Guided experiences in the preparation and presentation of discourse intended to influence outcomes of human interactions in various speaker-audience situations, including television. Special emphasis on speech styles in influencing thought, attitudes, and behavior. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 335. Rhetoric, Politics and the Mass Media. 3 Hours H.
This course investigates the ways in which rhetorical strategies (persuasive and linguistic usage) permeate the relationship between politics and politicians and the mass media. We will analyze media coverage of political debates, the presidential use of radio, television and press conferences, and the network evening news coverage of political events to see how political decisions are influenced by and influence the media. (Same as POLS 521.) Prerequisite: COMS 130 or COMS 150. LEC.

COMS 342. Problem-Solving in Teams and Groups. 3 Hours S.
This course introduces basic concepts important to leading and/or participating in problem-solving work teams. Problem identification and analysis and leadership are emphasized and practiced. Teamwork variables are discussed and promoted. Lecture, demonstrations, exercises in class are structure for students to analyze groups outside of class. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 344. Relational Communication. 3 Hours S.
This course studies communication issues, theories, research and skills applicable to sustaining and enriching long-term relationships, such as families, friendships and close workplace collaborations. Emphasis is given to applying course concepts to students’ own relationships and interaction in class. Prerequisite: COMS 244. LEC.

COMS 356. Introduction to Behavioral Research Methods in Communication. 3 Hours GE12 / S.
An introduction to the nature of theory and theory building in the study of human communication. Research methods include experimentation, survey, content analysis, and field description. An introduction to statistics and statistical tests is included as well. Prerequisite: MATH 101 and admission to the Communication Studies major or consent of instructor. LEC.

COMS 410. Micro-Level Organizational Communication. 3 Hours S.
An examination of dyadic level communication in organizations, with emphasis on contexts of superior-subordinate and peer communication. The course also addresses contexts of organizational entry and exit, perception and judgment, information seeking, feedback, and organizational attachment. Prerequisite: COMS 310. LEC.

COMS 411. Macro Level Organizational Communication. 3 Hours S.
An exploration of the communication patterns and challenges between organizational groups and organizations as a whole. Key elements include networks, boundary spanning, inter-organizational collaboration, and the role of technology in linking large organizational components. Prerequisite: COMS 310 or instructor permission. LEC.

COMS 412. Communication in Distributed Organizations. 3 Hours S.
Examination of the communication challenges faced by distributed organizations, especially those with a global presence. Topics include telework, virtual terms, and new processes required to support interaction among people located in several different places. Prerequisite: COMS 310 or permission of instructor. LEC.

COMS 420. Communication, Technology and Globalization. 3 Hours H.
Examines the social, cultural, and economic challenges and opportunities advanced communication technologies and globalization pose to processes such as democratic deliberation, urban governance, and environmental sustainability. Prerequisite: COMS 130. LEC.

COMS 425. Communication and the American Presidency. 3 Hours H.
Examination of the ways in which American presidents communicate with the American people and how such communication influences the public. Emphasis is on a number of approaches to better understanding presidential communication, including rhetorical, historical, and content analysis. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 431. Communication and Leadership. 3 Hours H.
This course provides an overview of the role of communication in leadership in a variety of contexts, including: interpersonal, small group, intercultural, organizational, and public sphere. It will include theoretical and experiential approaches to effective leadership communication. Prerequisite: Admission to Leadership Minor or consent of instructor. LEC.

COMS 435. Forms and Styles of American Public Discourse. 3 Hours H.
Changing styles of public discourse are examined from the beginning of the nation to contemporary times, and the generic forms of address that have emerged from our national dialogue, such as jeremiads, inaugurals, and statistical tests is included as well. Prerequisite: MATH 101 and admission to the Communication Studies major or consent of instructor. LEC.

COMS 440. Communication and Gender. 3 Hours AE41 / S.
Focuses on the relationship between communication and gender, including both physical and psychological dimensions. Topics include: sex role orientations and stereotypes; perceived and actual differences in verbal and nonverbal communication behaviors; the
Influence of gender on communication in a variety of contexts. (Same as WGSS 440.) Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 441. Health Communication. 3 Hours H. This course is a survey of the many disciplines found in the field of health communication, including persuasion that targets health-related behavior, negotiation of treatment with health care providers, emotional support of patients, news media coverage of medical research, and health campaign principles. Prerequisite: COMS 130. LEC.

COMS 447. Intercultural Communication: The Afro-American. 3 Hours AE41 / H/W. An examination of the barriers to effective communication between black Americans and non-black Americans. (Same as AAAS 420.) Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 450. Ethical Issues in Political Communication. 3 Hours H. Application of ethical standards to the evaluation of political communication. Examination of value questions related to advocacy in modern society (propaganda, demagoguery, credibility). Analysis of First Amendment rights and other issues pertaining to censorship and freedom of speech (defamation, dissent, incitement, public morals, privacy). Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 453. Communication in Political Campaigns. 3 Hours H. This course examines political communication as it evolves throughout a political campaign and includes such topics as theories and strategies, stages in political campaigns, influence of the mass media, television advertising, candidate debates, polling, and the use of new technologies in delivering campaign communication. Selected examples from recent campaigns illustrate the strategies and effects of political communication as we examine how politicians persuade us to vote for them. Prerequisite: A course in communication studies. LEC.

COMS 459. Undergraduate Seminar in: ________, 1-3 Hours H. Course organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (Distribution credit given for two or three hours only.) LEC.

COMS 460. Undergraduate Seminar in: ________, 1-3 Hours S. Course organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (Distribution credit given for two or three hour enrollments only.) LEC.

COMS 485. Communication and Organizational Change. 3 Hours S. Examines communication processes that support or hinder implementation of organizational change. Topics include stakeholder analysis, individual responses to change, communicating about change, generating support for change, and managing resistance to change. LEC.

COMS 496. Capstone in: ________, 3 Hours AE61 / S. In the capstone course students synthesize and apply knowledge and skills gained through the major. Capstone coursework requires students to integrate practices and theories learned in their areas of concentration. Topics within each concentration change as needs and resources develop. Prerequisite: Senior standing, COMS 130, and completion of COMS 235 and COMS 356 or concurrent enrollment. LEC.

COMS 497. Honors Seminar. 3 Hours AE61 / H. This course is intended for honor students who want to learn more about the history of communication studies, major areas of research, or more in-depth knowledge about special communication-related topics. Areas to be covered may change as needs and resources change. LEC.

COMS 498. Honors Thesis. 2-6 Hours AE61 / H. (Six hours maximum credit, which may be distributed through two semesters.) Study should include readings directed toward original research, i.e., an intensive investigation of a specific problem in this field. Prerequisite: Consent of the Department Honors Committee. IND.

COMS 499. Directed Study in Communication Studies. 1-3 Hours H. (A maximum of six hours of credit may be counted, with not more than four in a single area of study.) Investigation of a special topic or project selected by the student with advice, approval, and supervision of an instructor. Such study may take the form of directed reading, or special research, individual reports and conferences. (Distribution credit given for two-three hours only.) Prerequisite: At least seven hours of credit in the department and consent of instructor. IND.

COMS 503. Post-Soviet Communication. 3 Hours H. This course is designed to acquaint students with the shifting manner of public discourse in Post-Soviet Russia and help them to explore in some depth cross-cultural communication between America and Russia. In addition to contemporary and historical background on Russian communicative practices, students examine discourse in business development, mass media, marketing, and advertising. All readings in English. (Same as SLAV 503). LEC.

COMS 530. Internship in Communication Studies. 1-3 Hours AE61 / S. Students do communication-centered fieldwork in an organization related to their career goals. Criteria for the organizations and work assignments suitable for internship credit are in an information brochure available at the COMS Department office and website. The internship plan is developed with field supervisor and internship faculty adviser. Reports and meetings are required. Prerequisite: Permission of instructor, admission to COMS major. FLD.

COMS 531. Seminar in Leadership Strategies and Applications. 3 Hours H. This seminar serves as the capstone course for the Leadership Studies minor. It includes advanced readings on leadership theory and practice, as well as major written and applied projects in which students integrate and demonstrate what they have learned in the program. Prerequisite: COMS 201, COMS 431, and admission to the Leadership Studies minor. LEC.

COMS 532. Leadership Studies Practicum. 1-3 Hours AE61 / U. Students engage in a variety of training programs and field experiences in which they learn about leadership, observe leaders in action, and involve themselves in leadership activities. Written assignments and group discussions are used to analyze their learning. Should be taken for a total of three credit hours, across more than one semester. Prerequisite: COMS 201 and admission to the Leadership Studies minor. FLD.

COMS 535. American Public Address, Puritans to 1900. 3 Hours H. A history of American public address from the Puritans to about 1900. Using the tools of rhetorical criticism, students describe, analyze, and evaluate select rhetoric from the period. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 235. LEC.

COMS 536. American Public Address, 1900-Present. 3 Hours H. A history of American public address from 1900 to the present. Using the tools of rhetorical criticism, students describe, analyze, and evaluate select rhetoric from the period. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 235. LEC.

COMS 537. Communication in Conflict Resolution. 3 Hours S. An examination of conflict situations and the manner in which communication can serve as a vehicle for their intensification or resolution. The focus is on the theory of games as it applies to conflict.
within interpersonal situations; implications will be drawn for larger social systems. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 538. Persuasion Theory and Research. 3 Hours S.
This course focuses on the social scientific study of persuasion. Traditional theories of attitude change and persuasion research are studied along with techniques of measuring attitudes. Attention is also given to the attitude-behavior relationship and the production of compliance-gaining messages. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 539. Argumentation. 3 Hours S.
Analysis of the theory and techniques of argumentation in historical and contemporary writings, with special emphasis on the works of Aristotle, John Stuart Mill, Richard Whately, and Stephen Toulmin. Application of argumentation theory to political and legal discourse. Opportunity for student performances in the preparation and criticism of argument. Prerequisite: Four hours in the department. LEC.

COMS 540. Group Leadership Practicum. 1-3 Hours S.
Theory and practice in leadership of small group interaction. Includes responsibility for conducting a semester-long series of group meetings in an educational context under the supervision of faculty, study and training in leadership skills, a weekly practicum seminar, and individual conferences with supervising instructor. May be taken more than once, but not for more than four hours total credit. (Distribution credit given for two-three hours only.) Prerequisite: COMS 344, COMS 455, and permission of instructor. FLD.

COMS 544. Advanced Interpersonal Communication: Theories and Research. 3 Hours S.
Intensive exploration of contemporary theories and research in the field of interpersonal communication; emphasis on an array of theoretical models and research exemplars; comparative analysis of major theoretical and research paradigms. Prerequisite: COMS 244 or instructor consent. LEC.

COMS 546. Communication Across the Life-span. 3 Hours S.
Examination of the ways in which communication changes across the life-span, and influences human development. Course will include topics such as barriers to communication among elderly populations; communication and mis-communication across generations; the role of language in constructing life-span development (e.g., the mid-life crisis); development of language and social interaction during childhood; peer relationships and communication in adolescence; uses and effects of mass communication across the life-span. Prerequisite: COMS 244 and COMS 356. LEC.

COMS 547. Communication and Culture. 3 Hours S.
A study of the systematic relationship between communication and culture. Emphasis is on culture as a variable in communicative situations: cultural aspects of attitude and cognition, language interchange, cultural differences in extra-verbal behavior, interaction between oral traditions and mass media. Prerequisite: COMS 130, COMS 150, COMS 230, or an introduction course in anthropology. LEC.

COMS 548. Theories of the Interview. 3 Hours S.
Comprehensive study of communication processes in dyadic, face-to-face situations commonly encountered in organizations and professional environments. Intensive analysis of simulated and real-life interviews. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 549. Communication in Service and Sales. 3 Hours S.
This course will deal with communication between organizational personnel and their customers or clients. Case studies and research concerning communication behaviors of service providers and salespeople will be covered. Prerequisite: COMS 310. LEC.

COMS 551. The Rhetoric of Black Americans. 3 Hours H/W.
A study of the rhetoric of black Americans, from their earliest protest efforts to the contemporary scene, with focus on the methods and themes employed to alter their status in American society. (Same as AAAS 534.) Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 552. The Rhetoric of Women's Rights. 3 Hours AE41 / H.
An analysis of the themes and rhetorical strategies of the women's rights movement in America. The course will view the struggle for women's rights from a historical perspective and will conclude with contemporary issues concerning the role of women in society. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 554. Rhetoric of Popular Culture. 3 Hours H.
A study of the social and cultural importance of popular culture. Emphasis is on using rhetorical analysis and a number of important theoretical perspectives to help examine popular culture's often unnoticed influence. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 555. Family Communication. 3 Hours S.
An examination of trends and theory related to the scientific study of the family, with a focus on issues related to family interaction, functioning, relationships, and communication. Research and theories from communication, sociological, and psychological perspectives are employed to examine topics such as family violence, mental health problems, marital satisfaction, divorce, courtship, and the impact of the family on its children (and vice versa). Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 557. East Asian Communication. 3 Hours S.
Explores the major communication theories and research in the East Asian cultural contexts by focusing on the Chinese, Japanese, and Korean cultures. Examines, from a broader perspective, certain cultural values (e.g., harmony, hierarchy, conservatism, and modernism) upheld in East Asian cultures and their influences on people's communicative behaviors in an age of globalization. Students explore issues of history, identity, verbal and non-verbal symbols, stereotypes, prejudice, values and thought patterning systems in the East Asian cultural context from a communicative perspective. This course is designed as a bridge course and meets with a graduate level section of the same title. Prerequisite: COMS 246. LEC.

COMS 559. Seminar in: ____. 1-3 Hours H.
Course organized in any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (Distribution credit given for two-three hours only.) LEC.

COMS 560. Seminar in: ____. 3 Hours S.
Course organized in any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (May be repeated for credit if content varies). LEC.

COMS 590. Nonverbal Communication. 3 Hours S.
Examination of non-linguistic behavior in human communication, including proxemics (spacing), kinesics (movement and expression), and paralinguistics (voice quality). Includes phylogenetic and developmental perspectives, methods of analysis, applications to interpersonal problems. (Same as PSYC 590.) Prerequisite: COMS 356 or PSYC 210 or PSYC 211. LEC.

COMS 603. Topics in Presidential Rhetoric: ____. 3 Hours H.
This course involves an examination of presidential rhetoric, including a focus on the strategies present in presidential discourse, the function that
this rhetoric serves, and the historical context in which it was presented. One or more important presidential rhetors will be covered each semester. This course can be repeated for credit if taken under a different topic. LEC.

**COMS 605. Speech Writing. 3 Hours.** Emphasis is on actual practice in preparing speech manuscripts for oneself and others. Model speeches are examined to better understand language, evidence, and stylistic choices available to speech writers. The ethical dimensions of writing for others in corporate and political positions are stressed. Students are required to prepare a variety of speeches and analyses of others' speeches. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

**COMS 607. Political Communication. 3 Hours.** This course will focus on contemporary political communication theory and illustrate how such theories are exemplified in modern political contexts: political arguments and developing consensus, constitutional issues and hearings, the rhetorical presidency, the dissemination of political information, and political uses of definition. (Same as POLS 520.) Prerequisite: COMS 130 or COMS 150. LEC.

