**Minor in Visual Art Requirements**

A minor in Visual Art requires 18 hours, with 12 of those hours numbered 300 and above. The Department of Visual Art welcomes non-majors who wish to learn about the various areas within visual art through the completion of a minor. Please see specific requirements for the minor under the "Minor Requirements" tab.

**Foundations (3)**
- ART 101 Drawing I 3
- or ART 103 Art Concepts and Practice 3
- or ART 104 Art Principles and Practice 3

**Visual Art Introduction Courses (3)**
- 1 course required in any of the following areas:
  - Ceramics:
    - ART 131 Fundamentals of Ceramics (or any CER) 3
  - Drawing:
    - ART 120 Fundamentals of Drawing and Painting (or any DRWG) 3
  - Expanded Media:
    - ART 123 Fundamentals of Expanded Media (or any EXM) 3
  - Metals/Jewelry:

---

1. Successful completion of the following prerequisite courses with a prerequisite GPA #2.75 and no prerequisite grade below a grade of C:
   - ART 101, 102, 103, 104; HA 150, 151; MATH 101; ENGL 101; KU Core Goal 2.1 (choose from: ENGL 102, 201, 203, 209, 211, or HWC 110); and PSYC 104;
2. Earn a cumulative GPA #2.75 to be able to apply for the Professional Sequence.
3. VAE 410, and 420 are only offered in the fall semester.
4. VAE 320, 520 and 395 are only offered in the spring semester.

---

**Please note:**

- All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
- The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Graduate Admission - M.F.A.

To be admitted, students must have undergraduate backgrounds judged by the graduate faculty to be appropriate preparation for the specific specialization selected for graduate study. A strong preference exists for applicants whose undergraduate backgrounds are in visual art.

Departmental faculty selection and review committees evaluate each applicant's transcripts, portfolios, and letters of recommendation to determine their qualifications for admission. The committees expect applicants to have the B.F.A. degree or equivalent experience. In general, committees expect applicants to present about 70 hours of undergraduate credit in studio or related professional courses including about 36 hours of studio credit in a major area, to have maintained an undergraduate overall grade-point average of 3.0 on a 4.0 scale and in the proposed major, and to have had a minimum of 9 hours of credit in art history. The department encourages full-time residence.

Application to the program is competitive, by permission of the Kansas Board of Regents application for admission to graduate programs in Visual Art may be refused if available instructional space does not allow for addition of more students. The deadline for fall admission is January 15.

Submit your graduate application (http://graduate.ku.edu/application-process) and fee online, print it, and send it along with

- 1 official transcript of all college and university coursework,
- statement of purpose,
- 3 letters of recommendation,
- digital portfolio,
- printed image index,
- application form for financial aid,
- statement of financial resources (international students) and
- proof of proficiency in English (international students)

M.F.A. in Visual Art Degree Requirements
Concentrations in Ceramics, Drawing and Painting, Expanded Media, Fibers, Metalsmithing and Jewelry, Printmaking, and Sculpture

The graduate program consists of 60 semester hours of graduate credit, including thesis exhibition, in courses approved by the graduate director and the graduate thesis committee. A student may concentrate in one or more specializations. When the student has completed 2 semesters, the faculty selection and review committee reviews the student's work. The graduate director gives the student a written assessment of progress, signed by the committee. At the end of the third semester, the same committee conducts a thesis review that determines whether the student is prepared to begin thesis work, needs additional coursework, or is to be dropped from the program.

Upon approval by the review committee, the candidate begins work toward the thesis. Students not receiving approval may continue to work toward the next review unless denied by the committee. A student who is approved for thesis work may enroll in Thesis in Art. Before thesis enrollment, the student selects a graduate thesis committee consisting of 3 members of the graduate art faculty. The committee
advises the student, conducts regularly scheduled reviews of the work, and determines whether the requirements for the thesis have been completed. The graduate director must approve the membership of the graduate thesis committee.

The final departmental requirements are

- A thesis exhibition of the student's work,
- An oral examination, and
- A thesis folio of the exhibition.

The thesis folio includes a statement written by the candidate concerning the work and a visual record of the exhibition. The department reserves the option of selecting and retaining one example of each graduate student's work. Upon enrolling, the student automatically accepts these requirements and conditions.

The University of Kansas is a member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org). The entrance requirements and conditions.

### Master of Arts in Visual Art Education

The Department of Visual Art has been authorized by the University and the Kansas Board of Regents to offer the Master of Arts (M.A.) in Visual Art Education. The Visual Art Education graduate program strives to advance students' understanding of art education with a complement of courses that explores historical studies of art education, art criticism, studio work, and aesthetics. An important goal of the curriculum is the development of a broad perspective of art education through multicultural studies, cognitive approaches in teaching and learning, assessment in teaching, and technological issues that arise in contemporary society. Students' programs are tailored to their interests for specialties in areas such as studio, art history, evaluation, and others.

The University of Kansas is a member of the National Association of Schools of Art and Design (http://nasad.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of those organizations.

### Graduate Admission - M.A. Visual Art Education

Application deadlines:

- December 1 - Spring admission
- May 1 - Fall admission

Admission requirements for regular status:

1. Entrance into the M.A. degree program requires a bachelor's degree, from an accredited institution, which encompasses a minimum of 40 semester hours in fine arts studio (courses in drawing, painting, sculpture, design, printmaking, ceramics, metalsmithing/jewelry, weaving, lettering, commercial art, graphic design, constructive design, etc.), 9 hours in history of art, and 8 hours in visual art education. Applicants must have an overall undergraduate grade-point average of at least 3.0 on a 4-point scale.
2. 1 official transcript.
3. A minimum of 3 letters of recommendation from former or current instructors and/or those able to recommend the applicant on the basis of professional experience (e.g., principals, supervisors, or former employers). The letters of recommendation must address the applicant's potential to take initiative as a graduate student and ability to be a self-starter.

Submit your graduate application (http://graduate.ku.edu/application-process) and fee online, then print a copy and send it along with

- 1 official transcript of all college and university coursework,
- Graduate Student Information Questionnaire,
- 3 letters of recommendation,
- Graduate Licensure applicants only, Praxis I test scores
- statement of financial resources (international students) and
- proof of proficiency in English (international students)

in one envelope to the department:

The University of Kansas
Visual Art Education
Director of Graduate Studies
Art and Design Bldg.
1467 Jayhawk Blvd., Room 300
Lawrence, KS 66045-7531

### M.A. in Visual Art Education

The graduate program includes advanced professional and scholarly study for art educators and teaching licensure for those with baccalaureate degrees in other fields who wish to enter art education licensure typically also requires collateral undergraduate study) and advanced study for individuals in related disciplines. Details may be found in the Visual Art Education M.A. handbook, available from the Department of Visual Art (http://art.ku.edu).

### M.A. Degree Requirements

At least 15 and no more than 18 hours in visual art education are required. The remainder of the coursework can be in related fields such as history of art, education, psychology, etc. This emphasis is appropriate for the student desiring to improve his or her fine arts knowledge and research skills in art education.

#### Thesis Option

The student completes 9 credit hours of core courses (VAE 800, VAE 869, and VAE 875), additional elective hours, and an independent experimental, descriptive, historical, or philosophical investigation of a topic related to visual art education. A total of 30 credit hours is required.

#### Project Option

The student completes 9 credit hours of core courses (VAE 800, VAE 869, and VAE 875), and additional elective hours. A substantial application of theory, principles, and/or products of visual art education in a pedagogical setting must be documented. A total of 30 credit hours is required.
Examination Option

Students take a total of 37 credit hours in required core courses (including VAE 875 Research in Art Education) and elective courses with 36 credit hours in regularly scheduled classes. Students also take a 1-credit-hour course, VAE 890 Preparation for the M.A. Examination, devoted to preparing for a written final examination. Preparation for the examination occurs during the first half of the semester and provides the basis for the course grade. The written examination, taken during the second half of the semester, requires students to demonstrate their knowledge of current issues in the field. If the written exam is deemed unsatisfactory by a majority of the student’s committee, the student will be required to retake the exam. The exact content and format of the second examination will be determined by the student’s committee members.

Graduate Licensure in Art Education

Students who seek to be art teachers in public schools (PreK-12) may obtain licensure as part of the M.A. degree. The licensure track is for individuals with especially strong academic and artistic backgrounds who have completed baccalaureate degrees in studio art, design, art history, or other art-related fields. Coursework is taken at the undergraduate and graduate levels. Upon completion, individuals are recommended by the university for PreK-12 art licensure in Kansas and have earned a significant amount of credit required for the M.A. in Visual Art Education. Prospective students must meet all application requirements for the master’s degree to be considered for licensure in art. For further information, contact the Department of Visual Art (http://art.ku.edu) at 785-864-4401.
--Languages, Literatures & Cultures (in CLAS)

Studying a foreign language at the University of Kansas is your first step towards a richer life. When you speak another language, it gives you access to new literature, new music, new art. It will multiply your job opportunities. It will allow you to move about more freely in today’s global society.

The University of Kansas offers over 40 foreign languages. Our faculty provides a wealth of knowledge about the cultures and languages of the world. We are home to twelve foreign language and culture focused departments, as well as five resource centers focused on foreign languages and area studies. You can choose from over 60 different degrees and concentrations, more than 140 study abroad programs, and you have access to a vast pool of undergraduate and graduate scholarships.

More information is available at: http://sllc.ku.edu/

Second Language Studies, Graduate Certificate

The purpose of the graduate certificate program in Second Language Studies (SLS) is to enhance the preparation and professionalization of graduate students in the School of Languages, Literatures, and Cultures (SLLC), the Department of Linguistics, and other departments affiliated with SLLC. The certificate provides an opportunity at KU for graduate students of foreign language, literature, and culture and theoretical linguistics to add a concentration in applied linguistics and language teaching.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admissions

Current graduate students in any School of Languages, Literatures, and Cultures department or Linguistics are eligible to apply. Others interested in the certificate should contact the School to determine eligibility. For more information on admission to a graduate certificate program, see the policy on Graduate Certificate Programs - Eligibility and Admission Criteria (http://policy.ku.edu/graduate-studies/grad-certification-program-admission).

The certificate will be awarded to MA or Ph.D. students who successfully complete 4 graduate-level courses across disciplines (12 credits total):

1. LING 700 Introduction to Linguistics or equivalent offered in each participating department, e.g., Structure of Modern Standard German (GERM 712), Structure of Modern French (FREN 703).
2. LING 715 Linguistics and Second Language Acquisition
3. LA&S 720 Introduction to Language Teaching Research
4. Elective course in Second Language Studies. This could be fulfilled by a Teaching Methods course required of GTAs teaching in the SLLC (FREN 704, GERM 800, SLAV 824, SPAN 801) and by other approved related courses, including those offered by the School of Education.

A student who has prior coursework deemed equivalent to any of the required courses may replace these with approved electives.

If deemed necessary, some of these courses can be converted into blended courses with online modules.

Public Affairs Administration (in CLAS)

Bachelor of Arts and Bachelor of General Studies in Public Administration (p. 1951)
Minor in Public Administration (p. 1953)
Master of Public Administration (p. 1955)
Master of Public Administration and Juris Doctor (p. 1956)
Master of Public Administration and Master of Urban Planning (p. 1957)
Doctor of Philosophy in Public Administration (p. 1958)
Performance Management, Graduate Certificate in (p. 1954)
City and County Management, Graduate Certificate in (p. 1953)

Why study public affairs and administration?

The School of Public Affairs and Administration develops skilled leaders, innovators and problem solvers who are ready to confront pressing social and economic challenges at the local, state and national levels. Our graduates become public management practitioners who exemplify a deep commitment to ethical and professional public service administration within a wide variety of public and nonprofit sector professions.

The School of Public Affairs and Administration

The School of Public Affairs and Administration is ranked #1 among graduate schools in city management and urban policy (since 1998), and the School is ranked among public universities as #3 in public management administration, #8 in environmental policy and management, and #10 in public affairs according to the U.S. News and World Report (2016).

Founded in 1948, the masters in public administration (MPA) intern-option program prepares students to assume management and leadership roles in local government. The School also provides a career-option program for working professionals who want to earn their MPA without a career interruption.

While our School is most well-known for its MPA, the School also offers comprehensive programs at the bachelor's and doctoral levels. The bachelor's courses are taught at the Edwards Campus and include majors in 1) public administration and 2) law and society (proposed to begin Fall 2016). Our doctoral degree is designed primarily for students anticipating careers in research and teaching.

The Public Management Center (PMC), which is housed within the School, offers educational programs to meet the leadership training needs for public service professionals. The PMC is the only agency in the state of Kansas that can teach the nationally-accredited Kansas Certified Public Manager® program.

Mission

The mission of the School of Public Affairs & Administration of the University of Kansas is to educate exceptional public professionals and generate thought leadership that provides solutions to the most pressing global and community challenges by advancing the public good, democratic values, and ethical public management practices.

Undergraduate Programs

A bachelor’s degree in public administration provides undergraduate students with the knowledge and skills needed for planning, implementing and evaluating public programs. As students learn to think critically and analytically about public policy, they will better understand the dynamics in their own communities and how to be more effective citizens and public officials.

Graduates of the program will be ready to work in settings like local and state government, nonprofit organizations and private sector businesses.

Graduate Programs

The School offers an M.P.A. degree and a Ph.D. degree. The M.P.A. program offers two tracks.

• The intern-option M.P.A. program is designed for students who have little or no public administration experience and are willing to commit to one year of full-time study and a second year in a full-time internship to prepare themselves for careers in city or county management.

• The career-option M.P.A. program is designed for working professionals seeking to strengthen their leadership skills for careers in public service professions or advance in their current profession without a career interruption.

• The doctoral program is designed primarily for students anticipating careers in research and teaching.

Graduate Certificates

Performance Management Graduate Certificate

This certificate is designed for those who wish to develop skill sets in analyzing and changing performance in public sector and non-profit organizations.

Graduate Certificate in City and County Management

This certificate is designed for those who are interested in a career in local government organizations (cities and counties) or in non-profit or private sector organizations that collaborate or serve local governments.

Courses

LWS 330. Introduction to Law & Society. 3 Hours S.
Offers an introduction to the interdisciplinary field of law and society. Surveys the role of law in social processes and the influence of these processes on law, and introduces alternative theoretical perspectives on these processes. LEC.

LWS 332. Methods in Law and Society. 3 Hours S.
Surveys the various methods used in law society research and prepares students to be sophisticated readers of basic socio-legal research, capable of evaluating the quality of the research design and methods. Prepares students to participate as research assistants in original studies. LEC.

LWS 333. The Pursuit of Rights: Law, Democracy & Power. 3 Hours S.
Examines how law and legal norms, particularly rights, support social and political institutions yet also may be used to challenge these institutions and foster change. Particularly examines the role of law in supporting but also challenging hierarchies of race, ethnicity and gender. Surveys
major studies of these processes both domestically and across the globe. Prerequisite: LWS 330 or permission of the instructor. LEC.

LWS 643. Theoretical Foundations of Law and Society. 3 Hours S.
Provides advanced examination of the major theoretical traditions in the field. Addresses classic as well as contemporary studies in these traditions, and considers how these traditions may be applied to enhance understanding of current issues in the field. Prerequisite: LWS 330 or LWS 332. LEC.

LWS 691. Internship in Law & Society. 3 Hours S.
Designed to provide law society students an applied learning experience in a relevant public, non-governmental, or nonprofit organization. Students are required to critically reflect on their experience through a variety of academic assignments throughout their internship experience. Prerequisite: LWS 330 and LWS 332, and permission of instructor. INT.

LWS 692. Research Experience in Law & Society. 3 Hours S.
Designed for advanced law society students. Students enhance their research skills by working one-on-one with a faculty member on an independent scholarly project. Students are required to complete a final project or presentation, through advising and consultation with the designated faculty member. Prerequisite: LWS 330 and LWS 332, and permission of instructor. IND.

LWS 699. Capstone in Law and Society. 3 Hours.
Integrates learning across the Law Society curriculum with an applied, original research experience. Class topics rotate depending on faculty research agenda and current policy foci. Students gather and analyze data throughout the class, and present their final work to a variety of audiences. The product is an original research presentation that advances knowledge. Prerequisite: LWS 330 and LWS 332. LEC.

Courses

PUAD 177. First Year Seminar: ____. 3 Hours SF GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in public administration. May not contribute to major requirements in public administration. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

PUAD 330. Introduction to Public Administration. 3 Hours S.
Introduction to administration, public policy and policy making is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as POLS 330.) Prerequisite: POLS 110. LEC.

PUAD 331. Introduction to Public Administration, Honors. 3 Hours S.
Introduction to administration, public policy, and policy making, for honors students is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as POLS 331.) Prerequisite: POLS 110. LEC.

PUAD 332. Quantitative Methods for Public Administration. 3 Hours GE12 / S.
Focuses on building the quantitative analysis skills of students in public administration. Students learn basic and intermediate statistics, and methods of data analysis and interpretation. Students gain exposure to the uses of data in public organizational settings. Prerequisite: Math 101 or equivalent placement. LEC.

PUAD 333. Hard Choices in Public Administration: _____. 3 Hours GE33 / S.
Focuses on some of America's most vexing public policy challenges and emphasizes the political context of difficult choices. Course examines models of decision-making and the process of policy analysis. Students learn how to apply the tools of policy analysis to make policy judgments. Prerequisite: PUAD 330 or PUAD 331. LEC.

PUAD 431. Bureaucracy, Public Administration, and the Private Sector. 3 Hours S.
Examines the problems posed by behaviors within and by bureaucracies. Provides students with a set of conceptual tools for understanding the organizational environment in which policy analysts ply their profession and the role of a manager within such organizations. Offers strategies for the policy professional seeking to navigate large bureaucracies. Readings and class discussions integrate theoretical analyses of organizations with detailed case studies. Prerequisite: PUAD 330 or PUAD 331. LEC.

PUAD 432. Conducting the People's Business Ethically. 3 Hours AE51 / S.
Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership, as well as strategies to build strong institutional cultures and support ethical practices in institutions. Considers moral and political theory by focusing on contemporary cases and issues. Students learn how to identify moral issues in public life and public management. There is a special focus on the integration of moral concerns into public discussion in a manner that contributes to good policy and does not polarize issues. This course considers moral and political theory by focusing on contemporary cases and issues. Prerequisite: PUAD 330 or PUAD 331. LEC.

PUAD 433. Metropolitics and Macroproblems: The American City in Local and Global Context. 3 Hours S.
An interdisciplinary study of American cities, focusing on the rapidly changing demographic, physical, political, social, and economic changes. Sunbelt cities, edge cities, the rustbelt cities, planned and unplanned suburban communities, as well as declining center cities and newly revitalized downtowns are considered. The role of immigration and migration in reshaping the urban environment, and the effects of globalization are also examined. Prerequisite: PUAD 330 or PUAD 331. LEC.

PUAD 435. Generating, Allocating and Managing Public Resources. 3 Hours U.
This course is devoted to topics in public budgeting, finance and financial management. These activities play a central role in public management. The intent of this course is to understand the role these activities play in local, state, and federal governments and to see how policy and management are shaped and influenced by budgets, financial reports, and tax policy. Prerequisite: PUAD 330 or PUAD 331. LEC.

PUAD 436. Managing People in Public Organizations. 3 Hours U.
Effective human resources management is one of the key goals of organizations in both the public and private sectors. This course focuses on human resources management in a public sector context with particular emphasis placed upon past, current, and future challenges in the field. The course covers topics such as the recruitment, selection, and compensation of public sector employees, as well as more contemporary issues such as diversity management and public sector personnel reform. Prerequisite: PUAD 330 or PUAD 331. LEC.

PUAD 494. Topics in Public Administration: ____. 3 Hours S.
An introductory study of selected topics in public affairs and administration. Course may be repeated for credit if content varies.
Course may be offered in lecture or online format. Prerequisite: PUAD 330 or PUAD 331. LEC.

**PUAD 601. Crime and Punishment. 3 Hours AE41 / S.**
Examines the administration of justice and focuses on differential and discriminatory treatment in policing, criminal prosecutions, trials, sentencing, or imprisonment. Also considered are the basis and impact of racial profiling, harassment, arbitrary detention, and abusive treatment of members of racial and ethnic groups, immigrants, and/or other vulnerable groups by law enforcement, and disparate treatment by prosecutors and the courts. Prerequisite: PUAD 330 or PUAD 331. LEC.

**PUAD 602. Diversity in Public Administration. 3 Hours AE41 / S.**
Analyzes diversity and leadership in public and private institutions along ethnic, racial, and gender lines and the challenges of the facilitation of open dialogue on diversity. Examines the political, historical, social, and economic reasons why Americans of different ethnic, racial, and gender groups hold divergent views about major public policy areas, as well as fundamental views about democratic participation. Prerequisite: PUAD 330 or PUAD 331. LEC.

**PUAD 603. Foundations of the Nonprofit Sector. 3 Hours H/S.**
This course provides an overview of the U.S. nonprofit sector, its history, scope, diversity and its positioning among and between the private and public sectors of the U.S. economy. The course explores the legal framework under which nonprofit organizations operate and are regulated. Economic, political, social, organizational and giving theories of the sector are reviewed in order to understand the sectors existence, roles and activities with particular attention to philanthropy and voluntarism. Distinct contributions to society as well as contemporary challenges faced by the sector are examined. Prerequisite: PUAD 330, or POLS 110, or MGMT 305, or a PUAD master’s core course, or consent of instructor. Junior status or above is also required. LEC.

**PUAD 604. Resource Development and Management in Nonprofit Organizations. 3 Hours H.**
This course provides an overview of the broad range of activities relevant to acquisition, management and utilization of resources in nonprofit organizations. The course identifies the primary strategies through which resources are generated with emphases on grantwriting, fundraising, social entrepreneurship, and public/private partnerships. Development of organizational identity and management of public relations is examined in relation to resource and relationship development. Strategies for management of resources to ensure long-term benefit and sustainability are explored. Prerequisite: PUAD 603. LEC.

**PUAD 605. Managing Nonprofit Relationships. 3 Hours H.**
This course considers the set of relationships that nonprofit leaders must balance within the organization and beyond organizational boundaries. Both internal relationships (with staff, volunteers, and board members) and external relationships (with stakeholders, other organizations, and the community at large) are critical to mission accomplishment. This course provides students with the resources necessary to understand the challenges and opportunities related to building and LEC.

**PUAD 606. Nonprofit Accountability: Public Needs and Public Values. 3 Hours H.**
This course examines the role of the nonprofit sector in society by posing broad questions about why nonprofit organizations are held accountable, to whom they are accountable, and detailing how organizations can satisfy accountability demands. The course investigates the public role of the nonprofit sector in society, identifies the stakeholders that are integral to an organization’s mission, and describes and critiques the financial and evaluation tools that nonprofits can use to ensure their social viability. Prerequisite: PUAD 603. LEC.

**PUAD 607. Introduction to Project Management. 3 Hours H.**
An exploration of the technical aspects of project management and the human aspects of project leadership. The course integrates conceptual approaches with practical applications of knowledge and skill sets. The course addresses the Project Management Body of Knowledge (PMBOK-- as created by the Project Management Institute) and project leadership competencies including leading, communicating, negotiating, problem solving, and influencing. Prerequisite: Junior standing. LEC.

**PUAD 608. Collaboration in Public Administration. 3 Hours S.**
Managers must work effectively across organizational and sector boundaries to solve problems and produce public value. This course considers the forces contributing to the need for collaborative governance, changing management tasks and competencies, and how to address key collaborative challenges. Prerequisite: PUAD 330 or POLS 330, or permission of the instructor. LEC.

**PUAD 609. Concepts of Civil Society. 3 Hours U.**
Concepts of community, social capital, and civil capacity building, and their relations to effective community functioning, democratic politics, and administrative expertise. LEC.

**PUAD 641. Public Service Leadership. 3 Hours U.**
Concepts of leadership in community, political, and administrative settings. These settings include government and all non-business organizations (e.g. certain for-profit organizations). LEC.

**PUAD 660. Organizations and Management I. 3 Hours U.**
An exploration of management in the context of public organizations. Management is explored at the individual, group and organizational level including conflict resolution, problem-solving, planning and legal aspects of organizations. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission of instructor. LEC.

**PUAD 661. Organizations and Management II. 3 Hours U.**
A continuation of PUAD 660. The context for leading public organizations is explored through knowledge management, collaboration, innovation, process improvement and leadership succession. Graded on a satisfactory/unsatisfactory basis. Prerequisite: PUAD 660, and permission of instructor. LEC.

**PUAD 691. Internship in Public Service. 1-6 Hours AE61 / U.**
Designed to provide public administration students an applied learning experience in either a public or nonprofit organization. Open to majors in Public Administration only. Prerequisite: One of the following: PUAD 330, 331, PUAD 332, PUAD 333, and consent of instructor required. INT.

**PUAD 692. Research Experience in Public Administration. 1-6 Hours U.**
Designed for advanced public administration students. Students learn research skills by working one-on-one with a faculty member to assist in his/her program of research. Open to majors in Public Administration only. Students are required to complete a final project or presentation, through advising and consultation with the designated faculty member. Prerequisite: One of the following: PUAD 330, 331, PUAD 332, PUAD 333 and consent of instructor required. LEC.

**PUAD 693. Directed Readings. 1-3 Hours U.**
For advanced undergraduate students who wish to study a specific topic of interest that is not covered in the curriculum. Each student must complete a proposal outlining his or her topic request and submit to the Undergraduate Advisor. Intended for students majoring in Public Administration. Prerequisite: One of the following: PUAD 330, 331, PUAD 332, PUAD 333, and consent of instructor. IND.
PUAD 694. Topics in Public Administration: ____. 3 Hours U.
Study of selected topics in public administration. Course may be repeated for credit if content varies. Course may be offered in lecture or online format. Prerequisite: PUAD 330 or PUAD 331. LEC.

PUAD 824. Public Policy and Administration. 3 Hours.
An exploration of the ways in which public policy is made in the United States, focusing on the role of the administrator at each stage of the policy process: formulation, implementation, and evaluation. Various theories of policy-making with application to specific areas of public policy will be examined. LEC.

PUAD 825. Urban Policy and Administration. 3 Hours.
This course explores the development, implementation and evaluation of public policy in the local government context. It examines a variety of policy tools used to address urban problems and applies theories of the policy process, intergovernmental relations, and institutions to municipal governance. (Same as PUAD 825.) LEC.

PUAD 826. Public Policy and Administration of State Government. 3 Hours.
An examination of political and administrative aspects of state government focusing on legislative and executive branches of government. LEC.

PUAD 827. Health Care Policy and Administration. 3 Hours.
A seminar designed to explore the development of public health policy in the United States. Particular attention will be given to (1) the development of public institutions and policy goals; (2) current policy problems such as expenditure-cost controls, prospective reimbursement, utilization review, access, and public and private investment planning; and (3) administrative problems in the current health care system. (Same as HPM 837.) LEC.

PUAD 828. Nonprofit Management and Policy. 3 Hours.
This course focuses on the economic, social, and legal foundations of the nonprofit sector. Nonprofits are examined in the context of a three-sector economy, with emphasis on the ways in which nonprofits compensate for market failures and government failures. The course examines government-nonprofit relations in the modern welfare and offers an in-depth examination of the health, education, and welfare functions as performed by nonprofits. This course also provides exposure to selected topics in nonprofit management such as grant writing, board relations, advocacy, fundraising and volunteer management. LEC.

PUAD 830. Administrative Ethics. 3 Hours.
A survey of ethical issues faced by public administrators. Special attention will be given to ethical problems arising within hierarchical organizations and to the ethical implications of particular public policies. LEC.

PUAD 831. Public Administration Practicum. 1 Hour.
Exposes students to day-to-day operational facets of public management through workshops, speakers, exercises. LEC.

PUAD 832. Organizational Theory. 3 Hours.
An introductory theory course designed to develop an understanding about organizations, their environments, and the political subsystems in which they exist. LEC.

PUAD 833. Administrative Behavior. 3 Hours.
An examination of individual and group behavior within organizations, focusing on motivation, leadership, conflict and conflict resolution, group dynamics and communication. LEC.

PUAD 834. Human Resource Management. 3 Hours.
This course presents the context and practice of effective human resource management, with emphasis on the political, legal, historical, and ethical dimensions of public employment. This course considers the functions of workforce management, including: 1) planning of work and the allocation of labor to that work, 2) acquisition of employees and their competencies, knowledge, skills, and abilities, 3) development of employees to channel, improve and create new knowledge, skills, and abilities, and 4) maintaining the working relationship between employee and employer. Students will apply workforce management theories and techniques to contemporary organizational challenges and investigate the tensions inherent to balancing competing values (such as: responsiveness/neutrality and efficiency/equity) and meeting conflicting demands of organizational stakeholders and society. LEC.

PUAD 835. State and Local Public Finance. 3 Hours.
Focuses on the tax, spending, and debt practices of state and local governments. Drawing on the tools of positive and normative economic analysis, the course explores the implications of these activities on broader economic outcomes, including private allocation of resources and the distribution of wealth. LEC.

PUAD 836. Introduction to Quantitative Methods. 4 Hours.
Introduces quantitative approaches to examine public management and public policy decisions. Concepts of research design, probability, and inferential statistics are covered. LEC.

PUAD 837. Budgeting and Resource Allocation. 3 Hours.
Examines the practices and the political, economic, and organizational contexts of public and nonprofit budgeting, tools of financial analysis, and ethics of financial management. LEC.

PUAD 838. Urban Service Delivery. 3 Hours.
Focuses on organizational arrangements for the provision of basic urban services and the character of service delivery politics. Methods for evaluating the efficiency and responsiveness of alternative organizational arrangements are treated. LEC.

PUAD 839. Topics in Public Administration: ____. 3 Hours.
Study of selected topics in public administration. LEC.

PUAD 840. Theory of Public Administration. 3 Hours.
Survey of the development of ideas about public administration among public officials and research investigators. Emphasis on basic concepts, research reports, and theoretical treatises on the nature of public administration. LEC.

PUAD 841. The Role, Context, and Ethics of Public Administration in American Society. 3 Hours.
Provides students with an overview of the social context of public administration with an emphasis on political issues, intellectual history, ethics, and the tensions between democracy and bureaucracy. LEC.

PUAD 842. Law and Public Management. 3 Hours.
Course investigates major concepts that make up the legal environment of public administration. The accepted uses and procedures of the field, relationships among courts, agencies, the legislature, and basic legal research are examined. LEC.

PUAD 843. Constitutional Foundations of Public Administration. 3 Hours.
This course provides a grounding in the constitutional premises of public administration including executive, legislative, and judicial powers, and federalism, and those issues associated with the development of economic institutions and processes such as taxation, employment regulation, and commerce controls. LEC.

PUAD 844. Advanced Seminar in State and Local Budgeting. 3 Hours.
This course studies the theories behind selected topics in public budgeting and compares the theories with the actual practice of budgeting in the State of Kansas and its communities. LEC.
PUAD 845. Organizational Analysis and Public Management. 3 Hours.
Explores concepts and practices in organization behavior and management theory as they apply to public organizations. Emphasis is placed on understanding the dynamics of individuals, groups, and teams within organizations, dynamics associated with organizational structures, accountability, and culture and dynamics of risk in leadership, collaboration, and contracting. LEC.

PUAD 846. Kansas and Its Government. 3 Hours.
This course is designed to offer students the opportunity to obtain a comprehensive overview of the culture, history, economy, and geography of Kansas along with the review of state and local government infrastructure. The review of governments will include the financing of governments in Kansas. LEC.

PUAD 847. Legislative Process. 3 Hours.
This course is designed to acquaint students with the workings of the policy process at the level of state government. Its focus will give students an understanding of the political process to enable them to function more effectively in state policy development and implementation. Prerequisite: PUAD 824, PUAD 825, PUAD 826 or PUAD 827. LEC.

PUAD 848. Advanced Management Practices in State Government. 3 Hours.
This course offers the student an opportunity to enhance skills developed in PUAD 826 in an experiential learning environment that simulates actual management practice. Complex cases will be rank ordered and resolved on a work schedule developed by each work group. Groups will work simultaneously on two or more cases at all times. Prerequisite: PUAD 826. LEC.

PUAD 849. Law, Courts, and Public Policy. 3 Hours.
This course provides an overview of the role of law, litigation, and courts in the public policy process, with an emphasis on bureaucratic institutions. The course covers the main theories and empirical research on the policy effects of litigation and intervention, with a particular focus on civil rights in the areas of employment, policing, welfare, prisons, and environmental policy. (Same as POLS 849.) Prerequisite: Graduate standing or consent of instructor. LEC.

PUAD 850. Intergovernmental Relations. 3 Hours.
This course focuses on the fiscal and administrative relationships among the three levels of government - federal, state, and local - in the United States. A number of topics will be examined, including a history of intergovernmental relations, the political, constitutional, and legal foundations of the intergovernmental system, and intergovernmental fiscal policy. The impact of the intergovernmental system will be assessed from the perspective of specific areas and intergovernmental programs. LEC.

PUAD 851. Infra-Structure Management. 3 Hours.
A survey of land-use, infra-structure, and technology issues in municipalities. LEC.

PUAD 852. Comparative Public Policy and Administration. 3 Hours.
This seminar examines the application of theories in public administration, public management, and public policy in international and comparative contexts. Particular attention is given to how governments and publics are connected by way of intergovernmental strategies, governance, and differing political and administrative arrangements. LEC.

PUAD 853. Policy Analysis and Evaluation. 3 Hours.
This course will introduce students to the conceptual foundations and applied techniques associated with identifying, describing, and seeking solutions to public policy problems (policy analysis) and evaluating the performance of public programs and organizations (program evaluation). Basic microeconomic theory is introduced. LEC.

PUAD 854. Innovation and Organizational Change. 3 Hours.
This course will examine theories of innovation and organizational change as applied to public organizations. Particular emphasis will be placed on the concepts of innovation in bureaucratic organizations, on the process of successful change in organizations, and on leadership and employees' roles. LEC.

PUAD 855. Financial Management for Public and Not-for-Profit Organizations. 3 Hours.
Financial management focuses on the use of financial information for decision making and evaluation. This course will rely on fundamental accounting concepts as they relate to the basic financial statements of government and not-for-profit organizations. Time will also be spent on financial management practices (e.g. cash management, debt management, etc.) and financial condition analysis. Material presented in this course expands on the foundational material covered in PUAD 837. Prerequisite: PUAD 837 or permission from the instructor. LEC.

PUAD 856. Management and Information Technology. 3 Hours.
An introduction to the concepts of information policy and management of technology within governmental organizations. The course covers the effects of technology on government and society as well as information policy (privacy, security and access) and their importance to democracy. The course also includes a leadership perspective on planning, funding, and implementation of technology systems in governmental organizations as well as the role of Chief Information Officer. LEC.

PUAD 857. Performance Management and Governance. 3 Hours.
This course examines the practice and governance challenges of performance management and budgeting in the public sector. Topics covered in this course include: a) the governance context of performance measurement and management; b) the historical and theoretical foundation of performance measurement and management; c) the global trend of performance-oriented reforms; d) the practice and politics of performance measurement and management; and e) governance and ethical issues in managing for results. LEC.

PUAD 858. Performance Audit. 3 Hours.
This course examines the practice of performance audit at the national, state, and local levels. Topics covered in the course include: a) the concept of performance audit and the roles of auditors in performance management; b) performance audit systems and standards at the national, state and local levels; c) performance audit methodologies and techniques; d) the establishment of audit criteria; e) the concept and practice of risk and vulnerability analysis; f) the reporting and communication of performance audit results. LEC.

PUAD 859. Service Management. 3 Hours.
This course provides an introduction to service management in the public sector and will focus on providing students with the conceptual understanding and skills to design, promote, manage, and deliver public services. The course will integrate concepts of service management with quality assurance, business process analysis, and project management. Through this course, students will develop a better understanding of methods for improving responsiveness and accountability to organizational goals and mission. LEC.

PUAD 892. Public Administration Internship. 3 Hours.
A part-time supervised professional work experience designed to provide students the knowledge, background, and practical experience in public service. A written summary of the experience including a job description, projects the student, and a reflective statement on integrating the internship with theoretical issues regarding public administration. This
course brings theory and practice together. Graded on a satisfactory/unsatisfactory basis. INT.

PUAD 893. Directed Readings. 1-3 Hours.
Designed to meet the needs of advanced students whose study in public administration cannot be met with current course work. RSH.

PUAD 894. Professional Development Seminar I. 3 Hours.
Open only to precareer students with internships, this intensive seminar is designed around issues interna confront in their working relationships. Emphasis is placed on the transition of the student from an academic environment to a professional work relationship. Class sessions deal with issues like employee socialization, power and trust, and administrative change. Graded on a satisfactory/unsatisfactory basis. FLD.

PUAD 895. Professional Development Seminar II. 3 Hours.
Continuation of PUAD 894. Graded on a satisfactory/unsatisfactory basis. FLD.

PUAD 897. Public Administration Contemporary Issues and Competency Assessment. 3 Hours.
This course exposes students to the contemporary issues in public management and analysis of competencies for public management in four theme areas. Students will participate in discussions of issues and in three assessments of their preparation to lead public organizations. Students will complete the MPA Final Essay which focuses on integration of course and work experience in relation to the values theme of the MPA program. Graded on a satisfactory/unsatisfactory basis. LAB.

PUAD 898. Leadership, Professionalism, and Citizen Engagement. 3 Hours.
This course explores connections between facilitative political and administrative leadership, professional expertise, and citizen engagement. It will explore politics and the political arena; administrative/technical expertise and the relationship between the arenas of politics and administration. It will present the concept of citizen engagement and adaptive work, complicating as well as enriching public policy making and implementation. LEC.

PUAD 903. Research Seminar in Public Administration and Democracy. 3 Hours.
This course focuses on the democratic context of public administration. Topics could include how democracy shapes the practice of public administration; the functioning of public administration in a constitutional democracy; issues relating to control and discretion of public administrators; citizenship and representative bureaucracy; theories of bureaucratic values such as equity, justice and efficiency, ethics and accountability; theories of institutions. SEM.

PUAD 931. Research Seminar in Public Management. 3 Hours.
This course, on the topic which increasingly is approached as an interdisciplinary field, focuses on the management of public and non-profit agencies. Topics could include: the nature of public agencies and the roles of public executives, managers, and professionals; distinctions between public, private, and non-profit agencies in America and internationally; creating and managing organizational networks; leadership; work motivation; and the ethics of decision-making. SEM.

PUAD 932. Seminar in the Intellectual History of Public Administration. 3 Hours.
This course will analyze the intellectual currents that undergird the theories and concepts in public administration. There are three primary perspectives crosscutting the topics. They are historical, cultural and analytical. SEM.

PUAD 934. Research Methods in Public Administration. 3 Hours.
The course examines issues of research and epistemology with an emphasis on connecting theory and research and doing research in field settings. RSH.

PUAD 935. Advanced Quantitative Methods for Public Administration. 3 Hours.
This seminar will assist students to develop a thorough competence in both theory and application of multivariate statistical models of the types that are commonly used to study questions of organization and policy in the public sector. These will include inference for the general linear regression model under a wide variety of specifications, as well as a consideration of path models and systems of simultaneous equations. The principal goal of this course is to strengthen the ability of doctoral students in public administration to work methodologically as independent scholars using relatively advanced designs and technique in their work. SEM.

PUAD 936. Policy Analysis and Program Evaluation. 3 Hours.
This course examines the theoretical foundations and analytical components of policy analysis and program evaluation, common tools for assessing alternative courses of public action and program effectiveness. This examination will include a review and critique of common quantitative and qualitative approaches, including cost-benefit analysis, cost-effectiveness analysis, and quasi-experimental design. LEC.

PUAD 937. Qualitative Methods in Public Administration. 3 Hours.
This course examines the concepts and practices of qualitative research. The focus will be on field research and the collection of "textual data" through observation, interviewing, and documents. The course will also examine the interpretation and analysis of qualitative data and how to present qualitative findings. RSH.

PUAD 939. Topics in Public Administration: _____, 1-3 Hours.
A study of selective topics in public administration. Course may be taken more than once. LEC.

PUAD 943. Constitutional Foundations of Public Administration. 3 Hours.
This course provides grounding in the constitutional premises of public administration including executive, legislative, and judicial powers, and federalism, and those issues associated with the development of economic institutions and processes such as taxation, employment regulation, and commerce controls. LEC.

PUAD 949. Law, Courts, and Public Policy. 3 Hours.
This course provides an in-depth analysis of the role of law, litigation, and courts in the public policy process, with an emphasis on bureaucratic institutions. The course covers the main theories and empirical research on the policy effects of litigation and intervention, with a particular focus on civil rights in the areas of employment, policing, welfare, prisons, and environmental policy. As part of the course requirements, students will conduct original empirical research. LEC.

PUAD 990. Research Practicum in Public Policy and Administration. 3 Hours.
This course will provide students with an opportunity to conduct applied research in a field setting with faculty guidance. May be pursued as an independent study or as a regularly scheduled class with a group of students. Prerequisite: PUAD 934 and PUAD 935. RSH.

PUAD 998. Directed Reading on Public Administration. 1-6 Hours.
Designed to meet the needs of graduate students whose study in public administration cannot be met with present course. Prerequisite: consent of instructor. RSH.
PUAD 999. Dissertation. 1-15 Hours.
Enrollment for writing doctoral dissertations. Graded on a satisfactory/unsatisfactory basis. THE.

Bachelor of Arts and Bachelor of General Studies in Public Administration

Our programs prepare leaders and build professionalism in the public and nonprofit sectors and link KU resources to the challenges of public management. We produce skilled leaders, innovators, and problem-solvers, ready to confront pressing social and economic challenges at the local, state, and national levels.

The School of Public Affairs and Administration is ranked number one among graduate schools in city management and urban policy, number 5 in public management administration, and number 9 in public affairs according to the U.S. News and World Report.

First-and Second-Year Preparation

KU Edwards Campus

The undergraduate program in public administration is offered in its entirety only at the KU Edwards Campus (http://edwardscampus.ku.edu), 12600 Quivira Rd., Overland Park, KS 66213. This program is designed for students who have earned an associate’s degree or equivalent hours and wish to complete the upper-level courses necessary for a bachelor’s degree.

Public Administration Program

The major accommodates both traditional and nontraditional students. Public administration offers students the necessary knowledge and skills for planning, implementing, and evaluating public programs. Students will be able to work in such settings as local and state government, nonprofit organizations, and private sector businesses.

Students fulfill their first-year and sophomore hours through general education requirements. Students are encouraged, but not required to take POLS 110 as part of their general education hours. Students considering the major should contact the CLAS undergraduate advisor on the Edwards Campus, Dan Mueller, dmueller@ku.edu, 864-8659 (from Lawrence) or 913-897-8659 (outside of Lawrence) for advising on general education requirements leading up to the major.

Requirements for the B.A. or B.G.S. Major

Public Administration Required Courses

Majors must complete a course in each of the following areas:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUAD 330</td>
<td>Introduction to Public Administration</td>
<td>3</td>
</tr>
<tr>
<td>or PUAD 331</td>
<td>Introduction to Public Administration, Honors</td>
<td>3</td>
</tr>
<tr>
<td>PUAD 332</td>
<td>Quantitative Methods for Public Administration (PSYC 210 or MATH 365 and their equivalents may be substituted for this course requirement but students would need to complete another jr/sr PUAD elective for the PUAD major.)</td>
<td>3</td>
</tr>
<tr>
<td>PUAD 333</td>
<td>Hard Choices in Public Administration: _____</td>
<td>3</td>
</tr>
</tbody>
</table>

Public Administration Required Electives (18)

Majors must complete 6 courses (18 hours) from the following:

<table>
<thead>
<tr>

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 27 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

A sample 4-year plan for the BA degree in Public Administration is available by using the left-side navigation, or by clicking here (p. 1951).

A sample 4-year plan for the BGS degree in Public Administration is available by using the left-side navigation, or by clicking here (p. 1952).

BA in Public Administration

Below is a sample 4-year plan for students pursuing the BA in Public Administration. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

The Public Administration major is only available at the Edwards campus.

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. No more than 3 hours of PUAD 691 may count toward the major.
4. Typically KU Core Goal 6 is fulfilled by an approved major course. If a course within the Public Administration major is not available for Goal 6 another course will need to be taken. This may require that an undesignated elective be used to fulfill a pre-requisite for a Goal 6 course.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BGS in Public Administration

Below is a sample 4-year plan for students pursuing the BGS in Public Administration. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

The Public Administration major is only available at the Edwards campus.
Minor in Public Administration

Why study public affairs and administration?

The School of Public Affairs and Administration also offers a minor. All coursework related to the minor is offered at the KU Edwards Campus in Overland Park, Kansas, although PUAD 330/331 is also offered in Lawrence. The minor requires 18 hours of PUAD coursework. Six of these credits will consist of required core coursework, and the additional twelve will consist of elective PUAD courses.

Requirements for the Minor

KU Edwards Campus

All minor course work is offered on the KU Edwards Campus (http://edwardscampus.ku.edu), although PUAD 330/PUAD 331 can be taken in Lawrence.

Public Administration Minor Core Courses (6)

Minors must complete a course in each of the following areas:

- PUAD 330 Introduction to Public Administration
- or PUAD 331 Introduction to Public Administration, Honors
- PUAD 333 Hard Choices in Public Administration: _____

Public Administration Required Electives (12)

Minors must complete 4 courses (12 hours) in upper-level PUAD (300+ level and higher)

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

- **Minor Hours** Satisfied by 18 hours of minor courses.
- **Minor Hours in Residence** Satisfied by a minimum of 9 hours of KU resident credit in the minor.
- **Minor Junior/Senior Hours** Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the minor.

Minor Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/ Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

City and County Management, Graduate Certificate in

This certificate is designed for those who are interested in a career in local government organizations (cities and counties) or in non-profit or private sector organizations that collaborate or serve local governments.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary

Total Hours: 120

1. Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

2. No more than 3 hours of PUAD 691 may count toward the major.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Performance Management, Graduate Certificate in

Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission

The School of Public Affairs and Administration accepts students on a rolling admissions basis. Students may apply to be admitted for either the fall, summer or spring semesters.

Applicants for the certificate are required to have:

- Undergraduate GPA of 3.0 (if the undergraduate degree was awarded in the last three years)
- At least three years of managerial experience or be already admitted to any graduate programs of KU or already have a graduate management or leadership degree from an accredited institution
- All international applicants and domestic non-native English speakers are required to provide proof of English proficiency

Required application materials:

- KU online application (http://graduate.ku.edu/ku-graduate-application)
- Official transcripts
- Current resume

For students who do not have a master’s degree and are not currently enrolled in a graduate program, three letters of reference are required.

Certificate Requirements

The certificate requires 4 courses for a total of 12 graduate credit hours and has 2 options: intern option and career option. The intern option is designed for students who have no or little experience in local government environments.

Local Government Management (Intern)

Master of Public Administration

Why study public administration?

Our programs prepare leaders and build professionalism in the public and nonprofit sectors and link KU resources to the challenges of public management. We produce skilled leaders, innovators, and problem-solvers, ready to confront pressing social and economic challenges in local, state, national, international and non-profit organizations.

The School of Public Affairs and Administration is ranked number 1 among graduate schools in city management and urban policy, number 5 in public management administration, and number 9 in public affairs according to the U.S. News and World Report.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

M.P.A. Admission

Please visit our website http://kupa.ku.edu/admissions for complete admissions information.

The academic prerequisites for regular admission to the M.P.A. program are:

1. Completion of a bachelor’s degree, preferably with a background in the social sciences, including basic college algebra and statistics courses.
2. A grade-point average of B (3.0 on a 4.0 scale) for all previous university or college work. In certain circumstances, when the GPA is slightly below 3.0, other factors, such as strong Graduate Record Examination scores or exceptional letters of recommendation may be considered for provisional admission to the M.P.A. program.

For all applicants, a completed application includes:

1. Online Graduate Studies application (http://www.graduate.ku.edu).
2. A nonrefundable application fee, submitted online with the application form. For domestic applicants, the application fee is $65; for international applicants, the application fee is $85.
3. 1 official transcript from the degree-granting college or university and any post-graduate college or university attended.
4. 4 letters of recommendation. If possible, at least 1 should be an academic reference.
5. A 3- to 5-page essay describing your background and career goals and clearly indicating how the M.P.A. degree fits into those goals and addressing any deficiencies in your academic preparation.
6. A current résumé.

7. A writing sample that is at least 5 pages long. It should be a well-cited work in which you critically analyze (not just summarize) an issue.
8. Graduate Record Examination scores (General test only — verbal, analytical, and quantitative). GRE scores are not required, but recommended, for students who received their bachelor's degree more than 3 years prior to the time of admission. For reporting GRE scores to the KU School of Public Affairs and Administration, the institution code is 6871 and the department code is 4801.

Additional Requirements for International Applicants:

• An official Test of English as a Foreign Language score report. Please note that any international students admitted to a KU program must also be tested by the Applied English Center (http://www.aec.ku.edu) upon arrival, regardless of TOEFL score.

Deadlines

Applications for intern-track applicants must be received by February 1.

Applications for career-track applicants: Deadlines are May 1 and June 15 for fall admission and November 1 for spring admission. Note: No preference is given to applications received by the earlier deadlines. We offer the earlier dates to accommodate applicants who need an earlier decision for planning purposes.

International students (applying as career-track): The deadline for international students is February 1.

Campuses

The M.P.A. degree program is also offered at the following location:

KU Edwards Campus - KU offers a variety of graduate and undergraduate programs on the KU Edwards Campus in Overland Park, Kansas. The Edwards Campus offers late-afternoon and evening classes, catering to working professionals. For more information, call the Edwards Campus at 864-8400 from Lawrence or 913-897-8400 from other locations.

Topeka, Kansas - Each semester, select courses are offered at the Brown v. Board of Education National Historic Site in Topeka, Kansas.

Master of Public Administration Degree

The School of Public Affairs and Administration is home to the Edwin O. Stene Graduate Program in Public Administration and offers a Master of Public Administration degree. The Edwin O. Stene Master's program is one of the oldest and most respected programs in the United States, with our local government leadership program dating to 1948. Since 1998, our tradition of excellence in educating students at the masters’ level has been recognized by U.S. News and World Report with a #1 ranking in city management and urban policy. The MPA degree may be obtained through course work in Lawrence, Topeka, and the KU Edwards Campus (http://edwardscampus.ku.edu) in Overland Park for the Kansas City area.

The KU MPA offers 2 tracks:

1. The Intern track is designed for students who are willing to commit to one year of full-time study and a second year in a full-time internship to prepare themselves for careers primarily in city, county, or nonprofit management.
2. The Career track is designed for working professionals seeking to strengthen their leadership skills for careers in public service professions or advance in their current profession without a career interruption. Most career-track students attend part-time.
Intern track students begin the program in the summer semester, and complete the majority of their coursework over three semesters (summer, fall, spring). Career-track students usually begin in the fall or spring semester.

M.P.A. Degree Requirements

The master's degree is awarded after successful completion of 43 credit hours of course work. This includes 31 hours (10 courses) of required core courses (listed below) that all students complete, and 12 hours (4 courses) tailored to the student’s interests and/or track (intern or career). In addition, all students must pass a written master's examination (final paper) to complete the requirements for the M.P.A. degree which is part of the PUAD 897 core course. Once a student begins the program, all degree requirements must be completed within 7 years.

The MPA core coursework includes the following courses (31 credit hours):

<table>
<thead>
<tr>
<th>Select 1</th>

</tr>
</tbody>
</table>

Intern track students will take the following courses to complete the program:

- PUAD 892 Public Administration Internship 3
- PUAD 898 Leadership, Professionalism, and Citizen Engagement 3

2 Electives 6

Career track students will take 4 electives (12 hours) to complete the program.

Master of Public Administration and Juris Doctor

M.P.A./J.D. Combined Program

The joint degree program is designed for the student who intends to combine career preparation in law and public administration. Examples of career objectives for this degree are the practice of law in communities (for example, a city attorney, who may be called upon to perform legal services for a municipality) and for city managers (who may need to deal with legal questions and interact with legal professionals). The program combines into 4 years the normal 3-year Juris Doctor (p. 742) program offered by the School of Law (http://www.law.ku.edu) and the 2-year M.P.A. program offered by the School of Public Affairs and Administration (http://www2.ku.edu/~ekupa).

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

MPA/JD Admission

Applicants for the MPA/JD program will apply for the MPA Intern Track. Please visit our website http://kupa.ku.edu/admissions for complete admissions information.

The academic prerequisites for regular admission to the MPA program are:

1. Completion of a bachelor’s degree, preferably with a background in the social sciences, including basic college algebra and statistics courses.
2. A grade-point average of B (3.0 on a 4.0 scale) for all previous university or college work. In certain circumstances, when the GPA is slightly below 3.0, other factors, such as strong Graduate Record Examination scores or exceptional letters of recommendation may be considered for provisional admission to the MPA program.

For all applicants, a completed application includes:

1. Online Graduate Studies application (http://www.graduate.ku.edu).
2. A nonrefundable application fee, submitted online with the application form. For domestic applicants, the application fee is $65; for international applicants, the application fee is $85.
3. 1 official transcript from the degree-granting college or university and clearly indicating how the MPA degree fits into those goals and addressing any deficiencies in your academic preparation.
4. 3 letters of recommendation. If possible, at least 1 should be an academic reference.
5. A 3- to 5-page essay describing your background and career goals and clearly indicating how the MPA degree fits into those goals and addressing any deficiencies in your academic preparation.
6. A current résumé.
7. A writing sample that is at least 5 pages long. It should be a well-cited work in which you critically analyze (not just summarize) an issue.
8. Graduate Record Examination scores (General test only — verbal, analytical, and quantitative). GRE scores are not required, but recommended, for students who received their bachelor's degree more than 3 years prior to the time of admission. For reporting GRE scores to the KU School of Public Affairs and Administration, the institution code is 6871 and the department code is 4801.

Deadlines

Applications for intern-option applicants must be received by February 1.
M.P.A./J.D. Combined Program

The joint degree program is designed for the student who intends to combine career preparation in law and public administration. Examples of career objectives for this degree are the practice of law in communities (for example, a city attorney, who may be called upon to perform legal services for a municipality) and for city managers (who may need to deal with legal questions and interact with legal professionals). The program combines into 4 years the normal 3-year Juris Doctor (p. 742) program offered by the School of Law (http://www.law.ku.edu) and the 2-year M.P.A. program offered by the School of Public Affairs and Administration (http://www2.ku.edu/%7Eekupa). Students must complete 116 total credit hours: 78 credit hours in the School of Law (42 required and 36 elective), 31 hours in the School of Public Affairs and Administration, and 12 hours of electives of which only 3 hours may be law courses.

Of the 43 required hours in public administration, 6 hours are earned during the internship in the fourth year. The internship may not be taken concurrently with course work. At the conclusion of the internship year, each candidate must successfully pass a final written examination administered by public administration. The J.D. degree is awarded at the completion of the total required credit hours other than those associated with the internship. The M.P.A. degree is awarded upon successful completion of the internship and final examination. All course work counted toward any master’s degree requires a B average for the award of the degree. Specifically, students should understand that if they elect 6 or fewer hours of law requirements, the grades received in those law courses are incorporated into the M.P.A. grade-point average, which must be 3.0 for the award of the M.P.A.

For admission a student must meet requirements of both programs. Dual admission requires submitting separate sets of application materials as required by the respective programs. The M.P.A./J.D. program is open to those who have earned baccalaureate degrees and whose undergraduate academic records indicate that they have the capacity to complete these programs.

Since the total course work, excluding the internship, is 109 hours, students pursuing the joint degree should plan to enroll in course work for 2, and in some instances 3, summers.

Master of Public Administration and Master of Urban Planning

M.P.A./M.U.P. Combined Program

This program is designed for the student with career goals that center on assuming administrative and management responsibilities in urban planning and urban affairs. It combines into 3 years (excluding the 1-year internship required for the M.P.A. program) the normal course work required for the 2-year Master of Urban Planning (p. 101) degree and the 2-year M.P.A. degree. The program offers students experience not only in public policy management, but also in management with particular expertise in urban problem resolution.

A student must meet admission requirements of both programs. Dual admission requires submitting separate sets of application materials as required by the respective programs. The M.P.A./M.U.P. program is open to those who have earned baccalaureate degrees and whose undergraduate academic records indicate that they have the capacity to complete these graduate programs.

Contact the School of Public Affairs and Administration (http://www2.ku.edu/%7Eekupa) or the Department of Urban Planning (http://urbanplanning.ku.edu) for more information.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

M.P.A./M.U.P. Admission

Applicants for the M.P.A./M.U.P. program will apply for the M.P.A. Intern Track. Please visit our website http://kupa.ku.edu/admissions for complete admissions information.

The academic prerequisites for regular admission to the M.P.A. program are:

1. Completion of a bachelor’s degree, preferably with a background in the social sciences, including basic college algebra and statistics courses.
2. A grade-point average of B (3.0 on a 4.0 scale) for all previous university or college work. In certain circumstances, when the GPA is slightly below 3.0, other factors, such as strong Graduate Record Examination scores or exceptional letters of recommendation may be considered for provisional admission to the M.P.A. program.

For all applicants, a completed application includes:

1. Online Graduate Studies application (http://www.graduate.ku.edu).
2. A nonrefundable application fee, submitted online with the application form. For domestic applicants, the application fee is $65; for international applicants, the application fee is $85.
3. 1 official transcript from the degree-granting college or university and any post-graduate college or university attended.
4. 3 letters of recommendation. If possible, at least 1 should be an academic reference.
5. A 3- to 5-page essay describing your background and career goals and clearly indicating how the M.P.A. degree fits into those goals and addressing any deficiencies in your academic preparation.
6. A current résumé.
7. A writing sample that is at least 5 pages long. It should be a well-cited work in which you critically analyze (not just summarize) an issue.
8. Graduate Record Examination scores (General test only — verbal, analytical, and quantitative). GRE scores are not required, but recommended, for students who received their bachelor’s degree more than 3 years prior to the time of admission. For reporting GRE scores to the KU School of Public Affairs and Administration, the institution code is 6871 and the department code is 4801.

Deadlines

Applications for intern-option applicants must be received by February 1.
Doctor of Philosophy in Public Administration

Why study public affairs and administration?

The mission of the doctoral program in the KU School of Public Affairs and Administration is to provide advanced graduate education in theory and research to prepare students for academic and research careers in public administration, as well as professional careers in advanced practice of public administration.

KU SPAA doctoral students are expected to:

- Assist in research being conducted by a public administration faculty member;
- Serve as teaching assistants;
- Co-author a refereed article with a faculty member;
- Present a scholarly paper at a national conference.

For additional doctoral program data, please view the doctoral program profiles (http://www.graduate.ku.edu/node/310) on the Graduate Studies website (click on "Public Affairs and Administration" under "College of Liberal Arts and Sciences").

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

PhD Admission

Please visit our website (http://kupa.ku.edu/admissions) for complete admissions information.

Admission is based on the applicant’s undergraduate and/or graduate academic record, standardized test scores, and references from instructors. All applicants must have completed a bachelor’s degree and an M.P.A. or equivalent degree. Students without an M.P.A. or equivalent degree must complete KU core M.P.A. requirements as part of their doctoral studies.

A completed application must include

- Online Graduate Studies application (http://www.graduate.ku.edu).
- Graduate Record Examination results — verbal, quantitative, and analytical;
- 2-page statement of goals and research interests including evidence of research aptitude and interest;
- 3 letters of recommendation, preferably from faculty members who can comment on the applicant’s potential for doctoral study;
- A writing sample that reflects the applicant’s interest in and ability to conduct research;
- A current resume; and
- 1 official transcript from each college or university attended.

In addition, international students must submit Test of English as a Foreign Language (TOEFL) scores from an examination administered no more than 2 years before the date of application. Immigration requirements and a financial statement are available from the Office of International Student and Scholar Services (http://www.iss.ku.edu). All materials must be received before the application can be considered.

For fall admission and financial aid, the application file must be completed by January 25. Applicants who do not meet this deadline are unlikely to be considered for financial aid, even though applications may be considered throughout the year.

Ph.D. Degree Requirements

The Ph.D. program requires a minimum of 66 credit hours of courses, including up to 30 hours earned completing the M.P.A. degree or its equivalent, plus a minimum of 9 hours for the dissertation, for a total of 75 credit hours. (An applicant with a KU M.P.A. or its equivalent may apply 30 hours toward the 75-hour course work requirement.)

Ph.D. students without an M.P.A. or its equivalent must take 8 courses that make up the KU M.P.A. core after entering the Ph.D. program.

The requirements for the Ph.D. are based on formal course work and independent study in several fields:

- Foundations of public administration
- Specialization field within public administration
- Cognate field
- Methods sequence

Foundations of Public Administration

4 of the 5 courses listed below are required of all doctoral students.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUAD 930</td>
<td>Research Seminar in Public Administration and Democracy</td>
<td>3</td>

</tr>
<tr>
<td>or PUAD 949</td>
<td>Law, Courts, and Public Policy</td>
<td>3</td>
</tr>
</tbody>
</table>

Substitutions require the approval of the coordinator of doctoral studies.

Public Administration Specialization

In consultation with the coordinator of doctoral studies, each student must develop a public administration specialization of at least 3 courses. Common specializations include budgeting and finance, human resources management, public policy analysis and evaluation, public values and ethics, organizations management and organization theory, public law and administration, and urban policy/politics. Each has a basic course that is taught in the present graduate curriculum at the 800 level. It is presumed that at least an additional course will come from independent study/directed readings. A third course could come from the school or could be taken outside through another department such as Political Science, Communication Studies, Economics, Education or Business. Other areas of specialization may be created in consultation with faculty.
Cognate Fields

The Ph.D. degree requires a cognate field in addition to the public administration specialization. The cognate field is a subfield similar to a "minor" and courses typically are taken outside the School. Examples include economics, political science, education, or a policy specialization (e.g., environmental policy or transportation policy.) The cognate field's sequence of 3 courses requires the approval of the coordinator of doctoral studies and does not require a comprehensive examination.

Methods

The doctorate emphasizes the development of research skills. It requires PUAD 934 Research Methods in Public Administration, with the prerequisite PUAD 836 or its equivalent, and PUAD 935 Advanced Quantitative Methods for Public Administration. Students also are encouraged to take PUAD 937 Qualitative Methods in Public Administration. Substitutions require the approval of the coordinator of doctoral studies. The methods requirement satisfies Option 1 of the K.U. "Foreign Language or Other Research Skills" requirement.

After the completion of the required coursework, the student must pass two written exams: one in the area of Foundations of Public Administration, and the other in the student's choice of Specialization. If the student receives a grade of unsatisfactory, an exam may be repeated, but under no circumstances may the student take a qualifying exam more than twice.

After passing both written exams, to become a Ph.D. candidate, the student must then pass a comprehensive oral examination.

After passing the comprehensive oral examination, the doctoral candidate will write a dissertation approved by a dissertation committee and pass a final oral defense of the dissertation. If the aspirant receives a grade of unsatisfactory on the dissertation defense, the defense may be repeated, but under no circumstances may the student defend more than twice.
Medical Center Campus Interdisciplinary Studies

The Office of Graduate Studies on the KU Medical Center campus offers two two interdisciplinary programs with oversight by the University of Kansas Center for Health Informatics (http://www.kumc.edu/health-informatics.html) through its advisory council. Please see the specific catalog section for these two programs for detailed information about the programs.

Master of Science in Health Informatics (p. 1962)

Health Informatics Post-Graduate Certificate (p. 1963)

The Office of Graduate Studies also oversees several graduate level interdisciplinary courses. These courses have GSMC and IPHI subject codes. Please select the "Courses" tab at top of this page for a listing of these courses.

Center for Health Informatics Courses

IPHI 820. Program, Project, and Communication Planning. 2 Hours. Strategies to promote program, project, and communication planning are presented and applied by the student. Communication strategies for informing, guiding, and persuading clients, health care providers, payers, and other stakeholders to advance program and project development are discussed. The use of evolving information technologies to improve program, project and communication planning is emphasized. Prerequisites: Corequisite: NRSG 880, or consent of instructor. LEC.

IPHI 850. Introduction to Health Informatics. 2-3 Hours. This course will provide an overview of health informatics focused on five themes: health informatics foundations; clinical decision support; human factors/organization factors; public health informatics and current issues in health informatics including best practices. Students enrolled for 3 credits will develop and demonstrate a practical, innovative small-group information technology (IT) project from one of a set of faculty recommended projects or from a student-proposed idea. Prerequisite: Consent of Instructor LEC.

IPHI 851. Transforming Health Care through Use of Information Systems and Technology. 3 Hours. Includes 2 credit hour lecture and 1 credit hour practicum. The application of the information system development life cycle in the design, selection, and implementation of health information technology applications will be examined. Human computer interactions and emerging technologies will be explored for their impact on patient care and safety. The role of legal, regulatory, ethical and security issues will be discussed as they apply to clinical and consumer information technologies. Prerequisite: Consent of Instructor. LEC.

IPHI 852. Health Data: Theory and Practice. 3-4 Hours. Includes 2 credit hour lecture and 1-2 credit hour practicum. Principles of database theory, modeling, design and manipulation will be introduced. Students will have experience using a relational database management system. Database manipulation will be explored using structured query language (SQL) to compose and execute query statements and critically evaluate the results. Prerequisite: None. LEC.

IPHI 853. Abstraction and Modeling of Healthcare Information. 3 Hours. Includes 2 credit hour lecture and 1 credit hour practicum. The information system development life cycle process is presented with emphasis on determination and analysis of information system requirements and system design that meet the identified health care information requirements. Object-oriented techniques will be introduced, including Unified Modeling Language and Unified Modeling Methodology, to facilitate process analysis and design proposal development. Prerequisite: NRSG 820 and consent of instructor. LEC.

IPHI 854. Knowledge Management in Healthcare. 3 Hours. Includes 2 credit hour lecture and 1 credit hour practicum. Knowledge management is the creation, communication, and leveraging of a healthcare organization's knowledge assets. Defining knowledge, describing the knowledge creation cycle, and the identification of the knowledge worker and his/her impact on the organization are discussed. Information technology and communities of practice are presented in a balanced approach supporting a systematic viewpoint of the knowledge management process. Knowledge management theory is enhanced with the performance of a knowledge audit and the development of knowledge management tools. (Same as NRSG 854.) Prerequisite: NRSG 820 and consent of instructor. LEC.

IPHI 856. Health Informatics Practicum. 1-3 Hours. In collaboration with healthcare information faculty, preceptors, students design an experience to facilitate application of theories and research related to health care informatics. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. Prerequisite: All Specialty Core, Leadership Core, IPHI 853, Abstraction and Modeling of Health Care Information, IPHI 852, Health Data: Theory Practice. Prerequisite or Co-prerequisite: IPHI 854, Knowledge Management in Healthcare, IPHI 851, Topics in Health Care Informatics, IPHI 860, Research Project in Nursing, or consent of instructor. LEC LEC.

IPHI 860. Research Project. 2 Hours. Students will conduct a health informatics research project. A research report, designed artifact, or other appropriate deliverable will be developed. Prerequisite: A research course and two informatics core courses, or consent of instructor. The research project must meet research guidelines for the MS Informatics program. LEC.

Graduate Studies Medical Ctr Courses

GSMC 50. Science Special Studies. 0 Hours. The aim of this course is to teach the methodologies and skills required for conducting biomedical science research, or practice in a clinical setting. The learning experience will be tailored to individual needs with personalized instruction for the opportunity to learn new skills and competencies, or exposure to new research developments or clinical practice. Progress of the student will be monitored through weekly laboratory meetings with members of the research lab or weekly contact with the student and/or clinical instructor in the clinical setting. The students will self-assess their progress and receive constructive feedback from appropriate individuals in the lab or clinical setting. Prerequisite: Permission of instructor in the Office of International Programs. LBN.

GSMC 99. Postdoctoral Studies. 0 Hours. Postdoctoral Studies RSH.

GSMC 803. Introduction to Clinical Research. 1 Hour. Course will provide a comprehensive overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical
research among the various institutional entities involved with clinical research at the University of Kansas Medical Center such as the Research Institute (RI), General Clinical Research Center (GCRC) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on how to apply for funding (grantsmanship), critical appraisal of research studies, and how to present research data. Prerequisite: Consent of instructor. LEC.

GSMC 840. CLINICAL OBSERVATION IN HEALTH CARE FOR BIOENGINEERS. 3 Hours.
This course requires a 6 hour time commitment each week over the semester. During each weekly session the student will observe various medical practitioners in specific health care environments. The course gives the bioengineer an opportunity to see the inside of medical practice and exposes students to medical questions and challenges that could provide opportunities for engineers to contribute to the improvement of medical practice. Each student must select a concentration for this course from a health care specialty depending on availability. Some specialty options might include: Orthopedic, Radiology, Cardiology, Physical Therapy, etc. Grading will be pass/fail based on participation and journal keeping. Prerequisite: Graduate engineering standing, Consent of instructor. LEC.

GSMC 850. Proteins and Metabolism. 2 Hours.
This course is the first of four lecture units in the first year curriculum of the Interdisciplinary Graduate Program in the Biomedical Sciences. It will cover basic principles of metabolism, protein structure and an introduction to nucleic acids. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 852 (Introduction to Biomedical Research). LEC.

GSMC 851. Molecular Genetics. 2 Hours.
This course is the second of four lecture units in the first year curriculum of the Interdisciplinary Graduate Program in the Biomedical Sciences. It will cover basic principles of molecular genetics, DNA replication, DNA repair, transcription and translation. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 852 (Introduction to Biomedical Research). LEC.

GSMC 852. Introduction to Biomedical Research I. 2 Hours.
This is the first semester of a one year series in the Interdisciplinary Graduate Program in the Biomedical Sciences. The course is composed of weekly meetings to discuss research problems, methods and current literature. The course will interface with the lectures and students will learn to critically evaluate our scientific knowledge base. The students will be introduced to the tools that are available to obtain and evaluate information. The students will be challenged to identify areas of our scientific knowledge that require further experimentation and clarification. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. This course requires a 6 hour time commitment each week over the semester. During each weekly session the student will observe various medical practitioners in specific health care environments. The course gives the bioengineer an opportunity to see the inside of medical practice and exposes students to medical questions and challenges that could provide opportunities for engineers to contribute to the improvement of medical practice. Each student must select a concentration for this course from a health care specialty depending on availability. Some specialty options might include: Orthopedic, Radiology, Cardiology, Physical Therapy, etc. Grading will be pass/fail based on participation and journal keeping. Prerequisite: Graduate engineering standing, Consent of instructor. LEC.

GSMC 853. Cellular Structure. 2 Hours.
This course is the third of four lecture units in the first year curriculum of the Interdisciplinary Graduate Program in the Biomedical Sciences. It will cover basic principles of cellular structure and function. Topics include the lipid bilayer, membrane proteins, and cellular organelles. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 855 (Introduction to Biomedical Research). LEC.

GSMC 854. Cell Communication. 2 Hours.
This course is the fourth of four lecture units in the first year curriculum of the Interdisciplinary Graduate Program in the Biomedical Sciences. It will cover basic principles of cell communication. Topics include G-protein-coupled signaling, cellular cytoskeleton; cell cycle control; cell death; extracellular matrix; and cancer. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 855 (Introduction to Biomedical Research). LEC.

GSMC 855. Introduction to Biomedical Research II. 2 Hours.
This is the second semester of a one year series in the Interdisciplinary Graduate Program in the Biomedical Sciences. The course is composed of weekly meetings to discuss research problems, methods and current literature. The course will interface with the lectures and students will learn to critically evaluate our scientific knowledge base. The students will be introduced to the tools that are available to obtain and evaluate information. The students will be challenged to identify areas of our scientific knowledge that require further experimentation and clarification. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. Students must co-enroll in GSMC 853 (Cellular Structure) and GSMC 854 (Cell Communication). LEC.

GSMC 856. Introduction to Research Ethics. 1 Hour.
The objective of this course is to introduce students to research ethics. Students will learn and discuss some of the following areas of ethics in research: 1) sources of errors in science, 2) Scientific Fraud, 3) plagiarism and misrepresentation, 4) conflicts of interest, and 5) confidentiality. Prerequisite: Permission of instructor. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. LEC.

GSMC 857. Biographics. 1 Hour.
The objective of the course is to teach students how to organize and present data in a clear and concise manner at national meetings. Students are taught basic principles of organizing data for presentation and then learn through the actual presentation of data in simulated platform sessions held in the course. Videotapes are made of the presentations, and students are then given a constructive critique of their presentation by the instructor and fellow students. Prerequisite: Permission of instructors. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. LEC.

GSMC 858. Introduction to Faculty Research. 1 Hour.
This course was created to provide students with sufficient introduction to the research conducted at KUMC. To facilitate this point, the course is designed as a seminar series. In each session of the series, three faculty members present a brief 20-minute overview of their research programs. The series will help students to select faculty for research rotations and ultimately help them determine which faculty member they will select as a research adviser for their doctoral research. Prerequisite: Permission of instructors. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. LEC.

GSMC 859. Research Rotations. 1-4 Hours.
The course will introduce students to research methods, experimental design, and the types of biomedical research conducted at KUMC. The first research rotation begins halfway through the first semester; the second and third research rotations will occur in the second semester. It is designed to help students determine which faculty member they will select as a research adviser for their doctoral research. Prerequisite: Permission of instructors. Students must be admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences. LEC.
GSMC 860. Introduction to Molecular Medicine. 1 Hour.
Introduction to Molecular Medicine (1 credit hour/semester) is a two semester course, taught every fall and spring semester, primarily for first year MD-PhD students. This course is taught by the Director of the MD-PhD Program, with contributions from other faculty from the basic science and clinical departments. Through lectures, small group discussion, evaluation of primary literature, analysis of scientific data and presentations/discussions with current KUMC faculty, students will be introduced to the process of investigating the molecular and cellular derangements that underlie human disease. Order of topics mirror, to some extent, the subjects of the first-year modules. There will be particular emphasis on the diverse research methods and models systems used to investigate the molecular basis of disease and understanding how such investigations can be translated to answer clinically relevant questions. Students are evaluated by both group activity and individual preparation and participation. Prerequisite: Enrollment in the MD-PhD Program or Permission of Instructor. LEC.

Master of Science in Health Informatics

Professionals in health informatics have skills in analysis, design, implementation and evaluation of information systems that support a full range of clinical and patient care functions. Working as a translation specialist, the graduate will be prepared for entry and mid-level positions with informatics departments, medical practice departments, nursing departments, public health organizations, and as consultants and/or staff in organizations that specialize in computer operations and knowledge management. Graduates also have the skills to enter the growing field of health information exchange, which includes regional health information organizations and the emerging personal health records. In addition to a foundation in information technology, special skills will be acquired in organizational change, project management and impact evaluation.

Applicants not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs. The M.S. in Health Informatics curriculum is divided into three cores: informatics, leadership, and discipline focus (matching that of the faculty partners) along with a research component. A strength of the program is the close relationship between the students and their faculty advisers. Advisors are assigned based on the career goals of the student. The student and advisor will develop a plan of study that meets the career goals of the student.

Degree requirements:

• Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 5 years of admission to the program.
• Completion of a minimum of 40 credit hours.
• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
• Successful completion of a general examination (p. 2313) the semester the student will graduate.
• Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
• Successful completion of the Health Informatics Core (minimum 17 credit hours.) These courses provide the core knowledge and skills essential to health informatics.

Applicants not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs. The M.S. in Health Informatics curriculum is divided into three cores: informatics, leadership, and discipline focus (matching that of the faculty partners) along with a research component. A strength of the program is the close relationship between the students and their faculty advisers. Advisors are assigned based on the career goals of the student. The student and advisor will develop a plan of study that meets the career goals of the student.
Successful completion of the **Leadership Core** (minimum 9 credit hours.) This includes a minimum of one health policy (HP&M) course. Choose from:

- **NRSN 808** The Social Context for Health Care Policy 2
- **NRSN 820** Program, Project, and Communication Planning 2
- **NRSN 880** Organizational Foundations for Leading Change 3
- **NRSN 882** Introduction to Operations 3
- **NRSN 885** Evaluation and Analysis for Healthcare Effectiveness 2
- **HP&M 832** Governance and Health Law 2
- **HP&M 833** Ethics 2
- **HP&M 837** Health Policy 3
- **HP&M 840** Organizational Foundations for Leading Change 3
- **HP&M 850** Introduction to Operations 3

Successful completion of the **Research Component** (minimum 5 credit hours.) This component includes a research project that involves applying aspects of the research process to the student’s area of health informatics practice.

- **NRSN 754** Health Care Research 3
- **HP&M 819** Research for Health Care Leaders 3
- **IPHI 860** Research Project 2

Successful completion of the **Discipline-Specific Core** (minimum 9 credit hours.) The Discipline-Specific Core (Clinical, Health Policy or Preventive Medicine) and the courses within the core are selected in consultation with the student’s advisor based on the student’s background and career goals.

- **Clinical Core** (minimum 9 credit hours.) Choose from:
  - **NRSN 748** Theories for Practice and Research 3
  - **NRSN 755** Professionalism in Advanced Nursing Practice 3
  - **NRSN 826** Global Perspective and Diversity in Healthcare 2
  - **NRSN 883** Complexity Science Approaches to Improve Organizational Effectiveness 3
  - **NRSN 891** Human Resources and Workforce Development 3

- **Health Policy and Management Core** (minimum 9 credit hours). Choose from:
  - **HP&M 810** The Health Care System 3
  - **HP&M 822** Health Care Economics 3
  - **HP&M 825** Financial Concepts in Healthcare Management 3
  - **HP&M 846** Health Information Technology Management 3
  - **HP&M 850** Introduction to Operations 3

**Preventive Medicine Core** (minimum 9 credit hours). Choose from:

- **PRVM 800** Principles of Epidemiology 3
- **PRVM 809** Introduction to Public Health 3
- **PRVM 815** Infectious Disease Epidemiology 3
- **PRVM 875** Management of Public Health Data 3
- **PRVM 877** Health Communication 3

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years’ catalogs are:

### Health Informatics Post-Graduate Certificate

Emerging technologies are fundamentally changing the way we manage and apply knowledge. In addition, healthcare organizations must meet the challenges of the HITECH Act and Meaningful Use, HIPAA changes, as well as regulatory influences such as The Joint Commission and IOM. As a result, the need for trained healthcare informaticians has increased dramatically over the last few years. In order to appropriately select and use technology to improve healthcare and to meet the requirements of regulating bodies, health informatics professionals need training in the use informatics concepts and methodologies.
The Health Informatics Post-Graduate Certificate program meets this need by preparing students to:

1. Apply healthcare informatics using theoretical, conceptual, and experiential knowledge base
2. Articulate a vision of healthcare informatics in an organization in the context of multidisciplinary practice and complex healthcare delivery systems
3. Implement and evaluate information systems that support multi-professional clinical/administrative practice
4. Facilitate the delivery of evidence-based practice at point of care, and
5. Sit for national Nursing, MD or graduate level certification exam as an expert informatician, as appropriate.

The advantage of this certificate program is that it offers an interprofessional learning experience and is open to graduates in all fields.

The application process for the Health Informatics Post-Graduate Certificate program is an online process. Detailed instructions on how to apply are posted on the Center for Health Informatics (http://www.kumc.edu/health-informatics/certificate.html) website. Students are admitted for the fall and spring semesters only. Applications for the fall semester must be received by April 1st and by September 1st for the spring semester.

**Admission Requirements:**

- A master's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended both pre and post-baccalaureate are required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale.
- Applicants, who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://catalog.ku.edu/graduate-studies/kumc/#admissiontext).
- A background check (http://catalog.ku.edu/graduate-studies/kumc/#admissiontext) is required during the admission process; it may affect the student's eligibility to enter the program.
- Successful completion of a graduate level statistics course, which may be completed prior to admission or during the first semester of enrollment.
- Three letters of recommendation from individuals who can assess your academic and professional background and potential for success in a post-master's certificate program.
- A personal statement regarding applicant's career objectives and purpose.
- A current resume or curriculum vitae.
- Satisfactory phone or in-person interview.

Applicants will be assessed on the above criteria and selected applicants will in the judgment of the admissions committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for successful advancement. In addition, the committee looks for applicants who will contribute academic, nonacademic, and socioeconomic diversity to the class. The committee is interested in evidence of capacity for mature and independent scholarship.

After an applicant has been admitted, the program may defer an applicant's admission for one year after which time the applicant must submit a new application. Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

**Certificate Program Information:** (p. 2321)

No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral.

Graduate credit from another institution may not be transferred to a graduate certificate program.

The Health Informatics Post-Graduate Certificate program consists of 19 credit hours. The graduate certificate program focuses on the theory and application of informatics, computer technology, knowledge management, and evidence-based practice that supports healthcare informatics and clinical decision-making. The program culminates with a mentored practicum experience and project.

**Certificate requirements:**

- Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of 4 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate certificate coursework.
- Enrollment in a minimum of one (1) credit hour the semester the program is completed. Graduate certificates may not be granted retroactively.
- Successful completion of a minimum of 19 credit hours.
- Successful completion of the following courses:

The University of Kansas

IPHI 856 Health Informatics Practicum (total of 3 credit hours required which can be taken over 1-3 semesters)

| Total Hours | 19 |

A total of 200 clock hours is required to complete the practicum IPHI 856 minimum of three credit hours. The practicum course may be taken as 1-2 credit hours over consecutive semesters or taken as three credits in the final semester.

Students entering all programs of study at the University of Kansas Medical Center are expected to have basic skills in using a computer. Please refer to the recommendations for purchasing computers (http://www.kumc.edu/information-resources/standards-and-guidelines/purchasing-a-pc-for-work-use/recommendations-for-homestudents-computing.html). During your studies in health informatics you will be participating in simulations in Second Life (http://secondlife.com) so students must have a microphone/headset and a video card that is capable of carrying the graphics in Second Life. Students will be expected to have access to Microsoft Office, Microsoft Access, and Microsoft Visio in order to complete assignments.

Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

Medicine (M.D. & Graduate Degrees)

Founded in 1905, the KU School of Medicine is proud of its rich legacy as Kansas’ only medical school. Our mission is to enhance the quality of life and serve our community through the discovery of knowledge, the education of health professionals and by improving the health of the public.

The School of Medicine integrates excellent education, scientific discovery, outstanding clinical programs and dedication to community service. In addition to its commitment to educating the physician workforce of tomorrow, the school is an emerging leader in biomedical research and the health of the public. Graduate programs are offered in the biomedical sciences, biostatistics, public health, health policy and management, and clinical research.

Admission and degree requirements vary by program and are listed in the individual program descriptions. Requirements and course descriptions are subject to change. In most cases, use the catalog of the year student entered program. Other years’ catalogs (http://catalog.ku.edu/archives) ».

Department of Anatomy and Cell Biology

The Anatomy and Cell Biology Graduate Program is designed to prepare the student for a career in independent research and/or teaching with concentrations in the following areas:

- Cell Biology
- Developmental Biology
- Neuroscience
- Renal Biology
- Reproductive Biology

The graduate program emphasizes acquiring the skills and knowledge required to perform and communicate the results of laboratory research. Individual research programs within the Department of Anatomy and Cell Biology are largely complementary and focus on understanding the biological processes that contribute to human health and disease. Experimental systems include the use of cell and tissue culture, as well as model systems such as Chlamydomonas, Drosophila melanogaster, chameleon, frog, chick, zebrafish, rats, and transgenic mice.

In 2014, the Department of Anatomy and Cell Biology brought in over $8 million in grant funding from the National Institutes of Health, placing it at the top of all basic science departments within KUMC and 17th (out of 78) among all Anatomy and Cell Biology departments in the country. Faculty members and trainees also received funding from the American Heart Association, the Cystic Fibrosis Foundation, and various other agencies. Graduates of this program have obtained positions in industry, government, and consulting, as well as faculty positions at the college, university, and medical/graduate school level.

Courses

ANAT 832. Electron Microscopy Techniques. 3 Hours.
Basic methods in preparation of tissues and cells for ultrastructural studies; use of electron microscopy in specific research problems; interpretation of biological ultrastructure; reading assignments and discussion sessions. Prerequisite: ANAT 830, or consent of course instructor. LEC.

ANAT 845. Graduate Histology. 3 Hours.
This course will bridge student knowledge of systems/organs with cellular histology and is designed as an accelerated introduction to histological techniques, microscopy/ optics, and histology of normal and diseased tissues. Classes meet once a week and the format includes a 1 hour lecture on individual tissues within related organ systems followed by 1 hour of microscopic observation. (Same as NEUS 845.) Prerequisite: Completion of the IGPBS core curriculum or consent of instructor. LEC.

ANAT 846. Advanced Neuroscience. 5 Hours.
Team taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as PHCL 846, PHSL 846, NURO 846, and NEUS 846). Prerequisite: Permission of course director. LEC.

ANAT 847. Developmental Neurobiology. 2 Hours.
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as NURO 847, PHSL 847 and NEUS 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor. LEC.

ANAT 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer’s, Parkinson’s, Huntington’s, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down’s syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as NURO 848, PHCL 848, PHSL 848, and NEUS 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor. LEC.

ANAT 868. Advanced Developmental Biology. 2 Hours.
In-depth exposure to the classically important aspects of development using several different animal systems. The course addresses a selected number of topics and bring students up to date with regard to cutting edge research accomplishments in each topic. The materials selected are designed to qualify students for future teaching assignments in Developmental Biology and enhance their research capabilities. Prerequisite: IGPBS Core Curriculum or consent of instructor. LEC.

ANAT 869. Grant Writing. 3 Hours.
All aspects of preparing grant applications are covered. This includes writing an actual grant application containing all the usual elements of grants - budgets, biosketches, resources, and scientific text. In addition, different funding agencies, building research teams, the review process, responding to reviewers, and resubmitting grants will be covered. (Same as HPM 878 and NRSG 889.) Prerequisite: Appropriate research methods and statistics courses in student’s current graduate program; and permission of the instructor. For students in the Outcomes Management and Research concentration, HPM 821. LEC.

ANAT 870. Techniques in Anatomy and Cell Biology. 1-3 Hours.
Advanced study allowing a student to pursue a particular research or educational skill through directed laboratory work. Prerequisite: Consent of instructor. LEC.

ANAT 880. Advanced Topics. 1-5 Hours.
Special study allowing a student to pursue a particular subject through readings, laboratory work, and conferences with a faculty member. Prerequisite: Consent of instructor. IND.

ANAT 885. Seminar. 1 Hour.
Research-oriented presentations in a seminar format by students, faculty, and guests. LEC.

ANAT 890. Graduate Research. 1-10 Hours.
Independent laboratory investigation approved by and under the supervision of the student’s advisor, and in partial fulfillment of the requirements for the M.S. or Ph.D. degree. Prerequisite: Consent of advisor. RSH.

ANAT 899. Master’s Thesis. 1-6 Hours.
Preparation of the formal thesis based upon independent research and in partial fulfillment of the requirements for the M.S. degree. Credits will be given only after the thesis has been accepted by the department. Prerequisite: Consent of advisor. THE.

ANAT 900. Analysis of Scientific Papers. 1 Hour.
Research articles are analyzed by the student with the guidance of an instructor in terms of quality of scientific content and mechanics of the presentation. One or more articles are discussed in each tutorial session.
The research topics and the instructor are chosen in accordance with the research interest of the student. LAB.

**ANAT 990. Doctoral Research. 1-12 Hours.**
Original and independent laboratory investigation, approved by and conducted under the supervision of the students' advisor and advisory committee, in partial fulfillment of the requirements for the Ph.D. degree. Prerequisite: Consent of advisor. LEC.

**ANAT 999. Doctoral Dissertation. 1-12 Hours.**
Preparation of the dissertation based upon original research and in partial fulfillment of the requirements for the Ph.D. degree. Credits will be given only after the dissertation has been accepted by the student's dissertation committee. Prerequisite: Consent of advisor. THE.

## Master of Science in Cell Biology and Anatomy

The Master of Science (M.S.) program in Anatomy and Cell Biology prepares the student for a career at the advanced technical level in academia, industry, or government. Graduating students may also find teaching positions at the secondary or junior college level. Incoming students may not directly enroll in the M.S. program; entry will only be granted by the Departmental Director of Graduate Education upon the recommendation of the student’s Research Advisory Committee.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2042) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

### Admission requirements:

- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics

- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.*

### Degree Requirements:

- Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of either a thesis defense or general examination (p. 2313) the semester the student will graduate.
- If thesis option is chosen, then enrollment in a minimum of one (1) credit hour of ANAT 899 Master's Thesis and successful thesis submission and publication (p. 2313) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):
  - **GSMC 850** Proteins and Metabolism 2
  - **GSMC 851** Molecular Genetics 2
  - **GSMC 852** Introduction to Biomedical Research I 2
  - **GSMC 853** Cellular Structure 2
  - **GSMC 854** Cell Communication 2
  - **GSMC 855** Introduction to Biomedical Research II 2
  - **GSMC 856** Introduction to Research Ethics 1
  - **GSMC 857** Biographics 1
  - **GSMC 858** Introduction to Faculty Research 1
  - **GSMC 859** Research Rotations 1-4
- Successful completion of the following Anatomy and Cell Biology courses:
  - **ANAT 845** Graduate Histology 2
  - **ANAT 885** Seminar 1
  - **ANAT 890** Graduate Research 1-10
  - **ANAT 900** Analysis of Scientific Papers 1
  - **ANAT 899** Master’s Thesis (if thesis option chosen) 1-6
- Students must be continually enrolled in ANAT 885 Seminar and ANAT 900 Analysis of Scientific Papers each fall and spring semester beginning with fall semester of their second year. These two courses may be waived for one semester after the student has completed all departmental requirements other than the general exam or thesis defense.
• Successful completion of optional elective coursework as determined in consultation with the student’s advisor.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. *Other years’ catalogs.*

**Doctor of Philosophy in Cell Biology and Anatomy**

The Ph.D. program in Anatomy and Cell Biology prepares the student for a career in independent research and/or teaching. The Ph.D. is typically followed by postdoctoral training in a specific field of study. Graduates of this program have obtained positions in industry, government, and consulting, as well as faculty positions at the college, university, and medical/graduate school level.

Students that obtain a Ph.D. in Anatomy and Cell Biology are required to achieve the following expectations:

• Become knowledgeable in the areas of study included in the IGPBS (Interdisciplinary Graduate Program in the Biomedical Sciences) core curriculum.

• Obtain in-depth and up-to-date expertise in a specialized area of knowledge that is appropriate for the field of your dissertation research project.

• Make original and high quality contributions to the scientific literature in your chosen research field.

• To become familiar with the scientific literature through general and specialized journals in biological research, and to develop the ability to critically evaluate the original research in your own and related fields.

• Become skilled in organizing and communicating information in oral presentations, and to respond to critical questioning.

• Develop clarity, conciseness, and precision in writing, to aid in grant application writing, and publication of your original research results.

• To learn how to ask incisive scientific questions and gain experience in the design, performance, and interpretation of laboratory experiments and observations.

• To gain familiarity with the preparation and writing of grant applications.
• To prepare for the teaching as well as the research aspects of an academic career.
• To obtain instruction in research skills and responsible scholarship.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2042) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:
• Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
• A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
• A background check (p. 2310) is required during the admission process; it may affect the student’s eligibility to enter the program.
• An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
• Three letters of recommendation.
• Prerequisite coursework:
  • One year of general chemistry
  • One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  • One year of biological sciences
  • One semester of calculus
  • One semester of physics
• Research experience (beyond labs associated with lecture courses) is strongly suggested.
• Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

### Degree requirements:
• Degree requirements are normally completed within 5 years of admission to the program although a maximum of 8 years is allowed.
• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
• Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2313) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
• Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
• Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.

• Successful completion of the Residence Requirement (p. 2313) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
• Successful completion of the Oral Comprehensive Examination (p. 2313). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
• Successful completion of the Post-Comprehensive Enrollment (p. 2313) requirement.
• Enrollment in a minimum of one (1) credit hour of ANAT 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.
• Successful completion of the Final Oral Examination (p. 2313) (dissertation defense.)
• Successful Dissertation Submission and Publication (p. 2313) (according to Office of Graduate Studies policy.)
• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):

- Successful completion of two hour-long presentations in the regular departmental seminar series (or an equivalent seminar approved by the graduate education director) are to be given in two separate semesters, not including the one in which the student defends.

- Gain teaching experience by assisting in selected courses that are chosen in consultation with the student’s advisor and the graduate education director.

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (p. 2050) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years’ catalogs→.

Second hour-long seminar presented.
Final Oral Exam (dissertation defense) may be scheduled as early as this semester if approved by committee to defend and graduate.

ANAT 885 and ANAT 900 may be waived for one semester after the student has completed all departmental requirements other than the dissertation defense.

Total Hours: 31-71

Department of Biochemistry and Molecular Biology

The mission of the Department of Biochemistry and Molecular Biology is to:

- provide a dynamic research environment with programs in the disciplines of biochemistry and molecular biology
- provide a superior educational experience for graduate students and medical students
- provide a rich training environment for postdoctoral fellows
- provide service to our institution and community

Our areas of research strength include:

- Regulation of gene expression, emphasizing but not limited to transcription regulation.
- Protein folding and structure determination.
- Allosteric regulation of protein function.
- Signal transduction

Our faculty members are associated with a variety of cross-disciplinary centers within the university, including The Kidney Institute (http://www.kumc.edu/school-of-medicine/kidney-institute.html), the COBRE for Protein Structure and Function (http://psf.cobre.ku.edu), the COBRE for Novel Approaches for Control of Microbial Pathogens (http://www.kumc.edu/school-of-medicine/microbiology-molecular-genetics-and-immunology/cobre.html), and the COBRE for Molecular Regulation of Cell Development and Differentiation (http://www.kumc.edu/school-of-medicine/anatomy-and-cell-biology/nih-center-of-biomedical-research-excellence-cobre.html), the Cancer Center and the Institute for Reproductive Health and Regenerative Medicine (http://www.kumc.edu/school-of-medicine/irhrm.html).

Core services are available, which includes: a transgenic mouse facility; a biotechnology support center that offers DNA synthesis, sequencing, and microchip analysis; a state-of-the-art mass spectrometry facility (http://www.kumc.edu/mspc.html); in-house x-ray crystallographic equipment; and a variety of spectroscopy and calorimetry instruments, including advanced fluorescence equipment.

Courses

BCHM 802. Biochemistry Seminar. 1 Hour. Weekly meetings. LEC.

BCHM 808. Methods for Analyzing Biomolecules. 3 Hours. Application of physical techniques to the study of biological macromolecules in solution. Emphasis on utilization of data obtained from such studies in interpreting biological processes at the molecular level. Course will be taught in the spring. Prerequisite: Consent of instructor. LEC.

BCHM 850. Topics in Biochemistry. 1-3 Hours. Selected topics in biochemistry with varying subject matter. Students should inquire before enrolling. Topics are in-depth studies of current research areas. The course may consist of formal lectures and/or directed readings and studies. IND.

BCHM 862. Biochemical Research-Literature Seminar. 1 Hour. Students and faculty meet once weekly to discuss the research of students or the current biochemical literature. The student is required to make one presentation. Prerequisite: Consent of instructor. LEC.

BCHM 890. Research in Biochemistry. 1-15 Hours. Research for the M.S. degree or for Ph.D. students prior to completion of their comprehensive exam. RSH. RSH.

BCHM 899. Master's Thesis. 1-15 Hours. Restricted to the writing of the master's thesis. THE.

BCHM 922. Advanced Molecular Genetics. 3 Hours. An in-depth analysis of the structure and function of gene regulatory proteins and the mechanisms of gene transcription, and DNA replication and repair. Lectures and discussion of current literature. Prerequisite: consent of instructor. Course will be presented in the fall semester and will include several faculty leading discussions in their area of research interests. LEC.

BCHM 923. Protein Structure and Function. 3 Hours. The relationship between protein structure, binding, and physiological function. Emphasis is on proteins as enzymes, structural components, and regulators. Course will be taught in the spring. Prerequisite: consent of instructor. LEC.

BCHM 990. Doctoral Research. 1-15 Hours. Research for the doctoral degree. RSH.

BCHM 999. Doctoral Dissertation. 1-15 Hours. Restricted to the writing of the doctoral dissertation. THE.

Master of Science in Biochemistry and Molecular Biology

The M.S. in biochemistry and molecular biology normally leads to positions at the advanced technical level in academic research, industry, or government. It may lead to teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2042) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary
Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission requirements:**

- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. *Other years' catalogs*. If the general examination option is chosen, then enrollment in a minimum of one (1) credit hour the semester the student will graduate is required.

- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4

- Successful completion of the following Biochemistry and Molecular Biology courses:
  - BCHM 862 Biochemical Research-Literature Seminar 1
  - BCHM 890 Research in Biochemistry 1-6
  - BCHM 899 Master's Thesis (if thesis option chosen) 1-6

- As determined in consultation with the student's advisor, students who have not previously mastered undergraduate biochemistry will strengthen any areas of weakness by taking BCHM 850 Topics in Biochemistry.
- Successful completion of elective coursework as determined in consultation with the student's advisor.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. *Other years' catalogs*.

**Doctor of Philosophy in Biochemistry and Molecular Biology**

The Ph.D. is required for careers in independent research in biochemistry and molecular biology. The Ph.D. most often is followed by one or more years of postdoctoral training in a specific area of research. Ph.D. degree holders in biochemistry and molecular biology may find positions in industry or government and, with some postdoctoral experience, may obtain faculty positions at the college or university level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission requirements:**

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

**Degree requirements:**

- Degree requirements are normally completed within 5-6 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2313) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
- Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2313) prior to the semester the Oral Comprehensive Examination is scheduled.

**Total Hours: 19-30**

**Total Hours: 9-33**
The requirement is met by enrollment in full-time status a minimum of two semesters.

- Successful completion of the Oral Comprehensive Examination (p. 2313). This will comprise (i) a written grant proposal that conforms to the NIH R01 guidelines; and (ii) oral examination that centers around material in the written proposal, as well as broader aspects of biochemistry and molecular biology. The topic may be broadly related to the student's research area, but hypotheses should be developed independently by the student. Students are expected to complete the Oral Comprehensive Exam by the end of year 2. Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

- Successful completion of Post-Comprehensive Enrollment (p. 2313) requirement.

- Enrollment in a minimum of one (1) credit hour of BCHM 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.

- Successful completion of the Final Oral Examination (dissertation defense.)

- Successful completion of the Final Oral Examination (p. 2313) (dissertation defense.)

- Successful completion of the Final Oral Examination and Publication (p. 2313) (according to Office of Graduate Studies policy.)

- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):

• To provide a leadership role in biostatistical and informatics research initiatives across the medical center.

Courses

BIOS 704. Principles of Statistics in Public Health. 3 Hours.
Introductory course concerning the concepts of statistical reasoning and the role of statistical principles as the scientific basis for public health research and practice. Prerequisite: Permission of instructor. LEC.

BIOS 714. Fundamentals of Biostatistics I. 3 Hours.
First-semester course of a two-semester introductory statistics course that provides an understanding of the proper application of statistical methods to scientific research with emphasis on the application of statistical methodology to public health practice and research. This course focuses on basic principles of statistical inference with emphasis on one or two sample methods for continuous and categorical data. This course fulfills the core biostatistics requirement. Prerequisite: Calculus or Permission of Instructor. LEC.

BIOS 715. Introduction to Data Management using RedCap and SAS. 3 Hours.
This course will cover the utilization of Redcap and SAS for data management. Data collection and management using Redcap will be covered. Data cleaning and preparation for analysis will be covered using SAS. In addition, some of the basic descriptive analysis procedures will be covered in SAS. Prerequisite: Corequisite: BIOS 704 or BIOS 714 or equivalent with permission of instructor. LEC.

BIOS 717. Fundamentals of Biostatistics II. 3 Hours.
Second level statistics course that provides an understanding of more advanced statistical methods to scientific research with an emphasis on the application of statistical methodology to public health practice, public health research, and clinical research. Special focus will be upon the utilization of regression methodology and computer applications of such methodology. Prerequisite: BIOS 714 or equivalent with permission of instructor. LEC.

BIOS 720. Analysis of Variance. 3 Hours.
Methods for designed experiments including one-way analysis of variance (ANOVA), two-way ANOVA, repeated measures ANOVA, and analysis of covariance are emphasized. Post-ANOVA tests, power and testing assumptions required in NOVA are discussed and applied. Outlier detection using robust estimators also are incorporated. Boxplots, histograms and scatterplots are used to display data. Prerequisite: PRE 710/711 or BIOS 714/717 or equivalent. Preferred: BIOS 715. Knowledge of statistical software, basic statistical plotting methods, p-values, two-sample t-test and simple linear regression is assumed. LEC.
BIOS 725. Applied Nonparametric Statistics. 3 Hours.
This course will study nonparametric methods in many situations as highlighted by the following topics: Students will learn how nonparametric methods provide exact p-values for tests, exact coverage probabilities for confidence intervals, exact experimentwise error rates for multiple comparison procedures, and exact coverage probabilities for confidence bands. This course will be using EXCEL and SAS to conduct various procedures. Prerequisite: BIOS 714 or equivalent with permission of instructor. LEC.

BIOS 730. Applied Linear Regression. 3 Hours.
Simple linear regression, multiple regression, logistic regression, nonlinear regression, neural networks, autocorrelation, interactions, and residual diagnostics. Applications of the methods will focus on health related data. Prerequisite: 1) BIOS 714 or the equivalent and 2) BIOS 717 or BIOS 720 or equivalent with permission of instructor. LEC.

BIOS 735. Categorical Data and Survival Analysis. 3 Hours.
An intermediate level statistics course that provides an understanding of the more advanced statistical methods to scientific research with emphasis on the application of statistical methodology to clinical research, public health practice, public health research and epidemiology. Prerequisite: BIOS 714, BIOS 715, and BIOS 717 or permission of the instructor. LEC.

BIOS 740. Applied Multivariate Methods. 3 Hours.
This course is an advanced statistical course for students who have had fundamental biostatistics and linear regression. Topics to be covered include Hotelling’s T-squared test, MANOVA, principal components, factor analysis, discriminant analysis, canonical analysis, and cluster analysis. More advanced topics such as Multidimensional Scaling or Structural Equation Modeling might be introduced if time allows. Computers will be extensively used through the whole course, and students are suggested to be familiar with some statistical software before taking this course. Although students are allowed to use the software they are comfortable with, SAS will be the primary statistical package used to demonstrate examples in this course. Prerequisite: Corequisite: BIOS 730 or equivalent with permission of instructor. LEC.

BIOS 799. Introduction to Statistical Genomics. 3 Hours.
This survey course will provide a high-level introduction to various statistical and bioinformatics methods involved in the study of biological systems. In particular, this course will provide an overview of the analytical aspects involved in: the study DNA, RNA, and DNA methylation data measured from both microarray and next-generation sequencing (NGS) technologies. This course will be held in a block format with 4 hours of lectures a day for two weeks (one week in June and one week in July), with readings and homework assignments assigned throughout the summer semester. Prerequisite: Corequisite: BIOS 714 and BIOS 717 or equivalent with permission of instructor; Experience with a higher level programming language is preferred. LEC.

BIOS 805. Professionalism, Ethics and Leadership in the Statistical Sciences. 3 Hours.
This web-based course addresses issues in professionalism, leadership and ethics that are specific to students training to become statisticians, biostatisticians, and data scientists. Topics include use of sound statistical methodology, common threats to valid inference, effective communication and collaboration with content-area experts, maintaining transparency and independence, reproducible research, the publishing process (including authorship guidelines, plagiarism, peer review, intellectual property, etc.), conflict of interest, data security, and properties of effective leaders, among others. Prerequisite: Department consent. LEC.

BIOS 806. Special Topics in Biostatistics. 1-3 Hours.
This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Permission of the instructor. LEC.

BIOS 810. Clinical Trials. 3 Hours.
The design, implementation, analysis, and assessment of controlled clinical trial. Basic biostatistical concepts and models will be emphasized. Issues of current concern to trialists will be explored. Prerequisite: By permission of instructor. LEC.

BIOS 820. Statistical Computing/SAS Base L1. 3 Hours.
This is a graduate level course preparing a student for the SAS base programming certification exam. We will cover the topics required for a student to pass the SAS base programming certification exam given by SAS. To this end, topics we will study include, referencing files and setting options, creating list reports, understanding data step processing, creating and managing variables, reading and combining SAS data sets, do loops, arrays, and reading raw data from files. After the completion of the course the student should be able to create SAS programs to read data from external files, manipulate the data into variables to be used in an analysis, generate basic reports showing the results. Prerequisite: Permission of the Instructor. LEC.

BIOS 821. Statistical Computing II. 3 Hours.
This is a graduate level course preparing a student for the SAS advanced programming certification exam. We will cover the topics required for a student to pass the SAS advanced programming certification exam given by SAS. To this end, topics we will study include array processing, use of data step views, using the data step to write SAS programs, efficient use of the sort procedure, introduction to the macro language in SAS, and accessing data using SAS PROC SQL. After the completion of the course the student should be able to create SAS programs to read data from external files, manipulate the data into variables to be used in an analysis, generate basic reports showing the results. Prerequisite: Corequisite: BIOS 820 or equivalent (SAS Certified BASE programmer for SAS or at least one year of experience as a data analyst/programmer). LEC.

BIOS 823. Introduction to Programming and Applied Statistics in R. 3 Hours.
This course will provide students with the opportunity to learn advanced statistical programming. The development of new statistical or computational methods often implies the development of programming codes to support it's application. Much of this type of development is currently carried out in the R (or S-Plus) language. Indeed much of the recent development of statistical genetics is based on the R programming language and environment. This course provides an introduction to programming in the R language and it's applications to applied statistical problems. Prerequisite: Corequisite: Some previous exposure to computer programming. Some basic statistics at the Applied Regression or Applied Design level and permission of instructor. LEC.

BIOS 825. Nonparametric Methods. 3 Hours.
This course is an introduction to nonparametric statistical methods for data that do not satisfy the normality or other usual distributional assumptions. We will cover most of the popular nonparametric methods used for different scenarios, such as a single sample, two independent or related samples, three or more independent or related samples, goodness-of-fit tests, and measures of association. Power and sample size topics will also be covered. The course will cover the theoretical basis of the methods at an intermediate mathematical level, and will also present applications using real world data and statistical software. Prerequisite: Permission of instructor. LEC.

BIOS 830. Experimental Design. 3 Hours.
The emphasis of this course is on learning the basics of experimental design and the appropriate application and interpretation of statistical
analysis of variance techniques. Prerequisite: Permission of instructor, BIOS 820 recommended. LEC.

**BIOS 833. Sampling Methods. 3 Hours.**
Students will be introduced to the design and analysis techniques when sampling from finite populations using simple, stratified, multistage, systematic, and complex sampling designs. Prerequisite: Corequisite: BIOS 830 and BIOS 872 or by permission of instructor. LEC.

**BIOS 835. Categorical Data Analysis. 3 Hours.**
This course provides an understanding of both the mathematical theory and practical applications for the analysis of data for response measures that are ordinal or nominal categorical variables. This includes univariate analysis, contingency tables, and generalized linear models for categorical response measures. Regression techniques covered for categorical response variables, such as logistic regression and Poisson regression methods, will include those categorical and/or continuous explanatory variables, both with and without interaction effects. Prerequisite: By permission of instructor; BIOS 820 and BIOS 840 are recommended. LEC.

**BIOS 840. Linear Regression. 3 Hours.**
This course is an introduction to model building using regression techniques. We will cover many of the popular topics in Linear Regression including: simple linear regression, multiple regression, model selection and validation, diagnostics and remedial measures. Throughout the semester, we will be utilizing primarily SAS. Prerequisite: By permission of the instructor. LEC.

**BIOS 845. Survival Analysis. 3 Hours.**
This course provides an understanding of both the mathematical theory and practical applications for the analysis of data with censoring. This includes univariate analysis, group comparisons, and regression techniques for survival analysis. Parametric and semi-parametric regression techniques covered will include those with categorical and/or continuous explanatory variables, both with and without interaction effects. Prerequisite: Corequisite: BIOS 820, 835, 840, and 871, or by permission of instructor. LEC.

**BIOS 850. Multivariate Statistics. 3 Hours.**
This course will introduce the theory and methods of applied multivariate analysis. As the field of multivariate analysis is very wide and well developed, the course will focus on those methods that are more frequently used in biostatistical applications. Some knowledge of basic matrix algebra is necessary and will be reviewed as the course progresses. Theoretical exercises and analysis of data sets will be assigned to the student. Emphasis will be on biostatistical applications. Prerequisite: Corequisite: BIOS 820, 835, 840, and 871, or by permission of instructor. LEC.

**BIOS 855. Statistical Methods in Genomics Research. 3 Hours.**
This survey course will provide a high-level introduction to various statistical and bioinformatics methods involved in the study of biological systems. In particular, this course will provide an overview of the analytical aspects involved in: the study DNA, RNA, and DNA methylation data measured from both microarray and next-generation sequencing (NGS) technologies. This course will be held in a block format with 4 hours of lectures a day for two weeks (one week in June and one week in July), with readings and homework assignments assigned throughout the summer semester. During the last week of the summer semester, students will be required to participate in a group seminar session in which they will present the results from their assigned genomics projects. Prerequisite: BIOS 820 OR experience programming in a higher level programming language; BIOS 840; OR by permission of the instructor. LEC.

**BIOS 871. Mathematical Statistics. 3 Hours.**
This course introduces the fundamentals of probability theory, random variables, distribution and density functions, expectations, transformations of random variables, moment generating functions, convergence concepts, sampling distributions, and order statistics. Prerequisite: By permission of instructor. LEC.

**BIOS 872. Mathematical Statistics II. 3 Hours.**
This course introduces the fundamentals of statistical estimation and hypothesis testing, including point and interval estimation, likelihood and sufficiency principles, properties of estimators, loss functions, Bayesian analysis, and asymptotic convergence. Prerequisite: BIOS 871 or by permission of instructor. LEC.

**BIOS 880. Data Mining and Analytics. 3 Hours.**
Students will be introduced to common steps used in data mining, such as accessing and assaying prepared data; pattern discovery; predictive modeling using decision trees, regression, and neural networks; and model assessment methods. Prerequisite: Corequisite: BIOS 820, 830, 835, 840, and 871, or by permission of instructor. BIOS 820 and 850 recommended. LEC.

**BIOS 889. Collaborative Research Experience. 3 Hours.**
This course provides students with experience in collaborative research under the supervision of an experienced researcher. The student will spend one semester working under an investigator or faculty member, making independent contributions to a research project. Prerequisite: Corequisite: BIOS 820, 830, 835, 840, and 871, or by permission of instructor. LEC.

**BIOS 900. Linear Models. 3 Hours.**
This course introduces the theory and methods of linear models for data analysis. The course includes the theory of general linear models including regression models, experimental design models, and variance component models. Least squares estimation, the Gauss-Markov theorem, and less than full rank hypotheses will be covered. Prerequisite: Corequisite: BIOS 871 and BIOS 872 or by permission of instructor; BIOS 820 recommended. LEC.

**BIOS 902. Bayesian Statistics. 3 Hours.**
This course introduces Bayesian theory and methods for data analysis. The course includes an overview of the Bayesian approach to statistical inference, performance of Bayesian procedures, Bayesian computational issues, model criticism, and model selection. Case studies from a variety of fields are incorporated into the course. Implementation of models using Markov chain Monte Carlo methods is emphasized. Prerequisite: Corequisite: BIOS 871 and 872 or by permissions of instructor; BIOS 820 recommended. LEC.

**BIOS 905. Theory of Statistical Inference. 3 Hours.**
This course covers advanced aspects of statistical inference. It is aimed at preparing Ph.D. BIOS students for the Ph.D. comprehensive exam and will emphasize advanced biostatistical ideas as well as problem solving techniques. Prerequisite: Corequisite: BIOS 871 and BIOS 872 or equivalent and permission of instructor. LEC.
BIOS 906. Advanced Special Topics in Biostatistics. 1-3 Hours.
This course allows exploration of special topics that are not routinely a part of the Biostatistics PhD curriculum. Prerequisite: Passing grade on the PhD Qualifying exam. Permission of the instructor, LEC.

BIOS 908. Advanced Clinical Trials. 3 Hours.
This course provides an introduction to recent innovations in clinical trial designs and analysis methods. Topics include concepts of controls, randomization, and sample size calculations; interim analysis; and adaptive clinical trials. Traditional frequentist and likelihood approaches to clinical trial design and analysis will be covered in the first half of the course. The Bayesian approach (excluding adaptive clinical trial designs) will be emphasized in the second half of the course. Prerequisite: BIOS 810, BIOS 820, BIOS 830, BIOS 835, BIOS 840, BIOS 821 recommended. Permission of the Instructor, LEC.

BIOS 910. Generalized Linear Models. 3 Hours.
This course on Generalized Linear Models (GLM) is designed for both the applied and theoretical statistician. In this course we introduce the theoretical foundations and key applications of generalized linear models. Prerequisite: BIOS 835, BIOS 840, and BIOS 900 or by permission of instructor. LEC.

BIOS 911. Nonlinear Models. 3 Hours.
This course will involve both theory and applications of nonlinear models, with emphasis in biological, medical, and pharmaceutical research. Topics to be covered include dose-response studies, bioassay studies and clinical pharmacokinetics and pharmacodynamics studies will be discussed. Nonlinear mixed effects models will also be examined, as well as criteria for optimal experimental designs based on nonlinear models. This course will cover the theoretical basis of the methods at an intermediate mathematical level, and will also present applications using real world data and statistical software. Prerequisite: BIOS 900 or equivalent and permission of instructor, LEC.

BIOS 915. Longitudinal Data Analysis. 3 Hours.
A longitudinal study is a research study that involves repeated observations of the same individuals and events over extended periods of time. It is typically a type of observational study, though it may have design components. In medical settings these studies and related models are used to observe the developmental path of a disease or treatment through time. Often this is in the context of follow-up and long-term study of both progress and potential side-effects. As the study involves the same individuals (subject to drop-out) through several time points, statistical methods must employ random effects or "mixed models" incorporating various correlation structures. This is typically done using generalized estimating equations and marginal model approaches. Bayesian methods may also be appropriate here. Students will, after completing this course, be able to design and analyze longitudinal studies. The computer package to be employed is SAS. Prerequisite: BIOS 820, BIOS 830, BIOS 840, BIOS 871, BIOS 872, and BIOS 900 or by permission of instructor. LEC.

BIOS 920. Latent Variable Analysis. 3 Hours.
Latent variables refer to random variables whose realization values are not observable or cannot be measured without error, and their inferences rely on statistical models connecting latent and other observed variables. This course aims to introduce a family of such statistical models and their applications in biomedical and public health research. The course is designed as an elective course for students in the Biostatistics graduate program. We will use the statistical packages of M-plus, R, and/or SAS for the course. Prerequisite: BIOS 835 and BIOS 900, or by permission of instructor. Familiarity with vectors and matrices is strongly encouraged. LEC.

BIOS 999. Doctoral Dissertation. 1-9 Hours.
Preparation of the doctoral dissertation based upon original research and partial fulfillment of the requirements for the Ph.D. degree. Credits will be given only after the dissertation has been accepted by the student's dissertation committee. Prerequisite: Successful completion of the Department of Biostatistics Ph.D. Comprehensive Exam and consent of advisor, LEC.

Master of Science in Biostatistics

The Biostatistics M.S. and Ph.D. programs were created to help meet the ever-increasing demand for biostatisticians to take leadership roles in careers as researchers and educators in academia, government, and industry. Faculty members are active researchers collaborating and consulting in research projects and initiatives at the Medical Center, in addition to pursuing their own research agendas and participating in curricular instruction. Expertise in the department includes linear, nonlinear, and longitudinal modeling; clinical trial and experimental design; survival analysis; categorical data analysis; robust statistics; psychometric methods; and Bayesian methodology.

The master's program in Biostatistics produces graduates that are prepared to function as biostatisticians or biostatistical consultants. Therefore, graduates gain an extensive understanding of biostatistical theory and practice and should be proficient in the application of statistical methods to one or more areas in the health sciences. At the completion of the M.S. degree in Biostatistics the graduate should be able to:

1. Demonstrate a broad knowledge and understanding of statistical theory and practice as applicable in the health sciences.
2. Function as a collaborator on a research team.
3. Take a leadership role in the design and implementation of a health science project.
4. Assume responsibility for the design and implementation of analyses for health science investigations.
5. Assist with the design and implementation of data management systems for large health science studies.
6. Prepare reports and publications resulting from health science studies.
7. Serve as an advocate for good statistical design in health science investigations.

The application process for the M.S. in Biostatistics is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website. Students are admitted for the fall semester only. Applications for the fall semester must be received by February 1st for consideration.

Admission requirements:

- A bachelor's degree in statistics, biostatistics, mathematics or applied mathematics from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement.
- A background check is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.
- Letter grade of "B" or better in Calculus I, II, & III (or the equivalent.)
- Successful completion of at least one of the following courses: linear algebra, differential equations, numerical analysis.
- Successful completion of a course in any computer programming language.
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- A current resume or curriculum vitae.
- A personal statement regarding your interest in biostatistics and in biomedical research.
- A personal interview is required of all applicants who meet the minimum admissions standards. If travel to the area is impossible, a telephone or on-line interview may be substituted.

Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

The M.S. in Biostatistics degree program consists of 36 credit hours including collaborative research experience, annual evaluations, and the successful completion of the master's general examination. The course plan consists of 27 credit hours from required biostatistics core courses which includes 3 credit hours of Collaborative Research Experience. This requirement ensures the completion of a research component through collaborative effort within or external to the department. Students also complete 9 credit hours of elective coursework.

### Degree requirements:

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed.
- Completion of a minimum of 36 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Enrollment in a minimum of one credit hour the semester the student will graduate.
- Successful completion of a general examination (p. 2313) the semester the student will graduate. The general examination is given upon completion of the following courses: BIOS 820, BIOS 830, BIOS 835, BIOS 840, BIOS 871 and BIOS 872. The examination has three purposes: to assess the student's strengths and weaknesses; to determine whether the student should be awarded the M.S. degree; and, if it is a degree goal, to determine whether the student is prepared to continue into the Ph.D. program (p. 1983).
- Successful completion of the following Biostatistics courses:

- Successful completion of a minimum of 9 credit hours of elective coursework. Specific courses are determined in consultation with the student's advisor.
  - Successful completion of a minimum of 3 credit hours (maximum of 6) of elective coursework from courses offered by the department.
  - Successful completion of a minimum of 3 credit hours (maximum of 6) of elective coursework from courses offered outside the department.
  - Students may take up to 12 credit hours of equivalent coursework under the STAT prefix. Courses considered equivalent include STAT 805, STAT 820, STAT 821, STAT 830, STAT 840, STAT 850, and STAT 880.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

### Annual Evaluations:

Students are evaluated each May by their graduate advisors and the director of the graduate program. These evaluations provide feedback to the student regarding the progress they are making in meeting program requirements, classroom performance, and research performance.

The Master of Science in Applied Statistics and Analytics is offered by the Department of Biostatistics located at the University of Kansas Medical Center. This specific program is offered on the University of Kansas-Edwards campus. Graduates are provided with hands-on statistical computing skills emphasizing proper application and problem solving and are prepared for careers in the rapidly growing fields of statistics, biostatistics and data analytics. Many of the most employable graduate degrees involve statistics. In response to workforce demand for knowledge and skillset in data analytics and statistics, students enrolled in this degree program may choose from one of two areas of emphasis:

- **Data Analytics Emphasis** will provide graduates with experience working with and analyzing large datasets using several of the most common statistical software tools.
- **Statistics Emphasis** will provide hands-on statistical computing in the context of statistical methods commonly applied in industry and government agencies.

**Characteristics of Graduates**

Upon completion of the MS in Applied Statistics and Analytics, the student should be prepared to immediately function as a statistician and/or analyst. Therefore the student must have an understanding of the statistical theory underlying the methods most in-demand in the workforce and should be proficient in the application of statistical methods within their field. Graduates of this program should be able to:

1. Demonstrate an understanding of statistical theory and practice.
2. Function as a collaborator on a project team.
3. Demonstrate proficiency in industry-standard statistical software.
4. Assume responsibility for the design and implementation of analyses for projects within his or her field.
5. Assist with the design and implementation of data management systems for projects within his or her field of application.
6. Prepare reports and publications resulting from said projects.
7. Effectively communicate the principles of statistics and analytics with his or her peers with varying statistical backgrounds.
8. Serve as an advocate for good statistical design and practice.

The application process for the M.S. in Applied Statistics and Analytics is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics website. Students may be admitted to begin the fall, spring or summer semester. For applications to be considered, they must be received for the fall semester by August 1, for the spring semester by January 1 and for the summer semester by May 1.

**Admission requirements:**

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement.
- A background check is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.
- Successful completion with a B average or higher of Calculus I and II (i.e. single variable differentiation and integration or equivalent). Completion of Calculus III (i.e. multivariable) is preferred but not required.
- Successful completion of a course in any computer programming language.
- Three letters of recommendation from a faculty member, advisor, employer or other person familiar with the applicant's work and character. The recommendations may not be obtained from family members, friends, etc.
- A personal statement describing your career goals and your interest in the program.
- A current resume or curriculum vitae listing scholarships/fellowships, awards and history of employment.

Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, the program may defer an applicant's admission for one year after which time the applicant must submit a new application.

**Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.**

The M.S. in Applied Statistics and Analytics degree program consists of 30 credit hours. Students choose an emphasis area in either data analytics or statistics. Each emphasis area consists of a common foundation of 15 credit hours of statistics courses in addition to the 6 credit hours specific to the emphasis and 9 credit hours of related elective courses.
Degree requirements:

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed.

- Completion of a minimum of 30 credit hours.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- No more than two grades of C are allowed in courses required for the degree.

- Enrollment in a minimum of one credit hour the semester the student will graduate.

- Successful completion of a general examination (p. 2313) the semester the student will graduate. This is a comprehensive examination that is administered during the final semester of enrollment after successful completion of the required methods coursework including STAT 820, STAT 830, and STAT 871. The examination has two purposes: 1) to assess the student's strengths and weaknesses and 2) to determine whether the student should be awarded the MS degree. The examination is created and administered by a committee of at least three members of the Department Graduate Faculty. If this examination is failed, subject to committee approval, a second examination may be taken no sooner than three months later. The committee can recommend that the student leave the program following the semester in which the examination is taken. After two failures, no further examination is permitted and the student will not be awarded the degree.

- Successful completion of the following courses:

  - Foundation courses (minimum of 15 credit hours.)
    - STAT 805 Professionalism, Ethics and Leadership in the Statistical Sciences 3
    - STAT 820 Statistical Computing/SAS Base L1 3
    - STAT 830 Experimental Design 3
    - STAT 840 Linear Regression 3
    - STAT 871 Mathematical Statistics 3
    **Total Hours** 15

  - Emphasis courses (minimum of 6 credit hours.)
    **Data Analytics Emphasis (6)**
    - STAT 880 Data Mining and Analytics 3
    - STAT 823 Introduction to Programming and Applied Statistics in R 3
    or STAT 850 Multivariate Statistics
    or STAT 855 Statistical Methods in Genomics Research
    **Total Hours** 12

  - Elective courses (minimum of 9 credit hours.) Specific courses are determined in consultation with the student's advisor.

  - Successful completion of a minimum of 6 credit hours of elective coursework selected from master level statistics courses offered by the department.

  - Successful completion of a minimum of 3 credit hours of elective coursework. Any course taken for elective credit external to the department must be approved by the department's curriculum committee for the master's programs.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

Annual Evaluations:

Students are evaluated each May by their faculty advisor and Program Chair. These evaluations provide feedback to the student regarding the progress that they are making toward the degree.

Typical Plan of Study

Students may choose to pursue one of two emphasis areas for the MS in Applied Statistics and Analytics degree. The emphasis areas were developed based on the knowledge and skillset demanded by the workforce.

- **Data Analytics Emphasis** will provide graduates with experience working with and analyzing large datasets using several of the most common statistical software tools.

- **Statistics Emphasis** will provide hands-on statistical computing in the context of statistical methods commonly applied in industry and government agencies.

Below is the typical plan of study based on which emphasis is chosen.

Doctor of Philosophy in Biostatistics

The biostatistics M.S. and Ph.D. programs were created to help meet the ever-increasing demand for biostatisticians to take leadership roles in careers as researchers and educators in academia, government, and industry. Faculty members are active researchers collaborating and consulting in research projects and initiatives at the Medical Center, in addition to pursuing their own research agendas and participating in curricular instruction. Expertise in the department includes linear, nonlinear, and longitudinal modeling; clinical trial and experimental design; survival analysis; categorical data analysis; robust statistics; psychometric methods; and Bayesian methodology.

The Ph.D. program produces biostatisticians who can develop biostatistical methodology that can be used to solve problems in public health and the biomedical sciences. In addition, graduates are prepared to apply biostatistical and epidemiology methodology for the design and analysis of public health and biomedical research investigations. Finally, graduates are well suited to function as collaborators or team leaders on research projects in the biomedical and public health sciences.

In addition to the characteristics outlined in the M.S. section of this proposal, graduates of the Ph.D. program in Biostatistics will have:

1. The ability to develop careers in academia, research institutes, government, and industry;
2. A broad understanding of current statistical methods and practices in the health sciences;
3. A solid theoretical training necessary for the development and study of new statistical methods;
4. The ability to assume all responsibilities of a statistician in collaborative health science research; in particular, the graduate will have experience in the design, data management, analysis, and interpretation of a variety of experimental and observational studies;

Experience in writing reports and giving oral presentations describing health science studies.

The application process for the Ph.D. in Biostatistics is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website. Students are admitted for the fall semester only. Applications for the fall semester must be received by February 1st for consideration.

Admission requirements:

- A master's degree in statistics, biostatistics, mathematics or applied mathematics from a regionally accredited institution or a terminal degree (M.D., Ph.D.) in another field with approval from the program. Students not meeting this criteria should apply to the M.S. program (p. 1979). Completion of degree is documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement.

- A background check is required during the admission process; it may affect the student's eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.

- A letter grade of a B or better in Calculus I through III (or equivalent.)

- Successful completion of at least one of the following courses: linear algebra, differential equations, numerical analysis.

- Successful completion of a course in any computer programming language.

- Research experience (beyond labs associated with lecture courses) is strongly suggested.

- Three letters of recommendation.

- A personal statement regarding your interest in biostatistics and in biomedical research.

- A current resume or curriculum vitae.

- A personal interview is required of all applicants who meet the minimum admissions standards. If travel to the area is impossible, a telephone or on-line interview may be substituted.

Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.
Doctor of Philosophy in Biostatistics

The typical program consists of 63 credit hours including collaborative research experience, annual evaluations, graduate examinations, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty.

Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D. The typical course plan consisting of 63 credit hours is designed for students who have not previously completed a M.S. in biostatistics or directly relevant area. The course plan for a student who has previously completed a M.S. in biostatistics or directly relevant area is customized to account for master’s-level courses already taken; therefore the total credit hours required will vary.

Degree requirements:

- Degree requirements are normally completed within 4 years of admission to the program although a maximum of 8 years is allowed.

- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.

- Successful completion of the Qualifying Examination. The qualifying examination is given upon completion of the following courses (or equivalent): BIOS 820, BIOS 830, BIOS 835, BIOS 840, BIOS 871 and BIOS 872. The examination has two purposes 1) to assess the student’s strengths and weaknesses and 2) determine whether the student is sufficiently prepared to continue in the Ph.D. program.

- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2313) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  
  - Successful completion of BIOS 898 Collaborative Research Experience (or equivalent) meets the Research Skills requirement.

- Successful completion of BIOS 805 Professionalism, Ethics and Leadership in the Statistical Sciences and/or documented participation in the Biostatistics Graduate Students Association Seminar Series and completion of the KUMC Human Subjects Protection training module meets this requirement. Student must keep their certification current throughout their tenure in the Ph.D. program.

- Successful completion of the Residence Requirement (p. 2313) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.

- Successful completion of the Oral Comprehensive Examination (p. 2313). The comprehensive examination is typically given when a doctoral aspirant has completed the major portion of the course work at a satisfactory level and met all other prerequisites to the comprehensive examination. The examination assesses the student’s strengths and weaknesses and determines whether the student should continue in the Ph.D. program. There is both a written component to the exam and a subsequent presentation and defense of a dissertation proposal. Students are recognized as formal candidates for the Ph.D. only after they have passed the comprehensive examination.

- Successful completion of Post-Comprehensive Enrollment (p. 2313) requirement.

- Enrollment in a minimum of one credit hour of dissertation BIOS 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.

- Successful completion of the Final Oral Examination (p. 2313) (dissertation defense.) The candidate must present a dissertation showing the planning, conduct, and results of original research and scholarly activity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities as well as to demonstrate an intensive focus on a problem or research area. This work is carried out under the guidance of a dissertation advisor. When the completed dissertation has been accepted by the dissertation committee in final draft form and all other degree requirements have been satisfied the chair of the committee requests (at least 3 weeks before the date of the examination) Graduate Studies approval to proceed with the final oral examination.

- Successful Dissertation Submission and Publication (p. 2313) (according to Office of Graduate Studies policy.)

- Successful completion of the following Biostatistics courses (or equivalent):

- Students may take up to 12 credit hours of equivalent coursework under the STAT prefix. Courses considered equivalent include STAT 805, STAT 820, STAT 821, STAT 830, STAT 840, STAT 850, and STAT 880.

- Successful completion of any elective coursework as determined in consultation with the student's advisor.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

Annual Evaluations:

Students are evaluated each May by their graduate advisors and the director of the graduate program. These evaluations provide feedback to the student regarding the progress they are making in meeting program requirements, classroom performance, and research performance.

Statistical Applications Graduate Certificate

The Statistical Applications Graduate Certificate is awarded to those who have demonstrated specialized knowledge in a scientific field, but not to the level required by a postgraduate master’s degree. The Graduate Certificate in Statistical Applications requires individuals to acquire sufficient knowledge and expertise to permit them to work at the frontier of their field through:

1. Becoming familiar with statistical methods in research, business, and industry.
2. Becoming excellent consumers of the literature where statistical applications are utilized.
3. Applying many of the common statistical methods to complement his or her every day job duties. Course work in this proposal is designed with this purpose in mind.

Upon completion of the Graduate Certificate in Statistical Applications, the student should be prepared to apply many of the common statistical methods to complement his or her every day job duties. Therefore the student must have a basic understanding of statistical practice and should be proficient in the application of common statistical methods to one or more areas application. Upon completion of the Graduate Certificate in Statistical Applications program the student should be able to:

1. Demonstrate a basic knowledge and understanding of the applications of some of the more common statistical methods.
2. Function as a collaborator on a research team.
3. Critically evaluate the literature where statistical applications are used.
4. Take a leadership role in the implementation of a research project.
5. Prepare reports and publications resulting from research studies.
6. Serve as an advocate for proper statistical application and interpretation of results in his or her field.

The application for the Statistical Applications Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website.

Admission requirements:

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student’s eligibility to enter the program.
- A letter grade of B or better in calculus I (or equivalent), or a quantitative GRE score in the 70th percentile or higher.
- A letter grade B or better in a graduate-level introductory statistics course (e.g., BIOS 717 Fundamentals of Biostatistics II or equivalent.)

Note: Students not meeting this requirement may fulfill the requirement with completion of BIOS 717.

- Students currently enrolled in graduate programs at KUMC or KU must be in good standing (3.0 or higher GPA) and have a letter
of approval from their current graduate program director and/or department chair indicating support to enroll in the certificate program. Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs».

Certificate Program Information:
No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral.

Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements:
• Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of 4 years is allowed.
• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate certificate coursework.
• Enrollment in a minimum of one (1) credit hour the semester program is completed. Graduate certificates may not be granted retroactively.
• Completion of a minimum of 12 credit hours of coursework in statistical applications.

The Statistical Applications Graduate Certificate requirements vary depending on whether the certificate student is currently seeking a post-graduate degree at any of the KU campuses or not. The certificate program consists of a minimum of 12 credit hours of coursework in statistical applications.

Certificate requirements:
• Certificate students not currently seeking a KU post-graduate degree must complete the following two (2) courses:
  BIOS 720 Analysis of Variance 3
  BIOS 730 Applied Linear Regression 3

• Certificate students not currently seeking a KU post-graduate degree must complete two (2) elective courses from the following list:
  BIOS 715 Introduction to Data Management using RedCap and SAS 3
  BIOS 725 Applied Nonparametric Statistics 3
  BIOS 735 Categorical Data and Survival Analysis 3
  BIOS 740 Applied Multivariate Methods 3
  BIOS 799 Introduction to Statistical Genomics 3

Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years’ catalogs».

**Admission requirements:**

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.
- Letter grade of B or better in calculus I – III (or equivalent.)
- Successful completion of at least one of the following courses: linear algebra, differential equations, numerical analysis.
- Successful completion of a course in any computer programming language.
- Three letters of recommendation.
- Students currently enrolled in graduate programs at KUMC or KU must be in good standing (3.0 or higher GPA) and have a letter of approval from their current graduate program director and/or department chair indicating support to enroll in the certificate program.

Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. *Other years' catalogs*.

**Certificate Program Information:**

No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral.

Graduate credit from another institution may not be transferred to a graduate certificate program.

The Biostatistics Graduate Certificate program consists of a minimum of 15 credit hours of statistical coursework that is comprised of 9 credit hours of required coursework and 6 credit hours of elective coursework.

**Certificate requirements:**

- Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of 4 years is allowed.
- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate certificate coursework.
- Enrollment in a minimum of (1) credit hour the semester program is completed. Graduate certificates may not be granted retroactively.
- Completion of a minimum of 15 credit hours.
- Successful completion of the following Biostatistics courses:
  - BIOS 830   Experimental Design
Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

| Total Hours: 9 |

This Plan of Study shows the 9 credit hours of required courses and shows which semester a specific elective is offered. In addition to the required courses, select two (2) elective courses for a minimum of 6 credit hours in order to meet the 15 credit hour minimum requirement for completion of the Biostatistics Graduate Certificate program.

---

### Department of Cancer Biology

The Department of Cancer Biology is a newly developed basic science department in the School of Medicine at the University of Kansas Medical Center. The missions of our department are:

1. To build a strong team of basic researchers with a collaborative and translational mindset who will discover fundamental characteristics of cancer cells that can lead to novel therapeutic and preventive approaches which reduce cancer incidence, morbidities and mortality;
2. To understand the molecular genetic and epigenetic, biochemical, cellular and physiologic bases of cancer etiology and progression;
3. To understand the interactions between tumor cells and the microenvironments in which they find themselves;
4. To educate the next generation of cancer researchers, clinicians and patients;
5. To apply, as quickly as possible, fundamental research discoveries to patient care.

Our department is funded by grants from the National Cancer Institute, National Institutes of Health, American Cancer Society, Susan G. Komen for the Cure, the National Foundation for Cancer Research and from generous donations from patients, family and friends of the KU Cancer Center.

The Department of Cancer Biology is the home department for multi-departmental and institutional MS and PhD graduate programs. Students can choose from any funded graduate faculty member whose lab is doing cancer research in the KU Cancer Center. Details regarding admission and degree requirements for the M.S. (p. 1992) and Ph.D. (p. 1989) programs can be found on their respective catalog pages.

### Courses

**CBIO 800. Mechanisms of Tumor Development and Progression: Colloquium Format. 3 Hours.**

This 3 credit course is offered in the fall semester every year. This course examines the genetic alterations and cellular phenotypes involving cancer development in a practical manner. The course discusses the underlying molecular and biological principles that result from these genetic alterations and the methods/approaches to examine cancer phenotypes. By the end of the course, students should understand how cancer develops and how to design experiments to address different scientific hypotheses. In addition, students are expected to learn key points regarding how to prepare and give scientific presentation. The class will involve two, 1.5-hour lecture per week: one consists of didactic lecture by a faculty member and the other is student-led journal club related to the lecture topic. Prerequisite: College level biology. LEC.

**CBIO 820. Cellular and Molecular Mechanisms of Signal Transduction in Cancer: Colloquium. 2 Hours.**

This elective course will be offered in the spring semester every year. This course will be full of discussions on the importance of targeting signaling pathways in cancer through didactic teaching following student led discussion on the topic. The course discusses the underlying responses on signaling mechanisms in different cancers. The major theme is an understanding of how cancer cells receive, transmit and respond to environmental signals. Topics will include different complexity in signal transduction in cancer. There will be a series of lectures on the topics of signal transduction, cell cycle regulation, apoptosis and cancer. Each
The University of Kansas

**Doctor of Philosophy of Cancer Biology**

The Ph.D. program in Cancer Biology (CBIO) prepares the student for a career in independent research and/or teaching. The Ph.D. is typically followed by postdoctoral training in a specific field of study. Graduates of this program will be prepared for positions in industry, government, and consulting, as well as faculty positions at the college, university, and medical/graduate school level. Students mentored by CBIO faculty currently hold positions in academia, biotechnology, pharmacology, government, and scientific writing.

Students that obtain a Ph.D. in Cancer Biology are required to achieve the following expectations:

- Become knowledgeable in the areas of study included in the IGPBS (p. 2042) (Interdisciplinary Graduate Program in the Biomedical Sciences) core curriculum;
- Obtain in-depth and up-to-date expertise in a specialized area of knowledge that is appropriate for the field of your dissertation research project;
- Make original, high quality and publishable contributions to the scientific literature in your chosen research field;
- Become familiar with the scientific literature through general and specialized journals in biological research, and to develop the ability to critically evaluate the original research in your own and related fields;
- Become skilled in organizing and communicating information in oral presentations, and to respond to critical questioning;
- Develop clarity, conciseness, and precision in writing, to aid in grant application writing and publication of your original research results;
- To learn how to ask incisive scientific questions and gain experience in the design, performance and interpretation of laboratory experiments and observations.
- To gain familiarity with the preparation and writing of grant applications. (It is expected that all CBIO students identify available fellowship opportunities and apply as appropriate.)
- To prepare for the teaching as well as the research aspects of an academic career.
- To obtain instruction in research skills and responsible scholarship.

The faculty in this program have diverse research interests ranging from genetics/genomics, signaling (including, regulatory RNA, cell cycle, hormonal regulation of cancers), tumor-host interactions in carcinogenesis and metastasis, tumor immunology, preclinical research, pharmacology and drug resistance. The curriculum is flexible enough to allow students to pursue areas of special interest while maintaining breadth and rigor of cancer biology knowledge.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (http://catalog.ku.edu/medicine/graduate-program-biomedical-sciences) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission Requirements:**

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English
programs of study leading to the Ph.D. prior graduate work is taken into consideration in setting up individual culminates in a final dissertation examination consisting of an oral successful completion of a doctoral dissertation. In most cases, use the catalog of the year student entered the program. Other years' catalogs». The CBIO program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree requirements:

- Degree requirements are normally completed within 4 to 6 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2313) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
  - Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2313) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2313). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination. For this examination, students must: exhibit the potential for original scientific thought; be familiar with the relevant literature and be able to identify significant research questions in their field; have a good understanding of the underlying principles of the experimental methodologies proposed; show an ability to critically analyze data and to anticipate experimental outcomes; and, have a good fund of knowledge of cancer biology and be proficient in the 2-3 core areas most closely related to their dissertation research.
- Successful completion of the Post-Comprehensive Enrollment (http://catalog.ku.edu/graduate-studies/kumc/#programstext) requirement.
- Enrollment in a minimum of one (1) credit hour of CBIO 999 Dissertation for Ph.D. in Cancer Biology the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (http://catalog.ku.edu/graduate-studies/kumc/#programstext) (dissertation defense). The dissertation should be comparable in scope to justify co-authorship on a rigorously peer-reviewed manuscript. Students qualifying for a CBIO PhD degree must have at least one accepted first-author peer-reviewed research publication at the time of defense and a second submitted first author publication. The Student’s Advisory Committee can petition the CBIO Director and Graduate Advisory Committee for a waiver of these requirements if the scope and impact of the first author published report is deemed of sufficient merit (such a waiver is expected to be an exception, not commonplace). The Student’s Advisory Committee can also petition the CBIO Director and Graduate Advisory Committee for a waiver if the student’s work is deemed of sufficient merit to warrant acceptance in a scientific journal, even if it has not yet been accepted at the time of the student’s dissertation defense.
- Successful Dissertation Submission and Publication (http://catalog.ku.edu/graduate-studies/kumc/#programstext) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (http://catalog.ku.edu/medicine/graduate-program-biomedical-sciences) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4
  - Successful completion of the following Cancer Biology courses:
    - CBIO 800 Mechanisms of Tumor Development and Progression: Colloquium Format 3
    - CBIO 850 Cancer Center Seminar (Fall and Spring Years 2-3 and Fall Year 4) 1
    - CBIO 860 Communicating Cancer Science (Fall and Spring Years 2-3 and Fall Year 4) 1
    - CBIO 900 Carcinogenesis and Cancer Biology 3
    - CBIO 990 Research for Ph.D. in Cancer Biology 1-15
    - CBIO 999 Dissertation for Ph.D. in Cancer Biology 1-10
- Successful completion of PATH 913 Introduction to Grant Proposal Writing.
• Successful completion of a course in fundamentals of biostatistics and/or informatics approved by the student’s Academic Advisor and Graduate Director.

• Successful completion of advanced elective coursework as determined in consultation with the student’s advisor. Electives may be chosen from this list but are not limited to:

**Cancer Biology courses (3)**
- CBIO 820 Cellular and Molecular Mechanisms of Signal Transduction in Cancer: Colloquium 2
- CBIO 830
- CBIO 870 Analysis of Scientific Papers 1

**Other Department courses (39)**
- ANAT 845 Graduate Histology 3
- ANAT 868 Advanced Developmental Biology 2
- BCHM 808 Methods for Analyzing Biomolecules 3
- BCHM 922 Advanced Molecular Genetics 3
- BCHM 923 Protein Structure and Function 3
- BIOS 714 Fundamentals of Biostatistics I 3
- BIOS 717 Fundamentals of Biostatistics II 3
- DN 884 Diet, Physical Activity & Cancer 3
- MICR 805 Teaching in Higher Education 3
- MICR 808 Immunology 3
- PATH 803 Stem Cell Biology 2
- PATH 804 Selected Topics in Signal Transduction 1
- PATH 806 Epigenetics 2
- PHCL 761 General Principles of Pharmacology 1
- PHCL 765 Chemotherapy 1
- PHSL 843 Physiology of Disease 3

• Continued attendance at the KUCC seminar (minimum 75% required determined by sign-in) in both the Fall and Spring semesters after completing 5 semesters of CBIO 850 Cancer Center Seminar.

• Annual presentation and continued attendance at Communicating Cancer Science in both the Fall and Spring semesters after completing 5 semesters of CBIO 860 Communicating Cancer Science.

• Presentation at a regional/national/international meeting at least once prior to final dissertation defense.

• Annual participation and/or attendance at the KU Medical Center Student Research Forum.

• Annual participation and/or attendance at the KU Cancer Center Research Retreats.

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (p. 2050) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. *Other years’ catalogs*.

Master of Science in Cancer Biology

The Master of Science in Cancer Biology program prepares students for a career at the advanced technical level in academia, industry, or government. Graduating students may also find teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://catalog.ku.edu/graduate-studies/kumc/#admissiontext).
- A background check (http://catalog.ku.edu/graduate-studies/kumc/#admissiontext) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

The Master of Science (M.S.) program in Cancer Biology prepares the student for a career at the advanced technical level in academia, industry, or government.

Degree requirements:

- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 7 years is allowed.
- Completion of a minimum of 30 credit hours.
- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.
- Enrollment in a minimum of one (1) credit hour of CBIO 899 Master's Thesis in Cancer Biology the semester the student will defend the thesis and graduate.
- Successful completion of the thesis defense (http://catalog.ku.edu/graduate-studies/kumc/#ThesisDefense) the semester the student will graduate. The thesis should be comparable in scope to justify co-authorship on a rigorously peer-reviewed manuscript. In general, CBIO students graduating with an MS degree should have justified co-authorship on at least one peer-reviewed publication (as determined by their thesis advisory committee).
- Successful Thesis Submission and Publication (http://catalog.ku.edu/graduate-studies/kumc/#ThesisSubmission) (according to Office of Graduate Studies policy.
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (http://catalog.ku.edu/medicine/graduate-program-biomedical-sciences) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4
- Successful completion of the following Cancer Biology courses:
  - CBIO 800 Mechanisms of Tumor Development and Progression: Colloquium Format 3
  - CBIO 850 Cancer Center Seminar 1
  - CBIO 860 Communicating Cancer Science 1
  - CBIO 890 Master's Research in Cancer Biology 1-10
  - CBIO 900 Master's Thesis in Cancer Biology 1-10
  - CBIO 900 Carcinogenesis and Cancer Biology 3
- Successful completion of PATH 913 Introduction to Grant Proposal Writing.

- Successful completion of advanced elective coursework as determined in consultation with the student's advisor. Electives may be chosen from this list but are not limited to:
  - Cancer Biology courses (3)
    - CBIO 820 Cellular and Molecular Mechanisms of Signal Transduction in Cancer: Colloquium
    - CBIO 830
    - CBIO 870 Analysis of Scientific Papers
  - Other Department courses (39)

### Department of Health Policy and Management

The Department of Health Policy and Management prepares health services leaders and researchers who will advance systems of care delivery, promote effective health policy, and foster innovation and scholarly inquiry to improve and serve the health needs of Kansas citizens and beyond.

#### Teaching

The Department offers the following degree programs:

- Masters of Health Services Administration (p. 1998)
- PhD in Health Policy and Management (p. 2000)

#### Research

HP&M has an multidisciplinary faculty representing a variety of academic disciplines and teaching and research interests.

#### Service

Learn more about our faculty's outreach and service at local, state and national levels here (http://www.kumc.edu/school-of-medicine/hpm/faculty.html).

#### Courses

**HP&M 610. The Health Care System. 4 Hours.**

This course introduces students to the health care system of the United States. The course stresses the system's historical development, distinguishing features, financing, management, resources, and politics. Requirements include position papers, class discussions, examinations, and site visits to health care facilities LEC.
HP&M 620. Women and Health Care. 3 Hours.
A gender analysis of the organization of health care in the United States, using sociohistorical and sociological perspectives. Considers the health status and health care problems of women in relation to cultural aspects of medicine and health care; the roles of both informal and professional health care providers; the political economy of health care systems; and the relationship between gender and the state. (Same as SOC 617.) Prerequisite: HPM 601 or permission of instructor. LEC.

HP&M 810. The Health Care System. 3 Hours.
The structure and function of the components of the U.S. healthcare system are introduced in the context of the history, values and social forces that influenced its development and evolution. Students gain exposure to the concepts and vocabulary associated with aspects of the system, including delivery (providers, institutions, services), resources (finance, payment, insurance), population and public health, and outcomes (cost, access, quality). Healthcare outcomes from consumer, clinical, and societal perspectives are explored. LEC LEC.

HP&M 819. Research for Health Care Leaders. 3 Hours.
Introduces epidemiology, survey research, and evaluation research. Examines quantitative and qualitative methods. Focuses on role of research in health policy and health management. Incorporates lecture, discussion, papers and presentations. LEC.

HP&M 822. Health Care Economics. 3 Hours.
This course introduces the core concepts from economics to healthcare with a focus on helping healthcare managers use economic tools in making sound decisions. The demand for healthcare products, the structure of insurance, and the supply of healthcare products are examined. Students will apply a variety of economic analyses to health policy and health system issues. LEC LEC.

HP&M 825. Financial Concepts in Healthcare Management. 3 Hours.
Financial accountability is a critical responsibility of health service administrators. This course presents basic concepts and techniques for effective decision-making and stewardship, including financial statement analysis; strategic financial planning; capital formation; responsibility and cost accounting; operational, capital and cash budgeting; capital project analysis; and working capital management. LEC LEC.

HP&M 827. Financial Applications in Healthcare Management. 3 Hours.
Administrative applications of economic and financial concepts are applied to support strategic and financial goals. The concept of integrating operational and strategic planning into a strategic financial plan is developed. This course will foster integration and confidence in performing and applying financial analytical procedures such as financial statement ratio analysis; revenue and expense forecasting (budgeting); credit worthiness determination; break-even analysis and working capital management in a variety of healthcare settings including long-term care and public health. Prerequisite: HPM 825, Financial Concepts in Healthcare Management. LEC LEC.

HP&M 830. Health Care Management. 3 Hours.
This course introduces key concepts and skills for health care managers. Emphasizing self-discovery and professional development, the course examines how to become an informed employee, an effective team member, and a successful manager. Course topics include interpersonal skills, delegation, leadership, performance management, and organizational change. Learning methods include lectures, case analyses, experiential exercises, and discussion. Prerequisite: HPM 810 or permission of instructor. LEC.

HP&M 831. Reimbursement and Fiscal Policy. 2 Hours.
Reimbursement and fiscal policy practices impact the success and the economic well-being of healthcare institutions, payers and patients. This course develops the student's understanding of complex reimbursement methodologies from the perspective of providers and payers. Students will explore the strengths and weaknesses of the major methods of third party reimbursement, the types of managed care organizations and the payment methodologies employed. Students are also prepared to approach reimbursement policy issues both from the payer and the provider viewpoint. LEC LEC.

HP&M 832. Governance and Health Law. 2 Hours.
A survey course of the law as it affects governance, health care administration and health care generally. This course will develop the student's understanding of health law and its impact on many aspects of health care governance and administration. The student should be able to identify and understand various legal issues they may encounter and when to engage legal counsel's advice. Prerequisite: HPM 810. LEC.

HP&M 833. Ethics. 2 Hours.
An introduction to the principles and concepts in the ethics of health services administration. The course will help students further develop their skills to recognize and analyze ethical dilemmas, and to explain, justify and evaluate the decisions they make in response to such dilemmas. LEC.

HP&M 837. Health Policy. 3 Hours.
This course examines the development, implementation, and evaluation of federal, state, and local health policy in the United States. Particular attention will be given to (1) the development of public institutions and policy goals; and (2) current policy problems such as cost controls, reimbursement, health services utilization, program assessment and evaluation, public health, and public/private investment and resource planning. Students will be expected to synthesize and integrate knowledge to apply theory and principles in ways consistent with professional practice as a health policy analyst. LEC LEC.

HP&M 838. Rural Health Care. 3 Hours.
Provides students with (a) an understanding of major issues in rural health and the rural environment in which health care providers and administrators provide service; (b) an understanding of the demographics, economics, services and challenges associated with the health care delivery systems in rural America and (c) an overview of federal and state health policy and its effect on rural health systems. Special emphasis will be placed on identifying, understanding, and addressing rural health challenges from administrative and policy perspectives. Prerequisite: None. LEC.

HP&M 840. Organizational Foundations for Leading Change. 3 Hours.
Self-discovery as a foundation for professional development while exploring the concepts of leader, manager, and follower is emphasized. Analysis and prediction of an organization's stages of development and its capacity for linear and social change are introduced through the lens of complexity science. Political, legal, ethical, and other issues that constrain and destabilize organizations and strategies to restore equilibrium are explored. (Same as NRSG 880). LEC LEC.

HP&M 842. Roles, Functions and Care Models. 2 Hours.
This course examines the nature and characteristics of the healthcare workforce needed to deliver direct, indirect, and support services. Healthcare worker roles are analyzed through the lens of key organizational functions and care delivery modalities. Common care delivery models, such as primary, team, and patient-centered care approaches to organizing care delivery are explored in various clinical settings, including acute and long-term care and community and public health.
health entities. Administrative challenges and opportunities for managing a diverse workforce are presented. LEC LEC.

HP&M 844. Communication for the Healthcare Executive. 2 Hours. This course focuses on attaining proficient communication skills to deliver high impact messages to stakeholders ranging from board members, to diverse communities of interest, to policymakers and regulators. Verbal and written skill development addresses executive presence to perform communication functions such as conducting an 'ask' from a policymaker or potential benefactor, using storytelling and data to shape critical messages to the media, and communicating value-driven memoranda to internal audiences. The use of emerging technologies to aid in communication effectiveness will also be presented. LEC LEC.

HP&M 846. Health Information Technology Management. 3 Hours. This course covers fundamental concepts of health information technologies including information management, health care delivery and remote monitoring systems of interest to administrators in health services organizations. Types of systems, alignment with organizational strategy, selection and adoption, return on investment, security and privacy, and uses of healthcare information for clinical and strategic analysis and decision support will be covered. The course will also cover current U.S. health technology infrastructure, policy, organizations and issues regarding the latest technology applications. An introduction to health care analytics is also provided. LEC.

HP&M 848. Designing Health Care Organizations. 2 Hours. This class examines how design affects a broad range of health care organizations. It considers designs for jobs, processes, equipment, buildings, and organizations, and explores implications for safety, customer satisfaction, worker satisfaction, productivity, effectiveness, and profitability. Students analyze varied cases that approach design as a management decision-making process. LEC.

HP&M 850. Introduction to Operations. 3 Hours. Examines performance of health care organizations, sources of variation, methods of measurement, and strategies for improving performance. Considers several approaches to performance improvement and examines tools widely used in operations management. Incorporates lecture, discussion, and fieldwork. (Same as NRSG 882.) LEC.

HP&M 852. Strategic Marketing. 2 Hours. Provides students with a framework for executive-level, strategic market planning and analysis. Topics covered include: the strategic marketing organization; the impact of organizational culture on strategy development; environmental assignments and competitor analysis; market research; and the impact of the marketing fours (price, positioning, promotion, and product) in health care. LEC.

HP&M 853. Strategic Management. 2 Hours. Explores internal and external analysis for health care organizations. Examines development, analysis, execution, and monitoring of strategies. Application of critical thinking skills to strategy. Lecture and discussion. Prerequisite: Completion of HPM Level I courses or permission of instructor. LEC.

HP&M 854. Human Resources and Workforce Development. 3 Hours. The focus of this course is to understand the leadership functions of human resource management in organizations to create a competitive edge through employee empowerment. Core human resource concepts are introduced and applied to optimize human capital within a variety of healthcare settings, including compensation and benefits, employee recognition, and employee/labor relations. National, regional and local strategies and workforce trends are discussed related to best practices for the selection, retention, and management as a healthcare employer of choice. (Same as NRSG 891). LEC LEC.

HP&M 857. Evaluating Outcomes of Healthcare. 3 Hours. This course will trace the development of the outcomes research movement and provide examples of methodologies, assessment instruments and issues that guide outcomes research. It will also review the methods for linking research findings with clinical practice (i.e., clinical practice guidelines). Obstacles to acceptance of practice guidelines will be discussed. Finally, the translation of outcomes research methodology into programs to improve health quality will be presented. Prerequisite: Permission of instructor. LEC.

HP&M 858. Health and Social Behavior. 3 Hours. Healthcare as a cultural and socio-behavioral system is presented. Using research and theory, students explore alternative perspectives on the nature of medicine and healing within comparative health systems, both U.S. and abroad. Students examine at an advanced level how healthcare organizational structures contribute to patient health outcomes and influence employee behaviors. The course reinforces the nature and characteristics of the health professions, particularly medicine and nursing perceptions, and the complex behavioral dynamics of health professionals with organizational leaders. LEC LEC.

HP&M 859. Professional Development. 2 Hours. Prepares students for an initial professional job search, long term career planning and professional development. Explores personal assessment, professional networking, mentoring, resume' construction, job searches and interviewing. Reviews professional communication and other professionalism domains. Introduces foundational concepts of leadership and leadership development. Lectures, papers, interactive activities and discussion. Prerequisite: Permission of instructor. LEC.

HP&M 860. Graduate Internship in Healthcare Services Administration. 1-3 Hours. Novice and experienced health services administrators function in applied settings. The internship is designed to meet the needs of individual students to advance their career functioning and set in motion a professional development plan. The inexperienced administrator will use the internship as a mid-curriculum opportunity to apply and synthesize in the practice setting knowledge, skills, and abilities. Students who come to the program with mid-level to advanced experience use the practicum to advance their career through exposure to additional experiences that extends their knowledge, skills, and abilities and demonstrates synthesis of program competencies. FLD FLD.

HP&M 861. Capstone Seminar. 2 Hours. The knowledge, skills, and abilities learned throughout the program are validated in capstone experience. A case study approach will be used to synthesize and apply principles including, but not limited to, change theory and quality improvement, research and information technologies, strategy and communication tools, human resource management, financial and economic analysis, and advanced decision-making and management of organizational behavior. Students will present their cases to peers, faculty, and external reviewers for dialogue, critique, and a plan for professional skills development. IND RSH.

HP&M 862. Research Practicum in Health Services Administration. 1-3 Hours. A course to conduct a research project related to health services delivery, management or policy and to explore topics related to the research project. RSH Prerequisite: HPM 819. RSH.

HP&M 863. Independent Study. 1-3 Hours. This course is designed to meet the needs of students who have a special interest that cannot be met by existing courses. IND IND.
HP&M 868. Field Immersion in Health Systems Issues and Trends. 1 Hour.
This field-based experience exposes students to a range of issues and trends in health care organizations - public and private, profit and non-profit. The aim is to engage students in the realities of health system challenges and problems, which can be informed by health services research. Site visits and contacts with executives and policy leaders serve as the basis for scholarly analysis. Prerequisite: Permission of the instructor. FLD.

HP&M 870. Research Inquiry I: Defining and Supporting the Research Problem. 1 Hour.
Students select a problem area, critically review and analyze the research literature related to it and develop a research question(s) and working hypotheses. The analysis of the problem integrates field experiences with relevant literature, and translates ideas from the practice and/or policy setting into the context of scholarly inquiry. Prerequisite: Permission of the instructor. FLD.

HP&M 871. Research Inquiry II: Research Design and Analysis. 1 Hour.
Students build on a problem area of interest with potential benefit to the health care field and examine methodologies that would support a hypothesis or significant research question. The course guides students in translating their questions into a research design, using specific data sources, including overall strategy, measurement, study population and/or sample and analysis plan. Focus will be placed on critical analysis of design trade-offs and limitations. Prerequisite: HP&M 870 or permission of the instructor. SEM.

HP&M 873. Statistical Applications Using Large Data Bases. 3 Hours.
The management of large data sets is a critical analytic skill for health policy and management research. This course exposes students to the various types and configurations of large data sets and provides hands-on analytic experience using an array of statistical techniques and procedures. Attention is placed on the criteria for designing and evaluating, including the trade-offs in selecting one plan over another. Students actually carry out an analysis plan for a variety of data types. Prerequisite: HP&M 819, or permission of the instructor. LEC.

HP&M 874. Statistics for Decision Making. 3 Hours.
Elementary statistical techniques to include descriptive statistics, probability, sampling, and statistical inference of means and proportions; advanced statistical techniques include multivariate analysis of qualitative and quantitative variables using multiple linear and logistic regression. LEC.

HP&M 875. Modeling in Health Services Research. 3 Hours.
Provides an opportunity for students to use a number of common analysis models in health services research. Emphasizes a conceptual understanding of appropriate modeling techniques and use of statistical software packages. The course focuses on application of methods to health services research questions, with emphasis on regression design and interpretation. Prerequisite: HP&M 874 or permission of the instructor. LEC.

HP&M 876. Medicare and Medicaid. 3 Hours.
Provides students with an in-depth understanding of the three publicly financed health programs that impact virtually all aspects of the American healthcare system - Medicare, Medicaid and Children's Health Insurance Programs (CHIP). Explores history and evolution of each program, plus specific operational issues such as eligibility, financing, management reporting, state/federal coordination, quality of care and outcomes management and influence of recent legislation. Prerequisite: Permission of the instructor. LEC.

HP&M 877. Women and Healthcare. 3 Hours.
A gender analysis of the organization of healthcare in the United States, using sociohistorical and sociological perspectives. Considers the health status and healthcare problems of women in relation to cultural aspects of medicine and healthcare; the roles of both informal and professional healthcare providers; the political economy of healthcare systems; and the relationship between gender and state. Prerequisite: HPM 810, or permission of instructor. LEC.

HP&M 878. Grant Writing. 3 Hours.
The course is designed to take the principles and mechanics learned in introductory epidemiology and biostatistics and apply them in the design of epidemiologic studies. The strategy and data collection for studies will be emphasized rather than the methods of statistical analysis. The student will learn how to develop a proposal/grant that addresses the entire array of concerns regarding such studies and propose a realistic, scientifically justified study. (Same as ANAT 869 and NRSG 889.) Prerequisite: HPM 819 or HPM 821, and NRSG 886. LEC.

HP&M 879. Comparative Healthcare Systems. 3 Hours.
Critical examination of the structure and function of healthcare systems in major, advanced, capitalist countries (e.g., Canada, Japan, United Kingdom, France, Germany, and Sweden) in comparison to each other and to the healthcare system of the United States. Patterns in control and financing will be studied in relation to issues of cost, quality, access, and in relation to cultural values. Special attention will be placed on comparative analysis of reform efforts. Prerequisite: HPM 810 or permission of instructor. LEC.

HP&M 880. Health Care and Social Policies in Sweden. 3 Hours.
Sweden leads the world in major health outcomes despite spending significantly less than the U.S. This course provides students the opportunity to visit Sweden and see the operation of its health care and social welfare system firsthand. Learn about Swedish history and culture as you re-examine many commonly held assumptions about both the U.S. and Sweden. An intensive schedule of site visits and lectures in the Stockholm-Uppsala area, assigned readings, and a major paper. LEC.

HP&M 882. Health Services Research Using Public Payer Data. 3 Hours.
Several contemporary health reforms have rendered analyses of public payer data more feasible and valuable for population health, health services research, and quality improvement. The addition of an outpatient drug benefit to standard inpatient and outpatient service coverage for Medicare, for example, has stimulated a growth industry in comparative effectiveness research and expanded policy research across the health care system. Pending expansion of States’ Medicaid programs under the Affordable Care Act will undoubtedly create the largest public health care insurance program in the United States. The Centers for Medicare Medicaid Services (CMS) have streamlined researchers’ access to national Medicare and Medicaid populations for health services and quality improvement projects through contracts with the Research Data Center at the University of Minnesota and the Chronic Condition Warehouse. In addition, Kansas Medicaid has invested in a Data Analytic Interface that offers ready access to our state’s employees, Medicaid beneficiaries, and private health insurance claims data for enterprising researchers including tremendous opportunities for state of the art, contemporary policy analyses. This is indeed an exciting and opportune time for students embarking on careers in health services, policy, and population health research. This course is designed to prepare students for real world analyses using standard public payer claims data. LEC.

HP&M 883. Cost-Effectiveness and Decision Analysis. 3 Hours.
This course examines techniques that are used in making clinical and management decisions when outcomes are uncertain. The course begins
with a review of probabilistic decision making, then explores methods of analyzing choices with uncertain outcomes, stressing the use of decision trees and sensitivity analysis. The course examines cost minimization analysis, cost effectiveness analysis, and cost benefit analysis. (SAME as PRVM 878). LEC.

HP&M 884. Clinical and Administrative Data Analysis. 3 Hours.
This course presents advanced techniques in statistical analysis and information management to help understand, process, and use health services data. The three broad areas of health services data will be used: clinical, program, and population-based. Ways in which these data can be used as both management and research tools will be discussed. Implications for improving patient care and delivery of health services will be emphasized. Labs will stress the use of both manipulative techniques such as merging, matching, sorting, and file construction, as well as focus on analysis, using univariate, bivariate, and multivariate techniques. Recent methodology related to outcomes, case-mix, and performance assessment will be presented, and their application to health services administration demonstrated. LEC.

HP&M 885. Instructional Methods in Health Services Education. 1 Hour.
An overview of pedagogical approaches and learning strategies for higher education courses in health policy and management. Content will include course organization, syllabus design, techniques for teaching in the classroom and online, learning styles, strategies for classroom management, and evaluation/grading methods. Prerequisite: HPM 868 or permission of the instructor. LEC.

HP&M 886. Applied Health Services Research. 3 Hours.
Students in this course apply the full spectrum of the research process to a specific hypothesis or research question, drawn from practical health systems observations and/or supported by critical analysis of the health services research literature. Moving step by step through the research process, students work to develop a complete research plan and proposal suitable to investigate their chosen question. Group discussion and guest researchers provide elaboration for each stage of research plan development. Prerequisite: HPM 872 and HPM 873 or permission of the instructor. RSC.

HP&M 887. Practicum in Health Services Education. 2 Hours.
Application of the approaches and methods described in HPM 885. Students will serve as a teaching assistant for one semester, working with a teaching mentor. In addition to assisting with the class, students will meet regularly with the mentor to critique and analyze classroom processes, plan and develop teaching activities, and evaluate learning and performance in the classroom. Prerequisite: HPM 868 or permission of the instructor. HPM 887 may be taken concurrently with HPM 885. LEC.

HP&M 890. Topics in Health Policy and Management. 1-3 Hours.
This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Consent of the instructor. IND LEC.

HP&M 901. Doctoral Seminar in Health Policy. 3 Hours.
Students will investigate, review, and critically analyze major concepts, theoretical and methodological approaches and sub-areas in the field of health policy research. The course will cover comparative health policy analyses as well as both micro and macro system perspectives. Prerequisite: Permission of the instructor. SEM.

HP&M 903. Doctoral Seminar in Health Management. 3 Hours.
Students will investigate, review and critically examine major concepts, theories, issues, methodological approaches and sub-areas in the health services management research literature. Special attention will be placed on using research to develop evidence-based practice and suggesting interventional strategies for complex problems, both micro- and macro-organizational. Prerequisite: Permission of the instructor. SEM.

HP&M 904. Doctoral Seminar in Health Care Occupations and Culture. 3 Hours.
Examines the social, historical, and cultural forces shaping the organization and delivery of health care. Students will critically analyze concepts surrounding health, illness and wellness, healing, professional authority, and interprofessional and intraprofessional relationships. Explores the impact of organizational cultures on the health care system. Prerequisite: Admission to the PhD Program or permission of instructor. SEM.

