LEC.

ELPS 986. The Governance and Administration of Higher Education. 3 Hours.
A theory-based course aimed at providing an understanding of the governance and administration of academic institutions -- particularly universities. Emphasis is directed toward an analysis of decision-making in these complex organizations. LEC.

ELPS 993. Advanced District Leadership Internship. 2 Hours.