**COMS 608. Communication, Media and Terrorism. 3 Hours.** The course considers the topics of media and terrorism from a macro public opinion and politics perspective. This course addresses the nature of terrorism, who terrorists are, and what are their grievances with the larger society in which they are embedded. Terrorism has unique links to communication and these will be explored in various ways: consideration of acts of terror, recruiting new terrorists, and issues in choosing effective and ineffectve means of fighting terrorism. Additional topics include media portrayals of terrorism in news discourse and mediated communication such as motion pictures and televised dramatic portrayals. Prerequisite: COMS 130. LEC.

**COMS 620. Communication and New Technology. 3 Hours.** This course explores the impact of new communication technology on individuals and groups in various contexts. Topics include: The development of computer-mediated communication, social and psychological impacts of new communication technology, the evolution of telework and advances in interactive telecommunications. LEC.

**COMS 639. Legal Communication. 3 Hours.** An analysis of how communication principles and theories operate within the context of the legal system. Topics covered will include the lawyer/client interview, depositions and pre-trial discovery, settlement negotiation, jury selection, opening and closing statements, and witness testimony. Prerequisite: COMS 130 or COMS 150. LEC.

**COMS 647. Issues in Intercultural Communication. 3 Hours.** Examination of the processes and factors affecting communication in an intercultural context, and of methods of training for intercultural communication roles. Prerequisite: COMS 547 and an introductory course in anthropology, or consent of instructor. LEC.

**COMS 656. Mass Media: Social Science Applications. 3 Hours.** This course introduces students to the major theories of and prominent research in mass communication. The aim is to stimulate critical thinking about the content and effects of mass communication, develop critical consumption skills, and enhance awareness of public policy issues relating to the media. Students are required to read a variety of chapters and articles on mass communication, promoting independent investigation into specific areas of interest. This course is a bridge course and meets with a graduate level section of the same title. Prerequisite: COMS 356. LEC.

**COMS 667. Interpersonal Communication in Multinational Organizations. 3 Hours.** A study of interpersonal communication in management and professional development in intercultural situations. Focus on preparation of the global manager or professional in the organizational environment. Special attention to the problems and challenges of intercultural interactions in the context of multinational organizations. LEC.

**COMS 669. Human Conflict and Peace. 3 Hours.** Study of religious, cultural, and social traditions toward understanding the nature and purposes of human conflict. Analysis of various meanings of peace, with emphasis on study of nonviolent approaches to management of conflict. Class discussion, readings, and individual research projects. (Same as REL 669.) Prerequisite: Junior standing or above. LEC.

**COMS 710. Survey of Theory and Research in Organizational Communication. 3 Hours.** This course examines the theoretical and philosophical underpinnings of organizational communication research. Course topics cover variable analytic traditions and systems theory, as well as cultural, critical, and various interpretive approaches to understanding communication in organizational contexts. Prerequisite: COMS 310 and permission of the instructor. LEC.

**COMS 730. Writing and Speaking for Decision Makers. 3 Hours.** Theory and application of communication strategies for corporate communication. This course presents rhetorical analysis of organizational situations and audiences, focusing on corporate decision-makers. Included are informative and persuasive communications such as board presentations, requests for proposal and responses to RFPs, grant proposals, and persuasive presentations for adoption, implementation, or evaluation of organizational programs. Course is limited to Regents Center students only. LEC.

**COMS 741. Special Topics in Communication Studies: _____ 2-3 Hours.** Examination of special topics in Communication Studies. Prerequisite: Instructor consent. LEC.

**COMS 784. Proseminar in Communication and Aging. 1 Hour.** A weekly forum for students and faculty to discuss professional issues and interdisciplinary research in communication and aging. May be repeated for credit. (Same as PSYC 784.) (Same as SPLH 784.) Prerequisite: Consent of instructor. LEC.

**COMS 787. Gerontology Proseminar. 3 Hours.** A proseminar coordinated by the Gerontology Center. The proseminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (psychology, biology, sociology, and communication) perspective on aging. The proseminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as ABSC 787, AMS 767, PSYC 787, and SOC 767.) (Formerly HDFL 787.) LEC.

**COMS 807. Rhetoric, Politics and the Mass Media. 3 Hours.** This course investigates the ways in which rhetorical strategies (persuasive and linguistic usage) permeate the relationship between politics and politicians and the mass media. We will analyze media coverage of political debates, the presidential use of radio, television and press conferences, the network evening news coverage of political events, the influence of political advertising to see how political decisions are influenced by and influence the media. LEC.

**COMS 810. Organizational Communication: Theory and Research. 3 Hours.** This course examines the theoretical and philosophical underpinnings of organizational communication research. Course topics cover variable
analytic traditions and systems theory, as well as cultural, critical, and various interpretive approaches to understanding communication in organizational contexts. Prerequisite: COMS 310 and permission of instructor. LEC.

COMS 811. Applied Organization Communication. 3 Hours.
This course addresses key communication processes in organizations, including developing and sustaining workplace relationships, providing and receiving feedback, processes of effective teams and in leadership situations. Students will apply these concepts to appreciate the dynamics of organizational culture, power, and ethics at work and will identify strategies to enhance workplace success. SEM.

COMS 835. Impression Formation and Interpersonal Behavior. 3 Hours.
Intensive investigation of the processes involved in impression formation and of the effects of established impressions upon interpersonal communication. (Same as PSYC 845.) Prerequisite: COMS 535 or PSYC 670. LEC.

COMS 844. Seminar in Interpersonal Communication. 3 Hours.
This seminar addresses current theory and research in interpersonal communication. Issues addressed may include verbal or nonverbal communication in families, close relationships, initial interactions, and the like. LEC.

COMS 846. Communication and Aging. 3 Hours.
Examination of the interrelationship between communication and the aging process. The course will include current research and theory on such topics as intergenerational communication, language and age identity, age-stereotyping and communication, mass media and aging, age and health communication, and others of current interest in the field. LEC.

COMS 848. Communication Audits in Organizations. 3 Hours.
The principal thrust of this course is a hands-on analysis of the communication in 1-2 organizations. Students work as a consulting group to analyze dimensions of communication, communication channels, job satisfaction, organizational commitment, and communication strategies. Experience is gained in organizational research methods, instrument development, organizational analysis, feedback, and organizational development. LEC.

COMS 850. Introduction to Research Methods. 3 Hours.
An introduction to methodological approaches to the study of communication. Approaches considered will include (a) humanistic message analysis and evaluation; (b) ethnographic and observational techniques; (c) survey construction and execution; and (d) experimental design and procedures. Special focus on issues of validity, reliability, and ethics. LEC.

COMS 851. Communication Research: Historical and Descriptive. 3 Hours.
An introduction to types of historical and descriptive research in human communication. Library resources and methods of research will be covered. Emphasis will be placed upon preparing a research prospectus and upon writing the research report. LEC.

COMS 852. Communication Research: Experimentation and Quantitative Analysis. 3 Hours.
An introduction to the process of research in communication studies, including consideration of basic principles in research design, methods of observation and measurement, and the application of appropriate statistical techniques. LEC.

COMS 855. Qualitative Research Methods in Communication Studies. 3 Hours.
Study of strategies for describing communication behavior in particular contexts, emphasizing ethnography and specific observational and interview data gathering and analysis methods. Prerequisite: COMS 755 or equivalent. LEC.

COMS 856. Communication Research: Quantitative Analysis. 3 Hours.
An intermediate overview of statistical techniques commonly used in communication research. Content will include a review of univariate statistical tests such as t-test, correlation, chi-square, and other nonparametric techniques of data analysis. Additionally, factorial analysis of variance, multiple regression, and factor analysis will be covered, along with the application of appropriate statistical techniques. Prerequisite: COMS 850 and an introductory course in statistics. LEC.

COMS 859. Proseminar in Communication Studies. 3 Hours.
An overview and integration of communication studies based upon an examination of selected basic writings in the discipline. LEC.

COMS 860. New Communication Technology and the Work Place. 3 Hours.
An examination of changes in the workplace and for workers associated with new communication technologies such as e-mail, voice mail, teleconferencing, distributed computer processing, and computer-supported decision making. Emphasis is on changes in organizational communication patterns, participant responses to the technologies, and evaluation of the outcomes of implementing workplace communication technologies. To be taken by Regent Center students. LEC.

COMS 898. Investigation and Conference (For Master's Candidates). 1-8 Hours.
(Limited to eight hours credit toward the M.A. degree.) Directed research and experimentation for M.A. students in some phase of speech science or the teaching of speech and drama. RSH.

COMS 899. Master's Thesis. 1-6 Hours.
Graded on a satisfactory/unsatisfactory basis. THE.

COMS 907. Seminar in Political Communication. 3 Hours.
This course will focus on contemporary political communication theory and illustrate how such theories are exemplified in modern political contexts: political arguments and developing consensus, communication strategies in congressional and bureaucratic decision-making, the rhetorical presidency, the dissemination of political information, political narrative, and political campaigns. LEC.

COMS 920. Introduction to Teaching Oral Communication. 3 Hours.
This seminar prepares new graduate teaching assistants for their first teaching experience. Students will develop course materials including lectures, discussion prompts, assignments, exams based on pedagogical best practices. Students will apply theoretical concepts related to teaching, learning and assessment, and apply those theories to their own classrooms. LEC.

COMS 930. Seminar in Speech: ______. 1-4 Hours.
Special problems in speech. LEC.

COMS 932. Theories of Rhetoric: Classical. 3 Hours.
An intensive study of the rhetorical theories of classical writers from 466 B.C. to the decline of Roman oratory. Principal emphasis will be on Isocrates, Plato, Aristotle, Quintillian, Cicero, and Longinus. LEC.

COMS 933. Theories of Rhetoric: Neo-Classical. 2-3 Hours.
A study of the development of rhetorical theory from 325 A.D. to the twentieth century. Notable departures from the classical tradition will be examined. Special concentration on the writings of Augustine and
the tradition of medieval preaching. Alcuin, Ramus, Bacon, Campbell, Whately, Blair, John Quincy Adams, and the elocutionary movement. LEC.

COMS 936. Seminar in Language and Discourse. 3 Hours.
This seminar uses interdisciplinary readings to examine central theoretical questions regarding language and communication. The course moves from considering major theoretical positions to current research in communication on discourse. Methodological issues in the study of language and discourse are also addressed. LEC.

COMS 938. Seminar in Persuasion. 2-3 Hours.
Examination of selected topics in persuasion, with emphasis on the application of recent theories and experimental research to the analysis of persuasive discourse. Prerequisite: COMS 538 or equivalent. LEC.

COMS 939. Seminar in Argumentation. 2-3 Hours.
Examination of special problems in argumentation, with emphasis on the relationship of systems of argumentation to their philosophic presuppositions. Discussion of the writings of Toulmin, Natason, Johnstone, Perelman, Dewey. Prerequisite: COMS 539 or equivalent. LEC.

COMS 941. Seminar in Health Communications. 3 Hours.
This course is a survey of the many disciplines of study found in the field of health communication. Emphases include decision making regarding health-related behaviors, the influence of interpersonal messages, negotiating treatment with health care providers, coping with medical difficulties, the critical examination of medical research, news, and health campaigns, and the impacts of new technologies. SEM.

COMS 945. Seminar in Social Support. 3 Hours.
This course is a survey of the many disciplines of the fundamental form of communication known as social or emotional support or comforting. Emphases include message-, receiver-, and interactionally-oriented approaches, as well as support contexts, dilemmas, structures, features, and positive effects on physical and mental health. SEM.

COMS 946. Seminar in Communication and Intergroup Relations. 3 Hours.
Conceptual and theoretical frameworks for exploring and understanding relations between individuals from different societal groups (e.g., cultural/ethnic, gender, age). Focus on issues of identity, power relations as manifested in interpersonal, mass media, and organizational contexts. The course will include methodological and applied implications for studying different groups, both within the USA and around the world. LEC.

COMS 947. Communication in Cultural Innovation and National Development. 3 Hours.
An examination of the role of speech and other types of communication in the introduction of change within cultures and the diffusion of innovation between cultures. Specific communication problems concerning agriculture, education, international aid, military assistance, and public health will be discussed. LEC.

COMS 948. Seminar in Organizational Communication. 2-3 Hours.
Analysis of speech communication functions in the organizational structures of business, industry, labor, military, education, government, and professional agencies. Development of conceptual schemes for conducting research and training programs on speech systems which characterize the operation of organized groups. LEC.

COMS 950. Seminar in Public Address: 3 Hours.
The study of public address by historical periods or by topics. LEC.

COMS 951. Seminar in Movement Theory and Genre Criticism. 3 Hours.
This course examines the theoretical and methodological underpinnings of approaches to rhetorical analysis focusing on social movements and rhetorical genres. It will review existing theory on these topics, develop a methodological approach to both forms of critical analysis, and test each methodological approach via case studies. Prerequisite: COMS 755 or consent of instructor. LEC.

COMS 952. Seminar in Mythic and Narrative Approaches to Rhetorical Criticism. 3 Hours.
This course examines the theoretical and methodological underpinnings of approaches to rhetorical analysis focusing on narrative rhetoric, with a special emphasis on myth as a type of narrative. It will review existing theory on these topics, consider a number of alternative methodological approaches, and test each methodological approach via case studies. Prerequisite: COMS 755 or consent of instructor. LEC.

COMS 953. Seminar in Organizational Rhetoric. 3 Hours.
This course focuses on theoretical and methodological materials related to the use of rhetoric in an organizational setting. It will review existing theory and methodological development on this topic, paying special attention to the distinction between rhetoric used within an organization and rhetoric focused on audiences external to the organization. Multiple case-studies will be considered to illuminate the functioning of both internal and external organizational rhetoric. Prerequisite: COMS 755 or consent of instructor. LEC.

COMS 955. Seminar in Rhetorical Criticism. 3 Hours.
A study of contemporary and historical writings on rhetorical criticism. Emphasis is placed upon the development of critical methodology for future research and writing. Prerequisite: COMS 755. LEC.

COMS 958. Comparative Theories of Speech Communication. 3 Hours.
A descriptive and comparative analysis of theories of communication applicable to speech behavior. Prerequisite: COMS 859 or equivalent. LEC.

COMS 959. Theories of Rhetoric: Contemporary. 3 Hours.
A study of the writings on rhetorical theory in the twentieth century. Principal emphasis will be on the psychological treatment of rhetoric. J.A. Richards and Kenneth Burke, and the relationship in the twentieth century between rhetoric and dialectic, rhetoric and poetic. Prerequisite: COMS 859 or equivalent. LEC.

COMS 997. Research in: 1-6 Hours.
Supervised research under the direction of a faculty member on a topic of mutual interest to the faculty and graduate student. RSH.

COMS 998. Investigation and Conference (For Doctoral Candidates). 1-8 Hours.
(Limited to eight hours credit towards the Ph.D. degree.) Directed research and experimentation for Ph.D. students in some phase of speech science or the teaching of speech and drama. RSH.

COMS 999. Doctoral Dissertation. 1-12 Hours.
Graded on a satisfactory/unsatisfactory basis. THE.
Bachelor of Arts and Bachelor of General Studies in Communication Studies

Career Opportunities

A major in communication studies is helpful for careers in business and industry, education, foreign service, health care, human resources, law, politics and government, public relations, religion, sales and marketing, social service agencies, and technology. All occupations and human concerns involve communication in some form.