HP&M 905. Doctoral Seminar in Social Determinants of Health. 3 Hours.
An advanced survey of theory and research in social determinants of health, giving primary attention to health differences by education, income, race/ethnicity, gender, and sexual orientation. Demographic, cross-cultural, social-psychological, and physiological aspects of physical and mental health will be considered. Prerequisite: Admission to PhD program or permission of instructor. SEM.

HP&M 906. Doctoral Seminar in Comparative Health Systems. 3 Hours.
Critical examination of the structure and function of health care systems in major, advanced, capitalist countries (e.g., Canada, United Kingdom, France, Germany, Netherlands, Sweden) in comparison to each other and to the health care system of the United States. Patterns in control and financing will be studied in relation to issues of cost, quality, access, and in relation to cultural values. Special attention will be placed on comparative analysis of strategies for reform and the results of recent reform efforts in the focal countries. Prerequisite: Admission to PhD program or permission of instructor. SEM.

HP&M 910. Health Services Research Methods. 3 Hours.
Examines the research process and the primary methodologies used in health services research. Explores basic methods in survey research, epidemiology, and evaluation. Focuses on quantitative methods and introduces qualitative methods. Lecture Prerequisite: Graduate level statistics; Acceptance to the PhD program or permission of instructor. LEC.

HP&M 990. Advanced Topics in Health Policy and Management. 1-3 Hours.
This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Admission to a PhD program and consent of the instructor. IND. LEC.

HP&M 991. Individual Doctoral Readings. 1-3 Hours.
Individual study of special topics or problems by students working on a doctorate. Prerequisite: Admission to a PHD program and consent of the instructor. LEC.

HP&M 999. Dissertation. 1-12 Hours.
The Master of Health Services Administration (MHSA) degree prepares students for leadership roles in the health care sector, including positions in hospitals, health care systems, long-term care facilities, clinics, insurance firms, health departments, and government agencies. The MHSA offers a systematic examination of the health care system, exposure to the impact of health policy and the policy process, a mastery
of analytic methods, and a broad exposure to the practice of health care management. Classes are taught on the KUMC campus and offered in the late afternoon and evening.

**Joint Degree Programs**

The Department of Health Policy and Management offers 4 joint programs in conjunction with the MD program and the Schools of Law, Nursing, and Health Professions. Please contact the respective schools for complete information.

**MD/MHSA**

The joint MD/MHSA degree program prepares students to enter careers as physician executives or to provide administrative support for their medical practice. As the health care environment becomes more complex and competitive, administrative skills can be extremely important to individuals starting careers in medicine or those seeking to enhance their current careers. The MSHA portion of the curriculum combines social science and business content in the context of health care and prepares students for management and executive positions in health care organizations. Students complete requirements for the MD degree as specified by the School of Medicine. MD programs are described in the School of Medicine Catalog (p. 2052). Both programs can be completed in 5 years. Students must be admitted to each program to pursue the joint degree.

**JD/MHSA**

The JD/MHSA joint degree program combines into 4 years of full-time study the Juris Doctor (p. 742) (JD) program offered by the School of Law (http://www.law.ku.edu) and the Master of Health Services Administration (MHSA) program offered by the Department of Health Policy and Management. The program offers students who plan to practice health law or health services management a thorough academic grounding in both disciplines. Students must be admitted to each program to pursue the joint degree.

**MS in Nursing (Organizational Leadership)/MHSA**

The joint Master of Science in Nursing (Organizational Leadership)/ MHSA degree program combines the MHSA degree offered by the Department of Health Policy and Management and the School of Nursing’s Master of Science (p. 2215) degree with the specialization in Organizational Leadership. This program gives students the opportunity to acquire training in the convergent fields of nursing and health services administration. The program combines course work, allowing the two degrees to be completed in 8 semesters. Students must be admitted to each program to pursue the joint degree.

**BSHIM/MHSA**

The joint Bachelor of Science in Health Information Management (p. 666) and Master of Health Services Administration program is offered through the Department of Health Policy and Management in association with the Department of Health Information Management. By participating in this intensive, full-time bridge program, students can achieve both degrees in five years. Students pursuing the BSHIM/MHSA will be prepared to assume management and executive positions in health-related organizations and to bring their expertise in health information management to these positions.

The application is an on-line process. Detailed instructions on how to apply and application deadlines are posted on the Health Policy and Management website (http://www.kumc.edu/school-of-medicine/hpm/master-of-health-services-administration.html). Students are admitted for the fall semester only.

**Admission requirements:**

- Bachelor’s degree from a regionally accredited institution, documented by submission of official transcript(s). The bachelor's degree must be attained prior to entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score not more than approximately five (5) years old sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895. An alternative graduate level examination score may be substituted on a case-by-case basis.
- A statement of goals/purpose. This brief essay should outline the applicant's reasons for wanting to pursue graduate education in health administration and career objectives.
- Three letters of recommendation.
- Applicants must also have completed a prerequisite three (3) credit hour course in statistics.
- A personal interview is also required of all applicants who meet the minimum admissions standards. If travel to the area is impossible, a telephone or on-line interview may be substituted.

Applicants will be assessed based on these requirements. After an applicant has been admitted, the program may defer an applicant's admission for one year after which time the applicant must submit a new application.

**Degree requirements:**

- Degree requirements are normally completed within two (2) years of admission to the program although a maximum of seven (7) years is allowed. Part-time students normally complete requirements within four to five (4-5) years of admission to the program.
- Cumulative grade-point average (GPA) of at least a 3.0 for all program coursework.
- Completion of a minimum of 56 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of the following required courses (or equivalents):

  - HP&M 810 The Health Care System

**Doctor of Philosophy in Health Policy and Management**

Our PhD in Health Policy and Management prepares high-level health services researchers for careers in academic settings or in public and private organizations where advanced research, leadership and analytic skills are required.

Health services research is a multidisciplinary field that examines the uses, costs, quality, accessibility, delivery, organization, financing and health outcomes of healthcare systems in the U.S. and elsewhere. Health Services researchers investigate, compare and interpret the complexities of healthcare systems, including how social factors, financing systems, organizational structures and processes, health technologies, and individual and group behaviors affect access, cost and quality of care. The program is offered on a full-time basis only with course work at the KU Medical Center campus.

The application process is done online. Detailed instructions on how to apply and the application deadlines are posted on the Health Policy and Management website (http://www.kumc.edu/school-of-medicine/hpm/phd-in-health-policy-and-management/phd-admissions-criteria-process-and-timeline.html).

**Admission requirements:**

- A master's degree in health services administration or a related field (e.g. public health, public administration, business, social sciences, biological sciences, nursing) from a regionally accredited institution and documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from all other institutions attended post-baccalaureate are also required.
- A cumulative grade-point average (GPA) of at least 3.5 on a 4.0 scale for all post-baccalaureate course work. Students with degrees from outside the U.S. may be subject to transcript evaluation to determine that the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310) and additionally for this specific program, a minimum score of 50 on the TSE or SPEAK tests, a minimum iBT speaking score of 24, or a minimum IELTS speaking score of 8.
- A background check (p. 2310) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score not more than approximately 5 years old sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.
• Successful completion of a graduate level statistics course. The need for additional foundational coursework (health delivery systems, health economics, health behavior/organizations, health policy) will be evaluated on an individualized basis during the admissions process.
• Three letters of recommendation from individuals who can assess your academic background and potential for success in a doctoral program.
• A personal statement regarding your career objectives and purpose.
• A current resume or curriculum vitae.
• A copy of the applicant's master’s thesis, graduate-level research paper or other example of the applicant’s scholarly research writing.

Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, students should refer to the catalog content of the year they entered the program. Other years’ catalogs ».

The doctoral program is a post-master’s, competency-based program in health services research consisting of 3 stages. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D. The program, including dissertation, is designed to be completed in a minimum of 4-5 academic years (see Degree Plan tab.) Students are expected to maintain continuous, full-time enrollment.

Stage 1 consists of basic courses in health policy, health systems, culture, occupations, health care management, and qualitative and quantitative research methods. A notable feature of this stage is that students begin to participate in the research process immediately upon beginning the program through a series of 1-credit-hour immersion courses, taken within the first 2 semesters along with other basic courses.

Stage 2 involves specialization in a specific substantive area of either policy or management-related research or a combination, as well as advanced statistical analysis and research methods. Students also complete a teaching seminar and practicum.

Stage 3 consists of the doctoral dissertation demonstrating the development, execution, and results of original research. Students work primarily with their dissertation advisor and doctoral committee at this stage in order to prepare and defend their dissertation proposal and to carry out and complete their dissertation research project. There are two options for the written dissertation, the traditional book format or a dissertation focused on the development, execution, and results of original research. Students work in their respective substantive area of specialization to write their dissertation. Students who elect to complete their dissertation outside of their substantive area of specialization must fulfill the dissertation requirements for their substantive area.

Degree requirements:
• Degree requirements are normally completed within 4-5 years of admission to the program although a maximum of 8 years is allowed.
• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
• Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2313) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
• Successful completion of the required sequence of health services research methods courses HP&M 870, HP&M 871, HP&M 873, HP&M 875, HP&M 886, and HP&M 910 meets the Research Skills requirement.

• Successful completion of the research ethics modules within HP&M 870, HP&M 871, HP&M 886, and HP&M 910 meets the Responsible Scholarship requirement.
• Successful completion of the KUMC Human Subjects Project (p. 2313) training module during the first semester of enrollment and annual training renewal until completion of the program.
• Successful completion of preliminary examinations in quantitative analysis, general health policy and management research, and a specialization area.
• Successful completion of the Residence Requirement (p. 2313) by enrollment in full-time status a minimum of two semesters prior to the semester the Oral Comprehensive Examination is scheduled.
• Successful completion of the Oral Comprehensive Examination (p. 2313). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
• Successful completion of the Post-Comprehensive Enrollment (p. 2313) requirement.
• Enrollment in a minimum of one (1) credit of HP&M 999 Dissertation leading to the Ph.D. the semester the student will defend dissertation and graduate.
• Successful completion of the Final Oral Examination (p. 2313) (dissertation defense.)
• Successful Dissertation Submission and Publication (p. 2313) (according to Office of Graduate Studies policy.)
• Successful completion of the following Health Policy and Management core courses:

• Successful completion of an additional three (3) credit hour quantitative course. Specific course must be approved by the student's advisor.
• Successful completion of a three (3) credit hour course in qualitative methods. Specific course must be approved by the student's advisor.
• Attendance at the HP&M Health Services Research Colloquium.
• Students must be enrolled in the fall and spring semesters following the completion of required coursework.
Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. *Other years' catalogs*.

Final Oral Exam (Dissertation Defense) scheduled this semester if approved by committee to defend and graduate.

**Total Hours: 50-54**

### Department of History and Philosophy of Medicine

**The Programs and Mission**

The Department of History and Philosophy of Medicine consists of four major units: the Academic Programs, the Clendening Library, the Clendening Museum, and the KU Medical Center Archives. The Department unites these programs in its mission to advance understanding and application of ethical, historical and social analysis of health, medicine and healing.

Using the combined resources of the department we strive to teach students and colleagues how historical and social factors influence health and health care; and we inform our teaching through scholarship in the history and philosophy of medicine that merits national recognition.

The Library and Archives act as careful stewards of the extensive historical collections and promote their use and appreciation; while seeking to add some color to the often drab aesthetic of medical practice.

Finally, through our ethics programs we seek to deepen a moral appreciation of medicine’s role in healing through ethics education and scholarship in the medical school and ethics consultation in the University of Kansas Hospital.

**Explore our featured resources:**

- University of Kansas Medical Center Archives (http://www.kumc.edu/school-of-medicine/history-and-philosophy-of-medicine/kumc-archives.html)
- Spine and Orthopedic Historical Collections (http://www.kumc.edu/school-of-medicine/history-and-philosophy-
of-medicine/kumc-archives/spine-and-orthopedic-historical-collections.html)
• Writing Consult Center (http://www.kumc.edu/school-of-medicine/history-and-philosophy-of-medicine/education/writing-consult-center.html)

Although no graduate program is offered in this area, H&PM course work may be taken for graduate credit. Graduate level courses taught by History and Philosophy Medicine faculty are available through the Department of Health Policy and Management and the Department of Preventive Medicine and Public Health on the medical center campus and the Department of History on the Lawrence campus.

Courses

H&PM 853. Responsible Conduct of Research. 1 Hour.
The purpose of this course is to engage research trainees in reading about, considering, and discussing the responsible conduct of science. The course is designed as an option for meeting current federal regulations, which require that all NIH training grants provide training in the responsible conduct of research. This course provides a concise overview of key subject areas in the responsible conduct of research. It is designed to make students aware of relevant guidelines, policies and codes relating to ethical research, as well as to provide the skills for identifying and resolving ethical conflicts that may arise in research. Cross-linked with PRVM 853. LEC.

Department of Microbiology, Molecular Genetics, and Immunology

The mission of the Department of Microbiology, Molecular Genetics and Immunology is to conduct high impact research that is relevant to human health and train the next generation of biomedical scientists and physicians who will advance our understanding of infection and immunity in ways that benefit humankind.

Our nationally recognized research programs, highly supported by NIH research funding (http://www.brbr.mrg/NIH_Awards/2010/NIH_Awards_2010.htm), cover a variety of topics within the following themes:

• microbial physiology and pathogenesis
• virology
• immunology and host defense

Funding also provides support for pre- and postdoctoral trainees and visiting scientists, as well as for hosting national and international researchers in the Microbiology seminar series.

Courses

MICR 801. Principles of Immunology. 1 Hour.
An introductory course in immunology; cells and tissues of the immune system; B and T cells and their receptors; major histocompatibility complex; antigen presentation; regulation of immune responses; immunity and vaccination. Prerequisite: IGPBS courses or permission of instructor. LEC.

MICR 802. Principles of Virology. 1 Hour.
An introductory course in virology; replication of RNA and DNA viruses; viral RNA processing and translation; reverse transcription; virus assembly; viral pathogenesis; viruses as vectors. Prerequisite: MICR 801 or permission of instructor. LEC.

MICR 803. Principles of Bacterial Genetics and Pathogenesis. 1 Hour.
An introductory course in bacteriology; cell structure and function; chromosome and plasmid replication; genetic engineering; bacteriophage; gene regulation; quorum sensing; antibiotics; protein secretion; bacterial pathogenesis. Prerequisite: MICR 801 or permission of instructor. LEC.

MICR 805. Teaching in Higher Education. 3 Hours.
Theoretical and practical aspects of teaching in a graduate degree program with emphasis on program and curriculum design, student assessment, communicating learning expectations, selecting optimal teaching methods aligned with expectations, understanding diverse learning styles, apprenticeship teaching, developing as a teacher and applying contemporary educational theory to the classroom or research laboratory. Prerequisite: Any graduate degree or current enrollment in a graduate degree program or permission of instructor. LEC.

MICR 806. Becoming an Effective Teacher. 1 Hour.
Theoretical and practical aspects of teaching in higher education with emphasis on program and curriculum design, learner assessment, communicating learning expectations, selecting optimal teaching methods aligned with educational intentions, understanding diverse learning styles, use of educational technology, developing as a professional teacher and applying educational scholarship and best teaching practices to the classroom. Both theory and small group practical exercises characterize class time. Prerequisite: Any graduate or professional degree and permission of instructor. LEC.

MICR 808. Immunology. 3 Hours.
Molecular and cellular aspects of immunity. Specific topics will include immunoglobulin and receptor structure/function, attributes of antigenicity, antigen-antibody reactions, immunocompetent cells, cellular interactions, soluble mediators of immune responses and normal and abnormal immune regulation. Prerequisite: Permission of course director. LEC.

MICR 809. Tumor Immunology. 3 Hours.
Immune system and tumor growth; tumor immunotherapy. Analysis and applications of experimental systems and discussion of contemporary as well as classical primary literature in the field. Collaborative learning and communication skills emphasized. Prerequisite: IGPBS core curriculum or equivalent, or permission of instructor. LEC.

MICR 810. Fundamentals of Immunology. 2 Hours.
Immune cells and soluble mediators of the innate and adaptive systems, antigen and pattern recognition, lymphocyte development and activation, immune effector mechanisms, mechanisms of immune-based diseases. Analysis and applications of experimental systems and discussion of contemporary as well as classical primary literature in the field. Collaborative learning and communication skills emphasized. Prerequisite: Introductory course work in cell and molecular biology; biochemistry and genetics. LEC.

MICR 811. Molecular Genetics of Bacteria and Phages. 2 Hours.
This 2-credit course is designed for students pursuing a graduate degree in a biomedical field. The goal of the course is to introduce the fundamental concepts of modern microbial genetics and to expose the students to commonly used experimental procedures in microbial and molecular genetics. Students will study both textbook and literature sources and will learn to apply research methods to understand the problems associated with the bacterial physiology and genetics. Active learning approaches in the classroom will require that students work collaboratively with others. Both written and oral communication will be
emphasized as important learning outcomes in this course. Prerequisite: An introductory course in biology, genetics, chemistry or biochemistry. LEC.

MICR 812. Molecular Virology and Pathogenesis. 2 Hours.
This Virology course is aimed at graduate students who are pursuing a graduate degree in a biomedical field. It provides a contemporary understanding of how viruses are built, how they infect and replicate in host cells, how they spread and evolve, how they interact with host cells, how they eventually cause diseases, and how infection of a host can be prevented. Prerequisite: Introductory course work in cell and molecular biology, biochemistry and genetics. LEC.

MICR 820. Bacterial Genetics and Pathogenesis. 3 Hours.
Genetics of bacteria with emphasis on bacterial pathogens. Topics include: gene regulation, recombination, bacteriophages, transposons, genetic exchange, plasmids, genetics of virulence, bacterial adherence and colonization, immune evasion mechanisms, bacterial toxins, vaccines and antimicrobials, re-emerging bacterial diseases. Prerequisite: Introductory course work in cell and molecular biology, biochemistry and genetics or permission of instructor. LEC.

MICR 825. Virology. 3 Hours.
Molecular biology of animal viruses. Aspects of various virus groups to be covered include structure, replication, and host cell responses. Lectures and student seminars. Prerequisite: Permission of the course director. LEC.

MICR 826. Oncogenesis Associated with Viral Infections. 3 Hours.
The course is designed primarily for students pursuing a graduate degree in a biomedical field. The course will evaluate current understanding of the various mechanisms that mediate carcinogenesis that is linked to viral infections. It will also consider strategies of circumventing virus infections as a potential way of preventing the development of tumors. Prerequisites: Course MICR 812 or permission of instructor. LEC.

MICR 830. Seminar in Microbiology. 1 Hour.
Reports on research and literature. LEC.

MICR 835. Research in Microbiology. 1-6 Hours.
This course is specifically designed to provide supervised research experience in various laboratories in the department. LEC.

MICR 855. Host-Pathogen Interactions. 3 Hours.
This course is designed for students pursuing a graduate degree in a biomedical field. Topics include host-pathogen interactions; pathogen adhesion; invasion and intracellular survival; cell death pathways; innate immunity; role of extracellular matrices. The course will cover various bacterial and viral pathogens as well as eukaryotic pathogens such as fungus. Prerequisite: Introductory course work in cell and molecular biology, biochemistry and genetics or permission of instructor. LEC.

MICR 890. Master’s Research in Microbiology. 1-10 Hours.
This course is designated for research leading to the master's degree. LEC.

MICR 899. Master’s Thesis in Microbiology. 1-10 Hours.
This course is designated for thesis writing leading to a master's degree in Microbiology. THE.

MICR 900. Research for Ph.D. in Microbiology. 1-10 Hours.
This course is restricted entirely to dissertation research. RSH.

MICR 999. Dissertation for Ph.D. in Microbiology. 1-10 Hours.
Restricted to actual writing of dissertation. THE.

Admission requirements:

• Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
• A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
• An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
• Three letters of recommendation.
• Prerequisite coursework:
  • One year of general chemistry
  • One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  • One year of biological sciences
  • One semester of calculus
  • One semester of physics
• Research experience (beyond labs associated with lecture courses) is strongly suggested.
• Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs -.
Degree Requirements:

- Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of either a thesis defense or general examination (p. 2313) the semester the student will graduate.
- If thesis option chosen, then enrollment in a minimum of one (1) credit hour of MICR 899 Master's Thesis in Microbiology and successful thesis submission and publication (p. 2313) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4

- Successful completion of the following Microbiology courses:
  - MICR 810 Fundamentals of Immunology 2
  - MICR 811 Molecular Genetics of Bacteria and Phages 2
  - MICR 812 Molecular Virology and Pathogenesis 2
  - MICR 890 Master's Research in Microbiology 1-10
  - MICR 899 Master's Thesis in Microbiology (if thesis option chosen)

- Successful completion of additional elective coursework as determined in consultation with the student's advisor or research committee. Electives may include the Microbiology courses listed below or courses from other departments.
  - MICR 801 Principles of Immunology (offered Fall only) 1
  - MICR 802 Principles of Virology (offered Fall only) 1
  - MICR 803 Principles of Bacterial Genetics and Pathogenesis (offered Fall only) 1
  - MICR 805 Teaching in Higher Education (offered Fall and Spring) 3
  - MICR 808 Immunology (offered Spring only) 3
  - MICR 809 Tumor Immunology (offered Spring only) 3
  - MICR 820 Bacteriological Genetics and Pathogenesis (offered Spring only) 3
  - MICR 825 Virology (offered Spring only) 3
  - MICR 826 Oncogenesis Associated with Viral Infections (offered Fall and Spring) 3
  - MICR 830 Seminar in Microbiology (offered Fall and Spring) 1

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

Doctor of Philosophy in Microbiology

A Ph.D. is required for careers in independent academic research in microbiology and immunology. The Ph.D. degree is most often followed by two or more years of postdoctoral training in a specific area of research. Ph.D. graduates in microbiology, with appropriate postdoctoral experience, are ready to compete effectively for faculty positions at a college or university, senior level positions in biotech industry and government.

The faculty in this program have diverse research interests ranging from the molecular pathogenesis of infectious agents (bacteria and viruses) to the understanding of immune function. Students with undergraduate degrees in microbiology, biochemistry or other similar disciplines are encouraged to apply.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs».

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree requirements:

- Degree requirements are normally completed within 5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2313) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
- Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2313) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2313). This examination evaluates the student’s ability to write and defend an original research proposal, design experiments, and interpret results in a sound and critical manner. Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
- Successful completion of the Post-Comprehensive Enrollment (p. 2313) requirement.
- Enrollment in a minimum of one (1) credit hour of MICR 999 Dissertation for Ph.D. in Microbiology the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2313) (dissertation defense.) The doctoral candidate prepares a written dissertation detailing the results of their original research.
- Successful Dissertation Submission and Publication (p. 2313) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism
  - GSMC 851 Molecular Genetics
  - GSMC 852 Introduction to Biomedical Research I
  - GSMC 853 Cellular Structure
  - GSMC 854 Cell Communication
  - GSMC 855 Introduction to Biomedical Research II
  - GSMC 856 Introduction to Research Ethics
  - GSMC 857 Biographics
### GSMC 858
Introduction to Faculty Research  1

### GSMC 859
Research Rotations  1-4

- Successful completion of the following Microbiology courses:
  - MICR 810 Fundamentals of Immunology  2
  - MICR 811 Molecular Genetics of Bacteria and Phages  2
  - MICR 812 Molecular Virology and Pathogenesis  2
  - MICR 830 Seminar in Microbiology  1
  - MICR 835 Research in Microbiology  1-6
  - MICR 990 Research for Ph.D. in Microbiology  1-10
  - MICR 999 Dissertation for Ph.D. in Microbiology  1-10

- Successful completion of one of the following elective courses, which must be an advanced course in the student's research area. Courses are selected in consultation with the student's advisor. One of these courses must be completed prior to scheduling the oral comprehensive exam.
  - MICR 808 Immunology  3
  - MICR 809 Tumor Immunology  3
  - MICR 820 Bacterial Genetics and Pathogenesis  3
  - MICR 825 Virology  3
  - MICR 826 Oncogenesis Associated with Viral Infections  3
  - MICR 855 Host-Pathogen Interactions  3

- Successful completion of additional elective coursework as determined in consultation with the student's advisor or research committee. Electives may include the Microbiology courses listed below or courses from other departments.
  - MICR 801 Principles of Immunology  1
  - MICR 802 Principles of Virology  1
  - MICR 803 Principles of Bacterial Genetics and Pathogenesis  1
  - MICR 805 Teaching in Higher Education  3

- Successful presentation of a literature seminar.
- Participation in the Work in Progress series (meets monthly.)

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (p. 2050) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. *Other years' catalogs*.

Organisms and fall into three broad categories: Physiology cover the range from analysis of genes to analysis of whole research programs in the Department of Molecular and Integrative Physiology.

The faculty and graduate students participate in a variety of graduate level teaching programs in the Schools of Medicine and Health Professions. Extramural research support for fiscal year 2014 was 4.7 million dollars from the NIH. The Department of Molecular and Integrative Physiology ranks in the upper third of all physiology departments at public universities in the U.S. with respect to NIH funding.

### Courses

**PHSL 784. Faculty Research Programs. 1 Hour.**
The new student will be introduced to the faculty research programs. Each faculty member will present his/her research interests using one or more of the following formats: laboratory demonstrations, computer simulations and lectures. The objectives are to assist the new student in selecting his/her area of dissertation research and acquainting the new student with the department research resources. LEC.

**PHSL 834. Reproductive Physiology. 5 Hours.**
All aspects of reproductive physiology including an in depth study of ovarian and testicular development/function, neuroendocrine development/function, implantation, placentation, puberty, pregnancy and fertility regulation are covered. Historical and current scientific literature also encompasses various aspects of cancer biology including both in vitro and in vivo approaches.

- **Neuroscience** (http://www.kumc.edu/school-of-medicine/molecular-and-integrative-physiology/about-us/neuroscience.html)
  - This area includes the investigation of neural function in normal and disease states, and addresses problems at different levels ranging from the regulation of nervous system genes to central nervous system mechanisms controlling arm movement in the intact animal. Current research includes the study of development, transplantation, demyelinating diseases, recovery of function following peripheral and central nervous system injury and stroke, motor and cognitive defects associated with HIV, neuropathological, behavioral and molecular measures of early development, central mechanisms of hearing, neurotransmitters and plasticity.

  - This area includes the investigation of the hypothalamic-pituitary-gonadal axis, as well as uterine and placental function. Current studies are directed at mechanisms of hormone action, cell motility, cell-cell communication, cell and tissue differentiation and growth, cytokines and growth factors, gene expression and control of enzyme regulation in ovary, testis, sperm, hypotalamic-pituitary axis, preimplantation embryo, trophoblast/placenta and uterus. Mammalian and invertebrate reproductive models including transgenic and gene knockout mice provide fundamental information related to cell biology, endocrinology, and developmental biology.

The common thread is that all programs endeavor to understand biological function in health and disease. Nearly all faculty members have served on national advisory committees to major funding agencies such as the National Institutes of Health and as reviewers and editors to major scientific publications. The program provides outstanding didactic instruction and laboratory experiences that enable students to become effective teachers and independent investigators. The department offers the Ph.D. degree, and the combined M.D./Ph.D. degrees in conjunction with the School of Medicine. An M.S. degree may be granted in appropriate circumstances.

The faculty and graduate students participate in a variety of graduate level teaching programs in the Schools of Medicine and Health Professions. Extramural research support for fiscal year 2014 was 4.7 million dollars from the NIH. The Department of Molecular and Integrative Physiology ranks in the upper third of all physiology departments at public universities in the U.S. with respect to NIH funding.

### Department of Molecular and Integrative Physiology

Research programs in the Department of Molecular and Integrative Physiology cover the range from analysis of genes to analysis of whole organisms and fall into three broad categories:

  - This area includes the investigation of physiology and pathophysiology in experimental models ranging from cellular preparations to intact animals and humans. Current research is directed at studies of the microvascular system, cardiac system, hypoxia and oxygen transport in the respiratory system, metabolism within adipose, muscle and liver, and plasma membrane and fluid transport within the renal system. Research

Oral Comprehensive Exam may be scheduled as early as this semester if approved by committee to proceed.

Final Oral Exam (dissertation defense) scheduled semester approved by committee to defend and graduate

The new student will be introduced to the faculty research programs. Each faculty member will present his/her research interests using one or more of the following formats: laboratory demonstrations, computer simulations and lectures. The objectives are to assist the new student in selecting his/her area of dissertation research and acquainting the new student with the department research resources. LEC.

**PHSL 834. Reproductive Physiology. 5 Hours.**
All aspects of reproductive physiology including an in depth study of ovarian and testicular development/function, neuroendocrine development/function, implantation, placentation, puberty, pregnancy and fertility regulation are covered. Historical and current scientific literature also encompasses various aspects of cancer biology including both in vitro and in vivo approaches.
PHSL 835. Integrative Physiology of Exercise. 3 Hours.
To understand how the major physiological systems of the body respond to exercise with an emphasis on integration and function. Historical and current scientific literature will be used to generate discussion and support didactic material. Fundamentals of exercise physiology will be covered, but a background in exercise physiology is not required. Prerequisite: a general physiology course, an equivalent course and/or consent of instructor. LEC.

PHSL 838. Advanced Topics. 1-3 Hours.
Special studies designed and arranged on an individual basis to allow a student to pursue a particular subject through reading, special laboratory work, and conferences with a senior staff member. LEC.

PHSL 840. Advanced Genetic Analysis. 3 Hours.
This course will focus on principles that underlie genetic analysis, including mutation, complementation, recombination, segregation, and regulation. The genetics of commonly used model organisms such as yeast, flies, worms and mice will be examined, classic genetic screens performed to study phage assembly, cell cycle regulation, sex determination and X-chromosome inactivation will be discussed and modern-day techniques used to study inheritance and gene function in various systems will be analyzed. Human genetic analysis will also be covered, including population genetics, techniques for gene mapping, inherited diseases, genetic testing and gene therapy. Through reading and discussion of scientific literature and problem-based homework and exams, students will learn how to evaluate and interpret genetic data as well as develop and design genetic strategies to solve current biological problems. Prerequisite: Completion of IGPBS Core Curriculum or equivalent, or permission of Course Director. LEC.

PHSL 842. Comprehensive Human Physiology. 5 Hours.
Advanced course on modern human physiology. The course focuses on organ systems of the human body including nervous, cardiovascular, endocrine, digestive, respiratory, and reproductive and urinary systems. This course emphasizes the use of modern experimental approaches that take advantage of cellular and molecular technologies. Prerequisite: NONE LEC.

PHSL 843. Physiology of Disease. 3 Hours.
This course will cover physiological changes associated with representative diseases of major organ systems (endocrine, muscle, cardiovascular, respiratory, renal, gastrointestinal, immune, nervous, and reproductive). Example diseases to be covered include: diabetes, pituitary disorders, osteoporosis, obesity, non-alcoholic fatty liver disease, muscular dystrophy, hypertension, chronic obstructive pulmonary disease, asthma, glomerulonephritis, polycystic kidney disease, gastroesophageal reflux disease, inflammatory bowel diseases, rheumatoid arthritis, multiple sclerosis, infertility, endometriosis, and pregnancy complications. Class will include lectures, faculty-mentored student presentations, evaluations of research papers, and discussions. LEC Prerequisite: Comprehensive Human Physiology (PHSL 842), an equivalent course, or consent of Course Director. LEC.

PHSL 844. Neurophysiology. 3 Hours.
Somatosensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as NURO 844 and NEUS 844.) Prerequisite: Introductory course in neuroscience and consent of instructor. LEC.

PHSL 846. Advanced Neuroscience. 5 Hours.
Team taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHCL 846, NURO 846 and NEUS 846). Prerequisite: Permission of course director. LEC.

PHSL 847. Developmental Neurobiology. 2 Hours.
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847, NURO 847, and NEUS 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor. LEC.

PHSL 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.
An in-depth coverage of pathogenic mechanisms in neurological diseases: cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer’s, Parkinson’s, Huntington’s, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down’s syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, NURO 848, PHCL 848, and NEUS 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor. LEC.

PHSL 850. Research. 1-10 Hours.
Original laboratory investigation conducted under the supervision of a senior staff member. RSH.

PHSL 851. Seminar. 1 Hour.
Student participation (attendance and presentation) in weekly Departmental seminar series. The topics examined in these seminars are dictated by the interests of students and staff. Prerequisite: student must have passed their oral comprehensive exam. LEC.

PHSL 899. Master’s Thesis. 1-5 Hours.
Preparation of the formal thesis based on library research or independent research and in partial fulfillment of the requirements for the master’s degree. Credits will be given only after the thesis has been accepted by the student’s thesis committee. THE.

PHSL 999. Doctoral Dissertation. 1-10 Hours.
Preparation of the Dissertation based on original research and in partial fulfillment of the requirements for the Ph.D. degree. Credits will be given only after the dissertation has been accepted by the student’s dissertation committee. THE.

Master of Science in Molecular and Integrative Physiology

The Master of Science (M.S.) in Molecular and Integrative Physiology prepares the student for a career at the advanced technical level in academia, industry or government. It may also lead to teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2042) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary
Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs».  

Degree requirements:

- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour of PHSL 899 Master’s Thesis the semester the student will defend thesis and graduate.
- Successful completion of the defense (p. 2313).
- Successful thesis submission and publication (p. 2313) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2

Doctor of Philosophy in Molecular and Integrative Physiology

The Ph.D. in Molecular and Integrative Physiology prepares the student for a career in independent research in the broad area of Physiology. The Ph.D. is most often followed by one or more years of postdoctoral training in a specific area of research. Acquisition of a Ph.D. in Molecular and Integrative Physiology allows the individual to pursue positions in industry or government and following postdoctoral experience opportunities are available at the college or university level.

Upon acceptance into the graduate program in Molecular and Integrative Physiology, the student will select a research track for their subsequent studies. Three different tracks are available to the student:

- Cellular & Integrative Physiology
- Neuroscience
- Reproduction & Development

Each track has specialized curriculum requirements that must be followed for degree completion.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year the student entered the program. Other years' catalogs ».

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree Requirements:

- Degree requirements are normally completed within 6 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2313) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
- Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2313) by enrollment in full-time status a minimum of two semesters prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of the Oral Comprehensive Examination (p. 2313). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
- Successful completion of the Post-Comprehensive Enrollment (p. 2313) requirement.
- Enrollment in a minimum of one (1) credit hour of PHSL 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2313) (dissertation defense.)
- Successful Dissertation Submission and Publication (p. 2313) (according to Office of Graduate Studies policy.)
• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):

• Successful completion of track-specific requirements. Choose from one of the three tracks: Cellular & Integrative Physiology, Neuroscience or Reproduction & Development in consultation with the student’s advisor.

  • Cellular & Integrative Physiology
    • Minimum of three (3) credit hours of electives. Choose from the following courses:
      | Course        | Title                                           | Credits |
      |---------------|-------------------------------------------------|---------|
      | PHSL 835      | Integrative Physiology of Exercise              | 3       |
      | or PHSL 838   | Advanced Topics                                |         |
      | or PHSL 840   | Advanced Genetic Analysis                       |         |
      | or CBIO 800   | Mechanisms of Tumor Development and Progression: Colloquium Format | |
      | or CBIO 900   | Carcinogenesis and Cancer Biology               |         |
      | or other electives with approval by Graduate Director |         |

  • Neuroscience
    • Minimum of three (3) credit hours of electives. Choose from the following courses:
      | Course        | Title                                      | Credits |
      |---------------|--------------------------------------------|---------|
      | PHSL 844      | Neurophysiology                            | 3       |
      | or PHSL 846   | Advanced Neuroscience                       |         |
      | or PHSL 847   | Developmental Neurobiology                  |         |
      | or PHSL 848   | Molecular Mechanisms of Neurological Disorders |         |
      | or other electives with approval by Graduate Director |         |

  • Reproduction & Development
    • Minimum of three (3) credit hours of electives. Choose from the following courses:
      | Course        | Title                                      | Credits |
      |---------------|--------------------------------------------|---------|
      | PHSL 834      | Reproductive Physiology                    | 5       |

and other electives with approval by Graduate Director

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (p. 2050) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

Department of Pathology & Laboratory Medicine

The Department of Pathology & Laboratory Medicine crosses the bridge between basic science and clinical practice and involves the study and diagnosis of disease. We emphasize innovative, service-oriented programs that encompass a full spectrum of medical practice. Our Mission is to provide excellent teaching, research, patient care and community service and to meet the health needs of Kansas and the community at large. Our Aim is to provide a supportive work environment so that each individual can excel and pursue avenues that lead to recognition within the medical community and benefit healthcare at large.

The Department provides vital patient services to the Hospital, Greater Kansas City Metropolitan Area and outlying medical facilities through our clinical laboratory (http://www.kumc.edu/school-of-medicine/pathology/clinical-services.html) and anatomic (surgical) services (http://www.kumc.edu/school-of-medicine/pathology/anatomicsurgical-services.html). Faculty are board-accredited and the department provides a full spectrum of subspecialized expertise. The clinical laboratory processes over 3 million samples per year including the services of robotic automation and is accredited by the American Association of Blood Banks (AABB) (http://www.aabb.org/Pages/Homepage.aspx), College of American Pathologists (CAP) (http://www.cap.org/apps/cap.portal) and Foundation for the Accreditation of Cellular Therapy (FACT) (http://www.factwebsite.org). The core laboratory reviews over 30,000 surgical accessions and 10,000 surgical specimens per year, reflecting 9% year over year case growth; cytopathologists review 12,500 accessions per year. 2,300 bone marrow accessions are reviewed per year. The Department provides material to the University of Kansas Cancer Center’s Biospecimen Tissue Laboratory towards ongoing research and development of new and improved treatment modalities.

Basic Science research is conducted through our Division of Cancer & Developmental Biology (http://www.kumc.edu/school-of-medicine/pathology/researchbasic-science.html) and includes cancer biology, developmental biology and cell differentiation, stem cell biology and microbial and viral pathogenesis. Our laboratories are supported by external funding from sources including the NIH (http://www.nih.gov) as well as private resources; faculty and laboratories reside on both sides of the state line at the KUMC (http://www.kumc.edu) and Stowers Institute (http://www.stowers.org) campuses. Faculty numbers have increased dramatically since 2004, from 3 (2 at Stowers) in 2004 to 24 (5 at Stowers) in 2014.

The Department is committed to education (http://www.kumc.edu/school-of-medicine/pathology/education-programs.html) through its basic science research, medical and continuing medical education programs. Basic Science education is sponsored through our Graduate (http://www.kumc.edu/school-of-medicine/pathology/basic-science-graduate-program.html) and Postdoctoral programs and has grown commensurate with division laboratory expansion; there are currently 19 graduate students and 16 postdoctoral fellows enrolled in basic science programs and labs. Medical education is supported by our clinical and anatomic faculty and includes residency and postdoctoral hematopathology, surgical and cytopathology fellowships, post-sophomore fellowships, phase II elective rotations and phase I teaching services to the University of Kansas’ School of Medicine. Board accredited Continuing Medical Education is supported through a monthly Grand Rounds series that emphasizes current, applicable clinical and research topics; the department as well provides endowed subspecialty lectureships. Both our research and clinical/anatomic divisions provide regularly scheduled programs targeting cutting-edge basic science, subspecialized pathology topics and translational research, encouraging advancement of patient care.

Please refer to pages included in this catalog on both Master of Science and Doctor of Philosophy in Pathology for additional information regarding each program.

Courses

**PATH 803. Stem Cell Biology. 2 Hours.** Current concepts in the study of stem cells and the clinical potential in modern disease treatment. Students will learn concepts of stem cells: origin, regulation of pluripotency, and differentiative potential; experimental isolation and manipulation; and clinical application of isolated stem cells. Current scientific literature will be used to highlight recent advances in stem cell biology. Special emphasis will be placed on the ethical and legal issues surrounding the use of stem cells of both adult and embryonic origin. Prerequisite: Course in cell biology; consent of instructor. LEC.

**PATH 804. Selected Topics in Signal Transduction. 1 Hour.** A survey of the basic principles and contemporary literature of signal transduction pathways involved in cancer development and developmental biology. Faculty lecture and student presentations will
address selected topics in cellular signal transduction. Student seminars will focus on the scientific content of the publication with emphasis on appropriate presentation of background information, experimental methods, results and potential future directions. Critical discussion of papers will be provided by participating students and faculty. Prerequisite: Course in Molecular Biology. LEC.

PATH 805. Seminars in Pathology. 1 Hour. Presentation of Pathology Department graduate student research-in-progress. Students will conduct a one-hour seminar in which updates of their current research project(s) in pathology will be reported. The seminars are interactive and students are encouraged to participate in discussion of the presented work. Prerequisite: Completion of the IGPBS core curriculum and status as a second-year graduate student; consent of instructor. LEC.

PATH 806. Epigenetics. 2 Hours. Current concepts in epigenetic regulation of transcription, including its involvement in disease. Current scientific literature will be used to examine recent advances in the role of epigenetic regulation in transcription and its impact on cellular processes, including growth, differentiation, development, and disease. Students will learn the fundamental concepts of epigenetic regulation and the role of the epigenetic regulation in various gene expression systems. The role of epigenetics in long-range DNA interactions will also be studied, with an emphasis on enhancer, silencer, and locus control region function. Recent advances in the role of epigenetics in disease, including cancer, will also be examined. The course will examine current experimental methods to study epigenetics and gene regulation. Prerequisite: Completion of the IGPBS core curriculum or equivalent; consent of instructor. LEC.

PATH 890. Research in Pathology. 1-10 Hours. RSH. Replaces PATH 911 in prior catalogs. Enrollment for masters students and PhD students who have yet to successfully complete the oral comprehensive examination. RSH.

PATH 899. Master's Thesis. 1-7 Hours. THE.

PATH 912. Advanced Topics. 1-3 Hours. Offered by arrangement. Prerequisite: Approval of the instructor and completion of the IGPBS core curriculum or its equivalent. IND.

PATH 913. Introduction to Grant Proposal Writing. 1 Hour. This course will teach the fundamentals of writing a grant proposal with an emphasis on NIH proposals. This course is open to any graduate students interested in applying for pre-doctoral fellowships, and especially to graduate students in the Department of Pathology who will be conducting their comprehensive qualifying exams in the upcoming year. This course involves a combination of didactic lectures, student coursework and discussion. This course will include different principal investigators from the Pathology Department as guest speakers. Topics will include different sources of funding, grant submission and post-submission review process. However, the core component of this course will involve teaching the basic framework and components of an NIH R01 application. This course is designed to give practical structural guidance in scientific writing at a professional level and does not give guidance on specific research projects. Prerequisite: IGPBS coursework or equivalent, permission of instructor. LEC.

PATH 990. Doctoral Research in Pathology. 1-10 Hours. RSH for PhD candidates who have successfully completed the oral comprehensive examination. Prerequisite: PATH 890. RSH.

PATH 999. Doctoral Dissertation. 1-7 Hours. THE.

Master of Science in Pathology

The Master of Science in Pathology provides comprehensive training in understanding the molecular basis of disease and the fundamental mechanisms of cell growth and differentiation. It prepares the student for either a career in advanced academia or lays the base for continued terminal education. It may also lead to teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2042) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».
Degree requirements:

- Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Participation in faculty advisory committee meetings starting after 12 months in the program. Meetings at six-month intervals are recommended and required every 12 months with greater frequency as the student nears his/her thesis defense.
- Enrollment in a minimum of one (1) credit hour of PATH 899 Master's Thesis the semester the student will defend and graduate.
- Successful completion of a thesis defense (p. 2313). The thesis defense may be undertaken after the student has completed all requisite and elective coursework and has met the University's minimum credit hour requirement. The examination consists of both a final written submission of the student’s research project and related oral presentation. It should reflect the student’s current fund of knowledge, research skills and ability to progress in an industrial or education venue which may include pursuance of a terminal degree. It may be undertaken only after the student’s advisory committee has approved the student’s project and recommended the defense.
- Successful thesis submission and publication (p. 2313) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):

degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years’ catalogs».
Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).

- A background check (p. 2310) is required during the admission process; it may affect the student’s eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

- Three letters of recommendation.

- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
  - Research experience (beyond labs associated with lecture courses) is strongly suggested.
  - Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ». The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the PhD.

Degree requirements:

- Degree requirements are normally completed within 5 years of admission to the program although a maximum of 8 years is allowed.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2313) requirement prior to the semester the Oral Comprehensive Examination is scheduled.

- Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.

- Successful completion of GSMC 856 Introduction to Research Ethics or Stowers Research Integrity course (or equivalent) meets the Responsible Scholarship requirement.
• Successful completion of the Residence Requirement (p. 2313) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.

• Participation in faculty advisory committee meetings starting after 12 months in the program. Meetings at six-month intervals are recommended and required every 12 months with greater frequency as the student nears his/her oral comprehensive examination and dissertation defense.

• Successful completion of the Oral Comprehensive Examination (p. 2313). The examination is expected to be undertaken after the student has completed all requisite and elective coursework and approximately half-way through the program (e.g., 30th month in a five-year program). The examination consists of both a written research proposal and oral presentation and is intended to delineate the student's current fund of knowledge, research skills and ability to progress to a terminal degree in the department. It may be undertaken only after the student's advisory committee has approved the research proposal and recommended examination. The student will then submit a final version of the written research proposal for approval to his or her mentor, oral comprehensive examination committee and director of Pathology's graduate program a minimum of three weeks in advance of the examination; only when the student has successfully completed this stage will the request for examination be submitted to Graduate Studies for approval to defend (must be at least two weeks in advance of the examination). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

• Successful completion of the Post-Comprehensive Enrollment (p. 2313) requirement.

• Enrollment in a minimum of one (1) credit hour of PATH 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.

• Successful completion of the Final Oral Examination (p. 2313) (dissertation defense). The student will undertake this examination only after a preliminary draft and presentation of dissertation project has been successfully completed and accepted by the student's mentor and faculty advisory committee. A final draft is required to be submitted at least four weeks prior to defense and is to be presented to the student's mentor, dissertation defense committee and director of Pathology's graduate program. Only when the student has successfully completed this stage will the request for examination be submitted to Graduate Studies for approval to defend (must be at least three weeks in advance of the examination).

• Successful Dissertation Submission and Publication (p. 2313) (according to Office of Graduate Studies policy).

• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):

Comprehensive Oral Examination may be taken during the third year with the approval and recommendation of the student's advisory committee (normally after the 30th month in the program.)

Total Hours: 24-128

Department of Pharmacology, Toxicology, and Therapeutics

Pharmacology and Toxicology together form a discipline that examines the interactions of chemical substances with living systems. Pharmacology focuses on the properties of drugs, including their sites of action, processing by the human body, and therapeutic uses. Toxicology studies the adverse effects of chemicals such as environmental agents and synthetic compounds, including drugs and their metabolites, and the means to prevent or treat their effects. Because the study of chemicals requires an intimate knowledge of the biological systems affected, Pharmacology and Toxicology are by necessity an integrative discipline that studies the effects of chemicals at the molecular, cellular, organ, organismal, and population levels.

Faculty members in the Department of Pharmacology, Toxicology & Therapeutics at KUMC have diverse research interests. These research topics are essential for developing new drugs and are fundamental to determining the safety of all chemicals. Thus, our students obtain a broad educational background that prepares them for a career in research and scholarly work in a variety of settings, including academia, the pharmaceutical or biotechnology industries, or governmental agencies. Our department faculty has an excellent record of training students, and our graduates have become scientific leaders in academia, government and industry.

During the last five years, the Department faculty has undergone major changes with the addition of several tenure-track and research-track faculty, with a major focus in liver pathobiology and toxicology. This was facilitated in part by a Center of Biomedical Research Excellence (COBRE) grant from the National Institutes of Health, and has been accompanied by major new equipment purchases. The Department is been housed in state-of-the-art research space in the Hemenway Life Science Innovation Center. These resources provide an exciting environment that fosters personal and professional development in an atmosphere with ample opportunities for independent scholarship and strong collaborative activities.

Research opportunities are available for graduate students in the laboratories of faculty members throughout the department. Pharmacology faculty members have research interests in molecular and cellular neuropharmacology, neurotrauma, and the role of hormones and diet constituents on brain function. In addition, department faculty members study pharmacokinetics of drugs (absorption, distribution,
Courses

PHCL 761. General Principles of Pharmacology. 1 Hour.
General principles of pharmacology, including pharmacokinetics, pharmacodynamics, adverse effects, pharmacotherapeutics plus miscellaneous agents (antacids, cathartics, biologics). Open to advanced B.S. students and graduate students in Nursing, Allied Health, and other health related programs. Independent study program with use of computer assisted instruction, textbooks, syllabi, consultation with staff and exams as primary teaching instruments. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 762. Pharmacology of the Autonomic Nervous System. 1 Hour.
General principles of the autonomic nervous system, cholinergics, muscarinics, nicotinics, neuromuscular blockers, beta adrenergics, alpha adrenergics, and miscellaneous ANS agents. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 763. Cardiovascular-Renal Pharmacology. 1 Hour.
Antihypertensives, antiarrhythmics, vasodilators, cardiac glycosides, serotonin, histamine, polypeptides, diuretics, antilipemic agents. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 764. Pharmacology of the Central Nervous System. 1 Hour.
General principles of the central nervous system, stimulants, hallucinogens, depressants (hypnotics and sedatives), general and local anesthesia, antiparkinson agents, tranquilizers, analgesics, and anticonvulsants. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 765. Chemotherapy. 1 Hour.
Principles of chemotherapy, sulfonamides, penicillins, aminoglycosides, anticancer and antifungal agents, antimalarials, broad spectrum antibiotics, antiparasitic agents, and antisepsics. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 766. Blood-Endocrine Pharmacology. 1 Hour.
General principles of endocrine function and use, thyroid drugs, insulin, sex hormones, oxytocics, adrenal steroids, antiinflammatory agents, blood drugs, anticoagulants and vitamins. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 767. Toxicology. 1 Hour.
General principles of toxicology, clinical toxicology, solvents, metals, gases and dusts, corrosives, plant and animal toxins, pesticides, radiation, miscellaneous. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 809. Seminar in Pharmacology. 1 Hour.
Weekly meetings. LEC.

PHCL 846. Advanced Neuroscience. 5 Hours.
Team taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHSL 846, NURO 846 and NEUS 846). Prerequisite: Permission of course director. LEC.

PHCL 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer's, Parkinson's, Huntington's, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down's syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, NURO 848, PHSL 848, and NEUS 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHSL 846 or PHSL 848) or an equivalent course and consent of instructor. LEC.

PHCL 880. Essentials of Pharmacology. 4 Hours.
Introduction to Pharmacology for Graduate Students. Autonomic, Cardiovascular and Renal, Endocrine, Neuro, Antivirals Pharmacology. Autacoids: Workshop; Historical and Contemporary Methods used to Elucidate Mechanisms of Drug Action. Prerequisite: Successful completion of the Interdisciplinary Program in Biomedical Sciences or permission of the Instructor. LEC.

PHCL 890. Research in Pharmacology. 1-10 Hours.
For graduate students beginning their research training. RSH.

PHCL 898. Principles of Pharmacology. 1 Hour.
Chemical fundamentals in structure, actions and metabolism of drugs and toxics. Included are molecular features of drugs and toxics, stereoisomerism, receptor theory, dose-response relationships, agonists and antagonists, absorption, pharmacokinetics and structure-activity relationships. LEC.
PHCL 899. Thesis in Pharmacology. 1-10 Hours.
For students in a master’s program in pharmacology. THE.

PHCL 924. Clinical Pharmacology. 5 Hours.
Designed to give practical and theoretical experience with drug trials in humans. Includes animal experimentation when warranted. Clinical principles of drug therapy will be emphasized. IND.

PHCL 939. Carcinogenesis and Cancer Biology. 3 Hours.
Multidisciplinary approach. Cancer pathology. Mutagenesis, Genetics, Carcinogen metabolism. Signal Transduction, Apoptosis, Initiation and promotion. Tumor Immunology. Cell proliferation. Protooncogenes and suppressor genes. Hormonal carcinogenesis. Cancer epidemiology. Dietary and environmental causation and prevention. Cancer in various organ systems. (Same as PATH 939 and PTOX 939.) Prerequisite: Completion of one of the following: IGPBS modules 1-4 or equivalent or permission of instructor. LEC.

PHCL 990. Research for Dissertation in Pharmacology. 1-10 Hours.
Prerequisite: PHCL 890. RSH.

PHCL 999. Dissertation in Pharmacology. 1-10 Hours.
Prerequisite: Open to students of advanced standing enrolled in the doctoral program in Pharmacology. THE.

Courses

PHRM 910. Research in Pharmacology. 4 Hours.
Selected research problems may be investigated under the direction of individual staff members. A description of current staff research projects is available from the department. Offered in modules I-XII. Prerequisite: Permission of department. IND.

PHRM 911. Readings in Pharmacology. 2-10 Hours.
Selected topics for reading in advanced texts and original papers in pharmacology. A paper and Journal Club presentation of the selected topic are required. Offered in modules I-XII. Prerequisite: Permission of department. IND.

PHRM 914. Advanced Pharmacology. 4 Hours.
Consultant rounds, poison control, immunopharmacology, and environmental health. Offered in modules II and III. Prerequisite: Consent of instructor. FLD.

Courses

PTOX 830. Introduction to Clinical and Translational Cancer Research. 3 Hours.
Instruct students in developmental steps used in translating a basic science experiment with clinical applications into a proof of concept and application and human trial. Multidisciplinary approach; lectures from faculty in Pharmacology, KU Cancer Ctr, KUMCRI. Curriculum: Levels of evidence-clinical impact, Pre-Clinical modeling, In-Vitro studies Animal models, Cancer Drug Development-pharmacokinetics toxicity, Pre-Clinical Proof of Concept FDA, Creating a Pilot Study, Biostatistics 101, Phases of Clinical Trials, Data Collection, Support Staff, Regulatory and DSMBs, IRB and HIPPA, Funding Study: Grants Parma, Advertising study meeting accrual goals, Goals of Phase I study, Goals Objectives of Phase II Efficacy study, Phase 3 Multicenter Study: Value of Numbers Utilizing Cooperative Groups. Prerequisite: Completion of first 2 years of Med School or graduate school, or enrollment in MD/PhD program. Students no meeting one of these criteria will require permission from course instructor. LEC.

PTOX 887. Toxicologic Pathology. 4 Hours.
Introductory pathology course for graduate students preparing for a career in basic toxicology research. Topics to be presented and discussed include: cell injury, inflammation, repair and regeneration, immunopathology, neoplasia, tumor pathology, respiratory pathology, liver pathology, neuropathology, miscellaneous organ pathology, and lab animal clinical chemistry. LEC.

PTOX 889. Research in Toxicology. 1-10 Hours.
Introductory pathology course for planning on being research toxicologists. Topics to be presented and discussed: cell injury, inflammation, repair and regeneration, immunopath, neoplasia, tumor pathology, respiratory pathology, liver pathology, neuropathology, miscellaneous organ pathology, and lab animal clinical chemistry. LEC.

PTOX 898. Principles of Toxicology. 1 Hour.
Chemical fundamentals in structure, actions and metabolism of toxicants and drugs. Included are molecular features of toxicants and drugs, stereoisomerism, receptor theory, dose-response relationships, agonists and antagonists, absorption, pharmacokinetics, and structure-activity relationships. LEC.

PTOX 899. Thesis in Toxicology. 1-10 Hours.
For students in a master’s program in toxicology. THE.

PTOX 917. Disposition of Xenobiotics. 2 Hours.
Principles of absorption, biotransformation, and excretion of xenobiotics. Prerequisite: PHCL 888 or departmental permission. LEC.

PTOX 918. Toxicology. 4 Hours.
Selected topics in environmental, forensic, and industrial toxicology. LEC.

PTOX 939. Carcinogenesis and Cancer Biology. 3 Hours.
Multidisciplinary approach. Cancer pathology. Mutagenesis, Genetics, Carcinogen metabolism. Signal Transduction, Apoptosis, Initiation and promotion. Tumor Immunology. Cell proliferation. Protooncogenes and suppressor genes. Hormonal carcinogenesis. Cancer epidemiology. Angiogenesis. Dietary and environmental causation and prevention. Cancer in various organ systems. (Same as PATH 939 and PHCL 939.) Prerequisite: Completion of one of the following: IGPBS modules 1-4 or equivalent or permission of instructor. LEC.

PTOX 940. Techniques in Industrial Toxicology. 2 Hours.
A unique course where students are exposed to and have practical experience in techniques used for risk-assessment of chemicals. The course is taught with extensive input by industrial toxicologists who use these techniques on a daily basis. This course is offered at a local industrial setting. Prerequisite: PHCL 888; PTOX 917, PTOX 918, and PTOX 938, or departmental permission. LEC.

PTOX 990. Research for Dissertation in Toxicology. 1-10 Hours.
Prerequisite: PTOX 889. RSH.

PTOX 999. Dissertation in Toxicology. 1-10 Hours.
Prerequisite: Open to students of advanced standing enrolled in the doctoral program in toxicology. THE.

Master of Science in Pharmacology

Pharmacology and Toxicology both require an understanding of basic properties and actions of chemicals and the biological systems they affect. Pharmacology though, focuses more on the therapeutic actions of chemicals (particularly drugs) in the health sciences, the use of drugs as therapeutic agents in medicine or as tools in scientific research, and the development and regulation of pharmaceuticals. Pharmacologists perform many different duties including research and teaching in academic, nonprofit and industrial settings, and in consulting and public service.
The Master of Science (M.S.) in Pharmacology degree program provides an academic experience that emphasizes research skills and prepares students for a range of careers in varied employment settings or more advanced academic study. The M.S. curriculum provides a foundation of core concepts and skills through required coursework, but allows considerable flexibility for individualization through advanced electives and mentored research experiences.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

• Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attending the last academic year are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

• A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.

• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).

• A background check (p. 2310) is required during the admission process; it may affect the student’s eligibility to enter the program.

• An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

• Three letters of recommendation.

• Prerequisite coursework:
  • One year of general chemistry
  • One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  • One year of biological sciences
  • One semester of calculus
  • One semester of physics

• Research experience (beyond labs associated with lecture courses) is strongly suggested.

• Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs».

Degree Requirements:

• Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.

• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

• Completion of a minimum of 30 credit hours.

• Enrollment in a minimum of one (1) credit hour the semester the student will graduate.

• Successful completion of either a thesis defense or general examination (p. 2313) the semester the student will graduate.

• If thesis option chosen, then enrollment in a minimum of one (1) credit hour of PHCL 899 Thesis in Pharmacology and successful thesis submission and publication (p. 2313) (according to Office of Graduate Studies policy.)

• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS) (p. 2042) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4

• Successful completion of the following Pharmacology courses:
  - PHCL 890 Research in Pharmacology 1-10
  - PHCL 898 Principles of Pharmacology 1
  - PHCL 899 Thesis in Pharmacology (if thesis option chosen) 1-10

• Successful completion of elective coursework as determined in consultation with the student’s advisor.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years’ catalogs».

Doctor of Philosophy in Pharmacology

Pharmacology and Toxicology both require an understanding of basic properties and actions of chemicals and the biological systems they affect. Pharmacology though, focuses more on the therapeutic actions of chemicals (particularly drugs) in the health sciences, the use of drugs as therapeutic agents in medicine or as tools in scientific research, and the development and regulation of pharmaceuticals. Pharmacologists perform many different duties including research and teaching in academic, nonprofit and industrial settings, and in consulting and public service.

The Doctor of Philosophy (Ph.D.) in Pharmacology degree program prepares students for careers as independent scientists in academia, industry, or government through a broad-based curriculum and development of strong research design and communication skills. The Ph.D. didactic curriculum consists of a core of required discipline-based coursework, but is significantly individualized through advanced electives, seminars, extensive mentored research experiences, and consultation with the student’s selected advisory committee.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check is required during the admission process; it may affect the student’s eligibility to enter the program.
Degree requirements:

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree requirements:

- Degree requirements are normally completed within 6 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University's Research Skills and Responsible Scholarship (p. 2313) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 857 Biographics, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
  - Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2313) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2313). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
- Successful completion of the Post-Comprehensive Enrollment (p. 2313) requirement.
- Enrollment in a minimum of one (1) credit hour of PHCL 999 Dissertation in Pharmacology the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2313) (dissertation defense.)
- Successful Dissertation Submission and Publication (p. 2313) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4
- Successful completion of the following Pharmacology courses:
  - PHCL 880 Essentials of Pharmacology 4
  - PHCL 890 Research in Pharmacology 1-10
  - PHCL 898 Principles of Pharmacology 1
  - PTOX 917 Disposition of Xenobiotics 2
  - PTOX 918 Toxicology 4
  - PHCL 990 Research for Dissertation in Pharmacology 1-10
  - PHCL 999 Dissertation in Pharmacology 1-10
- Successful completion of a minimum of two elective courses that are at least two (2) credit hours each in consultation with the student's advisor and dissertation committee. Additional elective coursework may be taken as determined in consultation with the student's advisor.

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (p. 2050) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4

- Successful completion of the following Toxicology courses:
  - PHCL 880 Essentials of Pharmacology 4
  - PTOX 889 Research in Toxicology 1-10
  - PTOX 898 Principles of Toxicology 1
  - PTOX 917 Disposition of Xenobiotics 2
  - PTOX 918 Toxicology 4

- Successful completion of a minimum of two elective courses that are at least two (2) credit hours each in consultation with the student’s advisor and dissertation committee. Additional elective coursework may be taken as determined in consultation with the student’s advisor.

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (p. 2050) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. *Other years’ catalogs*.

Final Oral Exam (dissertation defense) scheduled semester approved by committee to defend and graduate.

Total Hours: 27-85

**Department of Preventive Medicine and Public Health**

The Departments of Preventive Medicine and Public Health in Kansas City and Wichita are passionate about healthy communities and are committed to improving the health of people through teaching, research and service. Our faculty, which includes physicians, epidemiologists, social scientists, and research scientists, conduct research and work in the community to harness public health and scientific discoveries for the benefit of all of our citizens.

**TEACHING**

Faculty and staff in the Departments of Preventive Medicine and Public Health are dedicated to offering degree programs to future public health practitioners as well as clinical researchers.

- Master of Public Health program (http://mph.kumc.edu)

**RESEARCH**

- Health Disparity/Equity Research
- Obesity, Physical Activity and Nutrition
- Tobacco Control
- Cancer Screening and Prevention

**SERVICE**

Our faculty are committed to serving the public health community and serve as collaborative partners with local, state and national public health agencies. Learn more > (http://www.kumc.edu/school-of-medicine/preventive-medicine-and-public-health/faculty-and-staff/faculty.html)

**Courses**

**PRVM 800. Principles of Epidemiology. 3 Hours.**
Basic concepts of epidemiology and methods for identification of factors influencing health and disease in human populations. Considerations are centered on physical, biological, psychosocial and cultural factors in relation to infectious and non-infectious diseases; interactions between agent, host, and environmental factors as determinants of health and disease; application of the epidemiologic approach to health services; retrospective and prospective analysis of morbidity and mortality data. LEC.

**PRVM 803. Introduction to Clinical Research. 1 Hour.**
This course will provide a basic and broad overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical research among the various institutional entities involved with clinical research at The University of Kansas Medical Center such as the Research Institute (RI), Clinical and Translational Science Unit, (CTSU) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on critical appraisal of research studies, and how to present research data. It is required that you have a research idea before enrolling. Students will find more benefit from course content and exercises if it can be directly applied to their own research idea. Prerequisite: Consent of Instructor. LEC.

**PRVM 805. Public Health Seminar. 1 Hour.**
This course will focus on public health practice. Guest lectures from national, state, and local public health agencies will present problems and how these problems are being addressed. Topics are expected to vary somewhat from year to year, depending on the priorities of the agencies. However, topics might include such issues as smoking prevention, automobile accidents, foodborne outbreaks, cryptosporidium outbreaks, lead poisoning in children, asthma in children, sexually transmitted diseases, diabetes, cancer control, nutrition, cardiovascular diseases, bioterrorism, legal issues and administration of public health. This course is the same as Public Health Grand Rounds. FLD.

**PRVM 806. Special Topics:. 1-4 Hours.**
In-depth, individualized investigation of special problems in community health. Designed especially for students with limited background in community health. Prerequisite: Permission of instructor. RSH.

**PRVM 807. Introduction to Field Epidemiology. 3 Hours.**
This course presents an overview of the methods used in epidemiologic field investigations. It provides students with a comprehensive review of the basic components of an outbreak investigation, an introduction to public health surveillance, and an overview of specific types of investigations in which a field epidemiologist might become involved, including traceback studies, environmental health assessments,
noninfectious health event investigations, contact tracing, and forensic epidemiology. In addition, resources that often come into play in outbreak investigations are presented, such as public health laboratories, the incident command system, and geographic information systems. Prerequisite: PRVM 800. RSH.

**PRVM 808. Clinical and Translational Research Seminar. 1 Hour.**
This seminar will present locally and nationally recognized clinicians and researchers to discuss various areas of clinical research. The course is designed to expose students to a variety of ongoing research and features speakers from a variety of disciplines including physicians, epidemiologists, biostatisticians behavioral scientists, nursing faculty, nursing students, medical students, allied health faculty and others. Prerequisite: Permission of instructor. LEC.

**PRVM 809. Introduction to Public Health. 3 Hours.**
This course provides an introduction to the basic principles of public health practice, including an overview of the history, philosophy, and scope of public health in the United States and globally. It will provide an overview of the primary disciplines within public health: biostatistics, demography, environmental health sciences, epidemiology, global health, health policy and management, social and behavioral health, and the analytical tools employed to measure public health indicators. Prerequisite: None. LEC.

**PRVM 810. Cardiovascular Disease Epidemiology. 3 Hours.**
This will be a study of Cardiovascular Disease risk factors, expression, treatment, and prevention from a population-based standpoint. Participants will gain knowledge of cardiovascular disease prevalence, incidence, risk factors, outcomes, and prevention strategies. The goal of this course is to understand major aspects of cardiovascular epidemiology and current strategies for primary and secondary prevention of major cardiovascular diseases. Attention will be given to physiologic mechanisms leading to atherosclerosis; traditional and novel coronary heart disease risk factors; prevention methodologies for cardiovascular disease, and the role of lifestyle, dietary, and genetic factors in the development of cardiac and vascular diseases. The course will be evidence- and outcomes-based, with reference to landmark studies and major publications. Relevant historical breakthroughs and current controversies in CVD will be discussed using recent publications from the lay press and peer-reviewed journals. Emphasis will be placed on coronary artery disease and its clinical manifestations. Participants will learn to critically assess public health measures undertaken to recognize, manage, and treat atherosclerotic disease processes. LEC.

**PRVM 811. Introduction to Pharmacoepidemiology. 3 Hours.**
Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects of health. Evaluating a drug’s effects commences when a chemical entity becomes a drug candidate, intensifies through clinical trials, and continues after products reach the market. These studies are critical for supporting the proper use of medications in terms of efficacy, effectiveness, and cost-effectiveness. This course provides a broad introduction to the principles of pharmacoepidemiology with a focus on applications in the medical literature. Prerequisite: PRVM 800. LEC.

**PRVM 812. Introduction To One Health. 2 Hours.**
"One Health" encompasses the complex interrelationships among humans and animals, humans and the environment, and animals and the environment. Incorporates original videos of leading subject matter experts and researchers, case studies, and scientific readings. It addresses zoonotic diseases (those that may be transferred between humans and animals) and environmental issues that impact human, animal, and ecosystem health. Topics include disease surveillance, the human-animal bond, the built environment, disaster response, sanitation, rural/suburban/urban interface, and food safety and security. Prerequisite: Two courses in the biological sciences. Course Format: This is an interactive online course led by the instructor. LEC.

**PRVM 813. Chronic Disease Epidemiology. 3 Hours.**
This course is required for students on the Epidemiology track but is open to other MPH students as well. It extends the methods and concepts of basic epidemiology to the prevention and control of major chronic diseases. Topics will include surveillance, risk factors, high risk populations, pathophysiology, and consequences. Students will also gain experience developing a proposal to conduct a screening, etiologic, or prevention study of selected chronic diseases. Prerequisite: PRVM 800 Principles of Epidemiology. LEC.

**PRVM 814. Health Literacy. 3 Hours.**
This is a graduate-level course designed to teach students about literacy and its implications on public health practice and research in the United States, with a focus on health literacy. Students will be introduced to the different types of literacy, including health, prose, quantitative, document, and computer, and how to evaluate them. In addition, students will learn how to lower literacy levels of health education materials for practical application. Cultural competency in literacy will also be discussed, with a focus on culturally competent health communication and education. LEC.

**PRVM 815. Infectious Disease Epidemiology. 3 Hours.**
This course emphasizes the underlying concepts of the epidemiologic approach as it relates to infectious diseases. Students will be introduced to principles and methods of disease surveillance and outbreak investigations using case studies. Essential concepts relating to vaccine efficacy and effectiveness in preventing infectious diseases, barriers to achieving adequate vaccine coverage, and how ongoing vaccine controversies relate to the scientific literature base will be covered. The evolving public health concerns of bioterrorism and antibiotic resistance will also be addressed. Characteristics of the agent, host, and environment that influence disease transmission will be examined in the context of control strategy identification. Instruction is primarily by online learning tools, with limited short lectures. Prerequisite: PRVM 800 Principles of Epidemiology. LEC.

**PRVM 816. International Health. 3 Hours.**
This course is divided into seven sections: 1) Global health introduction, 2) Health inequalities and the socio-economic context of disease, 3) Maternal and child health, the health of special populations, 4) The spread of infectious diseases, and HIV/AIDS, malaria, TB, 5) Globalizations and emerging infectious diseases, and nutrition, 6) Environmental health and the health of effects of environmental change, 7) Global health players and players, and global health priorities. Prerequisite: PRVM 800 Principles of Epidemiology or permission of the department/instructor. LEC.

**PRVM 817. Gender, Race, Class, and Health. 3 Hours.**
This graduate-level course examines the intersection of gender, race, and class and its effects on individual and public health. The theoretical orientation of this course is informed by Black feminist scholarship on intersectionality: that is, the intersecting oppressions of gender, sexuality, race, class, and nation. This theory is extended to contemporary public health and social problems through an examination of applied public health studies and interventions. Students’ work will be grounded in theory, but they will learn to apply theory in fieldwork-based exercises and critical analysis of public health problems. LEC.

**PRVM 818. Social and Behavioral Aspects of Public Health. 3 Hours.**
The course provides an overview of social and behavioral aspects of public health including the relevance of psychological and social factors for health, the principles of health behavior change, the application of these principles in various health domains, and an introduction to health behavior and health promotion interventions. The course
begins with the rationale for studying social and behavioral aspects of health and examines select social and behavioral factors (e.g. gender, socioeconomic status, race/ethnicity) as they relate to physical well-being. The course also focuses on well-established theories of health behavior and examines the role of psychological and social factors in specific health topics (e.g. obesity, cancer, cardiovascular disease, smoking).

Prerequisite: None. LEC.

PRVM 819. An Introduction to Geographic Information Systems (GIS) for Health. 2 Hours.

This course will provide students with an overview of Geographical Information Systems (GIS) applied in the context of health (public health, allied health and health care). Students will be introduced to GIS and health applications used locally, nationally and internationally. They will learn about pertinent data, how to visualize the data, how to design maps that represent the data, how to use spatial data, how to geocode data, and how to prepare and analyze data. Real-life examples will be used throughout the course and students will gain hands-on experience using a GIS application. Students will also be kept abreast of any new GIS resources and trends or developments in GIS as relates to health.

Prerequisite: Basic computer skills. LEC.

PRVM 820. Introduction to Oral Public Health. 3 Hours.

This course is a comprehensive introduction to oral public health in general as it relates to public health in general, within the context of the U.S. healthcare system. Course content includes: Basic organizational arrangements of health services in the U.S., concepts of public health and dental public health, public health problems and oral public health problems in the context of social and community factors and social determinants of health behavior, oral public health developments from a historical perspective, oral health/dental care financing and decision making; assessments of oral health status and need for care; population-based programs for oral disease prevention/health promotion, oral/dental public health research methodology and the practice of oral public health.

LEC.

PRVM 821. Research Methods in Public Health. 3 Hours.

This is an introductory behavioral research methods, course. Students will learn about research designs, hypothesis formation, measurement, sampling, ethical issues in research, and pragmatic and research issues with evaluating behavioral interventions. Students will also learn how to critically evaluate and develop behavioral randomized clinical trials.

Prerequisite: None. Social and Behavioral Aspects of Health and an Introductory statistics course are recommended but not required. LEC.

PRVM 823. Field Experience in Community Health Education. 1-3 Hours.

Internships with community agencies, community preceptors in areas of concentration. Prerequisite: Permission of instructor. FLD.

PRVM 825. Child and Family Health. 3 Hours.

Family, maternal, and child health problems will be addressed. Topics will include prenatal care (maternal health and habits); fetal growth factors, well baby care (immunizations, nutrition, growth, development, behavior); developmental disabilities; adoption; adolescence; child abuse; family as a support system; long-term medical and social outcomes of chronic illness/disability in children. Subjects are covered through lecture, discussion and field visits under the supervision of a pediatrician.

Prerequisite: Permission of instructor. LEC.

PRVM 826. Epidemiology for Advanced Nursing Practice. 3 Hours.

Epidemiology for Advanced Nursing Practice is a 3 credit hour graduate level course designed to synthesize basic epidemiology with clinical nursing concepts. The course is a core course required for the Doctor of Nursing Practice degree in which basic concepts of epidemiology and methods for identification of factors influencing health and disease in human populations are discussed. Considerations are centered on: 1) Physical, biological psychosocial and cultural factors in relation to infectious and non-infectious diseases; 2) Interactions between agent, host, and environmental factors as determinants of health and disease; 3) Application of the epidemiologic approach to clinical nursing; and 4) Measures of disease occurrence and risk. Prerequisite: None. LEC.

PRVM 827. Public Health Administration. 3 Hours.

This course provides students with an overview of the core functions of public health: assessment, policy development, and assurance together with an introduction to the leadership and management skills necessary to provide leadership in public health. It uses both theoretical and practical material to develop basic administrative competencies necessary for practice in community and public health. Assignments are designed to provide practice in applying course materials. LEC.

PRVM 828. Public Health Program Development and Management. 3 Hours.

Framed within the context of the core public health functions, assessment, policy development, and assurance, this course provides students with an overview of the planning process within a community setting. This course will use both theoretical and practical material to develop basic competencies in planning, implementing, and evaluating health programs; however, the predominant focus will involve the planning process and operations of a public health program. Assignments are designed to provide practice in applying course materials. Prerequisite: PRVM 818 Social and Behavioral Aspects of Public Health, PRVM 800 Principles of Epidemiology, PRVM 827 Public Health Administration. LEC.

PRVM 830. Environmental Health. 3 Hours.

This course will identify specific health effects of environmental contaminants and discuss principles of prevention. Specific problem areas will include air and water pollution, solid waste disposal, food preservation, radiation, industrial hygiene, occupational skin and lung diseases, chemical carcinogens accidents, an agricultural health and safety. A number of guest lecturers and field trips will be utilized. LEC.

PRVM 832. Environmental and Occupational Epidemiology. 3 Hours.

Epidemiological concepts applied to problems in environmental and occupational health will be discussed. This course will focus on studies of workplace and environmental exposures, exposure assessment and monitoring, hazardous exposures and adverse health effects, and approaches to prevention. Specific health effects of exposure to toxic chemical and physical agents will be discussed, as well as reading, evaluating, and interpreting epidemiologic studies. Prerequisite: PRVM 800 Principles of Epidemiology and PRVM 830 Environmental Health or permission of instructor. LEC.

PRVM 834. Community Health Education and Promotion. 3 Hours.

Designed to teach students the core concepts in community health education and promotion, students will be introduced to the scientific and practical knowledge necessary to develop successful research and implement programs. Students will learn models of analysis, management of health promotion in the workplace, health education diagnosis, planning, and evaluation. A variety of examples will be used, including the Centers for Disease Control model, and other commonly recognized approaches to community health promotion. Prerequisite: PRVM 818 Social and Behavioral Aspects of Public Health or permission of instructor. LEC.

PRVM 835. Evaluation Methods in Public Health. 3 Hours.

Principles and procedures to evaluate health promotion and disease prevention programs. Includes data collection methods, instrument scale development, measurement, and evaluation designs. Case studies of
PRVM 836. Epidemiology in Aging. 3 Hours.
An overview of the aging process, review of current knowledge of
epidemiology of selected diseases, such as dementia and
osteoporosis, and falls that primarily affect aging individuals. Emphasis
on epidemiologic designs, methods, and issues (e.g., low response rate and
measurements) that are pertinent to research on aging individuals.
Prerequisite: PRVM 800, BMTR 811/PRVM 804, or permission of
instructor. LEC.

PRVM 838. Reproductive Epidemiology. 3 Hours.
Epidemiologic concepts applied to problems in reproductive health of men
and women. Critical analysis of epidemiologic studies on sociocultural,
individual and pregnancy-specific risk factors to reproduction. Field trips
will be used to explore methods to reduce adverse reproductive health
outcomes in populations (worksites, managed care organizations, local
health departments). Literature synthesis skills are used in a project
focused on preventing adverse reproductive outcomes in a defined
population. LEC.

PRVM 841. Advanced Epidemiology I: Methods in Cross-Sectional
and Case-Control Studies. 3 Hours.
This course will concentrate on concepts and application of various
statistical techniques in the analysis of epidemiological data. Students will
be oriented toward application of SAS in data analysis and interpretation
of data from cross-sectional and case-control studies. Prerequisite:
Principles of Epidemiology (PRVM 800), Fundamentals of Biostatistics
I (BIOS 714), and Management of Public Health Data (PRVM 875) or
Statistical Computing SAS Base (BIOS 820.) LEC.

PRVM 842. Advanced Epidemiology II: Methods in Longitudinal
Studies. 3 Hours.
This course will concentrate on concepts and application of various
statistical techniques in the analysis of epidemiological data. Students will
be oriented toward application of SAS in data analysis and interpretation
of data from longitudinal studies and controlled clinical trials. Prerequisite:
Principles of Epidemiology (PRVM 800), Fundamentals of Biostatistics
I (BIOS 714), Advanced Epidemiology (PRVM 841), and Management
of Public Health Data (PRVM 875) or Statistical Computing SAS Base (BIOS
820.) LEC.

PRVM 843. Obesity and Public Health. 3 Hours.
Obesity is becoming epidemic and pandemic throughout the world.
What are the personal public health consequences of this phenomenon?
Are we as focused as we should be on the effects of this growing
problem? This course reviews the basic definition of obesity and defines
its known personal and public health effects: including issues of bias
and stigmatization. The course further examines the epidemiology, and
future predicted consequences of obesity and then examines personal
models of treatment followed by examination of public health efforts
to date. Finally, proposed interventions and areas for research are
discussed and evaluated. Students apply principles of behavioral change
and communication to develop proposed public health approaches to
ameliorating the obesity problem in children and adults. Prerequisite:
PRVM 800: Principles of Epidemiology and PRVM 818: Social and
Behavioral Aspects of Public Health, or permission of instructor. LEC.

PRVM 844. Organization, Financing and Delivery of Health Care. 3 Hours.
This course will facilitate an understanding of the difference between
health care and medical care and the place of medical care in the
economic system; the role of social values and economic principles
in societal decision making and the utilization of health care services;
and public

PRVM 851. Public Health Policy and Law. 3 Hours.
This course is designed to prepare public health leaders to live and work
in a world of laws, and to play an active and effective role in policy making
and analysis. Students will understand the source of national, state,
and local statutes and regulations and understand the role of common
law. Students will understand the policy process at the national, state,
and local level, and develop skills analyzing legislation and influencing policy decisions. Students will understand the rule making process at the national and state level. LEC.

PRVM 853. Responsible Conduct of Research. 1 Hour.
The purpose of this course is to engage research trainees in reading about, considering, and discussing the responsible conduct of science. The course is designed as an option for meeting current federal regulations, which require that all NIH training grants provide training in the responsible conduct of research. This course provides a concise overview of key subject areas in the responsible conduct of research. It is designed to make students aware of relevant guidelines, policies and codes relating to ethical research, as well as to provide the skills for identifying and resolving ethical conflicts that may arise in research. LEC.

PRVM 855. Seminar in Women’s Health. 3 Hours.
Seminar in Women’s Health is a 3 credit elective, graduate level course focusing on gender issues that are relevant in treatment approaches to various health issues, the differing health status of minority women, the evolvement of women’s health to include the entire life span and areas other than reproduction, the changing implications of health care and policy and men in women’s health. No prerequisite. LEC.

PRVM 856. Community-Based Participatory Research. 3 Hours.
This is a graduate-level course designed to teach students the basic methods of conducting and evaluating community-based participatory research (CBPR). Students will be introduced to the five phases of CBPR, including partnership formation and maintenance, community assessment and diagnosis, defining the issue, documentation and evaluation of partnerships, and feedback, interpretation, and evaluation of partnerships. In addition, students will learn how to find funding mechanisms and journals that are appropriate for CBPR, as well as some of the key factors in writing about CBPR. Students will be introduced to a variety of examples of well-done CBPR and will learn what makes it different from other types of research done in community settings. Prerequisite: Social and Behavioral Aspects of Public Health or permission of instructor. LEC.

PRVM 857. Motivational Interviewing in Public Health Settings. 1 Hour.
The course is designed to introduce participants to Motivational Interviewing, its concepts, and to the subsequent skills required for helping people to change. This course will be cross-listed with DN 857. LEC.

PRVM 858. Public Health in Film. 2 Hours.
The Public Health in Film course will allow students the opportunity to address multiple public health issues throughout time via educational films and public health documentaries and discussion. Specific issues will include, but will not be limited to: polio, leprosy, cholera, tuberculosis, the bubonic plague, influenza, bioterrorism and natural disasters. LEC.

PRVM 859. Tobacco and Public Health. 3 Hours.
This course will provide an overview of tobacco as a public health problem and tobacco politics. Students will learn about the pharmacology of nicotine, the mechanisms leading to tobacco addiction and biologic factors that affect pharmacology and tobacco use such as the menstrual cycle and comorbid illnesses such as depression and others. Public health approaches to preventing tobacco use initiation will be studied, including which initiatives are most effective. State-of-the-art methods to assist smokers to quit will be reviewed, including pharmacologic interventions, counseling by health professionals and education/motivation support. Barriers to obtaining services will be explored, such as educational needs among various types of health professionals, and access to care in rural areas or among clients with certain types of health insurance. LEC.

PRVM 860. Community Nutrition. 3 Hours.
Comparative analysis of the demographic, geographic, and economic structure of various types of communities in Western and non-Western societies. Relationships between these compositional elements of a given community, its food and nutrition resources and services, and the nutritional status of its members. Development of alternative strategies for resource expansion and/or for delivering appropriate nutritional services to target communities. Prerequisite: Permission of instructor. LEC.

PRVM 861. Leadership in Public Health. 3 Hours.
This course is designed to enhance and develop leadership knowledge, skills, and competencies vital to develop change strategies, which will impact public health workforce in Kansas. This will also be achieved by specifically addressing the core functions (assessment, policy and assurance) of public health workers as well as the national Healthy People 2010 objectives. LEC.

PRVM 862. Terrorism, Emergency Preparedness and Response. 3 Hours.
Through lectures, tabletop exercises, and invited speakers, the course content will include the following topics: terminology and core competencies, public health infrastructure, collaboration and communication, roles and responsibilities, psychological effects of terrorism, agricultural and zoonotic bioterrorism, law enforcements and public health, epidemiology of BT diseases (including agent specific lectures), burn injuries, risk communication, Strategic National Stockpile (SNS), National Incident Management System (NIMS), public health law as related to bioterrorism, and public health laboratory response related to bioterrorism. LEC.

PRVM 863. Health Disparities in Public Health. 3 Hours.
This course is designed to enhance students’ understanding of the biopsychosocial factors that contribute to disparities in health and health care. This course will also review strategies developed to reduce health disparities. Prerequisite: PRVM 818 Social and Behavioral Aspects of Public Health is recommended. LEC.

PRVM 864. Global Public Health Impact of HIV/AIDS. 3 Hours.
Historically reviews the HIV pandemic to evaluate lessons learned in prevention and treatment of the disease and successes and failures of public policies to reduce the impact of HIV in various countries. Critically analyzes HIV prevention interventions (voluntary counseling and testing, prevention of mother-to-child transmission, promotion of safer sex practices, clean needle exchange, methadone or buprenorphine programs, treatment with antiretroviral therapy, pre- and post-exposure prophylaxis, vaccine and microbicide development) and challenges with their implementation. LEC.

PRVM 867. Ethical Issues in Public Health. 3 Hours.
Lectures and small group discussions explore public health ethics, social justice and autonomy as they relate to public health practice and health policy. Current issues in health policy are discussed including: the right to health and health care, bioterrorism, and health inequalities, poverty and power. Weekly small group discussions include cases on MCHP, obesity and “fat taxes,” resource allocation, and disparities in infant mortality. Student evaluation is based on class participation, a small group project, and a final paper based upon a case study addressing ethical issues relevant to the student’s area of public health specialization. LEC.

PRVM 868. Biomedical Informatics Driven Clinical Research. 3 Hours.
This course introduces students to biomedical informatics, clinical and administrative information systems and workflows, data warehousing and hypothesis generation using HERON and the i2b2 web client, programming using Structured Query Language (SQL), and developing a computable phenotype and research cohort for observational research or
prospective trial eligibility based on secondary data sources centered on electronic health records. Students will also gain experience developing their cohort, an analytic ready database and files using SQLite and REDCap, conduct preliminary analysis, and prepare an abstract for submission to a clinical or informatics forum/conference. Prerequisite: PRVM 800 Principles of Epidemiology or BIOS 714 Fundamentals of Biostatistics I. LEC.

PRVM 870. Environmental Health Law and Policy. 3 Hours.
This is a survey course that will provide a broad, practical understanding of some important local, state, and federal environmental statutes, regulations, and case law. This course will cover the fundamentals of environmental law, examining the history, development, and current status of environmental law and federalism in the United States. Environmental Law is designed to introduce the student to a variety of important environmental challenges addressed by environmental laws and policy issues surrounding environmental problems as well as the legal complexities of environmental regulatory and administrative schemes. Prerequisite: PRVM 830 Environmental Health. LEC.

PRVM 871. Environmental Monitoring and Exposure Assessment. 3 Hours.
This course will examine the various techniques and analytical methods to monitor and measure environmental contamination in air, water, and soil in both indoor and outdoor environments. Students will learn to use measurement devices and instrumentation typically used to measure and analyze these environmental contaminants. They will also learn to interpret the data and model contaminant levels in the environment and use this data to model likely human exposures. Environmental Monitoring and Exposure Assessment is critical to the assessment of environmental hazards and identifying exposure risk to individuals and populations. The course will focus on standard sampling and analytical techniques that have been developed to assess contaminant levels, quality assurance, data analysis, pathways of exposure and the fate and transport of environmental contaminants. The course will also briefly discuss biomarkers as a tool to estimate exposure, dose or body burden, and the information they provide will be compared to and contrasted with measures of contaminant levels in the environment. Prerequisite: PRVM 830 Environmental Health. LEC.

PRVM 872. Grant Writing. 3 Hours.
This course combines instruction and practical exercises to move the participant step-by-step through all stages of planning programs, identifying funding sources, and writing grant proposals. Upon completion of the course, the student will have developed a quality proposal and be able to demonstrate skills in preparing grants. These will include: Development of fundable idea, Researching appropriate funding opportunities from foundations, corporations, and governmental sources; Finding grant information on the Internet; Reviewing federal grant applications, including NIH, NSF, and HRSA applications; Development of proposal elements and drafting a quality grant application; Review of certification and assurances required on grant applications; Review of evaluation and program outcome requirements on grant applications; Working with other participants in small groups to act as internal grant reviewers, responding to reviewers, and resubmitting grants. LEC.

PRVM 873. Scientific Writing. 2 Hours.
Includes the mechanics of how to write clearly, focusing on mechanics, structure, and style. Students will practice specific strategies for writing effectively, with in depth attention paid to how ideas are distributed through well written sentences and paragraphs. Also includes editing and revision of writing for publication and grant submission. LEC.

PRVM 874. Toxicology and Risk Assessment. 3 Hours.
This course will introduce students to basic toxicological concepts. Students will be provided opportunities to use these concepts to describe the underlying biochemical or physiological basis for health effects related to exposure to environmental toxicants and will practice interpreting the findings from student in the literature and critiquing studies. In the second part of the course students will learn the basic components of a health-based risk assessment and will practice applying these concepts by conducting a risk assessment. Prerequisite: PRVM 800 Principles of Epidemiology and 830 Environmental Health and one semester of college-level biology. Completion or concurrent enrollment in PRVM 832 Environmental and Occupational Epidemiology is recommended. Additional biology and chemistry courses may be helpful. LEC.

PRVM 875. Management of Public Health Data. 3 Hours.
A 3 credit hour graduate level course concerning basic computing skills necessary for any advanced epidemiologic or administrative quantitative methods. This course covers basics of variable and dataset creation, building, maintenance and basic descriptive (not interpretive) analysis. The course is designed to be of use to students entering a variety of research, administrative and public health settings in public health, clinical and other fields. Software covered will include SAS, SPSS, Epi Info, KIPHS, Microsoft-EXCEL and ACCESS. The course can stand alone, or prepare students for Biostatistics and Epidemiology courses. Public data presentations will be stressed to prepare students to communicate about data with the lay public. LEC.

PRVM 876. Health Services Research Using Public Payer Data. 3 Hours.
Several contemporary health reforms have rendered analyses of public payer data more feasible and valuable for population health, health services research, and quality improvement. The addition of an outpatient drug benefit to standard inpatient and outpatient service coverage for Medicare, for example, has stimulated a growth industry in comparative effectiveness research and expanded policy research across the health care system. Pending expansion of States’ Medicaid programs under the Affordable Care Act will undoubtedly create the largest public health care insurance program in the United States. The Centers for Medicare Medicaid Services (CMS) have streamlined researchers’ access to national Medicare and Medicaid populations for health services and quality improvement projects through contracts with the Research Data Center at the University of Minnesota and the Chronic Condition Warehouse. In addition, Kansas Medicaid has invested in a Data Analytic Interface that offers ready access to our state’s employees, Medicaid beneficiaries, and private health insurance claims data for enterprising researchers including tremendous opportunities for state of the art, contemporary policy analyses. This is indeed an exciting and opportune time for students embarking on careers in health services, policy, and population health research. This course is designed to prepare students for real world analyses using standard public payer claims data. LEC.

PRVM 877. Health Communication. 3 Hours.
This course is focused on community health education and promotion, especially designing and evaluating health communication programs for populations with shared risks, exposures or behaviors. Ways in which the general public receives and assigns meaning to health messages will be reviewed. The strengths and weaknesses of specific health communication initiatives will be analyzed in terms of theoretical constructs, costs and outcomes. Students apply public health principles by designing a substantive health communication piece or educational material. Prerequisite: PRVM 800: Principles of Epidemiology and PRVM 818: Social and Behavioral Aspects of Public Health. Permission of instructor may be granted in lieu of these prerequisites. LEC.
PRVM 878. Cost-effectiveness and Decision Analysis. 3 Hours.
This course examines techniques that are used in making clinical and management decisions when outcomes are uncertain. The course begins with a review of probabilistic decision making, then explores methods of analyzing choices with uncertain outcomes. Stressing the use of decision trees and sensitivity analysis. The course examines cost minimization analysis, cost effectiveness analysis, and cost benefit analysis. (Same as HPM 872) LEC.

PRVM 879. Financial and Human Resource Management. 3 Hours.
This graduate-level course covers principles and skills for financial and human resource management within public health organizations. It focuses on non-profit and public settings. Financial management topics include the principles and purposes of accounting, concepts related to finance, and financial strategic planning. Human resource management topics include job design and hiring, performance management, retention, compensation/benefits, legal issues, and termination. The focus of the course is twofold: 1) understanding the concepts behind financing and in gaining skills in interpreting and using financial information; 2) gaining skills in human resources management and resource development. The course is designed for people who are interested in public health administration, but should be useful to anyone with an interest in public health leadership in any setting. Prerequisite: Departmental permission. LEC.

PRVM 880. Seminar in American Indian Health. 3 Hours.
This is a graduate-level course designed to teach students about current issues in American Indian health, as well as provide a basic historic context for understanding these issues. Students will read current literature from the academic journals and will be exposed to research being done today in American Indian communities, some of which has not yet been published. In addition, students will gain an understanding of what health disparities exist in American Indian communities and some of the reasons why they exist, including access issues and other barriers to care, from both Western and Native points of view. Students will be exposed to some of the difficulties in conducting health research in Native communities and some of the more successful techniques to overcome barriers. Prerequisite: None. LEC.

PRVM 881. Performance Improvement in Public Health. 3 Hours.
This course provides students with an overview of performance improvement and management integrated within the core public health functions: assessment, policy development and assurance. It uses both theoretical and practical material to develop basic competencies necessary for performance management in community and public health settings. Key topics will include assessment tools and models, continuous quality improvement, evidence-based practice, performance improvement methods (epidemiologic measurement, measures of central tendency, problem identification and analysis, control charts) and the development of team-based problem solving and resolution. Prerequisite: PRVM 800 Principles of Epidemiology, PRVM 875 Management of Public Data; PRVM 827 Public Health Administration is preferred. LEC.

PRVM 889. Public Health Capstone. 1-3 Hours.
The public health capstone is a 192 hour (12 hours/week for the 16 week semester) culminating experience that requires students to synthesize and integrate knowledge and/or apply theories and principles learned to an area of public health. The capstone is meant to be taken at the end of the student's degree program, and is designed to give the student an opportunity to apply their skills to a variety of problems or issues in public health. The capstone should be primarily focused on addressing concentration specific competencies. While the exact activities and outcomes of the capstone will differ across concentrations all capstones, regardless of concentration, must include a written report and an oral defense. Prerequisite: All MPH core and required courses, nine of the 12 concentration credits completed, PRVM 891 Public Health Internship, last semester of enrollment. LEC.

PRVM 889. Thesis. 1-3 Hours.
Preparation of a formal thesis based on the research conducted on a community health problem. After the thesis has been completed, the student will be given an oral examination on the research methods and content. Prerequisite: All MS-CR core and required courses completed or in progress in the student's final semester (This course may be repeated for a maximum of 6 credit hours). THE.

Graduate Certificate in Community-Based Participatory Research

The Department of Preventive Medicine and Public Health is passionate about healthy communities and is committed to improving the health of people through our teaching, research and service. Faculty, students and staff work closely with members of the community on a wide variety of public health topics that are driven by the needs of our community: tobacco control, cancer screening and prevention in underserved rural and minority communities, obesity, health care access and utilization, and health outcomes.

The Certificate Program in Community-Based Participatory Research offered by the Department of Preventive Medicine and Public Health on the Kansas City campus is designed to provide students and scholars with a strong foundation in community-based participatory research principles and methods. Formal training in community-based participatory research, epidemiology, health literacy, qualitative methods, and grant writing will allow scholars to enhance their current research skills.

Students may apply to the Certificate in Community-Based Participatory Research program on the Kansas City campus. The students that will participate in this certificate program can be from a broad spectrum of backgrounds including graduate students, residents, fellows and faculty working in the area of health disparities and underserved communities.

The application process is an online process. For detailed instructions on how to apply and the application deadlines contact Tanya Honderick (913) 588-2720. Admission to the Community-Based Participatory Research Graduate Certificate program is competitive. The program is offered on the Kansas City campus only.

Admission Requirements:
• A bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants, who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
- Submission of official scores on the Graduate Record Examination (GRE) or other professional test scores (such as the Graduate Management Admission Test, Medical College Admission Test, Law School Aptitude Test) that are not more than five years old. Official copy of scores should be sent from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895. Applicants who have earned a doctoral degree in the United States are exempt from this requirement.
- Three letters of recommendation from employers, instructors, or other persons who can assess the applicant’s aptitude for the program. Letters submitted per instructions for the online application process.
- A résumé or curriculum vitae.
- A personal written statement that describes the applicant's career goals and motivation for seeking the certificate in community-based participatory research.
- One semester of college algebra.
- Students currently enrolled in graduate programs at KUMC or KU must be in good standing (3.0 or higher GPA) and have a letter of approval from their current graduate program director and/or department chair indicating support to enroll in the certificate program.

After an applicant has been admitted, the program may defer an applicant's admission for one semester after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

Certificate Program Information:

No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral. Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements:

- Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of 4 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate certificate coursework.
- Enrollment in a minimum of one (1) credit hour the semester the program is completed. Graduate certificates may not be granted retroactively.
- Successful completion of a minimum of 16 credit hours.
- Successful completion of the following courses:
  - PRVM 800 Principles of Epidemiology 3
  - PRVM 814 Health Literacy 3
  - PRVM 853 Responsible Conduct of Research 1
  - PRVM 856 Community-Based Participatory Research 3
  - PRVM 872 Grant Writing 3
  - Total Hours 13

- Successful completion of a minimum of three (3) credit hours of elective coursework in health disparities. Specific courses determined in consultation with the student’s advisor.
- Successful completion of the Human Subjects Tutorial.
- Successful completion of the ePortfolio Requirement.

Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

Master of Public Health

The University of Kansas Master of Public Health program (KU-MPH) is a fully accredited, 42 credit hour graduate program with concentrations in Epidemiology, Social and Behavioral Health, Environmental Health Sciences and Public Health Management. The program has been accredited by the Council on (http://ceph.org) Education for Public Health
Admission requirements:

- A bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirements (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
- Submission of official scores on the Graduate Record Examination (GRE) or other professional test scores (such as the Graduate Management Admission Test, Medical College Admission Test, Law School Aptitude Test) that are not more than five years old. Official copy of scores should be sent from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895. Applicants who have earned a doctoral degree in the United States are exempt from this requirement.
- Three letters of recommendation from employers, instructors, or other persons who can assess the applicant's academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A résumé or curriculum vitae. Demonstration of one or more years of responsible work experience in the health field or a degree in a recognized health profession or other evidence of training or experience that indicates adequate preparation for the M.P.H. curriculum is preferred.
- A personal written statement that describes the applicant's career goals and motivation for seeking postgraduate training in public health.
- Responses to three short-answer questions that are part of the online application itself.
- One semester of college algebra or calculus is required to enter the social and behavioral health concentration, the public health concentration, or the environmental health sciences concentration.
- Completion of one semester of calculus is required to enter the epidemiology concentration.
- Applicants to the environmental health concentration must also have completed at least one semester of undergraduate biology and one additional semester of biology or another physical science course.

After an applicant has been admitted, the program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. *Other years' catalogs*.

The Master of Public Health program consists of at least 42 credit hours. Students complete credit hours in specified core courses in epidemiology, environmental health, public health administration, biostatistics, and the social and behavioral sciences along with an elective course. The specific degree requirements vary by the choice of concentration. The four concentrations are epidemiology, social and behavioral health, environmental health sciences, or public health management. All students complete a public health internship and capstone project as described below.

Degree Requirements:

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 4 years of admission to the program.
- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Completion of a minimum of 42 hours.
- Successful completion of the following core courses (21 credit hours) regardless of concentration:

• Successful completion of three (3) credit hours of capstone including preparation and defense of a written project report developed from the capstone experience.
  PRVM 893  Public Health Capstone  3

• Successful completion of a concentration (minimum 12 credit hours.) Choose from Epidemiology, Social and Behavioral Health, Environmental Health Sciences or Public Health concentrations.

- **Epidemiology concentration** - complete the following courses:
  - PRVM 813  Chronic Disease Epidemiology  3
  - PRVM 815  Infectious Disease Epidemiology  3
  - PRVM 841  Advanced Epidemiology I: Methods in Cross-Sectional and Case-Control Studies  3
  - PRVM 842  Advanced Epidemiology II: Methods in Longitudinal Studies  3

  **Total Hours:** 12

- **Social and Behavioral Health concentration** - complete the following courses:
  - PRVM 835  Evaluation Methods in Public Health  3
  - PRVM 845  Cultural Competency in Public Health  3
  - PRVM 849  Qualitative Methods in Public Health  3
  - PRVM 877  Health Communication  3

  **Total Hours:** 12

- **Environmental Health Sciences concentration** - complete the following courses:
  - PRVM 832  Environmental and Occupational Epidemiology  3
  - PRVM 870  Environmental Health Law and Policy  3
  - PRVM 871  Environmental Monitoring and Exposure Assessment  3
  - PRVM 874  Toxicology and Risk Assessment  3

  **Total Hours:** 12

- **Public Health Management concentration** - complete the following courses:
  - PRVM 828  Public Health Program Development and Management  3
  - PRVM 851  Public Health Policy and Law  3
  - PRVM 861  Leadership in Public Health  3
  - PRVM 879  Financial and Human Resource Management  3

  **Total Hours:** 12

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

Total Hours: 42

Dual M.D.-M.P.H. Program

This is a five-year program in which the medical student completes the requirements for the M.P.H. degree in one year. This can be accomplished either between the second and third, or between the third and fourth years of medical school. Students must complete all degree requirements for both the M.D. and the M.P.H. programs. They complete the M.P.H. concentration (either in Social and Behavioral Health or Public Health Management), in three semesters, beginning in the summer (June), and proceeding through fall (August) and spring (January), and finishing by the end of May. Please contact the respective academic units offering the degree for more information. The M.D. degree (p. 2052) is offered by the School of Medicine.

Joint Ph.D. in Behavioral Psychology-M.P.H. Program

The Department of Applied Behavioral Science on the Lawrence campus offers a 72-credit-hour doctoral program in behavioral psychology (p. 1163). Students learn about an array of content areas and theoretical perspectives and achieve proficiency in behavioral analysis, developmental studies, or behavioral intervention. Both the departments of Applied Behavioral Science (http://www.absc.ku.edu) and of Preventive Medicine and Public Health (http://ph.kumc.edu) promote community/public health and development through collaborative research, teaching, and service.

The joint Ph.D./M.P.H. is ideal for students interested in prevention through community and public health. Students must apply for admission to the M.P.H. and Ph.D. programs separately. Applications are reviewed by the admissions committees of both programs. Students admitted to the joint program complete the 42-hour M.P.H. requirements as listed in the chart below in addition to the Ph.D. requirements. See the Doctor of Philosophy in Behavioral Psychology (p. 1163) section of this catalog for the Ph.D. degree requirements. Completion of ABSC 710, ABSC 875, and ABSC 876 also qualifies a student for a Graduate Certificate in Community Health and Development (p. 1166) offered by the Department of Applied Behavioral Science. Additional details about the certificate program may be found on their website (http://absc.ku.edu/graduate-certificate-community-health-and-development/#requirements).

M.P.H. Course Requirements for the Ph.D. in Behavioral Psychology-M.P.H. Program

Required Core Courses (21)

- PRVM 800 Principles of Epidemiology 3
- PRVM 809 Introduction to Public Health 3
- PRVM 818 Social and Behavioral Aspects of Public Health 3
- PRVM 827 Public Health Administration 3
- PRVM 830 Environmental Health 3
- PRVM 875 Management of Public Health Data 3
- BIOS 704 Principles of Statistics in Public Health 3
- or BIOS 714 Fundamentals of Biostatistics I 3

Shared Ph.D. Courses satisfies requirements for the MPH Concentration in Social and Behavioral Health (9)

- ABSC 710 Community Health and Development 3
- ABSC 735 Within Subjects Research Methodology and Direct Observation 3
- ABSC 861 Principles of Behavior Analysis 3

MPH Elective (3)

- PRVM 8xx 3

Public Health Internship and Capstone (6)

- PRVM 891 Public Health Internship 3
- PRVM 893 Public Health Capstone 3

Total Hours 39

Master of Science in Clinical Research

The University of Kansas Master of Science in Clinical Research program (MS-CR) is a 33 credit hour graduate program with the student’s thesis serving as their culminating project. The program is offered through the Departments of Preventive Medicine and Public Health at the University of Kansas Medical Center in Kansas City and the University of Kansas School of Medicine-Wichita.

The MS-CR program provides students with formal training in clinical research, biostatistics, and epidemiology that will allow clinical scholars to enhance their current research skills. Graduates from the Master of Science in Clinical Research (MS-CR) program serve in a wide variety of fields, including clinical medicine, research, education, disease surveillance and academic settings. The University of Kansas MS-CR degree is designed to provide clinical scholars with a strong foundation in patient-oriented research principles and methods.

Admission and degree requirements are detailed in this section of the catalog. Other program information and application details may be found at our website.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Clinical Research program (http://www.kumc.edu/school-of-medicine/preventive-
Admission requirements:

- A bachelor's degree from a regionally accredited institution, documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

- Students with degrees from outside the U.S. are required to submit an evaluation of their academic credentials performed by one of the established companies providing this service for a fee. The MS-CR program will accept evaluations from the World Education Service (http://www.wes.org) (WES) or Educational Credential Evaluators (http://www.ece.org) (ECE) and other companies on a case by case basis. The evaluation must be course by course and include degree equivalency and grade point average. The evaluation should be sent directly from the company to the MS-CR program.

- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310). The Educational Commission for Foreign Medical Graduates (ECFMG) certificate is accepted in lieu of a TOEFL/IELTS score for applicants with a Medical Degree applying to this program.

- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.

- Submission of official scores on the Graduate Record Examination (GRE) or other professional test scores (such as the Graduate Management Admission Test, Medical College Admission Test, Law School Aptitude Test) that are not more than five years old. Official copy of scores should be sent from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895. Applicants who have earned a doctoral degree in the United States are exempt from this requirement.

- Completion of at least one semester of calculus is required.

- Three letters of recommendation from employers, instructors, or other persons who can assess the applicant's academic and professional potential. Letters are submitted per instructions provided for the online application process.

- A résumé or curriculum vitae. Demonstration of one or more years of responsible work experience in the health field or a degree in a recognized health profession or other evidence of training or responsible conduct of research, and clinical trials for a total of 22 credit hours of core courses; 8 additional credit hours consist of electives. The final three credit hours are devoted to the student's thesis.

Degree requirements:

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 5 years of admission to the program.

- Completion of a minimum of 33 credit hours.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.

- Enrollment in PRVM 899 Thesis the semester the student defends their thesis.

- Successful completion of a thesis defense (p. 2313).

- Successful thesis submission (p. 2313) (according to Office of Graduate Studies policy.)

- Successful completion of the following core courses (22 credit hours):
  
<table>

Interdisciplinary Graduate Program in Biomedical Sciences

Graduate research at the University of Kansas Medical Center covers a rich and diverse range of topics in both basic and translational research. Basic research is geared toward understanding the basic biological systems that control life. By understanding these systems, rationale treatments to treat disease can be devised. The discovery and refinement of these rationale treatments is translational research. With such a range of research topics, it is often difficult to choose the best lab. The interdisciplinary program allows the student to make an informed choice of labs to enter. IGPBS students hear from every researcher who is able to take a new student into their lab during the Faculty Research Series. The student then selects 3 research rotations. At the end of the 3 rotations the student will choose the lab that is the best fit for their research goals. Once a lab is chosen, the student enters the chosen mentor's department to complete the Ph.D.

The interdisciplinary program covers the first 2 semesters of graduate study. Students take a core group of courses that cover all aspects of cell biology, biochemistry, and cell signaling. Courses are both lecture based and discussion based. Students receive introductions to critical research techniques, work on problem sets, and critically evaluate our current knowledge base. In addition, students take courses in scientific ethics and scientific communication. Scientific communication covers graphic presentation of data and both written and oral communication.

At the end of the first year, students have built a considerable knowledge base and have skills in scientific communication, critical thinking, and problem solving. Students expand their knowledge base and skills by taking advanced courses in their chosen departments or programs. Our graduate program prepares students for successful careers in research.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2042) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

The M.S. in Health Informatics program endeavors to fulfill its responsibilities to the changing needs of society by selecting applicants who, in the judgment of the admissions committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for successful advancement. In addition, the committee looks for applicants who will contribute academic, nonacademic, and socioeconomic diversity to the class. The committee is interested in evidence of capacity for mature and independent scholarship.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Master of Science in Health Informatics (http://www.kumc.edu/health-informatics/master-in-health-informatics/prospective-students.html) website.

Admission requirements:

• A bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

• A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.

• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).

• A background check (p. 2310) is required during the admission process; it may affect the student’s eligibility to enter the program.

• An official copy of the Graduate Record Examination (GRE) score. Scores are sent directly from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895.

• Three letters of recommendation preferably from employers, instructors, or other persons who can assess the applicant’s academic and professional potential. Letters are submitted per instructions provided for the online application process.

• A graduate level statistics course (may be completed prior to admission or during the first semester of enrollment.)

• A current resume or curriculum vitae.

• A personal written statement that describes the applicant’s career goals and motivation for seeking post-graduate training in health informatics.

• An informational telephone interview with a Center for Health Informatics representative.

Applicants not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

The M.S. in Health Informatics curriculum is divided into three cores: informatics, leadership, and discipline focus (matching that of the faculty partners) along with a research component. A strength of the program is the close relationship between the students and their faculty advisers.

Total Hours: 19-30

Beginning with the Fall semester of year two, the student enters the Ph.D. program their faculty mentor is associated with and completes the degree requirements listed in the catalog for that specific program.

**Master of Science in Health Informatics**

Professionals in health informatics have skills in analysis, design, implementation and evaluation of information systems that support a full range of clinical and patient care functions. Working as a translation specialist, the graduate will be prepared for entry and mid-level positions with informatics departments, medical practice departments, nursing departments, public health organizations, and as consultants and/or staff in organizations that specialize in computer operations and knowledge management. Graduates also have the skills to enter the growing field of health information exchange, which includes regional health information organizations and the emerging personal health records. In addition to a foundation in information technology, special skills will be acquired in organizational change, project management and impact evaluation.

This is an interprofessional degree offered through the Office of Graduate Studies (http://www.kumc.edu/academic-affairs/graduate-studies.html), with oversight by the University of Kansas Center for Health Informatics (http://www.kumc.edu/health-informatics.html) through its advisory council. The program is designed for health professionals or information technology specialists who want a specialty focus in health informatics. The advisory council of this program reflects this commitment to interprofessional collaboration. Faculty with foundations in nursing, health policy and management, and public health partner to create this master’s degree in health informatics.
Advisors are assigned based on the career goals of the student. The student and advisor will develop a plan of study that meets the career goals of the student.

Degree requirements:

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 5 years of admission to the program.
- Completion of a minimum of 40 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of a general examination (p. 2313) the semester the student will graduate.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of the Health Informatics Core (minimum 17 credit hours.) These courses provide the core knowledge and skills essential to the practice of health informatics.

The KU-L/KUMC bicampus Neuroscience Graduate Program (http://www.neuroscience.ku.edu) is designed to prepare the student for a research and/or teaching career with concentrations in neuroscience. The program emphasizes research and the skills and knowledge required to perform and communicate the results of research. Modern neuroscience researchers/educators must be versed in a number of areas of neural research, spanning from molecular neuroscience to systems neuroscience. As such, the course of study in the program is broadly based; you are encouraged to enroll in courses offered by other programs or departments. The research opportunities in the program are widely varied and will accommodate many interests.

Nearly all Ph.D. students in the Neuroscience Graduate Program at the KU School of Medicine are admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences (IGPBS). After the initial year of coursework, students choose a neuroscience research mentor and then join the laboratory of the mentor. Coursework for the Neuroscience Graduate Program is offered at the KUMC Medical Center campus in Kansas City, Kansas as well as the University of Kansas in Lawrence. Several courses are taught on both campuses via videoconferencing. Comprehensive Exams for all students must be completed by the fall of the 3rd year in Graduate School. The program on the KUMC campus is directed by the KUMC Neuroscience Graduate Studies Committee consisting of the following faculty:

KUMC Graduate Studies Committee Members:

Douglas Wright, Ph.D.
Dianne Durham, PhD
John Stanford, PhD

Applications may be made online at: Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS) (http://www.kumc.edu/igpbs.html). Inquiries related to the KUMC portion of the program may be directed to the Program Director:

Douglas Wright, Ph.D.
Professor
Director, Neuroscience Graduate Program, KUMC Campus

dwright@kumc.edu (mpetroff@kumc.edu)

Courses

**NEUS 799. Neuroscience Seminar Series. 2 Hours.**

Presentations of research papers by faculty, post-doctoral research associates, and graduate students. All graduate students in the Neuroscience program participate in this seminar series throughout their period of training. Each student has to present a seminar once every semester. Presentations by students are evaluated by other graduate students and faculty at the end of each seminar. (Same as NURO 799) Prerequisite: Graduate standing in the Neuroscience program. LEC.

**NEUS 844. Neurophysiology. 3 Hours.**

Somatosensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as PHSL 844.) Prerequisite: PHSL 846 or equivalent and consent of instructor. LEC.

**NEUS 845. Graduate Histology. 3 Hours.**

This course will bridge student knowledge of systems/ organs with cellular histology and is designed as an accelerated introduction to histological techniques, microscopy/optics, and histology of normal and diseased tissues. Classes meet one a week and the format includes a 1 hour lecture on individual tissues within related organ systems followed by 1 hour of microscopic observation. Prerequisite: Completion of the IGPBS core curriculum or consent of instructor. LEC.

**NEUS 846. Advanced Neuroscience. 5 Hours.**

Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHCL 846, and PHSL 846.) Prerequisite: Permission of the course instructor. LEC.

**NEUS 847. Developmental Neurobiology. 2 Hours.**

Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847 and PHSL 847.) Prerequisite: Advanced Neuroscience (ANAT 846, NURO 846, PHSL 846) or consent of instructor. LEC.

**NEUS 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.**

An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer’s, Parkinson’s, Huntington’s, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down’s syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, PHCL 848, and PHSL 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or equivalent course and consent of instructor. LEC.

**NEUS 850. Sensory Biology. 3 Hours.**

A variety of topics associated with sensory biology, including olfaction, vision, audition, equilibrium, and the visceral and somatic senses will be discussed relative to basic functions and in disease settings. Faculty will provide lectures throughout the semester and research article discussions will be woven into the content throughout the course. Prerequisite: Student must be admitted to the IGPBS program or equivalent. LEC.

**NEUS 899. Neuroscience Master’s Thesis. 1-11 Hours.**

Hours and credit for this course to be arranged with the mentor. Independent investigation of a research problem in neuroscience, but...
of limited scope. Prerequisite: Graduate standing in the Neuroscience program and consent of mentor/instructor. THE.

NEUS 900. Scientific Papers in Neuroscience. 1 Hour.
Neuroscience research articles are analyzed by the student with the guidance of an instructor in terms of quality of scientific content and mechanics of the presentation. One or more articles are discussed in each tutorial session. The research topics and the instructor are chosen in accordance with the research interest of the students. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor. LEC.

NEUS 990. Research in Neuroscience. 1-9 Hours.
Original and independent investigation, approved by and conducted under the supervision of the students’ advisor and advisory committee, in partial fulfillment of the requirements for the Ph.D. degree. Prerequisite: Consent of advisor. LEC.

Hours and credit for this course to be arranged with the mentor. Conduct of original investigation in neurosciences. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor. THE.

Master of Science in Neurosciences

The Neuroscience Master’s program is a bi-campus graduate program that incorporates neuroscience faculty at the KU main campus in Lawrence and the KU Medical Center (KUMC). Neuroscience graduate students that matriculate at KUMC participate in the integrated IGPBS graduate program their first year and have the option of taking selected courses on the main campus after their first year. Students on the Lawrence campus take neuroscience courses on the Lawrence campus, but also participate in courses offered on the KUMC campus. Students and faculty from both campuses participate regularly via the Neuroscience Seminar series, which is conducted by video conference.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.

Total Hours: 19-30

Doctor of Philosophy in Neurosciences

The KU-L/KUMC bicampus Neuroscience Graduate Program (http://www.neuroscience.ku.edu) is designed to prepare the student for a research and/or teaching career with concentrations in neuroscience. The program emphasizes research and the skills and knowledge required to perform and communicate the results of research. Modern neuroscience researchers/educators must be versed in a number of areas of neural research, spanning from molecular neuroscience to systems neuroscience. As such, the course of study in the program is broadly based; you are encouraged to enroll in courses offered by other programs or departments. The research opportunities in the program are widely varied and will accommodate many interests.

Nearly all Ph.D. students in the Neuroscience Graduate Program at the KU School of Medicine are admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences (IGPBS). After the initial year of course work, students choose a neuroscience research mentor and then join the laboratory of the mentor. Coursework for the Neuroscience Graduate Program is offered at the KU Medical Center campus in Kansas City, Kansas as well as the University of Kansas in Lawrence. Several courses are taught on both campuses via videoconferencing.

Comprehensive Exams for all students must be completed by the fall of the 3rd year in Graduate School. The program on the KUMC campus is directed by the KUMC Neuroscience Graduate Studies Committee consisting of the following faculty:

**KUMC Graduate Studies Committee Members:**

Douglas Wright, PhD
Dianne Durham, PhD
John Stanford, PhD

Applications may be made online at: Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS) (http://www.kumc.edu/igpbs.html). Inquires related to the KUMC portion of the program may be directed to the Program Director:

Douglas Wright, Ph.D.
Professor
Director, Neuroscience Graduate Program, KUMC Campus
Department of Anatomy & Cell Biology
University of Kansas Medical Center
Kansas City, KS 66160
913-588-2713 (office)
The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission requirements:**

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
- A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, interview and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

### Degree Requirements:

- Degree requirements normally are completed within 5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University's Research Skills and Responsible Scholarship (p. 2313) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of GMSM 857 Biographics, GMSM 852 Introduction to Biomedical Research I and GMSM 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
- Successful completion of GMSM 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2313) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2313). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
- Successful completion of Post-Comprehensive Enrollment (p. 2313) requirement.
- Enrollment in a minimum of one (1) credit hour of dissertation NEUS 999 Neuroscience Doctoral Dissertation the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2313) (dissertation defense.)
- Successful Dissertation Submission and Publication (p. 2313) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS (p. 2042)) courses (or their equivalent):
  - GMSM 850 Proteins and Metabolism  2
  - GMSM 851 Molecular Genetics  2
  - GMSM 852 Introduction to Biomedical Research I  2
  - GMSM 853 Cellular Structure  2
  - GMSM 854 Cell Communication  2
  - GMSM 855 Introduction to Biomedical Research II  2
  - GMSM 856 Introduction to Research Ethics  1
  - GMSM 857 Biographics  1
  - GMSM 858 Introduction to Faculty Research  1
  - GMSM 859 Research Rotations  1-4
- Successful completion of the following Neuroscience courses:
  - NEUS 799 Neuroscience Seminar Series  2
  - NEUS 900 Scientific Papers in Neuroscience  1
  - NEUS 990 Research in Neuroscience  1-12
  - NEUS 999 Neuroscience Doctoral Dissertation  1-11
- Successful completion of neuroscience related elective coursework as determined in consultation with the student's advisor and the graduate director. Options include the courses listed below as well as several neuroscience courses offered on the Lawrence campus.

Final Oral Exam (dissertation defense) scheduled semester approved by committee to defend and graduate.

Total Hours: 23-152

M.D.-Ph.D. Physician Scientist Training Program

The purpose of the MD-PhD combined degree program is to prepare highly qualified and motivated post-baccalaureate students for careers as physician scientists in academic medicine and biomedical research. To promote a close-knit group of students, MD-PhD training at the University of Kansas Medical Center includes small group interactions with the program directors and monthly interactions with fellow students at all phases of their training. A formal peer-mentoring program allows students to advise and guide each other on issues related to research and clinical training, personal life-work balance, and professional development. The program is conducted under the auspices of the Dean of Graduate Studies and the Executive Dean of the School of Medicine, with guidance from a MD-PhD Advisory Committee. On average, students spend about 7-8 years in the program; the variable period usually depends on the time needed to complete their research and dissertation.

Application for admission is through the MD-PhD Combined Degrees Admissions Committee. The Program seeks highly motivated students with outstanding academic credentials and potential, a strong interest in research, and demonstrated research experience. There are no Kansas residency requirements for admission to the MD-PhD program and students with exceptional potential as physician scientists are recruited from around the country.

Applicants need to submit the following credentials: (Deadline October 15th for application through AMCAS, all needed items due October 30th)

- Standard AMCAS medical application with “MD-PhD Combined-Degree Program” selected. Designate The University of Kansas School of Medicine as a recipient. Prepare an addendum and submit it to the Program address (email if possible) only if you wish to make additional or clarifying comments to those already expressed in the three essays in your AMCAS application: [1] Personal Statement. [2] Why are you interested in an MD-PhD Program? [3] Describe your research experience(s) to date, including location and time frame for each, and your research mentor(s).
• MCAT scores will be included in your AMCAS application, otherwise have official copy sent to the MD-PhD Program. Submit GRE scores if taken (not a requirement). Contact the Program if you have any questions.
• Download and complete Information for MD/PhD Physician Scientist Program at University of Kansas Medical Center form (http://www.kumc.edu/Documents/md-phd/MD-PhD-D%20Information%20Form.pdf) (PDF) using the link provided below. Please submit the form via e-mail if at all possible to jfletcher@kumc.edu.
• At least three (3) Letters of Recommendation (Please download through AMCAS):
  a. One must be written by the applicant’s mentor from the prior research experience(s) and give some indication about the applicant’s potential for research.
  b. One must be written by a faculty member, other than the research mentor with whom the applicant studied in a science course.
  c. A letter from any other person selected by the applicant.
• The application fee for our program comes directly to us. Please make out your check for $50.00 to: KUMC MD-PhD Program and send it to the Program address. You will not be required to pay the medical application fee that is listed on the MD only information.
• Email your current CV to jfletcher@kumc.edu.

**Interviews**

• Selected applicants will be invited for interviews in Kansas City. The interviews are usually held mid January. During the interview, applicants meet with members of the MD-PhD Admissions Committee, MD-PhD and Graduate Program Directors, students currently in the program, and research faculty.
• The Program will cover each selected applicant’s basic travel expenses for interviews; details will be provided at the time of the invitation to interview. A student invited to interview but with exceptional circumstances and unable to participate on those dates may be given an alternative date and considered for admission by the Admissions Committee on an individual case basis.

For additional information please see: http://www.kumc.edu/md-phd-program/application-and-admission.html for details on the application and admission processes.

**If Accepted Into the Program:**

Students accepted into the MD-PhD Combined Degrees program are admitted into the M.D. Program in the School of Medicine and as a Ph.D. student in one of the graduate programs offered through Graduate Studies. The student must provide an official transcript indicating receipt of a Baccalaureate degree from a fully accredited institution by the time of matriculation into the program (and if applicable, transcripts for any post-baccalaureate studies/degrees).

Admission requirements are subject to change. In most cases, use the catalog of the year the student entered the program. Other years’ catalogs».

• MD-PhD students must meet the MD degree requirements of the School of Medicine as outlined in their section of this online catalog and the PhD degree requirements as outlined by their PhD department and minimum Graduate Studies requirements also outlined in their respective sections (p. 1966) of this online catalog.
• For MD-PhD students, the first two years of the MD curriculum are considered the equivalent of the Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2042) curriculum. Successful completion of the IGPBS curriculum (or its equivalent) is a degree requirement for each of the basic science Ph.D. programs.
• PAON 920 Introduction to Molecular Medicine (meets once/week the fall and spring semester of the first year of the medical phase)
• Grant preparation seminar (meets once/week the spring semester of the second year of the medical phase)
• Research skills and responsible conduct of research will be met prior to taking the oral qualifying exam by the following coursework:
  • Research skills: 1) CORE 800 Foundations of Medicine (fall semester, first year of medical phase) and 2) PAON 920 Introduction to Molecular Medicine (fall semester, first year of medical phase)
  • Responsible conduct of research: either 1) GSMC 856 Introduction to Research Ethics (fall semester, first year of graduate phase) OR 2) Stowers Research Integrity Course (spring semester, first year of graduate phase). For details contact the Program office.

At any time throughout the course of study, if a student is not meeting the requirements of the MD-PhD program, or of the specific degrees – their tenure in the program will be reviewed by appropriate personnel and action may be taken. Continued advancement in the program is dependent on a student successfully meeting the requirements of the MD-PhD program and those of their current phase (MD or graduate) of study.

Degree requirements and course descriptions are subject to change. In most cases, use the catalog of the year the student entered the program. Other years’ catalogs».

Matriculation in this program begins with two years of a basic medical science curriculum. Students are assigned a clinical preceptor, who meets with the assigned student on a regular basis throughout the first two years of medical school. Students also take a required course PAON 920 Introduction to Molecular Medicine offered by the MD-PhD program during the fall and spring semesters of the first year of medical courses. This course is designed to introduce students to cutting edge scientific concepts and research directly related to topics covered in the medical school curriculum.

Introductory laboratory research rotations are typically performed in the summer before and the summer after the first year of medical courses. During the second year of medical courses, the student devotes time to selecting a research mentor (if not already done so by this time) and begins to develop ideas for the dissertation research problem. During the spring semester of the second year of medical courses - the MD-PhD program offers a required grant preparation seminar (1h/week) that will familiarize the students with NIH pre-doctoral fellowship application components as well as the submission processes. Students complete the second year by taking Step1 of the United States Medical Licensing Examination (USMLE).

Years three through five (or six) of the MD-PhD Program focus primarily on the research problem and the selected graduate curriculum. The number of years in this phase are dependent on individual progress with the required research.

During the first year in the graduate phase (year 3 of the program) the student fulfills the responsible research and ethics requirement for the Ph.D degree. Once completed, the student will be eligible to take the Oral Comprehensive Examination. For more details, refer to the degree requirements section in this catalog for the PhD program selected (p. 1966).
During years two through four of the graduate phase, the student will complete any program specific requirements and conduct research for their dissertation culminated by the defense of their dissertation. During this phase, students have several opportunities for clinical training experiences. For example, the student-run JayDoc free clinic provides an excellent opportunity to both practice clinical skills and serve the community. Students complete Basic Life Saving training/certification approximately every 2 years to stay current in those clinical skills. Students may also elect to participate in supplemental instruction opportunities – in which they help teach and review concepts to help their peers prepare for the USMLE Step 1 exam.

After the dissertation defense and successful completion of the requirements of the graduate phase, students enter a transitional introduction to medical clerkships prior to completing their elective clinical rotations. After the third year of medical school, the USMLE Step 2 is taken.

In addition to the course of study outlined above, the Program also sponsors a number of other functions designed to develop professional skills relevant to a career in academic medicine. All of the students meet once a month with the program directors and their peers for one hour to discuss program-related activities, issues and events – including planning service and social activities. These meetings conclude with a formal presentation of a research project or a clinical case presentation.

Another important element of the Program is the annual retreat. Each annual summer event focuses on one of three aspects of MD-PhD training: research, clinical practice, and professional development/leadership. The retreat fosters discussion and learning about the many and varied elements in a physician-scientist’s training and career.

Below is the typical plan of study that includes 4 years in the MD phase and 3-4 years in the PhD phase. For numbering, M is for medical phase, G is for PhD phase and P is for total years in program.

Doctor of Medicine (M.D.)

At the University of Kansas School of Medicine, future doctors are welcomed into a culture of community, forming bonds with peers and mentors by learning together, not competing separately. Through this support system, students reach common goals of serving their community, and excelling in the knowledge of medicine and delivery of health care.

Each student is introduced to an interdisciplinary, patient-centered curriculum model, incorporating a strong clinical foundation into the basic sciences and facilitating the development of exceptional critical thinkers who can analyze problems, formulate effective plans of action, and provide optimal clinical care.

Top rankings

Providing students with an outstanding medical education remains at the heart of the School of Medicine’s mission.

- U.S. News & World Report ranks the School of Medicine among the top programs for training primary care physicians.

Three diverse academic environments

The School of Medicine has campuses at three locations in Kansas and has gained a national reputation for educating family, primary-care and rural physicians.

- At the Kansas City campus, students train at a large academic medical center, which has attracted innovative and accomplished researchers because of a commitment to modern research facilities and state-of-the-art equipment. Students may also elect to train in community-based and rural settings from this campus.
- Wichita facilities provide a community-based medical education environment, in which students learn through direct patient care inside three partner hospitals as well as in physician offices across the state. Students may also elect to train in community-based and rural settings.
- The Salina program is designed for students with a strong interest in rural medicine, as well as for any student wishing to work with a small group of peers on a rural regional campus with opportunities for early clinical experiences and for frequent interactions with the local clinical faculty.

On the left you will find links for more information about the School of Medicine including administration, programs offered, campuses, and the course catalog for the School of Medicine.

KU Medical Alumni Academic Societies

As part of an effort to enhance student advising and mentoring and to develop professionalism in the students of the School of Medicine, the original seven academic societies were founded in the 1999-2000 academic year and named after past leaders of the School of Medicine. With campus expansion and the opening of the Salina campus in 2011, an eighth society, Lukert, was founded. Each society is headed by a faculty director, who also serves as an assistant dean for student affairs. Society members include School of Medicine faculty, KU Hospital physicians, and the School of Medicine students.

The goals of the societies are to:

- enhance student-faculty interaction;
- enhance student interaction, particularly across classes;
- provide a structure for student advising;
- promote a sense of community for students and faculty; and
- encourage the development of professional attitudes and behaviors among students.

Structure: The administrative support for the MAAS is provided by the Office of Student Affairs. The Associate Dean for Student Affairs serves as the Executive Director, and two members of the OSA office provide administrative support. Each Society Director holds the title of Assistant Dean for Student Affairs. Since there are three campuses, our Society Directors, student leaders and administrative staff meet monthly via ITV to discuss programming, plan events, and collectively share ideas for the betterment of the MAAS.

The organizational structure of each society is as follows:

- Society Director
- 2-3 Associate Directors
- Second year student leaders, i.e. Presidents
- 40-60 faculty advisors from the clinical and basic sciences
- 20-30 medical students from each class, with the exception of the Salina Campus, which has 8 students in each class.
Schools of Medicine, Nursing and Health Professions fosters equality in the academic community by promoting excellence through leadership, mentoring, and community involvement. The mission of the organization is to help faculty, trainees and students:

1. to be proactive and constructive in establishing and advancing the careers of women in medicine and science;
2. to educate women on relevant KU Policies and Procedures for career development and advancement;
3. to enhance and foster the professional development of all women faculty in the KUMC Schools of Medicine, Nursing and Health Professions through encouragement and mentoring, and to encourage growth, networking and quality within our KUMC community (local and national);
4. to promote the process of developing long-term, mutually beneficial relationships and cultivating new opportunities for collaboration through a supportive exchange of ideas and resources.

For information on programming and how to get involved, please contact one of their key individuals listed on http://www.kumc.edu/wims/contact-us.html

For more information, visit the WIMS website at http://www.kumc.edu/wims.html.

Medical Education Network Sites

The Medical Education Network Sites are an integral part of the School of Medicine's mission to implement rural health initiatives throughout the state. Each of the five sites represents a region of Kansas. Each region has a Medical Education Director (MED), a practicing physician who also works for the school's Office of Rural Medical Education to promote rural workforce development. MEDs help coordinate rural learning opportunities throughout Kansas. Many agencies in the state have this mission in common: the Health Policy Institute, State Data Board, Department of Health and Environment, and KUMC Offices of Admissions, Rural Health Education and Services, and Area Health Education Centers. The MEDs may work with these institutions and occasionally work with other health profession schools at KU and other Regents institutions to promote rural learning opportunities. Specific MEDs activities include:

- Support of local medical center educational programs
- Coordination of local premedical student recruitment activities
- Summer Rural Research and Practice Elective Program
- Scholars in Rural Health
- Identification and development of new health profession education sites.

Rural Track/Options

The need for rural primary care physicians continues to be critical in the majority of Kansas counties. KU-School of Medicine recently had a rural track where students spent a significant part of the clinical education in a rural setting. The rural track was in Salina which has now become a branch campus. New ways to provide rural training opportunities for students are in development.

In lieu of spending an extended period of time in one rural site, students currently have the option of receiving some of their training in Family Medicine, Surgery, Pediatrics, and Obstetrics and Gynecology in a rural site. Students can exercise this option for one of the clerkships or all of them as space permits. Students can spend from 2-6 weeks on site
depending on the clerkship. Some students have spent as much as 14 weeks in rural learning sites during their 3rd year.

**Nicodemus Project**

Despite remarkable advances in science and health care, health disparities persist in the United States. Health disparities exist in Kansas, too, and the disparate morbidity and mortality and leading causes of death and disease for ethnic minorities in Kansas reflect those of the nation. In Kansas, African-American adults, for example, are at higher risk of death and disease due to heart disease, cancer, cerebrovascular accidents, and other chronic conditions. African-American Kansans have issues related to less access to high-quality health care and information about health promotion and disease prevention compared to nonminority Kansans.

The Nicodemus Project is a multidisciplinary, health screening, promotion of wellness, disease prevention, service learning, and community outreach project in a culturally sensitive setting. The Nicodemus Project takes place in the rural and historic African-American town of Nicodemus, Kansas, during the town's Annual Homecoming Celebration, commemorating the exodus of former slaves to the promised land of Kansas. The Nicodemus project is coordinated and led by the School of Medicine's Office of Diversity and Inclusion.

**Scholars in Rural Health**

The Scholars in Rural Health program identifies and encourages undergraduate students from rural Kansas to practice medicine in Kansas counties that are medically underserved. Using a rigorous admissions process, students are annually selected to participate in a two-year premedical curriculum featuring community-based primary care experiences and other activities. Selection criteria include completion of two years of undergraduate premedical education and evidence of high probability for return to a medically underserved area of Kansas. Students who successfully complete the program during their junior and senior years are assured admission to the School of Medicine. Additional information is available at http://www.kumc.edu/school-of-medicine/education/premedical-programs/scholars-in-rural-health.html

**Degree Programs**

KU Medical Center includes the Schools of Health Professions, Medicine, Nursing, and an Office of Graduate Studies. Information about Health Professions or Nursing is available from those schools or in the appropriate sections of the KU Undergraduate Catalog and Graduate School Catalog.

**Masters and Ph.D. Programs**

For information about Masters and Ph.D. programs visit http://catalog.ku.edu/medicine/.

**Combined M.D./Ph.D. Degree Programs**

The purpose of the MD-PhD combined degree program is to prepare highly qualified and motivated post-baccalaureate students for careers as physician scientists in academic medicine and biomedical research. To promote a close-knit group of students, MD-PhD training at the University of Kansas Medical Center includes small group interactions with the program directors and monthly interactions with fellow students at all phases of their training. A formal peer-mentoring program allows students to advise and guide each other on issues related to research and clinical training, personal life-work balance, and professional development. The program is conducted under the auspices of the Dean of Graduate Studies and the Executive Dean of the School of Medicine, with guidance from their MD-PhD Advisory Committee.

Information may be obtained from the MD-PhD Physician Scientist Training Program, 1123 Delp, Mail Stop 3062, KU Medical Center, 3901 Rainbow Blvd., Kansas City, KS 66160, (913) 588-5241, http://www.kumc.edu/md-phd-program.html

**Dual M.D./M.P.H. Program**

This is a five year program in which the medical student completes the requirements for the M.P.H. degree in one year. This can be accomplished either between the second and third, or between the third and fourth years of medical school. Students must complete all degree requirements for both the M.D. and the M.P.H. programs. They complete the M.P.H. concentration (either in Social and Behavioral Health or Public Health Management), in three semesters, beginning in the summer (June), and proceeding through fall (August) and spring (January), and finishing by the end of May.

To obtain admission materials or for more information, call (913) 588-2720, or visit http://mph.kumc.edu.

**M.D./M.H.S.A. Program**

The MD/MHSA program is ideal for medical students interested in practice, hospital, or health system management. Students in this program have several options for completing the MHSA requirements in addition to the four-year MD curriculum.

To obtain admission materials or for more information, call (913) 588-3763 or visit http://www.kumc.edu/school-of-medicine/hpm/master-of-health-services-administration/joint-degree-programs/joint-mhsam.html.

**Medical School Requirements**

**Evaluation of Student Performance**

Faculty members evaluate the academic achievement, acquisition of skills, and attitudes of medical students as superior, high satisfactory, satisfactory, or unsatisfactory. A 4.0 grade-point system is used to determine the student's class rank and grade-point average.

**Repeating a Course**

Repetition of any part of the curriculum is upon recommendation of the Academic and Professionalism Committee.

**Withdrawal or Leave of Absence**

Withdrawal or leave of absence may be granted by the Associate Dean of Student Affairs upon recommendation by the Academic and Professionalism Committee.

**M.D. Degree Requirements**

The degree of Doctor of Medicine is awarded by the medical faculty of the University of Kansas to a student who has satisfactorily completed the medical school curriculum. The student must also pass Steps 1 and
United States Medical Licensing

The National Board of Medical Examiners prepares and administers a three-part examination known as the United States Medical Licensing Examination. Steps 1 and 2 of the USMLE are taken while the student is enrolled in medical school. Step 3 may be taken by a physician who has passed Steps 1 and 2 and has served at least six months of an approved hospital residency. National Board certification is awarded to candidates who successfully pass all three parts of the test and satisfy the requirements of the medical licensing authorities of most states. To graduate from the University of Kansas School of Medicine, students must pass Steps 1 and 2 of the USMLE. Students must pass Step 1 to continue in the clinical program. Applications to take both Step 1 and Step 2 are available online at https://apps.nbme.org/ciw2/prod/jsp/login.jsp. Residents register for the Step 3 exam via the same website.

Private Support and Endowment

The University of Kansas School of Medicine depends on private gifts and bequests for many of its activities and functions. Grants from national foundations and agencies of the federal government are supplemented by gifts from individuals, often donated as memorials to or in honor of friends and relatives. The Kansas University Endowment Association maintains all funds separately, and many bear the names of the donors or of the persons honored or memorialized. Donations to the Endowment Association are used solely for the purposes designated by the donor without deductions for administrative costs or overhead. Endowment funds finance student loans, lecturehips, scholarships, professorships, fellowships, and acquisitions for the Medical Center libraries. They also are used for general medical research and for special research in such fields as cancer, heart disease, and problems of aging. Both loan funds and scholarship funds benefit medical students. Funds received for scholarships are invested so that the income provides scholarships indefinitely. Both long-term and short-term loans are available. Long-term loans become payable one year after graduation. Short-term loans become payable within 90 days of issue. A complete list of endowment scholarships is available from the Office of Student Affairs or online at http://www.kumc.edu/school-of-medicine/osa/scholarships-loans-and-contests.html.

Distinctions and Awards

The Academic Achievement Award is given in recognition of senior graduates that have completed their education with a 4.0 GPA.

The Academic Excellence Award is given to a senior student in recognition of outstanding academic performance.

The Advocacy Award - Kansas City is presented to a graduating student in recognition of high standards of character, conduct, and integrity and the promotion of those qualities in colleagues.

The Alpha Omega Alpha Honor Medical Society promotes scholarship and research in medical school, encourages high standards of character and conduct, and recognizes high attainment in medical science, medical practice, or related fields. Members of AOA elect new members each year as well as granting honorary memberships to those gaining recognition in fields related to medicine. Elected medical students from the Kansas Alpha Chapter, established in 1930, give promise of professional leadership and fulfillment of these ideals.

The P.G. Czarlinsky Family Award (in memory of Charley Czarlinsky, M.D.) is presented to a senior student from the Wichita campus for outstanding performance as a student clinician in anesthesiology. Dr. Becker was professor and chair of the Department of Anesthesiology from 1987 to 1998. This award honors his excellent teaching skills and dedication to medical education.

The Distinguished George E. "Ned" Burket, M.D., Award is presented to a senior medical student from the Wichita campus for excellence as a fourth-year student in family medicine. Dr. Burket practiced in Kingman, Kansas, for 32 years. As president of the American Academy of General Practice in 1988, he provided pivotal support in the transition of general practice to family practice. Dr. Burket was a founding member and president of the American Board of Family Practice and chair of the Residency Review Committee for Family Practice. For his distinguished efforts, he was elected to the Institutes of Medicine of the National Academy of Sciences in 1975.

The LeRoy A. Calkins Award is presented to a senior student for academic and clinical excellence in obstetrics and gynecology. The award is in memory of Dr. Calkins, who was chair of the Department of Obstetrics and Gynecology for 30 years, retiring in 1959. Dr. Calkins came to KU in 1929 from the University of Virginia, where he was department chair. He received his education and training, both M.D. and Ph.D., at the University of Minnesota. He was an outstanding teacher, a recipient of many national awards, and a leader in postgraduate and resident education. He founded many societies and groups that sought to reduce maternal-fetal mortality and morbidity in Kansas.

The Tom D.Y. Chin Preventive Medicine Excellence Award is given to a graduating senior who has excelled in public health or preventive medicine during their medical education in honor of Tom D.Y. Chin, M.D. Professor Emeritus Chin was Chair of the Department of Preventive Medicine from 1975 through 1989. He has a national and international reputation in infectious disease epidemiology and cancer epidemiology and has 30 years of dedicated service to the U.S. Public Health Service. He is an outstanding teacher, clinician, and leader in public health research both nationally and internationally. This award honors an individual who has some of the personal attributes and characteristics that illuminated Dr. Chin's own distinguished career.

The Coghill Award for Original Research is presented to a graduating medical student who has produced research of high quality in the Department of Anatomy and Cell Biology as well as performed in a superior manner in coursework in the Department of Anatomy and Cell Biology.

The Anesthesiology Academic Excellence Award is presented to a senior student for academic and clinical excellence in anesthesiology.

The Karl E. Becker Jr., M.D., Award is presented to a senior student from the Wichita campus for outstanding performance as a student clinician in anesthesiology. Dr. Becker was professor and chair of the Department of Anesthesiology from 1987 to 1998. This award honors his excellent teaching skills and dedication to medical education.

The Distinguished George E. "Ned" Burket, M.D., Award is presented to a senior medical student from the Wichita campus for excellence as a fourth-year student in family medicine. Dr. Burket practiced in Kingman, Kansas, for 32 years. As president of the American Academy of General Practice in 1988, he provided pivotal support in the transition of general practice to family practice. Dr. Burket was a founding member and president of the American Board of Family Practice and chair of the Residency Review Committee for Family Practice. For his distinguished efforts, he was elected to the Institutes of Medicine of the National Academy of Sciences in 1975.
his retirement in 1962. The principles elucidated in his studies of fluid and electrolytes serve as a basis for our current management of children with body fluid disturbance. For these and many other scientific contributions, he was world famous. The members of the Department of Pediatrics give the certificate and award to an individual they believe has some of the personal attributes and characteristics that illuminated Dr. Darrow’s distinguished career.

The Mahlon H. Delp Award - Kansas City is presented in memory of Dr. Delp, Professor Emeritus of Medicine, to a senior student in internal medicine who best demonstrates integrity, compassion, and dedication to the care of patients as individuals.

The Mahlon H. Delp Award - Wichita is presented in memory of Dr. Delp, Professor Emeritus of Medicine, to a senior student in internal medicine who best demonstrates the qualities of integrity, compassion, and dedication to the care of patients as individuals.

The Louise deSchweinitz Award is presented in memory of Dr. deSchweinitz to recognize the most outstanding student performance on the clinical rotation in pediatrics.

The Emergency Medicine Award is presented to a senior student for demonstrated clinical and academic excellence in emergency medicine. It is sponsored by the Society for Academic Emergency Medicine.

The Endocrine Society’s Medical Student Achievement Award is presented to a senior medical student who has shown exceptional ability and interest in endocrinology. It encourages outstanding students to pursue careers in endocrinology and related fields of medicine and basic science.

James G. Price, MD, Award for Excellence in Family Medicine is presented to a graduating senior who excelled in the study of Family Medicine in memory of Dr. Price who left rural practice in Colorado to become the Chair of Family Medicine at the University of Kansas. He finished his career at KU as the Dean of the School of Medicine. During his illustrious career Dr. Price served as President of the American Academy of Family Physicians and the American Board of Family Practice. He was a member of the National Institute of Medicine and was selected as KU Honorary Alumnus in 2006. Dr. Price was an excellent teacher, valued mentor, skilled clinician, and trusted colleague. He was an iconic figure in the field of medicine and the consummate family physician.

The Family Medicine Award is given to a graduating medical student on the Salina campus who performed exceptionally well on the required family medicine clerkship, has consistently displayed compassion, professionalism and a relentless quest for knowledge in other clerkships, and desires to pursue a career in family medicine.

The George J. Farha Award for Excellence in Surgery is presented to a student from the Wichita campus for excellence during the surgical clerkship. The award is given to a student who displays knowledge of surgery as well as honesty, integrity, and compassion in the care of patients. The funds for this award were collected by Dr. Farha’s former residents to honor their teacher.

John D. Foret Urology Award is presented to an outstanding graduating student who has chosen to pursue a career in urologic surgery in recognition of their exemplary clinical and or research performance. The award is named in honor of Dr. John D. Foret, a native of San Diego, California, and a graduate of the University of Chicago School of Medicine. Dr. Foret came to the University of Kansas in 1953 to begin his postgraduate medical education. After completing his urology residency in 1958, Dr. Foret was appointed to the University of Kansas School of Medicine Faculty. He spent his entire career at KU, and was recognized as an outstanding clinician and educator. In 1993, Dr. Foret retired and was named Professor Emeritus of Surgery(Urology).

The Matthew Freeman Award in Social Justice is presented to a graduating medical student who has demonstrated how a commitment to social justice and equity can be combined with medicine.

Janet M. Glasgow-Rubin Achievement Citations are presented to female medical students who graduate in the top 10 percent of their class.

The Janet M. Glasgow-Rubin Certificate of Commendation is presented to a female medical student who stands first in her graduating class. Sponsored by the American Medical Women’s Association, this award was established by Dr. Maude Glasgow in honor of her sister, Janet M. Glasgow. Dr. Maude Glasgow was a pioneer in preventive medicine and public health. She received her degree in 1901 from Cornell University Medical College and went on to earn her degree in public health from New York University and Bellevue Medical College. Janet M. Glasgow unsellishly gave of her time and resources to see that her sister, Maude Glasgow, completed her medical education.

The Donald W. Goodwin, M.D., Award is presented to the senior student who is entering residency in psychiatry and is perceived by the faculty to be most likely to succeed in the profession. Dr. Goodwin was Chair of Psychiatry at the University of Kansas Medical Center from 1976 to 1991. Later he was University Distinguished Professor and Professor Emeritus. Dr. Goodwin embodied the inquisitive nature required of a modern academic psychiatrist who questions traditional approaches and savors empirical developments. The philosophy influenced his work in psychiatric diagnosis, alcoholism, and phobias. Dr. Goodwin’s work has a lasting influence on the field and the character of psychiatry at KU Medical Center.

The Kyle Lee Gratny Memorial Award is presented in memory of Kyle Lee Gratny to a graduating medical student for distinguished performance in the neonatology division, Department of Pediatrics.

The Don Carlos Guffey Award is presented to a senior student who has demonstrated a keen interest in the history or philosophy of medicine by writing an outstanding paper in one of those disciplines. The award honors Don Guffey, M.D., the first chair of the Department of Obstetrics at KU Medical Center, who had a long-standing interest in the history of medicine.

The Drs. Richard and Diana Guthrie Excellence in Pediatrics Award is presented to a graduating senior from the University of Kansas School of Medicine-Wichita campus for superior academic and clinical performance in Pediatrics. The recipient showed excellence in academics, ethics, as well as compassion during their Pediatrics rotations. Dr. Richard Guthrie was the founding chairman of Pediatrics on the Wichita campus, and he and his wife continue to be instrumental in the education of our students, as well as nationally known members of the medical community.

The Russell F. Holcomb Award is presented for outstanding performance as a student in obstetrics and gynecology at KU Medical Center in memory of Dr. Holcomb, who was a resident in the Department of Obstetrics and Gynecology at KUMC. Dr. Holcomb served a one-year rotating internship from July 1, 1961, to June 30, 1962. He interrupted his medical career to serve three years as a medical officer in the U.S. Navy with a tour in South Vietnam. He returned to KU Medical Center on July 1, 1965, to complete his three years of residency, where he
earned the respect of his peers and faculty of the department. The 1969 graduating class gave Dr. Holcomb the Resident Teaching Award. That class later initiated this award in his memory. Dr. Holcomb served as a chief resident his last year of residency plus serving a clinical fellowship with the American Cancer Society in this same year. Upon completion of his residency, he practiced in the San Diego, California area. Dr. Holcomb died in an automobile accident in Mexico, along with his wife and two sons, in 1973.

The Janney Family Award is given to award a 4th year medical student who excels in physical diagnosis at the University of Kansas School of Medicine-Wichita.

The Janney Family Award in Physical Diagnosis is given to a fourth-year medical student who excels in physical diagnosis at the Salina campus of the University of Kansas School of Medicine.

The Norge W. Jerome Preventive Medicine Excellence Award is presented to an outstanding senior medical student who has excelled in public health or preventive medicine for minority populations during his or her medical education in honor of Norge W. Jerome, Ph.D., Professor Emerita, Department of Preventive Medicine. She conducted her first pioneering research more than 30 years ago, combining the fields of human nutrition and anthropology. This innovative approach launched the discipline of nutritional anthropology. Dr. Jerome has a strong record of public service and has been active in community development for close to 50 years, combining science with compassion to address the food, nutrition and health concerns of women, families, and communities in the United States and around the world. She serves as an inspiration to future generations of students.

The KAFP-Hostetter Award honors fourth year medical students who have promoted the values of Family Medicine during their medical school tenure.

The Gerald R. Kerby, M.D. Award is given to a senior student in internal medicine who has excelled in the knowledge, science, and practice of internal medicine, in memory of Gerald R. “Jerry” Kerby, M.D., professor of medicine.

The Paul C. Laybourne, M.D., Award is presented to the senior student who demonstrated the highest academic performance in the required psychiatry clerkship. Dr. Laybourne served the University of Kansas School of Medicine for more than 30 years. He was the founding director of the division of child psychiatry and served in that capacity until he retired. He was an important force in the evolution of child psychiatry in Kansas. An important early contribution was his pioneering work on the value of brief diagnostic and therapeutic general pediatric hospital evaluation for children with possible underlying emotional disturbance and overt physical symptoms. This approach helped demonstrate the critical value of integrating psychiatric evolution and management with the other aspects of general pediatric medical care.

The LMMSA Award is presented to a graduating student who has been significantly involved in the Latino Minority Medical Student Association's Kansas Chapter and the greater Kansas City hispanic community.

The Loveland Scholar Fund is given to a graduating senior who demonstrates professionalism through commitment to the mastery of the knowledge needed to provide excellent medical care to patients and an appreciation of the need to contribute to the future of their profession through teaching and mentoring. The selected graduate has also demonstrated an understanding of the value of leadership and being a good citizen in their community. The award is a memorial to Dr. G. Charles “Chuck” Loveland who graduated from the School of Medicine in 1973.

The Norman L. Martin Award is presented to a senior student who has chosen radiology as a career for excellence in diagnostic radiology.

The Dr. Ronald L. Martin Clerkship Award is given to a senior medical student for outstanding interest and performance in the field of psychiatric medicine during the basic clerkship.

The Dr. Ronald L. Martin Elective Award is given to a senior medical student for outstanding performance in a psychiatry elective.

The MaryAnn McMullan Memorial Award is presented to a graduating medical student who best demonstrates the qualities of integrity, compassion and dedication to the care of the dying patient in memory of MaryAnn McMullan. Presented by the Division of Geriatric Medicine and Palliative Care, Department of Family Medicine.

Merck Manual Awards are presented to seniors who have demonstrated outstanding scholastic achievement.

The Dr. Herbert C. Miller Award is presented to a senior medical student in recognition of distinguished performance in research in the Department of Pediatrics.

The Roscoe Falls Morton, M.D., F.A.C.P., Memorial Fund Award (sponsored by the Roscoe Morton family, Arkansas City, Kansas) is presented to a graduating senior from the UKSM - Wichita campus for superior academic and clinical performance in internal medicine. The award recognizes the recipient's deep commitment to continued study of the principles of clinical science and special interest in internal medicine as a continued study and career.

The OCED Personal Perseverance Award is given to a senior student for their ability to overcome obstacles and persevere.

The Thomas G. Orr Sr. Award is presented to the outstanding senior medical student in surgery in memory of Dr. Orr, chair of the Department of Surgery for 25 years. Dr. Orr joined the staff of the KU medical school in 1915 from Johns Hopkins and achieved national recognition as an officer in professional societies, author, teacher, and recipient of honorary Doctor of Science degrees and numerous other honors. His bibliography contained 231 published articles and two textbooks, evidence of his interest in the investigation of clinical problems, his contributions to research, and his influence on the future study of surgery.

The Conrad Osborne, M.D., Family Medicine Award is presented to a senior medical student from the Wichita campus for excellence as a third-year student in family medicine. This award honors Dr. Osborne, a graduate of the KU School of Medicine. Dr. Osborne was in the first group of family practice residents in the United States, graduating from the Wesley Family Practice Residency Program in 1970. Dr. Osborne embodied the principles of family practice, serving as a caring physician, talented teacher, and trusted mentor and friend to a generation of family physicians until his untimely death from lymphoma in 1993.

The Outstanding Student in Otolaryngology Award is presented to a senior student who exhibits not only an interest, but excellence, in clinical care, academic medicine and research, related to the field of Otolaryngology Head and Neck Surgery.

The Department of Ophthalmology Medical Student Award is presented to a senior student who demonstrates the most outstanding performance
in the clinic, research and/or humanitarian arenas related to Ophthalmic care.

The Mary Packwood Memorial Award is presented to a graduating medical student who best demonstrates the qualities of integrity, compassion and dedication to the care of the older adult in memory of Mary Packwood. Presented by the Landon Center on Aging.

The Perseverance Award is given to recognize and honor triumph of the human spirit over adversity.

The Pride in the Profession Award is presented to a senior medical student who most appropriately characterizes the qualities of professionalism in medicine envisioned by Dean Deborah Powell, M.D., during her tenure at KUMC. The Pride in the Profession Award was established by Dr. Donald Hagen in honor of Dean Powell, who served as Executive Dean of the School of Medicine and Vice Chancellor for Clinical Affairs from 1997 to 2002. During her tenure, Dean Powell instituted programs of professionalism for students and faculty. She initiated the White Coat Ceremony to symbolize the students’ entry into the medical profession. Dean Powell supported the establishment of the Academic Societies as part of her vision of the mentoring of students by practicing physicians. She continues to work with students and serves as an inspiration to future generations of students.

The Prakash Raghavan Clinical Student Award is presented to a senior from the Wichita campus in recognition of outstanding performance in clinical rotations.

The Daniel K. Roberts Medical Student Award for Excellence in Women’s Health Care is presented to a medical student from the Wichita campus who exhibits excellence in clinical practice, education, and research in obstetrics and gynecology.

The Robert H. Robinson, M.D., Award is presented to a graduating student from the Wichita campus for superior academic and clinical performance in anesthesiology. Dr. Robinson was a long-time supporter of teaching medical students and residents in a clinical setting and is a former professor and the first chair of the Department of Anesthesiology at the KU School of Medicine - Wichita. This award honors the recipient’s special interest in anesthesiology.

The Rural Medicine Award is given to a graduating medical student on the Salina campus who has displayed a dedication to rural medicine, especially in Kansas. The honored student demonstrated an interest in the healthcare needs of rural Kansas, expressed a desire to eventually practice in rural Kansas, and has been actively involved in the area of rural medicine through participation in the Rural Medicine Interest Group and the summer Rural Primary Care Practice and Research Program and working with rural physicians during clinical clerkships.

The Willard J. Smith, M.D., Award for Academic Achievement is presented to a graduating senior from the Wichita campus for superior academic performance. In recognition of Dr. Smith’s contributions to the development of the clinical campus at UKSM - Wichita, the award is given to a student whose academic performance reflects a dedicated commitment to the scholarly acquisition and effective application of knowledge.

The Helmuth Sprinz Award is presented to a senior medical student whose academic achievements epitomize the spirit of Dr. Helmuth Sprinz. Dr. Sprinz was a distinguished faculty member of the KU School of Medicine from 1976 until his death in 1990. He was tireless in his effort on behalf of students, house staff, and faculty. He was particularly fond of working with, helping, and supporting students who were willing to expend extra effort to achieve their goals. Before joining the KU faculty, Dr. Sprinz enjoyed a distinguished career as a research pathologist and was Chief of Experimental Pathology at Walter Reed Army Institute of Research.

The Daniel Joseph Stechschulte, Sr. Award is given to a senior student in internal medicine who has shown diligence, dedication and a commitment to improve the health of Kansans, in memory of Dr. Daniel Joseph Stechschulte, Sr., professor of medicine.

The Student National Medical Association Award is given to a graduating student in recognition of outstanding community service, academic achievement and commitment to enhance diversity in the field of medicine.

The Robert W. Weber, M.D. and Patricia Ann Weber Award for Outstanding Scholarship and Professionalism is given to a graduating medical student on the Salina campus who displayed outstanding scholarship and professionalism during their four years on the Salina campus.

The W. Clarke Wescoe Award is presented to a senior student in recognition of outstanding achievement and the pursuit of excellence in the study of pharmacology and therapeutics. W. Clarke Wescoe, M.D., was a former chair and professor of pharmacology, former dean of the School of Medicine, former KU Chancellor, and former Chairman of the Board of Sterling Drug, Inc.

The Edward V. Williams Award is presented to a minority medical student who best reflects the integrity, compassion, and commitment to patient care exemplified by Edward V. Williams, M.D. Dr. Williams was the first African American to receive a medical degree from KU. He serves as an inspiration to future generations of students and countless others to achieve beyond expectations.

The Dewey K. Ziegler Neurology Award is given to an outstanding senior medical student pursuing a career in neurology. Dr. Ziegler was an outstanding teacher, clinician and leader. He joined the Department of Neurology in 1958, served as chair from 1966 through 1984, and served the Department of Neurology until his death in 2012. This award serves to honor Dr. Ziegler’s 50+ years of contributions to neurology and the University of Kansas Medical Center.

Core SOM Preclinical Phase

**CORE 800. Foundations of Medicine. 0-8 Hours.**

Foundations of Medicine is an 8-week, multidisciplinary course, taught by faculty members from basic science and clinical departments. This course integrates materials from the traditional disciplines of biochemistry, cell and molecular biology, histology, physiology, epidemiology, behavioral science, and preventive medicine. This course includes clinical skills instruction in medical history, physical examination, and cultural sensitivity. Patient cases are used where appropriate. Students participate in small group discussions, problem-based learning sessions, laboratory exercises, clinical correlations, and lectures: they work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are evaluated by multiple-choice examination, clinical evaluation, and group activity preparation and participation.

Prerequisite: Medical School admission requirements. LEC.

**CORE 805. Genetics and Neoplasia. 0-4 Hours.**

This 4-week multidisciplinary course, taught by both basic science and clinical faculty, covers the molecular and chromosomal basis of human genetic disease, emphasizing the clinical significance of normal and abnormal genetic variation; single-gene and multifactorial diseases; and conditions caused by somatic mutation and epigenetic mechanisms. An emphasis is placed on neoplastic disorders. This course also examines the predictive value of genetic testing and the role of genetic counseling in clinical decision making; the principles of cancer therapeutics; and gender, ethnic, and behavioral considerations affecting prevention and treatment of cancer and other genetic diseases. This course includes clinical skills instruction in history-taking and physical examination of a standardized cancer patient. Students participate in large and small group discussion, laboratory exercises, problem based learning sessions, clinical correlations, clinical skills lab sessions, and lectures; and are evaluated by small group and clinical skills performance, and by USMLE-style objective examinations. Prerequisite: Successful completion of Foundations of Medicine or permission of Associate Dean for Student Affairs. LEC.

**CORE 810. Inflammation and Immunity. 0-4 Hours.**

This 4-week multidisciplinary course, taught by faculty members from the Departments of Anatomy Cell Biology, Microbiology, Pathology, Medicine, Family Medicine and Preventive Medicine, addresses the basic biology of the normal immune system and the basis for immunemediated and inflammatory diseases. Topics will include normal lymphopoiesis and myelopoiesis, responses to infection, autoimmunity, allergy, transusions and transplantation, immune deficiencies and the appropriate therapies for these conditions. Therapies will include immunosuppressives, anti-inflammatories, vaccines and transplantation. The course integrates instruction on disease pathogenesis with clinical skills instruction (including history-taking and physical examination skills), consideration of epidemiological, ethical, social science aspects of medicine, disease prevention and the general approaches to therapy. Students participate in small group discussions, web-based instruction, labs, clinical skills lab sessions, and lectures. Students are evaluated based on their participation in small group discussion sessions and through standardized online summative examinations. Prerequisite: Successful completion of Foundations of Medicine, Genetics and Neoplasia, or permission of Associate Dean for Student Affairs. LEC.

**CORE 815. Cardiopulmonary. 0-8 Hours.**

This multidisciplinary course, taught by faculty members from Anatomy, Biochemistry, Medicine, Pathology, Pharmacology, and Physiology covers the normal/abnormal processes; principles of therapeutics; and gender, ethnic, and behavioral considerations affecting disease treatment and

</table>
prevention of the cardiopulmonary system. This course also includes clinical skill instruction of patient interviewing and examination. Students participate in small group discussions, laboratory exercises, clinical correlations, clinical skills lab sessions, lectures and web-based directed self-study and are evaluated by performance in small groups and on exams. Prerequisite: Successful completion of Foundations of Medicine, Genetics and Neoplasia, Inflammation and Immunity, or permission of Associate Dean for Student Affairs. LEC.

CORE 820. Gastrointestinal System and Nutrition. 0-4 Hours.
This 4-week multidisciplinary course is taught by faculty members from the Departments of Anatomy and Cell Biology, Molecular and Integrative Physiology, and Pathology and Laboratory Medicine, Biochemistry and Molecular Biology, Pharmacology, Toxicology, and Therapeutics, Internal Medicine, Preventive Medicine, History and Philosophy of Medicine, Health Policy Management, Microbiology, Molecular Genetics, and Immunology, Family Medicine, and Surgery in the School of Medicine and the Department of Dietetics and Nutrition in the School of Allied Health. The course covers the normal/abnormal processes; principles of therapeutics; and gender, ethnic, and behavioral considerations affecting disease treatment and prevention of the gastrointestinal system including nutrition. This course also includes clinical skills instruction in the abdominal physical examination. Students participate in small group discussions, laboratory exercises, clinical correlations, clinical skills lab sessions, and lectures are evaluated by written tests, oral exams, and assessment of PBL and clinical skills performance. Prerequisite: Successful completion of Foundations of Medicine, Genetics and Neoplasia, Inflammation and Immunity, Cardiopulmonary, or permission of Associate Dean for Student Affairs. LEC.

CORE 825. Renal and Endocrine System. 0-4 Hours.
This 4-week multidisciplinary course, taught by faculty members from Anatomy, Biochemistry, Medicine, Pathology, Pharmacology, and Physiology covers the normal/abnormal processes; principles of therapeutics; and gender, ethnic, and behavioral considerations affecting disease treatment and prevention of the renal and endocrine systems. This course also includes clinical skill instruction of patient interviewing and examination. Students participate in small group discussions, laboratory exercises, clinical correlations, clinical skills lab sessions, lectures and web-based directed self-study and are evaluated by performance in small groups and on exams. Prerequisite: Successful completion of Foundations of Medicine, Genetics and Neoplasia, Inflammation and Immunity, Cardiopulmonary, Gastrointestinal Tract and Nutrition or permission of Associate Dean for Student Affairs. LEC.

CORE 830. Reproduction and Sexuality. 0-4 Hours.
This 4-week multidisciplinary course is taught by faculty members from the Departments of Anatomy and Cell Biology, Pathology, Psychiatry and Behavioral Sciences, Gynecology and Obstetrics, Surgical Oncology, Urology, and Family Medicine. The course covers the normal/abnormal aspects of human reproduction and sexuality; principles of therapeutics; gender, ethnic, and behavioral consideration affecting sexual function, prevention and treatment of reproductive and sexual disorders. The course also includes clinical skill instruction in sexual history-taking and physical examination. Students participate in small group discussions, laboratory exercises, clinical correlations, patient and provider panels, clinical skills laboratory sessions, lectures, and web-based learning opportunities, and are evaluated by means of formative and summative examinations and assessment of participation in various learning activities. Prerequisite: Successful completion of Foundations of Medicine, Genetics and Neoplasia, Inflammation and Immunity, Cardiopulmonary, Gastrointestinal Tract and Nutrition, Renal and Endocrine Systems, or permission of Associate Dean for Student Affairs. LEC.

CORE 835. Musculoskeletal & Soft Tissue Systems. 0-4 Hours.
The (4-5) week multidisciplinary course, taught by faculty members from (Anatomy and Cell Biology, Orthopedic Surgery, Pathology, Pharmacology, Internal Medicine, Family Medicine, and Pediatrics departments), covers the normal/abnormal processes; principles of therapeutics (non-drug treatment will be emphasized); and gender, ethnic, and behavioral considerations affecting disease treatment and prevention of diseases of the musculoskeletal soft tissue systems. This course also includes clinical skill instruction in an extremities physical examination. Students participate in small group discussions, laboratory exercises, clinical correlations, clinical skills lab sessions, and lectures and are evaluated by exams, attendance, participation, and professional behavior. Prerequisite: successful completion of the first year curriculum. LEC.

CORE 840. Brain and Behavior. 0-8 Hours.
This 8 week multidisciplinary course, taught by faculty members from Anatomy and Cell Biology, Molecular and integrative Physiology, Otolaryngology, Neurology, Pharmacology, Pathology, Internal Medicine, and Psychiatry, covers the normal/abnormal processes of the central and peripheral nervous system, including an introduction to the principles of therapeutics. The course combines and integrates several disciplines, including neuroanatomy, neurophysiology, neuropathology, introductory neuropsychopharmacology, basic neurology and psychiatry. Prerequisite: Successful completion of Musculoskeletal Soft Tissue Systems or permission of Associate Dean for Student Affairs. LEC.

CORE 845. Blood and Lymphoid System. 0-4 Hours.
This 4 week multidisciplinary course, taught by faculty members from Pathology and Laboratory Medicine, Internal Medicine, Pharmacology, and History and Philosophy of Medicine covers the normal/abnormal processes; principles of therapeutics; and gender, ethnic, and behavioral considerations affecting disease treatment and prevention of the blood lymphoid system. The course also includes clinical skill instruction in history-taking and physical examination. Students participate in lectures, problem-based learning sessions, and small group discussions. Students are evaluated by multiple choice examination and group activity preparation and participation. Prerequisite: Successful completion of Musculoskeletal Soft Tissue Systems, Brain and Behavior or permission of Associate Dean for Student Affairs. LEC.

CORE 850. Infectious Diseases. 0-6 Hours.
This 6-week multidisciplinary course, taught by faculty members from the Departments of Pharmacology, Microbiology, Pathology, Internal Medicine, and Preventive Medicine, addresses the basic biology of the normal immune system and the basis for infectious and parasitic diseases. Topics will include normal immune responses to infection, immune deficiencies, bacteriologic, viral, fungal and parasitic infections, and the appropriate therapies for these conditions. Therapies discussed will include immunosuppressives, anti-microbials, and vaccines. The course integrates instruction on disease pathogenesis with clinical skills instruction (including history-taking and physical examination skills), consideration of epidemiological, ethical, social science aspects of medicine, disease prevention and the general approaches to therapy. Students participate in small group discussions, web-based instruction, labs, clinical skills lab sessions, and lectures. Students are evaluated based on their participation in small group discussions and through standardized online summative examinations. Prerequisite: Successful completion of Phase I, or permission of Associate Dean of Student Affairs. Successful completion of Musculoskeletal Soft Tissue Systems, Brain and Behavior, Blood and Lymphoid System or permission of Associate Dean for Student Affairs. LEC.
CORE 860. Integration and Consolidation. 0-8 Hours.
This 8 week multidisciplinary module, taught primarily by faculty members from Pathology and Pharmacology, will consolidate and integrate materials from previous modules using pathophysiology and therapeutics as the focal point to highlight content required to successfully pass USMLE Step 1. The module will serve as a bridge between the basic and clinical sciences, as the students prepare to transition to clinical rotations. Faculty from Internal Medicine, Family Medicine, and School of Pharmacy will co-facilitate small group discussions. Students will be expected to participate in small group discussions, lectures and web-based self-study, and are evaluated by their overall performance in small groups and summative exams. Prerequisite: Successful completion of Musculoskeletal, Soft Tissue, Brain and Behavior, Blood and Lymphoid System, Infectious Diseases, or permission of Associate Dean of Student Affairs. LEC.

Course credit hours are indicated after the course title.

Kansas City Clinical Required Course Descriptions

Third Year Requirements

FAPR 955. Family Medicine Clerkship. 0-8 Hours.
Students are introduced to the principles and practice of family medicine. They spend the majority of their time participating in the practice of a private family physician where they evaluate patients under direct supervision and recommend management. This practice experience is enhanced by case-based seminars and skills-based workshops with faculty and hospital call with family medicine residents. Evaluation is based on assessment by clinical supervisors, projects, a departmental exam, and the NBME Family Medicine Subject Exam. Prerequisite: Completion of Phase I (Years 1 and 2). CLN.

GERO 900. Geriatric Medicine Clerkship. 4 Hours.
This required 4 week Year 3 clerkship is sponsored by the Landon Center on Aging in collaboration with the Departments of Family Medicine, Internal Medicine, and Physical and Rehabilitation Medicine. The student will participate in the evaluation and care of older adults, with emphasis on the aging process and geriatric syndromes in both frail and successfully aging older adults. Students participate as a member of the health-care team in the medical practices of primary care physicians and geriatricians providing care to older adult patients. They help provide ambulatory care to older adults, as well as care in a variety of community-based long term care settings such as assisted living and nursing facilities, hospice, and home care. By the conclusion of this clerkship the students will be able to describe how to identify and address geriatric syndromes, expected decline of organ functions with aging, behavioral characteristics of the aged, special problems of drug treatment of older adults, and special strategies for providing medical care to complex older adult patients. Clinical experiences are augmented by web-based modules on geriatric topics, facilitated case discussions, and workshops. Evaluation is based on assessment of clinical performance by faculty members, an objective structured clinical exam, seminar participation, and a departmental written exam. Prerequisite: Medical Basic Science and Completion of Phase I (Years 1 and 2). CLN.

GYNO 900. Obstetrics/Gynecology Clerkship. 0-6 Hours.
During this clerkship the student develops understanding of disease in women through history, physical examination, and laboratory studies. The clerkship includes study of biochemical, anatomical, and physiological changes of normal pregnancy and the effect of disease in altering the course of reproduction. Prerequisite: Medical Basic Sciences. FLD.

ICM 900. Issues in Clinical Medicine. 0 Hours.
This course enables students to apply the theoretical framework developed in ICM 801/802 and 850/851 to the patient care activities in which they participate during third-year clerkships. Through lectures and small group discussions students examine the ethical, legal and social aspects of medical practice and application of key principles to clinical practice. Students also explore career opportunities in medicine and factors to be considered in choosing a medical specialty. Students are evaluated through written assignments and participation in course activities. LEC.

MED 900. Internal Medicine Clerkship. 0-8 Hours.
General medicine orientation. Students will be assigned to Kansas University Medical Center, Bethany Medical Center, and Kansas City Veterans Administration Hospitals. FLD.

NEUR 900. Neurology Clerkship. 4 Hours.
The required four-week Neurology Clerkship is intended to familiarize students with the diagnosis and treatment of major neurological disorders. Effective interviewing and diagnostic skills, and competent performance of the neurological examination are emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Prerequisite: Completion of Phase I (Years 1 and 2). CLN.

PED 900. General Pediatrics Clerkship. 0-6 Hours.
The student's activities will include rotations on the pediatric inpatient wards (taking histories, examining children, and making daily ward rounds with staff physicians) and the outpatient clinic and newborn nursery. Student evaluations are based primarily upon clinical performance, assessment of problem-solving skills and performance on a written multiple-choice examination given at the end of the clerkship. Offered in modules I and II, III and IV, V and VI, VII and VIII, IX and X, XI and XII. Prerequisite: Medical Basic Sciences. FLD.

PYCH 955. Psychiatry Clerkship. 4 Hours.
The required four-week basic Psychiatry Clerkship is intended to familiarize students with the diagnosis and treatment of major psychiatric disorders. Effective interviewing and diagnostic skills, and competent performance of the mental status examination is emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Prerequisite: Completion of Phase I (Years 1 and 2). CLN.

SURG 900. Junior Surgery Clerkship. 0-8 Hours.
Surgical problems and diseases are studied utilizing lectures, skills laboratory experiences, study questions, clinical problem discussion and live patients. This course prepares the student to meet the pertinent aspects of the summative competencies of the University of Kansas School of Medicine during the third year of Medical School. A particularly useful goal of this course is to teach the student to identify life-threatening conditions that require urgent intervention. Although the skills of this course are necessary for an ambulatory practice, the skills that are taught in this course are most frequently seen and performed in the hospital setting. The student is expected to have a basic understanding of normal and abnormal body function. The student is expected to have completed successfully the basic course in physical diagnosis (years 1 and 2 of medical school). Prerequisite: first and second year medical years. LEC.
Fourth Year Requirements

PMED 960. Population Health in Practice. 4 Hours.
This required clerkship is designed to instruct fourth-year medical students about population-based approaches to health care and to facilitate the application of epidemiologic principles to clinical decision making. Using some of the basic concepts described under the auspices of community oriented primary care, students will learn how to define specific populations, ascertain their health care needs, formulate interventions to meet those needs and evaluate the impact of those interventions. Learning opportunities will develop and reinforce concepts related to health services organization and delivery, community dimensions of medical practice, occupational and environmental medicine, health care finances, access to medical care, and quality of medical care. This clerkship will include didactic teachings supplemented by course reading material and workshops that involve care studies and site visits. Learning experiences will allow the student to examine what it means for a physician to be part of a community and to explore the role that the community plays in the health of an individual. Practical application of course material will be emphasized. Prerequisite: Completion of third-year medical school curriculum. CLN.

FAPR 900. Rural Preceptorship. 4 Hours.
Since 1951 all medical students have completed, as a requirement of graduation, a rural preceptorship of at least four weeks with a practicing physician in the state of Kansas. The emphasis of the preceptorship is rural primary care (family medicine, general internal medicine and general pediatrics). Rural placements are made by the Course Administrator. The preceptor or site will provide housing while the student is on this rotation. The preceptor will expect the student to participate in all phases of professional life as a rural physician. Most sites have the student work in ambulatory clinic, hospital care, ER, nursing home, house calls, and night call. Students also are expected to participate in the civic, administrative and social activities of their preceptor. The preceptor will evaluate student performance based on school of medicine criteria. At the completion of the course the student will have: a working knowledge of the rural health care system, an understanding of the function of a physician in the context of community and an appreciation for the support systems needed for practice in rural Kansas. Offered in Modules I-XII. Prerequisite: Completion of year 3 clinical clerkships. IND.

Subinternships (4)

The four-week subinternship gives medical students an opportunity to become more proficient in a specific area of medicine. They provide a more comprehensive course than that of the third-year required course. Students select one of the following options to fulfill the requirement.

FAPR 901. Subinternship in Family Medicine. 4 Hours.
This clerkship is designed to prepare students for the responsibilities encountered as a first-year resident. Students will be required to perform the following: 1) actively participate in the management of a panel of inpatients on the Family Medicine Service, 2) participate in the care of outpatients in the Family Medicine Clinic, 3) take one in-house call weekly, and 4) take one OB call weekly. In fulfilling these responsibilities, some weekend participation will be necessary. Students will be expected to complete the same objectives listed in FAPR 950, but do so in an advanced manner incorporating a well-developed and organized approach to multifaceted clinical issues accompanied with a keen perception of non-clinical factors involved in Family Practice. A resident level examination will be administered covering both inpatient and outpatient topics. LEC.

GYN0 901. Subinternship in Obstetrics and Gynecology. 4 Hours.
The objective of this clerkship is to provide students with advanced experience in obstetrics and gynecology. Students will be assigned to the Obstetrics and Gynecology Service at KUMC. Students will participate in the management of common obstetrical and gynecologic conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Subinternship Selective requirement. LEC.

MED 908. Subinternship in Internal Medicine. 4 Hours.
The objective of this clerkship is to provide students with advanced experience in the management of acutely ill medical patients. Students will be assigned to one of five locations: KUMC; the Kansas City VAMC; the Leavenworth VAMC; or St. Catherine’s Hospital, Garden City. Students will participate in the diagnosis and treatment of common medical conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Subinternship Selective requirement. LEC.

OTOR 901. Subinternship in Otolaryngology. 4 Hours.
The objective of this clerkship is to provide students with advanced experience in otorhinolaryngology. Students will be assigned to the Otolaryngology Service at KUMC. Students will participate in the management of common ENT conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Subinternship Selective requirement. LEC.

PED 910. Subinternship in Pediatrics. 4 Hours.
This selective is an extension of the basic pediatric clerkship. It is designed to permit senior medical students to take increasing responsibility of patient care under close supervision of the faculty. Students will learn skills in patient management by active participation in the daily activities of the pediatric residency program. This selective is entirely clinical. The student will work on the Pediatric Inpatient Unit at KUMC. Student performance will be evaluated by the faculty based on factual knowledge, practical skills, problem-solving abilities, and personal behavior and values. On the first day of the rotation, students will report to the senior pediatric resident assigned to the pediatric floor. Prerequisite: PED 900 or equivalent. LEC.

PED 914. Philmont Adolescent Medicine. 4-8 Hours.
The Philmont Adolescent Medicine experience is in the high altitude environment at Philmont Scout Ranch in New Mexico. Students learn health screening, care of sports injuries, and diagnosis and management of pediatric, medical, surgical, gynecologic problems, primarily of teenagers, but also of children and adults. Supervision of students consists of faculty members from Medicine Pediatrics, Surgery, Neurology, Family Practice, Gynecology, and Physical Medicine in an effort to give well rounded educational guidance to the students. National Board, Part 1, must be passed in order to receive clinical elective credit. One four week experience only counts toward clinical electives requirements. Permission of Instructor. Prerequisite: Physical Diagnosis, Pathology and Pharmacology. FLD.

PED 918. Pediatric Subinternship Selective - Outpatient. 4 Hours.
This selective is an extension of the basic pediatric clerkship. It is designed to permit senior medical students to take increasing responsibility of patient care under close supervision of the faculty. Students will learn skills in patient care by active participation in the daily activities of the pediatric outpatient clinic. This selective is entirely clinical. The student will work in the Pediatric Outpatient Clinic at KUMC in a variety of clinics. The specific clinics will be assigned by the Chief of the Ambulatory Pediatric Section after consultation with the student. Student performance will be evaluated by the faculty based on factual knowledge,
practical skills, problem-solving abilities, and personal behavior and values. This course can still be taken for elective credit even if a student already has met the subinternship selective requirement. Prerequisite: PED 900 or equivalent. FLD.

**PYCH 901. Subinternship in Psychiatry. 4 Hours.**
The student will function as an intern on the Adult and Child Psychiatric Services at the University of Kansas Medical Center and Kansas City VA Hospital. Each student will work closely with faculty and residents and will have an important role in the team care of hospital patients. The course is designed to provide a transitional experience between the predoctoral and residency stage of medical education allowing the student the opportunity to take more responsibility for patients with support and active teaching provided by faculty and residents. LEC.

**SURG 901. Subinternship - Plastic Surgery. 4 Hours.**
This course is designed to provide advanced experience to medical students the diagnosis and management of plastic surgery patients. Additionally, concepts taught during surgery 900 are reemphasized in greater detail. Ward rounds, clinical conference seminars and case studies supplement the clinical experience. An optional laboratory experience providing in-depth introduction to microvascular surgery can be arranged. Emphasis is placed on an understanding of the principles and surgical anatomy of areas of plastic surgery including congenital, trauma, tumor and cosmetic. Students are expected to participate with the surgical team in the diagnosis and management of plastic surgery patients. It is expected that the student will participate, when possible, at a resident level of responsibility. The student participates directly in patient care on the wards, in the outpatient clinics and in the operation room. Prerequisite: SURG 900, MED 900. LEC.

**SURG 902. Subinternship in Surgery. 4 Hours.**
The student will be expected to participate with surgical team in the diagnosis, operation, and management of surgical patients. It is expected that the student will participate, as possible, at a resident level of responsibility. Ward rounds, clinical conference, seminars, and case studies supplement clinical experience. The student participates directly in patient care on the ward, in the out-patient department, and in the operating room. Emphasis is placed on an understanding of alterations in physiology secondary to pathology, management of fluids and electrolytes, basic elements of pre- and post-operative care, and diseases amenable to surgical treatment. In addition, concepts taught during surgery 900 are reemphasized and considered in more detail. We can accommodate 6 students in Modules I-XII. Prerequisite: SURG 900 and MED 900. LEC.

**SURG 909. Surgery Subinternship-Neurosurgery. 4 Hours.**
This course is designed to provide advanced experience to the student in the management of neurosurgical problems. The student is assigned to the neurosurgical service at the University hospital for four weeks. Students will participate with the surgical team in daily rounds, diagnosis, out-patient experience, operative experience and post-operative management of neurosurgical patients. Emphasis is placed on an understanding of neurologic disease with special emphasis in physical exam and diagnosis, management of basic neurosurgical emergencies and management of common neurosurgical problems. Accommodates three students in Modules I-XII. Prerequisite: SURG 900 and MED 900. LEC.

**SURG 910. Surgery Subinternship-Urology. 4 Hours.**
This course is designed to provide advanced experience to the student in the diagnosis and management of genitourinary disease. The student is assigned to the Urology Service at KUMC or the VA Hospital for 4 weeks. Students are expected to participate with the urologic patients. It is expected that the student will participate, as possible, at a resident level of responsibility. Ward rounds, clinical conference, seminars and case studies supplement clinical experience. The student participates directly in patient care on the ward, in the out-patient department, and in the operating room. Emphasis is placed on an understanding of alterations in physiology, secondary to pathology of the genitourinary tract, and diseases amenable to surgical or medical treatment. The student is expected to become familiar with the diagnostic procedures and techniques used in evaluating patients with acute and chronic genitourinary problems (i.e. cystoscopy). The out-patient experience is particularly emphasized. By the end of the clerkship, the student should be able to describe risk factors, epidemiology, etiology, diagnosis, management strategy, prognosis, including sequelae, and preventive measures for common urologic problems. We can accommodate two students at KUMC and two students at VAH. This will be offered in Modules I-XII. Prerequisite: SURG 900 and MED 900. FLD.

**SURG 915. Subinternship-Orthopaedic Surgery. 4 Hours.**
This subinternship is designed to allow the student to participate in orthopedic clinical care. The student is assigned to the orthopedic surgical service at KUMC for four weeks. The student participates with the orthopedic surgery team in the diagnosis, surgical treatment and postoperative management of orthopedic patients. The student will participate directly in care of patients in the emergency department, operating room, intensive care unit and orthopedic ward. Emphasis is placed on the understanding of pre-op, intra-op and postop care of the orthopedic patient. There is a limit of 4 students per rotation. Prerequisite: Successful completion of basic clinical clerkships. CLN.

**Critical Care (4)**
The four-week critical care selective presents the knowledge, skills, and attitudes required to care for very ill hospitalized patients. This allows the student to focus on an interest in a particular specialty and ensures that all students have basic knowledge and skills in critical care. Students select one of the following options to fulfill the requirement.

**ANES 911. Critical Care: Post-Anesthesia Unit. 4 Hours.**
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Post-Anesthesia Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

**MED 905. Critical Care: Coronary Care Unit. 4 Hours.**
The objective of this clerkship is to provide students with experience in the management of critically ill patients with cardiovascular disorders. Students will participate in the diagnosis and treatment of patients in the KUMC or Kansas City VAMC Coronary Care Unit. Clinical work will be supplemented by conferences, formal and informal lectures and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

**MED 912. Critical Care: Medical Intensive Care Unit. 4 Hours.**
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC or Kansas City VAMC Medical Intensive Care Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

**PED 926. Critical Care: Neonatology. 4 Hours.**
The student will be actively involved in the care and management of the high-risk and acutely ill neonate. Through a clinical participation, tutorial sessions and assigned reading emphasis will be placed on modern
neonatal intensive care techniques and developmental physiology and biochemistry. Students may elect additional consecutive four-week periods to pursue aspects of neonatology in more detail, engage in investigative projects or acquire first-hand experience in the operation of a regionalized program for care of high-risk or acutely ill neonates in the state. Students wishing this additional four weeks should contact the Pediatric Department. LEC.

PED 930. Critical Care: Pediatric Intensive Care Unit. 4 Hours.
Principles of ongoing assessment and management of critically ill children with single and multiple organ failure will be presented. The teaching format will be formal and informal rounds at the bedside in the KUMC Pediatric ICU by faculty members of the Pediatric Critical Care Division. Integration of history-taking, physical examination skills, and laboratory and radiological assessment with pathophysiology will be emphasized. LEC.

SURG 927. Critical Care: Burn Center. 4 Hours.
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Burn Center. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

SURG 928. Critical Care: Neurosurgical Intensive Care Unit. 4 Hours.
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Neurosurgical Intensive Care Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

SURG 929. Critical Care: Surgical Intensive Care Unit. 4 Hours.
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Surgical Intensive Care Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

Anatomy

ATMY 910. Readings in Anatomy. 1-4 Hours.
Enrollees will select an area of major personal interest and narrow their efforts to some accepted idea in that field. They will delve into the support for this idea by all means available to them, be it scientific literature, opinions of practicing physicians and other medical scientists, or chart review, to come up with an evaluation that they consider satisfactory. The selected subject of interest can deal with any area of medicine since this is to be primarily an experience that promotes motivation for self-learning. Offered in Modules I-XII. LEC.

ATMY 915. Advanced Topics. 2-4 Hours.
Special studies which allow students to further their training in one or more areas. Assignments are tailored to fulfill the needs of the individual and usually include readings and laboratory work guided by frequent conferences with an advisor. Offered in modules I-XII. Prerequisite: Permission of department. IND.

ATMY 920. Research. 4 Hours.
Original independent study of a problem approved by the student's advisor or advisory committee. Offered in modules I-XII. Prerequisite: Permission of department. IND.

Anesthesiology

Students may enroll in an elective module in which an experience in clinical anesthesia is offered, including the administration of anesthetics under supervision. The student becomes proficient in the placement of peripheral intravenous lines and endotracheal tubes. The opportunity to place central venous lines and intra-arterial lines, as well as other critical care procedures, may also be provided. Lectures and case conferences are presented, enabling the student to manage patients with renal failure, chronic pulmonary disease, coronary artery disease, neuromuscular diseases, and central nervous system diseases. The student also becomes familiar with the basic concepts of cardiopulmonary resuscitation and has the opportunity to participate in the treatment of patients with chronic pain.

ANES 910. Anesthesiology. 4 Hours.
Students will work in the operating room suite in the mornings under the direct supervision of an instructor in anesthesia and will be made to feel that they are part of the cooperative, expert team caring for each patient. In addition, the basic fundamentals of anesthesiology will be taught by means of lectures, seminars, and conferences in the afternoons, as well as through clinical situations. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. LEC.

ANES 912. Special Topics in Anesthesiology. 4 Hours.
This elective is designed to provide the clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with department faculty, specific objectives, reading assignments, and the mechanism for student evaluation. Prerequisite: Medical basic sciences and departmental consent. CLN.
Biochemistry

The Department of Biochemistry and Molecular Biology is dedicated to the advancement of knowledge of living systems at the molecular level and expanding the knowledge base of molecular medicine.

BIOC 910. Topics in Biochemistry and Molecular Biology. 1-4 Hours.
Special studies in a selected area of interest. Assignments may involve scholarly activity such as reading, writing, or small group discussions. Prerequisite: Permission of department chairperson. LEC.

BIOC 913. Research in Biochemistry and Molecular Biology for Medical Students. 1-8 Hours.
Selected research problems with emphasis on biochemistry and molecular biology. Offered in Modules I-XII. Prerequisite: Permission of department chairperson. IND.

Cardiothoracic Surgery

CTSU 910. Cardiothoracic Surgery. 4 Hours.
Stressing pre-operative assessment and post-operative management. This elective module will allow the student to develop his/her skills in diagnosis of cardiac disease, interpretation of cardiac catheterization and arteriographic data, and management of patients undergoing cardiothoracic surgery. Participation in consultations, follow-up clinics, and conferences with cardiology will be expected. Offered in modules I-XII. Prerequisite: SURG 900 and MED 900. CLN.

Diagnostic Radiology

The diagnostic radiology department actively participates in all four years of the curriculum. The first year correlates radiology with anatomy as part of the presentation of the Department of Anatomy and Cell Biology. Various types of X-rays and imaging studies including vascular studies, MRI, and CT demonstrate the necessity of a firm foundation in anatomy and illustrate how changes in anatomy form the foundation of disease processes. This brings anatomy and the patient to the student in a meaningful manner. During the third and fourth years, the department offers educational programs in four-week modules. Students serve rotations in radiology and nuclear medicine. Students receive basic instruction in principles of radiology and its different modalities and observe the tools and methodology of imaging. Radiology conferences are given daily and weekly as part of other departmental curricula, such as neurosurgery, neurology, cardiology, pediatrics, medicine, orthopedics, and gastroenterological conferences. The student is trained and guided in accumulating knowledge and skill in the imaging diagnosis of disease.

DIAG 910. Diagnostic Radiology. 4 Hours.
The student will work in all phases of diagnostic radiology including gastrointestinal, neuroradiology, pediatric radiology, cardiovascular and special procedure radiology. Offered in Modules I-IV, VII-XI. Prerequisite: Medical Basic Sciences. FLD.

DIAG 911. Nuclear Medicine-University of Kansas Medical Center or Veteran Administration Hospital, Leavenworth. 4 Hours.
The student will participate in examination of patients and use of radioisotopes in diagnosis (scanning techniques) and treatment. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. FLD.

DIAG 913. Radiological Research. 4 Hours.
Students may work with radiology staff in any of the following areas: radiological sciences, health physics, radiation biology, application of computers to radiology, radiological engineering, clinical research. Offered in modules I-XII. Prerequisite: Consent of instructor. IND.

Emergency Medicine

ERMD 919. Clinical Clerkship in Emergency Medicine. 4 Hours.
This course will instruct students in the evaluation, management, and disposition of patients presenting to the Emergency Department with undifferentiated complaints. Students will be expected to evaluate patients of all groups and develop treatment plans under the direct supervision of Emergency Medicine faculty. In addition, students will actively participate in the resuscitation and stabilization of critically ill and traumatized patients. Prerequisite: SURG 900, MED 900, GYNO 900, PED 900. CLN.

ERMD 921. Emergency Ultrasound. 4 Hours.
Emergency ultrasound allows for rapid and accurate diagnostic information that can have significant benefits to patient outcomes. It involves performing and interpreting ultrasound at the patient's bedside and is used to rapidly triage, diagnose, and treat medical conditions in modern emergency departments around the country. This course will instruct students interested in Emergency Medicine in the skills necessary to perform and interpret point-of-care ultrasound examinations. Students will be expected to learn the basic principles of point of care ultrasound, to recognize the indications of point of care ultrasound, and also to develop proficiency in performance and interpretation of the basic point of care ultrasound examinations performed in the Emergency Department. CLN.

Family Practice

Family practice is comprehensive, continuous medical care regardless of the age, sex, or affected organ system of the patient. It emphasizes the preventive aspects of health care and treatment of the patient in context of his or her family and community. Treatment of the whole person is a hallmark of family practice.

FAPR 905. Rural Family Medicine - Practice and Research. 4 Hours.
This elective is offered to students between the first and second years of medical school. It is designed to provide students with the opportunity to observe a rural family physician in the daily practice of medicine and to participate in the data collection involving delivery of medical care to patients seen in rural practices in Kansas. Students will spend two summer months on site with a rural family physician, observing the practice and performing data collection. At the beginning and end of the two month on site experience, students will spend eight days with faculty in the Department of Family Practice at KUMC. Prerequisite: Permission of the instructor. FLD.

FAPR 910. Clerkship in Family Medicine. 4 Hours.
The instructional objectives of the elective clerkship in family practice are to build on the skills and knowledge accumulated in the basic science areas and the other clinical specialty areas and reinforce them and apply them to the delivery of health services to the family unit and relate them to the individual, the family and the community. The clerkship, through supervised patient contact within the hospital and in the Family Practice Center and supervised teaching conferences, will amalgamate and reinforce the skills and previously gained clinical knowledge into the philosophy of primary health care delivery in breadth rather than depth. Offered in Modules I-XII. Prerequisite: Completed third year. FLD.

FAPR 915. Medicine and the Family. 2 Hours.
This elective course on medicine and the family teaches students about family dynamics as they relate to the practice of medicine. Specifically, the course focuses on the family life cycle, normal and dysfunctional families, marriage, "normal" sexual behavior, and sexual dysfunction. These
participate in this elective. CLN.

FAPR 920. Research in Family Practice. 2-8 Hours.
Students desiring basic research experience in the context of Family Medicine may seek the sponsorship of a Family Practice faculty member and with that individual develop a written plan for the elective. The elective may vary in length from two weeks to three months and carries with it one credit hour for each sixty hours of time spent on the elective. Elective not available during July. FLD.

FAPR 925. Interdisciplinary Community Partnership. 4 Hours.
This course is designed as an interdisciplinary team approach to developing strategies for community health assessment and intervention. Students will work with a team that includes at least three other health professional students and at least one community "lay health advisor" to assess the health needs of a local neighborhood and develop and implement an appropriate intervention. The course will explore community needs and resources, assess barriers to care, and culturally appropriate interventions. No courses currently exist which involve an equal partnership with medicine, allied health, social work and nursing. This course is designed to give students the opportunity to learn to work as a team member with a variety of health care professionals, and to understand the valuable contribution of each group. Research has shown that students who are involved in the community during medical school continue to be actively involved in their chosen communities. This course is developed in concert with KU's Schools of Nursing, Allied Health and Social Welfare. This first year, two interdisciplinary teams will be assembled, working with 2 neighborhoods in the vicinity of KUMC. If this pilot is successful, more communities and teams will be assembled in future years. This is a year-long course that will span both fall and spring semesters. LEC.

FAPR 926. AIDS Care in the Community. 4 Hours.
This elective is a concentrated experience in AIDS medical care provided in a family practice setting. The focus is on diagnosis, treatment and psycho-social issues for men, women and children with HIV disease (including gynecologic, prenatal and delivery of infected women). Care throughout the spectrum of disease is emphasized. The course is an additional elective to be made available to clinical medical students in the fourth year of training. LEC.

FAPR 927. Palliative Care in a Community Setting. 4 Hours.
This elective is an end-of-life medical care experience including identification and treatment of medical problems associated with cancer, CHF, COPD, AIDS, and other life-shortening diseases. The course focus is on symptom management and psycho-social issues associated with dying. This course is an additional elective to be made available to clinical medicine students in the fourth year of training. LEC.

FAPR 935. PRIMARY CARE SPORTS MEDICINE. 4 Hours.
Students on this rotation will have the opportunity to learn the principles of primary care sports medicine. The rotation will be outpatient based and will include learning experiences in the sports medicine clinic, at the training room, and on the sidelines of high school and college sporting teams. Specific learning experiences will vary based on the sporting events that are available during the time of the elective. PREREQUISITE: Students must have completed all required third-year clerkships to participate in this elective. CLN.

FAPR 961. Community Based Geriatrics. 4 Hours.
Students on this rotation will have the opportunity to learn the principles of caring for older patients. The rotation will be based at the Landon Center of Aging and will include educational experiences in outpatient clinic, long-term care facilities, assisted living facilities and with hospice. This elective experience will build on the Year 3 Geriatrics clerkship by allowing the student to further develop their understanding and management skills in the care of older adults across the health care continuum. Students are invited to individualize their experience through a focus on a particular care setting or aspect of older adult care by arrangement with the clerkship director. CLN.

FAPR 962. Advanced Clinical Reasoning Skills. 2 Hours.
Clinical reasoning is a critical, often-underdeveloped skill in practicing physicians. Diagnostic errors are common among physicians and residents. In this course, you will learn to recognize common clinical reasoning errors, develop practice habits to help you improve your clinical reasoning, and develop reflective habits that help you determine why an error was made. You will learn how specific history, physical examination, and ancillary testing items make certain diagnoses more or less likely. This course will meet 10 times for 2 hours during a semester with course work between meetings. PREREQUISITE: Satisfactory completion of 6 months (4 six-week or 3 eight-week) of clinical clerkships. Concurrent clinical rotations for a minimum of 8 weeks over the semester. CLN.

FAPR 963. Cross-cultural Health Leadership Module I: Didactic. 1 Hour.
Cross-culturally competent care refers to physicians’ “ability to communicate effectively and provide quality health care to patients from diverse sociocultural backgrounds.” This course will train medical students in cross-cultural communication (C3) skills via interactive sessions in a student-based “learning community”. In Module 1, students learn and practice Association of American Medical Colleges (AAMC)-defined core topics for cross-culturally competent knowledge, attitude and skills. These are: 1) the definition of cultural competence, and providers’ self-assessment of own relevant cultural experiences; 2) key aspects of cultural competence, including patients’ healing traditions and systems, institutional cultural issues, and how these patients’ explanatory illness narratives; 3) understanding how stereotyping and bias influence medical care; 4) the epidemiology of social determinants of health care disparities and collaboration with communities to address these; and 5) clinical communication skills to engage patients with different values, culture and beliefs than one’s own, i.e. working with interpreters, and diagnostic, negotiating and problem-solving skills. In Module 1, we will use interactive faculty-facilitated didactic discussions, role play, case-studies, volunteer standardized patient interactions and out-of-class reading. Students will also conduct an in-depth case study with one cross-cultural patient and prepare a detailed patient narrative report describing both the patient’s illness narrative and relevant cultural and social determinants of health impacting their health experience. Prerequisite: KUMC School of Medicine student. LEC.

FAPR 964. Cross-cultural Health Leadership Module 2: Service Learning Projects. 1 Hour.
Cross-culturally competent care refers to physicians’ “ability to communicate effectively and provide quality health care to patients from diverse sociocultural backgrounds.” This advanced course will train and mentor medical students in cross-cultural communication (C3) skills via participant-conducted service learning projects in voluntary clinical settings within a student-based “learning community”. In Module 2, students will practice skills taught in Module 1, namely Association of American Medical Colleges (AAMC)-defined core topics for cross-culturally competent knowledge, attitude and skills (See Module 1 description). Participating students will collaborate to conduct service
learning, quality improvement (Q1) projects to improve cross-culturally
competent care in cross-cultural clinical settings in which they or their
colleagues participate, e.g. (for M1/M2 students) Jaydoc, Bulldoc school-
based health center, or clinical settings with permission of clinical faculty
in those settings. Module 2 service learning projects will include 2 clinic-
based "whole system events" to which participating students invite clinic
faculty, staff and other student colleagues from students' practice settings.
At the first event, students will present and discuss their proposed project
to improve cross-culturally competent health care with clinic faculty and
staff from the proposed setting. At the second event (at the end of the
course), students will present the results of their project to their clinic
faculty and student colleagues. Projects must address cross-cultural
elements of clinical practice or cross-cultural communication skills; and
be appropriate to the students' developmental stage of training (e.g.
M1 students might conduct projects to improve M1 student skills using
interpreters). Module 2 students will also participate in interactive sessions
with faculty and other student participants, during which they will learn
and discuss methodological approaches; and discuss challenging issues
arising in their projects. Prerequisite: Prior participation in "Cross-cultural
Health Leadership Module 1: Didactic" or Permission of Instructor LEC.

Gynecology and Obstetrics

The Department of Obstetrics and Gynecology teaches anatomy,
physiology, and endocrinology of reproduction in the basic science
disciplines. During a clinical clerkship the student develops understanding
of disease in women through history, physical examination, and laboratory
studies. The clerkship includes study of biochemical, anatomical, and
physiological changes of normal pregnancy and the effect of disease in
altering the course of reproduction.

GYNO 914. Reproductive Endocrinology and Infertility. 4 Hours.
This clerkship will allow the medical student to develop skills in assessing
and managing female patients who have complex reproductive
endocrinology disorders. The student will also gain experience with
diagnosis and the treatment options for female and male infertility. This
clerkship will provide experience in office and operative procedures
including laparoscopic procedures utilizing the laser and open procedures,
which may include tubal reversal and myomectomy procedures.
Prerequisite: GYNO 906, permission of instructor and clerkship director,
John Caikins, M.D. FLD.

GYNO 915. Maternal Fetal Medicine. 4 Hours.
This clerkship will provide the medical student with advanced experience
in high risk obstetrics. The student will be assigned to the Obstetrical
Service at KUMC. The student will participate in the management of
complicated obstetrical conditions in a role similar to that of a sub-intern.
Prerequisite: GYNO 900, permission of instructor. LEC.

GYNO 916. Special Topics and Research. 2-4 Hours.
Offered in modules I-XII. Prerequisite: Permission of instructor. IND.

GYNO 918. Gynecologic Oncology. 4 Hours.
Subject material consists of the clinical science of oncology as applied to
malignancies of the vulva, vagina, cervix, uterus, ovary and trophoblast.
The student should be able to describe and define malignancies of the
female genital tract in general terms and complete a clinical study in detail
in the area of gynecologic oncology. The student will be evaluated by
faculty judgment for general information, and a specific assessment of
student projects will be performed. Offered in modules I-XII. Prerequisite:
GYNO 900 and permission of instructor. LEC.

History & Philosophy of Medicine

A survey of the history and philosophy of medicine and the sciences
applied to medicine from antiquity to the 20th century is offered. The
changes and developments of medical theory, practice, organization,
and education are traced and their relations with contemporary cultures
examined. The following electives on aspects of medical history and
philosophy are available.

HPMD 905. Narrative Ethics. 4 Hours.
Narrative Ethics provides an essential complement to traditional
philosophic ethics. Where an analytic approach to ethics reduces
moral decisions to rational puzzles to be solved, a narrative approach
examines a moral problem within the context of an individual's lived life,
characterized by its own unique cultural and personal relationships,
values, and commitments. Physicians need the narrative skills of a good
reader in order to recognize and respond effectively to moral issues as
they arise, to integrate concerns for values and beliefs into the routines
of patient care, and to interpret patients' moral choices within a framework of
an individual life story. LEC.

HPMD 906. Medicine and the Movies. 0 Hours.
Utilizing film clips and video from the early 20th century to the present,
the course provides a selected review of important topics in public
health, medical institutions, and the professions of medicine and nursing.
Consequently, students will become familiar with historical and social
factors that have helped shaped medicine in the 20th century. LEC.

HPMD 908. Case Studies in Medical Ethics. 0 Hours.
Subject area to be arranged with faculty as independent study, offered
only in August-December each year. IND.

HPMD 909. Ethical Issues in: ______. 4 Hours.
"Ethical Issues in _______" is a course offered to senior medical
students who desire to spend a four-week block of time in the systematic
examination of the set of ethical issues they are likely to encounter in their
chosen post-graduate training program, e.g. ethical issues in psychiatry,
ethical issues in OB/GYN, etc. The course consists of a guided literature
search, regular tutorial sessions and preparation of a short research
paper on a particular ethical issue or "case." The course is intended to
offer the interested student a basic introduction to the reference tools and
literature of contemporary medical ethics; assist the student in developing
a critical perspective in ethical controversies within his/her chosen field;
and, provide the student with basic analytical skills and approaches to
particular ethical problems. Evaluation will be based on participation in
tutorial sessions and the research paper. (Interested students should
contact the Department of History and Philosophy of Medicine, (x7040) for
additional information.) ALL STUDENTS ENROLLING IN THE COURSE
MUST CONTACT THE DEPARTMENT AT LEAST ONE MONTH
PRIOR TO ENROLLMENT DATE TO ALLOW FOR APPROPRIATE
INDIVIDUALIZED PLANNING AND SCHEDULING. Prerequisite:
Enrollment limited to senior medical students. (Junior medical students by
special permission.) IND.

HPMD 910. Readings in the History of Medicine. 4 Hours.
Guided readings in an area chosen by the student after consultation.
Weekly individual tutorials and group seminars. Offered in Modules I-XII.
IND.

HPMD 911. Current Social and Ethical Problems of Medicine. 4 Hours.
Guided readings and discussion of one or more social or ethical
problems currently facing medicine. Examples: Homosexuality, abortion,
contraception, medical education, medicine as a social instrument, etc. Offered in modules I-XII. IND.

HPMD 914. Advanced Study in the History of Medicine. 4 Hours. Sequel to readings in the history of medicine. Offered in Modules I-XII. Prerequisite: HPMD 910 and approval of chairperson. IND.

Interdisciplinary

IDSP 800. Special Programs. 1-8 Hours.
Electives taken during the basic science years of institutions other than KUMC or at KUMC but in departments that do not have an elective course number. These courses include, but are not limited to, a research training experience or a clinical training experience, during the summer session between the first and second years of medical school. The application form, obtained from the Office of Student Affairs, School of Medicine, must contain a written description of the educational experience, the reason for proposing such a program, and written indication of faculty or supervisory personnel of their willingness to evaluate the student's performance. Elective credit will be accrued at the rate of four credits for eight weeks, three credits for six weeks, two credits for four weeks, or one credit for two weeks. Prerequisite: Approval of student's special program mentor, special program advisor and Associate Dean for Student Affairs. FLD.

IDSP 801. Remedial Program. 0-12 Hours.
Medical students will be enrolled in this course when the Academic Committee of the School of Medicine recommends a remedial program for a student who has failed a course. Remediation may take place at KUMC or at another institution. Evaluation of the student's performance must be obtained from the remedial program director upon completion of the remedial program. Prerequisite: Approval of Associate Dean for Student Affairs. FLD.

IDSP 802. Diversity and Cultural Competency in Medicine. 3 Hours.
The primary purpose of this course is to provide medical students at the University of Kansas School of Medicine with the critical knowledge, skills, abilities and attitudes necessary for cultural competency in medicine. This course will empower student to develop the attitudes, skills, and knowledge base necessary to effectively serve diverse populations, especially the underserved, vulnerable, and at-risk populations. In addition, students will learn more about diversity and diverse populations. Students will learn that diversity is each of us and all of us, and that it is necessary to treat each person as the unique individual he/she is. There are many complex issues surrounding the provision of health and social services in this state, the nation, and the world. Differences in language, age, culture, sexual orientation, life experiences, socioeconomic status, political and religious beliefs add challenging dimensions to healthcare delivery and education. The State of Kansas and the nation is becoming increasingly diverse. It is improbable that current medical students will become physicians who serve only those with whom they share a common background. Therefore, it is necessary that medical students learn to understand and appreciate those who differ from them so that the physician/patient relationship is one that is mutually beneficial. Those students who successfully complete this course will have the skills they need to be the world class physician the future requires. FLD.

IDSP 804. Special Experience. 0 Hours.
Medical students will be enrolled in this course when the Associate Dean for Student Affairs, the Associate Dean for Academic and Student Affairs, or the Academic Committee approves a program for a student that may include a prolonged absence from the School of Medicine. The student's experience may include, but is not limited to, a fellowship, research, or Master's program. The student will not receive credit, a grade, or evaluation of their performance. LEC.

IDSP 805. Enrichment Program. 0 Hours.
Medical students will be enrolled in this course during the clinical years when no other rotations are scheduled for the student. IND.

IDSP 806. Personal/Professional Development. 0 Hours.
Medical students will be enrolled in this course during the clinical years when no other rotations are scheduled for the student. IND.

IDSP 850. Introductory to Clinical Research. 1 Hour.
The course will provide a comprehensive overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical research among the various institutional entities involved with clinical research at The University of Kansas Medical Center such as the Research Institute (RI), General Clinical Research Center (GCRC) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on how to apply for funding (grantsmanship), critical appraisal of research studies, and how to present research data. LEC.

IDSP 900. Special Program. 1-12 Hours.
A special program is any scholastic activity that departs from the required or elective modules of the curriculum at KUMC and for which the student expects to receive credit toward the M.D. degree. Any student enrolled in medical school is eligible to apply. The application form is initiated in the Office of Student Records and Registration. In addition to this form, the application must contain a written description of the type of educational experience sought and the reason for proposing such a program; written indication of faculty or supervisory personnel of their willingness to participate in the program and to evaluate the student's performance; source of scholarship, fellowship, travel, or research fund when these funds constitute support of an integral part of the program. If the special
program involves study in an area identifiable by department (medicine, Surgery, Gynecology-Obstetrics, etc.) approval by the chairperson of the respective department or designate must be obtained. No more than two modules may be substituted by a special program. The application must be submitted at least two months before the expected starting date of the program. Offered in Modules I-XII. Prerequisite: Approval of Dean. FLD.

IDSP 910. Medical Spanish-Level 1. 2 Hours.
This is an entry level Medical Spanish course for students with minimal or no Spanish language education. Student completing this course will have acquired the language skills necessary to interact at a basic level in a medical context. Students will learn how to introduce themselves, greet patients, obtain personal information, ask about symptoms, and describe medical conditions. In addition, students will be able to hold basic conversations with patients about pain, diabetes, diet, trauma, cardiac issues, depression, and anxiety. Students will also be able to use and recognize basic cultural practices such as forms of address, family structure, beliefs about medicine as well as how to work with a translator. Prerequisite: Minimal to no knowledge of Spanish language and approval from the Dean of Student Affairs. LEC.

IDSP 911. Medical Spanish-Level 2. 2 Hours.
This is an intermediate-low level Medical Spanish class. In Medical Spanish level 2 students build on what they have learned in the previous level. They expand their vocabulary skills to include medical specialties and procedures as well as their ability to describe medical conditions. Students begin to learn to ask about and express past actions and conditions. They also learn to give specific advice and directions to medical personnel and patients. By the end of the course, students will be able to hold conversations on STIs and reproduction, MI symptoms and anatomy, respiratory concerns, pregnancy and prenatal-care, drug and alcohol abuse, strokes, surgery procedures, pharmacy and drugs and elder care. Students will also be able to understand culturally specific approaches such as the meaning of death, modern medicine and "fatalism" among many others. CLN.

IDSP 912. Spanish for Health Care Workers. 2 Hours.
This is an advanced Medical Spanish course for students with prior knowledge of Spanish. The class requires students to conduct medical encounters in Spanish, and thus, only those at a set proficiency level will be invited to enroll. Completion of Medical Spanish I and II (or equivalent) and a score of at least "Approaching Proficiency" on the Clinician Cultural and Linguistic Assessment (CCLA) are prerequisites for enrollment. The CCLA is a tool developed by Kaiser Permanente designed to assess physicians' ability to communicate directly with target language-speaking patients in a primary care medical setting. Students completing this course will have acquired the language skills necessary to successfully conduct the most common patient encounters in a clinical setting. Students will also be able to use, recognize and appreciate basic cultural practices such as forms of address, family structure and beliefs about medicine and illnesses. Prerequisite: Permission of the instructor required; completion of Medical Spanish I and II (or equivalent); and, a score of at least "Approaching Proficiency" on the Clinician Cultural and Linguistic Assessment (CCLA). FLD.

IDSP 950. Introduction to Clinical Research. 1 Hour.
The course will provide a comprehensive overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical research among the various institutional entities involved with clinical research at The University of Kansas Medical Center such as Research Institute (RI), General Clinical Research Center (GCRC) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on how to apply for funding (grantsmanship), critical appraisal of research studies, and how to present research data. Must have instructor permission to enroll. LEC.

IDSP 956. Health Data Theory and Practice. 2 Hours.
Principles of database theory, modeling, design and manipulation will be introduced. Students will have experience using a relational database management system. Database manipulation will be explored using structured query language (SQL) to compose and execute query statements and critically evaluate the results. IND.

IDSP 970. Introduction to Health Informatics. 2 Hours.
This course will provide a broad survey of health informatics focused on five themes: health informatics foundations; clinical decision support; human factors/organization factors; public health informatics and current issues in health informatics including best practices. Students enrolled for the optional 3 credit offering will develop and demonstrate a practical, innovative small-group information technology (IT) project from one of the set of faculty recommended projects or from a student-proposed idea. IND.

IDSP 975. Health Care Policy Development. 4 Hours.
Health care policy is having an increasing impact on the patient-physician relationship. In addition, these policies address critical issues affecting patients, such as access to care and health care financing. Although input from physicians on these issues is crucial, physicians are infrequently aware of the mechanisms through which they can participate in the legislative or regulatory processes. As efforts continue to reform the health care system, it will be increasingly important for physicians to participate in these processes. LEC.

Internal Medicine

Before being assigned to an inpatient medical service, all students learn techniques of obtaining a medical history and performing a physical examination. Each student must then take an 8-week Basic Medicine Clerkship in internal medicine. After successful completion of this phase of education, students interested in obtaining greater mastery of the content and principles of internal medicine may choose from a variety of advanced clerkships and electives in medical subspecialties.

MED 901. General Medicine--Veterans Administration Medical Center. 4 Hours.
The student will be assigned to one of the general medical wards where the student will function in the role of subintern (e.g., the student will be assigned patients to work up and will be expected to assume partial responsibility for their diagnostic and therapeutic program). The number of patients assigned and the amount of responsibility given will vary with the student's ability. At all times the student will work closely with a staff physician or senior resident who will be responsible for the student's education. Offered in modules I-XII. Prerequisite: MED 900. FLD.

MED 902. Advanced Topics in Internal Medicine. 4 Hours.
Offered in modules I-XII. Prerequisite: MED 900 and special arrangement with department. FLD.

MED 903. Research Topics in Internal Medicine. 4 Hours.
Offered in modules I-XII. Prerequisite: Special arrangement with department. IND.
MED 906. Advanced General Medicine - Leavenworth Veterans Administration Medical Center. 4 Hours.
The student will function in the role of a sub-intern on the Medicine I Teaching Service. He/She will assume partial responsibility for the diagnostic and therapeutic program for assigned patients. The number of patients and level of responsibility will be accommodated to the individual's educational goals and ability. Emphasis will be placed on the clinical and practical approach to the patient including differential diagnosis, pathophysiology, and management strategies. At all times the student will work closely with the Chief, Medical Service who is in charge of the Teaching Unit. Evaluation of the student's performance during the clerkship will be based on faculty's assessment of the student's clinical and conference participation. Prerequisite: MED 900. FLD.

MED 907. Ambulatory Specialties Selective in Dermatology. 2 Hours.
Two week course composed of outpatient clinic experience, tutorial sessions, and audiovisual material available in the educational resource center (ERC) will enable the medical students to diagnose the most prevalent skin diseases and perform an adequate history and physical examination needed to establish these diagnoses. There will be a syllabus available from the secretaries in the dermatology office. There will be an opportunity to attend a monthly Kansas City Dermatological Society meeting on the third Thursday of most months, and attend at least twice weekly conferences given by the dermatology residents to the medical students. Some medical students will have the opportunity to spend two weeks with a dermatologist in private practice in the Kansas City area (or Topeka) instead of spending the time at the University of Kansas Medical Center Dermatology department. Those students are encouraged to attend the lectures given by the dermatology residents. LEC.

MED 909. Clinical Elective in General Medicine Consultation and Hospital Based Medicine Practice. 4 Hours.
The student(s) will be exposed to the arena of general medicine consultation and hospital based medicine practices. The students would be responsible for performing initial evaluation and work up of new general medicine and/or geriatric consultations as well as the ongoing care of the patient's medicine issues. This experience would be unique in that the attending record is not a general internist but often a surgeon, rehab specialist, etc. The students would learn the art and science of being a consultant-from evaluating medical conditions as they arise in the surgical and rehabilitating patient communicating with referring physicians, providing concurrent care, diagnostically and therapeutically of serious ongoing medical issues. In addition, the student would become well versed in the pre-operative evaluation of patients, as this can be a substantial part of a general internist's practice. Finally, the student will gain insight to what it is like to have a hospital-based practice by working directly with two hospitalists for KUMC. One of the responsibilities of the elective would be to prepare and give a short presentation on an issue of consultative medicine that would be presented in small group format but could also be used in care-based format to present in other arenas if so desired. FLD.

MED 910. Clinical Cardiology. 4 Hours.
The clerkship in cardiology offers an experience in the clinical evaluation and treatment of patients with a variety of cardiovascular problems. The students, as sub-interns, will function on the cardiovascular service as an integral part in the care of the seriously ill patient with a wide range of problems. The students will make cardiovascular rounds with one of the members of the cardiology staff, during which time clinical skills in bedside diagnosis, auscultation and palpitation will be emphasized and developed. They will have an opportunity to develop expertise in interpretation of electrocardiograms on a daily basis. The treatment of arrhythmias and heart failure will be stressed. They will also have an opportunity to evaluate in-hospital consultations as well as outpatient consultations and to see postoperative follow-up patients. They will have an opportunity to follow patients through cardiac catheterization procedures and to participate in the computation and assessment of the catheterization date. Indication for cardiovascular operations will be emphasized to weekly conferences. FLD.

MED 911. Coronary Care Unit and Electrocardiography--Veterans Administration Medical Center. 4 Hours.
The student will function as a subintern in the Coronary Care Unit with the cardiovascular fellow and cardiology subspecialty resident. The patient material consists of all the patients in the VA medical center with acute myocardial infarction, rule out acute myocardial infarction, pre-infarction syndrome and problem arrhythmias. The student will also develop expertise in electrocardiography and read a portion of the daily EKG's independently and in collaboration with the cardiovascular resident or fellow and the cardiologist. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 915. Comprehensive Care of the Complex Adult. 4 Hours.
The objective of this four week elective is to enhance the student's ability to care for complex adult patients in various systems of care. Clinically, the student will rotate through selected clinical centers of care at the University of Kansas. There will be a focus on three facets of the care: the clinical content and context, the patient's experience and the structure of the specific systems of care. Through experience, didactic presentations on systems of care, focused observation and reflection, the student will be able to better define the organization of clinical systems of care and to recognize how to 'diagnose' and to help collaborate in improving systems of care. These skills will likely be of great benefit for understanding elements of the core competency of 'systems based practice', and practically applying that knowledge to the new systems of care encountered in residency. CLN.

MED 916. Integrative Medicine. 4 Hours.
Course objectives are to expose medical students to other healing fields through readings, lectures and seminars, field observations, performing an independent review, and presenting a paper at the conclusion of the course. The students are expected to evaluate the claims of various practices critically and be rigorous in their questioning of all forms of human healing including practices currently considered mainstream. The students are expected to become aware of various practices that patients may be using so that they can be better informed physicians and be more comfortable in discussing these areas with patients whom may be interested in using them or are already doing so. The students should also learn to communicate effectively with practitioners of complementary and alternative medicine therapies. LEC.

MED 920. Advanced Gastroenterology Clerkship. 4 Hours.
This clerkship is directed toward specific problems of gastrointestinal disease. The clinical clerk is involved in ward care and ward work, including admission work-up of patients, their daily care, staff rounds, X-ray interpretation, treatment of specific GI disease, long term therapy, and follow-up in the outpatient clinic. The clerk is supervised by the GI resident or fellows and can participate in special GI procedures on patients, such as endoscopy and motility studies. The clerk is instructed in proctoscopy until he/she has mastered this as a routine procedure. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 921. Gastroenterology Clerkship--Veterans Administration Medical Center. 4 Hours.
The manifestations of gastrointestinal disease will be presented to the student by participation in consultation rounds and endoscopy. The student will be a member of a team composed of a staff gastroenterologist, a fellow, and a medical resident. At the completion of the course, the student will be familiar with the manifestations
of gastrointestinal diseases, their diagnostic evaluation, and their treatment. The student will learn the indications and contraindications of gastrointestinal procedures. The student will be evaluated on a daily basis by the staff gastroenterologist as the student interviews and examines patients and makes recommendations for their diagnostic and therapeutic measures on consultation rounds. Prerequisite: MED 900 or permission of instructor. FLD.

MED 923. Gastroenterology--Special Programs. 4 Hours.
Combination of the preceding GI electives as desired by the student upon consultation with the senior GI staff. Offered in modules I-XII. Prerequisite: MED 900 and MED 920 or MED 921. FLD.

MED 925. Interdisciplinary Community Partnership. 4 Hours.
This course offers an interdisciplinary eight-week experience in diverse settings outside of the tertiary care environment, dealing with community health issues and their impact on individual and population health. Students will be engaged in intensive on-site internships with organizations, e.g., social service and public health agencies, community-based indigent-care clinics, which provide services related to disease prevention, health promotion, quality of life, health insurance, poverty prevention, and other healthcare issues. The students will gain insight into the hallmarks of specific populations within the community, as well as the jensities and programs that serve their needs. Direct mentorship will be provided by professionals trained in multiple disciplines, including but not limited to: medicine, nursing, allied health, and social work. Students will complete a comprehensive project related to a particular need of the agency and/or the population that the agency serves. Common examples include: needs assessments, grant development, health interventions, research surveys, and curriculum development. In addition, students will be required to complete an oral or poster presentation describing their project, as a comprehensive written report of their internship experience. The overall emphasis of the course will be to enhance awareness to expand knowledge, and to gain experience in working with individuals and populations on the health care challenges they confront within their families, their community and our society. FLD.

MED 930. Clinical Hematology. 4 Hours.
This will consist of inpatient and outpatient care, dealing with all types of hematologic disorders. The student will be given experience and instruction in morphology of peripheral blood and bone marrow. Weekly conferences, didactic and participating study sessions with the hematology staff will be conducted. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 935. Infectious Diseases--Advanced Clerkship. 4 Hours.
The students will be given the responsibility of participating actively in the care of patients admitted to the division of infectious diseases under close supervision by attending physicians and house officers. Students will also be exposed to experiences in clinical microbiology as well as medical consultations requested by other clinical services to the division of infectious diseases. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 936. Infectious Disease Elective at Kansas City Veterans Administration Medical Center. 4 Hours.
The Infectious Disease Section at the VA medical center is responsible for an active inpatient consult service. The student will be responsible for seeing the consult patients with the resident and/or Infectious Disease fellow, recommending initial diagnostic and therapeutic management, and presentations to the Infectious Disease staff physician. The clinical experience will be supplemented with didactic discussions and an introduction to medical microbiology in the clinical laboratory. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 940. Endocrinology and Metabolism, Clinical. 4 Hours.
Introduction to endocrinology and metabolism with special emphasis on diagnosis and management of selected patients with this category of disease. Students will participate directly in patient evaluation. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 941. Research Problems in Endocrinology and Metabolism. 8 Hours.
Two consecutive four-week modules that will provide the interested student with laboratory and research experience necessary for clinical investigation of specific problems in endocrinology and metabolism. The student may either pursue an independent research project or participate in a research project currently under investigation by a staff member. The student will be required to submit a written report and deliver a seminar at a Sectional Research Conference. An objective of this course will be to obtain data suitable for publication or presentation at Student Research Day. Offered in modules I-XII. Prerequisite: Special arrangement with staff. IND.

MED 950. Clinical Nephrology-University of Kansas Medical Center or Veterans Administration Medical Center. 4 Hours.
The Division of Nephrology is active in both the University of Kansas Medical Center and the Veterans Administration Medical Center. The activities of this division center on the diagnosis and treatment of patients with medical diseases of the kidney. Clinical clerks are assigned patients on the inpatient service, the outpatient clinic and in the outpatient chronic hemodialysis unit. The clerks are expected to function at a subintern level. Under the guidance of the house staff they provide the primary work up, write the admitting orders and assist in performing procedures such as peritoneal dialysis and hemodialysis. Clerks and house staff meet regularly with the attending staff nephrologist to discuss specific topics in renal physiology and pathogenesis. A formal nephrology conference for all housestaff and students is held weekly. The clerk is encouraged to participate in one of the ongoing research projects. Three positions are available at the University of Kansas Medical Center and two at the Veterans Administration Medical Center. Offered in modules I-XII. Prerequisite: MED 900. FLD.

MED 951. Research Problems in Basic and Clinical Nephrology. 4-8 Hours.
Investigation of specific problems in nephrology. One or two modules consecutively. Offered in modules I-XII. Prerequisite: Arrangement with staff. IND.

MED 960. Pulmonary/Critical Care. 4 Hours.
Students will be assigned to the Respiratory Intensive Care Unit. Under direct supervision of a Senior Medical Resident and a Pulmonary/Critical Care Fellow they will participate in the care of patients hospitalized in the Respiratory Intensive Care Unit. Daily attending rounds emphasize correlation of clinical, radiographic, laboratory, and invasive physiologic data in managing critically ill patients. Extensive experience in ventilator management and invasive monitoring. Students are on pager contact so they may be notified and participate in critical care decision making. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 961. Pulmonary Medicine, Physiology. 4 Hours.
Students will be assigned to the pulmonary function laboratory to learn the technique and interpretation of pulmonary function tests. Under the immediate supervision of a pulmonary technician and a pulmonary disease fellow, students will observe, perform, and interpret the various tests of lung function. Clinical correlation will be obtained via attendance at inpatient, outpatient, and consultation rounds where clinical problems will be related to physiologic findings. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. LAB.
MED 962. Chest Disease Medicine—Veterans Administration Medical Center. 4 Hours.
The student electing the Chest Disease Service at the Veterans Administration Medical Center will be assigned as a subintern on Ward 11 West where he or she will be assigned to primary care of a small number of selected chest disease patients. The student will be directly responsible for the patients' diagnostic and therapeutic management under the specific supervision of the chest disease fellow and chief of chest disease section, VA medical center. There will be seminar and didactic instruction on natural history of the frequently occurring chronic chest diseases. The student will assist in procedures such as fiberoptic bronchoscopy, pneumo-thorax intubation, thoracentesis and pleural biopsy and will observe and perform common procedures of pulmonary function testing with patients. He or she will assist with chest disease consultations from other services with the chest disease resident and will be expected to attend and participate in all conferences of the chest disease section. The student will participate in inhalation therapy procedures including ventilator management. He or she will be expected to complete and discuss a small required reading list from selected texts and journal articles. The objective of the elective is to give a student concentrated but comprehensive actual experience in the management of the chest disease performance section of the VA medical center in writing at the completion of the elective. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 969. Clinical Oncology—Veterans Administration Medical Center. 4 Hours.
The student will participate in both in- and outpatient cancer management, consult rounds, and twice-weekly teaching conferences. Emphasis will be on clinical investigations of new and established anticancer drugs, and on the application of pharmacokinetic and cytokinetic studies to the treatment of cancer. Evaluation of the student's general clinical skills and acquisition of knowledge in oncology will include direct observation of clinical performance and conference participation, and a brief objective examination. Offered in modules I-XII. Prerequisite: MED 900. FLD.

MED 970. Clinical Oncology Clerkship. 4 Hours.
The student participates actively in the care of the oncology patient on an in- and outpatient basis. This includes consultation rounds. Clinical investigation with both conventional and experimental drugs will be stressed and an opportunity to treat patients by protocols will be given. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 971. Advanced Studies in Clinical Oncology. 4 Hours.
This is an advanced course with emphasis on consultations with attending staff and fellows, investigative protocol studies and special projects, including lectures and conferences. There will be outpatient activity, but no inpatient care. Offered in modules I-XII. Prerequisite: MED 900 and MED 970 or MED 969. FLD.

MED 972. Palliative Medicine Across the Continuum of Care. 4 Hours.
This elective rotation will expose the student to palliative care patients at all stages of illness and coping with advanced disease processes, from the ICU to the inpatient and home hospice settings. The student will work with the Palliative Care Team of physicians, advanced practice nurses, Palliative Medicine fellows, and our social workers. Focus of clinical activity is on the interdisciplinary management of patient symptoms, inter-professional and interpersonal communication skills, clinical ethics in end of life decision making, and understanding health care system complexities for patients facing advanced, progressive illness. The student will spend a portion of the rotation with either Northcare Hospice or Kansas City Hospice and Palliative Care, working with their interdisciplinary team in the management of acute inpatient hospice patients and home hospice patients. Continuity for the student in care of patients who transition from the hospital to the inpatient or home hospice setting will be fostered. CLN.

MED 980. Clinical Allergy, Immunology, and Rheumatology. 4 Hours.
Students will participate in the weekly KUMC allergy and rheumatology outpatient clinics, as well as assist in subspecialty inpatient consultations. They will perform medical evaluations, select appropriate diagnostic procedures and define specific therapy on assigned patients under the supervision of the staff. They will receive orientation to clinical immunologic tests in current use and be expected to interpret the results of these appropriately. Regular lectures by the staff are given in areas of clinical immunology. With guidance they will choose a topic appropriate for seminar presentation at the end of this clerkship. Offered in modules I-XII. Prerequisite: MED 900 or permission of Instructor. FLD.

MED 981. Advanced Allergy, Immunology, and Rheumatology. 4 Hours.
The activities outlined in MED 980 will be continued, but the student will have more responsibility for patient evaluation and management. With guidance, another topic will be chosen for seminar presentation at the end of this clerkship. Offered in modules I-XII. Prerequisite: MED 900 and MED 980. FLD.

MED 982. Research Problems in Allergy, Immunology, and Rheumatology. 4 Hours.
Three consecutive modules are necessary to give the student adequate time to pursue an independent research problem or a project currently under investigation by a staff member. The student will be required to submit a written report and give a seminar at a division research conference during the final module. Offered in modules I-XII. Prerequisite: Special arrangement with division. FLD.

MED 990. Geriatric Medicine - Leavenworth Veterans Administration Medical Center. 4 Hours.
The student will function in the role of a sub-intern, with supervised responsibility for management of patients in a special assessment unit for the elderly, a nursing home, and an outpatient clinic. In addition to daily teaching rounds, students will participate in seminars covering physiology of aging, altered presentation of illness in the elderly. Evaluation of the student's performance during the clerkship will be based on faculty's assessment of the student's clinical skills and conference participation. Prerequisite: MED 900. FLD.

MED 995. Dermatology. 4 Hours.
This course is composed of outpatient clinic experience, tutorial sessions utilizing audiovisual aids extensively, and inpatient teaching rounds, as well as frequent review of pertinent aspects of dermatological allergy, microbiology, and histopathology. There will be opportunities to attend special weekly dermatological basic science lectures and grand rounds. Acquired skills in dermatological diagnosis (disease recognition, as well as analytical reasoning, or "problem solving") and in dermatological therapy will be evaluated by such means as oral quizzes and a written examination, but the final appraisal of each student will always be individualized. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. FLD.

MED 996. Research Problems in Dermatology. 4 Hours.
A four-week research elective in which the student undertakes an original investigation in dermatology or participates in an ongoing project, in either case under the direct supervision of a dermatology faculty member. A written report at the end of the module summarizing the student's findings will be required. Modules I-XII, limited to one student per module.
Prerequisite: Medical Basic Sciences and by special arrangement with staff. FLD.

MED 998. Advanced Studies in Geriatric Medicine. 4-12 Hours.
An advanced course of one to three months specially arranged for each student to encompass a clinical research project. There will be participation in clinics and consultations as appropriate. Offered in modules I-XII. Prerequisite: MED 900. RSH.

Microbiology, Molecular Genetics, and Immunology

Presentations in bacteriology, virology, immunology, microbial genetics, microbial physiology, and mycology with emphasis on cell biology and pathophysiology of infectious diseases of humans.

MBIO 850. Microbiology. 9 Hours.
The course presents microbial physiology and microbial genetics with emphasis on the molecular biology of microorganisms; Immunology with emphasis on the defense mechanism, immune regulation and immunogenetics and selected coverage of etiologic agents of infection in bacteriology, parasitology, mycology, and virology. Lectures, small group conferences and tutorials. (Same as MCR 850.) Prerequisite: ATMY 820, cell and tissue biology, BI0C 800, and PHYS 800. LEC.

MBIO 910. Advanced Topics in Microbiology. 4 Hours.
Students will work with individual instructors in directed study or laboratory work. Offered in modules I-VIII. IND.

MBIO 911. Research in Microbiology, Molecular Genetics, and Immunology. 3-16 Hours.
Students will participate in research projects supervised by faculty members of the Department. Participants will be expected to conduct an individual research project, compile and interpret data, and communicate results and conclusions in a written or oral form. Student evaluations will be based on the supervisor's assessment of written and/or oral research reports. Offered in modules I-XII. Prerequisite: MBIO 850. IND.

Molecular and Integrative Physiology

The Department of Molecular and Integrative Physiology approaches physiology on many levels, ranging from analysis of integrated body functions of the intact organism to study of the organ at molecular and cellular levels. The student is expected to become competent in examining such diverse physiological problems as analyzing the multiple adjustments to exercise in laboratory animals or humans or analyzing factors influencing the transport of molecules across cell boundaries. Students are encouraged to think in physiological terms, that is, in terms of cause and effect as determined by basic physical and chemical laws.

PHYS 910. Advanced Topics. 1-10 Hours.
Special studies designed and arranged on an individual basis to allow a student to pursue a particular subject through reading, special laboratory work, and conferences with a senior staff member. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. IND.

PHYS 911. Research. 4 Hours.
Original laboratory investigation conducted under the supervision of a senior staff member. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. LAB.

PHYS 912. Fundamentals of Biomedical Imaging. 2-4 Hours.
This is a multidisciplinary course designed to introduce 2nd, 3rd, and 4th year medical students to the fundamentals of existing imaging modalities for anatomy, structure and functioning biomedical sciences. The course will also be offered to Junior and Senior level undergraduate students as well as graduate students from other interdisciplinary areas including engineering, science, biology and biomedicine. Students must be in good academic standing. LEC.

Neurology

The Department of Neurology is introduced to medical students in the first year that clinical correlation is offered in connection with the neuroanatomy courses. During the clinical modules, clinical neurology electives allow students to participate in the management of inpatients and outpatients on the neurological service and in the educational conferences that are part of the neurology department. Conferences include pediatric neurology, neuropathology, and neuroradiology. Students obtain some familiarity with interpretation of electroencephalograms and electromyograms and supervised experience in the evaluation of patients with neurological problems seen in consultation. Students are accepted into these electives only after at least one previous clinical module.

NEUR 931. Neurology Clinical Clerkship--University of Kansas Medical Center. 4 Hours.
The Neurology Section provides clinical experience and exposure to common neurological problems. The department is staffed by one full-time and three part-time neurologists. Students will be assigned to cases which have teaching value. He/She will be expected to carry out a detailed examination of the patients assigned and present them to the staff. The student is expected to take an active part in complete diagnostic evaluation and the management of patients. The main focus will be to develop skills of neurological examinations, interpretation of findings and clinical and anatomic correlation. The student can also take part in specialty clinics such as Movement Disorder, Memory, Cerebrovascular. FLD.

NEUR 932. Clinical Neurology--Veterans Administration Medical Center. 4 Hours.
The student will be assigned patients selected on the basis of their teaching value. He/she will be expected to carry out complete detailed examinations of each patient and assume responsibility for assisting in all phases of the patient's diagnostic evaluation. Emphasis will be on developing skills in examination, interpretation on findings and neuroanatomic correlation. During this elective, the student will participate actively in all teaching conferences held both at this hospital and at KUMC. In exceptional cases, by prior arrangement and if an opening is available, a student may split time between neurology services at KUMC and the VAMC. Offered in modules I-XII. Prerequisite: One clinical module or permission of instructor. FLD.

NEUR 933. Neurology--Advanced Topics. 4 Hours.
The Neurology Section provides clinical experience and exposure to common neurological problems. The department is staffed by one full-time and three part-time neurologists. Students will be assigned to cases which have teaching value. He/She will be expected to carry out a detailed examination of the patients assigned and present them to the staff. The student is expected to take an active part in complete diagnostic evaluation and the management of patients. The main focus will be to develop skills of neurological examinations, interpretation of findings and clinical and anatomic correlation. The student can also take part in
specialty clinics such as Movement Disorder, Memory, Cerebrovascular. Offered in modules I-XII. Prerequisite: NEUR 931 or NEUR 932. FLD.

NEUR 934. Advanced Clinical Neurology--Veterans Administration Medical Center. 4 Hours.
This course will consist of assumption of more responsibility concerning diagnostic formulation and management of the patient with emphasis on clinical neurology. Offered in modules I-XII. Prerequisite: NEUR 931 or NEUR 932. FLD.

NEUR 935. Advanced Clinical Neurology - Veterans Administration Medical Center, Leavenworth. 4 Hours.
The Neurology Section provides clinical experience and exposure to common neurological problems. The department is staffed by one full-time and three part-time neurologists. Students will be assigned to cases which have teaching value. He/She will be expected to carry out a detailed examination of the patients assigned and present them to the staff. The student is expected to take an active part in complete diagnostic evaluation and the management of patients. The main focus will be to develop skills of neurologic examinations, interpretation of findings and clinical and anatomic correlation. The student can also take part in specialty clinics such as Movement Disorder, Memory and/or Cerebrovascular. Offered in modules I-XII. Prerequisite: NEUR 931 or NEUR 932. FLD.

Ophthalmology

The Department of Ophthalmology teaches undergraduates primarily in conjunction with other departments. The goal is to stress the importance of the ocular examination as a part of the complete physical examination and the role of ocular changes in general disease. In addition, all students learn the diagnosis and management of specific ocular problems that any physician should know. An elective is available to the student at any level of training. This experience is a completely flexible, individual program planned with each student. The experience is designed not only for the student interested in ophthalmology but to provide in-depth experience in any aspect of the specialty for the undergraduate student.

OPTH 910. General Ophthalmology. 4 Hours.
The program will be tailored to the interest of the individual student. Students will be given a program in Ophthalmology Outpatient Department and Surgery according to their interest. The student will be given instruction in the use of audio-visual aids in the department and reference readings. All departmental conferences and seminars are open to students. In the Outpatient Clinic the student will be instructed in the use of all special instruments and patient examination. Offered in modules I-VI and IX-XII. Prerequisite: Medical Basic Sciences. FLD.

OPTH 911. General Ophthalmology. 2 Hours.
The student will spend five mornings a week working in the Ophthalmology Outpatient Department and participating in the individual work-up of patients. The number of openings in this course will depend upon the number of students registered for OPTH 910. If OPTH 910 is full there will be no openings in OPTH 911. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. FLD.

OPTH 915. Research Problems in Ophthalmology. 4 Hours.
A 4 week course research elective in which the student has an opportunity to be exposed to vision research methods and to participate in ongoing research projects. In some circumstances this can be the introduction for continued part-time research. A written report will be due describing the project and the student's participation in the project. Prerequisite: Approval of chairperson and faculty mentor. LEC.

OPTH 916. Ambulatory Specialty Selective in Ophthalmology. 2 Hours.
Terms and abbreviations used in ophthalmology are not routinely used in other areas of medicine nor are they usually taught in year 1 or 2 of medical school. Knowledge of ophthalmic terms will allow better understanding of ophthalmology consults and notes. The student will be able to write more precise consult requests. Ocular anatomy, although taught in basic anatomy, is only reinforced in other areas of medicine at a superficial level. Better understanding of ocular conditions will allow the primary care physician to feel more comfortable treating certain common ocular conditions and know when to make appropriate referrals. LEC.

Otorhinolaryngology

Diseases of the ear, nose, throat, head, and neck are presented in inpatient and outpatient otorhinolaryngology. The importance of understanding the anatomical structures for comprehension of examination, diagnosis, and treatment is emphasized.

OTOR 910. Clinical Otolaryngology. 2 Hours.
The objectives of this course are to acquaint the students with the examination of the anatomical areas and cavities of the head and neck. Recognition of clinical signs and symptoms peculiar to these areas would be taught with tutorial advice immediately available. To accomplish this objectively and realistically, the student will work in the outpatient clinic with residents and members of the staff. He or she will also participate in evening rounds and seminars. This course offers the student a basic understanding of disorders of the head and neck region. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. FLD.

OTOR 911. Advanced Otorhinolaryngology. 3-4 Hours.
Through in-service training experiences the student will be taught to assess otorhinolaryngological disorders using advanced and relatively sophisticated techniques. Instruction will be provided on the screening of hearing and in basic principles of acoustics, the vestibular system and psychoacoustics. Instruction will be provided in those areas where the interaction of the otolaryngologist and the general physician can best be utilized to the advantage of the patient. The objectives of this course are to acquaint the student with basic clinical otolaryngology and, in addition, the surgical aspect of the specialty. Participation in the operating room is emphasized along with inpatient and outpatient experience. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. FLD.

OTOR 915. Research Problems in Otorhinolaryngology. 4 Hours.
One or more modules that provide the interested student with laboratory or clinical research experience necessary for investigation of research problems related to otorhinolaryngology. The student may pursue an independent research problem or participate in a project currently under investigation by a staff member. In either case, a faculty mentor must be identified. All projects must be reviewed and approved by the mentor at least one month in advance of the intended start date. Students will be required to submit a written report at the conclusion of the module. One objective of this course will be to generate data suitable for publication or presentation at the Student Research Forum. Prerequisite: Special arrangement with faculty mentor. LEC.

OTOR 916. Ambulatory Specialties Selective in Otolaryngology. 2 Hours.
The objectives of this two week selective course will be to expose the fourth year medical student to clinical and surgical aspects of otorhinolaryngology head and neck surgery. This will be done in the form of three projects. The first project will consist of a pre test examination. These questions will be open-ended and will consist of 75 to 100 questions in which the student is expected to find the answer over the
Pathology and Laboratory Medicine

Pathologists play many roles in medicine, from interpreting surgical biopsies to supervising clinical laboratory testing. It has been estimated that 70% of all medical decisions are based on data generated by pathology departments. The department of Pathology and Laboratory Medicine at KUMC plays an integral role in the core curriculum and also offers elective courses to medical students interested in learning more about laboratory practice. Students in elective rotations participate in daily teaching conferences and specimen “sign-out” at the University of Kansas Hospital. They receive hands-on exposure to pathology technical methodology in the surgical pathology suite, microbiology laboratory, and cytochemistry laboratory.

PAON 920. Introduction to Molecular Medicine. 2 Hours.
Introduction to Molecular Medicine is a two semester course for first year MD-PhD students taught by the Director of the MD-PhD Program, with other faculty from the basic science and clinical departments. Through lectures, small group discussion, evaluation of primary literature, and presentations/discussions with current KUMC faculty, students will be introduced to the process of investigating the molecular and cellular derangements that underlie human disease. Order of topics mirror, to some extent, the subjects of first-year modules. There will be particular emphasis on the diverse research methods and models systems used to investigate the molecular basis of disease and understanding how such investigations can be translated to answer clinically relevant questions. Students are evaluated by both group activity and individual preparation and participation. Prerequisite: Enrollment in the MD-PhD Program. LEC.

PAON 921. Diagnostic Pathology. 4 Hours.
This elective is designed to introduce the student to the practice of pathology and the role of the pathologist in diagnosis and management, and will provide exposure to several subspecialty areas within the pathology department. An effort will be made to tailor the elective experience to the needs and interests of the individual student, including those interested in pathology as a career, and those interested in broadening their understanding of pathology in general, or in relation to their chosen field. The course consists of a two-week rotation in surgical pathology/autopsy, a one-week rotation in hematopathology, and a one-week rotation in cytopathology. The student will work closely with the pathology residents, fellows and faculty on service. In surgical pathology, students will have the opportunity to participate in the diagnosis of blood and bone marrow disorders and take part in daily sign-out of bone marrow biopsy specimens. In cytopathology, the student will assist in the work up and sign out of gynecologic and non-gynecologic cytologic specimens and participate in FNA procedures. At the end of the rotation, each student will present an interesting case they encounter during a formal PowerPoint presentation to faculty and residents. Final grade is based on attendance, participation in daily activities, knowledge of general concepts and practice of pathology, and final case presentation. Prerequisite: Completion of core clinical clerkships. LEC.

PAON 922. Special Topics in Pathology. 4 Hours.
This rotation affords the student the opportunity to spend four weeks focused on a particular subspecialty of pathology or a pathology-based research elective. The department has subspecialists in dermatopathology, neuropathology, renal pathology, breast and hepatic pathology. The rotation consists of daily interpretation of subspecialty biopsies, participation in subspecialty conferences, slide set study, and assigned readings. Students participate in their own learning by setting their rotation objectives with faculty at the start of their elective and following through with a schedule of clinical, laboratory and core lecture conferences. Students will need to obtain the appropriate staff members’ permission for the rotation as follows: dermatopathology (Garth Fraga); neuropathology (Kathy Newell); renal pathology (Timothy Fields); breast pathology (Fang Fan); hepatic pathology (Maura O’Neil). Prerequisite: Completion of the core clinical clerkships and permission of the faculty. LEC.

Pediatrics

The Department of Pediatrics gives the student a comprehensive exposure to primary care and subspecialty pediatrics. The experience ranges from exposure to a sick newborn to care of an adolescent patient. Inpatient and outpatient services are available. Student participation includes history-taking and examination of pediatric patients, making daily ward rounds with the staff physician, and rotation through general and subspecialty outpatient clinics and the full-term nursery. Electives are available in the Children’s Rehabilitation Unit, Behavioral Pediatrics, and all other subspecialties in pediatrics. Research electives are also available with department faculty members.

PED 915. Pediatric Cardiology. 4 Hours.
Inpatient and outpatient clinical experience in children with cardiac disease will be provided. Daily pediatric cardiology ward rounds are conducted by the senior staff. Active participation in the pediatric cardiology clinics each week highlight the outpatient experience. Personal instruction will be given in cardiac physical diagnosis with stress on cardiovascular hemodynamics, evaluation of heart sounds and murmurs, electrocardiograms, and cardiac radiology. Significant responsibility in patient management will be delegated to the student who will function as a member of the pediatric cardiology team. The student will attend the various pediatric cardiology conferences and will follow children through the cardiac catheterization laboratory and the operative procedures. Opportunity will be available for participation in clinical investigative projects if the student so desires. Teaching conferences, seminar, and patient rounds will be made on the scheduled basis by a member of the senior pediatric cardiology staff. Offered in modules I-XII. Prerequisite: PED 900. FLD.

PED 916. Pediatric Subinternship Selective-Inpatient/Outpatient-Distant Site. 4 Hours.
This elective is an extension of the basic pediatric clerkship. It is designed to permit senior medical students to take increasing responsibility of patient care and management by active participation in the daily activities of a private pediatric practice. This elective is entirely clinical. The student will work with clinical faculty at a distant site. Most of the experience will likely be in an outpatient setting with some inpatient experience. Student performance will be evaluated by the faculty
based on factual knowledge, practical skills, problem-solving abilities and personal behavior and values. Offered in all modules if sites are available. Prerequisite: PED 900 or equivalent and permission of the Pediatric Clerkship Director. LEC.

**PED 917. Pediatric Hematology-Oncology. 4 Hours.**
This course will include involvement in the diagnosis and care of children with hematologic and oncologic diseases. The student will be involved directly with these patients under the supervision of the pediatric hematology fellows. During this time, he or she should become conversant with the general area of pediatric hematology and be trained in the diagnostic procedures including bone marrow examination and other routine and special procedures used in this subspecialty area. The special emphasis placed on the psychological aspects of these diseases for the child and the family will be part of the training experience. The complications that commonly occur in patients on chemotherapy make these patients particularly appropriate for a broad experience. Offered in Modules I-XII. Prerequisite: PED 900. FLD.

**PED 919. Developmental and Behavioral Pediatrics Elective. 4 Hours.**
This course is designed to provide students with an in-depth understanding of children and their families. Students will learn about normal and atypical child development, behavioral and emotional problems commonly seen in Pediatrics (e.g., ADHD, depression, anxiety, oppositional behavior), and helping children cope with acute and chronic illnesses. Students will observe/participate in outpatient clinics in the Developmental Disabilities Center and Behavioral Pediatrics section (e.g., autism assessment, developmental medicine, telemedicine, feeding team, and behavioral pediatrics clinic), as well as in medical inpatient consultations. Within the curriculum there is ample opportunity to pursue individual interests related to children with developmental and behavioral problems. Expected to be offered in most Modules. One student per module. Prerequisite: PED 900 and permission of instructor. FLD.

**PED 920. Pediatric Subinternship Selective-Inpatient. 4 Hours.**
Students will participate in the evaluation and management of children with infectious diseases. Laboratory aspects of infectious diseases will be emphasized. Students will attend teaching conferences and seminars on various aspects of infectious diseases. Offered in modules I-XII. Prerequisite: PED 900 and permission of instructor. FLD.

**PED 921. Pediatric Neurology. 4 Hours.**
This module will serve to acquaint the student with the wide spectrum of neurological diseases of infancy, childhood, and adolescence. The student will become familiar with the neurological examination of the newborn, as well as assessment of the infant and child. During the elective rotation the student will become actively involved in the diagnosis and treatment of seizure disorders. The student will be exposed to routine laboratory procedures, such as lumbar puncture, EEG and brain scan, as well as special procedures, such as arteriography and pneumoencephalography. The student will be supervised by pediatric residents rotating through the pediatric neurology service and by staff physicians throughout all aspects of the module. Offered in modules I-XII. Prerequisite: PED 900. FLD.

**PED 922. Pediatric Gastroenterology. 4 Hours.**
The Pediatric Gastroenterology course will provide exposure to diseases of the gastrointestinal tract, liver and pancreas in infants and children. The student will obtain histories, physicals, and present cases on all Pediatric Gastrointestinal clinic and in-patients brought in for consultations. During endoscopy, motility, and biopsy of the small bowel and liver, the student will learn the indications and technique as applies to patients they have worked up. Each student will be required to present a 30-45 minute paper on a specific Pediatric Gastrointestinal subject at the end of the course. Evaluation for the course will be based on assessment of performance of patient care and oral presentation and knowledge of literature. Prerequisite: Completion of third year. LEC.

**PED 923. Developmental or Behavioral Pediatrics Elective. 2 Hours.**
This 2-week course is designed to provide students with a streamlined introductions to childhood developmental, emotional, and behavioral problems. Students will also learn about normal and atypical child development. Students participate in outpatient clinics, telemedicine, and medical inpatient consultations with faculty from developmental pediatrics, psychology, speech-language, physical therapy, and occupational therapy. Expected to be offered in most Modules. One student per module. Prerequisite: PED 900 and permission of instructor. CLN.

**PED 924. Pulmonology. 4 Hours.**
Students will participate in the evaluation and management of infants, children, and adolescents with chronic and acute pulmonary diseases in the out-patient setting as well as performing in-patient consultations. The students will be involved directly with these patients under the supervision of the pediatric pulmonology faculty. CLN.

**PED 925. Research in Pediatrics. 4-8 Hours.**
Students will work on research programs arranged between them and the instructor. The purpose of the elective is to provide the student an opportunity to become familiar with clinical research involving children and pediatric problems, and to learn about research protocols and methods. Available areas of research include the newborn, cardiology, hematology, allergy, nephrology, neurology, endocrinology, infectious disease. Offered in modules I-XII. Prerequisite: Permission of instructor. IND.

**PED 927. Pediatric Endocrinology and Metabolism. 4 Hours.**
Students will participate in the diagnosis and management of pediatric-age patients with endocrine-metabolic problems. Emphasis is placed on the clinical problems that are unique to pediatric-age patients such as puberty, abnormalities of growth, and juvenile diabetes mellitus. Students are encouraged to become involved in patient management by participating in rounds, clinic, conferences, consultative evaluation and care of the inpatients, and other functions of the endocrinology-metabolism staff. Offered in modules I-XII. Prerequisite: PED 900. FLD.

**PED 929. Allergy, Immunology, and Rheumatology. 4 Hours.**
The Pediatric Immunology course will provide exposure to children with allergies, asthma, immunodeficiencies, autoimmune disease and arthritis. The approach to children with these disorders and the management of children with multisystem disease and chronic disease are emphasized. Students will be involved in the clinic and with consultations. The students will have exposure to ongoing research in these areas and will attend teaching conferences. Offered in modules I-XII. Prerequisite: PED 900. FLD.

**PED 931. Nephrology. 4 Hours.**
Students will participate in the evaluation and management of children with urinary tract diseases and fluid and electrolyte disorders. This elective will give the students the opportunity to develop clinical skills in assessing a child's hydration status and in assessing the effect of the child's kidney disease or metabolic disorder on other organ systems. Students will also have the opportunity to review radiologic imaging studies of the urinary tract, to perform urinalyses, and to participate in the care of patients who require acute hemodialysis, peritoneal dialysis, or continuous arterio-venous hemofiltration. Prerequisite: PED 900. FLD.

**Pharmacology, Toxicology, & Therapeutics**

The medical pharmacology courses teach pharmacological principles and the essential facts necessary to select and prescribe appropriate
medications to maximize the desirable and minimize the undesirable effects. Moreover, students are prepared to incorporate new information and the use of new drugs into their practice. The courses give students a variety of instructional aids to master the material, exposing them to concepts, facts, and therapeutic applications. Group discussions cultivate the ability to interpret, integrate, and synthesize essential information

**PHRM 910. Research in Pharmacology. 4 Hours.**
Selected research problems may be investigated under the direction of individual staff members. A description of current staff research projects is available from the department. Offered in modules I-XII. Prerequisite: Permission of department. IND.

**PHRM 911. Readings in Pharmacology. 2-10 Hours.**
Selected topics for reading in advanced texts and original papers in pharmacology. A paper and Journal Club presentation of the selected topic are required. Offered in modules I-XII. Prerequisite: Permission of department. IND.

**Preventive Medicine and Public Health**

The multidisciplinary Department of Preventive Medicine and Public Health uses epidemiological methods to solve individual and population health problems. We are dedicated to the development of education, research, and service that emphasizes health promotion, disease prevention, health services, and public health science to improve health. We place special emphasis on a population health perspective that encompasses the ability to assess the health needs of a specific population; implements and evaluates interventions to improve the health of that population; and provides care for individual patients in the context of the culture, health status, and health needs of the population of which that patient is a member. Through required and elective courses, the department emphasizes the following content areas: evidence-based medicine; social and behavioral determinants of health (at an individual and population level); ethics; organization and financing of U.S. health care; the principles, practice, and financing of preventive care; cost-analytic approaches and information in prioritizing the use of resources; and analyzing population demographics.

**PMED 910. Special Topics in Population Health. 4 Hours.**
Independent study of community health issues and their implications for or impact on the health of society. Examples include infectious disease control, immunization programs, nutrition, air pollution, over-population, wellness, health promotion and life-style change programs, cancer epidemiology, care of disabled persons, mental health programs, the terminally ill or the elderly, poverty, sports, physical fitness programs, etc. Specific content will be defined primarily by interest, background, and wishes of the student. Emphasis will be placed on the methodology used in gaining information and the means by which a health professional can translate and channel such information effectively into educational processes of the community. Prerequisite: Permission of instructor. IND.

**PMED 950. International Health Experience. 4-8 Hours.**
Within this elective are presented opportunities for the student to gain clinical and community health experiences in an international setting. The country selected is to be prearranged by the student with the assistance of faculty. Two modules are recommended for this elective. Prerequisite: Permission of instructor. LEC.

**PMED 970. Principles of Epidemiology. 2 Hours.**
Basic concepts of epidemiology and methods for identification of factors influencing health and disease in human populations. Considerations are centered on physical, biological, psychosocial and cultural factors in relation to infectious and non-infectious diseases; interactions between agent, host, and environmental factors as determinants of health and disease; application of the epidemiologic approach to health services; retrospective and prospective analysis of morbidity and mortality data. LEC.

**Psychiatry**

Through participation of the Department of Psychiatry in the interdisciplinary clinical process course, first-year students are introduced via formal presentations and follow-up small-group discussions to the following relevant topics: the medical interview; the disturbed family; death, dying and loss; childhood growth and development; human sexuality; aging; addiction; anxiety; depression; and psychosis. Clinical training includes supervised experience in the treatment of hospitalized patients and clinic outpatients, using chemotherapy, other somatic treatments, interview techniques demonstrated in regularly held seminars using videotaped case material, and in weekly case conferences. The clerkship offers a thorough didactic review of such topics as psychopharmacology, child development and psychopathology, all major psychiatric syndromes, drug abuse and alcoholism, human sexuality and sexual dysfunction, and consultative psychiatric services.

**PYCH 911. Child Psychiatry. 4 Hours.**
Normal and abnormal growth and development. Clinical assessment of children and early adolescents. Interview and play therapy. Family counseling. Group work with parents. Offered in modules I-XII. Prerequisite: PYCH 955. FLD.

**PYCH 912. Emergency Psychiatry. 4 Hours.**
Exposure to patients with acute psychiatric disturbances. Students will learn how to assess psychiatric emergencies and provide initial treatment. The course involves exposure to community resources, multidisciplinary treatment and interaction with law enforcement and the court system. Clinical experience working with physicians caring for patients in the Emergency Department. Readings in emergency patient care and discussions with the attending physician are part of the course. Patient contact with patients in the Crisis Stabilization Center of the Emergency Department. Prerequisite: PYCH 955. LEC.

**PYCH 913. Ambulatory Psychiatry. 4 Hours.**
This course involves exposure to patients followed in an ambulatory psychiatry setting. Students will have the opportunity to learn to evaluate and manage a cross section of patients with psychiatric complaints. Clinical evaluations and exposure to actual patients. Students will first observe and later lead evaluation of patients and formulate treatment plans with attending physicians. Readings in ambulatory patient care and diagnosis interviewing are a part of the course. Patients will be ambulatory clinic patients at the KUMC outpatient clinic, the Kansas City-VA Hospital Mental Hygiene Clinic, a facility clinic location, or the community mental health centers. Prerequisite: PYCH 955. LEC.

**PYCH 914. Psychiatry in Medicine and Surgery. 4 Hours.**
Experience with psychiatric consultations to the medicine and surgery services. Evaluation of psychiatric problems in medical and surgical inpatients. Students will demonstrate effective interview technique and explain the basis for diagnosis and management. Supervisors will evaluate clinical skills. Offered in modules I-XII. Prerequisite: PYCH 955. FLD.

**PYCH 915. Psychiatry in Pediatrics. 4 Hours.**
Experience with psychiatric consultations to the pediatric services. Evaluation of psychiatric problems in pediatric inpatients and outpatients.
Students will demonstrate effective interview technique and explain the basis for diagnosis and management. Faculty supervisors will evaluate clinical skills. Offered in modules I-XII. Prerequisite: PYCH 955. FLD.

**PYCH 916. Introduction to Psychotherapy. 4 Hours.**
The student will observe and participate in individual and group psychotherapy sessions in outpatient as well as inpatient settings. Child and adolescent patients as well as adult patients will be involved. These psychotherapy experiences will include: 1) Inpatient group psychotherapy for adult patients with an affective disorder 2) Inpatient group psychotherapy for adult patients with a substance use disorder 3) Inpatient group psychotherapy with acting-out adolescents 4) Family psychotherapy with parents of psychiatric child patients 5) Outpatient adult group psychotherapy with patients suffering from panic disorder 6) Outpatient adult group psychotherapy with patients suffering from a schizoaffective disorder 7) Outpatient adult individual cognitive therapy in a family practice setting 8) Outpatient adult interpersonal psychotherapy with less psychologically ill patients 9) Outpatient individual diagnosis specific psychotherapy. In addition, the student will provide brief, problem-focused individual psychotherapy three times weekly to at least one patient hospitalized on the adult inpatient service under the immediate supervision of Dr. Elizabeth C. Penick that will include a review of audiotaped psychotherapy sessions. The student will be provided a list of readings which he will discuss on a weekly basis with Dr. Penick. At the completion of the program, the student will have received a broad comprehensive introduction to the more commonly used approaches to psychotherapy. LEC.

**PYCH 918. Inpatient Psychiatry. 4 Hours.**
Advanced full-time experience in hospital treatment. Includes training in individual and milieu therapy, chemotherapy, etc. The student will function as a first-year resident insofar as the student is able to assume the required responsibilities of that position. Students electing this module will be evaluated by faculty supervisors on the basis of their clinical performance and the growth of their fund of psychiatric knowledge during the module. Offered in modules I-XII. Prerequisite: PYCH 955. FLD.

**PYCH 919. Continuation of Inpatient Psychiatry. 4 Hours.**
Students electing this module will be evaluated by faculty supervisors on the basis of their clinical performance and the growth of their fund of psychiatric knowledge during the module. Offered in modules I-XII. Prerequisite: PYCH 900 and PYCH 918. FLD.

**PYCH 920. Research in Psychiatry. 4 Hours.**
An approved psychiatric research project in an area of special interest to the student may be undertaken with the individual supervision of a faculty member within the sphere of whose own professional interests the student's topic of study lies. This elective experience will include the writing of a paper or presentation of a seminar reporting on the student's investigation and findings. Offered in modules I-XII. Prerequisite: PYCH 900. IND.

**Radiation Oncology**

Students are introduced to the diagnosis, staging, and management of patients with cancer. The rationale and techniques of radiation therapy are emphasized.

**RADO 910. Research in Radiation Oncology. 4 Hours.**
The student will engage in original research in an aspect of Radiation Oncology: clinical radiation therapy, radiation biology, or radiation physics. The exact area will depend upon the background and interest of the student, and the availability of an appropriate faculty mentor. In consultation with faculty, the student will develop a research project addressing a topic in Radiation Oncology. The student will then perform the indicated research project. At the conclusion of the project, the student will prepare a document describing the research and the findings, and will present a research seminar to the department. Student achievement will be evaluated by three endpoints. There will be a faculty assessment of the conduct of the student during the project period. Secondly, the manuscript produced by the student will be evaluated as an indication of the student's accomplishments. Finally, the student will be evaluated by his or her performance during the research seminar and/or other scheduled presentations of the results. Prerequisite: Permission of instructor. LEC.

**RADO 912. Radiation Oncology. 4 Hours.**
Students will see consultations, follow up patients and on-treatment patients along with the staff. They will participate along with the faculty in simulation of patients, surgical procedures, brachytherapy procedures and other procedures that require physician participation. Students will attend conferences in radiotherapy, radiobiology, radiation physics and treatment planning conferences. They will attend site-specific multi-disciplinary and general multi-disciplinary conferences and present cases if required of these conferences. Students will be required at the end of their rotation to present to faculty, residents and staff in the department a topic in depth that involves radiation as a treatment modality. Students will be evaluated by their performance and conduct during their rotation with the faculty and by the quality of their presentation toward the end of the rotation. Offered in Modules I-XII. Prerequisite: Medical Basic Sciences and permission of instructor. FLD.

**Rehabilitation Medicine**

Rehabilitation medicine is concerned with the evaluation and treatment of physical impairment and disability. It is an interdisciplinary field where the physiatrist (rehabilitation physician specialist) works with a team of health professionals (rehabilitation psychologists, physical therapists, occupational therapists, speech therapists) to develop and manage individualized treatment plans to maximize the functional recovery of the disabled individual following a catastrophic illness or injury. Rehabilitation embodies the concept of adding quality to longevity, and emphasizes a holistic approach to the patient with respect to psychological, social, vocational, and avocational adaptation to disability. Students interested in experiencing first hand the interdisciplinary approach learn which patients can benefit from rehabilitation and have the opportunity to participate in patient evaluation and team management of appropriate inpatients and outpatients on a regular basis. Students who desire this type of experience find the skills and knowledge thus gained useful in many aspects of medical practice. First-year students may participate in patient evaluation and clinical discussions of patients in this department as part of the clinical process.

**REHB 910. Clerkship in Rehabilitation Medicine. 4 Hours.**
The student will have the opportunity to participate in the traditional evaluation and management of disease and disability as well as being oriented toward the impaired performance of function as a result of these conditions. The student will obtain histories from and perform physical examinations on inpatients with particular emphasis on evaluation of function, e.g., neurologic, kinesiologic and self-care function. He/she will be involved in the analysis and management of musculoskeletal disorders common to many situations encountered in internal medicine, family practice, neurology, psychiatry, orthopedic surgery, and neurosurgery. In addition, the student will demonstrate an understanding of methods for function restoration. Evaluation in the course will be based upon at least five (5) case work ups in which the student will present his/her
evaluation of function and make recommendations regarding restoration of function. The team approach to the management of these cases will be emphasized. Offered in modules I-XII. Prerequisite: Medical Basic Sciences; 1 required clinical clerkship. FLD.

**Surgery**

The Department of Surgery offers an introduction to surgical diseases as part of the required medical science course, Junior Surgery Clerkship. After successful completion of this phase of education, electives are offered in the surgical specialties and other surgical disciplines. These courses offer more specific and in-depth exposure than the basic core course.

**SURG 911. Clinical Clerkship in General Surgery–Veterans Administration Medical Center. 4 Hours.**
This is a clerkship at VA Medical Center (Kansas City or Leavenworth) in which the basic principals of patient evaluation and care are emphasized. Students practice the skills of history taking, physical examination, diagnostic procedures and of direct observation of the pathologic processes in assigned patients in the clinic, wards and operating room. Students participate in appropriate surgical and multidisciplinary conferences in which clinical problems are related to basic sciences and in which the expectations and the limitations of surgical treatment are discussed in clinical situations. Evaluation is based on clinical performance. Offered in Modules I-XII. Prerequisite: SURG 900 FLD.

**SURG 913. Clinical Clerkship in Plastic Surgery. 4 Hours.** The medical student participates as an intern, functioning in the clinics, wards and operating room as an integral part of the service. Evaluation is based on clinical performance. Offered in Modules I-XII. Prerequisite: SURG 900 FLD.

**SURG 914. Clinical Clerkship in Orthopedic Surgery. 4 Hours.** The principles of orthopedic evaluation and care are emphasized. Responsibility is to function as an extern in the clinics, the wards and the operating room. Evaluation is based on clinical performance. Offered in Modules I-XII. Prerequisite: SURG 900 FLD.

**SURG 916. Surgical Oncology. 4 Hours.** This rotation for medical students at a clinical level is designed to expose the student to procedures and techniques of modern surgical oncology. This experience includes: (1) Seeing all surgical oncology inpatient and outpatient consultations with the staff, (2) Operating room observation and participation with major cancer ablative procedures; e.g., radical lymphadenectomies, pelvic exenteration, major organ resections etc., (3) Clinical and laboratory exposure to immunotherapy and basic cancer immunology, (4) Exposure to special chemotherapeutic procedures; e.g., arterial infusion and perfusion, (5) Attendance at the combined medical surgical conference. The specific duties for each individual student is defined at the beginning of each module and will be changed to fit the specific needs and desires of each student. Evaluation is based on clinical performance. Offered in Modules I-XII. Prerequisite: SURG 900 FLD.

**SURG 917. Clinical Clerkship in Urologic Surgery. 4 Hours.** This course is limited to one medical student at a time who has completed the Basic Surgery Clerkship, Surgery 900. Experience consists of care and evaluation of outpatients and inpatients requiring urologic diagnosis. Tutorial instruction and conferences are the prevalent means of instruction. Evaluation is based on clinical performance. Offered in modules I-XII. Prerequisite: SURG 900 FLD.

**SURG 918. Clinical Clerkship in Neurologic Surgery. 4 Hours.** The principles of patient care and the physiological basis of neurological diagnosis are stressed. Experience consists of care and evaluation of outpatients and inpatients requiring neurosurgical diagnosis and treatment. Evaluation is based on clinical performance. Offered in Modules I-XII. Prerequisite: SURG 900 FLD.

**SURG 921. Special Surgical Elective. 4 Hours.** Special clerkships or assignments not included in other elective courses which may be prearranged with and must be approved by the Course Director, Surgery 900, the Education Council, and the Department of Surgery. Evaluation is based on performance as determined by the sponsoring faculty member. Offered in Modules I-XII. Prerequisite: SURG 900 and by special arrangement with the section chief. FLD.

**SURG 923. Care of Critically Ill Surgical Patient. 4 Hours.** The basic purpose of this clerkship is to provide the student with an opportunity to observe the management of the critically ill surgical patient. A physiological approach to the management of the surgical patient with shock, sepsis, renal failure, respiratory and cardiac failure is stressed. The student participates in the management and care of critically ill patients by assisting in the interpretation of physical the laboratory findings and proposing management responses to these findings. The student is encouraged to participate in ongoing clinical studies. An adjacent fully equipped laboratory is available for student use. Evaluation will be based upon clinical performance. Offered in Modules I-XII. FLD.

**SURG 925. Ambulatory Specialties Selective in Urological Surgery. 2 Hours.** To optimize the health of men, women, and children, physicians must be able to diagnose, manage, and provide preventive advise concerning a wide range of conditions and symptoms pertaining to the genitourinary tract. The process depends on adequate patient assessment and appreciation of the epidemiology and pathophysiology of individual conditions, and the appropriate use of medical, surgical, and other interventions. Students will be on service in two week blocks. During that time they will participate in the following activities: Observe procedures in-patient and out-patient, out-patient experience at KUMC at the KC-VA, tutorial sessions, conferences, and in-patient rounds. LEC.

**SURG 926. Musculoskeletal Medicine. 4 Hours.** Clinical experience in the evaluation of common orthopedic disorders such as osteoarthritis, osteoporosis, sports injuries, and fractures; students will be involved in out-patient orthopedic clinics, orthopedic clinical conferences, and a directed, individualized study program. Prerequisite: All clinical rotations. CLN.

**SURG 930. Orthopedic Advanced Clerkship. 4 Hours.** The principles of orthopedic evaluation and treatment are emphasized, through participation in the clinics, in-patient wards, and operating room. In addition, the student will learn relevant anatomy and surgical approaches by functioning as a prosector in the anatomy laboratory. Evaluation is based on clinical performance and participation in the dissections. Prerequisite: Surgery 900 CLN.

**SURG 931. Rural Orthopedic Rotation. 4 Hours.** A rural orthopedic rotation in Garden City, Kansas. Students enrolled in this orthopedic rotation can expect to receive room and board from St. Catherine Hospital. The student will be expected to conduct themselves appropriately in a professional office. The student would be expected to follow the dress code of the office. The educational experience involves a clinical and surgical experience of general orthopedic practice with an emphasis on joint replacement, sports medicine, and hand surgery. The student could be expected to see patients with the attending physician in the office. The patient would be expected to participate in emergency room evaluations of orthopedic patients. The student would be expected to participate in the operating room with the attending physician. The scope of instruction would include musculoskeletal examination, instruction on the pathophysiology of musculoskeletal...
disease. A comprehensive written and video library is available for the student’s use to aid in their education. The student can expect to learn aspects about radiology interpretation of musculoskeletal pathology. The student may also get experience with rehabilitation. The student will have an exposure to issues pertaining to worker’s compensation including the opportunity to observe at depositions. Prerequisite: This course is appropriate for third and fourth year medical students with an interest in learning musculoskeletal diagnosis and treatment. CLN.

Wichita Clinical Required Courses

Third Year Requirements

FCMD 950. Family Medicine Clerkship. 0-8 Hours.
Students are introduced to the principles and practice of family medicine. They spend the majority of their time participating in the practice of a private family physician where they evaluate patients under direct supervision and recommend management. This practice experience is enhanced by case-based seminars and skills-based workshops with faculty and hospital call with family medicine residents. Evaluation is based on assessment by clinical supervisors, projects, a departmental exam, and the NBME Family Medicine Subject Exam. Prerequisite: Basic Sciences. CLN.

GERI 950. Geriatric Medicine Clerkship. 4 Hours.
This clerkship is designed to prepare students for delivery of medical care in the geriatrics setting. It is jointly sponsored by the Department of Family Community Medicine and the Department of Internal Medicine. Students spend the majority of their time in the outpatient office of a practicing internist of family physician where they participate as a member of the healthcare team. To introduce students to multi-disciplinary approaches to care, they visit a variety of agencies including nursing homes, hospice, wound care clinic, and community support agencies. These clinical experiences are augmented by web-based modules on geriatric topics, seminars on common and important medical topics and workshops. Evaluation is based on assessment of clinical performance, seminar participation, assignments and a departmental written exam. Prerequisite: Medical Basic Science. CLN.

ICM 975. Issues in Clinical Medicine. 0 Hours.
This course is designed to promote the development of professional responsibility and medical ethics. Incorporated into the topics are medical ethical theory, skills of ethical decision making and recognizing personal and professional responsibilities and value identification. The one-hour sessions are held twice a month. All third year medical students are required to attend. Prerequisite: Medical Basic Sciences. LEC.

INMD 975. Internal Medicine Clerkship. 0-8 Hours.
Students are assigned two four-week blocks on university general medicine services. Students are expected to acquire basic clinical skills in medicine: interview and examine patients, complete databases and clinical problem assessments, write progress notes and give bedside presentations on daily rounds, and demonstrate accountability for ward duties and patient data. Rounds with visiting professors, KUSM-W Grand Rounds, and medicine case conferences supplement regularly scheduled tutorial sessions and daily ward rounds. Students receive instruction in basic skills, i.e., ECG, chest X-ray, blood count, body chemistry interpretation. Grades are based on ward work, critical case summaries, and bedside practical exam (both pass/fail), and National Board subject examination scores. Prerequisite: Medical Basic Sciences. CLN.

NROL 950. Neurology Clerkship. 4 Hours.
The required four-week Neurology clerkship is intended to familiarize students with the diagnosis and treatment of major neurological disorders.

Effective interviewing and diagnostic skills, and competent performance of the neurological examination are emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. CLN.

OBGN 975. Obstetrics/Gynecology. 0-6 Hours.
During the clinical clerkship the student develops understanding of disease in women through history, physical examination, and laboratory studies. The clerkship includes study of biochemical, anatomical, and physiological changes of normal pregnancy, and the effect of disease in altering the course of reproduction. Prerequisite: Medical Basic Sciences. CLN.

PDRC 975. Pediatrics Clerkship. 0-6 Hours.
The student will spend approximately 60 percent of the time on pediatric wards taking pediatric medical histories, physical examination of children and infants and making ward rounds with attendings and house staff. Approximately 40 percent of the student’s time will be spent in ambulatory pediatrics in general specialty clinics and in the offices of practicing pediatricians. Time will be spent in the newborn nursery. Prerequisite: Medical Basic Sciences. CLN.

PSCR 950. Psychiatry Clerkship. 4 Hours.
The required four-week basic Psychiatry Clerkship is intended to familiarize students with the diagnosis and treatment of major psychiatric disorders. Effective interviewing and diagnostic skills, and competent performance of the mental status examination is emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Prerequisite: Medical Basic Sciences. CLN.

SGRY 975. Junior Surgery. 0-8 Hours.
This course offers the student an introduction to the surgical management of disease. Students are assigned to one of the several surgical services, where they participate fully in diagnosis, operation, and management of patients with a wide range of surgical diseases. Clinical conferences, seminars, ward rounds, and case studies supplement the clinical experience. Students participate directly in patient care on the ward, as well as in the outpatient department and operating room. Emphasis is placed on the understanding of alterations in physiology secondary to trauma, management of fluids and electrolytes, basic elements of pre- and post-operative care, and understanding diseases amenable to surgical treatment. Prerequisite: Medical Basic Sciences. CLN.

Fourth Year Requirements

PVMD 975. Population Health in Practice. 4 Hours.
This required clerkship is designed to instruct fourth-year medical students about population-based approaches to health care and to facilitate the application of epidemiologic principles to clinical decision making. Using some of the basic concepts described under the auspices of community oriented primary care, students will learn how to define specific populations, ascertain their health care needs, formulate interventions to meet those needs and evaluate the impact of those interventions. These concepts will be developed and reinforced as the student moves through a series of modules designed to provide learning opportunities about health services organization and delivery, community dimensions of medical practice, occupational and environmental medicine, health care finance, access to medical care, and quality of medical care. These modules will include didactic teachings supplemented by course reading material and workshops that involve
case studies and site visits. This clerkship will allow the student to examine what it means for a physician to be part of a community and to explore the role that the community plays in the health of an individual. Prerequisite: Completion of third-year medical school curriculum. CLN.

**Rural Preceptorship (4)**

A preceptorship of four weeks with a practicing physician in the state of Kansas is required for graduation. Students select one of the following options to fulfill the requirement.

**RLMD 976. Rural Preceptorship: Family Medicine. 4 Hours.**

The student participates in the practice of a family physician in the state of Kansas. In addition, the student is asked to participate in the life of the rural community and explore the various roles a physician plays in the community. At the end of the Rural Preceptorship, the student will be able to describe the challenges and rewards of rural practice. Evaluation consists of clinical performance as assessed by the rural preceptor, and completion of a small project during the Rural Preceptorship. CLN.

**RLMD 977. Rural Medicine in Internal Medicine. 4 Hours.**

Rural Medicine in Internal Medicine is a four week clinical rotation during which each student works with a practicing Internal Medicine physician in the state of Kansas. Students will experience a one-to-one teaching/learning relationship in a private office (i.e., non-institutional) setting and will be exposed to both professional and non-professional aspects of the preceptor's family and social life in a non-tertiary care community environment. The student will perform a history and physical examination on each patient and will be responsible for writing daily progress notes on each assigned patient. Students will formulate diagnostic treatment and educational plans on each patient. The student will write orders after reviewing plans with attending physician. The student will also see patients in the emergency room and present them to the attending physician. The student will be involved in all procedures, such as treadmills, lumbar puncture, bone marrow biopsies, liver biopsies, upper GI endoscopy and flexible sigmoidoscopy on all assigned patients and other patients if appropriate. The student will be required to complete a pass/fail reflective assignment questionnaire which must be turned in to the department and reviewed by the course director. Prerequisite: Senior standing and INMD 975. CLN.

**RLMD 978. Rural Preceptorship - Pediatrics. 4 Hours.**

Rural Medicine in Pediatrics is a four-week clinical rotation during which each student works with a practicing pediatrician in the State of Kansas. Students will experience a one-to-one teaching/learning relationship in a private practice (i.e., non-institutional) setting and will be exposed to both professional and non-professional aspects of the preceptor's family and social life in a community environment. Initially the student will see patients and take calls with the pediatrician. Later in the month, the student will be given some independence seeing patients. The student may write progress notes and learn to dictate discharge summaries. The student will also participate in a number of procedures such as lumbar punctures, umbilical artery catheter insertion, etc. Students may also assist in ambulance transfers to smaller communities. Prerequisite: Senior standing and PDRC 975. CLN.

**Subinternships (4)**

The four-week subinternship gives medical students an opportunity to become more proficient in a specific area of medicine. They provide a more comprehensive course than that of the third-year required course. Students select one of the following options to fulfill the requirement.

**FCMD 998. Subinternship in Family Medicine. 4 Hours.**

The student will function as a subintern at one of the three KUSM-W sponsored family medicine residency programs. - Via Christi or Wesley in Wichita or Smoky Hill in Salina. Experiences include evaluation of outpatients and inpatients and performance of procedures under direct supervision of residents and faculty. Assignments include in-hospital call and case presentations as directed by the individual residency. Evaluation is based on assessment of clinical performance and case presentations. Prerequisite: FCMD 950. CLN.

**INMD 998. Subinternship in Internal Medicine. 4 Hours.**

This course is designed to give the student practical experience in the hospital care of general medicine patients and patient care at the intern or R1 level. Students will perform and dictate the initial history and physical, write orders, perform indicated procedures under the supervision of a senior resident and faculty attending, and dictate discharge summaries on patients. Students will take hospital call with the senior resident, attend scheduled rounds and conferences, and function as a member of the patient care team. Prerequisite: Medical Basic Sciences and INMD 975. CLN.

**OBGN 998. Subinternship in Obstetrics and Gynecology. 4 Hours.**

The student will become proficient in pre-and post-operative evaluation of various procedures and the management of uncomplicated and complicated obstetric problems. He/she will gain an understanding of the pathophysiology of both obstetrics and gynecologic diseases and present an oral case presentation conference with discussion to OB-GYN staff physicians along with a third or fourth year resident. Subintern will be under direct supervision of 1 to 2 OB-GYN staff physicians along with a third or fourth year resident and will have direct responsibility for orders, pre- and post-operative evaluation, including H P and discharge summary. The subintern will be exposed adequately to call both for obstetrics and gynecology. The subintern will work up approximately 2 new patients per day. Evaluation will be made by the staff that were directly responsible for supervising the subintern along with the third or fourth year resident that was assigned to him or her. Prerequisite: Medical Basic Sciences and OBGN 975. CLN.

**PDRC 998. Pediatric Subinternship. 4 Hours.**

The student will participate in pediatric case management in a greater comprehensive manner than that of the general pediatric student curriculum. The student will be assigned to a Pediatric resident and will participate in the clinical case load of the assigned resident. He/she will be assigned to a Pediatric resident and will participate in the clinical case load of the assigned resident. He/she will be expected to gather and analyze data as pertaining to the assigned pediatric care load. The student will perform physicals and dictate histories on assigned patients where permitted. Case load will be 1-3 patients per day. The student will formulate plan of management with written orders to be reviewed and countersigned by resident and faculty, perform indicated procedures under supervision, and dictate discharge summary of assigned patients where permitted. He/she will take call and attend scheduled rounds, pediatric clinics, and conferences with supervising resident. Evaluation will conform to the clinical assessment utilized for pediatric resident. Assessment of performance will be done jointly by supervising resident and faculty member. Prerequisite: PDRC 975 and senior standing. CLN.

**PSCR 998. Subinternship in Psychiatry. 4 Hours.**

This course is designed to expand the student's experience in general psychiatry by having them assume supervised, clinical responsibility equivalent to that of an intern or PGY-1 resident. Students will perform and dictate initial history and physical examinations, formulate diagnoses and treatment plans, write orders to be reviewed and countersigned, dictate discharge summaries, participate in the evaluation and intervention of psychiatric emergencies, attend scheduled rounds, conferences, and
PGY-1 didactics. Prerequisite: PSCR 950, INMD 975, SGRY 975, senior standing. CLN.

**SGRY 998. Subinternship in Surgery. 4 Hours.**
The student will learn to work up patients with elective surgery, acute surgical abdomen, or GI bleeding, perform fundamental diagnostic and therapeutic procedures, and assist in certain endoscopies. The student will present a patient's clinical problems in a clear and concise manner. The student will be a part of a surgical team consisting of the attending surgeon and the senior and junior surgical residents. He/she will work up patients with the junior surgical resident and be reviewed by the attending surgeon and senior surgical resident. He/she will make daily rounds with the surgical team, scrub on all surgical procedures on his/her patients, and attend all conferences required of surgical residents (consultant rounds, surgical grand rounds, etc.). He/she will assist in the operation, attend clinics and minor surgery clinics. The student will work up approximately one new patient per day. Evaluation will be based on patient workups, technical skills, rapport with patient, paramedical personnel, and surgical team. Prerequisite: SGRY 975, INMD 975, and senior standing.

**Critical Care (4)**
The four-week critical care selective presents the knowledge, skills, and attitudes required to care for very ill hospitalized patients. This allows the student to focus on an interest in a particular specialty and ensures that all students have basic knowledge and skills in critical care. Students select one of the following options to fulfill the requirement.

**CCSL 977. Critical Care Selective in Neonatology. 4 Hours.**
This course is an overview of neonatal medicine. The student will develop skills and conceptual knowledge of newborns and premature infants. The student will also attend x-ray conferences weekly, literature review, service rounds twice daily, pediatric grand rounds weekly, and neonatal mortality review, as well as care for infants with special emphasis on NIVU, NSCU and Continuing Care Nurseries. Prerequisite: Senior standing. CLN.

**CCSL 978. Critical Care Selective in Pulmonary. 4 Hours.**
The student will learn the essentials of a comprehensive history, physical exam and interpretation of chest x-rays for the patient with pulmonary disease. The student will also learn the use and basic interpretation of pulmonary function testing, cardiopulmonary exercise testing, plus other laboratory information important to pulmonary disease (sputum assessment, ABG, scanning, pulmonary artery catheterization data, etc.). Emphasis will be focused toward the patient in respiratory failure for diagnosis and ventilator management. Prerequisite: Senior standing. CLN.

**CCSL 979. Critical Care Selective in Pediatrics. 4 Hours.**
This elective experience has been designed as a one-month rotation in the pediatric intensive care unit at Wesley Medical Center. Care will be provided to critically ill patients from the neonatal period through adolescence. During this rotation the student will receive exposure to many pediatric critical care subjects and will be expected to convey an understanding of those processes during bedside rounds, in lectures, and during actual patient care. The student will participate in the educational endeavors of the critical care service, including lectures to other students and allied critical care staff such as nurses and respiratory therapists. The student will be expected to give brief presentations on topics that are identified during patient care. Prerequisite: Senior standing. CLN.

**CCSL 980. Critical Care Selective in Burn. 4 Hours.**
Student will be provided hands-on experience in burn management and critical care. Student will make daily rounds, assist in surgery, and participate in pre-operative and post-operative care of patients admitted to the burn unit. Student will be supervised by faculty and residents. Prerequisite: Senior standing. CLN.

**CCSL 981. Critical Care Selective in Internal Medicine. 4 Hours.**
The critical care rotation will aim to provide educational opportunities to acquire knowledge of and to develop clinical competence in the field of critical care medicine. The student will learn interpretation of CXR's, EKG's, Lab/Hemodynamic data and ventilator management. The student will participate in daily morning and evening rounds, and observe and be involved in ICU procedures. The student will be exposed to the many ethical issues of critical care illness. Emphasis will be on formulation of differential diagnosis and therapeutic plan. Prerequisite: Senior standing. CLN.

**CCSL 983. Critical Care Selective in Trauma. 4 Hours.**
The student will learn the care of surgical patients who have experienced blunt and penetrating traumas. Students will be assigned to the trauma service and work with a critical care resident. Students will develop trauma evaluation skills by participating in trauma patient work-ups in the emergency room. Students will assist in surgery and participate in hospital rounds for trauma patients in the Surgical Intensive Care Unit. Students will also develop diagnostic skills in the ambulatory care setting and attend surgical conferences. Prerequisite: Senior standing. CLN.

**Clinical Electives in Wichita**

**Anesthesiology (p. 2082)**

Emergency Medicine (p. 2083)

Family and Community Medicine (p. 2083)

Internal Medicine (p. 2084)

Obstetrics and Gynecology (p. 2085)

Ophthalmology (p. 2085)

Otolaryngology (p. 2085)

Pathology (p. 2085)

Pediatrics (p. 2086)

Preventive Medicine and Public Health (p. 2088)

Psychiatry and Behavioral Sciences (p. 2088)

Radiology (p. 2089)

Special Programs (p. 2089)

Surgery (p. 2089)

**Anesthesiology**

**ANSL 976. Anesthesiology. 4 Hours.**
This course will acquaint students with various aspects of Anesthesiology. Students will learn essentials of the pharmacology of the various potent anesthetic agents, narcotics, barbiturates, tranquilizers, muscle relaxants and local anesthetics. They will acquire knowledge of pharmacology, physiology, anatomy, and biochemistry as they relate to anesthesia and some knowledge in the mechanics and physics of anesthesia machines and gas physiology in general. Students will receive training in Acute Care Medicine and Pulmonary Medicine. Students will be exposed to intensive and respiratory care, learn mechanics of ventilators and indications for use of ventilatory support. Students will be exposed to intensive and respiratory care, learn mechanics of ventilators and indications for use of ventilatory support. Students will learn pulmonary physiology and the use of diuretics and cardiotonic agents as they pertain to respiratory support to the patient in acute respiratory failure. Students will also be exposed to regional and spinal anesthesia, learning drug doses, techniques and indications for use. Prerequisite: Medical Basic Sciences. CLN.
Emergency Medicine

EMRM 976. Emergency Medicine. 2-4 Hours.
This rotation will introduce the student to the clinical practice of Emergency Medicine. The student will observe and participate as a member of the Emergency Department team, in handling a variety of patient problems and complaints, under the direct supervision of the full time Emergency physician. The student will develop patient evaluation skills, examining unscreened patients under faculty supervision. The information gained from performance of this history and physical exam will aid in the selective use of ancillary services to achieve the most efficient and effective emergency assessment in management of patients seen in the Emergency Department setting. The student will develop and improve skills in sputuring, interpretation of radiographs and electrocardiograms, establishing IV lines, and other diagnostic studies and procedures commonly performed in the Emergency Department setting. The student will have clinical exposure to resuscitation techniques and problems. The student will develop an understanding of how Emergency Medicine Services relates to other departments and services. The student will assume appropriate responsibility for management of patient problems under the direct supervision of the Emergency Medicine faculty. The student's evaluation will consist of performance observed by assigned preceptor and director of Emergency Medicine Education. Prerequisite: Medical Basic Sciences and any two of the following four: SGRY 975, INMD 975, PDRC 975, or OBGN 975. CLN.

Family and Community Medicine

FCMD 976. Advanced Family Medicine-Greater Wichita Region. 4-8 Hours.
This course is tailored to the individual learning objectives of the student. Experiences include evaluation of outpatients and performance of procedures under direct supervision of volunteer faculty in the Wichita metro area. Assignments for call and case presentations are directed by the individual faculty. Evaluation is based on assessment of clinical performance and case presentations. Prerequisite: FCMD 950. CLN.

FCMD 977. Advanced Family Medicine-Rural Kansas. 4-8 Hours.
This course is tailored to the individual learning objectives of the student with interest in exploration of family medicine in a rural setting. Experiences include evaluation of outpatients and inpatients and performance of procedures under direct supervision of volunteer faculty in rural Kansas. Assignments for call and case presentations are directed by individual faculty. Evaluation is based on assessment of clinical performance and case presentations. Prerequisite: FCMD 950 and RLMD 976. CLN.

FCMD 978. Clinical Problems--A Community Perspective. 4 Hours.
This course is designed to provide an opportunity for the student to define and analyze clinical problems in community terms rather than individual terms. The student is assisted in developing a population-based study, including literature review, data collection and analysis, and procedures for submitting the work for scientific publication. Evaluation is based on assessment of community research skills. Prerequisite: Medical Basic Sciences. CLN.

FCMD 979. Ambulatory Care of the Elderly. 4 Hours.
This course is tailored to the individual learning objectives of the student with interest in geriatric care. Experiences include evaluation of patients under direct supervision of volunteer faculty in a variety of settings including inpatient, outpatient, nursing home and home visits. Assignments for call and case presentations are directed by the individual faculty. Evaluation is based on assessment of clinical performance and case presentations. Prerequisite: FCMD 950 and GERI 950. CLN.

FCMD 980. Advanced Family Medicine - A Residency Perspective. 4 Hours.
This course is tailored to the individual learning objectives of the student. However, it is designed for the student to function as a subintern at one of the three KUSM-W sponsored family practice residences - Via Christi or Wesley in Wichita or Smoky Hill in Salina. Experiences include evaluation of outpatients and inpatients and performance of procedures under direct supervision of residents and faculty. The individual residency directs assignments for in hospital call and case presentations. Evaluation is based on assessment of clinical performance and case presentations. Prerequisite: FCMD 950. CLN.

FCMD 981. Addiction Medicine. 2-4 Hours.
This elective will assist students to learn: 1) Diagnostic skills relevant to the identification of alcohol/drug dependency in patients of all ages whatever the presenting complaints 2) Management techniques including confrontation, inpatient and outpatient models of treatment, prognosis and aftercare including the role of community resources for patient and family 3) Preventive skills including an understanding of the epidemiology of addictive diseases and resources to identify and intervene with individuals and families at risk. The course will emphasize direct patient contact supported by required readings and didactic sessions with faculty members. Evaluation will be based on competence in this specialty at the end of the rotation, performance during the elective and completion of assignments. Prerequisite: FCMD 950. CLN.

FCMD 982. Sports Medicine. 2-4 Hours.
This course exposes medical students to the primary care/non-operative aspects of sports medicine. During this course, students will develop skills in the evaluation and management of athletes of all ages and athletic abilities who participate in a variety of sporting activities. The Sports Medicine course is offered at the KUSM-Wichita Family Medicine Residency at Via Christi Regional Medical Center in the Sports Medicine Center (located on the St. Joseph campus). The clinical component of the program includes examination and treatment of athletes in the clinic, at the training room, and on the field. The student will be exposed to high school, college, and professional athletes. They will become familiar with the injuries and illnesses commonly seen by a team physician. Upon completion of the course, students will have a basic understanding of the skills to: * Conduct a preparticipation sports exam * Prevent sports-specific injuries * Evaluate and treat injuries and illnesses in athletes * Design home rehabilitation programs for sports injuries * Design criteria for safe return to sports * Order appropriate diagnostic laboratory and radiologic tests and interpret the findings * Apply casts and splints * Work effectively with athletic trainers, personal trainers, physical therapists and other health care professionals involved in the care of athletes * Advise athletes on strength training, cardiovascular fitness, exercise prescription, and sports nutrition. Medical students will be expected to participate in small group discussions on aspects of Sports Medicine by doing selected readings assigned by the course director. Students will also participate in patient care along with physicians (including residents), athletic trainers, and physical therapists in the clinic, in training rooms, and at athletic events. Prerequisite: Senior Standing. CLN.
FCMD 983. In-Patient Maternal Care. 2 Hours.
This course is designed for fourth-year students who desire further experience in maternal care in a Family Medicine setting. The student will be assigned shifts three nights per week. During these shifts, the student will attend rounds and lectures and will be involved in the management of labor and delivery patients with Family Medicine residents and attending physicians. The student will also attend Maternal Care lectures and will complete readings assigned by course director. The course is offered October, November, December and January. Prerequisite: FCMD 950 and senior standing. CLN.

FCMD 984. Care of the Underserved, Sedgwick County. 2-4 Hours.
This course exposes medical students to the primary care of patients in Sedgwick County who are generally regarded as underserved due to low socioeconomic level, minority status, culture and/or homelessness. Clinically, the student will increase awareness, apply knowledge and practice problem-solving skills in the care of patients who are underserved. Most have limited socioeconomic resources and support systems. The student will develop an understanding of health care disparities and the role of the medical home in reducing disparities of care. The rotation is conducted at GraceMed, a federally qualified health center in Wichita. CLN.

FCMD 995. Special Topics in Family and Community Medicine. 2-8 Hours.
This elective provides an opportunity for clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. Examples include Occupational Medicine, and Ambulatory Procedures. The student, in consultation with departmental faculty, will design specific objectives, activities, reading assignments, and the mechanism for course evaluation. Prerequisite: Departmental consent. CLN.

Internal Medicine

INMD 977. Pulmonary Medicine. 4 Hours.
Students will work at a subintern level with pulmonary disease patients on the service of the assigned pulmonary specialist, participate in consultations, work in the Intensive Care Unit, and by special arrangement in the Pulmonary Function Laboratory. Prerequisite: INMD 975. CLN.

INMD 979. Endocrinology. 4 Hours.
Student will learn to appreciate the normal physiology and pathophysiology of selected diseases of the endocrine glands. In this brief encounter he or she will study in particular thyroid abnormalities as a model of the altered homeostasis occurring in endocrinopathies. Patients with diabetes mellitus will be encountered and the reference to metabolic perturbation of the acute and chronic complications of the same. Less common problems will be assigned when patients are available. The student will be expected to attend and participate in two seminars weekly along with the resident on the endocrinology rotation. There are two to four new work-ups weekly among hospital patients and selected outpatients with individual patient follow-ups as required. Performance will be evaluated by the faculty on written departmental forms. Critical review of clinical ward and outpatient activities will equal 100 percent of the grade. An in-depth topical summary may be submitted for extra credit consideration (not required). Prerequisite: INMD 975. CLN.

INMD 981. Rheumatology. 4 Hours.
Medical students completing a four-week elective in Rheumatology should be able to: 1) Perform a complete history and physical, with emphasis on the those items (e.g., skin, joints) related to rheumatic disorders; 2) Aspirate the knee; 3) Identify urate and calcium pyrophosphate dihydrate crystals in synovial fluid; 4) List: a) historical and physical findings; b) X-ray findings; c) modes of therapy for rheumatoid arthritis, degenerative joint disease, gout, lupus and ankylosing spondylitis. Outpatient and inpatient clinical performance - 100% of grade. Students will be evaluated on the basis of meeting objectives 1-4 listed above. Prerequisite: INMD 975. CLN.

INMD 982. Hematology/Oncology. 4 Hours.
The student will learn the “team approach” to patient care, involving the patient and family and other caregivers. Students will learn to examine and interpret a peripheral smear. Students will also learn: the fundamentals of bone marrow examination, the approach to evaluation of anemia, the approach to patients with suspected malignancy and the rationale behind chemotherapy, the evaluation of coagulopathies, thrombotic states, bleeding disorders, nutritional deficiencies, and blood therapy. Students will learn the natural history of common malignancies, to perform therapeutic phlebotomy, bone marrow aspiration, and how to interpret biopsy, bleeding time, and bone marrow pathology. Student will perform patient work-ups, attend conferences, and rounds, including interaction with the team (nurses, chaplains, staff physicians, occupational therapists, volunteers). Prerequisite: INMD 975. CLN.

INMD 984. Nephrology. 4 Hours.
Students will be assigned patients at a sub-intern level from the inpatient renal consultation services and the inpatient and outpatient hemodialysis services. Renal physiology and pathophysiology will be emphasized plus complicated fluid and electrolyte problems. Prerequisite: INMD 975. CLN.

INMD 985. Infectious Disease. 4 Hours.
The student will: 1) Learn about management of postoperative infection, CNS infection, pulmonary infection, sepsis, fungal infection, etc. 2) Learn data analysis techniques of infectious diseases specialist and how (generally) microbiology laboratories work. 3) Learn principles of antibiotic, antifungal, and antiviral therapy. Students are to attend infectious diseases conferences. Students will see patients primarily admitted to the Infectious Disease Office and work with selected educational consultants. They will attend noon medicine conferences and grand rounds at the assigned hospital. They will be supervised by one physician. Students will have contact with 3 to 5 new patients a week plus follow-up 3 to 4 patients. Clinical ward performance =100% of grade. Student performance will be evaluated by faculty on written departmental forms to assess: history-taking ability, expertise in performing physical exams, formulation of clinical judgment, diagnostic approach, rapport with nursing staff and fellow physicians. Prerequisite: INMD 975. CLN.

INMD 986. Physical Medicine and Rehabilitation. 2-4 Hours.
The student should develop a working knowledge of the physiatric evaluation, including manual muscle testing, examination of joints, neurologic evaluation, evaluation of functional level. The student should achieve a basic familiarity with neuromuscular diseases, CVA, joint problems, amputee management, head injury, and spinal cord injuries, as well as the rehabilitation goals and therapies as applied to the above. The student will be involved in the initial evaluation and diagnostic workup of selected patients, including EMG's, X-rays, scans, lab tests, as well as the physical examination with emphasis on the physiatric evaluation. There will be student involvement in the management of patient progress. The student will participate in inpatient rounds, consultations, and outpatient evaluations. He/she is expected to be a participating member of the rehabilitation team and to work closely with the nurses, therapists, and physicians. The students will be evaluated on the basis of their clinical skills, knowledge of the interest in the field, rapport with patients, and participation as a member of the rehabilitation team. Clinical ward performance = 100% of grade. Prerequisite: INMD 975. CLN.
INMD 987. Neurology. 4 Hours.
The clerk will serve at a subintern level under supervision of a resident and attending staff. Clinical examination of patients and management of neurologic disorders will be emphasized. Prerequisite: INMD 975. CLN.

INMD 988. Gastroenterology. 4 Hours.
Services are available for concentrated experience in gastrointestinal disease problems with student participation in diagnostic work-up, including various endoscopic procedures and management of clinical problems. Prerequisite: INMD 975. CLN.

INMD 989. Dermatology. 2-4 Hours.
This service is centered in the private offices of dermatology groups where the student will observe and participate in treating a wide variety of dermatologic problems. The emphasis is on common problems, those relating to systemic disease, and principles of dermatologic therapy. Prerequisite: INMD 975. CLN.

INMD 991. Cardiology. 4 Hours.
Student will learn 1) Evaluation and therapy of clinical cardiology patients, 2) Proficiency in physical diagnostic techniques, 3) Introduction to non-invasive cardiology, including EKG, stress testing both exercise treadmill and nuclear procedures, M-Mode, and two dimensional echocardiography, 4) Direct hands-on invasive procedures on patients that the attending works up, as well as other selected patients, 5) Intensive care experience, including management and proficiency in dealing with acutely ill cardiac patients, and ascertaining the ability to use hemodynamic monitoring and intensive care treatment such as drugs, intra-aortic balloon, etc. Experience with both in-patients and out-patients will be offered. Primary emphasis will be placed on learning basic cardiology and sharpening skills. Student will work with 3 to 5 patients per week. Clinical ward performance = 100% of grade. Student performance will be evaluated by faculty on written departmental forms to assess: history-taking ability, expertise in performing physical exam, formulation of clinical judgment, diagnostic approach, rapport with nursing staff and fellow physicians. Prerequisite: INMD 975. CLN.

INMD 994. Ambulatory Care in Internal Medicine. 4 Hours.
The student may elect an office practice experience in ambulatory medicine with available faculty as arranged by Academic and Student Affairs and the department of Internal Medicine. The specific goals and objectives and the scope and type of clinical experience are constructed under the supervision of the Clerkship Director in Internal Medicine. The office experience may be in general medicine or specialty practice. Prerequisite: INMD 975. CLN.

INMD 995. Special Topics in Internal Medicine. 2-8 Hours.
This elective is designed to provide clinical and/or research experience in general medicine or topics of special interest. The student will design, in consultation with the clerkship director and department faculty, specific objectives, reading assignments, and the mechanism for course evaluation. Prerequisite: INMD 975 and departmental consent. CLN.

OBGN 976. General Obstetrics and Gynecology. 4-8 Hours.
Supervised experience in labor and delivery, gynecologic surgery, and in-hospital management of the OB-GYN patient will be given. Scheduled conferences include weekly case conference and didactice lectures on Wednesday morning. Daily teaching and working rounds with attending staff will likewise be a very important part of the clerkship. Clinics meet daily. Deliveries/month: 500 (60 clinic); operations/month: 500 (60 clinic). Prerequisite: OBGN 975. CLN.

OBGN 977. Maternal-Fetal Medicine. 4 Hours.
The student will develop skills in assessment of high-risk obstetric and neonatal patients and will be a participating member of the perinatal transport team. Through development of a scientific paper on perinatal medicine (the specific subject to be determined in advance by the course director and student), the student will be able to illustrate his or her expanded knowledge in this subspecialty. The student on this elective will attend a weekly high-risk follow-up clinic, make rounds in the neonatal intensive care and intermediate nurseries with the assigned staff and resident physicians. The student will be on call for the perinatal transports team of obstetric and neonatal transports by ground and air, be on twenty-four hour birth room call every fourth night, devoting this call time to the delivery rooms. The student will attend all obstetric and neonatal conferences, attend a weekly conference with perinatologists and neonatologists, be invited on outreach education programs, and effort will be made to follow high-risk patients through labor-delivery-postpartum and neonatal care. The student will be evaluated by the supervising staff physician on patient care and on the completed paper on perinatal subject. Prerequisite: OBGN 975 and PDRC 975. CLN.

OBGN 979. Gynecologic Oncology. 4 Hours.
The objectives of this course for a senior medical student are as follows: 1) to introduce the student to gynecologic malignancies, their presenting symptoms, their evaluation, and treatment thereof; 2) management of treatment complications including management of chemotherapy problems and radiation problems; 3) management of medical problems associated with progressive malignancies. Prerequisite: OBGN 975. CLN.

OBGN 995. Special Topics in Obstetrics. 2-4 Hours.
This elective is designed to provide clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with department faculty, specific objectives, reading assignments, and the mechanism for course evaluation. Prerequisite: Departmental consent. CLN.

Ophthalmology

OTHO 976. Ophthalmology. 2 Hours.
The rotation is designed to familiarize the student with the private office and surgical procedures of a practicing ophthalmologist. Students will learn proper use of an ophthalmoscope and how to perform the ocular exam. Students will observe surgical procedures, and participate in hospital rounds and private office visits. The student will be directly involved in all patient care as provided by the assigned ophthalmologist. Prerequisite: Medical basic sciences. CLN.

Otorhinolaryngology

OHIN 976. Otolaryngology—Ears, Nose, Throat. 2 Hours.
Students will observe the activities of a practicing otorhinolaryngologist and participate in the management of patients with ENT disorders. Students will observe and perform the examination of the anatomical areas and cavities of the head and neck. Students will accompany the assigned physician on all hospital rounds during office hours and when possible, observe surgical procedures. Prerequisite: Medical basic sciences. CLN.

Pathology

PALO 976. Introduction to Clinical Pathology - St. Joseph. 4-6 Hours.
This elective serves to enhance the student's awareness of the role of the clinical laboratory in patient management. At the end of the elective, the student will be able to: 1) Describe the general methodology,
Depending upon the individual student's areas of major interest, he/she will observe testing procedures and may perform selected analyses at the discretion of the supervisor. Details of methodology will not be stressed, rather the emphasis will be on general principles, sampling, and interpretation. The student will attend daily departmental gross anatomic pathology conferences and didactic presentations in both anatomic and clinical pathology. The student will be encouraged, but not required to attend extra departmental conferences, such as the daily family practice noon conference. (Observation and participation in autopsies is also optional, but encouraged. The student may choose to spend time in surgical pathology or cytopathology.) The student will be required to make a formal presentation during the last week of the elective. This may consist of a case presentation with discussion of pertinent laboratory findings or the student may elect to present an analysis of a particular laboratory testing procedure, theory, or problem. Evaluation will be based upon the student's knowledge, acquisition, interest, and participation. Prerequisite: Medical Basic Sciences. CLN.

**PALO 977. Laboratory Medicine. 4 Hours.**

Several options are offered to the student within the Department of Laboratories as follows: 1) A general survey of Laboratory Medicine, including opportunities to view and assist in autopsies, a study of surgical pathology, some exposure to interpretation of immunoelectrophoretic studies, bone marrows, and other laboratory parameters of interest to medical students. 2) More selective and deeper evaluations such as the entire time in anatomic pathology including autopsy and surgical pathology. 3) Programmed courses of experience in chemistry, hematology, or microbiology. It is anticipated that the student will make preliminary contact with a member of the department indicating his or her interest and type of program he or she would like to be exposed to. The student will have the opportunity to attend the morning and afternoon conferences offered daily by the department together with the noon conferences offered by the general medical staff. It is hoped that the experience will be a pleasant and informative one and the student, as a possible pathology resident, will have the opportunity to survey the general field of pathology in a large institution primarily devoted to service and developmental pathology. Students are evaluated by the pathologist or medical technologist in the area which they are working and a report of the student's performance is submitted to the Medical School. Prerequisite: Medical Basic Sciences. CLN.

**PALO 978. Introduction to Surgical Pathology. 4-6 Hours.**

The student will understand and be able to describe orally, the role of the surgical pathologist in the diagnosis and treatment of common disorders, including: 1) breast masses, 2) suspicious mammographic lesions, 3) mass lesions of the lung, 4) enlarged lymph nodes, and 5) thyroid nodules. Differential diagnosis will be discussed. Using microscopic slides, the student will correctly identify major common surgical lesions of the breast, lung, lymph nodes, thyroid and colon. The student will describe how an intraoperative consultation is conducted, including the frozen section evaluation of resected tissue. The student will be assigned to work with a particular surgical pathologist in two-day blocks. On day 1 the student and pathologist will be in the operating room, performing intraoperative consultations, frozen sections and dissecting tissues removed at surgery. On day 2 they will examine the microscopic slides from selected cases received on the previous day. Depending upon the individual student's areas of major interest, he/she will accompany pathologists who perform fine needle aspiration biopsies and assist in their evaluation. The student will attend departmental conferences. Students will be evaluated according to the objectives above. Prerequisite: SGRY 975 or OBGN 975. CLN.

**PALO 979. Introduction to Clinical Pathology - Wesley. 4 Hours.**

Given a description of history and physical findings, the student will be able to select from a panel of tests those which, in the opinion of the faculty, would be most suitable for diagnosis management. The student will list no less than 5 legitimate reasons for performing laboratory tests and will discuss each of these using specific examples. The student will list no less than 4 conceptual definitions of "normal" and discuss the implications of each using specific examples. The student, using his/her understanding of the statistical nature of laboratory data, will discuss concepts of accuracy, precision, errors and clinical significance in 5 common laboratory tests of the student's choice. An effort will be made to tailor the elective experiences to the needs and interests of the individual student. In general, students will rotate through most areas of the clinical laboratory, and will gain experience in specimen collections, processing, test methodologies, and clinical interpretation. Students will report to their assigned areas by 7:30 a.m. and carry out assigned tasks then meet a member of the faculty in the late afternoon to go over the day's work and to discuss the clinical correlation of the tests reviewed that day. Students will attend the Departmental Teaching Conferences. Attendance at other clinical conferences, usually held at noon, is encouraged, but not required. Students will attend Medicine Morning Report with the Staff Pathologist each day at 8:00 a.m. Students will make one presentation at a Clinical Pathology Conference during their last week of rotation which may consist of a short lecture and a particular test or a patient presentation. The quality of the presentation will be evaluated and will form 50% of the grade. The other 50% will be determined from questions asked at the end of the presentation as determined by the objective given above. Prerequisite: INMD 975 or SGRY 975 or PDRC 975 or OBGN 975. CLN.

**PALO 980. Introduction to Forensic Pathology. 2-4 Hours.**

The student will understand and be able to describe orally, the basic principles of the medicolegal autopsy through observation of postmortem dissections and assisting the forensic pathologist. The student will learn the principles of death scene investigation. The student will appreciate the importance of toxicology in the correct determination of cause and manner of death through the interpretation of toxicology reports and consultations with the chief forensic toxicologist. The student will understand the role of physical evidence collected at the scene and autopsy as it pertains to the determination of cause and manner of death. The student will be assigned to the autopsy suite and will be supervised by the on-duty designated forensic pathologist. As time permits the student will accompany the coroner or deputy coroner to court to observe trial testimony. Students will be evaluated according to the objectives listed above. Prerequisite: Medical basic sciences. CLN.

**Pediatrics**

**PDRC 976. General Pediatrics. 4 Hours.**

This is a four-week continuation of the basic pediatric clerkship for those students interested in additional pediatric experience. The program is flexible and should be arranged individually with the departmental chair. The experience may be either an inpatient or ambulatory experience or a combination of both. This experience carries with it increased responsibilities for patient care in areas selected by the student and arranged with the pediatric staff. Prerequisite: PDRC 975. CLN.
PDRC 977. Neonatology. 2-4 Hours.
The student will learn overview of neonatal medicine and develop skills and conceptual knowledge of newborns and premature infants. The student will attend X-ray conferences weekly, daily literature review, service rounds twice daily, pediatric grand rounds weekly and neonatal mortality review, as well as care for infants with special emphasis on NBICU. Prerequisite: PDRC 975. CLN.

PDRC 978. Ambulatory Pediatrics. 2-4 Hours.
This elective involves increased exposure to community and ambulatory pediatrics utilizing community resources including the pediatrician’s office, the Public Health Department, Wesley Pediatric Clinic, Institute of Logopedics and other community resources. The program is flexible and can be broadly based in several areas or strictly confined to one area such as a continuous experience in the office of a community pediatrician. The program will be individually arranged with the department chairperson and the pediatric staff. The standard Elective Evaluation form will be utilized for the course. Prerequisite: PDRC 975. CLN.

PDRC 979. Medical Genetics. 2-4 Hours.
This elective is designed to give the medical student the opportunity to participate in the genetic evaluation of children with developmental delay, mental retardation, dysmorphic features or autism. By the end of the rotation the student will be familiar with common pediatric genetic syndromes and appropriate genetic testing strategy. The student will also get the opportunity to participate in telemedicine genetic clinics. Prerequisite: PDRC 975 or INMD 975. CLN.

PDRC 980. Pediatric Endocrinology. 2-4 Hours.
During the elective the student will learn diagnosis and management of endocrine problems in children. The student will participate in inpatient management, hospital and office consultation, and in a weekly endocrine clinic. Emphasis will be on the management of diabetes in children. Additional experience may be arranged through the Pediatric Department with other endocrinologists in the community. Prerequisite: PDRC 975. CLN.

PDRC 981. Diabetes. 2-4 Hours.
The student will learn to recognize and manage simple inpatient and outpatient problems related to controlling blood glucose levels in children and adults, discuss the psychosocial adaptation to their chronic illness, and perform as well as educate others in specific procedures involved in self care. The student will see patients with diabetes mellitus in the hospital clinic, attend team meetings, attend counseling staffing, do assigned readings, and report to the faculty. Evaluation of this clerkship will be based on rounds, conferences, lectures and performance on patient workups in hospital and in the clinic. Prerequisite: PDRC 975. PDRC 975. CLN.

PDRC 982. Pediatric Hematology/Oncology. 2-4 Hours.
The student will obtain histories, do physical examinations, write progress notes, conduct in-depth consultations regarding pediatric hematology and oncology problems, and will develop skills in diagnosis and therapy of pediatric oncology patients. The student will demonstrate knowledge of various procedures, such as bone marrow aspiration, administration of chemotherapy, and intrathecal medication. Prerequisite: PDRC 975. CLN.

PDRC 983. Pediatric Critical Care. 4 Hours.
This elective experience has been designed as a one-month rotation in the pediatric intensive care unit at Wesley Medical Center. Care will be provided to critically ill patients from the neonatal period through adolescence. Availability of the elective will be limited to one student per month, with possible exceptions based on the student’s own objectives and educational needs. During this rotation the student will receive exposure to pediatric critical care subjects, and will be expected to convey an understanding of these processes during bedside rounds, in lectures, and during actual patient care. The student will participate in the educational endeavors of the critical care service, including lectures to other students and allied critical care staff such as nurses and respiratory therapists. The student will be expected to give brief presentations on topics which are identified during patient care. The student’s final evaluation will be based primarily on the expression of an increased understanding of and confidence in the management of the diseases encountered in the PICU. Prerequisite: PDRC 975 and approval of instructor. CLN.

PDRC 984. Pediatric Allergy. 2-4 Hours.
Primarily a private office experience under the supervision of the physician, emphasizing an immunologic approach to allergy problems in pediatric patients. Prerequisite: PDRC 975. CLN.

PDRC 985. Pediatric Cardiology. 2-4 Hours.
Extensive clinical experience in children with cardiac disease will be provided. Daily pediatric cardiology ward rounds are conducted by the senior staff. Personal instruction will be given in cardiac physical diagnosis with stress on cardiovascular hemodynamics, evaluation of heart sounds and murmurs, electrocardiograms and cardiac radiology. Significant responsibility in patient management will be delegated to the student who will function as a member of the pediatric cardiology team. Ample opportunity will be available for participation in clinical investigative projects if the student so desires. Prerequisite: PDRC 975. CLN.

PDRC 986. Pediatric Neurology. 2-4 Hours.
The purpose of this elective is to acquaint the student with the wide spectrum of neurological diseases of infancy, childhood, and adolescence. The student will become familiar with the neurological examination of the newborn as well as the assessment of the infant and child. During the elective course the student will become actively involved in the diagnosis and treatment of seizure disorders. He or she will be exposed to routine laboratory procedures such as lumbar puncture, EEG and brain scan, as well as special procedures such as arteriography and pneumoencephalography. The student will be supervised by staff physicians and pediatric residents. Prerequisite: PDRC 975. CLN.

PDRC 987. Developmental Pediatrics. 2-4 Hours.
Students will become familiar with normal developmental patterns and will demonstrate the ability to perform and interpret developmental screening tests. Students will be able to recognize aberrant patterns of development in an individual child and gain understanding of intervention services that are available for children with developmental delays. Students will be involved in the Development Clinic, Neonatal Follow-up Clinic, Heartspring (residential school for multiple handicapped children), and Rainbows United (early intervention provider for children under 5 years of age). These sites will allow the student exposure to a variety of children, with both normal development and those with behavioral and/or developmental problems. CLN.

PDRC 988. Pediatric Infectious Disease. 2-4 Hours.
This course is designed to familiarize students with infectious diseases of pediatric patients. Students will learn the rational selection of antimicrobials and their appropriate uses and recognize the reasons for failure of antimicrobial therapy. Students will learn basic immunology and both active and passive immunization. Students will learn the pathogenesis of fever and to recognize the common pediatric pathogens causing meningitis, bacteremia, respiratory tract infections, enteric infections and urinary tract infections. Students will attend outpatient clinics, daily hospital rounds on in-patients and new consultations, and daily meetings to discuss infectious disease topics. *Recommendation: Candidates for Med/Peds residency should enroll in 2 weeks of this course and 2 weeks INMD 986, (Adult) Infectious Disease. CLN.
PDRC 989. Pediatric Emergency Care. 2-4 Hours.
The student will spend time at the Pediatric Emergency Department, working closely with the faculty. Teaching and supervision is provided by board certified emergency medicine physicians and internal medicine/pediatrics physicians with faculty positions in the Department of Pediatrics. Expectations include participation in didactic instruction and patient cart, literature searches of material as assigned or necessary for management of patients, understanding of evidence-based medicine in the care pediatric emergencies and participation in emergency department procedures under the guidance of the attending. The goals are for the student to become familiar with various pediatric emergencies, as well as understanding other situations in which children are brought into the ED. Prerequisite: PDRC 975. CLN.

PDRC 990. Pediatric Nephrology. 2-4 Hours.
During this elective, the student will learn to recognize and manage inpatient and outpatient problems related to pediatric nephrology. Participation in clinic, as well as hospital consultations will be involved, as well as reading assignments/discussions with faculty. Teaching and supervision is provided by a full-time, board certified pediatric nephrologist. A basic understanding of pediatric nephrology is essential to the pediatrician in general practice who will need to recognize a child suffering from a renal condition, manage those that generally do not require referral, and initiate management of those that will need the intervention of a nephrologist. Expectations include participation in daily instruction and patient care, literature searches of material as assigned or necessary for management of patients, and understanding of evidence-based medicine in the care of the nephrology patient. Prerequisite: PRDC 975. CLN.

PDRC 995. Special Topics in Pediatrics. 2-8 Hours.
This elective is designed to provide clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with department faculty, specific objectives, reading assignments, and the mechanism for course evaluation. Prerequisite: Medical Basic Sciences and Departmental consent. CLN.

Preventive Medicine and Public Health

PVMD 976. CLARION. 2-4 Hours.
Students who participate in CLARION will develop a deeper understanding of healthcare as a system that requires highly performing interprofessional teams to achieve the six aims outlined by the Institute of Medicine. These aims include care that is safe, timely, equitable, effective, efficient and patient centered. Students will study with other students from other health professions disciplines under the direction of interprofessional course faculty and invited members of the community who will guide discussions each week to prepare students for analyzing and developing solutions to a fictional healthcare sentinel event. CLN.

PVMD 995. Special Topics in Preventive Medicine. 2-8 Hours.
This elective is designed to provide clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with Departmental faculty, specific objectives, reading assignments and the mechanism for course evaluation. CLN.

Psychiatry and Behavioral Sciences

PSCR 975. Child Psychiatry/Adolescent Psychiatry. 2-4 Hours.
The course will familiarize students with common psychiatric diagnoses and therapies for children and adolescents. Students will observe and participate in the evaluation and treatment of children and adolescents in inpatient, outpatient, and residential settings. They will attend staffings, family meetings, and relevant conferences. Faculty will provide supervision. Prerequisite: PSCR 950. CLN.

PSCR 979. Advanced Studies in Psychiatry. 2-8 Hours.
This course allows students to expand their knowledge and experience in Psychiatry with rotations of their own choosing. Experience can be modified to fit the individual's interests and needs. All students will have the core experience (attendance at Grand Rounds, Journal Club and readings assigned by Clinical supervisor). Students may choose one training site for four to eight weeks, subject to availability of supervision. Scheduling should be arranged with the Psychiatry Clerkship Director. Written evaluation by supervisor at the end of the course. Supervisor's evaluation comprises 100% of the grade. Prerequisite: PSCR 950. CLN.

PSCR 980. Geriatric Psychiatry. 2-4 Hours.
The student will experience caring for elderly and often medically ill patients with psychiatric symptoms and diagnoses on an acute geropsychiatry hospital unit, in outpatient settings, and in the nursing home and assisted living environment. Experience will be gained in assessing and managing complex medical and psychiatric conditions in elders. Objectives include: 1) Increase awareness of the common psychiatric conditions in elders. 2) Improve ability to assess, diagnose and treat common psychiatric conditions in elders who commonly have co morbid medical conditions. 3) Understand the impact of the elder's environment on psychiatric symptoms, and the necessity of managing the elder within the context of the psychosocial environment, especially the family unit. 4) Improve ability to manage complex pharmacotherapy. Teaching Methodology includes bedside clinical rounds, geropsychiatry small group discussions, lectures and assigned readings. Patient contact would include elderly patients with common psychiatric conditions - affective disorders, dementias, anxiety disorders, psychotic disorders and comorbid medical conditions, acute care hospital geropsychiatry unit, outpatient clinic, and long term care facilities. Evaluation will be completed by supervisor. Prerequisite: PSCR 950 and INMD 975. CLN.

PSCR 981. Consultation/Liaison Psychiatry. 2-8 Hours.
The objective of this course is to increase the student's knowledge and skills in evaluating patients with both psychiatric and medical illnesses in inpatient and outpatient settings, making recommendations, and communicating with referring physicians. These objectives will be met by direct patient contact, individual supervision, assigned readings, and attendance at conferences. Prerequisite: PSCR 950 and INMD 975. CLN.

PSCR 985. Clinical Psychopharmacology. 2-8 Hours.
The purpose of this elective is to obtain intensive and in-depth experience with the medical management of a variety of psychiatric disorders. During this rotation, the student will come in contact with patients suffering from a variety of psychiatric disorders and will gain further experience with a medical model approach to the management of these disorders. The student will learn basic pharmacokinetics principles which are broadly applicable to the pharmacologic management of patients with both psychiatric and non-psychiatric disorders. The student will learn pharmacodynamic principles and clinical neuroscience principles which are of special relevance to clinical psychopharmacology. Effort will be made to tailor the elective to maximize the exposure to a particular area
or diagnosis, based on student interest. The student may choose to be involved in ongoing clinical psychopharmacology research, including an exposure to drug development and testing. Prerequisite: Pharmacology (2nd year) and SPCR 950. CLN.

**SPCR 977. Special Program: International. 4-8 Hours.**
The student will enroll in this rotation when desiring elective credit for an educational experience at a site other than KU, outside the United States. Within this elective are presented opportunities for the student to gain clinical and community health experiences in an international setting. The country selected is to be prearranged by the student with the assistance of faculty. A particular month is recommended (but not required) for this elective. Prerequisite: Approval of Instructor and Associate Dean for Academic and Student Affairs. CLN.

**SPCR 978. Special Program: On-Campus. 1-8 Hours.**
The student will enroll in this rotation when desiring elective credit for an educational experience at KU which is not otherwise defined by a current elective offering. Application process is initiated through the office of Academic Student Affairs. A student may receive no more than 8 units of Special Program elective credit, which count toward the M.D. degree. Prerequisite: Approval of the chair of the respective department and the Associate Dean for Academic and Student Affairs. CLN.

**Surgery**

**SGRY 972. Urological Surgery. 2-4 Hours.**
Students will experience urologic surgery patient care during clinics in the office setting. Students will be assigned to the Urological service and perform history and physical and urological diagnosis examinations. Students will attend surgical conferences. Students will see both pre- and post-operative patients and assist with minor out-patient surgeries. CLN.

**SGRY 977. Plastic Surgery. 2-4 Hours.**
All student participation will be under the direct supervision of the staff. This clerkship is directed toward providing a variety of experiences in the field of plastic surgery. The student will participate in evaluating and treating outpatients and inpatients in a private office and hospital setting. The student will be involved with history taking, physical examination, and evaluation of patients preoperatively. Attendance in the operating room will be emphasized as well as postoperative management of plastic surgery problems. The student will be introduced to the basic concepts of hand surgery ranging from acute surgical problems to that of congenital abnormalities. Complete care of the burn patient will be stressed. Tumors of the skin, head and neck, and congenital anomalies of the hands and face will be covered. Facial trauma and esthetic surgery will also be included in the curriculum. Prerequisite: SGRY 975. CLN.

**SGRY 978. Orthopedic Surgery. 2-4 Hours.**
Emphasis will be placed on the principles of orthopedic evaluation and care through obtaining a history, performing a physical examination, and outlining management on assigned orthopedic patients. The student's responsibilities will include rounds with attending orthopedic surgeon or the resident, clinic or office rotation and several orthopedic conferences and assigned lectures. Prerequisite: SGRY 975. CLN.

**SGRY 979. Cardiothoracic Surgery. 2-4 Hours.**
This clerkship is designed to give the student familiarity and basic understanding of cardiopulmonary disease entities with emphasis on pathophysiology, diagnosis, and management. Conferences as well as rounds with attending surgeons and resident staff comprise the essential part of this clerkship. Patients will be assigned to students for workup on a regular basis not to exceed three patients a week. Prerequisite: SGRY 975. CLN.
SGRY 980. Burn and Critical Care. 2-4 Hours.
This course will provide hands-on experience in burn management and critical care. The student will be assigned to the Burn Unit at Via Christi Regional Medical Center - St. Francis Campus. He/She will make daily rounds, assist in surgery, and participate in preoperative and postoperative care of patients admitted to the Burn Unit. He/She will be supervised by faculty and surgery residents. Patient Contact: 5-10 patients/day (inpatient and outpatient). Evaluation: Use form for clinical assessment and personal skills (Department of Surgery form currently being used). Prerequisite: SGRY 975. CLN.

SGRY 981. Neurosurgery. 2-4 Hours.
This elective will provide an in-depth exposure to neurosurgery. Student will have daily rounds, patient workups, surgery and office experience. He/she will be supervised by faculty and surgery residents assigned to neurosurgery. Patient contact is variable. Students will be evaluated on form for clinical assessment and interpersonal skills currently in use by the Department of Surgery. Prerequisite: SGRY 975. CLN.

SGRY 983. General Surgery Preceptorial. 2-4 Hours.
The clerkship provides in-depth exposure to hospital and office practice in general surgery. The student will make daily rounds, assist in office, perform patient work-ups, scrub on all surgical procedures on his/her patients, and attend conferences on consultant rounds, surgical grand rounds, and tumor and x-ray. Evaluation will be based on patient work-ups, technical skills, rapport with patients, paramedical personnel, and surgical team. Prerequisite: SGRY 975 and INMD 975. CLN.

SGRY 985. Pediatric Surgery. 2-4 Hours.
This course provides an introduction to common problems in pediatric surgery. The student will attend three to four conferences per week, make daily rounds, perform patient work-ups, and assist in surgery and office experience both preoperatively and postoperatively. The student will have contact with approximately twenty-five patients per week and will be supervised by a faculty member. Evaluation will be based on clinical assessment and interpersonal skills. Prerequisite: SGRY 975 and PDRC 975. CLN.

SGRY 986. Peripheral Vascular Surgery. 2-4 Hours.
The objective is to learn to care for patients with peripheral vascular disease emphasizing diagnosis, examination, appropriate testing, including ultrasounds, vascular lab, angiography, and CT scans. Students will also be familiar with the natural history of peripheral vascular disease and the role of surgical and non-surgical treatments. In addition the student will gain knowledge of venous disease to include management and treatment of deep vein thrombosis and pulmonary embolism. The student will be expected to see patients on rounds, assist in surgery, and perform preoperative evaluation of patients with vascular disease. The student will see patients both as in-patients and out-patients. Prerequisite: SGRY 975. CLN.

SGRY 987. Senior Elective in Surgery. 4 Hours.
The student will be assigned to a teaching panel and will work closely with the attending surgeons and residents. The student will participate in the preoperative, intraoperative, and postoperative management of surgical patients. Exposure to acutely injured patients and acute surgical conditions in the emergency department will be an important aspect of this elective. As a result of these experiences the student will be able to: recognize acute surgical conditions and institute initial management, develop skills in surgical diagnosis, participate and assist in surgical procedures, elicit and perform an H P on patients in an ambulatory care setting, and develop diagnostic skills in the ambulatory care setting. Prerequisite: SGRY 975. CLN.

SGRY 995. Special Topics in Surgery. 2-8 Hours.
This elective is designed to provide clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with department faculty, specific objectives, reading assignments, and the mechanism for course evaluation. Prerequisite: Medical Basic Science and departmental consent. CLN.

SGRY 997. Sports Medicine. 2-4 Hours.
The student will experience Sports Medicine Care in the ambulatory setting. The student will evaluate sports-related injuries in the office setting and also have the opportunity to observe surgical treatment in the arthroscopic surgery suite. The student will have the opportunity to participate in the on-site evaluation of athletic injuries through outreach sports medicine programming. Additional exposure to athletic training services will also be utilized. Prerequisite: Senior standing. CLN.

Postgraduate Training Programs

The KU School of Medicine provides two distinct residency and fellowship programs. Both programs are comprehensive in their training. One program is at the KU School of Medicine and Medical Center in Kansas City. The second program is at the KU School of Medicine — Wichita. Kansas City Postgraduate Training Programs (http://www.kumc.edu/school-of-medicine/gme.html)
Wichita Postgraduate Training Programs (http://wichita.kumc.edu/education/graduate-medical-education.html)
Continuing Medical Education (http://kumcce.ku.edu)
Institute for Community Engagement (http://www.kumc.edu/community-engagement.html)
Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor for details). Other years' catalogs (http://catalog.ku.edu/archives)

   Doctor of Musical Arts in Composition (p. 2170)
   Doctor of Musical Arts in Conducting (p. 2172)
   Doctor of Musical Arts in Music Performance: Organ and Church Music (p. 2176)
   Doctor of Musical Arts in Music Performance: Brass and Percussion (p. 2174)
   Doctor of Musical Arts in Music Performance: Piano (p. 2178)
   Doctor of Musical Arts in Music Performance: Strings (p. 2180)
   Doctor of Musical Arts in Music Performance: Voice (p. 2182)
   Doctor of Musical Arts in Music Performance: Woodwinds (p. 2184)
Doctor of Philosophy (p. 2185)
   Doctor of Philosophy in Music (p. 2186)
   Doctor of Philosophy in Music Education (p. 2187)

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor's, master's, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in the Swarthout Recital Hall (remodeled in 2015), Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Degrees

Undergraduate Degree Programs

The degree of Bachelor of Music is granted with majors in bassoon, clarinet, double bass, euphonium, flute, French horn, harp, musicology, music therapy, oboe, organ and church music, percussion, piano, saxophone, theory, composition, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

The degree of Bachelor of Arts in Fine Arts is granted with concentrations in applied music (on an instrumental or voice), jazz studies, musicology, and music theory.

The degree of Bachelor of Fine Arts is granted with a major in theatre and voice.

The degree of Bachelor of Music Education is granted with a major in music education.
Requirements for Graduation

Degrees from the School of Music are conferred on candidates who have satisfactorily completed a minimum of 120 credit hours for the B.A., B.M., B.F.A., and B.M.E. degrees, including required subjects. 45 credit hours must be in junior/senior-level courses, numbered 300 and above. A minimum 2.0 grade-point average, both cumulative and in KU courses, is required for graduation. 4 hours of the total in each case except the B.M.E. degree may be in physical education activity courses.

Remedial Courses

Remedial courses listed in the catalog and Schedule of Classes (https://classes.ku.edu/Classes/ExternalDisplay.action) are numbered below 100. Such courses include, but are not limited to, MATH 2 and MTHC 99. Such courses do not count toward graduation in the School of Music and may not be counted as distribution courses or electives.

Graduate Degree Programs

The School of Music offers these degree programs:

**Master of Music**
- Composition
- Conducting
- Musicology
- Music theory
- Performance

**Master of Music Education**
- Music education
- Music therapy

**Doctor of Musical Arts**
- Composition
- Conducting
- Performance

**Doctor of Philosophy**
- Music with an emphasis in musicology or music theory
- Music Education with an emphasis in music education or music therapy

The Kansas Board of Regents (http://www.kansasregents.org) has designated KU as the sole institution in the Regents system authorized to grant doctoral degrees in music.