Admission to the Major

Admission Criteria

Course Requirements

Admission to the major

1. Students must have completed COMS 130 or COMS 131, or have satisfied exemption requirements.
2. Students must have completed two of the following courses: COMS 210, COMS 232, COMS 238, COMS 244, COMS 246.
3. Students must have completed one of the following courses: COMS 230, COMS 235, COMS 330, COMS 331, COMS 342, COMS 307.

Grade-Point Average Requirements

Students must earn a minimum grade-point average of 2.75 or higher in COMS 130 and the courses designated for admission to the student’s selected track. Grades in other COMS courses are not considered for admission to the major. KU’s course repeat policy applies to grade-point average calculation.

Application Term

Students should apply to the major during the semester in which major admission criteria will be completed. This is normally no later than 60 hours, or for transferring students, normally during the initial term at KU. Application to this major after completion of 60 hours, or the initial KU term for transfer students, will likely delay graduation.

Requirements for the B.A. or B.G.S. Major

Prerequisite Knowledge (3)

Majors must complete a public speaking requirement as specified below. Note: COMS 130 and COMS 131 do not contribute to the minimum number of hours required for the major.

Speaker-Audience Communication. Satisfied by one of the following:
- COMS 130  Speaker-Audience Communication
- COMS 131  Speaker-Audience Communication, Honors
- Exemption

Communication Studies Core Knowledge and Skills (0)

Majors select two concentrations of courses, one designated as primary and one as secondary. To complete the major, students must complete 33 credit hours, distributed as:

<table>
<thead>
<tr>
<th>Breadth of discipline (6 hours)</th>
<th>Depth of discipline (12 hours)</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 210  Communication in Organizational and Professional Contexts</td>
<td>COMS 235  Introduction to Rhetoric and Social Influence</td>
</tr>
<tr>
<td>COMS 232  The Rhetorical Tradition</td>
<td>COMS 356  Introduction to Behavioral Research Methods in Communication</td>
</tr>
<tr>
<td>COMS 238  Cases in Persuasion ((for the Political Communication/Social Influence concentration))</td>
<td>COMS 330  Effective Business Communication</td>
</tr>
<tr>
<td>COMS 244  Introduction to Interpersonal Communication Theory ((for the Interpersonal/Intercultural concentration))</td>
<td>COMS 331  Persuasive Speaking</td>
</tr>
<tr>
<td>COMS 246  Introduction to Intercultural Communication</td>
<td>COMS 342  Problem-Solving in Teams and Groups</td>
</tr>
</tbody>
</table>

Skills classes (6 hours). Students choose two skills courses from their primary concentration. (6)

Students pursuing the Rhetoric Concentration take the following two courses:
- COMS 230  Fundamentals of Debate
- COMS 331  Persuasive Speaking

Students pursuing the Interpersonal/Intercultural concentration choose two courses from:
- COMS 246  Introduction to Intercultural Communication
- COMS 330  Effective Business Communication

Students pursuing the Political Communication/Social Influence concentration choose two courses from:
- COMS 307  Introduction to Political Communication
- COMS 330  Effective Business Communication

Students pursuing the Organizational Communication concentration choose two courses from:
- COMS 330  Effective Business Communication

Methods classes (6)

All students in all concentrations take the two methods courses:
- COMS 235  Introduction to Rhetoric and Social Influence
- COMS 356  Introduction to Behavioral Research Methods in Communication

Capstone experience (3)

Students take a capstone course in their primary or secondary concentration or meet this requirement with other approved elements.

COMS 496  Capstone in: _____
Upper-level elective options Rhetoric Concentration: Understanding Messages
COMS 335 Rhetoric, Politics & Mass Media
COMS 435 Forms and Styles of American Public Discourse
COMS 551 The Rhetoric of Black Americans
COMS 552 The Rhetoric of Women’s Rights
COMS 535 American Public Address
COMS 536 American Public Address II
COMS 539 Argumentation
COMS 544 Advanced Interpersonal Communication
COMS 546 Communication Across the Lifespan
COMS 547 Communication and Culture
COMS 555 Family Communication
COMS 557 East-Asian Communication
COMS 590 Nonverbal Communication
COMS 647 Social Science Approaches to the Media
Political Communication/Social Influence Concentration: Influencing Others
COMS 310 Introduction to Organizational Communication
COMS 335 Rhetoric, Politics & Mass Media
COMS 425 Communication and the American Presidency
COMS 450 Ethics and Political Communication
COMS 453 Political Campaigns
COMS 537 Communication in Conflict Resolution
COMS 538 Persuasion Theory and Research
COMS 539 Argumentation
COMS 607 Political Communication
COMS 639 Legal Communication
COMS 654 Social Science Approaches to Media
Organizational Communication Concentration: Communicating Professionally
COMS 310 Introduction to Organizational Communication
COMS 410 Micro-Level Organizational Communication
COMS 411 Macro-Level Organizational Communication
COMS 412 Communication in Distributed Organizations
COMS 440 Communication and Gender
COMS 485 Communication and Organizational Change
COMS 537 Communication in Conflict Resolution
COMS 538 Persuasion Theory and Research
COMS 590 Nonverbal Communication

**Major Hours**
Satisfied by 33 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Sample 4-year plans for the BA degree in Communication Studies with the following concentrations, can be found here: Rhetoric (p. 1265), Interpersonal/Intercultural Communication (p. 1266), African-American Communication (p. 1267), and Organizational Communication (p. 1268), or by using the left-side navigation.

Sample 4-year plans for the BGS degree in Communication Studies can be found by using the left-side navigation.

**Departmental Honors**
Outstanding undergraduates may earn departmental honors if they meet the following criteria:

1. A grade-point average at the time of graduation of at least 3.25 overall and 3.5 in communication studies courses.
2. Completion of an honors thesis involving independent research — either a single comprehensive project or an integration of several related projects. Completion requires satisfactory defense of the thesis in an oral examination and submission of a satisfactory thesis manuscript to the department office by one month before graduation. Independent research for the thesis must be conducted under the direction of a faculty member. The student must be enrolled with that instructor in 2 to 6 hours of COMS 498, usually over two semesters.

**BA in Communication Studies with concentration in Rhetoric**
Below is a sample 4-year plan for students pursuing the BA in Communication Studies with a concentration in Rhetoric. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1
2 course.

3 COMS 356 is required for the major and requires admission to the major in order to be enrolled.
4 The Communication Studies department requires completion of admission criteria in order to be admitted to the major. Review admission requirements here (http://catalog.ku.edu/liberal-arts-sciences/communication-studies/ba-bgs/#admission).
5 The Communication Studies major requires that students choose a primary and secondary concentration within the major. This plan displays the required courses for a primary concentration in Rhetoric, with an open choice for the secondary concentration. Note: the secondary concentration courses must be chosen from the same concentration area for both the breadth and depth of discipline requirements.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**1** The COMS 130/131 requirement can also be fulfilled by exemption.

**2** The Communication Studies department requires completion of admission criteria in order to be admitted to the major. Review admission requirements here (http://catalog.ku.edu/liberal-arts-sciences/communication-studies/ba-bgs/#admissiontext).

**3** The Communication Studies major requires that students choose a primary and secondary concentration within the major. This plan displays the required courses for a primary concentration in Interpersonal/Intercultural Communication, with an open choice for the secondary concentration. Note: the secondary concentration courses must be chosen from the same concentration area for both the breadth and depth of discipline requirements. Refer to the Degree Requirements tab for more information, or contact your advisor.

**4** COMS 356 is required for the major and requires admission to the major in order to be enrolled.

**5** Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

---

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal.
The Communication Studies major requires that students choose a primary and secondary concentration within the major. Minor in Communication Studies

Why study communication studies?
Because effective and ethical communication is at the core of family, of human organizations of all types, and of democratic decision making.

Requirements for the Minor
Students selecting the communication studies minor must complete 6 COMS courses (18 hours).

Prerequisite Knowledge. Minors must complete a public speaking requirement. These hours do not contribute to the minimum number of hours required for the minor.

Speaker-Audience Communication (0)
Satisfied by one of the following:
- COMS 130 Speaker-Audience Communication
- COMS 131 Speaker-Audience Communication, Honors
- COMS 230 Fundamentals of Debate
- Exemption

Communication Studies Course Requirements. Satisfied by 6 COMS courses (18 hours), 12 hours at the 300+ level.

Minor Hours & GPA
While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Professional Communication, Undergraduate Certificate

Requirements for the Undergraduate Certificate in Professional Communication
12 credit hours, 6 of which must be completed at the Jr/Sr level.

Complete each of the following:
- COMS 210 Communication in Organizational and Professional Contexts 3
- COMS 310 Introduction to Organizational Communication 3

ENGL 203 Topics in Reading and Writing: ______ 3
ENGL 362 Foundations of Technical Writing 3

(All courses available online)

Master of Arts in Communication Studies

Why study communication studies?
Because effective and ethical communication is at the core of family, of human organizations of all types, and of democratic decision making.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog. Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
All domestic M.A. and Ph.D. applicants on the Lawrence or Edwards Campuses must submit the Graduate Record Examination. International students who apply to Lawrence must submit Test of English as a Foreign Language scores. International students who have earned a U.S. degree must submit GRE scores.

Submit your graduate application online (http://graduate.ku.edu/application-process). Send curriculum vitae or résumé, 3 letters of recommendation, and a 2- to 3-page personal statement to the department:

The University of Kansas
Department of Communication Studies
Robert C. Rowland, Graduate Director
Bailey Hall
1440 Jayhawk Blvd., Room 102
Lawrence, KS 66045-7545

M.A. Degree Requirements
Concentration in Communication Studies
For course work areas, see Ph.D. requirements.

Communication Studies
Satisfactory completion of these required courses:

- COMS 851 Communication Research: Historical and Descriptive 3
- or COMS 852 Communication Research: Experimentation and Quantitative Analysis
- Select a second methodology course 3
- COMS 859 Proseminar in Communication Studies 3
Doctor of Philosophy in Communication Studies

COMS 899 Master’s Thesis 6
Select at least 6 hours in each of 2 areas of communication 6
Select 3 additional credit hours from any communication studies courses or from outside the department 3
Final oral examination 6

Total Hours 30

1 Appropriate for the student’s area of study. A list of courses is provided following the requirements.

Nonthesis Option

A nonthesis option is available in communication studies. Requirements for this option include:

Communication Studies

COMS 859 Proseminar in Communication Studies 3
COMS 851 Communication Research: Historical and Descriptive 3
or COMS 852 Communication Research: Experimentation and Quantitative Analysis

Select at least 9 hours in each of 2 areas of communication 9
Select 6 hours of electives 6

General examination structured as follows: 1

1 hour written over required courses
2 hours written over the first major area of communication
2 hours written over the second major area of communication
1 hour oral examination

1 Each student must complete an examination over the 2 course work concentrations.

KU Edwards Campus M.A. Program

The M.A. also is offered on the KU Edwards Campus (http://edwardscampus.ku.edu) in Overland Park. The requirements for the degree at the Edwards Campus are the same as for the program on the Lawrence campus. Edwards Campus classes are taught by the same faculty members who teach regularly in Lawrence. Courses are scheduled during the late afternoons and evenings to accommodate working professionals.

Doctor of Philosophy in Communication Studies

Why study communication studies?

Because effective and ethical communication is at the core of family, of human organizations of all types, and of democratic decision making.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

All domestic M.A. and Ph.D. applicants on the Lawrence or Edwards Campuses must submit the Graduate Record Examination. International students who apply to Lawrence must submit Test of English as a Foreign Language scores. International students who have earned a U.S. degree must submit GRE scores.

Submit your graduate application online (http://graduate.ku.edu/application-process). Send curriculum vitae or résumé, 3 letters of recommendation, and a 2- to 3-page personal statement to the department:

The University of Kansas
Department of Communication Studies
Robert C. Rowland, Graduate Director
Bailey Hall
1440 Jayhawk Blvd., Room 102
Lawrence, KS 66045-7545

Ph.D. Degree Requirements

Concentration in Communication Studies

Requirements include:

Basic Communication Theory (9)

COMS 859 Proseminar in Communication Studies (waived for students with the M.A. in communication) 3
COMS 958 Comparative Theories of Speech Communication 3
COMS 959 Theories of Rhetoric: Contemporary 3

Additional subject matter courses (27)

A minimum of 27 hours of additional subject matter courses: 27
These courses must represent 2 emphases.
These areas are developed by the student in consultation with the advisor and the director of graduate study.
If a student holds a master’s degree in communication studies (or equivalent), appropriate course work from this degree may be used to fulfill the subject matter course requirements. However, the total number of hours from the M.A. program used to satisfy items 2c, 3, and 4 must not exceed 24 hours.

Electives (18)

Electives may be chosen from another department or any phase of the program. The 18 hours need not be all in the same department. They may be used to broaden or intensify the program, as long as they constitute a meaningful course of study. Only 6 hours may be in independent study. Students with master’s degrees from other universities satisfy this requirement with 18 hours from their master’s programs.

Research Methodology (15) 1

Courses required of all students:

COMS 851 Communication Research: Historical and Descriptive 3
or COMS 852 Communication Research: Experimentation and Quantitative Analysis

1
Rhetorical methods courses include but are not limited to:

Three caveats:

1. These lists are not comprehensive. Other courses may count as methods courses provided the student receives approval from the advisor.

2. The courses on these lists are not required. These are recommended courses for training in each methods type.

3. All methods courses should be chosen with the advisor's input.

Rhetorical methods courses include but are not limited to:

</tr>
</tbody>
</table>

Approved Methodology Courses

The following lists identify methods courses taught in and outside of the department for the 3 areas of methods trainings: rhetorical, qualitative, and quantitative. The faculty of the Communication Studies Department agrees that these courses qualify as methods courses toward the course requirements for doctoral candidates.

Three caveats:

1. These lists are not comprehensive. Other courses may count as methods courses provided the student receives approval from the advisor.

2. The courses on these lists are not required. These are recommended courses for training in each methods type.

3. All methods courses should be chosen with the advisor's input.

Research skills & responsible scholarship requirement:

- The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the Comprehensive Oral Exam. Please contact your advisor or the director of Graduate Studies for specific requirements and also see the Graduate Studies section of the online catalog.

Ph.D. dissertation (18 or more hours).

Satisfactory completion of the oral and written comprehensive examination.

Final oral examination.

Please consult with your advisor and other relevant faculty members about courses that may meet the research methods requirement. Courses that may be used to meet a Methods requirement instead of Theory, because they involve systematic and explicit reflection on research methods including appropriate research questions, objects of study, and units of analysis include:

<table>
<thead>
<tr>
<th>Course Code</th>

It is recommended that graduate students complete COMS 856 prior to taking quantitative methods courses outside of Communication Studies.
Professional Workplace Communication, Graduate Certificate in

Introduction

Why study communication studies?

Because effective and ethical communication is at the core of family, of human organizations of all types, and of democratic decision making.