Contact the school (http://music.ku.edu) for specific admission requirements. See also Admission in the Graduate Studies section of the online catalog.

View the list of School of Music academic programs (p. 2091).

Facilities

**Murphy Hall**

*Murphy Hall*, named for former KU Chancellor Franklin D. Murphy, houses the School of Music (http://music.ku.edu). It is a 5-level facility with offices for faculty members in applied music, music theory and composition, musicology, opera, music education, music therapy, and ensembles. Designed for music and theater, it contains 4 performance areas.

- **Crafton-Preyer Theater** provides a venue for plays, operas, musical theater shows, and concerts. It is a fully equipped, 1,188-seat proscenium stage facility.
- **William Inge Memorial Theater** is an intimate black-box facility with seating for up to 125, suitable for plays and small opera productions.
- **Swarthout Recital Hall**, a 340-seat facility with exceptional acoustics, is dedicated to faculty and student solo and chamber music presentations and occasional opera productions. Swarthout Recital Hall has been fully remodeled and re-opens to public performances in April, 2015.
- **The Baustian Theater**, a black-box facility for opera and musical theater productions, seats 125 and has a dressing room and wardrobe area, set construction and storage area, and office and performance control areas.

Murphy Hall also houses classrooms, practice rooms, rehearsal halls, and storage facilities for instruments and sheet music. The **Electronic Music Studio** contains a digital workstation for the recording and production of electronic music and video.

The **Kansas Center for Music Technology** in Murphy Hall promotes the development and application of current technologies in music instruction, research, and creative projects. Its Computer Center contains 32 fully networked multimedia workstations. KCMT has a library of commercially available software for evaluation, experimentation, and integration into existing courses. The lab also contains 3 high-end workstations for professional-quality digital audio, digital video, and DVD authoring. The library includes basic productivity and Internet software; music notation and sequencing, ear-training, CD-ROMs, and drill design software; and digital editing software for audio, video, multimedia, and Web authoring. Through workshops and music technology courses, KCMT helps faculty members and students develop innovative new software.

The **Thomas Gorton Music and Dance Library** in Murphy Hall houses more than 111,000 scores, books, sound recordings, videos, microforms, and serials, and has the leading music collection in the Great Plains. It features digital workstations; study carrels; comfortable seating; and public display of new acquisitions, current periodicals, and special exhibitions. Students can make full use of music and dance information resources. The Joe and Joyce Hale Media System allows remote listening and viewing from 30 locations in the library, including 328 media carrels, the seminar room, and the group study room. Media carrels have remote controls, MIDI music keyboards, mini-disk recorders, computers, and video monitors.

The **Music Education and Music Therapy Complex** in Murphy Hall contains a model music education classroom, a general music instruction classroom, large and small therapy clinical spaces, three research spaces, faculty offices, the **Psychology and Acoustics of Music Laboratory**, and the **Music Therapy Clinic**, a clinical training and research facility. In addition, the complex houses a **Vocology Laboratory**, which affords excellent resources for research-based understanding of singing voice phenomena. The stationary lab facilitates acquisition and analysis of voice data in a controlled environment. It also provides mobile configurations of resources for field-based research and pedagogy in voice studios, choir rehearsal areas, classrooms, and music therapy clinics. A Polycom system enables interactive distance delivery of music education and music therapy graduate courses throughout Kansas and anywhere in the world.
Lied Center

The Lied Center of Kansas (http://www.lied.ku.edu) is a 2,020-seat performing arts hall. On KU’s west campus at Irving Hill Road and Constant Avenue, it is the venue for the Lied Center Series. It also presents School of Music (http://music.ku.edu) productions, Student Union Activities (https://rockchalkcentral.ku.edu/?cl=Student_9347) shows, and university and community events. The performing arts hall offers excellent acoustic quality and technical production capabilities. The stage features a 56-foot-wide proscenium opening, resilient wood floor, counterweighted rigging system, and ample wing space. There is a full complement of backstage support areas including seven dressing rooms, dance rehearsal studio, two warm-up rooms, a Greenroom, and a production office.

The Dane and Polly Bales Organ Recital Hall is acoustically designed for the teaching and performance of organ music. It has seating for 200 and is attached to the Lied Center main lobbies at two levels. It houses a 45-stop mechanical key-action (electric stop-action) organ built by Hellmuth Wolff et Associés, one of the finest builders of organs in the world. The hall is available to organ students for practice, lessons, and recitals. Its aesthetics are enhanced by three magnificent stained glass windows designed by Peter Thompson, former dean of Fine Arts.

Undergraduate Programs

The school acquaints undergraduates with music as an important field of a liberal culture, either as members of a discriminating public or as trained practitioners. It prepares students for careers in music and promotes scholarship and research. It offers curricula for teachers of music in public schools and institutions of higher education and special degree curricula for training music therapists.

View the list of School of Music academic programs (p. 2091).

Applied Music Lessons

All majors and nonmajors (as space permits) who wish to take lessons must first pass an audition. All music majors enroll in 121-level applied music courses until they have accumulated 4 credits (6 credits for performance majors) at which time they may enroll in the 221 level. Music majors who are not performance majors must accumulate 8 applied music credits before enrolling in the 321 level and 12 applied music credits before enrolling in the 421 level (or 422 level for the B.M.E.). Performance majors must accumulate 12 credits at the 121 and 221 levels before they enroll in 622 level.

Music majors pursuing the performance degrees, B.M. and B.F.A., are required to enroll in 3 credits of lessons to receive 50-minutes per week of studio instruction. Music majors pursuing the Music Education B.M.E., some Music B.A. degrees and the following B.M. degrees: Music Composition, Music Theory, Musicology and Music Therapy are required to enroll in 2 credits of lessons to receive 50-minutes per week of studio instruction. Music minors, some Music B.A. majors, non-music majors and students in music with a secondary area may enroll in 1 credit of lessons to receive 30-minutes per week of studio instruction. See degrees listed on the Programs page for specific credit-hour and recital requirements. The summer session limit on all music major lessons is 1 to 3 credit hours.

Students may state their preferences as to teachers for private lessons, but final authority rests with the director of the division. The minimum acceptable grade to remain in applied music lessons is a B-. A grade of B- or higher must be earned in each semester of lessons.

Courses for Nonmajors and Music minors

Students in other KU schools may enroll in music courses for credit, subject to the availability of instructional time and as space permits. The Business of Music (MUS 586), most musicology courses and all ensembles are open to all KU students.

Students in the College of Liberal Arts and Sciences not majoring in music may elect an appropriate introductory course (MUS 586, MUSC 298, MUSC 305, MUSC 308, MUSC 309, MUSC 310, MUSC 312, MUSC 313, MUSC 336, MUSC 560 or MUSC 650). Minors in music are offered for students in other disciplines. Most degree programs accept up to 6 hours of electives in music ensembles and performance.

Junior/senior credit in applied music involves a prerequisite of 4 hours of university credit in sequence in the field concerned.

University Honors Program

The school encourages qualified students to participate in the University Honors Program (http://www.honors.ku.edu).

Ensembles

The University Symphony Orchestra performs works from the standard symphonic repertoire on campus and occasionally on tours. It combines with choral ensembles to present oratorios or other large works and assists in musical theatre productions and opera. In addition, the orchestra reads new orchestral works submitted by KU composers for the George Lawner Prize, an annual adjudicated competition co-sponsored by Music Theory and Composition and the KU Symphony Orchestra.

The Wind Ensemble presents 4 or more concerts annually and tours nationally and internationally. The Symphonic and University Bands perform 2 concerts each semester. The KU Jazz program includes 3 jazz ensembles, 2 jazz choirs, and several combos.

The Marching Jayhawks are part of the pageantry at football games. The Basketball Bands (Men’s and Women’s) and pep bands also perform for sports events.

The Bales Chorale, Chamber Choir, Concert Choir, Men’s Glee Club, University Singers, and Women’s Chorale perform concerts on campus, tour, and participate in combined choral and orchestral presentations such as the annual Holiday Vespers. All KU students are eligible through audition for placement in a choir.

The Collegium Musicum specializes in early music, both vocal and instrumental, using KU’s collection of replicas of early instruments. Helianthus is the performing arm of KU’s New Music Ensemble. Each semester it performs the finest available contemporary chamber music.

Recitals of music by KU student composers are presented each semester by the KU Composers Guild, a student organization. The Kansas Brass Quintet, Kansas Woodwinds, and Kansas String Quartet are faculty groups that present numerous concerts.
Visit the School of Music (http://music.ku.edu) for current information about recitals, concerts, and performances.

Graduate Programs

The School of Music offers Master of Music programs in composition, conducting, musicology, music theory, and areas of performance and Master of Music Education degree programs in music education or music therapy.

The Doctor of Musical Arts degree is offered in composition, conducting, and areas of performance. We offer the Doctor of Philosophy degree in music education with an emphasis in music education or music therapy and the Doctor of Philosophy degree in music with an emphasis in musicology or music theory.

View the list of School of Music academic programs (p. 2091).

The Kansas Board of Regents (http://www.kansasregents.org) has designated KU as the sole institution in the Regents system authorized to grant doctoral degrees in music.

Graduate Credit for Nonmajors

Performance

Permission to enroll for graduate credit in applied music is determined by audition. This audition should be scheduled with the major division faculty at the beginning of each semester.

Music Education or Music Therapy

Permission to enroll for graduate credit in music education or music therapy is determined by the information in the MEMP Graduate Application Procedure (http://music.ku.edu/programs/memp/prospective/graduate/admissions.shtml) document.

Ensembles

The University Symphony Orchestra performs works from the standard symphonic repertoire on campus and occasionally on tours. It combines with choral ensembles to present oratorios or other large works and assists in musical theater and opera productions. In addition, the orchestra reads new orchestral works submitted by KU composers for the George Lawner Prize, an annual adjudicated competition co-sponsored by Music Theory and Composition and the KU Symphony Orchestra.

The Wind Ensemble presents 4 or more concerts annually and tours nationally and internationally. The Symphonic and University Bands perform 2 concerts each semester. The KU Jazz program includes 3 jazz ensembles, and several combos.

The Marching Jayhawks are part of the pageantry at football games. The Basketball Bands (Men’s and Women’s) and pep bands also perform for sports events.

The Bales Chorale, Chamber Choir, Concert Choir, Men’s Glee Club, University Singers and Women’s Chorale perform concerts on campus, tour, and participate in combined choral and orchestral presentations. All KU students are eligible through audition for placement in a choir.

The Collegium Musicum specializes in early music, both vocal and instrumental, using KU’s collection of early instrument replicas. Helianthus is the performing arm of KU’s New Music Ensemble. Each semester it performs the finest available contemporary chamber music.

Recitals of music by KU student composers are presented each semester by the KU Composers Guild, a student organization. The Kansas Brass Quintet, Kansas Woodwinds, and Kansas String Quartet are faculty groups that present numerous concerts.

Visit the School of Music (http://music.ku.edu) for current information about recitals, concerts, and performances.

Undergraduate Advising

Music students are advised by music faculty members from their major area of study as well as from the School of Music Student Services office. Students in Music Education and Music Therapy are each assigned a specific faculty advisor.

Each entering first-year student is encouraged to attend KU’s summer First-Year Experience Orientation. At the summer orientation program, students are advised on course selection for the fall semester and given the opportunity to enroll.

Each semester before enrollment, students see their advisors to plan schedules and discuss academic and career interests. Students are encouraged to call on their advisors any time during the school year if they wish to change their schedules or discuss other matters. Consultation with an advisor is recommended before making schedule changes.

Music students should direct questions to the School of Music (http://music.ku.edu) Office of Student Services.

Graduate Advising

Graduate advising is handled by the student’s major professor.

Undergraduate Scholarships

Academic Scholarships, as well as grants, loans, and need-based financial aid, are available through Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml).

Merit Scholarships in Music are also available. Audition application and information is available on the school’s website (http://music.ku.edu/applyaudition).

Tuition and Fees

Information about KU tuition and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu). Tuition and fees are set by the Board of Regents and are subject to change.

Graduate Fellowships and Assistantships

For information about graduate assistantships, contact the School of Music.

Visit the Graduate Studies website for information about funding opportunities for graduate students at KU.
Financial Aid and Scholarships (http://financialaid.ku.edu) administers grants, loans, and need-based financial aid.

Tuition and Fees

Information about KU tuition and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu). Tuition and fees are set by the Board of Regents and are subject to change.

Undergraduate University Regulations

For information about all university regulations, see Regulations (p. 13) or visit the University of Kansas Policy Library (http://www.policy.ku.edu). A few examples specific to the School of Music are shown below.

Absences

The school defines excessive absence as absence in excess of the number of credit hours in the course. A student with excessive absences may be withdrawn from the course by the dean.

Change of School

To change from one school to another, the student must submit a Change of School form in the dean’s office of the school the student plans to enter. Deadlines are provided on the form.

Admission is competitive. Students must have minimum cumulative grade-point averages of 2.75 on a 4.0 scale from all colleges or universities including KU. Music admission is contingent upon a successful audition. Change-of-school applicants must meet the same requirements as transfer applicants.

Credit/No Credit

A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (https://documents.ku.edu/policies/governance/USRR.htm#art2sect2).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Graduation with Distinction and Highest Distinction

Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. The list is compiled each spring and includes July, December, and May graduates.

Honor Roll

Students with grade-point averages of 3.6 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

Incompletes

The letter I should not be used when a definite grade can be assigned for the work done. It is not given for the work of a student in any course except to indicate that some part of the work has, for reasons beyond the student’s control, not been done, while the rest has been satisfactorily completed. At the time an I is reported on the electronic roster, the character and amount of work needed, as well as the date required for completion and lapse grade if further work is not completed by this date, should be indicated.

If the instructor specifies that repetition of a portion of the classroom work is required, the student may attend classes but should not officially enroll in that course again.

A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade assigned by the course instructor, and shall be indicated on the student’s record.

Extensions to the time limit may be granted by the dean’s representative upon submission of a petition from the student containing the endorsement of the course instructor who assigned the I grade, or the department chairperson if the instructor is unavailable. After the I grade is converted to a grade of F or U, the grade may only be changed in accordance with USRR Article II, Section 3 (https://documents.ku.edu/policies/governance/USRR.html#art2sect3).

Maximum and Minimum Semester Enrollment

The normal maximum enrollment is 20 hours during fall or spring semesters or 9 hours during the summer session. Students may exceed the normal maximum enrollment only with the permission of the dean.

Probation

Students may be dismissed at any time by the dean for excessive absences or for failure to make satisfactory progress in their studies.

A student not on probation who fails to earn a grade-point average of at least 2.0 in any semester is placed on probation for the following semester.

At the end of the semester in which the student has been on probation, he or she is removed from probation if the grade-point average for the semester is at least 2.0, with a minimum course load of 12 hours and a cumulative grade-point average of 2.0. A student whose course load is fewer than 12 hours or whose cumulative grade-point average is below 2.0 continues on probation even if the semester grade-point average is 2.0 or above.

At the end of the semester in which the student has been on probation, he or she is dismissed for poor scholarship if the grade-point average for the semester is below 2.0.

A student who has been dismissed for poor scholarship is not eligible to enroll again at any time, except with the special permission of the dean. A reinstated student is placed on final probation. If the student fails to achieve a minimum grade-point average of 2.0 for the semester, he or she is dismissed, and readmission is not granted.
Students who take courses at other institutions during the suspension may receive credit for such work only if it meets the approval of the dean.

**Required Work in Residence**

6 of the final 30 hours may be taken for nonresident credit, with advance permission. Nonresident credit may fill only elective requirements not in the major field of study.

**Transfer of Credit**

CredTrans (http://credittransfer.ku.edu) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Only grades of C or higher are accepted as transfer credit toward degrees.

**Graduate University Regulations**

For information about all university regulations, see Regulations (p. 13) or visit the University of Kansas Policy Library (http://www.policy.ku.edu). A few examples specific to the School of Music are shown below.

**Absences**

A leave of absence may be granted on request. View the Graduate Studies policy on leaves of absence (https://documents.ku.edu/policies/Graduate_Studies/leaveofabsence.htm).

**Credit/No Credit**

The Credit/No Credit option is authorized, as of spring 2012, for graduate students (USRR Article II, 2.2.7). The full explanation can be found in the KU Policy Library under University Senate Rules and Regulations (http://catalog.dept.ku.edu/wrong/schools/gs/regulations).

**Incompletes**

The letters W and I may be given. The letter I indicates incomplete work that may be completed without re-enrollment in the course. The letter W indicates withdrawal for which no credit or grade point is assigned. For more information, see USRR Article II, Section 3 (https://documents.ku.edu/policies/governance/USRR.htm#art2sect3).

**Maximum and Minimum Semester Enrollment**

The normal maximum enrollment is 16 hours during fall or spring semesters or 6 hours during the summer session. Students may exceed the normal maximum enrollment only with the permission of the dean. International students must comply with the credit requirements for their visa status.

**Probation and Dismissal**

Upon falling below a cumulative graduate grade-point average of B (3.0), computed with the inclusion of grades earned at KU for all courses acceptable for graduate credit, the student is placed on probation by the Graduate Division of the school or college. The grades of P, S, U, and I, for which no numerical equivalents are defined, are excluded from the computation. If the student's overall graduate average has been raised to B by the end of the next semester of enrollment after being placed on probation, the student may be returned to regular status. If not, the student is not permitted to re-enroll unless the Graduate Division acts favorably on a departmental recommendation fro the student to continue study.

For more information regarding Probation and Dismissal, see the Graduate Studies Policy library (http://www.graduate.ku.edu/policies-processes).

**Required Work in Residence**

For information about the doctoral residence requirement, see the Graduate Studies (p. 2280) section of the online catalog.

**Transfer of Credit**

View the Graduate Studies policy on graduate credit, including transfer credit, in the Graduate Studies section of the online catalog or the KU Policy Library (http://catalog.dept.ku.edu/201314/schools/gs/regulations/#12).

**Courses**

ACMP 527. Accompanying, 1-4 Hours. Individual instruction in vocal and/or instrumental accompanying. Open to junior, senior, and graduate pianists with permission of instructor. IND.

ACMP 529. Performance Class in Accompanying, 1 Hour. A class in the performance of vocal and instrumental accompaniment. Prerequisite: Completion of ACMP 527 or permission of instructor. IND.

ACMP 727. Accompanying, 1-4 Hours. Individual instruction in vocal and or instrumental accompanying. Prerequisite: Consent of instructor. IND.

ACMP 811. Advanced Accompanying, 2-4 Hours. For graduate students majoring in accompanying. May be repeated for credit. Summer session limit one to three hours. IND.

ACMP 822. The Accompanist's Literature, 3 Hours. A course in which major vocal and instrumental works are studied with vocal or instrumental participants. LEC.

**Courses**

BAND 202. Wind Ensemble, 0-1 Hours. Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor. LAB.

BAND 204. Symphonic Band, 0-1 Hours. For freshmen and sophomores. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 206. University Band, 0-1 Hours. For freshmen and sophomores. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard band repertoire. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 210. University Marching Band, 0-1 Hours. For freshmen and sophomores. Open to all qualified University students, regardless of major. Public performances include presentation of maneuvers and pageantry at all home football games as well as several
trips each season. Three two-hour rehearsals per week. Offered fall semester only. Membership by audition. May be repeated for credit. ACT.

BAND 301. Workshop in: _____, 0-3 Hours.
May be repeated for credit. ACT.

BAND 404. Symphonic Band. 0-1 Hours.
For junior and seniors. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 406. University Band. 0-1 Hours.
For juniors and seniors. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard concert band repertoire. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 410. University Marching Band. 0-1 Hours.
For juniors and seniors. Open to all qualified University students regardless of major. Public performances include presentation of marching maneuvers and pageantry at all home football games as well as several trips each season. Membership by audition. May be repeated for credit. ACT.

BAND 459. Scoring for Field Band. 2 Hours.
Primary voicings and textural possibilities for wind and percussion instruments will be stressed as these resources relate to the arranging of music for marching and pep bands at the secondary level. (Same as MTHC 459.) Prerequisite: MTHC 214. LEC.

BAND 466. Directed Study: _____, 1-3 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. IND.

BAND 559. Scoring for Concert Band. 2 Hours.
Curriculum includes idiomatic writing, tonal balance, scoring for large percussion sections, and analysis of wind colors and instrumental combinations found in music of Holst, Vaughan Williams, Grainger, Stravinsky, Hindemith, and C. Williams. (Same as MTHC 559.) Prerequisite: MTHC 214 and MTHC 459. IND.

BAND 602. Wind Ensemble. 0-1 Hours.
Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor. LAB.

BAND 604. Symphonic Band. 0-1 Hours.
For graduate students. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. LEC.

BAND 630. Band Repertoire. 2 Hours.
A survey of selected band works from the standard repertoire. The works are to be analyzed in terms of style and form, and in terms of the rehearsal and performance problems inherent in the work. Also a study of the standard band repertoire from an educational viewpoint as well as from a programming viewpoint. LEC.

BAND 701. Workshop in: _____, 1-3 Hours.
May be repeated for credit. LEC.

BAND 803. Interpretation of Band Music. 1 Hour.
A study of the essential factors necessary for the understanding and subsequent interpretation of various compositions of advanced band music. In addition to the regular course work, students must participate in one of the university concerts bands, attend all rehearsals each week and play in concerts. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

BAND 866. Directed Study in: _____, 1-3 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. LEC.

Courses

BASN 100. Bassoon. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

BASN 101. Bassoon Reed Making. 0-1 Hours.
The principles of bassoon reed making, including profiling and shaping of bassoon cane and scraping of bassoon reeds. Open only to freshmen and sophomores. May be repeated for credit. LAB.

BASN 121. Bassoon. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

BASN 221. Bassoon. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

BASN 300. Bassoon. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

BASN 301. Bassoon Reed Making. 0-1 Hours.
The principles of bassoon reed making, including profiling and shaping of bassoon cane and scraping of bassoon reeds. Open only to juniors and seniors. May be repeated for credit. LAB.

BASN 321. Bassoon. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

BASN 421. Bassoon. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

BASN 622. Bassoon. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

BASN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: BASN 622. LEC.

BASN 711. Bassoon. 1-2 Hours.
For graduate students not majoring in bassoon. May be repeated for credit. IND.

BASN 811. Bassoon. 3-4 Hours.
For graduate students majoring in bassoon. May be repeated for credit. Summer session limit three hours. IND.
BASN 899. Master's Recital. 1 Hour.
Master's Degree Recital. The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Permission of BASN 811. THE.

BASN 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the bassoon during the seventeenth and eighteenth centuries. LEC.

BASN 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the twentieth century. LEC.

BASN 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in bassoon. May be repeated for credit. Summer session limit three hours. IND.

BASN 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

BASN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

BRSS 252. Brass Choir. 0-1 Hours.
For freshmen and sophomores. Study and performance of large brass ensemble literature. May be repeated for credit. IND.

BRSS 652. Brass Choir. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of large brass ensemble literature. May be repeated for credit. IND.

BRSS 921. Seminar in Performance and Pedagogy: ______. 3 Hours.
Repertoire, performance practice, pedagogical, and stylistic concerns relating to the music for brass instruments throughout their history. Topics will include the physical development of the instruments, their usage as solo, chamber, and large ensemble instruments in both sacred and secular literature, and a survey of historical and modern bibliographic materials. May be repeated for credit when topics vary. IND.

Courses

CARI 100. Carillon. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

CARI 300. Carillon. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

CARI 621. Carillon. 1-4 Hours.
One or two lessons per week. For graduate students not majoring in carillon performance. May be repeated for credit. IND.

CARI 711. Carillon. 1-2 Hours.
May be repeated for credit. IND.

CARI 804. History of Carillon Literature and Design. 3 Hours.
A survey of carillon literature and design. Prerequisite: Permission of instructor. LEC.
Courses

CHOR 214. University Singers. 0-1 Hours.
Open through audition. Study and performance of significant choral music from the major periods of music history. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 216. Concert Choir. 0-1 Hours.
Open through audition. Study and public performance of significant choral music from the major periods of music history. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 218. KU Men's Glee Club. 0-1 Hours.
A choral ensemble for male singers. The group will study, rehearse, and perform traditional and contemporary choral music for men's chorus. A formal audition is not required. May be repeated for credit. ACT.

CHOR 220. Oread Consort. 0-1 Hours.
A select choral ensemble of 16-20 singers specializing in challenging music of all periods. Open by audition to experienced sight readers and ensemble singers. Concurrent membership in another choir encouraged. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 222. Women's Chorale. 0-1 Hours.
A choral ensemble for women singers. The group will study, rehearse, and perform traditional and contemporary choral music for women's chorus. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 228. Summer Chorus. 0-1 Hours.
A choral ensemble that meets during the summer term. May be repeated for credit. ACT.

CHOR 242. Chamber Choir. 0-1 Hours.
Intensive study and public performance of significant choral literature. Membership by audition. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 254. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as MUSC 254.) Prerequisite: Permission of instructor. ACT.

CHOR 410. Choral Practicum. 1 Hour.
A choral ensemble directed by student conductors under the supervision of the choral faculty. May be repeated for credit. ACT.

CHOR 414. University Singers. 0-1 Hours.
Open through audition. Study and performance of significant choral music from the major periods of music history. For juniors and seniors. May be repeated for credit. LAB.

CHOR 416. Concert Choir. 0-1 Hours.
Open through audition. Study and public performance of significant choral music from the major periods of music history. For juniors and seniors. May be repeated for credit. LAB.

CHOR 418. KU Men's Glee Club. 0-1 Hours.
A choral ensemble for male singers. The group will study, rehearse, and perform traditional and contemporary choral music for men's chorus. A formal audition is not required. May be repeated for credit. ACT.

CHOR 424. Opera Chorus. 1 Hour.
A chorus for opera or musical theatre productions. Open by audition in conjunction with the theatre department. May be repeated for credit. LAB.

CHOR 446. Women's Chorale. 0-1 Hours.
A choral ensemble for women singers. The group will study, rehearse, and perform traditional and contemporary choral music for women's chorus. For juniors and seniors. May be repeated for credit. LAB.

CHOR 620. Oread Consort. 0-1 Hours.
A select choral ensemble of 16-20 singers specializing in challenging music of all periods. Open by audition to experienced sight readers and ensemble singers. Concurrent membership in another choir encouraged. For juniors, seniors, and graduate students. May be repeated for credit. LAB.

CHOR 628. Summer Chorus. 0-1 Hours.
A choral ensemble that meets during the summer term. May be repeated for credit. ACT.

CHOR 630. Choral Repertoire. 2 Hours.
A survey of selected choral repertoire available for the high school choral conductor. Both sacred and secular choral literature from the major periods of music history will be studied and analyzed in terms of the problems therein which may be encountered by high school choral conductors. Fall semester and summer only. May be repeated for credit. Prerequisite: MEMT 246, MEMT 330, MEMT 700, and/or consent of instructor. LEC.

CHOR 642. Chamber Choir. 0-1 Hours.
Intensive study and public performance of significant choral literature. Membership by audition. For juniors, seniors, and graduate students. May be repeated for credit. LAB.

CHOR 654. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as MUSC 654.) Prerequisite: Permission of instructor. ACT.

CHOR 701. Workshop in: _____. 0.5-3 Hours.
May be repeated for credit. LEC.

CHOR 805. Interpretation of Choral Music. 1 Hour.
A study of the essential factors necessary for the understanding and subsequent interpretation of various compositions of advanced choral music. Offered in the summer session only. LEC.

CHOR 820. Orchestral Bowing Techniques for Choral Conductors. 1 Hour.
Stylistic, expressive, and technical considerations essential for making effective bowing decisions. Prerequisite: A course in conducting. LAB.

CHOR 825. Choral Diction. 3 Hours.
Study of methods to teach and learn diction in choral music contexts. Attention to International Phonetic Alphabet, acoustic implications of particular phonemes, and contributions of emerging technologies. Application of various languages, including English, Latin, Italian, French, German, and Spanish. (Same as MEMT 825.) LEC.

CHOR 826. Adolescent Changing Voices. 3 Hours.
Scientific approaches to the pedagogy of adolescent male and female voices during voice change. (Same as MEMT 826.) LEC.

CHOR 827. Children's Voices. 3 Hours.
Scientific approaches to understanding and working with unchanged children's voices. (Same as MEMT 827.) LEC.

CHOR 828. Science-based Voice Education. 3-6 Hours.
Comprehensive examination of vocal anatomy, respiration, phonation, resonance, articulation, and voice development, with particular attention to research-based vocal/choral pedagogies for working with child through senior adult voices. (Same as MEMT 828.) Prerequisite: Permission of instructor. LEC.

CHOR 830. Sacred Choral Repertoire. 2 Hours.
A study of anthems for Lectionary years A, B, and C. For church choir directors and church music majors. May be repeated for credit. Prerequisite: Consent of instructor. LAB.
CHOR 850. Choral Arranging. 2 Hours.
Techniques of arranging for large and small choral groups, with and without accompaniment. Prerequisite: MTHC 253 or consent of instructor. LEC.

CHOR 910. Research Methodologies in Choral Music. 3 Hours.
This course will provide the student with an overview of historical, analytical, qualitative, and quantitative approaches used in the research of choral music and issues related to teaching and conducting in the choral field. LEC.

Courses

CHUR 222. Bales Chorale. 0-1 Hours.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit. ACT.

CHUR 320. Church Music Practicum. 0 Hours.
Methods and materials of church music. May be repeated. LAB.

CHUR 622. Bales Chorale. 0-1 Hours.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit. ACT.

CHUR 801. Church Music Seminar I. 3 Hours.
History of Jewish music; history of church music and the thought about church music through the Middle Ages. LEC.

CHUR 802. Church Music Seminar II. 3 Hours.
History of church music and the thought about church music from the period of the Renaissance/Reformations through the Baroque era with special emphasis on hymnody, and anthem literature. LEC.

CHUR 803. Church Music Seminar III. 3 Hours.
History of church music and the thought about church music from the 19th century to the present with special emphasis on hymnody, and anthem literature. LEC.

CHUR 804. Church Music Seminar IV. 3 Hours.
A survey of sacred choral literature focusing on the development of the motet, the mass, and the cantata. Prerequisite: Permission of instructor. LEC.

CHUR 805. Selected Topics in Church Music: ____. 1-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

CHUR 806. Service Playing and Improvisation I. 3 Hours.
Hymn playing, service playing techniques, anthem accompaniment, conducting from the console and improvisation. Prerequisite: Permission of instructor. LEC.

CHUR 807. Service Playing and Improvisation II. 3 Hours.
Continuation of CHUR 806. Prerequisite: Permission of instructor. LEC.

CHUR 808. History of Liturgy. 3 Hours.
The history of liturgy in Jewish and Christian traditions as well as historical criticism and interpretation of liturgy. LEC.

CHUR 809. The Judeo-Christian Tradition and the Arts. 3 Hours.
Readings, discussion and projects concerning architecture, visual art, literature, drama, poetry, dance, and film as they have developed in the Judeo-Christian tradition. LEC.

CHUR 810. Religion and the Arts. 3 Hours.
Issues in the relationship between religion and the arts. LEC.

CHUR 821. Church Music Colloquium I: Anthem Literature. 1 Hour.
A survey of significant anthem literature. Prerequisite: Permission of instructor. LEC.

CHUR 822. Church Music Colloquium II: Handbells. 1 Hour.
Handbell history, literature, performance, and rehearsal techniques. Prerequisite: Permission of instructor. LEC.

CHUR 823. Church Music Colloquium III: Children's Choirs. 1 Hour.
A study of the history and literature of children's choirs, vocal characteristics of children, and rehearsal procedures with the children's choir. Prerequisite: Permission of instructor. LEC.

CHUR 824. Church Music Colloquium IV: Hymnology. 1 Hour.
A study of the historical development of hymnody. Prerequisite: Permission of instructor. LEC.

CHUR 962. Improvisation. 2 Hours.
Applied study in improvisation at the organ. Prerequisite: Permission of instructor. LEC.

Courses

CLAR 100. Clarinet. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

CLAR 121. Clarinet. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

CLAR 221. Clarinet. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

CLAR 300. Clarinet. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

CLAR 321. Clarinet. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

CLAR 421. Clarinet. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

CLAR 422. Clarinet. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

CLAR 622. Clarinet. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

CLAR 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor in Music). Must be taken in the semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: CLAR 622. LEC.

CLAR 711. Clarinet. 1-2 Hours.
For graduate students not majoring in clarinet. May be repeated for credit. IND.

CLAR 811. Clarinet. 3-4 Hours.
For graduate students majoring in clarinet. May be repeated for credit. Summer session limit three hours. IND.
CLAR 899. Master's Recital. 1 Hour.
The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: COND 811. THE.

CLAR 921. Seminar. 3 Hours.
A study of clarinet repertoire and performance techniques in the 18th and 19th centuries. LEC.

CLAR 922. Seminar. 3 Hours.
A study of clarinet repertoire and performance techniques from 1900 to the present. LEC.

CLAR 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in clarinet. May be repeated for credit. Summer session limit three hours. IND.

CLAR 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

CLAR 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

CLAR 972. D.M.A. Document. 1-4 Hours.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

Courses

COND 245. Conducting I. 2 Hours.
An introduction to the principles of conducting through exercises and musical examples designed to develop a specific technical skill. A study of the basic conducting patterns and their application. IND.

COND 345. Conducting II. 2 Hours.
A continuation of COND 245. Prerequisite: COND 245. IND.

COND 711. Choral Conducting I. 1-3 Hours.
Conducting technique, choral musicianship, and choral methods. Prerequisite: MEMT 246, MEMT 330, and/or consent of instructor. RSH.

COND 712. Choral Conducting II. 1-3 Hours.
Continuation of COND 711. RSH.

COND 745. Instrumental Conducting. 2 Hours.
A study of conducting techniques and problems in rehearsal and performance. Score analysis and repertoire development. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

COND 791. Score Reading. 2 Hours.
Development of skills in the reading of all clefs and the most common transpositions. Simultaneous reading of multiple lines and their practical rendition at the piano. May be repeated for credit. RSH.

COND 811. Advanced Choral Conducting. 2-4 Hours.
A study of conducting techniques as they pertain to developing an expressive and precise choral ensemble. Participating in rehearsals under the supervision of instructor. May involve conducting in public performance. May be repeated for credit. Summer session limit one to three hours. Prerequisite: Four hours of conducting and/or consent of instructor. IND.

COND 820. Advanced Choral Conducting and Rehearsal Techniques. 3 Hours.
Refrinement of conducting and teaching skills in a choral setting. Focus on relationships between gesture and choral sound, rehearsal structure and
Courses

**DBBS 100. Double Bass. 1-2 Hours.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

**DBBS 120. Double Bass Performance Class. 0-1 Hours.**
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin, and violoncello study. May be repeated. LEC.

**DBBS 121. Double Bass. 1-4 Hours.**
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

**DBBS 221. Double Bass. 1-4 Hours.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

**DBBS 300. Double Bass. 1-2 Hours.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

**DBBS 320. Double Bass Performance Class. 0-1 Hours.**
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

**DBBS 321. Double Bass. 1-2 Hours.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

**DBBS 421. Double Bass. 1-2 Hours.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

**DBBS 422. Double Bass. 1-2 Hours AE61.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

**DBBS 622. Double Bass. 2-4 Hours AE61.**
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

**DBBS 623. Senior Recital. 1 Hour.**
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: DBBS 622. LEC.

**DBBS 711. Double Bass. 1-2 Hours.**
For graduate students not majoring in double bass. May be repeated for credit. IND.

**DBBS 720. Double Bass Performance Class. 0-1 Hours.**
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

**DBBS 811. Double Bass. 3-4 Hours.**
For graduate students majoring in double bass. May be repeated for credit. Summer session limit three hours. IND.

**DBBS 899. Master's Recital. 1 Hour.**
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: DBBS 811. THE.

Courses

**EUPH 100. Euphonium. 1-2 Hours.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

**EUPH 121. Euphonium. 1-4 Hours.**
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

**EUPH 221. Euphonium. 1-4 Hours.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

**EUPH 300. Euphonium. 1-2 Hours.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

**EUPH 321. Euphonium. 1-2 Hours.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

**EUPH 421. Euphonium. 1-2 Hours.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 421-level until the music major has accumulated 12 credits. IND.

**EUPH 422. Euphonium. 1-2 Hours AE61.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

**EUPH 622. Euphonium. 2-4 Hours AE61.**
Applied music lessons for seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

**EUPH 623. Senior Recital. 1 Hour.**
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: EUPH 622. LEC.

**EUPH 711. Euphonium. 1-2 Hours.**
For graduate students not majoring in euphonium. May be repeated for credit. IND.

**EUPH 811. Euphonium. 3-4 Hours.**
For graduate students majoring in euphonium. May be repeated for credit. Summer session limit three hours. IND.

**EUPH 899. Master's Recital. 1 Hour.**
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: EUPH 811. THE.

Courses

**FLUT 100. Flute. 1-2 Hours.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.
Courses

FLUT 121. Flute. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

FLUT 131. Baroque Flute. 1-4 Hours.
One or two lessons per week. For freshmen and sophomores. May be repeated for credit. IND.

FLUT 221. Flute. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

FLUT 300. Flute. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

FLUT 321. Flute. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 12 credits. IND.

FLUT 331. Baroque Flute. 1-4 Hours.
One or two lessons per week. For juniors and seniors. May be repeated for credit. IND.

FLUT 421. Flute. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

FLUT 422. Flute. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

FLUT 622. Flute. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

FLUT 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: FLUT 622. LEC.

FLUT 711. Flute. 1-2 Hours.
For graduate students not majoring in flute. May be repeated for credit. IND.

FLUT 731. Baroque Flute. 1-4 Hours.
May be repeated for credit. IND.

FLUT 811. Flute. 3-4 Hours.
For graduate students majoring in flute. May be repeated for credit. Summer session limit three credits. IND.

FLUT 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: FLUT 811. THE.

FLUT 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the baroque flute and recorder during the seventeenth and eighteenth centuries. LEC.

FLUT 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the twentieth century. LEC.

FLUT 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in flute. May be repeated for credit. Summer session limit one to three hours. IND.

FLUT 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

FLUT 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

FRHN 100. French Horn. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

FRHN 121. French Horn. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

FRHN 221. French Horn. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 8 credits. IND.

FRHN 252. Horn Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the horn. May be repeated for credit. IND.

FRHN 300. French Horn. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

FRHN 321. French Horn. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

FRHN 421. French Horn. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

FRHN 422. French Horn. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

FRHN 622. French Horn. 2-4 Hours AE61.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

FRHN 623. Senior Recital. 1 Hour.
Applied music lessons majoring in music. May be repeated for credit. Prerequisite: Consent of instructor. THE.
FRHN 652. Horn Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the horn. May be repeated for credit. IND.

FRHN 711. French Horn. 1-2 Hours.
For graduate students not majoring in French horn. May be repeated for credit. IND.

FRHN 811. French Horn. 3-4 Hours.
For graduate students majoring in French horn. May be repeated for credit. Summer session limit three credits. IND.

FRHN 899. Master’s Recital. 1 Hour.
Master’s Degree Recital: The Master’s recital is the culminating event for the Master of Music degree and must be given before the Master’s Final Oral Exam. Prerequisite: Corequisite: FRHN 811. THE.

FRHN 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in French Horn. May be repeated for credit. Summer session limit three hours. IND.

FRHN 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit. THE.

FRHN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

GUIT 100. Beginning Group Guitar I. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

GUIT 102. Beginning Group Guitar II. 1 Hour.
A continuation of GUIT 100 or for beginning students with considerable music experience. Emphasis on guitar basics, using easy exercises, etudes, chord structure and scales, sight reading, including lead sheets. IND.

GUIT 120. Intermediate Group Guitar. 2 Hours.
A pedagogical approach to guitar literature of medium difficulty. A survey of standard methods, etudes, and literature through group performance and individual assignments. IND.

GUIT 121. Guitar. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

GUIT 122. Advanced Group Guitar. 2 Hours.
A survey of intermediate and advanced etudes as they apply to the representative and corresponding literature. Advanced technical studies. IND.

GUIT 221. Guitar. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

GUIT 300. Guitar. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

GUIT 321. Guitar. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

GUIT 421. Guitar. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

GUIT 422. Guitar. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performing majors. IND.

GUIT 622. Guitar. 1-4 Hours.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

Courses

HARP 100. Harp. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

HARP 120. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 121. Harp. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

HARP 221. Harp. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

HARP 300. Harp. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

HARP 320. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 321. Harp. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

HARP 421. Harp. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performing majors. IND.

HARP 622. Harp. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must...
accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

HARP 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: HARP 622. LEC.

HARP 711. Harp. 1-4 Hours.
For graduate students not majoring in harp. May be repeated for credit. Summer session limit one to three hours. IND.

HARP 720. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 811. Harp. 2-4 Hours.
For graduate students majoring in harp. May be repeated for credit. Summer session limit one to three hours. IND.

Courses

HPCD 100. Harpsichord. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

HPCD 300. Harpsichord. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

HPCD 621. Harpsichord. 1-4 Hours.
One or two lessons per week. For graduate students. May be repeated for credit. IND.

HPCD 711. Harpsichord. 1-2 Hours.
May be repeated for credit. IND.

Courses

JAZZ 105. Jazz Theory. 2 Hours.
An introduction to jazz harmony: Scales, modes, chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines. Prerequisite: MTHC 105 or consent of instructor. ACT.

JAZZ 208. Jazz Ensemble. 0-1 Hours.
For freshmen and sophomores. A performance laboratory specializing in the preparation and presentation of jazz compositions and arrangements. Designed to provide today's student musician with the background and skills necessary to function successfully as a professional studio musician, or as a teacher of popular jazz music. May be repeated for credit. Prerequisite: Consent of director. ACT.

JAZZ 209. Jazz Combo. 0-1 Hours.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.

JAZZ 212. Vocal Jazz Ensemble. 0-1 Hours.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. May be repeated for credit. ACT.

JAZZ 224. Jazz Improvisation I. 2 Hours.
Study of techniques involved in jazz improvisation, including application of chord/scale relationships to basic blues and II-V-I chord progressions; transcriptions of recorded jazz solos; and memorization of jazz standards and patterns. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 225. Jazz Improvisation II. 2 Hours.
Study of advanced techniques in jazz improvisation, including third relationships, Coltrane changes, advanced reharmonization and altered pentatonic patterns and scales. Continuation of solo transcriptions, patterns and jazz standard memorization from Jazz Improvisation I. Prerequisite: JAZZ 224 or JAZZ 624 or permission of instructor. ACT.

JAZZ 230. Introduction to Jazz Piano. 2 Hours.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 305. Jazz Theory. 2 Hours.
An introduction to jazz harmony: Scales, modes, chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines. Prerequisite: MTHC 105 or consent of instructor. ACT.

JAZZ 409. Jazz Combo. 0-1 Hours.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.

JAZZ 459. Jazz Arranging. 2 Hours.
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections. Prerequisite: JAZZ 105 or JAZZ 305 and JAZZ 230 or permission of instructor. ACT.

JAZZ 608. Jazz Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. May be repeated for credit. ACT.

JAZZ 612. Vocal Jazz Ensemble. 0-1 Hours.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. For juniors, seniors, and graduate students. May be repeated for credit. ACT.

JAZZ 624. Jazz Improvisation I. 2 Hours.
Study of techniques involved in jazz improvisation, including application of chord/scale relationships to basic blues and II-V-I chord progressions; transcriptions of recorded jazz solos; and memorization of jazz standards and patterns. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. LAB.

JAZZ 625. Jazz Improvisation II. 2 Hours.
Study of advanced techniques in jazz improvisation, including third relationships, Coltrane changes, advanced reharmonization and altered pentatonic patterns and scales. Continuation of solo transcriptions, patterns and jazz standard memorization from Jazz Improvisation I. Prerequisite: JAZZ 224 or JAZZ 624 or permission of instructor. ACT.

JAZZ 630. Introduction to Jazz Piano. 2 Hours.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 659. Jazz Arranging. 2 Hours.
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections.
Prerequisite: JAZZ 105 or JAZZ 305 and JAZZ 230 or permission of instructor. ACT.

Courses

MEMT 111. Class Guitar for Nonmajors. 2 Hours.
Common chords, major and minor triads and major-minor sevenths, and fundamentals of music notation for guitar. Strumming and rudimentary finger picking. Performance of simple melodies on all six strings from standard notation. May be repeated for credit. IND.

MEMT 112. Performance Media: ______. 0.5-1 Hours.
Laboratory class lessons in pedagogy and performance. May be repeated for credit in different specific media. LAB.

MEMT 113. Performance Media: Brass. 1 Hour.
Knowledge and skills needed to teach brass instruments in music education settings. LAB.

MEMT 114. Performance Media: Woodwinds. 1 Hour.
Knowledge and skills needed to teach woodwind instruments in music education settings. LAB.

MEMT 115. Performance Media: Percussion. 1 Hour.
Knowledge and skills needed to teach and use percussion instruments in music education settings. LAB.

MEMT 116. Performance Media: Computers, Synthesizers, and Electronics. 1 Hour.
Knowledge and skills needed to teach and use computers, synthesizers, and electronics. LAB.

MEMT 118. Performance Media: Strings. 1 Hour.
Knowledge and skills needed to teach string instruments in music education settings. LAB.

MEMT 119. Performance Media: Guitar. 1 Hour.
Knowledge and skills needed to teach and use guitar functionally in music education and music therapy settings. LAB.

MEMT 120. Vocal Performance in English. 0-1 Hours.
Fundamentals of solo vocal performance with an emphasis on English diction and communicating the English language. IND.

MEMT 150. Introduction to Music Therapy. 3 Hours.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

MEMT 160. Principles of Music Education. 1 Hour.
An overview of the music education field. History, philosophy, curricula, necessary skills and competencies for music educators, and alternative careers in music. LEC.

MEMT 196. Group Leadership Skills in Music Therapy. 2 Hours.
Music therapy group leadership skills; leading group singing, playing accompanying instruments, and developing effective delivery skills. Prerequisite: MEMT 150 Introduction to Music Therapy/MEMT 760 Principles of Music Therapy. LEC.

MEMT 229. Performance Clinic: ______. 1 Hour.
Designed to provide students with opportunities to sing and play instruments other than their principal instrument in ensembles. Materials chosen for suitability for secondary school ensembles. Techniques for care and maintenance of the voice and instruments. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

MEMT 230. Performance Clinic: Band. 1 Hour.
Continued development of the knowledge and skills needed to teach band in music education settings. Prerequisite: MEMT 113 and MEMT 114, or MEMT 113 and MEMT 115, or MEMT 114 and MEMT 115, or permission of the instructor. LAB.

MEMT 231. Performance Clinic: Choral. 1 Hour.
Continued development of the knowledge and skills needed to teach and use the singing voice in music education and music therapy settings. LAB.

MEMT 232. Performance Clinic: Orchestra. 1 Hour.
Continued development of the knowledge and skills needed to teach string instruments in music education settings. Prerequisite: MEMT 118 or permission of the instructor. LAB.

MEMT 246. Fundamentals of Conducting. 1 Hour.
This course deals with the techniques of the baton, with gestures, signs, and cues as generally used in conducting choral and instrumental organizations. It includes the essentials of conducting techniques in both the choral and instrumental types of ensemble performance. LAB.

MEMT 250. Human Musical Learning and Development. 2 Hours.
Music learning and development from infancy through adulthood. Development of musical perception, cognition, performance skills, attitudes, and affective/aesthetic responses. Use of theoretical, knowledge-based rationale for building music instruction systems. LEC.

MEMT 251. Clinical Techniques for Children. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring/evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. Prerequisite: MEMT 250. Corequisite: SPED 326. LEC.

MEMT 296. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring/evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 311. Intermediate Class Guitar. 2 Hours.
Instruction in playing barre chords, blues and Latin strums, major and minor scales, position studies, and special effects such as the Travis pick, hammer on, and slurring techniques. Prerequisite: MEMT 116-Guitar; or MEMT 111; or permission of instructor. IND.

MEMT 329. Rehearsal/Conducting Clinic: ______. 1 Hour.
Rehearsing and conducting ensembles appropriate for music education and music therapy. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

MEMT 330. Rehearsal/Conducting Clinic: Band. 1 Hour GE22.
Knowledge and skills needed to rehearse and conduct band ensembles. Prerequisite: MEMT 230 and MEMT 246 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 331. Rehearsal/Conducting Clinic: Choral. 1 Hour GE22.
Knowledge and skills needed to rehearse and conduct choral ensembles. Prerequisite: MEMT 231 and MEMT 246 for Music Education majors or MEMT 231. Corequisite: MEMT 246 for Music Therapy majors or permission of the instructor. LAB.

MEMT 332. Rehearsal/Conducting Clinic: Orchestra. 1 Hour GE22.
Knowledge and skills needed to rehearse and conduct orchestral ensembles. Prerequisite: MEMT 232 and MEMT 246, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 341. Instructional Strategies in Music for Elementary Classroom Teachers. 2 Hours.
Child growth and development in music. Materials as they relate to a sequential music education curriculum in the elementary school.
Prerequisite: Admission to the School of Education or the education division of the graduate school. LEC.

**MEMT 349. Advanced Rehearsal/Conducting Clinic: _____ 1 Hour.**
Advanced knowledge and skills needed to rehearse and conduct ensembles, including attention to more difficult literature with ensembles exhibiting increasing sophistication. May be repeated for credit. Prerequisite: Admission into Music Education Professional Sequence and with permission of the MEMT division. LAB.

**MEMT 350. Advanced Rehearsal/Conducting Clinic: Band. 1 Hour.**
Advanced knowledge and skills needed to rehearse and conduct band ensembles, including attention to more difficult concert band literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 330 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

**MEMT 351. Advanced Rehearsal/Conducting Clinic: Choral. 1 Hour.**
Advanced knowledge and skills needed to rehearse and conduct choral ensembles, including attention to more difficult choral literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 331 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

**MEMT 352. Advanced Rehearsal/Conducting Clinic: Orchestra. 1 Hour.**
Advanced knowledge and skills needed to rehearse and conduct string orchestra ensembles, including attention to more difficult string orchestra literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 332 and admission into Music Education Professional Sequence; or with permission of the MEMT division. LAB.

**MEMT 366. Introduction to Research in Music Therapy and Music Education. 2 Hours.**
Investigative techniques in music therapy and music education with emphasis on small group and case study design and analysis. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

**MEMT 367. Managing Behavior in the Musical Environment. 2 Hours.**
Theories and techniques for managing the music classroom and clinic setting for best professional practice. Understanding the self and environment as management factors. Field practice of management techniques. Prerequisite: MEMT 250 and admission into the Music Education Professional Sequence or Music Therapy Professional Sequence; or with permission from the MEMT Division. LEC.

**MEMT 396. Clinical Practicum. 1-3 Hours.**
Supervised clinical practice in on-campus or other approved setting. May be repeated for credit. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. FLD.

**MEMT 407. The Exceptional Child in Music Education. 2 Hours.**
Skills and knowledge needed to facilitate appropriate and productive integration of exceptional children and youth into music classroom settings. Prerequisite: MEMT 367, SPED 326, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

**MEMT 408. Vocal Pedagogy. 1 Hour.**
Knowledge and skills needed to teach voice, with particular attention to lifespan voice anatomy, physiology, and acoustics, diagnosis and correction of vocal inefficiencies, teaching styles, repertoire choice, professional development, and acquaintance with current research in voice science and vocal pedagogy. Includes a voice teaching practicum. (Same as VOIC 408.) Prerequisite: MEMT 160, MEMT 231, MEMT 331 and admission into the Music Education Professional Sequence or the Music Therapy Professional Sequence; or with permission from the MEMT division. LEC.

**MEMT 419. PreK-12 Music Curriculum. 1 Hour.**
The design of PreK-12 general music curriculum that includes a statement of philosophy, a scope and sequence, music literature, a variety of methodologies, and technology integration for use in public school teaching. Prerequisite: MEMT 367 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

**MEMT 420. Teaching Elementary and Secondary General Music. 3 Hours.**
Methods and materials for teaching music through singing, playing instruments, moving, listening, and creative activities to students in early childhood through adulthood, including those with disabilities. The course will also deal with music in diverse cultures and integrating music into the general curriculum. Prerequisite: MEMT 367 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

**MEMT 421. Advanced General Music Teaching. 1 Hour.**
Enhanced methodology and pedagogy course for the general music classroom; advanced instruction in teaching children to improvise, sing, play classroom instruments, listen, move, and create music based on specific pedagogies; advanced instruction in assessment strategies. This course is for undergraduate music majors in their senior year. Prerequisite: MEMT 420 and admission to the Music Education Professional Sequence. LEC.

**MEMT 431. Choral Diction for Music Educators. 1 Hour.**
Knowledge and skills needed to teach choral diction in music education settings. Prerequisite: Admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

**MEMT 432. Approaches to String Pedagogy. 1 Hour.**
An examination of the concepts and skills associated with the most influential past and current pedagogical approaches to string education. Prerequisite: Admission to the Music Education Professional Sequence. LEC.

**MEMT 433. Jazz Techniques. 1 Hour.**
Knowledge and skills needed to teach jazz techniques in music education settings. Prerequisite: Admission into the Music Education Professional Sequence. LEC.

**MEMT 435. Marching Band Techniques. 1 Hour.**
Knowledge and skills needed to teach and administer marching bands in music education settings. Prerequisite: Admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

**MEMT 450. Teaching Choral Music. 2 Hours.**
Application of research-based skills for curriculum development, content selection, and development of teaching strategies for choral music programs to students in early childhood through adulthood including those with disabilities. Prerequisite: MEMT 331, MEMT 420, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

**MEMT 451. Teaching Instrumental Music. 2 Hours.**
Application of research-based skills for curriculum development, content selection, and development of teaching strategies for instrumental music programs to students in early childhood through adulthood including those with disabilities. Prerequisite: MEMT 330, MEMT 420, and admission into
the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 454. Psychological Foundations of Musical Behavior II. 2 Hours.
Laboratory and field research in psychology of music. Prerequisite: MEMT 453 or concurrent enrollment. LEC.

MEMT 455. Psychology of Music. 3 Hours.
Psychological bases of music and human musical behavior. Study of musical sound perception, cognition, response, reproduction, and creation. Room Acoustics are studied. Research projects required. Prerequisite: MEMT 367, MEMT 420 (music education majors); and admission into the Music Education Professional Sequence or the Music Therapy Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 463. The Influence of Music on Behavior I. 3 Hours.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission of the MEMT division. LEC.

MEMT 464. Music in Therapy. 3 Hours.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission of the MEMT division. LEC.

MEMT 472. Music Education and Music Therapy Research Project. 1-3 Hours.
Clinical, laboratory, field, or historical research in music education or music therapy. May be repeated for credit. Prerequisite: MEMT 366 or equivalent, and permission of instructor. IND.

MEMT 497. Independent Study in: ____. 1-4 Hours.
Only one enrollment permitted each semester; a maximum of four hours will apply toward the bachelor’s degree. May be repeated for credit. Prerequisite: Recommendation of advisor and consent of instructor. IND.

MEMT 498. Student Teaching. 2-4 Hours AE61.
A supervised teaching experience in an approved school setting, with level and subject area to be selected from either elementary general music or a secondary teaching area not covered in MEMT 496. This experience is a minimum of five weeks full time experience. It will begin the spring of the Senior Year right after the new year. Prerequisite: Admission into the Music Education Professional Sequence and MEMT 496. INT.

MEMT 499. Internship in Teaching Music. 4-8 Hours AE61.
A supervised internship experience leading to initial music teacher certification. The student assumes the total professional role as a teacher of music in an approved school setting with level and subject area to be the remaining area not experienced in MEMT 498. This experience is a minimum of eleven weeks full time experience. Prerequisite: Admission into the Music Education Professional Sequence and either completion of or concurrent enrollment with MEMT 498. INT.

MEMT 500. Student Teaching in: _____. 1-6 Hours.
A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. May be repeated for credit. Prerequisite: Admission to the Student Teaching program. INT.

MEMT 564. Seminar in Music Therapy Professional Development I. 1 Hour.
This seminar style course will focus on Internship Placement, Board Certification, and Professional Advocacy. Undergraduate Prerequisite: MEMT 463 and MEMT 464. Graduate Corequisite: MEMT 763 and MEMT 764. LEC.

Successful completion of six months of full-time clinical experience (minimum of 1,040 hours) as a music therapy intern in an approved setting. May be repeated for credit. Prerequisite: Completion of senior year in music therapy or its equivalent at the graduate level. INT.

MEMT 597. Individual Study in: ____. 1-15 Hours.
Successful completion of six months of full time clinical experience (minimum of 1040 hours) as a music therapy intern in an approved setting. May be repeated for credit. Prerequisite: Completion of senior year in music therapy or its equivalent at the graduate level. INT.

MEMT 598. Special Course: ____. 1-5 Hours.
A special course of study to meet current needs of education students -- primarily for undergraduates. May be repeated for credit. LEC.

MEMT 616. Advanced Pedagogy and Materials: ____. 1 Hour.
(FS) Techniques and materials appropriate for instruction in musical media. May be repeated for credit in different specific media. LAB.

MEMT 651. Sociocultural Influences on Musical Behavior. 3 Hours.
Cultural and social determinants of musical behavior. Musical value systems in contemporary cultures. Prerequisite: MTHC 214 or MEMT 341 or permission of instructor. LEC.

MEMT 670. Acoustics of Music. 3 Hours.
Study of physical aspects of sound, stressing the production, reproduction, transmission, and reception of musical sounds. Acoustics of musical instruments and auditoria, systems of tuning, wave phenomena in musical environments, behavior of the ear, and electrical analysis, synthesis, and recording are included. Laboratory. LEC.

MEMT 695. Developing Theoretical Framework for Evidence-Based Practice. 3 Hours.
The purpose of this course is to provide music therapy majors with the tools to read, evaluate, understand, and facilitate research in order to develop a theoretical framework for decision making in evidence based clinical practice. Prerequisite: MEMT 464 Music in Therapy or MEMT 764 Music in Therapy and admission to the Music Therapy Professional Sequence. LEC.

MEMT 707. Mainstreaming/Inclusion in Music Education. 2 Hours.
Skills and knowledge needed to facilitate appropriate and productive integration of children and youth with disabilities into music classroom settings. Prerequisite: MEMT 500 and SPED 431. LEC.

MEMT 710. Professional Development. 1 Hour.
Participation in approved professional development conferences. Requires documentation of attendance, an annotated time log of activities, and a short paper. May be repeated for up to 3 credit hours. FLD.
MEMT 711. Emerging Technologies for Choral Teaching and Learning. 2-3 Hours.
Applications of current digital and electronic technologies to choral ensemble teaching and learning. LEC.

MEMT 750. Measurement in Music Education Professional Practice. 3 Hours.
Skills and knowledge needed by professional music educators to assess and evaluate students, learning, instruction, curriculum, and programs. Measurement and evaluation techniques for cognitive, affective, and psychomotor learning in music. Criterion and norm reference measures in formative and summative evaluation. Use of evaluation data for improving instruction, curriculum, and program. Standardized tests. Reporting and interpreting evaluation results. LEC.

MEMT 753. Psychology and Acoustics of Music. 5 Hours.
Psychological and acoustical bases of music and human musical behavior. Study of musical sound production, transmission, perception, cognition, response, and reproduction. Laboratory component and research project required. LEC.

MEMT 760. Principles of Music Therapy. 3 Hours.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

MEMT 761. Clinical Techniques for Children. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 762. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 763. The Influence of Music on Behavior I. 3 Hours.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 764. Music in Therapy. 3 Hours.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, and evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 772. Music Education and Music Therapy Research Project. 1-3 Hours.
Clinical, laboratory, field, or historical research in music education or music therapy. May be repeated for credit. Prerequisite: MEMT 366 or equivalent, permission of instructor. IND.

MEMT 780. Internship in Teaching Music: ____. 1-15 Hours.
A supervised internship experience leading to initial music teacher certification. The student assumes the total professional role as a teacher of music in an approved school setting. INT.

MEMT 791. Music Education/Music Therapy Techniques: ____. 1-3 Hours.
Specific methodologies, strategies, approaches, and materials for music education/music therapy for specific populations, musical media, instructional settings, or clinical environments. May be repeated for credit. LEC.

MEMT 798. Special Course: ____. 1-5 Hours.
A special course of study to meet current needs of education professionals -- primarily for graduate students. May be repeated for credit. LEC.

MEMT 812. Research in Music Education and Music Therapy. 3 Hours.
Study of research in music education and music therapy. Required of all candidates for graduate degrees. Enrollment must precede or be concurrent with enrollment in thesis. LEC.

MEMT 814. Sociology of Music. 3 Hours.
A study of societal influence on musical thought and practice, both in historical perspective and in comparative study of contemporary societies. The relations between school and community music. The role of musical organizations, institutions, and agencies in American life. LEC.

MEMT 815. Musical Values and Aesthetics. 3 Hours.
Examination of musical values in the context of music's functions and uses. Diverse viewpoints are considered, with attention to philosophical and psychological aesthetics. Implications and applications of values systems for music education, music therapy, and other fields. LEC.

MEMT 816. Current Trends in Music Education. 3 Hours.
A comprehensive study of the elements that contribute to current practice and successful music programs (many of all of these may be anticipated dependent upon the class participants' needs): curriculum, standards, assessment, classroom management, pedagogy, leadership, organizational structure, budget and finance, scheduling, federal mandates, and administrative practices. LEC.

MEMT 817. Methodologies in Music Education. 3 Hours.
A survey of music methodologies (general, vocal, instrumental) used by teachers at the pre-school, elementary, middle/junior high, and high school levels. LEC.

MEMT 818. Behavior Management in Music. 3 Hours.
A study of behavioral theories and techniques as applied to classroom and clinical settings for music professionals. Emphasis on a conceptual framework for human behavior and the ameliorative aspects of music. LEC.

MEMT 819. Music in Early Childhood. 2 Hours.
Child development as related to musical development, including implications for participation in music from birth through age seven. Current trends in goals, objectives, materials, equipment, facilities, training and evaluation will be discussed. LEC.

MEMT 820. Advanced Choral Conducting and Rehearsal Techniques. 3 Hours.
Refinement of conducting and teaching skills in a choral setting. Focus on relationships between gesture and choral sound, rehearsal structure and optimal learning, and age-appropriate choral literature and development of musicality. (Same as COND 820.) LAB.
MEMT 823. Seminar in: ______. 1-3 Hours.
May be repeated for credit. LEC.

MEMT 825. Choral Diction. 3 Hours.
Study of methods to teach and learn diction in choral music contexts.
Attention to International Phonetic Alphabet, acoustic implications of
particular phonemes, and contributions of emerging technologies.
Application of various languages, including English, Latin, Italian, French,
German, and Spanish. (Same as CHOR 825.) LEC.

MEMT 826. Adolescent Changing Voices. 3 Hours.
Scientific approaches to the pedagogy of adolescent male and female
voices during voice change. (Same as CHOR 826.) LEC.

MEMT 827. Children’s Voices. 3 Hours.
Scientific approaches to understanding and working with unchanged
children's voices. (Same as CHOR 827.) LEC.

MEMT 828. Science-based Voice Education. 3-6 Hours.
Comprehensive examination of vocal anatomy, respiration, phonation,
resonance, articulation, and voice development, with particular attention
to research-based vocal/choral pedagogies for working with child through
senior adult voices. (Same as CHOR 828.) Prerequisite: Permission of
instructor. LEC.

MEMT 830. Leadership and Program Development in Music Education. 2-3 Hours.
A comprehensive study of the elements of management, leadership,
organizational structure, budget and finance, federal mandates, and
administrative practices. LEC.

MEMT 835. Practical Applications of Advanced Methodology in the Music Classroom. 2-3 Hours.
A comprehensive study and application of the elements that contribute to
current practice in methodology and pedagogy in the music classroom,
encompassing elementary general, choral, orchestral, and band music.
LEC.

MEMT 838. Orff Applications in Music Education and Music Therapy. 2 Hours.
The use of the Orff-Shulwerk approach in music education and music
therapy. Course includes historical background, philosophical approach
and practical application of the process. Prerequisite: Admission to
professional sequence or permission from MEMT division. LEC.

MEMT 840. Development and Application of Improvisation Skills. 2-3 Hours.
Development of individual and group improvisation skills and their
applications in professional practice. LEC.

MEMT 845. Curriculum Development in Music Education. 3 Hours.
Developing a practical and useful music curriculum that aligns theoretical/
philosophical position, program goals, course objectives, instructional
materials, learning activities, and assessments. LEC.

MEMT 850. Measurement of Musical Behavior. 3 Hours.
Measurement theory applied to the development and administration of
measures of musical ability, achievement, attitude, and performance for
the use in individual and program evaluation. Classical and innovative
methods for establishing reliability and validity. Each student will develop
and evaluate a measure of some type of musical behavior appropriate for
an educational or therapeutic setting. LEC.

MEMT 854. Music Therapy in Pediatrics. 2 Hours.
The use of music therapy in individual and group pediatric settings.
Course includes an overview of childhood illnesses, associated medical
terminology, and therapy techniques used as contextual and procedural
support. Prerequisite: Admission to professional sequence or permission
from MEMT division. LEC.

MEMT 855. Music Therapy in Hospice and Bereavement. 2 Hours.
The use of music therapy for hospice patients and their families, as well
as clients who are grieving due to death of a loved one. Course includes
historical, theoretical and practical perspectives. Prerequisite: Admission
to professional sequence or permission from MEMT division. LEC.

MEMT 856. Neurologic Music Therapy. 2 Hours.
The scientific basis for the neurological influence of music on behaviors
in physical functioning and cognitive functioning will be explored in
rehabilitation and learning models. Clinical experience will be included.
Prerequisite: Admission to the graduate program in music therapy or
permission of the instructor. FLD.

MEMT 857. Music Therapy in Gerontology. 2 Hours.
The theories and clinical applications of music therapy across the life
span of older adults, including the young old, the middle old, and the
old old. Special considerations will be given to persons with debilitating
conditions including dementia, and to older persons’ professional and
family caregivers. Prerequisite: Admission to the graduate program in
music therapy or permission of the instructor. FLD.

MEMT 858. Music Therapy in Medical Care and Wellness of Adult Persons. 2 Hours.
The theories and practice of music therapy as enhancement to health and
wellness and to medical interventions for adults will include applications
within the medical setting and in the home setting. Interventions will
include, among others, approaches for stress management, medical
procedural support, pre-operative and post-operative support, follow-up
care in catastrophic illness, interventions in post-traumatic stress disorder,
and others. Prerequisite: Admission to the graduate program in music
therapy or permission of the instructor. FLD.

MEMT 860. Assessment in Music Therapy Professional Practice. 2 Hours.
Skills and knowledge needed to assess and evaluate clients, goals,
treatments and their effectiveness, program outcomes, program quality,
and quality of care. LEC.

MEMT 861. Current Trends in Music Therapy. 2 Hours.
A comprehensive study of the elements that contribute to current
practice in music therapy, but not limited to, professional competencies,
code of ethics, assessment and implementation of interventions,
leadership, organizational structure, budget and finance, scheduling
and management of contracts, grant writing, and other administrative
practices. FLD.

MEMT 863. The Influence of Music on Behavior II. 2 Hours.
A laboratory and research course to accompany or follow MEMT 763.
LAB.

MEMT 864. Philosophy and Theory of Music Therapy. 3 Hours.
Concentrated, interdisciplinary study of conceptual foundations for music
therapy. LEC.

MEMT 890. Practicum in Music Therapy. 1-16 Hours.
Advanced music therapy practice including clinical work with a population
of the student’s choice which incorporates music therapy program design,
implementation, and evaluation. The student will work in consultation with
qualified Music Therapy staff. May be repeated for credit. FLD.

MEMT 891. Advanced Clinical Techniques. 3 Hours.
The student will articulate, test and refine music therapy clinical practice
protocol(s) with a clientele(s) of choice. Students will work in consultation
with qualified Music Therapy staff. FLD.
MEMT 892. Supervision in Music Therapy I. 3 Hours.
Study and application of theoretical models and supervisory roles applicable to music therapy clinical supervision. Students will review developmental levels for supervisors and practicum students. Supervision of music therapy clinical practicum students will be required. LEC.

MEMT 893. Supervision in Music Therapy II. 3 Hours.
A model of practicum supervision will be applied in music therapy clinical practicum supervision. Video and/or tape recordings of supervision conferences with practicum students will be reviewed in consultation with qualified music therapy staff. LEC.

MEMT 895. Master’s Project. 1-3 Hours.
May be repeated for credit. RSH.

MEMT 897. Independent Study: ______. 1-4 Hours.
May be repeated for credit. Prerequisite: Consent of advisor and instructor. RSH.

MEMT 898. Comprehensive Examination. 1 Hour.
An independent course in preparation for the non-thesis M.M.E. degree final examination. Prerequisite: Permission of the instructor. IND.

MEMT 899. Master’s Thesis. 1-6 Hours.
May be repeated for credit. THE.

MEMT 910. Learning Theories and Music Education. 3 Hours.
(V) A broad survey of formal learning theories and other approaches to the teaching-learning situation, accenting implications for, applications to, and research needs in music education. LEC.

MEMT 912. Administration of Music Education Programs. 3 Hours.
A study of the administration of music education programs at all school levels; topics will include personnel, finance, curriculum, supervision, and articulation of the music program with other segments of the school and community. LEC.

MEMT 915. Teaching Music in Higher Education. 3 Hours.
Knowledge, skills, and dispositions for graduate students in music who are preparing to teach at the college level. This course is directed toward the end of developing competencies and understandings that will contribute to one’s becoming an effective college/university teacher. LEC.

MEMT 920. Doctoral Seminar in Music Education and Music Therapy. 0-1 Hours.
This course will emphasize strategies and skills for successful completion of the doctoral program, as well as strategies and skills to prepare doctoral students to contribute to the profession as college teachers, researchers, master teachers, and arts administrators. Course may be repeated for zero credit. LEC.

MEMT 923. Seminar in ______. 1-3 Hours.
May be repeated for credit. LEC.

MEMT 953. Advanced Acoustical and Psychological Aspects of Musical Behavior. 3 Hours.
Study and experimental investigation of acoustical, psychoacoustical, and psychological phenomena as they influence music. Attention will be given to physical parameters; estimation of pitch, loudness, and timbre; magnitude estimation; theories of consonance; experimental aesthetics; and measurement and prediction of musical ability. Each student will be expected to complete an experiment or quasi-experiment related to human musical behavior. (Same as PSYC 853.) Prerequisite: MEMT 453 or equivalent, or permission of instructor. LEC.

MEMT 965. Advanced Methods in Experimental and Descriptive Research in Music. 3 Hours.
An advanced study of experimental and descriptive research techniques with careful investigation of research design, experimental control, analysis and manuscript composition. Consideration of recent trends in research methods and their place in the scholarly schemata will be reviewed. Prerequisite: MEMT 812 or permission of instructor. LEC.

MEMT 972. Research in Music Education. 2-5 Hours.
For students who are sufficiently qualified to conduct original investigations in this field. Consent of instructor necessary. May be repeated for credit. IND.

MEMT 980. Advanced Topics: ______. 1-3 Hours.
A special course of study to meet current needs of education professionals -- primarily for post-master’s level students. May be repeated for credit. IND.

MEMT 995. Field Experience in: ______. 1-5 Hours.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. May be repeated for credit. FLD.

MEMT 996. Practicum in College Teaching. 1-3 Hours.
College teaching experience, guided by a major professor in the department. Open only to doctoral aspirants or candidates. FLD.

MEMT 997. Individual Study: ______. 1-4 Hours.
May be repeated for credit. Prerequisite: Prior graduate course work in the area of study and consent of Instructor. IND.

MEMT 998. Seminar in: ______. 1-4 Hours.
May be repeated for credit. LEC.

MEMT 999. Doctoral Dissertation. 1-15 Hours.
May be repeated for credit. THE.

Courses

MTHC 99. Fundamentals of Music. 1 Hour.
Tutoring for music majors as required based on fundamentals exam given in MTHC 105, Theory I. LEC.

MTHC 105. Theory I. 4 Hours.
The first semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Prerequisite: Music major or consent of instructor. LEC.

MTHC 115. Theory II. 4 Hours GE11.
The second semester of an integrated two-year theory sequence that examines the harmonic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Prerequisite: MTHC 105. LEC.

MTHC 150. Introduction to Music Theory: Reading, Listening, Composing. 3 Hours.
An introductory course for non-music majors, emphasizing western art and vernacular styles of music. Students will participate in and interact with various parameters of music through the acquisition of basic musical skills. For freshmen and sophomores. LEC.

MTHC 205. Theory III. 4 Hours GE11.
The third semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Prerequisite: MTHC 115. LEC.
MTHC 253. Composition. 2 Hours.
For music theory and composition majors. Creative writing using basic
concepts in harmony, melody, and form. May be repeated for credit.
Prerequisite: MTHC 115. IND.

MTHC 315. Theory IV. 4 Hours.
The fourth semester of an integrated two-year sequence that
examines the harmonic, melodic, rhythmic, and formal organization of
music while developing critical listening and keyboard skills. Prerequisite:
MTHC 205. LEC.

MTHC 316. Tonal Form and Post-Tonal Techniques. 4 Hours.
A study of musical forms from the common practice period through the
present day and analytical techniques for post-tonal music. The class is
designed for music education and music therapy majors. Prerequisite:
MTHC 205, music education, or music therapy major. LEC.

MTHC 350. Introduction to Music Theory: Reading, Listening,
Composing. 3 Hours.
An introductory course for non-music majors, emphasizing western art
and vernacular styles of music. Students will participate in and interact
with various parameters of music through the acquisition of basic musical
skills. For juniors and seniors. LEC.

MTHC 355. Readings in Music Theory: ______. 1-4 Hours.
Investigation of a subject by means of directed readings using primary
scholarly sources. May be repeated for credit. Prerequisite: Consent of
instructor. LEC.

MTHC 400. Graduate Review: Written Theory. 1 Hour.
A review of basic harmonic and voice-leading principles relevant
to the common-practice period. For graduate students deficient in
undergraduate harmonic theory. LEC.

MTHC 402. Graduate Review: Aural Skills. 1 Hour.
A review of aural and sight-reading skills relevant to the common-practice
period. For graduate students deficient in undergraduate aural theory.
LEC.

MTHC 404. Graduate Review: Form. 1 Hour.
A review of basic forms relevant to the common-practice period. For
graduate students deficient in undergraduate form. LEC.

MTHC 406. Graduate Review: Post-Tonal Music. 1 Hour.
A review of basic theories and techniques relevant for understanding post-
tonal music. For graduate students deficient in undergraduate post-tonal
theory. LEC.

MTHC 410. Tonal Forms. 3 Hours.
Phrase structure and formal design in common-practice tonal music.
Structural analysis of binary, ternary, rondo, sonata, variations, and
contrapuntal, and multi-movement forms. Prerequisite: MTHC 205. LEC.

MTHC 432. Introduction to the Analysis Contemporary Music. 3
Hours.
Introductory course in the sequence, presenting the basic tools of post-
tonal and 20th century composition, including, serial techniques, set
theory, extended tertian harmony, minimalist techniques, contemporary
tonality and other trends. Exploration of form and complex rhythmic
structures as well as aural skills appropriate to the subject matter.
Prerequisite: MTHC 315. LEC.

MTHC 433. Advanced Analysis of Contemporary Music. 3 Hours.
Analysis seminar, emphasizing intense study of larger contemporary
works, using techniques learned in the first course (MTHC 732). Further
content will vary according to the instructor. Includes aural skills work
appropriate to the subject matter. Prerequisite: MTHC 432. LEC.

MTHC 459. Scoring for Field Band. 2 Hours.
Primary voicings and textural possibilities for wind and percussion
instruments will be stressed as these resources relate to the arranging
of music for marching and pep bands at the secondary level. (Same as
BAND 459.) Prerequisite: MTHC 205. LEC.

MTHC 485. Composing and Arranging for Educational Ensembles. 2
Hours.
For music majors interested in learning to write for primary and secondary
educational performing groups. Emphasizes conventional tonal practices
and idiomatic, accessible writing for young players. Prerequisite: MTHC
205, MTHC 484, and MTHC 459. IND.

MTHC 498. Undergraduate Recital. 1 Hour AE61.
Composition recital for undergraduate music composition majors.
Prerequisite: Permission of instructor. IND.

MTHC 499. Senior Research Project. 1-4 Hours AE61.
For seniors majoring in music theory who will normally enroll for two
credits in each of the last two semesters. Students will write a scholarly
paper on an approved topic. May be repeated for credit. IND.

MTHC 541. Eighteenth-Century Counterpoint. 3 Hours.
A study of eighteenth century style with analysis and original work.
Prerequisite: MTHC 205. LEC.

MTHC 542. Sixteenth-Century Counterpoint. 3 Hours.
A study of sixteenth-century style with analysis and original work.
Prerequisite: MTHC 253 or consent of instructor. IND.

MTHC 559. Scoring for Concert Band. 2 Hours.
Curriculum includes idiomatic writing, tonal balance, scoring for large
percussion sections, and analysis of wind colors and instrumental
combinations found in music of Holst, Vaughan Williams, Grainger,
Stravinsky, Hindemith, and C. Williams. (Same as BAND 559.)
Prerequisite: MTHC 205 and MTHC 459. IND.

MTHC 563. Survey in Jazz Composition and Arranging. 3 Hours.
Analysis of jazz composition and orchestration, beginning with early
procedures (Louis Armstrong through the "Big Band Era") and culminating
with analysis of scores by Gil Evans and Bob Brookmeyer. Prerequisite:
Permission of instructor required. LEC.

MTHC 583. Composition. 2 Hours.
Advanced composition including larger forms in a variety of media.
Composition majors will present a public recital of original works
during the fourth semester of enrollment. May be repeated for credit.
Prerequisite: MTHC 253 or consent of instructor. IND.

MTHC 610. Tonal Forms. 3 Hours.
Phrase structure and formal design in common-practice tonal music.
Structural analysis of binary, ternary, rondo, sonata, variations, and
contrapuntal, multi-movement forms. LEC.

MTHC 643. Contemporary Repertoire. 3 Hours.
Comprehensive overview of major composers and works of the past
beginning in the mid 20th Century, but focusing on music written in the
last 40 years, major contemporary ensembles and granting organizations.
Prerequisite: Graduate standing in MTHC or permission of instructor.
LEC.

MTHC 655. Readings in Music Theory: ______. 1-4 Hours.
Investigation of a subject by means of directed readings of primary
scholarly sources. May be repeated for credit. Prerequisite: MTHC 410
and consent of instructor. IND.
MTHC 670. Scoring for Voice. 3 Hours.
Composing and arranging for voice, including solo voice, choral and operating settings. Prerequisite: Six hours of MTHC 253 and MTHC 541 and consent of instructor. LEC.

MTHC 674. Orchestration I. 3 Hours.
A study of the four families of orchestral instruments (woodwinds, brass, percussion, and strings) concentrating on ranges, transpositions, timbres, and techniques of the various instruments. Scoring projects concentrate on voicing and balance within the individual choirs of the orchestra. Prerequisite: MTHC 205. LEC.

MTHC 676. Orchestration II. 3 Hours.
A continuation of MTHC 674. Emphasis on scoring for full symphony orchestra and the large wind ensemble. Prerequisite: MTHC 674. LEC.

MTHC 678. Electro-Acoustic Composition I. 3 Hours.
Survey of concepts and practices of electronic sound synthesis. Required of music theory and composition majors, and open to other music majors by consent of department. Prerequisite: MTHC 315 or MTHC 316. LEC.

MTHC 680. Electro-Acoustic Composition II. 3 Hours.
Basic concepts and techniques of electronic composition. For majors in music theory and composition. Prerequisite: MTHC 678 and consent of division. LEC.

MTHC 732. Introduction to the Analysis of Contemporary Music. 3 Hours.
Introductory course in the sequence, presenting the basic tools of post-tonal and 20th century composition, including, serial techniques, set theory, extended tertian harmony, minimalist techniques, contemporary tonality and other trends. Exploration of form and complex rhythmic structures as well as aural skills appropriate to the subject matter. Prerequisite: MTHC 315 or MTHC 316. LEC.

MTHC 733. Advanced Analysis of Contemporary Music. 3 Hours.
Analytical seminar, emphasizing intense study of larger contemporary works, using techniques learned in the first course (MTHC 732). Further content will vary according to the instructor. Includes aural skills work appropriate to the subject matter. Prerequisite: MTHC 732. LEC.

MTHC 741. Canon and Fugue. 3 Hours.
A study of strict imitation and fugal writing. Practical work in two, three, and four parts in various media. Prerequisite: MTHC 541. LEC.

MTHC 778. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. (Same as MUSC 778.) LEC.

MTHC 789. Seminar on Selected Topics: __________. 0.5-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

MTHC 801. Advanced Analysis I. 3 Hours.
A bibliographic survey intended to explore aspects of both structure (rhythm, texture and timbre) and methodology (semiotics, gesture and cognition) that variously complement the pitch-based approaches to musical interpretation associated with Schenkerian tonal analysis and pitch-class theory. Prerequisite: MTHC 732 Introduction to the Analysis of Contemporary Music or permission of instructor. LEC.

MTHC 802. Advanced Analysis II. 3 Hours.
A bibliographic survey intended to explore in depth the pitch grammars developed by composers of Western Art Music since circa 1910, and the various methodologies assembled to codify them. Prerequisite: MTHC 732 Introduction to the Analysis of Contemporary Music or permission of instructor. LEC.

MTHC 810. Advanced Form. 3 Hours.
An investigation of formal types, processes and functions in the music of the seventeenth through the twentieth centuries, focusing on instrumental genres. Prerequisite: Permission of instructor. LEC.

MTHC 820. Seminar in Schenkerian Analysis. 3 Hours.
A study of the theories and analytical methodologies developed by the Austrian theorist Heinrich Schenker. Prerequisite: MTHC 410 or permission of the instructor. LEC.

MTHC 825. Computers in Music and Music Research. 3 Hours.
A seminar designed to develop and explore the use and programming of microcomputers as an aid in research and the production of music. Topics will include composition and production tools for music, structured program design, data representation, and basic computer-assisted instruction models. Prerequisite: EECS 138 or equivalent or permission of the instructor. LEC.

MTHC 830. Pedagogy of Music Theory. 1-3 Hours.
Procedures for teaching theoretical concepts and skills. Survey of available texts and related materials. Three credits when offered during a full academic term; one-two credits when offered as a short-term institute. Prerequisite: MTHC 315 or MTHC 316 or permission of instructor. LEC.

MTHC 840. Pedagogy of Music Composition. 3 Hours.
This course provides an overview of pedagogical philosophies in music composition and is designed to prepare students for a teaching position in higher education. The course emphasizes broad critical understanding of historic, aesthetic, and theoretical perspectives pertinent to the field of composition pedagogy. Teaching methodologies are explored for one-on-one studio instruction, group lesson instruction, masterclass, and classroom instruction. Prerequisite: Consent of instructor. LEC.

MTHC 853. Advanced Composition. 1-6 Hours.
Essentially for theory and composition majors on the master's level. May be repeated for credit. Summer session limit one to three hours. RSH.

MTHC 887. Advanced Orchestration. 3 Hours.
Prerequisite: MTHC 676, or consent of department. May be repeated for credit. RSH.

MTHC 889. Seminar on Selected Topics: __________. 0.5-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

MTHC 898. Recital. 1 Hour.
Recorded grade for MM Composition recital. LEC.

MTHC 899. Thesis. 1-6 Hours.
May be repeated for credit. THE.

MTHC 953. Advanced Composition. 1-6 Hours.
Essentially for theory and composition majors on the doctoral level. May be repeated for credit. Summer session limit one to three hours. RSH.

MTHC 965. Doctoral Composition Recital. 2 Hours.
May be repeated for credit. RSH.

MTHC 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

MTHC 999. Dissertation. 1-12 Hours.
May be repeated for credit. THE.
Courses

MUS 100. Directed Study: ______. 1-4 Hours.
This is an all-purpose fill in the blank course for freshmen and sophomores. It can be used when need arises. May be repeated for credit. IND.

MUS 140. Encounter with Music and Musicians. 3 Hours H.
A study of concert and recital music as it relates to the performer and listener. Students will have interaction with professional musicians through live performances and discussions with the performers. Music performed on the concert and chamber music series and on concerts of music department faculty will be carefully examined. Baroque through modern music, jazz, and music of other cultures are the basic units in the course. Written research projects and reviews of performances are required. LEC.

A team-taught, performance-based survey for wind and string students of musical styles from the Baroque to present. Students will examine music from their perspective literature from several different perspectives including: historical, theoretical, technical, and expressive. The integration of these perspectives into the students' performance is the ultimate goal of the course. May be repeated for credit. Prerequisite: Approval of applied instrumental instructor. IND.

MUS 300. Directed Studies: ______. 1-4 Hours.
This is an all-purpose fill in the blank course for juniors and seniors. It can be used when need arises. May be repeated for credit. IND.

MUS 340. Encounter with Music and Musicians. 3 Hours H.
A study of concert and recital music as it relates to the performer and listener. Students will have interaction with professional musicians through live performances and discussions with the performers. Music performed on the concert and chamber music series and on concerts of music department faculty will be carefully examined. Baroque through modern music, jazz, and music of other cultures are the basic units in the course. Written research projects and reviews of performances are required. LEC.

MUS 388. Curriculum and Pedagogy in: ______. 1 Hour.
Independent study. Prerequisite: Permission of Instructor. IND.

A team-taught, performance-based survey for wind and string students of musical styles from the Baroque to present. Students will examine music from their perspective literature from several different perspectives including: historical, theoretical, technical, and expressive. The integration of these perspectives into the students' performance is the ultimate goal of the course. May be repeated for credit. Prerequisite: Approval of applied instrumental instructor. IND.

MUS 586. The Business of Music. 3 Hours.
A course covering commercial aspects of the music business, including publishing, copyright law, recording, live performance, the motion picture and radio business, composition, teaching, and music merchandising. Prerequisite: Consent of the instructor. LEC.

MUS 686. Arts Administration: Presenting the Performing Arts. 3 Hours.
Considerations involved in booking, scheduling, and presenting music, theatre, and dance events. Locating and selecting artists, reading and negotiating contracts, fund raising, grant writing, working with support groups, marketing techniques, publicity, personnel, and finance management. LEC.

MUS 732. Twentieth Century Techniques before 1945. 3 Hours.
A study and analysis of music from the turn of the century to World War II. For non-music majors. Prerequisite: Permission of instructor. LEC.

MUS 733. Twentieth Century Techniques after 1945. 3 Hours.
A study and analysis of music from World War II to the present. For non-music majors. Prerequisite: Permission of instructor. LEC.

MUS 800. Directed Study: ______. 1-4 Hours.
This is an all-purpose fill in the blank course for graduate students. It can be used when need arises. May be repeated for credit. LEC.

MUS 888. Curriculum and Pedagogy in: ______. 1 Hour.
Independent study. Prerequisite: Permission of instructor. LEC.

Courses

MUSC 135. Masterworks of Music. 3 Hours.
Honors version of MUSC 136/MUSC 336. Open only to students in the University Honors Program or by permission of instructor. Designed to aid non-music majors in developing skills needed for listening to music. Emphasis on masterworks of Western music. A student may receive credit for only one of the four courses numbers: MUSC 135, MUSC 335, MUSC 136, MUSC 336. LEC.

MUSC 136. Masterworks of Music. 3 Hours HT GE3H / H.
Designed to aid non-music majors in developing the skills needed for listening to music. Emphasis on masterworks of Western music. Open only to freshman and sophomore non-music majors. A student may receive credit in either MUSC 136 or MUSC 336, but not both. LEC.

MUSC 139. Introduction to Music in World Cultures. 3 Hours NW AE42.
Addresses music as a social and cultural phenomenon shaping broader patterns of human activity. It examines the ideas, behaviors and beliefs people have about their music based on selected case studies of traditional and popular music from North America, Africa, Asia, and Latin America. The main goal of this course is to understand why people from different parts of the world do music the way they do. LEC.

MUSC 254. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as CHOR 254.) Prerequisite: Permission of instructor. ACT.

MUSC 256. Collegium Musicum, Instrumental. 0-1 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. ACT.

MUSC 298. Introduction to Jazz. 3 Hours HT AE41 / H/W.
A survey of the history of jazz from its beginnings in the early twentieth century to the present. Open to music and non-music majors. LEC.

MUSC 299. American Popular Song. 3 Hours H.
A survey of the American popular song in the twentieth century, with an emphasis on the composer's lyrics, and performers who made them popular. LEC.

MUSC 300. Jazz Styles, 1920-1980. 3 Hours H.
A detailed study of the major styles of jazz that developed between 1920 and 1980, with an emphasis on aural recognition of their characteristics. LEC.

MUSC 301. Great Innovators of Jazz. 3 Hours H.
A detailed study of the most innovative and influential figures in the history of jazz. LEC.

MUSC 302. The Broadway Musical. 3 Hours AE41/GE3H / H.
A survey of the Broadway Musical from the early twentieth century to the present. LEC.

MUSC 303. The Film Musical. 3 Hours.
A survey of the film musical from the 1920s through the 1980s. LEC.

MUSC 305. Music of Latin America. 3 Hours AE42 / H.
Designed for non-music majors, the course surveys the geographical and ethnographical sources of the many forms of music in Latin America.
The various forms of music will be examined from historical, cultural, and stylistic perspectives. LEC.

**MUSC 306. Introduction to Contemporary Music. 3 Hours H.**
A survey of concert music in Europe and the United States in the twentieth century. Not open to music majors. LEC.

**MUSC 307. Music of Africa and the Middle East. 3 Hours.**
Survey of the many musical traditions of Black Africa and the Middle East, emphasizing their cultural and social context. Open to both majors and non-majors. LEC.

**MUSC 308. Music in East Asia. 3 Hours AE42.**
Study of musical cultures in China, Korea, and Mongolia, with a special focus on court music, musical theater, popular music, and the influence of East Asian music on the Western art music and vice-versa. LEC.

**MUSC 309. History of Rock and Roll. 3 Hours GE3H / H.**
Survey of the history of rock and roll, starting with its origins in rhythm and blues and continuing to the present day. Open to both majors and non-majors. LEC.

**MUSC 310. History of Film Music. 3 Hours HT GE3H.**
A survey course for non-majors on the history of film music from silent films to the present. Students will use written texts, website materials such as streaming video and audio, and regular screening in an auditorium setting for assignments and papers. LEC.

**MUSC 311. History of African American Music. 3 Hours.**
This course examines the richness and diversity of African American music and its influence on the entire American musical landscape. Beginning with African retentions in African American music, the course will trace the history and development of both written and oral traditions from 1700 to the present day. LEC.

**MUSC 312. Music in the Andes. 3 Hours AE42.**
This course examines the history, culture, and musical traditions of the Andean region: Peru, Ecuador, Bolivia, Chile, Columbia, and Venezuela. It focuses on a selection of indigenous rituals and popular music of mestizo and African American origin. By the end of the semester students will be acquainted with particular genres, instruments, and the social contexts with which they are associated. LEC.

**MUSC 313. Music in Mexico and the Caribbean. 3 Hours AE42.**
This course examines the history, culture, and musical traditions of Mexico and the Caribbean. It focuses on a selection of rituals and traditional and popular music of the region. By the end of the semester students will be acquainted with various musical genres, instruments, and the social contexts with which they are associated. LEC.

**MUSC 315. History of Country Music. 3 Hours GE3H.**
Study of country music in the U.S. from the early 1920’s to the present, including performers, styles, historical context, and technology. LEC.

**MUSC 320. Music History I. 3 Hours AE42.**
Introduction to world music; and Western music to 1400. Prerequisite: One year of music theory. LEC.

**MUSC 335. Masterworks of Music. 3 Hours.**
Honors version of MUSC 136/MUSC 336. Open only to students in the University Honors Program or by permission of instructor. Designed to aid non-music majors in developing skills needed for listening to music. Emphasis on masterworks of Western music and writing about music. Open only to junior and senior non-music majors. A student may receive credit for either MUSC 136 or MUSC 336, but not both. LEC.

**MUSC 337. Selected Topic in Music: ______. 1-3 Hours HT / H.**
A selected topic in music or an interdisciplinary topic in the fine arts. The course may be repeated for credit when topic varies. Open only to non-music majors. LEC.

**MUSC 338. Selected Topic in Music: ______. 1-3 Hours.**
The course may be repeated for credit when topic varies. Open only to music majors. Prerequisite: MUSC 320 or permission of instructor. LEC.

**MUSC 339. Introduction to Music in World Cultures. 3 Hours NW AE42.**
Addresses music as a social and cultural phenomenon shaping broader patterns of human activity. It examines the ideas, behaviors and beliefs people have about their music based on selected case studies of traditional and popular music from North America, Africa, Asia, and Latin America. The main goal of this course is to understand why people from different parts of the world do music the way they do. LEC.

**MUSC 340. Music History II. 3 Hours GE3H.**
Western Music from 1400 to 1750. Prerequisite: MUSC 320. LEC.

**MUSC 394. Readings in Jazz and American Popular Music. 1-3 Hours.**
Investigation of a subject by means of directed study of primary sources. Prerequisite: A grade of “A” or “B” in MUSC 298, or equivalent, and permission of instructor. IND.

**MUSC 440. Music History III. 3 Hours GE3H.**
Western Music from 1750 to 1900. Prerequisite: MUSC 340. LEC.

**MUSC 474. Graduate Review: Medieval. 1 Hour.**
A review of the practice of Western art music composed between c. 437 and 1420. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

**MUSC 475. Graduate Review: Renaissance. 1 Hour.**
A review of the practice of Western art music composed between c. 1420 and 1600. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

**MUSC 476. Graduate Review: Baroque. 1 Hour.**
A review of the practice of Western art music composed between c. 1600 and 1750. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

**MUSC 477. Graduate Review: Classic. 1 Hour.**
A review of the practice of Western art music composed between c. 1750 and 1815. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

**MUSC 478. Graduate Review: Romantic. 1 Hour.**
A review of the practice of Western art music composed between c. 1815 and 1900. It examines the genres, forms, styles, and performance
practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 479. Graduate Review: 20th-21st Centuries. 1 Hour.
A review of the practice of Western art music composed between c. 1900 and the present day. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 480. Music History IV. 3 Hours AE41.
Western music since 1900, classical and vernacular. Prerequisite: MUSC 440. LEC.

MUSC 481. Music of the Middle Ages. 3 Hours.
A concentrated survey of Western music from about 500 to 1400. Prerequisite: MUSC 320. LEC.

MUSC 482. Music of the Renaissance. 3 Hours.
A concentrated survey of Western music from about 1400 to 1600. Prerequisite: MUSC 340. LEC.

MUSC 483. Music of the Baroque Era. 3 Hours.
A concentrated survey of Western music from about 1600 1750. Prerequisite: MUSC 340 and MUSC 440. LEC.

MUSC 484. Music of the Classical Era. 3 Hours.
A concentrated survey of Western music from about 1750 to 1815. Prerequisite: MUSC 440. LEC.

MUSC 485. Music of the Romantic Era. 3 Hours.
A concentrated survey of Western music from about 1815 to 1900. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 486. Music of the Twentieth Century. 3 Hours.
A concentrated survey of Western music during the twentieth century. Prerequisite: MUSC 480. LEC.

MUSC 487. Music in America. 3 Hours.
A concentrated survey of music in the United States. Prerequisite: One course in the field of musicology or permission of the instructor. LEC.

MUSC 488. History of Opera. 3 Hours.
A concentrated survey of the history of opera. Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 489. History of Chamber Music. 3 Hours.
A concentrated survey of the history of chamber music. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 490. History of the Concerto. 3 Hours.
A concentrated survey of the history of the concerto. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 491. History of the Symphony. 3 Hours.
A concentrated survey of the history of the symphony. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 492. History of Wind Band Music. 3 Hours.
A chronological survey of the development of the wind band/ensemble and its music, using standard musical works from each historical period. Prerequisite: MUSC 440 and MUSC 480 or permission of the instructor. LEC.

MUSC 493. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. Prerequisite: MUSC 240, MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 494. Readings in Musicology: ____. 1-3 Hours.
May be repeated for credit. Prerequisite: Minimum average of B in MUSC 320, MUSC 340, MUSC 440, MUSC 480 or equivalent, and permission of instructor. IND.

MUSC 499. Senior Thesis. 2 Hours AE61.
An original research project that will result in a scholarly paper of moderate size. May be repeated once for credit. IND.

MUSC 560. Music in World Cultures. 3 Hours NW AE42 / W.
An introduction to music as part of the cultural experience in India, Southeast Asia, the Orient, and Africa, with comparisons to Western traditions and influences on contemporary music. LEC.

MUSC 650. Selected Topics in Music: ____. 0.5-3 Hours.
Prerequisite: MUSC 320, MUSC 340, MUSC 440, and MUSC 480 or permission of instructor. LEC.

MUSC 654. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as CHOR 654.) Prerequisite: Permission of instructor. ACT.

MUSC 655. Readings in Music Theory: ____. 1-4 Hours.
Investigation of a subject by means of directed readings using primary scholarly sources. May be repeated for credit. Prerequisite: MTHC 410 and consent of instructor. LEC.

MUSC 656. Collegium Musicum, Instrumental. 0-1 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. ACT.

MUSC 744. Readings in Jazz and American Popular Music. 1-3 Hours.
Investigation of a subject by means of directed study of primary resources. Prerequisite: Permission of instructor. IND.

MUSC 752. Music of the Middle Ages. 3 Hours.
Prerequisite: MUSC 320. LEC.

MUSC 753. Music of the Renaissance. 3 Hours.
Prerequisite: MUSC 340. LEC.

MUSC 754. Music of the Baroque Era. 3 Hours.
Prerequisite: MUSC 340 and MUSC 440. LEC.

MUSC 755. Music of the Classical Era. 3 Hours.
Prerequisite: MUSC 440. LEC.

MUSC 756. Music of the Romantic Era. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 757. Music of the Twentieth Century. 3 Hours.
Prerequisite: MUSC 480. LEC.

MUSC 758. History of Musical Instruments. 3 Hours.
Prerequisite: MUSC 340 or MUSC 440 or permission of instructor. LEC.

MUSC 759. Music in America. 3 Hours.
A survey of historical developments from the Pilgrims to the present. (Same as AMS 737.) Prerequisite: One course in the field of music history or permission of the instructor. LEC.

MUSC 760. History of Opera. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 761. History of the Mass. 3 Hours.
Prerequisite: MUSC 340 and MUSC 440, or permission of instructor. LEC.

MUSC 765. History of Chamber Music. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 766. History of the Concerto. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.
MUSC 767. History of the Symphony. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 768. History of Wind Band Music. 3 Hours.
A chronological survey of the development of the wind band/ensemble and its music, using standard musical works from each historical period. Prerequisite: MUSC 440, MUSC 480, or permission of instructor. LEC.

MUSC 775. History of Keyboard Music. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 777. History of Solo Vocal Music. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 778. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. (Same as MTHC 778.) LEC.

MUSC 794. Readings in Musicology: _____. 1-3 Hours.
Investigation of a subject by means of directed reading of primary literary sources. May be repeated for credit. Prerequisite: A grade average of "B" in two musicology courses numbered 500 or above and consent of instructor. IND.

MUSC 801. Music Bibliography and Research. 3 Hours.
Bibliography, research methods, and scholarly writing in music for entering graduate students. Prerequisite: Permission of instructor. LEC.

MUSC 802. Advanced Music Bibliography and Research. 3 Hours.
Advanced bibliography and writing of research papers. Prerequisite: MUSC 801. LEC.

MUSC 899. Thesis. 1-6 Hours.
May be repeated for credit. THE.

MUSC 902. Seminar in Musicology. 3 Hours.
A research course designed primarily for doctoral students in musicology. Prerequisite: MUSC 801, or its equivalent. LEC.

MUSC 903. Seminar in Performance Practices. 3 Hours.
Primary and secondary sources in performance practices dealing mainly with the seventeenth through nineteenth centuries, with implications applicable to student's performance medium. LEC.

MUSC 940. Seminar on Selected Topics in Musicology: _____. 3 Hours.
Each semester a topic (to be inserted in the blank) will be the basis for discussion, reports, and a research paper. May be repeated for credit provided no course duplication takes place. LEC.

MUSC 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

MUSC 999. Dissertation. 1-12 Hours.
May be repeated for credit. THE.

Courses

OBOE 100. Oboe. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

OBOE 101. Oboe Reed Making. 0-1 Hours.
The principles of oboe reed making, including tube cane selection, pre-gouging, gouging, shaping, tying and scraping reeds. Knife sharpening and tool maintenance will also be covered. Open only to freshmen and sophomores. May be repeated for credit. LAB.

OBOE 121. Oboe. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

OBOE 131. Baroque Oboe. 1-4 Hours.
For one or two lessons per week. For freshmen and sophomores. May be repeated for credit. IND.

OBOE 221. Oboe. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

OBOE 300. Oboe. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

OBOE 301. Oboe Reed Making. 0-1 Hours.
The principles of oboe reed making, including tube cane selection, pre-gouging, gouging, shaping, tying and scraping reeds. Knife sharpening and tool maintenance will also be covered. Open only to juniors and seniors. May be repeated for credit. LAB.

OBOE 321. Oboe. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

OBOE 331. Baroque Oboe. 1-4 Hours.
One or two lessons per week. For juniors and seniors. May be repeated for credit. IND.

OBOE 421. Oboe. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

OBOE 422. Oboe. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

OBOE 622. Oboe. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

OBOE 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: OBOE 622. LEC.

OBOE 711. Oboe. 1-2 Hours.
For graduate students not majoring in oboe. May be repeated for credit. IND.

OBOE 731. Baroque Oboe. 1-4 Hours.
May be repeated for credit. IND.

OBOE 811. Oboe. 3-4 Hours.
For graduate students majoring in oboe. May be repeated for credit. Summer session limit three hours. IND.
OBOE 899. Master's Recital. 1 Hour.
Master’s Degree Recital: The Master’s recital is the culminating event for the Master of Music degree and must be given before the Master’s Final Oral Exam. Prerequisite: Corequisite: OBOE 811. THE.

OBOE 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the baroque oboe during the seventeenth and eighteenth centuries. LEC.

OBOE 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the twentieth century. LEC.

OBOE 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in oboe. May be repeated for credit. Summer session limit three hours. IND.

OBOE 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

OBOE 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Summer session limit one to three credits. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

ORCH 200. University Symphony Orchestra. 0-1 Hours.
For freshmen and sophomores. Four hours full rehearsal and one hour sectional (string only) rehearsal each week throughout the school year. An intensive study of the symphonic repertoire, instrumental and vocal accompaniments, and complete major opera. Two public concerts each semester and numerous out-of-town concerts, radio broadcasts, and local vespers performances. Acceptance for membership and playing positions is determined by tryout. May be repeated for credit. LAB.

ORCH 201. University Chamber Orchestra. 1 Hour.
Two hours of rehearsal per week. May be repeated for credit. Audition required. LAB.

ORCH 210. Repertory Orchestra. 1 Hour.
A reading orchestra, emphasizing standard orchestral works from Baroque through modern periods. Open to string, wind, and percussion instrument players of the community and university. (Does not count toward ensemble requirement for students with stringed instruments emphasis.) May be repeated for credit. LAB.

ORCH 600. University Symphony Orchestra. 0-1 Hours.
For juniors, seniors, and graduate students. May be repeated for credit. LAB.

ORCH 601. University Chamber Orchestra. 1 Hour.
Two hours rehearsal per week. May be repeated for credit. Audition required. LAB.

ORCH 701. Workshop in: _______. 0.5-3 Hours.
May be repeated for credit. LEC.

Courses

ORGN 100. Organ. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

ORGN 121. Organ. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

ORGN 221. Organ. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

ORGN 300. Organ. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

ORGN 320. Studio Class in Organ - Lab. 0 Hours.
Studio performance of works prepared under individual instruction. May be repeated. LAB.

ORGN 321. Organ. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

ORGN 421. Organ. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

ORGN 502. Master Class in Organ - Lab. 0 Hours.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated. LAB.

ORGN 603. Institute for Organ and Church Music. 1-2 Hours.
A one-week intensive study program in performance, practice, and literature, advanced pedagogy, and church music. Normally offered during the summer session. May be repeated for credit. Graded S (satisfactory) or U (unsatisfactory). IND.

ORGN 608. Organ Pedagogy. 2 Hours.
For seniors and graduate students majoring in organ or by permission of instructor. May be repeated for credit. Materials and methods of pedagogy. Lectures, discussion, demonstration teaching, planning, and evaluation. One beginning or lower level organ student assigned to each class member with teaching done under supervision of class instructor. LEC.

ORGN 622. Organ. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

ORGN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: ORGN 622. LEC.

ORGN 702. Master Class in Organ - Lab. 0 Hours.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated. LAB.

ORGN 711. Organ. 1-2 Hours.
For graduate students not majoring in organ. May be repeated for credit. IND.
Courses

PCUS 100. Percussion. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

PCUS 120. Drum Set Technique. 1 Hour.
One lesson per week. Small group instruction. For freshmen and sophomores. A course designed to develop drum set technique, with emphasis placed on understanding the various styles of music to perform on the set: swing, jazz, rock, ethnic, Broadway shows. May be repeated for credit. IND.

PCUS 121. Percussion. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

PCUS 221. Percussion. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

PCUS 300. Percussion. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

PCUS 320. Drum Set Technique. 1 Hour.
One lesson per week. Small group instruction. For juniors and seniors. A course designed to develop drum set technique, with emphasis placed on understanding the various styles of music to perform on the set: swing, jazz, rock, ethnic, Broadway shows. May be repeated for credit. IND.

PCUS 321. Percussion. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

PCUS 421. Percussion. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

PCUS 422. Percussion. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

PCUS 622. Percussion. 2-4 Hours AE61.
Applied music lessons for undergraduates majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (4 each semester for 3 semesters) at the 121/221 levels. IND.

PCUS 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduates majoring in music. Must be taken in the senior year as required by the degree program. Prerequisite: Corequisite: PCUS 622. LEC.

PCUS 711. Percussion. 1-2 Hours.
For graduate students majoring in percussion. May be repeated for credit. IND.

PCUS 811. Percussion. 3-4 Hours.
For graduate students majoring in percussion. May be repeated for credit. Summer session limit three credits. IND.
PCUS 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: PCUS 811. THE.

PCUS 921. Seminar in Performance and Pedagogy. 3 Hours.
A study of the interpretive problems encountered in percussion music from the various historical periods, and a study of the performance practices in orchestral, band, chamber ensemble, and solo literature. LEC.

PCUS 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in percussion. May be repeated for credit. Summer session limit three hours. IND.

PCUS 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit. THE.

PCUS 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

PCUS 972. D.M.A. Document. 1-4 Hours.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

PENS 252. Percussion Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of works for various percussion instrument combinations. May be repeated for credit. LAB.

PENS 652. Percussion Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of works for various percussion instrument combinations. May be repeated for credit. LAB.

Courses

PIAN 100. Piano. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

PIAN 111. Elementary Keyboard Musicianship. 2 Hours.
The development of keyboard skills in sight-reading, transposition, harmonization, improvisation, score reading, and playing by ear. Open to all students not majoring in music who have little or no music training. IND.

PIAN 121. Piano. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

PIAN 125. Piano. 1-4 Hours.
Small group instruction for the development of performance abilities encouraging exploration of creative potentials and self-directed study. For freshmen and sophomores. May be repeated for credit. Prerequisite: Permission of instructor. IND.

PIAN 144. Elementary Keyboard Skills I. 1 Hour.
The development of keyboard skills in sight-reading, transposition, harmonization, improvisation, score reading, and playing by ear. Open to all music majors with little or no piano background. IND.

PIAN 148. Elementary Keyboard Skills II. 1 Hour.
A continuation of PIAN 144. IND.

PIAN 200. Piano. 1-2 Hours.
Continuation of PIAN 284. Prerequisite: Permission of instructor. IND.

PIAN 216. Chamber Music for Pianists. 1-2 Hours.
For freshmen and sophomores majoring in piano. The study of chamber music literature for piano and various instrumental combinations. Development of rehearsal conducting techniques and leadership skills through collaboration with other musicians. May be repeated for credit. LEC.

PIAN 221. Piano. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

PIAN 227. Two-Piano and Four-Hand Literature. 2 Hours.
Instruction in two-piano and duet repertoire for performance and sight-reading by advanced keyboard performers. IND.

PIAN 229. Performance Class in Accompanying. 1 Hour.
A class in the performance of vocal and instrumental accompaniment. Prerequisite: May be repeated for credit. IND.

PIAN 230. Creative Jazz Piano I. 1 Hour.
Group instruction in techniques of playing jazz. Prerequisite: Permission of instructor. IND.

PIAN 237. Accompanying for Dance. 1-3 Hours.
Instruction in dance accompanying. Open to freshman and sophomore pianists with permission of instructor. IND.

PIAN 284. Intermediate Keyboard Skills I. 2 Hours.
Continuation of PIAN 148. Prerequisite: Permission of instructor. IND.

PIAN 288. Intermediate Keyboard Skills II. 2 Hours.
Continuation of PIAN 284. Prerequisite: Permission of instructor. IND.

PIAN 300. Piano. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

PIAN 310. Advanced Keyboard Skills. 2 Hours.
The development of functional keyboard skills in sight-reading, transposition, harmonization, improvisation, score reading, and playing by ear. Prerequisite: MTHC 115 or permission of instructor. IND.

PIAN 320. Piano Performance Class. 1 Hour.
Performances, lectures, and discussions of all aspects of performance. May be repeated for credit. Prerequisite: Consent of instructor. LAB.

PIAN 321. Piano. 1-2 Hours.
Applied music lessons for juniors and seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

PIAN 325. Piano. 1-4 Hours.
For juniors and seniors. Small group instruction for the development of performance abilities, encouraging exploration of creative potentials, and self-directed study. May be repeated for credit. Prerequisite: Permission of instructor. IND.

PIAN 336. Chamber Music for Pianists. 1-2 Hours.
For juniors and seniors majoring in piano. The study of chamber music literature for piano and various instrumental combinations. Development of rehearsal conducting techniques and leadership skills through collaboration with other musicians. May be repeated for credit. LEC.

PIAN 402. Master Class. 1 Hour.
A class in the performance of advanced piano repertoire. Enrollment by permission of the department. IND.
PIAN 421. Piano. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

PIAN 422. Piano. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

PIAN 429. Performance Class Accompanying. 1 Hour.
A class in the performance of vocal and instrumental accompaniment. May be repeated for credit. LEC.

PIAN 430. Creative Jazz Piano II. 1 Hour.
Group instruction in advanced techniques of jazz improvisation with emphasis on various styles and interpretation of leading jazz performers. Prerequisite: Permission of instructor. IND.

PIAN 437. Accompanying for Dance. 1-3 Hours.
Instruction in dance accompanying. Open to junior and senior pianists with permission of instructor. IND.

PIAN 522. Piano Technology I. 1 Hour.
An introduction to the principles of design, theory of operation, maintenance, and tuning of the piano. Lecture and laboratory. Open to junior, senior, and graduate students. LEC.

PIAN 523. Piano Technology II. 1 Hour.
A continuation of PIAN 522, Piano Technology I. Application of principles of design, theory of operation, maintenance, and tuning of the piano. Prerequisite: PIAN 522. LEC.

PIAN 540. Piano Pedagogy I. 2-3 Hours.
Observation and research of the techniques and materials relevant to piano instruction at the elementary to intermediate levels. Additional topics pertinent to music education to include child development, learning, communication, and group dynamics. Prerequisite: Permission of instructor. LEC.

PIAN 546. Piano Pedagogy II. 2-3 Hours.
Observation and research of the techniques and materials relevant to piano instruction at the elementary to intermediate levels. Additional topics pertinent to music education to include child development, learning, communication, and group dynamics. Prerequisite: PIAN 540 or permission of instructor. LEC.

PIAN 622. Piano. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

PIAN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: PIAN 622. LEC.

PIAN 624. Piano Workshop. 1-3 Hours.
A short term course covering a piano-related topic. May be repeated for credit. LEC.

PIAN 640. Piano Pedagogy III. 2 Hours.
Practicum in piano instruction at the elementary to intermediate levels. Students enrolled for this course are expected to participate in the Children's Piano Laboratory Program or the Campus Community Program. Prerequisite: PIAN 546 or permission of instructor. FLD.

PIAN 643. Piano Repertoire I. 3 Hours.
Study and analysis of keyboard repertoire from its beginning through the Classical period. LEC.

PIAN 644. Piano Repertoire II. 3 Hours.
Study and analysis of keyboard repertoire of the Romantic and Modern periods. LEC.

PIAN 646. Piano Pedagogy IV. 1-2 Hours.
Practicum in piano instruction at the elementary to intermediate levels. Prerequisite: PIAN 640 or permission of instructor. FLD.

PIAN 711. Piano. 1-2 Hours.
For graduate students not majoring in piano. May be repeated for credit. IND.

PIAN 720. Piano Performance Class. 1 Hour.
Performances, lectures, and discussion of all aspects of performance. May be repeated for credit. Prerequisite: Consent of instructor. IND.

PIAN 802. Master Class. 1 Hour.
A class in the performance of advanced piano repertoire. Enrollment by permission of the department. Graded on satisfactory/unsatisfactory basis. IND.

PIAN 811. Piano. 3-4 Hours.
For graduate students majoring in piano. May be repeated for credit. Summer session limit three hours. IND.

PIAN 840. Advanced Piano Pedagogy I: Group and Class Instruction. 3 Hours.
The techniques and materials for the development of keyboard literacy at the elementary and intermediate levels. LEC.

PIAN 846. Advanced Piano Pedagogy II: Group and Class Instruction. 3 Hours.
The techniques and materials for the development of keyboard literacy at the elementary and intermediate levels. Prerequisite: PIAN 840. LEC.

PIAN 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: PIAN 811. THE.

PIAN 921. Seminar in Performance and Pedagogy: ______ 3 Hours.
A detailed study of repertoire, performance practice, pedagogical, and stylistic problems relating to keyboard music. May be repeated for credit when topics vary. LEC.

PIAN 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in piano. May be repeated for credit. Summer session limit three hours. IND.

PIAN 965. Doctoral Recitals. 1-3 Hours.
Maximum credit, seven hours. May be repeated for credit. THE.

PIAN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.
Courses

REC 100. Laboratory in Music Performance. 0 Hours.
This course deals with the performance of music. The goal is to increase
the understanding of music and music performance through exposure to
a wide variety of repertory and performance styles, mediums, techniques,
and related issues. May be repeated. LAB.

Courses

RECO 119. Recorder. 1-4 Hours.
For freshmen and sophomores. Group instruction at the beginning level,
two hours per week. Thirty minutes per day practice expected. May not
be repeated for credit. Prerequisite: Student must read music and own an
alto recorder. IND.

RECO 319. Recorder. 1-4 Hours.
For juniors and seniors. Group instruction at the beginning level, two
hours per week. Thirty minutes per day practice expected. May not be
repeated for credit. Prerequisite: Student must read music and own an
alto recorder. IND.

Courses

SAXO 100. Saxophone. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in
music. May be repeated for credit. IND.

SAXO 121. Saxophone. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated
for credit. IND.

SAXO 221. Saxophone. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be
repeated for credit. Prerequisite: 121-level until the music major has
accumulated 4 credits (8 for performance majors). IND.

SAXO 300. Saxophone. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May
be repeated for credit. IND.

SAXO 321. Saxophone. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance
majors. May be repeated for credit. Prerequisite: 221-level until the music
major has accumulated 8 credits. IND.

SAXO 421. Saxophone. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance
majors. May be repeated for credit. Prerequisite: 321-level until the music
major has accumulated 12 credits. IND.

SAXO 422. Saxophone. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being
performed and as required by the degree program. Not for performance
majors. IND.

SAXO 622. Saxophone. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance.
May be repeated for credit. Prerequisite: Performance majors must
accumulate 12 credits (3 each semester for 4 semesters) at the 121/221
levels. IND.

SAXO 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor
of Music). Must be taken in semester the senior recital is being performed
and as required by the degree program. Prerequisite: Corequisite: SAXO
622. LEC.

SAXO 711. Saxophone. 1-2 Hours.
For graduate students not majoring in saxophone. May be repeated for
credit. IND.

SAXO 811. Saxophone. 3-4 Hours.
For graduate students majoring in saxophone. May be repeated for credit.
Summer session limit three hours. IND.

SAXO 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for
the Master of Music degree and must be given before the Master's Final
Oral Exam. Prerequisite: Corequisite: SAXO 811. THE.

SAXO 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance techniques from the saxophone's
inception to 1950. LEC.

SAXO 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques from 1950 to
the present. LEC.

SAXO 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to
the D.M.A. curriculum in saxophone. May be repeated for credit. Summer
session limit three hours. IND.

SAXO 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

SAXO 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's
major field. Open only to candidates for the D.M.A. in performance. May
be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open
only to the candidates for the D.M.A. in performance and conducting. May
be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

STRG 424. String Pedagogy: _____. 1 Hour.
Lectures, demonstrations, and discussions of such topics as physiological
factors, style and interpretation, music editing, teaching materials and
repertoire, planning, and evaluation. May be repeated for credit as
instrument varies. IND.

STRG 701. String Pedagogy Workshop. 0.5-3 Hours.
A short-term intensive course in string pedagogy intended for school
orchestra directors, private teachers, and advanced students. Normally
offered during the summer session. May be repeated for credit. Graded
on a satisfactory/unsatisfactory basis. IND.

STRG 921. Seminar in Performance and Pedagogy. 3 Hours.
Repertoire, performance practice, and pedagogical and stylistic problems
relating to stringed instrument music before 1800. LEC.

STRG 922. Seminar in Performance and Pedagogy. 3 Hours.
Stringed instrument repertoire from 1800 to 1875. LEC.

STRG 923. Seminar in Performance and Pedagogy. 3 Hours.
Stringed instrument repertoire from 1875 to the present. LEC.

STRG 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's
major field. Open only to candidates for the D.M.A. in performance. May
be repeated for credit. Prerequisite: Consent of instructor. RSH.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

TROM 100. Trombone. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

TROM 121. Trombone. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

TROM 221. Trombone. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

TROM 252. Trombone Choir. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the trombone. May be repeated for credit. IND.

TROM 300. Trombone. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

TROM 321. Trombone. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

TROM 421. Trombone. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

TROM 422. Trombone. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

TROM 622. Trombone. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

TROM 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: TROM 622. LEC.

TROM 652. Trombone Choir. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the trombone. May be repeated for credit. IND.

TROM 711. Trombone. 1-2 Hours.
For graduate students not majoring in trombone. May be repeated for credit. IND.

TROM 811. Trombone. 3-4 Hours.
For graduate students majoring in trombone. May be repeated for credit. Summer session limit three hours. IND.

TROM 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's Recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: TROM 811. THE.

TROM 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in trombone. May be repeated for credit. Summer session limit three hours. IND.

TROM 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit. THE.

TROM 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

TRUM 100. Trumpet. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

TRUM 121. Trumpet. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

TRUM 221. Trumpet. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

TRUM 252. Trumpet Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the trumpet. May be repeated for credit. IND.

TRUM 300. Trumpet. 1-2 Hours.
Applied music lessons for juniors and seniors majoring in music. May be repeated for credit. IND.

TRUM 321. Trumpet. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

A scholarly paper on a topic pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

TUEU 252. Tuba-Euphonium Consort. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the tuba and euphonium. May be repeated for credit. IND.

TUEU 652. Tuba-Euphonium Consort. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the tuba and euphonium. May be repeated for credit. IND.

Courses

VIOA 100. Viola. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VIOA 120. Viola Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VIOA 121. Viola. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.
Courses

VION 100. Violin. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VION 120. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VION 121. Violin. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VION 131. Baroque Violin. 1-4 Hours.
One or two lessons per week. For freshmen and sophomores. May be repeated for credit. IND.

VION 221. Violin. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

VION 300. Violin. 1-2 Hours.
Applied music lessons for freshmen majoring in music. Not for performance majors. May be repeated for credit. IND.

VION 320. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VION 321. Violin. 1-2 Hours.
Applied music lessons for freshmen majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 12 credits. IND.

VION 422. Violin. 1-2 Hours.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VION 511. Workshop in Stringed Instrument Care and Repair. 2 Hours.
Students will perform repairs such as gluing cracks, applying tailpiece gut, setting and adjusting sound posts, and rehairing bows. Proper care and maintenance of the instrument will be stressed. Prerequisite: Junior standing with a background of stringed instrument study meriting departmental approval. LAB.

VION 622. Violin. 2-4 Hours AE61.
Applied music lessons for seniors majoring in music. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

VION 623. Senior Recital. 1 Hour.
One or two lessons per week. For juniors and seniors. May be repeated for credit. IND.

VION 711. Viola. 1-2 Hours.
For graduate students not majoring in viola. May be repeated for credit. IND.

VION 720. Viola Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in viola (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

VION 811. Viola. 3-4 Hours.
For graduate students majoring in viola. May be repeated for credit. Summer session limit three hours. IND.

VION 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VION 811. THE.

VION 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in viola. May be repeated for credit. Summer session limit three hours. IND.

VION 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit to a maximum of seven hours. THE.
and as required by the degree program. Prerequisite: Corequisite: VION 622. LEC.

**VION 711. Violin. 1-2 Hours.**
For graduate students not majoring in violin. May be repeated for credit. IND.

**VION 720. Violin Performance Class. 0-1 Hours.**
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

**VION 731. Baroque Violin. 1-4 Hours.**
May be repeated for credit. IND.

**VION 811. Violin. 3-4 Hours.**
For graduate students majoring in violin. May be repeated for credit. Summer session limit three hours. IND.

**VION 899. Master’s Recital. 1 Hour.**
Master’s Degree Recital: The Master’s recital is the culminating event for the Master of Music degree and must be given before the Master’s Final Oral Exam. Prerequisite: Corequisite: VION 811. THE.

**VION 961. Directed Performance. 3-4 Hours.**
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violin. May be repeated for credit. Summer session limit three hours. IND.

**VION 965. Doctoral Recitals. 1-3 Hours.**
Maximum of seven hours credit. May be repeated for credit. THE.

**Courses**

**VNCL 100. Violoncello. 1-2 Hours.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

**VNCL 120. Cello Performance Class. 0-1 Hours.**
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

**VNCL 121. Violoncello. 1-4 Hours.**
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

**VNCL 961. Directed Performance. 3-4 Hours.**
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violoncello. May be repeated for credit. Summer session limit three hours. IND.

**VNCL 965. Doctoral Recitals. 1-3 Hours.**
May be repeated for credit to a maximum of seven hours. THE.

**Courses**

**VOIC 100. Voice. 1-2 Hours.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

**VOIC 104. Class Voice. 1 Hour.**
A study of the fundamentals of singing; performance of songs; an approach to voice instruction in a group situation. May be repeated for credit. IND.

**VOIC 120. Vocal Performance in English. 1 Hour.**
Fundamentals of solo vocal performance with an emphasis on English diction and communicating the English language. IND.

**VOIC 121. Voice. 1-4 Hours.**
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

**VOIC 221. Voice. 1-4 Hours.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (6 for performance majors). IND.

**VOIC 270. Lyric Diction for Singers: ____. 1 Hour.**
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to
voice and theatre/voice majors, and to others with approval of instructor. May be repeated for credit as language varies. LEC.

**VOIC 300. Voice. 1-2 Hours.**

Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

**VOIC 302. Repertoire for the High School Singer. 1 Hour.**

Designed for future educators of young voices. Vocal literature and issues related to students aged thirteen to eighteen. May substitute for one semester of the studio voice requirements for Music Education majors with vocal/choral emphasis. Prerequisite: Four semesters of private voice. LEC.

**VOIC 320. Vocal Performance Class II. 1 Hour.**

Solo vocal performance in a class situation with emphasis including the preparation, planning of repertoire, and interpretive skills appropriate to a recital. Designed for junior/senior voice and theatre-voice majors. Prerequisite: Permission of instructor. Eligibility for VOIC 622. IND.

**VOIC 321. Voice. 1-2 Hours.**

Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

**VOIC 405. Vocal Literature I. 2 Hours.**

A survey of English song. LEC.

**VOIC 406. Vocal Literature II. 2 Hours.**

A survey of German song. LEC.

**VOIC 408. Vocal Pedagogy. 1 Hour.**

Knowledge and skills needed to teach voice, with particular attention to lifespan voice anatomy, physiology, and acoustics, diagnosis and correction of vocal inefficiencies, teaching styles, repertoire choice, professional development, and acquaintance with current research in voice science and vocal pedagogy. Includes a voice teaching practicum. (Same as MENT 408.) LEC.

**VOIC 412. Vocal Pedagogy and Advanced Repertoire II. 1 Hour.**

Continuation of VOIC 408. LEC.

**VOIC 421. Voice. 1-2 Hours.**

Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

**VOIC 422. Voice. 1-2 Hours A61.**

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

**VOIC 440. Vocal Performance. 1 Hour.**

A class in the performance of vocal repertoire. IND.

**VOIC 470. Lyric Diction for Singers: ____. 1 Hour.**

Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to voice and theatre/voice majors, and to others with approval of instructor. May be repeated for credit as language varies. LEC.

**VOIC 490. Opera Workshop. 0-4 Hours.**

The study of various aspects of opera, such as character development, aria, chorus, and opera scene study, staging, body movement, and audition techniques. May be repeated for credit. ACT.

**VOIC 492. Opera Production. 1-4 Hours.**

The preparation and performance of an opera role. May be repeated for credit. ACT.

**VOIC 500. Directed Study in: ____. 1-3 Hours.**

Investigation of a special topic or project. May be repeated for credit. Prerequisite: Consent of instructor. IND.

**VOIC 520. Vocal Coaching. 1 Hour.**

An investigation of elements of vocal performance such as language, musical style, tradition, and dramatic content and the communication thereof in preparation for the senior recital. Open to undergraduates majoring in voice and theatre/voice in the senior year, with consent of instructor. May be repeated for credit. IND.

**VOIC 620. Voice. 2-4 Hours AE61.**

Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits at the 121/221 levels. IND.

**VOIC 623. Senior Recital. 1 Hour.**

Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VOIC 622. LEC.

**VOIC 670. Advanced Lyric Diction for Singers: ____. 1 Hour.**

Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to graduate students in voice and opera performance, and to others with approval of instructor. May be repeated for credit as language varies. LEC.

**VOIC 704. Vocal Repertoire: ____. 2 Hours.**

A survey of selected topics in vocal repertoire to be chosen from categories such as: Italian, German, French, and English songs, oratorio literature, and art songs by women composers. The course may be repeated for credit when topic varies. LEC.

**VOIC 705. Advanced Vocal Literature I. 3 Hours.**

An investigation of the development of French melodie. The course will include directed readings, writing, and performance. LEC.

**VOIC 706. Advanced Vocal Literature II. 3 Hours.**

An investigation of the development of German lieder. The course will include directed readings, writing, and performance. LEC.

**VOIC 707. Advanced Vocal Literature III. 3 Hours.**

An investigation of the development of songs in English. The course will include directed readings, writing, and performance. LEC.

**VOIC 711. Voice. 1-2 Hours.**

For graduate students not majoring in voice. May be repeated for credit. IND.

**VOIC 720. Vocal Performance Class II. 1 Hour.**

Solo vocal performance in a class situation with emphasis including the preparation, planning of repertoire, and interpretive skills appropriate to a recital. Advanced repertoire and appropriate level of vocal and musical comprehension shall be expected from the graduate student. Prerequisite: Consent of instructor. IND.

**VOIC 740. Vocal Performance. 1 Hour.**

A class in the performance of vocal repertoire. IND.

**VOIC 770. Special Studies in Voice: English Lyric Diction for the Choral Singer and Soloist. 1 Hour.**

A graduate level course designed for the choral director, public school music teacher and voice teacher. Techniques for achieving a distinct, unlabeled English pronunciation will be studied. The International Phonetic Alphabet will be employed. IND.
Courses

W&P 125. Wind and Percussion Pedagogy. 1 Hour.
For freshmen and sophomores. Materials and concepts for teaching beginning and intermediate instrumental students; teaching materials and techniques, repertoire, performance practice, and instructional methods for the teaching of the brass, woodwind, percussion, and related instruments. May be repeated for credit. Prerequisite: Corequisite: WP 125. ACT.

W&P 130. Orchestral Repertoire. 1 Hour.
For freshmen and sophomores. Weekly reading sessions for wind, percussion and harp students with the objective of acquainting the student with important orchestral passages for his or her particular instrument. May be repeated for credit. Enrollment controlled by the director of percussion. IND.

W&P 325. Wind and Percussion Pedagogy. 1 Hour.
For juniors and seniors. Continuation of WP 125. May be repeated for credit. Prerequisite: Corequisite: Applied instruction for the appropriate instrument. (e.g. FRHN 321, PCUS 622). IND.

W&P 630. Orchestral Repertoire. 1 Hour.
The study of orchestral literature for wind and percussion instruments. May be repeated for credit. Permission of instructor. IND.

W&P 655. Independent Study in: ______. 1-4 Hours.
May be repeated for credit. Prerequisite: Consent of advisor and instructor. IND.

W&P 702. Special Studies in Woodwind Instrument Pedagogy. 1-3 Hours.
Physiological factors of woodwind playing, teaching materials and techniques, practice methods, and chamber music repertoire, teaching materials and techniques, techniques of tone production, articulation, embouchure, and intonation. May be repeated for credit to a maximum of five hours. LEC.

W&P 704. Special Studies in Brass Instrumental Pedagogy. 1 Hour.
Physiological factors of brass playing, teaching materials and techniques, practice methods, and chamber music repertoire, teaching materials and techniques, techniques of tone production, articulation, embouchure, and intonation. May be repeated for credit to a maximum of five hours. LEC.

W&P 706. Advanced Pedagogy Workshops in Orchestral Instruments. 0.5 Hours.
Methods and materials of teaching fundamentals of the instruments. Lecture, class performance, class discussion, teaching demonstration, and library research. Summer session only. Prerequisite: Teaching experience or undergraduate instruction in the instrument, or permission of the instructor. LEC.

The study of percussion pedagogy of Membrane Percussion; Keyboard Percussion; and Jazz/Rock/Commercial Drum Set, Marching and World Percussion. Study will include but not limited to such areas as teaching materials and techniques, repertoire, performance practice, and discography. Course may concentrate on one of the three areas listed above, or be taught as a survey course covering all three topics. May be repeated for credit to a maximum of five hours. LEC.
Courses

WENS 252. Wind Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of original works for various wind instrument combinations. May be repeated for credit. LAB.

WENS 652. Wind Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of original works for various wind instrument combinations. May be repeated for credit. LAB.

Bachelor of Arts in Fine Arts in Music

B.A. in Fine Arts in Music Degree Requirements

The B.A. in Fine Arts in Music is offered with a concentration in

- Jazz studies,
- Musicology,
- Music theory,
- Piano/organ/orchestral instruments, or
- Voice.

A total of 120 credit hours is required. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will gain knowledge in a variety of areas while pursuing the B.A. and may include any approved KU minor without adding extra credit hours to their degree program. Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities, as well as a senior performance recital.

With this degree, students will be well-rounded prospects for nearly any employer upon graduation. Students can also go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor's, master's, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble¹ each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

¹ KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), and are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the
School of Music website (http://music.ku.edu/placement-exams) each semester.

**B.A. in Fine Arts in Music Degree Requirements**

The B.A. in Fine Arts in music is offered with a concentration in

- Jazz studies (p. 2131),
- Musicology (p. 2131),
- Music theory, (p. 2132)
- Piano/organ/orchestral instruments (p. 2132), or
- Voice (p. 2133).

A total of 120 credit hours is required. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work. Click a concentration above to be taken to that degree plan.

Applied music lessons (8 semesters each for credit, includes senior recital)

Jazz ensembles (4 semesters for credit)

Jazz combo (4 semesters for credit)

REC 100 Laboratory in Music Performance (2 semesters)

Additional non-music electives required. Remember 45 total credits must be in courses numbered at the 300 level or above.

**Musicology Concentration (37)**

9 hours selected from courses numbered 602-778

Applied music lessons (4 semesters each for credit)

MUSC 499 Senior Thesis

Ensembles (at least 2 semesters of Collegium Musicum each for credit)

REC 100 Laboratory in Music Performance (4 semesters)

Music electives

Additional non-music electives. Remember 45 total credits must be in courses numbered at the 300 level or above.

**Music Theory Concentration (37)**

Upper-division music theory courses (MTHC courses numbered 300 and above)

Applied music lessons (8 semesters for credit, includes senior recital)

MTHC 499 Senior Research Project

Ensembles (8 semesters each for credit)

REC 100 Laboratory in Music Performance (4 semesters)

Additional non-music electives. Remember 45 total credits must be in courses numbered at the 300 level or above.

**Note:** See MTHC professional sequence and portfolio requirements under Music Theory and Composition.

**Piano/Organ/Orchestral Instruments Concentration (37)**

Applied music lessons (8 semesters each for 2 credits, includes senior recital)

MUS 586 The Business of Music

REC 100 Laboratory in Music Performance (4 semesters)

Ensembles & Music electives

Orchestral Instruments: 8 semesters each for credit in ensembles

Piano and Organ: 4 semesters each for credit in ensembles plus 4 credits of music electives

Additional non-music electives. Remember 45 total credits must be in courses numbered at the 300 level or above.

**Voice Concentration (33)**

Applied music lessons (8 semesters each for 2 credits, includes senior recital)

Senior recital

VOIC 120 Vocal Performance in English

Vocal diction (2 semesters of VOIC 470)

Vocal repertoire (VOIC 405 or VOIC 406)

Ensembles (4 semesters each for credit)

REC 100 Laboratory in Music Performance (4 semesters)

Piano (Proficiency level of PIAN 284)
Additional non-music electives. Remember 45 total credits must be in courses numbered at the 300 level or above.

## Bachelor of Fine Arts in Theatre-Voice Program

### Theatre and Voice

The Division of Voice offers 2 programs (Bachelor of Fine Arts and Bachelor of Music (p. 2147)) for singers interested in art song, opera, oratorio, concert, other classical pieces or vocal teaching. Students receive training in vocal technique, languages and diction, vocal repertoire, acting and the theatrical arts. Performance opportunities range from workshops to fully staged productions, allowing students to develop their talents at the most beneficial pace.

The Bachelor of Fine Arts (B.F.A.) in Theatre and Voice degree requires 124 credits. Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the in-depth exploration of music as well as performing a junior recital and a senior recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for theatre/musical productions, or create their own path in music or music-related endeavors.

### The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.
Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams) each semester.

Each student who is a candidate for the Bachelor of Music degree must carry a major in

- Musicology,
- Music theory,
- Music composition,
- Music therapy, or
- Music performance.

A total of 120 to 129 credit hours is required and is designed to further the student’s knowledge, practice, and experience in their chosen major. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors. Individuals who complete the music therapy program are eligible to take the national music therapy board certification examination. The music therapy major does not lead to licensure to teach music in public schools.

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Bachelor of Music in Musicology

A total of 120 credit hours is required and is designed to further the student’s knowledge, practice, and experience in musicology. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice.

With this degree, students can go on to pursue graduate studies in music, or create their own paths in music or music-related endeavors.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble each semester in which they are enrolled. For
music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams) each semester.

B.M. Degree Requirements for Musicology Majors

To graduate, the student must attain a minimum grade-point average of 3.0 in 12 credit hours chosen from MUSC 320, MUSC 340, MUSC 440, MUSC 480 and MUSC courses numbered 602-778. A minimum of 120 hours is required, distributed as follows:

Musicology (30)
- MUSC 320 Music History I 3
- MUSC 340 Music History II 3
- MUSC 440 Music History III 3
- MUSC 480 Music History IV 3
- MUSC 499 Senior Thesis (2 credits/semester, 1 or 2 semesters) 2

Plus 12 hours selected from courses numbered 602-778 12
- MUSC 654 Collegium Musicum, Vocal and/or MUSC 656 Collegium Musicum, Instrumental (4 semesters each for credit)

Music Theory and Composition (25)
- MTHC 105 Theory I 4
- MTHC 115 Theory II 4
- MTHC 205 Theory III 4
- MTHC 315 Theory IV 4
- MTHC 410 Tonal Forms 3
- MTHC 541 Eighteenth-Century Counterpoint 3
- MTHC 542 Sixteenth-Century Counterpoint 3

Music Courses (26)
- Ensembles: 8 semesters each for credit 8
- Applied music lessons: 8 semesters for 2 credits each, plus senior recital 16
- COND 245 Conducting I 2
- REC 100 Laboratory in Music Performance (4 semesters) 0

Basic Courses (39-40)
- ENGL 101 Composition (or any course that fulfills GE21) 3
- ENGL 102 Critical Reading and Writing (or any course that fulfills GE21) 3
- COMS 130 Speaker-Audience Communication (or any course that fulfills GE12) 3
- MATH 101 College Algebra (or any course that fulfills GE12) 3
- Natural Science: any course that fulfills GE3N 3
- Social Science: any course that fulfills GE3S 3
- Social/Ethics: any course that fulfills AE51 or AE52 3
- GERM, FREN, ITAL, or SPAN: 13 credits in same language 13

Choose from the following for an additional 5-6 credits in non-music courses:
- 4th semester of foreign language (3)
- History elective (3-6)
- History of art elective (3-6)
- PIAN 284 (2) Piano proficiency not counted toward graduation, but must be met.

Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's
undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Music Theory Placement**

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams) each semester.

**Music Theory and Composition**

To graduate, the student must maintain a minimum grade-point average of 3.0 in music theory and composition courses on both the first- and second-year and the junior/senior levels.

Students majoring in music theory (B.A. or B.M.) or music composition (B.M.) must complete MTHC 105, MTHC 115, and MTHC 205 before preparing a portfolio of their work for application to the professional sequence. The earliest a student may submit a portfolio is the fourth semester. Transfer students must be in residence for at least 1 semester before they can submit a portfolio.

This portfolio must include recent work (scholarly papers for music theory and musical compositions for composers), 2 letters of recommendation (1 from the student's major instrument instructor and 1 from a MTHC professor who has had the student in a class), and a minimum grade-point average of 3.0 in MTHC courses. The student may be asked to provide a demonstration of musicality on his or her major instrument.

Portfolios are accepted once each semester for admission to the professional sequence the following semester. The portfolio is assessed by the MTHC faculty with one of 3 recommendations: admit, revise and resubmit next semester, or denied. Students in music theory are not exceptions:

- Students with a major in composition must offer in partial fulfillment of the degree requirements a recital of approximately 45 minutes duration consisting of original works in various media. This is MTHC 499, listed below.
- Pianists and organists take 16 credits of lessons and do not take the additional 8 credits of piano, organ and/or harpsichord lessons while all other instrumentalists or vocalists take only 8 credits of lessons and the additional 8 credits of piano, organ and/or harpsichord lessons.
- MTHC 499 is not required.

**B.M. Degree Requirements for the Composition Major**

A total of 120 hours is required for the degree. Courses should be distributed as described for the major in music theory with the following exceptions:

- Students with a major in composition must offer in partial fulfillment of the degree requirements a recital of approximately 45 minutes duration consisting of original works in various media. This is MTHC 498, listed below.
- Pianists and organists take 16 credits of lessons and do not take the additional 8 credits of piano, organ and/or harpsichord lessons while all other instrumentalists or vocalists take only 8 credits of lessons and the additional 8 credits of piano, organ and/or harpsichord lessons.
- MTHC 499 is not required.

**Music Composition (12)**

MTHC 253 Composition: 2 semesters each for 2 credits 4

Bachelor of Music in Music Therapy

Music Therapy

The program helps students develop competence for entry into the music therapy profession. The interdisciplinary curriculum emphasizes understanding of human behavior, musical and otherwise. It includes extensive work in music, behavioral science, biological science, and liberal arts, in addition to specific academic, clinical, and research studies in music therapy.

Music Therapy Program

The undergraduate music therapy program provides full preparation for entry into the profession. It culminates in the degree of Bachelor of Music with a major in music therapy. Graduates are prepared for general music therapy practice in a variety of settings, which may include, but are not limited to hospitals, schools, community health programs, wellness centers, and private and group settings across the age span. The KU music therapy program is approved by the American Music Therapy Association. Individuals who complete the program are eligible to take the national music therapy board certification examination. The music therapy major does not lead to licensure to teach music in public schools.

Advising

Students admitted to music therapy will be assigned an appropriate faculty advisor to work with the student throughout his or her academic career. The undergraduate handbook is available online (http://music.ku.edu/BM/requirements) and from the MEMT office, 448 Murphy Hall, and provides detailed procedures, suggestions, and specifications.

Regardless of applied performance medium, each entering student should be able to sing independently, in tune, and with acceptable tone quality. Functional keyboard skills (accompanying, playing by ear, improvising, and transposing) are helpful. Experience working with others is helpful. Well-developed interpersonal skills are an asset.

Admission

Students must meet or exceed the School of Music academic admission requirements and successfully complete a major performance medium audition to be admitted. Students should declare the B.M. in music therapy as the major on the KU application for admission. Music therapy majors are in plan MTP-BM in the School of Music.

Students pursuing the B.M. in music therapy degree should apply for admission to the professional sequence upon completion of the second semester of the sophomore year with 50 or more KU hours. Transfer students with more than 45 hours of transfer credit must complete this application the first semester of classes at KU. Students may not enroll in courses in the professional sequence before formal approval by the
Students must be admitted to the music therapy professional sequence to enroll in upper-division music therapy courses. See the Music Therapy Undergraduate Program Handbook online (http://music.ku.edu/requirements) for details.

Candidates are reviewed for admission periodically. No student may be admitted to the professional sequence for a semester during which he or she will be on academic probation. Application forms for music therapy professional sequence admission are available online (http://music.ku.edu/ment/documents/#undergrad).

**Undergraduate Admission to the School of Music**

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students may be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

### Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams) each semester.

### Requirements for the B.M. with a Major in Music Therapy

The degree requires a minimum of 127 semester hours of credit appropriately distributed among general studies, the major, and supporting music areas and behavioral sciences. With careful planning, the program can be completed in about 4½ years. Four academic years of study and clinical work on campus are followed by a full-time, 6-month internship in an approved clinical institution.

The degree requires at least a 2.75 cumulative grade-point average in all course work and a minimum of 2.75 in all MEMT courses. All music therapy majors must demonstrate proficiency in the major applied performance medium and in other performance areas.

All students must demonstrate functional vocal skills and ability to perform accompaniments on a portable chordal instrument, such as accordion, autoharp, guitar, or electric piano. These skills are assessed periodically throughout the program.

**Total Hours: 31**

- Students must successfully complete Pre-Clinical Musicianship Assessment parts A and B before entering the Clinical Techniques Courses. These assessments are components of the Final Examinations for MEMT 150 and 196 respectively.
• Students must successfully complete the Clinical Musicianship Assessment before entering Clinical Practicum. This assessment is addressed across MEMT 251 and 296.

Professional Sequence

Professional Sequence Admission Requirements

Students should apply for admission to the Professional Sequence as early as possible and must be admitted before beginning the first semester of the junior year. Admission requirements:

1. Cumulative grade-point average of 2.75 or higher.
2. Grade-point average of 2.75 or higher in MEMT courses.
3. A grade of C or higher in each of the following courses:
   - MEMT 150 Introduction to Music Therapy
   - MEMT 196 Group Leadership Skills in Music Therapy
   - MEMT 250 Human Musical Learning and Development
   - MEMT 251 Clinical Techniques for Children
   - MEMT 296 Clinical Techniques for Adults
4. At least 50 hours of college credit.
5. A signed applied music recommendation form verifying successful completion of the first semester of sophomore-level lessons.
6. Successful completion of the application form.
7. The submitted copy must be single sided. Do not submit a copy with print on both sides of the page.

• Students must successfully complete Clinical Practicum Musicianship Assessment before entering their second MEMT 396 Clinical Practicum.

Total Hours: 31

1 Students must achieve admission to the music therapy professional sequence prior to enrolling in these courses.

• All MEMT professional courses as noted on the undergraduate music therapy degree requirement check sheet must be completed with a C or higher prior to beginning internship.

• Students must pass all Clinical Musicianship and Internship Assessments and Musicianship Portfolio.

• Students must request a graduation check from the School of Music Student Services Office approximately 1 year before the estimated internship date. Graduation checks before that time should occur with the student’s MEMT advisor.

• Upon acceptance to an internship site students must complete and turn in the Music Therapy Internship Information sheet to the MEMT office.

• Students must do the following in the final semester before leaving for internship:
  - review degree requirement check sheet to see that they have met all graduation requirements
  - submit an application for graduation online through Enroll and Pay
  - successfully complete the major applied instrument (422 Senior Project Lesson) including the senior 1/2 recital
Audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Music Theory Placement**

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams) each semester.

**B.M. Degree Requirements for the Piano Major**

A total of 120 hours is required, distributed as follows:

**Music Theory (22)**
- MTHC 105 Theory I 4
- MTHC 115 Theory II 4
- MTHC 205 Theory III 4
- MTHC 315 Theory IV 4
- MTHC 410 Tonal Forms 3
- MTHC 541 Eighteenth-Century Counterpoint 3

**Musicology (12)**
- MUSC 320 Music History I 3
- MUSC 340 Music History II 3
- MUSC 440 Music History III 3
- MUSC 480 Music History IV 3

**Music Courses (55)**
- Applied music lessons: 8 semesters each for credit, plus junior and senior recitals 25
- PIAN 310 Advanced Keyboard Skills 2
- PIAN 229/429: 6 semesters each for credit 6
- PIAN 540 Piano Pedagogy I 3
- PIAN 546 Piano Pedagogy II 3
- PIAN 643 Piano Repertoire I 3
- PIAN 644 Piano Repertoire 2 3
- PIAN 216/336 Chamber music: 2 semesters each for credit 2
- REC 100 Laboratory in Music Performance (4 semesters) 0
- COND 245 Conducting I 2
- Ensembles: 4 semesters each for credit 4
- Music electives 2

**Basic Courses (31)**
- ENGL 101 Composition (or any course that fulfills GE21) 3
- ENGL 102 Critical Reading and Writing (or any course that fulfills GE21) 3
- COMS 130 Speaker-Audience Communication (or any course that fulfills GE22) 3
- MATH 101 College Algebra (or any course that fulfills GE12) 3
- Foreign language: 2 semesters of same language 10
- Natural Science: any course that fulfills GE3N 3
- Social Science: any course that fulfills GE3S 3

---

**Bachelor of Music in Music Performance: Piano**

A total of 120 credit hours is required and is designed to further the student’s knowledge, practice, and experience of piano. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

**Undergraduate Admission to the School of Music**

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Transfer Students**

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition).
### Bachelor of Music in Music Performance: Organ and Church Music

A total of 124 credit hours is required and is designed to further the student’s knowledge, practice, and experience of organ and church music. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Students who wish to major in music must audition. All music students welcome for information about international admissions.

and Undergraduate Admissions (http://admissions.ku.edu/international/). Visit the Office of International Recruitment permission of the dean. Send applications to the Office of Admissions return to the college or university last attended in addition to completing if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Bachelor of Music in Music Performance: Strings and Harp

A total of 120 credit hours is required and is designed to further the student’s knowledge, practice, and experience on their major instrument in strings. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams) each semester.

B.M. Degree Requirements for the Strings Major

**Bachelor of Music in Music Performance: Voice**

The Division of Voice offers 2 programs (Bachelor of Music and Bachelor of Fine Arts) for singers interested in art song, opera, oratorio, concert, other classical pieces or vocal teaching. Students receive training in vocal technique, languages and diction, vocal repertoire, acting, and the theatrical arts. Performance opportunities range from workshops to fully staged productions, allowing students to develop their talents at the most beneficial pace.

A total of 125 credit hours is required and is designed to further the student’s knowledge, practice, and experience in voice. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

Students may transfer to the school from other institutions or from other
KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible
to return to the college or university last attended, and complete a
successful audition. Only grades of C or higher are accepted in transfer
credit toward degrees offered by the School of Music. Students who
wish to transfer performance credit from another institution toward
any music degree at KU must validate this credit by audition. Music
audition information and application forms are available online (http://
music.ku.edu/applyaudition). There is a limit of two times a prospective
student may request an audition for entrance into one of the School's
undergraduate degree programs. The second request must be within
12 months of the first and may be as early as 1 month following the
first audition. The limitation also applies to students within the School
auditioning from one program into another.

Music Theory Placement
The music theory placement examination is required of all undergraduate
transfer students who have not completed a 4-semester theory sequence
with an accredited NASM school. It is administered as announced on the
School of Music website (http://music.ku.edu/placement-exams) each
semester.

B.M. Degree Requirements for the Brass and Percussion Major
A total of 120 hours is required for the degree in brass and percussion,
distributed as follows:

Music Theory (25)
MTHC 105 Theory I 4
MTHC 115 Theory II 4
MTHC 205 Theory III 4
MTHC 315 Theory IV 4

Bachelor of Music in Music Performance: Brass and Percussion
A total of 120 credit hours is required and is designed to further the
student's knowledge, practice, and experience on their major instrument.
To graduate, a student must earn a minimum grade-point average of 3.0
in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and
internationally recognized. Courses in music theory and musicology
are part of the exploration of music as are private instruction, ensemble
and chamber music opportunities. All students pursuing the B.M.
degree will perform a senior recital on their primary instrument/voice. In
addition, performance majors will also complete a junior recital and music
composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music,
establish private studios, audition for music ensembles, or create their
own paths in music or music-related endeavors.

Ensemble Policy
In order to remain enrolled in studio instruction (lessons), all
undergraduate (B.A. & B.M.) and M.M. students who enroll in any level
of studio instruction (including nonmajor levels) in band and orchestral
instruments must audition for and perform as assigned in a major
instrumental ensemble 1 each semester in which they are enrolled. For
music majors, 1 ensemble taken for credit each semester is required
for graduation. Exceptions to this policy are allowed on a case-by-case
basis and only by the ensemble conductor in consultation with the faculty
member in the studio area or the faculty advisor in music therapy as
appropriate.

Senior

Social/Ethics: any course
that fulfills AE51 or AE52 3
Socical Science: any course
that fulfills GE3S 3
Music elective 3

Total Hours: 129

Additional courses are required for those wishing to pursue graduate
studies in music theory.
Bachelor of Music in Music Performance: Woodwinds

A total of 120 credit hours is required and is designed to further the student's knowledge, practice, and experience on their major instrument. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

**Ensemble Policy**

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major ensemble.
Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the School from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams) each semester.

Music Education B.M.E. Program

Music Education

The program helps students develop specific skills in planning and delivering instruction in all types of music education classrooms. The curriculum emphasizes both the theoretical and practical elements of human behavior, musical and otherwise, and integrates with this core a variety of learning experiences that prepare the pre-service teacher for the classroom medium. Among these is a broad spectrum of learning experiences both at KU and in area classrooms. These include planning and delivering instruction, classroom management, conducting, assessment, and curriculum design. Within the curriculum, individual emphases are reflected in the choice of major performance medium and performance ensembles. The goal of the music education curriculum is to prepare the student for success in the profession.

Advising

Students admitted to music education will be assigned an appropriate academic faculty advisor to work with the student throughout his or her academic career. The undergraduate handbook is available online (http://music.ku.edu/BME/requirements) and from the MEMT office, 448 Murphy Hall and provides detailed procedures, suggestions, and specifications.

Regardless of applied performance medium, each entering student should be able to sing independently, in tune, and with acceptable tone quality. Functional keyboard skills (accompanying, playing by ear, improvising, and transposing) are helpful. Experience working with others is also beneficial as well. Well-developed interpersonal skills are an asset.

Music Education Program

This program provides full preparation for entry into the profession. It leads to the Bachelor of Music Education and eligibility for licensure to teach vocal, instrumental, and general music in grades pre-K through 12 in the state of Kansas. The program typically requires eight semesters of full-time work, which includes a semester of student teaching and internship in the public schools.

Music Teacher Licensure Program

Teacher licensure in Kansas is a function of the Kansas State Board of Education. Individuals who complete an approved music teacher licensure program are recommended to the state for licensure in music for grades pre-K through 12. Students must meet additional state requirements, such as passing specified standardized tests, before licenses are granted.

Contact the licensure officer, 211 J.R. Pearson Hall, 785-864-9602, for information.

Admission

Students must meet or exceed the School of Music academic admission requirements and successfully complete a major performance medium audition to be admitted. Students should declare the B.M.E. in music education as the major on the KU application for admission. Music education majors are in plan ME-BME in the School of Music.

Students pursuing the music education B.M.E. must apply for admission to the professional sequence by the first Monday in February of the sophomore year. Transfer students with more than 45 hours of transfer credit must complete this application the first semester of classes at KU. Students may not enroll in courses in the professional sequence before formal approval by the director of music education. Music education majors who have been admitted to the professional sequence are in plan MEPS-BME in the School of Music.

Students must be admitted to the music education professional sequence to enroll in upper-division music education courses. See the Music Education Undergraduate Program Handbook online (http://music.ku.edu/BME/requirements) for details.

No student may be admitted to the music education professional sequence for a semester during which he or she is on academic probation. The application form for music education professional

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble¹ each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

¹ KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another. The student must participate in appropriate performing ensembles and demonstrate proficiency in a major applied performance medium and in other performance areas.

General Education Requirements (28 hours)

| Language Arts and Communication (6) | ENGL 101 Composition | 3 |
| Behavioral and Social Sciences (12) | PSYC 104 General Psychology | 3 |
| Natural Sciences and Mathematics (10) | BIOL 100 Principles of Biology | 3 |
| Professional Education/Music Education (23 hours) | MENT 160 Principles of Music Education | 1 |

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams) each semester.

The Music Education Teacher Licensure Curriculum

The B.M.E. degree requires a minimum of 122 semester credit hours distributed among general studies, the major, professional education class work, and student teaching and internship. The degree requires at least a 2.75 cumulative grade-point average in all course work. Each student must participate in appropriate performing ensembles and demonstrate proficiency in a major applied performance medium and in other performance areas.

The University of Kansas
## Performance Requirements (37-40 hours)

### Major Instrument (14)
- 121 Applied music lessons (2 semesters) 4
- 221 Applied music lessons (2 semesters) 4
- 321 Applied music lessons (2 semesters) 4
- 422 Senior project lessons (1 semester) 2

### Ensemble (7 semesters, 7 hours) (7)
7 hours of credit representing 7 semesters of participation, including experience in small ensembles wind and percussion: 1 semester/1 credit marching band required. Vocal: 6 semesters/6 credits major ensemble and 1 semester/1 credit small ensemble required.

### Piano Skills (2-5)
An audition is required. If skills are insufficient, remedial course work (PIAN 144) is necessary. Students with a major performance medium of piano or organ take only PIAN 310.

### Performance Techniques (6)
- MEMT 113 Performance Media: Brass
- MEMT 114 Performance Media: Woodwinds
- MEMT 115 Performance Media: Percussion
- MEMT 118 Performance Media: Strings
- MEMT 119 Performance Media: Guitar
- MEMT 408 Vocal Pedagogy

### Conducting/Rehearsal Skills (8)
- MEMT 230 Performance Clinic: Band 1
- MEMT 231 Performance Clinic: Choral 1
- MEMT 232 Performance Clinic: Orchestra 1
- MEMT 246 Fundamentals of Conducting 1
- MEMT 330 Rehearsal/Conducting Clinic: Band 1
- MEMT 331 Rehearsal/Conducting Clinic: Choral 1
- MEMT 332 Rehearsal/Conducting Clinic: Orchestra 1
- Select one of the following: 1
  - MEMT 350 Advanced Rehearsal/Conducting Clinic: Band
  - MEMT 351 Advanced Rehearsal/Conducting Clinic: Choral
  - MEMT 352 Advanced Rehearsal/Conducting Clinic: Orchestra

### Basic Musicianship Requirements (28 hours)

#### Music Theory and Composition (16)
- MTHC 105 Theory I 4
- MTHC 115 Theory II 4
- MTHC 205 Theory III 4
- MTHC 316 Tonal Form and Post-Tonal Techniques 4

#### Musicology (12)
- MUSC 320 Music History I 3
- MUSC 340 Music History II 3

#### Music Education 4 Year Plan

Courses must be completed before admission to the music education professional sequence.

Music Theory I and II should be taken before Music History I or higher.

Students must apply for admission to the music education professional sequence upon completion of the first semester of their sophomore year.

Professional Sequence

Professional Sequence Admission Requirements

1. Cumulative grade-point average of 2.75 or higher.
2. Grades of C or higher in MATH 101 and 6 hours of English as listed on the application.
3. Satisfactory completion of "Criteria for Admission" courses as shown in the Application for Music Education Professional Sequence Admission.
4. The student must write and attach a one-page essay (12-point font, double-spaced) to the application form that answers the following question: How will you advocate for school music programs in the community at large when you enter the classroom?
5. A fully completed application form and associated documents must be submitted to the MEMT office in 448 Murphy Hall.

Transfer students with more than 45 hours of transfer credit must complete the professional sequence application during the first semester of classes at KU.

Students must achieve admission to the music education professional sequence prior to enrolling in these courses.

Students should request a graduation check from the School of Music Student Services Office approximately 1 year before their expected graduation date. Graduation checks before that time should occur with the student's MEMT advisor.

MEMT 435 (Wind and Percussion) (F) | 1
Ensemble | 1 | 422 Senior Project lessons | 2
CLAS elective | 3 | |

Total Hours: 34-35

Students must achieve admission to the Music Education Professional Sequence prior to enrolling in these courses.

Students must do the following during the final semester:
- register to take the PLT (Principles of Learning and Teaching) test
- register to take the Praxis II Music Content test during the final semester
- check their degree requirement check sheet to see that they have met all of the graduation requirements

Students must do the following before graduation:
- submit an application for graduation online through Enroll and Pay at the beginning of their last semester
- successfully complete their major applied instrument (422) including the senior 1/2 recital

Total Hours: 23-29
Minor in Music

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor's, master's, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Requirements for the Minor in Music

Open to All KU Students

Students must first audition to be accepted as music minors, then may earn a minor in music by taking 24 hours in the courses listed below. At least 12 hours must be junior/senior-level courses, numbered 300 and above. A minimum grade-point average of 2.0 in the minor is required.

MTHC 105  Theory I  4
MTHC 115  Theory II  4
Applied music lessons: 4 semesters at the 100 level each for credit (all on same instrument or voice)  4
MUSC 336  Masterworks of Music  3
Nine junior/senior music credits numbered 300 and above to be chosen from:

Lessons on same instrument or voice at 300 level, ensembles, and/or music classes (MUS 586, Business of Music, and most MUSC - music history - courses are open to all KU students)

Master of Music in Conducting

Master of Music in Conducting Degree Programs

M.M. degree programs in conducting:

- Choral conducting
- Orchestral conducting
- Wind conducting

M.M. in Conducting Admission

Applicants are expected to have educational backgrounds equivalent to the B.M. or B.M.E. degree (including a course in form and analysis) from KU. They should have one or two years of experience in conducting. Such experience may include work in public school, college, or with other amateur or professional ensembles. Applicants normally are expected to have a high level of performing ability on an instrument or in voice. Applicants must complete audition-interviews successfully before the divisional faculty and should provide a résumé of their conducting experience, including programs of public appearances.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in
Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M. in Conducting Degree Requirements

Diagnostic Examinations

All entering graduate students, except those in the MM-Opera program, are required to take diagnostic exams in musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Master’s Recital

The conducting degree candidate must present a final concert-length recital consisting of a public choral or instrumental program. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option is still available to students and faculty members. Divisions must approve the recital content well in advance but no less than three weeks before the recital date. The Master’s recital must be given before the final oral exam can occur.

Final Oral Exam

Master’s degree students must schedule and pass a final oral examination. The student’s 3-member Graduate Advisory Committee consists of the student’s major professor, one member from the student’s major division and one musicology or music theory professor. This committee administers the final oral exam.

A program of study in band and orchestral conducting (minimum of 30 hours) is as follows:

Master of Music in Musicology

Master of Music in Musicology Degree Program

The Master of Music (M.M.) degree in musicology requires a minimum of 30 credits and is designed to further the student’s knowledge and indepth exploration of musicology (music history) at the post-baccalaureate level.

M.M. in Musicology Admission

Applicants are expected to have educational backgrounds equivalent to the B.A. or B.M. in musicology from KU. Applicants are expected to have a reading knowledge of German, French, Italian, or Spanish. A language deficiency may be satisfied after entrance into the program. Proficiency at the piano is encouraged. Applicants must submit samples of original scholarly writing. In addition to the required course work, students are encouraged to continue study of performance or composition.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.
Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations
All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M. in Musicology Degree Requirements

Final Oral Exam
Master’s degree students must schedule and pass a final oral exam. For the Master’s degree in musicology, the final oral exam is a defense of the student’s thesis.

The musicology student’s 3-member Graduate Advisory Committee consists of the student’s major professor, one member from the student’s major division and one music theory professor. This committee administers the final oral exam.

The course work for the M.M. degree in musicology (minimum of 30 credits) is as follows:

Master of Music in Music Theory or Composition

Master of Music in Music Theory or Composition Degree Programs
The Master of Music (M.M.) degrees in theory or composition require a minimum of 30 credits and are designed to further the student’s knowledge and in-depth exploration of music theory or composition at the post-baccalaureate level.

M.M. in Music Theory or Composition Admission
Applicants are expected to have educational backgrounds equivalent to the B.A., the B.M. in music theory, or the B.M. in composition from KU. Composition applicants should submit scores and recordings (if available) of original compositions; theory applicants should submit research papers in music theory. Applicants are expected to have a reading knowledge of German, French, Italian, or Spanish. A language deficiency may be satisfied after entrance into the program. In addition to the required course work, students are encouraged to continue study of performance and participate in ensembles on their major instruments.

Graduate Admission to the School of Music
Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/apply/admission/graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/ music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average
is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

M.M. in Music Theory or Composition Degree Requirements

Final Oral Exam
Master’s degree students must schedule and pass a final oral exam. The student’s 3-member Graduate Advisory Committee consists of the student’s major professor, one member from the student’s major division and one musicology or music theory professor. This committee administers the final oral exam.

Programs of study are as follows:

Music Theory (minimum of 30 credits)
- Advanced music theory 9
- Advanced musicology and/or advanced composition 9
- MUSC 801 Music Bibliography and Research 3
- MTHC 778 History of Music Theory 3
- Thesis 6

Composition (minimum of 30 credits)
- Advanced composition 9
- Advanced musicology and music theory 12
- MUSC 801 Music Bibliography and Research 3
- Recital 1
- Thesis 5

Composition/Jazz Emphasis (minimum of 30 credits)
- Advanced composition 9
- Elective 4
- JAZZ 659 Jazz Arranging 2
- MTHC 563 Survey in Jazz Composition and Arranging 3
- American Studies Course 3
- MUSC 801 Music Bibliography and Research 3
- Recital 1
- Thesis 5

View a check sheet (http://music.ku.edu/resources/checksheets.shtml) for this degree program.

1 The master’s thesis in theory or composition shall consist of either a 20-minute work for large ensemble or a 30-minute chamber work, either of which may include electronic media. All thesis proposals must be approved by the MTHC faculty before the student begins work on the thesis.

Master of Music in Music Performance: Brass and Percussion

Master of Music in Performance Degree Programs

M.M. degree programs in music performance:
- Accompanying
- Bassoon
- Carillon
- Cello
- Church music
- Clarinet
- Double bass
- Euphonium
- Flute
- French horn
- Harp
- Oboe
- Opera performance
- Organ
- Percussion
- Piano
- Saxophone
- Trumpet
- Trombone
- Tuba
- Viola
- Violin
- Voice

M.M. in Performance Admission

The applicant must perform an audition before the faculty of the major performance division. In some cases, an audio recording may be submitted in lieu of a live performance. A complete list of repertoire studied should be submitted with the graduate application. A prescreening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (http://music.ku.edu/prospective/auditions.shtml).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

- Viola
- Violin
- Voice

M.M. in Performance Admission

The applicant must perform an audition before at least two members of the faculty of the major performance division. In some cases, a video recording may be submitted in lieu of a live performance. A complete list of repertoire studied, including past recital programs, should be included with the graduate application. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (http://music.ku.edu/prospective/auditions.shtml).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or
Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations
All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

Master of Music in Music Performance Degree Programs
M.M. degree programs in music performance:

- Bassoon
- Carillon
- Cello
- Church music
- Clarinet
- Collaborative piano
- Double bass
- Euphonium
- Flute
- French horn
- Harp
- Oboe
- Opera performance
- Organ
- Percussion
- Piano
- Saxophone
- Trumpet

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees. As specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor's or master's degree in music from the University of Kansas within the previous 4 years.

M.M. in Performance Degree Requirements

Diagnostic Examinations

All incoming graduate students, except those in MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Master’s Recital

A final solo recital is required for all master’s degrees in performance. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve recital content well in advance but no less than 3 weeks before the recital date. The candidate must file a copy of the final recital program with the School of Music before the final oral examination is scheduled. The audio recording of the recital will be placed the School of Music archives.

Final Oral Examination

All Master’s students in Music must schedule and pass a Final Oral Exam during the semester the student plans to graduate. The Master’s Recital must be performed before the Final Oral Exam can be taken. The Oral Exam is administered by the student’s 3-member advisory committee. The committee is comprised of the student’s major professor, one member from the student’s major division, and one Musicology or Music Theory faculty member.

A program of study for students in cello, double bass, harp, viola, and violin (minimum of 30 credits) is as follows:

The applicant must perform an audition before at least two members of the faculty of the major performance division. In some cases, a video recording may be submitted in lieu of a live performance. A complete list of repertoire studied, including past recital programs, should be included with the graduate application. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (http://music.ku.edu/prospective/auditions.shtml).

Students in opera performance must take a minimum of 1 year each in French, German, and Italian before entering graduate studies or before completing the M.M. degree. For the master’s degree program in voice, the language requirement is 1 year of 2 of the following: French, German, or Italian. Both programs have prerequisites in French, German, and Italian diction. Students found deficient in a particular area of diction must enroll in the specific course in which they are deficient and pass it with a minimum grade of C or demonstrate proficiency by passing a diction diagnostic examination. A student whose transcript shows she or he has passed a particular language diction course normally is considered proficient in the diction of that language.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Master of Music Education in Music Education or Music Therapy

Master of Music Education
With a Major in Music Education or Music Therapy

The division’s graduate programs include advanced professional and scholarly study for music educators and music therapists, licensure/certification programs for those with baccalaureate degrees in other fields who plan to enter the music education or music therapy professions.
(these initial licensure/certification programs typically also require collateral undergraduate study), and advanced study for individuals in related disciplines. Areas of emphasis, curricula, examinations, and regulations and procedures are described in the MEMT Master's Handbook available in the division office and online (http://music.ku.edu/MME/requirements).

Music Education M.M.E. Program

Master of Music Education

With a Major in Music Education

The division’s graduate programs include advanced professional and scholarly study for music educators and music therapists, licensure/certification programs for those with baccalaureate degrees in other fields who plan to enter the music education or music therapy professions (these initial licensure/certification programs typically also require collateral undergraduate study), and advanced study for individuals in related disciplines. Areas of emphasis, curricula, examinations, and regulations and procedures are described in the MEMT Master's Handbook available in the division office and online (http://music.ku.edu/MME/requirements).

M.M.E. in Music Education or M.M.E. in Music Therapy Admission

Admission requirements are as follows:

1. Undergraduate grade-point average of 3.0 or higher on a 4.0 scale.
2. An appropriate baccalaureate degree to support the individual’s goals for master’s study. Students seeking entrance into the graduate initial certification program in music education or the graduate equivalency program in music therapy should have substantial backgrounds in music regardless of undergraduate major.
3. Scores on the Graduate Record Examination (verbal, quantitative, analytical writing).
4. 3 letters of recommendation regarding applicant's qualifications for graduate study in their selected program.
5. Submission of a video recording appropriate to degree of application.
6. Other supporting materials are required.

Additional detailed admission requirements and information are found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.
• at least 3 hours in musicology, theory, or composition;
• at least 3 hours in a supportive elective area; and
• additional non-MEMT hours necessary to reach the minimum.

All of these selections are subject to the advisor’s approval.

Final Master’s Examination (Thesis)
The student must be enrolled at the time the final master’s exam is held. The exam will be scheduled for a period of 2 hours. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final thesis copy to each committee member 2 weeks in advance of the scheduled exam date.

The candidate will begin by giving a twenty-minute oral presentation on his or her thesis, but the exam is not confined to that topic. Thereafter, the candidate will address questions posed by the committee arising from the candidate’s presentation and the thesis document.

Final Master’s Examination (Non-Thesis)
The non-thesis option typically functions as a terminal degree and the work must be distributed as indicated in the categories shown on the appropriate Degree Program Plan. This option culminates with enrollment in a 1-credit hour comprehensive final examination (MEMT 898 Comprehensive Examination) and the subsequent portfolio and presentation.

The student must be enrolled at the time the final non-thesis master’s exam is held. The non-thesis master’s exam includes presenting a portfolio and will be scheduled for a period of 1 hour. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final portfolio to each committee member 2 weeks in advance of the scheduled examination date.

More information about the thesis or non-thesis option is available online (http://music.ku.edu/MME/requirements) in the MEMT Graduate Handbook.

Plan of Study
The Master of Music Education with a major in music education program plan is available online (http://music.ku.edu/MME/requirements).

Music Therapy M.M.E. Program

Master of Music Education
With a Major in Music Therapy
The division’s graduate programs include advanced professional and scholarly study for music educators and music therapists, licensure/certification programs for those with baccalaureate degrees in other fields who plan to enter the music education or music therapy professions (these initial licensure/certification programs typically also require collateral undergraduate study), and advanced study for individuals in related disciplines. Areas of emphasis, curricula, examinations, and regulations and procedures are described in the MEMT Master’s Graduate Handbook available in the division office and online (http://music.ku.edu/MME/requirements).

M.M.E. in Music Education or M.M.E. in Music Therapy Admission
Admission requirements are as follows:

1. Undergraduate grade-point average of 3.0 or higher on a 4.0 scale.
2. An appropriate baccalaureate degree to support the individual’s goals for master’s study. Students seeking entrance into the graduate initial certification program in music education or the graduate equivalency program in music therapy should have substantial backgrounds in music regardless of undergraduate major.
3. Scores on the Graduate Record Examination (verbal, quantitative, analytical writing).
4. 3 letters of recommendation regarding applicant’s qualifications for graduate study in their selected program.
5. Submission of a video recording appropriate to degree of application.
6. Other supporting materials are required.

Additional detailed admission requirements and information are found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

Graduate Admission to the School of Music
Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudit/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

• Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
• Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in
thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations
All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M.E. with a Major in Music Therapy
Course and Proficiency Requirements
The degree requires a minimum of 30 hours of graduate credit. At least one half of the required credit hours must be in courses open only to graduate students. At least 20 of the hours must be in regularly scheduled classes excluding directed study, research, and thesis or comprehensive examination (as applicable).

Course Distribution
• The program must include at least 17 hours of graduate work in the division, including MEMT 812 Research in Music Education and Music Therapy (3 hours), MEMT 864 Philosophy and Theory of Music Therapy (3 hours), MEMT 890 Practicum in Music Therapy (2 hours), MEMT 899 Master’s Thesis (3 hours if thesis option) or MEMT 898 Comprehensive Examination (1 hour if nonthesis option), and additional hours to reach the minimum elected from 700- and 800-level MEMT courses, subject to the advisor’s approval. At least 2 courses must be at the 800 level. At least 9 of these hours must be in regularly scheduled courses.
• At least 10 hours in supportive studies outside MEMT.
• Proficiency as a performing musician must be demonstrated before the degree may be awarded.

The work is distributed as indicated in the categories on the appropriate Degree Program Plan found online (http://music.ku.edu/MME/requirements). All of these selections are subject to the advisor’s approval.

The M.M.E. with a major in music therapy may be earned only by individuals eligible to sit for the national examination offered by the Certification Board for Music Therapists (CBMT).

Final Master’s Examination (Thesis)
The student must be enrolled at the time the final master’s exam is held. The exam will be scheduled for a period of 2 hours. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final thesis copv to each committee member 2 weeks in advance of the scheduled exam date.

The candidate will begin by giving a twenty-minute oral presentation on his or her thesis, but the exam is not confined to that topic. Thereafter, the candidate will address questions posed by the committee arising from the candidate’s presentation and the thesis document.

Final Master's Examination (Non-Thesis)
The non-thesis option typically functions as a terminal degree and the work must be distributed as indicated in the categories shown on the appropriate Degree Program Plan. This option culminates with enrollment in a 1-credit hour comprehensive final examination (MEMT 898 Comprehensive Examination) and the subsequent portfolio and presentation.

The student must be enrolled at the time the final non-thesis master’s exam is held. The non-thesis master’s exam includes presenting a portfolio and will be scheduled for a period of 1 hour. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final portfolio to each committee member 2 weeks in advance of the scheduled examination date.

More information about the thesis or non-thesis option is available online (http://music.ku.edu/MME/requirements) in the MME Graduate Handbook.

Doctor of Musical Arts in Composition

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:
• Church music (organ or choral conducting emphasis),
• Composition,
• Conducting (choral, orchestral, or wind), and
• Areas of performance

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2280) section of the online catalog. Further admission requirements are listed below.

Composition

Applicants should submit at least 3 scores of original works (including master’s thesis), recordings if available, and lists of past performances.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

• Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
• Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each graduate student selects a faculty advisory committee, in consultation with the major advisor, subject to the consent of the faculty members involved, and approved by the associate dean. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations.

Recitals

Composition students must present a public program of original compositions approximately 45 minutes in length and participate in at least one work as either a performer or conductor.

All recitals and public appearances required for the D.M.A. are graded by the performance members of the student's graduate advisory committee. The student must achieve at least a grade of B on each recital for satisfactory completion of degree requirements.
Written and Oral Comprehensive Examinations

Composition doctoral students must take written examinations in music theory and musicology when most of the course work has been completed and the research skills/responsible scholarship requirements have been fulfilled. All diagnostic deficiencies must be satisfied before taking the written and oral comprehensive exams. After successful completion of the written examinations, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee.

Large-Scale Composition

Candidates in composition must submit to the student’s graduate advisory committee a proposal for a large-scale composition at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. The composition proposal should outline a large-scale work for orchestra, with or without soloists, a work for chorus and orchestra, or an opera, and should include a preliminary analysis.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination. For students in composition, the examination is primarily a defense of the large-scale composition.

The student must receive at least a grade of B on the composition for satisfactory completion of degree requirements.

Examinations

At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

Doctor of Musical Arts in Conducting

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2280) section of the online catalog. Further admission requirements are listed below.

Conducting

Applicants are expected to have had experience in conducting that spans a period of not less than 2 years. This may include work in public school, college, or with other amateur or professional ensembles. Applicants normally are expected to have a high level of performing ability on an instrument or in voice. Applicants are expected to submit preliminary audition materials that include a DVD recording of the applicant conducting in performance and in rehearsal, a CD recording of an ensemble trained and conducted by the applicant, and a prescribed formal analysis project. Details can be found at the band, choral, and orchestral links on the School of Music’s website (http://music.ku.edu).

An entrance interview-audition is required for admission. The audition is heard by a committee composed of the Graduate Faculty of the conducting divisions. Approval by a majority of the committee is required for acceptance into the program. The audition may include:

1. Harmonic and melodic dictation and/or sight-singing;
2. Score identification;
3. Score reading at the keyboard; and
4. Conducting from a band, choral, or orchestral score to be selected by the examiners.

International students may submit a DVD. The Graduate Faculty in the ensemble divisions will review this recording.

Students applying to the D.M.A. program in choral conducting must display a working knowledge of 2 of the following 4 languages: French, German, Spanish, and Italian. A working knowledge normally implies at least 2 semesters of undergraduate study.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and
a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations
All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements
Research Skills and Residency
Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Exams
All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee
Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study
A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals
All students in performance and in choral, orchestral, and wind conducting must perform a total of 3 doctoral recitals. This number does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Doctoral conducting students are expected to perform 3 public, concert-length recitals. Up to 2 recitals may consist of the combination of works conducted with various official university ensembles over the course of several semesters. The third recital must be a single program with a major ensemble assigned as part of course work or teaching duties and presented as a regular program in that ensemble’s performance schedule. The third recital may include a complete performance of an opera, ballet, dance, or musical. A student who wishes to use an ensemble other than an official university ensemble must obtain permission to do so from the directors of ensembles.

For the first 2 required recitals in the D.M.A. program in performance and conducting, a recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve the recital content well in advance but no less than 3 weeks before the recital date. Normally, there is no recital preview for the final recital.

Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills
requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

**Document or Lecture-Recital**
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

**Examinations**
At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

**Cognate**
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

**Doctor of Musical Arts in Music Performance: Brass and Percussion**

**Doctor of Musical Arts**
The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

**D.M.A. Admission**
The applicant is expected to have a master's degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2280) section of the online catalog. Further admission requirements are listed below.

---

* Credits can be used to fulfill the optional Cognate credits

View a check sheet (http://music.ku.edu/resources/checksheets.shtml) for this degree program.
Performance

The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (http://music.ku.edu/prospective/auditions.shtml).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except those in music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a student has the academic background necessary to succeed in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801 Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in musicology and music theory. The exams are given during the week before the Fall and Spring semesters begin. This degree program.

Doctor of Musical Arts in Music Performance: Organ and Church Music

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

• Church music (organ or choral conducting emphasis),
• Composition,
• Conducting (choral, orchestral, or wind), and
• Areas of performance.

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2280) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (http://music.ku.edu/prospective/auditions.shtml).
Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except MM-Opera) are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Language Requirement

All organ and church music doctoral students must demonstrate competence in one foreign language. Approved languages include French and German for organ majors and French, German, or Latin for Church Music majors. Students may petition the organ faculty for approval of a language other than those stated.

Advisory Committee

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Church Music with Choral Conducting emphasis must present 2 choral recitals and 1 organ or voice recital. Church Music with Organ emphasis must present 2 organ recitals and 1 choral recital.

D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnosis Exams

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Language Requirement

All organ and church music doctoral students must demonstrate competence in one foreign language. Approved languages include French and German for organ majors and French, German, or Latin for Church Music majors. Students may petition the organ faculty for approval of a language other than those stated.

Advisory Committee

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Church Music with Choral Conducting emphasis must present 2 choral recitals and 1 organ or voice recital. Church Music with Organ emphasis must present 2 organ recitals and 1 choral recital.
Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Examinations
At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

Cognate
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student’s advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Piano

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at
the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2280) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (http://music.ku.edu/prospective/auditions.shtml).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801 Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations

All incoming graduate students, except those in MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course. The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each doctoral student must form a Graduate Advisory Committee. The committee consists of at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least
from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

**Program of Study**

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

**Recitals**

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

**Written and Oral Comprehensive Examinations**

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

**Document or Lecture-Recital**

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

**Examinations**

At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

**Cognate**

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student’s advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.
At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**Diagnostic Examinations**

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor's or master's degree in music from the University of Kansas within the previous 4 years.

**D.M.A. Degree Requirements**

**Research Skills and Residency**

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

**Diagnostic Exams**

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

**Advisory Committee**

Each graduate student, in consultation with the major advisor, selects a Graduate Advisory Committee subject to the consent of the faculty members involved, and approval of the School of Music Graduate office. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), 1 from the School of Music at large and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

**Program of Study**

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

**Recitals**

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

**Written and Oral Comprehensive Examinations**

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

**Document or Lecture-Recital**

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

**Language and Diction**

Students in the D.M.A. program in voice must take or have taken a minimum of 1 year each of French, German, and Italian, and courses in English, French, Italian, and German diction before completing the D.M.A. program. If deficient in any language or diction coursework, as determined either through transcript evaluations or during the audition when selections from each language have been performed, the student must enroll in the specific course for that deficiency and pass with a grade of C or better. All deficiencies must be satisfied before the oral comprehensive exam can be scheduled.

**Examinations**

At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.
Cognate

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee.

Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Voice Program

MUSC 801 Music Bibliography and Research 3
VOIC 961 Directed Performance (Applied lessons) 18
Seminars 9
VOIC 965 Doctoral Recitals (1 credit each) 3
Advanced courses in musicology and music theory* 12
Electives* 12
D.M.A. document or lecture-recital 4

* Credits may be used to fulfill the 12 optional Cognate credits.

View a check sheet (http://music.ku.edu/resources/checksheets.shtml) for this degree program.

Doctor of Musical Arts in Music Performance: Woodwinds

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master's degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2280) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform the equivalent of a full master's recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (http://music.ku.edu/prospective/auditions.shtml).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor's or master's degree in music from the University of Kansas within the previous 4 years.
D.M.A. Degree Requirements

Research Skills and Residency
Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations
All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: (1) re-taking the exam the next time it is given (one re-take only) or (2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee
Each graduate student, in consultation with the major advisor, selects a Graduate Advisory Committee subject to the consent of the faculty members involved, and approval of the School of Music Graduate office. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), 1 from the School of Music at large and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study
A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals
All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations
At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

Cognate
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee.

Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Philosophy

View requirements for:

• Doctor of Philosophy in Music (p. 2186)
• Doctor of Philosophy in Music Education (p. 2187)
Doctor of Philosophy in Music

Ph.D. in Music

The Ph.D. in Music is offered in Musicology or Music Theory.

Ph.D. in Music Admission

The Doctor of Philosophy degree in music is offered in musicology and music theory. The applicant is expected to hold a Master of Music degree with emphasis in musicology or music theory or an equivalent master’s degree from another accredited institution. In addition to the required transcripts, Graduate Record Examination scores, and letters of recommendation, the applicant for admission to the Ph.D. program should submit a resume or CV of professional training and experience and samples of original scholarly writing.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions website (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all coursework counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

Doctor of Philosophy in Music Degree Requirements

Foreign Language Requirements

Aspirants to the Ph.D. degree in music theory and musicology are expected to demonstrate reading knowledge of German and a Romance language chosen from French, Italian, Portuguese, or Spanish. Reading proficiency must be demonstrated before scheduling the oral comprehensive examination. The student also may be advised to develop reading proficiency in another language or languages in order to pursue research for the dissertation.

Course of Study

Specific course work for each student is arranged individually in consultation with the student’s advisor. The Ph.D. program normally requires 4 years of full-time study beyond the master’s degree, with the first 2 years devoted to course work. A minimum of 18 credit hours is devoted to the dissertation, an original contribution to knowledge in the student’s research area.

Students in musicology must complete at least 2 semesters of MUSC 654 or MUSC 656 Collegium Musicum, and 2 semesters of MUSC 940 Seminar on Selected Topics in Musicology. In addition, students must complete at least 3 more 3-credit-hour courses in advanced musicology and at least 3 more 3-credit-hour courses in advanced music theory.

Although the Ph.D. program does not include a minor area, students are encouraged to continue their study of performance and/or composition, and may be advised to take nonmusic courses that are directly applicable to their fields of research for the dissertation.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2280) section of the online catalog.

Research Skills and Responsible Scholarship

Doctoral students are required to have training in both responsible scholarship and research skills pertinent to the doctoral level of research in their field of study.

To satisfy both components, D.M.A. students in performance or composition and Ph.D. students in Musicology or Music Theory must complete MUSC 801 Music Bibliography and Research (or its equivalent) and, if available, participate in advanced performance seminars.

Scholarly Presentation

Each candidate for the Ph.D. degree in musicology and music theory must make a public presentation of no less than 20 minutes on a scholarly topic. This requirement may be fulfilled by reading a paper at a national or
regional meeting of a society in the student’s discipline or in a colloquium at KU.

**Written and Oral Comprehensive Examinations**

Students must take written examinations in music theory and musicology when most of the course work has been completed and research skills/responsible scholarship requirements have been fulfilled. Some major divisions also may require a written examination in the major area. Upon successful completion of all written examinations, the student is eligible to schedule the oral comprehensive examination administered by the graduate advisory committee. With the satisfactory completion of both written and oral comprehensive examinations the aspirant is admitted to candidacy for the degree of Doctor of Philosophy.

**Dissertation Proposal**

No later than the end of the semester after successful completion of the written and oral comprehensive examinations, the candidate, in consultation with the faculty dissertation committee, must submit a dissertation proposal of several pages with a preliminary bibliography, outline, and description of the project and research plan.

**Final Oral Examination**

Following completion of the dissertation, a final oral examination is scheduled in which the candidate presents and defends the results of dissertation research and is expected to respond to questions from the faculty committee. A grade of at least B must be achieved on the dissertation for satisfactory completion of the degree requirements.

**Doctor of Philosophy in Music Education**

**Ph.D. in Music Education**

The Doctor of Philosophy with an emphasis in either music education or music therapy focuses on research and scholarship. It is often sought by those who aspire to careers in research and graduate-level teaching. The requirements help the student develop broad and profound understanding of musical behavior, sophisticated skill and extensive experience in pursuing new knowledge of such behavior, and a rational system for evaluating the relationships between the specialty and other areas of human understanding. The program culminates with completion of a substantial piece of original research.

Detailed information about admission processes in Music Education and Music Therapy can be found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

**Ph.D. in Music Education Admission Requirements for Regular Admission**

1. Master’s grade point average of at least 3.5 on a 4.0 scale.
2. Appropriate baccalaureate and master’s degrees to support the individual’s goals for doctoral study.
3. Scores on the Graduate Record Examination (verbal, quantitative, and analytical writing).
4. 3 letters of recommendation estimating the applicant’s potential for success in doctoral study.
5. Documentation of at least 18 months successful full time experience, or its equivalent, as a professional music educator if seeking an emphasis in music education, or at least 5 years successful full-time experience as a professional music therapist, or its equivalent, if seeking an emphasis in music therapy.
6. Submission of a video recording appropriate to the degree emphasis.
7. A reasoned statement of professional goals and research interests.
8. An interview with the appropriate faculty for area of emphasis.
9. Other supporting materials may be required.
10. Passing score on the music education and music therapy division diagnostic examination to be taken at the end of the first semester.

Additional detailed admission requirements and information are found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

**Graduate Admission to the School of Music**

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

**Program Areas**

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**Diagnostic Examinations**

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations...
in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt if he or she received a bachelor's or master's degree in music from the University of Kansas within the previous 4 years.

Ph.D. in Music Education Degree Requirements

Research Skills

Doctoral students in music education and music therapy at KU must demonstrate research skills by completing 3 research projects suitable for publication. These may be developed and completed independently or in consultation with appropriate doctoral faculty members. There must be a project of each of the following types: descriptive, experimental, and historical (including the history and logic of ideas). The descriptive and experimental research articles should be presented in APA style. The historical research article may be presented in Turabian, MLA, or APA style.

Each completed project is reviewed by the student’s doctoral committee, which rules in the majority whether the project is of sufficient quality for publication in a national, refereed research journal in music education or music therapy. Single-author studies that have been published or accepted for publication in such journals may be used to demonstrate these skills.

Completion of each of the 3 research projects must be certified by the student’s mentor/advisor in music education or music therapy on the MEMT Doctoral Check List in the student’s file in the MEMT office. The mentor/advisor must submit an appropriate MEMT Do-All form after the completion of each project.

Responsible scholarship requirements are met by satisfactory completion of courses MEMT 812 Research in Music Education and Music Therapy and MEMT 920 Doctoral Seminar in Music Education and Music Therapy.

Preliminary and Comprehensive Examinations

The student must pass a series of examinations, culminating with the comprehensive oral examination.

The music education and music therapy Ph.D. handbook is available online (http://music.ku.edu/PHD/requirements) and in the MEMT office, and includes information about patterns of coursework, the Ph.D. minor, examinations, and the dissertation.

Plan of Study

Course requirements for the doctoral degree are flexible. The Ph.D. program requires a minor. Each student’s program is planned specifically in light of his or her background and to meet the needs of the anticipated academic and professional career. However, each student is expected to achieve a broad understanding of human musical behavior and to become skilled in research. Professional competence, not hours of credit per se, is the underlying requisite for conferring the degree.
Nursing

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu) for details). Other years' catalogs (http://catalog.ku.edu/archives)

School of Nursing Programs
Bachelor of Science in Nursing (p. 2211)
Master of Science in Nursing (p. 2215)
Doctor of Philosophy in Nursing (p. 2216)
Doctor of Nursing Practice (p. 2217)
Post-Master's Certificate Programs in Nursing (p. 2219)

Interprofessional Programs
Master of Science in Health Informatics (p. 1962)
Doctor of Philosophy in Therapeutic Sciences (p. 701)

The School of Nursing
The School of Nursing is one of 3 schools at the University of Kansas Medical Center (http://www.kumc.edu) in Kansas City, Kansas. Academic programs at KU Medical Center are offered through the Schools of Health Professions, Medicine, and Nursing. The Office of Graduate Studies at KUMC (http://www.kumc.edu/academic-affairs/graduate-studies.html) handles matters related to graduate programs in Health Professions, Medicine, and Nursing.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu). One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791. This organization is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master's, and D.N.P. programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org). The Nurse Midwifery Program is accredited by the Accreditation Division of the American College of Nurse-Midwives (http://www.midwife.org), 818 Connecticut Ave., NW, Suite 900, Washington, DC 20036, (202) 728-9860.

Undergraduate Programs
The Bachelor of Science in Nursing (BSN) program prepares baccalaureate generalist nurses for professional nursing practice. The American Association of Colleges of Nursing's Essentials of Baccalaureate Education for Professional Nursing Practice provide the framework for this first step in professional nursing education (AACN. 2008). The roles of the baccalaureate generalist include: provider of care, designer/manager/coordinator of care, and member of a profession. Baccalaureate generalist education provides the foundation for all graduate nursing education.

High School Preparation
High school students planning to enter the baccalaureate program in nursing are encouraged to follow a general college preparatory course of study. Such a course usually emphasizes basic preparation in English, a foreign language, mathematics, natural science, and social sciences.

Graduate Programs
Basic admission requirements are listed in the Graduate Studies (p. 2280) section of the online catalog. Individual graduate programs may have additional specific requirements including prerequisite undergraduate courses. These are listed or referenced in program descriptions. Combined degree options are available.

The School of Nursing offers the following graduate degrees:
- Master of Science in Nursing (p. 2215)
- Doctor of Nursing Practice (p. 2217)
- Doctor of Philosophy (p. 2216)
- Post-Master's Certificate Programs (p. 2219)

For online information about graduate programs, visit the school's website (http://nursing.kumc.edu).

Undergraduate University Regulations
For information about university regulations, see Regulations (p. 13) or visit the University of Kansas Policy Library (http://www.policy.ku.edu).

Academic Forgiveness
Academic forgiveness does not apply in the School of Nursing.

Change of School
To change from one school to another, you must submit a Change of School form in the dean's office of the school you plan to enter. Follow the deadlines on the form.

Admission is competitive and occurs once each year for the traditional BSN program, in the fall semester. Applications are due by October 15 of the year before beginning classes.

Credit/No Credit
A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (https://documents.ku.edu/policies/governance/USRR.htm#art2sect2).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Grading
Courses in which grades of D and F are earned do not count toward graduation.

Graduation with Distinction and Highest Distinction
Students who rank in the upper 10 percent of their graduating class may graduate with distinction. The upper third of those awarded distinction may graduate with highest distinction. The list is compiled each spring and includes July, December, and May graduates.
Honor Roll

Students with grade-point averages of 3.5 who have completed at least 12 hours are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

Honors Graduates

For students who complete the school’s honors program, designation of honors appears on the transcript.

Independent Study Through KU Continuing Education

Students may complete up to 31 hours of Independent Study through KU Continuing Education, credit-by-examination, and/or extension courses.

Probation

Probation

Students whose grade-point averages fall below 2.0 for the semester are placed on probation. The associate dean of student affairs notifies the student by letter. It is the student’s responsibility to seek a conference with the student affairs advisor. The student and the student affairs advisor assess the situation jointly and make appropriate recommendations.

Return to Good Standing

A student remains on probation until completion of the next term in which the student is enrolled full time. (Full-time enrollment is 12 hours or more; full-time summer session enrollment is 6 hours or more.) To be removed from probation, a part-time student must maintain a 2.0 grade-point average in the next 12 semester hours of enrollment. Only courses required for the nursing major (junior/senior course work) apply toward the required grade-point average for removal from probation. If the student attains a grade-point average higher than 2.0 in the probationary semester, the student is removed from probation. No student may graduate with a nursing grade-point average lower than 2.0 or an overall grade-point average lower than 2.0.

Dismissal

If the student does not attain a grade-point average higher than 2.0 in the probationary semester, the student is dismissed for academic reasons. One nursing course may be repeated one time only if necessary to earn the minimum grade of C or S. Failure to achieve a minimum grade of C or S in two nursing courses or one repeated nursing course results in the student’s dismissal.

Repetition of Courses

For admission to the school, grades in all courses taken and retaken are included in the grade-point average. All grades are considered for calculation of honors and awards.

Transfer of Credit

CredTran (http://credittransfer.ku.edu) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU. Only transfer grades of C or higher apply toward graduation at KU.

Graduate University Regulations

For information about university regulations, see Regulations (p. 13). For Graduate Studies regulations, see Office of Graduate Studies, Medical Center Campus (p. 2310) section of this catalog.

Academic Forgiveness

Academic forgiveness does not apply in the School of Nursing.

Credit/No Credit

Graduate students may select the Credit/No Credit option for courses that do not fulfill a degree requirement, but this option may be limited in certain programs. Students should follow the policy outlined in the University Senate Rules and Regulations, Section 2, article 2.27, and contact the department or program for more information.

Nursing (Graduate) Courses

NRSG 520. Medical Spanish I. 2 Hours.
This is an entry level Medical Spanish course for students with minimal or no Spanish language education. Students completing this course will have acquired the language skills necessary to interact at a basic level in a medical context. Prerequisite: None. LEC.

NRSG 521. Medical Spanish II. 2 Hours.
This is an intermediate-low level Medical Spanish class. In Medical Spanish level 2 students build on what they have learned in the prerequisite level. Students expand their vocabulary skills to include medical specialties and procedures as well as their ability to describe medical conditions. Prerequisite: Medical Spanish 1 or equivalent. LEC.

NRSG 550. Research Coordinator: Pre-Study Activities. 3 Hours.
This course is designed as an introduction to the Research Coordinator role and provides in-depth knowledge of Pre-Clinical Trials Study activities. Regulatory, administrative, and ethical issues will be presented as well as the daily operational requirements (study design, financial aspects, protocols, hiring of personnel, subject recruitment, etc.) to begin a study. Prerequisite: Senior status, RN licensure, Graduate level, or consent of instructor. LEC.

NRSG 551. Research Clinical Trial Coordinator: Post-Study Activities. 3 Hours.
This course is designed as an introduction to the Research Coordinator role and provides in-depth knowledge of during-Clinical Trial Study activities. The process of conducting the ‘day-to-day’ operations of a research study; subject recruitment, data collecting forms and documenting subjects’ responses to the interventions, audits, inspections, budget monitoring, ethical/liability situations that may occur during the study, etc. will be addressed. PREREQUISITE: NRSG 550 or consent of instructor. LEC.

NRSG 552. Research Clinical Trial Coordinator: Post-Study Activities & Practicum Experience. 3 Hours.
This course is designed as an introduction to the research clinical trial coordinator role and provides in-depth knowledge of Post-Clinical Trial Study activities. The process of conducting the ‘day-to-day’ operations of a research study; preparing for final sponsor and FDA visits; preparing final reports to the sponsor and IRB; evaluating sponsor, site, and team members’ performance; management of data and preparing summary reports; etc will be addressed. The course is also designed to provide the student with a Research Coordinator practicum experience in selected research settings. Opportunities are provided to utilize learned details related to the role of a Research Coordinator during key phases of a Clinical Trial Study:

NRSG 520. Medical Spanish I. 2 Hours.
This is an entry level Medical Spanish course for students with minimal or no Spanish language education. Students completing this course will have acquired the language skills necessary to interact at a basic level in a medical context. Prerequisite: None. LEC.

NRSG 521. Medical Spanish II. 2 Hours.
This is an intermediate-low level Medical Spanish class. In Medical Spanish level 2 students build on what they have learned in the prerequisite level. Students expand their vocabulary skills to include medical specialties and procedures as well as their ability to describe medical conditions. Prerequisite: Medical Spanish 1 or equivalent. LEC.

NRSG 550. Research Coordinator: Pre-Study Activities. 3 Hours.
This course is designed as an introduction to the Research Coordinator role and provides in-depth knowledge of Pre-Clinical Trials Study activities. Regulatory, administrative, and ethical issues will be presented as well as the daily operational requirements (study design, financial aspects, protocols, hiring of personnel, subject recruitment, etc.) to begin a study. Prerequisite: Senior status, RN licensure, Graduate level, or consent of instructor. LEC.

NRSG 551. Research Clinical Trial Coordinator: Post-Study Activities. 3 Hours.
This course is designed as an introduction to the Research Coordinator role and provides in-depth knowledge of during-Clinical Trial Study activities. The process of conducting the ‘day-to-day’ operations of a research study; subject recruitment, data collecting forms and documenting subjects’ responses to the interventions, audits, inspections, budget monitoring, ethical/liability situations that may occur during the study, etc. will be addressed. PREREQUISITE: NRSG 550 or consent of instructor. LEC.

NRSG 552. Research Clinical Trial Coordinator: Post-Study Activities & Practicum Experience. 3 Hours.
This course is designed as an introduction to the research clinical trial coordinator role and provides in-depth knowledge of Post-Clinical Trial Study activities. The process of conducting the ‘day-to-day’ operations of a research study; preparing for final sponsor and FDA visits; preparing final reports to the sponsor and IRB; evaluating sponsor, site, and team members’ performance; management of data and preparing summary reports; etc will be addressed. The course is also designed to provide the student with a Research Coordinator practicum experience in selected research settings. Opportunities are provided to utilize learned details related to the role of a Research Coordinator during key phases of a Clinical Trial Study:
pre-study, during-study, and at the end-study activities. PREREQUISITE: NRSG 551 or consent of instructor. LEC.

NRSG 564. Health Care of Persons with Patterns of Addiction. 1-2 Hours.
Health care implications for client systems with problems related to alcohol and other commonly abused chemicals are examined. Both acute and chronic responses will be presented as effects upon the psychosocial, biological, cognitive/perceptual and spiritual/belief dimensions of the client systems. Ethical and legal considerations will be explored in conjunction with current research findings. Prerequisite: Senior status, RN licensure, Graduate level, or consent of instructor. LEC.

NRSG 565. Nursing Care of Persons with Patterns of Chemical Dependency: Practicum. 2 Hours.
Clinical application of the nursing process for complex client systems with problems related to alcohol and other drug abuse is the primary purpose of the course. Assessing clients and planning interventions to restore system balance will be emphasized. Resources appropriate for these clients within the community will be investigated. This course is designed to complement the didactic course NRSG 564 Health Care of Persons with Patterns of Addiction by affording students opportunities for building experiential skills. Prerequisite: Corequisite: NRSG 564, Senior status, RN licensure, Graduate level, or consent of instructor. LEC.

NRSG 572. Topics for Health Professional Educators. 2-3 Hours.
This topics course is designed to develop the health professional's role as educator and to promote a skill set to enhance teaching and learning for diverse populations. Experiences are gaining assessed the learning needs of a target population and developing educational topics. Participants apply current learning theories and effective teaching strategies to design, implement and evaluate educational experiences. Technological advances, as well as current and future issues in teaching and learning are considered. Content, specific to the topic, includes role development issues, assessment and planning strategies, teaching/learning concepts, technology implications, and evaluation concepts. Prerequisite: Corequisite: Senior Level Nursing/Allied Health, Admission to Graduate program or consent of instructor. LEC.

NRSG 720. Introduction to Nursing Informatics. 2 Hours.
This course will provide an overview of hospital information systems, nursing information systems, artificial intelligence, and micro and mainframe computers. Interactive laboratory experiences will examine microcomputer uses for problem solving in nursing education, nursing research, nursing practice, or nursing administration. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.

NRSG 721. Understanding and Changing Health Behavior. 3 Hours.
The student is introduced to theories, research, and issues related to health behavior. Health behavior includes actions or activities undertaken for the purpose of promoting, preserving, or restoring wellness, and actions or activities that endanger wellness or cause illness. Internal and external influences are considered. The problems encountered by persons who are attempting to alter their own health behavior are addressed. The role of nurses in changing health behaviors in individuals, families, communities, and the larger society are examined. Prerequisite: Consent of instructor. LEC.

NRSG 722. Scholarly Writing for the Health Professional. 3 Hours.
Development of scholarly writing skills is emphasized to promote professional communication and to enhance professional image. Students enrolled in this interdisciplinary course analyze their own and others' writing to improve their written communications. Writing skills are practiced and developed by critiquing published articles, and by preparing written memorandums, letters, abstracts, and a manuscript. Legal and ethical issues related to the publication process are explored. Prerequisite: Admission to the graduate program, or consent of instructor. LEC.

NRSG 723. Advanced Practice Geriatric Nursing of the Frail Older Adult. 2-3 Hours.
The knowledge and skills necessary to provide holistic care for the frail elderly client are emphasized in the advanced practice nursing course. Physical and multidimensional functional assessments are discussed as a basis for establishing functional approaches to care and planning effective therapeutic interventions in various long-term care settings. Strategies for coordination of services and collaboration with an interdisciplinary team for comprehensive health care are integrated throughout the course. Prerequisite: Admission to the graduate program or consent of instructor (excludes students in the Adult/Geriatric Nursing track). LEC.

NRSG 731. Pharmacokinetics and Pharmacodynamics for Advanced Practice Nursing. 1 Hour.
General principles of pharmacology, including pharmacokinetics and pharmodynamics, are discussed in preparation to prescribe. The principles for decision making about drug selection, use and monitoring are examined. Prerequisite: Corequisite: Admission to the graduate program, or consent of instructor. LEC.

NRSG 742. Pediatric Hematology/Oncology Essentials for Advanced Nursing Practice. 3 Hours.
An understanding of pathophysiological and psychosocial changes that occur within the internal environment of the child in the presence of malignant disease, and effects on the family unit, are provided as a rationale for therapeutic interventions. The course covers the most common pediatric cancer diagnoses, related treatments, side effects of treatment, supportive care, psychosocial issues, patient and family education, late effects, and care during end of life. The principles of advanced pediatric hematology/oncology nursing, standards of evidence-based practice, and research are discussed. Prerequisite: Advanced Pathophysiology, Graduate Research Course, or consent of instructor. LEC.

NRSG 748. Theories for Practice and Research. 3 Hours.
Theory development and analysis techniques provide the framework for the study of concepts and theories from nursing and related disciplines. Particular emphasis will be placed on the relationship of theory and research in the development of nursing knowledge to support evidence-based practice. This course will enhance the decision-making skills for choosing and using concepts and theories that guide practice. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.

NRSG 754. Health Care Research. 3 Hours.
This course will enable the student to synthesize nursing knowledge and make recommendations to translate research findings into practice within diverse health care settings. Research methods, processes and findings for use in practice will be critically evaluated. Emphasis will be placed on formulating relevant research questions from theory and practice. Prerequisite: Admission to the graduate nursing program, Graduate Statistics, or consent of instructor. LEC.

NRSG 755. Professionalism in Advanced Nursing Practice. 3 Hours.
An analysis of economic, political, legal, ethical, professional, societal and cultural issues is conducted within the context of advanced nursing practice. Application of concepts essential to understanding, influencing and leading change in health care delivery specific to advanced nursing practice is emphasized. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.
NRSG 801. Advanced Health Assessment and Clinical Reasoning. 3 Hours.
The purpose of this course is to develop knowledge and skills for advanced clinical nursing practice, including comprehensive history and physical exam across lifespan. Content on special populations, communication with patients and care teams, cultural considerations, health promotion and prevention, and use of electronic health records will be discussed with opportunity for application. Prerequisite: Corequisite: NRSG 812: Advanced Pathophysiology, or permission of course faculty. LEC.

NRSG 802. Methods for Qualitative Research. 3 Hours.
The naturalistic paradigm and various qualitative research approaches such as ethnography, phenomenology/hermeneutics, historiography, grounded theory and/or others are explored. Emphasis is placed on the appropriateness of each approach for description and explanation of phenomena encountered in clinical, organizational, and educational settings. Experience is provided in problem formulation and development of qualitative research proposal. Prerequisite: NRSG 804 or NRSG 945, or consent of the instructor. LEC.

NRSG 803. Introduction to Clinical Research. 1 Hour.
This course will provide a comprehensive overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical research among the various institutional entities involved with clinical research at the University of Kansas Medical Center such as the Research Institute (RI), General Clinical Research Center (GCRC) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on how to apply for funding (grantsmanship), critical appraisal of research studies, and how to present research data. Prerequisite: Consent of instructor. LEC.

NRSG 804. Interpreting Research for Applied Science. 3 Hours.
Research relevant to therapeutic intervention comes from a variety of disciplines involving varied research designs and analysis strategies. Students in this course will examine selected research studies and gain skill in analyzing methods and results as well as in applying research findings to practical problems. Students also will design their own research project reflecting their area of interest. Prerequisite: Corequisite: NRSG 748, 754, and 755 or consent of instructor. RSC.

NRSG 805. Caring for People with a Disability. 2 Hours.
This course will provide an opportunity for students to learn how to effectively care for a person with a disability in a health care or public health setting. This will include learning to effectively communicate and partner with people with disabilities. This course will address disability civil rights and provide a basic understanding of a variety of disability conditions and options/resources available for independent living. Through effective partnerships, providers and health professionals can support people with disabilities to achieve independent, healthy lives. Prerequisite: Consent of instructor. LEC.

NRSG 806. Advanced Physiology. 4 Hours.
This course is designed to lead to an advanced comprehension of the physiology of organ systems in the human in both cellular and organ processes. Physiology subject matter relevant to clinical health sciences include membrane transport, muscle, cardiovascular, respiratory, renal, water and electrolyte balance, gastrointestinal, and endocrine physiology as well as neurophysiology. Cellular mechanisms include the structure and function of ion channels and pumps, mechanisms of calcium regulation, excitation-coupling processes and mechanisms of oxidative cell damage and apoptosis. Prerequisite: Admission to the Graduate Nursing Program or Consent of Instructor. LEC.

NRSG 807. Genetics in Primary Care. 2 Hours.
This course is designed to give the primary care nurse practitioner and other graduate nursing students a foundation in medical genetics. The basics of genetics, common genetic disorders and genetic testing are discussed. The application of this knowledge to counsel individuals at risk for genetic disorders is emphasized through the use of case studies. Ethical, legal and clinical practice issues and perspectives of primary care counseling in genetics are addressed. Prerequisite: Admission to the Graduate Nursing Program or Consent of Instructor. LEC.

NRSG 808. The Social Context for Health Care Policy. 2 Hours.
Using a local/single clinical issue students examine ways to abstract this issue into a social policy context. Local exemplars are used throughout the course to demonstrate the leadership and structural systems required to effect change in policy. Strategies to identify constituencies and build coalitions are studied. Prerequisite: NRSG 755, or consent of instructor. LEC.

NRSG 809. Health Promotion and Complementary Therapeutics. 3 Hours.
Current trends in health promotion and clinical preventive care across the lifespan are examined. Specific guidelines for assisting clients to maintain/improve health and/or prevent illness are reviewed. Attention is given to the roles of the health care provider and care recipient in screening, communication, and counseling. The use of complementary (non-pharmacological) therapeutics in assisting clients to achieve goals of health promotion is examined. The recommendation and use of non-pharmacological interventions will be evaluated based on research findings related to selection of therapeutics and measurement of expected outcomes following use of a particular intervention. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.

NRSG 810. Advanced Health Assessment and Physical Diagnosis. 5 Hours.
Building upon basic health assessment, knowledge and skills for advanced clinical practice are discussed, described and demonstrated. The advanced clinical practice content is then applied in multiple clinical settings (120 hours of clinical practice is required). Content on special populations that cover the lifespan is presented (i.e. geriatrics, pediatrics, women's health) followed by directed laboratory and simulated experiences. The concept of clinical decision making for differential diagnosis is introduced and applied to patient-focused data. Prerequisite: Consent of instructor. LEC.

NRSG 812. Advanced Pathophysiology. 3 Hours.
An in-depth scientific knowledge base relevant to selected pathophysiological states confronted in primary care is explored. This information provides a basis for the formulation of clinical decisions related to diagnostic tests and the initiation of therapeutic regimens. Age specific and developmental alterations are correlated with clinical diagnosis and management. Application is made through age appropriate examples. Prerequisite: NURA 806/NRSG 806, or consent of instructor. LEC.

NRSG 813. Applied Drug Therapy. 3 Hours.
The clinical application of specific categories of drugs, commonly encountered in primary care settings is discussed. The use of protocols, prescription writing, and the ethical/legal, and economic issues surrounding the advanced nurses' role in prescribing and monitoring pharmacologic therapies in the ambulatory setting are explained. Factors such as age-appropriate content related to pharmacokinetics, dosages, expected outcomes, and side effects of the drugs are discussed. First line
NRSG 814. Primary Care I: Management of Common Health Problems Throughout the Life Span. 3 Hours.
Management of common health problems seen in individuals and families throughout the life span are discussed in the first of two sequential courses. Applications of current research and theory-based interventions appropriate for protocol-based management by advanced registered nurse practitioners are analyzed. Strategies to manage common health problems in urban and rural patients are explored. Interventions to restore individual and family level of pre-illness health, and positive lifestyle behaviors are emphasized. Prerequisite: NRSG 748, NRSG 755, NRSG 809, NRSG 810, NRSG 812 or Consent of Instructor. Prerequisite: Corequisite: NRSG 813. LEC.

NRSG 815. Primary Care I Practicum: Management of Common Health Problems Throughout the Life Span. 2 Hours.
Opportunities to develop beginning skills as advanced practice nurses in a primary care setting are provided. Emphasis is on assessment, clinical decision making, and management of clients/client systems of all ages/stages who are experiencing common health problems. Internal and external environmental factors as well as legal, ethical and economic concerns related to the presenting common health problems are explored. Current research outcomes and theory-based interventions appropriate for management by advanced practice nurses are stressed. Collaboration and consultation (including referrals) with appropriate health providers is emphasized. Prerequisite: NRSG 814, NRSG 816 or Consent of Instructor. LEC.

NRSG 816. Primary Care II: Management of Complex Health Problems Throughout the Life Span. 3 Hours.
Complex health problems seen in individuals and families throughout the life span are discussed in this second sequential course. Applications of current research and theory-based interventions appropriate for management by advanced registered nurse practitioners are analyzed. Strategies and protocols to manage complex patient problems, in urban and rural patients, are explored. Interventions to restore individual and family levels of pre-illness health, including secondary and tertiary prevention, are emphasized. Prerequisite: NRSG 813, NRSG 814 or Consent of Instructor. LEC.

NRSG 817. Primary Care II Practicum: Management of Complex Health Problems Throughout the Life Span.. 4 Hours.
Opportunities to develop intermediate skills as advanced practice nurses in a primary care setting are provided. Emphasis is on assessment, clinical decision making, and management of clients/client systems of all ages/stages who are experiencing complex health problems. Internal and external environmental factors as well as legal, ethical and economic concerns related to the presenting complex health problems are explored. Current research outcomes and theory-based interventions appropriate for management by advanced practice nurse are stressed. Collaboration and consultation (including referrals) with appropriate health providers is emphasized. Prerequisite: NRSG 815 or Consent of Instructor. LEC.

NRSG 818. Primary Care III: Preceptorship. 3-5 Hours.
The theoretical, clinical, and role components of care as delivered by the nurse practitioner are implemented through an intensive supervised clinical practicum with seminar sessions. An opportunity is provided to apply advanced clinical decision making skills and research to the assessment, management, and evaluation of complex health care problems in the primary care setting. The client system for this experience include individuals and families throughout the life span within the context of community. Emphasis is on increased independence and decision making in a multi-disciplinary environment. Internal and external environmental factors, ethical, legal, and health policy issues related to the nurse practitioner role in the practice setting are analyzed. Prerequisite: NRSG 816, NRSG 817, or consent of instructor. LEC.

NRSG 820. Program, Project, and Communication Planning. 2 Hours.
Strategies to promote program, project, and communication planning are presented and applied by the student. Communication strategies for informing, guiding, and persuading clients, health care providers, payers, and other stakeholders to advance program and project development are discussed. The use of evolving information technologies to improve program, project and communication planning is emphasized. Prerequisites: Corequisite: NRSG 880, or consent of instructor. LEC.

NRSG 821. Clinical Dynamics and Interventions in Diabetology. 3 Hours.
A complexity science framework is used to discuss current and innovative concepts and trends in the care of person with diabetes. The disease process of diabetes, preventive measures, complications, pharmacologic, technologic, lifestyle interventions and self-management techniques based on current evidence are presented and analyzed in relations to care of persons with diabetes across age groups and in different settings. Consideration is given the complexity of the co-morbidities that accompany diabetes as well as the special approaches to age appropriate treatment and cultural diversity factors that influence care. External barriers that contribute to decrease in quality outcomes are analyzed and innovative solutions are proposed. Prerequisite: NRSG 801, NRSG 813, or Consent of Instructor. SEM.

NRSG 823. Research Clinical Trial Management: Pre-Study Activities. 3 Hours.
This course is designed as an introduction to the research clinical trial manager role and provides in-depth knowledge of Pre-Clinical Trials Study activities. Regulatory, administrative, and ethical issues will be presented as well as the daily operational requirements (study design, financial aspects, protocols, hiring of personnel, subject recruitment, etc.) to begin a study. Included is the development of training skills for the Clinical Trial manager for critiquing sample protocols and for assessing adequate resources for implementation of protocol. Prerequisite: RN Licensure, graduate level, or consent of instructor. LEC.

NRSG 824. Research Clinical Trial Management: During Study Activities. 3 Hours.
This course is designed as an introduction to the research clinical trial manager role and provides in-depth knowledge of During-Clinical Trial Study activities. The process of conducting the ‘day-to-day’ operations of a research study; subject recruitment, data collection forms and documenting subjects’ responses to the interventions, audits, inspections, budget monitoring, ethical/liability situations that may occur during the study, etc. will be addressed. Included is the development of training skills for the Clinical Trial Manager that is involved in conducting the ‘day-to-day’ operations of the research study. Prerequisite: NRSG 823, or consent of instructor. LEC.

NRSG 825. Research Clinical Trial Management: Post-Study Activities and Practicum Experience. 3 Hours.
This course provides an introduction to the research clinical trial manager role and provides in-depth knowledge of Post-Clinical Trial Study activities. The process of conducting the ‘day-to-day’ operations of a research study; preparing for final sponsor and FDA visits; preparing final reports to the sponsor and IRB; evaluating sponsor, site and team members’ performance; management of data and preparing summary reports, etc.
will be addressed. The course provides the student with a Research Manager practicum experience in selected research setting. Opportunities are provided to utilize learned details related to the role of a Research Manager during key phases of a Clinical Trial Study: pre-study, during-study, and at the end-study activities. Prerequisite: NRSG 824, or consent of instructor. PRA.

NRSG 826. Global Perspective and Diversity in Healthcare. 2 Hours.
Cultural receptivity is integrated into the collaboration, development, and implementation of health programs at the local, national, and international level. Frameworks that emphasize the meanings of health and healthcare; prevention and management; and related ethical, economic, and social justice concerns are introduced. Students partner with a community of interest to understand their health and illness beliefs, identify barriers to healthcare access, integrate the historical, social, political and economic forces that impact healthcare. Together they plan and implement appropriate strategies to influence positive community outcomes. Prerequisite: NRSG 880, or consent of instructor. LEC.

NRSG 827. Advanced Concepts Public Health Nursing. 2 Hours.
Public health is addressed in terms of common values and interests as well as particular client populations (vulnerable and at risk groups) across the lifespan. Health promotion and disease prevention for whole communities and selected vulnerable and at risk aggregates are emphasized. Ethical and social justice concerns as well as public policy and legislative issues in population-focused health care are discussed. Selected models, concepts, theories, and research in public health provide the framework for identifying, exploring, prioritizing and planning interventions for public health concerns. Ultimately, a grant proposal is developed to support the action plan. Prerequisite: Corequisite: NRSG 754, NRSG 755, NRSG 809, NRSG 820, NRSG 880, NRSG 885, PRVM 800. Prerequisite/Corequisite: NRSG 808, NRSG 826 PRVM 830. Corequisite: NRSG 828, or consent of instructor. LEC.

Students are provided with an opportunity to explore advanced practice roles within the context of public health needs. Based on each student’s goals and interests, health related needs of an identified population are assessed, analyzed, and synthesized; and a plan of action proposed. Prerequisite: Corequisite: NRSG 827, or consent of instructor. LEC.

NRSG 829. Public Health Practicum. 3 Hours.
Students will complete an intensive practicum in a community/public health setting. Prerequisite: NRSG 827, NRSG 828 or Consent of Instructor. LEC.

NRSG 830. Care of Women in the Antepartal Period. 3 Hours.
Care during the antepartal period in healthy pregnant women is presented and analyzed. Strategies focusing on risk reduction and early identification of deviation from normal during pregnancy are examined. Biopsychosocial and cultural aspects of pregnancy within the family structure are presented. Concepts of research, ethics, legal and political issues, nutrition, genetics, pharmacotherapeutics, health promotion, and selected deviations from normal are included. Prerequisite: NRS 801, NRSG 809, NRSG 812, NRSG 813, NRSG 835, NRSG 841, or consent of instructor. LEC.

NRSG 831. Care of Women in The Antepartal Period Practicum. 2 Hours.
This clinical practicum focuses on competencies for management of pregnant women in various health care environments. Health promotion and risk reduction in pregnant women are emphasized. Management experiences in the advanced practice role include antepartal risk-assessment, consultation, collaboration, and referral when medically necessary. Prerequisite: NRSG 830, NRSG 832, NRSG 835, NRSG 836, NRSG 841, or Consent of Instructor. Corequisite: NRSG 838, or Consent of Instructor. LEC.

NRSG 832. Nurse Midwifery in the Postpartum and Newborn Period. 2 Hours.
Synthesis of the nurse-midwifery philosophy for postpartum and newborn periods is conceptualized. Health maintenance for mothers and infants is explored. Research, ethics, legal and political issues, nutrition, pharmacotherapeutics, health promotion, and selected deviations from normal are included. The nurse-midwifery role in consultation, collaboration, and referral are addressed. Prerequisite: NRSG 830, NRSG 835, or Consent of Instructor. Corequisite: NRSG 836. LEC.

NRSG 833. Managing Clinical Research Projects. 3 Hours.
This course is designed to help nurses develop in-depth knowledge of good clinical practices and federal regulations, as well as develop a strong foundation for the management of clinical research program. Regulatory, administrative, and ethical issues will be presented as well as the daily operational requirements of managing a clinical research office. Completion of this course prepares one for clinical research professional national certification. Prerequisite: NRSG 825 or Consent of Instructor. LEC.

NRSG 835. Primary Care of Women Across the Lifespan. 2 Hours.
The knowledge and skills necessary to promote health, prevent illness, and manage the primary care needs of women across the lifespan will be provided. Therapeutic, research-based therapeutic management of acute, episodic and chronic conditions that occur in women across the lifespan will be explored. Professional values including standards of practice, professional, legal and ethical issues and professional roles will be addressed. The health care delivery system will be analyzed for cost effectiveness and sensitivity to women. Prerequisite: NRSG 801, NRSG 809, NRSG 812, NRSG 813, NRSG 841, or Consent of Instructor. LEC.

NRSG 836. Nurse Midwifery in the Intrapartum Period. 3 Hours.
Nurse-midwifery care of uncomplicated women in the intrapartum period is presented and analyzed. Intrapartum and immediate postpartum complications and emergency events are addressed. Concepts of research, ethics, legal and political issues, nutrition, pharmacotherapeutics, health promotion, and selected deviations from normal are included. Prerequisite: NRSG 830, NRSG 835, NRSG 841, or Consent of Instructor. Corequisite: NRSG 832. LEC.

NRSG 837. Childbearing Family Practicum: Intrapartum, Postpartum, and Newborn. 3 Hours.
Competencies for nurse-midwifery management according to national standards of practice for the care of healthy women during labor, birth, and postpartum are demonstrated; additionally, competencies for nurse-midwifery management according to national standards of practice for the care of newborns are demonstrated. The development of a skill base for intrapartum, postpartum, and newborn emergencies is addressed. Nurse-midwifery management practice provides experience in the role of care provider during normal labor, delivery, postpartum, and newborn periods. This care may include consultation, collaboration, and referral when medically necessary. Prerequisite: NRSG 831, NRSG 832, NRSG 836, NRSG 838, Completion of Intermediate or Advanced Fetal Heart Monitoring Course within past 3 years, Up to date Neonatal Resuscitation Program (NRP) certification, or Consent of Instructor. LEC.

NRSG 838. Primary Care of Women Across the Lifespan Practicum. 2 Hours.
This practicum focuses on clinical competencies for the advanced practice nurse providing primary care and gynecologic management of women throughout the lifespan. Health promotion, complementary therapies, and evidence-based models of health care delivery are incorporated in the care of women. Clinical management experiences in
the advanced practice role include but are not limited to: family planning, gynecologic health, and primary care for women from adolescence through menopause. Clinical experiences will include consultation, collaboration, and/or referral when medically necessary. Prerequisite: NRSG 830, NRSG 832, NRSG 835, NRSG 836, NRSG 841, or Consent of Instructor. Corequisite: NRSG 831, or Consent of Instructor. PRA.

NRSG 839. Global Perspectives and Diversity in Healthcare: Practicum. 2 Hours.
Students will have the opportunity to integrate concepts and theories of global health and diversity by direct program planning, delivery, and evaluation of care activities with a vulnerable population. Students will partner with a community of interest to provide directed advanced nursing care and or leadership activities via individual/population/organizational assessment, intervention, and evaluation. Emphasis will be placed on building cultural competence with an understanding of the historical, social, political, and economic forces of health within a specific community setting or geographic area. The worldview of the individual/population/organization will be respected and integrated into all aspects of health care delivery. Prerequisite: NRSG 826 or consent of instructor. PRA.

NRSG 840. Nurse-Midwifery Integration Practicum. 4 Hours.
The theoretical, clinical and role components of care as delivered by the advanced nurse-midwife student are implemented through an intensive supervised clinical practicum. Advanced professional clinical skills and evidence-based practice in the assessment, management and care of women and newborns are applied. Emphasis is on increased independence and decision-making embracing the function, scope and practice of nurse-midwifery practice. Prerequisite: NRSG 831, NRSG 837, NRSG 838, or Consent of Instructor. LEC.

NRSG 841. Reproductive Endocrinology. 2 Hours.
In-depth examination of the anatomy and physiologic processes of reproduction are studied, and will include normal growth and development, as well as clinical genetics. Essential information will be focused on understanding of the reproductive hormones and regulation of the menstrual cycle. With a complete understanding of menstrual hormone regulation, students will be better prepared to apply concepts to alterations that are encountered with maturation/development, puberty, pregnancy, lactation, menopause, and management of common gynecological needs (such as contraception). Prerequisite: NRSG 812 or Consent of Instructor. LEC.

NRSG 842. Topics in Mental Health Nursing. 1-5 Hours.
Investigation of issues and psychiatric mental health problems relevant to a selected population in mental health nursing. Prerequisite: Consent of instructor. LEC.

NRSG 844. Advanced Psychiatric Assessment. 3 Hours.
Advanced psychiatric assessment of children, adults and the elderly will be covered, including conducting patient-centered, culturally competent interviews in simulated situations. Epidemiology of psychiatric disorder is addressed. Assessment for psychiatric diagnoses of substance abuse, mood and anxiety disturbances, psychosis, dementia and disorders arising in childhood and adolescence are emphasized. Assessment of dangerous behaviors and crisis intervention is covered. Prerequisite: Corequisite: NRSG 801, or consent of instructor. LEC.

NRSG 845. Psychotherapeutics I: Psychiatric Mental Health Nurse Practitioner. 3 Hours.
Focus is placed on assessing vulnerabilities, social determinants and resilience as they relate to health promotion, disease prevention, symptom management, and behavior change. Mental health and common psychiatric disorders such as depression and anxiety throughout the life span are discussed. Evidence-based brief psychotherapeutic intervention frameworks including psychotherapy are applied to individuals, groups and families across the life span. Professional issues that commonly occur in implementing the advanced practice role in psychiatric and mental health care are emphasized. Prerequisite: NRSG 748, NRSG 754, NRSG 755, NRSG 801, NRSG 809, NRSG 812, NRSG 813, NRSG 844, NRSG 850, or Consent of Instructor. Prerequisite/Corequisite: NRSG 851. LEC.

NRSG 846. Psychotherapeutics I: Psychiatric Mental Health Nurse Practitioner Practicum. 2 Hours.
The focus of this clinical course is to apply theories and evidence-based findings in a clinical setting serving culturally diverse individuals, groups, and families. Students will have opportunities to conduct comprehensive psychiatric assessments, formulate diagnoses, and conduct therapy in conjunction with an interdisciplinary team. Prerequisite: NRSG 845, NRSG 847, NRSG 851, or Consent of Instructor. LEC.

NRSG 847. Psychotherapeutic Interventions II: Psychiatric Mental Health Nurse Practitioner. 3 Hours.
This theory course focuses on recovery-oriented, person-centered approaches for individuals, families, and populations with complex and persistent alterations in mental health functioning. Factors that affect mental health functioning will be explored with a focus on interventions that facilitate recovery including psychopharmacology. In addition, policies and socioeconomic factors that influence the delivery of mental health services will be analyzed. Emphasis is placed on identifying the unique role of the psychiatric mental health nurse practitioner (PMHNP) within an integrated, client-centered delivery system. Prerequisite: NRSG 845 or Consent of Instructor. LEC.

NRSG 848. Psychotherapeutics II: Psychiatric Mental Health Nurse Practitioner Practicum. 4 Hours.
In this practicum students will apply recovery oriented, evidence-based frameworks such as biobehavioral, pharmacologic and psychoeducational to individuals and groups across the lifespan with complex alterations in functioning. The psychiatric mental health nurse practitioner in collaboration with interdisciplinary team members and families coordinates person-centered culturally sensitive care. Ethical principles and legal issues are identified and integrated into care. Prerequisite: NRSG 846 or Consent of Instructor. LEC.

NRSG 849. Psychotherapeutics III: Practicum. 3-4 Hours.
In this clinical course students will integrate knowledge from previous courses in implementing the psychiatric mental health nurse practitioner role. This includes using diagnostic reasoning, evidence-based therapy, biobehavioral, and psychoeducational interventions with culturally diverse clients from different age groups. Students will implement care within interdisciplinary teams using consultation and referral as needed to deliver person-centered culturally sensitive care. Students will work with age groups needed to meet the role of psychiatric nurse practitioner across the lifespan. Prerequisite: NRSG 847, or consent of instructor. LEC.

NRSG 850. Mental Health Assessment of Infants, Children and Adolescents. 3 Hours.
This is an advanced course in infant, child and adolescent mental health assessment development for those individuals who desire to gain greater knowledge and understanding of complex mental health issues in children, adolescents and their families. The course focus is to identify deviations between normal and abnormal development. Identification of environmental and social determinates will be examined. Recognition of pre-birth risk factors affecting children and protective measure that promote positive growth and development will be discussed. Assessment tools and strategies for effective assessment will be reviewed. Emphasis on the legal and ethical issues regarding safety and well-being of children...
and families will be addressed. Prerequisite: NRSG 748, or consent of instructor. LEC.

NRSG 851. Psychopharmacology for Advanced Nursing Practice. 3 Hours.
Understanding of the neuron, neurotransmitter and receptor functioning as the basis for psychopharmacotherapy is emphasized in developing the knowledge for prescribing and monitoring psychotropic medications for clients diagnosed with psychiatric disorders. The major classes of psychotherapeutic drugs, their mechanism of action, metabolism, interaction, adverse and side effects are discussed. Drug development is reviewed and ethical and legal issues involved in prescribing across the lifespan are covered. Knowledge is applied to case studies that include differentiating drugs, dosages and response to clients' internal environment, racial/ethnic background, and age. Prerequisite: NRSG 844 or equivalent; or consent of instructor. LEC.

NRSG 853. Abstraction and Modeling of Healthcare Information. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The information system development life cycle process is presented with emphasis on determination and analysis of information system requirements and system design that meet the identified health care information requirements. Object-oriented techniques will be introduced, including Unified Modeling Language and Unified Modeling Methodology, to facilitate process analysis and design proposal development. Prerequisite: NRSG 820 or Consent of Instructor. LEC.

NRSG 854. Knowledge Management in Healthcare. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. Knowledge management is the creation, communication, and leveraging of a healthcare organization's knowledge assets. Defining knowledge, describing the knowledge creation cycle, and the identification of the knowledge worker and his/her impact on the organization are discussed. Information technology and communities of practice are presented in a balanced approach supporting a systematic viewpoint of the knowledge management process. Knowledge management theory is enhanced with the performance of a knowledge audit and the development of knowledge management tools. (Same as IPHI 854.) Prerequisite: NRSG 820 or Consent of Instructor. LEC.

NRSG 855. Topics in Health Informatics. 3 Hours.
Investigation of current futuristic issues and trends relevant to healthcare informatics. Prerequisite: One graduate course in information, or consent of instructor. LEC.

NRSG 856. Health Informatics Practicum. 1-3 Hours.
In collaboration with healthcare information faculty and preceptors, students design an experience to facilitate application of theories and research related to health care informatics. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. Prerequisite: All Common Core, Leadership Core, NRSG 853, NRSG 858. Prerequisite/Corequisite: NRSG 854, NRSG 855, NRSG 898, or consent of instructor. LEC.

NRSG 857. Transforming Health Care through Use of Information Systems and Technology. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The application of the information system development life cycle in the design, selection, and implementation of health information technology applications will be examined. Human computer interactions and emerging technologies will be explored for their impact on patient care and safety. The role of legal, regulatory, ethical and security issues will be discussed as they apply to clinical and consumer information technologies. Prerequisite: Consent of Instructor. LEC.

NRSG 858. Health Data: Theory and Practice. 3-4 Hours.
Includes 2 credit hour lecture and 1-2 credit hour practicum. Principles of database theory, modeling, design and manipulation will be introduced. Students will have experience using a relational database management system. Database manipulation will be explored using structured query language (SQL) to compose and execute query statements and critically evaluate the results. Prerequisite: None. LEC.

NRSG 859. Introduction to Health Informatics. 2-3 Hours.
This course will provide an overview of health informatics focused on five themes: health informatics foundations; clinical decision support; human factors/organization factors; public health informatics and current issues in health informatics including best practices. Students enrolled for 3 credits will develop and demonstrate a practical, innovative small group information technology (IT) project from one of a set of faculty recommended projects or from a student-proposed idea. Prerequisite: None (previous or simultaneous enrollment in Health Data Theory and Practice is recommended). LEC.

NRSG 862. Adult/Gerontological Health Care I. 3 Hours.
Knowledge and skills necessary to provide holistic care for the culturally-diverse adult in multiple care settings are emphasized in the first of two sequential didactic courses for the Adult/Gerontological advanced practice registered nurse. The course covers acute and common health problems experienced across the life span from adolescence to advanced age. Physical and multidimensional functional assessments are emphasized as a basis for establishing differential diagnosis and planning effective therapeutic, patient-centered interventions. Evidence-based management strategies are emphasized. Coordination of services and collaboration with interprofessional and intraprofessional teams for comprehensive health care are integrated throughout the course. Prerequisite: NRSG 748, NRSG 755, NRSG 809, NRSG 801, NRSG 812, or Consent of Instructor. Prerequisite/Corequisite: NRSG 813. LEC.

NRSG 863. Adult/Gerontological Health Care I: Practicum - CNS. 2 Hours.
Management of the primary, acute, and chronic health care needs of a culturally-diverse population of adults across the lifespan with specific system dysfunction are explored. Clinical practice will include multidisciplinary coordination of comprehensive, managed care. Consultative, patient education, quality improvement, and project development activities will be the major focuses. Prerequisite: NRSG 862, NRSG 865, or Consent of Instructor. LEC.

NRSG 864. Adult/Gerontological Health Care I: Practicum - NP. 2 Hours.
Assessment of adults across the lifespan and the management of common acute and chronic health problems are executed in consultation with the appropriate provider. Opportunities to manage pharmacological and medical therapeutics will be provided. Nursing therapeutics and case management based on theory and research are applied in a variety of community and institutional practice settings. Emphasis is on health promotion and health maintenance for culturally diverse adult individuals and groups. Prerequisite: NRSG 862, NRSG 865, or Consent of Instructor. LEC.

NRSG 865. Adult/Gerontological Health Care II. 3 Hours.
Knowledge and skills necessary to provide holistic care for adults from diverse cultures in multiple care settings are emphasized in the second of two sequential didactic courses for the Adult/Gerontological advanced practice registered nurse. The course covers chronic and complex health problems experienced by adults across the life span from adolescence to advanced age. Physical and multidimensional functional assessments are
emphasized as a basis for establishing differential diagnosis and planning effective therapeutic, patient centered interventions. Evidence-based strategies to manage care are emphasized. Coordination of services and collaboration with interprofessional and intraprofessional teams for comprehensive health care are integrated throughout the course. Prerequisite: NRSG 813, NRSG 862 or Consent of Instructor. LEC.

NRSG 866. Adult/Gerontological Health Care II: Practicum - CNS. 4 Hours.
Management of the primary, acute and chronic health care needs of a culturally-diverse population of adults across the lifespan with specific system dysfunction are explored. Clinical practice will include interdisciplinary coordination for comprehensive, managed care. Consultative, patient education, quality improvement, and project development activities will be major focuses. Prerequisite: NRSG 863 or Consent of Instructor. LEC.

NRSG 867. Adult/Gerontological Health Care II: Practicum - NP. 4 Hours.
Assessment of adults across the life span and the management of common acute and chronic health problems are executed in consultation with the appropriate provider. Opportunities to manage pharmacological and medical therapeutics will be provided. Nursing therapeutics and care management based on theory and research are applied in a variety of community and institutional practice settings. Emphasis is on health promotion and health maintenance for culturally-diverse adult individuals and groups. Prerequisite: NRSG 864 or Consent of Instructor. LEC.

NRSG 868. Adult/Gerontological Health Care III: Preceptorship - CNS. 3-5 Hours.
The theoretical, clinical, and research role components of care as delivered by the adult/gerontological CNS are implemented. Opportunities are provided to utilize diagnostic reasoning, nursing therapeutics, pharmacological therapeutics, interdisciplinary treatment plans, project development, consultation, referral, and research findings in the management and evaluation of culturally diverse clients experiencing specific system dysfunction. The client system for this preceptorship includes adults (and their families) experiencing a selected system dysfunction. Emphasis is on stabilization of the client, minimization of complications, and promotion of optimal level of health through an interdisciplinary approach. Prerequisite: NRSG 866 or Consent of Instructor. LEC.

NRSG 869. Adult/Gerontological Health Care III: Preceptorship - NP. 3-5 Hours.
The theoretical, clinical, and research role components of care as delivered by the Adult/Geriatric nurse practitioner are implemented. Opportunities are provided to individualize the student's clinical acumen in utilizing diagnostic reasoning, nursing therapeutics, pharmacological therapeutics, interdisciplinary treatment plans, consultation, referral, and research findings in the management and evaluation of culturally-diverse adult/geriatric clients with common ambulatory care problems. The client system for this preceptorship includes adults (and their families) across the life span. Emphasis is on preventing illness, promoting health and an optimal functional level. Stabilizing the ill client, and minimizing complications through an interdisciplinary approach. Prerequisite: NRSG 867 or Consent of Instructor. LEC.

NRSG 870. Designing a Student Learning Environment. 3 Hours.
The roles of both the educator and student in designing a learning environment provide the framework for analyzing pedagogical philosophies, theories, ethical/legal issues, and research related to teaching strategies and education. The focus is on best practices and research-based strategies to promote various learning styles and create an active learning environment that increases student retention and learning success for diverse, multicultural student populations. Attention will be given to the relationship between the setting, methodologies of clinical teaching, and the assessment of competencies. Prerequisite: NRSG 748, NRSG 754, or consent of instructor. LEC.

NRSG 871. Curriculum/Program Planning and Evaluation. 3 Hours.
Philosophies, methods, and processes of curriculum and instruction in nursing education provide the framework for discussing curricular and program planning theories/models, resources for decision making, research, and evaluation methods that create a learner-centered environment. Attention is given to frameworks for program evaluation, methods of data collection, and the ethics and standards of evaluation practice. The influence of societal trends, and current health professions issues relevant to curriculum planning are addressed. Emphasis is on strategies for anticipating future societal needs and developing educational curriculum to meet those needs. Matters of diversity, workforce development, ethics/legal issues in curriculum planning and education also are included. Prerequisite: NRSG 748, NRSG 754, or consent of instructor. LEC.

NRSG 872. Topics in Nursing Education. 1-5 Hours.
Investigation of special issues or problems relevant to appropriate client systems (client, family, and student or health care professional) in Nursing Education. Prerequisite: Consent of instructor. LEC.

NRSG 873. Teaching with Technologies. 3 Hours.
Theories and trends that support the use of merging and emerging technologies for the enhancement of teaching and learning are explored. The focus is on assisting educators to gain skills in choosing appropriate instructional technologies to enhance learning. Learning variables, the environment context, financial-political issues, and the influence of those variables on technologies are examined. The evaluation and impact of current technology on the delivery of education are examined along with strategies for considering/anticipating future technologies to meet educational needs. Prerequisite: NRSG 748, NRSG 754 or Consent of Instructor. LEC.

NRSG 874. Nurse Educator Preceptorship. 3 Hours.
The role components of the nurse educator are implemented with a preceptor in selected educational settings. Opportunities are provided to utilize teaching and learning strategies, research findings, and evaluation methods with diverse students. Professional issues, educational trends, changing role of the educator, and self-assessment are incorporated in accommodating modules. Prerequisite: NRSG 870, NRSG 871, NRSG 873. LEC.

NRSG 877. Foundations in Education and Learning. 3 Hours.
Investigation of special issues or problems relevant to appropriate client systems (client, family, and student or health care professional) in Nursing Education. Prerequisite: Consent of instructor. LEC.

NRSG 878. Clinical Radiology for the Advanced Practice Nurse. 2 Hours.
A complexity science framework is used to present the basic and advanced technical aspects of radiological tests used in the care of adult and pediatric patients in the diagnostic work up of the etiology of the health problem. The science that forms the basis for all plain (cathode) films as well as computerized scanning and magnetic resonance imaging tests is covered in the course. The emphasis is on the appropriate choice of radiological tests in the work-up of the patient's health problem. Also, advanced practice nurses will learn a framework for evaluating
NRSG 880. Organizational Foundations for Leading Change. 3 Hours.
Self-discovery as a foundation for professional development while exploring the concepts of leader, manager and follower is emphasized. Analysis and prediction of an organization's stages of development and its capacity for linear and social change are introduced through the lens of complexity science. Political, legal, ethical and other issues that constrain and destabilize organizations and strategies to restore equilibrium are explored. (Same as HPM 840.) Prerequisite: NRSG 748, or consent of instructor. Prerequisite/Corequisite: NRSG 755. LEC.

NRSG 881. Applied Budgeting and Finance. 3 Hours.
Leaders apply basic principles associated with program, project and service-line fiscal management, price setting, budget preparation, cost-benefit/break-even analysis, managed-care contracting, and interpreting financial ratios while concurrently acquiring a financial vocabulary to communicate with various stakeholders. Financial reports such as balance sheets, budget forms and expense reports are studied and formulated related to government agencies, small clinical operations, grant-funded projects, and start-up programs. Staffing models and the staffing-quality equation are analyzed for the purpose of projecting human resource requirements. Prerequisite: NRSG 880, HPM 822, or Consent of Instructor. LEC.

NRSG 882. Introduction to Operations. 3 Hours.
Examines performance of health care organizations, sources of variation, methods of measurement, and strategies for improving performance. Considers several approaches to performance improvement and examines tools widely used in operations management. Incorporates lecture, discussion, and fieldwork. (Same as HPM 850.) Prerequisite: NRSG 754 or NRSG 880 or equivalent course; or consent of instructor. LEC.

NRSG 883. Complexity Science Approaches to Improve Organizational Effectiveness. 3 Hours.
This course introduces complexity science principles with the aim of improving the quality and effectiveness of healthcare organizations. Traditional approaches to quality improvement will be contrasted with tools and metrics that can be applied in complex organizations. Principles that relate to embeddedness, diversity, distributed control, co-existence of order and disorder, nonlinearity, inability to predict, emergence, and functioning at the edge of chaos will be introduced. Prerequisite: NRSG 880, or consent of instructor. LEC.

NRSG 884. Topics in Organizational Leadership. 3 Hours.
Investigation of current and futuristic issues and trends relevant to organizational leadership. LEC.

NRSG 885. Evaluation and Analysis for Healthcare Effectiveness. 2 Hours.
Systematic approaches for analyzing and evaluation processes of care delivery and their impact on client populations, organizational processes, and communities are considered. Research concepts and methods are used in a systems context. Program evaluation, performance improvement, and other methods of measuring outcomes are examined for their utility within the health care setting. Linkages between program evaluation and regulatory policy are studied. Prerequisite: NRSG 754. Prerequisite/Corequisite: NRSG 880 or Consent of Instructor. LEC.

NRSG 886. Organizational Leadership Practicum. 1-3 Hours.
The knowledge, skills, and abilities learned throughout the course of study are integrated in this practicum experience designed to develop further specialized knowledge. The faculty and preceptor provide support and guidance to help interpret experiences, and gain a broader worldview within organizational leadership. Students design an experience to facilitate application of theories and research related to organizational leadership. Emphasis is on expanding the capacity of the emerging leader in leading change, facilitating advanced communication skills, and demonstrating one or more areas of leadership expertise. Students negotiate a leadership project to be completed within the practicum. Prerequisite: Corequisite: NRSG: 808, 820, 826, 881, 882 or 883, 885, 891 HPM 822, or consent of instructor. CLN.

NRSG 889. Grant Writing. 3 Hours.
All aspects of preparing grant applications are covered. This includes writing an actual grant application containing all the usual elements of grants—budgets, biosketches, resources, and scientific text. In addition, different funding agencies, building research teams, the review process, responding to reviewers, and resubmitting grants will be covered. Prerequisite: Appropriate research methods and statistics courses in student's current graduate program (at least 2 statistics courses, one including content of multiple regression), and permission of instructor. For students in the Outcomes Management and Research Concentration: prerequisites: HPM 821 or PRVM 800. Same as ANAT 869 and HPM 788. LEC.

NRSG 890. Independent Study in Nursing. 1-5 Hours.
Intensive study in an area of interest with experiences selected according to the student's written purposes, conceptual framework, objectives and evaluation (1-5 credit hours). Appropriate prerequisite courses, as determined by the Independent Study faculty advisor, must be completed. LEC.

NRSG 891. Human Resources and Workforce Development. 3 Hours.
The focus of this course is to understand the leadership functions of human resource management in organizations to create a competitive edge through employee empowerment. Core human resource concepts are introduced and applied to optimize human capital within a variety of healthcare settings, including compensation and benefits, employee recognition, and employee/labor relations. National, regional and local strategies and workforce trends are discussed related to best practices for the selection, retention, and management as a healthcare employer of choice. Prerequisite: All Leadership Core Courses, or consent of instructor. Same as HPM 854. LEC.

NRSG 892. Independent Study in Nursing Practicum. 1-5 Hours.
Intensive practicum in a specified area of interest with experiences selected according to aims that are mutually agreed upon by faculty and student. Prerequisite: None IND.

NRSG 898. Research Project in Nursing. 2 Hours.
Portions of the research process in an area of nursing are implemented. Emphasis is placed on experiential knowledge of the actual conduct of research. The student selects one of several research activities and reports on the project. Prerequisite: NRSG 754 plus either one advanced practice or one administration track course, or consent of instructor. LEC.

NRSG 899. Thesis. 1-6 Hours.
Prerequisite: NRSG 754, and one core track course. THE.

NRSG 901. Primary Care I: Adult-Gerontology Health. 3 Hours.
The first of two core specialty courses using a systems approach that emphasizes a multi-dimensional and interprofessional approach to assessment, differential diagnosis and treatment formulation for the health care needs of adults across the life span in multiple care settings. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis and management of common episodic, chronic, and complex conditions affecting health. Students develop skills in critical thinking, analysis and synthesis of data from
a variety of sources, and use of evidence-based practice guidelines in diagnosing and managing health care needs. In addition to cultural spiritual diversity, students learn how patient preferences in health care decision making are incorporated in a focus on person-centered care. Prerequisite: NRSG 801, NRSG 812, and NRSG 813. LEC.

NRSG 909. NEXus Topics. 1-9 Hours.
This course is used for enrollment in the Nursing Education Exchange program (NEXus). NEXus is a collaboration of doctoral programs in nursing that offer distance-accessible graduate courses. KU School of Nursing is an academic collaborator in NEXus. Students in NEXus schools may enroll in online doctoral courses offered by other NEXus academic collaborators. The student's transcript will reflect the course title, under the home school course number. Students select appropriate NEXus courses to fit with their plans of study. Courses are selected by the student in consultation with his/her academic advisor. Prerequisite: Admission to a doctoral program in nursing and completion of course-specific prerequisites. LEC.

NRSG 911. Tools for Practice Doctorate Scholarship. 3 Hours.
Foundations and applications of tools and methods to develop advanced practice project proposals across diverse settings are explored. Scholarly evidence from a variety of sources is used to develop project proposals that enhance patient care, staff development, and organizational leadership. Relevant practice theories such as quality improvement and evaluation models serve as project proposal guides. Students acquire knowledge and skills to support professional development, to write advanced practice project proposals, and to advance doctoral scholarship. Prerequisite: NRSG 804, or consent of instructor. LEC.

NRSG 914. Primary Care I: Family Health. 3 Hours.
The first of two core specialty courses using a systems approach that emphasizes a multi-dimensional interprofessional approach to assessment, differential diagnosis and treatment formulation for the primary care needs of individuals and families across the lifespan. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis, and management of common episodic, chronic, and complex conditions affecting health. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing primary care needs. In addition to cultural and spiritual diversity, students learn patient preferences in health care decision making with a focus on person centered care. Prerequisite: NRSG 801, NRSG 812, and NRSG 813. LEC.

NRSG 919. Foundations for Leading & Communicating. 3 Hours.
Theoretical foundations in organizational decision making and communication will enhance students' development of expertise in assessing organizations, identifying systems issues, and facilitating organization- and system-wide improvements in healthcare. Traditional approaches to organizing and communicating are contrasted with emerging approaches that promote sensitivity to diverse organizational cultures and populations. Through examination of theoretical perspectives, the student will develop an ability to integrate the contributions of different points of view and ways of thinking crucial to accurately assess, design and lead high performing healthcare organizations in a dynamic world. Prerequisite: Corequisite: NRSG 829 or 833 or 856 or 886, and NRSG 941, or consent of instructor. LEC.

NRSG 920. Microsystems in Healthcare Operations. 3 Hours.
Competencies necessary for studying clinical microsystems and examining their influence on patient safety, satisfaction, and other clinical outcomes are developed in this course. Microsystems will be determined, deconstructed, analyzed for best practice, and re-constituted for the purpose of improved organizational performance. The roots of quality improvement are traced and quality improvement application within a microsystem environment is explored. Key topics include: assessment tools and models, continuous quality improvement theory, evidence-based practice, performance improvement methods (measurement, statistics, problem identification and analysis, control charts) and the development of team-based problem solving and resolution. Students examine productivity and cost indicators, strategic and operational planning, healthcare finance, relationship-building, collaboration techniques, and leadership principles. Prerequisite: Corequisite: NRSG 829 or 833 or 856 or 886, and NRSG 941, or consent of instructor. LEC.

NRSG 935. Professionalism and Scholarship Workshop. 1 Hour.
Building a foundation for advanced study is explored in the context of professionalism and scholarship. Strategies for promoting professional development while preparing for future roles as nurse scholars and nurse scientists are examined. Students are introduced to a model of scholarship that includes discovery, integration, application, and teaching. Issues associated with scientific integrity in academics, research and services are identified and examined. Prerequisite: Admission to the Doctoral Program. LEC.

NRSG 938. Informatics and Technology Applications. 2 Hours.
The field of nursing informatics and the role of the nurse to support research and evidence-based practice inquiry in a variety of organizational settings is introduced. The current state of the science in naming nursing phenomena and how these phenomena are represented in information systems is explored. The use of technology as an adjunct to doctoral-level inquiry and how it supports clinical and professional decision-making is explained and demonstrated. Prerequisite: Corequisite: NRSG 935, or consent of instructor. LEC.

NRSG 940. Knowledge and Theory Development in Nursing Science. 3 Hours.
The philosophical, ethical, socio-cultural, economic, and political forces that shaped the historical course of nursing science are examined. Philosophical and scientific foundations of knowledge development in nursing science are explored. Conceptual and grand theoretical development and analysis strategies are practiced. Integration of theory, research, and practice knowledge development in nursing science is emphasized. Prerequisite: NRSG 938, or consent of instructor. LEC.

NRSG 941. Preparing for Doctoral Leadership. 3 Hours.
Skills in leading, managing, and following as the doctoral graduate assumes critical roles within academia, the healthcare system, or other business entities are developed and strengthened. Through developmental exercises, theoretical and practical explorations of organizational structures and settings and career trajectory planning, the student is poised to optimize the doctoral experience to influence social change. Prerequisite: Admission to the Doctoral Program or Consent of Instructor. LEC.

NRSG 942. Theory Application in Nursing Science. 3 Hours.
The development of middle-range theoretical structures and processes in nursing science is examined. Historical foundations of middle-range theory are traced to current trends and future possibilities in theory development, application, testing, and evaluation. Examples from nursing science and related health and social sciences are used to illustrate middle-range theory development, application, testing, and evaluation. Strategies for using existing theoretical knowledge to guide practice in diverse settings and to foster ongoing development of new knowledge are explored. Prerequisite: NRSG 940, or consent of instructor. LEC.

NRSG 943. Methods for Quantitative Research. 3 Hours.
Quantitative research methods are studied as they relate to investigation of phenomena in nursing and health care. Focus is on understanding the issues involved in generating research questions and hypotheses,
designing and implementing studies to answer specific questions or test hypotheses, the logic and application of statistical inference, and the strengths and weaknesses of different approaches to quantitative methods. Prerequisite: NRSG 945, BIOS 730, BIOS 740 or equivalent, or Consent of Instructor. LEC.

NRSG 944. Quantitative Research Application. 2 Hours.
This practicum provides a research application experience in quantitative methods and seminar discussions of quantitative research issues such as scientific integrity, research implementation and management, and interpretations of statistical analyses. Students identify a research problem/question/hypothesis that may be analyzed using existing data, plan and execute appropriate analyses to answer the question or test the hypothesis, and write a formal report including a description of what was done, why it was done, and an interpretation of the findings. Prerequisite: NRSG 943 or consent of instructor. LEC.

NRSG 945. Synthesis Workshop I. 1 Hour.
Leadership development and technologic applications are integrated with theoretical, statistical, and research methods. Doctoral leadership skills are refined and tested through case study simulations of theory and research applications in diverse practice settings. A qualifying examination concludes the Workshop consisting of a written and oral case study simulation. Prerequisite: BIOS 730 and BIOS 740 or equivalent, NRSG 941, NRSG 942, NRSG 946, or Consent of Instructor. Prerequisite/Corequisite: NRSG 977. LEC.

NRSG 946. Measurement Principles and Practice. 3 Hours.
Classical measurement theory and related measurement concepts are the focus of this course. Various approaches to instrumentation are examined. Students use existing data to evaluate selected measures, with emphasis on reliability and validity. They also critically analyze published reports of instrumentation for research. Basic knowledge of concept analysis is expected prior to enrollment. Prerequisite: NRSG 940, or consent of instructor. LEC.

NRSG 947. Qualitative Research Application. 3 Hours.
Students conduct fieldwork to implement a qualitative research proposal. Emphasis is placed on advanced application of various qualitative methods. Extended experience in qualitative data collection and analysis is provided. Prerequisite: NRSG 802, NRSG 945, or Consent of Instructor. LEC.

NRSG 948. Advancing Organizational and Clinical Quality. 2 Hours.
The roles of nursing leaders in the design, measurement, and evaluation of the discipline within a variety of organizational settings are analyzed. The nuances of measurement and statistics are compared and related to the quality science paradigm, applying incremental measurement techniques to foster continuous improvement. Process design, standards development and adaptation, regulatory requirements, and consumer expectations for quality are integrated into a quality plan that aligns with the student's career trajectory. Prerequisite: NRSG 804 or either [NRSG 944 or NRSG 947], or Consent of Instructor. LEC.

NRSG 949. Synthesis Workshop II. 1 Hour.
Content from the full range of doctoral courses including theory, research, statistics and professional development is integrated and synthesized. Strategies for using these content areas to meet program objectives and students’ professional objectives are explored. A qualifying examination, consisting of a written and oral case study simulation, concludes the Workshop. Prerequisites: Completion of all doctoral course work. Prerequisite: Corequisite: NRSG 948, NRSG 970. LEC.

NRSG 957. Health Informatics, Human Factors, and Ergonomics as Applied to Patient Safety. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The use of information systems including medical devices is paramount in achieving patient safety. Students will attain an inclusive understanding of how human factors and ergonomic principles can be used to improve patient safety in the design, implementation, and evaluation of information systems and medical devices. Additionally, health care professionals will acquire skills to appropriately apply error reduction strategies developed in high reliability organizations. Prerequisite: Admission to a doctoral program in nursing, NRSG 857 or consent of instructor. LEC.

NRSG 958. Knowledge Representation and Interoperability. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The need to exchange clinical information consistently between health care providers, care settings, researchers and other requires syntactic and semantic interoperability. Requirements and approaches to meet interoperability will be explored. Standards for messaging, terminology, and knowledge representation will be investigated. Prerequisite: Admission to a doctoral program in nursing, NRSG 853 or consent of instructor. LEC.

NRSG 959. Research Experience. 2 Hours.
This practicum is an intensive research experience with a specific faculty mentor. It involves working on part of the faculty mentor's current research or on a subject closely related to the mentor's work. The student submits a proposal for this research experience to the faculty mentor. Once the project is complete, the student presents the research orally in a structured forum and, if appropriate, develops a publishable manuscript. Prerequisite: Consent of instructor. FLD.

NRSG 963. Advanced Leadership Residency. 1-9 Hours.
The advanced leadership residency is designed to expand the DNP student's breadth and depth of leadership knowledge and skills in an area of practice at the aggregate/systems/organization level. Students will have the opportunity to enhance their existing advanced leadership skills in one or more of the following areas: organizational and systems leadership for enhancing healthcare outcomes; quality improvement strategies to support decision-making; prediction and evaluation of practice outcomes; patient safety initiatives; health care policy; creating and sustaining change at organizational and policy levels; or ethics related to healthcare systems; information technology; knowledge management; or population health. Prerequisite: Corequisite: NRSG 919 and NRSG 941, or consent of instructor. PRA.

NRSG 964. Advanced Clinical Residency. 1-9 Hours.
The advanced clinical residency is designed to expand the DNP student's breadth and/or depth of clinical knowledge and skills in an area of practice. The focus can be either on the delivery of sub-specialty care services or full spectrum primary care services. Students will have the opportunity to enhance their existing advanced practice skills in one or more of the following areas: the diagnosis and management of ambulatory patients with complex diagnoses and comorbid conditions in the context of family, community and culture; the diagnosis and management of patients with complex diagnoses and/or comorbid conditions who present with acute changes in health status requiring interventions available only in an acute care setting; and the diagnosis and management of patients who are unable to function independently due to age related alteration in mental and physical status, developmental, perceptual and physical disability and chronic, degenerative illness. Students will synthesize clinical knowledge and use evidence-based decision making to construct symptom-based assessments, advanced differential diagnoses, independent therapeutic interventions, and outcome evaluation of the care of clients. Prerequisites: Corequisite: Post-BSN students: NRSG 818, or NRSG 868, or NRSG 869, or NRSG 849, or NRSG 840, or
consent of instructor. Post-Master's students: A minimum of 1000 clinical hours in your current or previous work following graduation from an accredited Master's in Nursing program; National certification in your area of expertise (e.g., family, adult, psych, pediatric, CNM, etc.) CLN.

NURS 965. Special Topics: _____. 2 Hours.
Students participate in advanced study that provides theoretical, methodological, and clinical perspectives to facilitate their pursuit of research interests in an identified specialty area. Methods include directed readings, discussions, and the interpretation of data-based literature. Examples of topics are theory and research issues related to health systems, symptom management, or health behavior; topic for any given semester to be announced. Prerequisite: Consent of instructor. IND.

NURS 970. Synthesis of Minor Area of Study. 1-2 Hours.
This course provides an opportunity for the PhD student to synthesize work in their selected minor. After completion of minor coursework, students will focus on synthesizing content across these minor courses. The synthesis experience culminates in a written synthesis paper in the minor area to assure the student's competency in the minor area of study. Typically, the minor coursework and the minor synthesis paper contribute directly to the student's dissertation. Prerequisite: Completion of Minor Coursework (at least 10 credit hours) and NURS 945, or consent of instructor. LEC.

NURS 980. Doctor of Nursing Practice Project. 1-6 Hours.
The Doctor of Nursing Practice (DNP) project is an amalgamation of the student's field of inquiry in his/her doctoral course of study. As such, the DNP project requires that a practice-focused problem be identified and examined in depth. For most students the DNP project will include application of an evidence-based intervention suitable to their area of focus (e.g., organizational leadership, clinical practice, education, etc.) that involves the appropriate metric (or sets of metrics) evaluation, and dissemination of the project findings to a targeted audience. The DNP project must meet DNP Project guidelines for the DNP program. Prerequisite: NURS 911 and completion of 2 doctoral level specialty courses, or consent of instructor. FLD.

NURS 989. Doctoral Research. 1-12 Hours.
Original and independent investigation approved by and conducted under the supervision of the student's adviser or advisory committee and in partial fulfillment of the requirements for the Ph.D. degree. Prerequisite: Consent of Advisor. RSH.

NURS 997. Independent Study. 1-4 Hours.
Having chosen an appropriate mentor, the student selects an area of advanced study. Specific objectives and credit hours are jointly determined by the student and selected faculty member. Prerequisite: Prior graduate course work in the area of study and consent of instructor. IND.

NURS 999. Dissertation. 1-12 Hours.
Preparation of the dissertation based upon original research and in partial fulfillment of the requirements for the Ph.D. degree. Credit is given only after the dissertation proposal has been accepted by the student's dissertation committee. Prerequisite: Consent of Instructor. THE.

Nursing Courses

NURS 50. Research Clinical Trial Coordinator Certificate Program. 0 Hours.
The Research Clinical Trial Coordinator Certificate Program targets the interdisciplinary Health Professions and is designed to meet the training needs for individuals to become Clinical Trial Coordinators. The series of three courses over eighteen months provides as an introduction to the research coordinator role and provides in-depth knowledge of pre-, during-, and post- clinical trial study activities. Regulatory, administrative, and ethical issues will be presented as well as the daily operational requirements (e.g. study design, financial and monitoring, protocols and documentation, subject recruitment and retention, audits, etc.). A practicum experience in selected research settings provides opportunities to utilize learned competencies related to the role of a Research Coordinator during key phases of a clinical trial study: pre-study, during-study, and post-study activities. Minimum educational requirements are a high school diploma. LEC.

NURS 301. Techniques for Therapeutic Interventions I. 1 Hour.
Skills necessary to perform fundamental techniques relating to therapeutic interventions are discussed and demonstrated. The emphasis is on drug calculation and psychomotor skills. Concepts of time management, prioritization of nursing care, team building, cost effectiveness and resource utilization are introduced through scenarios and demonstrations in a laboratory setting. Prerequisite: Admission to the School of Nursing. LEC.

NURS 302. Techniques for Therapeutic Interventions II. 1 Hour.
Therapeutic interventions pertaining to care of the client experiencing acute, chronic, and complex health deficiencies are discussed and demonstrated. Case scenarios and demonstrations are used to apply the concepts of time management, prioritization of nursing care, delegation, team building, cost effectiveness, and resource utilization in a laboratory setting. Prerequisite: NURS 301. Prerequisites or Corequisites: NURS 322, NURS 325, or consent of instructor. Corequisites: NURS 366 and NURS 376. LEC.

NURS 306. Nursing Care of the Adult Experiencing Surgery. 2 Hours.
This course is designed to assist undergraduate students to acquire a scientific knowledge base necessary for delivering quality nursing care to adult surgical patients. The course will include an in-depth study of content relevant to the pre-operative, intra-operative, and post-operative phases, using Maslow's hierarchy of needs as a basis for the content. Opportunities will be provided for students to increase their skills in the use of the nursing process. Prerequisite: NURS 340 and NURS 341. LEC.

NURS 310. Information Technology For Healthcare Professionals. 1 Hour.
Beginning theory and practical applications of various uses and results of computer technologies are explored in order to provide the basic skills and current infrastructure for information management in health care delivery. These concepts and skills are essential for curriculum related activities, as well as for providing therapeutic nursing interventions and communications with faculty, client systems, and other health care participants. Learners are encouraged to be cognizant of emerging legal and ethical issues related to electronic communications. Knowledge and skills presented in this course will be developed and expanded in future nursing courses. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 312. Adult Trauma Management. 2 Hours.
Basic concepts related to the care of the traumatically injured adult are discussed. Emphasis is placed on the initial management and stabilization of the adult trauma client. The nursing process is utilized to assist the individual client to restore system balance and prevent further system imbalance. Basic trauma stabilization skills are demonstrated. Ethical, legal, and societal issues, as well as current research on trauma management will be explored. Prerequisite: NURS 340, NURS 341, NURS 350, or consent of instructor. LEC.

NURS 313. Integrating Nutrition in Nursing. 2 Hours.
Knowledge from the basic sciences is applied to explore the relationship between nutrition and body function. Nutrition requirements for the different phases of the life cycle are described. The application of
nutritional concepts necessary for the maintenance of health, prevention of illness, and minimization of the complications of acute and chronic illness will be discussed. A framework to counsel clients regarding healthful dietary habits, costs and governmental programs will be explored. Prerequisite: Completion of two Level II courses. LEC.

NURS 316. Psychosocial Aspects of Nursing Seminar. 2 Hours. Psychosocial issues that relate to nursing care across the wellness-illness continuum for client systems across the lifespan will be explored in this course. Relevant topics such as death and dying, disfiguring conditions, infertility, and coping with chronic illnesses will be investigated. Ethical and legal considerations as well as current research will be discussed. Prerequisite: Completion of two Level II courses. LEC.

NURS 317. Stress Management for Nurses. 2 Hours. This course is designed to acquaint students with the concept of stress as it occurs in our society and to introduce them to effective ways of dealing with stress in themselves and in their clients. The course will examine socio-cultural, physiological, and psychological components of stress. Students will be exposed to effective stress management techniques through the utilization of small group experiential exercises as a teaching methodology. LEC.

NURS 318. Advanced Concepts in Intravenous Therapy. 2 Hours. Advanced concepts in intravenous therapy that are relevant to practice in acute, ambulatory, long term and home settings will be presented. All venous access devices and types of intravenous therapies will be studied. Emphasis will be placed on client assessment, client teaching, early recognition of complications and research-based implications as they relate to intravenous therapy and care of clients across the lifespan. Hands-on opportunities to work with the various intravenous access devices and therapies will be provided in non-clinical and clinical laboratory settings. Prerequisite: Completion of two Level II courses. LEC.

NURS 320. Pathophysiology for the Practicing Nurse. 3 Hours. This course is designed to provide students with a basic understanding of pathophysiological changes that occur within the internal environment of the individual. Understanding these alterations is basic to providing quality nursing care. System variations across the lifespan are addressed. Prerequisites: Admission to the School of Nursing and RN to BSN program or consent of instructor. Exams will be scheduled as in class proctored experiences. LEC.

NURS 321. Alterations in Physiological Functioning I. 3 Hours. Basic mechanisms underlying illness and disease are stressed as a basis for the understanding of health promotion and disease prevention in this first of two sequential courses. Pathophysiological changes that occur within the internal environment of individuals in the presence of dysfunction of disease of selected systems are presented as a rationale for nursing diagnoses and therapeutic interventions. System variations across the life span are addressed. Prerequisite: Admission to the School of Nursing. LEC.

NURS 322. Alterations in Physiological Functioning II. 2 Hours. In this second sequential course, an understanding of pathophysiological changes that occur within the internal environment of the individual in the presence of dysfunction or disease of selected systems are provided as a rationale for nursing diagnoses and therapeutic interventions. The most common alterations in selected body systems are presented, with relevant risk factors and epidemiology, pathophysiologic mechanisms, and clinical manifestations. System variations across the life span are discussed. Prerequisite: NURS 321. Prerequisites or corequisites: NURS 325 or consent of instructor. LEC.

NURS 325. Pharmacology. 3 Hours. Pharmacodynamics and pharmacokinetics of drug therapy are discussed in order to provide a basic understanding of the client's reaction to a drug both therapeutically and adversely, and to predict potential drug interactions. Internal and external environmental factors affecting drug therapy are assessed in order to provide a comprehensive data base for therapeutic nursing interventions. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, side effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drug effects, and client system education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisites: Admission to the School of Nursing or consent of instructor. Prerequisite: Corequisite: NURS 322 or consent of instructor. LEC.

NURS 326. Pharmacology for the Practicing Nurse. 3 Hours. Pharmacodynamics and pharmacokinetics of drug therapy are discussed in order to provide a basic understanding of the client's reaction to a drug, both therapeutically and adversely, and to predict potential drug interactions. Internal and external environmental factors affecting drug therapy are assessed in order to provide a comprehensive database for therapeutic nursing interventions. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, side effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drug effects, and client system education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisites: Admission to the School of Nursing or consent of instructor. Prerequisite: Corequisite: NURS 322 or consent of instructor. LEC.

NURS 327. Communicating and Managing Healthcare Information. 3 Hours. Basic theories of interpersonal communication and information technologies are explored. Use of these skills and technologies to develop therapeutic relationships with patients and the interdisciplinary healthcare team is emphasized. Legal and ethical issues related to health information technology and health information exchanges will be examined. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 331, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 328. Professional Development I: Introduction to the Profession. 2 Hours. Students are introduced to the evolution of the profession of nursing. Focus is on professional and personal accountability. Students will have opportunities to establish personal and professional boundaries, examine their own beliefs and values, and develop their personal philosophy of nursing. Students will explore how their lived experience will impact their professional practice. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 329, NURS 330, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 329. Alterations in Physiological Functioning I. 2 Hours. Basic mechanisms underlying illness and disease are stressed as a basis for the understanding of health promotion and disease prevention in this first of two sequential courses. Pathophysiological changes that occur within the environments of individuals in the presence of dysfunction or disease of selected systems are presented as a rationale for nursing diagnoses and therapeutic interventions. System variations across the lifespan (fetuses, children, pregnant women, adults, and older adults) are addressed. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 328, NURS 330, NURS 332, NURS 333 or consent of instructor. LEC.
NURS 330. Pharmacology I. 2 Hours.
Pharmacodynamics and pharmacokinetics of drug therapy across the lifespan are discussed in order to provide a basic understanding of the patient's reaction to a drug both therapeutically and adversely, and to predict potential drug interactions. Personal, genetic, and environmental factors affecting drug therapy are assessed in order to provide a comprehensive data base for therapeutic nursing interventions. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, adverse effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drug effects, and patient education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 328, NURS 329, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 331. Basic Assessment and Therapeutic Interventions. 3 Hours.
Skills necessary to perform basic patient assessment and therapeutic interventions are discussed and demonstrated. Opportunities are provided in a laboratory setting for students to demonstrate cognitive and psychomotor competencies of therapeutic interventions and assessment of the individual patient across the life span. The emphasis is on interviewing techniques, physical examination, and psychomotor skills. Developmental factors and risk factors, including genetic and environmental, that affect the patient's health will be explored. Case studies and simulation are used to apply the concepts of safe quality care. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 328, NURS 329, NURS 330 or consent of instructor. LEC.

NURS 332. Health and Illness: Foundations of Nursing. 3 Hours.
Concepts basic to the art and science of nursing are introduced as a foundation for safe, quality patient care. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Evidence-based principles of nursing and health promotion are integrated to prepare the student to meet the health-related needs of a patient. The nurse's role as a member of the interdisciplinary team will be examined. Principles of information management and communication are integrated into the care of the patient with health care needs. Prerequisite: NURS 331, or consent of instructor. Corequisite: NURS 327, NURS 328, NURS 330, NURS 333, or consent of instructor. LEC.

NURS 333. Health and Illness: Foundations of Nursing Practicum. 1 Hour.
Evidence-based clinical reasoning is applied in the care of individual patients with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 331, or consent of instructor. Corequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, or consent of instructor. LEC.

NURS 334. Professional Development II: Image, Roles, and Ethics. 3 Hours.
Ethical principles of patient care are applied. Team building and group process skills are explored to facilitate students working within healthcare teams. The role of the nurse as a member of the interprofessional health care team is examined using concepts and theories of organizational design, quality, group process, and team building. The professional responsibilities and roles of advocacy will be explored. Regulatory agency influence on the microsystem will be investigated. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. LEC.

NURS 335. Quality Improvement. 2 Hours.
Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. LEC.

NURS 336. Alterations in Physiological Functioning II. 3 Hours.
Building on NURS 321, this course expands knowledge of pathophysiological changes that occur within the environments of the individual in the presence of dysfunction or disease. The most common alterations in selected physiological systems are presented as a framework for clinical reasoning. Relevant risk factors, epidemiology, pathophysiological mechanisms, and clinical manifestations across the life span (fetuses, children, pregnant women, adults, and older adults) are discussed. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 337, NURS 338, or consent of instructor. LEC.

NURS 337. Pharmacology II. 2 Hours.
In this second sequential course, students continue their study of pharmacology across the lifespan. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, adverse effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drugs' effects, and patient education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 337, NURS 338, or consent of instructor. LEC.

NURS 338. Health and Illness: Nursing Across the Lifespan. 3 Hours.
A greater sophistication of clinical reasoning is developed to achieve safe and quality outcomes using multiple ways of knowing including nursing knowledge. Emphasis is placed on managing the care of patients experiencing acute and chronic illnesses and promoting health across the lifespan. Strategies to empower and engage patients/designees in all aspects of the health care process are examined. Evidenced-based therapeutic nursing interventions that meet a patient's holistic health needs will be expanded. Perspectives of other health care members will be recognized in order to collaborate and work effectively as a team to provide interdisciplinary care. Technology and communication skills are integrated as methods to support safe processes of care. Prerequisite: NURS 331, NURS 332, NURS 333, NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. LEC.

NURS 339. Health and Illness: Nursing Across the Lifespan Practicum. 3 Hours.
Students engage patients in active partnerships to manage acute and chronic illness and promote health across the lifespan. Multiple sources of evidence are incorporated into the planning, implementation and evaluation of nursing care including nurse sensitive quality indicators. Coordination, integration and continuity of care for multiple patients will be applied in the healthcare microenvironment. Emphasis is placed on interdisciplinary collaboration to ensure safe and quality outcomes.
Technology and information management tools are utilized to support safe processes of care. Prerequisite: NURS 331, NURS 332, NURS 333, NURS 327, NURS 328, NURS 329, NURS 330, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, or consent of instructor. LEC.

NURS 340. Foundations of Nursing and Health Promotion. 3 Hours.
Four concepts basic to the art and science of nursing (client systems, environment, health, and nursing) are introduced as a foundation for professional practice. The influence of nursing values and standards (ANA), client characteristics, and the evolving health care system on nursing practice are explored. Principles of nursing are integrated with concepts of health promotion to prepare the student to meet the fundamental health-related needs of individual and family client systems across the life span. Prerequisite: Corequisite: Admission to the School of Nursing, NURS 301, NURS 341, NURS 350. LEC.

NURS 341. Foundations of Nursing Health Promotion: Clinical Laboratory. 2 Hours.
The four concepts basic to the art and science of nursing (client systems, environment, health and nursing) in providing care to healthy clients across the life span are demonstrated in a clinical laboratory setting. Students develop beginning skill in applying the nursing process and planning care for healthy individuals and families. Prerequisite: Corequisite: Admission to the School of Nursing or consent of the instructor, NURS 301, NURS 340, NURS 350. LEC.

NURS 344. The Pediatric Surgical Client. 2 Hours.
Introduces students to concepts and theories of pediatric operating room nursing. Factors in the client's internal and external environment that contribute to alterations in system balance resulting in the need for surgical intervention are explored. Components of the role of the OR Nurse during preoperative, intraoperative, and postoperative phases are emphasized. Physiological and psychological alterations are identified. Nursing interventions used to maintain or restore system balance and prevent further system imbalance are investigated. Ethical and legal issues, as well as current research involving the practice of pediatric operating room nursing, are discussed. Prerequisite: NURS 375 and NURS 376. LEC.

NURS 345. Nursing of Children: Practicum. 2 Hours.
Evidence based clinical reasoning is applied in the care of children with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 333, NURS 339, or consent of instructor. CLN.

NURS 346. Nursing of Adults: Practicum. 2 Hours.
Evidence based clinical reasoning is applied in the care of adults with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 333, NURS 339, or consent of instructor. CLN.

NURS 350. Client Assessment. 3 Hours.
Opportunities are provided in a laboratory setting to demonstrate cognitive and psychomotor competencies related to assessment of the individual client system across the life span. The emphasis is on physical examination and historical data collection. Developmental factors and environmental stressors that influence health status are explored.

The four basic methods of physical examination (inspection, palpation, percussion and auscultation) are presented. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 352. Client Assessment for the Practicing Nurse. 3 Hours.
Opportunities are provided, in a laboratory setting and with simulations, to demonstrate competencies in assessment of the individual client system across the life span. Historical data collection and psychological and physical assessment are reviewed. Interviewing techniques and the four basic methods of physical examination (inspection, percussion, palpation, and auscultation) are presented. Critical thinking is emphasized to cluster data to select and support nursing diagnoses. Prerequisite: Admission to the School of Nursing and RN licensure, or consent of instructor. LEC.

NURS 353. Pathophysiology for the Baccalaureate Nurse. 3 Hours.
This course is designed to provide students with a basic understanding of pathophysiological changes that occur within the internal environment of the individual. Understanding these alterations is basic to providing quality nursing care. System variations across the life span are addressed. Prerequisite: Admission to the School of Nursing. LEC.

NURS 354. Nursing Pharmacology. 3 Hours.
Pharmacodynamics and pharmacokinetics of drug therapy are discussed in order to provide a basic understanding of the client's reaction to a drug, both therapeutically and adversely, and to predict potential drug interactions. Internal and external environmental factors affecting drug therapy are assessed in order to provide a comprehensive database for therapeutic nursing interventions. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, side effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drug effects, and client system education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: Admission to the School of Nursing. LEC.

NURS 355. Assessment for the Prelicensure Nurse. 3 Hours.
Opportunities are provided for students to demonstrate competencies in assessment of the individual patient across the life span. Historical data collection and psychological and physical assessment are reviewed. Interviewing techniques and the four basic methods of physical examination are presented. Identification of risk factors, including genetic and environmental, that affect the patient's health will be explored. Prerequisite: Admission to the School of Nursing. LEC.

NURS 356. Using Technology and Informatics to Improve Patient Safety. 3 Hours.
Beginning theory and practical applications of various uses and results of computer technologies, including electronic health records, are explored in order to provide the basic skills and current infrastructure for information management in healthcare delivery. These concepts and skills are essential for curriculum related activities, as well as for providing therapeutic nursing interventions and communications with faculty, client systems, and other healthcare participants. Built-in safeguards, and legal and ethical issues related to electronic communications and health records are emphasized using 21st century tools of communication and collaboration. Knowledge and skills presented in this course will be expanded in future nursing courses related to the baccalaureate completion program. Prerequisite: Admission to the School of Nursing or consent of instructor. Satisfactory completion of a statistics course. LEC.

NURS 357. Introduction to the Baccalaureate Nurse Role. 3 Hours.
Contemporary issues confronting the nursing profession are discussed. Personal accountability, professional boundaries, and group process skills are explored to facilitate students working within interprofessional health care teams. Students will examine their own beliefs and values, establish personal and professional boundaries, and develop their personal philosophy of nursing. Students will explore how their lived experience will
impact their professional practice. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

**NURS 360. Mental Health Nursing. 3 Hours.**
Principles of communication as an intervention in developing therapeutic relationships with clients from varying age groups in psychiatric settings are discussed. Mental health concepts and selected theoretical frameworks are used to understand adaptive and maladaptive coping behaviors in response to alterations in psychological functioning. These theoretical frameworks, as well as designated diagnostic classification systems, are discussed in relation to the implementation of the nursing process. Students engage in critical thinking to examine the role of the nurse in psychiatric-mental health nursing, exploring it in relation to health promotion, disease prevention, community resources, historical perspectives, and economic, legal and ethical issues. Prerequisite: Level I courses. Prerequisites or Corequisites: NURS 302, NURS 322 and NURS 325, or consent of instructor. Corequisite: NURS 361. LEC.

**NURS 361. Mental Health Nursing: Clinical Laboratory. 2 Hours.**
Theoretical concepts from NURS 360 and nursing therapeutics are applied in the care of clients who have alterations in psychological functioning. Acute care and community-based clinical experiences provide opportunities for students to participate in interdisciplinary team planning, interventions, and therapeutic group meetings. Prerequisite: Corequisite: NURS 360. LAB.

**NURS 362. Depression in Children and Adolescents: Assessment & Treatment. 2-3 Hours.**
This course will offer a detailed overview of the assessment and treatment of depression in children and adolescents and will present national depression management guidelines. Emphasis will be placed on the role of the nurse in depression management, including collaboration across healthcare professionals/teams. Acute and chronic depression presentations across diverse children and adolescents will be examined. The course will explore current pharmacological and psychosocial treatments, with an emphasis on the outpatient setting. The course will address commonly occurring co-morbid health concerns and psychosocial issues. The course will include analysis of the impact of environmental factors that relate to health promotion, disease prevention, symptom management, and behavior change related to depression in children and adolescents. Admission into the School of Nursing or consent of the instructor for RN-to-BSN students; N360 LEC.

**NURS 365. Nursing of Adults. 3 Hours.**
Use of the nursing process in the care of adult clients in a variety of settings with acute and chronic illness is discussed. The role of the nurse in the use of clinical pathways to guide the interdisciplinary care of the client in the evolving health care environment is explored. Emphasis is placed on therapeutic nursing interventions that will successfully manipulate environmental factors to promote, maintain, and restore system balance and to prevent further system imbalance. Legal, ethical, economic and cultural considerations associated with the management of adults with acute and chronic illness are investigated. Prerequisite: Level I courses. Prerequisites or Corequisites: NURS 302, NURS 322, NURS 325, or consent of instructor. Corequisite: NURS 366. LEC.

**NURS 366. Nursing of Adults: Clinical Laboratory. 2 Hours.**
Theoretical concepts from NURS 365 and the nursing process are applied in the care of adult clients with acute and chronic illness in a variety of acute care and community settings. The student demonstrates the role of the nurse in interdisciplinary care including clinical pathways. Selected cultural, legal ethical and economic principles pertinent to the clinical practicum are applied. Prerequisite: Corequisite: NURS 365. LAB.

**NURS 375. Nursing of Children. 3 Hours.**
Acute and chronic alterations in physiological and psychological functioning of the child and family are introduced. Emphasis is placed on changes within the internal and external environments which relate to the child’s acute and chronic illness experience. Therapeutic nursing interventions are explored in the context of research findings, holistic perspectives and outcome measures as related to the dynamics of system balance, growth and development, health promotion and client system values. The role of the nurse in an evolving health care system of managed care is examined. Holistic and caring approaches to human functioning are explored. Legal, ethical, cultural, economic and social principles which affect decision-making, interdisciplinary collaboration and outcomes of care are identified. Prerequisite: Level I courses. Prerequisites or corequisites: NURS 302, NURS 322, NURS 325, or consent of instructor. Corequisite: NURS 376. LEC.

**NURS 376. Nursing of Children: Clinical Laboratory. 2 Hours.**
Theoretical concepts from NURS 375 are applied in the care of children with acute and chronic health problems and their families. Research-based nursing therapeutics, managed care, interdisciplinary collaboration and outcome measures are emphasized in the care of children with acute and chronic health problems. Hospital, clinic, community and home-based settings provide opportunities for holistic and caring approaches to children and families from culturally and economically diverse backgrounds. Prerequisite: Corequisite: NURS 375. LAB.

**NURS 377. Care of the Childbearing Family. 2 Hours.**
Emphasis is placed upon meeting the needs of mother, infant, and family as the pregnancy progresses from conception through postpartum period. Students will explore the concepts of health promotion and disease prevention related to women and the newborn infant. Common problems of pregnancy, labor, postpartum and specific needs of the newborn infant are included. Management and planning of the Nursing Process will include concepts from the art and science (client systems, environment, health, and nursing). Prerequisite: Corequisite: Admission to the School of Nursing. NURS 301, NURS 340, NURS 350 or consent of instructor. LEC.

**NURS 378. Care of the Childbearing Family: Clinical Lab. 1 Hour.**
Meeting the needs of mother, infant, and family as the pregnancy progresses from conception through the postpartum period is demonstrated in a clinical laboratory setting. Care of families during the normal childbearing experience is an integral part of this course. Students develop beginning skills in applying the nursing process and planning care for women and newborn infants. Prerequisite: Corequisite: Admission to the school of Nursing or consent of instructor, NURS 340, NURS 301, NURS 350. LBN.

**NURS 382. Honors Seminar. 1 Hour.**
This seminar provides the Honors nursing student the opportunity to explore topics of interest and begin reviewing the current research literature on a given topic. Emphasis is placed on interaction with active nurse researchers to enable the student to identify available research opportunities in ongoing studies. Students are introduced to the application of various methods used to address nursing questions. Prerequisite: Admission to the Nursing Honors Program. LEC.

**NURS 383. At Risk Childbearing Family. 2 Hours.**
Alterations in physiological and psychological functioning of the child system as it relates to at risk clients during antepartum, intrapartum, and postpartum periods will be explored. Theoretical concepts related to the dynamics of individual and family systems balance and the application of nursing process during pregnancy, birth, and early parenting will be examined. Care of women and childbearing families will include interaction with clients and their families in hospital and community settings. Prerequisite: Completion of two Level II core courses (NURS
NURS 354. Mentor/Doula. 2 Hours.
The mentor/doula role and its benefit to the pregnant/postpartum client will be explored. The learner will enhance positive health behaviors in an assigned pregnant teenage client during the antepartum, intrapartum, postpartum, as well as the early parenting period as the mentor/doula. The student functioning as a mentor/doula will educate and coach the pregnant teenager during the birthing/postpartum process. Prerequisite: Application to the St. Luke’s Hospital Mentor/Doula Program. Prerequisite: Corequisite: NURS 375 or consent of instructor. LEC.

NURS 401. Basic Spanish for Nurses. 2 Hours.
This is an entry level Medical Spanish course for students with minimal or no Spanish language education. Students will develop working language skills, learning techniques for optimal communication, phonetics, morphology, grammar, understanding sentence structure, conjugation and cultural aspects applicable to the current health care environment. The goal is to achieve proficiency and confidence when using the Spanish language with Hispanic patients. Prerequisite: Corequisite: Minimal or no knowledge of Spanish language and approval from the Dean of Student Affairs. LEC.

NURS 402. Health Care of the Older Adult. 2-3 Hours.
Students will explore concepts and theories to increase their knowledge base of the complex challenges that face older adults and their families. Emphasis will be on promotion, maintenance and restoration of health and wellness, and the prevention of disease. Internal and external environmental factors will be assessed including biophysical, psychological, behavioral, sociocultural, economic and political. Students will utilize case examples and discussion to practice integrating communication and clinical skills into the role of the nurse as a client advocate and professional health team member. A clinical experience option for one-credit hour is offered for students to provide direct care to older adults in a variety of settings. Prerequisite: NURS 360, NURS 420, NURS 434 or consent of instructor. LEC.

NURS 404. Concepts of Professional Nursing and Health Promotion. 3 Hours.
Concepts and skills required for the transition to the professional nurse’s role and application of the nursing process with client systems through the life span are explored. The four concepts basic to the art and science of nursing (client systems, environment, health, and nursing) are demonstrated. Internal and external environmental factors are examined that promote, maintain, or restore client system balance with emphasis on different ages and developmental stages. The concepts of health promotion and illness prevention are emphasized, including the use of health teaching, screening, and community referrals for culturally diverse clients across the life span. Prerequisite: RN licensure, and admission to the School of Nursing. LEC.

NURS 407. The Camper Experience For Healthy and Chronically Ill Youth. 2 Hours.
Nursing concepts and their application in a camp setting that are relevant to the day to day activities of youths in camp is the focus of the course. Emphasis is placed on individual and small group teaching, promotion of self care, and role of the nurse in a camp environment. Nursing care functions will be practiced in a residential, outdoor environment in a relaxed atmosphere. The nursing process is the organizing framework for content to enable the student nurse to assist in orientation to the initial camper experience and to promote self care in the camper, whether for general health or a chronic illness. Overnight experiences may be required. Prerequisite: Corequisite: NURS 375 or consent of instructor. LEC.

NURS 410. Primary Women’s Health Care Across the Lifespan. 3 Hours.
Psychological, sociological, and physiological issues of health and human functioning of the female client systems across the life span are explored. Theory and research-based therapeutic management of acute, episodic, and chronic conditions that occur in community based women and their families will be planned. Professional values including standards of practice, certification, cultural, legal and ethical issues, and professional roles will be addressed. The health care delivery system will be analyzed for cost effectiveness and sensitivity to women. Prerequisite: Corequisite: RN-BSN student or consent of instructor. LEC.

NURS 411. Population-Based Nursing. 3 Hours.
Concepts and theories related to providing health care to complex systems and aggregates in the community, state, nation and world are explored. Emphasis is placed on the promotion, maintenance and restoration of health and wellness, and the prevention of disease. Environmental components including historical, political, social, cultural, and economic factors are presented. The role of the health care provider in identifying, prioritizing and meeting the health and life participation needs of populations is discussed. Prerequisite: Admission to the School of Nursing. LEC.

NURS 412. Nursing in Healthcare Microsystems. 3 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in micro-environments of health care delivery. The microsystem is the structural unit responsible for delivering care to specific patient populations or the frontline places where patients, families, and care teams meet. This environment is where the nurse participates in a broad mixture of direct and indirect care patient care delivery. Findings of current research related to nursing leadership are discussed. Professional, organizational, historical, and social factors that affect health care delivery within a clinical micro system are considered. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 413. Teamwork and Collaboration in Healthcare. 3 Hours.
Ethical principles of patient care are applied. Team building and group process skills are explored to facilitate working within the interprofessional healthcare team. The role of the nurse as a member of the healthcare team is examined using concepts and theories of communication, group process, team building, and advocacy. Skills to continue professional growth and support excellence in nursing practice are investigated. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 414. Organizational Influences on Nursing Practice. 3 Hours.
The impact that nursing departments and organizational decision making has on the achievement of quality patient outcomes will be explored. Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the meso-environment of health care delivery. The role of the nurse as leader in achieving organizational goals addressing socio-cultural, economic, legal, and political environmental factors is examined. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 415. Improving Healthcare Quality. 3 Hours.
Skills of inquiry and information literacy are developed to locate and evaluate information to improve healthcare quality. Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: Admission to the School of Nursing or consent of instructor. Satisfactory completion of a statistics course. LEC.
NURS 416. Evidence-Based Nursing Practice. 3 Hours.
Searching, critiquing and synthesizing sources of evidence as it applies to the nurse's clinical practice will be emphasized. Fundamental principles of the research process and models for applying evidence to clinical practice will be explored. Strategies for implementation of evidence into clinical practice will be discussed. Prerequisite: Admission to the School of Nursing or consent of instructor. Satisfactory completion of a Statistics course.

NURS 417. Influences of the Healthcare Macro-System on Nursing Practice. 3 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the macro-environment of health care delivery. The role of the nurse as a provider of direct and indirect care is expanded to include local, state, national and international regulatory, legal, and professional association's interactions that impact the ability of the nurse to deliver patient care. Prerequisite: Admission to the School of Nursing. LEC.

NURS 418. Senior Nursing Project. 3 Hours.
Synthesis of knowledge for professional practice will guide development of a small test of change project to meet an identified need in an area of interest. The student will select an area associated with a patient safety initiative, patient education need or agency educational need for project implementation. Prerequisite: NURS 353, NURS 354, NURS 355, NURS 356, NURS 357, NURS 411, NURS 412, NURS 413, NURS 414, NURS 415, NURS 416, NURS 417, or consent of instructor. LEC.

NURS 421. Nursing of The Client With Complex Acute Needs: Clinical Laboratory. 1.5 Hour.
Theoretical concepts from NURS 420 are applied in a clinical laboratory setting. Critical thinking and the nursing process are used to provide therapeutic nursing interventions with client systems experiencing complex acute alterations in physiological and psychological functioning. Emphasis is on mastery of advanced assessment techniques and interdisciplinary communication. Opportunities are provided for application of the concepts for using technically advanced therapeutics which support physiological functioning and maintain hemodynamic stability. Prerequisite: Corequisite: NURS 420. LAB.

NURS 430. Population Based Health Care. 2 Hours.
Concepts and theories related to providing health care to complex systems and aggregates in the community, state, nation and world are explored. Emphasis is placed on the promotion, maintenance and restoration of health and wellness and the prevention of disease. Internal and external environmental components which include historical, political, social, cultural and economic factors are presented. The role of the health care provider in identifying, prioritizing and meeting the health needs of aggregates is discussed. Prerequisite: Level II courses. Corequisite: NURS 431. LEC.

NURS 431. Population Based Health Care: Clinical Laboratory. 1.5 Hour.
Concepts and theories from NURS 430 are applied to the health care of aggregates in the community. Students are given opportunities for interdisciplinary collaboration in the provision of health care for culturally diverse populations. Prerequisite: Level II courses. Corequisite: NURS 430. LAB.

NURS 432. Perioperative Nursing. 2 Hours.
The perioperative nursing course focus is on the role and practice of the professional perioperative nurse and the basic skills and knowledge involved in operating room nursing. A technological orientation will be used to apply the nursing process in assisting the patient in adapting to the surgical experience; to demonstrate skill in applying knowledge in motor and manipulative activities; and to facilitate therapeutic relationships between the nurse and the patient. It is anticipated that upon completion of the course, the registered nurse will be able to assume responsibilities at the beginning staff nurse level in the operating room. Prerequisite: Current R.N. licensure in Kansas and graduate of an N.L.N. accredited School of Nursing. LEC.

NURS 433. Introduction to the Professional Nurse Role. 4 Hours.
Concepts and skills required for the transition to the professional nurse's role and the application of the nursing process with client systems through the life span are explored. Metaparadigms foundational to the art and science of nursing (client systems, environment, health, and nursing) are explored. Environmental factors are examined that promote, maintain, or restore client system balance with emphasis on the adult client. Communication, clinical leadership and evidence-based practice skills that enhance the student's ability to perform in a complex organizational system are emphasized. Prerequisite: Corequisite: Admission to the School of Nursing LEC.

NURS 434. Technology to Enhance Client Safety. 2 Hours.
Beginning theory and practical applications of various uses and results of computer technologies, including electronic health records, are explored in order to provide the basic skills and current infrastructure for information management in healthcare delivery. These concepts and skills are essential for curriculum related activities, as well as for providing therapeutic nursing interventions and communications with faculty, client systems, and other healthcare participants. Built-in safeguards, and legal and ethical issues related to electronic communications and health records are emphasized using 21st century tools of communication and collaboration. Knowledge and skills presented in this course will be expanded in future nursing courses related to the baccalaureate completion program. Prerequisite: Corequisite: Admission to the School of Nursing. LEC.

NURS 435. Leading and Managing in Healthcare Micro-Environments. 6 Hours.
Nursing practice in an evolving health care system in addressed with emphasis on the unique challenges in micro-environments of health care delivery (sub-units, units, departments, divisions). The role of the nurse as leader and manager of a healthcare team is examined using concepts and theories of organization, management, leadership, quality, decision-making and group process. Findings of current research related to nursing management and leadership are discussed. Professional, organizational, historical, and social factors that affect health care delivery within an organization are considered. Prerequisite: NURS 433 LEC.

NURS 437. Population Based Health Care for the Professional Nurse. 3 Hours.
Concepts and theories related to providing health care to complex systems and aggregates in the community, state, nation and world are explored. Emphasis is placed on the promotion, maintenance and restoration of health and wellness and the prevention of disease. Environmental components including historical, political, social, cultural, and economic factors are presented. The role of the health care provider in identifying, prioritizing and meeting the health and life participation needs of populations is discussed. Prerequisite: Corequisite: NURS 434 LEC.

NURS 438. Population Based Healthcare for the Professional Nurse: Clinical Laboratory. 1 Hour.
Concepts and theories from NURS 437 are applied to the health care of aggregates in the community. Students are given opportunities for multidisciplinary collaboration in the provision of health care for culturally diverse populations. Prerequisite: Corequisite: NURS 437 LAB.
NURS 439. Leading and Managing in the Macro-Environment of Health Care. 6 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the macro-environment of health care delivery (organization as part of Health Care Delivery System). The role of the nurse as leader and manager of an organization that exists in a unique sociopolitical, cultural, economic, technological, and psychographic environment is examined. Findings of current research related to nursing management and leadership are discussed. The student uses 21st century tools of collaboration and communication to address professional, organizational, historical, and social factors that affect a healthcare organization's role and function in society. Prerequisite: NURS 435 LEC.

NURS 440. Leadership and Management in Nursing. 3 Hours.
Nursing practice in an evolving health care system is addressed as well as the implications of a managed care environment on health care delivery. The role of the nurse as leader and manager of a health care team is examined using concepts and theories of organization, management, leadership, change, decision making, and group process. Findings of current research related to nursing management and leadership are discussed. Historical, political, economic, social, and cultural factors that affect health care delivery within an organization are considered. Prerequisite: Level II courses. LEC.

NURS 441. Nursing Research in an Evidence-Based Practice Setting. 3 Hours.
Searching, critiquing and synthesizing sources of evidence as it applies to the nurse's clinical practice will be emphasized. Fundamental principles of the research process and models for applying evidence to clinical practice will be explored. Strategies for implementation of evidence into clinical practice will be discussed. Prerequisite: Admission to the RN to BSN program, course in statistics. LEC.

NURS 442. Critical Inquiry for Nursing Practice. 2-3 Hours.
This course is designed to develop the health professional's role as a critical thinker and to promote a skill set to enhance decision making for a diverse multicultural patient population. Students apply problem solving skills to a variety of clinical case scenarios in order to develop logical solutions to the clinical problems demonstrated. Students provide rationale for their decisions in order to critique their own clinical decision making process. Prerequisite: Corequisite: NURS 420, NURS 421 or consent of instructor. LEC.

NURS 443. Developing the Baccalaureate Nurse Role. 3 Hours.
Contemporary issues confronting the nursing profession are discussed and methods to advocate for patients and the profession are investigated. Communication, clinical leadership, and evidence-based practice skills that enhance the student's ability to perform in a complex organizational system are emphasized. Personal accountability, professional boundaries, team building, and group process skills are explored to facilitate students working within interprofessional health care teams. Students will examine their own beliefs and values and develop their personal philosophy of nursing. Prerequisite: Admission to the RN to BSN program. LEC.

NURS 444. Using Technology to Enhance Client Safety. 3 Hours.
Beginning theory and practical applications of various uses and results of computer technologies, including electronic health records, are explored in order to provide the basic skills and current infrastructure for information management in healthcare delivery. These concepts and skills are essential for curriculum related activities, as well as for providing therapeutic nursing interventions and communications with faculty, client systems, and other healthcare participants. Built-in safeguards, and legal and ethical issues related to electronic communications and health records are emphasized using 21st century tools of communication and collaboration. Knowledge and skills presented in this course will be expanded in future nursing courses related to the baccalaureate completion program. Prerequisite: Admission to the RN to BSN program. LEC.

This course is designed to enlighten students to new cultures, provide the opportunity to see how these cultures deal with health care, and assess the clients' internal and external environment that impact health care. Various roles and responsibilities of nurses participating in international health are examined. A short term immersion experience provides an opportunity to incorporate the nursing process in clinic and community settings and to function as members of a health care team. Prerequisite: NURS 333, NURS 339, or consent of instructor. LEC.

NURS 446. Population Based Health Care for the Practicing Nurse. 3 Hours.
Concepts and theories important to providing health care to aggregates, communities, and populations are explored. Health promotion and prevention of disease and injury as essential elements of baccalaureate nursing practice are emphasized. Determinants of health are identified to allow students to construct methodologies that address health care disparities. The role of individuals within the interprofessional healthcare team is examined to determine the contributions of each to the achievement of healthy populations. Prerequisite: Admission to the RN to BSN program. LEC.

NURS 447. Nursing Practice within the Clinical Health Care Micro System. 3 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in micro-environments of health care delivery. The microsystem is the structural unit responsible for delivering care to specific patient populations or the frontline places where patients, families, and care teams meet (2008 AACN Essentials, p. 38). This environment is where the nurse participates in a broad mixture of direct and indirect patient care delivery. Findings of current research related to nursing leadership are discussed. Professional, organizational, historical, and social factors that affect health care delivery within a clinical micro system are considered. Prerequisite: Admission to the RN to BSN program. LEC.

NURS 448. Scholarly Inquiry for Quality Improvement. 3 Hours.
Skills of inquiry and information literacy are developed to locate and evaluate information to improve healthcare quality. Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: Admission to the RN to BSN program LEC.

NURS 449. Nursing Practice within the Healthcare Organization. 3 Hours.
The impact that nursing departments and organizational decision making has on the achievement of quality patient outcomes will be explored. Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the meso-environment of health care delivery. The role of the nurse as leader in achieving organizational goals addressing socio-cultural, economic, legal, and political environmental factors is examined. Prerequisite: Admission to the RN to BSN program LEC.

NURS 451. Navigating the Influences of the Health Care Macro-Environment. 3 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the macro-environment of health
care delivery. The role of the nurse as a provider of direct and indirect care is expanded to include local, state, national and international regulatory, legal, and professional association interactions that impact the ability of the nurse to deliver patient care. Prerequisite: Admission to the RN to BSN program LEC.

NURS 453. Nursing and Children with Developmental Disabilities. 2 Hours.
This course provides the student with an introduction to children with developmental disabilities. The impact of environmental factors on children and their families is examined. The ability of children and their families to maintain a state of well-being and the nurse’s role in promoting a maximum state of well-being is explored. Information about children with developmental disabilities and their families is based on understanding of nurse-client interactions that can assist in identifying and meeting the needs of children and their families. Prerequisite: NURS 375, NURS 376 concurrently; or permission of instructor. FLD.

NURS 455. Legal/Ethical Foundation for Professional Nursing Practice. 3 Hours.
Legal and ethical issues related to nursing practice are discussed. Laws and ethical principles that guide professional nursing practice in the current health care delivery system are emphasized. Information on the law, legal system, malpractice, negligence, and standards of care is provided. Distinctions between legal and ethical bases for nursing actions are identified in order to provide guidance in the decision making process. Critical thinking is used to analyze the impact of personal, professional, societal, and client system values on ethical decision making. Prerequisite: NURS 340. LEC.

NURS 460. Nursing Research. 2 Hours.
The history of nursing research, terminology, and steps in the research process are explored. Research as a basis for assessment of outcomes of health promotion and health care interventions including therapeutic nursing interventions is emphasized. Research questions relevant to clinical practice are identified. Interpretation of research for use in nursing practice is emphasized. The role of theory and ethical issues involved in the conduct of research is addressed. Prerequisite: Level II courses or consent of instructor. LEC.

NURS 465. Psychiatric Mental Health Nursing of Children & Adolescents. 2-3 Hours.
This course focuses on mental health issues and psychiatric disorders common to children and adolescents and their family such as acute, short term mental health problems and ongoing psychiatric disorders whose onset are in childhood or adolescence. Developmental, biobehavioral, crisis theories, and psychoeducational frameworks and supporting outcome research are analyzed as they apply to children/adolescents/families who meet the criteria for specific psychiatric disorders or who are exhibiting high risk behaviors. Analysis of the impact of environmental factors that relate to health promotion, disease prevention, symptom management, and behavior change in this population will be examined. The nursing process is applied to this population by means of case studies directed projects, and active on-line class participation. Professional issues that commonly occur in implementing the psychiatric mental health generalist nurse role while working with this patient population are emphasized. Prerequisites: Corequisite: Admission into the School of Nursing or consent of instructor for RN-BSN student. Successful completion of NURS 360, NURS 361 for the BSN student. LEC.

NURS 466. Serum Laboratory Data: From Theory to Clinical Application. 2 Hours.
The usefulness of common serum laboratory tests in identifying potential or actual needs of individuals is the primary purpose of this course. Alterations in serum laboratory data associated with imbalances in the internal environment due to common pathological states of individuals across the life span will be discussed. The focus will be on utilizing this knowledge in the identification of nursing diagnoses and interventions. Prerequisite: Completion of two of the four Level II courses or permission of instructor. LEC.

NURS 469. Independent Study in Nursing. 0.5-5 Hours.
Intensive study in an area of interest with experiences selected according to the student's written purposes, conceptual framework, objectives and evaluation (1-5 credit hours). Appropriate prerequisite courses, as determined by the Independent Study faculty advisor, must be completed. IND.

NURS 471. Development of a Microsystem Leader. 4 Hours.
The microsystem is the structural unit responsible for delivering care to specific patient populations or the frontline places where patients, families, and care teams meet (2008 AACN Essentials, p. 38). This environment is where the nurse participates in a broad mixture of direct and indirect care patient delivery. Students will be given the opportunity to apply principles of leadership and management to recognize how changing delivery patterns, organizational, regulatory, care, and association processes impact the care provided to specific patient populations. Prerequisite: NURS 327, NURS 329, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339 or consent of instructor. Corequisite: NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor. LEC.

NURS 472. Evidence-Based Practice: Translating Research to Practice. 2 Hours.
Concepts of evidence-based practice (EBP) and healthcare research are explored. Methods to critically appraise healthcare research will be applied. Critical appraisal of evidence will be employed to inform the delivery of safe and quality nursing care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. Corequisite: NURS 471, NURS 473, NURS 474, NURS 475, or consent of instructor. LEC.

NURS 473. Professional Development III: Navigating the Profession. 2 Hours.
Contemporary issues confronting the nursing profession are discussed and methods to advocate for patients and the profession are investigated. The dynamic and ever present evolution of healthcare will be explored. Professional skills, such as job interviewing, portfolio development, and examination of advanced roles in nursing, will be emphasized. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. Corequisite: NURS 471, NURS 472, NURS 474, NURS 475, or consent of instructor. LEC.

NURS 474. Health and Illness: Nursing with Diverse Populations. 4 Hours.
Comprehensive and focused evidence-based care of patients in diverse populations with complex health conditions will be examined. The nurse’s role in assuring coordination, integration, and continuity of care is investigated. Integration of the physical, behavioral, psychological, spiritual, socioeconomic and environmental factors that influence patient centered care is explored. Collaboration with other health care team members to provide safe and quality care for diverse patients in a variety of complex settings is analyzed. Information management tools to monitor outcomes of care are evaluated. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 336, NURS 337, NURS338, NURS 339, or consent of instructor. Corequisite: NURS 471, NURS 472, NURS 473, NURS 475, or consent of instructor. LEC.
NURS 475. Health and Illness: Nursing with Diverse Populations Practicum. 3 Hours.
Coordination, integration, and continuity of care for diverse patients with multiple/complex problems will be applied in the dynamic microenvironments such as: maternity, pediatrics, mental health, and critical care. Patients/designees are engaged in active partnerships that promote health, safety, well-being, and self-care management. Synthesis of evidence and collaboration with other members of the health care team are used to plan, implement, and evaluate safe and quality care for patients. Technologies that support clinical decision-making, error prevention, and care coordination are emphasized. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. Corequisite: NURS 471, NURS 472, NURS 473, NURS 474, or consent of instructor. LEC.

NURS 476. Nursing in an Evolving Healthcare System. 4 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges presented to the nurse. The role of the nurse as provider of direct and indirect patient care is expanded to include the external influences of the health care organization, the regulatory environment, and the professional association. The development of the nurse as a member of a profession is expected. Inherent is a developing knowledge and appreciation for the diversity of opinions and organizations that exist to provide assistance in the delivery of direct patient care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 477, N URS 478, NURS 479, NURS 480, or consent of instructor. LEC.

NURS 477. Capstone. 3 Hours.
A preceptor model of learning professional nursing practice provides opportunities to synthesize and integrate previous learning experiences. Emphasis is placed on the roles of the nurse as provider of indirect and direct care; designer, manager and coordinator of care; and member of the profession. The focus is on individual transition to the professional nursing role, recognizing the organizational, social, political, economic, ethical, and legal context in which interdisciplinary health care is delivered in a selected clinical setting. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 476, NURS 477, NURS 478, NURS 479, NURS 480, or consent of instructor. LEC.

NURS 478. Integration Seminar. 1 Hour.
The seminar provides students with an opportunity to apply concepts discussed in the classroom with observations from the clinical setting to enhance knowledge of how nurses meet multiple responsibilities. Through the use of small group guided discussion, students begin building a skill set that shows knowledge of and appreciation for the roles of direct care provider, designer, manager and coordinator of care; and member of profession. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 476, NURS 477, NURS 478, NURS 479, NURS 480, or consent of instructor. LEC.

NURS 479. Population Based Healthcare. 3 Hours.
Concepts and theories related to improving health of entire populations are explored. Focus is placed on risk reduction, protective and predictive factors within the environments which influence the health of individuals, families, aggregates, and entire populations, including global communities. Considering the determinants of health, students will learn methods to facilitate collaboration to provide quality and safe health interventions for populations. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 476, NURS 477, NURS 478, NURS 480, or consent of instructor. LEC.

NURS 480. Population Based Healthcare Practicum. 2 Hours.
Concepts and theories from Population Based Healthcare are applied to the health care of multiple patients; individuals, groups, communities and populations in the community. There is a concentrated focus on health promotion and disease prevention that provides safe, effective, and efficient care. Students are provided opportunities for inter-professional collaboration in the planning of health care and promotion of quality outcomes for culturally diverse populations. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 476, NURS 478, NURS 479, or consent of instructor. LEC.

NURS 481. Honors Evidence-Based Practice: Translating Research to Practice. 2 Hours.
Concepts of evidence-based practice (EBP) and health care research are explored to inform the delivery of safe and quality nursing care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 382, or consent of instructor. Corequisite: NURS 471, NURS 473, NURS 474, NURS 475, or consent of instructor. This course is for Honors students only. LEC.

NURS 482. Honors Practicum I. 2 Hours.
Under the mentorship of an active nurse researcher the student designs and conducts a research project and participates as a member of a research project team. Students apply principles of research learned in NURS 460 to design and critique their own research project while providing feedback to peers. Through seminar activities they critically analyze the issues, rewards, and challenges of conduction research. LEC.

NURS 483. Honors Practicum II. 2 Hours.
Under the mentorship of an active nurse researcher the student designs and conducts a research project and participates as a member of a research project team. Students apply principles of research learned in NURS 460 to design and critique their own research project while providing feedback to peers. Through seminar activities they critically analyze the issues, rewards, and challenges of conduction research. LEC.

NURS 485. Populations Based Healthcare I. 1 Hour.
Concepts and theories related to improving health of entire populations are explored. Focus is placed on risk reduction, predictive and determinants within the environments which influence the health of individuals, families, aggregates, and entire populations, and the identification of core public health functions and essential of service that impacts population health. Considering the multiple determinants of health, students will learn methods to facilitate collaboration to provide quality and safe health interventions for populations. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339 LEC.

NURS 486. Populations Based Healthcare II. 2 Hours.
Building upon the concepts and theories taught in NURS 486: Population Based Healthcare I, emphasis is placed on behavioral change techniques to promote health and manage disease that influence the health of individuals, families, communities, and entire populations. Considering the multiple determinants of health, students will learn methods to facilitate
collaboration to provide quality and safe population health interventions through program planning to meet the needs of aggregate populations. Principles of disaster management and emergency preparedness will be explored at the individual, community, and population level. Prerequisite: NURS 485. LEC.

NURS 490. Professional Practicum. 2-5 Hours.
A preceptor model of learning professional nursing practice provides opportunities to synthesize and integrate previous learning experiences. Concepts of leadership and management, change, and therapeutic nursing interventions are integrated into practice. The focus is on individualized transition to the professional nursing role as an employee, recognizing the organizational, social, political, economic, ethical, and legal context in which interdisciplinary health care is delivered in a selected clinical setting. Prerequisite: NURS 420, NURS 421, NURS 430, NURS 431, NURS 455 and NURS 460. Prerequisite or Corequisite: NURS 440, NURS 450. LEC.

NURS 491. Practicum for the Professional Nurse. 1 Hour.
A preceptor model of learning professional nursing leadership and/or management provides the RN student opportunities to synthesize and integrate previous learning experiences. Concepts of leadership and management, change, and evidence-based practice are integrated into professional practice. The focus is on individualized transition to the professional nursing role as a leader, recognizing the organizational, social, political, economic, ethical, and legal context in which interdisciplinary health care is delivered in a selected clinical setting. Prerequisite: NURS 433, NURS 434, NURS 320, NURS 325, NURS 437, NURS 438, NURS 435. Prerequisite or Corequisite: NURS 436, NURS 439. LEC.

NURS 492. Senior Project. 2-3 Hours.
Synthesis of knowledge for professional practice will guide development of a project to meet an identified need in an area of interest. The student will select one of three areas (management, clinical practice, education for patients and families, staff, or agency personnel) for project implementation. Prerequisite: NURS 320, NURS 352, NURS 433, NURS 434, NURS 435, and NURS 437. Corequisite: NURS 436, NURS 439, and NURS 441. LEC.

NURS 520. Medical Spanish I. 2 Hours.
This is an entry level Medical Spanish course for students with minimal or no Spanish language education. Students completing this course will have acquired the language skills necessary to interact at a basic level in a medical context. LEC.

NURS 521. Medical Spanish II. 2 Hours.
This is an intermediate-low level Medical Spanish class. In Medical Spanish level 2 students build on what they have learned in the prerequisite level. Students expand their vocabulary skills to include medical specialties and procedures as well as their ability to describe medical conditions. LEC.

Bachelor of Science in Nursing

With a Bachelor of Science in Nursing (BSN) from the University of Kansas School of Nursing, graduates are prepared for success in any health care setting. KU graduates are ready to work in hospitals, community health agencies, industrial or long-term care facilities, as travel nurses, or flight nurses, as well as in other clinical settings.

Graduates of the KU School of Nursing baccalaureate program, begun in 1929, go on to become charge nurses and move into other leadership positions in Kansas and across the country. They are well-prepared for continuing their education through master's and doctoral programs in nursing.

School of Nursing alumni are hired by renown hospitals all over the country, including Johns Hopkins and Mayo Clinic and find excellent starting positions closer to home at The University of Kansas Hospital and Children's Mercy Hospitals and Clinics.

The School of Nursing is one of three schools at the University of Kansas Medical Center (http://www.kumc.edu) in Kansas City, Kansas. Academic programs at KU Medical Center are offered through the Schools of Health Professions, Medicine, and Nursing. The Office of the Dean of Graduate Studies at KUMC handles matters related to graduate programs in Health Professions, Medicine, and Nursing.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu), One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791. This organization is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master's, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org). The Nurse Midwifery Program is accredited by the Accreditation Division of the American College of Nurse-Midwives (http://www.midwife.org), 818 Connecticut Ave., NW, Suite 900, Washington, DC 20006, (202) 728-9860.

Undergraduate Admission to the School of Nursing

Pre-licensure BSN Program

Students enter the Pre-Licensure BSN program after taking 62 semester credit hours of prerequisite work in an accredited college or university. Admission to the school is competitive. A minimum grade-point average of 2.5 is required to apply.

Pre-nursing Advising

A pre-nursing advisor is available by appointment during the fall and spring semesters in the Undergraduate Advising Center (http://advising.ku.edu), 126 Strong Hall, on the Lawrence campus and year-round on the Kansas University Medical Center campus in Kansas City. The advisor provides students with information about the nursing profession, help with course selection in preparation for nursing application, and guidance in the admission process. For an appointment, current Lawrence campus students can call (785) 864-2834. All other students can call (913) 588-1619 for an appointment in Kansas City.

Admission Procedure

The application for the pre-licensure BSN program is available from July 1st to October 1st of the year before beginning work in the School of Nursing. Applications are available on the School of Nursing (http://www.nursing.kumc.edu) website.

Criteria for Admission

The school endeavors to meet the changing needs of society by selecting applicants who, in the judgment of the Student Admission and Progression Committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for the successful study and practice of nursing, and who will best meet the needs of the citizenry. Students are selected on the basis of college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular
activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, and genetic information in the university’s programs and activities.

Pre-licensure BSN Prerequisite Course Requirements

Within the 62 hours required for admission to the basic BSN program, the following must be included:

Humanities and Social Sciences

Courses in English composition and literature, public speech, general sociology, general psychology, theories of child or human development, global perspectives, and humanities are required. Students who complete these general education requirements through the KU College of Liberal Arts and Sciences meet these requirements by taking the following courses:

<table>

Electives can be chosen according to the student’s particular interests or needs. Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, physics, mathematics, political science, western civilization, biological sciences, economics, etc. A maximum of 8 non-liberal-arts credit hours can be accepted in the 62 credit hours required for admission. These 8 credit hours may be in physical education courses, activity courses, first-aid courses, health education courses, applied courses, and technique courses in art, music, and professional fields other than nursing.

RN to BSN Program

Students enter the RN to BSN program after taking 60 semester credit hours of prerequisite work in an accredited college or university. Admission to the school is competitive. A minimum grade-point average of 2.5 is required to apply.

Admission Procedure

The application for the RN to BSN program is open at all times, with the following deadline dates: April 1st for summer semester, July 1st for fall semester, and November 1st for spring semester.

Applications are available through the link on the School of Nursing (http://www.nursing.kumc.edu) website.

Criteria for Admission

The school endeavors to meet the changing needs of society by selecting applicants who, in the judgment of the student admission and progression committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for the successful study and practice of nursing, and who will best meet the needs of the citizenry. Students are selected on the basis of college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, and genetic information in the university’s programs and activities.

RN to BSN Prerequisite Course Requirements

Within the 60 hours required for admission to the RN to BSN program, the following must be included:
**Humanities and Social Sciences**

Courses in English composition and literature, speech or interpersonal communication, general sociology, general psychology, theories of child or human development, global perspectives, and humanities are required. Students who complete these general education requirements through the KU College of Liberal Arts and Sciences meet these requirements by taking the following courses:

**English (3)**

**Electives**

Electives can be chosen according to the student's particular interests or needs. Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, oral communication, physics, mathematics, political science, western civilization, biological sciences, economics, etc.

A maximum of eight non-liberal-arts credit hours can be accepted in the 62 credit hours required for admission. These eight credit hours may be in physical education courses, activity courses, first-aid courses, health education courses, applied courses, and technique courses in art, music, and professional fields other than nursing.

**Bachelor of Science in Nursing Degree**

The BSN degree is granted to candidates recommended by the School of Nursing as having successfully fulfilled all prescribed requirements, including the courses listed below. A total of 124 credit hours is required for the pre-licensure BSN degree, and a total of 120 credit hours is required for the RN to BSN degree, with a cumulative grade-point average of at least 2.0. Only courses in which a grade of C or higher is earned count toward graduation. The last 30 hours completed for the degree must have been taken in residence at KU. A portion of total hours applied toward graduation may be earned through credit by examination.

**Nursing Major: Pre-Licensure BSN Option**

The professional portion of the BSN program can be completed in 2 academic years of full-time study.

**Nursing Major: RN–BSN Option**

The RN to BSN program provides registered nurses a way to complete their bachelor's degrees in a flexible online format. The program can be completed in as little as one calendar year of full-time study or up to five years of part-time study. A total of 120 semester credit hours are required for the degree, comprised of 60 credit hours of liberal arts prerequisite courses and 60 credit hours of nursing courses. Nursing course content may be transferred via portfolio from the associate degree nursing program. The last 30 hours completed for the degree must be taken at KU.

**KU BSN Courses**

- **NURS 320** Pathophysiology for the Practicing Nurse 3
- **NURS 326** Pharmacology for the Practicing Nurse 3
- **NURS 352** Client Assessment for the Practicing Nurse 3
- **NURS 441** Nursing Research in an Evidence-Based Practice Setting 3
- **NURS 443** Developing the Baccalaureate Nurse Role 3
- **NURS 444** Using Technology to Enhance Client Safety 3
- **NURS 446** Population Based Health Care for the Practicing Nurse 3
- **NURS 447** Nursing Practice within the Clinical Health Care Micro System 3
- **NURS 448** Scholarly Inquiry for Quality Improvement 3
- **NURS 449** Nursing Practice within the Healthcare Organization 3
- **NURS 451** Navigating the Influences of the Health Care Macro-Environment 3
- **NURS 492** Senior Project 2-3

**Total Hours** 35-36

**Portfolio/Transfer Credits**

- Introduction to Professional Nursing 2
- Assessment/Therapeutic Interventions 3
- Foundations of Nursing 4
- Image, Roles & Ethics 3
- Nursing Across the Lifespan 6
- Nursing Diverse Populations 7
- NURS 320, NURS 326, and NURS 352 are eligible for credit by portfolio from approved associate degree programs.

**Total Hours** 25-34

**Total Hours: 62-64**

**University Honors Program**

The School of Nursing encourages all qualified on-campus BSN undergraduates to participate in the University Honors Program (http://www.honors.ku.edu).

**Departmental Honors Program**

The School of Nursing’s Departmental Honors Program offers enhanced educational opportunities for the most academically talented, promising, and motivated baccalaureate students while providing a foundation for leadership development and articulation into graduate education.

Students in the School of Nursing Honors Program develop and complete a research project under the guidance of a faculty research mentor. Students must make formal application and be admitted to the Honors Program to take honors courses. Once admitted to the program, students may use departmental honors courses to help meet the requirements of the University Honors Program.

Selection criteria for the Nursing Honors Program are as follows:

- Enrollment in the pre-licensure BSN program
- Full-time status
- Overall grade-point average of 3.25 or higher contingent on earning a nursing grade-point average of 3.5 or higher at the end of the fall semester (exceptions are considered on an individual basis)
- Completion of Nursing Honors Program application

Academic progression through the honors curriculum is evaluated on an individual basis. However, to graduate with departmental honors from the School of Nursing, the student must attain an overall grade-point average of 3.25 with a nursing grade-point average of 3.5 and satisfactory
grades in all clinical practicum courses, complete all required courses in the Nursing Honors Program, and have their oral and written reports of research findings certified.

The honors curriculum comprises the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>NURS 382</td>
<td>Honors Seminar (spring of junior year)</td>
<td>1</td>
</tr>
<tr>
<td>NURS 481</td>
<td>Honors Evidence-Based Practice: Translating Research to Practice (summer between junior and senior year)</td>
<td>2</td>
</tr>
<tr>
<td>NURS 482</td>
<td>Honors Practicum I (fall of senior year)</td>
<td>2</td>
</tr>
<tr>
<td>NURS 483</td>
<td>Honors Practicum II (spring of senior year)</td>
<td>2</td>
</tr>
</tbody>
</table>

Students who successfully complete the Nursing Honors Program are recognized in the following ways:

- The notation of Departmental Honors on the official university transcript
- An official certificate indicating graduation with BSN Honors
- Listing in the School of Nursing Recognition Ceremony program
- Formal recognition at the School of Nursing Recognition Ceremony
- Listing in the University of Kansas Commencement Program
- Formal recognition at the Cording Ceremony on the Lawrence campus for students also completing the University Honors Program

For more information, contact the School of Nursing Office of Student Affairs.

**Master of Science in Nursing**

The Master of Science degree in nursing enlarges the focus of nursing, using as its foundation the basic baccalaureate nursing program. The program’s goals are directed toward educating the nurse leader. Leadership specializations include organizational leadership, public health nursing, clinical research management, and nursing informatics.

The KU School of Nursing’s baccalaureate, master’s, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu), One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791. This organization is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master’s, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org). The Nurse Midwifery Program is accredited by the Accreditation Division of the American College of Nurse-Midwives (http://www.midwife.org), 818 Connecticut Ave., NW, Suite 900, Washington, DC 20006, (202) 728-9860.

**MS Degree Requirements**

The Master of Science degree in nursing requires completion of an approved curriculum with a grade-point average of 3.0 or above, a written thesis or project, and a comprehensive oral examination. The program’s goals are directed toward educating the nurse leader. Leadership specializations include:

- The **organizational leadership (OL) specialization** prepares nurses to assume leadership positions in hospitals and other health agencies.
- The **public health (PH) specialization** prepares nurses to develop advanced community-based interventions and determine outcomes with emphasis on health promotion and disease prevention strategies for a targeted population.
- The **clinical research management (CRM) specialization** prepares the nurse to plan and implement clinical research trials.
- The **nursing informatics (NI) specialization** prepares the nurse with skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions.

**Joint Degree**

Students may combine the Master of Science in Nursing (specialization in organizational leadership) with the Master of Health Services Administration. By combining some course work, the two degrees may be completed in fewer hours than if pursued independently.

**Program Components**

The leadership major presents a theoretical base specific to each specialization. Specialization courses are accompanied by practical experience that allows students to apply theory in a health care setting.

The MS in Nursing curriculum includes four core components: common, leadership, research and specialty. Organizational Leadership and Nursing Informatics specializations each require 37 credit hours. Public Health requires 39 credit hours. Clinical Research Management (CRM) requires 41 credit hours.

**Common Core**

Common core nursing courses provide the core knowledge and skills essential to nurses practicing in any advanced area of nursing. Courses in this area are NRSG 748, NRSG 754, and NRSG 755.

**Leadership Core**

Courses in the leadership core provide the theoretical basis for the specializations in organizational leadership, public health nursing, and nursing informatics. Courses in this category are NRSG 808, NRSG 820, NRSG 826, NRSG 880, and NRSG 885. CRM requires NRSG 820, NRSG 826, and NRSG 880 from the leadership core and NRSG 731,
Nursing Informatics: Clinical Research Management: Public Health Nursing: Organizational Leadership courses by specialty are at the graduate degree level within each of the specialty areas. The core courses by specialty are:

<table>

Thesis/Project Option

The student may choose to complete a thesis for six credit hours (NRSG 899) or to complete a project for two credit hours (NRSG 898). The project involves applying aspects of the research process to the student’s area of nursing practice. A number of options are available for the project. Both thesis and project involve completion of a formal paper. The area of study from either thesis or project comprises a part of the comprehensive oral examination, which takes place at the end of the MS program.

Flexible Scheduling

The majority of students in the MS program are part-time students and many students are employed. To accommodate student need and preference, courses are offered online. Online classes typically include both asynchronous and synchronous learning activities.

Doctor of Philosophy in Nursing

The PhD program prepares graduates to function in faculty positions in college and university settings; conduct independent research and scholarly endeavors in nursing; generate and expand the theoretical, empirical, and philosophical bases for nursing practice; provide leadership to the profession; and interpret nursing to society. Students have opportunities to expand their theoretical knowledge and research skills in a minor area; develop expertise in nursing theory development; expand research skills; and gain a historical and philosophical perspective that broadens their professional orientation and provides a basis for understanding changing social expectations, cultural perspectives, and economic and political trends.

Nurses engaged in doctoral study are adult learners with unique perspectives gained from personal, professional, and educational experiences. These individuals tend to be self-directed, goal-oriented, highly motivated and capable of abstract, original thinking. Individual interests are explored through study in a related discipline, i.e., minor area of study. Learning is achieved through independent study and research, as well as instructed courses.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu), One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791. This organization is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master’s, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org). The Nurse Midwifery Program is accredited by the Accreditation Division of the American College of Nurse-Midwives (http://www.midwife.org), 818 Connecticut Ave., NW, Suite 900, Washington, DC 20006, (202) 728-9860.

PhD Admission

Admission Criteria

New students are accepted to the PhD degree program once a year, for instruction that begins in June during the summer semester. The application deadline is December 1st for the following summer. Prospective students can apply using the KU Medical Center online application at https://www.applyweb.com/apply/kumc/
1. Completion of a Bachelor of Science in Nursing (BSN) or Master of Science (MS) in nursing degree from a nationally accredited program is required. Prerequisite preparation must include the following courses:
   - Basic Graduate Statistics - 3 credit hours
   - Analysis of Variance - 3 credit hours
2. Preference is given to students with a Master’s Degree GPA of 3.25 for the master’s degree in nursing.
3. Expected Graduate Record Examination (GRE) scores are 1,000 on the verbal and quantitative sections and at least five on the analytical writing section (or a score of 1,500 on the three-part GRE taken before October 2002).
4. Potential for leadership and scholarship in nursing should be demonstrated.
5. A background check (http://www.kumc.edu/student-services/vice-chancellor-of-student-services/criminal-background-checks-for-students.html) is required during the admission process; it may affect the student’s eligibility to enter the program.
6. For international applicants, a satisfactory score on the Test of English as a Foreign Language or the International English Language Testing System taken within the last two years is required. See KUMC Graduate Studies (p. 2310) for information.

Applicants who do not meet the admission criteria for regular admission status may be considered on an individual basis for provisional admission status as either degree-seeking or nondegree-seeking students.

See also Admission in the Graduate Studies (p. 2310) section of the online catalog.

PhD Requirements

Program Options

Students may apply to the doctoral program after completing the master’s degree in nursing or the baccalaureate degree with a major in nursing. The post-baccalaureate entry option is for exceptionally well-qualified BSN graduates whose career goals are research-oriented and who wish to progress as rapidly as possible toward the research doctorate in nursing.

Course Requirements

The PhD program is offered in a combination of ways, including: three on-campus, one-week summer intensives, online coursework throughout the year, and e-mentoring by faculty for research and career advisement.

The nursing portion of the doctoral program has 3 major components:

- Theory
- Empirics
- Leadership

A total of 50 coursework credit hours and 15 dissertation credit hours are required, for a total of 65 credit hours.

<table>
<thead>

Dissertation

Each PhD student must complete a study that shows the planning, conduct, and results of original research. See Doctoral Degree Requirements, Dissertation, in the Graduate Studies (p. 2313) section of the online catalog. The minimum number of post-comprehensive dissertation credit hours is 15.

The program also requires satisfactory completion of the university’s research skills and responsible scholarship requirement (p. 2313), and two qualifying examinations: comprehensive oral (dissertation proposal defense) and final oral (dissertation defense).

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) degree prepares graduates for nursing practice at the highest level. The DNP offers sophisticated, cutting-edge experiences that help nurses actively engage in a complex, dynamic and demanding health care field. Skills in collaboration, innovation, and evaluation — complemented by advanced nursing practice skills — prepare nurses to shape the future of health care. Graduates of the DNP program provide patient-centered care that is evidence-based, contribute to the development of evidence-based practice, and pursue leadership roles in a variety of health care and educational settings. All DNP graduates must have completed at least 1,000 hours of supervised, post-baccalaureate, practice experiences.
The School of Nursing is one of 3 schools at the University of Kansas Medical Center (http://www.kumc.edu) in Kansas City, Kansas. Academic programs at KU Medical Center are offered through the Schools of Health Professions, Medicine, and Nursing. The Office of Graduate Studies at KUMC (http://www.kumc.edu/academic-affairs/graduate-studies.html) handles matters related to graduate programs in Health Professions, Medicine, and Nursing.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu), One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791. This organization is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master's, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.bsbn.org). The Nurse Midwifery Program is accredited by the Accreditation Division of the American College of Nurse-Midwives (http://www.midwife.org), 818 Connecticut Ave., NW, Suite 900, Washington, DC 20006, (202) 728-9860.

**DNP Admission**

New students are accepted to the DNP degree program once a year, for study that begins during the summer semester. The application deadline is December 1st for the following summer (June). Prospective students can apply using the KU Medical Center online application at https://www.applyweb.com/apply/kumc/

**DNP Program Admission Criteria**

1. Completion of a bachelor of science in nursing (BSN) degree (for BSN to DNP), or completion of a master's degree in nursing (for post-master's DNP) from a nationally accredited program.

2. Minimum cumulative undergraduate GPA of 3.0 for BSN-DNP application; for post-MS DNP, preference is given to applicants with a 3.25 graduate GPA in the master’s program.

3. Potential for leadership and application of scholarship in nursing.

4. Potential to provide expert advanced clinical care or expert service in functional area.

5. Current registered nurse licensure in at least one state in the United States is preferred; upon admission, advanced practice students are required to be licensed in both Kansas and Missouri prior to first fall semester enrollment. New BSN graduates must obtain RN licensure prior to the first fall semester enrollment.

6. Minimum of one year of clinical work experience as a registered nurse is recommended.

8. A graduate-level statistics course.

9. A background check (http://www.kumc.edu/student-services/vice-chancellor-of-student-services/criminal-background-checks-for-students.html) and drug screen are required during the admission process and may affect the student's eligibility to enter the program.

10. For international applicants, a satisfactory score on the Test of English as a Foreign Language or the International English Language Testing System taken within the last 2 years is required. Visit KUMC Graduate Studies (p. 2310) for information.

**Admission Process**

Application deadlines are:

- Post-master's entry: **December 1st** for summer semester
- Post-baccalaureate entry: **December 1st** for summer semester

All applicants must submit the following:

- Completed application for graduate study;
- Official transcripts of all academic work toward the bachelor's and master’s degrees in nursing (KUMC provides the University of Kansas record);
- 3 references from advanced-practice nurses, nurse leaders, nursing faculty, or physicians who are able to attest to the applicant's potential ability to practice at the highest level of advanced nursing practice and to engage in scholarly activity and leadership roles;
- A statement of career goals and practice interests;
- A résumé;
- Evidence of current licensure as a professional nurse in 1 state;
- Nonrefundable application fee. See the School of Nursing website (http://nursing.kumc.edu) for the fee.

The admissions committee of the School of Nursing reviews application materials. Specialty area faculty may request an interview with a student.

See also Admission in the Graduate Studies (p. 2310) section of the online catalog.

**BSN-DNP**

The post-baccalaureate DNP curriculum is designed for registered nurses with a BSN degree. DNP graduates will have knowledge, skills and expertise to become clinical scholars and transformational leaders. The BSN to DNP program offers nurses a variety of specializations in two majors: Advanced Practice and Leadership.

### Advanced-Practice Major

The advanced-practice nursing major prepares nurses for clinical nurse specialist, nurse practitioner, or nurse-midwife role specializations.