Professional and Workplace Communication Certificate

Good communication skills ranked in the top 5 skills missing in mid-level management, according to Strategic Human Resources Talent Management. And, interpersonal and team skills were identified as the second most required workplace competency employers expected in new hires. The new graduate certificate in professional workplace communication meets these workforce needs for business communications.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Application process

Individuals who are not already enrolled as KU graduate students must complete an application to the Graduate School for admission into the certificate program and submit an application fee along with the following materials:

- A Statement of Interest in the Professional Workplace Communication graduate certificate program. This 1-2 page narrative should summarize your education, employment history, your long-term career goals, and how this certificate will help you achieve these goals.
- Official undergraduate transcript.
- A letter of recommendation from someone familiar with your academic work or qualified to offer judgment on your ability to undertake graduate-level work (former professor of instructor, workplace supervisor).

Current KU graduate students wishing to enroll in the Graduate Certificate in Professional Workplace Communication program will apply through the Graduate School. A student must be in good standing with their graduate degree program in order to participate in the certificate program.

A graduate GPA of 3.0 or higher is required for admission. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Graduate School. Completion of the certificate will appear on the graduate transcript.

KU graduate students should submit the following materials:

- A Statement of Interest in the Professional Workplace Communication certificate program and its relationship to your graduate course of study.
- An unofficial copy of your KU transcript.
- A letter of support from your graduate degree program (your advisor or graduate director).

The University of Kansas
Department of Communication Studies
Robert C. Rowland, Graduate Director
Bailey Hall
1440 Jayhawk Blvd., Room 102
Lawrence, KS 66045-7545

Certificate Requirements

The Professional Workplace Communication graduate certificate requires completion of 12 credit hours, including 2 required courses and 2 elective options.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>

Computational Biology Graduate Program

Computational Biology is an interdisciplinary science at the interface of biology, chemistry, medicine, mathematics, and computer science. Its goal is development and application of computational approaches to studies of life processes and improvement of human health. The Computational Biology Graduate Program recruits students with bachelor’s or master’s degrees who made a choice to pursue a career in computational biology. The Ph.D. degree in Computational Biology requires successful completion of formal courses and demonstration of accomplishments in basic research, qualifying examinations, scientific writing, and formal presentations of research data.

Courses

BINF 701. Bioinformatics I. 5 Hours.
First semester of a two-semester course in bioinformatics and computational biology. Topics include basic concepts of bioinformatics and molecular modeling, bioinformatics databases, computational tools and modeling methods, protein sequence and structure alignment, conformational analysis, secondary structure determination, tertiary structure modeling (homology, threading, ab initio, molecular dynamics and Monte Carlo simulations, protein folding and dynamics), as well as students presentations of material from current papers in the field of study and their own on-going research for discussion and critique. Prerequisite: College introductory biochemistry (no requirement for specific courses), math, and computer courses or concurrent enrollment in such courses and consent of instructor. LEC.

BINF 702. Bioinformatics II. 5 Hours.
Second semester of a two-semester course in bioinformatics and computational biology. Topics include protein quaternary structure modeling (protein-protein/DNA/small ligand docking, binding, computer-aided drug design), protein structure-function relationships, biological membranes (structure and function of integral membrane proteins, protein-membrane and protein-protein interactions in membranes), phylogenetic trees, modeling of genome-wide protein interaction networks based on structure, sequence, experiment and data-mining, as well as students presentations of material from current papers in the field of study and their own on-going research for discussion and critique. Prerequisite: BINF 701. LEC.

BINF 703. Advanced Computational Biology I. 5 Hours.
This is the first semester of an intensive two-semester course in Computational Biology, aimed at second-year graduate students. Topics include graph theory, systems biology, mathematical and computational modeling of complex systems, synthetic biology and protein design. Students will gain a mastery of cutting-edge topics in Computational Biology through lectures, careful reading of current literature, and advanced individual research projects. Prerequisite: BINF 701 and BINF 702, or consent of instructor. LEC.

BINF 704. Advanced Computational Biology II. 5 Hours.
This is the second semester of an intensive two-semester course in Computational Biology, aimed at second-year graduate students. Topics include graph theory, systems biology, mathematical and computational modeling of complex systems, synthetic biology and protein design. Students will gain a mastery of cutting-edge topics in Computational Biology through lectures, careful reading of current literature, and advanced individual research projects. Prerequisite: BINF 703. LEC.

BINF 709. Topics in: ____. 1-3 Hours.
Advanced courses on special topics in Bioinformatics, given as need arises, including lectures, discussions, readings, or laboratory. Students may select sections according to their special interests. LEC.

BINF 999. Doctoral Dissertation. 1-12 Hours.
Original research that is to be incorporated into a PhD dissertation. THE.

Doctor of Philosophy in Computational Biology

Computational Biology Graduate Program

Computational biology is an interdisciplinary science at the interface of biology, chemistry, medicine, mathematics, and computer science. Its goal is development and application of computational approaches to studies of life processes and improvement of human health. The Computational Biology Graduate Program recruits students with bachelor’s or master’s degrees who made a choice to pursue a career in computational biology. The Ph.D. degree in Computational Biology requires successful completion of formal courses and demonstration of accomplishments in basic research, qualifying examinations, scientific writing, and formal presentations of research data.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Ph.D. Admission

Admission Requirements

Applicants must have a bachelor’s or master’s degree in natural sciences, mathematics, engineering, or another relevant field. Applications are accepted online (http://graduate.ku.edu/application-process).

Ph.D. Degree Requirements

Students must earn credit in each of the following courses or their equivalents:

By the end of the second year, the student should have completed the formal course work to fulfill requirements for the degree. The student completes and submits a research proposal for the comprehensive oral examination. The proposal must develop a research topic related to the general areas of computational biology. The topic of the research proposal is decided upon by the student in consultation with the thesis advisor. Upon completion of the comprehensive oral examination, the student aggressively carries out research in the laboratory of the thesis advisor. In addition, the student continues attending the weekly Computational Biology seminar series and participating in the Computational Biology student seminar series. A Ph.D. degree is awarded once the student has written a final dissertation and carried out a successful defense of it before a committee.

The Computational Biology Ph.D. includes training in research skills and responsible scholarship. The research skills training requirement is met through BINF 701/BINF 702 coursework, as well as through individual mentorship and collaborations in the Center for Computational Biology and student research presentations. The responsible scholarship training requirement is met through BIOL 804 coursework, as well as through individual mentorship during the conduct of research.

Department of East Asian Languages and Cultures

Why study East Asian languages and cultures?

The areas of East Asia covered - China, Japan, and Korea - represent three of the oldest continuous civilizations in the world. Japan and mainland China are the world's largest economies after the United States. South Korea and Taiwan are key U.S. trading partners. The economic and political relationship between the U.S. and East Asia will be among the most important for the U.S. in the 21st century. In-depth knowledge of East Asia is critical in the new global culture and marketplace.

Eastern Civilizations Courses

The Eastern Civilizations courses promote a broad understanding of the civilizations of China, Japan, and to a limited extent, Korea.

ECIV 104, ECIV 304, and ECIV 305 (Honors). Eastern Civilizations consist of readings from the major works of East Asian thought, religion, and literature. Those who are considering a major or minor in EALC are encouraged to enroll in ECIV 304 or ECIV 305 (Honors), rather than ECIV 104.

Undergraduate Programs

The department offers a full program of instruction in the languages, literatures, and cultures of China, Japan, and Korea.

With an EALC B.A., students can pursue a range of careers in business, government, education, nonprofit organizations, etc., or continue on to graduate study in East Asian languages and literatures. Some students choose an EALC B.A. to connect with their heritages or to fulfill personal interests.

Placement

If students have already learned Chinese, Japanese, or Korean to some degree, whether at home, in a classroom, or elsewhere, they must take a placement test before enrolling in a language class. For more information, contact the department administrator at 785-864-3100. There is no fee for a placement test. To be eligible for enrollment in intermediate Chinese, Japanese, or Korean, a student must have earned college credit for the first year or have earned 2 years of high school credit in that language or have permission from the department based on the results of the placement test.

Retroactive Credit

Students with no prior college or university Chinese, Japanese, or Korean course credit are eligible for retroactive credit according to this formula:

- Students with 2 or 3 years of high school study who enroll in second-semester Chinese, Japanese, or Korean (CHIN 108, JPN 108, KOR 108) and earn grades of C or higher may receive 2 hours of retroactive credit.
- Students with 3 or 4 years of high school study who enroll in third-semester Chinese, Japanese, or Korean (CHIN 204, JPN 204, KOR 204) and earn grades of C or higher may receive 5 hours of retroactive credit.
- Students with 4 years of high school study who enroll in fourth-semester Chinese, Japanese, or Korean (CHIN 208, JPN 208, KOR 208) and earn grades of C or higher may receive 7 hours of retroactive credit.

Courses for Non-majors

Courses available to non-language specialists are listed under East Asian Languages and Cultures Courses.

EALC also offers elementary and intermediate language courses in Tibetan (TIB 101, TIB 102, TIB 201, TIB 202) and Uyghur (UYGR 101, UYGR 102, UYGR 201, UYGR 202). Tibetan and Uyghur language studies can be used to fulfill the CLAS second language requirement necessary to complete the B.A. degree.

Graduate Program

M.A. in East Asian Languages & Cultures

The Department of East Asian Languages and Cultures (EALC) is the only department in Kansas offering a regular program of instruction in the languages, literatures, and cultures of East Asia.

The EALC Thesis M.A. program trains students who will devote themselves to becoming effective links between the Far East and the United States.

Students concentrate in Chinese, Japanese, or East Asian Cultures, usually entering the program with at least two years of college-level language. The program typically takes two years to complete, including the defense of a required Master’s thesis.

Center for East Asian Studies

The Center for East Asian Studies (http://www.ceas.ku.edu) is a National Resource Center funded by the U.S. Department of Education. CEAS promotes East Asian language and area studies; coordinates interdisciplinary activities; works with the East Asian Library; advises students in East Asian studies; awards Foreign Language and Area Studies Fellowships in Chinese, Japanese, Korean, Uyghur, and Tibetan; and arranges special events related to East Asia on campus. CEAS also offers outreach to schools, businesses, and the community and serves as a regional resource for information about East Asia.
Courses

EALC 105. Living Religions of the East. 3 Hours HR/NW AE42/GE3H / H/W.
A basic introduction to religion in India, China, and Japan with emphasis upon religions that affect the modern period. Not open to students who have taken REL 108/EALC 108. (Same as REL 106.) LEC.

EALC 108. Living Religions of the East, Honors. 3 Hours HR/NW AE42/GE3H / H.
A basic introduction to religion in India, China, and Japan with emphasis upon religions that affect the modern period. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 106/EALC 105. (Same as REL 108.) LEC.

EALC 121. Introduction to Contemporary China. 3 Hours NW AE42 / H.
An overview of contemporary Chinese culture and society since the economic reforms and opening up launched in 1978, through the study of changes in politics, the economy, society, culture and everyday life in China. The course is taught in English. No prior knowledge of Chinese language is required. LEC.

EALC 130. Myth, Legend, and Folk Beliefs in East Asia. 3 Hours NW AE42 / H/W.
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the traditional world view of the peoples of East Asia. (Same as ANTH 293, REL 130.) LEC.

EALC 131. Myth, Legend, and Folk Beliefs in East Asia, Honors. 3 Hours NW / H/W.
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the world view of the ordinary peoples of East Asia in contrast to their more sophisticated systems of philosophy that are better known to the Western world. Open only to students in the University Honors Program or by permission of instructor. LEC.

EALC 142. Ethics in Chinese Philosophy. 3 Hours AE51 / H.
How can ethical codes help us lead a better life? What principles of government will ensure an ordered and harmonious society? What responsibilities do we have to others and to the natural world? Thinkers in early China asked these questions and came to a variety of different conclusions, ranging from a goal of spontaneous harmony, to a rigid law-and-order ethic. Their ideas are still relevant today and in this course we will both survey these different ethical perspectives and also apply them to contemporary social, political, and environmental issues. LEC.

EALC 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in East Asian Languages and Cultures. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

EALC 198. Studies in: _____. 1-5 Hours H.
Special purpose subject in East Asia and contiguous regions. LEC.

EALC 231. Introduction to: _____. 1-3 Hours NW / H/W.
Topics are various aspects of Chinese and Japanese cultures. LEC.

EALC 298. Studies in: _____. 1-5 Hours H.
Special purpose subject in East Asia and contiguous regions. LEC.

EALC 301. Cultural Traditions of China, Inner Asia, and Tibet. 3 Hours NW / H.
This course acquaints the student with the broad outlines of the traditional cultures and literatures of China and the contiguous regions of Inner Asia and Tibet. Course materials include translations and discussions of oral tales, epics, poetry, novels, and biography, which explore the interaction between these regions and cultures as well as their continuities and disparities. The course is most appropriate for students with no background in Asian culture. LEC.

EALC 302. Cultural Traditions of Japan and Korea. 3 Hours NW / H/W.
A wide-ranging examination of the similarities and difference between Japanese and Korean culture through folklore, literature, film, and other texts. Format: Lecture and discussion. Designed for students with no background in Asian culture. LEC.

EALC 310. The Chinese Novel. 3 Hours H/W.
Reading and analysis of the form and types of Chinese novel, its beginnings and development to the present day. LEC.

EALC 312. Japan's Literary Legacy. 3 Hours H/W.
A survey of the major works of Japan's long literary heritage. Readings from such classics as the Tale of Genji, the world's first novel, No drama, and poetry will acquaint the student with one of the world's great literary traditions. (Not open to students with credit in EALC 712.) LEC.

EALC 314. Traditional Chinese Literature in Translation. 3 Hours H/W.
A general survey of representative literary works of major genres in traditional China. Lectures, assigned readings, and discussions in English. A knowledge of Chinese is not required. (Not open to students with credit in EALC 714.) LEC.

EALC 315. Survey of Japanese Film. 3 Hours NW AE42 / H.
This course surveys the major developments in and critical approaches to twentieth-century Japanese film. Focusing mostly on narrative films, the course introduces students to basic methodological issues in Japanese film history, especially questions of narrative, genre, stardom, and authorship. We examine Japanese cinema as an institution located within specific contexts focusing on the ways in which this institution shapes gender, race, class, ethnic and national identities. This course examines how patterns of distribution, exhibition, and reception have influenced film aesthetics and film style over the last century. Through secondary readings, lectures, and discussions students critically examine how Japanese cinema as an institution both responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as FMS 315.) LEC.

EALC 316. Modern Japanese Film and Fiction. 3 Hours AE42 / H/W.
A survey of major works of fiction and film in modern Japan. Topics include the social and spiritual challenges of modernization, urbanization, and the issues of race and national identity. Works by Akutagawa, Kawabata, Kurosawa, Ogai, Ozu, Soseki and Tanizaki and others are covered. Lectures, discussion, readings, and films in English. Knowledge of Japanese language is not required. This course is offered at the 300 and the 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 716. LEC.

EALC 317. Contemporary Japanese Literature in Translation: 1945-Present. 3 Hours AE42 / H/W.
A survey of major literary works of Japan's post-war and contemporary eras. Topics include life during and after the war, the experience of the atomic bomb, and the postmodern landscape. Works by Dazai, Mishima, Oe, Abe, Murakami, and others will be covered. The course is offered at
the 300 and 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 717. LEC.

EALC 318. Modern Chinese Fiction and Film. 2-3 Hours AE42 / H/W.
A general survey of important Chinese fiction and film of the 20th century. Lectures, readings, and discussions in English. Knowledge of Chinese is not required. Not open to students with credit in EALC 518. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. LEC.

EALC 319. Contemporary Chinese Fiction and Film. 3 Hours AE42 / H.
A general survey of important Chinese fiction and film from the late 20th century to the present. Lectures, readings, and discussions in English. Knowledge of Chinese is not required. (Not open to students with credit in EALC 519.) LEC.

EALC 320. Modern East Asia: Multiple Perspectives. 3 Hours NW / H.
A survey of the major political changes in China, Japan, Korea and Tibet in the 20th century. Students will learn about the changes that swept through East Asia as it rapidly modernized via documentary films and lectures and will study the impact of these changes on individuals by reading autobiographies. LEC.

EALC 328. The Body in Japan. 3 Hours H.
The course examines historical and cultural concepts of the body in Japan and then focuses upon the pivotal events of the last half-century as experienced through the body. Students are introduced to a wide range of extreme bodily experiences: the regimented body of wartime, the body irradiated by the atomic bomb, the body of malnutrition and national humiliation, possessed bodies, licentious bodies, creating life through the body, the aged body, self-immolation of the body, nurturing the body, beautifying the body, and others. The primary sources of investigation and discussion are novels written after the war, films, anthropological writings, and popular culture. All readings are in English. LEC.

EALC 330. Chinese Literature and Culture: Premodern Times. 3 Hours NW AE42 / H/W.
An examination of Chinese literature and culture from earliest times to the modern period. Not open to students who have taken EALC 330. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. LEC.

EALC 331. Studies In: _______. 1-3 Hours H/W.
Topics in the Chinese and Japanese cultures. LEC.

EALC 332. Asian Literature in Translation: _______. 3 Hours NW / H/W.
Introduction to Asian culture and society through close reading and analysis of important works of Asian literature. Themes and issues to be focused upon will vary (e.g., traditional or modern literature of China, Japan, or Korea, and special topics of interest). Lecture and discussion format. Knowledge of Asian languages is not required. LEC.

EALC 333. Asian Literature in Translation, Honors: _______. 3 Hours NW / H/W.
Introduction to Asian culture and society through close reading and analysis of important works of Asian literature. Themes and issues to be focused upon will vary (e.g., traditional or modern literature of China, Japan, or Korea, and special topics of interest). Lecture and discussion format. Knowledge of Asian languages is not required. Open only to students in the University Honors Program or by permission of instructor. LEC.

EALC 340. Structure of Chinese. 3 Hours H.
A detailed study of the phonological and grammatical structure of Chinese and the interactions between language and culture. Depending on student interest, a unit on the pedagogy of teaching Chinese as a foreign language may also be included. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. Students taking the course at the 500 level will have more work required of them. LEC.

EALC 345. Chinese Cinema. 3 Hours H.
This course surveys representative Chinese films since the 1980s and their global reception. The most recent formalistic, industrial, and institutional developments of Chinese cinema are examined. Students view films, do secondary readings, and learn theories and methodologies of film studies. Lectures and class discussions also cover the socio-historical context of contemporary Chinese filmmaking. This course is taught at the 300 and 500 levels with additional assignments required at the 500-level. Prerequisite: Junior status, or permission of the instructor. Not open to students with credit in EALC 545. LEC.

EALC 350. Contemporary Japan. 3 Hours NW / U.
An exploration of the Japanese way of life, self-concepts, and world view through lecture, discussion, reading, and field trips to businesses, community organizations, and cultural sites. Offered only during the Summer Institute in Hiratsuka, Japan. LEC.

EALC 361. Colonial Korea. 3 Hours H.
This course examines the history, society, and culture of Korea from the end of Choson dynasty through the Colonial period (1910-1945) in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. Not open to students with credit in EALC 561. LEC.

EALC 362. Post-Colonial Korea. 3 Hours H.
This course examines the history, society, and culture of South Korea from the time of its liberation from Japan in 1945 to the present in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. Prerequisite: EALC 361 or EALC 561, or permission of the instructor. Not open to student with credit in EALC 562. LEC.

EALC 363. Gendered Modernity in East Asia. 3 Hours H.
This course explores rapidly changing gender relationships and the sense of being "modern" in East Asia by examining marriage and family systems, work, education, consumer culture, and geopolitics. The class seeks to understand how uneven state control over men and women shapes desires, practices, and norms and how men and women act upon such forces. Avoiding biological or social determinism, this course treats gender as an analytical category and examines how modern nation-states and global geopolitics are constituted and operated. (Same as ANTH 363 and WGSS 363.) LEC.

EALC 364. Peoples of Japan and Korea. 3 Hours NW / S/W.
An analysis of the cultural diversity and unity of the peoples of Japan and Korea. Emphasis on historical and ethnological relationships, social structure, and ethics. (Same as ANTH 364.) LEC.

EALC 365. Japanese People through Films. 3 Hours NW / S/W.
Japanese people's culture and society through an extensive examination of both documentary and feature films. Readings from social science fields and literature will be used--the former to supply a theoretical framework for the study of Japanese people and the latter to further the inquiry into the individual sentiment motivating actions. (Same as ANTH 365.) LEC.

EALC 366. The Life Cycle in Japanese Culture and Literature. 3 Hours NW / H/W.
A study of the Japanese people from birth to death: what it means to be born in a Japanese family, to grow up Japanese, and to die Japanese. Anthropological works and selections from Japanese literature and film...
will be used to examine ways in which Japanese people live through the critical periods in their life cycle. (Same as ANTH 368.) LEC.

EALC 368. The Peoples of China. 3 Hours NW / S/W.
An analysis of the cultural origin, diversity, and unity of the peoples of China. Emphasis on historical development, social structure, cultural continuity and change, and ethics. (Same as ANTH 368.) LEC.

EALC 370. Chinese Folk Belief. 3 Hours H/W.
A survey of the beliefs of the ordinary Chinese people throughout the centuries with regard to myths, the other world, festivals, and the gods. Prerequisite: A course dealing with China. LEC.

EALC 380. Popular Cultures of East Asia. 3 Hours NW / H.
This course examines the contemporary popular cultures of Korea, Japan, China, and Taiwan, with particular emphasis on relations between East Asia and North America. Students study the issue of globalization and how the transnational flow of commodities and culture affects local societies and individual identities. They learn to identify, describe, and analyze the cross-cultural content of popular cultural artifacts and modes of expression relating to East Asia. To this end, they explore in detail such subjects as: fashion, foodways, cinema, manga, soap operas, and punk rock. Not open to students who have taken EALC 580. LEC.

EALC 410. The Culture of Play in Japan. 3 Hours NW AE42 / N/W.
This course examines the phenomenon and manifestations of play in Japanese culture. Topics include but are not confined to: the philosophy of play, the semiotics of play, the places of play, the role of laughter, play in Japanese religion, simulation and performance, and play and competition. LEC.

EALC 411. The Culture of Play in Japan, Honors. 3 Hours NW AE42 / N/W.
This course examines the phenomenon and manifestations of play in Japanese culture. Topics include but are not confined to: the philosophy of play, the semiotics of play, the places of play, the role of laughter, play in Japanese religion, simulation and performance, and play and competition. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

EALC 412. Visual and Literary Culture in Modern Japan. 3 Hours H.
This course examines the interconnections between the evolution of modern Japanese literature and vision technologies such as painting, panoramas, magic lanterns, stereoscopes, photography, motion pictures, television, and computers. The course provides an overview of modern Japanese literature from the perspectives of the visual culture in which that literature was conceived. The course considers such authors as Higuchi, Soseki, Ogai, Shimazaki, Akutagawa, Tanizaki, Yokomitsu, Kawabata, and Abe. Not open to students who have completed EALC 612. LEC.

EALC 413. Asian Media Studies. 3 Hours H.
This course examines new and emerging media in East Asia and how the media industries of East Asia function. Using recent scholarship and industry data on contemporary cyberculture, music studies, and television industries of East Asia we examine how such factors as globalization, post-colonialism, censorship, emerging technology, and national media legislation affect the local and transnational media industries in Japan, South Korea, and Mainland China/Taiwan/Hong Kong. (Same as FMS 413.) LEC.

EALC 415. Ancient China. 3 Hours NW / H.
A survey of ancient Chinese culture to the Qin period. Major archaeological discoveries and the literary tradition are taken as the primary evidence through which a number of topics are introduced (for example: environment, food, writing, art, thought, ritual). A knowledge of Chinese is not required. The course is offered at the 400 and 600 levels, with additional assignments at the 600 level. Not open to students who have completed EALC 615. LEC.

EALC 418. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Hours NW / H.
This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women's literature, and erotic literature. Recommended: A course in East Asian studies. Not open to students who have taken EALC 618. This course is taught at the 400 and 600 levels with additional assignments at the 600-level. LEC.

EALC 420. Daily Life in China From the Opium War to the Present. 3 Hours NW / H/W.
Daily life and issues of social and cultural interaction between China and Western nations from the Opium War to the present. Fiction, travel diary, historical sources, film, and personal accounts will make up course materials. LEC.

EALC 431. Studies in: _____. 1-3 Hours H/W.
Topics in the Chinese and Japanese traditions. LEC.

EALC 488. Senior Seminar in East Asian Languages and Cultures. 3 Hours AE61 / H/W.
Open to seniors majoring in East Asian Languages and Cultures or by consent of instructor. LEC.

EALC 498. Directed Readings in East Asian Languages and Cultures. 1-4 Hours AE61 / H/W.
Readings in English on an East Asian subject, selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: ECIV 104 or ECIV 304 and consent of instructor. IND.

EALC 499. Honors Thesis. 3 Hours AE61 / H/W.
Required of all students working for a degree with honors. May be repeated for a total of nine semester hours. IND.

EALC 508. Religion in China. 3 Hours NW AE42/GE3H / H/W.
Survey of religious thought and practice in China from the Shang to the People's Republic. (Same as REL 508.) LEC.

EALC 509. Religion in Japan. 3 Hours NW AE42/GE3H / H/W.
Survey of religious thought and practice in Japan from the Jomon period to the present. (Same as REL 509.) LEC.

EALC 510. Education in Japan. 3 Hours NW / N/W.
An investigation of the relationship between education and Japanese national and cultural identity as expressed in conceptions of childhood: philosophical and political positions underlying curricular and administrative policies, teachers' training, and pedagogical styles; the interface between education, "work," and the economy in general; and the theme of "internationalization," (kokusaika). The course is taught in English. LEC.

EALC 518. Modern Chinese Fiction & Film. 3 Hours AE42 / H.
A general survey of important Chinese fiction and film of the 20th century. Lectures, readings, and discussions in English. Knowledge of Chinese is not required. Not open to students with credit in EALC 318. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course such as ECIV 104 or ECIV 304 or EALC 105; or consent of instructor. LEC.
An introductory East Asian studies course such as ECIV 104 or ECIV 304 or EALC 105; or consent of instructor. (Not open to students with credit in EALC 319.) LEC.

EALC 520. Entrepreneurship in East Asia. 3 Hours NW / H.
An intensive examination of the history and current status of entrepreneurship in China, Japan, and other nations in East Asia. This course investigates the role of entrepreneurs in Asian economic development from the nineteenth century to the present, as well as the relation between entrepreneurship and Asian cultural traditions. The opportunities and challenges of entrepreneurship in East Asia today are also considered. (Same as HIST 640.) LEC.

EALC 527. Asian Theatre and Performance. 3 Hours NW / H/W.
A survey of traditional and modern theatre and performance in Asia, with greatest attention given to India, China, and Japan. A study of plays, dramatic genres, history, conventions of play production, and acting styles and other performance forms. (Same as THR 527.) LEC.

EALC 530. Chinese Literature and Culture: Premodern Times. 3 Hours NW AE42 / H/W.
An examination of Chinese literature and culture from earliest times to the modern period. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course, such as ECIV 104 or ECIV 304 or EALC 105; or consent of the instructor. Not open to students with credit in EALC 330. LEC.

EALC 541. Asian Film. 3 Hours NW AE42 / H.
Seminar on various national film cultures of East and Southeast Asia. Representative films are studied from formal, stylistic, and socio-historic perspectives. Addresses the 12 impact of key cultural, economic, and political issues on each film industry. Class discussion, reports, and individual research papers. The course is offered at the 500 and 800 levels, with additional assignments at the 800 level. (Same as FMS 541.) Prerequisite: Junior status. LEC.

EALC 543. Contemporary Japanese Film. 3 Hours NW AE42 / H.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We survey recent Industrial and stylistic trends as well as key critical debates. Class discussion, reports, and individual research papers. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as FMS 543.) Prerequisite: Junior status. LEC.

EALC 545. Chinese Cinema. 3 Hours H.
This course surveys representative Chinese films since the 1980s and their global reception. The most recent formalist, industrial, and institutional developments of Chinese cinema are examined. Students view films, do secondary readings, and learn theories and methodologies of film studies. Lectures and class discussions also cover the socio-historical context of contemporary Chinese filmmaking. This course is taught at the 300 and 500-levels with additional assignments required at the 500-level. Prerequisite: Junior status, or permission of the instructor. Not open to students with credit in EALC 345. LEC.

EALC 555. Buddhists and Buddhism in China. 3 Hours NW AE42 / H.
A reading and media-rich survey of institutional, ritual, literary, educational, and exegetical practices that have shaped the lives of Buddhists in China, past and present. Alterities within the Buddhist tradition, and interactions with other religious options, are considered. (Same as REL 555.) LEC.

EALC 561. Colonial Korea. 3 Hours H.
This course examines the history, society, and culture of Korea from the end of the Choson dynasty through the colonial period (1920-1945) in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature and film. Prerequisite: An introductory East Asian studies course, such as ECIV 104 or ECIV 304, or EALC 105; or consent of instructor. There are additional readings and more extensive writing assignments than in EALC 361. Not open to students with credit in EALC 361. LEC.

EALC 562. Post-Colonial Korea. 3 Hours H.
This course examines the history, society, and culture of South Korea from the time of its liberation from Japan in 1945 to the present in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. Prerequisite: EALC 361 or EALC 561, or permission of the instructor. There are additional readings and more extensive writing assignments than in EALC 362. Not open to students with credit in EALC 362. LEC.

EALC 563. Cultural History of Korea. 3 Hours H.
This course examines the cultural history of Korea in periods prior to the 19th Century. Special attention is given to varying constructions of cultural value, heritage, and identity, together with the historically specific factors that engendered them. (Same as HIST 590.) LEC.

EALC 564. Modern Korean Culture and Society. 3 Hours H.
This course examines the history, society, values, and political economy of Korea in its East Asian and global context. The course uses multi-disciplinary approaches, including those of history, anthropology, literature and film. Prerequisite: An introductory course in East Asian studies, or permission of instructor. LEC.

EALC 565. Popular Images in Japanese Culture, Literatures, and Films. 3 Hours NW / S/W.
The course examines recurring themes and images in Japanese culture through films, literary works, and anthropological and other social science literature. These themes and images are studied in the contexts of both modern and traditional cultures. Although the popular deviates from the orthodox, nevertheless, the energy and pervasiveness of these offspring will sustain “proper” cultural values. As a result of exploration of both highways and backroads of cultural expression, a holistic picture of Japanese ethos will emerge. (Same as ANTH 565.) LEC.