- The **clinical nurse specialist specialization** includes adult/gerontological nursing. It prepares nurses to perform in the expanded role of caring for a particular kind of patient/client or to function in a particular kind of setting. (75 credit hours)
- The **nurse practitioner specialization** prepares nurses to provide primary health care to clients and families across the life span. Family nurse practitioner, adult/gerontological nurse practitioner, and psychiatric/mental health nurse practitioner options are available. The nurse practitioner is prepared to provide primary health care in a variety of settings. (75 - 79 credit hours)
- The **nurse-midwife specialization** focuses on the support and management of well-women's primary and reproductive health care needs throughout the life span. (76 credit hours)

### Leadership Major

- Clinical Research Management (74 total credit hours)
- Nursing Informatics (71 total credit hours)
- Organizational Leadership (74 total credit hours)
- Public Health Nursing (74 total credit hours)
Curriculum

The post-baccalaureate DNP program requires the following:

- 22-24 credit hours of post-baccalaureate common core courses
- A minimum of 6 credit hours of doctoral capstone project
- 12-23 credit hours of Advanced-Practice or Leadership core
- 12-23 credit hours of specialization courses
- 11 credit hours of specialty area support courses and practicum courses
- Satisfactory completion of the university’s research skills and responsible scholarship requirement (p. 2313)

Total required DNP program credit hours vary from 71 to 81, depending on the specialization. Although curricular changes may occur, some examples of core courses include:

- Common Core (NRSG 748, 754, 755)
- Advanced Practice Core (NRSG 731, 801, 806, 809, 812, 813)
- Leadership Core (NRSG 808, 820, 826, 880, 885)
- DNP Core (PRVM 800, NRSG 804, 911, 941)
- DNP Specialty Area (NRSG 857, 919, 920)
- Adult/Genrontological Nurse Practitioner Specialty Core (NRSG 862, 864, 865, 867, 869)
- Adult/Genrontological Clinical Nurse Specialist Specialty Core (NRSG 862, 863, 865, 866, 868)
- Family Nurse Practitioner Specialty Core (NRSG 814, 815, 816, 817, 818)
- Nurse Midwifery Specialty Core (NRSG 830, 831, 832, 833, 835, 836, 837, 838, 840, 841)
- Psychiatric Mental Health Nurse Practitioner Specialty Core (NRSG 842, 844, 845, 846, 847, 848, 849, 850, 851)
- Organizational Leadership Specialty Core (HP&M 822, NRSG 881, 882 or 883, 886, 891)
- Public Health Nursing Specialty Core (NRSG 809, 827, 828, 829, PRVM 830)
- Nursing Informatics Specialty Core (NRSG 853, 854, 856, 857, 858)
- Clinical Research Management Specialty Core (NRSG 823, 824, 825, 833)

The post-master’s DNP program requires the following:

- 15 credit hours of post-master’s common core courses
- A minimum of 6 credit hours of doctoral capstone project
- 11 credit hours of specialty courses
- Satisfactory completion of the university’s Research Skills and Responsible Scholarship requirement

The post-master’s DNP curriculum is designed for nurses who have already earned a Master of Science in Nursing degree. The DNP degree allows nurses to serve at a higher level as an advanced practice nurse or leader in their specialty. Two majors are offered in the post-master’s DNP program: 1) Advanced Practice and 2) Leadership. A total of 32 credit hours is required for the post-master’s DNP.

For further information, visit the Doctor of Nursing Practice (http://nursing.kumc.edu/academics/doctor-of-nursing-practice.html) section of the school’s website (http://nursing.kumc.edu).

Post-Master's Certificate Programs in Nursing

Graduate Certificate Programs in Nursing

The School of Nursing offers Post-Master’s Certificate programs in three areas: Health Professions Educator, Leadership, and Advanced Practice. In the Leadership and Advanced Practice categories, some prerequisite courses and other requirements are required beyond simply holding the MS degree in nursing.

Health Professions Educator

This interdisciplinary certificate (12 credit hours) affords graduate-prepared nurses and other health professionals broader opportunities and the necessary skill to find positions in education at the various levels and become leaders in their field. Paired with faculty mentors throughout the program, students complete applied teaching projects in each educator course, including a final student teaching capstone. Students may complete the health professions educator certificate within their master’s program or as post-master’s study. All courses are online.

- NRSG 870  Designing a Student Learning Environment  3
- NRSG 871  Curriculum/Program Planning and Evaluation  3
- NRSG 873  Teaching with Technologies  3
- NRSG 874  Nurse Educator Preceptorship  3

Leadership

Students choose one course from the Leadership core, as part of their course requirements for each program.

Prerequisite Leadership Core (11)

Select one of the following:

- NRSG 808  The Social Context for Health Care Policy  2
- NRSG 820  Program, Project, and Communication Planning  2
- NRSG 826  Global Perspective and Diversity in Healthcare  2
- NRSG 880  Organizational Foundations for Leading Change  3
- NRSG 885  Evaluation and Analysis for Healthcare Effectiveness  2

Healthcare Informatics

This certificate (17 to 18 credit hours) prepares clinicians and health care managers with skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. The graduate is prepared for entry- and mid-level positions in IT departments, advanced clinical departments, and as consultants and/or staff in organizations that specialize in computer operations and knowledge management. All NRSG courses are online.

Prerequisite: Leadership Core elective course (2 or 3 credit hours)  2-3

- NRSG 853  Abstraction and Modeling of Healthcare Information  3
Clinical Research Management

No Leadership Core prerequisite is required.

The Post-Master's Certificate (12 credit hours) in Clinical Research Management prepares graduates for entry- to mid-level clinical management positions, working as research leaders with potential for promotion to executive-level positions in a variety of research settings. This program is suited for novice or advanced beginner managers and advanced practice clinicians who have potential for clinical research leadership at the advanced level.

The University of Kansas School of Nursing's Clinical Research Management specialty within the Master of Science in nursing program is a certificate program that prepares clinical research professionals with competencies and skills related to Good Clinical Practice (GCP) standards and research related to conducting clinical trials, institutional review boards and regulations, and ethical issues. The Clinical Research Management Certificate program is available to post-master's students.

Advanced Practice

The Psychiatric/Mental Health Nurse Practitioner, Nurse Midwife, Family Nurse Practitioner, Adult/Gerontological Nurse Practitioner, and Adult/Gerontological Clinical Nurse Specialist certificate programs require that students have earned a master's degree in nursing from a nationally accredited school of nursing. More specifically, the AP certificates require that students have completed an advanced practice registered nurse (APRN) educational program from a nationally accredited school of nursing. Applicants must also have completed the following AP prerequisite courses, either as part of their previous graduate degree or as post-graduate study through an accredited university: advanced health assessment, advanced pathophysiology, advanced pharmacology, and health promotion. Additional eligibility requirements may include licensure as an advanced practice registered nurse.

Prerequisites include the following courses or their equivalents from another institution:

<table>

Psychiatric/Mental Health Nurse Practitioner

This certificate (24 credit hours) program prepares advanced practice nurses to diagnose and treat common mental health conditions in general medical settings and to deliver more effective psychiatric care in mental health settings. Students are prepared to apply knowledge and skills in interpersonal, psychotherapeutic, and psychopharmacologic interventions for individuals, groups, and families with psychiatric disorders. All courses are online and offered in sequence every other year. Spring 2016 begins the next available course sequence.

Nurse Midwifery

This certificate (19 credit hours) prepares advanced practice nurses to focus on the care and management of well women's primary and reproductive health care needs throughout the life span. The program content is family-centered, respectful of individual and cultural variations, and promotes health through individual choice and participation. Courses are offered online and on the KU Medical Center campus.

Adult/Gerontological Nurse Practitioner

This certificate program (15 credit hours) prepares advanced practice nurses to transition to the role of adult/gerontological nurse practitioner in collaboration with other professionals to coordinate and improve health care. Students acquire knowledge, skills, and competencies to manage primary health care needs of adult clients. The courses include adult/gerontological theory courses, practice-focused clinical courses, and an intensive preceptorship experience. Courses are offered online and on the KU Medical Center campus.

Admission Criteria

The Advanced Practice Clinical Certificate Programs require that students have completed an advanced practice registered nurse (APRN) educational program from a nationally accredited school of nursing. Applicants must also have completed the following advanced practice prerequisite courses, either as part of their previous graduate degree or as post-graduate study through an accredited university: advanced health assessment, advanced pathophysiology, advanced pharmacology, and health promotion.

- Adult/Gerontological Clinical Nurse Specialist Certificate
- Adult/Gerontological Nurse Practitioner Certificate
- Nurse-Midwifery Certificate
- Psychiatric/Mental Health Nurse Practitioner Certificate

The Leadership Certificate Programs require applicants to have earned a master’s in nursing or DNP degree, or a graduate degree in a health-related discipline.

- Clinical Research Management
- Healthcare Informatics Certificate

The Health Professions Educator Certificate can be completed as additional hours within a student’s graduate program or as post-master’s study.

All post-MS certificate programs require a minimum 3.0 grade-point average in both undergraduate and graduate programs.

For KU programs to maintain accreditation status, all persons, employees, volunteers and students involved in patient care activities must have background checks. This status is very important to healthcare organizations to demonstrate to patients and professionals that they meet the highest of standards for patient care. The background check will be done at the applicant's expense after provisional acceptance has been granted. The information from this report is held in confidence by the school.

Contact the School of Nursing at soninfo@kumc.edu for additional application information.

Master of Science in Health Informatics

Professionals in health informatics have skills in analysis, design, implementation and evaluation of information systems that support a full range of clinical and patient care functions. Working as a translation specialist, the graduate will be prepared for entry and mid-level positions with informatics departments, medical practice departments, nursing departments, public health organizations, and as consultants and/or staff in organizations that specialize in computer operations and knowledge management. Graduates also have the skills to enter the growing field of health information exchange, which includes regional health information organizations and the emerging personal health records. In addition to a foundation in information technology, special skills will be acquired in organizational change, project management and impact evaluation.

This is an interprofessional degree offered through the Office of Graduate Studies (http://www.kumc.edu/academic-affairs/graduate-studies.html), with oversight by the University of Kansas Center for Health Informatics (http://www.kumc.edu/health-informatics.html) through its advisory council. The program is designed for health professionals or information technology specialists who want a specialty focus in health informatics. The advisory council of this program reflects this commitment to interprofessional collaboration. Faculty with foundations in nursing, health policy and management, and public health partner to create this master's degree in health informatics.

The M.S. in Health Informatics program endeavors to fulfill its responsibilities to the changing needs of society by selecting applicants who, in the judgment of the admissions committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for successful advancement. In addition, the committee looks for applicants who will contribute academic, nonacademic, and socioeconomic diversity to the class. The committee is interested in evidence of capacity for mature and independent scholarship.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Master of Science in Health Informatics (http://www.kumc.edu/health-informatics/master-in-health-informatics/prospective-students.html) website.

Admission requirements:

- A bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2310).
• A background check (p. 2310) is required during the admission process; it may affect the student's eligibility to enter the program.
• An official copy of the Graduate Record Examination (GRE) score. Scores are sent directly from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895.
• Three letters of recommendation preferably from employers, instructors, or other persons who can assess the applicant's academic and professional potential. Letters are submitted per instructions provided for the online application process.
• A graduate level statistics course (may be completed prior to admission or during the first semester of enrollment.)
• A current resume or curriculum vitae.
• A personal written statement that describes the applicant's career goals and motivation for seeking post-graduate training in health informatics.
• An informational telephone interview with a Center for Health Informatics representative.

Applicants not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs are archived. The M.S. in Health Informatics curriculum is divided into three cores: informatics, leadership, and discipline focus (matching that of the faculty partners) along with a research component. A strength of the program is the close relationship between the students and their faculty advisers. Advisors are assigned based on the career goals of the student. The student and advisor will develop a plan of study that meets the career goals of the student.

Degree requirements:

• Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 5 years of admission to the program.
• Completion of a minimum of 40 credit hours.
• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
• Successful completion of a general examination (p. 2313) the semester the student will graduate.
• Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
• Successful completion of the Health Informatics Core (minimum 17 credit hours.) These courses provide the core knowledge and skills essential to the practice of health informatics.
  
  IPHI 850 Introduction to Health Informatics 2-3
  IPHI 851 Transforming Health Care through Use of Information Systems and Technology 3
  IPHI 852 Health Data: Theory and Practice 3-4
  IPHI 853 Abstraction and Modeling of Healthcare Information 3
  IPHI 854 Knowledge Management in Healthcare 3
  IPHI 856 Health Informatics Practicum 1-3

• Successful completion of the Leadership Core (minimum 9 credit hours.) This includes a minimum of one health policy (HP&M) course. Choose from:
  
  NRSG 808 The Social Context for Health Care Policy 2
  NRSG 820 Program, Project, and Communication Planning 2
  NRSG 880 Organizational Foundations for Leading Change 3
  NRSG 882 Introduction to Operations 3
  NRSG 885 Evaluation to Operations 3
  HP&M 832 Governance and Health Law 2
  HP&M 833 Ethics 2
  HP&M 837 Health Policy 3
  HP&M 840 Organizational Foundations for Leading Change 3
  HP&M 850 Introduction to Operations 3

• Successful completion of the Research Component (minimum 5 credit hours.) This component includes a research project that involves applying aspects of the research process to the student's area of health informatics practice.
  
  NRSG 754 Health Care Research 3
  or HP&M 819 Research for Health Care Leaders
  IPHI 860 Research Project 2

• Successful completion of the Discipline-Specific Core (minimum 9 credit hours.) The Discipline-Specific Core (Clinical, Health Policy or Preventive Medicine) and the courses within the core are selected in consultation with the student's advisor based on the student's background and career goals.

  • Clinical Core (minimum 9 credit hours.) Choose from:
    
    NRSG 748 Theories for Practice and Research 3
    NRSG 755 Professionalism in Advanced Nursing Practice 3
    NRSG 826 Global Perspective and Diversity in Healthcare 2
    NRSG 883 Complexity Science Approaches to Improve Organizational Effectiveness 3
    NRSG 891 Human Resources and Workforce Development 3

  • Health Policy and Management Core (minimum 9 credit hours). Choose from:
    
    HP&M 810 The Health Care System 3
    HP&M 822 Health Care Economics 3
    HP&M 825 Financial Concepts in Healthcare Management 3
    HP&M 846 Health Information Technology Management 3
    HP&M 850 Introduction to Operations 3
    HP&M 854 Human Resources and Workforce Development 3

  • Preventive Medicine Core (minimum 9 credit hours). Choose from:
    
    PRVM 800 Principles of Epidemiology 3
    PRVM 809 Introduction to Public Health 3
    PRVM 815 Infectious Disease Epidemiology 3
    PRVM 875 Management of Public Health Data 3
Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

**Total Hours: 40**
Pharmacy

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor for details). Other years’ catalogs (http://www.ku.edu/academics/catalogs)»

Doctor of Pharmacy (p. 2224) Doctor of Pharmacy (p. 2238)
Medicinal Chemistry (p. 2241) Master of Science in Medicinal Chemistry (p. 2242) Doctor of Philosophy in Medicinal Chemistry (p. 2243)
Neurosciences (p. 2244) Master of Science in Neurosciences (p. 2244) Doctor of Philosophy in Neurosciences (p. 2245)
Pharmaceutical Chemistry (p. 2246) Master of Science in Pharmaceutical Chemistry (p. 2250) Doctor of Philosophy in Pharmaceutical Chemistry (p. 2251)
Pharmacology and Toxicology (p. 2252) Master of Science in Pharmacology and Toxicology (p. 2255) Doctor of Philosophy in Pharmacology and Toxicology (p. 2256)
Pharmacy Practice (p. 2257) Master of Science in Pharmacy Practice (p. 2261)

The School of Pharmacy

Since its founding in 1885, the University of Kansas School of Pharmacy (http://pharmacy.ku.edu) has been a leader in pharmacy education. Since 1996, the school has only offered the Doctor of Pharmacy degree as the entry-level practice degree. The curriculum gives the student the knowledge, skills, and ability required of the pharmacy practitioner; it is comprehensive and produces a highly competent general practitioner.

Approximately 60 full-time faculty members teach in the undergraduate professional Doctor of Pharmacy and graduate programs. Three departments (Pharmacology and Toxicology, Medicinal Chemistry, and Pharmaceutical Chemistry) offer Master of Science and Doctor of Philosophy degrees. The Department of Pharmacy Practice offers the master’s degree.

Both the undergraduate and graduate divisions have outstanding national and international reputations based on the excellence and productivity of the faculty. KU is consistently ranked in the top 5 among colleges/schools of pharmacy that receive National Institutes of Health research funding. KU’s School of Pharmacy was awarded more than $22 million in research grants and contracts from the NIH in fiscal year 2011.

The School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (https://www.acpe-accredit.org), 135 S. LaSalle St, Suite 4100, Chicago, IL 60603-4810, (312) 664-3575, info@acpe-accredit.org, the official accrediting body for American schools of pharmacy.

Professional Program

The School of Pharmacy offers a 6-year Doctor of Pharmacy (p. 2238) program. The 2-year pre-pharmacy portion of the program may be taken at any accredited 2- or 4-year college.

After acceptance into the School of Pharmacy students completing the first 2 years of the Doctor of Pharmacy professional degree program (3rd and 4th year of college) are awarded a Bachelor of Science in Pharmaceutical Studies. Students completing the remaining 5th and 6th professional years are awarded the Doctor of Pharmacy (Pharm.D.) degree. These degree programs are available to students on both the Lawrence and Wichita campuses.

University Honors Program

The school encourages qualified students entering KU as freshman to participate in the University Honors Program (http://www.honors.ku.edu).

Graduate Programs

The School of Pharmacy offers graduate programs through the departments of

• Medicinal Chemistry (p. 2241),
• Pharmaceutical Chemistry (p. 2246),
• Pharmacology and Toxicology (p. 2252), and
• Pharmacy Practice (p. 2257).

The Department of Pharmacy Practice offers the Master of Science degree. The other 3 departments offer both the M.S. and the Ph.D. with majors in their respective disciplines. Programs in Neurosciences (p. 2244) are offered in cooperation with KU Medical Center.

Requirements for admission and baccalaureate preparation vary with each department and are discussed separately. Address inquiries and correspondence about graduate studies to the program or department of interest.

Undergraduate Scholarships and Financial Aid

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml), located at the KU Visitor Center at 1502 Iowa St, Lawrence, KS 66045-7518, 785-864-4700, financialaid@ku.edu, administers grants, loans, and other need-based financial aid. In recent years, about $29 million has been processed annually through the office, including about $2 million annually in short-term loans. Prospective students should contact Financial Aid and Scholarships. Some financial aid programs have application deadlines as early as January 15. The earlier an application is received and the student’s file is completed, the better the chance of obtaining financial aid.

For information about scholarships from KU and various outside agencies based on academic merit, diversity, major, and residence, visit Scholarship Information for KU Students (http://affordability.ku.edu/cs/index.shtml).

School of Pharmacy Financial Aid

The School of Pharmacy, in cooperation with Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml), offers financial assistance to pharmacy students. Applications are received in the dean’s office according to an announced schedule each year. Awards are
Based on merit and need. Assistance is available for both entering and continuing students.

**Graduate Fellowships and Assistantships**

For information about graduate assistantships, contact the School of Pharmacy (http://pharmacy.ku.edu). Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding) for graduate students at KU. Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml) administers grants, loans, and need-based financial aid.

**Undergraduate University Regulations**

For information about university regulations, see Regulations (p. 13) or visit the University of Kansas Policy Library (http://www.policy.ku.edu).

**Academic Misconduct**

Instructors detecting academic misconduct must act in accordance with the School of Pharmacy (http://policy.ku.edu/pharmacy/academic-professional-scholarly-conduct) and Faculty Senate Rules and Regulations (http://policy.ku.edu/governance/USRR).

Students experiencing difficulties or problems with a particular course or having complaints or grievances about a particular instructor are urged to discuss the problem in a timely fashion with the instructor. If the student feels awkward or uncomfortable doing this, he or she should see the chair of the instructor's department, or if necessary, an associate dean. The chair or dean brings the matter to the instructor's attention, preserving the student's anonymity, if so requested.

**Credit/No Credit**

A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (https://documents.ku.edu/policies/governance/USRR.htm#art2sect2).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

**Exemptions and Petitions**

A student may gain an exemption from introductory pre-pharmacy courses by successfully completing the Advanced Placement or College Level Examination Program examinations or by other recognized means. Only the exemption is allowed. A total of 208 credit hours of college-level course work is still required for the PharmD degree. Students who have completed high school physics with a grade of B or higher need not take college-level physics. In meritorious cases, the department offering a specific course may waive course prerequisites. Students whose educational goals would be better served by courses other than those prescribed in the normal curriculum may petition the academic standing committee for permission to make appropriate course substitutions.

**Graduation with Distinction and Highest Distinction**

Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. Grade-point averages are determined on the basis of credit hours taken while enrolled in the School of Pharmacy. The list is compiled each spring and includes July, December, and May graduates.

**Health Insurance and Immunizations**

The School of Pharmacy requires students to provide proof of health insurance and professional insurance coverage and immunizations for MMR, hepatitis B, varicella, and tetanus, and a current TB skin test.

**Honor Roll**

Students with grade-point averages of 3.5 who have completed at least 12 professional hours are recognized on the honor roll or dean's list in fall and spring. An Honor Roll notation appears on the transcript.

**Maximum Community College Credit Allowed**

The School of Pharmacy allows a maximum of 68 credit hours from any accredited college or university toward completion of the PharmD degree.

**Prerequisites and Corequisites**

In meritorious cases, course prerequisites may be waived by the department offering the course. Waiver is not granted if the prerequisite course was taken and failed.

**Probation**

**Probation**

A student will be placed on academic probation if they:

1. fail to attain a 2.5 grade point average of professional coursework in any semester, or whose overall professional course grade-point average falls below 2.5.
   a. A student falling below the minimum grade point average of 2.5 will be required to develop and submit an individualized remediation plan to their Academic Faculty Advisor and the Chair of the Academic Standings committee.
2. fail an introductory or advanced pharmacy practice experience.
   a. A student failing either an IPPE or APPE will be required to develop an individualized remediation plan with the Assistant Dean for Experiential Education and the Associate Deans for Administration and Academic Affairs.
3. fails to comply with programmatic requirements in a timely manner (see the pharmacy student handbook (http://policy.ku.edu/pharmacy/student-handbook)).

**Suspension**

A student who fails or does not make timely progress in a course or courses while a student in the School of Pharmacy may be placed on suspension. Additionally, a student who fails to comply with the School conduct policy, or academic and/or programmatic requirements may be placed on suspension.

**Dismissal**

Students will be dismissed from school if they:

1. fail to attain a 2.5 grade-point-average in all courses or in professional courses for any semester while on probation.
2. receive a grade of “F” in 40 percent or more of the credit hours taken during any semester (including semesters in which they are enrolled in only one course).
3. fail an individual course twice.
4. fail two advanced pharmacy practice experiences (APPEs).
5. are placed on probation or suspended for a second academic semester for failure to comply with programmatic requirements.

Petitions
Students dismissed for poor scholarship may file a written petition with the academic standing committee for reinstatement. The committee’s decision is final. The committee normally takes one of the following actions:

1. The student is allowed to enroll, often with specific recommendations regarding strategies for restoring good academic standing.
2. The committee may deny the petition.

Courses Taken Outside the School
Students on probation or in nondegree-student status may take courses outside the School of Pharmacy, or at other institutions, to improve the grade-point average. Prior approval is required, and in general, only courses that count toward graduation are honored.

Return to Good Standing
Students are returned to good standing when the overall pharmacy grade-point average reaches 2.5.

Required Work in Residence
Of the last 30 hours preceding graduation, 24 hours must be in residence at the KU School of Pharmacy.

Terminal-Year Courses
A student cannot enroll in the principal terminal-year pharmacy practice experiential rotations unless he or she has a grade-point average in professional courses of at least 2.5 and has completed all didactic course work required for the degree.

Graduate University Regulations
For information about university regulations, see Regulations (p. 13) or visit the University of Kansas Policy Library (http://www.policy.ku.edu).

Academic Forgiveness
The school does not participate in academic forgiveness.

Academic Misconduct
Students experiencing difficulties or problems with a particular course or having complaints or grievances about a particular instructor are urged to discuss the problem in a timely fashion with the instructor. If the student feels awkward or uncomfortable doing this, he or she should see the chair of the instructor’s department, or if necessary, the dean. The chair or dean brings the matter to the instructor’s attention, preserving the student’s anonymity, if so requested.

Instructors detecting academic misconduct must act in accordance with the School of Pharmacy (http://policy.ku.edu/pharmacy/academic-professional-scholarly-conduct) and Faculty Senate Rules and Regulations (http://www.policy.ku.edu).

Credit/No Credit
The Credit/No Credit option is not authorized for graduate students’ enrollments, including, but not limited to, courses taken to fulfill the research skills requirements, undergraduate deficiencies, etc.

Graduation with Distinction and Highest Distinction
Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. Grade-point averages are determined on the basis of credit hours taken while enrolled in the School of Pharmacy. The list is compiled each spring and includes July, December, and May graduates.

Health Insurance and Immunizations
The School of Pharmacy requires students to provide proof of health insurance and professional insurance coverage and immunizations for MMR, hepatitis B, varicella, and tetanus, and a current TB skin test.

Requirements to Practice Pharmacy in Kansas
A license is required to practice pharmacy. State boards of pharmacy grant licenses to students who successfully pass board examinations. In all states, eligibility to take board examinations requires graduation from an accredited school of pharmacy and completion of required experiential training. The Kansas State Board of Pharmacy (http://www.kansas.gov/pharmacy) requires graduates of schools of pharmacy to indicate any current, pending, or previous convictions, fines, violations, or disciplinary action that may affect their eligibility to take the licensing examination. Pharmacists generally may transfer their licenses from a state in which they completed the entire examination to another state, provided the 2 states had similar practical experience requirements at the time the pharmacist was licensed by examination. Most pharmacists find it useful to maintain a license in the state where they were licensed by examination. By doing so, they can preserve their eligibility to transfer to another state.

Pharmacists in Kansas must renew their licenses biennially by paying the required fee and providing proof that they have completed the required 30 clock hours of continuing education.

The Kansas Board of Pharmacy requires completion of an appropriate degree from an accredited school of pharmacy plus 1,500 hours of practical experience in pharmacy. At the conclusion of the program, students are certified to the Kansas State Board of Pharmacy as having completed the entire externship requirement (1,500 hours) and are therefore eligible to take the Kansas licensure examination. Students must register as interns with the board at matriculation in the School of Pharmacy. Students desiring to compile an official record of pharmacy experience obtained on their own initiative may do so by submitting this information to the Kansas State Board of Pharmacy. Practical experience above and beyond the 1,500 required hours may be gained by working as a licensed pharmacy student intern in Kansas, then transferring the hours to another state.

Medicinal Chemistry Courses
MDCM 601. Medicinal Biochemistry I. 3 Hours.
A study of the biochemical principles of macromolecular structure and function, molecular communication, and the metabolism of nutrients and
xenobiotics as applied to problems of medicinal and pharmacological significance. Prerequisite: Concurrent enrollment in MDCM 602 Lab. LEC.

MDCM 603. Medicinal Biochemistry II. 3 Hours.
A study of the biochemical principles of macromolecular structure and function, biosynthesis, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. Prerequisite: MDCM 601. LEC.

MDCM 606. Phytomedicinal Agents. 1 Hour.
This course will acquaint the pharmacy students with the current status of botanical use in the United States. A basic foundation will be provided so that the pharmacist can properly assess the appropriateness and usefulness of various phytochemicals and combinations in managing certain ailments with regard to efficacy, safety, potential toxicity, and potential herb-drug interactions. Prerequisite: MDCM 626 or instructor permission. LEC.

MDCM 607. Clinical Pharmacognosy. 1 Hour.
The course will provide a technical background for understanding the scientific basis underlying the use of herbal medicines. This will be followed by practical information about the pharmacological and chemical properties as well as clinical uses of herbal medicines. Active student participation in discussing the properties of these non-prescription medicinals is expected. Prerequisite: MDCM 601. LEC.

MDCM 625. Medicinal Chemistry I: Neuroeffector Agents. 4 Hours.
A study, from the molecular viewpoint, of the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action; this course emphasizes drugs affecting the central nervous system. Prerequisite: CHEM 626 and MDCM 601. LEC.

MDCM 626. Medicinal Chemistry II: Homeostatic Agents. 4 Hours.
A continuation of MDCM 625 with emphasis on autonomic and cardiovascular agents and peripherally-acting hormones. Prerequisite: MDCM 625. LEC.

MDCM 627. Medicinal Chemistry III: Chemotherapeutic Agents. 3 Hours.
A continuation of MDCM 625 and MDCM 626 with special emphasis on anticancer, antiviral, antibacterial, antifungal and non-steroidal anti-inflammatory drugs. Prerequisite: MDCM 625. LEC.

MDCM 690. Undergraduate Research. 1-5 Hours.
Research in medicinal chemistry. Students will be assigned to a laboratory research problem. Prerequisite: Consent of instructor. IND.

MDCM 692. Problems in Medicinal Chemistry. 1-5 Hours.
This course encompasses original work on a laboratory problem of limited scope, honors reading assignments from medicinal chemistry literature, or in-depth discussions of assigned topics. Prerequisite: Consent of instructor. IND.

MDCM 701. Biomedical Chemistry. 3 Hours.
A study of the principles of macromolecular structure and function, biosignaling, bioenergetics and metabolism, with an emphasis on the relationship between biochemistry and medicine. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 703. Advanced Biomedical Chemistry. 3 Hours.
A study of the principles of basic enzymology, including chemical reactions, biosynthesis, and metabolism. In addition, the course will cover lipids, hormones, vitamins, and minerals. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 710. Chemistry of Drug Action I. 5 Hours.
This course provides an overview of physiological mechanisms and disease processes as well as the basic principles of contemporary drug design. Modulation of drug absorption, distribution, metabolism and excretion; drug-like properties; conformational constraint; structure-based drug design; library generation; HTS hit optimization, prodrugs; bioisosteres; Kcat inhibitors; active site directed reversible and irreversible inhibitors; quantitative SAR; molecular dissection; rigid analogs; pharmacophores; etc., will be treated. Prerequisite: One college-level course in biology. LEC.

MDCM 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: Consent of instructor. LEC.

MDCM 785. Natural Products of Medicinal Significance. 2 Hours.
A discussion of bioassay-directed screening, the isolation, structure determination, biosynthesis, partial synthesis and total chemical synthesis of organic natural products of medicinal significance. Examples of the classes of compounds to be considered include steroid hormones, cardiac glycosides, alkaloids, antibiotics, terpenes, and the like. Prerequisite: Graduate standing or consent of instructor. LEC.

MDCM 790. Chemistry of Drug Action II. 2 Hours.
A discussion of the principles of contemporary drug design with specific examples chosen from the original literature. This course covers the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action. Prerequisite: Graduate standing or completion of MDCM 624 and MDCM 627. LEC.

MDCM 799. Research Seminar in Medicinal Chemistry. 1 Hour.
Reports by research students and discussions of developments in the field not covered in formal courses. LEC.

MDCM 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientists in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801, PHCH 801 and PHCH 802.) LEC.

MDCM 816. Careers in Chemical Biology. 1 Hour.
Advanced course examining current research topics in chemical biology. An emphasis will be placed on career options open to PhD scientists in Chemical Biology, and preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816, and MDCM 816.) Prerequisite: Permission of instructor. SEM.

MDCM 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.
MDCM 895. Research in Medicinal Chemistry. 1-12 Hours.
Hours and credit to be arranged. RSH.
MDCM 899. Master's Thesis. 1-12 Hours.
Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Consent of instructor. THE.
MDCM 950. Advanced Topics: ____. 1-3 Hours.
An in-depth discussion of topics of current interest to medicinal chemists. Prerequisite: Consent of instructor. LEC.
MDCM 980. Proposal Preparation and Seminar. 3 Hours.
Presentation of a seminar and writing an original NIH-style research proposal concerning contemporary problems in medicinal chemistry. Prerequisite: Consent of instructor. LEC.
MDCM 999. Doctoral Dissertation. 1-12 Hours.
Hours and credit to be arranged. Original chemical research in the synthesis and development of medicinal agents, elucidation of the chemical mechanisms of drug action, drug metabolism, and drug toxicities. THE.

Neuroscience Courses
NURO 710. Advanced Neurobiology. 3 Hours.
The course will build an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics will include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor. LEC.
NURO 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, MDCM 775, PTX 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent. LEC.
NURO 799. Neuroscience Seminar Series. 2 Hours.
Presentations of research papers by faculty, post-doctoral research associates, and graduate students. All graduate students in the Neuroscience program participate in this seminar series throughout their period of training. Each student has to present a seminar once every semester. Presentations by students are evaluated by other graduate students and faculty at the end of each seminar. (Same as NEUS 799.) Prerequisite: Graduate standing in the Neuroscience program. LEC.
NURO 800. Neuroscience Teaching Principles. 2 Hours.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in Neuroscience. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with faculty whom he or she is assisting in preparation of presentation materials and tests. Each student will be evaluated by the faculty mentor and by the students in the class taught. Prerequisite: Graduate standing in Neuroscience. LEC.
NURO 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, PTX 801, PHCH 801 and PHCH 802.) Prerequisite: Graduate standing in the Neuroscience program. LEC.
NURO 825. Research in Neuroscience. 1-10 Hours.
Original investigations at an advanced level in the areas of neuroscience. The research by each student will be performed in the laboratory of one of the faculty mentors of the graduate program in Neuroscience. Prerequisite: Graduate standing in the Neuroscience program. LEC.
NURO 844. Neurophysiology. 3 Hours.
Somatosensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as PHSL 844 and NEUS 844.) Prerequisite: PHSL 846 or equivalent and consent of instructor. LEC.
NURO 846. Advanced Neuroscience. 5 Hours.
Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHCL 846, PHSL 846 and NEUS 846.) Prerequisite: Permission of the course instructor. LEC.
NURO 847. Developmental Neurobiology. 2 Hours.
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847, PHSL 847, and NEUS 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor. LEC.
NURO 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer’s, Parkinson’s, Huntington’s, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down’s syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, PHCL 848, PHSL 848, and NEUS 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor. LEC.
Hours and credit for this course to be arranged with the mentor. Independent investigation of a research problem in neuroscience, but of limited scope. Prerequisite: Graduate standing in the Neuroscience program and consent of mentor/instructor. THE.
Hours and credit for this course to be arranged with the mentor. Conduct of original investigation in neurosciences. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor. THE.

Pharmacology and Toxicology Courses
P&TX 630. Pharmacology I. 4 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to
modifying the pathophysiology of specific disease states. Topics in PTX 630 include, general principles of cell biology, molecular biology, pharmacogenomics, immunology and principles of drug metabolism and disposition. Prerequisite: BIOL 646 or equivalent. LEC.

P&TX 631. Pharmacology II. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: PTX 630 and BIOL 400 or equivalent. LEC.

P&TX 632. Pharmacology III. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: PTX 630 and PTX 631. LEC.

P&TX 633. Pharmacology IV. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in PTX 633 include endocrine disorders, diabetes and obesity, and gastrointestinal pharmacology. Prerequisite: PTX 630, PTX 631 and PTX 632. LEC.

P&TX 640. Toxicology. 2 Hours.
General principles of toxicology, treatment, and management of accidental poisoning, and current topics of interest. Prerequisite: PTX 630, PTX 631, and PTX 632. LEC.

P&TX 642. Obesity, Diabetes, and Metabolic Syndrome: Current Concepts. 1 Hour.
The objective of this course is to provide students with an opportunity to read, examine, and report on a broad array of topics relevant to diabetes and obesity. Students will be given broad latitude to propose topics of interest to them within the area of diabetes and obesity. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them in the field of diabetes and obesity, prepare a 30 min presentation and deliver it to the class for discussion. Prerequisite: PTX 630. LEC.

P&TX 643. Current Concepts of Neurodegenerative Disease. 1 Hour.
Neurodegenerative diseases, such as Alzheimer’s and Parkinson’s diseases, are associated with older age and/or enhanced oxidative stress. The possible causes for the development and progression of these diseases with relation to current research in the field will be discussed. Additionally, a summary of available and suggested future treatments will be given. Prerequisite: PTX 630. LEC.

P&TX 644. Adverse Drug Events. 1 Hour.
The objective of this course is to alerts students to common and preventable adverse drug events. This course will provide students with an opportunity to read, examine, and report on a broad array of topics relevant to adverse drug events. Students will be given broad latitude to propose topics of interest to them within the area of adverse drug events. In addition students can report on common and preventable food-drug, herb-drug, and disease-drug interactions. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them among a list of provided topics, prepare a 30 minute presentation and deliver it to the class for discussion. Prerequisite: 3rd, 4th, or 5th professional year standing in the School of Pharmacy. LEC.

P&TX 645. Neurobiological Basis of Addiction: Physiological, Biochemical, Pharmacological & Treatment Concepts. 1 Hour.
Several addictions will be discussed including addictions to alcohol, cocaine, methamphetamine, gambling, and others as time permits. The physiology, biochemistry, pharmacology and available treatments for these addictions will be reviewed. The role of pharmacotherapies will be discussed, particularly as they relate to the molecular basis of addiction. Behavioral and psychological approaches also will be examined. Prerequisite: Completion of PTX 632 or special permission from faculty. LEC.

P&TX 694. Undergraduate Laboratory: Research in Pharmacology and Toxicology. 1-5 Hours.
Original research on a laboratory problem of limited scope. This course cannot count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: Consent of instructor. IND.

P&TX 698. Library Problems in Pharmacology and Toxicology. 1-5 Hours.
Original library review of a limited special topic in pharmacology and toxicology. The student will write a review in his or her report. This course may count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: PTX 635 and consent of instructor. IND.

P&TX 700. Professional Issues in the Biomedical Sciences. 2 Hours.
A course designed to assist doctoral students in the biomedical sciences in their professional development by providing presentations, discussions, and practical experiences related to career planning. Topics include diverse career opportunities and expectations of each, preparation of vitae/resumes and other elements of a successful job search, writing scientific papers and dealing with editors, developing programmatic research programs, balancing professional obligations, advancing through promotions, and related topics. Prerequisite: Graduate standing in pharmacology and toxicology. LEC.

P&TX 730. Advanced Pharmacology I - CNS and ANS. 2 Hours.
A detailed study of the fundamentals of autonomic nervous system, central nervous system, and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 731. Advanced Pharmacology II - Cardiovascular and Renal System. 2 Hours.
A detailed study of the fundamentals of cardiovascular system, renal system and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 732. Advanced Pharmacology III - Immunology and Inflammatory Diseases. 2 Hours.
A detailed study of the fundamentals of immunology and inflammation and their pharmacology. The student will attend PTX 631 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 733. Advanced Pharmacology IV - Endocrinology. 2 Hours.
A detailed study of the fundamentals of endocrinology and associated pharmacology. The student will attend PTX 633 lectures and meet separately with the faculty for additional discussions of advanced material
on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 740. Advanced Biotechnology. 3 Hours.
An examination of basic principles of molecular biology, immunology, and protein chemistry as they apply to the identification, production, stability, delivery, and monitoring of new therapeutic agents provided by the expanding biotechnology industry. Students will attend lectures in PTX 633 and meet separately with faculty for additional discussions of more advanced material on these topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LAB.

P&TX 741. Biomedical Statistics. 3 Hours.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: PTX graduate student status in good academic standing. LEC.

P&TX 742. Experimental Pharmacology. 4 Hours.
Experimental approaches to understanding mechanism of drug action. Use of drugs as tools to understand functioning of biological systems will also be stressed. Historically important experiments will be discussed along with experiments which are currently used to define drug mechanisms. Topics will include: dose-response, drug receptors, drug metabolism, chemotherapy as well as autonomic CNS, cardiovascular and renal pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 747. Molecular Toxicology. 4 Hours.
A detailed study of the fundamentals of the experimental methods used in a modern toxicology laboratory. The student will attend PTX 640 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 750. Pharmacology I- Introduction to Pharmacology and Biotechnology. 3 Hours.
An introduction to the field of Pharmacology, with an initial focus on the pharmacokinetics and pharmacodynamics of drug action in the body. The second section covers protein-based therapeutics, and biotechnology including an examination of basic principles of molecular biology, immunology, and protein chemistry as they apply to the identification, production, stability, delivery, and monitoring of new therapeutic agents provided by the expanding biotechnology industry. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 751. Molecular Toxicology. 3 Hours.
A detailed study of the fundamentals of the experimental methods used in a modern toxicology laboratory. The course will also cover the mode of toxicity of a number of classes of drugs and the therapeutic approach to patient treatment. The student is also required to create their own 50 minute didactic lecture on a chosen topic within the field of toxicology in consultation with the course director. The student will then deliver the lecture to the course advisor in a digital format. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. LEC.

An overview of animal care and use, this course is designed for graduate students currently engaged in animal based research or that anticipate work with live animals. Topics covered include regulatory framework for animal research; animal facility operations; biology, husbandry, and care of common laboratory animal species; and experimental manipulation of laboratory animals. Emphasis is placed on practical experience with live animals. LEC.

P&TX 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, MDCM 775, NURO 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent. LEC.

P&TX 799. Pharmacology and Toxicology Seminar. 1-2 Hours.
A review of current literature and research in pharmacology and toxicology. Required of all graduate students in the department every fall and spring semester. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PTX. LEC.

P&TX 800. Pharmacology and Toxicology Teaching Principles. 2 Hours.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in pharmacology and toxicology. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with the faculty whom he or she is assisting. Prerequisite: Graduate standing in pharmacology and toxicology program. RSH.

P&TX 801. Issues in Scientific Integrity. 1-3 Hours.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PHCH 801 and PHCH 802.) LEC.

P&TX 803. Pharmacology Literature Review I. 1 Hour.
This course is designed for graduate students and will fulfill the first written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a six page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 805. Pharmacology Literature Review II. 1 Hour.
This course is designed for graduate students and will fulfill the second written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a twelve page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 825. Research in Pharmacology and Toxicology. 1-10 Hours.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration with a faculty member. Prerequisite: Graduate standing and consent of instructor. RSH.
Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Graduate standing in PTX and consent of instructor. THE.

P&TX 990. Postdoctoral Research. 1-11 Hours.
Advanced level research in collaboration with a faculty member in the department. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Doctoral degree or equivalent in an appropriate related area, and consent of instructor. RSH.

P&TX 999. Doctoral Dissertation. 1-11 Hours.
Hours and credit to be arranged. Original investigation in pharmacology and toxicology. Prerequisite: Consent of instructor. THE.

Pharmacy Courses
PHAR 500. Introduction to Pharmacy. 1 Hour.
This course is designed to introduce pharmacy students to the profession of pharmacy, potential career pathways, and available academic and post-doctoral educational opportunities. Additionally, topics such as professionalism, leadership, professional advocacy, empathy, cultural competency, self-directed learning, interprofessional education, and professional communication will be discussed. Students will receive instruction and fulfill the prerequisites for their Introductory Pharmacy Practice Experiences (IPPE) occurring in the summer semesters of the PharmD program. LEC.

PHAR 502. Translational Science Lab. 1 Hour.
Laboratory exercises designed to familiarize students with techniques in biomedical and clinical science and their application to problems of medicinal and pharmacological significance. LAB.

PHAR 509. History of Pharmacy Elective. 1 Hour.
This course is comprised of a survey of historical highlights of the development of Pharmacy as a discipline. The course will cover early antecedents of pharmacy, development of the discipline in Europe and the United States, the development of professional organizations, standards, education, and literature, economic development, and the pharmacists' contributions to community service, science, and the industry. There will be a mix of some lectures, discussion, assigned readings, and short papers. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHAR 510. Pharmacy Skills Laboratory I. 1 Hour.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing and patient counseling. LAB.

PHAR 515. Pharmacy Skills Laboratory II. 1 Hour.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. LAB.

PHAR 520. Pharmacy Skills Laboratory III. 1 Hour.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. LAB.

PHAR 525. Pharmacy Skills Laboratory IV. 1 Hour AE61.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. LAB.

PHAR 530. Pharmacy Skills Laboratory V. 1 Hour.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. LAB.

PHAR 550. Introductory Pharmacy Practice Experience - Community. 4 Hours AE52.
A required four credit hour experiential course involving 160 hours of on-site experiential education. The course is designed to provide the student pharmacist with exposure to the practice of pharmacy in either an independent community or chain pharmacy in either a rural or urban setting within the state of Kansas. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Completion of PHAR 500 or instructor consent. FLD.

PHAR 560. Introductory Pharmacy Practice Experience - Institutional. 4 Hours.
A required four credit hour experiential course years involving 160 hours of on-site experiential education. The course is designed to provide the student pharmacist with exposure to the practice of pharmacy in an institutional health-system (hospital) environment in either a rural or urban setting within the state of Kansas. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Completion of PHAR 502 or instructor consent. FLD.

PHAR 599. New Drug Review: The Nexus of Basic Science and Clinical Practice. 1 Hour.
This course is an interdepartmental elective focused on integrating pharmaceutical sciences (broadly defined) with the practice of clinical pharmacy, while also improving technical communication skills. Students will write an abbreviated new drug review on a therapeutic candidate in phase 2 or phase 3 trials. The review will describe relevant (a) scientific preclinical development, (b) preclinical translational studies, (c) clinical data, and (d) the drug's potential to impact clinical practice guidelines. Additionally, students will provide an oral presentation of their therapeutic candidate to the class. At the completion of the course, students will have developed the skills needed to deliver this common presentation required on APPE rotations. The final draft of the review will be assessed by faculty and may subsequently be published online. The above work will require students to read, evaluate, and summarize both primary scientific literature and clinical data of a pre-approved drug, and will encourage integration of scientific knowledge with the clinical practice of pharmacy. Participating faculty will use a series of videos, lectures, in-class discussions, and active learning workshops to further develop students' understanding of their topic areas. Students will enhance technical writing, presenting, interpersonal communication and other "soft" skills. Prerequisite: Must be accepted to the Pharmacy program. LEC.

PHAR 600. Institutional Pharmacy. 1 Hour.
Introduction to pharmacy services within health-system pharmacies with an emphasis on medication distribution systems, parenteral and sterile products, clinical pharmacy practice and other services. Prerequisite: Must be accepted to the Pharmacy program. LEC.

Pharmaceutical Chemistry Courses
This elective class will explore emerging areas of research currently impacting the pharmaceutical industry. Potential topics include; biologicals as therapeutics, drug targeting, prodrugs, nanotechnology, biological barriers, gene therapy, transporters, vaccines, intracellular drug trafficking, controlled release drug delivery, cancer therapy, analytical biotechnology and many others. The class will be team taught by PHCH faculty and guest speakers. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be accepted to the Pharmacy Program. LEC.
PHCH 512. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is a two-hour class that meets 8 times during the semester. Prerequisite: 1st, 2nd or 3rd professional year standing in the School of Pharmacy. LEC.

PHCH 514. Scientific Writing for the Health Professional. 1 Hour.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and successful communication depends on clarity of thought and careful use of language. This course is intended for 5th professional (P3) year students who are seeking residency and will need to write research proposals and abstracts, as well as prepare effective posters and presentations. It is an intensive course with multiple writing assignments. Students are expected to participate fully, and individual feedback and guidance on writing will be provided by the instructor. Graded on a satisfactory/fail. Prerequisite: 5th professional (P3) year students who plan to complete post-doctoral residency training. LEC.

PHCH 517. Pharmacy Calculations. 2 Hours.
An introduction to the mathematics involved in filling prescriptions and in manufacturing pharmaceuticals. Includes an introduction to standard prescription notation and familiarization with pharmaceutical weights and measures. LEC.

PHCH 518. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: PHCH 517. LEC.

PHCH 605. Vaccines. 1 Hour.
Vaccines are currently the most powerful therapeutic approach available for infectious disease and promise to become of increasing importance for a wide variety of other pathologies including cancer. This course discusses the immunological basis of vaccinology, types of vaccines currently available and in development and the process by which vaccines are made from the basic research stage through their pharmaceutical development and marketing. Ethical aspects of vaccine use will also be considered. LEC.

PHCH 625. Pharmacokinetics. 3 Hours.
A discussion of the basic concepts, and some clinical applications, of pharmacokinetics, clearance concepts, extravascular dosing, and the use of pharmacokinetic principles in dosage regimen design and adjustment. Prerequisite: PHCH 517 and PHCH 518. LEC.

PHCH 626. Biopharmaceutics and Drug Delivery. 3 Hours.
A study of biological barriers to drug delivery, conventional dosage forms, and new and future drug delivery strategies. Prerequisite: PHCH 517, PHCH 518, and PHCH 625. LEC.

PHCH 667. Introduction to Clinical Chemistry. 2 Hours.
A lecture-discussion course concerned with identification of the contents of physiological fluids, changes in physiological fluid content induced by disease and drugs, and therapeutic drug monitoring: case studies are presented. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHCH 690. Undergraduate Research in Pharmaceutical Chemistry. 1-5 Hours.
Student will be assigned a suitable research project in the area of pharmaceutical analysis or pharmaceutics. Prerequisite: Consent of instructor. IND.

PHCH 693. Clinical Pharmacokinetics. 2 Hours.
This course presents discussions on physiological and disease state variables in pharmacokinetics for selected drugs and drug classes, and instructs students in the use of physiological and disease state pharmacokinetic information to develop individualized therapeutic regimens. Prerequisite: PHCH 625 and PHCH 626. LEC.

PHCH 694. Problems in Pharmaceutical Chemistry. 1-5 Hours.
A student will be assigned a suitable research project in an area of pharmaceutical analysis or pharmaceutics. This course is offered regularly by the Department of Pharmaceutical Chemistry to meet the special needs of selected students, usually for one of the following two situations: (1) This course may be taken when a student has a special interest in a problem or area of limited scope and desires to pursue that study in depth under supervision of a member of the faculty. (2) This course is sometimes used as a remedial class to provide a mechanism of intensive review and study in an area of weakness. Prerequisite: Consent of instructor. IND.

PHCH 700. Experimental Methods in Pharmaceutical Chemistry. 1-5 Hours.
Discussions, lectures, and laboratory work designed to acquaint and provide hands on experiences to advanced undergraduate and graduate students with experimental design, methods, and approaches relevant to modern research in pharmaceutical chemistry. Prerequisite: Consent of instructor. LEC.

PHCH 705. Writing and Communicating Science for Graduate Students. 3 Hours.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 712. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is a two-hour class that meets 8 times during the semester. Prerequisite: Graduate standing in Pharmaceutical Chemistry or a trainee of the NIH Biotech Training Grant. LEC.
PHCH 715. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: Master's or PhD candidate in Engineering, Chemistry, Medicinal Chemistry, or Pharmaceutical Chemistry (by appointment for seniors or graduate students in departments not listed). LEC.

PHCH 716. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: This course is only open to distance education students. LEC.

PHCH 718. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: Graduate standing. LEC.

PHCH 719. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to distance education students. Prerequisite: Graduate standing. LEC.

PHCH 725. Molecular Cell Biology. 3 Hours.
Fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell function, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. (Same as CPE 725) LEC.

PHCH 726. Molecular Cell Biology. 3 Hours.
Fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell function, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. This course is only open to distance education students. LEC.

PHCH 730. Biopharmaceutics & Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. LEC.

PHCH 731. Biopharmaceutics and Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course open only to distance education students. LEC.

PHCH 744. Organic Chemistry for Pharmaceutical Scientists. 3 Hours.
A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include functional group chemistry: electronic structure, acid/base properties: molecular structure and properties (dipole, strain, and steric effects, inductive and resonance effects); dynamics of reactions (the major organic reaction mechanism, kinetics, energy profiles, isotope effects, linear free energy relationships), solvent effects, stereochemistry and conformation, an introduction to orbital symmetry control; basic thermodynamic and kinetic concepts; and an overview of important classes of mechanisms. This course is only open to distance education students. Prerequisite: CHEM 624 and CHEM 626. LEC.

PHCH 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as PTX 775, BIOL 775, CHEM 775, MDCM 775 and NURO 775.) Prerequisite: BIOL 600 or equivalent. LEC.

PHCH 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientists in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801 and PHCH 802.) LEC.

PHCH 802. Issues of Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. This course is open only to distance education students. (Same as PHCH 801, MDCM 801, NURO 801, and PTX 801.) LEC.

PHCH 816. Careers in Chemical Biology. 1 Hour.
Advanced course examining current research topics in chemical biology. An emphasis will be placed on career options open to PhD scientists in Chemical Biology, and preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816 and MDCM 816.) Prerequisite: Permission of instructor. SEM.

PHCH 851. Solid State Stability and Formulation. 3 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 860. Solid State Stability and Formulation. 3 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. This course is open only to distance education students. Prerequisite: Graduate standing in Pharmaceutical Chemistry or consent of the instructor. LEC.
PHCH 860. Principles and Practices of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and MDCM 860.) Prerequisite: Permission of instructor. LEC.

PHCH 862. Pharmaceutical Equilibrium. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. LEC.

PHCH 863. Pharmaceutical Equilibria. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. This course is open only to distance education students. LEC.

PHCH 864. Pharmaceutical Analysis. 4 Hours.
This course is intended to be a comprehensive treatment of contemporary techniques used for analytical methods for the determination of drugs in the bulk form, pharmaceutical formulations, biological samples and other relevant media. The emphasis will be on chromatographic techniques reflecting the preeminent position that those techniques occupy in the field of pharmaceutical and biomedical analysis. Prerequisite: Previous or concurrent enrollment in PHCH 684. LEC.

PHCH 865. Pharmaceutical Analysis. 4 Hours.
Advanced course on pharmaceutical analysis. This course is only open to distance education students. LEC.

PHCH 870. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 871. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. This course is only open to distance education students. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 895. Research in Pharmaceutical Chemistry. 1-11 Hours.
Advanced level research in collaboration with a faculty member in pharmaceutical chemistry or related areas. This course is limited to students who are doing research, but not necessarily working toward either a master's or a doctoral degree. RSH.

PHCH 898. Master's Thesis. 1-10 Hours.
Master's Thesis. This course is open only to distance education students. THE.

PHCH 899. Master's Thesis. 1-11 Hours.
Graded on a Satisfactory/Fail basis. THE.

PHCH 920. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. LEC.

PHCH 921. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. This course is only open to distance education students. LEC.

PHCH 972. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. LEC.

PHCH 973. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. This course is only open to distance education students. LEC.

PHCH 974. Advanced Special Topics in Pharmaceutical Chemistry. 1-3 Hours.
Various topics pertinent to the area of pharmaceutical chemistry will be explored. Graded on a satisfactory/unsatisfactory basis. LEC.

PHCH 978. Pharmaceutical Chemistry Seminar. 1 Hour.
A seminar on the chemistry of pharmaceutical systems. LEC.

This course is open only to distance education students. THE.

THE.

Pharmacy Practice Courses

PHPR 502. Pharmacy Practice II Pharmaceutical Care Fundamentals. 4 Hours.
Drug interactions will be presented with an emphasis on evaluating the risk of the interaction in a particular patient. Patient counseling and communication techniques will be covered. Approximately half the class time will be spent covering non-prescription drugs and herbas. Prerequisite: PHAR 500. LEC.

PHPR 507. Advanced Community Practice. 1 Hour.
The objective of this course is to prepare pharmacy students to practice as advanced pharmacists in a community setting. The course will cover patient care as well as the business and insurance aspects surrounding community pharmacy practice. We will cover a variety of topics including reimbursement, legal issues, Medication Therapy Management (MTM), communication, ethics, and the future of Community Pharmacy practice. Prerequisite: 3rd professional year standing in the School of Pharmacy. LEC.
PHPR 508. Oncology Elective. 1 Hour.
This course is designed to extend the students' understanding of Oncology diseases and treatments beyond what is covered in the Pharmacotherapy series in the School of Pharmacy. Prerequisite: PHPR 646. LEC.

PHPR 509. Medicare Part D. 1 Hour.
This elective course will focus on the understanding and active enrollment of patients into Medicare prescription drug benefit (Part D). Students will mainly focus on the understanding of Medicare eligibility, benefits, formulary requirements, and the administration of benefits. Students will also participate in community outreach which may focus on underserved patients. Prerequisite: 2nd or 3rd professional year standing in the School of Pharmacy. LEC.

PHPR 510. Medical Terminology Elective. 1 Hour.
This course provides the fundamentals for developing a medical vocabulary. The student will develop the ability to understand, define and utilize medical terminology and abbreviations used in patient care. LEC.

PHPR 511. Service-Learning Elective. 1 Hour.
Students will work at a health-related community center and participate in structured learning exercises. The objectives are to: 1) enable students to learn appropriate strategies to communicate and provide services to people with varying languages, cultures, social, and economic backgrounds, disabilities, illnesses, or impairments, 2) increase social interaction and citizenship, 3) heighten social awareness and understanding of ethical issues, and 4) acknowledge social responsibility and realize personal values. FLD.

PHPR 512. Nuclear Pharmacy. 1 Hour.
This course is designed for students interested in learning about nuclear pharmacy practice as a specialty practice in pharmacy. Students will learn about the application of radiopharmaceuticals used in the diagnosis of various diseases or identifying patient therapeutic issues. The course will cover principles of radiation, radiation safety, preparation of and handling of radiopharmaceuticals, their appropriate use, and the training requirements for a nuclear pharmacist. At the conclusion of the course the student will have an insight into this specialty practice in nuclear pharmacy as a potential career. Prerequisite: Students must be admitted to the School of Pharmacy. LEC.

PHPR 513. Chemical Dependency Elective. 1 Hour.
This elective course will enhance the pharmacy student's knowledge and understanding of the current theories behind the addiction process, frequently abused drugs and/or chemicals and the treatment and recovery process. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHPR 514. Communication and Counseling. 1 Hour.
An elective course designed to help students improve professional communication skills. Prerequisite: PHAR 500. LEC.

PHPR 515. The Aging Patient. 1 Hour.
This elective course is designed for the learner to explore many of the clinical considerations employed when caring for the aging patient within our health care system. The course will be devoted to exploring generational perceptions, learning how the aging process can impact patient care, and identifying the role of the pharmacist in enhancing this care. Prerequisite: 4th or 5th professional year (P2 or P3) standing in the School of Pharmacy. LEC.

PHPR 516. Pharmacy in Public Health. 1 Hour.
Public health is more than providing treatment for an illness; it is a concern for the health of an entire population. The ideal is to ensure the health of all. This course will focus on providing students with a solid foundational understanding of what public health is and how pharmacists play a role as a public health provider. The course will cover the concepts and tools used in public health including issues such as: determining health, cultural competence, health promotion, disease prevention, epidemiology and disease, describing populations and community health. Lastly, the course will provide students with specific pharmacist models of public health. Successful models include tobacco cessation programs, community vaccination programs, obesity prevention, tuberculosis monitoring, emergency preparedness and domestic violence. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHPR 517. Medication Safety and Error Prevention. 1 Hour.
This course introduces the student to medication safety and the technology as well as the tools used in error prevention. The student will also learn about adverse drug events including both medication errors and adverse drug reactions in hospital and retail pharmacy settings. Prerequisite: 4th or 5th professional year (P2 or P3) standing in the School of Pharmacy. LEC.

PHPR 518. Cultural Competency in Pharmacy Practice. 1 Hour.
The United States becomes more culturally diverse every year. This course is designed to help student pharmacists excel in today's multicultural environment by improving their cultural competency skills. Students will explore their own culture and those belonging to other diverse cultures. Students are expected to learn of the beliefs, needs and tendencies of those with cultures much different than themselves. Prerequisite: Must be admitted to the School of Pharmacy. LEC.

PHPR 519. Business Planning for Pharmacy. 1 Hour.
This course is designed for students interested in developing a business plan. Most pharmacists will have an opportunity to develop a new service, product line or even start a new business venture in their careers. Students need to know how to create a formal business plan and how to present the plan to decision makers. The course will cover the basic components and rationale of creating a formal a business plan. When finished students will be expected to have created a written business plan and will present their creation to the class. In this manner, students will gain experience in developing an idea into a plan. Prerequisite: Students must be admitted to the school of Pharmacy. LEC.

PHPR 599. Clinical Application of Basic Science. 1 Hour.
This course is an inter-departmental, team-based, technology-centric elective course. Concomitantly, instructors from the basic and clinical science departments within the school of pharmacy will promote deeper student understanding of the path a drug takes from discovery, development and ultimately clinical use. Instructors will collaborate in course content development to integrate basic and clinical science concepts. The course will utilize a blended learning method, incorporating out of class podcasts, online group collaborative projects, and readiness quizzes and exams. Prerequisite: 4th or 5th professional year standing (P2/P3) in the school of pharmacy and concomitant enrollment in either PTX 599, MDCM 599, or PHCH 599 is required. LEC.

PHPR 601. Advanced Pharmacy Practice Experience 1. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.
PHPR 602. Advanced Pharmacy Practice Experience 2. 4 Hours.  
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

PHPR 603. Advanced Pharmacy Practice Experience 3. 4 Hours.  
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

PHPR 604. Advanced Pharmacy Practice Experience 4. 4 Hours.  
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

PHPR 605. Advanced Pharmacy Practice Experience 5. 4 Hours.  
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

PHPR 606. Advanced Pharmacy Practice Experience 6. 4 Hours.  
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

PHPR 607. Advanced Pharmacy Practice Experience 7. 4 Hours.  
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

PHPR 608. Advanced Pharmacy Practice Experience 8. 4 Hours.  
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

PHPR 609. Advanced Pharmacy Practice Experience 9. 4 Hours.  
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

PHPR 610. Advanced Pharmacry Practice Experience 10. 4 Hours.  
The final year of the Doctor of Pharmacy program is spent participating in nine pharmacy practice experience rotations (PHPR 601-609). PHPR 610 is reserved for students requiring a remedial experiential rotation. FLD.

PHPR 613. Pharmacoconomics and Health Outcomes. 2 Hours.  
A course to foster an understanding of economic, financial and outcome principles that drive the demand and supply of medical care in the US. Economic logic behind decisions made by patients, physicians, hospitals,
managed care organizations, and governments will be covered. Students completing this course should be able to identify the drivers of the health economy, identify different types of pharmacoeconomic evaluations, critically analyze pharmacoeconomic and outcome literature, and apply economic principles to pharmaceutical care. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this class. LEC.

**PHPR 614. Pharmacy Management. 3 Hours.**
A course designed to provide knowledge and skills to effect efficient and effective pharmacy management. This will include foundations in financial management, inventory control, purchasing, cost-effective drug utilization, quality management, pharmacoeconomics, and human resource management. LEC.

**PHPR 615. Nuclear Pharmacy Practice. 2 Hours.**
This introductory course in nuclear pharmacy practice provides a basic understanding of radiation, radiation dosimetry, radiopharmaceuticals, and clinical application of radiopharmaceuticals in diagnosis and treatment. The course includes both didactic material as well as laboratory experience, LEC.

**PHPR 619. Health Care Systems. 3 Hours.**
This course is an introduction to the organization, financing, and delivery of health care services with a focus on the U.S. health care system. Course content addresses the following questions: how do we evaluate the health care sector, where is health care provided, how is health care financed, what are the characteristics of health care providers (individuals and institutions), what influences the performance of the health care sector, and what lies in the future for health care delivery. The purpose of the course is to prepare pharmacy students for non-clinical aspects of their practice sites. Enrolment limited to pharmacy majors. LEC.

**PHPR 620. Ethical, Legal, and Cultural Issues in Patient Care. 2 Hours.**
This course provides an introduction to the fundamentals of law and ethics as they apply to the practice of pharmacy. Course sessions will focus on ethical expectations of the profession, principles and issues in medical and pharmacy ethics, and laws that govern medication dispensing. LEC.

**PHPR 621. Pharmacy Law. 2 Hours.**
A course developed to increase students’ knowledge and understanding of laws that regulate the pharmacy profession. Prerequisite: Fifth year standing (P3 student). LEC.

**PHPR 630. Drug Information/Biostatistics and Med Lit Evaluation. 3 Hours.**
An introduction to the principles of drug information analysis, storage, and retrieval as well as biostatistics as applied to understanding and interpreting biomedical literature. Advantages and disadvantages of several commercial and manual drug information systems will be considered. The course includes practical experiences in drug information services. The biostatistical emphasis of the course will be on the application of statistical tests commonly used and the interpretation of their results. Prerequisite: Fifth year standing (P3 student). LEC.

**PHPR 635. Problems in Pharmacy Practice. 1-5 Hours.**
A course designed for the study of special topics in pharmacy practice. A research paper will be required. Prerequisite: Consent of instructor. IND.

**PHPR 646. Pharmacotherapy I. 4 Hours.**
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Incorporates three credit hours of lecture and one credit hour of case studies and off-campus professional experience. Prerequisite: Successful completion of Pharmacy Practice II (PHAR 502). LEC.

**PHPR 647. Pharmacotherapy II. 4 Hours.**
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Incorporates three credit hours of lecture and one credit hour of case studies and off-campus professional experience. This course is graded A,B,C,F. Prerequisite: Fifth year standing and successful completion of Pharmacotherapy I, PHPR 646. LEC.

**PHPR 648. Pharmacotherapy III. 4 Hours.**
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Incorporates three credit hours of lecture and one credit hour of case studies and off-campus professional experience. This course is graded A,B,C,F. Prerequisite: Fifth year standing and successful completion of Pharmacotherapy II, PHPR 647 with a C or above. LEC.

**PHPR 661. Pharmacotherapy I. 4 Hours.**
A course dealing with the clinical applications of drug knowledge to patient care. Drug interactions and patient counseling techniques will be covered. Over-the-counter medications and herbas will also be a significant portion of the course. Prerequisite: First year professional standing in the School of Pharmacy. LEC.

**PHPR 662. Pharmacotherapy II. 4 Hours.**
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Second year professional standing in the School of Pharmacy and successful completion of Pharmacotherapy I, PHPR 661. LEC.

**PHPR 670. Clinical Assessment. 2 Hours.**
This laboratory course will allow students to develop clinical assessment skills necessary in the provision of pharmaceutical care to patients with a variety of disease states. Students will combine physical assessment and clinical application of radiopharmaceuticals in diagnosis and treatment. The course includes both didactic material as well as laboratory experience. This course requires students to meet for one hour between 1:00 to 5:00 PM on either Monday, Tuesday, or Wednesdays. A detailed schedule of lab meeting dates and times will be provided in the syllabus. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. Students must pass PHPR 647 Pharmacotherapy II to be eligible to complete PHPR 670. LAB.

**PHPR 845. Professional Communications. 2 Hours.**
A course designed to give the graduate student a practical experience in areas of professional communications such as administrative proposals, grants, letters, memos, poster presentations, and written papers. The course focuses on the different kinds of communications required to relate to other health care professionals. Prerequisite: Consent of instructor. LEC.

**PHPR 850. Introduction to Pharmacoepidemiology. 3 Hours.**
Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects on health. Evaluating a drug's effects commences when a chemical entity becomes a drug candidate, intensifies through clinical trials, and continues after products reach the market. These studies are critical for supporting the proper use of medications in terms of efficacy, effectiveness, and cost-effectiveness. This course provides a broad introduction to the principles
of pharmacoepidemiology with a focus on applications in the medical literature. LEC.

PHPR 855. Economic Evaluation of Health Care Programs and Services. 3 Hours.
The course will provide students with an overview and appraisal of the "state-of-the-art" in the evaluation of health care programs and services (with a special emphasis on pharmaceutical programs, services, and products). The purpose of the course is to provide the student with the tools to conduct economic rather than general evaluation of health care programs and services. There will be some discussion of theoretical concepts, but the major emphasis will be on practical methodological issues in economic evaluation of pharmaceutical programs. The course integrates the perspectives of pharmaceutical and health care technology assessment, managed care, outcomes research, and public health. The main topics covered in the course include: cost, cost-minimization, cost-effectiveness, cost-utility, and cost-benefit analyses. LEC.

PHPR 860. Seminar in Pharmacy Practice. 1 Hour.
Research reports, reviews, and/or presentations on the current status of various aspects of pharmacy practice. Prerequisite: Consent of instructor. LEC.

PHPR 865. Advanced Institutional Pharmacy Services. 3 Hours.
A course dealing with the planning, justification, implementation, management, and coordination of a progressive, comprehensive institutional pharmacy service. Seminar presentations and case studies are used to analyze recent advances and to apply data from the research literature. Prerequisite: Consent of instructor. LEC.

PHPR 875. Health Care Delivery Systems. 3 Hours.
A continuation of PHPR 865 dealing with the current status of health care delivery systems and the impact of changes in this area on pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 885. Human Resource Management in Institutional Pharmacy Practice. 3 Hours.
A course dealing with recruitment, training, motivation, monitoring of performance, and disciplining of personnel. Seminars, case studies, and role-playing are used to apply the information to specific human resource management situations in institutional pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 899. Research in Pharmacy Practice. 1-6 Hours.
Original investigation in the area of pharmacy practice. Prerequisite: Consent of instructor. RSH.

Doctor of Pharmacy

The School of Pharmacy

Since its founding in 1885, the University of Kansas School of Pharmacy (http://pharmacy.ku.edu) has been a leader in pharmacy education. Since 1996, the school has offered only the Doctor of Pharmacy degree as the entry-level practice degree. The curriculum gives the student the knowledge, skills, and ability required of the pharmacy practitioner; it is comprehensive and produces a highly competent general practitioner.

About 60 full-time faculty members teach in the undergraduate professional Doctor of Pharmacy program and in the graduate programs. 3 departments (Pharmacology and Toxicology, Medicinal Chemistry, and Pharmaceutical Chemistry) offer Master of Science and Doctor of Philosophy degrees. Pharmacy Practice offers the master’s degree.

Both the undergraduate and graduate divisions have outstanding national and international reputations based on the excellence and productivity of the faculty. KU is consistently ranked in the top 5 among colleges/schools of pharmacy that receive National Institutes of Health research funding. KU's School of Pharmacy was awarded more than $22 million in research grants and contracts from the NIH in fiscal year 2011.

The School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (https://www.acpe-accredit.org), 135 S. LaSalle St, Suite 4100, Chicago, IL 60603-4810, (312) 664-3575, info@acpe-accredit.org, the official accrediting body for American schools of pharmacy.

Undergraduate Advising

On admission to the school, undergraduates are assigned faculty members as their advisors. The advisor serves continuously during the student’s tenure in the school. Students are expected to meet with their advisors at least once each semester and are encouraged to meet more often to discuss academic issues and career and professional development.

Undergraduate Admission to KU

To qualify for undergraduate admission to KU, Kansas resident first-year applicants must meet 1 of the following requirements:

- Complete the Kansas Board of Regents’ Qualified Admission curriculum (http://admissions.ku.edu/regents-curriculum) with at least a 2.0 grade-point average on a 4.0 scale or
- Achieve an ACT score of 21 or above or an SAT score of 980 or above or
- Rank in the top 1/3 of your high school graduating class.

To qualify for admission to KU, out-of-state first-year applicants must meet 1 of the following requirements:

- Complete the Kansas Board of Regents’ Qualified Admission curriculum (http://admissions.ku.edu/regents-curriculum) with at least a 2.5 grade-point average on a 4.0 scale or
- Achieve an ACT score of 24 or above or an SAT score of 1090 or above with a cumulative 2.0 or higher grade-point average on a 4.0 scale or
- Rank in the top 1/3 of your high school graduating class.

Prospective students should request applications from the University of Kansas Office of Admissions (http://admissions.ku.edu), KU Visitor Center, 1502 Iowa St., Lawrence, KS 66044-7576, 785-864-3911, adm@ku.edu. Return completed applications to that office with necessary transcripts and records. Prospective pharmacy students should declare prepharmacy as the major field of study. Visit the Office of Admissions (http://admissions.ku.edu) for further information. Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Pre-pharmacy students are advised by faculty members from the College of Liberal Arts and Sciences while they complete their pre-pharmacy course work. All pre-pharmacy students are strongly encouraged to make appointments in the office of the dean of the School of Pharmacy, 2010 Becker Drive, Room 2050, for co-advising services and when they have questions concerning specific course requirements or appropriate electives or any other concerns about their preparation for pharmacy admission. Pre-pharmacy students are also encouraged to participate in the pre-pharmacy club. Email pharmacy@ku.edu to request to be added to the club’s e-mail distribution list.
Undergraduate Admission to the School of Pharmacy

Students should apply to the School of Pharmacy during the application period (October 1 through February 1) for admission the following fall semester. When they apply, they should have completed, or be about to complete, the 68 credit hours of required pre-pharmacy courses. The required pre-pharmacy curriculum may be completed at accredited schools other than KU. KU students should submit a change of school form. Students transferring from other schools should submit an application for transfer student undergraduate admission.

Requirements

Applying students should meet the following requirements:

- Complete the required pre-pharmacy courses (http://pharmacy.ku.edu/academics) and provide the required transcripts as documentation of the course work. One official copy of your transcript should be sent to the Office of Admissions.
- Take the Pharmacy College Admissions Test (http://www.pearsonassessments.com/haiweb/Cultures/en-US/site/Community/PostSecondary/Products/pcat/pcathome.htm), preferably in October. January test results also are accepted and considered.
- Have the results of the PCAT sent to KU.
- Complete and return the Applicant Profile Form (http://pharmacy.ku.edu/supplemental-application-forms) to the School of Pharmacy with a $75 nonrefundable application fee.
- Maintain a grade-point average of 2.5 or higher overall and in the sciences. This is the minimum grade-point average acceptable for admission; the average is generally much higher.
- Arrange for 3 letters of recommendation, including the school’s standard reference forms, to be sent to the School of Pharmacy by the persons serving as your references.
- An interview is held with selected applicants.

Procedures

The School of Pharmacy admissions committee, consisting of at least 2 faculty members from each department and representation from the office of the dean, determines admissions. A file consisting of the required documentation is created for each applicant when the application is received. Consideration is given to a student’s grade-point average overall and in all science courses in the pre-pharmacy curriculum. The average grade point of previous entering classes has been 3.5 or higher. Good scholarship is considered a predictor of success in the pharmacy curriculum. However, good communication skills, emotional maturity, leadership ability, professional attitude, an understanding of the pharmacy profession, work experience in a pharmacy, and interest in service to the community are also important. These additional skills may outweigh very high grades or choice of pre-pharmacy courses. Applicant PCAT scores also are considered in the admission process. Admission is competitive and depends on the number of applications received and the qualifications of the applicants.

The admissions committee begins to consider applications in January each year. The application deadline is February 1, and most decisions are made by April. As a condition of matriculation into the KU School of Pharmacy, all admitted students must successfully clear an investigative criminal background check and successfully obtain pharmacy intern status (http://www.pharmacy.ks.gov/licensing-registration/pharmacy-interns) with the Kansas Board of Pharmacy. Successful clearance of the background check and attainment of pharmacy intern status with the Board of Pharmacy is required to enroll in the School of Pharmacy and to participate in curricular and extracurricular curricular activities including interacting with patients. Instructions for completing the background check are provided with the letter of acceptance.

Doctor of Pharmacy Degree Requirements

Prepharmacy Requirements

The Doctor of Pharmacy degree requires completion of all of the required pre-pharmacy and professional courses and a total of 208 credit hours with an overall and professional grade-point average of at least 2.5.

The pre-pharmacy requirements of 68 credit hours include a year each of English, general chemistry, and organic chemistry. Other required courses include calculus, interpersonal communication, molecular and cellular biology, microbiology, human anatomy, physiology, statistics; and 15 credit hours of general studies that satisfy the following KU Core Curriculum requirements: goal 1 outcome 1; goal 3 humanities; goal 3 social science; goal 4 outcome 1; and goal 4 outcome 2. The KU Core Curriculum goals 1 through 4 must be satisfied during the completion of the pre-pharmacy curriculum requirements. KU Core goals 5 and 6 are satisfied during the professional curriculum. A course in college physics is required if the student did not complete physics in high school with a grade of B or higher. The college physics credit hours, if required, do not count toward the 208 credit hours required for the degree.

Students are expected to have or to develop basic competence with personal computers, including word processing and spreadsheet software. All students are required to own an Apple iPad capable of running the most current operating system (iOS). These skills and equipment are necessary for some class assignments, assessments, as well as for professional work assignments.

Courses in other professional schools (e.g., engineering, education) may not be counted toward the degree unless the student can show that such courses are directly relevant to pharmacy. For example, a course in business law taken in the business school may count (consult with the office of the dean in the school of pharmacy).

Total Hours: 68

1 Select a course that satisfies KU Core Curriculum requirements: goal 1 outcome 1; goal 3 humanities; goal 3 social science; goal 4 outcome 1; or goal 4 outcome 2. All of the above need completed.

Professional Requirements

The Doctor of Pharmacy degree requires completion of all the required prepharmacy and professional courses and a total of 208 credit hours with an overall and professional grade-point averages of 2.5.

The curriculum includes instruction in the 3 basic sciences: medicinal chemistry, pharmaceutical chemistry, and pharmacology and toxicology. It also includes courses in the various aspects of pharmacy practice, including the health care system, law, and emerging roles for pharmacy practitioners. The curriculum integrates course material among departments. Assignments within the curriculum foster development of independent learning, communication skills, problem solving, and professional motivation. The professional curriculum includes a requirement that each student must complete a minimum of 4 elective credit hours within School of Pharmacy. One credit hour must be completed from the basic science department (either medicinal chemistry, pharmaceutical chemistry, and pharmacology and toxicology) and the remaining two credit hours are left to the students discretion.

Students enroll in introductory pharmacy practice experiences during the summer following the first and second years. These experiences are located throughout the state of Kansas and vary in the type of professional setting.

The final year of the curriculum consists of nine 4-week advanced experiential practice rotations with faculty preceptors at pharmacy practice sites throughout Kansas. Students must have their own transportation to reach their assigned sites. Housing at these sites is also the student’s responsibility.

Professional Program

The following curriculum is applicable to the graduating class of 2019 (matriculating in the fall of 2015) and later. See http://pharmacy.ku.edu/academics for the curriculum for the graduating classes of 2016, 2017, and 2018.

Total Hours: 140

* Bachelors of Science in Pharmaceutical Studies (BSPS) awarded to students who complete all required coursework (at a GPA of 2.0 or higher) through the spring of professional year 2.

Fourth Year

The fourth year is composed of 36 credit hours of advanced experiential pharmacy practice rotations (nine 4-week assignments). The required experiential rotations include advanced hospital, advanced community, ambulatory care, and acute care/inpatient general medicine. The remaining 5 clerkships/externships are assigned as elective clerkship courses. Assignments are made on the basis of the student’s preference, and site availability. The five 4-week rotations of the fall semester begin in July and conclude at the end of November. The four 4-week spring semester rotations begin in January and conclude in April. See the
Pharmacy Practice (PHPR) courses with Clerkship titles for a complete listing.

**Department of Medicinal Chemistry**

**Medicinal Chemistry Graduate Programs**

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic chemistry, biochemistry, natural product chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department’s research activities encompass many areas of modern medicinal chemistry.

Currently, the department has 9 full-time faculty members, about 30 graduate students, more than 15 postdoctoral associates, numerous undergraduate researchers, and an outstanding technical staff. The department is recognized nationally and internationally, and most graduates have gone on to successful careers in the pharmaceutical industry and in academia. Medicinal chemistry faculty members are directors of one Center for Biomedical Research Excellence (COBRE) — Protein Structure and Function (http://psf.cobre.ku.edu) — as well as the Center for Chemical Methodologies and Library Development (http://www.cmdl.ku.edu) (CMLD), both funded by the National Institutes of Health.

**Facilities**

The department is well equipped for both chemical and biochemical research and has research facilities for about 70 graduate students, postdoctoral associates, and research technicians. Malott Hall, where most of the medicinal chemistry laboratories are located, also houses the departments of Chemistry (http://www.chem.ku.edu) and Pharmacology and Toxicology (http://www.pharmtox.pharm.ku.edu). Anschutz Library is adjacent to the building. Much of the laboratory space in the department has recently undergone renovation and provides exceptional research laboratories for chemical synthesis and biochemical research. Faculty are also housed in several modern research buildings on west campus. The department has an excellent complement of modern spectroscopic, biochemical, and chromatographic instrumentation, and other specialized research instrumentation is available through cooperative arrangements with other departments.

Advanced instrumentation and facilities are available through KU’s Molecular Structures Group (http://msg.dept.ku.edu/webs/msg). MSG laboratories include the Biochemical Research Service Laboratory, the Mass Spectrometry Laboratory, the Nuclear Magnetic Resonance Laboratory, the Molecular Graphics and Modeling Laboratory, the X-ray Crystallography Laboratory, and the Protein Structure Laboratory (dedicated to macromolecular X-ray crystallography) with more than $10 million in instrumentation.

The Shankel Structural Biology Center, on KU’s west campus, offers new research opportunities for medicinal chemists interested in protein and nucleic acid structure and combinatorial synthesis; it also houses the new 800-MHz NMR. The Analytical Proteomics Laboratory, which combines activities of the Mass Spectrometry Lab and BRSL to create a collaborative environment for protein handling, protein mass spectrometry, and bioinformatics, is in the Shankel Structural Biology Center. In the same building, the High Throughput Screening Laboratory (http://www.hts.ku.edu) has integrated and automated robotics equipment for carrying out biochemical and cell-based assays and a chemical library of more than 100,000 compounds with diverse structures and drug-like properties for biological screening. The service laboratories have professional staff that provides training in specialized research techniques in addition to their service functions.

**Courses**

**MDCM 601. Medicinal Biochemistry I. 3 Hours.**  
A study of the biochemical principles of macromolecular structure and function, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. Prerequisite: Concurrent enrollment in MDCM 602 Lab. LEC.

**MDCM 603. Medicinal Biochemistry II. 3 Hours.**  
A study of the biochemical principles of macromolecular structure and function, biosynthesis, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. Prerequisite: MDCM 601. LEC.

**MDCM 606. Phytomedicinal Agents. 1 Hour.**  
This course will acquaint the pharmacy students with the current status of botanical use in the United States. A basic foundation will be provided so that the pharmacist can properly assess the appropriateness and usefulness of various phytomedicines and combinations in managing certain ailments with regard to efficacy, safety, potential toxicity, and potential herb-drug interactions. Prerequisite: MDCM 626 or instructor permission. LEC.

**MDCM 607. Clinical Pharmacognosy. 1 Hour.**  
The course will provide a technical background for understanding the scientific basis underlying the use of herbal medicines. This will be followed by practical information about the pharmacological and chemical properties as well as clinical uses of herbal medicines. Active student participation in discussing the properties of these non-prescription medicinals is expected. Prerequisite: MDCM 601. LEC.

**MDCM 625. Medicinal Chemistry I: Neuroeffector Agents. 4 Hours.**  
A study, from the molecular viewpoint, of the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action; this course emphasizes drugs affecting the central nervous system. Prerequisite: CHEM 626 and MDCM 601. LEC.
MDCM 625. Medicinal Chemistry II: Homeostatic Agents. 4 Hours.
A continuation of MDCM 625 with emphasis on autonomic and cardiovascular agents and peripherally-acting hormones. Prerequisite: MDCM 625. LEC.

MDCM 627. Medicinal Chemistry III: Chemotherapeutic Agents. 3 Hours.
A continuation of MDCM 625 and MDCM 626 with special emphasis on anticancer, antiviral, antibacterial, antifungal and non-steroidal anti-inflammatory drugs. Prerequisite: MDCM 625. LEC.

MDCM 690. Undergraduate Research. 1-5 Hours.
Research in medicinal chemistry. Students will be assigned to a laboratory research problem. Prerequisite: Consent of instructor. LEC.

MDCM 692. Problems in Medicinal Chemistry. 1-5 Hours.
A study of the principles of basic enzymology, including chemical mechanisms of drug action, drug metabolism, and drug disposition, with special emphasis on the uptake, storage, release, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. Prerequisite: Consent of instructor. IND.

MDCM 701. Biomedical Chemistry. 3 Hours.
A study of the principles of macromolecular structure and function, biosignaling, bioenergetics and metabolism, with an emphasis on the relationship between biochemistry and medicine. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 703. Advanced Biomedical Chemistry. 3 Hours.
A study of the principles of basic enzymology, including chemical reactions, biosynthesis, and metabolism. In addition, the course will cover lipids, hormones, vitamins, and minerals. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 710. Chemistry of Drug Action I. 5 Hours.
This course provides an overview of physiological mechanisms and disease processes as well as the basic principles of contemporary drug design. Modulation of drug absorption, distribution, metabolism and excretion; drug-like properties; conformational constraint; structure-based drug design; library generation; HTS hit optimization, prodrugs, bioisosteres; Kcat inhibitors; active site directed reversible and irreversible inhibitors; quantitative SAR; molecular dissection; rigid analogs; pharmacophores; etc., will be treated. Prerequisite: One college-level course in biology. LEC.

MDCM 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: Consent of instructor. LEC.

MDCM 785. Natural Products of Medicinal Significance. 2 Hours.
A discussion of the principles of contemporary drug design with specific examples chosen from the original literature. This course covers the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, and metabolism and mechanisms of action. Prerequisite: Graduate standing or completion of MDCM 624 and MDCM 627. LEC.

MDCM 799. Research Seminar in Medicinal Chemistry. 1 Hour.
Reports by research students and discussions of developments in the field not covered in formal courses. LEC.

MDCM 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientists in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801, PHCH 801 and PHCH 802.) LEC.

MDCM 816. Careers in Chemical Biology. 1 Hour.
Advanced course examining current research topics in chemical biology. An emphasis will be placed on career options open to PhD scientists in Chemical Biology, and preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816, and MDCM 816.) Prerequisite: Permission of instructor. SEM.

MDCM 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.

MDCM 895. Research in Medicinal Chemistry. 1-12 Hours.
Hours and credit to be arranged. RSH.

MDCM 899. Master's Thesis. 1-12 Hours.
Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Consent of instructor. THE.

MDCM 901. Issues in Scientific Integrity. 1 Hour.
An in-depth discussion of topics of current interest to medicinal chemists. Prerequisite: Consent of instructor. THE.

MDCM 950. Advanced Topics. 1-3 Hours.
An in-depth discussion of topics of current interest to medicinal chemists. Prerequisite: Consent of instructor. THE.

MDCM 980. Proposal Preparation and Seminar. 3 Hours.
Presentation of a seminar and writing an original NIH-style research proposal concerning contemporary problems in medicinal chemistry. Prerequisite: Consent of instructor. LEC.

MDCM 999. Doctoral Dissertation. 1-12 Hours.
Hours and credit to be arranged. Original chemical research in the synthesis and development of medicinal agents, elucidation of the chemical mechanisms of drug action, drug metabolism, and drug toxicities. THE.

Master of Science in Medicinal Chemistry

Medicinal Chemistry Graduate Programs

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic
chemistry, biochemistry, natural product chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department’s research activities encompass many areas of modern medicinal chemistry.

Currently, the department has 9 full-time faculty members, about 30 graduate students, more than 15 postdoctoral associates, numerous undergraduate researchers, and an outstanding technical staff. The department is recognized nationally and internationally, and most graduates have gone on to successful careers in the pharmaceutical industry and in academia. Medicinal chemistry faculty members are directors of one Center for Biomedical Research Excellence (COBRE) — Protein Structure and Function (http://psf.cobre.ku.edu) — as well as the Center for Chemical Methodologies and Library Development (http://www.cmlld.ku.edu) (CMLD) both funded by the National Institutes of Health.

**Graduate Admission**

Graduate students are primarily admitted to the department to pursue the Ph.D. degree. The M.S. degree and postdoctoral training are also available. An applicant wishing to enter the graduate program must have earned a bachelor’s or master’s degree in pharmacy, medicinal chemistry, chemistry, biochemistry, or a closely related field, and must have completed 1 year of organic chemistry with laboratory (equivalent to CHEM 330, CHEM 331, CHEM 335, and CHEM 336). In all cases, general admission requirements must be met.

Applications are evaluated by the graduate selection committee. Applications must be supported by 1 copy of official transcripts of all previous college and university work, both undergraduate and graduate. In addition, a resume, a statement of purpose, and 3 letters of recommendation from current or former teachers, advisors, or employers must be submitted. Students from non-English-speaking countries also must furnish proof of proficiency in English. Graduate Record Examination (GRE) general test scores are required, and applicants are strongly encouraged to take the subject test in chemistry as well.

The graduate selection committee makes admission decisions based on grade-point averages for previous college work (particularly in the relevant science areas), letters of recommendation, previous research or employment experience relevant to the graduate training being sought, GRE scores, etc. The number of applicants who can be admitted at any time varies, depending on the availability of laboratory space, research facilities, and financial support for research activities, but it is usually about 10 a year.

Graduate applications (http://wwwgraduate.ku.edu) and all other requested application materials (transcripts, résumé, statement of purpose, recommendation letters, etc.) must be submitted online:

The University of Kansas  
Department of Medicinal Chemistry  
Malott Hall  
1251 Wescoe Hall Drive, Room 4070  
Lawrence, KS 66045-7572

**M.S. Degree Requirements**

Candidates for this degree must satisfy general requirements as well as those of 1 of the following options:

- Students who are proceeding toward the Ph.D. degree at KU receive the master’s degree after satisfactorily completing the course work requirement for the Ph.D. and passing a comprehensive oral examination.
- Students who wish to earn only the M.S. degree must complete a prescribed subset of the course work requirements for the Ph.D. degree and a thesis representing at least 10 credit hours of research and pass a thesis defense.

**Doctor of Philosophy in Medicinal Chemistry**

**Medicinal Chemistry Graduate Programs**

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic chemistry, biochemistry, natural product chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department’s research activities encompass many areas of modern medicinal chemistry.

Currently, the department has 9 full-time faculty members, about 30 graduate students, more than 15 postdoctoral associates, numerous undergraduate researchers, and an outstanding technical staff. The department is recognized nationally and internationally, and most graduates have gone on to successful careers in the pharmaceutical industry and in academia. Medicinal chemistry faculty members are directors of one Center for Biomedical Research Excellence (COBRE) — Protein Structure and Function (http://psf.cobre.ku.edu) — as well as the Center for Chemical Methodologies and Library Development (http://www.cmlld.ku.edu) (CMLD) both funded by the National Institutes of Health.

**Graduate Admission**

Graduate students are primarily admitted to the department to pursue the Ph.D. degree. The M.S. degree and postdoctoral training are also available. An applicant wishing to enter the graduate program must have earned a bachelor’s or master’s degree in pharmacy, medicinal chemistry, chemistry, biochemistry, or a closely related field, and must have completed 1 year of organic chemistry with laboratory (equivalent to CHEM 330, CHEM 331, CHEM 335, and CHEM 336). In all cases, general admission requirements must be met.

Applications are evaluated by the graduate selection committee. Applications must be supported by 1 copy of official transcripts of all previous college and university work, both undergraduate and graduate. In addition, a resume, a statement of purpose, and 3 letters of recommendation from current or former teachers, advisors, or employers must be submitted. Students from non-English-speaking countries also must furnish proof of proficiency in English. Graduate Record Examination
(GRE) general test scores are required, and applicants are strongly encouraged to take the subject test in chemistry as well.

The graduate selection committee makes admission decisions based on grade-point averages for previous college work (particularly in the relevant science areas), letters of recommendation, previous research or employment experience relevant to the graduate training being sought, GRE scores, etc. The number of applicants who can be admitted at any time varies, depending on the availability of laboratory space, research facilities, and financial support for research activities, but it is usually about 10 a year.

Graduate applications (http://www.graduate.ku.edu) and all other requested application materials (transcripts, résumé, statement of purpose, recommendation letters, etc.) must be submitted online:

**The University of Kansas**
Department of Medicinal Chemistry
Malott Hall
1251 Wescoe Hall Drive, Room 4070
Lawrence, KS 66045-7572

**Ph.D. Degree Requirements**

If credit has not already been obtained in the courses below or their equivalents, students must complete the following courses as early as is practical in the graduate program: 1 semester of physical chemistry (CHEM 510 or CHEM 530), and biochemistry (MDCM 701). Satisfactory completion of qualifying examinations in organic chemistry and biochemistry also is required.

A series of monthly written cumulative examinations is used to assess students' knowledge of medicinal chemistry, organic chemistry, and biochemistry. These examinations must be passed at an accelerating rate during the second and third years. After completing the cumulative examinations, the major part of the course work, and other requirements, the student takes an oral comprehensive examination. After completing this examination, the student prepares an original research proposal for presentation to the faculty. The final requirement for the Ph.D. is the preparation and defense of a dissertation based on original laboratory research conducted by the candidate.

**Note:** Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

General requirements, such as those related to the comprehensive oral examination, the dissertation, and the dissertation defense, are listed in the Graduate Studies (p. 2280) section of the online catalog.

**Neurosciences Programs**

**Neurosciences Graduate Programs**
The neurosciences program admits students directly for study on the Lawrence campus, with strengths in behavioral, biological, chemical, and pharmaceutical sciences, and the KU Medical Center (http://www.kumc.edu) campus in Kansas City, with strengths in all the biomedical and clinical sciences. Each student is asked which campus he or she would prefer. Students earn a Ph.D. degree in the neurosciences.

In exceptional circumstances, the program also offers an M.S. degree in neurosciences.

Graduates can pursue careers in university teaching and research or conduct and supervise research in a pharmaceutical/biotechnology company or government laboratory.

**Programs**
Neuroscience is a truly multidisciplinary research field. All students are expected to be able to understand the fundamental principles and contributions of each of the major disciplines of the neurosciences core. New students receive training in biochemistry and molecular biology, cell biology, and physiology before proceeding with more focused courses.

Neuroscience is a truly multidisciplinary research field. All students are expected to be able to understand the fundamental principles and contributions of each of the major disciplines of the neurosciences core. New students receive training in biochemistry and molecular biology, cell biology, and physiology before proceeding with more focused courses.

**Graduate Admission**
All application materials are reviewed by faculty committees in Lawrence and Kansas City. Students should have B.A. or B.S. degrees in anthropology, behavioral sciences, biology, chemistry, engineering, neuroscience, or pharmacological sciences. Preference is given to students who have completed courses in introductory and organic
chemistry, calculus, physics, introductory biology, and at least 1 course in advanced biology topics such as biochemistry, physiology, microbiology, or molecular biology. Students who do not have sufficient training complete appropriate courses before admission. The program requires standard Graduate Record Examination scores with all applications, 3 letters of recommendation, and an essay by the applicant about his or her career goals. Selection is based on grade-point average, GRE scores, letters of recommendation, and evidence of previous experience in research. The minimum standard is a grade-point average of 3.0 on a 4.0 scale.

Submit your graduate application online (http://www.graduate.ku.edu). Forward all requested supporting application documents to the program:

Lawrence, KS 66045-7572

M.S. Degree Requirements

The M.S. is offered in rare cases where attainment of the Ph.D. is inappropriate. A student may earn the M.S. by completing these minimum requirements:

- The courses in the curriculum of the first year of the Ph.D. training program.
- The course in advanced neuroscience.
- A thesis based on either original research or library research.
- The total credit hours of graduate-level courses required for the M.S. degree.

Doctor of Philosophy in Neurosciences

Neurosciences Graduate Programs

The neurosciences program admits students directly for study on the Lawrence campus, with strengths in behavioral, biological, chemical, and pharmaceutical sciences, and the KU Medical Center (http://www.kumc.edu) campus in Kansas City, with strengths in all the biomedical and clinical sciences. Ph.D. Degree Requirements

The neuroscience curriculum is subdivided into core courses that all students must complete and electives representing the 2 major specializations,

- Cell and Molecular Neuroscience and
- Cognitive and Systems Neuroscience.

The core curriculum includes research rotations in 2 laboratories of the student’s choice during the first year. Laboratory rotations offer first-hand research experience. Students complete 2 rotations in faculty research laboratories in the first year. Laboratories are selected by the student and the co-directors. After the rotations, each student chooses a research advisor and begins an independent research project.

Students also receive training in the responsible conduct of research and teaching in the neurosciences. For the Ph.D., the student completes the core curriculum as well as research skills training, comprehensive oral examination, preparation of a dissertation, and final oral examination and defense of the dissertation.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Students must

• Complete 1 core course from Cognitive and Systems Neuroscience;
• Complete 1 core course from Cell and Molecular Neuroscience;
• Complete 1 core course from General Neurobiology;
• Take Bioethics or NURO 801 Issues in Scientific Integrity; and
• Receive training in effective oral communication and teaching by enrolling in 1 semester of NURO 800 Neuroscience Teaching Principles, which includes a teaching experience.

Neuroscience Courses

Cognitive and Systems Neuroscience (9)

BIOL 701 Topics in: _____ (Brain Disorders and Neurological Disorders) 3

NURO 844 Neurophysiology 3

PSYC 961 Biological Foundations of Psychopathology 3

Cell and Molecular Neuroscience (9)

BIOL 673 Cellular and Molecular Neurobiology 3

NURO 775 Chemistry of the Nervous System 3

NURO 848 Molecular Mechanisms of Neurological Disorders 3

General Neurobiology (10)

NURO 846 Advanced Neuroscience 5

NURO 710 Advanced Neurobiology 3

NURO 847 Developmental Neurobiology 2

NURO 799 Neuroscience Seminar Series 2

Scientific Integrity (1)

NURO 801 Issues in Scientific Integrity 1

Teaching Experience (2)

NURO 800 Neuroscience Teaching Principles 2

Continued enrollment in the neuroscience seminar is required, and students present at least 2 seminars during their graduate careers. In consultation with a 5-member faculty advisory committee including at least 3 members of the neuroscience program, each student chooses electives that provide training relevant to the research goals.

All students must complete a research skill. Commonly used areas are radiation biology and radiation safety, cell culture methodology, techniques of electron and confocal microscopy, molecular biology laboratory training, computer science training, statistics, and training in electronics and instrumentation.

After the first 2 years, students take the comprehensive oral examination. This consists of a research proposal in the general area of the doctoral research, written in NIH format, and an oral examination on the proposal and on general knowledge in neuroscience and related fields.

Department of Pharmaceutical Chemistry

Pharmaceutical Chemistry Graduate Programs

The Department of Pharmaceutical Chemistry offers a number of core courses designed to hone the student’s skills in aspects of physical/organic chemistry, chemical kinetics, and equilibrium phenomena, which we consider essential in understanding problems of any origin, including biological processes, on a molecular level. Every student entering the program is expected to complete these core courses successfully during the first year.

Research has become increasingly multidisciplinary; students have the option to focus their didactic training in 2 unique areas of specialization or tracks:

• Pharmaceutical biotechnology and
• Physical/analytical pharmaceutical chemistry.

In addition, students can choose from a variety of elective courses that allow them to gain knowledge and skills in areas specific to individual research project interests.

The department places emphasis on excellence in research, making every effort to ensure that students can maximize efforts on their research projects toward earning the Ph.D. degree in a timely fashion. The core courses are taught every year and can be completed in just 2 semesters. Students are fully supported by the department their entire time in the program and are not burdened with time-consuming teaching responsibilities.

Facilities

The department is located on KU’s west campus in Simons Biosciences Research Laboratories and the Multidisciplinary Research Building
in developing a new medicine that can be produced at large-scale in
a manufacturing facility? (3) why are patents and venture capital so
important in drug development? Guest lecturers will provide real world
perspectives including case studies. This is a two-hour class that meets 8
times during the semester. Prerequisite: 1st, 2nd or 3rd professional year
standing in the School of Pharmacy. LEC.

PHCH 514. Scientific Writing for the Health Professional. 1 Hour.
Communicating research plans and experimental findings is a critical
skill for health care professionals working in a research environment,
and successful communication depends on clarity of thought and careful
use of language. This course is intended for 5th professional (P3) year
students who are seeking residency and will need to write research
proposals and abstracts, as well as prepare effective posters and
presentations. It is an intensive course with multiple writing assignments.
Students are expected to participate fully, and individual feedback and
guidance on writing will be provided by the instructor. Graded on a
satisfactory/fail. Prerequisite: 5th professional (P3) year students who plan
to complete post-doctoral residency training. LEC.

PHCH 517. Pharmacy Calculations. 2 Hours.
An introduction to the mathematics involved in filling prescriptions and
in manufacturing pharmaceuticals. Includes an introduction to standard
prescription notation and familiarization with pharmaceutical weights and
measures. LEC.

PHCH 518. Physical-Chemical Principles of Solution Dosage Forms.
3 Hours.
Physical properties of pharmaceutical solutions and their physiological
compatibility will be discussed (intermolecular interactions, energetics,
colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics
and mechanisms of drug degradation in solution will also be introduced.
Prerequisite: PHCH 517. LEC.

PHCH 605. Vaccines. 1 Hour.
Vaccines are currently the most powerful therapeutic approach available
for infectious disease and promise to become of increasing importance
for a wide variety of other pathologies including cancer. This course
discusses the immunological basis of vaccinology, types of vaccines
currently available and in development and the process by which vaccines
are made from the basic research stage through their pharmaceutical
development and marketing. Ethical aspects of vaccine use will also be
considered. LEC.

PHCH 625. Pharmacokinetics. 3 Hours.
A discussion of the basic concepts, and some clinical applications, of
pharmacokinetics, clearance concepts, extravascular dosing, and the
use of pharmacokinetics in dosage regimen design and adjustment.
Prerequisite: PHCH 517 and PHCH 518. LEC.

PHCH 626. Biopharmaceutics and Drug Delivery. 3 Hours.
A study of biological barriers to drug delivery, conventional dosage forms,
and new and future drug delivery strategies. Prerequisite: PHCH 517,
PHCH 518, and PHCH 625. LEC.

PHCH 667. Introduction to Clinical Chemistry. 2 Hours.
A lecture-discussion course concerned with identification of the contents
of physiological fluids, changes in physiological fluid content induced by
disease and drugs, and therapeutic drug monitoring: case studies are
presented. Prerequisite: Must be accepted to the Pharmacy Program.
LEC.

PHCH 690. Undergraduate Research in Pharmaceutical Chemistry.
1-5 Hours.
Student will be assigned a suitable research project in the area of
pharmaceutical analysis or pharmaceutics. Prerequisite: Consent of
instructor. IND.
PHCH 693. Clinical Pharmacokinetics. 2 Hours.
This course presents discussions on physiological and disease state variables in pharmacokinetics for selected drugs and drug classes, and instructs students in the use of physiological and disease state pharmacokinetic information to develop individualized therapeutic regimens. Prerequisite: PHCH 625 and PHCH 626. LEC.

PHCH 694. Problems in Pharmaceutical Chemistry. 1-5 Hours.
A student will be assigned a suitable research project in an area of pharmaceutical analysis or pharmaceutical chemistry. This course is offered regularly by the Department of Pharmaceutical Chemistry to meet the special needs of selected students, usually for one of the following two situations: (1) This course may be taken when a student has a special interest in a problem or area of limited scope and desires to pursue that study in depth under supervision of a member of the faculty. (2) This course is sometimes used as a remedial class to provide a mechanism of intensive review and study in an area of weakness. Prerequisite: Consent of instructor. IND.

PHCH 700. Experimental Methods in Pharmaceutical Chemistry. 1-5 Hours.
Discussions, lectures, and laboratory work designed to acquaint and provide hands on experiences to advanced undergraduate and graduate students with experimental design, methods, and approaches relevant to modern research in pharmaceutical chemistry. Prerequisite: Consent of instructor. LEC.

PHCH 705. Writing and Communicating Science for Graduate Students. 3 Hours.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 712. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is a two-hour class that meets 8 times during the semester. Prerequisite: Graduate standing in Pharmaceutical Chemistry or a trainee of the NIH Biotech Training Grant. LEC.

PHCH 715. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: Master's or PhD candidate in Engineering, Chemistry, Medicinal Chemistry, or Pharmaceutical Chemistry (by appointment for seniors or graduate students in departments not listed). LEC.

PHCH 716. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: This course is only open to distance education students. LEC.

PHCH 718. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isonitocity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: Graduate standing. LEC.

PHCH 719. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isonitocity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to distance education students. Prerequisite: Graduate standing. LEC.

PHCH 725. Molecular Cell Biology. 3 Hours.
Fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell function, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. (Same as CPE 725) LEC.

PHCH 726. Molecular Cell Biology. 3 Hours.
Fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell function, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. This course is only open to distance education students. LEC.

PHCH 730. Biopharmaceutics & Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. LEC.

PHCH 731. Biopharmaceutics and Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course open only to distance education students. LEC.

PHCH 744. Organic Chemistry for Pharmaceutical Scientists. 3 Hours.
A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include functional group chemistry: electronic structure, acid/base properties: molecular structure and properties (dipole, strain, and steric effects, inductive and resonance effects); dynamics of reactions (the major organic reaction mechanism, kinetics, energy profiles, isotope effects, linear free energy relationships), solvent effects, stereochemistry and conformation, an introduction to orbital symmetry control; basic thermodynamic and kinetic concepts; and an overview of important classes of mechanisms. This course is only open to distance education students. Prerequisite: CHEM 624 and CHEM 626. LEC.
PHCH 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as PTX 775, BIOL 775, CHEM 775, MDCM 775 and NURO 775.) Prerequisite: BIOL 600 or equivalent. LEC.

PHCH 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientists in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801 and PHCH 802.) LEC.

PHCH 802. Issues of Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. This course is open only to distance education students. (Same as PHCH 801, MDCM 801, NURO 801, and PTX 801.) LEC.

PHCH 816. Careers in Chemical Biology. 1 Hour.
Advanced course examining current research topics in chemical biology. An emphasis will be placed on career options open to PhD scientists in Chemical Biology, and preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816 and MDCM 816.) Prerequisite: Permission of instructor. SEM.

PHCH 850. Solid State Stability and Formulation. 3 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 851. Solid State Stability and Formulation. 3 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. This course is open only to distance education students. Prerequisite: Graduate standing in Pharmaceutical Chemistry or consent of the instructor. LEC.

PHCH 860. Principles and Practices of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and MDCM 860.) Prerequisite: Permission of instructor. LEC.

PHCH 862. Pharmaceutical Equilibrium. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. LEC.

PHCH 863. Pharmaceutical Equilibria. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. This course is open only to distance education students. LEC.

PHCH 864. Pharmaceutical Analysis. 4 Hours.
This course is intended to be a comprehensive treatment of contemporary techniques used to validate analytical methods for the determination of drugs in the bulk form, pharmaceutical formulations, biological samples and other relevant media. The emphasis will be on chromatographic techniques reflecting the preeminent position that those techniques occupy in the field of pharmaceutical and biomedical analysis. Prerequisite: Previous or concurrent enrollment in PHCH 684. LEC.

PHCH 865. Pharmaceutical Analysis. 4 Hours.
Advanced course on pharmaceutical analysis. This course is only open to distance education students. LEC.

PHCH 870. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 871. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. This course is only open to distance education students. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 895. Research in Pharmaceutical Chemistry. 1-11 Hours.
Advanced level research in collaboration with a faculty member in pharmaceutical chemistry or related areas. This course is limited to students who are doing research, but not necessarily working toward either a master's or a doctoral degree. RSH.

PHCH 898. Master's Thesis. 1-10 Hours.
Master's Thesis. This course is open only to distance education students. THE.

PHCH 899. Master's Thesis. 1-11 Hours.
Graded on a Satisfactory/Fail basis. THE.

PHCH 920. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and
solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. LEC.

**PHCH 921. Chemical Kinetics. 2 Hours.**

This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. This course is only open to distance education students. LEC.

**PHCH 972. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.**

A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. LEC.

**PHCH 973. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.**

A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. This course is only open to distance education students. LEC.

**PHCH 974. Advanced Special Topics in Pharmaceutical Chemistry. 1-3 Hours.**

Various topics pertinent to the area of pharmaceutical chemistry will be explored. Graded on a satisfactory/unsatisfactory basis. LEC.

**PHCH 978. Pharmaceutical Chemistry Seminar. 1 Hour.**

A seminar on the chemistry of pharmaceutical systems. LEC.

**PHCH 998. Doctoral Dissertation in Pharmaceutical Chemistry. 1-11 Hours.**

This course is only open to distance education students. THE.

**PHCH 999. Doctoral Dissertation in Pharmaceutical Chemistry. 1-11 Hours.**

**Pharmaceutical Chemistry Graduate Programs**

The Department of Pharmaceutical Chemistry offers a number of core courses designed to hone the student’s skills in aspects of physical/organic chemistry, chemical kinetics, and equilibrium phenomena, which we consider essential in understanding problems of any origin, including biological processes, on a molecular level. Every student entering the program is expected to complete these core courses successfully during the first year. In addition, students can choose from a variety of elective courses that allow them to gain knowledge and skills in areas specific to individual research project interests.

The department places emphasis on excellence in research, making every effort to ensure that students can maximize efforts on their research projects toward earning the M.S. degree in a timely fashion. The core courses are taught every year and can be completed in just 2 semesters. Students are fully supported by the department their entire time in the program and do not have teaching responsibilities.

**Graduate Admission**

Students with bachelor’s or master’s degrees in chemistry, pharmacy, the biological sciences, material sciences, chemical engineering or related disciplines are encouraged to seek admission. Except under unusual circumstances, we review and accept candidates for admission to fall semester only. All required materials must be received before the department can begin to consider an application.

Required materials to be sent to the Department of Pharmaceutical Chemistry include the following:

1. Graduate Record Examination results (not more than 5 years old) forwarded directly to Graduate Studies/Department of Pharmaceutical Chemistry from the Educational Testing Service. Photocopies of results are not permissible. The institution code for the University of Kansas is R6871. The Department of Pharmaceutical Chemistry’s code is R0305.
2. Test of English as a Foreign Language results if applicable. These may not be required if you have completed a degree in an English-speaking country. The current list is limited to the U.S., England, Australia, and New Zealand. Contact the Office of Graduate Studies to learn if your institution is recognized.
3. Official transcripts from all universities/institutions in which the applicant has studied.
4. KU’s graduate application (http://www.graduate.ku.edu).
5. The application processing fee (amount varies).
6. A brief personal statement (about one page) that helps us understand why you are interested in graduate studies and specifically why KU’s department.
7. An updated copy of your resume indicating relevant experience, including educational and research experience, if applicable.
8. 3 letters of recommendation from people you believe are best qualified to comment on your potential to succeed in graduate studies. There is no template for letters of recommendation, but please make sure they are on official letterhead.

All of these items should be sent to the department:

**The University of Kansas**

**Department of Pharmaceutical Chemistry**

Attn: Nancy Helm

McCollum Laboratories

2095 Constant Ave.

Lawrence, KS 66047-3729

Telephone: 785-864-4822, fax: 785-864-5736, nhelm@ku.edu.

Although the department does not have a formal application deadline, the faculty begins evaluations of applications around January 15 each year. To ensure full consideration, it is highly recommended that complete applications be in the department far in advance of January 15.

Admitted students receive a competitive stipend, tuition, and basic health insurance. Students also can be selected to participate in the Takeru Higuchi and Nigel Manning Ph.D. Intersearch Program, allowing them to conduct a portion of their research at the Victorian College of Pharmacy (http://www.vcp.monash.edu.au) at Monash University in Melbourne, Australia. In addition, students are encouraged to participate in other industrial and/or academic internship programs the department offers.

A number of fellowship awards are offered to recognize academic superiority and to assist meritorious students in the timely completion of their degree programs. The number of fellowships awarded each year depends upon available funds. For a description of funding opportunities for KU graduate students, visit the Graduate Studies website (http://
www.graduate.ku.edu/funding-opportunities). Students with particularly outstanding undergraduate records may be eligible for special awards. The Department of Pharmaceutical Chemistry is a Madison and Lila Self Graduate Fellowship Program (http://selfgraduate.ku.edu) partner at KU. The program provides a generous stipend and tuition to outstanding students for 4 years of graduate study.

At the department level, the Higuchi, Lindenbaum, Rytting, Stella, and Waugh Fellowships are awarded each year to incoming graduate students with high promise.

M.S. Degree Requirements

Except under unusual circumstances, the Department of Pharmaceutical Chemistry does not recruit students seeking the M.S. degree. However, all students who pass the comprehensive qualifying examinations for the Ph.D. degree receive a nonthesis M.S. degree. Students who wish to earn the terminal M.S. degree must complete satisfactorily the core curriculum recommended for the Ph.D. degree, present a thesis based on original research or a suitable technical report based on the review of published research in a particular area, and pass a final Master’s thesis defense.

Distance Master’s Degree Program

The department also offers a distance master’s program. See the website (http://pharmchem.ku.edu/admission-requirements-2) for details. This program features the same high-quality lectures and courses offered in the on-campus M.S./Ph.D. program but allows students to complete the degree while working at a remote location. Students typically take 1 course a semester. All courses offered by the department can be taken this way. For questions, contact the director of the distance master’s program, John Stobaugh, 785-864-3996, stobaugh@ku.edu.

Doctor of Philosophy in Pharmaceutical Chemistry

Pharmaceutical Chemistry Graduate Programs

The Department of Pharmaceutical Chemistry offers a number of core courses designed to hone the student’s skills in aspects of physical/organic chemistry, chemical kinetics, and equilibrium phenomena, which we consider essential in understanding problems of any origin, including biological processes, on a molecular level. Every student entering the program is expected to complete these core courses successfully during the first year. In addition, students can choose from a variety of elective courses that allow them to gain knowledge and skills in areas specific to individual research project interests.

The department places emphasis on excellence in research, making every effort to ensure that students can maximize efforts on their research projects toward earning the Ph.D. degree in a timely fashion. The core courses are taught every year and can be completed in just 2 semesters. Students are fully supported by the department their entire time in the program and are not burdened with time-consuming teaching responsibilities.

Graduate Admission

Students with bachelor’s or master’s degrees in chemistry, pharmacy, the biological sciences, material sciences, chemical engineering or related disciplines are encouraged to seek admission. Except under unusual circumstances, we review and accept candidates for admission to fall semester only. All required materials must be received before the department can begin to consider an application.

Ph.D. Degree Requirements

Entering Background

Students entering the program are expected to be competent in basic principles of physical/organic chemistry and mathematics. These requirements are typically satisfied by most degrees in the basic or pharmaceutical sciences. One year of organic chemistry for majors, a physical chemistry course that includes classical thermodynamics, and two semesters of calculus equivalent to MATH 121/122.

Core Courses

All students participating in the Pharmaceutical Chemistry Ph.D. program are required to take a series of core courses, which are designed to ensure that graduates maintain the department’s long-standing reputation for strength in the physical-chemical sciences as they relate to modern research in Pharmaceutical Chemistry (Pharmaceutics). The department requires that each student take seven core courses in which they must receive a grade of B or better in order to be eligible to take the Core Competency Exam, which is offered the week following completion of the spring semester of their first year in the program. These courses are offered every year and must be completed in the first two semesters in the program.

Research Skills (RS2) Requirement

Graduate students must take one elective course in addition to the previously listed courses. This may be from the courses offered by the Department of Pharmaceutical Chemistry or from other science and engineering departments on campus with prior approval from the graduate director. This requirement must be completed prior to undertaking the comprehensive examination at the end of year 2.

Post-core Examination Requirements

PHCH 870 Advanced Pharmaceutical Biotechnology, PHCH 864 Pharmaceutical Analysis and an additional elective course chosen from a wide variety of the scientific disciplines are post-core required courses that must be completed prior to the end of year 3.

Seminar Requirements

All graduate students must attend the weekly departmental seminar. Seminars consist of presentations by guest speakers, faculty members, and students. Typically, graduate students are required to present at least two departmental seminars during their time in the program. The seminar may be based on progress in their research or on a literature review of work related to their research.

Dissertation

Each Ph.D. candidate must submit and defend a dissertation resulting from research of sufficient originality and quality for publication in peer-reviewed scientific journals. The research is conducted under the supervision and guidance of the student’s advisor, with input from the dissertation committee as needed. The department strives for students to complete the Ph.D. degree within 4-5 years time.

Distance Ph.D. Degree Program

The department also offers a distance Ph.D. program. Admittance is offered to a limited number of highly qualified students who excel while completing the Distance M.S. degree program. Interested students should inquire with their M.S. advisor, onsite advisor and the graduate director for details. This program features the same didactic coursework and research requirements as in the onsite Ph.D. program but allows students to complete the degree while working at a remote location. For questions, contact the graduate director, John Stobaugh, 785-864-3996, stobaugh@ku.edu.

Department of Pharmacology and Toxicology

Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology — especially in neurodegeneration, psychiatric disorders, and addiction — and control of energy metabolism and effects of diabetes on the nervous system. The research program is founded on strong Ph.D. and M.S. graduate programs.

Doctoral students are prepared to teach and do research in a university, pharmaceutical, biotechnology, or government laboratory setting. New Ph.D. students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. The department recruits 4 to 5 Ph.D. students each year and offers stipends and tuition coverage.

The major aim of the MS degree program is to provide qualified graduates to institutions in academia, industry, and government. The Master of Science in Pharmacology and Toxicology program emphasizes student’s research skills in molecular and neuro-pharmacology and toxicology. In addition to the didactic component of our training, we view hands-on training in laboratory research critical to the master’s thesis experience.

The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences. The School of Pharmacy is ranked third in the nation for the NIH funding.

Facilities
Research facilities offer a range of modern instrumentation and many research support services. Major instruments include tissue culture rooms, ultracentrifuges, scintillation counters, high-pressure liquid chromatography systems, a patch-clamp electrophysiology system with Nikon fluorescent microscope, microprocessor-controlled spectrophotometers and fluorometers including a dual excitation wavelength instrument for intracellular measurements and a time-resolved luminescence and fluorescence microplate reader with dual dispensing capabilities, a Seahorse Extracellular Flux Analyzer for measuring cell metabolism and major energy-producing pathways of the cell, a dark room with a film processor, and real-time PCR equipment.

University research support facilities also contribute to the high quality of research and training for graduate students. These facilities are fully staffed by professionals and include the Electron Microscopy Lab with transmission and scanning scopes; the Biochemical Research Services Lab for Illumina RNAseq, protein and DNA sequencing, amino acid analysis, and oligonucleotide and peptide syntheses; a High Throughput Laboratory for screening compounds as potential tools and drug development, and the Molecular Graphics and Modeling Lab with VAX computers, extensive databases for structural proteins, and multiple molecular modeling programs an NMR facility; an X-ray Crystallography Laboratory; a Mass Spectrometry Laboratory; and an Instrumentation Design Laboratory. All labs have current computer technology, including hardware and extensive software for imaging, data analysis, data reduction, protein and gene analysis, and statistical tests.

Courses

P&TX 630. Pharmacology I. 4 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in P&TX 630 include, general principles of cell biology, molecular biology, pharmacogenomics, immunology and principles of drug metabolism and disposition. Prerequisite: BIOL 646 or equivalent. LEC.

P&TX 631. Pharmacology II. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: PTX 630 and BIOL 400 or equivalent. LEC.

P&TX 632. Pharmacology III. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: PTX 630 and PTX 631. LEC.

P&TX 633. Pharmacology IV. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in PTX 633 include endocrine disorders, diabetes and obesity, and gastrointestinal pharmacology. Prerequisite: PTX 630, PTX 631 and PTX 632. LEC.

P&TX 640. Toxicology. 2 Hours.
General principles of toxicology, treatment, and management of accidental poisoning, and current topics of interest. Prerequisite: PTX 630, PTX 631, and PTX 632. LEC.

P&TX 642. Obesity, Diabetes, and Metabolic Syndrome: Current Concepts. 1 Hour.
The objective of this course is to provide students with an opportunity to read, examine, and report on a broad array of topics relevant to diabetes and obesity. Students will be given broad latitude to propose topics of interest to them within the area of diabetes and obesity. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them in the field of diabetes and obesity, prepare a 30 min presentation and deliver it to the class for discussion. Prerequisite: PTX 630. LEC.

P&TX 643. Current Concepts of Neurodegenerative Disease. 1 Hour.
Neurodegenerative diseases, such as Alzheimer’s and Parkinson’s diseases, are associated with older age and/or enhanced oxidative stress. The possible causes for the development and progression of these diseases with relation to current research in the field will be discussed. Additionally, a summary of available and suggested future treatments will be given. Prerequisite: PTX 630. LEC.

P&TX 644. Adverse Drug Events. 1 Hour.
The objective of this course is to alerts students to common and preventable adverse drug events. This course will provide students with an opportunity to read, examine, and report on a broad array of topics relevant to adverse drug events. Students will be given broad latitude to propose topics of interest to them within the area of adverse drug events. In addition students can report on common and preventable food-drug, herb-drug, and disease-drug interactions. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them among a list of provided topics, prepare a 30 minute presentation and deliver it to the class for discussion. Prerequisite: 3rd, 4th, or 5th professional year standing in the School of Pharmacy. LEC.

P&TX 645. Neurobiological Basis of Addiction: Physiological, Biochemical, Pharmaceutical & Treatment Concepts. 1 Hour.
Several addictions will be discussed including addictions to alcohol, cocaine, methamphetamine, gambling, and others as time permits. The physiology, biochemistry, pharmacology and available treatments for these addictions will be reviewed. The role of pharmacotherapies will be discussed, particularly as they relate to the molecular basis of addiction. Behavioral and psychological approaches also will be examined. Prerequisite: Completion of PTX 632 or special permission from faculty. LEC.
P&TX 694. Undergraduate Laboratory: Research in Pharmacology and Toxicology. 1-5 Hours.
Original research on a laboratory problem of limited scope. This course cannot count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: Consent of instructor. IND.

P&TX 698. Library Problems in Pharmacology and Toxicology. 1-5 Hours.
Original library review of a limited special topic in pharmacology and toxicology. The student will write a review in his or her report. This course may count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: PTX 635 and consent of instructor. IND.

P&TX 700. Professional Issues in the Biomedical Sciences. 2 Hours.
A course designed to assist doctoral students in the biomedical sciences in their professional development by providing presentations, discussions, and practical experiences related to career planning. Topics include diverse career opportunities and expectations of each, preparation of vitae/resumes and other elements of a successful job search, writing scientific papers and dealing with editors, developing programmatic research programs, balancing professional obligations, advancing through promotions, and related topics. Prerequisite: Graduate standing in pharmacology and toxicology. LEC.

P&TX 730. Advanced Pharmacology I - CNS and ANS. 2 Hours.
A detailed study of the fundamentals of autonomic nervous system, central nervous system, and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program Program. LEC.

P&TX 731. Advanced Pharmacology II - Cardiovascular and Renal System. 2 Hours.
A detailed study of the fundamentals of cardiovascular system, renal system and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 732. Advanced Pharmacology III - Immunology and Inflammatory Diseases. 2 Hours.
A detailed study of the fundamentals of immunology and inflammation and their pharmacology. The student will attend PTX 631 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 733. Advanced Pharmacology IV - Endocrinology. 2 Hours.
A detailed study of the fundamentals of endocrinology and associated pharmacology. The student will attend PTX 633 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 740. Advanced Biotechnology. 3 Hours.
An examination of basic principles of molecular biology, immunology, and protein chemistry as they apply to the identification, production, stability, delivery, and monitoring of new therapeutic agents provided by the expanding biotechnology industry. Students will attend lectures in PTX 633 and meet separately with faculty for additional discussions of more advanced material on these topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology. LEC.

P&TX 741. Biomedical Statistics. 3 Hours.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmaceutical applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: PTX graduate student status in good academic standing. LEC.

P&TX 742. Experimental Pharmacology. 4 Hours.
Experimental approaches to understanding mechanism of drug action. Use of drugs as tools to understand functioning of biological systems will also be stressed. Historically important experiments will be discussed along with experiments which are currently used to define drug mechanisms. Topics will include: dose-response, drug receptors, drug metabolism, chemotherapy as well as autonomic CNS, cardiovascular and renal pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 747. Molecular Toxicology. 4 Hours.
A detailed study of the fundamentals of the experimental methods used in a modern toxicology laboratory. The student will attend PTX 640 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 750. Pharmacology I- Introduction to Pharmacology and Biotechnology. 3 Hours.
An introduction to the field of Pharmacology, with an initial focus on the pharmacokinetics and pharmacodynamics of drug action in the body. The second section covers protein-based therapeutics, and biotechnology including an examination of basic principles of molecular biology, immunology, and protein chemistry as they apply to the identification, production, stability, delivery, and monitoring of new therapeutic agents provided by the expanding biotechnology industry. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 751. Molecular Toxicology. 3 Hours.
A detailed study of the fundamentals of the experimental methods used in a modern toxicology laboratory. The course will also cover the mode of toxicity of a number of classes of drugs and the therapeutic approach to patient treatment. The student is also required to create their own 50 minute didactic lecture on a chosen topic within the field of toxicology in consultation with the course director. The student will then deliver the lecture to the course advisor in a digital format. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. LEC.

An overview of animal care and use, this course is designed for graduate students currently engaged in animal based research or that anticipate work with live animals. Topics covered include regulatory framework for animal research; animal facility operations; biology, husbandry, and care of common laboratory animal species; and experimental manipulation of laboratory animals. Emphasis is placed on practical experience with live animals. LEC.
P&TX 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, MDCM 775, NURO 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent. LEC.

P&TX 799. Pharmacology and Toxicology Seminar. 1-2 Hours.
A review of current literature and research in pharmacology and toxicology. Required of all graduate students in the department every fall and spring semester. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PTX. LEC.

P&TX 800. Pharmacology and Toxicology Teaching Principles. 2 Hours.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in pharmacology and toxicology. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with the faculty whom he or she is assisting. Prerequisite: Graduate standing in pharmacology and toxicology program. RSH.

P&TX 801. Issues in Scientific Integrity. 1-3 Hours.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PHCH 801 and PHCH 802.) LEC.

P&TX 803. Pharmacology Literature Review I. 1 Hour.
This course is designed for graduate students and will fulfill the first written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a six page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 805. Pharmacology Literature Review II. 1 Hour.
This course is designed for graduate students and will fulfill the second written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a twelve page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 825. Research in Pharmacology and Toxicology. 1-10 Hours.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration with a faculty member. Prerequisite: Graduate standing and consent of instructor. RSH.

P&TX 899. Master’s Thesis. 1-11 Hours.
Hours and credit to be arranged. Independent investigation in pharmacology and toxicology. Prerequisite: Consent of instructor. THE.

P&TX 990. Postdoctoral Research. 1-11 Hours.
Advanced level research in collaboration with a faculty member in the department. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Doctoral degree or equivalent in an appropriate related area, and consent of instructor. RSH.

P&TX 999. Doctoral Dissertation. 1-11 Hours.
Hours and credit to be arranged. Original investigation in pharmacology and toxicology. Prerequisite: Consent of instructor. THE.

Master of Science in Pharmacology and Toxicology

Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology — especially in neurodegeneration, mood disorders, and addiction — and control of energy metabolism and effects of diabetes on the nervous system. The research program is founded on a strong graduate program. The major aim of this Master of Science (MS) degree program is to provide qualified graduates to institutions in academia, industry, and government. The Master of Science in Pharmacology and Toxicology program emphasizes student’s research skills in molecular and neuro-pharmacology and toxicology. In addition to the didactic component of our training, we view hands-on training in laboratory research critical to the master’s thesis experience. The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences. The School of Pharmacy is ranked third in the nation for the NIH funding.

Graduate Admission

Admission is based on the student’s undergraduate record in a relevant field. Graduate Record Examination scores, and 3 letters of recommendation. A minimum grade-point average of 3.0 on a 4.0 scale is required. Applications from non-English-speaking countries must include a copy of the Test of English as a Foreign Language score. Acceptance depends on the availability of space and faculty commitment.

Students are expected to have bachelor’s degrees in pharmacy, chemistry, biology, pharmacology, toxicology, or other physical science related disciplines. Submit your graduate application online (http://www.graduate.ku.edu). Send transcripts of all completed college and university course work and all other requested application materials to the department:

Ph.D. Degree Requirements

Course Work

Incoming students should have completed 4 semesters of Chemistry and 4 semesters of Biology, including a course in Cell Biology and one in Biochemistry. Prerequisites can be completed during the first year. The core courses in Pharmacology and Toxicology that all students are required to take are listed below. Prerequisite for all courses is graduate standing in the Pharmacology and Toxicology Program.

Research Advisory Committee members for Ph.D. degree aspirants should be identified by the end of the second year in the program. The committee is composed of at least three members, and the research director serves as chairman. The final Dissertation Defense Committee should consist of the original Advisory Committee (3 members) plus two (2) other members of the Graduate Faculty. At least one member of the final Dissertation Committee must be from outside the Department.

Comprehensive Exam Requirements for Ph.D. Students

The comprehensive examination is composed of 3 parts:

1. Written Comprehensive Examination: Each student must complete two written examinations to complete P&TX 803 and P&TX 805.
2. Preparation of an NIH-style research proposal: After successful completion of the second written comprehensive exam, the student should begin working on their NIH grant proposal. These serve as the basis for the Oral Comprehensive Exam.

3. Oral Comprehensive Examination: After approval of the research proposal by the student’s advisory committee, each student, in consultation with the advisor, takes an oral examination covering the student’s major field.

Dissertation Research
The student, with the advisor’s assistance, develops a dissertation project. After the oral comprehensive examination, the student presents the dissertation research project to the advisory committee and receives periodic advice from this committee throughout the project. Upon acceptance of the dissertation by the advisory committee, the candidate must pass a final oral examination, including a defense of the dissertation before the dissertation committee and any other interested members of the Graduate Faculty.

Department of Pharmacy Practice
Pharmacy Practice Graduate Program
The Department of Pharmacy practice furthers the mission of the School of Pharmacy by striving for excellence in teaching, research, scholarly activity, service, and patient care.

The faculty provide professional educational opportunities for undergraduate, graduate, and postgraduate students and practitioners to enable them to practice pharmaceutical care, adapt to changing professional roles, use new technologies, assume leadership roles in a dynamic health-care environment, and contribute new knowledge to the profession.

Facilities
Facilities of the pharmacy department at the University of Kansas Medical Center (http://www.kumc.edu) in Kansas City are used in the residency portion of the program.

Courses
PHPR 502. Pharmacy Practice II Pharmaceutical Care Fundamentals. 4 Hours.
Drug interactions will be presented with an emphasis on evaluating the risk of the interaction in a particular patient. Patient counseling and communication techniques will be covered. Approximately half the class time will be spent covering non-prescription drugs and herbs.
Prerequisite: PHAR 500. LEC.

PHPR 507. Advanced Community Practice. 1 Hour.
The objective of this course is to prepare pharmacy students to practice as advanced pharmacists in a community setting. The course will cover patient care as well as the business and insurance aspects surrounding community pharmacy practice. We will cover a variety of topics including reimbursement, legal issues, Medication Therapy Management (MTM), communication, ethics, and the future of Community Pharmacy practice.
Prerequisite: 3rd professional year standing in the School of Pharmacy. LEC.

PHPR 508. Oncology Elective. 1 Hour.
This course is designed to extend the students’ understanding of Oncology diseases and treatments beyond what is covered in the Pharmacotherapy series in the School of Pharmacy. Prerequisite: PHPR 646. LEC.

PHPR 509. Medicare Part D. 1 Hour.
This elective course will focus on the understanding and active enrollment of patients into Medicare prescription drug benefit (Part D). Students will mainly focus on the understanding of Medicare eligibility, benefits, formulary requirements, and the administration of benefits. Students will also participate in community outreach which may focus on underserved patients. Prerequisite: 2nd or 3rd professional year standing in the School of Pharmacy. LEC.

PHPR 510. Medical Terminology Elective. 1 Hour.
This course provides the fundamentals for developing a medical vocabulary. The student will develop the ability to understand, define and utilize medical terminology and abbreviations used in patient care. LEC.

PHPR 511. Service-Learning Elective. 1 Hour.
Students will work at a health-related community center and participate in structured learning exercises. The objectives are to: 1) enable students to learn appropriate strategies to communicate and provide services to people with varying languages, cultures, social, and economic backgrounds, disabilities, illnesses, or impairments, 2) increase social interaction and citizenship, 3) heighten social awareness and understanding of ethical issues, and 4) acknowledge social responsibility and realize personal values. FLD.

PHPR 512. Nuclear Pharmacy. 1 Hour.
This course is designed for students interested in learning about nuclear pharmacy practice as a specialty practice in pharmacy. Students will learn about the application of radiopharmaceuticals used in the diagnosis of various diseases or identifying patient therapeutic issues. The course will cover principles of radiation, radiation safety, preparation of and handling of radiopharmaceuticals, their appropriate use, and the training requirements for a nuclear pharmacist. At the conclusion of the course the student will have an insight into this specialty practice in nuclear pharmacy as a potential career. Prerequisite: Students must be admitted to the School of Pharmacy. LEC.

PHPR 513. Chemical Dependency Elective. 1 Hour.
This elective course will enhance the pharmacy student's knowledge and understanding of the current theories behind the addiction process.
frequently abused drugs and/or chemicals and the treatment and recovery process. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

**PHPR 514. Communication and Counseling. 1 Hour.**
An elective course designed to help students improve professional communication skills. Prerequisite: PHAR 500. LEC.

**PHPR 515. The Aging Patient. 1 Hour.**
This elective course is designed for the learner to explore many of the clinical considerations employed when caring for the aging patient within our health care system. The course will be devoted to exploring generational perceptions, learning how the aging process can impact patient care, and identifying the role of the pharmacist in enhancing this care. Prerequisite: 4th or 5th professional year (P2 or P3) standing in the School of Pharmacy. LEC.

**PHPR 516. Pharmacy in Public Health. 1 Hour.**
Public health is more than providing treatment for an illness; it is a concern for the health of an entire population. The ideal is to ensure the health of all. This course will focus on providing students with a solid foundational understanding of what public health is and how pharmacists play a role as a public health provider. The course will cover the concepts and tools used in public health including issues such as: determining health, cultural competence, health promotion, disease prevention, epidemiology and disease, describing populations and community health. Lastly, the course will provide students with specific pharmacist models of public health. Successful models include tobacco cessation programs, community vaccination programs, obesity prevention, tuberculosis monitoring, emergency preparedness and domestic violence. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

**PHPR 517. Medication Safety and Error Prevention. 1 Hour.**
This course introduces the student to medication safety and the technology as well as the tools used in error prevention. The student will also learn about adverse drug events including both medication errors and adverse drug reactions in hospital and retail pharmacy settings. Prerequisite: 4th or 5th professional year (P2 or P3) standing in the School of Pharmacy. LEC.

**PHPR 518. Cultural Competency in Pharmacy Practice. 1 Hour.**
The United States becomes more culturally diverse every year. This course is designed to help student pharmacists excel in today's multicultural environment by improving their cultural competency skills. Students will explore their own culture and those belonging to other diverse cultures. Students are expected to learn of the beliefs, needs and tendencies of those with cultures much different than themselves. Prerequisite: Must be admitted to the School of Pharmacy. LEC.

**PHPR 519. Business Planning for Pharmacy. 1 Hour.**
This course is designed for students interested in developing a business plan. Most pharmacists will have an opportunity to develop a new service, product line or even start a new business venture in their careers. Students need to know how to create a formal business plan and how to present the plan to decision makers. The course will cover the basic components and rationale of creating a formal a business plan. When finished students will be expected to have created a written business plan and will present their creation to the class. In this manner, students will gain experience in developing an idea into a plan. Prerequisite: Students must be admitted to the school of Pharmacy. LEC.

**PHPR 599. Clinical Application of Basic Science. 1 Hour.**
This course is an inter-departmental, team-based, technology-centric elective course. Concomitantly, instructors from the basic and clinical science departments within the school of pharmacy will promote deeper student understanding of the path a drug takes from discovery, development and ultimately clinical use. Instructors will collaborate in course content development to integrate basic and clinical science concepts. The course will utilize a blended learning method, incorporating out of class podcasts, online group collaborative projects, and readiness quizzes and exams. Prerequisite: 4th or 5th professional year standing (P2/P3) in the school of pharmacy and concomitant enrollment in either PTX 599, MDCM 599, or PHCH 599 is required. LEC.

**PHPR 601. Advanced Pharmacy Practice Experience 1. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

**PHPR 602. Advanced Pharmacy Practice Experience 2. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

**PHPR 603. Advanced Pharmacy Practice Experience 3. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

**PHPR 604. Advanced Pharmacy Practice Experience 4. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both
clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

**PHPR 605. Advanced Pharmacy Practice Experience 5. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

**PHPR 606. Advanced Pharmacy Practice Experience 6. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

**PHPR 607. Advanced Pharmacy Practice Experience 7. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

**PHPR 608. Advanced Pharmacy Practice Experience 8. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

**PHPR 609. Advanced Pharmacy Practice Experience 9. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. FLD.

**PHPR 610. Advanced Pharmacy Practice Experience 10. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in nine pharmacy practice experience rotations (PHPR 601-609). PHPR 610 is reserved for students requiring a remedial experiential rotation. FLD.

**PHPR 611. Pharmacoeconomics and Health Outcomes. 2 Hours.**
A course to foster an understanding of economic, financial and outcome principles that drive the demand and supply of medical care in the US. Economic logic behind decisions made by patients, physicians, hospitals, managed care organizations, and governments will be covered. Students completing this course should be able to identify the drivers of the health economy, identify different types of pharmacoeconomic evaluations, critically analyze pharmacoeconomic and outcome literature, and apply economic principles to pharmaceutical care. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this class. LEC.

**PHPR 612. Pharmacy Management. 3 Hours.**
A course designed to provide knowledge and skills to effect efficient and effective pharmacy management. This will include foundations in financial management, inventory control, purchasing, cost-effective drug utilization, quality management, pharmacoeconomics, and human resource management. LEC.

**PHPR 613. Nuclear Pharmacy Practice. 2 Hours.**
This introductory course in nuclear pharmacy practice provides a basic understanding of radiation, radiation dosimetry, radiopharmaceuticals, and clinical application of radiopharmaceuticals in diagnosis and treatment. The course includes both didactic material as well as laboratory experience. LEC.

**PHPR 614. Health Care Systems. 3 Hours.**
This course is an introduction to the organization, financing, and delivery of health care services with a focus on the U.S. health care system. Course content addresses the following questions: how do we evaluate the health care sector, where is health care provided, how is health care financed, what are the characteristics of health care providers (individuals and institutions), what influences the performance of the health care sector, and what lies in the future for health care delivery. The purpose of the course is to prepare pharmacy students for non-clinical aspects of their practice sites. Enrollment limited to pharmacy majors. LEC.

**PHPR 620. Ethical, Legal, and Cultural Issues in Patient Care. 2 Hours.**
This course provides an introduction to the fundamentals of law and ethics as they apply to the practice of pharmacy. Course sessions will focus on ethical expectations of the profession, principles and issues in medical and pharmacy ethics, and laws that govern medication dispensing. LEC.
PHPR 621. Pharmacy Law. 2 Hours.
A course developed to increase students' knowledge and understanding of laws that regulate the pharmacy profession. Prerequisite: Fifth year standing (P3 student). LEC.

PHPR 630. Drug Information/Biostatistics and Med Lit Evaluation. 3 Hours.
An introduction to the principles of drug information analysis, storage, and retrieval as well as biostatistics as applied to understanding and interpreting biomedical literature. Advantages and disadvantages of several commercial and manual drug information systems will be considered. The course includes practical experiences in drug information services. The biostatistical emphasis of the course will be on the application of statistical tests commonly used and the interpretation of their results. Prerequisite: Fifth year standing (P3 student). LEC.

PHPR 635. Problems in Pharmacy Practice. 1-5 Hours.
A course designed for the study of special topics in pharmacy practice. A research paper will be required. Prerequisite: Consent of instructor. IND.

PHPR 646. Pharmacotherapy I. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Incorporates three credit hours of lecture and one credit hour of case studies and off-campus professional experience. Prerequisite: Successful completion of Pharmacy Practice II (PHAR 502). LEC.

PHPR 647. Pharmacotherapy II. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Incorporates three credit hours of lecture and one credit hour of case studies and off-campus professional experience. This course is graded A,B,C,F. Prerequisite: Fifth year standing and successful completion of Pharmacotherapy I, PHPR 646. LEC.

PHPR 648. Pharmacotherapy III. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Incorporates three credit hours of lecture and one credit hour of case studies and off-campus professional experience. This course is graded A,B,C,F. Prerequisite: Fifth year standing and successful completion of Pharmacotherapy II, PHPR 647 with a C or above. LEC.

PHPR 661. Pharmacotherapy I. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Drug interactions and patient counseling techniques will be covered. Over-the-counter medications and herbs will also be a significant portion of the course. Prerequisite: First year professional standing in the School of Pharmacy. LEC.

PHPR 662. Pharmacotherapy II. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Second year professional standing in the School of Pharmacy and successful completion of Pharmacotherapy I, PHPR 661. LEC.

PHPR 670. Clinical Assessment. 2 Hours.
This laboratory course will allow students to develop clinical assessment skills necessary in the provision of pharmaceutical care to patients with a variety of disease states. Students will combine physical assessment skills, patient counseling skills, and pharmacotherapy knowledge and apply this information to patient care related activities in various clinical settings. Students will apply their skills using various practice models that include medication therapy management, collaborative drug therapy management, and interprofessional healthcare teams. The lab component will require students to meet for one hour between 1:00 to 5:00 PM on either Monday, Tuesday, or Wednesdays. A detailed schedule of lab meeting dates and times will be provided in the syllabus. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. Students must pass PHPR 647 Pharmacotherapy II to be eligible to complete PHPR 670. LAB.

PHPR 845. Professional Communications. 2 Hours.
A course designed to give the graduate student a practical experience in areas of professional communications such as administrative proposals, grants, letters, memos, poster presentations, and written papers. The course focuses on the different kinds of communications required to relate to other health care professionals. Prerequisite: Consent of instructor. LEC.

PHPR 850. Introduction to Pharmacoepidemiology. 3 Hours.
Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects on health. Evaluating a drug's effects commences when a chemical entity becomes a drug candidate, intensifies through clinical trials, and continues after products reach the market. These studies are critical for supporting the proper use of medications in terms of efficacy, effectiveness, and cost-effectiveness. This course provides a broad introduction to the principles of pharmacoepidemiology with a focus on applications in the medical literature. LEC.

PHPR 855. Economic Evaluation of Health Care Programs and Services. 3 Hours.
The course will provide students with an overview and appraisal of the "state-of-the-art" in the evaluation of health care programs and services (with a special emphasis on pharmaceutical programs, services, and products). The purpose of the course is to provide the student with the tools to conduct economic rather than general evaluation of health care programs and services. There will be some discussion of theoretical concepts, but the major emphasis will be on practical methodological issues in economic evaluation of pharmaceutical programs. The course integrates the perspectives of pharmaceutical and health care technology assessment, managed care, outcomes research, and public health. The main topics covered in the course include: cost, cost-minimization, cost-effectiveness, cost-utility, and cost-benefit analyses. LEC.

PHPR 860. Seminar in Pharmacy Practice. 1 Hour.
Research reports, reviews, and/or presentations on the current status of various aspects of pharmacy practice. Prerequisite: Consent of instructor. LEC.

PHPR 865. Advanced Institutional Pharmacy Services. 3 Hours.
A course dealing with the planning, justification, implementation, management, and coordination of a progressive, comprehensive institutional pharmacy service. Seminar presentations and case studies are used to analyze recent advances and to apply data from the research literature. Prerequisite: Consent of instructor. LEC.

PHPR 875. Health Care Delivery Systems. 3 Hours.
A continuation of PHPR 865 dealing with the current status of health care delivery systems and the impact of changes in this area on pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 885. Human Resource Management in Institutional Pharmacy Practice. 3 Hours.
A course dealing with recruitment, training, motivation, monitoring of performance, and disciplining of personnel. Seminars, case studies, and role playing are used to apply the information to specific human resource
management situations in institutional pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

**PHPR 899. Research in Pharmacy Practice. 1-6 Hours.**
Original investigation in the area of pharmacy practice. Prerequisite: Consent of instructor. RSH.

### Master of Science in Pharmacy Practice

**Pharmacy Practice Graduate Program**

The Department of Pharmacy practice furthers the mission of the School of Pharmacy by striving for excellence in teaching, research, scholarly activity, service, and patient care.

The faculty provide professional educational opportunities for undergraduate, graduate, and postgraduate students and practitioners to enable them to practice pharmaceutical care, adapt to changing professional roles, use new technologies, assume leadership roles in a dynamic health-care environment, and contribute new knowledge to the profession.

**Graduate Admission**

In addition to meeting the general requirements for admission to graduate studies, applicants are considered for admission if they are graduates of a school of pharmacy accredited by the Accreditation Council for Pharmaceutical Education (ACPE) (https://www.acpe-accredit.org) and are eligible for licensure as registered pharmacists by the Kansas State Board of Pharmacy (http://pharmacy.ks.gov). A Bachelor of Science degree or a Doctor of Pharmacy (Pharm.D.) degree with a major in pharmacy is required.

Submit your graduate application online (http://www.graduate.ku.edu).
Send transcripts of all completed college and university course work and all other requested application materials to the department:

*The University of Kansas*
Department of Pharmacy Practice
2010 Becker Drive, Room 2001
Lawrence, KS 66047-1620

**M.S. Degree Requirements**

A minimum of 30 credit hours, with a majority of hours in pharmacy, is required for the degree. These courses may be selected from related fields after approval by the department. Examples are health-system pharmacy, clinical pharmacy, nuclear pharmacy, computer science, business administration, health policy and management, and related fields. An approved project, representing 6 to 9 credit hours of original research, is required. It may be in pharmaceutical sciences, clinical pharmacy, pharmacy practice, pharmacotherapy, or health-system pharmacy.

An accredited PGY1/PGY2 residency in Health-Systems Pharmacy Administration in an approved hospital is required of each student. Requirements for the residency program include eligibility for licensure as a pharmacist in Kansas. The student must complete the residency concurrently with the academic portion of the program. Upon satisfactory completion of the residency, the student receives a certificate of residency from the cooperating hospital. The length of the program is 2 years. For students who have previously completed a residency accredited by the American Society of Health-System Pharmacists (http://www.ashp.org), this part of the program may be waived on approval of the department.
Social Welfare

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu) for details). Other years’ catalogs (http://catalog.ku.edu/archives)

Bachelor of Social Work (p. 2270)
Master of Social Work (p. 2274)
Doctor of Philosophy in Social Work (p. 2278)

The School of Social Welfare

The University of Kansas School of Social Welfare offers the only comprehensive program in social work in Kansas: the professional degrees of

- Doctor of Philosophy in Social Work (p. 2278),
- Master of Social Work (p. 2274), and
- Bachelor of Social Work (p. 2270).

KU’s School of Social Welfare is an excellent place to pursue your interests in professional social work education. It is the oldest school of social welfare in the state and the only one to offer degree preparation from undergraduate through doctoral degrees in social work.

Social work education began at KU in 1937. The Master of Social Work program, established in Lawrence and at the KU Medical Center in Kansas City in 1946, has been continuously accredited since 1948. The Bachelor of Social Work degree has been awarded since 1971. In 1974, the B.S.W. program became one of the first in the nation to receive accredited status. The Council on Social Work Education (http://www.cswe.org), the accrediting body for social work education, most recently reaccredited the B.S.W. and M.S.W. programs in 2010. The doctoral program admitted its first students in 1981.

KU’s Master of Social Work program consistently ranks among the top U.S. national public universities, according to U.S. News & World Report’s “America’s Best Graduate Schools”. The School of Social Welfare is recognized internationally as an innovator in social work theory development and in research that makes positive contributions to our communities.

The school is housed on KU’s Lawrence campus in Twente Hall, named for nationally renowned social work educator Esther Twente, who chaired the social work department from 1946 to 1957. The school also offers the M.S.W. program at the KU Edwards Campus in Overland Park, a suburb of Kansas City, and in western Kansas in collaboration with Fort Hays State University and Garden City Community College. The B.S.W. Edwards 2+2 program is offered at Kansas City Kansas Community College.

Mission and Themes

Mission

The threefold mission of the University of Kansas School of Social Welfare is to educate students at the B.S.W., M.S.W., and Ph.D. levels, to conduct scholarly inquiry that contributes to the knowledge base of the profession, and to provide leadership in formulating social policy and developing service delivery strategies and systems.

In the B.S.W. and M.S.W. programs, students learn generalist and advanced-level social work practice methods and skills that advance the empowerment and well-being of individuals, families, and communities. At the Ph.D. level, students are equipped with the necessary skills for critical inquiry and scholarship to become leaders in the social work profession in academic, research, and public policy realms.

Guiding Principles and Themes

The KU School of Social Welfare is committed to practicing educational approaches and conducting scholarship that directly and explicitly enhance the connection of theory and concepts to the needs of clients and the demands of everyday practice. This commitment flows from the values and ethical principles of the profession and is enriched by our commitment to these 4 themes:

- A focus on people’s strengths
- An understanding of human diversity
- The promotion of social and economic justice
- The development of a critical perspective

Strengths

A perspective that recognizes, mobilizes, and supports the inherent strengths of individuals, families, neighborhoods, organizations, and communities to discover and develop their own and communal resources and assets in their struggle for a better quality of life.

Diversity

Understanding, valuing, and engaging the broad range of differences and commonalities that are brought to the interaction among social workers, clients, and the social environment and that reflect clients' culture, ethnicity, race, geography, gender, social class, religion, sexual orientation, and physical and mental abilities — particularly when those differences are the cause for discrimination.

Social and Economic Justice

A commitment to promoting fairness, equality of power, and equity of resources based on a complex understanding of the effects of economic, political, and social structures on people’s life chances, particularly related to economic inequality and the allocation of necessary social resources.

Critical Perspective

The capacity to engage in a deliberate and continuing examination of the assumptions underlying the theories, methods, and approaches used by social work in understanding and responding to human needs.

The Programs

At the University of Kansas, students have the opportunity to prepare for professional careers in social work at the bachelor’s, master’s, and doctoral levels. The curriculum is carefully laid out to bring students from the introductory level through advanced study in clinical social work practice or social work administrative and advocacy practice. Under the umbrella of a practice orientation, the programs are structured to support the essential themes of the school, which focus on people’s strengths, celebrate human diversity, promote social and economic justice, and provide a critical perspective.

Classroom work is one half of professional preparation; field placements are the other half. Placements in social service agencies offer students the opportunity to apply skills learned in the classroom. B.S.W. and M.S.W. students spend time in practicum settings throughout the region.
Our students provide more than 250,000 hours of service to underserved populations through practicum experiences.

Learn more about the School of Social Welfare programs (http://socwel.ku.edu/degrees).

**Professional and Community Education**

To help our graduates and other professionals maintain proficiency in practice skills and to expand their capacities, the school offers a wide range of courses and workshops through the Professional and Community Education Program (http://socwel.ku.edu/alumni/pce/intro).

These offerings are designed specifically for the practicing professional. Courses are developed in conjunction with the local human services community. They range from management skills to sophisticated clinical strategies. Evening and weekend classes are offered with a variety of credit and noncredit options. For information on the program and its offerings, please contact the program director at 913-897-8550.

**Student Profile**

The School of Social Welfare currently has more than 500 students, approximately 150 in the B.S.W. program, 350 in the master’s program, and 40 in the Ph.D. program. More than 350 students are enrolled in field practicum settings that reflect the range of practice of professional social work. Many students enter social work as a second career after an extended period away from school.

**Student Handbook**

During orientation, students who are admitted to degree-seeking status are directed to the student handbook (http://socwel.ku.edu/resources/ forstudents/academic-handbooks), which contains full descriptions of policies and other details.

**The Profession**

Through the long history of the profession, social workers have understood the desperation of the homeless, the despair of the poor, the ostracism suffered by the mentally ill, the pain of those who are abused and neglected, and the humiliation endured by victims of discrimination. By carrying out this special commitment to helping vulnerable groups and individuals, social workers believe that society as a whole is strengthened. At the same time, social workers celebrate differences among people and believe that respecting those differences — whether of race, culture, religion, gender, sexual orientation, or age — enriches the quality of life for all.

**Purpose and Objectives of Social Work**

Social work is a vital, evolving profession that changes with the world in which we live. The purpose of social work is to promote or restore a mutually beneficial interaction between individuals and society in order to improve the quality of life for everyone. Social workers support the following values:

- The environment (social, physical, organizational) should provide the opportunity and resources for the maximum realization of the potential and aspirations of all individuals, and should provide for their common human needs and for the alleviation of distress and suffering.
- Individuals should contribute as effectively as they can to their own well-being and to the social welfare of others in their immediate environment, as well as to the collective society.
- Transactions between individuals and others in their environment should enhance the dignity, individuality, and self-determination of everyone. People should be treated humanely and fairly.

Social workers focus on person-and-environment interaction. To carry out their purpose, they work with people to achieve the following objectives:

- Help people increase their competence and problem-solving abilities.
- Help people obtain resources.
- Make organizations responsive to people.
- Facilitate interaction between individuals and others in their environment.
- Influence interactions between organizations and institutions.
- Influence social and environmental policy.

Social workers are educated to provide services to individuals, families, groups, and communities; to develop, administer, and evaluate programs and organizations; and to participate in policy formulation and planning at the local, state, and national levels.

**NASW Code of Ethics**

As a guide to professional conduct, the Code of Ethics of the National Association of Social Workers (http://www.socialworkers.org) represents the fundamental values of the profession. The National Association of Social Workers is the largest organization of professional social workers in the world, with a membership of 166,000.

The Code of Ethics identifies 6 values that inform the following principles:

- Social workers’ primary goal is to help people in need and to address social problems.
- Social workers challenge social injustice.
- Social workers respect the inherent dignity and worth of the person.
- Social workers recognize the central importance of human relations.
- Social workers behave in a trustworthy manner.
- Social workers practice within their areas of competence and develop and enhance their professional expertise.

View the entire Code of Ethics (http://www.socialworkers.org) or request a copy.

**Resources**

**Area Research Offices**

The school supports research and policy development in a number of key areas, providing leadership and resources at the local, state, and national levels:

- Center on Assets, Education, and Inclusion (http://aedi.ku.edu)
- C (http://socwel.ku.edu/research-social-work-practice-social-policy)enter for Children & Families (http://childrenandfamilies.ku.edu)
- C (http://socwel.ku.edu/research-social-work-practice-social-policy)enter for Mental Health Research and Innovation (http://mentalhealth.socwel.ku.edu)
- C (http://socwel.ku.edu/research-social-work-practice-social-policy)enter for Research on Aging and Disability Options (http://crado.ku.edu)
- Spirituality Diversity and Social Work Initiative (http://spiritualdiversity.ku.edu)
Faculty
The faculty’s scholarly interests, as reflected in teaching, research, and publications, span a wide range, including health, mental health, child welfare, adult and juvenile justice, gerontology, multiculturalism, women’s issues, history of social work, public policy analysis, homelessness, gender equity, poverty reduction and asset building, and social administration.

School of Social Welfare faculty members hold doctoral degrees in social work, social welfare, psychology, and other fields. In addition, outstanding social work practitioners serve as part-time classroom instructors, and 280 social work practitioners serve as practicum instructors.

Faculty members serve the public interest and the profession of social work as consultants and board members in professional and citizens’ organizations.

Undergraduate Programs
The undergraduate program (http://socwel.ku.edu/academics/degrees/bsw/bsw/overview) prepares graduates for generalist social work practice. The program defines generalist practice as maintaining focus on the interface between systems — individuals, families, groups, organizations, and communities.

The B.S.W. Edwards 2+2 program also is offered at Kansas City Kansas Community College. If you are interested, contact the student services coordinator at 913-288-7304 to make an appointment.

University Honors Program
The school encourages qualified undergraduates to participate in the University Honors Program (http://www.honors.ku.edu).

Graduate Programs
The Master of Social Work program (http://socwel.ku.edu/academics/degrees/msw/regular/overview), established in Lawrence and at the KU Medical Center in Kansas City in 1946, has been continuously accredited since 1948. KU’s M.S.W. program ranked 15th among U.S. national public universities, according to U.S. News & World Report’s “America’s Best Graduate Schools” rankings for 2015.

The doctoral program (http://socwel.ku.edu/academics/degrees/phd/overview) admitted its first students in 1981. It prepares students to be leaders of the profession through advanced research, scholarship, and teaching.

Financial Aid
To be eligible for financial aid, applicants should complete the Free Application for Federal Student Aid (FAFSA) by February 15 (March 1 is the priority deadline), even before receiving information about acceptance. FAFSA materials can be obtained from all college or university financial aid offices or submitted online (http://www.fafsa.ed.gov). The School of Social Welfare uses the FAFSA need determination level in making awards. For more information regarding financial aid visit the KU Office of Financial Aid & Scholarship (http://affordability.ku.edu). (http://affordability.ku.edu)

For Ph.D. students (http://socwel.ku.edu/academics/degrees/phd/financialsupport), financial assistance, including tuition and significant salary, is available from the school through teaching and research assistantships in research and training areas such as adult and children’s mental health, aging, child welfare, corrections, social policy, spiritual diversity, or other areas of faculty grants and interests.

Scholarships and Awards
The School of Social Welfare has several sources of financial assistance available to students who meet the various criteria. Awards are made on an annual basis and are applied directly towards tuition and fees in most instances. All students interested in applying are required to submit a Free Application for Federal Student Aid by March 1. All recipients are expected to maintain a minimum grade point average of 3.0. Students must renew their applications each year they wish to be considered.

Undergraduate University Regulations
For information about university regulations, see Regulations (p. 13) or visit the University of Kansas Policy Library (http://www.policy.ku.edu).

For information about school regulations refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks).

Change of School
Students are admitted for fall semester only. The priority application deadline is February 1. No applications will be considered after June 15. Additional information is available from the B.S.W. program office.

Graduation with Distinction
The top 10 percent of the graduates of the B.S.W. program each year receive degrees with distinction.

Honor Roll (Dean’s List)
Students who have been accepted into the B.S.W. program, enrolled in a minimum of 9 credit hours during the semester, and earned a semester grade-point average in the top 20 percent of their class (junior or senior) qualify for the KU School of Social Welfare B.S.W. Dean’s List.

Guidelines for Conduct
Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks) for specific information.

Required Work in Residence
No baccalaureate degree is granted to an undergraduate who has not completed at least 30 semester credit hours of residence courses at KU. No exceptions are granted.

To earn a bachelor’s degree from KU, you must complete the last 30 hours of credit for the degree by resident study. You may petition the B.S.W. program director for a waiver. Up to 6 hours of work taken at another institution may be accepted as part of the last 30 hours, if the hours are not in required social work courses.

Student Advancement Policy
Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks) for specific information.

Advising
Once a student is admitted to the School of Social Welfare, a member of the School’s faculty is assigned as a professional/career advisor. In addition, an academic advisor will be able to assist students in the
enrollment process, filling out enrollment forms and other academic program requirements. Students consult with their academic advisor before enrollment each semester and have their advising hold removed by the B.S.W. program office. Current students can view their advisors on the Kyou portal (https://my.ku.edu/uPortal/f/u562101s4/norma.render.uP). (https://my.ku.edu/uPortal/f/u562101s4/norma.render.uP)

Transfer of Credit

CredTran is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Transfer of credit allows specific course work from other accredited colleges or universities to count toward the B.S.W. degree. Decisions to accept prior credits are made by KU’s transcript evaluator during the admission process. Exceptions must be petitioned through the B.S.W. director. Petitions must be accompanied by a catalog description and a syllabus of the course and submitted at the time of application. Community college equivalents to KU courses are available from the school or through community college counselors. A maximum of 64 credit hours from a community college may be transferred toward the B.S.W. degree.

Prior Work Experience

In accordance with national curriculum policy, prior employment and life experience may not be credited toward classroom course work or practicum requirements.

Leave of Absence and Withdrawal

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks) for specific information

Graduate University Regulations

For information about university regulations, see Regulations (p. 13) or visit the University of Kansas Policy Library (http://www.policy.ku.edu).

For information about school regulations refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks).

Guidelines for Conduct

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks) for specific information

Student Advancement Policy

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks) for specific information

Advising

Each student is assigned a faculty advisor who assists with career and academic decision making. Scheduling/enrollment advisors are available at the time of enrollment.

Leave of Absence and Withdrawal

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks) for specific information

Employment Opportunities

Some employment opportunities for social workers include

• Child protection, foster care, and adoption services.
• Services in community centers, juvenile courts, and residential treatment centers.
• Women’s counseling and shelter facilities.
• Family services, substance abuse, illness, and unemployment services.
• Community services for the mentally ill.
• Services for the elderly in home care, nursing homes, and senior centers.
• Services for offenders and their families in community corrections programs.

Courses

SW 177. First Year Seminar: ___. 3 Hours GE11.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in social work. Course is designed to meet the critical thinking learning outcome of the KU Core. Prerequisite: First-time freshman status. LEC.

SW 210. Contemporary Social Topics: ___. 1-3 Hours.
This course provides the opportunity for experimentation with innovative course content and unique learning strategies in accordance with guidelines established by faculty. Subjects offered as topics include Training for Diversity, Organizing in Underserved Communities, etc. LEC.

SW 220. Social Work, Social Welfare and U.S. Society. 3 Hours SF GE3S / S.
An introduction to the field of social welfare and its relationship to the social work profession, charged with carrying out its primary missions. Specific social welfare policies will be analyzed, particularly as those policies affect individuals and families in need. LEC.

SW 303. Human Sexuality in Everyday Life. 3 Hours GE3S.
An introductory course which focuses on assisting students to understand their own and others’ sexual development and expression, as found in attitudes, beliefs, and behaviors. Physiological, psychological, and social/cultural aspects of human sexuality will be reviewed. The format of the course will include: lectures, discussion, value clarification exercises, and the use of explicit audio-visual materials. LEC.

SW 310. Managing Stress: Principles and Techniques for Coping, Prevention, and Wellness. 3 Hours.
Covers major stress-management techniques, helping others cope with stress, and promoting wellness. Concepts, theories, and models of stress, psychological basis for stress, relationship between personality and stress, family and social stress, job stress, dissatisfaction, and burnout are discussed. LEC.

SW 410. Professional Writing Skills in Social Work. 3 Hours.
Students learn the principles of organizing, developing, writing and revising documentation for different professional social work settings. Students will master basic writing skills and become proficient in several types of social work writing styles. LEC.

SW 420. Social Work in Urban Settings. 3 Hours.
Students gain knowledge about the historical and current relationships between the definition of social problems, the development of social welfare policies, and the delivery of social services in urban settings. Students will learn to access current policies and practices as they impact local communities in the Kansas City area. LEC.
SW 455. Topics in Social Welfare: _____. 1-3 Hours.
This course covers a variety of topics on a rotating basis and provides the opportunity for experimentation with innovated course content in accordance with guidelines established by faculty. These topics may include, but are not limited to, globalization and poverty, special topics in child welfare, mental health, juvenile justice, etc. LEC.

SW 490. Directed Readings. 1-3 Hours.
Individual and supervised readings in selected areas of social welfare. Prerequisite: Consent of instructor and approval by dean's office. IND.

SW 510. Fundamentals of Social Work Practice. 3 Hours.
Introduces the basic concepts of social work practice including the focus and context of practice, the nature of a social work relationship; basic skills and techniques common to practice such as interviewing, engagement, information gathering, etc. Introduction to problem solving and social work roles. Prerequisite: SW 530, SW 540, and SW 555. LEC.

SW 530. Human Behavior in the Social Environment. 3 Hours AE61.
A study of theoretical frameworks for understanding human behavior. The theories include the developmental stages across the life cycle, abnormal behavior compared to normal, analysis of family and societal processes and their effects on the individual, and individual behavior in relation to social class, ethnicity, and cultural background. Junior social work classification required. LEC.

SW 532. Community and Organizational Dynamics and Human Behavior. 3 Hours AE61.
An analysis of community and organizational life with emphasis on human behavior dynamics. Systems operation and change are considered and related to social functioning, especially as it impinges on social welfare objectives. Junior social work classification required. LEC.

SW 540. Fundamentals of Social Work Research. 3 Hours AE61.
An examination of the basic concepts and principles of scientific inquiry as applied to the social work profession's quest for and utilization of knowledge. Positivistic and naturalistic methods of inquiry are covered. Other content includes conceptualization, operationalization, sample design, ethics, and culturally sensitive research practice. Junior social work classification required. LEC.

SW 541. Social Work Research Seminar. 3 Hours AE61.
Focus is on applying material learned in SW 540 to the critique of empirical work in the social work arena and to the development of a proposal for a practice-based research project. Emphasis on assessing relevance of research to special populations. Content on the interpretation of graphs, tables, and statistical measures provided. Prerequisite: SW 540. LEC.

This course will provide the conceptual, theoretical and empirical knowledge base related to difference, oppression, social justice and empowerment. This knowledge is necessary for culturally competent social work practice in a multicultural society. Junior social work classification required. LEC.

SW 556. Diversity, Oppression and Social Justice. 3 Hours AE41.
This course offers non-social work majors the opportunity to explore conceptual, theoretical, and empirical knowledge related to differences based upon race, class, gender, and sexual orientation. The course explores the interplay of social and cultural identities, societal power relations, and other societal forces as they impact human functioning. Assignments and lectures in this course are geared toward helping students develop an informed world view of human diversity and its impact on our own lives and the lives of others. LEC.

SW 560. Study Abroad. 3 Hours.
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, Ireland, Italy, and South Korea. Junior Social Work classification required. LEC.

SW 601. Field Practicum. 6 Hours AE61.
Students are assigned to social service agencies that provide generalist practice opportunities under the supervision of a qualified field instructor. This provides students with the opportunity to apply and test social work knowledge, values, and skills within an approved practice setting in order to gain competency as beginning social workers. This course is taken for two semesters (fall-spring), with credit being given only after completion of the second semester. Enrollment in this course must be concurrent with enrollment in SW 610 and SW 612. FLD.

SW 610. Social Work Practice Seminar I. 3 Hours.
Focuses on learning and implementing the problem-solving and interaction models of practice to be applied to individuals, families, and small groups. Concurrent with SW 601, practicum; students bring issues with clients to class for discussion. Open only to BSW seniors. Prerequisite: SW 510. LEC.

SW 612. Social Work Practice Seminar II. 3 Hours.
Second of two-course sequence extends the work begun in SW 610. Examines interventive strategies applicable to practice with larger systems. Models of community organization and community development are presented. Concurrent with SW 601, practicum; students work on individualized, agency-related projects. Prerequisite: SW 610. LEC.

SW 620. Social Policies and Program Analysis. 3 Hours.
Conceptual models for the analysis of social welfare problems and policies are developed. The frameworks are applied to the problem of poverty and major policies and programs developed to cope with that problem. In addition the model is used to examine social welfare problems/needs being addressed in the students' practicum agencies. The focus throughout is on the understanding and application of analytic framework. Open only to BSW seniors. LEC.

SW 621. Social Policy Analysis and Advocacy. 3 Hours.
The course builds on SW 620 using the conceptual models to examine a range of social welfare problems/needs, policies and programs. Emphasis is on advancing student's understanding and skills for using the analytic framework and building policy advocacy skills. Attention given to the role of social workers in the legislative process for shaping social welfare policies. Prerequisite: SW 620. LEC.

SW 623. Seminar in Professional Issues. 3 Hours AE51.
Seminar in the philosophy, values, and issues in contemporary social work and social welfare. Seminar will address areas such as conception of professional and professionalism, ethics and values, standards, licensing, and professional regulation, accountability and professional responsibility. Senior social work classification is required. LEC.

SW 630. Topics in Social Work Practice: Antisocial, Aggressive Behavior in Childhood and Early Adolescence. 1.5 Hour.
This course explores the theories and methods related to practice with children whose behavior is disruptive, oppositional, aggressive, or otherwise antisocial. Emphasis is placed on using protective and risk factors to design appropriate interventions. Open only to BSW seniors. LEC.

SW 631. Topics in Social Work Practice: Intimate Partner Violence. 1.5 Hour.
This course provides students with a beginning understanding of intimate partner violence including definitions, prevalence, theoretical frameworks, dynamics, and consequences for the individual, the family, the community
and society. Students will develop skills required to assess, intervene, and prevent domestic violence cases. Open only to BSW seniors. LEC.

SW 632. Topics in Social Work Practice: Substance Abuse and Social Work Practice. 1.5 Hour.
This course will offer BSW students a very basic understanding of concepts associated with social work practice with people who confront challenges with alcohol and other drugs. Students will learn about substance abuse problems currently prevalent, recognize behavior related to substance abuse disorders and applicability of generalist social work practice models in developing interventions. Open only to BSW seniors. LEC.

SW 633. Topics in Social Work Practice: Crisis Intervention. 1.5 Hour.
This course will provide undergraduate social work students with a basic introduction to crisis intervention, including theoretical models, the evolution and use of crisis theory and the design of interventions across a broad range of crisis situations. Open only to BSW seniors. LEC.

SW 690. Professional Education Topics in Social Welfare: _____. 0.5-3 Hours.
Current topics supplementing general social work knowledge of professionals in the field. Subjects offered as topics include: Addictions and Professional Enabling, Dynamics of Change, Computer Skills for Social Services Budgeting, Short Term Social Work Interaction. LEC.

SW 701. Basic Field Practicum. 4 Hours.
Students are assigned to social service agencies that provide generalist practice opportunities that prepare students for entry into the advanced level of either clinical social work practice or social work administration and advocacy practice. All students work under the supervision of a qualified field instructor where they have the opportunity to apply and test social work knowledge, values, and skills. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to first-level M.S.W. students. Enrollment must be concurrent with enrollment in SW 702, SW 710 and SW 711. FLD.

SW 702. Basic Field Practicum. 3 Hours.
Students are assigned to social service agencies that provide generalist practice opportunities that prepare students for entry into the advanced level of either clinical social work practice or social work administration and advocacy practice. All students work under the supervision of a qualified field instructor where they have the opportunity to apply and test social work knowledge, values, and skills. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to first-level M.S.W. students. Enrollment must be concurrent with enrollment in SW 701, SW 710 and SW 711. FLD.

SW 710. Social Work Practice I. 3 Hours.
The first of two-course sequence prepares students to begin to translate theory into strategies of intervention that cut across social work practice with systems of all sizes. Presents an integrating framework of generalist social work based on a strengths perspective and a person-in-environment frame of reference. Course taken concurrently with SW 701 which provides students an opportunity to integrate theory and practice in work with clients. LEC.

SW 711. Social Work Practice II. 3 Hours.
Second of two-course sequence and extends the work begun in SW 710. Focus in the second course is on mastery of the basics of helping relationships and the development of intervention skills for the middle and ending phases of intervention. Content is structured to prepare students to enter the advanced level of the M.S.W. program. Course taken concurrent with SW 701. Prerequisite: SW 710. LEC.

SW 712. Social Work Practice Seminar. 3 Hours.
Introduces advanced standing students to the themes of the school. Special emphasis is given to the Strengths Perspective, a multicultural approach to practice, and developing the skills to critically and reflectively think about one’s own practice. Advanced standing status required. LEC.

SW 713. Community and Organizational Practice. 3 Hours.
Students will be exposed to a body of knowledge and skills necessary to practice with communities and organizations. An advocacy perspective will act as the course’s unifying theme with client well-being acting as the driving force behind the activities of community and organizational practitioners. LEC.

SW 720. Social Policy and Program Analysis. 3 Hours.
This course provides a broad social context for identifying and analyzing social problems and social policy/program responses. Economic and social justice issues are exemplars for understanding societal dynamics and evaluating related policies. Emphasis is given to the development of conceptual skills in identifying and analyzing needs addressed by programs and policies. LEC.

SW 730. Human Behavior in the Social Environment. 3 Hours.
Course provides foundation knowledge about bio-psycho-social aspects of individual and family behavior. Theoretical perspectives on well being dysfunction, and developmental processes are critically analyzed, especially concerning applicability to social work practice that supports client strengths, diversity, and social justice. A holistic conceptual framework is used to integrate these micro-system perspectives with larger environmental socio-political concerns. LEC.

SW 740. Social Work Research. 3 Hours.
An examination of professionally relevant aspects of the nature of science: the nature of knowing, a constructed reality, the logic of explanation and inquiry, the nature of concepts, hypotheses, and assumptions. The content will include such issues as sampling, measurement reliability and validity, developing survey questions, types of qualitative and quantitative research, and an introduction to descriptive and inferential statistics. LEC.

SW 755. Studies: _____. 1-3 Hours.
This course provides the opportunity for experimentation with innovative course content in accordance with guidelines established by faculty. LEC.

SW 801. Advanced Field Practicum—Clinical Practice. 4 Hours.
Students are assigned to social service agencies that provide opportunities for advanced level clinical social work practice. All students work under the supervision of a qualified field instructor where they have the opportunity to integrate theory and practice and develop beginning competence in clinical social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Enrollment must be concurrent with enrollment in SW 801, SW 810 and SW 811. Prerequisite: Completion of all foundation requirements. FLD.

SW 802. Advanced Field Practicum—Clinical Practice. 3 Hours.
Students are assigned to social service agencies that provide opportunities for advanced level clinical social work practice. All students work under the supervision of a qualified field instructor where they have the opportunity to integrate theory and practice and develop beginning competence in clinical social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students.
Enrollment must be concurrent with enrollment in SW 801, SW 810 and SW 811. Prerequisite: Completion of all foundation requirements. FLD.

**SW 803. Advanced Field Practicum-Clinical Practice. 2-6 Hours.**
Students are assigned to social service agencies that provide opportunities for advanced level clinical social work practice. All students work under the supervision of a qualified field instructor where they have the opportunity to integrate theory and practice and develop beginning competence in clinical social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Enrollment must be concurrent with SW 810 and SW 811. Prerequisite: Completion of all foundation requirements. FLD.

**SW 804. Advanced Field Practicum-Social Work Administration. 4 Hours.**
Students are assigned to social service agencies that provide practice opportunities in social work administration. All students work under the supervision of a qualified field instructor where they have the opportunity to develop beginning competence in social work administration. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Enrollment in fall semester must be concurrent with enrollment in SW 840, SW 841, and SW 849 and in Spring semester enrollment must be concurrent with enrollment in SW 805, SW 842, and SW 843. Prerequisite: Completion of all foundation requirements. FLD.

**SW 805. Advanced Field Practicum-Social Work Administration. 3 Hours.**
Students are assigned to social service agencies that provide practice opportunities in social work administration. All students work under the supervision of a qualified field instructor where they have the opportunity to develop beginning competence in social work administration. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Enrollment in fall semester must be concurrent with enrollment in SW 840, SW 841, and SW 849 and in Spring semester enrollment must be concurrent with enrollment in SW 804, SW 842, and SW 843. Prerequisite: Completion of all foundation requirements. FLD.

**SW 806. Advanced Field Practicum-Social Work Administration. 2-6 Hours.**
Students are assigned to social service agencies that provide practice opportunities in social work administration. All students work under the supervision of a qualified field instructor where they have the opportunity to develop beginning competence in social work administration. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Enrollment in fall semester must be concurrent with enrollment in SW 840, SW 841, and SW 849 and in Spring semester enrollment must be concurrent with enrollment in SW 842, SW 843 and SW 846. Prerequisite: Completion of all foundation requirements. FLD.

**SW 810. Clinical Social Work Practice. 3 Hours.**
Clinical social work practice occurs in a variety of settings, from large public and private agencies and institutions through many types of individual and group private practice situations. This course is designed to teach advanced knowledge and skills that transcend contextual factors in order to produce a variety of positive client outcomes in a range of practice situations. In addition, this course focuses on the commitment of social work practitioners to provide services to those groups who, by reason of class, race, sex, or other characteristics, are not ordinarily well served by the many institutions in this society. Course taken concurrently with SW 801 which provides an opportunity to integrate theory and practice in work with clients. Prerequisite: Completion of all foundation requirements. LEC.

**SW 811. Topics in Advanced Clinical Social Work: _____. 3 Hours.**
The organizing theme of the advanced clinical selective emphasizes application of advanced theoretical and practice principles to client systems. This advanced selective provides students with the opportunity to critically consider the themes of the school as they relate to the need for assessment, diagnostic, and process evaluations with a variety of client systems. Every student will engage in activities designed to solidify their professional identity as clinical practitioners as they enter the workforce. Topics offered may include solution-focused brief therapy; family therapy, and cognitive behavioral therapy. Prerequisite: Completion of SW 810. LEC.

**SW 830. Social Work in Child and Family Settings. 3 Hours.**
An in-depth examination of social work in child and family settings. Students demonstrate the capacity to integrate research, policy, direct practice, and human behavior in considering the issues central to this area of practice. Students will also be able to explain how diversity issues manifest themselves at both the policy and direct practice levels. Prerequisite: Completion of all foundation requirements. LEC.

**SW 832. Social Work in Health Care and Mental Health Settings. 3 Hours.**
Content as in SW 830 focused on health care and mental health. LEC.

**SW 833. Social Work and Aging. 3 Hours.**
Content as in SW 830 focused on aging. LEC.

**SW 834. Social Work in Schools. 3 Hours.**
Content as in SW 830 focused on schools. LEC.

**SW 840. Program Design and Grant Writing. 3 Hours.**
Introduction to the effective construction of social programs, and the acquisition of agency resources through grant writing and fundraising. Topics include the design and analysis of social programs and the process of preparing a fundable grant proposal. Prerequisite: Completion of social welfare foundation level requirements. LEC.

**SW 841. Advanced Policy and Programs. 3 Hours.**
The focus is on the development of skills to stay abreast of and knowledgeable about critical federal and state policies, regulations, and funding structures and streams in students' chosen field of practice. Students will also learn how to research the literature on best practice and effective programs. All of these skills and consequential knowledge will be used to inform program design, resource acquisition, financial management, personnel management, outcome management, and other administrative functions. Prerequisite: Completion of all foundation requirements. LEC.

**SW 842. Using Outcomes for Administrative and Advocacy Practice. 3 Hours.**
Emphasis is on the use of information to improve human service program performance. Includes content for the design, implementation, and evaluation of information systems. Prerequisite: Completion of all foundation requirements. LEC.

**SW 843. Program Management and Supervision. 3 Hours.**
Introduction to client centered human service management including the variety of tasks, roles, and functions of managers. Builds knowledge and skills in effective employee supervision and human resource management including the development of a diverse workforce. Prerequisite: Completion of all foundation requirements. LEC.

**SW 846. Advanced Community and Advocacy Practice. 3 Hours.**
This course is designed to build on the content of the foundation course on community and organizational practice by further developing the
theories, methods, and skills of community and advocacy practice. The course will help students know and further develop the analytical and empirical skills needed to effectively manage and advocate with and on behalf of different human service communities. Throughout the course, skill-based exercises are presented to aid in understanding theoretical concepts. Prerequisite: Completion of all foundation requirements. LEC.

**SW 849. Managing Financial Resources. 3 Hours.**
Focus on the use of resources needed to operate a client centered program. Includes budgeting techniques and their application; use of budgets for decision making, and problems of reallocation. Prerequisite: Completion of all foundation requirements. LEC.

**SW 852. Social Work with Groups. 3 Hours.**
Theory and practice of social work in the wide range of groups in which social workers participate as workers and co-workers. Focus on the social worker’s tasks and behaviors in establishing group services and in facilitating work in the group from the time of its formation to its termination as a service entity. Prerequisite: Completion of all foundation requirements. LEC.

**SW 855. Study Abroad. 3 Hours.**
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, Ireland, Italy and South Korea. LEC.

**SW 860. Loss and Grief. 3 Hours.**
Examines the multiple faces of loss and grief throughout the human life cycle. Examines personal and societal attitudes toward death and dying and the processes of dying and grieving. Course includes exploration of assessment and interventions that enable individuals and their families to cope with loss. Prerequisite: Completion of all foundation requirements. LEC.

**SW 861. Intimate Partner Violence. 1.5 Hour.**
This advanced practice course addresses the seriousness and extent of the problem, contributing factors, consequences for the individual, the family, the community, and society. Prevention and intervention practice models will be discussed within a clinical and strengths framework with a focus on developing skills for assessment, intervention, and prevention of violence with individuals and families. LEC.

**SW 862. Intrafamilial Sexual Abuse. 1.5 Hour.**
This course will focus on sexual misuse that occurs within the family system. Students will obtain a comprehensive understanding of sexual misuse that occurs within the family system and develop assessment and helping skills needed when working with abusive families. Theoretical, assessment, and helping aspects of intrafamilial sexual abuse will be examined. Prerequisite: Completion of all foundation requirements. LEC.

**SW 863. Mental Health and Psychopathology. 3 Hours.**
Theories of mental health and psychopathology are compared concerning etiology, classification, assessment, and treatment of distress and mental disorders. Theories and practices are evaluated critically for their usefulness in a strengths approach to social work in mental health settings. Prerequisite: Completion of all foundation requirements. LEC.

**SW 866. Social Work Practice with Children and Adolescents. 3 Hours.**
Developmental norms and processes in childhood and adolescence and related implications for assessment and intervention methods in work with children and adolescents. Topics include countertransference issues in work with children, working with parents and children, intervention tools, stress in childhood, special issues, and concerns in adolescence, sexual abuse of children. Prerequisite: Completion of all foundation requirements. LEC.

**SW 868. Crisis Intervention and Suicide Risk Reduction. 3 Hours.**
Principles of planned short term intervention generally and of crisis intervention specifically are addressed. The use of and application of crisis theory, crisis intervention, and suicide risk reduction are examined. Evidence based practices regarding the effects of crises including disasters on individual, family, and community well-being are considered. Prerequisite: Completion of all foundation requirements. LEC.

**SW 869. Social Work with Clients with Alcohol and Drug-Related Problems. 3 Hours.**
Focus is on developing value consciousness and multidimensional understandings in relation to drug use and abuse. Patterns of drug use, sociocultural attitudes toward drug use and definitional issues in the drug field will be examined. Explanatory theories and contemporary interventions, including the applicability of generalist social work practice models are presented and critically assessed. Prerequisite: Completion of all foundation requirements. LEC.

**SW 870. Spiritual Aspects of Social Work Practice. 3 Hours.**
This course provides a framework of knowledge, values, and skills for spiritually-sensitive social work practice. In order to prepare students to respond competently and ethically to diverse spiritual perspectives, a comparative, critically reflective approach to content is employed. The role of religion and spirituality in supporting or impeding individual strengths and social justice is considered. Prerequisite: Completion of all foundation requirements. LEC.

**SW 872. Cultural Diversity in Social Work Practice. 3 Hours.**
Provides students with a framework of knowledge, values, and practice methodology for culturally competent social work practice. Emphasizes themes of oppression and empowerment, culture-specific strengths and resources, and multicultural/transcultural perspectives. Prerequisite: Completion of all foundation requirements. LEC.

**SW 873. Social Work with Gay, Lesbian, Transgendered and Bisexual Clients. 3 Hours.**
The purpose of this course is to introduce students to the basic knowledge, values, and skills needed to work effectively with people who are gay, lesbian, and bisexual. The course will reflect a person-environment perspective, focusing on strategies that empower lesbians, gay men, and bisexuals to develop personal and environmental resources from a strengths perspective. Throughout the course, attention will be given to issues of diversity within the lesbian and gay population. Prerequisite: Completion of all foundation requirements. LEC.

**SW 874. Social Work Practice with Women. 3 Hours.**
Expands knowledge and practice skills in working with women in diverse social work practice settings. Critical examination of traditional and feminist practice approaches to problems that frequently confront women. Prerequisite: Completion of foundation requirements. LEC.

**SW 875. Readings and Investigations: ______. 1-3 Hours.**
Opportunity for scholarly investigation in an area of special interest. Students pursue independent study in an area of social work practice through the guidance of a selected faculty member. RSH.

**SW 890. Current Issues in Professional Social Work Education: ______. 0.5-3 Hours.**
Course provides opportunity for innovative course content designed for the social work professional. Subjects offered include: Psychopathology: A Biopsychosocial Approach, Ethics and the Social Worker, Mediation, Solution Focused Practice, Strengths-based Management, Outcome-based Measurement of Practice. LEC.
SW 955. Study Abroad. 3 Hours.
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, Ireland, Italy, and South Korea. LEC.

SW 978. Research Design and Methods. 3 Hours.
This class is an in-depth introduction to the process of conducting research. This introduction provides the essential context for the qualitative, quantitative, and mixed methods research courses. LEC.

SW 979. Methods of Qualitative Inquiry. 3 Hours.
This course provides a detailed overview of knowledge and skills in qualitative inquiry. It examines issues in the philosophy of science and paradigms for qualitative inquiry in social work. It emphasizes principles and procedures for qualitative inquiry design, including an introduction to data collection, analysis, report writing, while attending to criteria for establishing trustworthiness. LEC.

SW 980. History and Philosophy of Social Work. 3 Hours.
This course is designed to provide students with opportunities to examine the underlying conceptual frameworks of social work practice-their history and present manifestations. This course rests on the definition of social work practice that includes the interaction of knowledge, value, and skill around professional purpose and in the context of professional sanction. LEC.

SW 981. Advanced Quantitative Research Methods I. 3 Hours.
This course, which includes a lab, focuses on quantitative research methodology and related inferential statistics, emphasizing mastery of specific methodological and statistical knowledge and skills. The course will address the following topics: the framing of research questions; the selection of appropriate research methods and designs; the selection of appropriate statistics for data analysis; the principles of analysis; interpretation of findings; and the presentation of results. LEC.

SW 982. Social Welfare Policy. 3 Hours.
This seminar helps doctoral students learn to analyze social welfare policies and programs. After comparing and contrasting various policy analysis frameworks, students learn to analyze the ways in which social conditions, values, and ideologies shape the definitions of social problems as well as the development, implementation, and evaluation of social welfare policies that impact those problems. LEC.

SW 983. Advanced Quantitative Research Methods II. 3 Hours.
The purpose of this advanced research methods course is to help equip professionals to design and carry out research with direct implications for social work practice and social welfare policy. Building on the experience in SW 978 and SW 981, this course will focus on more advanced topics in research design and both experimental and correlational statistical analyses. LEC.

SW 984. Social Work Practice: Identifying and Improving "Best Practices. 3 Hours.
The main focus of this seminar is on developing skills for conduction multi-dimensional, value critical inquiry about "best practices" relevant to social work practice, and applying the results of that inquiry toward extending and improving current "best practices". LEC.

SW 985. Theory for Research: _____, 3 Hours.
This course provides an introduction to interdisciplinary theory for applied social research, focusing on: (1) the roles and uses of theory in social inquiry (2) theory building and theory testing (3) induction and deduction (4) the articulation of common or related theoretical traditions in various social science disciplines. LEC.

SW 986. Teaching Social Work: Philosophy and Methods. 3 Hours.
The purpose of the course is to prepare doctoral students for effective teaching of Social Work courses at all levels of higher education. Doctoral students need practical skills, a theoretical base, experience, and confidence in order to improve their teaching performance. LEC.

SW 988. Mixed Methods in Social Science Research. 3 Hours.
The purpose of this course is to provide an overview of mixed methods research, consisting of the history and philosophy of mixed methods research, the emerging literature on it, purposes and characteristics of mixed methods research, types of research problems addressed, the specification of mixed methods purpose statements and research questions, types of major mixed methods designs, data collection and analysis strategies, and reporting and evaluating results. LEC.

SW 990. Graduate Research. 1-9 Hours.
Individual research preparatory to defense of dissertation prospectus. (By arrangement with doctoral chair.) RSH.

SW 998. Doctoral Applied Research and Education Studies. 1 Hour.
This course provides the opportunity for doctoral students to learn about research or teaching through direct application of research or teaching skills under the mentorship of faculty. RSH.

SW 999. Dissertation. 1-12 Hours.
The Bachelor of Social Work

Bachelor of Social Work Program

The School of Social Welfare provides the education and experience necessary for a career in social work. By helping shape students' capacity for caring, the school prepares social workers to carry out the unique purposes of the profession — to develop human potential, to promote individual well-being, and to bring about a more just society.

Social work is a major professional discipline in the broad institution of social welfare. The term social welfare denotes the dimensions of society concerned with human needs: health, education, economic security, housing, and mental health.

The undergraduate program of the KU School of Social Welfare prepares graduates for beginning generalist social work practice. The program defines generalist practice as maintaining focus on the interface between systems (i.e., individual, family, groups, organizations, and communities), with particular emphasis on

- The strengths inherent in these systems.
- The need to understand the role of gender, age, race/ethnicity, class, religious beliefs, sexual orientation, disability, and culture in all phases of the social work process.
- The promotion of social and economic justice for those disenfranchised on the basis of the attributes listed above.
- The assumption of a critical perspective regarding different ways of knowing.

Beginning generalist practice uses multilevel methodology, depending on the needs of the client system, and incorporates a knowledge, value, and skill base that is transferable between and among diverse contexts and locations.
The B.S.W. program is offered on the Lawrence campus and through the Edwards Campus as part of a degree-completion program at Kansas City Kansas Community College.

**B.S.W. Edwards Campus 2+2**

The B.S.W. Edwards 2+2 program is offered as a partnership between the KU School of Social Welfare and Kansas City Kansas Community College (KCKCC). The curriculum is designed as a degree completion program for students who are completing or who have completed an associate's degree and are interested in pursuing a bachelor's degree. Students in the B.S.W. Edwards 2+2 program take the upper-level social work courses required for the B.S.W. with KU professors at KCKCC and receive a KU degree. For more information, contact the B.S.W. 2+2 student services coordinator at 913-288-7304 to make an appointment.

**Advising**

**While Deciding on a Major**

Early advising is recommended for undergraduates interested in social work. Pre-social work students (both KU and transfer) are encouraged to attend group advising through the school during each enrollment period.

**From Another College**

For undergraduates who plan to transfer to KU but currently attend another college, advising is available by phone or email. The school works closely with counselors from all Kansas colleges.

**Once Admitted**

Once a student is admitted to the School of Social Welfare, academic advisors are available to assist students in the enrollment process, filling out enrollment forms and other academic program requirements. Students consult with their academic advisor before enrollment each semester and have their advising hold removed. In addition, a member of the School’s faculty is assigned as professional/career advisor to assist with career matters.

For more information on B.S.W. advising, review the student handbook (http://socwel.ku.edu/resources/forsocialworkstudents/academic-handbooks).

Beginning in the fall semester, 4 semesters are necessary to complete professional social work courses required for the B.S.W. degree.

**Certificate Programs**

**Undergraduate Engaged Learning Certificate Programs**

The university offers several engaged learning certificate programs that work well with the undergraduate social work major. Students who complete an engaged learning certificate program receive a notation of it on their transcripts. Learn more about certificate programs (http://socwel.ku.edu/academics/degrees/bsw/certificateprograms).

**Undergraduate Admission to KU**

First-year students enter the College of Liberal Arts and Sciences and complete 3 semesters of work (36 credit hours) before applying to the B.S.W. program. Visit the Office of Admissions (http://admissions.ku.edu) for information about admission to KU. Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

**Undergraduate Admission to the School of Social Welfare**

**Admission Requirements**

- Completion of 36 hours of course work, including college algebra and English composition I and II.
- A minimum grade-point average of 2.5.
- Submission of completed application (https://deptsec.ku.edu/~socwel/apply) including an essay answering 3 questions, a résumé, and 3 reference forms.
- Online KU application (transfer students).

**Grade-Point Average**

Evaluation of transcripts submitted as part of the application for admission includes computation of grade-point average for all work completed. This admission grade-point average is adjusted to include only courses that transfer. A student must maintain a minimum cumulative grade-point average of 2.5 and a 2.5 in social work required courses.

**Admission Process**

Students are admitted for fall semester only. The priority application deadline is February 1 to be considered for scholarships. No applications will be considered after June 15.

Learn more about the admission process (http://socwel.ku.edu/admission).

**Bachelor of Social Work Degree Requirements**

Primary responsibility for meeting graduation requirements rests with the student.

- A minimum of 120 credit hours of course work, including 12 credit hours of field practicum. At least 30 hours must be taken in residence.
- A 2.5 minimum grade-point average for all classroom work.
- A 2.5 minimum grade-point average in required social work courses.
- Successful completion of field practicum.
- Recommendation by the faculty of the school to the chancellor and the Kansas Board of Regents that the degree be granted.

**Curriculum**

**Professional Socialization (6)**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SW 623</td>
<td>Seminar in Professional Issues</td>
<td>3</td>
</tr>
</tbody>
</table>

Students prepare for the responsibilities of social work, involving professional functioning, knowledge and use of professional ethics, values, attitudes, and skills. Students analyze their values critically to develop a unified personal and professional framework. Students develop their professional commitment to a code of ethics and understanding of social work to govern their professional behavior.

**Human Behavior and the Social Environment (6)**

<table>
<thead>
<tr>
<th>Course</th>

<td>Human Behavior in the Social Environment</td>
<td>3</td>
</tr>
<tr>
<td>SW 532</td>
<td>Community and Organizational Dynamics and Human Behavior</td>
<td>3</td>
</tr>
</tbody>
</table>
Students acquire a knowledge and understanding of individual, group, community, institutional, and cultural dynamics and behavior. Students become familiar with concepts, theories, and empirical findings that enable them to practice effectively as professional social workers.

Research (6)

SW 540 Fundamentals of Social Work Research 3
SW 541 Social Work Research Seminar 3

Students achieve a command of fundamental social work research. A knowledge of the scientific method is acquired and applied to current research. Students learn to apply critical thinking to the professional literature.

Social Work Practice (21)

SW 510 Fundamentals of Social Work Practice 3
SW 555 Diversity, Oppression, and Social Justice: Culturally Competent Social Work 3
SW 560 Study Abroad 3
SW 610 Social Work Practice Seminar I 3
SW 612 Social Work Practice Seminar II 3
SW 630 Topics in Social Work Practice: Antisocial, Aggressive Behavior in Childhood and Early Adolescence 1.5
SW 631 Topics in Social Work Practice: Intimate Partner Violence 1.5
SW 632 Topics in Social Work Practice: Substance Abuse and Social Work Practice 1.5
SW 633 Topics in Social Work Practice: Crisis Intervention 1.5

Students acquire knowledge and skills needed for effective social work practice. The accumulated knowledge and understanding of the social work curriculum come together in the practice courses.

Social Policy (6)

SW 620 Social Policies and Program Analysis 3
SW 621 Social Policy Analysis and Advocacy 3

Students develop the capacity for critical analysis of social problems, policies, and programs. Students analyze social work practice to understand the effect of policy on direct service. Basic policy analysis skills acquired in the first course are applied in specified areas of practice, applying analytical skills to problems, policies, and programs.

Study Abroad (3)

SW 560 Study Abroad 3

Students get exposure to international aspects of social welfare in countries such as Costa Rica, South Korea, India, and Ireland. An elective course that meets general education credit hour requirements.

Field Practicum (SW 601)

The field education office works with community agencies throughout Kansas and western Missouri to provide field practicum opportunities for students. Students are placed in these agencies through a collaborative process among the field education office, the student, and the agency. The field education office is responsible for ensuring that all field placements are able to provide the appropriate learning opportunities for students and that qualified field instructors will be available to the student.

Learn more about field education (http://socwel.ku.edu/academics/degrees/bsw-fe/fieldeducation).

Required Hours for Field Practicum

Students with 9 or more remaining elective or general education requirement credit hours in the fall of the senior year must complete these hours before beginning field placement. Students who are completing these hours may take SW 620, SW 621, and the mini-courses, but they cannot enroll in SW 610, SW 612, or SW 623. Students will be able to meet the requirements of Core Goals 4, 5, and 6 as a result of completing the major.

B.S.W. Edwards Campus 2+2

The B.S.W. Edwards 2+2 program (http://socwel.ku.edu/academics/degrees/bsw/2plus2/overview) is offered as a partnership between the KU School of Social Welfare and Kansas City Kansas Community College (KCKCC). The curriculum is designed as a degree completion program for students who are completing or who have completed an associate's degree and are interested in pursuing a bachelor's degree. Students in the B.S.W. Edwards 2+2 program take the upper-level social work courses required for the B.S.W. with KU professors at KCKCC and receive a KU degree. For more information, contact the B.S.W. 2+2 student services coordinator at 913-288-7304 to make an appointment.

Liberal Arts Prerequisites for a broad base of understanding

Master of Social Work

Master of Social Work

Built upon the commitment to a strengths perspective of social work practice, the Master of Social Work program (http://socwel.ku.edu/academics/degrees/msw/regular/overview) offers educational opportunities for those who wish to expand their skills in helping individuals and communities develop their capacities to support and enhance the quality of life for all people. The school recognizes that individuals with a natural skill in helping come from all backgrounds and encourages them to apply.

The Master of Social Work degree prepares graduates for advanced social work practice in 1 of 2 broad areas — clinical social work practice with individuals, families, and groups or social work administrative and advocacy practice aimed at macro-level practice. The first level of the master’s curriculum is a generalist foundation required of all students. The foundation consists of 6 classroom courses and a 2-semester practicum that reflects the generalist intent.

At the advanced level, students choose a concentration in clinical social work practice with a focus in a particular field of practice — child and family, health/mental health, aging — or social work administrative and advocacy practice. The advanced-level practicum implements students’ choice of concentration.

Full-time students complete the social work degree program in two years. Students admitted for part-time study may extend the program for up to four years (see Completion Plans (http://socwel.drupal.ku.edu/sites/socwel.ku.edu/files/docs/Academics/msw/MSW%20Completion%20Plans%20March%202014.pdf)). The regular M.S.W. program is offered on the main KU campus in Lawrence at the Edwards Campus in Overland Park, KS, and in alternating years in the western Kansas program (http://socwel.drupal.ku.edu/academics/degrees/msw/westernks/overview).

The Advanced-Standing program (http://socwel.drupal.ku.edu/academics/degrees/msw/advancedstanding/overview) admits individuals with B.S.W. degrees and strong academic records. Applicants generally have relevant post-degree work experience.

Postgraduate Education Options

A special program has been created to help meet the continuing education needs of professional social workers in the community. For more information, see the Professional and Community Education Program (http://socwel.ku.edu/alumni/pce/intro).

Social Work & Law

Joint Degree in Social Work and Law

The Juris Doctor/Master of Social Work (http://socwel.drupal.ku.edu/academics/degrees/msw/mswd/overview) joint degree program combines 4 years of study the 3-year Juris Doctor (p. 742) program offered by the School of Law (http://www.law.ku.edu) and the 2-year M.S.W. degree offered by the School of Social Welfare. The social work practitioner gains an understanding of the legal environment in which he or she works and its impact on social problems. The legal practitioner learns how social problems shape the law. Applicants must apply to and meet the criteria for admission to both schools. Contact each school for separate admission information.

Master of Social Work

Regular M.S.W. Program - 2-Year Full-Time or Part-Time

Applicants must have bachelor’s degrees from accredited universities before beginning the M.S.W. course and field work. Applicants’ undergraduate studies must reflect the successful completion of liberal arts courses, including those in the social sciences and humanities which focus on the development of knowledge in communication; social, biological, and behavioral sciences; history; philosophy and the ways in which knowledge is gained and applied; and the value of a multicultural and diverse society.

Advanced-Standing Program

The Advanced-Standing Program requires a bachelor’s degree from a CSWE-accredited social work program with a grade-point average of at least 3.0. A higher grade-point average is desirable. Applicants who earned their social work bachelor’s degrees within the 2 years before applying to the M.S.W. program must submit a copy of their practicum evaluation as well as a letter of recommendation for graduate studies completed by one of their practice instructors. In addition, all applicants who have been employed in a social work setting should submit a letter of recommendation from at least one supervisor who can address the applicant’s knowledge, skill, and readiness for graduate education.

Admission decisions take into account the applicants’ amount and types of social service experience, letters of recommendation, narrative statement, writing skills, and undergraduate grade-point averages and courses completed.
The Advanced-Standing Program is a full-time 1-year program or part-time 2-year program. To be considered for advanced standing, current seniors should submit transcripts that document their fall semester grades and their successful practicum experience. All applications to either the regular M.S.W. or the Advanced-Standing Program become the property of the University of Kansas.

Learn more about the M.S.W. programs (http://socwel.ku.edu/academics/degrees/msw/regular/overview).

**Admission to the M.S.W. Program**

**M.S.W. Admission Requirements**

- Bachelor's degree from an accredited university (Regular M.S.W.). Bachelor's of social work degree from a CSWE-accredited social work program (Advanced Standing).
- Undergraduate grade-point average of 3.0 or above. The admissions committee takes into account special circumstances such as improvement of grades in upper-division or graduate courses. We look for evidence of an applicant’s commitment to the well-being of people and communities; a well-developed sense of self; emotional maturity and the ability to think clearly, creatively, and independently.
- Online application including three electronic reference forms and student-issued transcripts from all previously attended schools regardless of degree status.
- All applicants who have been employed in a social work setting should submit an electronic M.S.W. reference form from at least one supervisor who can address the applicant's knowledge, skill and readiness for graduate social work education as one of the three references.
- Non-refundable application fee of $65 for domestic students and $85 for international students.
- Graduate Record Examination scores are not required. Applicants are evaluated on undergraduate grade-point average, graduate course work (if any), volunteer and work experience especially related to social work, and evidence of potential for a social work career in the application narrative and references.

**Deadlines**

The deadline for the Advanced-Standing Program is January 15. The deadline for applications to the regular M.S.W. program (full time or part time) is February 15. Early application is encouraged.

**Admission Process for All Programs**

M.S.W. degree program students are admitted for fall semester only. Applications may be submitted anytime between Oct. 1 and January 15 (Advanced Standing M.S.W.) or Feb. 15 (Regular M.S.W.). All fully completed applications are reviewed upon receipt. Admission decisions are made in the spring of each year. Advanced-Standing M.S.W. students begin in June; all other M.S.W. students (full time and part time) begin in August.

Learn more about the application process (http://socwel.ku.edu/admission).

**International Students**

All students from abroad, including students from English-speaking countries, must visit KU’s Applied English Center (http://www.aec.ku.edu) for verification of English language skills. You may be required to take an English Language Proficiency Test and to enroll in English language courses if you do not pass that test.

**Note:** The need to take English courses may delay your start in or extend the length of the M.S.W. program.

If you are admitted to the M.S.W. program, your admission to the School of Social Welfare is provisional. You must visit the KU International Student and Scholar Services (http://www.iss.ku.edu) Office, isss@ku.edu, for your I-20 documentation.

You must also visit the Applied English Center (http://www.aec.ku.edu), aec@ku.edu.

The International Conference on Social Welfare recommends that before seeking professional education for social work in the United States, a student should complete comparable study available in his or her own country and acquire a minimum of 2 years of social work experience there.

International students also must submit

1. Original bank statements showing evidence of your and/or your sponsor’s financial ability to pay for your educational and living expenses. Adequate health insurance coverage also is required.
2. Evidence of having taken the Test of English as a Foreign Language (TOEFL) examination within the past 2 years. Minimum scores are subject to change. Please visit the application area of our website for the latest minimum scores.
3. 1 official, original-language copy of your academic records with a certified English translation.

**Planning Your Commitment**

Students are admitted on either a full- or a part-time basis. In making decisions about full- or part-time study, students should consider that each class requires several hours of preparation each week. The program is demanding; students can expect reading assignments and paper preparation and should be prepared to fulfill practicum commitments averaging 2½ to 3 days a week.

Students admitted part-time take 6 credit hours each semester the first year and the additional 10 hours, including practicum, the second year. Full-time students enroll in 16 credit hours each semester.

**M.S.W. Degree Requirements**

The School of Social Welfare requires a total of 64 credit hours for the M.S.W. degree, consisting of

- 36 credit hours of classroom work maintaining a grade-point average of 3.0 (B) — a total of 108 grade points on a 4.0 grading scale.
- 28 credit hours of field practicum with an S grade for satisfactory performance.
- 2 sequential semesters of 10-credit-hour enrollments are necessary to meet residence requirements.
- Recommendation of the faculty of the School of Social Welfare to the University Registrar that the master’s degree be granted.

1 Students who maintain grade-point averages of at least 3.0 in the foundation courses are eligible to take additional courses beyond the minimum requirement.
M.S.W. Foundation Curriculum

Social Work Practice (SW 710, SW 711). Based on the school’s unique strengths perspective, courses provide core knowledge and skills essential for working with individuals, families, and groups.

Community and Organizational Practice (SW 713). This practice class gives students an understanding of the core elements of practice in organizations and communities.

Social Policy and Program Analysis (SW 720). Course emphasizes the effect of social problems, policies, and programs on people and gives students the skills to analyze the effectiveness of policies and programs.

Social Work Research (SW 740). Course offers students the opportunity to become informed consumers of social-work-relevant research and to develop skill in evaluating the effectiveness of their own work with clients and the effectiveness of the programs in which they work.

Field Practicum (SW 701). Community agencies throughout Kansas and western Missouri offer practicum opportunities for the application of knowledge, values, and skills learned in the classroom. Field experiences for foundation-level students extend the curriculum goal of generalist social work and are designed so that students acquire fundamental competencies and practice skills across multiple social systems.

Foundation Courses

The following courses (http://socwel.drupal.ku.edu/academics/degrees/msw/regular/curriculum) are required (32 credit hours):

<table>

M.S.W. Advanced-Level Curriculum

Students at the advanced level (http://socwel.drupal.ku.edu/academics/degrees/msw/regular/curriculum) select a concentration in either clinical social work practice or social work administrative and advocacy practice. This selection is based on their goals of working directly with individuals, families, and groups or at the macro-level of practice in advocacy and community practice. With the exception of study abroad courses offered by the School of Social Welfare, students may not enroll in advanced-level classes before completing foundation requirements.

All students completing the M.S.W. degree are eligible to apply for licensure in the State of Kansas as Licensed Master Social Workers (LMSW). Students who anticipate working towards meeting the requirements for the Licensed Specialist Clinical Social Worker (LSCSW) examination should enroll in the clinical social work practice concentration.

Clinical Social Work Concentration

This 32-credit-hour concentration prepares students for social work practice with individuals, families, and small groups. The focus of the student's academic preparation is twofold: on developing the assessment skills needed to identify client's personal, interpersonal, environmental and/or systems needs; and on selecting, in concert with the client, appropriate interventions that are evidence based and supported as best practices. Students are exposed to social work theories and methods applicable to the range of practice settings in which clinical social work services are provided; they simultaneously have the opportunity to apply this developing knowledge in the field education component of their graduate programs. Students who anticipate taking the Licensed Specialist Clinical Social Worker (LSCSW) examination should enroll in the clinical social work practice concentration.

The following courses must be taken in the clinical concentration (32 credit hours):

<table>

</table>
The clinical practice elective offers students an opportunity to acquire in-depth knowledge in a core area of clinical social work practice. Topics may include ethics, human sexuality, mental health and psychopathology, family mediation, loss and grief. Study Abroad courses do not meet clinical practice elective requirements.

Non-Clinical Electives 3
SW 846 Advanced Community and Advocacy Practice 3
SW 855 Study Abroad 3
SW 875 Readings and Investigations: _______ 1-3

These courses are macro-oriented and do not have significant clinical content.

Note: Earning an M.S.W. in the clinical social work concentration requires 15 credit hours of course work which has clinical content covering issues of diagnosis and treatment. These courses include SW 810, SW 811, SW 863, integrative seminars, and clinical electives. Study Abroad courses do not contain clinical content and may be used toward the diversity selective requirement or as an elective. If a student enrolls in Study Abroad for the diversity selective requirement, the elective course must contain clinical social work content.

Social Work Administrative and Advocacy Practice Concentration

The 32-credit-hour social work administrative and advocacy practice (SWAAP) curriculum prepares graduates for management or advocacy positions in public and voluntary human services organizations. The concentration helps students achieve competence in managerial and advocacy practice grounded in the knowledge and values of social work. Knowledge and skill areas include program design, managing information, managing people, managing resources, community advocacy, and program evaluation. This concentration prepares students to be program managers, supervisors, agency administrators, program monitors, advocates and evaluators, and social planners with voluntary health and welfare planning agencies; federal, state, and local planning bodies; and advocacy and self-help organizations. Students graduating from the social welfare planning agencies; federal, state, and local planning bodies; and advocacy and self-help organizations. Students graduating from the social work administrative and advocacy practice concentration are eligible for licensure at the LMSW level in the state of Kansas.

The following courses must be taken in the SWAAP concentration (32 credit hours):

<table>

</tbody>
</table>

For students expecting to sit for the LSCSW license in the future, at least one of the clinical electives must meet the BSRB requirement for diagnosis and treatment. Those interested in school social work should take SW 834 as one of their elective courses.

The clinical practice elective offers students an opportunity to acquire in-depth knowledge in a core area of clinical social work practice. Topics may include ethics, human sexuality, mental health and psychopathology, family mediation, loss and grief. Study Abroad courses do not meet clinical practice elective requirements.

M.S.W. Advanced-Standing Program

The Advanced-Standing program (http://socwel.drupal.ku.edu/academics/degrees/msw/advancedstanding/curriculum) requires an enrollment of 38 credit hours, as follows:

- A summer enrollment in 2 classes:
  a. SW 712, a social work practice class organized around the school’s major curriculum themes. Students must earn a minimum grade of B in SW 712 to continue matriculating.
  b. An elective course selected by the student to broaden the base of knowledge. Electives are offered in various locations.
- The advanced level of the M.S.W. program (32 credit hours):
  a. 18 credit hours of classroom work maintaining a grade-point average of 3.0 (B)
  b. 14 credit hours of field practicum with an S grade for satisfactory performance

No credit is given for courses taken before admission. The advanced level of this program may be taken full time or extended up to 2 years. Two sequential semesters of 10-credit-hour enrollments are necessary to meet residence requirements.

Field Practicum

The field education office works with community agencies throughout Kansas and western Missouri to provide field practicum opportunities for students. Students are placed in these agencies through a collaborative process among the field education office, the student, and the agency. The field education office is responsible for ensuring that all field placements are able to provide the appropriate learning opportunities for students and that qualified field instructors will be available to the student.

Learn more about field education (http://socwel.ku.edu/academics/degrees/msw/regular-fe/fieldeducation).

Prior Work Experience

In accordance with national curriculum policy, prior employment and life experience may not be credited toward classroom course work or practicum requirements.

School Social Work

The Kansas Department of Education no longer certifies school social workers. However, the School of Social Welfare strongly recommends that students interested in practicing in a school setting take the following:

- A practicum experience at the advanced level in a public school setting under the direct supervision of a school social worker.
- Clinical social work concentration.
- SW 830 Social Work in Child and Family Settings.
- SW 834 Social Work in Schools as 1 clinical elective.
- SPED 725 is highly recommended as an elective choice for students planning a future in school social work.
-
Doctor of Philosophy in Social Work

Doctor of Philosophy in Social Work

The goal of the University of Kansas School of Social Welfare doctoral program is to prepare students to become leaders nationally and internationally in advancing social work practice and policy through research, teaching, and scholarship. Our students graduate from the program with the critical knowledge and skills they need to become innovative stewards of the discipline who generate and disseminate knowledge as researchers, scholars and educators. The school is known internationally as a prime innovator in the Strengths Perspective for social work practice. Doctoral students have played a key role in this exciting initiative.

Program Highlights

- Creative, critical thinking about practice, policy, and theory
- Quantitative and qualitative skills for research
- Innovative scholarship and teaching
- Student-centered educational approach
- Financial support and mentoring for students
- Full- and part-time enrollment options
- Personal and community strengths
- Appreciation for human diversity and global perspective
- Social justice
- Study Abroad opportunities

Doctoral students become conversant with the excitement and creativity in the profession — how professionals come to know what they know, how they put that knowledge into practice, and how it affects consumers.

Consider Our Program

The Ph.D. program (http://socwel.ku.edu/academics/degrees/phd/overview) offers effective alternatives for building knowledge and inquiring into social work practice and social welfare policy. We are dedicated to educating scholars who can develop knowledge for the profession through quantitative, qualitative, theoretical, or conceptual analyses, and historiographic investigations. Demand for our Ph.D. graduates is high. Recent alumni are employed in teaching, research, and combined teaching/research positions at large and small universities.

Curriculum

Doctoral courses (http://socwel.ku.edu/academics/degrees/phd/curriculum) prepare students as scholars with conceptual and methodological sophistication.

- The history and philosophy course focuses on the intellectual history, current status, and innovation of social work ideas, ideologies, and theories.
- In the research sequence, students learn both qualitative and quantitative methodologies, designs, advanced modes of analysis, theory for research, and appropriate applications.
- The policy/practice courses provide the opportunity to analyze policies of interest to the student and discover "best" practices as they affect a population. Students critically consider human problems, strengths, and strategies for change and transformation.
- Qualifying papers and electives help students develop deep understanding in areas of special interest.
- A required course as well as teaching seminars for GTAs prepare students to be effective educators.
- The dissertation involves advanced and focused research into a topic selected by the student, based on quantitative, qualitative, historical, or other methods of inquiry.

GTA & GRA

Teaching and Research Opportunities

Our Ph.D. program contributes significantly to the model of strengths and community-based research, service, and education developed by the school. Under the direction of faculty members, many Ph.D. students help with research projects and serve as teaching assistants. For example, doctoral research assistants work in such areas as aging, asset-building, child welfare, criminal justice, diversity issues, domestic violence, health and disability, child and adult mental health, poverty, social policy, and spirituality.

It is part of the school’s mission to focus on teaching, inquiry, and practice that benefit populations who experience oppression of all kinds. The school is committed to diversity and multicultural perspectives. Many of the research and service projects of faculty members and doctoral students are committed to direct and positive impact on people of color, status minorities, and oppressed peoples, individually, collectively, and internationally.

Responsible Scholarship

Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Admission Criteria & Requirements

Criteria used in judging applications include the applicant’s potential for excellence in academic performance, professional practice experience, and potential for contributions to knowledge-building for social work.

Required

- Master's degree in social work or related field.
- Graduate grade-point average of 3.5 or higher.
- Personal statement.
- Three letters of reference.
- Completion of the Graduate Record Examination's (GRE) Quantitative and Verbal tests within the past 5 years. The GRE Writing/Analytic test is not required.
- Completion of a basic statistics course within the past two years with a grade of B or higher. The applicant must include a written statement showing how this requirement has been met or how it will be met before entering the program.
- Online graduate application.
- For international students, completion of the Test of English as a Foreign Language (TOEFL) or the IELTS within the past two years, demonstrating high proficiency.

Preferred

- GRE scores in at least the 50th percentile on the Quantitative and Verbal tests.
- Undergraduate grade-point average of 3.0 or higher preferred.
• M.S.W. degree preferred. Applicants with master’s degrees related to social work and affiliation with social work activities and values are considered.
• Two years of social work or related practice; two years of post-master’s professional social work experience preferred.
• Personal interview (telephone or email contacts with the chair of the program are recommended before submitting application).

Application Timeline and Procedure
Applications are not reviewed until all materials are received. The deadline is January 15. Applicants are strongly encouraged to take the Graduate Record Examination well in advance of the January 15 deadline. Late applications are considered only on a space-available basis.

Learn more about the admission process (http://socwel.ku.edu/academics/degrees/phd/admission).

International Students
International students from all regions of the world are encouraged to apply. Contact the school at socwelweb@ku.edu (admissionsw-phd@ku.edu) for more information about international student applications and resources and regulations of International Student and Scholar Services (http://www.iss.ku.edu) and the Applied English Center (http://www.aec.ku.edu).

Ph.D. Degree Requirements
The program requires a minimum of 54 credit hours, as follows:

• 27 credit hours of required coursework.
• 9 credit hours of electives.
• A qualifying paper.
• A comprehensive examination process.
• Completion of a dissertation.

In fulfilling the elective hours, students may take graduate-level courses in any substantive area or research skills necessary for successful completion of their goals. Students can take electives in social science or other relevant graduate disciplines. They may also complete Independent Study under faculty direction and/or choose from on of several study abroad courses offered by the School.

Beyond course work, students complete one qualifying paper under the guidance of a faculty committee. This demonstrates their ability to integrate knowledge and skills across the three curriculum areas in relation to a theme of inquiry developed by the student in his or her chosen specialization. After the qualifying paper is completed, students complete an oral comprehensive exam (dissertation proposal defense) and then write and defend a doctoral dissertation.

Commuting for 1 or 2 days a week is possible. Required course work (http://socwel.ku.edu/academics/degrees/phd/curriculum) can be completed in 2 years. Additional time is needed to complete the qualifying papers and dissertation. The program can be completed in 4 years of focused work. Students may start on a part-time basis but eventually must spend 1 year in residence, which entails 2 semesters of full-time course work (9 hours) and may include one summer session (6 hours); or a combination of 6 hours of course work and half-time appointment as a teaching or research assistant for 2 semesters.

Office of Graduate Studies, Lawrence and Edwards Campus Students

Goals of Graduate Study

The traditional goals of graduate study are independent scholarship, competence in research or other creative work, and the cultivation of skill and commitment in teaching. Having acquired a broad education as an undergraduate, the student must be trained to master a special field, learn the methods of investigation employed therein, and to proceed toward making an original contribution to knowledge. Since many of those who earn advanced degrees find careers in higher education, the acquisition of skill in teaching and in directing research are also essential parts of graduate education.

Emerging societal interests and changing market demands continue to underscore the importance of the traditional goals of graduate study. At the same time, they emphasize the need for flexibility in programs and accommodation in career objectives. Graduates in many fields continue to pursue increasingly diverse careers and, as they do, they demonstrate the value of graduate study and research to society, government, business, industry, the diverse professions, and the arts. Nevertheless, incoming students must realize that a change in employment patterns for graduates is underway in many fields where the major, if not the sole, employment opportunity after graduation was once to be found in a teaching career.

Graduate Military Programs

The Office of Graduate Military Programs (GMP) (http://gmp.ku.edu) facilitates collaboration between the university and the US Armed Forces for the development of academic programs and research initiatives that support the needs of the Department of Defense (DOD). GMP develops and maintains programs for select officers attending the Command and General Staff College at nearby Fort Leavenworth, instructors at the United States military academies, foreign area officers, logisticians, and other DOD personnel requiring the advanced degrees necessary to teach and conduct research at the highest level. The office assists principal investigators throughout the university to find well-matched research grant opportunities, prepare proposals, and coordinate with the appropriate DOD entities. GMP also serves as the voice for all educational issues related to student veterans. GMP is committed to creating and maintaining a positive learning environment for military veterans attending our university.

Research

Research is an integral part of the university’s educational mission and approach to graduate study. The National Science Foundation classifies KU as a major university receiving substantial research support. The Carnegie Classification of Institutions of Higher Education classifies KU as a doctorate-granting Research University with Very High Research Activity, and KU has been a member of the Association of American Universities since 1909. The university has a long and successful record of research collaboration through independent, multidisciplinary research centers that focus on common themes. KU is home to university research centers and institutes, affiliated centers, core service labs, the Kansas Geological Survey, and the Kansas Biological Survey. In addition, a number of research centers exist in individual departments and academic units throughout the university. For more information about research on the Lawrence campus, visit the Research (http://www.ku.edu/research) page or the Office of Research (http://www.research.ku.edu).

Fellowships and Scholarships

Visit the Graduate Studies website (http://graduate.ku.edu/funding) for information about funding opportunities for KU graduate students.

Admission to Graduate Study

Persons whose records indicate their ability to succeed in advanced work may be admitted to the University of Kansas for graduate study in one of the professional schools or in the College of Liberal Arts and Sciences. Applicants can apply to be degree-seeking, non-degree-seeking, or certificate-seeking. Applicants pursuing an identifiable degree program are degree-seeking; those applicants pursuing a certificate are certificate-seeking, those who are not pursuing an identified degree or certificate program should be admitted under the non-degree-seeking category. No student may work toward a graduate degree without being accepted as a degree-seeking student in a specific graduate program. (View the current policies on Graduate admission (http://policy.ku.edu/graduate-studies/admission-to-graduate-studies).)

English Proficiency:

In accordance with the policy on English Proficiency Requirements for Admitting Graduate Students (https://documents.ku.edu/policies/Graduate_Studies/EnglishProficiencyIntlStudents.htm?num1.5), international applicants must demonstrate English proficiency, even if they indicate that English is their first language. Domestic applicants who
indicate that English is not their first language must demonstrate English proficiency as described in this policy.

**Degree- and Certificate-Seeking Admission**

Students who apply to a graduate degree or certificate program may be offered admission with a status of regular or provisional.

Degree-seeking graduate students who wish to pursue a certificate within their own department do not need to apply separately for admission to the certificate program. Degree-seeking graduate students who wish to pursue a certificate outside of their home department must apply to the certificate program. Degree-seeking graduate students must be in good standing in their degree programs in order to be admitted to a certificate program, whether in the same or a different department.

**Regular Admission**

Regular admission requires evidence* of a bachelor’s degree from a regionally accredited university or from a foreign university with substantially equivalent bachelor's, master's, or doctoral degree requirements. The bachelor’s degree is not acceptable if it contains credit awarded for work experience that was not directly supervised by faculty members (life experience) or if the work was not evaluated in units that identify the academic content (e.g., if the work was graded on a P/F or S/U basis). In exceptional cases, persons not holding bachelor’s degrees may be admitted if they are academically well prepared. In these cases, the Dean of Graduate Studies reviews the student’s academic background before the student is admitted.

Additionally, applicants must demonstrate a grade-point average (GPA) of at least a 3.0 (on a 4.0 scale) in a completed* degree program at KU, at another regionally-accredited institution, or at a foreign university with substantially equivalent bachelor’s, master’s, or doctoral degree requirements. For more information on procedures used to provide and evaluate transcripts, see the policy on Admission to Graduate Study, Procedures (http://policy.ku.edu/graduate-studies/admission-procedure?num1.2).

*Students may be admitted based on their cumulative GPA in the last term of an active degree program, but these students must provide evidence of a completed bachelor’s degree (as described above) before they will be allowed to enroll in a second term of graduate study at KU.

**Provisional Admission**

Applicants who meet the minimum bachelor's degree requirement outlined above, but who have one or more deficiencies in grade-point average, English proficiency scores (see the policy on English Proficiency Requirements for Admitting Graduate Students (https://documents.ku.edu/policies/Graduate_Studies/EnglishProficiencyIntlStudents.htm?num1.5)), prerequisite course work, or in other areas as determined by the department or program, but who meet all other admission standards, may be admitted on a provisional basis.

If an applicant is admitted provisionally for a lack of prerequisite coursework or low English proficiency scores, it is expected that the student's department and his or her college or school will review the student immediately following the first semester of graduate study. This review will determine whether the student has met the requirements of regular admission.

If the student meets the requirements of regular admission, the department or program in which the student is enrolled will request that Graduate Studies move the student from provisional to regular status. If the student has not met the requirements of his or her provisional admission at the time of review, the student may be continued on provisional status or dismissed immediately.

A student admitted provisionally may be dismissed at the conclusion of any semester if s/he fails to earn a 3.0 GPA or meet other requirements of regular admission. If, after the first semester, provisional continuation is recommended by the department or program and approved by the graduate division, the student may remain on provisional status until the requirements of regular status are met.

Students who have been dismissed from a graduate program may be admitted for further graduate study at KU only by petition of the graduate division that will accept the student. The petition must be approved by the Dean of Graduate Studies.

**Non-Degree-Seeking Admission**

A non-degree-seeking applicant applies to the University (not to a department, program, or school) for admission as a non-degree-seeking student. A non-degree-seeking applicant must confirm that s/he has completed a bachelor’s degree and, if applicable, meets the English proficiency requirements for provisional admission (for more information, see the policy here (https://policy.drupal.ku.edu/graduate-studies/english-proficiency-international-students)). S/he is not required to meet the other admission standards for Regular admission.

Non-degree-seeking admission is not intended to bypass regular admission into a graduate certificate or degree program. However, if a non-degree-seeking student later applies for admission and is accepted as a regular degree-seeking student, s/he may transfer up to 9 credit hours toward a graduate certificate or degree, or up to 6 hours in the case of a 9-hour certificate.

**Easy Admit**

An applicant to graduate study who wishes only to attend institutes or workshops that require graduate admitted status may be admitted under the easy admit process. This process allows any person, with evidence of a bachelor's degree from an accredited institution, to take one course per semester without needing to meet the additional requirements of provisional admission.

The easy admit process is limited to certain Lawrence-campus programs that tend to have a high volume of applicants who enroll in institutes or workshops for continuing education purposes. An applicant should verify that the easy admit option is available for the course in which s/he is interested before pursuing this option.

**Offers of Admission**

Offers of admission are valid for one year from the term of admission, as long as the admitting program approves deferral to a future term. If individuals offered admission are not in attendance at the University of Kansas after one year from the term of admission, all application materials are destroyed and the admission is rescinded. If this occurs, prospective graduate students must submit a new application, application fee, official transcripts, and other required materials. Previous acceptance into a graduate program does not guarantee an admission offer for a future application.
Admission Procedures

Applying for Admission

Applicants submit an application online at graduate.ku.edu. To ensure adequate time for review, applicants should check with individual degree programs for application deadline dates. In addition to the application, Graduate Studies requires official transcripts from the baccalaureate-granting institution as well as transcripts from any institutions attended post-baccalaureate. Transcripts must be sent directly by the baccalaureate-granting institution to KU. (Please note, transcripts and test scores that have been faxed by someone other than a university staff member are not accepted as official copies.) Applicants with degrees from a foreign country must follow the transcript procedures outlined here (http://graduate.ku.edu/transcripts).

At the time of application, applicants must supply at least a scanned version of official transcripts for processing purposes. Some programs may require that official and final transcripts be provided at the time of application. Applicants should check with the program(s) to which they apply for more information.

Applicants with degrees from institutions outside of the U.S. may be required to submit additional transcript documents. Transcripts that are in a language other than English must be accompanied by English translations. Information about required transcript documents for degrees earned outside of the U.S. is available here (http://graduate.ku.edu/transcripts).

International applicants must also provide a financial statement and test scores demonstrating English proficiency (see the English Proficiency Requirements (http://policy.ku.edu/graduate-studies/english-proficiency-international-students); for more information). The university is unable to issue immigration documents until an international applicant provides a statement of financial resources. Degree programs may choose not to consider international applications if they are not accompanied by a financial statement.

Admission Notification

The university may classify admitted students as degree-seeking, certificate-seeking, or non-degree-seeking and may admit them with regular or provisional status. Each student's decision letter explains the classifications under which s/he is admitted. Each applicant is notified by email when the decision letter is available.

For all admission categories, enrollment in specific courses may be subject to fulfillment of departmental course prerequisites and consent of the instructor.

Admission to graduate study does not imply admission to candidacy for a higher degree. A student becomes a candidate for an advanced degree only by demonstrating through resident study at KU the requisite preparation and ability. Requirements specified for an advanced degree must be regarded as minimum requirements. Additional requirements depend on the student's undergraduate preparation and the particular field of graduate work chosen.

Limitations on Admission

Some programs must restrict the number of applicants they admit because of limited space, faculty, or other resources for research and instruction. Prospective students should direct their questions to the program(s) which interest them.

Application Fees

Nonrefundable application fees payable to the University of Kansas are required. Rates are subject to change. Some departments and programs require deposits from admitted students to be fully credited against required fees upon enrollment.

English Proficiency Requirements for Admission to Graduate Study

The following are acceptable means of verifying English proficiency for purposes of admitting international applicants and domestic applicants who are non-native English speakers:

- Graduation with a baccalaureate degree (or higher) earned in residence from an accredited English-medium U.S. college or university or a college or university in the United Kingdom, Australia, New Zealand, Ireland, English-speaking province of Canada, or an English-speaking Caribbean country, with instruction conducted in English.

Degrees earned online may not be used to verify English proficiency.

- Receipt of official copy (not student's copy) of applicant's English proficiency standardized test scores (e.g., TOEFL) achieved not more than two years prior to the semester of first enrollment.

Note: Graduate Teaching Assistants (GTAs) have additional English proficiency requirements indicated in the policy on Spoken English Language Competency of Faculty and Graduate Teaching Assistants (http://policy.ku.edu/KBOR/spoken-english-competency-BOR-policy).

The Permit to Re-Enroll form is not available to students who:

- apply for graduate admission.
- are not eligible to use the Permit to Re-Enroll form. These students must re-approve Leave of Absence, for four or more consecutive semesters.
- Students who have allowed their active enrollment to lapse, without the consent of their departments or programs.

Students returning from an approved Leave of Absence will be returned from leave by their department. These students are not required to use the Permit to Re-Enroll. View the current Lawrence and Edwards Campus policy on Permit to Re-Enroll (http://policy.ku.edu/graduate-studies/permit-to-reenroll). View an illustrative chart here (http://graduate.ku.edu/sites/graduate.ku.edu/files/images/general/resources/Permit%20to%20Reenroll%20chart.pdf).

### Provisional Admission Minimums for Campus-based programs

</tr>
<tr>
<td>IELTS</td>
<td>Overall score 5.5 or any part score below 5.0</td>
</tr>
</tbody>
</table>

All international students and all domestic students who are not native speakers of English, when admitted to campus-based programs, are required to check in at the Applied English Center (AEC) upon arrival on campus. At that time, the AEC will confirm the student’s level of English proficiency and determine whether English courses are required.

Any U.S. citizen or U.S. permanent resident who has declared that his or her native language is not English must report to the AEC for verification of English proficiency before enrolling.

**Note:** Provisional admission is not available to students in all programs. Provisional admission is not available to students who are applying to online programs in the School of Education and are not native English speakers. View the current Lawrence and Edwards Campus English proficiency policy (https://documents.ku.edu/policies/Graduate_Studies/EnglishProficiencyIntlStudents.htm).

### Permit to Re-enroll

Students who have allowed their active enrollment to lapse, without an approved Leave of Absence, for up to one academic year (three consecutive semesters, including the summer semester) may be eligible to use the Permit to Re-Enroll form with the consent of their departments or programs.

Students who have allowed their active enrollment to lapse, without an approved Leave of Absence, for four or more consecutive semesters are not eligible to use the Permit to Re-Enroll form. These students must re-apply for graduate admission.

The Permit to Re-Enroll form is not available to students who:

- have been dismissed from a program at KU;
- voluntarily discontinued (formally withdrew from) their graduate program;
- completed their graduate degree program; or
- most recently enrolled as non-degree-seeking graduate students.

Before completing the Permit to Re-Enroll form, students should contact their graduate program directly to confirm availability of the Permit to Re-Enroll.

### Transcripts

Applications must be accompanied by one copy of official transcripts from the institution where the applicant earned the bachelor's degree (or equivalent). This official transcript will be used to verify the completion (or intended completion) of a baccalaureate degree (or equivalent).

If the applicant has completed any graduate work, official transcripts from the graduate institution(s) must be included as well. Letters of recommendation and test scores may also be required. Applicants should check with the program(s) to which they are applying for more information.

In order to be considered official, transcripts and test scores must be sent through secure means (e.g., a sealed envelope, electronic transmission) directly from the degree-granting institution or testing service to the University of Kansas. Transcripts and test scores provided through unofficial means will not be considered to be official documents for the purpose of admission.

### Degrees

Degrees are awarded three times each year, in August, December, and May. Degrees for each academic year are conferred formally at the annual commencement ceremony in May. Degree candidates are not eligible to graduate if the graduate grade-point average (GPA) is lower than 3.0 in all courses acceptable for graduate credit. Doctoral candidates who have fulfilled all of their degree requirements by the deadline dates for graduation in August 2016, December 2016, and May 2017 are allowed to participate in the May 2017 doctoral hooding ceremony. In addition, doctoral candidates who expect to complete all of their degree requirements by the deadline date for graduation in August 2017 may elect to participate in the May 2017 doctoral hooding ceremony. Summer 2017 graduates should contact the Office of Graduate Studies early in the spring 2017 semester in order to participate in hooding.

Students who are working toward two degrees must complete the requirements for each degree. Course work may not count toward fulfilling degree requirements for more than one degree.

Graduate students may not be awarded an additional KU degree with the same name and degree code as a previously awarded degree from KU. This applies to the completion of different degree tracks, concentrations, and subspecialties within a given degree. This does not prohibit students from earning additional master’s or doctoral degrees in another discipline.

View the current list of all master’s and doctoral degrees on the Graduate Studies Academics page (http://www.graduate.ku.edu/find-graduate-program). View the current Lawrence and Edwards Campus policy on graduate degrees (http://policy.ku.edu/graduate-studies/degrees).
Master’s Degree Programs
KU grants traditional Master of Arts and Master of Science degrees, as well as professional master’s degrees that have developed out of these traditional arts and science degrees. A Master of Arts or a Master of Science degree requires at least one year of graduate work or its equivalent. Stated in terms of hours of credit, the standard master’s program requires 30 hours though some degrees, especially in professional areas, may require as many as 36 or 40 or more. With permission from the department (or in the case of interdepartmental programs, permission from the joint program committee) and of the Graduate Division, it is sometimes possible to complete a 30-hour master’s degree with as few as 24 hours if the student enters the program especially well prepared and maintains a superior GPA. Work for a master’s degree is concentrated in the major area, with only a minimal amount of work (usually no more than 6 credit hours) that is completed at KU permitted outside the major department. Each master’s program must contain a research component, represented either by a thesis (usually for 6 hours of credit) or by an equivalent enrollment in research, independent investigation, or seminars. Within these requirements and well-founded practices, departmental master’s programs may be flexible enough to meet the particular needs of individual students. View the current Lawrence and Edwards Campus policy on master’s degrees (http://policy.ku.edu/graduate-studies/ma-ms-degrees).

Master of Arts and Master of Science
Historically, most of the master’s degrees granted at KU have been the Master of Arts and Master of Science degrees. This fact conforms to the traditional liberal arts background out of which most U.S. graduate schools developed.

Professional Master’s Degrees
KU grants a number of professional master’s degrees, most of which are offered through the professional schools. Students should consult the appropriate college or school section of the online catalog for detailed descriptions of professional master’s programs.

Specialist in Education
The degree of Specialist in Education (http://catalog.dept.ku.edu/201314/schools/educ/departments/pre/programs/eds/requirements) is offered through the School of Education and may be earned as a concentration on the basis of two years of graduate work (which can include an appropriate master’s degree or equivalent). Information on this degree, including the concentration in which it may be earned, can be found in the School of Education section of the online catalog.

Jointly Administered Degrees
In a few cases, a degree is offered through two schools and administered by a joint committee from the two faculties. The master of arts degree in Speech-Language Pathology and the master of arts degree in Audiology are administered by an intercampus committee drawn from the Department of Speech-Language-Hearing: Sciences and Disorders in Lawrence and from the Department of Hearing and Speech of the School of Health Professions in Kansas City.

Master’s Degree Requirements
This section of the online catalog, maintained by the Office of Graduate Studies, provides general and common requirements for master’s degrees at the University of Kansas. Specific requirements for each individual degree program are outlined in the catalog section maintained by the school or college offering that degree.

Master’s Enrollment Requirements
All graduate students enrolled in master’s programs must be enrolled the semester they complete master’s degree requirements. Master’s students who complete degree requirements during the first week of summer session or within the first two weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester.

View the current Lawrence and Edwards Campus policy on master’s enrollment requirements (http://policy.ku.edu/graduate-studies/ma-enrollment-requirements).

Master’s Program Time Constraints
Normal expectations are that most master’s degrees (excluding some professional terminal degrees) should be completed in two years of full-time study. However, master’s degree students are allowed seven years for completion of all degree requirements. In cases in which compelling reasons or circumstances recommend a one-year extension, the Graduate Division, on recommendation of the department/committee, has authority to grant the extension. In cases where more than eight years are requested, the appropriate appeals body of the school considers petitions for further extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant them.

Some departments may have more stringent rulings about time restrictions. Students should ask about the policy in effect in the department in which they plan to study. View the current Lawrence and Edwards Campus policy on master’s program time constraints (http://policy.ku.edu/graduate-studies/ma-program-time-constraints).

Master’s Final Examinations
A final general examination or defense of the thesis or culminating master’s project in the major subject is required of all candidates for the Master of Arts or Master of Science. The degree program and the Graduate Division should ascertain that the graduate student is in good academic standing (3.0 or higher grade-point average) before scheduling the final general examination or thesis defense.

At the option of the department, the examination may be oral or written, or partly oral and partly written. In some departments, passing a written examination is a necessary preliminary to taking the oral examination by which success or failure is judged.

Master’s examinations are administered by a committee of at least three members of the Graduate Faculty. Exam attendance is governed by the Graduate Student Oral Exam Attendance (http://policy.ku.edu/graduate-studies/oral-exam-attendance) policy.

The examination is held during the semester of the student’s final enrollment in course work. The thesis defense should be held when the thesis has been substantially completed.

The department’s request to schedule the general examination must be made on or before the date set by the Graduate Division, normally a minimum of two weeks before the examination date.
Students earning a master’s thesis degree must have completed at least one hour of thesis enrollment before the master’s degree may be awarded. See the Graduate Studies website (http://www.graduate.ku.edu/electronic-thesis-and-dissertation) for information and requirements related to submitting the thesis electronically.

View the current Lawrence and Edwards Campus policy on master's final examinations (http://policy.ku.edu/graduate-studies/masters-final-exams).

**Master’s Student Oral Exam Committee Composition**

When the master’s student final examination is partly or entirely oral (i.e., thesis defense), the oral portion of the examination must be conducted by a committee which meets the following conditions.

1. Master's committees are composed of at least three voting members.
2. The majority of committee members serving on a master’s student oral examination must be tenured/tenure-track faculty holding regular or dissertation graduate faculty status in the candidate’s department/program of study. Tenured/tenure-track faculty who are appointed as courtesy faculty within the program/department are considered (for purposes of committee composition) to be faculty of that program/department.
3. Beyond the majority requirement, additional members may hold any graduate faculty status, including regular, dissertation, or special status. This third member can be, but need not be, a member of the candidate’s department/program.
4. For approved professional master’s degree programs (listed below), the committee may be composed as described above, or any number of the committee members may be professors of the practice, clinical faculty, or research faculty in the department/program. For the approved professional master’s degree programs, the committee chair can hold any graduate faculty status.

As long as the conditions above are met, the committee may include more than three members.

The master’s committee chair must hold regular or dissertation status. While master’s committees are not required to have a co-chair, the student or the committee members may decide to select a co-chair. The co-chair can hold any graduate faculty status.

Substitutions of the committee chair (and/or co-chair) are prohibited after the committee has been approved by the Graduate Division of the school or college. If a committee chair (and/or co-chair) needs to be replaced, the revised committee must be approved by the Graduate Division of the school or college in advance of the exam.

Substitutions of the committee members are permitted as long as the new members hold regular or dissertation graduate faculty status. Special members can be added after the committee has been approved by the Graduate Division of the school or college, but these additions must be approved by the Graduate Division of the school or college in advance of the exam.

**Committee Composition for Approved Professional Degree Programs**

The following master’s programs are approved to utilize professors of the practice, clinical faculty, and/or research faculty to compose committees, as outlined elsewhere in this policy:

- Master of Science in Engineering Management
- Master of Arts in Speech-Language Pathology
- Master of Science in Geology
- Master of Construction Management
- Master of Civil Engineering
- Master of Science in Civil Engineering
- Master of Science in Architectural Engineering

View the current Lawrence and Edwards Campus policy on Master’s Student Oral Exam Committee Composition (https://policy.ku.edu/graduate-studies/masters-oral-exam-committee-composition).

**Master’s Thesis Submission**

When the master’s candidate has passed the final oral examination and the members of the committee have signed the thesis, a title page and acceptance page with original signatures must be delivered to the Graduate Division of the school in which the student’s program resides so that completion of degree requirements may be officially certified.

As a requirement of graduation, the candidate must publish the thesis electronically and pay all applicable fees. Learn more about the electronic submission and publication process here (http://www.graduate.ku.edu/electronic-thesis-and-dissertation).

**Theses will be made available through UMI/Proquest and KU ScholarWorks, unless there is an embargo in place or special circumstances pertain as outlined in the KU Embargo policy (http://policy.ku.edu/graduate-studies/embargo-policy).**

The student must be the author of the thesis, and every publication from it must indicate that authorship. Practices vary among disciplines—and even among scholars in a given field—as to whether the mentor’s name may appear as a co-author, and whether as senior or junior co-author, on subsequent publication of the thesis (usually revised), or on articles prepared from it. It is expected that clear understandings in individual cases will be established during the apprenticeship period, when ethical practices in publication are addressed within the professional development training of the program.

Students from the following program are permitted to request a permanent embargo of their thesis: Master of Fine Arts (MFA) in Creative Writing offered by the Department of English. View the current Lawrence and Edwards Campus policy on master’s thesis submission (http://policy.ku.edu/graduate-studies/ma-thesis).

**Doctoral Degree Programs**

KU offers the following doctoral degrees:

- Doctor of Philosophy (Ph.D.),
- Doctor of Audiology (Au.D.),
- Doctor of Education (Ed.D.),
- Doctor of Engineering (D.E.), and
- Doctor of Musical Arts (D.M.A.)

The programs offering these degrees are administered by the schools and colleges through their departments and graduate divisions, from admission through final recommendation for degree award.

This section of the catalog provides succinct, general descriptions of each of these five doctoral degrees in order to facilitate convenient comparison of the degrees. It also lists regulations common to the administration of all doctoral programs. The particular application, interpretation, or method of implementation of these common elements is, in certain cases, left to
the faculty of each department or degree program (e.g., Research Skills). Detailed information about requirements for each degree, as it is offered in a specific discipline, should be obtained from the appropriate college, school, or department listing in the online catalog. The requirements there are in addition to the general requirements listed here.

The School of Law offers the Juris Doctor (J.D.) and Doctor of Juridical Science (S.J.D.) degrees.

The School of Medicine offers the Doctor of Medicine (M.D.) degree. The KU Medical Center campus offers additional doctoral degrees, such as the Clinical Doctorate in Speech-Language Pathology (S.L.P.D.), the Doctor of Nursing Practice (D.N.P.), the Doctor of Occupational Therapy (O.T.D.), and the Doctor of Physical Therapy (D.P.T.).

**Doctor of Philosophy**

The degree of Doctor of Philosophy (Ph.D.) is the highest degree offered by the university. It is awarded for mastering a field of scholarship, for learning the methods of investigation appropriate to that field, and for completing a substantial piece of original research. In addition to preparing research specialists, the process of earning a Ph.D. shares certain goals with liberal education:

- putting order into human experience;
- fostering a love of learning for its own sake;
- instilling respect for human values;
- integrating various human powers into a process of creation; and
- making vital, in many fields at least, a sense of history.

Although the courses and research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The Ph.D. aspirant is expected to be a well-educated person with a broad base of general knowledge, not only as preparation for more advanced work but also as a means of knowing how the chosen specialty is related to other fields of human thought.

To give depth and breadth to their doctoral programs, many departments require some work in a minor field or at least an articulated selection of extra-departmental courses. Because of the diversity of the fields in which the Ph.D. is offered, and the variety of needs and interests of individual students, the degree does not have a specific requirement for a minor. However, the Ph.D. aspirant is encouraged to plan an integrated program, under departmental direction, that includes courses outside the major field.

View the current Lawrence and Edwards Campus policy on the Doctor of Philosophy degree. (https://documents.ku.edu/policies/Graduate_Studies/docofphilosophy.htm)

**Other Doctoral Degrees**

**Doctor of Audiology**

The Doctor of Audiology (Au.D.) degree program prepares the student to enter clinical practice as an audiologist. Offered by the KU School of Health Professions, the program produces professionals skilled in providing diagnostic, rehabilitative, and related services in the fields of sound, balance, and hearing sciences. There is an emphasis on the clinical learning experience, although research is also a significant component of the program. A baccalaureate degree is required for admission. Degree requirements are listed under Communicative Disorders: Intercampus Program in the online catalog.

**Doctor of Education**

The degree of Doctor of Education (Ed.D.) is a professional degree designed primarily for practitioners in the field of education. Applicants must present evidence of successful experience in professional education. While many of the requirements for the degree closely parallel those for the Ph.D., the degree program—particularly the dissertation—focuses on research concerned with application of existing knowledge rather than on basic research. Specific degree requirements are listed in the School of Education section of the online catalog.

**Doctor of Engineering**

The degree of Doctor of Engineering (D.E.) is directed toward the practice of engineering and includes the entire process of technology from planning to product. Candidates for the degree are intimately associated throughout their tenure with technology project teams, generally composed of master’s degree candidates and undergraduates. Specific degree requirements are listed in the School of Engineering section of the online catalog.

**Doctor of Musical Arts**

The degree of Doctor of Musical Arts (D.M.A.) is intended as recognition of high professional attainment. Since only exceptionally well-qualified candidates are admitted to the program, students are expected to devote their doctoral studies primarily to developing professional qualifications for teaching at the college level. The degree of Doctor of Musical Arts is offered in the specific fields of bassoon; church music (organ or choral conducting emphasis); clarinet; composition; conducting (band, choral, or orchestral); flute; French horn; oboe; organ; percussion; piano performance, literature, and pedagogy; saxophone; strings; trombone; trumpet; tuba; and voice.

The current list of all master’s and doctoral degrees is available on the Graduate Academics page (http://www.graduate.ku.edu/find-graduate-program).

**Doctoral Degree Requirements**

In most programs, doctoral education is divided into two phases. Upon admission to a doctoral program, the student is known as an aspirant for the degree and remains so designated until successful completion of the comprehensive oral examination. After passing that examination, the student is designated a candidate for the degree until successful defense and submission of the finished dissertation.

When a department or program requests its Graduate Division to schedule a comprehensive oral examination or a final oral examination for a student, it must report on the student’s completion of both the general requirements and the specific requirements of the degree program, department, and school. The degree program and Graduate Division should ascertain that the graduate student is in good academic standing (3.0 or higher grade-point average) before scheduling a comprehensive oral examination or a final oral examination.

Doctoral students completing all their degree requirements within the first week of summer session or within the first two weeks of the fall or spring semester are not required to be enrolled for that term. View the current Lawrence and Edwards Campus policy on doctoral degree requirements (http://policy.ku.edu/graduate-studies/doctoral-degree-requirements).
Research Skills and Responsible Scholarship

All doctoral students must meet the Research Skills requirement before proceeding to comprehensive exams. The requirement must include at least two components:

1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.
2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).

Procedure

For both of these requirements, it is the responsibility of the department to report when the student completed the requirement and how the requirement was met via the Progress-to-Degree form. Meeting this requirement is determined by the program or department according to the department’s approved research skills requirement plan.

All doctoral programs must have a research skills requirement plan approved by the school or college and the Office of Graduate Studies.

As outlined in USRR 2.2.7.6, no course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

View the current Lawrence and Edwards Campus policy on doctoral research skills and responsible scholarship (http://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship).

Comprehensive Oral Examination

When a doctoral aspirant has completed the major portion of the course work at a level satisfactory to the graduate degree program and school and has met all other program, school, and general requirements prerequisite to the comprehensive oral examination, including the research skills requirement as appropriately applied and established for the student’s particular program, the degree program must request that the Graduate Division of its school or college schedule the comprehensive oral examination. The examination may be scheduled provided that at least 5 months have elapsed from the time of the aspirant’s first enrollment at KU. Before scheduling the examination, it should be determined that the student is in good academic standing (3.0 or higher grade-point average). The examination request must be submitted in advance of the examination date by at least the period specified by the graduate division, normally a minimum of two weeks. The Graduate Division ascertains whether all pertinent requirements have been satisfied and whether reports of any previously scheduled comprehensive oral examinations have been properly submitted and recorded.

The committee for the comprehensive oral examination must consist of at least five members, all of whom must be members of the Graduate Faculty. Its members are appointed by the Graduate Division of the school or college on the basis of nominations submitted by the graduate degree program. At least one member must be from a department other than the aspirant’s major department. This member represents Graduate Studies and must hold either Regular or Dissertation status on the Graduate Faculty. The Graduate Studies representative is a voting member of the committee and has full right to participate in the examination. In the case of any unsatisfactory or irregular aspects of the exam or violation of Graduate Studies policy, the Graduate Studies representative shall provide a written report to the Dean of Graduate Studies for consideration of further action.

The comprehensive oral examination covers the major field and any extra departmental work for which the program wishes to hold the aspirant responsible. For every scheduled examination, the degree program reports a grade of Honors, Satisfactory, or Unsatisfactory. If the aspirant receives a grade of Unsatisfactory on the comprehensive oral examination, it may be repeated on the recommendation of the degree program, but under no circumstances may it be taken more than three times. In any case, the examination may not be repeated until at least 90 days have elapsed since the last unsuccessful attempt.

Doctoral Candidacy

Dissertation Committee

Upon passing the comprehensive oral examination, the aspirant becomes a candidate for the doctorate. If it has not begun before, the traditional, close student-mentor apprenticeship relationship comes into being. The student is expected to learn by both precept and example of the mentor and, often, in collaboration. The chosen field of scholarship is explored using acquired research tools. The principles and customs of academic inquiry and the codes of ethics traditional to the various disciplines and professional fields become part of the student’s thinking and working.

When the student passes the comprehensive oral examination, the Graduate Division of the appropriate school designates the candidate’s dissertation committee based on the recommendations of the candidate’s major department. The dissertation committee must consist of at least five members and may include members from other departments and divisions or, on occasion, members from outside the university. All members of the committee must be chosen from the Graduate Faculty and, in addition, the committee chair must be authorized to chair doctoral dissertations. (In other words, the committee chair must hold Dissertation status (https://documents.ku.edu/policies/Graduate_Studies/gradfacdissertationstatus.htm) on the Graduate Faculty.) A prospective member of the committee from outside the university must have gained appointment as a Special (https://documents.ku.edu/policies/Graduate_Studies/gradfacspecialmemberstatus.htm) member of the Graduate Faculty before appointment to the committee.

Post-Comprehensive Enrollment

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled in one or more hours of dissertation or programmatically-equivalent coursework (for example, document hours for DMA students) that both moves the student towards degree completion and reflects, as accurately as possible, the candidate’s demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours each semester and 3 hours each summer session. Post-comprehensive enrollment may include enrollment during the semester or summer session in which the comprehensive oral examination has been passed. If after 18 hours of post-comprehensive enrollment the degree is not completed, the candidate must continue to enroll each semester and each summer session until all degree requirements have been met. The number of hours of each enrollment must be determined by the candidate’s advisor and must reflect, as accurately as possible, the candidate’s demands on faculty time and university facilities.

View the current Lawrence and Edwards Campus policy on doctoral candidacy (http://policy.ku.edu/graduate-studies/doctoral-candidacy) are listed in the KU Policy Library.
Doctoral Dissertation

The doctoral candidate must present a dissertation showing the planning, conduct, and results of original research and/or scholarly creativity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities and to demonstrate an intensive focus on a problem or research area. The dissertation itself should be an evident product of the candidate’s growth and attainment of the ability to identify significant problems; organize, analyze, and communicate scholarly results; and bring to bear on an area of scholarly or scientific interest a variety of research skills and scholarly or creative processes. The dissertation must show some original accomplishment, but it should also demonstrate without doubt the candidate’s potential to make future contributions to knowledge and understanding.

The dissertation is to be a coherent scholarly work, not a collage of separate, distinct pieces. Its unity of theme and treatment may still accommodate several subtopics by demonstrating their relationships and interactions. If previously published material by other authors is included in the dissertation, it must be quoted and documented. Final acceptance of the dissertation is subject to the approval of the dissertation committee. It should be noted that prior publication does not guarantee acceptance of the dissertation by the dissertation committee. The dissertation—or one or more substantial portions of it, often rewritten—is expected to be publishable and, indeed, to be published.

Both the dissertation research and the dissertation itself are to be completed under the guidance and direction of the committee appointed as described in the Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition) policy. Instructions about the proper form of the dissertation may be obtained from the KU Graduate Studies website (http://www.graduate.ku.edu/formatting), or from the Graduate Division of each school or college. Candidates and faculty members are reminded that the dissertation is to be a coherent, logically-organized, scholarly document. Because the demands and practices of different disciplines are varied, the format is somewhat flexibly described, and moderate departures from the norm are allowed when justified by the nature of the work or the circumstances of presentation. Any substantial divergences must be approved in advance as prescribed by the instructions and candidates and faculty members are urged to seek early approval to avoid last-minute disappointments over unacceptable format or reproduction.

View the current Lawrence and Edwards Campus policy on doctoral dissertations (http://policy.ku.edu/graduate-studies/doctoral-dissertation).

Final Oral Examination

Completion of the dissertation is the final academic phase of a doctoral program, culminating in the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the dissertation is followed promptly by the final oral examination. When the completed dissertation, in final draft form, has been accepted by the committee and all other degree requirements have been satisfied, the chair of the committee requests that the Graduate Division schedule the final oral examination. This request must be made in advance as prescribed by the instructions and candidates and faculty members are urged to seek early approval to avoid last-minute disappointments over unacceptable format or reproduction.

View the current Lawrence and Edwards Campus policy on final oral examinations (http://policy.ku.edu/graduate-studies/final-oral-exams).

Dissertation Submission and Publication

When the candidate has passed the final oral examination and the members of the dissertation committee have signed the dissertation, a title page and acceptance page with original signatures are to be delivered to the Graduate Division of the school or college in which the student’s program resides so that completion of degree requirements may be officially certified. As a requirement of graduation, the candidate must arrange for electronic publication of the dissertation and payment of all applicable fees. Information about the electronic submission and publication process is found on the KU Graduate Studies website (http://www.graduate.ku.edu/formatting).

Dissertations will be made available through UMI/Proquest and KU ScholarWorks, unless there is an embargo in place or special circumstances pertain as outlined in the KU Embargo policy (http://policy.ku.edu/graduate-studies/embargo-policy).

The student must be the author of the dissertation, and every publication deriving from it must indicate that authorship. Practices vary among disciplines — and even among scholars in a given field — as to whether the mentor’s name may appear as a co-author, and whether as senior or junior co-author, on subsequent publication of the dissertation (usually revised), or on articles prepared from it. It is expected that
clear understandings in individual cases will be established during the
degree objectives. Enrollment in approved distance-learning courses
appointment for teaching or research if it is directed specifically toward
full time in academic or professional pursuits, which may include an
in residence study at KU. During this period, the student must be involved
Two semesters, which may include one summer session, must be spent
Residence Requirement
program time constraints (http://policy.ku.edu/graduate-studies/doctoral-
View the current Lawrence and Edwards Campus policy for more information.
Leave of Absence (https://documents.ku.edu/policies/Graduate_Studies/
readmission to the program and the Graduate Division. Please see the
Ordinarily a leave of absence is granted for one year, with the possibility
absence also may be granted because of illness or other emergency.
Minimum Tenure
The student must spend three full academic years, or the bona fide
equivalent thereof, in resident study at this or some other approved
university, including the time spent in attaining the master’s degree.
Resident study at less than full time requires a correspondingly longer
period, but the requirement is not measured merely in hours of enrollment.
Because a minimum number of hours for the degree is not prescribed, no
transfer of credit is appropriate. However, doctoral degree programs take
relevant prior graduate work into consideration in setting up programs of
study leading to the doctorate.
Maximum Tenure
After being admitted to doctoral programs at KU, students must complete
all degree requirements in eight years. In cases in which compelling
circumstances recommend a one-year extension, the Graduate
Division has authority to grant the extension on the written advice of
the department and dissertation committee. Students who complete the
master’s degree at KU and subsequently begin doctoral studies have
a maximum total enrolled time of ten years to complete both degrees.
Normal expectations, however, are that most master’s degrees (excluding
some professional terminal degrees) should be completed in two years of
full-time study, and both master’s and doctorate degrees in six years of
full-time study. Some graduate degree programs may have more stringent
time restrictions. Students should inquire about the policy in effect in the
department in which they plan to study.
During any phase of doctoral education, a student in any of the above
categories may petition the Graduate Division, through the department,
for a leave of absence to pursue full-time professional activities related
to the doctoral program and long-range professional goals. Leaves of
absence also may be granted because of illness or other emergency.
Ordinarily a leave of absence is granted for one year, with the possibility of
extension upon request. After an absence of five years, however, a
doctoral aspirant or candidate loses status as such and must apply for
readmission to the program and the Graduate Division. Please see the
Leave of Absence (https://documents.ku.edu/policies/Graduate_Studies/
leaveofabsence.htm?num2.6) policy for more information.
View the current Lawrence and Edwards Campus policies on doctoral
program time constraints (http://policy.ku.edu/graduate-studies/doctoral-
program-time-contraints).
Residence Requirement
Two semesters, which may include one summer session, must be spent
in resident study at KU. During this period, the student must be involved
full time in academic or professional pursuits, which may include an
appointment for teaching or research if it is directed specifically toward
degree objectives. Enrollment in approved distance-learning courses
offered through KU cannot be used to meet the doctoral residence
requirement. The student must be enrolled in a minimum of 6 credit
hours a semester, and the increased research involvement must be fully
supported and documented by the dissertation supervisor as contributing
to the student’s dissertation or program objectives. Research must be
performed under the direct supervision of the major advisor if on campus,
or with adequate liaison if off campus.
Note: These are minimum residence requirements. Students should
check with the Graduate Division of their school or college for additional
requirements.
Doctoral Comprehensive Exam Time Constraints
Under normal circumstances, the doctoral candidacy period between
passage of the oral comprehensive examination and the final dissertation
defense must last no longer than five years. If a student took the oral
comprehensive examination more than five years prior to the dissertation
defense, a re-evaluation of the student’s candidacy status is necessary.
Re-evaluation of the student’s candidacy status can include retaking the
comprehensive oral examination.
View the current Lawrence and Edwards Campus policy on doctoral
comprehensive oral examinations (http://policy.ku.edu/graduate/studies/
doctoral-oral-exams).
Doctoral Examinations
Doctoral Student Oral Exam Committee Composition
Doctoral student oral examinations include the doctoral comprehensive
oral exam and the doctoral final oral exam (i.e., dissertation defense) and
must adhere to the following requirements:
1. Doctoral committees are composed of at least five voting members;
2. The majority of committee members serving on a doctoral student oral
examination committee must be tenured/tenure-track faculty holding
Regular or Dissertation graduate faculty status in the candidate’s
department/program of study. Tenured/tenure-track faculty who are
appointed as courtesy faculty within the program/department are
considered (for the purposes of committee composition) to be faculty
of that program/department;
3. One member must meet the requirements for serving as the Graduate
Studies representative. A faculty member from a different department
with a courtesy appointment in the student’s department may serve as
the Graduate Studies representative or in fulfillment of the committee
majority, but cannot serve in both roles at the same time. (For more
information on the Graduate Studies representative, see the policy
listed in the Policy Library here (https://policy.ku.edu/graduate-
studies-representative-doctoral-exam-committees)); and
4. Beyond the majority requirement, the additional member may hold
any graduate faculty status, including Regular, Dissertation, or Special
status. This fifth member can be, but need not be, a member of the
candidate’s department/program. For more information, see the policy
on Graduate Faculty appointments (http://policy.ku.edu/graduate-
studies/graduate-faculty-appointments).
As long as the conditions above are met, the committee may include
more than five members. Exam attendance is governed by the Graduate
Student Oral Exam Attendance (http://policy.ku.edu/graduate-studies/oral-exam-attendance) policy.

The doctoral committee chair must hold Dissertation status. While committees are not required to have a co-chair, the student or the committee members may decide to select a co-chair. The co-chair can hold any graduate faculty status.

Substitutions of the committee chair (and/or co-chair) are prohibited after the committee has been approved by the Graduate Division of the school or college. If a committee chair (and/or co-chair) needs to be replaced, the revised committee must be approved by the Graduate Division in advance of the exam.

Substitutions of the committee members are permitted as long as the new members hold Regular or Dissertation graduate faculty status. Special members can be added after the committee has been approved by the Graduate Division of the school/college, but these additions must be approved by the Graduate Division in advance of the exam.

View the current policy on Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition).

**Graduate Studies Representative on Doctoral Exam Committees**

The Graduate Studies representative must be a member of the Graduate Faculty with Regular or Dissertation graduate faculty status granted by a department other than the aspirant’s major department.

A faculty member from a different department who holds a courtesy appointment in the student's department may serve as the Graduate Studies representative or in fulfillment of the committee majority pursuant to the Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition) policy, but cannot serve in both roles at the same time.

The role of the Graduate Studies representative is designed to assure the appropriate standard of fairness, professionalism, judgment, and skill are applied throughout the examination process for the benefit of the institution and in the best interest of the student. As an independent participant observer, this member should have no personal or professional duality or conflict of interest with other members of the committee or the student that would prevent her or him from the unbiased fulfillment of these responsibilities.

The Graduate Studies representative is a voting member of the committee and has full rights to participate in the examination. In the case of any unsatisfactory or irregular aspects of the exam or violation of Graduate Studies policy, the Graduate Studies representative shall provide a written report to the Dean of Graduate Studies for consideration of further action.

Before the examination, the Graduate Division should provide a list of responsibilities to the Graduate Studies representative. A list of these responsibilities is provided below. In addition, the Dean’s Letter to the Graduate Studies Representative (http://graduate.ku.edu/sites/graduate.ku.edu/files/docs/excon/Dean-letter-to-Graduate-Studies-Rep_COGAedits.pdf) is always available. The Graduate Studies representative should observe and report on whether:

1. The examination was conducted in compliance with the policies and by-laws of Graduate Studies and the program’s Graduate Division.
2. The examination was held in a manner that was free and open to the public.
3. S/he was accorded full participatory rights in the examination.
4. S/he was accorded full voting rights as a member of the committee.
5. The examination was free from irregularities or unfairness to the student.
6. The examination was free from irregularities or unfairness among faculty members.
7. The examination, if repeated, occurred at least 90 days after the last unsuccessful attempt.

View the current policy concerning the Graduate Studies Representative on Doctoral Exam Committees (https://policy.ku.edu/graduate-studies/graduate-studies-representative-on-doctoral-exam-committees).

**Dual-Title Doctor of Philosophy Degrees**

**Definition**

A dual-title Ph.D. is a single degree with significant scholarship in two fields. At the completion of a dual-title degree program, the graduate will receive one diploma with two program names. Students enrolled in a dual-title degree program work concurrently in both areas of study.

Students are admitted initially into the major Ph.D. program. Upon being approved to pursue a dual-title Ph.D., students will be admitted into the dual-title Ph.D. program.

**Guidelines:**

Only existing programs approved to grant Doctor of Philosophy degrees may collaborate in creating a dual-title degree.

A dual-title degree is a single degree from KU. University-wide degree count reports will record a single Ph.D. in the major Ph.D. program discipline area. During the program proposal phase, doctoral programs must determine which program will be credited with the degree count. This department will also be responsible for reviewing the program during Board of Regents’ program review cycle.

All program requirements for both areas must be met as determined by the faculty in each program. The governing structure for dual-title Ph.D. programs is overseen by the Directors of Graduate Study in each participating Ph.D. program. Dual-title Ph.D.s. are conferred by the dean of the student’s major Ph.D. program.

A student applies for a dual-title degree only after being admitted and enrolled in an existing graduate doctoral program. Admissions procedures are described below.

**Admissions Procedures and Plan of Study for Dual-Title Ph.D. Programs**

**Admissions Procedures for a Dual-Title Ph.D.**

1. The student applies and is admitted to the major Ph.D. program. The student must enroll in the major Ph.D. program for at least one semester and be in good academic standing before applying to the dual-title Ph.D. program.
2. The student may then apply and be admitted to the dual-title Ph.D. program. This is an internal application procedure for students already admitted and enrolled at KU.
Plan of Study for Dual-Title Ph.D.

1. The student completes coursework in the major Ph.D. program and any additional coursework in the dual-title Ph.D. program. In many cases, the dual-title field coursework is integrated with the disciplinary field coursework. For example, PSYC 691 (Psychology of Aging) might meet the requirements for the dual-title degree in Psychology and Gerontology.

2. The two participating Ph.D. programs of the dual-title program develop sections in their graduate student handbooks that outline the nature of the dual-title degree, stipulate the array of courses typically taken, and detail other structural and practical requirements of a dual-title degree.

Each participating program oversees its own dual-title students and signs off on a curricular plan for its own program.

3. Ideally, the student’s advisor is a member of the major Ph.D. program and the dual-title program. If this is not possible, the student must have a co-chair from each of the two fields. This ensures integration of the two areas in the coursework, examinations, and the dissertation.

4. The candidacy examination committee for the dual-title degree-seeking student must be composed of faculty from the major Ph.D. program as well as at least one faculty member from the dual-title Ph.D. program. The comprehensive exam requirements of both programs must be met.

5. The dissertation topic should integrate both fields and be defended before a committee of graduate faculty from both programs.

The dean of the school for the major Ph.D. program confers the dual-title degree. The student’s diploma carries the name of both programs; for example: Doctor of Philosophy in Psychology and Gerontology. One Classification of Instructional Programs (CIP) code is assigned for the dual title degree.

M.A., M.S., and Ph.D. with a Major in Interdisciplinary Studies

Only superior students admitted and enrolled in a graduate program at KU whose proposed studies require direction not available in any single department are considered for admission to an Interdisciplinary Studies program. Before seeking acceptance, an applicant must assemble a graduate faculty advisory committee headed by a faculty member authorized to direct master’s research (for M.A. or M.S. in Interdisciplinary Studies) or doctoral research and dissertations (for Ph.D. in Interdisciplinary Studies). The applicant, in conjunction with the committee, must prepare a proposal for the course of study. The proposal must provide a rationale for the particular mix of disciplines, demonstrating how each contributes to a central theme or focus. It must also show that the proposed program cannot be achieved through an established master’s or doctoral program at KU.

The student seeking to enter the Interdisciplinary Studies program must have an outstanding academic record (a grade-point average of 3.75 or higher on a 4.0 scale for graduate courses or a grade-point average of 3.5 or higher on a 4.0 scale for undergraduate courses if no graduate courses have been taken) and must be admitted to and enrolled in a graduate program at KU at the time of application. A graduate student who has failed to maintain the required grade-point average is not eligible for the Interdisciplinary Studies program. A student is not eligible for this program if he or she has tried and failed to achieve candidacy in a regular graduate department or program at KU.

The student is expected to assume the initiative in determining his or her potential eligibility through consultation with graduate advisors and, if deemed eligible, in forming an advisory committee and preparing documentation to support the application.

Preadmission Procedures

To enter the program, a student should:

1. Determine that KU offers courses and research in the areas appropriate to the student’s interest(s).
2. Prepare a tentative study plan based on those offerings to serve as a basis for initial discussion.
3. Approach a professor whose interests are comparable to those of the student and request that he or she act as advisor. Normally this professor is a faculty member of the program of principal interest to the student. To grant an M.A. or M.S. in Interdisciplinary Studies, it is essential that the school has the authority to grant master’s degrees. To grant a Ph.D. in Interdisciplinary Studies, it is essential that the school has the authority to grant Doctor of Philosophy degrees. The selected professor must be a full member of the graduate faculty and authorized to chair doctoral dissertation committees for Ph.D. in Interdisciplinary Studies.
4. After a professor agrees to serve as an advisor, the student should assemble an advisory committee of at least three additional professors representing the disciplines covered in the Interdisciplinary program. At least two disciplines or departments must be represented.
5. In conjunction with the advisor and the committee, the student should prepare a proposal for study, including:
   - A statement, with supporting documentation, that the proposed Interdisciplinary Studies program cannot be accomplished through established programs.
   - A statement of the interdisciplinary or transdisciplinary nature of the proposed area of study.
   - A definition of the field of study incorporating, in a consistent way, a description of how each included discipline contributes to the broader field.
   - An outline of the course of study, indicating substantive work in the fields represented. Readings courses and independent study do not substitute for regular courses.
   - A description of the method for satisfying research skills and responsible scholarship requirements.
   - A description of the comprehensive examination procedures for the Ph.D. (nature of the examinations and possible examining committee) or final examination for the M.A./M.S.
   - A description, to the extent possible, of the nature of the field in which a dissertation or master’s thesis might be written, indicating the respective contributions of the selected disciplines to the final product.
   - Attach the following:
     - complete transcripts of all previous work,
     - a cover sheet, signed by committee members, indicating their support of the proposal,
     - letters of recommendation and other appropriate supporting documents.
Note: The diploma indicates the degree awarded as "M.A. in Interdisciplinary Studies," "M.S. in Interdisciplinary Studies," or "Ph.D. in Interdisciplinary Studies," and does not specify the area of specialization. The transcript notes the area of specialization as determined by the admissions committee.

Admission and Review Procedure
Upon completion of the above, the student must submit the application for admission into the Interdisciplinary Studies program to the Dean of Graduate Studies. The Dean of Graduate Studies appoints an admission committee consisting of (a) the Associate Dean of Graduate Studies or the associate dean’s designate for the school most involved in the interdisciplinary undertaking (the school in which the major advisor resides), (b) two or more doctoral chairing faculty members from unrelated fields, including at least one member of the Executive Council of the Graduate Faculty, and (c) the Department Chair or the Director of Graduate Studies of the department in which the student resides at time of application. The Dean of Graduate Studies serves as ex officio chair of the Interdisciplinary Studies admissions committee. The committee reviews the documents and may, if necessary, interview the student and the advisor for clarification and additional information or to discuss suggested revisions to the proposal.

Approved Program Implementation
Upon acceptance of the proposal and admission to the Interdisciplinary Studies program, the student is admitted to the school of the major advisor to facilitate record keeping and to provide a central administrative office. The Associate Dean or the Director of Graduate Studies of that school must enroll the student and monitor the program. Along with the major advisor, s/he must make annual reports to Graduate Studies on the student’s progress. These reports are distributed to the directors of other involved programs along with a request to supply any additional information regarding the student’s performance. Proposals for major deviations from the approved course of study must be submitted for review by Graduate Studies and by the graduate studies office of the school in which the student resides. It is understood that no additional requirements unique to traditional graduate programs of the school(s) or departments may be imposed unless stated explicitly in the approved study plan.

Once approved, changes to the program plan must be approved by a Graduate Studies committee, appointed by the Dean of Graduate Studies. Significant curricular changes may require a new proposal and admissions process.

All basic rules and requirements for the Master of Arts, Master of Science, and Doctor of Philosophy degrees apply to Interdisciplinary Studies programs. These include program time constraints, residence requirement, post-comprehensive enrollment, final examinations, research skills and responsible scholarship requirements, dissertation submission and publication, grade-point average, etc. (See Master’s Degree Requirements and Doctoral Degree Requirements in this section of the online catalog.)

View the current Lawrence and Edwards Campus policy on interdisciplinary studies (http://policy.ku.edu/graduate-studies/ma-ms-phd-interdisciplinary-studies).

Combined Degrees
Combined degrees are granted in programs meeting the requirements of the graduate master’s or doctoral degree and the professional post-baccalaureate degree. View the current list of all master’s and doctoral degrees on the Graduate Studies Academics page (http://wwwgraduate.ku.edu/find-graduate-program). View the current Lawrence and Edwards Campus policy on graduate degrees (http://policy.ku.edu/graduate-studies/degrees).

Distance Education
The University of Kansas offers online and hybrid courses and certificate and degree programs. For more information about specific online course and degree program options, students should contact their academic department of study. Similar to regular courses, the availability of online courses varies by semester and year.

Online or Hybrid Graduate Programs

- Master of Science in Pharmaceutical Chemistry (https://pharmchem.ku.edu/degrees)
- Master of Science in Education in Education Administration (http://elps.soe.ku.edu/academics/eadmin/mse)
- Master of Science in Education in Special Education Transition Education and Services (http://specialedu.soe.ku.edu/academics/transitions/mse)
- Master of Science in Education in Curriculum and Instruction - Reading
- Master of Science in Education in Curriculum and Instruction
- Doctor of Philosophy in Pharmaceutical Chemistry

Additional online programs may be available. View KU’s current online or hybrid programs (https://online.ku.edu/programs) or contact the KU Center for Online and Distance Learning (http://www.independentstudy.ku.edu/index.shtml) for more information on online and hybrid courses.

Independent Study
Independent study is a research experience or directed readings independently pursued through an academic department. Students should contact their academic department to discuss independent study opportunities to investigate a special research problem or directed readings in an area not covered by regular courses.

Eligibility Criteria
Degree-seeking graduate students who wish to apply to a certificate program must be in good standing in their departments or programs. An individual who is not currently a degree-seeking graduate student at KU must be admitted directly to a graduate certificate program. Application procedures for admission to a graduate certificate program are discussed in the Admissions section of the academic catalog.

With the consent of the certificate-granting department, degree-seeking or non-degree seeking students may count up to (2) courses — for a maximum of 8 credit hours — taken at KU prior to admission to the certificate program toward the graduate certificate. Any course credits that are counted are subject to the specific certificate coursework requirements in the certificate program. Graduate certificates are not granted retroactively and no exceptions to this two-course limit will be
granted. Students who withdraw from a degree program and subsequently seek admission to a certificate program are subject to these same limits (i.e., 8 hours).

If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking students, applicable courses taken for the graduate certificate program may be counted toward the degree with the approval of the degree-granting program.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program.

Graduate credit from another institution may not be transferred to a KU graduate certificate program.

View the current policy on eligibility and admission to a graduate certificate program (http://policy.ku.edu/graduate-studies/grad-certification-program-admission). A current list of all certificate programs is available on the KU Academics page (http://www.ku.edu/academics).

Policies and Processes for Graduate Certificate Programs

A graduate certificate is a focused collection of courses that, when completed, affords the student some record of coherent academic accomplishment in a given discipline or set of related disciplines. Students may be awarded these certificates upon completion of a well-defined program of course work. The didactic material comprised within a graduate certificate program may represent a more practice-oriented subset of an existing graduate discipline.

A graduate certificate program will comprise no less than 9 and generally no more than 18 credit hours of course work in a particular discipline or related disciplines of study.

All proposals for graduate certificate programs will be adopted for a seven-year time period. The certificate program will expire at the end of that period. The program may request renewal of the certificate program by sending an updated program proposal, endorsed by the department and the school or college, to the Executive Council of Graduate Faculty. The proposal will be evaluated for an additional seven-year period. Graduate Studies will remind the graduate certificate program about its expiration. If a program expires or is discontinued, no new students may be accepted into the program by semester, and the number of students who complete the program by semester.

The courses taken in the graduate certificate program will be listed on the student’s transcript and recognition of the earned certificate will also be posted on the transcript.

The awarding of graduate certificates will coincide with the August, December and May graduations at the University of Kansas. The certificate-awarding department will forward its list of certificate recipients to the Graduate Division of the school or college that holds the certificate program. The Graduate Division will forward names of the students completing graduate certificates in a given semester to the Graduate Studies office. The same degree-granting deadline dates will apply to the awarding of graduate certificates.

• Students will file the Application for Graduation in the semester they complete their graduate certificate. This process notifies the University Registrar’s office of the names of certificate recipients along with the corresponding names of the completed certificate programs.

• Each semester, Graduate Studies will provide departments with authorized Graduate Certificates for students who successfully complete all certificate program requirements. The department will be responsible for completing the certificates and presenting them to the students.

Graduate certificates will not be recognized by any Graduate Studies official graduation ceremony.

View the current graduate certificate policies and processes (http://policy.ku.edu/graduate-studies/certificate-programs).

The Graduate Faculty

The Graduate Faculty consists of members of the university faculty and other persons qualified by training and experience who are duly nominated and appointed. Only members of the Graduate Faculty may teach courses for graduate credit, supervise master’s programs and theses, or serve on doctoral committees. There are three types of appointment to the Graduate Faculty:

• Regular Status (http://policy.ku.edu/graduate-studies/grad-faculty-status)

• Dissertation Status (http://policy.ku.edu/graduate-studies/grad-faculty-dissertation-status) (Dissertation Chair Status)

• Special Member Status (http://policy.ku.edu/graduate-studies/grad-fac-special-members-status)

For a side-by-side comparison of these Graduate Faculty appointment types, view the current policy on Graduate Faculty Appointments (http://policy.ku.edu/graduate-studies/graduate-faculty-appointments).

Appointment Instructions for Degree Programs

To appoint a faculty member to either Dissertation or Special Member status, departments or programs should submit the Graduate Studies Recommendation for Appointment to the Graduate Faculty form through the Progress to Degree (PtD) system. Departments should send the appointment request to the appropriate Graduate Division along with a current vita that includes a list of graduate courses the appointee has taught and a list of graduate students’ committees on which the appointee has served. Once approved by the Graduate Division, the form proceeds to the Office of Graduate Studies for final approval. For more information, see PtD Forms (http://www.graduate.ku.edu/progress-degree-forms).

Regular Graduate Faculty Status

Any faculty member who is appointed to a tenure-track position automatically receives Regular status on the Graduate Faculty. These members of the Graduate Faculty may:

• teach courses for graduate credit;

• supervise the master’s programs and thesis students;
• serve on master’s and doctoral committees; and
• chair master’s committees.

When appropriate, a qualified member of the regular Graduate Faculty may be nominated to serve as co-chair of a specific dissertation committee if a faculty member with dissertation chair status serves as co-chair of the committee and agrees to ensure that all requirements are met. However, this does not apply to circumstances where a regular member of the Graduate Faculty had dissertation chair status removed.

Present or newly appointed faculty members in tenured/tenure-track appointments with the rank of assistant professor or above in departments or programs with approved graduate programs are granted regular membership in the Graduate Faculty, provided they have received the terminal degree in their field of specialization or have acquired equivalent training and/or professional experience as determined by the appropriate Graduate Division.

In special cases where faculty members who hold regular membership in the Graduate Faculty enroll in a KU graduate program as part of their professional development, they may be permitted to retain their Graduate Faculty status. They may not supervise or serve as the instructor of record for students that are peers in the graduate program in which they are enrolled.

To hold regular membership in the Graduate Faculty, a faculty member must continue to show evidence of a pattern of productive professional activity demonstrating the ability to contribute to high-quality graduate education. The form that productive professional activity may take varies across disciplines. Conventional evidence of such activity includes such things as:

• effective teaching;
• scholarly publication;
• participation in professional societies; and
• other scholarly activity.

Graduate degree programs are responsible for monitoring faculty with regular membership in the Graduate Faculty. View the current policies on Regular Graduate Faculty status (http://policy.ku.edu/graduate-studies/grad-faculty-status).

Dissertation Status

To qualify for the privilege of chairing doctoral dissertation committees, a regular member of the Graduate Faculty must demonstrate continuing activity commensurate with being an established scholar in his or her field and involvement in the graduate education program as evidenced by:

• teaching graduate courses;
• advising and mentoring graduate students and serving on thesis and dissertation committees;
• maintaining an ongoing program of scholarly activity which includes a record of scholarship, publication, and other contributions to the field.

It is the graduate program’s responsibility to nominate members of the Graduate Faculty for authorization to chair doctoral committees and to provide evidence of scholarship and involvement in the graduate education program. Authorization to chair dissertation committees is reviewed as part of each graduate program review.

View the current policy on Dissertation Graduate Faculty status (http://policy.ku.edu/graduate-studies/grad-faculty-dissertation-status).

Special Member Status

Special membership may be granted to employees of the university and its affiliates who do not have tenured/tenure-track faculty appointments in a department granting graduate degrees, or to individuals who are not employed by the university or its affiliates but who are uniquely qualified by training or experience and otherwise meet the established criteria for regular membership in the Graduate Faculty.

Such membership is for the purpose of:

• teaching a graduate course or courses;
• having graduate courses cross-listed as KU courses if they are part of a cooperative graduate program between KU and the appointee’s home institution; or
• serving on the thesis, dissertation, or examination committee of a particular student or students.

Special memberships may be requested for up to a maximum period of five calendar years for teaching purposes or for the duration of the specified committee assignment. Special memberships are renewable based on the same criteria as the initial appointment.

All nominations for special membership must state clearly the specific purposes for which the nomination is being sought and, when it can be known in advance, the length of time for which it is being requested.

Special appointments are reviewed by the appointing graduate department, the appropriate Graduate Division, and the Dean of Graduate Studies and continued as appropriate.

Serving on a master’s or dissertation committee:

Graduate Faculty with special status are not authorized to chair master's or doctoral committees. When appropriate, Graduate Studies may authorize a qualified committee member with special status to serve as co-chair of a specific thesis or dissertation committee. While committees are not required to have a co-chair, the student or the committee members may decide to select a co-chair. The chair must have dissertation status, while the co-chair can hold any status.

Graduate faculty with special status in a student's department may not serve as the Graduate Studies representative or in fulfillment of the committee majority pursuant to the doctoral committee composition policy.

View the current policy on Special Graduate Faculty status (http://policy.ku.edu/graduate-studies/grad-fac-special-members-status).

Non-reappointment, Graduate Faculty Eligibility, and Procedures When Graduate Faculty Are Given Terminal Contracts

Faculty members given a notice of non-reappointment are not eligible to hold Graduate Faculty status. The Provost's Office will provide Graduate Studies with a written list of faculty who receive a notice of non-reappointment. Graduate Studies will remove Graduate Faculty status for these faculty, beginning with the appointment period for which the terminal notice is effective.

Upon non-reappointment the faculty member is no longer eligible for Graduate Faculty status. The named faculty member will no longer be
allowed to teach future courses for graduate credit or to serve on graduate students’ committees.

The appropriate dean of the school or college may request, in writing, that the Dean of Graduate Studies grant an exception to this policy. In granting such an exception, the Dean of Graduate Studies may give the faculty member permission to serve on a graduate student’s committee if the graduate student will meet all degree requirements within the semester that the terminal notice takes effect. The faculty member in question will be given a copy of the initial letter, sent to the Dean of Graduate studies, which requested and defined the exception.

View the current policy on non-reappointment (http://policy.ku.edu/graduate-studies/grad-faculty-terminal) for procedures that apply when Graduate Faculty are given terminal contracts.

University Faculty and Advanced Degrees

Members of the university faculty who have, or are eligible for, tenure or who hold any rank above that of instructor will not be granted degrees or certificates. Because of the variety of appointments covered by such terms as Lecturer, Associate, or the like, every case must be considered individually. A department or program that wishes to accept a faculty member as a student must make a recommendation to Graduate Studies before a faculty member begins a graduate degree or certificate program. Similarly, a department or program that wishes to hire a student already in a graduate program must make a recommendation to Graduate Studies before a faculty appointment is made. Although appointing departments are expected to bring this rule to the attention of prospective appointees who plan to seek degrees or certificates, the responsibility for initiating a request for waiver of the rule lies with the student. Waivers may be granted in rare cases where the student and the department demonstrate satisfactorily that circumstances and conditions assure freedom from conflict of interest and undue influence.

View the current policy on university faculty and advanced degrees (http://policy.ku.edu/graduate-studies/university-faculty-advanced-degrees).

Graduate Research Assistants, Graduate Teaching Assistants, and Graduate Assistants

The following premises and eligibility requirements govern all graduate research assistant (GRA), graduate teaching assistant (GTA) and graduate assistant (GA) appointments at the University of Kansas, Lawrence:

Principles:

1. Individuals who enroll in graduate educational programs at the University of Kansas do so in order to attain specific educational goals. It is the University’s responsibility to help ensure that graduate students attain their academic goals in a reasonable amount of time and move on to the next stage in their careers, whether to another advanced degree program or to professional employment.

2. When departments and schools offer GRA, GTA, or GA appointments, the assistantships must contribute to the training experience of the graduate student.

3. GRA, GTA, and GA responsibilities should be in balance with the student’s responsibilities to the graduate program. For appointments of .5 FTE, the expectation is that the assigned duties will average no more than 20 hours per week during the semester. For appointments at other percentages, the number of hours per week must be proportional to the appointment percentage.

Appointment Limits:

GRA appointments shall not normally exceed 50% (0.50 FTE). GTA appointments in excess of 0.50 FTE must be approved by the Graduate Studies or by the Dean’s Office of the College of Liberal Arts & Sciences in advance of an appointment offer and will be approved only in extraordinary circumstances. See the Memorandum of Agreement (http://humanresources.ku.edu/sites/humanresources.ku.edu/files/docs/gta_moa_2014.pdf) between The University of Kansas and the Board of Regents and the Kansas Association of Public Employees (representing graduate teaching assistants at the University of Kansas, Lawrence).

GRA appointments may be made up to 72.5% (0.725 FTE).

GA appointments shall not normally exceed 50% (0.50 FTE). GA appointments in excess of 0.50 FTE must be approved by the Office of Graduate Studies in advance of an appointment offer and will be approved only in special circumstances.

Although GRA, GTA, and GA appointments in excess of 50% have the undesirable potential to extend time towards degree, GRA appointments and combined GRA/GTA or GRA/GA appointments of up to 72.5% (0.725 FTE) will be approved so long as the GTA or GA component of the appointment does not exceed 0.50 FTE. GTA, GRA, or GA appointments above 72.5% (0.725 FTE), or combined appointments above 72.5% (0.725 FTE), must additionally be authorized by the appropriate dean(s) or vice provost(s) in accordance with the policy on Student Employee Eligibility Requirements and Appointment Limits (http://policy.ku.edu/human-resources/student-employee-eligibility-aca). Exceptions for GTA appointment limits must comply with the provisions of the GTA Memorandum of Agreement (http://www.humanresources.ku.edu/files/documents/gta_moa.pdf).

Departments are expected to monitor appointments in excess of 50% (0.50 FTE) to ensure that the graduate students’ assistantship assignments enhance their academic preparation and do not interfere with progress towards degree.

Graduate Research Assistantships

Graduate research assistantships may be available to graduate students. For further information, the applicant should write directly to the chair or graduate advisor of the major department.

Graduate Teaching Assistantships

Graduate teaching assistantships may be available to graduate students through graduate departments. Graduate students should apply directly to the department for GTA appointments. Graduate teaching assistantships in Lawrence are governed by a Memorandum of Agreement between KU, the Kansas Board of Regents, and the Kansas Association of Public Employees, which represents KU GTAs in Lawrence. The Memorandum of Agreement, with additional information on tuition and fee payment, appointments, wages, benefits, and other topics of interest to GTAs, is available on the Graduate Studies website (http://www.graduate.ku.edu).

Graduate Assistantships

Graduate assistantships may be available to graduate students. For further information, the applicant should write directly to the chair or graduate advisor of the major department.
GRA, GTA, and GA Eligibility (Lawrence campus)

GRA Eligibility

The following eligibility requirements govern all Graduate Research Assistant (GRA) appointments at the University of Kansas, Lawrence:

Graduate Research Assistants are salaried student employees who perform research that is in their fields (or a closely related field) of study and is integral to the student’s education (e.g., dissertation topic). The duties performed are under the direct supervision of faculty or research professionals. The duties do not involve classroom instruction. GRA appointments must be approved by the Office of the Vice Chancellor for Research (for all funds under Research and KUCR), the Budget Office (for the professional schools’ state- and endowment-funded GRA positions), or the College of Liberal Arts and Sciences (for state- and endowment-funded GRA positions in CLAS).

In order to be eligible for a GRA appointment, a graduate student must meet all of the following conditions:

1. During the term of appointment, the person is admitted to and enrolled in a graduate degree program offered by the University of Kansas;
2. During the fall or spring semester, the person is enrolled in no fewer than 6 credit hours required for the student's graduate degree. During the summer session, the GRA must be enrolled in coursework related to his or her graduate program. The number of hours must be determined by the student's advisor and must reflect, as accurately as possible, the student's demand on faculty time and university facilities. Generally, an enrollment of 3 credit hours is appropriate for the summer session.
   a. Enrollment and Post Comps: Upon successful completion of the doctoral comprehensive examination and all other Graduate Studies and departmental requirements for candidacy to the doctoral degree and upon completion of 18 post-comprehensive credit hours, the person may enroll in 1 or more dissertation, thesis, or equivalent credit hours as approved by the Graduate Studies Office or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate to qualify for a graduate research assistantship appointment. [Note: Candidates for professional doctoral degrees may enroll in dissertation-equivalent hours as approved by Graduate Studies. More detailed information about post-comprehensive enrollment can be found under “Regulations” in the Graduate Studies section of the catalog.]
3. During the term of appointment, the GRA must be in academic good standing and be making satisfactory progress toward a graduate degree, as determined by the Office of Graduate Studies and the department in which the person is enrolled. [Note: Students who are admitted to a degree program on provisional status are not considered to be in academic good standing for the purpose of GRA appointments. Exceptions may be granted by the Dean of Graduate Studies under extraordinary circumstances.] A graduate student must maintain a cumulative grade point average (GPA) of 3.0 to remain in academic good standing. However, if a department judges that a graduate student whose GPA falls below 3.0 after the first semester at KU is nonetheless making satisfactory progress, the department may recommend to the Dean of Graduate Studies that the student be allowed to keep his or her GRA position for 1 additional semester.
4. The person must successfully pass a background check established by the university.
5. A student who has earned a graduate degree may not continue in a GRA appointment after the graduation date unless he or she has just completed a master's degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

Enrollment Exceptions for GRAs

Doctoral Candidates: In accordance with Graduate Studies requirements, after passing the comprehensive oral examination for a doctoral degree, the candidate must be continuously enrolled, including summer sessions, until all requirements for the degree are completed, and each enrollment must reflect, as accurately as possible, the candidate’s demand on faculty time and University facilities. Until 18 post-comprehensive hours are completed, the candidate must enroll in a minimum of hours each semester and 3 hours during the summer session. Doctoral candidates may be enrolled in fewer than 6 post-comprehensive hours in the fall and spring semesters and in fewer than 3 hours during the summer session if all of the criteria described in 2.a. (above) are met.

In certain master's degree programs, students who are in the final semester may be able to complete the course and hours requirements for the degree while enrolling in fewer than 6 hours. Such students may enroll in fewer than 6 hours and still retain eligibility to hold a position as a Graduate Research Assistant (GRA), provided that the student will not be continuing in a doctoral program at the University of Kansas. The option of enrolling in fewer than 6 hours during the final semester is available only to master's students with GRA appointments. It is not available to master's students with GTA or GA appointments.

Note: Different enrollment criteria may be used in determining eligibility for student financial aid and student loan deferments. GRAs are advised to consult with Financial Aid and Scholarships (http://affordability.ku.edu) to determine student financial aid eligibility.

Enrollment Exception Process

In order to certify that a GRA is eligible to enroll in fewer than 6 credit hours, campus departments must submit the Certification of Eligibility to Enroll in Fewer than Six Hours Form (https://policy.ku.edu/graduate-studies/doctoral-GRA-eligibility-fewer-six-hours) (for doctoral candidates - GTAs, GRAs, and GAs), or the Certification of Eligibility form for Master’s Level Graduate Research Assistants (https://policy.ku.edu/graduate-studies/TRA-enroll-masters-under-six-hours).

View the current policy on GRA appointment eligibility (http://policy.ku.edu/graduate-studies/GRA-appointment-eligibility).

GA Eligibility

The following eligibility requirements govern all Graduate Assistant (GA) appointments at the University of Kansas, Lawrence:

Graduate Assistants are salaried student employees (as determined by Human Resources and Equal Opportunity) who hold a position that furthers the professional and/or academic development of the graduate student. The duties performed are professional in nature and under the direct supervision of faculty, academic professionals, or administrators. The duties do not involve classroom instruction or research integral to the student's degree program or dissertation. The graduate assistant's responsibilities may include, but are not limited to, administrative and professional internships. The Dean of Graduate Studies must approve GA appointments. [Note: Graduate Assistant positions are a distinct category
of graduate student support. This category does not include Graduate Research Assistants or Graduate Teaching Assistants.]

In order to be eligible for a GA appointment, a graduate student must meet all of the following criteria:

1. During the term of appointment, the person is admitted to and enrolled in a graduate degree program offered by the University of Kansas;
2. During the fall and/or spring semesters in which the graduate student holds a GA appointment, he or she must be enrolled in no fewer than 6 credit hours required for the student’s graduate degree. GAs on summer session appointments may enroll but are not required to do so unless they are doctoral candidates, who are required to be continuously enrolled.
   a. Enrollment and Post Comps: Upon successful completion of the doctoral comprehensive examination and all other Graduate Studies and departmental requirements for candidacy to the doctoral degree and upon completion of 18 post-comprehensive credit hours, the person may enroll in 1 or more dissertation, thesis, or equivalent credit hour(s) as approved by Graduate Studies or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate to qualify for a graduate assistantship appointment. [Note: Candidates for the professional doctoral degrees may enroll in dissertation-equivalent hours as approved by Graduate Studies. More detailed information about post-comprehensive enrollment can be found under “Regulations” in the Graduate Studies section of the catalog.]
3. During the term of appointment, the GA must be in academic good standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the person is enrolled. Students who are admitted to a degree program on provisional status are not considered to be in academic good standing for the purpose of GA appointments. Exceptions may be granted by the Dean of Graduate Studies under extraordinary circumstances. A graduate student must maintain a cumulative grade point average (GPA) of 3.0 to remain in academic good standing. However, if a department judges that a graduate student whose GPA falls below 3.0 after the first semester at KU is nonetheless making satisfactory progress, the department may recommend to the Dean of Graduate Studies that the student be allowed to keep his or her GA position for 1 additional semester.
4. The person must successfully pass a background check established by the university.
5. A student who has earned a graduate degree may not continue in a GA appointment after the graduation date unless he or she has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

**Enrollment Exceptions for GAs who are Doctoral Candidates**

In accordance with Graduate Studies requirements, after passing the comprehensive oral examination for a doctoral degree, the candidate must be continuously enrolled, including summer sessions, until all requirements for the degree are completed, and each enrollment must reflect, as accurately as possible, the candidate’s demand on faculty time and university facilities. Until 18 post-comprehensive hours are completed, the candidate must enroll in a minimum of 6 hours each semester and 3 hours during the summer session. Doctoral candidates may be enrolled in fewer than 6 post-comprehensive hours in the fall and spring semesters and in fewer than 3 hours during the summer session if all of the conditions described in 2.a. (above) are met.

**Note:** Different enrollment criteria may be used in determining eligibility for student financial aid and student loan deferments. GAs are advised to consult with Financial Aid and Scholarships (http://affordability.ku.edu) to determine student financial aid eligibility.

**Enrollment Exception Process**

In order to certify that a GA is eligible to enroll in fewer than 6 credit hours, campus departments must submit the Certification of Eligibility to Enroll in Fewer Than Six Hours Form (https://policy.drupal.ku.edu/graduate-studies/doctoral-GTA-eligibility-fewer-six-hours) for doctoral students.

View the current policy on GA appointment eligibility (http://policy.ku.edu/graduate-studies/GA-appointment-eligibility).

**GTA Eligibility**

The following eligibility requirements govern all Graduate Teaching Assistant (GTA) appointments at the University of Kansas, Lawrence:

Graduate Teaching Assistants are salaried student employees whose job duties consist primarily of direct involvement in classroom or laboratory instruction. The duties are performed under the supervision of faculty.

The University also requires that a GTA’s teaching assignment be in his or her own field of study or one that is closely related. Out-of-field appointments require consultation with the student’s home academic unit and the explicit approval of the Office of Graduate Studies or College of Liberal Arts and Sciences.

In accordance with the Memorandum of Agreement between the University of Kansas and the Board of Regents and the Kansas Association of Public Employees (http://humanresources.ku.edu/sites/humanresources.ku.edu/files/docs/gta_moa_2014.pdf) (MOA), in order to be eligible for a GTA appointment, a graduate student must meet all of the following conditions:

1. During the term of appointment, the person is admitted to and enrolled in a graduate degree program offered by the University of Kansas;
2. During the term of appointment, the person is enrolled in no fewer than 6 graduate credit hours per semester or other credit hours as required for the student's graduate degree and as approved by Graduate Studies or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate. [Note: GTAs on summer session appointments may enroll but are not required to do so unless they are doctoral candidates, who are required to be continuously enrolled.]
   a. Enrollment and Medical Leave: Should the person be unable to enroll in 6 graduate or other approved hours for reasons of medical condition or other hardship, that person may, with supporting documentation and the approval of the department of employment (and the department of study in cases in which the two are different), petition the Graduate Studies Office or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate that this requirement be waived. Final approval rests with the Graduate Studies Office or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate.
   b. Enrollment and Post Comps: Upon successful completion of the doctoral comprehensive examination and all other Graduate Studies and departmental requirements for candidacy to the doctoral degree and upon completion of 18 post-comprehensive credit hours, the person may enroll in 1 or more dissertation, thesis, or equivalent credit hours as approved by Graduate
3. During the term of appointment, the GTA must be in academic good standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the person is enrolled. [Note: Students who are admitted to a degree program on probationary or provisional status are not considered to be in academic good standing for the purpose of GTA appointments. Exceptions may be granted by the Dean of Graduate Studies under extraordinary circumstances.] A graduate student must maintain a cumulative grade point average (GPA) of 3.0 to remain in academic good standing. However, if a department judges that a graduate student whose GPA falls below 3.0 after the first semester at KU is nonetheless making satisfactory progress, the department may recommend to the Dean of Graduate Studies or the Dean of the College of Liberal Arts and Sciences that the student be allowed to keep his or her GTA position for 1 additional semester.

4. The graduate student must satisfy any and all English proficiency criteria established by the Regents and/or the university. [Note: Prior to finalization of a GTA appointment, every prospective GTA must be interviewed and have his or her spoken English competency certified by no fewer than 3 institutional personnel, at least 1 of whom should be a student. Non-native speakers of English must achieve a minimum score of 50 on the SPEAK (Speaking Proficiency English Assessment Kit), a score of 22 on the iBT (Internet-based TOEFL), or an 8 on the IELTS (International English Language Testing System).]

5. During the term of the appointment, the GTA's assigned responsibilities consist primarily of direct involvement in classroom or laboratory instruction.

6. The GTA has satisfactorily completed all of the components of the orientation and training as specified in section 7 of the MOA within the timeframes established by the university.

7. The department may require a graduate teaching assistant to be on campus to assume the responsibilities of his/her employment, not to exceed five weekdays (excluding weekend days) prior to the first day of classes each semester [Note: In accordance with Article 5, Section 1, of the MOA, “Individuals who are being reappointed as GTAs, regardless of whether the appointment is for an academic year or a shorter period, shall begin work on the first day of classes for each semester for which they are appointed, unless notified by the GTA’s department of earlier required assignments. Attendance at GTA orientation prior to the start of the semester is required as a condition of employment for any person who has not previously served as a GTA at the University of Kansas or for any returning GTA who has been identified as needing to attend GTA orientation.”]

8. The person must successfully pass a background check established by the university.

In addition to the conditions of appointment set forth in the MOA, the University has established the following condition:

A student who has earned a graduate degree may not continue in a GTA appointment after the graduation date unless he or she has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

**Enrollment Exceptions for GTAs who are Doctoral Candidates**

In accordance with Graduate Studies requirements, after passing the comprehensive oral examination for a doctoral degree, the candidate must be continuously enrolled, including summer sessions, until all requirements for the degree are completed, and each enrollment must reflect, as accurately as possible, the candidate’s demand on faculty time and university facilities. Until 18 post-comprehensive hours are completed, the candidate must enroll in a minimum of 6 hours each semester and 3 hours during the summer session. Doctoral candidates may be enrolled in fewer than 6 post-comprehensive hours in the fall and spring semesters and in fewer than 3 hours during the summer session if all of the conditions described in 2.b (above) are met.

**Note:** Different enrollment criteria may be used in determining eligibility for student financial aid and student loan deferments. GTAs are advised to consult with Financial Aid and Scholarships (http://affordability.ku.edu) to determine student financial aid eligibility.

**Enrollment Exception Process**

In order to certify that a GTA is eligible to enroll in fewer than 6 credit hours, campus departments must submit the Certification of Eligibility to Enroll in Fewer than Six Hours Form (https://policy.drupal.ku.edu/graduate-studies/doctoral-GTA-eligibility-fewer-six-hours) for doctoral students.

View the current policy on GTA appointment eligibility (http://policy.ku.edu/graduate-studies/GTA-appointment-eligibility).

**Time Limits on Appointments of Graduate Teaching Assistants**

The University of Kansas, Lawrence, has established limits on appointments to graduate teaching assistantships (summer appointments excluded) as specified below. Departments may establish shorter limits if appropriate to their programs. In determining whether a person has met the limit described here, all semesters served as a GTA within any department of the university shall be counted.

- A student who is admitted to a graduate degree program to obtain only a master's degree is limited to 12 semesters of GTA appointments.
- A student who is admitted to a graduate degree program to obtain only a doctorate is limited to 10 semesters of GTA appointments.
- A student who is admitted to a graduate program to obtain both a master's and a doctorate is limited to 12 semesters of GTA appointments.
- In no case may a student exceed the GTA appointment limits indicated here. No GTA may be appointed in excess of 12 semesters.

In accordance with the provisions of the Memorandum of Agreement (http://humanresources.ku.edu/sites/humanresources.ku.edu/files/docs/gta_moa_2014.pdf) (MOA) between the University of Kansas and the Board of Regents and the Kansas Association of Public Employees, a GTA who has exhausted the semester limits may be considered for appointment as a lecturer.

**Note:** This policy does not apply to summer session GTA appointments. Semesters in which a student's sole appointment was as a graduate assistantship appointment. [Note: Candidates for professional doctoral degrees may enroll in dissertation-equivalent hours as approved by Graduate Studies. More detailed information about post-comprehensive enrollment can be found under "Regulations" in the Graduate Studies section of the catalog.]
research assistant (GRA) do not count against the GTA-semester limit. All GTA appointments are made pursuant to the provisions of the MOA.

**Out-Of-Field GTA Appointments**

**General Policy on GTA Appointments, Training, and Mentoring**

University policy ([http://policy.ku.edu/graduate-studies/GTA-appointment-eligibility](http://policy.ku.edu/graduate-studies/GTA-appointment-eligibility)) stipulates that a graduate teaching assistantship must be an integral part of a student's academic endeavor, serving as a logical complement to the graduate student's program of study. While the GTA experience is often part of a student's preparation to assume a full-time role in a specific field in academia, the GTA experience also provides valuable training in the science and art of teaching. Accordingly, departments or schools are expected to offer quality teaching-related experiences for GTAs and to designate faculty who will work closely with GTAs to advise them and help them improve their teaching skills. Teaching-related training is integral to the GTA experience.

**Guidelines and Criteria for Out-Of-Field Appointments**

It is assumed that the majority of GTAs have appointments within their home departments. However, undergraduate teaching needs frequently arise in departments and programs that do not have a specific and circumscribed pool of graduate students from which GTAs can be drawn. Recognizing that graduate students can make significant contributions to the undergraduate teaching mission of the university by teaching out of their field and that there is great value in this teaching experience as they learn the science and art of teaching undergraduate students, the university will allow out-of-field GTA appointments with the following stipulations:

- A request for an out-of-field appointment has to be approved by the student's home department or program as well as the department or program offering the teaching appointment.
- The out-of-field appointment has to be approved by the school or college of the home department or program as well as the school or college of the department or program offering the teaching appointment.
- Because it is university policy ([http://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs](http://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs)) to waive some or all of the differential tuition for GTAs who are enrolled in schools that charge differential tuition, a unit wishing to extend an out-of-field GTA appointment to a graduate student who is enrolled in a school or college that charges differential tuition must notify the dean of the school or college in which the student is enrolled and obtain that dean's approval of the out-of-field appointment.
- The schools and the college must, annually, send a list of all out-of-field appointments to the Office of Graduate Studies.
- The student's home department or program must certify, at the time they approve the out-of-field appointment, that the student is making acceptable progress toward completion of her or his terminal degree.
- Any out-of-field GTA appointments must include a pedagogical and/or mentoring component offered by the hiring department, with assigned faculty supervisors or mentors. When the hiring department offers courses or seminars that are required of home department GTAs, out-of-field GTAs will be required to enroll in such courses or seminars.
- Students pursuing graduate degrees that are not generally intended to prepare a student for a career that involves teaching cannot be appointed as out-of-field GTAs. These students should be appointed as lecturers if their service as teachers is desired.

**Procedures for Requesting Out-Of-Field GTA Appointments**

Individual schools or the college will review all requests for out-of-field GTA appointments. Units requesting an out-of-field appointment must provide documentation that the student has been admitted to graduate study and is in good academic standing. No offer of an out-of-field GTA appointment, either written or verbal, may be made until the school or college has completed its review.

A department that wishes to offer a GTA appointment to a graduate student in another academic unit must consult with the student's home department to develop a rationale describing how the appointment is consistent with the guidelines stated here and how it will benefit the student's educational program. The rationale should include information about the student's background and qualifications to teach the course(s) in question and how the experience gained will contribute to the student's graduate training. An out-of-field appointment will not be approved without the explicit endorsement of the student's home department.

**Timeline:** Requests for out-of-field GTA placements normally should be submitted to the school or college involved as soon as possible and at least four weeks before the department expects to make an appointment offer. The four-week requirement may be waived when a proposed appointment is related to a staffing emergency such as the late resignation of a GTA or the unanticipated illness of a faculty member who was scheduled to teach a course.

**GRA, GTA, and GA Benefits - Lawrence and Edwards Campuses**

The University is authorized by Kansas statutes and administrative regulations to provide graduate research assistants (GRAs), graduate teaching assistants (GTAs), and graduate assistants (GAs) with certain benefits that are not available to other student employees. The Memorandum of Agreement (MOA) ([http://www.humanresources.ku.edu/files/documents/gta_moa.pdf](http://www.humanresources.ku.edu/files/documents/gta_moa.pdf)) between the University of Kansas and the Board of Regents and the Kansas Association of Public Employees (representing Graduate Teaching Assistants at the University of Kansas, Lawrence) provides further information about benefits available to GTAs. This summary is provided for informational purposes only. For information about specific benefits, contact the Office of Graduate Studies.

1. **Staff Rates**

Graduate students with GRA, GTA, or GA appointments of 40% (0.40 FTE) or more are eligible for staff (resident) rates for tuition, as are individuals who hold concurrent GRA, GTA, and GA appointments totaling 40% (0.40 FTE) or more as stipulated in the Staff and Staff Dependent Tuition Rates ([http://policy.drupal.ku.edu/registrar/staff-tuition-rates/#GTA](http://policy.drupal.ku.edu/registrar/staff-tuition-rates/#GTA)) policy.

2. **Payment of Tuition**

GRAs and GTAs are eligible to have all or some of their tuition paid, including any differential tuition assessed, according to the provisions below.

**Graduate Research Assistants:**

Graduate Research Assistants with an appointment of 40% (0.40 FTE) or more will have their tuition provided by the same funding source as their
salary. The full cost of tuition for graduate research assistants must be included in all proposals, renewals, and contracts as part of the proposal budget when permissible by the granting agency or funding source. When not permitted by the funding source, the payment of tuition may be granted by the Graduate Tuition Assistance Pool. Further information about this program is available in the Graduate Research Assistant Tuition Assistance Policy (http://policy.drupal.ku.edu/graduate-studies/ GRA-tuition-assistance-policy).

Graduate Teaching Assistants:
Depending on the level of appointment, the university pays all or some of a GTA’s tuition, including any course fees for GTAs who are enrolled in schools or programs that charge such fees. If the student is eligible for staff rates, these will be assessed before applying the tuition waiver. Course fees include all school course fees and the Edwards Campus Program Fee as listed in section 1.1 of the Comprehensive Fee Schedule (http://www.withdraw.ku.edu/~registr/fees/index.shtml) published annually by the Office of the University Registrar.

GTAs with appointments of less than 40% (0.40 FTE) will have a portion of their basic tuition and course fees paid in accordance with the table that appears in Article 7, Section 3, of the MOA and is reproduced here:

<table>
<thead>
<tr>
<th>Percentage paid by University</th>
<th>40% FTE or more</th>
<th>30% FTE but less than 40%</th>
<th>20% FTE but less than 30%</th>
<th>10% FTE but less than 20%</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% paid</td>
<td>75% paid</td>
<td>50% paid</td>
<td>25% paid</td>
<td></td>
</tr>
</tbody>
</table>

Summer appointment percentages and tuition may vary from those shown here because of the reduced term of the appointment. Students should consult with their departmental hiring manager for more information on summer term tuition benefits.

3. Payment of Required Campus Fees
For GTAs, the university pays required campus fees for 3 credit hours per semester in accordance with the table and restrictions set forth below.

<table>
<thead>
<tr>
<th>Percentage paid by University</th>
<th>40% FTE or more</th>
<th>30% FTE but less than 40%</th>
<th>20% FTE but less than 30%</th>
<th>10% FTE but less than 20%</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% paid</td>
<td>75% paid</td>
<td>50% paid</td>
<td>25% paid</td>
<td></td>
</tr>
</tbody>
</table>

The GTA is responsible for paying the remainder of the required campus fee assessment; any applicable off-campus area service fees (e.g., Edwards Campus construction fee, Union fee, and required fee); mediated course fees; optional fees; Housing costs; and other specialized fees.

4. Tuition and Fee Assessments in Case of Resignation or Termination
If a GRA or GTA resigns or abandons the GTA/GRA position or the appointment is terminated, the GRA/GTA must pay all resident or non-resident tuition and fees for that semester, as appropriate given the GRA/GTA’s residence status as a student who does not hold a GRA/GTA appointment. The GRA/GTA will lose his or her eligibility for staff rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

If a GA resigns or abandons the GA position or the appointment is terminated, the GA will lose his or her eligibility for staff rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

5. Deferment of Tuition and Fees
Returning GRAs, GTAs, and GAs have the option of deferring payment for any tuition and required campus fees until September 15 (fall) and February 15 (spring). Please note that housing costs, optional campus fees, or other charges are not eligible for deferment. The fall deadline for returning graduate students to request a fee deferment is August 10; the spring deadline is January 10. Returning GTAs, GRAs, or GAs who do not request a deferment or do not pay their tuition and fees by the deadline will be assessed a late fee.

6. Payment of Tuition and Fees for Required Orientation/Training Course
In cases where a GTA is required to enroll in a for-credit orientation or training course, the university covers the full tuition and campus fee associated with one orientation/training course.

7. Health Insurance
The Kansas Board of Regents, in cooperation with the state universities, offers health insurance for students. Full information can be found here (http://www.hr.ku.edu/benefits_pay/benefits_info/health_insurance_programs/gta_ga_health_insurance.aspx).

8. Sick Leave and Annual (Vacation) Leave
In accordance with Board of Regents policy, persons appointed to student unclassified positions (including GRA, GTA, and GA positions) do not accrue sick leave or annual leave.

9. Approved Medical Leave
The GTA MOA (Article 5, Section 10) provides that GTAs with a medical condition that necessitates an absence of more than a week from assigned responsibilities shall request unpaid leave with appropriate medical documentation. Such unpaid leave of absence shall be requested in writing from the department/school by the GTA or a representative in advance of taking the leave, unless the illness or injury precludes advance notice. The request for leave without pay must be reviewed and approved by the department, the school or college, the Graduate Studies Office, and by the Department of Human Resources and Equal Opportunity before being granted, but approval shall not be withheld if appropriate supporting medical documentation is provided. If additional documentation is needed, the GTA or authorized representative from the department/school will be notified and given reasonable time to provide the documentation. Failure to request a leave of absence or to have a leave of absence approved according to this provision shall result in the placement of the GTA on leave without pay or the termination of the GTA’s appointment.

GRAs or GAs with a medical condition that necessitates an absence of more than a week from assigned responsibilities shall request unpaid leave with appropriate medical documentation. Such unpaid leave of absence shall be requested in writing from the department/school by the GRA/GA or a representative in advance of taking the leave, unless the illness or injury precludes advance notice. The request for leave without
pay must be reviewed and approved by the department, the school or college, the Graduate Studies Office, and by the Department of Human Resources and Equal Opportunity before being granted, but approval shall not be withheld if appropriate supporting medical documentation is provided. If additional documentation is needed, the GRA/GA or authorized representative from the department/school will be notified and given reasonable time to provide the documentation. Failure to request a leave of absence or to have a leave of absence approved according to this provision shall result in the placement of the GRA/GA on leave without pay or the termination of the GRA/GA’s appointment.

Please note that the approval of a medical leave of absence from a GRA, GTA, or GA position does not affect the academic status of a graduate student. A student who wishes to reduce his or her enrollment level due to a medical condition must consult with the department/school; doctoral students who wish to take a leave of absence from graduate studies because of a medical condition must request a leave from the department.

10. Other Benefit Programs
GRAs, GTAs, and GAs also can participate in voluntary benefit programs. Additional information is located on the Temporary & Student Employee Voluntary Benefits page (https://humanresources.ku.edu/temporary-student-employee-voluntary-benefits).

View current policies on GTA/GLA Benefits (http://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs). Further information about tuition (http://affordability.ku.edu/cs/index.shtml) and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu/tuition-and-fees).

Graduate Tuition Assistance Pool (TAP)

1. Payment of Tuition
The appointing KU unit is expected to fund the full cost of a graduate research assistant’s (GRA’s) tuition, consistent with the Benefits for GTA/GAs (https://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs) policy.

The full cost of tuition for graduate research assistants must be included in all proposals, renewals, and contracts as part of the budget proposal when such support is permitted by the granting agency or source of funding.

2. Eligibility for the Graduate Tuition Assistance Pool (TAP)
When not permitted by the funding source, GRA tuition support may be granted by the TAP. Eligibility for the TAP is determined by the availability of tuition support from the funding source, the source of salary support, the availability of TAP funds, enrollment requirements, and the student eligibility requirements listed below. In order to be eligible for the TAP, the GRA must meet all of the following requirements:

1. S/he must be enrolled in a doctoral degree program.
2. S/he must meet the requirements for holding a GRA appointment.
3. S/he must have at least one of the following:
   • at least a 40% (0.40 FTE) GRA appointment;
   • a combined GTA/GRA or GA/GRA appointment of 40% (0.40 FTE) or above; or
   • an externally-funded fellowship as defined in the external funding section (http://policy.ku.edu/graduate-studies/graduate-tuition-assistance-pool/#External) of the Graduate Tuition Assistance Pool (TAP) (http://policy.ku.edu/graduate-studies/graduate-tuition-assistance-pool) policy.

Tuition support from the TAP may not exceed 9 credit hours in a given semester or 6 credit hours in the summer term. Students are limited to a maximum of 10 semesters of support from the TAP. Students who have completed the required 18 credit hours of post-comprehensive enrollment, and are therefore eligible to enroll in only 1 dissertation or dissertation-equivalent credit hour are limited to 1 credit hour per semester of tuition support from the TAP.

External Funding
Externally-funded tuition support is defined as any circumstances in which the source of the salary for a GRA is from a research project funded by an agency external to the University of Kansas. External funding agencies may include, but are not limited to, the National Institutions of Health (NIH), the National Science Foundation (NSF), and the Department of Education (DOE).

It is expected that externally-funded graduate research assistantships and fellowships will provide tuition support. The source of the GRA or fellowship salary is one determinant for TAP eligibility.

Tuition support from the TAP is available to externally-funded GRAS in the following circumstances:

1. the funding agency does not provide tuition support;
2. the funding agency provides only partial tuition support;
3. the GRA position is funded entirely from Kansas state dollars budgeted for GRAs in the Tertiary Oil Recovery Project (TORP), the Biodiversity Institute (KUBI/BI), the Institute for Policy and Social Research (IPSR), or the Kansas Geological Survey (KGS); or
4. the student is appointed as a GRA in the Center for Research Methods and Data Analysis (CRMDA), and conditions (1) or (2) apply.

If a GRA salary is supported from an externally-funded government grant that supports tuition but does not cover tuition rate increases over the duration of the grant, the TAP will cover the difference in tuition between past and current tuition rates.

For research training grants from the NIH and NSF in National Research Service Awards (NRSA), Integrative Graduate Education and Research Training (IGERT), or Graduate Stem Fellows in K-12 Education (GK-12), assistance from the TAP will be only for that amount of the tuition not covered by the training grant.

A GRA is not eligible for support from the TAP if external funding for tuition is available from the grant that is supporting the student, or permitted by the granting agency that is supporting the student’s work, and would cover tuition and campus fees up to full-time enrollment. If a GRA receives compensation from such an externally-funded grant and the student salary or tuition was not originally budgeted in the grant, the university requires that the grant be re-budgeted or that the tuition support be identified from alternative sources.

Internal KU Funding
If the GRA salary is funded entirely from a KU General Research Fund award (either a competitive or new faculty award), then the GRA is eligible for TAP support.

Students who have a salary or stipend at least equivalent to the minimum GTA salary (as determined by the GTA Memorandum of Agreement (http://humanresources.ku.edu/sites/humanresources.ku.edu/files/docs/
gta_moa_2014.pdf) for a 50% (0.50 FTE) appointment) from a national or international fellowship that supports either no tuition or only partial tuition are eligible for the TAP to cover their full tuition or the difference between the tuition portion covered by the fellowship and their actual tuition costs.

**Ineligibility for the TAP**

The following circumstances describe when a GRA position is ineligible for tuition support from the TAP:

- **Commercial Entities**
  A GRA position funded by industry, business, or commercial partnerships is not eligible for TAP support and is expected to have tuition funded by the awarding entity.

- **State Dollars**
  A GRA position paid entirely from startup funds, release funds, shrinkage, or other departmental funds (funds originally budgeted for another purpose) is not eligible for TAP support.

- **KUEA Funds**
  A GRA paid entirely through KU Endowment Association (KUEA) is not eligible for TAP support and the KUEA funding must include the cost of tuition.

- **Overhead Support**
  A GRA position paid entirely from returned overhead funds is not eligible for TAP support.

**Split-Funded GRA Appointments**

GRAs who are paid from split funds that are both eligible and ineligible for tuition assistance are eligible to have that proportion of their tuition paid from the TAP that represents the proportion of funding support they are receiving from a TAP-eligible funding source. Graduate students who have a split appointment as a GTA/GRA are similarly eligible for a proportional amount of tuition support from the TAP.

**KU Medical Center GRAs**

Students who are enrolled in a KU Lawrence Campus (KULC) doctoral program and who are employed as a GRA on the KU Medical Center (KUMC) campus are eligible for the TAP. The student's KULC academic department should submit the TAP request and include proof of the GRA appointment on the KUMC campus.

**Application Deadline**

Requests for graduate tuition assistance from the TAP are preferably submitted 60 calendar days prior to the first day of classes for each semester. The final deadline for submission of TAP requests is 30 calendar days after the first published class day of each semester.

**GTAs Who Are Non-Native Speakers of English**

All prospective graduate teaching assistants of the state universities shall have their English competency assessed prior to being considered for any employment having classroom or laboratory instructional responsibility and/or direct tutorial responsibilities. The following shall be used to implement this policy:

1. All prospective graduate teaching assistants, whose first language is not English, must be interviewed by and have their competency in spoken English assessed by no fewer than 3 institutional personnel, 1 of which should be a student. An oral interview shall be conducted either face-to-face or by mediated means.

2. To be eligible for an appointment without spoken English language remediation conditions, all prospective graduate teaching assistants, whose first language is not English, shall be required to achieve a minimum score of 50 on the Test of Spoken English (TSE) or the Speaking Proficiency English Assessment Kit (SPEAK), or equivalent, or a minimum score, set by Board staff in consultation with the Council of Chief Academic Officers and with the approval of the Board Academic Affairs Standing Committee, on the Speaking section of the Test of English as a Foreign Language internet Based Test (TOEFL iBT).

3. All prospective graduate teaching assistants who do not meet the above requirements shall not be assigned teaching responsibilities nor other tasks requiring direct instructional contact with students.

4. An exception will be made for courses taught in sign language.

5. A report detailing the process for interviewing graduate teaching assistants, whose first language is not English, including the composition of the interview team and scores from the TSE or SPEAK for each candidate, will be submitted to the President/CEO every other year.

View the current policy on Spoken English Language Competency of Faculty and Graduate Teaching Assistants (Kansas Board of Regents Policy) (https://policy.drupal.ku.edu/provost/spoken-english-competency-BOR-policy).

**Graduation Calendar**

The Graduate Studies graduation calendar is available online (http://graduate.ku.edu/graduation).

**Course Numbering System**

Generally, graduate courses are numbered according to the following scheme:

- **Courses numbered 500-699** are designed for juniors and seniors, but are also taken by some graduate students who have fewer than 30 hours of graduate credit.
- **Courses numbered 700-799** are designed for graduate students who have fewer than 30 hours of graduate credit, but they are also taken by some undergraduates.
- **Courses numbered 800-899** are designed for graduate students who have fewer than 30 hours of graduate credit.
- **Courses numbered 900-999** are designed for graduate students who have 30 or more hours of graduate credit.

Courses that contain a mixture of undergraduate and graduate students should set requirements for graduate credit beyond or different from the requirements for undergraduate credit. No course, regardless of its number, can give graduate credit unless it has been approved for graduate credit by the appropriate Graduate Division and is taught by a person holding a current appointment to the Graduate Faculty. See the graduate credit section of the catalog (below) for more information.

**Grading, Credit, and Satisfactory Progress**

**Grading**

The basic system is an A, B, C, D, F system, where A designates above-average graduate work; B, average graduate work; C, passing but not average graduate work (C— is not considered a passing grade); D and F,
failing graduate work. C–, D, and F work does not count toward fulfilling degree requirements.

The letter P is used only to indicate participation in thesis, dissertation, and research enrollments (related to thesis or dissertation), and in the first semester enrollment of a two-semester sequence course. In any semester, an instructor may, at his or her option, assign a letter grade of A, B, C, D, or F when evidence about performance is available. Upon completion of thesis/dissertation or research hours leading to a master’s or doctoral degree, the P remains on the final transcript except for the last semester of enrollment. A letter grade (A, B, C, D, or F) is assigned in the last semester of enrollment to characterize the quality of the final product.

For enrollments other than thesis, dissertation, or research, the letter I indicates course work that has been of passing quality, some part of which is, for good reason, unfinished. The I grade is not appropriate for enrollment in thesis, dissertation, or research, and is not accepted.

As stated in University Senate Rules and Regulations (http://policy.ku.edu/governance/USRRR), Article II, Section 2.2.3.2: “A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade assigned by the course instructor, and shall be indicated on the student’s record.”

The grades of S and U may be used to designate satisfactory and unsatisfactory performance, respectively, in continuing education, workshop, and institute courses upon the recommendation of the department offering the course. No more than 6 hours total of graduate courses graded S are permitted to count toward a degree.

In courses numbered 800 or above for which specific authorization has been given, the instructor may report a grade of S for students who have satisfactorily attended the course but for whom it has not been possible to evaluate the quality of performance.

Once the S grade for a particular course (or a particular faculty member’s section of a multi-section course) has been recommended by the department and approved by the Graduate Division, it must be applied to the entire student enrollment in the course or section. This applies to those 800- or 900-level courses eligible for the S grade (or its alternative of F), as well as to Continuing Education, institute, and workshop courses. The S and U grades are not used in computing the grade-point average.

The Credit/No Credit option is authorized for graduate students. The grade of CR will be received for grades of C and above, and the grade of NC (no credit) will be received for grades of C– and below.

As outlined in USRR 2.2.7.6, no course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree or a graduate certificate. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

Please see the Research Skills and Responsible Scholarship policy (https://policy.drupal.ku.edu/graduate-studies/research-skills-responsible-scholarship) for more information.

The individual schools have the option of using or not using ++/−, according to the policy adopted by the particular school. B– does not represent satisfactory work in graduate studies.

In the grading system defined above, at least a B average is required on course work counted toward any of the master’s degrees or the Specialist in Education degree at KU, and only courses graded A, B, or C (excluding C–) may be so counted. Course work counted toward a doctorate, including that for a master’s degree if obtained at KU, should average better than a B. Courses graded P, S, U, or I are excluded from the computation of the average.

Performance is graded Honors, Satisfactory, or Unsatisfactory for the following examinations:

1. The general examination for the master’s degree.
2. The general examination for the degree of Specialist in Education.
3. The comprehensive oral examination for the doctorate.
4. The final examination for the doctorate.

View the current Graduate Studies policy on grading (http://policy.ku.edu/graduate-studies/grading?num2.4).

**Graduate Credit**

Three conditions must be met for a student to receive graduate credit for work satisfactorily completed at KU:

1. The student must have gained graduate admission.
2. The course must be numbered 500-level or above and have been approved for graduate credit by the appropriate school or college.
3. The instructor must have gained appointment to the Graduate Faculty.

Graduate courses may count toward both a graduate degree and a graduate certificate as long as the student is admitted and enrolled in the intended program prior to completion of the last required course.

Graduate credit earned while certificate-seeking may also be applied toward a master’s program with the approval of the master’s program, provided the student is enrolled as degree-seeking in the master’s program prior to the last semester of coursework in the program.

At the discretion of the certificate-granting or degree-granting program and the Graduate Division, up to 9 credit hours of graduate credit earned as a non-degree-seeking student may be allowed to count toward a certificate or degree program. In the case of a 9-hour graduate certificate, a maximum of 6 credit hours is allowed.

Grades of C- and below do not count toward fulfilling degree requirements and cannot be counted toward degree. Course credit by examination is not accepted toward graduate degrees.

**Transfer Credit**

At the discretion of the major department and the Graduate Division, up to 9 hours of graduate credit taken at a regionally-accredited graduate school may be transferred and applied to a KU master's degree plan if the credits were taken before the final semester of enrollment at KU.

Only work graded B (3.0 on a 4.0 scale) or higher may be transferred. KU does not accept transfer credit for courses that have been graded B- or below. KU also does not accept transfer for institutes, workshops, or for life/work experience. Credit will not transfer for courses that were previously counted toward the completion of an undergraduate or graduate degree.

A minimum of 15 credits toward a master's degree must be earned in KU coursework. As described in the M.A. & M.S. Degrees policy, a 30-hour master's degree may be reduced to as few as 24 hours for students who are "exceptionally well-prepared." If coursework is transferred to KU,
the same coursework cannot also be utilized to establish a student as "exceptionally well-prepared."

No graduate credit may be transferred toward a doctoral degree, but departments may take relevant prior graduate work into consideration in setting up programs of study.

Graduate credit from another institution may not be transferred to a KU graduate certificate program.

In order to transfer credits, the appropriate paperwork must be initiated by the student's department. The department/program and Graduate Division retain the discretion to deny a student's request to have transfer credit and/or non-degree-seeking credit count toward a degree or certificate. View the current policy on graduate credit (http://policy.ku.edu/graduate-studies/graduate-credit).

**Graduate Course Work Expiration Dates**

Courses completed at the University of Kansas, or transfer credits from another university, cannot be used to fulfill graduate degree requirements if these courses were completed more than 10 years prior to the final defense for doctoral candidates or graduation for master's students.

Faculty members retain the responsibility for determining the validity of courses that count toward the degree. Any decision to make an exception to the policy outlined above must be approved by the Graduate Division of the school or college in which the student's program resides. View the current policy on Graduate Coursework Expiration Dates (https://documents.ku.edu/policies/Graduate_Studies/Graduate_Coursework_Expiration_Dates.htm).

**Good Academic Standing**

Evaluation of graduate student academic standing includes, but is not limited to, consideration of performance in and progress through a graduate program according to program expectations.

**Performance**

Graduate students must maintain an expected level of performance throughout their program. Criteria for evaluating satisfactory performance include, but are not limited to:

1. A minimum cumulative grade-point average (GPA) of 3.0 or higher. Graduate programs may have more stringent GPA requirements;
2. Academic and scholarly integrity;
3. Compliance with academic policies at the university, school, and departmental level; and
4. Satisfactory progress toward completion of the degree.

Graduate programs are responsible for evaluating students at least annually to assess progress toward a degree. Progress may be determined by factors including:

a. Completion of coursework, milestones, exams, or other program components on a specified timeframe; and
b. Official time to degree and total time in program.

Graduate programs may have additional measures of progress. Failure to maintain an expected level of performance will result in a student not being in good academic standing.

Lack of good academic standing will result in the graduate program placing the student on probation or in dismissal from the program (for more information, please see the policies on academic probation (http://policy.ku.edu/graduate-studies/academic-probation) and dismissed enrollment (http://policy.ku.edu/graduate-studies/dismissed-enrollment?num2.2)).

It is expected that graduate programs will evaluate students pursuing more than one degree program based on their progress in each program individually.

**Academic Probation**

Upon falling below a cumulative graduate grade-point average (GPA) of 3.0, computed with the inclusion of grades earned at KU for all courses acceptable for graduate credit, the student is placed on probation by the Graduate Division of the school or college. The grades of P, S, U, and I, for which no numerical equivalents are defined, are excluded from the computation. If the student's overall graduate average has been raised to 3.0 by the end of the next semester of enrollment after being placed on probation, the student may be returned to regular status. If not, the student is not permitted to re-enroll unless the Graduate Division acts favorably on a departmental recommendation for the student to continue study.

If admitted provisionally due to deficiencies in grade-point average, a student must earn an overall graduate average of at least 3.0 during the first quarter of enrollment (in which case the student is considered to have achieved good academic standing) to be permitted to re-enroll. A student admitted provisionally who fails to earn a 3.0 average in the first quarter of enrollment may be dismissed immediately. If provisional continuation is recommended by the department or program, and approved by the Graduate Division, the student may remain on provisional status for one additional quarter. Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the Graduate Division that will accept the student. The petition must be approved by the Dean of Graduate Studies.

View the current policy on academic probation (http://policy.ku.edu/graduate-studies/academic-probation).

**Progress to Degree Forms**

The Progress to Degree forms are the official forms, recognized by Graduate Studies, used to track and monitor graduate student progress at the University of Kansas. The forms should be used to report every aspect of academia, including, but not limited to, change in degree plans within the same department, changes in academic status, time limit extensions, leaves of absence, master's-degree transfer credit, completion of comprehensive and oral exams, completion of certificate programs, and fulfillment of FLORS requirements.

The forms are available on the Graduate Studies website and should follow the workflow indicated for the individual function required.

**Enrollment**

**Graduate Student Enrollment**

All graduate students are expected to fit into one of the following enrollment categories at all times while completing the credits required for the fulfillment of their degrees.

- Full-time Enrollment
- Leave of Absence
- Discontinued
- Dismissed
Graduate students are not normally permitted to enroll for more than 16 hours each semester or more than 8 hours in the summer session.

Under some circumstances, undergraduate students may enroll in graduate courses.

- Undergraduate Enrollment in Graduate Level Courses
- Co-enrollment (Seniors and Graduate Study)

View the current Lawrence and Edwards Campus policy on enrollment (http://policy.ku.edu/graduate-studies/enrollment?num2.3).

**Full-time Enrollment for Graduate Students**

Full-time and half-time enrollment consists of the following:

### Full-time enrollment for Fall and Spring semesters

- Enrollment in 9 credit hours;
- Enrollment in 6 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 6 credit hours for graduate students using the Montgomery GI Bill – Active Duty (MGIB-AD) and Post-9/11 GI Bill – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s).

*Please see the current policy on Doctoral post-comprehensive enrollment (http://policy.ku.edu/graduate-studies/doctoral-candidacy).*

### Full-time enrollment for Summer Semesters

- Enrollment in 6 credit hours;
- Enrollment in 3 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill – Active Duty (MGIB-AD) and Post-9/11 GI Bill – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s).

*Please see the current policy on Doctoral post-comprehensive enrollment (http://policy.ku.edu/graduate-studies/doctoral-candidacy).*

### 3/4-time Enrollment for Fall and Spring Semesters

- Enrollment in 7 credit hours;
- Enrollment in 4.5 credit hours plus a GRA appointment, regardless of percentage of appointment;
- Only master’s students in their final semester of study are eligible for the 3/4-time and half-time enrollment exception while holding a GRA appointment. For more information, please see the current policy on Graduate Research Assistant Appointment Eligibility (http://policy.ku.edu/graduate-studies/GRAC appointment-eligibility).

### 3/4-time Enrollment for Summer Semesters

- Enrollment in 4.5 credit hours;
- Enrollment in 2 credit hours plus a GRA appointment, regardless of percentage of appointment;
- Only master’s students in their final semester of study are eligible for the 3/4-time and half-time enrollment exception while holding a GRA appointment. For more information, please see the current policy on Graduate Research Assistant Appointment Eligibility (http://policy.ku.edu/graduate-studies/GRAC appointment-eligibility).