EALC 567. Japanese Ghosts and Demons. 3 Hours NW / S/W.
An investigation of deeply rooted Japanese beliefs about intimate relationships among humans, animals, and nature - beliefs which help to explain the mysterious and to lend order to the world. Anthropological works, selections from Japanese literature, historical documents, artworks, and films will be used to examine supernatural themes. (Same as ANTH 567.) LEC.

EALC 570. The Structure of Japanese. 3 Hours H.
A detailed study of the phonological and grammatical structure of Japanese and the use of the language in social/cultural contexts. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. (Same as LING 570.) LEC.

EALC 572. The Structure of Chinese. 3 Hours AE42 / H.
A detailed study of the phonological and grammatical structure of Chinese and the interactions between language and culture. Depending on student interests, a unit on the pedagogy of teaching Chinese as a foreign language may also be included. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. (Same as LING 572.) LEC.
EALC 575. Love, Sexuality and Gender in Japanese Literature. 3 Hours H.
An examination of Japanese attitudes toward love, sexuality, and gender differences as revealed in literature from the tenth century to the present. Discussion format. LEC.

EALC 578. Gender and Society in Modern China. 3 Hours H.
This course examines gender policies and social institutions in modern China by examining important literary works and films from the Republican era (1911-1949), the Maoist era (1949-1976), and the post-Mao era (1976-present). Secondary readings are also supplied. All the readings are in English. No knowledge of Chinese is required. Prerequisite: An introductory East Asian studies course such as ECIV 104. ECIV 304, or EALC 105; or consent of the instructor. LEC.

EALC 580. Popular Cultures of East Asia. 3 Hours NW / H.
This course examines the contemporary popular cultures of Korea, Japan, China, and Taiwan, with particular emphasis on relations between East Asia and North America. Students study the issue of globalization and how the transnational flow of commodities and culture affects local societies and individual identities. They learn to identify, describe, and analyze the cross-cultural content of popular cultural artifacts and modes of expression relating to East Asia. To this end, they explore in detail such subjects as: fashion, foodways, cinema, manga, soap operas, and punk rock. More extensive writing requirements than 380. Not open to students who have taken EALC 380. LEC.

EALC 583. Imperial China. 3 Hours NW / H/W.
An intensive survey of China’s traditional civilization and its history, with emphasis on the last centuries of imperial rule under the Sung, Yuan, Ming, and Ch’ing dynasties (to 1850). (Same as HIST 583.) LEC.

EALC 584. Modern China. 3 Hours NW AE42 / H/W.
An intensive survey of China’s history from the early 19th century to the present. Key topics include the decline of the traditional system, the rise of communism, the Maoist era, and the tensions of change and control in the 1980s and 1990s. (Same as HIST 584.) LEC.

EALC 585. Reform in Contemporary China. 3 Hours NW AE42 / H/W.
Examines the epochal changes that have occurred in China from Deng Xiaoping’s rise to power in 1978 to the present. Includes a focus on the historical background of the revolutionary period before examining the political and economic changes that spawned the 1989 “prodemocracy” movement at Tiananmen. The course includes an analysis of the events of the 1990s focusing on U.S.-China political and economic relations and the destabilizing effects of inflation, infrastructural reform, political and economic decentralization, and leadership succession. A previous course on China is helpful, but not mandatory. (Same as POLS 668.) LEC.

EALC 587. Early Modern Japan. 3 Hours NW AE42 / H/W.
Early modern Japan (16th to 19th century) examines the history, culture, and patterns of life during an era of rigid social control but artistic brilliance. After an historical overview of the period, students will explore topics including the social structure, travel, religion, thought, and the formation of traditional cultural forms such as Kabuki theater. (Same as HIST 587.) LEC.

EALC 588. Japan, 1853-1945. 3 Hours NW / H/W.
This course provides an intensive survey of Japanese history from the arrival of Commodore Perry through the Pacific War. Social, economic, and political themes will be emphasized. Among the topics covered will be the Meiji Restoration, industrialization, Japanese imperialism, Taisho democracy, and wartime mobilization. (Same as HIST 588.) LEC.

EALC 589. Japan Since 1945. 3 Hours NW / H/W.
This course provides an overview of Japanese history from the end of World War II to the present day. Among the topics covered will be the Allied Occupation, postwar politics and social change, the economic “miracle,” popular culture, women and the family, crime and punishment, the educational system, and Japan’s place in the world. (Same as HIST 589.) LEC.

EALC 590. Topics in East Asian Languages and Cultures: ____. 1-9 Hours H/W.
Specific topical courses will be offered every year covering a number of disciplines. Credit, description, and prerequisites will vary. Note: May be repeated for credit up to the stated limit. LEC.

EALC 591. Topics in East Asian Languages and Cultures: ____. 1-9 Hours S/W.
Specific topical courses will be offered every year covering a number of disciplines. Credit, descriptions, and prerequisites will vary. Note: May be repeated for credit up to the stated limit. LEC.

EALC 593. Modern Korea. 3 Hours NW / H/W.
This course will examine selected topics in Modern Korean history in the 19th and 20th centuries, with special emphasis on Korea’s connections to China and Japan. (Same as HIST 593.) Prerequisite: A college-level course in East Asian history or culture, or consent of instructor. LEC.

EALC 596. Defining Japan: Marginalized Groups and the Construction of National Identity. 3 Hours NW / H/W.
This course investigates the construction of national identity in modern Japan by examining the historical experiences of groups marginalized by mainstream society. We will explore the pressures of conformity, the pervasiveness of social ostracism and the surprising diversity in Japanese society. Among the groups discussed will be indigenous peoples (the Ainu, Okinawans), the Korean minority, the outcast class (burakumin), the sick and disabled, the Yakuza, and political activists. (Same as HIST 596.) LEC.

EALC 597. Japanese Theater History. 3 Hours NW / H/W.
This course examines the historical development and characteristics of Japanese theater, with special attention to traditional theater and the genres of noh, kyogen, and kabuki in particular, tracing their origins in the pre-modern era and their continued performance today. To gain an understanding of the historical and artistic setting of these arts, lectures and readings will consider broader issues such as performance and ritual in religion and daily life, gender and representation, and folk theater. A portion of this class will include practical studies of theatrical forms including noh dance and kabuki music (shamisen). (Same as HIST 597.) LEC.

EALC 598. History and Structure of the Japanese Language. 3 Hours H/W.
The historical development of Japanese. Study of Japanese phonology, morphology and syntax, using the techniques of descriptive linguistics and generative grammar. Prerequisite: An introductory course in linguistics or one year of Japanese. LEC.

EALC 600. Biography of a City: ____. 3 Hours H/W.
This interdisciplinary, team-taught course surveys the artistic, intellectual, and historical development of some of the great cities of the world, such as Kyoto or Tokyo. LEC.

EALC 612. Visual and Literary Culture in Modern Japan. 3 Hours H.
This course examines the interdisciplinary, team-taught course surveys the artistic, intellectual, and historical development of some of the great cities of the world, such as Kyoto or Tokyo. LEC.
Kawabata, and Abe. There will be additional assignments for students in 612. Not open to students who have completed EALC 412. LEC.

EALC 615. Ancient China. 3 Hours NW / H/W.
A survey of ancient Chinese culture to the Qin period. Major archaeological discoveries and the literary tradition will be taken as the primary evidence through which a number of topics are introduced (for example: environment, food, writing, art, thought, ritual). A knowledge of Chinese is not required. The course is offered at the 400 and 600 levels, with additional assignments at the 600 level. Not open to students who have completed EALC 415. LEC.

EALC 618. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Hours NW / H.
This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women’s literature, and erotic literature. Prerequisite: A course in East Asian studies. Not open to students who have taken EALC 418. This course is taught at the 400 and 600 levels with additional assignments at the 600-level. LEC.

EALC 620. Daily Life in China from the Opium War to the Present. 3 Hours NW / H/W.
Daily life and issues of social and cultural interaction between China and Western nations from the Opium War to the present. Fiction, travel diary, historical sources, film, and personal accounts will make up course materials. LEC.

EALC 636. Women in Japanese Literature. 3 Hours H/W.
An examination of women as subjects, readers, and writers of Japanese literature. Topics may include images and stereotypes of women in Japanese literature; feminist readings of this literature; female culture; and the psychodynamics of female creativity. LEC.

EALC 642. Chinese Thought. 3 Hours NW AE42/GE3H / H/W.
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as HWC 524 and PHIL 506.) Prerequisite: Eastern civilizations course or a course in Asian history or a distribution course in philosophy. LEC.

EALC 646. Chinese Law. 3 Hours H/W.
The history and development of civil and criminal law in China from its beginnings until the present. The course will be taught both by lectures and by discussion of cases. A section of the course will concern modern Chinese law. Prerequisite: A course on China, or general background in law or business. LEC.

EALC 649. Doing Business With China: Law and Policy. 3 Hours NW / H/W.
A study of the issues involved in doing business with China. The current Chinese political and economic context will be examined, followed by a study of the Chinese legal system and Chinese economic law and regulation. Relevant U.S. law will also be considered. Prerequisite: A course on China, or general background in law or business. LEC.

EALC 656. Government and Politics of East Asia. 3 Hours NW AE42 / S/W.
A comparative examination of the contemporary political institutions, processes and ideas of China, Japan, and Korea. (Same as POLS 656.) Prerequisite: Junior level or consent of the instructor. LEC.

EALC 666. Political Economy of East Asia. 3 Hours S.
This course provides basic understanding of fiscal, monetarist, and trade policies; how governments in East Asia use them to pursue growth; the extent to which these governments follow or controvert economics to pursue growth; and how the performances of economies in East Asia relate to the US and global economies. (Same as POLS 666.) Prerequisite: POLS 150. LEC.

EALC 676. International Relations of Asia. 3 Hours S/W.
An intensive study of the problems of ideological conflict, diplomatic relations, strategic arrangements, economic cooperation, and cultural exchange in East and Southeast Asia with special emphasis upon the roles of major world powers. (Same as POLS 676.) Prerequisite: Sophomore level or consent of the instructor. LEC.

EALC 700. Introduction to East Asian Studies. 1 Hour.
Required of all M.A. students in the Department regardless of concentration. Introduction to resources in East Asian languages and literature. LEC.

EALC 701. Practicum in Teaching Chinese. 1 Hour.
This course is required every semester for graduate teaching assistants in the Chinese language program in EALC. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Chinese classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department. SEM.

EALC 702. Practicum in Teaching Japanese. 1 Hour.
This course is required every semester for graduate teaching assistants in the Japanese language program in East Asian Languages and Cultures. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Japanese language classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department. SEM.

EALC 703. Practicum in Teaching Korean. 1 Hour.
This course is required every semester for graduate teaching assistants in the Korean language program in East Asian Languages and Cultures. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Korean language classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department. SEM.

EALC 704. Contemporary East Asia. 3 Hours.
This graduate seminar explores rapidly changing societies in contemporary East Asia, particularly China, Japan, and Korea. The course provides a critical overview of East Asia and its diversity and complexity using cross-cultural perspectives and interdisciplinary social science approaches, and situates East Asian societies in the context of globalization. (Same as CEAS 704.) LEC.

EALC 712. Readings in Traditional Japanese Literature. 3 Hours.
A survey of Japanese literature from earliest times to 1868. Students will study the major writers in each genre, with special emphasis on an
individual research topic. A knowledge of Japanese is not required. (Not open to students with credit in EALC 312.) LEC.

EALC 714. Readings in Traditional Chinese Literature. 3 Hours.
A general survey of representative literary works of major genres in traditional China. Lectures, assigned readings, and discussions in English. A knowledge of Chinese is not required. (Not open to students with credit in EALC 314.) LEC.

EALC 715. Survey of Japanese Film. 3 Hours.
This course surveys the major developments in patterns of distribution, exhibition, and reception and their influence on film aesthetics in twentieth century Japanese film. Through secondary readings, lectures, and discussions students will examine how Japanese cinema as an institution responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as FMS 715.) LEC.

EALC 716. Fiction and Film in Japan. 3 Hours.
A survey of major works of fiction and film in modern Japan. Topics include the social and spiritual challenges of modernization, urbanization, and the issues of race and national identity. Works by Akutagawa, Kawabata, Kurosawa, Ogai, Ozu, Soseki and Tanizaki and others will be covered. Lectures, discussion, readings, and films in English. Knowledge of Japanese language is not required. This course is offered at the 300 and the 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 316. LEC.

EALC 717. Contemporary Japanese Literature in Translation: 1945-Present. 3 Hours.
A survey of major literary works of Japan's post-war and contemporary eras. Topics include life during and after the war, the experience of the atomic bomb, and the postmodern landscape. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. An individual research project in an area of the student's special interest will be required. Not open to students who have completed EALC 317. LEC.

EALC 718. Readings in Modern Chinese Literature. 2-3 Hours.
A general survey of the important writers of the 20th century and their works. Lectures, readings, and discussions in English. A knowledge of Chinese is not required. (Not open to students with credit in EALC 318.) LEC.

EALC 728. The Body in Japan. 3 Hours.
The course examines historical and cultural concepts of the body in Japan and then focuses upon the pivotal events of the last half-century as experienced through the body. Students will be introduced to a wide range of extreme bodily experiences: the regimented body of wartime, the body irradiated by the atomic bomb, the body of malnutrition and national humiliation, possessed bodies, licentious bodies, creating life through the body, the aged body, self-immolation of the body, nurturing the body, beautifying the body, and others. The primary sources of investigation and discussion will be novels written after the war, films, anthropological writings, and popular culture. All readings will be in English. This course is offered at the 300 and the 700 levels, with additional assignments at the 700 level. Prerequisite: Upper division or graduate status. LEC.

EALC 732. Seminar in Eastern Religious Thought: ______. 3 Hours.
Analysis of the religious thought of selected thinkers of India, China, and/or Japan, traditional and modern. May be taken more than once if subject matter varies sufficiently. (Same as REL 762.) Prerequisite: REL 507, REL 508, REL 509, or permission of the instructor. LEC.

EALC 733. Seminar in Eastern Religious Texts: ______. 3 Hours.
Analysis of a selected religious text or texts from India, China, or Japan, in translation. May be taken more than once if subject matter varies sufficiently. (Same as REL 733.) Prerequisite: REL 507, REL 508, REL 509, or permission of the instructor. LEC.

EALC 741. Asian Film. 3 Hours.
Seminar on various national film cultures of East and Southeast Asia. Representative films are studied from formal, stylistic, and socio-historic perspectives. Addresses the impact of key cultural, economic and political issues on each film industry. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 800 levels.
levels, with additional assignments at the 800 level. (Same as FMS 841.) SEM.

EALC 888. Contemporary China Studies. 3 Hours.
This course will review and analyze the current literature on China's social and political development, including a wide range of topics within political science. There is a rich body of literature within each topic such as civil society in China, legal reform, political culture, nationalism, gender issues, ethnicity, political behavior, elections, economic development, and inequality. This course will introduce key literature within each topic focusing on the debates among Chinese scholars as well as how these debates fit in the general field of political science. (Same as GIST 888 and POLS 888.) Prerequisite: POLS 668 or permission of the instructor. LEC.