### Half-time Enrollment for Fall and Spring Semesters

- Enrollment in 5 credit hours;
- Enrollment in 3 credit hours plus a GRA appointment, regardless of percentage of appointment;
- Only master’s students in their final semester of study are eligible for the 3/4-time and half-time enrollment exception while holding a GRA appointment. For more information, please see the current policy on Graduate Research Assistant Appointment Eligibility (http://policy.ku.edu/graduate-studies/GRAC appointment-eligibility).
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill – Active Duty (MGIB-AD) and Post-9/11 GI Bill – Active Duty.

### Half-time Enrollment for Summer Semesters

- Enrollment in 3 credit hours;
- Enrollment in 1 credit hour plus a GRA appointment, regardless of percentage of appointment;
- Only master’s students in their final semester of study are eligible for the 3/4-time and half-time enrollment exception while holding a GRA appointment. For more information, please see the current policy on Graduate Research Assistant Appointment Eligibility (http://policy.ku.edu/graduate-studies/GRAC appointment-eligibility).
- Enrollment in 1 credit hour for graduate students using the Montgomery GI Bill – Active Duty (MGIB-AD) and Post-9/11 GI Bill – Active Duty.

Students enrolled in fewer hours than defined by half-time enrollment are considered part-time.

All students should check with their graduate degree programs and Graduate Studies’ policies to determine if additional enrollment requirements or summer enrollment requirements exist. View the current Lawrence and Edwards Campus policy on full-time enrollment for Graduate students (http://policy.ku.edu/graduate-studies/fulltime-enrollment).

**Note:** A few internship programs have been approved by Graduate Studies to count as full-time enrollment. Students enrolled in these internship programs will be counted as full-time students. Please contact your program to verify that an internship program qualifies.

### International Students

International students in F-1 and J-1 status must also comply with Federal immigration requirements by pursuing a full course of study each semester to maintain their legal status. All international students must conform to residence requirements, even though immigration regulatory requirements may be lower.

### Leave of Absence

A Leave of Absence may be granted upon request to the graduate program in advance of leave. A leave of absence may be granted in extraordinary circumstances (e.g. cases of illness, emergency, financial hardship, military leave), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals.

Appropriate documentation related to these extraordinary circumstances may be requested from the student directly. Evidence of progress towards degree will also be a determining factor in the decision to grant an exception.
The time taken for a leave of absence does not count against the student’s time to degree. However, if the total time for the leave extends more than five years, the student will lose his or her place in the program and must reapply for admission.

To request a leave of absence, the department or program must complete a Progress to Degree form. For more information, please contact Graduate Studies or view the current policy on Leave of Absence (https://documents.ku.edu/policies/Graduate_Studies/leaveofabsence.htm?num2.1). The permit to re-enroll form is not available to a student who:

- completed the graduate program; or
- was dismissed from a program at KU;
- was voluntarily discontinued (formally withdrew) from a graduate program;
- most recently enrolled as a non-degree-seeking graduate student.

Before completing the permit to re-enroll form, students should contact their graduate programs directly to confirm availability of the permit to re-enroll.

Students returning from an approved leave of absence will be returned from leave by their department; such students are not required to use the permit to re-enroll form.

Please review the current policy (http://policy.ku.edu/graduate-studies/permit-to-reenroll) and the explanatory chart (http://graduate.ku.edu/files/images/general/resources/Perm%20to%20Reenroll%20chart.pdf) for more information about the permit to re-enroll.

Dismissed Enrollment (Dismissal)

Graduate programs are responsible for evaluating the students in their programs to ensure that they are making satisfactory progress toward a degree. If a graduate program finds that a student is not making satisfactory progress, the program may recommend to the school or college that the student be dismissed from the program. Dismissal is requested by the graduate program through the Progress to Degree form.

Indicators of failure to make satisfactory progress toward a degree may include, but are not limited to, the following:

- Running out of allowable time to degree;
- Neither enrolling nor receiving approval for a leave of absence for two consecutive semesters;
- Committing Academic Misconduct;

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the Graduate Division of the school or college that will accept the student. The petition must be approved by the Dean of Graduate Studies.

Discontinued Enrollment

Students may voluntarily resign from their programs of study by requesting discontinuance. Once this request is granted, the student resigns his or her place in the program. In order to return to their studies at a later date, voluntarily discontinued students must reapply for admission. Departments or programs must request discontinuance through the Progress to Degree form. View the current Lawrence and Edwards Campus policy on discontinued enrollment (http://policy.ku.edu/graduate-studies/discontinued-enrollment?num2.1).

Permit to Re-Enroll

A student who has been actively enrolled in a degree-seeking graduate program, but who has not been enrolled for one academic year (three consecutive semesters, including the summer semester) or less, may be eligible to use the permit to re-enroll form with the consent of her or his department or program.

A student who has been actively enrolled in a degree-seeking program, but who has not enrolled for four or more consecutive semesters without an approved leave of absence, is not eligible to use the permit to re-enroll form and must re-apply for graduate admission.

The permit to re-enroll form is not available to a student who:

- most recently enrolled as a non-degree-seeking graduate student.

To meet the criteria of co-enrollment, the student must earn undergraduate credit for at least 1 class during the co-enrollment semester. Continuing education courses may be used to satisfy this requirement. If after the co-enrollment semester the baccalaureate degree is not completed, the student will not be permitted to enroll in courses for graduate credit until the baccalaureate degree has been conferred. After 1 semester, students are not eligible for co-enrollment and the graduate admission will be retracted.

Students who are eligible to co-enroll receive an email from the Registrar’s Office before enrollment with instructions on how to enroll in more than 1 career (ex. LAW, GRDL-Graduate, UGDL-Undergraduate). Students will have separate appointment times to enroll for each career and must enroll only in the courses that will count correctly toward the career in which they are enrolling during each appointment time. When enrollment is complete for each career, students must check the grading option for each course to ensure the class will be counted correctly.

Seniors and Graduate Study (Co-enrollment)

Seniors at KU who will complete the requirements for a baccalaureate degree in a given semester may be allowed to enroll in graduate course work during their final semester. These seniors must have very strong academic records (grade-point average higher than 3.0 on a 4.0 scale), must apply and be admitted provisionally as degree-seeking graduate students, and must request the permission of the appropriate Graduate Division. Seniors requesting the privilege of co-enrollment must make formal application through the graduate affairs office of the appropriate school or college.

Procedure

To meet the criteria of co-enrollment, the student must earn undergraduate credit for at least 1 class during the co-enrollment semester. Continuing education courses may be used to satisfy this requirement. If after the co-enrollment semester the baccalaureate degree is not completed, the student will not be permitted to enroll in courses for graduate credit until the baccalaureate degree has been conferred. After 1 semester, students are not eligible for co-enrollment and the graduate admission will be retracted.

Students who are eligible to co-enroll receive an email from the Registrar’s Office before enrollment with instructions on how to enroll in more than 1 career (ex. LAW, GRDL-Graduate, UGDL-Undergraduate). Students will have separate appointment times to enroll for each career and must enroll only in the courses that will count correctly toward the career in which they are enrolling during each appointment time. When enrollment is complete for each career, students must check the grading option for each course to ensure the class will be counted correctly.

View the current policy on co-enrollment (http://policy.ku.edu/graduate-studies/seniors-and-grad-study?num2.8).

Undergraduate Student Enrollment in Graduate-Level Courses

Well-qualified undergraduate students may be permitted to enroll in 800- or 900-level courses for undergraduate credit with the approval of the instructor, the student’s advisor, and the Graduate Division. The student must bring a Count Towards Degree form signed by the instructor, a letter of explanation and recommendation from the advisor, and current academic record to the Graduate Division for approval. If approved, the Graduate Division signs the Count Towards Degree form, which the student must present to the staff in the Student Records Center to enroll in the courses. Courses taken for undergraduate credit may not be transferred to graduate credit.
Embargo of Theses and Dissertations

When an exception to the immediate release of a thesis or dissertation is necessary, an embargo provides a temporary, delayed public release of the work. Embargo periods of six months, one year, or two years are available. While embargoes are not intended to be permanent, renewals of the original embargo period are permissible. Considerations that may be deemed reasonable for granting permission for an embargo include, but are not limited to:

- Patentable rights or other issues are contained in the work, the disclosure of which may be detrimental to the rights or interests of the author.
- There is a need to prevent disclosure of government information about persons, institutions, technologies, etc. that is contained in the work.
- An academic or commercial press has expressed interest in acquiring the rights to publish the work as a book that may require an embargo.
- The work contains content that has already been submitted to a peer-reviewed journal that may require an embargo.
- Approval for delay has been granted by the KU Restricted Research Committee.

Requests for an extension of the embargo should be directed to the Office of Graduate Studies and must be received at least one month prior to the expiration of the current embargo to ensure sufficient time to process the request. A request for an embargo submitted to the University of Kansas affects only the publication of the thesis or dissertation in KU ScholarWorks. It is the graduate student's responsibility to request an extension from both the University of Kansas for the copy in KU ScholarWorks and separately through ProQuest/UMI.

While there is no limit to the number of times a student can request an embargo extension, embargoes that have been allowed to expire without a request for an extension will result in the thesis or dissertation being made publicly available.

The embargo period will be calculated beginning at the end of the semester in which the student graduates with the specific dates being: December 31st, May 31st, and August 31st.

Steps necessary for embargoing a thesis or dissertation:

Theses and dissertations at the University of Kansas are made available in two electronic databases: KU ScholarWorks and ProQuest/UMI Dissertations and Theses. Items in KU ScholarWorks are publicly accessible on the world-wide web and can be indexed by search engines such as Google, Bing, Yahoo, and others.

Students who do not wish to have their theses or dissertations made public in these two venues for some limited period of time must receive permission to embargo the theses or dissertations from the director of graduate studies in their departments, their committee chairs, their department chairs, or the dean of the pertinent school or college. These students must request this permission with the Electronic Thesis and Dissertation (ETD) Release Form. The University of Kansas will accept a thesis or dissertation—thereby completing all degree requirements—only if the student signs this release form. Likewise, the University of Kansas will only entertain requests for an embargo on the publication of a thesis or dissertation through submission of this same form.

Once the student has obtained these signatures, s/he must take two steps before graduation to ensure that the embargoed work is restricted.

- First, the student must submit the Electronic Thesis and Dissertation (ETD) Release Form to the school or college. If an embargo has been approved, this form will ensure that the work is temporarily restricted in KU ScholarWorks.
- Second, during the electronic submission process to ProQuest/UMI, the student must select the embargo option under the publishing restrictions section. If an embargo has been approved, this step will ensure that public view of the work is temporarily restricted in the ProQuest/UMI Dissertations and Theses database. See the related documents section below for more information.

Note: If a student does not receive permission for an embargo and/or does not submit the required documentation requesting such an embargo to Graduate Studies prior to graduation, the work will be made publicly available through KU ScholarWorks, and search engines like Google, Bing, Yahoo, and others will find and index the work. For this reason, once a work is released publicly, it is impossible to deploy an embargo in its entirety, because copies of a released work are likely to be stored on the web even if the KU ScholarWorks or ProQuest/UMI copies are retracted. It is therefore crucial for students who desire the embargo option to request it prior to graduation and to request extensions, if needed, prior to the work being exposed to public search engines.

Dissertation defenses are open to the public. In the event that an embargo is deemed necessary for a dissertation, the committee should consider holding an additional question period for the defense that is closed to the public. Any sensitive data may be discussed in the closed session.

Students from the following programs are permitted to request a permanent embargo of their thesis or dissertation:

- Master of Fine Arts (MFA) in Creative Writing;
- Ph.D. in English: Literature and Creative Writing track;

View the current policy on embargo of theses and dissertations (http://policy.ku.edu/graduate-studies/embargo-policy).

Graduate Student Oral Exam Attendance

Ideal, all members of the committee are physically present at graduate student oral examinations, which include the master’s comprehensive oral exam, the master’s final oral exam (i.e. thesis defense), the doctoral comprehensive oral exam, and the doctoral final oral exam (i.e. dissertation defense).

A majority of committee members must be physically present for an examination to commence; for doctoral oral examinations this requirement is 3 of the 5 members, for master’s oral examinations the requirement is 2 of the 3 members.

In addition, it is required that the student being examined, the chair of the committee, and the Graduate Studies representative all be physically present at the examination or defense. Mediated attendance by the student, chair and Graduate Studies representative is prohibited.
When a situation arises in which a committee member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair.

In cases where the student prefers an examination in which all committee members are physically present, the student's preference shall be honored.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered canceled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

View the current policy on Graduate Student Oral Exam Attendance (https://documents.ku.edu/policies/Graduate_Studies/Graduate_Student_Oral_Exam_Attendance.htm).

**Grievance Policy for Graduate Students**

A graduate student who believes himself or herself to be unfairly or unlawfully treated in an academic matter may present a grievance to the academic department or program chair. Each academic unit and all Graduate Divisions have established grievance policies and procedures. Appeal of a grievance heard at one of these levels is made to the Judicial Board. Graduate Studies has established a set of guidelines for graduate student petitions in certain categories that may not be under the jurisdiction of other hearing bodies. The Executive Council of Graduate Faculty has identified two categories as the purview of Graduate Studies:

1. **Cases involving the Graduate Divisions of two or more schools or colleges:**

2. **Cases involving the interpretation of Graduate Studies policy as it pertains to the Graduate Division of a school or college.**

For disputes involving alleged academic misconduct or alleged violations of student rights, the initial hearing normally is held at the unit level. There is an option to hold an initial hearing at the Judicial Board level if both parties agree, or if either party petitions the Judicial Board chair to hold the hearing at the Judicial Board level and the petition is granted. The petition must state why a fair hearing cannot be obtained at the unit level; the opposing party has an opportunity to respond to the petition.

**Procedures for Graduate Student Grievances**

Pursuant to Article XIV of the University Senate Code and Articles V and VI of the University Senate Rules and Regulations of the University of Kansas, Lawrence, Graduate Studies establishes the following procedures to hear the individual grievances of graduate students. Except as provided in USRR 6.5.4, no person shall be disciplined for using the grievance procedure or assisting another in using the grievance procedure. Graduate Studies shall provide a copy of this procedure to anyone who requests it.

A sub-committee of the Executive Council of Graduate Faculty is charged to establish policies governing the handling of individual grievances of graduate students brought to the attention of Graduate Studies and to carry out or delegate the investigation of individual grievances presented to Graduate Studies, and to make and report final recommendations to the Dean of Graduate Studies with respect to individual grievances. Since the sub-committee has the responsibility to adjudicate and hence to hear grievances, it cannot function to develop evidence on behalf of either complainant or respondent. It is appropriate, however, for Graduate Studies, in its administrative capacity, to look into complaints prior to scheduling a grievance hearing, to interview parties, to secure documents, and to seek a conciliatory solution. Before pursuing formal grievance procedures, a grievant should ordinarily attempt to resolve the matter informally through direct or indirect consultation with the other party, through discussions with supervisory personnel or through informal mediation. If the problem is not solved in this fashion the Dean shall refer the complainant to the sub-committee or, if appropriate, to another appropriate unit charged with jurisdiction to resolve the dispute. If it is referred to the sub-committee, Graduate Studies shall make available to the committee what it has learned that bears on the complaint. This shall not be construed, however, to deny the right of a student to file a complaint directly with the committee.

1. **To start the grievance process, the complainant must submit a written grievance to Graduate Studies.** The complaint shall contain a statement of the facts underlying the complaint and specify the provision(s) of the Faculty Code of Conduct, University Senate Code, the University Senate Rules and Regulations, the Code of Student Rights and Responsibilities, or other applicable rule, policy, regulation, or law allegedly violated. The complaint shall also indicate the witnesses or other evidence relied on by the complaining party, and copies of any documents relevant to the complaint shall be attached to the complaint.

2. **At the time the complaint is submitted to Graduate Studies, the complaining party shall provide a copy of the complaint, with accompanying documents, to the respondent(s).**

3. **Upon receipt of the complaint, Graduate Studies shall contact the respondent to verify that the respondent has received a copy of the complaint and to provide the respondent with a copy of these procedures.**

4. **Pursuant to University Senate Code 14.2.c, a respondent has the privilege of remaining silent and refusing to give evidence in response to a complaint.** The respondent also has the right to respond and give evidence in response to the complaint.

5. **The respondent shall submit a written response to Graduate Studies within 14 calendar days of receiving the complaint.** The response shall contain the respondent’s statement of the facts underlying the dispute as well as any other defenses to the allegations in the complaint. The response shall also identify the witnesses or other evidence relied on by the respondent and shall include copies of any documents relevant to the response. The respondent shall provide a complete copy of the response to the complaining party.

6. **Upon receipt of the response, Graduate Studies shall contact the complaining party to verify that a copy of the response has been provided.**

7. **Upon receiving the complaint and response, or if the respondent fails to respond within the 14-day time period, Graduate Studies shall appoint a committee to consider the complaint.** Normally, a complaint shall be heard by a sub-committee of the Executive Council of Graduate Faculty from among the members of the committee. The sub-committee members shall be disinterested parties who have not had previous involvement in the specific situation forming the basis of the complaint. In the summer, if the complainant requests a hearing before the full committee he or she must waive the right to timely hearing (see 11 below) and a hearing date will be scheduled early in the fall.

8. **Pursuant to USRR 6.8.4.2, the chair of the sub-committee may contact other hearing bodies within the University to determine whether a grievance or complaint involving the underlying occurrence
or events is currently pending before or has been decided by any other hearing body.

9. Time limits. To use this procedure, the complainant must file the written complaint with Graduate Studies within six months from the action or event that forms the basis of the complaint. The six-month time period shall be calculated using calendar days (including weekends and days during which classes are not in session).

10. Upon receiving the complaint, if the chair of the sub-committee determines that any of the following grounds exist, he or she may recommend to the Dean that the complaint be dismissed without further proceedings. The grounds for such dismissal are: (a) the grievance or another grievance involving substantially the same underlying occurrence or events has already been, or is being, adjudicated by proper University procedures; (b) the grievance has not been filed in a timely fashion; (c) Graduate Studies lacks jurisdiction over the subject matter or any of the parties; (d) the grievance fails to allege a violation of a University rule; (e) the party filing the grievance lacks standing because he or she has not suffered a distinct injury as a result of the challenged conduct and has not been empowered to bring the complaint on behalf of the University; or (f) the party filing the grievance has been denied the right to file grievances pursuant to USRR 6.5.4.

11. If the chair of the sub-committee determines that a grievance on its face properly should be heard by another body, the chair will recommend that the Dean send the grievance to the appropriate hearing body without further proceedings in Graduate Studies. The Dean will send a copy of the referral to the complainant(s) and any responding parties.

12. If not previously attempted, prior to scheduling a hearing, the parties shall participate in mediation of the dispute unless either party waives mediation. Mediation shall be governed by USRR 6.2.3.

13. If mediation is successful, the mediator will forward to the Dean, the sub-committee chair, and all parties a letter describing the outcome of the mediation and the terms upon which the parties have agreed to resolve the dispute. This letter shall be a recommendation to the Dean. The Dean will notify the mediator, the sub-committee chair, and the parties that the recommendation has been accepted, modified, or rejected.

14. If mediation is not successful, the mediator will notify the Dean, the sub-committee chair, and the parties that mediation has terminated. If mediation is not successful, or if it is waived by either party, the grievance sub-committee will schedule a hearing no later than 30 calendar days from the written submission of the complaint. The 30-day period may be extended for good cause as determined by the chair of the sub-committee. The 30-day period shall be suspended during the mediation process. The hearing will be closed unless all parties agree that it shall be public.

15. Each party may represent himself or herself or be represented by an advisor or counsel of his or her choice.

16. Each party has the right to introduce all relevant testimony and documents if the documents have been provided with the complaint or response.

17. Each party shall be entitled to question the other party’s witnesses. The committee may question all witnesses.

18. Witnesses other than parties shall leave the hearing room when they are not testifying.

19. The chair of the sub-committee shall have the right to place reasonable time limits on each party’s presentation.

20. The chair of the sub-committee shall have the authority and responsibility to keep order, rule on questions of evidence and relevance, and shall possess other reasonable powers necessary for a fair and orderly hearing.

21. The hearing shall not be governed by the rules of evidence, but the chair of the sub-committee may exclude information he or she deems irrelevant, unnecessary, or duplicative. Statements or admissions made as part of the mediation process are not admissible.

22. The sub-committee will make an audiotape of the hearing but not of the deliberations of the sub-committee. The audiotape will be available to the parties, their authorized representatives, the sub-committee and the Dean. If a party desires a copy of the audiotape or a transcript of the tape, that party will pay for the cost of such copy or transcript. In the event of an appeal, the audiotape will be provided to the appellate body as part of the record of the case.

23. After the presentation of evidence and arguments, the sub-committee will excuse the parties and deliberate. The sub-committee’s decision will be a written recommendation to the Dean. The sub-committee shall base its recommendations solely upon the information presented at the hearing.

24. The sub-committee will send its written recommendation to the Dean and the parties as soon possible and no later than 14 calendar days after the end of the hearing.

25. Within 14 calendar days of receiving the sub-committee recommendation, the Dean will notify the parties of the acceptance, modification, or rejection of the recommendation. The Dean will advise the parties of the procedure available to appeal the decision.

View the current policy on Grievance Procedure for Graduate Studies (http://policy.ku.edu/graduate-studies/grievance).

**Student Responsibilities**

All graduate students are responsible for informing themselves of requirements and Graduate Studies policies. Visit the Graduate Studies website (http://www.graduated.ku.edu) for the most up-to-date requirements and policies. Graduate students are also expected to be familiar with the regulations and requirements of their Graduate Divisions and departments and of their graduate programs. Members of the Graduate Faculty and staff members of the Graduate Divisions are expected to be ready to answer questions and offer counsel.

It is each graduate student’s responsibility to know and observe all regulations and procedures relating to the graduate degree program the student is pursuing. In no case will a regulation be waived or an exception be granted because students plead ignorance of, or contend that they were not informed of, requirements, regulations, procedures, and deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.
Office of Graduate Studies, Medical Center Campus Students

The Office of Graduate Studies (a unit of the Office of Academic Affairs (http://www.kumc.edu/academic-affairs.html)) on the KU Medical Center campus (http://www.kumc.edu) is the administrative unit responsible for graduate education on that campus. A variety of graduate programs are offered through the Medical Center’s Schools of Health Professions (p. 588), Medicine (p. 1966), and Nursing (p. 2189).

Graduate degrees on the Medical Center campus are conferred by the Schools of Health Professions, Medicine and Nursing with the exception of the Health Informatics master’s degree, which is conferred by the Office of Graduate Studies upon recommendation by the Health Informatics Advisory Council. Appointments to the Graduate Faculty are recommended by individual academic units and administered by the Graduate Studies office.

Goals of Graduate Study

Independent scholarship, competence in research or other creative work, and the cultivation of teaching commitment and skill are the traditional goals of graduate study. Having acquired a broad education as an undergraduate, the student is expected to master a special field, to learn the methods of investigation employed therein, and to proceed toward making an original contribution to knowledge. Since many of those who earn advanced degrees find careers in higher education, the acquisition of skill in teaching and in directing research is also an essential part of graduate education.

These traditional goals gain renewed significance in changing times, while newly emerging societal interests and needs and new demands of the marketplace both underscore their importance and emphasize the necessity for flexibility in programs and accommodation in career objectives.

Research

Research is an integral part of the University’s educational mission. The National Science Foundation classifies KU as a major university receiving substantial research support. KU is also a Carnegie Doctoral/Research Extensive University and has been a member of the Association of American Universities since 1909. The University has a long and successful record of research collaboration through independent, multidisciplinary research centers that focus on common themes. For more information about research on the Medical Center campus, visit the University of Kansas Medical Center Research Institute (http://www.kumc.edu/kumcri.html) website page.

This catalog is not itself a source of policy and does not create a contract between the University of Kansas and its students. University policy is the binding agent in the event an inconsistency is noted between the catalog and official University policy. Whenever possible the catalog provides information from the latest policies at the time of publication and links to the policies referenced.

- Admission Notification (p. 2312)
- Admission Procedure (p. 2312)
- Application Fees (p. 2312)
- Background Check (p. 2312)
- Degree Seeking Admission (p. 2310)
- Graduate Certificate Admission (p. 2311)
- Minimum English Proficiency Requirement (p. 2311)
- Non-degree Seeking Admission (p. 2311)
- Reactivation (p. 2313)

Admission to Graduate Studies

Persons whose records indicate their ability to succeed with advanced work may be admitted for graduate study. Applicants may either apply as degree seeking, non-degree seeking, or to a Graduate Certificate program. Applicants seeking an identifiable degree program are degree seeking, while those applicants who do not have an identified degree program should be admitted under the non-degree seeking category. No student may work toward a graduate degree without being accepted as a degree seeking student in a specific graduate program.

Degree Seeking Admission

Students who wish to work toward a specific graduate degree should be considered for admission under the degree seeking category in either the regular or provisional category.

Regular Admission

Regular admission requires a bachelor’s degree and a cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale, from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements. The bachelor’s degree is not acceptable if it contains credit awarded for work experience that was not directly supervised by faculty members (life experience) of an accredited university or not evaluated in units that identify the academic content (e.g., P/F, S/U).

Applicants who are not native speakers of English must demonstrate they meet the Minimum English Proficiency Requirements as described below.

Applicants must meet these minimum admission requirements to qualify for regular admission. Individual academic programs may have additional admission requirements that the applicant must also meet to be eligible for regular admission status to that program.

In exceptional cases, persons not holding bachelor’s degrees may be admitted if they are academically well prepared. In these cases, the Dean of Graduate Studies reviews the student’s academic background and approves graduate admission.

Regular Admission, Special B

This category is available only to degree seeking graduate students applying to the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS) offered by the School of Medicine. A student meeting the minimum admissions
requirements described under Regular Admission and the academic standards of the basic science departments is admitted to graduate study in IGPBS. If the applicant does not meet the minimum admissions requirements, he or she may be admitted in the provisional category.

After completion of the IGPBS program, the student seeks entrance directly into a specific graduate discipline in one of the basic science departments. When the department accepts an IGPBS student, the department submits a Progress to Degree form to formally change the individual student’s academic program from IGPBS to the specific basic science doctoral program.

Provisional Admission

An applicant who has one or more deficiencies in 1) grade-point average, 2) English proficiency scores, 3) prerequisite course work, and/or 4) other specific deficiencies determined by the academic program, may be admitted on a provisional basis.

If admitted provisionally for a lack of prerequisite course work or low English proficiency scores, it is expected that the student will be reviewed immediately following the first semester of graduate study to determine if the student has met the requirements of regular admission. When the student meets the requirements of regular admission the program submits a Progress to Degree form to Graduate Studies to move the student from provisional to regular status. If the student has not met the requirements of his or her provisional admission at the time of review, the program may recommend to the Dean of Graduate Studies to continue the student on provisional status for another semester or dismiss immediately. A student admitted provisionally for any reason who fails to earn a B (3.0) average in their first semester may be dismissed immediately.

Students who have been dismissed from a graduate program may be admitted for further graduate study at KU only if the new academic program receives approval by petition from the Dean of Graduate Studies.

Non-degree Seeking Admission

A non-degree seeking applicant applies to the university for admission as a non-degree seeking student and may be processed by a specific department or program. Admission requires a bachelor’s degree from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements. Applicants who are not native speakers of English, must demonstrate they meet the Minimum English Proficiency Requirements as described below. The applicant is not required to meet the other admission standards of regular admission.

Non-degree seeking admission is not intended to bypass regular admission into a graduate degree program. However, if a non-degree seeking student later applies for admission as a regular degree seeking student, and is accepted by an academic program, the total transfer credits toward a graduate degree may not exceed six hours, or eight hours if the student holds a baccalaureate degree from KU (this total includes credit from other accredited graduate programs as well as non-degree credit earned at KU).

Graduate Certificate Admission

An application is required to pursue a graduate certificate. A graduate certificate program must adhere to the same minimum admission standards required for degree seeking admission (bachelor’s degree, 3.0 grade-point average, English proficiency).

No student may work toward a graduate certificate without being accepted in a specific graduate certificate program. Graduate certificates are not granted retroactively. Graduate credit from another institution may not be transferred to a KU graduate certificate program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral of the certificate.

Applicants apply directly to a graduate certificate program for admission unless the applicant is a current graduate degree seeking student. To admit a current degree seeking graduate student to a certificate program, the student must be in good standing (3.0 or higher grade-point average) with their degree program. If pursuing a graduate certificate offered by another department, the student must inform the graduate director, advisor, or coordinator in the home department of intent to seek the certificate. If approved by the home department, the student must then make application directly to the graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the program to the Office of Graduate Studies and within general guidelines, be approved by the Dean of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program.

Minimum English Proficiency Requirement for Admission to a Graduate Program

Academic programs must verify that all applicants, whether domestic or international, who are not native speakers of English, meet the minimum English proficiency requirement to be admitted for graduate study as degree seeking, non-degree seeking or certificate program students. Verification may come in one of the following forms:

- Official transcript showing the applicant graduated with a baccalaureate degree (or higher) earned in residence from an accredited U.S. institution of higher education.
- Official transcript showing the applicant graduated with a baccalaureate degree (or higher) from an institution whose medium of instruction is English. This does not apply to degrees earned online. This verification may be from a catalog or program description.
Involved in direct patient contact, additional checks maintained by the student's eligibility to enter the program. In the case of students involved in direct patient contact, additional checks of Employment Disqualified Listings maintained by various health care disciplines may be required. Prospective students should check with their individual academic programs regarding these requirements.

All domestic students, as well as any international students who have been in the United States for more than 30 days prior to admission*, must submit to at least a standard background check through Validity Screening Solutions. In the case of students involved in direct patient contact, additional checks of Employment Disqualified Listings maintained by various health care disciplines may be required by specific programs. Prospective students should check with their individual department or program to determine the process and appropriate institutional or program code number to be provided to Validity Screening Solutions for the transmittal of the background check results.

Background check results will be considered on a case-by-case basis but, in general, the following may be considered as disqualifying findings and therefore prevent admission or matriculation. Future licensing requirements can determine admission.

- Felony convictions
- Misdemeanor convictions or felony deferred adjudications involving crimes against persons (physical or sexual assault or abuse)
- Misdemeanor convictions related to moral turpitude (e.g., prostitution, public lewdness, etc.)
- Felony deferred adjudications for the sale, possession, distribution or transfer of narcotic drugs or other controlled substances.
- Registered sex offender status
- Medicare, Medicaid or other healthcare fraud or misuse

Should you have any questions concerning this requirement for admission to Medical Center campus programs, please contact your specific program or department.

*International students admitted on valid visas and who have not resided in the United States for more than 30 days may be excused from this requirement due to the background checks conducted as part of their visa screening process.

### Application Fees

Nonrefundable application fees payable to the University of Kansas are required. Rates are subject to change. Some departments and programs require deposits from admitted students to be fully credited against required fees upon enrollment.

### Admission Notification

Each applicant is notified in writing of the admission decision. The admission decision letter includes the admission classification (Regular Degree Seeking, Special B, Provisional Degree Seeking, Non-degree Seeking or Graduate Certificate). For all admission categories, enrollment in specific courses may be subject to fulfillment of program course prerequisites and/or consent of the instructor.
After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission to graduate studies does not imply admission to candidacy for a higher degree. A student becomes a candidate for an advanced degree only by demonstrating through resident study at KU the requisite preparation and ability. Requirements for an advanced degree must be regarded as minimum requirements. Additional requirements depend on the student’s undergraduate preparation and the particular field of graduate work chosen.

Reactivation

Students who are not continuously enrolled should check with the academic program to see if they will be required to re-apply for admission or if they may be reactivated without re-applying. If permission is granted by the program to reactivate, the student completes the Reactivation Form (https://www.kumc.edu/student-services/enrollment-services/current-students/more-information/reactivation-form.html) on the posted on the Registrar’s website and pays the reactivation fee that is in place at the time of reactivation. Individual programs make the determination about when a student is required to re-apply. However, after an absence of 5 years, Graduate Studies requires the student to re-apply for admission to their graduate program.

Limitations on Admission

Because of limitations of space, faculty, or general resources for research and instruction, some programs must restrict the number of applicants they admit. Questions should be directed to the program to which the prospective student wishes to apply.

- Awarding of Degrees (p. 2313)
- Combined Degrees (p. 2320)
- Dissertations Committee (p. 2318)
- Dissertations Submission and Publication (p. 2319)
- Doctoral Degree Programs (p. 2314)
- Doctoral Degree Requirements (p. 2315)
- Final Oral Exam (p. 2318)
- General Examination, Thesis Defense or Project Defense (p. 2314)
- Interdisciplinary Studies (p. 2319)
- Masters Degree Programs (p. 2313)
- Master’s Degree Requirements (p. 2313)
- Oral Comprehensive Exam (p. 2317)
- Post-Comprehensive Enrollment (p. 2318)
- Research Skills and Responsible Scholarship (p. 2315)
- Thesis Submissions and Publication (p. 2314)

Awarding of Degrees

Degrees are awarded 3 times each year, in August, December, and May. Each academic year’s degrees are conferred formally at the annual commencement in May. Degree candidates are not eligible to graduate if the graduate cumulative grade-point average is lower than 3.0 in all courses taken for graduate credit.

Students who are working toward 2 degrees must complete requirements for each degree. Course work may not count toward fulfilling degree requirements for more than 1 degree.

Graduate students may not earn an additional KU degree with the same name and degree code as a previously awarded degree from KU. This applies to the completion of different degree tracks, concentrations, and subspecialties within a given degree. This does not prohibit students from earning additional master’s or doctoral degrees in another discipline.

Master’s Degree Programs

Master of Arts and Master of Science

Historically, most of the master’s degrees granted have been the Master of Arts (M.A.) and Master of Science (M.S.). This fact conforms with the traditional liberal arts background out of which most U.S. graduate schools developed. These degrees’ requirements are generally concentrated in 1 area or major discipline. The KU Medical Center campus with oversight from the Office of Graduate Studies offers Master of Science degrees in several disciplines through the Schools of Health Professions (p. 588), Medicine (p. 1966), and Nursing. (p. 2189)

Professional Master’s Degrees

In more recent years, professional master’s degree programs have been developed for entry level or advancement in specific professions. On the Medical Center campus this includes health services administration (M.H.S.A.) (p. 1998), occupational therapy (M.O.T.), and public health (M.P.H.). (p. 2034)

Master’s Degree Requirements

This section gives the general and common requirements for all master’s degree programs. The program sections of the online catalog give specific requirements for the degrees they offer.

Master’s Program Time Constraints

Normal expectations are that most master’s degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study. However, master’s degree students are allowed 7 years for completion of all degree requirements. In cases in which compelling reasons or circumstances recommend a 1-year extension, the Office of Graduate Studies, on recommendation of the academic program, has authority to grant the extension. In cases where more than 8 years are requested, the Office of Graduate Studies considers petitions for further extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant them. Some academic programs may have more stringent rulings about time restrictions. Students should ask about the policy in effect in the academic program in which they plan to study.

Master’s Enrollment Requirement

All graduate students enrolled in master’s graduate programs must be enrolled the semester they complete master’s degree requirements. Master’s students who complete degree requirements during the first week of summer session or within the first 2 weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester.
See the current Graduate Studies calendar for deadlines for specific semesters.

M.A. and M.S. Degree Requirements

A Master of Arts (M.A.) or a Master of Science (M.S.) degree requires at least 1 year of graduate work or its equivalent. Stated in terms of hours of credit, the standard master's program requires 30 hours. With permission of the academic program (or in the case of interdepartmental programs, permission of the joint program committee) and of the Office of Graduate Studies, it is sometimes possible to complete a 30-hour master's degree with as few as 24 hours if the student enters the program especially well prepared and maintains a superior grade-point average. Work for a master's degree is concentrated in the major area, with only a minimal amount of work (usually no more than 6 hours) that is completed at KU permitted outside the major department. Each master's program must contain a research component, represented either by a thesis (usually for 6 hours of credit) or by an equivalent enrollment in research, independent investigation, or seminars. Within these requirements, departmental master's programs may be flexible enough to meet the particular needs of individual students.

In a few cases, the degree is offered through two schools and administered by joint committees with faculty representation from both schools. The Master of Arts degree in speech-language pathology and the Master of Arts degree in audiology are administered by an intercampus committee drawn from the Department of Speech-Language Hearing; Sciences and Disorders in Lawrence and from the Department of Hearing and Speech in the School of Health Professions in Kansas City.

M.A. and M.S. Final General Examination, Thesis Defense or Project Defense

Completion of a final general examination, defense of a thesis or defense of a project in the major subject, is the culminating academic phase of the M.A. and M.S. degree programs and is required of all candidates for these two degrees. At the option of the academic program, the final general examination may be oral or written, or partly oral and partly written. In some departments, passing a written examination is a necessary preliminary to taking the oral examination by which success or failure is judged. For students defending a master’s thesis, the student must be enrolled in a minimum of one hour of master thesis the semester the thesis is defended.

When a M.A. or M.S. student is in their final semester, the degree program requests the Office of Graduate Studies approve the scheduling of the final general exam, thesis or project defense via the Progress to Degree form. The degree program should ascertain that the student is in good academic standing (3.0 or higher grade-point average) and is currently in regular admission status, if the student was admitted provisionally, before scheduling the examination or defense. This request must be submitted in advance of the examination date by a minimum of two weeks.

The committee for the administration of the general exam or the defense of a thesis or project, must consist of at least 3 members, all of whom must be members of the Graduate Faculty (see Graduate Faculty section of this catalog.)

The Office of Graduate Studies verifies that all criteria described in the preceding three paragraphs has been met upon receiving a Progress to Degree form requesting the scheduling of the general exam, thesis defense or project defense. If the criteria has been met, Graduate Studies approves the request to proceed.

M.A. and M.S. Thesis Submission

For those students completing a thesis, when the final oral examination has been passed and the thesis title page has been signed by the members of the committee, the title page with original signatures are to be delivered to the Office of Graduate Studies. When all requested changes have been made to thesis, the student arranges for the thesis committee chair to review changes, then sign and date the acceptance page, verifying the thesis is approved for publishing. The acceptance page with original signature is also delivered to the Office of Graduate Studies.

The student is then required to arrange publication of the thesis and payment of all associated fees (including copyright fee if applicable), through the electronic submission process (http://www.gpa.graduate.ku.edu/electronic-thesis-and-dissertation) detailed on the Graduate Studies website. The student must be the author of the thesis, and every publication from it naturally must indicate that authorship. However, practices vary among disciplines, and even among scholars in a given field, as to whether the mentor’s name may appear as a co-author and whether as senior or junior, on subsequent publication of the thesis (usually revised), or on articles prepared from it. Clear understandings in individual cases are expected to be established during the apprenticeship period, when the ethical practices in publication are addressed within the program’s professional development training.

Doctoral Degree Programs

KU Medical Center campus with oversight from the Office of Graduate Studies offers the six graduate doctoral degrees. General descriptions for each of the five doctoral degrees are given here in succinct form to provide convenient comparison of the degrees. Detailed information about requirements for each degree as it is offered in specific disciplines should be obtained from the appropriate academic program elsewhere in this catalog. Note: The School of Medicine also offers the Doctor of Medicine (p. 2052) (M.D.) (p. 2052) degree which is administered by the School of Medicine.

Clinical Doctorate in Speech-Language Pathology

The Clinical Doctorate in Speech-Language Pathology (SLPD) is a professional degree offered by the School of Health Professions. This program of study is intended for individuals who have a Master of Speech-Language Pathology degree and wish to upgrade their knowledge and skills to the doctoral level to meet the demands of complex clinical practice. Degree requirements are listed under Communicative Disorders: Intercampus Program in the online catalog.

Doctor of Philosophy

The degree of Doctor of Philosophy (Ph.D.) is the highest degree offered by the university. It is awarded for mastering a field of scholarship, for learning the methods of investigation appropriate to that field, and for completing a substantial piece of original research. In addition to preparing research specialists, the process of earning a Ph.D. shares certain goals with liberal education: putting order into human experience; fostering a love of learning for its own sake; instilling respect for human values; integrating various human
powers into a process of creation; and making vital, in many fields at least, a sense of history.

Although the courses and research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The Ph.D. aspirant is expected to be a well-educated person with a broad base of general knowledge, not only as preparation for more advanced work but also as a means of knowing how the chosen specialty is related to other fields of human thought.

To give depth and breadth to their doctoral programs, many departments require some work in a minor field or at least an articulated selection of courses. Because of the diversity of the fields in which the Ph.D. is offered, and the variety of needs and interests of individual students, the degree does not have a specific requirement for a minor. However, the Ph.D. aspirant is encouraged to plan an integrated program, under departmental direction, that includes courses outside the major field.

Doctor of Philosophy (Ph.D.) is offered by programs in specific disciplines by the Schools of Health Professions (p. 588), Medicine (p. 1966), and Nursing (p. 2189).

Doctor of Audiology
The Doctor of Audiology (Au.D.) degree program prepares the student to enter clinical practice as an audiologist. Offered by the KU School of Health Professions, the program produces professionals skilled in providing diagnostic, rehabilitative, and related services in the fields of sound, balance, and hearing sciences. There is an emphasis on the clinical learning experience, although research is also a significant component of the program. A baccalaureate degree is required for admission. Degree requirements are listed under Communicative Disorders: Intercampus Program (p. 621) in the online catalog.

Doctor of Nursing Practice
The Doctor of Nursing Practice (D.N.P.) at the KU School of Nursing prepares advanced practice nurses at the highest level of nursing practice. The D.N.P. offers sophisticated, cutting-edge experiences that help nurses actively engage in a complex, dynamic, and demanding health care field. Skills in collaboration, innovation, and evaluation, complemented by advanced practice skills, prepare nurses to share the future of health care. Students preparing for advanced practice roles learn to provide patient-centered care that is evidence-based, and contribute to the development of the highest level of evidence-based practice. Students preparing for indirect care roles learn to provide the highest level of leadership in a variety of care and educational settings. Requirements are listed in the Doctor of Nursing Practice (p. 2218) and the Doctor of Nursing Practice in Nurse Anesthesia (p. 672) section of the online catalog.

Doctor of Occupational Therapy
The Doctor of Occupational Therapy (O.T.D.) is a professional degree offered by the School of Health Professions. This program of study is intended for therapists already in practice who have either a bachelor's degree or a Master of Occupational Therapy degree and wish to upgrade their knowledge and skills to the doctoral level to meet the increasing demands of complex practice issues. Requirements for admission are listed in the Doctor of Occupational Therapy (p. 685) section of the online catalog.

Doctor of Physical Therapy
The Doctor of Physical Therapy (D.P.T.) is designed for individuals pursuing careers in physical therapy. The program prepares a physical therapy practitioner with the skills for lifelong professional development. To be eligible for admission, the student must have a minimum of a baccalaureate degree or its equivalent. Requirements for admission are listed in the Doctor of Physical Therapy (p. 690) section of the online catalog.

Doctoral Degree Requirements
The sections immediately following list the general and common requirements for doctoral degrees. Specific degree requirements, including requirements for the clinical doctoral degrees, set by specific departments, programs, and schools, appear in the sections of the catalog devoted to those units.

Maximum Tenure for Doctoral Programs
After being admitted to doctoral programs at KU, students complete all degree requirements in 8 years. In cases in which compelling circumstances recommend a 1-year extension, the Graduate Division has authority to grant the extension on the written advice of the department and dissertation committee. Students who complete the master's degree at KU and subsequently begin doctoral studies have a maximum total enrolled time of 10 years to complete both degrees. Normal expectations, however, are that most master's degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study, and both master's and doctorate in 6 years of full-time study. Some graduate degree programs may have more stringent time restrictions. Students should inquire about the policy in effect in the department in which they plan to study.

Doctoral Enrollment Requirement
All graduate students enrolled in doctoral graduate programs must be enrolled the semester they complete doctoral degree requirements. Doctoral students who complete degree requirements during the first week of summer session or within the first 2 weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester. See the current Graduate Studies Calendar (http://www.kumc.edu/academic-affairs/graduate-studies/calendars.html) for deadlines for specific semesters.

Research Skills and Responsible Scholarship
All doctoral students must meet this requirement before proceeding to comprehensive exams. The requirement must include at least 2 components:

1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.

2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).

Procedure
All doctoral programs must have a research skills and responsible scholarship requirement plan approved by the Graduate Studies Office. Students meet this requirement as determined by the approved plan for their program. It is
the responsibility of the program to report when the student completed the requirement and how the requirement was met.

No course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

It is the purview of the department or program to determine the necessary topics in training doctoral students in the areas of responsible scholarship. Such topics **may** include:

- Protection of human subjects
- Welfare of laboratory animals
- Conflicts of interest
- Data management
- Mentor/student responsibilities
- Collaborative research
- Authorship, publication, plagiarism, copyright
- Peer review
- Professional practices
- Maintenance of confidentiality
- Appropriate research conduct and research misconduct

It is also the purview of the department or program to determine the research skills necessary to perform doctoral level research. Research skills **may** include:

- Knowledge of language(s) significant to the field
- Research methodology
- Methods of qualitative and quantitative data analysis
- Computer programming necessary for the field
- Laboratory skills and techniques necessary for the discipline

**Note:** These lists serve as guides; additional appropriate topics may exist.

## Doctor of Philosophy Degree Requirements

This section lists KU regulations common to the administration of all doctoral Ph.D. programs. The particular application, interpretation, or method of implementation of such a common element for individual degree programs and departments is, in certain cases, left to the faculty of the department or the degree program (e.g., Research Skills and Responsible Scholarship requirement). Additional requirements specific to each degree, along with variations permitting each student to achieve particular academic goals, are listed in the section of this catalog for the school through which the degree program is offered.

### 1. Application and Admission

A student who seeks admission to a doctoral program must apply to the graduate degree program and school offering the desired degree. Upon admission, the student is known as an aspirant for the degree and remains so designated until successful completion of the comprehensive oral examination. After passing that examination, the student is designated a candidate for the degree.

### 2. Program Time Constraints

#### Minimum Tenure

The student must spend 3 full academic years, or the bona fide equivalent thereof, in resident study at this or some other approved university, including the time spent in attaining the master’s degree. Resident study at less than full time requires a correspondingly longer period, but the requirement is not measured merely in hours of enrollment. Because a minimum number of hours for the degree is not prescribed, no transfer of credit is appropriate. However, graduate degree programs take relevant prior graduate work into consideration in setting up programs of study leading to the doctorate.

#### Residence Requirement

Two semesters, which may include one summer session, must be spent in resident study at KU. For the two specific semesters counted towards meeting this requirement, the student must be involved full time in academic or professional pursuits such as a GTA or GRA appointment for teaching or research if it is directed specifically toward degree objectives. Enrollment in approved distance-learning courses offered through KU cannot be used to meet the doctoral residence requirement.

Full time enrollment for a graduate student is 9 hours for Fall or Spring semesters and 6 hours for the Summer semester. For semesters in which a student holds a GTA or GRA appointment, full-time enrollment is 6 hours for Fall or Spring semesters and 3 hours for the Summer semester. The residence requirement must be met prior to the semester the Comprehensive Oral Examination is scheduled. It is the responsibility of the academic program to report the two semesters that will satisfy this requirement via the Progress to Degree form requesting approval to schedule the Comprehensive Oral Examination.

**Note:** These are minimum residence requirements. Please check with the individual program for any additional requirements.

#### Maximum Tenure

After being admitted to doctoral programs at KU, students complete all degree requirements in 8 years. In cases in which compelling circumstances recommend a 1-year extension, Graduate Studies has authority to grant the extension on the written advice of the department and dissertation committee. Students who complete the master’s degree at KU and subsequently begin doctoral studies have a maximum total enrolled time of 10 years to complete both degrees. Normal expectations, however, are that most master’s degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study, and both master’s and doctorate in 6 years of full-time study. Some graduate degree programs may have more stringent time restrictions. Students should inquire about the policy in effect in the department in which they plan to study.
A student in any of the above categories may petition the Dean of Graduate Studies through the program for a leave of absence during either the pre- or post-comprehensive period to pursue full-time professional activities related to the doctoral program and long-range professional goals. Leaves of absence also may be granted because of illness or other emergency. Ordinarily a leave of absence is granted for 1 year, with the possibility of extension upon request. After an absence of 5 years, however, a doctoral aspirant or candidate loses status as such and must apply for readmission to the program.

3. Research Skills and Responsible Scholarship

All doctoral students must meet this requirement before proceeding to comprehensive exams. The requirement must include at least 2 components:

1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.

2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).

Procedure

All doctoral programs must have a research skills and responsible scholarship requirement plan approved by the Graduate Studies Office. Students meet this requirement as determined by the approved plan for their program. It is the responsibility of the program to report when the student completed the requirement and how the requirement was met via the Progress to Degree form requesting approval to schedule the Comprehensive Oral Examination.

No course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

It is the purview of the department or program to determine the necessary topics in training doctoral students in the areas of responsible scholarship. Such topics may include:

- Protection of human subjects
- Welfare of laboratory animals
- Conflicts of interest
- Data management
- Mentor/student responsibilities
- Collaborative research
- Authorship, publication, plagiarism, copyright
- Peer review
- Professional practices
- Maintenance of confidentiality
- Appropriate research conduct and research misconduct

It is also the purview of the department or program to determine the research skills necessary to perform doctoral level research. Research skills may include:

- Knowledge of language(s) significant to the field
- Research methodology
- Methods of qualitative and quantitative data analysis
- Computer programming necessary for the field
- Laboratory skills and techniques necessary for the discipline

Note: These lists serve as guides; additional appropriate topics may exist.

4. Comprehensive Oral Examination

The comprehensive oral examination covers the major field and any extra departmental work for which the program wishes to hold the aspirant responsible. When a doctoral aspirant has completed the major portion of the course work at a level satisfactory to the graduate degree program and met all other program and general requirements prerequisite to the comprehensive oral examination, including the research skills and responsible research requirement as appropriately applied and established for the student’s particular program, the degree program requests the Office of Graduate Studies approve the scheduling of the comprehensive oral examination via the Progress to Degree form. The degree program should ascertain that the student is in good academic standing (3.0 or higher grade-point average) and is currently in regular admission status, if the student was admitted provisionally, before scheduling the examination. The examination may be scheduled provided that at least 5 months have elapsed from the time of the aspirant’s first enrollment at KU and at least 90 days have elapsed since any unsuccessful attempt. The examination request must be submitted in advance of the examination date by a minimum of two weeks.

The committee for the comprehensive oral examination must consist of at least 5 members, all of whom must be members of the Graduate Faculty (see Graduate Faculty section of this catalog). At least one member of the committee must be from a department other than the aspirant’s major department. This outside committee member represents the Office of Graduate Studies and must hold either regular or dissertation graduate faculty status to be eligible to serve in this capacity. Before the examination, Graduate Studies provides the outside committee member a list of responsibilities as the Graduate Studies representative. The Graduate Studies representative is a voting member of the committee, has full right to participate in the examination, and reports any unsatisfactory or irregular aspects of the examination to the committee chair, department chair, and Graduate Studies.

The Office of Graduate Studies verifies that all criteria described in the preceding two paragraphs has been met upon receiving a Progress to Degree form requesting the scheduling of the Comprehensive Exam. If the criteria has been met, Graduate Studies approves the request to proceed with the exam.

For every scheduled examination, the degree program reports an exam result of Honors, Satisfactory, or Unsatisfactory. If the aspirant receives a grade of Unsatisfactory on the comprehensive
oral examination, it may be repeated on the recommendation of the program, but under no circumstances may it be taken more than 3 times. In any case, the examination may not be repeated until at least 90 days have elapsed since the last unsuccessful attempt.

5. Candidacy

Dissertation Committee

Upon passing the comprehensive oral examination, the aspirant becomes a candidate for the doctorate. If it has not begun before, the traditional, close student-mentor apprenticeship relationship comes into being. The student is expected to learn by both precept and example of the mentor, and often in collaboration. The chosen field of scholarship is explored using acquired research tools. The principles and customs of academic inquiry and the codes of ethics traditional to the various disciplines and professional fields become part of the student’s thinking and working.

When the student passes the comprehensive oral examination, the program designates the candidate’s dissertation committee. All members of the committee must be chosen from the Graduate Faculty, and the chair must, in addition, be authorized to chair doctoral dissertations.

Post-Comprehensive Enrollment

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled in one or more hours that both moves the student towards degree completion and reflects, as accurately as possible, the candidate’s demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester and 3 hours a summer session. Post-comprehensive enrollment may include enrollment during the semester in which the comprehensive oral examination has been passed. If after 18 hours of post-comprehensive enrollment the degree is not completed, the candidate must continue to enroll each semester until all degree requirements have been met. The number of hours at this stage may be as little as one hour a semester. The number of hours of enrollment is determined by the candidate’s advisor and must reflect as accurately as possible the candidate’s demands on faculty time and university facilities.

6. Dissertation

The candidate must present a dissertation showing the planning, conduct, and results of original research and scholarly creativity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities as well as to demonstrate an intensive focus on a problem or research area. The dissertation itself should be an evident product of the candidate’s growth and attainment of the ability to identify significant problems; organize, analyze, and communicate scholarly results; and bring to bear on a useful area of interest a variety of research skills and scholarly or creative processes. It must show some original accomplishment, but it should also demonstrate without doubt the candidate’s potential to make future contributions to knowledge and understanding.

The dissertation is to be a coherent scholarly work, not a collage of separate, distinct pieces. Its unity of theme and treatment may still accommodate several subtopics by demonstrating their relationships and interactions. If previously published material by other authors is included in the dissertation, it must be quoted and documented. It should be noted that prior publication does not guarantee acceptance of the dissertation by the dissertation committee. Final acceptance of the dissertation is subject to the approval of the dissertation committee. The dissertation—or one or more substantial portions of it, often rewritten—is expected to be publishable and indeed to be published (see the Dissertation Submission and Publication section).

Both the dissertation research and the dissertation itself are to be completed under the guidance and direction of the dissertation committee. Instructions about the proper format of the dissertation are available on the Graduate Studies website (http://www.graduate.ku.edu/electronic-thesis-and-dissertation) Candidates and faculty members are reminded that the dissertation is to be a coherent, logically organized scholarly document. Because the demands and practices of different disciplines are varied, the format is somewhat flexibly described, and moderate departures from the norm are allowed when justified by the nature of the work or the circumstances of presentation. Any substantial divergences must be approved in advance as prescribed by the instructions, and candidates and faculty members are urged to seek early approval to avoid last-minute disappointments over unacceptable format or reproduction.

7. Final Oral Examination

Completion of the dissertation is the culminating academic phase of a doctoral program, climaxing by the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the dissertation is followed promptly by the final oral examination. When the completed dissertation has been accepted by the committee in final draft form, and all other degree requirements have been satisfied, the chair of the committee requests Graduate Studies approve the scheduling of the final oral examination via the Progress to Degree form. This request must be made in advance of the desired examination by at least 3 weeks to allow sufficient time to publicize the examination so that interested members of the university community may attend.

At least 5 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination. Under normal circumstances, the doctoral candidacy period between passage of the oral comprehensive examination and the final dissertation defense must last no longer than 5 years. If a student took the oral comprehensive examination more than 5 years prior to the dissertation defense, a re-evaluation of the student’s candidacy status is necessary. Re-evaluation of the student’s candidacy status can include retaking the comprehensive oral examination.

The committee for the final oral examination must consist of at least 5 members, all of whom must be members of the Graduate Faculty (see Graduate Faculty section of this catalog.) At least one member of the committee must be from a department other than the aspirant’s major department. This outside committee member represents the Office of Graduate Studies and must hold either regular or dissertation graduate faculty status to be eligible to serve in this capacity. Before the examination, Graduate Studies
for the particular mix of disciplines, demonstrating how each contributes to a central theme or focus. It must also show that the proposed program cannot be achieved through an established master’s or doctoral program at KU.

The student seeking to enter the Interdisciplinary Studies program must have an outstanding academic record (a grade-point average of 3.75 or higher on a 4.0 scale for graduate courses or a grade-point average of 3.5 or higher on a 4.0 scale for undergraduate courses if no graduate courses have been taken) and must be admitted to and enrolled in a graduate program at KU at the time of application. A graduate student who has failed to maintain the required grade-point average is not eligible for the Interdisciplinary Studies program. A student is not eligible for this program if he or she has tried and failed to achieve candidacy in a regular graduate department or program at KU.

The student is expected to assume the initiative in determining his or her potential eligibility through consultation with graduate advisors and, if deemed eligible, in forming an advisory committee and preparing documentation to support the application.

**Preadmission Procedures**

To enter the program, a student should

1. Determine that KU offers courses and research in the areas appropriate to the student’s interest(s).

2. Prepare a tentative study plan based on those offerings to serve as a basis for initial discussion.

3. Approach a professor whose interests are comparable to those of the student and request that he or she acts as advisor. Normally this professor is a faculty member of the program of principal interest to the student. To grant an M.A. or M.S. in Interdisciplinary Studies, it is essential that the school has the authority to grant master’s degrees. To grant a Ph.D. in Interdisciplinary Studies, it is essential that the school has the authority to grant doctoral degrees. The selected professor must be a full member of the graduate faculty and authorized to chair doctoral dissertation committees for Ph.D. in Interdisciplinary Studies.

4. After a professor agrees to serve as an advisor, the student should assemble an advisory committee of at least 3 additional professors representing the disciplines covered in the Interdisciplinary program. At least 2 disciplines or departments must be represented.

5. In conjunction with the advisor and the committee, the student prepares a proposal for study, including

- A statement, with supporting documentation, that the proposed Interdisciplinary Studies program cannot be accomplished through established programs.

- A statement of the interdisciplinary or transdisciplinary nature of the proposed area of study.

- A definition of the field of study incorporating in a consistent way a description of the contribution of each included discipline to the broader field.

- An outline of the course of study, indicating substantive work in the fields represented. Readings courses and independent study do not substitute for regular courses.
• A description of the method for satisfying research skills and responsible scholarship requirements.

• A description of the comprehensive examination procedures for the Ph.D. (nature of the examinations and possible examining committee) or final examination for the M.A./M.S.

• A description, to the extent possible, of the nature of the field in which a dissertation or master’s thesis might be written, indicating the respective contributions of the selected disciplines to the final product.

• Attach the following:
  i. complete transcripts of all previous work,
  ii. a cover sheet, signed by committee members, indicating their support of the proposal,
  iii. letters of recommendation and other appropriate supporting documents.

Note: The diploma indicates the degree awarded as “M.A. in Interdisciplinary Studies,” “M.S. in Interdisciplinary Studies,” or “Ph.D. in Interdisciplinary Studies,” and does not specify the area of specialization. The transcript notes the area of specialization as determined by the admissions committee.

Admission and Review Procedure
Upon completion of the above, the student must submit the application for admission to the Interdisciplinary Studies program to the Dean of Graduate Studies. The Dean of Graduate Studies appoints an admission committee consisting of (a) the associate dean of graduate studies or associate dean’s designate for the school most involved in the interdisciplinary undertaking (the school in which the major advisor resides), (b) 2 or more doctoral chairing faculty members from unrelated fields, including at least 1 member of the Graduate Council, and (c) the chair or director of graduate studies of the department in which the student resides at time of application. The Dean of Graduate Studies serves as ex officio chair of the Interdisciplinary Studies admissions committee. The committee reviews the documents and may, if necessary, interview the student and the advisor for clarification and additional information or to discuss suggested revisions to the proposal.

Approved Program Implementation
Upon acceptance of the proposal and admission to the Interdisciplinary Studies program, the student is admitted to the school of the major advisor to facilitate record keeping and to provide a central administrative office. The associate dean or director of graduate studies of that school must enroll the student and monitor the program and, along with the major advisor, must make annual reports to Graduate Studies on the student’s progress. These reports are distributed to the directors of other involved programs along with a request to supply any additional information regarding the student’s performance. Proposals for major deviations from the approved course of study must be submitted for review by Graduate Studies and by the school in which the student resides. It is understood that no additional requirements unique to traditional graduate programs of the school(s) or departments may be imposed unless stated explicitly in the approved study plan.

Once approved, changes to the program plan must be approved by a Graduate Studies committee, appointed by the Dean of Graduate Studies. Significant curricular changes may require a new proposal and admissions process.

All basic rules and requirements for the Master of Arts, Master of Science, and Doctor of Philosophy degrees apply to Interdisciplinary Studies programs. These include program time constraints, residence requirement, post-comprehensive enrollment, final examinations, research skills and responsible scholarship requirements, thesis or dissertation submission and publication, grade-point average, etc. (See Master’s Degree Requirements and Doctoral Degree Requirements in this section of the online catalog.)

CombinedDegrees
Combined degrees are granted in programs meeting the requirements of the graduate master’s or doctoral degree and the professional post-baccalaureate degree. Approved programs include the following degrees:

Doctor of Audiology (Au.D.) with Ph.D. in Audiology
Doctor of Philosophy (Ph.D.) in basic medical science fields with M.D.
Doctor of Philosophy (Ph.D.) with Au.D.
Master of Health Services Administration (M.H.S.A.) with B.S. in Health Information Management
Master of Health Services Administration (M.H.S.A.) with J.D.
Master of Arts (M.A.) or Master of Science (M.S.) in basic medical science fields with M.D.
Master of Health Services Administration (M.H.S.A.) with M.D.
Master of Science (M.S.) in Nursing with M.H.S.A.
Master of Science (M.S.) in Nursing with M.P.H.

Combined Medical and Master’s Degrees
Graduate students in the basic medical science departments in the School of Medicine are enrolled, for the most part, only in graduate programs. Outstanding medical students, however, are allowed to participate in work leading jointly to the M.D. degree and a graduate degree. A student admitted to both academic programs may enroll concurrently in courses in the respective programs, provided the regular medical course load is reduced to compensate for the added graduate work. The student should discuss concurrent enrollment with the chair or graduate advisor of the master’s degree program; departmental policies vary. All requirements for the degrees must be met, but within these limitations, superior students may be able to complete the joint degree program in less time than the total required for the 2 degrees to be earned separately. For the master’s degree, a student must complete graduate work equivalent to at least 1 academic year in addition to the time spent on the medical curriculum.

Combined Medical and Doctoral Degrees
Outstanding students who are qualified to do so may participate concurrently in work leading to the M.D. and the Ph.D. degrees. Credit hours earned in the medical curriculum cannot be transferred as graduate
credit hours toward the requirements for the Ph.D. degree, although recognition of satisfactory performance in appropriate medical courses may be given by the involved Ph.D. program when formulating the student's additional graduate curriculum for the Ph.D. All the requirements for the respective degrees must be met. The joint degree requirements and application information for the joint M.D.-Ph.D. program are posted on the M.D.-Ph.D. website (p. 2049).

Policies and Processes for Graduate Certificate Programs

The graduate certificate is a focused collection of courses that, when completed, affords the student some record of coherent academic accomplishment in a given discipline or set of related disciplines. Students may be awarded these certificates upon completion of a well-defined program of course work. The didactic material comprised within a graduate certificate program may represent a more practice-oriented subset of an existing graduate discipline.

The KU Medical Center campus with oversight from the Office of Graduate Studies offers graduate certificate programs in several disciplines through the Schools of Health Professions, Medicine, and Nursing. Specific information about the certificate programs offered can be found in the the Schools of Health Professions (p. 588), Medicine (p. 1966), and Nursing (p. 2189) sections of this catalog.

Eligibility and Admission Criteria

See Graduate Certificate Admission (p. 2310) section of this catalog for admission criteria on the Medical Center campus.

Number of Credits

A graduate certificate program will comprise no less than 9 and generally no more than 18 credit hours of course work in a particular discipline or related disciplines of study.

Expiration of Program

All proposals for graduate certificate programs will be adopted for a 7-year time period. The certificate program will expire at the end of that period. The program may request renewal of the certificate program by sending an updated program proposal, endorsed by the department and School to the Graduate Council on the Medical Center campus. The proposal will be evaluated for an additional 7-year period. The Office of Graduate Studies will remind the graduate certificate program about its renewal one year before the graduate certificate program is scheduled to expire. If a program expires or is discontinued, no new students may be enrolled in the program and those students currently in the program will continue until completion.

Student Records Criteria

- It is the responsibility of the degree program that houses the graduate certificate program to maintain all student records of the graduate certificate program. These records should include, but are not limited to, the number of students that apply to the program, the number accepted and denied into the program, the number of students enrolled in the program by semester, the number of students who complete the program by semester.
- The courses taken in the graduate certificate program will be listed on the student's transcript and recognition of the earned certificate will also be posted on the transcript.
- The awarding of graduate certificates will coincide with the August, December and May graduations at the University of Kansas. The certificate awarding department will forward its list of certificate recipients in a given semester to the Graduate Studies office. The same degree granting deadline dates will apply to the awarding of graduate certificates.
- Graduate Studies will be responsible for providing the University Registrar's office with the names of certificate recipients along with the corresponding names of the completed certificate programs each semester.
- The Registrar's Office will provide Graduate Certificates for students who successfully complete all certificate program requirements each semester.
- Graduate certificates will not be recognized by any Graduate Studies official graduation ceremony.

Process of Approval for New Graduate Certificate Programs

Approval Process

Proposals for new graduate certificate programs may be created and submitted by graduate faculty in the same manner as proposals for new graduate degree programs, with the exception that all approvals are made internally at the University of Kansas. The proposal must be approved by the Vice Chancellor for Academic Affairs and accompanied by endorsement from the department chairperson, and dean of the school in which the contributing course work is administered.

After a proposal has been endorsed by the sponsoring department and school, the proposal must go to the Graduate Council and, if approved, will be forwarded to the Vice Chancellor for Academic Affairs.

Curriculum Criteria

- All certificate programs must be linked to a specific KU degree program(s), such that they provide a specific set of skills or knowledge base within a defined body of knowledge of the particular discipline. Certificate programs are encouraged where they might provide value-added benefits to students in existing graduate degree programs or provide a needed educational initiative for post-baccalaureate students in an area not currently addressed by a graduate degree program. These programs are not encouraged where they might detract from existing graduate programs.
- The proposed sequence of course work must offer a clear and appropriate educational objective at the post-baccalaureate level.
- The proposed certificate program must achieve its educational objective in an efficient and well-defined manner.
- A statement of the proposed course sequence associated with the certificate, including titles, number of credit hours of courses, and course descriptions both for existing courses and any new courses that may be developed.
- Graduate certificate programs may be at the post-baccalaureate, the post-master’s or post-doctoral level.
- Graduate certificate programs must be proposed for current KU graduate students or new KU students seeking a post-baccalaureate certificate.
- The certificate program must include an appropriate number of credit hours. In general, certificate programs should be no less than 9 credit hours. All proposals must have a maximum time to completion of no more than 4 full academic years.
- The proposal will identify the extent to which the curriculum overlaps with the curriculum of existing degree programs.
• The proposal will identify requirements of the program that are supplemented to the course work, including but not limited to laboratories, practicum, internships, and projects.

**Faculty Criteria**

Instructors in graduate certificate programs must have gained appointment to the Graduate Faculty.

**Materials Required for New Certificate Proposal**

Proposals for a graduate certificate program at KU must include the following materials:

• A statement of the educational objectives of the program.

• A statement of the proposed course sequence associated with the certificate, including titles, number of graduate credit hours, and course descriptions both for existing courses and any new graduate courses that may be developed.

• A statement identifying the important academic objectives of the proposed certificate program, including the range of skills and knowledge future graduates will possess. Proposals should show how the graduate certificate program complements existing courses and does not detract from existing programs.

• A statement of how the proposed course sequence associated with the certificate will meet the stated educational objectives.

• A statement of the need for the proposed program and the basis for such need, supported by either external or internal derived data.

• A list of the names of the faculty associated with or contributing to the certificate program, either by teaching the courses or advising the students within the program. An up-to-date curriculum vitae for each faculty member listed needs to be included.

• The name and curriculum vitae of the faculty member who will be designated as the coordinator of the program.

• A planned date of implementation.

**The Graduate Faculty**

The Graduate Faculty consists of members of the university faculty and other persons qualified by training and experience who are duly nominated by a graduate department and appointed by the Office of Graduate Studies. Only members of the Graduate Faculty may teach courses for graduate credit, supervise master’s programs, serve on master’s examination and defense committees, or serve on doctoral examination committees.

**Regular Graduate Faculty Status**

Any faculty member who is appointed to a tenure-track position in a graduate degree granting department on the Medical Center campus receives regular graduate status. These members of the Graduate Faculty may teach courses for graduate credit, master’s programs, serve on master’s examination and defense committees, or serve on doctoral examination committees.

When appropriate, a qualified member of the Regular Graduate Faculty may be nominated to serve as co-chair of a specific dissertation committee if a faculty member with Dissertation status serves as co-chair of the committee and agrees to ensure that all requirements are met. However, if the regular member of the Graduate Faculty has lost dissertation status, this does not apply. Present or newly appointed faculty members in tenure-track appointments with the rank of assistant professor or above in departments or programs with approved graduate programs are granted regular membership in the Graduate Faculty, provided they have received the terminal degree in their field of specialization or have acquired equivalent training and/or professional experience as determined by the appropriate Graduate Division.

In special cases where faculty members who hold regular membership in the graduate faculty enroll in a KU graduate program as part of their professional development, they may be permitted to retain their graduate faculty status. They may not supervise or serve as the instructor of record for students who are peers in the graduate program in which they are enrolled. To hold regular membership in the Graduate Faculty, a faculty member must continue to show evidence of a pattern of productive professional activity demonstrating the ability to contribute to high-quality graduate education. The form that productive professional activity may take varies across disciplines. Conventional evidence of such activity includes such things as effective teaching, scholarly publication, participation in professional societies, and other scholarly activity.

Graduate degree programs are responsible for monitoring faculty with regular membership in the Graduate Faculty.

**Dissertation Graduate Faculty Status**

To qualify for the privilege of chairing doctoral dissertation committees, a regular member of the Graduate Faculty must demonstrate continuing activity commensurate with being an established scholar in his or her field and involvement in the graduate education program as evidenced by:

1. Teaching graduate courses,
2. Advising and mentoring graduate students and serving on thesis and dissertation committees, and
3. Maintaining an ongoing program of scholarly activity including a record of scholarship, publication and other contributions to the field.

It is the graduate program’s responsibility to nominate members of the Graduate Faculty for authorization to chair doctoral committees and to provide evidence of scholarship and involvement in the graduate education program. Authorization to chair dissertation committees is reviewed as part of each graduate program review.

**Special Graduate Faculty Status**

Special membership may be granted to any university employee or non-employee who is uniquely qualified by training or experience for membership in the Graduate Faculty for the purposes of:

1. Teaching a course or courses;
2. Having courses cross-listed as KU courses if they are part of a cooperative graduate program between KU and the appointee’s home institution;
3. Serving on the thesis, dissertation, or examination committee of a particular student or students;
4. Chairing master’s thesis committees of a particular student or students.
5. Co-chairing dissertation committees of a particular student or students. The other co-chair must hold dissertation status and agrees to ensure that all requirements are met.

Special memberships are limited to a maximum period of 5 calendar years for teaching purposes or for the duration of the specified committee assignment. All nominations for special membership must state clearly the specific purposes for which the nomination is being sought and, when it can be known in advance, the length of time for which it is being requested. Special appointments are reviewed by the appointing graduate department and renewed when term ends as appropriate.
Graduate Faculty Appointment Chart

This chart summarizes the organization and privileges of the various types of Graduate Faculty appointments.

<table>

1. The term “doctoral committee” refers to both oral comprehensive and dissertation defense committees.

2. A faculty member with the appropriate status may chair a degree committee alone or co-chair a degree committee with another faculty member (i.e., both co-chairs have equal status). Degree committees cannot have both a chair and a co-chair.

A current list of Graduate Faculty on the Medical Center campus is posted on the Graduate Studies website (http://www.kumc.edu/academic-affairs/graduate-studies/graduate-faculty.html).

Notice of Non-reappointment and Graduate Faculty Eligibility

Faculty members given a notice of non-reappointment are not eligible to hold Graduate faculty status. The Office of Faculty Affairs (http://www.kumc.edu/academic-affairs/faculty-affairs.html) on the Medical Center campus will provide the Office of Graduate Studies with a written list of faculty who receive a notice of non-reappointment. The Office of Graduate Studies will remove graduate faculty status for these non-reappointed faculty for the appointment period for which the terminal notice is effective.

Upon non-reappointment the faculty member is no longer eligible for graduate faculty status. The named faculty member will no longer be allowed to teach future courses for graduate credit or to serve on graduate students' committees.

The appropriate chairperson for the faculty member receiving the terminal notice may request, in writing, an exception to the policy from the Dean of Graduate Studies. Permission may be given to the faculty member to serve on a graduate student's committee if the graduate student will meet all degree requirements within the semester.

The faculty member who received notice of non-reappointment will be given a copy of the initial letter sent to the dean and will be provided a copy of the letter sent requesting and defining an exception.

Graduate Teaching Assistantships (GTA) (p. 2323)

GTA Eligibility (p. 2324)

GTA Tuition Benefit (p. 2324)

Graduate Research Assistantships (GRA) (p. 2325)

GRA Eligibility (p. 2325)

GRA Tuition Benefit (p. 2325)

Principles Guiding Assistantships

The following principles govern all graduate teaching assistant (GTA) and graduate research assistant (GRA) appointments on the Medical Center campus:

1. Individuals who enroll in graduate educational programs at the University of Kansas do so in order to attain specific educational goals. It is the University’s responsibility to help ensure that graduate students attain their academic goals in a reasonable amount of time and move on to the next stage in their careers, whether to another advanced degree program or to professional employment.

2. When academic programs/departments offer GTA or GRA appointments, the assistantships must contribute to the training experience of the graduate student.

3. The responsibilities required of the GTA or GRA should be in balance with their responsibilities as a student in the graduate program. For appointments of .50 FTE, the expectation is that the assigned duties will average no more than 20 hours per week during the semester. For appointments at other percentages, the number of hours per week must be proportional to the appointment percentage.

Appointments shall not normally exceed .50 FTE. Appointments in excess of .50 FTE but not exceeding .75 FTE, must be approved by the academic program and the Dean of Graduate Studies in advance of an appointment offer and will be approved only in special circumstances. Departments are expected to monitor appointments in excess of .50 FTE to ensure that the graduate students’ assistantship assignments enhance their academic preparation and do not interfere with progress towards degree.

Graduate Teaching Assistantships (GTA)

Graduate Teaching Assistants are salaried student employees whose job duties consist primarily of direct involvement in classroom or laboratory instruction. The duties are performed under the supervision of faculty. The University also requires that a GTA’s teaching assignment be in his/her own field of study or one that is closely related.

A limited number of graduate teaching assistantships are available. Graduate students should inquire directly to their academic program/department about GTA appointment opportunities. Graduate teaching assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies. (Note: Graduate teaching assistantships on the Lawrence campus differ in that they are governed by a memorandum of agreement among KU, the Kansas Board of
GTA Eligibility

The following eligibility requirements govern all Graduate Teaching Assistant (GTA) appointments at the Medical Center campus:

1. During the semester of appointment, the GTA is admitted to and enrolled in a graduate degree program offered by the Medical Center campus.

2. During the semester of appointment, the GTA is enrolled in no fewer than six graduate credit hours per Fall and Spring semester and no fewer than 3 credit hours per Summer semester. See "Enrollment Exceptions" below.

3. During the semester of appointment, the GTA must be in good academic standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: A graduate student must maintain a cumulative grade point average of 3.0 to remain in good academic standing. However, if a program judges that a graduate student whose GPA falls below 3.0 is nonetheless making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be allowed to continue with the GTA appointment.]

4. The GTA must satisfy the English proficiency criteria established by the Board of Regents for GTAs - see Minimum English Requirement for GTAs below.

5. A student completing his or her graduate degree may not continue in a GTA appointment after the graduation date unless he or she has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

Enrollment Exceptions

A Ph.D. student appointed as a GTA, who has successfully completed the doctoral comprehensive examination and 18 post-comprehensive credit hours, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies (http://www.kumc.edu/academic-affairs/graduate-studies/gta-and-gra.html) website and is subject to approval by the academic department and the Dean of Graduate Studies.

A professional doctoral (Au.D., D.N.P., D.P.T., O.T.D.) student appointed as a GTA, who is in his or her final semester, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies (http://www.kumc.edu/academic-affairs/graduate-studies/gta-and-gra.html) website and is subject to approval by the academic department and the Dean of Graduate Studies.

A master's student appointed as a GTA, who is in his or her final semester, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies (http://www.kumc.edu/academic-affairs/graduate-studies/gta-and-gra.html) website and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not his or her final semester after all.

Minimum English Requirement for GTAs

All applicants for graduate teaching assistantships whose first language is not English, including international students and U.S. residents or citizens, must meet one of the following criteria:

1. Score a minimum of 22 on the spoken English portion of the TOEFL iBT.

2. Score a minimum of 8 on the spoken English portion of the IELTS.

3. Score a minimum of 50 on the SPEAK administered by the Office of International Programs (http://www.kumc.edu/international-programs/academic-english-requirements/speak-test-faq.html) on the Medical Center campus.

GTA Tuition Benefit

The Medical Center campus pays the tuition of graduate students who receive appointments as graduate teaching assistants as defined below for the semester of appointment:

- .40 FTE or more appointment
- .30 FTE but less than .40 FTE appointment
- .20 FTE but less than .30 FTE appointment
- .10 FTE but less than .20 FTE appointment

A graduate student who has a GTA appointment or a combination of a GTA and GRA appointment of at least .40 FTE is eligible for staff (resident) tuition rates for the semester of appointment. The staff rate is assessed before tuition is paid. The tuition payment program covers only tuition, including any differential tuition assessed. It is not applicable for campus fees, KU Edwards Campus construction fee, union fee, and required fees; mediated and Continuing Education course fees; optional fees; housing costs; or other specialized fees.

GTA Health Insurance Benefit

A graduate student who has a GTA appointment or combination GTA and GRA appointment of at least .50 FTE for a given semester is eligible to participate in a health care benefits plan for that semester, for which the University provides a contribution. The health care benefits plan is the same plan that is available to all students, but a portion of the premium is paid if the student appointed as a .50 FTE GTA/GRA selects the plan. The health insurance information is available from the Student Health Insurance Office (http://www.kumc.edu/student-services/student-health-insurance-.html) in Student Services.

Resignation or Termination

If a GTA resigns or abandons the position or the appointment is terminated before working a minimum of 8 pay-periods during the semester, the student must pay full tuition for that semester and will
lost eligibility for staff (resident) tuition rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

Graduate Research Assistantships (GRA)

Graduate Research Assistants are salaried student employees who perform research that is in their fields (or a closely related field) of study and is integral to the student’s education (e.g., dissertation topic). The duties performed are under the direct supervision of faculty or research professionals.

A limited number of graduate research assistantships (GRA) are available. Graduate students should inquire directly to their academic program/department about GRA appointment opportunities. Graduate research assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies.

GRA Eligibility

The following eligibility requirements govern all Graduate Research Assistant (GRA) appointments at the Medical Center campus:

1. During the semester of appointment, the GRA is admitted to and enrolled in a graduate degree program offered by the Medical Center campus.

2. During the semester of appointment, the GRA is enrolled in no fewer than six graduate credit hours per Fall and Spring semester and no fewer than 3 credit hours per Summer semester. See “Enrollment Exceptions” below.

3. During the semester of appointment, the GRA must be in good academic standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: A graduate student must maintain a cumulative grade point average of 3.0 to remain in good academic standing. However, if a program judges that a graduate student whose GPA falls below 3.0 is nonetheless making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be allowed to continue with the GRA appointment.]

4. A student completing his or her graduate degree may not continue in a GRA appointment after the graduation date unless he or she has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

Enrollment Exceptions for GRAs

A Ph.D. student appointed as a GRA, who has successfully completed the doctoral comprehensive examination and 18 post-comprehensive credit hours, may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies (http://www.kumc.edu/academic-affairs/graduate-studies/gta-and-gra.html) website and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not his or her final semester after all.

A master’s student appointed as a GRA, who is in his or her final semester, may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies (http://www.kumc.edu/academic-affairs/graduate-studies/gta-and-gra.html) website and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not his or her final semester after all.

GRATuitionBenefit

A graduate student who has a GRA appointment or a combination of a GRA and GTA appointment of at least .40 FTE is eligible for staff (resident) tuition rates for the semester of appointment.

GRA Health Insurance Benefit

A graduate student who has a GRA appointment or combination GRA and GTA appointment of at least .50 FTE for a given semester is eligible to participate in a health care benefits plan for that semester, for which the University provides a contribution. The health care benefits plan is the same plan that is available to all students, but a portion of the premium is paid if the student appointed as a .50 FTE GTA/GRA selects the plan. The health insurance information is available from the Student Health Insurance Office (http://www.kumc.edu/student-services/student-health-insurance-.html) in Student Services.

Resignation or Termination

If a GRA resigns or abandons the position or the appointment is terminated before working a minimum of 6 pay-periods during the semester, the student will lose eligibility for staff (resident) tuition rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

Academic Calendar
The Academic Calendar (http://www.kumc.edu/student-services/office-of-the-registrar/current-students/academic-calendar.html) with the official university calendar dates is maintained by the Office of the Registrar and is available online. Many of the Medical Center campus programs have different starting and ending dates so check with your academic program for more detailed information.

The Graduate Studies Calendar (http://www.kumc.edu/academic-affairs/graduate-studies/calendars.html) indicates graduation deadlines related to master's and doctoral examination dates and the submission of theses and dissertations.

Academic Misconduct
Guidelines for Alleged Misconduct
The following information shall serve as guidelines for dealing with situations where inappropriate deviations from these accepted standards of conduct by a graduate student are alleged to have occurred. All questions concerning these guidelines should be directed to the Dean of Graduate Studies or his/her designee.

I. Expectations for Conduct by a Graduate Student

One goal shared by the graduate programs at the University of Kansas Medical Center is to provide a seminal educational environment in which a student can master a special field of knowledge and strive to develop competence in independent scholarship and research, in order to make original contributions to knowledge. In achieving that goal, there is an expectation by the University of Kansas Medical Center that the graduate faculty and their students will conduct themselves with high integrity and professional ethics. Such conduct by a graduate student must include adherence to the written and observed or taught guidelines for ethical standards of the profession for which the student is seeking to enter. A graduate student is responsible for informing himself/herself about these requirements and expectations of conduct as well as seeking answers to his/her own questions about what constitutes misconduct. Potential sources for this information include the:

A. Director of the Graduate Program and the faculty members of the department in which the graduate student has entered;
B. Student Handbook or a similar document prepared by the student’s academic program, department and/or school;
C. the University of Kansas Medical Center “Behavioral Standards in Patient Care.”

Academic Misconduct

Academic misconduct by a student shall include, but not be limited to: cheating on examinations whether by a student on his/her own behalf or by giving to another student or receiving from another student unauthorized aid on examinations; giving or receiving of unauthorized aid in the preparation of notebooks, themes, reports, or other types of assignments, or in the preparation of master’s theses and/or doctoral dissertations; or knowingly misrepresenting the source of any academic work, falsification of research results, plagiarizing of another’s work, violation of regulations, ethical or professional codes for the treatment of humans and animals, or otherwise acting dishonestly.

II. Decisions by a Faculty Member Relative to Academic Misconduct

A. Not to Make a Recommendation for an Investigative Hearing: A faculty member (acting as an instructor or assistant in a course, or a graduate student’s advisor or mentor for his/her research and/or academic program, etc.) may decide not to recommend an investigative hearing, as outlined in these Guidelines, for what he/she believes is academic misconduct by a student. The faculty member thus may treat as unsatisfactory any student work which he/she believes is a product of academic misconduct and impose a sanction(s) appropriate to the traditionally accepted realm
of authority or jurisdiction of the faculty member. Any action by the faculty member shall be with due written notice to the student.

B. Make a Recommendation for an Investigative Hearing:
The Faculty Member may decide to recommend to his/ her Chairperson (also see Section IV. A. 4, and Section IV. B., below):

1. that an investigative Hearing be held for the alleged occurrence of academic misconduct, and/ or

2. imposing a sanction that is outside of the traditionally accepted realm of authority or jurisdiction of The Faculty Member (e. g., see Section VI. D. below). Hence, The Faculty Member initiates the procedures in Section IV.

III. Procedural Information for and Investigative Hearing Process

A. Definitions of Terms Hereafter Applied in these Guidelines

1. "The Faculty Member" is the faculty member initiating an allegation of academic misconduct by a student.

2. "The Student" is the graduate student identified by The Faculty Member as the subject of the alleged act(s) of academic misconduct.

3. The "Involved Department" is the department, center, or functional unit in which the act(s) of academic misconduct allegedly occurred by The Student.

4. The "Chairperson" is the Chairperson of the Involved Department in which the act(s) of academic misconduct allegedly occurred by The Student and is the next higher administrative officer to whom The Faculty Member sends the initial report about an allegation of academic misconduct.

   a. "Dean of the School of Nursing" replaces the designation of "Chairperson" hereafter throughout these Guidelines for Dealing With Alleged Misconduct by a Graduate Student as the appropriate administrative officer to whom faculty members in the School of Nursing shall forward any report or recommendation, if the alleged act occurred in this School.

   b. Possible Conflicts of Interest:

      i. If The Faculty Member perceives (relative to Section III. B., above) that there may be a conflict of interest involved in this issue between The Student and The Chairperson, or if The Chairperson is The Faculty Member initiating the allegation of misconduct, then The Faculty Member’s Inquiry Report of the alleged incident(s) (see Section IV. B., below) shall be forwarded to the Dean of the Faculty Member’s or Chairperson’s, respectively, School or the next higher administrative officer, as appropriate, who thereafter will assume the responsibilities of "The Chairperson” identified throughout these Guidelines for Dealing With Alleged Misconduct by a Graduate Student.

      ii. For Other Situations when questions arise about conflict of interest, the questions shall be directed to the Dean of Graduate Studies.

5. The Official Record of the Hearing Process:
The Dean of Graduate Studies shall initiate and maintain in the Office of Graduate Studies an Official Record (i. e., file) of the entire Hearing Process. All subsequent original written communications, documents, audio tape recordings (see Section V. 3., below), and recommendations that relate to the alleged misconduct and the Hearing shall be sent on a timely basis by The Chairperson and/ or the Hearing Officer (see Section IV. E., below) to the Dean of Graduate Studies for inclusion in the Official Record. If the final conclusion of the Hearing Process is that academic misconduct has not occurred, then only the Dean’s Official Record of the entire Hearing Process shall be saved as the permanent record; all other faculty, Departmental, and School copies of a "record/ file" for the Hearing Process must be destroyed (see Section V. B. 2. a., below).

6. The Time Periods for the Hearing Process:
Throughout these Guidelines, MAXIMUM LIMITS are specified for the length of time allowed for certain stages of the overall Hearing Process to take place. Unless specified otherwise, all lengths of time shall be in terms of the traditionally considered “working days” of any given week (recognized holidays that occur on otherwise traditional working days are not to be counted in these time frames). Any request for an extension of a time limit shall be made expeditiously, and before the expiration of the limit, to either the Chairperson or the Hearing Officer or the Dean of Graduate Studies, as appropriate, (or, in their absence, their designates), who shall decide and notify within three (3) days if there is good cause for the extension and, if so, for what period of time. Notification shall be to all involved parties of the Hearing Process and may be done first by telephone if deemed appropriate, and then shall be followed by written notification.

B. Inquiry Report by the Faculty Member is Sent to the Chairperson: Following the decision by The Faculty Member in Section III. B., above, and with due notice to The Student, The Faculty Member shall submit a detailed written report about the allegation (hereafter called the Inquiry Report) to the Chairperson. The Inquiry Report shall be submitted within twenty (20) days of the discovery of the alleged occurrence of misconduct. The Chairperson shall, within 15 days of receiving the Inquiry Report, review the report and attempt to resolve the allegation through consultation and mediation with the involved persons. If the Chairperson determines that the allegation should be resolved through the investigative Hearing Process, then the Chairperson shall continue the procedure outlined hereafter in these Guidelines. Written notice shall be sent to The Student (see Section IV. D., below) and to the Faculty Member (including a request for the Faculty Member
to respond, within 10 days of receipt of the notice, with his/ her selection of a faculty member to serve on the Hearing Panel; see Section IV. E. 2., below).

C. Notification of the Dean of Graduate Studies: The Chairperson shall send a written notification to the Dean of Graduate Studies that an investigative Hearing Process for alleged academic misconduct by The Student is going to be initiated. The Chairperson’s notification shall include copies of The Faculty Member’s Inquiry Report of the alleged misconduct and all written communications up to this time with The Student.

D. Notification About the Allegation to the Student: A written notification of the specific allegation shall be sent (certified or registered letter with return receipt requested indicating the date of receipt) to The Student by The Chairperson within fifteen (15) days after the time The Chairperson receives the Faculty Member’s Inquiry Report. A copy of this notification shall be sent to the Dean of Graduate Studies. The notice shall include:

1. a statement of the specific allegation(s) with sufficient explanatory information to enable The Student to understand the nature and extent of the allegation(s);

2. an invitation for The Student to provide, to The Chairperson, within ten (10) days after receiving the notification letter: a. a written response to the allegation(s); and b. the name of a faculty member whom The Student selects to serve on the Hearing Panel (see Section IV. E. 2., below), and a statement indicating that this faculty member told The Student that he/ she agreed to serve;

3. a statement indicating that The Student has the right to continue attending class as scheduled until such time as the Dean of Graduate Studies has reached his/ her final decision UNLESS there is a question of unsafe and/ or disruptive behavior and/ or offense against other persons (including patients of or visitors to) and/ or property of the University of Kansas.

4. a copy of these “Guidelines for Dealing With Alleged Academic Misconduct by a Graduate Student” so that The Student is aware of the procedural process and possible actions.

E. Selection of Members for the Hearing Panel: The Hearing Panel shall be composed of four (4) members of the graduate faculty (voting members of the Panel), excluding The Faculty Member initiating the allegation of misconduct (See Section IV. A. 4., above) and excluding the chairperson of the department in which The Student named in the allegation is a graduate student member, and one (1) graduate student (voting member of the Panel), excluding The Student who is the subject of the allegation. One of the graduate faculty members of the Panel will be designated by The Chairperson as the “Hearing Officer” in charge of the Hearing Panel. Any member of the Hearing Panel who perceives that there is any irregularity in the proceedings of the Hearing process has the responsibility of PROMPTLY reporting this to the Dean of Graduate Studies. Selection of the Hearing Panel shall include at least one but no more than two faculty members from the Involved Department in the allegation and shall be done as follows:

1. the graduate student member: shall be selected by the officers of the Graduate Student Council at an on-need basis, shall not be a graduate student member of the same Department as The Student named in the allegation, and must be currently classified as a Regular Graduate Student in the category of Degree-Seeking Students and in good academic standing (not on probation);

2. one faculty member from inside or outside the Involved Department may be selected by The Student named in the allegation;

3. one faculty member from inside or outside the Involved Department may be selected by The Faculty Member initiating the allegation; and

4. two faculty members selected by The Chairperson. The Chairperson’s selections shall assure that the composition of the Panel includes at least one but no more than two members from the Involved Department in the event that The Student and/ or The Faculty Member do not select such a member. Additionally, if The Student and/ or The Faculty Member decline(s) to select a Panel member or fail to respond to The Chairperson within ten (10) days of the request (see Section IV. B. and IV. D. 2., above), then The Chairperson will also select that member or members, likewise with due consideration for the basic composition of the Panel as defined above.

F. Scheduling the Hearing: The Hearing Officer shall, within five (5) days of the selection of members of the Hearing Panel, (1) schedule the day, time and place for the Hearing to occur (which shall be sometime between 20 and 30 days after the selection of the Hearing Panel), and (2) provide written notice of this schedule to The Faculty Member, The Student, The Chairperson, and The Dean of Graduate Studies. Both The Student and The Faculty Member shall be informed with this scheduling notification that during the Hearing each:

1. will be given the opportunity to present his/ her own viewpoint of the situation(s) that directly led to the allegation(s), and/ or

2. may have witnesses speak or have witnesses’ affidavits read on his/ her behalf.

G. Documents, Representatives & Witnesses for the Hearing: All information cited below shall be promptly sent to (see time deadlines indicated in this Section) or collected by the Hearing Officer, who shall promptly distribute copies of the information to The Student, The Faculty Member, and the rest of the Hearing Panel members.

1. The Faculty Member’s Inquiry Report sent to The Chairperson (see Section IV. B.),

2. The Chairperson’s Notification of Allegation letter sent to The Student (see Section IV. D.),
3. The Hearing Officer's letter to The Student and The Faculty Member stating the day, time and place for the hearing (see Section IV. F.).

4. The Student's written Response to the allegation(s), if such was sent to The Chairperson (see Section IV. D. 2. a.).

5. Any documents provided by The Student and/ or The Faculty Member for presentation as evidence to the Hearing Panel (sent at least by five (5) days before the Hearing).

6. Names of Representatives:

Each party to the hearing should be present for the hearing unless the Chairperson agrees that another person may appear as a substitute representative. A Hearing may be held even if The Student and/ or The Faculty Member fail to appear for the Hearing. Neither The Student nor The Faculty Member is compelled to appear or testify at the Hearing, and no inference may be drawn by the Hearing Panel against The Student or the Faculty Member due to his/ her failure or refusal to testify or appear.

The use of legal counsel is discouraged.

7. Names of Witnesses: The Student and The Faculty Member shall provide a list of intended witnesses, if any, to the Hearing Officer at least ten (10) days before the Hearing is to occur. The Hearing Officer shall provide these names, reciprocally, to The Faculty Member and The Student at least five (5) days before the Hearing.

8. All materials (including the audio recording tapes identified in Section IV. H. 3., below concerning the alleged violation of misconduct should be treated as CONFIDENTIAL documents. The Hearing Panel members will return all materials received for the Hearing to the Hearing Officer at the end of the scheduled Hearing. The Hearing Officer will forward ALL ORIGINAL AND PHOTOCOPIED AND AUDIO TAPE RECORDED MATERIALS to the Dean of Graduate Studies (see Section IV. A. 5., above).

H. Conducting the Hearing: The Hearing Officer of the Hearing Panel may establish procedures in addition to those listed, however, the basic requirements of the Hearing procedures as listed here may not be altered by the Hearing Officer: The Hearing shall be conducted in a closed session and witnesses shall be excluded from the Hearing except when actually testifying.

1. The Hearing Officer shall have the authority to keep order, rule on questions of relevance and evidence, and shall possess other powers normal and necessary for a fair and orderly Hearing. Rules of Evidence that govern courtroom proceedings shall not apply.

2. There shall be only a single audio tape recording made of the proceedings in order to provide an accurate record of the Hearing for possible review by the Hearing Panel (Section IV. I. 1) and/or Dean of Graduate Studies (Section IV. I. 4.).

3. The Hearing Officer shall introduce the Hearing Panel members, The Faculty Member, The Student, and, their representatives, if any.

4. The Hearing Officer shall explain the Hearing Procedures as outlined herein.

5. The Hearing Officer shall announce that The Faculty Member initiating the allegation has the responsibility to persuade the Hearing Panel by a preponderance of evidence that academic misconduct has occurred.

6. The Hearing Officer shall orally review the allegation(s) of misconduct which led to the Hearing, and the possible sanction(s).

7. The Hearing Officer shall allow The Faculty Member to state the allegation and explain the incident. The Faculty Member may choose to remain silent. (see Section IV. G. 6. a.).

8. The Hearing Officer shall allow The Student to reply and explain the incident. The Student, if present, may choose to remain silent. (see Section IV. G. 6. a.).

9. Hearing Panel members may direct questions to The Faculty Member, if present, The Student, if present, and any witnesses and/ or representatives.

10. Through the procedural process of the Hearing, The Student and The Faculty Member may question another another and any witnesses appearing. One witness at a time may be called by either The Faculty Member or The Student. No witness will be permitted to participate in the Hearing if his/ her name was not previously given to the Hearing Officer in accord with Section, IV. G. 7., above. IN EXCEPTIONAL CIRCUMSTANCES, this provision may be modified by decision of the Hearing Officer, and, if it is, The Student and The Faculty Member will be given sufficient opportunity to collect information to respond to whatever the witness presents.

11. The Hearing Officer shall state that the Hearing Panel will make a recommendation to the Dean of Graduate Studies within seven (7) days after the Hearing.

I. Findings of the Hearing Panel and Recommendation Carried Forward:

1. At the conclusion of the Hearing, the Panel members, alone and in closed session, shall deliberate and decide by a majority vote (anonymous written ballot counted by the Hearing Officer and verified by the graduate student member) if "academic misconduct," as alleged by The Faculty Member and only based upon all evidence presented to and heard by the Hearing Panel, " has occurred" or "has not occurred."

2. If the Panel's decision is that "academic misconduct has occurred," then the Panel members shall deliberate and determine (by majority vote) their
recommendation(s) for specific disciplinary action and/or sanction(s), if any.

3. The Hearing Officer shall compile comments, rationale, findings, voting results, and recommendations in writing and forward them within seven (7) days after the Hearing to the Dean of Graduate Studies. The Hearing Panel recommendation(s) shall not be binding upon the Dean of Graduate Studies.

4. The Dean of Graduate Studies shall consider the recommendation(s) and report of the Hearing Officer and any relevant information and take action.

J. Notifications Consequent to the Hearing Process:

1. The Dean of Graduate Studies shall, within seven (7) days of receipt of the summary final report of the Hearing Officer, send written notification of his/her action(s) to The Faculty Member, The Student (notification by certified or registered mail with return receipt requesting delivery date), and the Hearing Officer.

2. If this final action of the Hearing process concludes that academic misconduct by The Student has NOT occurred, then the Dean of Graduate Studies also shall, in writing, instruct the chairperson(s) of the involved department(s) that: a. all materials appended to any and all departmental files, including a possible so-called permanent file on The Student, that would not have been in these files if an allegation of misconduct had not been made shall be removed (also see Section IV. A. 5., above) b. conscientious efforts are to be made by the involved department(s) not to subject the student to unwarranted bias or action by the department(s) consequent to the hearing process.

IV. Sanctions that may be Imposed for Academic Misconduct:

A. Censure: A written reprimand for actions which constitute academic misconduct. Censure may include a written warning that subsequent actions of academic misconduct may be the cause for a more severe disciplinary sanction.

B. Unsatisfactory Work: Treating as unsatisfactory any work which is a product of academic misconduct. This may include reduction of a pending or completed grade (including the awarding of a Failing grade) for the work and/or a grade in the course.

C. Suspension: Exclusion from classes and other specified privileges or activities for a definite period not in excess of two years.

D. Expulsion: Termination of graduate student status for an indefinite period. The conditions of readmission, if any, shall be stated in the order of expulsion. Approved by Graduate Studies Committee. University of Kansas Medical Center, April 4, 1991.

Academic Probation

The cumulative grade point average is computed at the end of each semester with the inclusion of grades earned at KU for all courses acceptable for graduate credit. If the cumulative grade point average falls below 3.0 (B average), the student is placed on probation by the Office of Graduate Studies and the student and program are both notified in writing.

The grades of P, S, U, and I, for which no numerical equivalents are defined, are excluded from the computation. If the student's overall graduate average has been raised to a 3.0 by the end of the next semester of enrollment after being placed on probation, the student may be returned to good academic standing. If not, the student may not be permitted to enroll and will be dismissed unless the Dean of Graduate Studies acts favorably on a program recommendation for the student to continue study.

If a student is admitted provisionally due to deficiencies in grade point average, a student must earn an overall graduate average of at least 3.0 during the first 9 hours of enrollment which is the equivalent of one semester full-time enrollment. When the overall 3.0 grade point average has been achieved, the program submits a Progress to Degree form to move the student from provisional to regular admission status.

A student admitted provisionally who fails to earn a 3.0 average in the first 9 hours of enrollment may be dismissed immediately. If provisional continuation is recommended by the program, and approved by the Dean of Graduate Studies, the student may remain on provisional status for one additional semester. Subsequent recommendation and approval are required for each additional semester continued on provisional status.

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the graduate program that will accept the student. The petition must be approved by the Dean of Graduate Studies on the appropriate campus (Medical Center or Lawrence).

Childbirth Accommodation

The University of Kansas Medical Center acknowledges that the years spent in graduate and professional degree programs can be prime childbearing years for students. KUMC wishes to assert itself as an institution that values family-friendly policies for students, faculty and staff by adopting a student-specific childbirth accommodation policy. This policy illustrates a commitment by KUMC to diversity and inclusion which will allow the institution to recruit and retain the highest quality students.

The University of Kansas Medical Center will grant students up to a six-week accommodation period for welcoming a child under the following conditions: the birth of a child, the adoption of a child, or the placement of a child for adoption or foster care. The six-week accommodation period can be granted as a leave, a revised academic, research, or clinical schedule, or a combination of the above.

Eligibility

This policy will apply to all enrolled students regardless of gender or marital status. Other situations related to family life would continue to be covered by general leave of absence. Depending on their academic program, timing of birth/adoption, and level of support they will receive in caring for a newborn, a student may find it more advantageous both academically and personally to take a leave of absence rather than utilizing the childbirth accommodation policy.

Academic Accommodations

A student should fill out the Application for an Academic Accommodation Period form to initiate discussions with their advisor(s) and departmental or school administrators as soon as
possible, but no later than four months prior to the anticipated delivery date. If a child is being welcomed through adoption or foster care, please fill out an Application for an Academic Accommodation Period form as soon as possible depending on the situation.

Individual programs and departments will review the student's requests and, along with the student and other necessary parties (i.e. advisors, instructors), determine the accommodations that will be provided. These discussions should also detail the type of academic engagement, and progress expected from the student while on leave or a revised academic schedule. If a program decides that due to academic requirements, a leave of absence is more appropriate, a request may be denied. The denial of the request must be made to the student in writing with adequate justification. If an accommodation period of less than six weeks is proposed, this decision must also be justified. Upon approval of a student's request, a plan will be submitted to the Dean of the student's School. The plan will outline the specific accommodations being provided for a student, as well as any expectations from the academic program. Students may appeal decisions regarding accommodations. The appeal of the decision must be made in writing and submitted to the Dean of the student's School. The Dean of the student's School will have final decision-making authority.

All academic programs and departments are expected to work with their students and make a good-faith effort to provide reasonable accommodations so that their students can remain in good academic standing and continue progress towards their degree while also balancing the demands of caring for a new child. It is also encouraged that advisors, academic staff, and departmental leaders work with sensitivity and imagination to provide more than these minimum standards put forth by KUMC when circumstances allow for further accommodations. Students should be proactive in speaking with advisors, instructors, and academic deans when they are planning a family or expecting a child to devise the best personal and academic plan.

Student Status

Students will retain their full time student status if approved for an academic accommodation period. Additionally, for students who decide to take a leave of absence, they will have the option to pay student fees if they wish to have continued access to campus resources.

Financial Support (applicable to those funded by GTAs, GRAs, or Fellowships)

For students who currently receive stipends through a graduate teaching assistantship (GTA) or graduate research assistantship (GRA), they will remain fully funded for a six-week period. Students who do not receive stipends at the time of application are not eligible for financial support. Any continuation of support past six weeks will be determined on an individual basis. Students will remain funded by their current stipend source for the first two weeks and then will be funded by a Childbirth Accommodation Fund through the Office of Graduate Studies for up to four additional weeks. Students in the MD/PhD program would continue to receive their stipends from their current source during the MD phase and from current stipend source for two weeks and then the Childbirth Accommodation Fund for up to four additional weeks during the PhD phase. If a student is on a grant or fellowship that allows them to receive stipends during maternity/paternity leaves, then they will continue to be paid by their current funding source for the entire six-week period. If funding is not allowed by the outside grant or fellowship, then the student will receive six weeks of support from the Childbirth Accommodation Fund.

While not covered under this childbirth accommodation policy, students who experience medically necessary absences during pregnancy or due to conditions related to pregnancy should refer to the federal Title IX policy to educate themselves about their rights regarding their education. If you feel that you are experiencing discrimination due to pregnancy or related conditions, please contact the Office of Institutional Opportunity and Access (IOA@ku.edu).

Course Numbering System

Courses that may give graduate credit are numbered according to the following scheme:

- **Courses numbered 500-699** are designed primarily for juniors and seniors, but are also taken by some graduate students who have fewer than 30 hours of graduate credit.
- **Courses numbered 700-799** are designed primarily for graduate students who have fewer than 30 hours of graduate credit, but they are also taken by some undergraduates.
- **Courses numbered 800-899** are designed primarily for graduate students who have fewer than 30 hours of graduate credit.
- **Courses numbered 900-999** are designed primarily for graduate students who have 30 or more hours of graduate credit.

Courses that contain a mixture of undergraduate and graduate students should set requirements for graduate credit beyond or different from the requirements for undergraduate credit. No course, regardless of its number, can give graduate credit unless it has been approved for graduate credit by the appropriate Graduate Studies Office (Medical Center or Lawrence) and is taught by a person holding a current appointment to the Graduate Faculty.

Co-enrollment (Seniors and Graduate Study)

Seniors at KU who will complete the requirements for a baccalaureate degree in a given semester, and who have very strong academic records (grade-point average higher than 3.0 on a 4.0 scale), must apply and be admitted provisionally as degree seeking students and request the permission of the appropriate Graduate Studies Office (Medical Center or Lawrence) to co-enroll for the final undergraduate semester. Seniors requesting the privilege of co-enrollment must make formal application through the online graduate application.

Procedure

To meet the criteria of co-enrollment, the student must earn undergraduate credit for at least one class during the co-enrollment semester. Continuing education courses may be used to satisfy this requirement. If after the co-enrollment semester the baccalaureate degree is not completed, the student will not be permitted to enroll in courses for graduate credit until the baccalaureate degree has been conferred. After one semester, students are not eligible for co-enrollment and the graduate admission will be retracted.

Students who are eligible to co-enroll receive an email from the Registrar’s Office before enrollment with instructions on how to enroll in more than one career (ex. LAW, GRDL-Graduate, UGDL-Undergraduate). Students will have separate appointment times to enroll for each career and must enroll only in the courses that will count correctly toward the career in which they are enrolling during.
Embargo of Theses and Dissertations

When an exception to the immediate release of a thesis or dissertation is necessary, an embargo provides a temporary, delayed public release of the work. Embargo periods of six months, one year, or two years are available. While embargoes are not intended to be permanent, renewals of the original embargo period are permissible. Considerations that may be deemed reasonable for granting permission for an embargo include:

- There is a need to prevent disclosure of government information about persons, institutions, technologies, etc. that is contained in the work.
- An academic or commercial press has expressed interest in acquiring the rights to publish the work as a book that may require an embargo.
- The work contains content that has already been submitted to a peer-reviewed journal that may require an embargo.
- Approval for delay has been granted by the KU Restricted Research Committee.

Requests for an extension of the embargo should be directed to the Office of Graduate Studies and must be received at least one month prior to the expiration of the current embargo to ensure sufficient time to process the request. A request for an embargo submitted to the University of Kansas affects only the publication of the thesis or dissertation in KU ScholarWorks. It is the graduate student’s responsibility to request an extension from both the University of Kansas for the copy in KU ScholarWorks and separately through ProQuest/UMI.

While there is no limit to the number of times a student can request an embargo extension, embargoes that have been allowed to expire without a request for an extension will result in the thesis or dissertation being made publicly available.

The embargo period will be calculated beginning at the end of the semester in which the student graduates with the specific dates being: December 31st, May 31st, and August 31st.

Procedure

Steps necessary for embargoing a thesis or dissertation:

Theses and dissertations at the University of Kansas are made available in two electronic databases: KU ScholarWorks and ProQuest/UMI Dissertations and Theses. Items in KU ScholarWorks are publicly accessible on the world-wide web and can be indexed by search engines such as Google, Bing, Yahoo, and others.

A student who does not wish to have his or her thesis or dissertation made public in these two venues for some limited period of time must receive permission to embargo the thesis or dissertation from one of the following 1) department graduate director, 2) department chair, or 3) committee chair, and the Dean of Graduate Studies. The student must request this permission with the Electronic Thesis and Dissertation (ETD) Release Form. The University of Kansas will accept the thesis or dissertation—thereby completing all degree requirements—only if the student signs this release form. Likewise, the University of Kansas will only entertain requests for an embargo on the publication of a thesis or dissertation through submission of this same form.

To ensure that embargoed work is restricted, students must take two steps after receiving the appropriate signatures before graduation:

- First, the student must submit the Electronic Thesis and Dissertation (ETD) Release Form to the Office of Graduate Studies. If an embargo has been approved, this form will ensure that the work is temporarily restricted in KU ScholarWorks.
- Second, during the electronic submission process to ProQuest/UMI, the student must select the embargo option under the publishing restrictions section. If an embargo...
Enrollment Definitions (Full-Time, Half-Time, and Part-Time)

Full-time enrollment for fall and spring semesters
- Enrollment in 9 credit hours;
- Enrollment in 6 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 6 credit hours for graduate students using the Montgomery GI Bill – Active Duty (MGIB-AD) and Post-9/11 GI Bill – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s). *See doctoral candidates below.

Full-time enrollment for summer sessions
- Enrollment in 6 credit hours;
- Enrollment in 3 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill – Active Duty (MGIB-AD) and Post-9/11 GI Bill – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s). *See doctoral candidates below.

Half-time enrollment for fall and spring semesters
- Enrollment in 5 credit hours;
- Enrollment in 3 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill – Active Duty (MGIB-AD) and Post-9/11 GI Bill – Active Duty.

Half-time enrollment for summer sessions
- Enrollment in 3 credit hours;

Part-time enrollment
- Students enrolled in fewer hours than defined by half-time enrollment are considered part-time.

International Student Enrollment
International students in F-1 and J-1 status must also comply with Federal immigration requirements of pursuing a full course of study each semester to maintain their legal status. All international students must conform to residence requirements, even though immigration regulatory requirements may be lower.

Grading
The basic system is an A, B, C, D, F system, where A designates above-average graduate work; B, average graduate work; C, passing but not average graduate work (C– is not considered a passing grade); D and F, failing graduate work. C–, D, and F work does not count toward fulfilling degree requirements.

The letter P is used only to indicate participation in thesis, dissertation, and research enrollments (related to thesis or dissertation), and in the first semester enrollment of a multi-semester sequence course. In any semester, an instructor may, at his or her option, assign a letter grade of A, B, C, D, or F when evidence about performance is available. Upon completion of thesis/dissertation or research hours leading to a master’s or doctoral degree, the P remains on the final transcript except for the last semester of enrollment. A letter grade (A, B, C, D, or F) is assigned in the last semester of enrollment to characterize the quality of the final product. The I grade is not appropriate for enrollment in thesis, dissertation, or research and is not accepted.
For enrollments other than thesis, dissertation, or research, the letter I indicates course work that has been of passing quality, some part of which is, for good reason, unfinished.

A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An I grade not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade assigned by the course instructor, and shall be indicated on the student’s record.

The grades of S and U may be used to designate satisfactory and unsatisfactory performance, respectively, in continuing education, workshop, and institute courses upon the recommendation of the department offering the course. No more than 6 hours total of graduate courses graded S are permitted to count toward a degree. An exception to this rule is that in courses numbered 800 or above for which Graduate Council authorization has been given, the instructor may report a grade of S for students who have satisfactorily attended the course but for whom it has not been possible to evaluate the quality of performance. The S and U grades are not used in computing the grade-point average.

The Credit/No Credit option is authorized for graduate students. For graduate students, the grade of CR will be received for grades of C and above, and the grade of NC (no credit) will be received for grades of C- and below.

No course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree or a graduate certificate. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement. Please see the Research Skills and Responsible Scholarship policy in the Doctoral Degree Requirements section of this catalog for more information.

The individual schools have the option of using or not using +/−, according to the policy adopted by the particular school. B– does not represent satisfactory work in graduate studies.

In the grading system defined above, at least a B average is required on course work counted toward any of the master’s degrees or the Specialist in Education degree at KU, and only courses graded A, B, or C (excluding C−) may be so counted. Course work counted toward a doctorate, including that for a master’s degree if obtained at KU, should average at least a B or better. Courses graded P, S, U, or I are excluded from the computation of the average.

Performance is graded Honors, Satisfactory, or Unsatisfactory for the following examinations:

1. The general examination for the master’s degree.
2. The general examination for the degree of Specialist in Education.
3. The comprehensive oral examination for the doctorate.
4. The final examination for the doctorate.

Graduate Credit

Three conditions must be met for a student to receive graduate credit for work satisfactorily completed at KU:

1. The student must have gained graduate admission.
2. The course must be numbered 500 level or above and have been approved for graduate credit by the appropriate school/college and the Graduate Council on the Medical Center campus.
3. The instructor must have gained appointment to the Graduate Faculty.

Credit by Examination

Credit by examination is not accepted toward graduate degrees.

Transfer Credit

Six hours of graduate credit taken at a regionally accredited graduate school may be transferred and applied to a program leading to one of the master’s degrees if the credits were taken before the final semester of enrollment at KU and have the approval of the major department and the appropriate school.

Eight hours may be approved for transfer if the student holds a baccalaureate degree from KU.

The total of transferred credit, including graduate continuing education credit and distance-learning courses taken at KU may not exceed 6 hours, or 8 if the student holds a baccalaureate degree from KU.

Only work graded B (3.0 on a 4.0 scale) or higher may be transferred. KU does not accept transfer credit for courses that have been graded B– or below. KU also does not accept transfer for institutes, workshops, or life/work experience. Any exceptions to this policy must be approved by the department and the Dean of Graduate Studies.

To transfer credits, the Progress to Degree form must be initiated by the student’s department.

Credit will not transfer for courses that were counted toward the requirements for an undergraduate or graduate degree, whether completed at KU or another institution.

No credit is actually transferred toward the doctorate, but programs may take relevant prior graduate work into consideration in setting up programs of study.

Graduate Course Work Expiration Dates

Courses completed at the University of Kansas, or transfer credits from another university, cannot be used to fulfill graduate degree requirements if these courses were completed more than ten (10) years prior to the final defense for doctoral candidates or graduation for master’s students. A request to make an exception to this policy must be approved by the program and the Dean of Graduate Studies.

Graduate Student Oral Exams

Attendance

Ideally, all members of the committee are physically present at graduate student oral examinations. For M.S. and M.S. students this includes the final general exam, project defense or thesis defense. For Ph.D. students this includes the doctoral comprehensive oral exam, and the doctoral final oral exam (i.e., dissertation defense).

A majority of committee members must be physically present for an examination to commence; for doctoral oral examinations this requirement is 3 of the 5 members, for master’s oral examinations the requirement is 2 of the 3 members.

In addition, it is required that the student being examined, the chair of the committee, and the outside committee member all
be physically present at the examination or defense. Mediated attendance by the student, chair and outside member is prohibited. When a situation arises in which a member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair.

In cases where the student prefers an examination in which all committee members are physically present, the student’s preference shall be honored.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the chair or director of graduate studies) be present at the examination.

**Committee Composition**

The majority of committee members serving on a graduate student oral examination committee in most cases are in the candidate’s department/program of study.

Ph.D. doctoral committees are composed of at least five voting members and must adhere to the following requirements:

1. The chair of the committee must hold dissertation status. If the committee has co-chairs, at least one of the co-chairs must hold dissertation status.

2. One member must meet the requirements for serving as an outside member; i.e., be a KU faculty member holding regular or dissertation graduate faculty status and is not a faculty member holding graduate status in the candidate’s department/program. The outside member represents Graduate Studies and is a voting member of the committee, has full rights to participate in the examination, and reports any unsatisfactory or irregular aspects of the examination.

Master’s committees are composed of at least three voting members and must adhere to the following requirements:

1. At least two committee members must be members of the candidate’s department/program.

**Grievance Policy and Procedures for Graduate Students**

A graduate student who believes herself or himself unfairly or unlawfully treated in an academic matter may present a grievance to the academic department or appropriate program chairperson. Each academic unit has established grievance policies and procedures. Concerns regarding illegal discrimination or harassment should be reported to the Equal Opportunity Office. For academic misconduct issues, see the Academic Misconduct policy in this section of the catalog.

The grievance procedure may not be used as an appeal for a grade. Grades should be appealed at the department or program level. Committees established at the department, program or school level to hear grievances proceed in accordance with their own specific procedures and make recommendations to the appropriate administrative officers as provided in those procedures. Appeals from the decision of a department or program or school must be made to the Dean of Graduate Studies.

The appellate process is designed to ensure that due process has been afforded an individual in the initial hearing. The Dean of Graduate Studies will appoint the committee chair from the membership of the KUMC Graduate Council. Two other members will be selected by the chair from the Graduate Council and one other graduate faculty member selected by the student complainant and a second graduate faculty member selected by the accused. The selection of these faculty members shall be acceptable to both parties. A student member will be selected by the President of the Graduate Student Council. Care should be taken to ensure that none of the members has a conflict of interest in this case. This committee will examine all pertinent documents including student records and interview the parties directly involved in the complaint as well as other parties deemed necessary. Minutes of testimony will be made available to both the complainant and accused parties after the hearing is completed. It is essential that all parties retain confidentiality of information gained through the hearing process. Both parties will be provided an opportunity to respond to the minutes in writing before the committee’s final recommendation is forwarded to the Dean of Graduate Studies who will make the final determination. The documents provided to the grievance committee will be retained in the Office of Graduate Studies for a period of three years, after which time they will be destroyed. There is no further appeal.

**Independent Study**

Independent study is a research experience or directed readings independently pursued through an academic department. Students should contact their academic department to discuss independent study opportunities to investigate a special research problem or directed readings in an area not covered by regular courses.

**Intellectual Property Policy**

All enrolled students are subject to the Board of Regents and KU Intellectual Property Policies. The ownership of student works submitted in fulfillment of academic requirements is retained by the creator(s). By enrolling, the student gives the institution a nonexclusive royalty-free license to mark on, modify, retain the work in the process of instruction, or otherwise handle the work, as set out in the institution’s Intellectual Property Policy or in the course syllabus. The institution does not have the right to use the work in any other manner without the written consent of the creator(s).

**Leave of Absence**

The Office of Graduate Studies may grant a leave of absence (LOA) from an academic program for up to one year, with the possibility of extension. The student must make a written request for a leave of absence from their academic program and submit to their program. The program forwards the student’s request along with the program’s recommendation to the Dean of Graduate Studies for approval. If approved, the time on leave from the academic program will not be counted toward the maximum time granted to complete a degree (doctoral, 8 years; master’s, 7 years).
Post-Comprehensive Enrollment for Doctoral Candidates

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled in one or more hours of dissertation that both moves the student towards degree completion and reflect, as accurately as possible, the candidate’s demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester and 3 hours a summer session.

Post-comprehensive enrollment may include enrollment during the semester or summer session in which the comprehensive oral examination has been passed. If after 18 hours of post-comprehensive enrollment the degree is not completed, the candidate must continue to enroll each semester and each summer session until all degree requirements have been met. The number of hours of each enrollment are determined by the candidate’s advisor and must reflect as accurately as possible the candidate’s demands on faculty time and university facilities.

Posthumous Degrees

In order to recognize the achievement of students who have died, the University of Kansas may grant undergraduate, graduate and professional degrees posthumously. This policy applies to deceased students who were in good academic standing at the time of death and enrolled for their final semester at the University of Kansas, as determined by the dean of the school or college. Requests for posthumous degrees must be initiated by the student’s academic department and approved by the dean of the school or college conferring the degree. Each case will be determined on its own merits.

The dean of the school or college posthumously conferring the degree should contact the Office of the University Registrar to confirm the correct information for the degree to be conferred, notify the Vice Provost for Academic Affairs, and coordinate with the Office of the Chancellor for notification to the family. Posthumous degrees are conferred during the semester in which the student was expected to graduate. The Chancellor informs the student’s family in writing of the posthumous award of the degree.

Progress to Degree Policy

The Progress to Degree system is used by Graduate Studies to track and monitor graduate student progress. The forms should be used to report items such as change in degree plan within the same department, change in admission status, transfer credit towards a master’s degree, master’s general exam, master’s thesis defense and oral comprehensive and final exam for PhD students. This system is used by designated faculty or staff to request Graduate Studies approval for the various functions indicated.

Research Compliance

There are certain types of research or activities that may not be pursued unless specific prior approval and/or training has been obtained. Students should refer to KUMC Office of Compliance (http://www.kumc.edu/compliance.html) policies.

Student Responsibilities

All graduate students are responsible for informing themselves of requirements and policies of the Office of Graduate Studies. They are also expected to be familiar with the regulations and requirements of their departments and of their graduate programs. Program Graduate Directors and Office of Graduate Studies staff are ready to answer questions and offer counsel. It is each graduate student’s responsibility to know and observe all regulations and procedures relating to the graduate degree program the student is pursuing. In no case will a regulation be waived or an exception be granted because students plead ignorance of, or contend that they were not informed of, requirements, regulations, procedures, and deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

Undergraduate Enrollment in Graduate-Level Courses

Well-qualified undergraduate students may be permitted to enroll in 800- or 900-level courses for undergraduate credit with the approval of the instructor and the student’s advisor. The student must bring a Count Towards Degree form signed by the instructor, a letter of explanation and recommendation from the advisor, and current academic record to the Office of Graduate Studies for approval. If approved, the Office of Graduate Studies signs the Count Towards Degree form, which the student must present to the staff in the Student Records Center to enroll in the courses. Courses taken for undergraduate credit may not be transferred to graduate credit.
Applied English

Applied English Center

Applied English Center courses provide English language instruction to non-native speakers of English. All students whose native language is not English, including international students and residents or citizens of the United States, are required by the Faculty Senate Rules and Regulations (http://www.policy.ku.edu) to enroll in the English language courses, if any, specified for them by the AEC before enrolling in any academic work.

Admission to KU does not constitute a waiver of the University of Kansas English proficiency requirement. Students may be required to take the English Proficiency Exam and may be required to take courses with the Applied English Center.

Courses labeled 140 and above and AECT 101 are available for credit toward an undergraduate degree. To receive a grade of Credit, students must receive a grade of A, B, or C in the course. Transcripts show No Credit for these courses in which students receive a grade of D or F.

A maximum of 9 hours of credit may count toward undergraduate degrees in the College of Liberal Arts and Sciences and the School of Business. A maximum of 6 hours of credit may count toward undergraduate degrees in the School of Architecture, Design and Planning. Consult an advisor in the College or school for details.

Courses

AAPL 140. English for Academic Purposes: Listening and Speaking. 3 Hours U.
An advanced skills course providing practice in pronunciation, fluency, comprehension, and vocabulary development, with an emphasis on college-level content. Students listen to interviews and lectures, and participate in class discussions in order to improve skills in comprehension, note-taking, content discussion, interview, summarization, and presentation in an advanced academic setting. Recorded and written work and analysis are also required. Prerequisite: Placement in this course by the KU Academic Accelerator Program. LEC.

Courses

AEC 1. Support Course: ____. 2 Hours.
Skill-based support course for students enrolled in a section of Level 1 Applied English Center core course. Prerequisite: Placement by the Applied English Center. LEC.

AEC 2. Level 2 Support Course. 2 Hours.
Skill-based support course for students enrolled in one or more Level 2 Applied English Center core courses. Prerequisite: Placement by the Applied English Center. LEC.

AEC 3. Level 3 Support Course. 2 Hours.
Skill-based support course for students enrolled in one or more Level 3 Applied English Center core courses. Prerequisite: Placement in this course by Applied English Center. LEC.

AEC 4. Elective: Special Topics in: ____. 2 Hours.
Skill-based or content-based special topics for upper level students enrolled in at least one Applied English Center core course. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 5. Short Term Program with Applied English Center Course Enrollment: ____. 1-16 Hours U.
Skill-based special topics at appropriate level(s) for short term program students attending core AEC courses for a partial term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 6. Anticipated Future Applied English Center Credit Hours. 1-16 Hours U.
This course is a placeholder for future anticipated Applied English Center credit hour enrollment. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 7. Short Term Programs Self-Contained Enrollment: ____. 1-16 Hours U.
Specialized English language courses for short term program students. Courses focus on the use of English in particular fields of study or employment based on program objectives. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 10. Diagnostic Tests for Level 1. 1-16 Hours U.
Diagnostic test. Enrollment required for students who take proficiency test at semester start and place into level 1 courses. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 11. Study Hall 1-1. 0 Hours U.
A beginning level study hall course structured to assist students, with limited English proficiency, in learning and practicing concepts presented in core courses. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 12. Study Hall 1-2. 0 Hours U.
A beginning level study hall course structured to assist students with foundational English proficiency in learning and practicing concepts presented in core courses. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 13. Study Hall 1-3. 0 Hours U.
A beginning level study hall course structured to assist students with elementary English proficiency in learning and practicing concepts presented in core courses. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 82. Classroom Communication for International Teaching Assistants. 3-4 Hours U.
Practice of communication skills: pronunciation, fluency and vocabulary development, question and answer techniques, paraphrasing and discussion; video-recorded practice teaching mini-lectures or demonstrations with feedback by instructor in tutorial sessions and by other native speakers during presentations. Open only to graduate students or seniors near graduation. Four credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Students must have completed all AEC courses except AECG 151 or AECR 151, have a score of at least 35 on the SPEAK test; and have written permission from the Applied English Center. LEC.

AEC 90. English Proficiency Test. 0 Hours U.
Final proficiency test. Required of all students enrolled in one or more Applied English Center courses, except AEC 82. Graded satisfactory/unsatisfactory. LEC.

AEC 150. Advanced English for Academic Purposes 5. 6-7 Hours U.
A content-based combined skills course offering advanced instruction in university-level written and spoken materials. Students are required to write response papers, essays, and a research paper, as well as take essay tests and make oral presentations. Additional objectives of this course include developing notetaking skills in lectures and completing a portfolio for assessment at midterm and semester end. Seven credits in
the fall and spring semesters; six credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

Courses

3-5 Hours U.
A beginning level communicative course designed to help students with limited English proficiency acquire essential vocabulary and rudimentary sentence- and discourse-level grammar to begin expressing meaning appropriately and accurately in spoken and written English. Five credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

3-5 Hours U.
A beginning level communicative course designed to help students with foundational English proficiency gain basic vocabulary and sentence- and discourse-level grammar to further express meaning appropriately and accurately in spoken and written English. Five credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

3-5 Hours U.
A beginning level communicative course designed to help students with elementary English proficiency increase basic vocabulary and sentence- and discourse-level grammar to further express meaning appropriately and accurately in spoken and written English. Five credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

3-5 Hours U.
A lower-intermediate level communicative course designed to help students build conventional sentence- and discourse-level grammar and vocabulary to expand their ability to express meaning appropriately and accurately in spoken and written English. At this level, students practice increasingly complex sentence structures and vocabulary in a wide variety of in-class and out-of-class activities, including group projects. Five credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

3-5 Hours U.
An upper-intermediate level communicative course designed to help students increase conventional sentence- and discourse-level grammar and vocabulary to advance their ability to express meaning appropriately and accurately in spoken and written English. At this level, students continue to learn and practice increasingly complex sentence structures and vocabulary in a wide variety of in-class and out-of-class activities, including group projects. Five credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

3-5 Hours U.
A low-advanced level communicative course designed to help students better understand sentence- and discourse-level grammar and vocabulary to support their ability to express meaning appropriately and accurately in spoken and written English. At this level, students master increasingly complex sentence structures and vocabulary through practice in a wide variety of in-class and out-of-class activities. Five credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECG 151. Special Studies in Grammar for Communication 5-1. 3-4 Hours U.
An individualized course combining in-class and on-line work designed to help upper-advanced level students better review sentence- and discourse-level grammar and vocabulary to support their ability to identify, analyze and correct errors in writing. In this course, students write weekly essays in the AEC computer lab and receive feedback and individualized grammar assignments via e-mail. Students also have several face-to-face conferences with their instructor and must use review skills to write a passing essay within a designated time limit. Four credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECG 152. Special Studies in Grammar for Communication 5-2. 2 Hours U.
An individualized course combining in-class and on-line work designed to help high-advanced level students better review sentence- and discourse-level grammar and vocabulary to support their ability to identify, analyze and correct errors in writing. In this course, students write weekly essays in the AEC computer lab and receive feedback and individualized grammar assignments via e-mail. Enrollment in this course is intended for students requiring less intensive special studies instruction. Prerequisite: Placement in this course by the Applied English Center. LEC.
Students build the conventional sentence- and discourse-level grammar summarization, and presentation skills. Written work is also required. Students build the conventional sentence- and discourse-level grammar and vocabulary needed to express meaning appropriately and accurately in spoken English. Six and a half credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 11. Reading, Writing and Grammar for Academic Purposes 1-1. 3-8 Hours U.
A beginning level course designed to teach students with limited English proficiency strategies to begin reading and writing. Emphasis is placed on taking notes from academic texts to demonstrate and develop students’ understanding of the organization of English writing. At this level, students focus on establishing writing fluency and building a foundation of high frequency vocabulary. Students build the conventional sentence- and discourse-level grammar and vocabulary needed to express meaning appropriately and accurately in written English. Six and a half credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 12. Reading, Writing and Grammar for Academic Purposes 1-2. 3-8 Hours U.
A beginning level course designed to teach students with foundational English proficiency strategies to begin reading and writing. Emphasis is placed on taking notes from academic texts to demonstrate and develop students’ understanding of the organization of English writing. At this level, students focus on establishing writing fluency and building a foundation of high frequency vocabulary. Students build the conventional sentence- and discourse-level grammar and vocabulary needed to express meaning appropriately and accurately in written English. Six and a half credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 13. Reading, Writing and Grammar for Academic Purposes 1-3. 3-8 Hours U.
A beginning level course designed to teach students with limited English proficiency strategies to begin reading and writing. Emphasis is placed on taking notes from academic texts to demonstrate and develop students’ understanding of the organization of English writing. At this level, students focus on establishing writing fluency and building a foundation of high frequency vocabulary. Students build the conventional sentence- and discourse-level grammar and vocabulary needed to express meaning appropriately and accurately in written English. Six and a half credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 14. Reading, Writing and Grammar for Academic Purposes 1-4. 3-8 Hours U.
A lower-advanced level course designed to teach students with elementary English proficiency strategies to begin reading and writing. Emphasis is placed on taking notes from academic texts to demonstrate and develop students’ understanding of the organization of English writing. At this level, students focus on establishing writing fluency and building a foundation of high frequency vocabulary. Students build the conventional sentence- and discourse-level grammar and vocabulary needed to express meaning appropriately and accurately in written English. Six and a half credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 15. Reading, Writing and Grammar for Academic Purposes 1-5. 3-8 Hours U.
A beginning to lower-intermediate level course designed to teach students with elementary English proficiency strategies for advancing their reading and writing. Emphasis is placed on taking notes from academic texts to demonstrate and promote students’ understanding of the organization of English writing. At this level, students focus on progressing writing fluency and broadening their general knowledge of high-frequency vocabulary. Students build the conventional sentence- and discourse-level grammar and vocabulary needed to express meaning appropriately and accurately in written English. Six and a half credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.
AECR 20. Reading, Writing and Grammar for Academic Purposes 2. 3-8 Hours U.
A low-intermediate level course designed to teach and reinforce strategies for improving students’ academic reading and writing. At this level, emphasis is placed on writing complex sentences and paragraphs to strengthen fluency and vocabulary. Additional competencies developed in this course include writing essays and integrating ideas from several sources into academic writing. Students build the conventional sentence- and discourse-level grammar and vocabulary needed to express meaning appropriately and accurately in written English. Six and a half credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 30. Reading, Writing and Grammar for Academic Purposes 3. 3-8 Hours U.
A high-intermediate level course designed to teach and promote strategies for improving students’ academic reading and writing. At this level, emphasis is placed on deepening vocabulary and refining academic skills, including note-taking, paraphrasing, summarizing, revising, and integrating ideas from several sources, to elevate fluency and comprehension. Additional objectives covered in this course include building critical reading and writing skills as well as learning the process of writing a research paper. Students build the conventional sentence- and discourse-level grammar and vocabulary needed to express meaning appropriately and accurately in written English. Six and a half credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 140. Reading, Writing and Grammar for Academic Purposes 4. 3-8 Hours U.
A low-advanced level course designed to teach and promote strategies for improving students’ academic reading and writing. At this level, students work to achieve a high level of fluency, vocabulary, and academic skills, including summarizing, responding to test questions, and integrating ideas from several sources. Additional objectives emphasized in this course include furthering critical reading and writing skills as well as producing a research paper. Students build the conventional sentence- and discourse-level grammar and vocabulary needed to express meaning appropriately and accurately in written English. Six and a half credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 151. Special Studies in Reading, Writing and Grammar 5-1. 3-7 Hours U.
A high-advanced level course designed to help polish student’s strategies for academic reading and writing in preparation for college-level coursework. Continued emphasis is placed on increasing fluency, building vocabulary, and developing academic skills, such as note taking and summarization. To help transition skills to a collegiate setting, students work with university course material in a variety of academic areas. Enrollment in this course is intended for students requiring less intensive special studies instruction. Prerequisite: Placement in this course by the Applied English Center. LEC.

Courses

AECS 150. Laboratory Practice. 1-2 Hours.
Advanced language practice in a laboratory setting designed to coincide with the level 5 capstone course. Emphasis is placed on refining grammar skills, with additional opportunities provided to practice speaking, listening, and reading skills. Prerequisite: Placement in this course by the Applied English Center. Requisite: AEC 150. LAB.

Courses

AECT 1. Special Enrollment in English as a Second Language Non-Credit Tutorial: ______. 1-16 Hours U.
Individualized schedule of instruction in one or more language skills at appropriate level(s) for students enrolling in level 1, 2, or 3 AEC courses. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECT 82. Tutorial in Classroom Communication for International Teaching Assistants: ______. 2-4 Hours U.
Improve English communication skills: work on pronunciation and grammatical accuracy and fluency using speech recognition software and by presenting mini-lectures that are video recorded for review. Receive individual feedback and prioritization of tasks in weekly tutorial. Special emphasis is placed on classroom communication strategies. Open only to graduate students or seniors near graduation. Variable hour enrollment dependent on student need. Prerequisite: Students must have completed all AEC courses except AECG 151 or AECR 151, have a score of at least 35 on the SPEAK test, and have written permission from the Applied English Center. LEC.

AECT 101. Special Enrollment in English as a Second Language For-Credit Tutorial: ______. 1-16 Hours U.
Individualized schedule of instruction in one or more language skills at appropriate level(s) for students enrolling in level 4 or 5 AEC courses. Prerequisite: Placement in this course by the Applied English Center. LEC.

Courses

EAP 101. English for Academic Purposes. 6 Hours U.
A general introduction to academic English for students in term one of the KU Academic Accelerator Program (KUAAP) that utilizes materials from textbooks appropriate for use in courses in the humanities, social sciences, and sciences. The focus is on the use of English and academic strategies necessary to access, understand, recreate, and critically discuss disciplinary content typical of lower division academic courses. Students read textbook chapters, take practice tests, write papers, and give oral presentations on topics from various disciplines. Prerequisite: Placement in this course is by the KU Academic Accelerator Program. LEC.

EAP 102. English for Academic Purposes. 3 Hours U.
An advanced academic English preparatory course that helps students in term two of the KU Academic Accelerator Program (KUAAP) expand their ability to use English to access, understand, re-create, and critically discuss disciplinary content for lower division academic classes taken in term two. AAP 102 emphasizes academic strategies and the use of vocabulary, collocations, grammar, and larger pieces of discourse to express ideas and relationships among the concepts central to these
courses. Students will write papers and give oral presentations based on content from the disciplines. Prerequisite: AAP 101. LEC.

**EAP 111. Information Literacy. 1 Hour U.**
An advanced academic English course that helps students acquire the ability to use the English language in conducting and disseminating sound academic research. Students will learn how to make a professional PowerPoint presentation, create a defendable thesis statement, evaluate sources, utilize digital databases, cite information, and understand how to avoid plagiarism. The course emphasizes the process of researching a topic related to concepts taught in AAP 101. Students acquire the ability to use relevant technology to conduct their research in order to be autonomous in the future. Students will write a large-scale research paper including multiple source citations and create a presentation. Prerequisite: Concurrent enrollment in AAP 101. LEC.

**EAP 121. English Grammar for Academic Purposes. 2 Hours U.**
A two-hour, high-intermediate grammar course, designed to introduce key vocabulary and major grammatical structures used in EVRN 170 (students must be concurrently enrolled in this course). The grammar course is created in collaboration with faculty who teach EVRN 170. Students are introduced to a range of vocabulary and grammar structures typically used to define, explain, and illustrate key concepts central to this course. The focus is on paragraph organization, grammatical accuracy, word choice, and general comprehensibility. LEC.

**EAP 122. English Grammar for Academic Purposes. 1 Hour U.**
A one-hour advanced grammar course that focuses on the lexical and grammatical expression of key concepts in EVRN 171 (students must be concurrently enrolled in this course). The grammar course is created in collaboration with faculty who teach EVRN 171. The students explore the vocabulary, phrases, and grammatical options necessary for accurate and direct responses to prompts and short-answer questions. The prompts and short-answer questions come from the instructor of the disciplinary course identified. There is an intense focus on overall comprehensibility, lexical choice, and grammatical accuracy as demonstrated in weekly writing assignments and/or audio recordings. Prerequisite: AAP 121. LEC.
Reserve Officers Training Corps

The University of Kansas is one of only 37 U.S. universities with a full offering of Army, Air Force, and Naval ROTC programs. These programs are integrated into the mainstream of campus activities. All ROTC programs offer scholarships that pay tuition and fees, furnish books and uniforms, and provide a monthly living allowance.

Students in ROTC pursue regular courses toward a degree and augment their studies with courses from the Departments of Military Science, Aerospace Studies, or Naval Science. These courses may be crosslisted with a professional school or reviewed on an individual basis by the Assembly of the College of Liberal Arts and Sciences (http://clas.ku.edu) for accreditation toward degree requirements.

On successful completion of requirements and graduation from KU, Army or Air Force ROTC cadets are commissioned as Army or Air Force Second Lieutenants, and Naval ROTC Midshipmen are commissioned either as Ensigns in the Navy or as Second Lieutenants in the Marine Corps.

Programs

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu) for details). Other years' catalogs

Army - Army: Department of Military Science
Air Force - Air Force: Department of Aerospace Studies
Navy - Navy: Department of Naval Science

Army: Department of Military Science

The Program

The Department of Military Science administers the Army Reserve Officers Training Corps program at KU. The military science curriculum provides a student with unique leadership and management training, along with practical experience. It develops qualities basic to success in the Army and in the civilian sector. It also offers the student the opportunity to earn an officer's commission in the Army.

Eligible students enrolled at KU may register for a 100- or 200-level military science course or for ARMY 303 or ARMY 450. These students receive credit if the course they are enrolled in has been approved for degree credit in the College of Liberal Arts and Sciences (http://clas.ku.edu). The credit does not count toward the required 100 hours in the College for students earning a baccalaureate degree in the College of Liberal Arts and Sciences.

Students who want to receive a commission in the Army through the ROTC program must meet the eligibility requirements of Section 2103, Title 10, U.S. Code, and current Department of Defense and Department of the Army guidelines.

4-Year Program

The 4-year Army ROTC program is made up of a basic course and an advanced course.

Basic Course

The basic course is taken during the first 2 years of college. It covers subjects such as organizational behavior, leadership, management, ethics, writing, public speaking, military affairs, and tactics. All necessary textbooks, classroom materials, uniforms, and other equipment are furnished at no cost. Students who have completed the basic course; have met academic, physical, and medical standards; and have the potential to serve as officers may enter the advanced course.

The basic course is composed of a total of 4 courses. A student may enter the basic course at one of 3 points (if eligible).

1. Entering First-Semester First-Year Students

First semester:

ARMY 101 Introduction to Military Science I

Second semester:

ARMY 102 Introduction to Military Science II

Third semester:

ARMY 201 Basic Military Science I

Fourth semester:

ARMY 202 Basic Military Science II

2. Entering Second-Semester First-Year Students

First semester:

ARMY 102 Introduction to Military Science II

Second semester:

ARMY 101 Introduction to Military Science I

ARMY 201 Basic Military Science I

Third semester:

ARMY 202 Basic Military Science II

3. Entering Third Semester (Sophomore Year)

First semester:

ARMY 101 Introduction to Military Science I

ARMY 102 Introduction to Military Science II

Second semester:

ARMY 201 Basic Military Science I

ARMY 202 Basic Military Science II

Advanced Course

The advanced course normally is taken during the final 2 years of college. It offers instruction in military organization, tactics, military law, Army
administration, and leadership. All necessary books, classroom supplies, uniforms, and other equipment are issued to students at no cost. During the summer between the junior and senior years of college, students must attend the Leadership Development and Assessment Camp, a fully paid, five-week training and evaluation course. LDAC gives each student the chance to practice for an extended period of time what they have learned in the classroom. All students contracted in the advanced course receive stipends from the government of up to $5,000 a year.

The advanced course is composed of a total of 4 courses.

2-Year Program
Students can receive credit for the basic course in 3 ways other than taking the 4 courses associated with the basic course. Students who complete the basic course by 1 of these alternate means can enroll in basic course classes but cannot enroll in the advanced course until they are academic juniors. Any upper-level student, junior through graduate, may earn a commission through the 2-year program. The 3 alternate ways to receive basic course credit are

1. Successfully completing the basic enlisted training offered by any of the armed services.
2. Successfully completing the ROTC Leadership Training Course held each summer (prerequisite to ARMY 301).
3. Successfully completing at least 4 years of high school Junior ROTC.

Professional Military Education Course
The following course is required for commissioning:

Military History. Gain an understanding of the evolution of warfare, military theory, the military profession, and the place of military institutions in American society. The requirement can be met by successfully completing a history course focusing on either a major war or on military history in general. ROTC courses also meet this requirement.

Scholarships and Financial Assistance
Army ROTC offers 2-, 3-, and 4-year scholarships to qualified students. Scholarships are awarded on a competitive basis to students with outstanding academic and leadership abilities. These scholarships pay for all tuition, required fees, $1,200 a year for books and other supplies, and a stipend of up to $5,000 a year. Special consideration is given to students who major in nursing, engineering, or the sciences. The Kansas Army National Guard offers numerous educational benefits such as the Board of Regents Scholarship.

Army National Guard and Army Reserve Students
Students who are members of the Army National Guard or the Army Reserve may enroll in Army ROTC classes and be members of their units at the same time. Once students enter a contractual agreement as early as their sophomore year, they can remain members of their units under the Simultaneous Membership Program. These students are still eligible for all military benefits they have earned under enlisted contract such as Tuition Assistance, GI Bill, and drill pay; additionally, they may compete for guaranteed reserve forces designated ROTC scholarships if they commit to commissioning to the Army Reserve or Army National Guard.

Courses

ARMY 10. Leadership Laboratory. 0 Hours U.
Required of all Army Cadets. A study of Army customs and courtesies, drill and ceremony, career opportunities in the Army, and the life and work of a junior Army officer. Cadets develop leadership potential through practical supervised training. Course must be taken in conjunction with Army 101, 102, 201, 202, 301, 302, 401, and 402. Course not approved for credit in the College of Liberal Arts and Sciences. LAB.

ARMY 101. Introduction to Military Science I. 1 Hour U.
Required introductory course for the Army military science program. Course is comprised of one hour of lecture and one hour of laboratory per week. Introduces the military science program as an element of the reserve forces and includes an examination of major legislation, the Army organization structure, and military leadership techniques. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

ARMY 102. Introduction to Military Science II. 1 Hour U.
Course comprised of one hour of lecture and one hour of leadership laboratory per week. A general study and appreciation of the American military system from colonial times to the present. The course identifies factors present in the American society and national policy in each particular historical period which influenced the development of American military systems. The relationship between the military establishment and the larger American society is examined in each historical period. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 101 or department approval. LEC.

ARMY 201. Basic Military Science I. 1 Hour U.
Course comprised of one hour of lecture and one hour of laboratory per week. Analyzes the principles of war and military leadership at small unit level, and introduces principles of military writing. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 102 or department approval. LEC.

ARMY 202. Basic Military Science II. 1 Hour U.
Course is comprised of one hour of lecture and one hour of leadership laboratory per week. Curriculum consists of the fundamentals of topographic map reading and their application in a field environment. Includes instruction in various types of maps, marginal information, topographic symbols and colors, scale, distance, direction and use of the magnetic compass. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 201 or department approval. LEC.
ARMY 301. Theory and Dynamics of Tactical Operations I. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. A comprehensive study of conventional tactical operations. Emphasizes the fundamentals of land warfare and the qualities necessary to conduct fluid, non-linear operations. Introduces the student to the tenets of Air-Land Battle, the underlying structure of modern warfare, the dynamics of combat power, and the application of classical principles of war to a contemporary battlefield. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 202 or department approval. LEC.

ARMY 302. Theory and Dynamics of Tactical Operations II. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. Expands on the application of conventional tactical operations in the low, medium, and high intensity conflict spectrum. Examines the three-dimensional nature of modern warfare and the unified battlefield. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 301 or department approval. LEC.

ARMY 303. Military Conditioning. 1 Hour U.
Introduction to the theoretical and practical aspects of developing physical fitness programs for all Army personnel from the commander or supervisor's perspective. Provides an overview of total fitness, defines physical fitness, outlines the phases of fitness, discusses various types of fitness programs, and presents evaluation criteria. Approved for degree credit in the College of Liberal Arts and Sciences, to count within the limit of 25 hours accepted from other schools and divisions. LEC.

ARMY 401. Concepts of Military Management. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. An introduction to the military management system with special attention to the functions, organizations, and operations of military training, logistics and administration. The use of standardized staff formats in the development of plans and orders is emphasized from the standpoint of the leader with limited resources. Extensive use of standard staff procedures is emphasized in problem solving scenarios. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 302 or department approval. LEC.

ARMY 402. The Military Profession. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. A seminar on the military profession as an object of social inquiry. Focus is on the internal structure of the profession, current problems, and interaction with the larger American society. Seminar topics include but are not limited to the following: a historical perspective on the military profession; civil-military relations; social and political impact of military activities; military justice; professionalism versus careerism. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 401 or department approval. LEC.

ARMY 450. Military Analysis. 1 Hour U.
A study of present and future military operations; emphasis placed on analysis of problem. The student will defend his/her analysis through written and oral presentations. Prerequisite: Permission of department chairperson. LEC.

Reserve Officers Training Corps - Air Force

The Program

The Air Force Reserve Officer Training Corps program trains intelligent, energetic, and dedicated men and women for service as second lieutenants in the United States Air Force. To accomplish this, the Air Force, with approval of KU, has established a curriculum that allows commissioning in 3- to 4-year programs.

Air Force: Department of Aerospace Studies

Detachment 280, Military Science Building
1520 Summerfield Hall Drive, Room 109
Lawrence, KS 66045-7554
785-864-4676
http://www.afrotc.ku.edu/

Lieutenant Colonel Brian R. Salmans, Chair
785-864-4676

4-Year Program

The Air Force ROTC program is divided into the General Military Course (GMC) and the Professional Officer Course (POC). The program is for high-school scholarship recipients as well as those without scholarships. All cadets not on scholarship are eligible to compete for in-college scholarships, which are awarded based on GPA, physical fitness, commander’s ranking, and academic degree. Scholarships support tuition and fees, along with a nontaxable subsistence allowance. Scholarship recipients receive $900 a year for books. Please visit www.afrotc.com for more information about scholarships.

Although most AFROTC cadets complete the program in 4 years, students can join the program in their sophomore year by taking all GMC courses in one year. Certain majors such as engineering and atmospheric science are 5-year degrees, thus extending the student’s time in the program. More information can be obtained by contacting the Air Force ROTC office.

The General Military Course (GMC, Foundations of the USAF, Airpower History) is offered during the first 2 years of college and constitutes an introduction to the present-day Air Force. The emphasis is on the role of military forces in world affairs, customs and courtesies, being an officer, professionalism, the mission and organization of the Air Force, and the history of air power. If the cadet is medically and academically qualified and successfully completes 4 weeks of Field Training, he or she may enter the POC during the junior and senior years.

The Professional Officer Course (POC, Leadership Studies, National Security Studies) teaches leadership and management, organizational patterns, technologies, military policies and procedures, and provides an in-depth study of national security affairs. Cadets also learn and practice communication, leadership, and management skills. POC cadets receive a nontaxable subsistence allowance.

Current Subsistence Allowance for Contracted Cadets

(authorized Oct. 1, 2007)
Air Force Career Fields
Cadets commissioned from AFROTC are called to active duty in such diverse career fields as pilot, combat systems officer, engineering, nursing, space and missile officer, aircraft maintenance, personnel, air traffic control, space control, finance, scientist, contracting, weather, security forces, and public affairs. Medical and legal opportunities are available as well. Opportunities are limited only by initiative, ability, and desire. Go to www.afrotc.com (http://www.afrotc.com) for more information about career opportunities.

Field Training
AFROTC Field Training is held during summer break following the cadet’s second year in the program. Cadets must receive an enrollment allocation to attend field training, which is mandatory for cadets who wish to enter the POC. Each cadet receives pay and transportation to and from field training. The major areas of study are junior officer training, career orientation, survival training, base functions, team building, and physical training. College credit is not given for attending Field Training.

Leadership Laboratory
The Leadership Laboratory is a noncredit, 2-hour, once-a-week course taken every semester throughout the cadet’s enrollment in AFROTC. Instruction is conducted in the framework of an organized cadet corps with a progression of experiences that develop each student’s leadership potential. Leadership Lab also includes proper wear of the uniform, military rank, and military drill and ceremony. Because physical fitness is an integral part of Air Force life, an additional 2 hours a week of physical fitness activities each week.

Scholarships
High school seniors may apply for Air Force ROTC guaranteed scholarships covering the 4-year college period. Some technical majors, such as engineering, are regularly approved for five-year scholarship support. Students should apply no later than December 1 of the senior year of high school. Online applications (http://www.afrotc.com) are available beginning about May of the junior year. 2- and 3-year scholarships are available to qualified college students. These are awarded competitively. Scholarships generally cover full tuition, laboratory and incidental fees, $900 a year for books, and the nontaxable subsistence allowance. Visit the website (http://www.afrotc.com) for more information and to apply online for a high school scholarship.

Service Commitment
Upon commissioning, the Air Force service commitment for most cadets is 4 years of active duty for most officers, 10 years for pilots, 6 years for cadets who become combat systems officers, air battle managers, or remote aircraft pilots. Certain cadets may be eligible to receive a commission directly into the guard or reserve for a commitment of 6 years.

Courses
AIR 100. Leadership Laboratory. 0 Hours U.
The AS 100 and AS 200 Leadership Laboratory courses (LLABs) include a study of Air Force customs and courtesies, drill and ceremonies, and military commands. The LLAB also includes studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. The AS 300 and AS 400 LLABs consist of activities classified as leadership and management experiences. They involve the planning and controlling of military activities of the cadet corps and the preparation and presentation of briefings and other oral and written communications. LLABs also include interviews, guidance, and information which will increase the understanding, motivation, and performance of other cadets. LAB.

AIR 144. Foundations of the USAF. 1 Hour U.
Survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.

AIR 284. Airpower History. 1 Hour U.
A course designed to examine general aspects of air and space power through an historical perspective ranging from the first balloons and dirigibles to space-age satellite systems and the Global War on Terrorism. Leaders, pivotal situations in peace and war, successes and failures are provided to extrapolate the development of Air Force capabilities (competencies), and missions (functions) in shaping today’s USAF air and space power. In addition, the students will continue to discuss the importance of the Air Force Core Values with the use of operational examples and historical Air Force leaders and will continue to develop their communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.

AIR 288. Airpower History. 1 Hour U.
A course designed to examine general aspects of air and space power through an historical perspective ranging from the first balloons and dirigibles to space-age satellite systems and the Global War on Terrorism. Leaders, pivotal situations in peace and war, successes and failures are provided to extrapolate the development of Air Force capabilities (competencies), and missions (functions) in shaping today’s USAF air and space power. In addition, the students will continue to discuss the importance of the Air Force Core Values with the use of operational examples and historical Air Force leaders and will continue to develop their communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.

AIR 344. Leadership Studies. 3 Hours U.
A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of an Air Force junior officer.

First-Year | Sophomore | Junior | Senior
--- | --- | --- | ---
$300 | $350 | $400 | $500

All aerospace studies textbooks and uniforms for ROTC are provided free of charge.
Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course. LEC.

AIR 348. Leadership Studies. 3 Hours U.
A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course. LEC.

AIR 404. National Security Affairs. 3 Hours U.
Course examines the national security process (from a military standpoint) from its birth with the Founding Fathers and the US Constitution to the joint warfighting scenarios of today. It looks at the Constitutionally established roles of the legislative and executive branches of government in dealing with defense issues during war or peacetime. It examines the current command and control structure within the Department of Defense and outlines the global responsibilities of the military, specifically of the US Air Force. This course also examines the development of National Security policy and the interrelationship between the Air Force, sister services and the Air Reserve component. Multiple classroom hours on formal military communications skills (writing and briefing) are included. The course culminates with a look at current political trends and U.S. defense policy decisions in some of the world's major geographical areas. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences giving students the opportunity to apply leadership principles in a dynamic setting. LEC.

AIR 408. National Security Affairs. 3 Hours U.
Course examines U.S. National Security Policy as it relates to major geographical regions and political issues across the world. It also covers multiple legal, social and policy structures/procedures that Air Force officers and commanders face day-to-day. Air Force communications techniques, formal writing and speaking, are covered in detail. The latter part of the course addresses situations that new officers will encounter in their first few assignments. LEC.

Navy: Department of Naval Science

The Program

Courses in naval science include both practical and theoretical instruction in subjects pertaining to the Navy and the Marine Corps. The Navy-option student receives 23 credit hours of naval science instruction over a period of 4 years. The Marine-option student receives 17 credit hours of instruction.

Additionally, naval science laboratory meets every semester for 4 years. Laboratory sessions integrate and apply knowledge gained from naval science courses through practical application during tactical planning exercises, leadership training, and professional development. They also include classroom instruction on issues relating to naval careers and policies and some close-order drill.

Navy: Department of Naval Science

Military Science Building
1520 Summerfield Hall Drive. Room 115
Lawrence, KS 66045-7554
785-864-3161
http://www2.ku.edu/~kunrotc/

Admissions

Male and female citizens of the United States who are 17 years old on or before September 1 of the year of initial enrollment may apply.

- **Scholarship** applicants must not have reached age 27 on June 30 of the year in which they will be commissioned.
- **College Program** students must not have reached age 27½ on June 30 of the year in which they will be commissioned.

Age waivers may be available to students with active duty military backgrounds. Please contact the NROTC office for details. All students must be physically qualified for the NROTC program and must enter into an agreement with the Secretary of the Navy to accept a commission, if offered, in the Navy or Marine Corps upon successful completion of work toward their first bachelor’s degree.

4-Year Scholarship NROTC Students

Students may begin applying for scholarships as early as their second semester of their high school junior year (preceding the year in which the scholarship is desired). This scholarship is rolling, and therefore students will be selected periodically until the deadline (which occurs between January and February of the following year). Selection is based on high school grades, SAT/ACT test results, physical ability, citizenship, and aptitude for naval service.

If selected, students are appointed as midshipmen and granted compensation and benefits specified by law. These benefits include tuition, required fees, laboratory equipment, a $750-a-year book stipend, and subsistence pay of $250 a month for first-year students. Subsistence pay increases to $300 a month for sophomores, $350 for juniors, and $400 for seniors.

Scholarship students participate in 3 required summer training cruises. Scholarship students assume an obligation to serve at least 5 years on active duty after commissioning as Ensign, U.S. Navy, or 4 years as Second Lieutenant, U.S. Marine Corps.

Students with 30 or more college credits are not eligible to apply for this scholarship. More information can be found at www.nrotc.navy.mil.

4-Year College Program NROTC Students

These NROTC students have the status of civilians who have entered into an agreement with the Navy. They are not entitled to the benefits and compensation given to scholarship NROTC students, but are entitled to uniform issue. A subsistence allowance of $350 a month for juniors and $400 for seniors is paid in the final two years of training if they are selected for scholarship.

These students participate in one summer cruise between their junior and senior years. College program students agree to accept commissions in
the Naval or Marine Corps Reserve and serve a minimum of three years on active duty.

Upon proven superior performance in the college program, students will apply for a 3- or 2-year scholarship with the same requirements and benefits as 4-year scholarship students. Students must be selected for a scholarship by the end of their sophomore year to complete training.

### 3- and 2-Year Programs (Side-load Scholarship)

Entrance into the 3- or 2-year scholarship, or “side load scholarship”, program is offered to qualified students with 3 or 2 years remaining to complete their undergraduate degrees. Students applying for these scholarships are encouraged to have completed 1 year of differential and integral calculus of 1 real variable (MATH 115 and MATH 116, or MATH 121 and MATH 122) and must have attained a minimum grade of C.

Students who are accepted into either program may complete a paid 6-week summer course at the Naval Science Institute in Newport, Rhode Island. Upon successful completion of NSI, students have the same program benefits and requirements as students in the 4-year scholarship or college programs.

Applications for these programs must be completed by date released via message to the Navy ROTC at University of Kansas.

### Naval Science Students

Any student enrolled at KU may enroll in a naval science course for KU credit after obtaining consent of the Naval Science Instructor. Such students are not considered to be in the NROTC program and are not entitled to receive any compensation, benefits, or a commission.

### 4-Year Program Requirements

Both Navy- and Marine-option students must take professional Navy- and/or Marine-option courses as part of the NROTC program. The normal sequence of courses is

#### Navy 4-Year Scholarship Students

- **NAVY 101** Introduction to Naval Science 2
- **NAVY 220** Seapower and Maritime Affairs 3
- **NAVY 401** Principles of Naval Organization and Management (Leadership and Management I) 3
- **NAVY 180** Introduction to Naval Ships Systems I (Engineering) 3
- **NAVY 300** Navigation and Operations I 3
- **NAVY 304** Navigation and Operations II 3
- **NAVY 184** Introduction to Naval Ships Systems II (Weapons) 3
- **NAVY 402** Seminar in Military Leadership and Management (Leadership and Management II) 3

#### Marine 4-Year Scholarship Students

- **NAVY 101** Introduction to Naval Science 2
- **NAVY 220** Seapower and Maritime Affairs 3
- **NAVY 401** Principles of Naval Organization and Management (Leadership and Management I) 3
- **MCOR 380** Evolution of Warfare 3
- **MCOR 384** Amphibious Warfare 3

- **NAVY 402** Seminar in Military Leadership and Management (Leadership and Management II) 3

The above courses are approved by the College of Liberal Arts and Sciences (http://clas.ku.edu) and count as elective credit but do not count toward the required 100 hours in the College for students earning a baccalaureate degree in the College of Liberal Arts and Sciences.

#### Navy scholarship students must take the following courses in the College of Liberal Arts and Sciences:

- **Mathematics and Physics (17)**
  - **MATH 121** Calculus I 5
  - **MATH 122** Calculus II 5
  - **PHSX 211** General Physics I 4
  - **PHSX 212** General Physics II 3
  - (MATH 122 is a prerequisite for PHSX 212.)

#### Plus courses in the following areas (12)

- American history, military affairs, or national security policy 3
- English 6
- Computer science 3

### Marine Corps Option

Marine-option students are not required to take MATH 121, MATH 122, PHSX 211, or PHSX 212, but are encouraged to do so. During the junior and senior years, Marine-option students take MCOR 380, MCOR 384, and 2 relevant courses taught by civilian faculty and approved by the marine officer instructor in lieu of NAVY 300 and NAVY 304.

### Courses

**MCOR 380. Evolution of Warfare. 3 Hours U.**

A study of the art, science, concepts, and evolution of warfare as one instrument of political action throughout history. The study of selected battles and campaigns serves as a vehicle to emphasize the application of the classical principles of warfare, the influence of leadership, and the advancement of technology of the art and science of war. This course is substituted for NAVY 300 by NROTC students selected for Marine Corps training. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of twenty-five hours accepted from other schools and divisions. LEC.

**MCOR 384. Amphibious Warfare. 3 Hours U.**

An historical survey and evaluation of the concept, doctrinal origins, evolution, and strategic role of the amphibious projection of seapower ashore from antiquity and into the 20th century. The student studies and critiques historically significant amphibious campaigns. The student then evaluates the current and future need of amphibious capability within the U.S. defense community. Approved for degree credit in the College of Liberal Arts and Sciences effective Fall 1976. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.
Courses

NAVY 100. Naval Science Laboratory. 0 Hours U.
Designed for and required annually of all NROTC midshipmen, to provide increased knowledge in the areas of warfare techniques, history, operations, and operational decision making. Applies knowledge learned from other accredited naval science courses. Highly educated, well known, professional guest lecturers appear frequently and make presentations on topics which apply to naval science courses, increase the educational awareness of future Navy and Marine Corps officers, and further develop the leadership and decision making of the officer candidates. Some close order drill and lectures on standard naval topics. Graded on a satisfactory/unsatisfactory basis. LAB.

NAVY 101. Introduction to Naval Science. 2 Hours U.
An introduction to the Department of the Navy (U.S. Navy and U.S. Marine Corps) emphasizing its mission, organization, operation, and relationship to other U.S. federal and military institutions. Through historical overview, the development of the current Department of the Navy mission, organization and operation, both at sea and ashore, including customs, traditions, regulations, and professional/technical vocabulary is examined. Educational opportunities and specializations for naval officers are also detailed. Approved for degree credit in the College of Liberal Arts and Sciences effective spring 1982. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 180. Introduction to Naval Ships Systems I. 3 Hours U.
A course designed to familiarize students with the types, structures, and purpose of naval ships. Ship compartmentation, propulsion systems, auxiliary power systems, electrical systems, interior communications, and control are included. Elements of ship design to achieve safe operations, damage control, and ship stability characteristics are examined. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. (Same as ENGR 180.) LEC.

NAVY 184. Introduction to Naval Ships Systems II. 3 Hours U.
The concept of weapons systems and the systems approach are explored. The techniques of linear analysis of ballistics and weapons are introduced. The dynamics of the basic components of weapons control systems are investigated and stated as transfer functions. This course provides the tools for the future development in the student’s understanding of the basic principles that underlie all modern naval weapons systems. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. (Same as ENGR 184.) Prerequisite: MATH 002. LEC.

NAVY 220. Seapower and Maritime Affairs. 3 Hours U.
A survey of United States naval history from the American Revolution to the present with emphasis on major developments. Included is an in-depth discussion of the geopolitical theory of Mahan. The course also treats present day concerns in seapower and maritime affairs including the economic and political issues of merchant marine commerce, the law of the sea, the Global War on terror, and a comparison of United States and foreign naval strategies. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 300. Navigation and Operations I. 3 Hours U.
A comprehensive study of the theory, principles, and procedures of ship navigation in coastal and open ocean environment. Includes piloting, triangulation, ocean and tidal currents, International and U.S. inland rules of the road for navigation, sight reduction, publications, and logs; an introduction to electronic navigation, including theory of wave propagation, hyperbolic and azimuthal systems, doppler, inertial, and satellite systems. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. (Same as ENGR 301.) LEC.

NAVY 304. Navigation and Operations II. 3 Hours U.
A study of the laws for the prevention of collisions at sea; tactical formations and dispositions, relative motion, and the maneuvering board. A portion of the semester is devoted to an analysis of naval operations utilizing formal decision making theory, particularly as applied to command and control. Numerous case studies are used to examine the application of the above topics. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. (Same as ENGR 305.) Prerequisite: MATH 111 or higher. LEC.

NAVY 401. Principles of Naval Organization and Management. 3 Hours U.
An introduction of management functions as they apply to routine daily military activities. The concepts of planning, organizing, staffing, directing, controlling, and coordinating are introduced and examined using lecture, seminar, and case study methods. The course includes discussions on responsibility and accountability, power and influence, managerial theories, decision making, personnel appraisal, organizational structure, and communications. Emphasis is placed on management of personnel and physical resources. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 402. Seminar in Military Leadership and Management. 3 Hours U.
A study of military leadership and management which investigates techniques and concepts of task accomplishment in the absence of a normative business environment. The course includes an examination of military law, ethical leadership, personal responsibility, authority, and bureaucracy. The focus of discussion is on those aspects of leadership and management not normally present in civilian enterprise such as operating in the presence of hostility and morale management. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.
Pre-Majors

If you’re planning an undergraduate degree in a KU school that doesn’t admit first-year students, you’ll start out in the College of Liberal Arts and Sciences, complete your prerequisites, and then apply for admission to the KU school you want.

Meanwhile, you’ll be classified in one of the following ways:

- Prebusiness (p. 105)
- Preclinical laboratory science (p. 632)
- Predentistry (p. 1714)¹
- Pre-education (p. 167)
- Pre-education (elementary) (p. 226)
- Pre-education (secondary) (p. 226)
- Pre-education (sport science/community health) (p. 353)
- Pre-education (p.e./health teacher education) (p. 353)
- Pre-engineering (p. 394)
- Pre-health information management (p. 663)
- Prehealth professions (p. 588)
- Prejournalism (p. 706)
- Prelaw (p. 1713)¹
- Premedicine (p. 1714)¹
- Pre-nursing (p. 2189)
- Pre-occupational therapy (p. 677)¹
- Pre-optometry (p. 1714)²
- Pre-pharmacy (p. 2224)
- Pre-physical therapy (p. 364)¹
- Prephysician’s assistant (p. 1714)²
- Prerespiratory care (p. 696)
- Presocial welfare (p. 2262)
- Pre-veterinary medicine (p. 1714)²

¹ These are graduate programs at KU. If you’re interested in these programs, please consult your academic advisor for more information.

² KU doesn’t offer these degree programs. Students may indicate interest in these areas as preparation for programs at other colleges and universities.