EALC 899. Thesis. 1-6 Hours.
An inquiry into the source material upon a specific subject. THE.

Courses

ECIV 104. Eastern Civilizations. 3 Hours HL/NW AE42 / H/W.
This course acquaints the student with the broad outlines of the traditional cultures and literatures of East Asia, and explores the interaction between these regions and cultures as well as their continuities and disparities. Course materials include translations and discussions of original sources. The course is most appropriate for students with no background in Asian culture. Does not complete major requirement. Not open to students with credit in ECIV 304. LEC.

ECIV 105. Eastern Civilizations Honors. 3 Hours HL/NW AE42 / H/W.
An introductory course designed to acquaint the student with the broad outlines of the traditional cultures and literatures of East Asia. By reading translations of original source materials, the student is able to see the interaction among the various cultures as well as their essential continuity. The course is most appropriate for students without any background in Asian culture. Offered for students with superior academic records. Open only to students in the University Honors Program or by permission of instructor. LEC.

ECIV 177. First Year Seminar: ____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Eastern Civilization. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ECIV 304. Eastern Civilizations. 3 Hours HL/NW AE42 / H/W.
This course acquaints the student with the broad outlines of the traditional cultures and literatures of East Asia, and explores the interaction between these regions and cultures as well as their continuities and disparities. Course materials include translations and discussions of original sources. The course is most appropriate for students with no background in Asian culture. Not open to students with credit in ECIV 104. If majoring in EALC and have completed ECIV 104, see major advisor about completing the ECIV 304 major requirement. LEC.

ECIV 305. Eastern Civilizations Honors. 3 Hours HL/NW AE42 / H/W.
An introductory course designed to acquaint the student with the broad outlines of the traditional cultures and literatures of East Asia. By reading translations of original source materials, the student is able to see the interaction among the various cultures as well as their essential continuity. The course is most appropriate for students without any background in Asian culture. Similar to ECIV 304, but reading and writing assignments reflect the fact that this is an honors course. Open only to students in the University Honors Program or by permission of instructor. LEC.

Courses

JPN 100. Beginning Japanese I. 3 Hours U.
An introduction to Japanese. Familiarity with the basic structural patterns of the language through conversation is stressed. The hiragana and katakana syllabaries are introduced and a few characters are learned. Usually offered as part of a Summer Study Abroad Program. LEC.

JPN 101. Beginning Japanese II. 3 Hours U.
Continuation of JPN 100. Available to students who took JPN 100 as part of the Summer Study Abroad Program. Not available for credit for students who have previously completed JPN 104. Prerequisite: JPN 100 or equivalent. LEC.

JPN 104. Elementary Japanese I. 5 Hours U / F1.
Three hours of lecture, three hours of drill per week. Acquisition of basic language skills (listening, speaking, reading, writing). Not available for credit for students who have previously completed JPN 101. LEC.

JPN 106. Elementary Japanese II. 5 Hours U / F2.
Continuation of JPN 104. Prerequisite: JPN 101, JPN 104, or equivalent. LEC.

JPN 177. First Year Seminar: ____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Japanese. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

JPN 204. Intermediate Japanese I. 5 Hours U / F3.
Three hours of lecture, three hours of drill. Prerequisite: JPN 108 or equivalent. LEC.

JPN 206. Intermediate Japanese Conversation. 2-4 Hours U.
Enhancement of conversational ability at the intermediate level. Used primarily to accommodate transfer credits. Prerequisite: JPN 204 or equivalent. LEC.

Continuation of JPN 204. Prerequisite: JPN 204. LEC.

JPN 226. Japanese in Context - Intermediate. 3 Hours U.
Supervised and individualized study and practice of language skills through direct experience in interviews and guided practical applications in various public settings in Japan. Some conventional classroom instruction in grammar included. Offered only during the Summer Institute in Hiratsuka, Japan. Prerequisite: Two semesters or the equivalent of Japanese language study. LEC.

JPN 233. Special Skills in Japanese: ____. 1-4 Hours U.
Instruction in special skills in Japanese, such as pronunciation, recognition of Chinese characters, comprehension of broadcast media, etc. at the freshman/sophomore level. Course work must be arranged through the office of KU Study Abroad and approved by the Department of East Asian Languages and Cultures. May be repeated for credit if content varies. LEC.

JPN 306. Advanced Japanese Conversation I. 2 Hours H/W / FP.
Intensive practice of communicative skills at the advanced level. Prerequisite: JPN 208 or equivalent. LEC.

JPN 310. Advanced Japanese Conversation II. 2 Hours H/W / FP.
Continuation of JPN 306. LEC.

JPN 326. Japanese in Context - Advanced. 3 Hours U / FP.
Supervised and individualized study and practice of language skills through direct experience in interviews and guided practical applications in various public settings in Japan. Some conventional classroom instruction in grammar and usage. Offered only during the Summer
Institute in Hiratsuka, Japan. Prerequisite: Four semesters or the equivalent of Japanese language study. LEC.

JPN 333. Special Skills in Japanese: _____, 1-4 Hours U.
Instruction in special skills in Japanese, such as pronunciation, recognition of Chinese characters, comprehension of broadcast media, etc. at the junior/senior level. Course work must be arranged through the office of KU Study Abroad and approved by the Department of East Asian Languages and Cultures. May be repeated for credit if content varies. LEC.

JPN 386. Advanced Japanese Conversation III. 1-3 Hours U / FP.
Instruction in discussion in formal contexts and speech making. Prerequisite: JPN 504 or equivalent. LEC.

JPN 498. Directed Readings in Japanese. 1-4 Hours H/W / FP.
Readings in Japanese on a subject selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: Consent of instructor. IND.

JPN 504. Advanced Modern Japanese I. 3 Hours H/W / FP.
Readings in selected modern Japanese texts on various topics: history, education, language, society, business, and literature. Meets three hours per week. Prerequisite: JPN 208 or equivalent. LEC.

JPN 508. Advanced Modern Japanese II. 3 Hours H/W / FP.
Continuation of JPN 504. Prerequisite: JPN 504 or equivalent. LEC.

JPN 509. Business Japanese. 3 Hours U / FP.
Study of Japanese language especially appropriate to business situations. Although the course emphasizes developing conversational ability, the primary focus is on strengthening reading and writing in the specialized area. The course includes discussion of non-verbal aspects of Japanese business practices as well. Prerequisite: The first semester of third-year Japanese or the equivalent. LEC.

JPN 542. Introduction to Classical Japanese I. 3 Hours H/W / FP.
Introductory grammar and readings in classical Japanese texts. Prerequisite: JPN 508. LEC.

JPN 544. Introduction to Classical Japanese II. 3 Hours H / FP.
Continued readings of classical Japanese texts, on the intermediate and advanced level. Introduction to the elements of kambun (Sino-Japanese) and sorobun (epistolary) styles. Prerequisite: JPN 542 or equivalent. LEC.

JPN 562. Modern Japanese Texts I. 3 Hours AE61 / H/W / FP.
Readings and interpretation of modern Japanese texts from various fields. Continued study of the language in the form of oral discussion and written reports. Prerequisite: JPN 508. LEC.

JPN 564. Modern Japanese Texts II. 3 Hours H/W / FP.
A continuation of JPN 562. Prerequisite: JPN 562 or equivalent. LEC.

JPN 569. Advanced Business Japanese. 3 Hours U / FP.
This course strengthens reading and writing skills and continues developing conversational ability. It assumes a higher level of competency in Japanese than JPN 509 and includes both verbal and non-verbal aspects of Japanese business practices. Prerequisite: Completion of third-year Japanese or equivalent. LEC.

JPN 598. Readings in: _____, 1-3 Hours H/W / FP.
Students will read selections from materials on a given topic or topics. May be repeated for credit. Prerequisite: JPN 564 or permission of instructor. IND.

JPN 690. Seminar in: _____, 1-3 Hours H/W / FP.
Varying topics with varying prerequisites. LEC.

JPN 801. Directed Readings and Research in Japanese. 1-4 Hours / FP.
Advanced language training for the study of Japanese sources in the humanities or social science field of the student. Prerequisite: JPN 564 or consent of instructor. RSH.

JPN 880. Advanced Japanese Research Materials. 2 Hours / FP.
A detailed examination of various Japanese language reference works and research materials. Emphasis will be placed on the use of different types of reference works to carry out research strategies. Prerequisite: JPN 508 or equivalent and JPN 580. LEC.

Courses

KOR 104. Elementary Korean I. 5 Hours U / F1.
Five hours of class and two hours of drill in the spoken language each week. Grammar and readings in selected texts. LEC.

KOR 108. Elementary Korean II. 5 Hours U / F2.
Continuation of KOR 104. Prerequisite: KOR 104. LEC.

KOR 177. First Year Seminar: _____, 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Korean. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

KOR 204. Intermediate Korean I. 5 Hours U / F3.
Five hours of class and two hours of spoken drill. Readings in selected texts in modern Korean. Prerequisite: KOR 108 or equivalent. LEC.

KOR 208. Intermediate Korean II. 5 Hours U / F4.
Continuation of KOR 204. Prerequisite: KOR 204. LEC.

KOR 498. Directed Readings in Korean. 1-4 Hours H/W / FP.
Readings in Korean on a subject selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: Consent of instructor. IND.

KOR 504. Advanced Modern Korean I. 4 Hours H/W / FP.
Readings in and discussion of selected modern Korean texts on various topics: history, literature, society, and language. Prerequisite: KOR 208 or equivalent. LEC.

KOR 508. Advanced Modern Korean II. 4 Hours H/W / FP.
Readings and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. Prerequisite: KOR 504 or equivalent. LEC.

KOR 562. Modern Korean Texts I. 1-5 Hours H/W / FP.
Readings and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. Prerequisite: KOR 504 or equivalent. LEC.

KOR 564. Modern Korean Texts II. 1-5 Hours H / FP.
Continuation of KOR 562. Reading and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. Prerequisite: KOR 564 or equivalent. LEC.

Courses

MONG 101. Elementary Mongolian I. 3 Hours U.
The first semester of Elementary Mongolian is designed to give the student basic communicative competency, including pronunciation and intonation, structure, and syntax. Effective oral and written communication is stressed. LEC.
MONG 102. Elementary Mongolian II. 3 Hours U.
A continuation of Elementary Mongolian I. Prerequisite: Elementary Mongolian I or the equivalent. LEC.

MONG 177. First Year Seminar: _____ 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Mongolian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

Courses

TIB 101. Elementary Tibetan I. 3 Hours U / F1.
An introduction to the Tibetan language in both its literary and colloquial forms according to the Central Tibetan dialects. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement. LEC.

TIB 102. Elementary Tibetan II. 3 Hours U / F2.
A continuation of TIB 101. Prerequisite: TIB 101 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement. LEC.

TIB 177. First Year Seminar: _____ 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Tibetan. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

TIB 201. Intermediate Tibetan I. 3 Hours U / F3.
Continuation of TIB 102. Prerequisite: TIB 102 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement. LEC.

Continuation of TIB 201. Prerequisite: TIB 201 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement. LEC.

Courses

UYGR 101. Elementary Uyghur I. 3 Hours U / F1.
Uyghur is an important Central Asian Turkic language spoken by nine million people in China. The first semester is designed to give the student basic communicative competency, including pronunciation and intonation, structure, and syntax. Effective oral and written communication is stressed. LEC.

UYGR 102. Elementary Uyghur II. 3 Hours U / F2.
Continuation of UYGR 101. Prerequisite: UYGR 101 or the equivalent. LEC.

UYGR 177. First Year Seminar: _____ 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Uyghur. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

UYGR 201. Intermediate Uyghur I. 3 Hours U / F3.
Continuation of UYGR 102. Prerequisite: UYGR 102 or equivalent. LEC.

Continuation of UYGR 201. Prerequisite: UYGR 201 or equivalent. LEC.

Bachelor of Arts in East Asian Languages and Cultures

Why study East Asian languages and cultures?
Because knowledge of East Asia is critical in the new global culture and marketplace.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credit.transfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Major and Concentrations
For undergraduates in the department, the B.A. degree in East Asian languages and cultures is available in the following concentrations:

1. Chinese language and literature.
2. Japanese language and literature.
3. East Asian studies with Chinese language.
4. East Asian studies with Japanese language.
5. East Asian studies with Korean language.
6. Double language Concentration: Chinese and/or Japanese and/or Korean.

First- and Second-Year Preparation
Students considering a major in EALC should begin language training as soon as possible, starting with CHIN 104/JPN 104/KOR 104-CHIN 108/JPN 108/KOR 108 in the first year and advancing to the intermediate 204-208 level. Students are encouraged to take ECIV 304/ECIV 305 as soon as possible. Talk to the undergraduate advisor in the target language to plan a 4-year course of study. Call 785-864-3100 for information about advisors to contact.
Requirements for the B.A. Major
Chinese Language and Literature Concentration

East Asian Languages and Cultures Prerequisite Knowledge (20)
Elementary Chinese I. Satisfied by:
CHIN 104 Elementary Chinese I 5
Elementary Chinese II. Satisfied by:
CHIN 108 Elementary Chinese II 5
Language Proficiency. Satisfied by:
CHIN 204 Intermediate Chinese I & CHIN 208 Intermediate Chinese II

East Asian Languages and Cultures Core Knowledge and Skill (22)
Majors choosing this concentration must complete a course or courses in each of the following areas:
Eastern Civilizations. Satisfied by:
ECIV 304 Eastern Civilizations 3
or ECIV 305 Eastern Civilizations Honors
Advanced Language. Satisfied by:
CHIN 504 Advanced Modern Chinese I & CHIN 508 Advanced Modern Chinese II 10
CHIN 342 Introduction to Classical Chinese 3
or CHIN 542 Introduction to Classical Chinese
CHIN 562 Modern Chinese Texts I 3
And one of the following:
CHIN 544 Readings in Classical Chinese: ______
CHIN 564 Modern Chinese Texts II
EALC/LING 572 The Structure of Chinese

East Asian Languages and Cultures Required Elective (0)
Majors choosing this concentration must complete a course in each of the following areas (A course cannot be used in more than 1 area):
Chinese Literature or Culture in Translation. Satisfied by one course, e.g.:
EALC 314 Traditional Chinese Literature in Translation
EALC 318 Modern Chinese Fiction and Film
or EALC 518 Modern Chinese Fiction & Film
EALC 319 Contemporary Chinese Fiction and Film
or EALC 519 Contemporary Chinese Fiction and Film
EALC 330/530 Chinese Literature and Culture: Premodern Times
EALC 370 Chinese Folk Belief
EALC 418/618 Sexual Politics in Chinese Literature and Culture: Premodern Times
EALC 499 Honors Thesis
EALC 578 Gender and Society in Modern China

Japanese Language and Literature Concentration

East Asian Languages and Cultures Prerequisite Knowledge (20)
Elementary Japanese I. Satisfied by:
JPN 104 Elementary Japanese I 5
Elementary Japanese II. Satisfied by:
JPN 108 Elementary Japanese II 5
Language Proficiency. Satisfied by:
JPN 204 Intermediate Japanese I & JPN 208 Intermediate Japanese II 10

East Asian Languages and Cultures Core Knowledge and Skills (19)
Majors choosing this concentration must complete a course or courses in each of the following areas:
Eastern Civilizations. Satisfied by one of the following:
ECIV 304 Eastern Civilizations 3
or ECIV 305 Eastern Civilizations Honors
Advanced Language. Satisfied by:
Bachelor of Arts in East Asian Languages and Cultures

JPN 306 Advanced Japanese Conversation I and Advanced Japanese Conversation II 4
& JPN 310

JPN 504 Advanced Modern Japanese I and Advanced Modern Japanese II 6
& JPN 508

JPN 562 Modern Japanese Texts I 3

And one of the following: 3
JPN 564 Modern Japanese Texts II
JPN 569 Advanced Business Japanese
EALC/LING 570 The Structure of Japanese

East Asian Languages and Cultures Required Elective (0)

Majors choosing this concentration must complete a course in each of the following areas (a course cannot be used in more than one area):

Pre-Modern Japanese Literature in Translation. Satisfied by one course, e.g.:
EALC 312 Japan's Literary Legacy
EALC 575 Love, Sexuality and Gender in Japanese Literature

Modern Japanese Literature in Translation. Satisfied by one course, e.g.:
EALC 316 Modern Japanese Film and Fiction
EALC 317 Contemporary Japanese Literature in Translation: 1945-Present
EALC 328 The Body in Japan
EALC 412 Visual and Literary Culture in Modern Japan

Pre-Modern Japan. Satisfied by one course on pre-modern Japan, e.g.:
EALC 312 Japan's Literary Legacy
EALC 410 The Culture of Play in Japan
EALC 411 The Culture of Play in Japan, Honors
EALC 509 Religion in Japan
EALC 587 Early Modern Japan
EALC 499 Honors Thesis

Modern Japan. Satisfied by one course on modern Japan, e.g.:
EALC 316 Modern Japanese Film and Fiction
EALC 317 Contemporary Japanese Literature in Translation: 1945-Present
EALC 328 The Body in Japan
EALC 543 Contemporary Japanese Film
EALC 588 Japan, 1853-1945
EALC 589 Japan Since 1945
EALC 499 Honors Thesis

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 31 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 12 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 31 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

East Asian Studies with Chinese Language Concentration

East Asian Languages and Cultures Prerequisite Knowledge (20)
Elementary Chinese I. Satisfied by:
CHIN 104 Elementary Chinese I 5
Elementary Chinese II. Satisfied by:
CHIN 108 Elementary Chinese II 5
Language Proficiency. Satisfied by:
CHIN 204 Intermediate Chinese I 10
& CHIN 208 and Intermediate Chinese II

East Asian Languages and Cultures Core Knowledge and Skills (13)
Majors choosing this concentration must complete a course or courses in each of the following areas:

Eastern Civilizations. Satisfied by one of the following
ECIV 304 Eastern Civilizations 3
or ECIV 305 Eastern Civilizations Honors

Advanced Language. Satisfied by:
CHIN 504 Advanced Modern Chinese I 10
& CHIN 508 and Advanced Modern Chinese II

East Asian Languages and Cultures Required Elective (0)

Majors choosing this concentration must complete a course in each of the following areas (a course cannot be used in more than one area):

Pre-Modern China. Satisfied by one course on pre-modern China, e.g.:
EALC 314 Traditional Chinese Literature in Translation
EALC 330 Chinese Literature and Culture: Premodern Times
EALC 415 Ancient China
EALC 418 Sexual Politics in Chinese Literature and Culture: Premodern Times
EALC 583 Imperial China

Modern China. Satisfied by one course on modern China, e.g.:
EALC 318 Modern Chinese Fiction and Film
or EALC 518 Modern Chinese Fiction & Film
EALC 319 Contemporary Chinese Fiction and Film
or EALC 519 Contemporary Chinese Fiction and Film
EALC 578 Gender and Society in Modern China
EALC 420 Daily Life in China From the Opium War to the Present
EALC 584 Modern China
EALC 585 Reform in Contemporary China

China in the Humanities. Satisfied by one course on China in a humanities discipline, e.g.:
EALC 301 Cultural Traditions of China, Inner Asia, and Tibet
EALC 310 The Chinese Novel
EALC 314 Traditional Chinese Literature in Translation
EALC 317 Contemporary Chinese Literature in Translation: 1945-Present
Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 31 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 12 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 31 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

East Asian Studies with Korean Language Concentration

**East Asian Languages and Cultures Prerequisite Knowledge (20)**
Elementary Korean I. Satisfied by:
- KOR 104 Elementary Korean I 5
Elementary Korean II. Satisfied by:
- KOR 108 Elementary Korean II 5
Language Proficiency. Satisfied by:
- KOR 204 Intermediate Korean I 10
  & KOR 208 Intermediate Korean II

**East Asian Languages and Cultures Core Knowledge and Skills (11)**
Majors choosing this concentration must complete a course or courses in each of the following areas:

Eastern Civilizations. Satisfied by one of the following:
- ECIV 304 Eastern Civilizations 3
  or ECIV 305 Eastern Civilizations Honors
Advanced Language. Satisfied by:
- KOR 504 Advanced Modern Korean I 8
  & KOR 508 Advanced Modern Korean II

**East Asian Languages and Cultures Required Elective (0)**
Majors choosing this concentration must complete a course in each of the following areas (a course cannot be used in more than one area):

Pre-modern Korea. Satisfied by one course on pre-modern Korea, e.g.:
- EALC 563 Cultural History of Korea
- HA 369 Art and Culture of Korea
- HA 469 Art and Culture of Korea, Honors
Modern Korea. Satisfied by one course on modern Korea, e.g.:
- EALC 593 Modern Korea
East Asia in the Humanities. Satisfied by one course on East Asia in a humanities discipline, e.g.:
- EALC 380 Popular Cultures of East Asia
- EALC 413 Asian Media Studies
- EALC 541 Asian Film
East Asia in the Social Sciences. Satisfied by one course on East Asia in a social science discipline, e.g.:

East Asian Studies. Satisfied by three courses (9 hours) in any East Asian field. One of these three may be KOR 562.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 32 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 32 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Double Language Concentration

Majors choosing this concentration must complete the following requirements for 2 languages from the following: Japanese, Chinese, and/or Korean. Total hours required for this concentration will depend on the languages chosen and will range from 30-32 jr/sr hours.

**East Asian Languages and Cultures Prerequisite Knowledge (0)**
Elementary Japanese or Chinese or Korean I. Satisfied by one of the following:
- JPN 104 Elementary Japanese I
- CHIN 104 Elementary Chinese I
- KOR 104 Elementary Korean I
Elementary Japanese or Chinese or Korean II. Satisfied by one of the following:
- JPN 108 Elementary Japanese II
- CHIN 108 Elementary Chinese II
- KOR 108 Elementary Korean II
Language Proficiency. Satisfied by one of the following:
- JPN 204 Intermediate Japanese I & JPN 208 and Intermediate Japanese II
- CHIN 204 Intermediate Chinese I & CHIN 208 and Intermediate Chinese II
- KOR 204 Intermediate Korean I & KOR 208 and Intermediate Korean II

**East Asian Languages and Cultures Core Knowledge and Skills (0)**
Advanced Language. Satisfied by one of the following sequences:
JPN 306 & JPN 310 & JPN 504 & JPN 508
Advanced Japanese Conversation I and Advanced Japanese Conversation II
and Advanced Modern Japanese I and Advanced Modern Japanese II
CHIN 504 & CHIN 508
Advanced Modern Chinese I and Advanced Modern Chinese II
KOR 504 & KOR 508
Advanced Modern Korean I and Advanced Modern Korean II

Pre-Modern Culture (6)
Choose 2 of the following 3, matching language choices (6 credits combined - must be in the same two languages as chosen to fulfill the language sequences):
China
Japan
Korea

Modern Culture (6)
Choose 2 of the following 3, matching language choices (6 credits combined - must be in the same two languages as chosen to fulfill the language sequences):
China
Japan
Korea

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30-32 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 30-32 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Sample 4-year plans for the BA degree in East Asian Languages and Cultures with the following concentrations can be found here: Chinese Language & Literature (p. 1293), Japanese Language & Literature (p. 1294), East Asian Studies-Chinese Language (p. 1295), East Asian Studies-Japanese Language (p. 1296), East Asian Studies-Korean Language (p. 1297), Double Language (p. 1297), or by using the left-side navigation.

Departmental Honors
The department awards honors to undergraduates who demonstrate exceptional academic achievement. Students should make their intentions known in writing before the final undergraduate semester, preferably during the junior year. The candidate must achieve a minimum overall grade-point average of 3.25 and a minimum of 3.5 in the major and complete EALC 499 with a grade of B or higher. In EALC 499, the student writes an honors thesis under the supervision of a faculty member. Two faculty members evaluate the thesis.

Study Abroad
Students are encouraged to undertake a substantial study abroad experience as part of the major. Studying abroad helps students master the language and affords them cultural understanding far beyond what can be conveyed in a classroom.

KU offers several options for academic-year abroad, direct-exchange programs for undergraduates and graduates in China (Nankai, Nanjing, Huazhong Normal universities and the University of Hong Kong), Japan (Fukuoka, J.F. Obirin, Okayama, Sophia Universities and Tsuda College) and South Korea (Korea University). The department sponsors a five-week study abroad program in Hiratsuka, Japan, every summer.

The study abroad office also helps students find other summer, semester, or academic-year programs that meet unique student needs. Credit is usually similar to credit earned during an academic year at KU, and costs are about the same. Some scholarship aid is available. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu) for program and scholarship information as well as program offerings in other countries in Asia.

BA in East Asian Languages & Cultures with concentration Chinese Language & Literature

Below is a sample 4-year plan for students pursuing the BA in East Asian Languages & Culture with a concentration in Chinese Language & Literature. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

**Total Hours: 120-121**

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Double Language majors must choose to complete one of three languages through 4th semester proficiency: Japanese, Chinese, Korean.
3. Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
4. 2 courses (6 hours) are required from each of the following categories: Pre-Modern Culture, Modern Culture. Visit the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/east-asian-languages-cultures/ba/#requirementstext) tab for a list of approved courses for each category.
5. Double Language majors must complete a two-semester sequence of Advanced Language in two languages chosen from: Japanese, Chinese, Korean. The Japanese sequence requires one semester that includes JPN 306 and JPN 504, and another semester that includes JPN 310 and JPN 508. The Chinese sequence requires one semester that includes CHIN 504, and another semester that includes CHIN 508. The Korean sequence requires one semester that includes KOR 504, and another semester that includes KOR 508.
6. Typically Goal 6 is fulfilled using a course required by the major. Review the list of Goal 6 courses (http://kucore.ku.edu/courses/goal6) that may apply to the major, or choose another course. A free elective may need to be used to fulfill pre-requisites if a course within the major is not chosen.

---

**Minor in East Asian Languages and Cultures**

**Why study East Asian languages and cultures?**

Because knowledge of East Asia is critical in the new global culture and marketplace.

**Requirements for the Minor**

Students selecting this minor must complete one of the following options:

**East Asian Languages and Cultures Minor Option I**

Advanced Language Requirement for Minor Option I (10)

Must complete the third year of one of the following languages: 10 (students who complete this requirement by taking KOR 504 and KOR 508 will complete a 20 hour minor)

**Required Electives for Minor Option I (9-12)**

Students who choose to pursue Korean language must complete 1 additional Korean culture course.

Select one of the following categories: 9-12

Category 1:

Students of the Chinese or Japanese languages must complete 3 elective courses:

- Six hours must be at the 300 level or above focusing on the country of the language being studied.
- Three hours may be a course that covers East Asian broadly.
- Three hours may be a 100 level course.

Category 2:

Students of the Korean language must complete 4 elective courses:

- Six hours must be courses at the 300 level or above focusing on Korea. Six hours may be courses that cover East Asia broadly. Three hours may be a 100 level course.

**East Asian Languages and Cultures Minor Option II**

**Core Knowledge and Skills for Minor Option II (10)**

Must complete the second year of one of the following languages: 10

**Required Electives for Minor Option II (0)**

Pre-modern culture: Satisfied by the completion of one course on the pre-modern culture of the country of the language being studied. Must be a 300 level or above.

Modern culture: Satisfied by the completion of one course on the modern culture of the country of the language being studied. Must be a course at the 300 level or above.

East Asian Studies Electives: Satisfied by the completion of four courses on Japan, China, Korea, or East Asia. Two courses may be 100 level courses.

**Minor Hours & Minor GPA**

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by 18-20 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 18-20 hours from junior/senior courses (300+)

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Master of Arts in East Asian Languages and Cultures**

**Why study East Asian languages and cultures?**

The areas of East Asia covered represent 3 of the oldest continuous civilizations of the world. The great historical contributions of China, Japan, and Korea in literature, philosophy, and art are widely recognized and studied throughout the world. Today, the highly advanced industries of Japan, the enormous human resources of China, and the rapidly growing economies of Korea and Taiwan have contributed to the development of extremely valuable socio-political and economic ties between these areas and the United States.

**M.A. Program Overview**

The Department of East Asian Languages and Cultures (EALC) is the only department in Kansas offering a regular program of instruction in the languages, literatures, and cultures of East Asia.

The EALC Thesis M.A. program trains students who will devote themselves to becoming effective links between the Far East and the United States. Students concentrate in Chinese, Japanese, or East Asian Cultures, usually entering the program with at least two years of college-level language. The program typically takes two years to complete, including the defense of a required Master's thesis.

**FLAS Fellowships**

Students in the M.A. program may also be eligible for a Foreign Language and Area Studies (FLAS) (http://flas.ku.edu) fellowship through the Center for East Asian Studies. FLAS fellowships include:

- Summer award - up to $5,000 for tuition and a stipend of $2,500 for living expenses for summer language study equivalent to one full year of language study
- Academic Year award - full KU tuition and a $15,000 stipend for living expenses for academic year study that includes two semesters of language and six credits or more of East Asian culture courses.
Students in the joint J.D./M.A. or who are also admitted to other programs are strongly encouraged to apply (http://flas.ku.edu/how-apply) for this funding.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A. program
Apply to the EALC M.A. program via the Office of Graduate Studies online application system (http://graduate.ku.edu/prospective-students). For additional information regarding departmental admissions requirements, deadlines, and the application process, please visit the graduate admissions page (https://ealc.drupal.ku.edu/admission) of the EALC Department website, or contact the EALC Department Graduate Program directly at ealc@ku.edu.

Master’s Program
The department offers a master’s degree in East Asian languages and cultures. The student declares his or her concentration in 1 of 3 options.

- Chinese language and literature
- Japanese language and literature
- East Asian cultures

Students of Chinese or Japanese language and literature gain in-depth knowledge of these ancient civilizations, which have produced some of the world’s greatest literature.

Students of East Asian cultures develop a broad interdisciplinary knowledge of East Asia. This concentration is for students pursuing professional or noncollege teaching careers, for students in the early stages of language training, or for students who have already acquired competence in an East Asian language.

Prerequisites
Entrance requirements for a concentration in either Chinese or Japanese language and literature include

- 3 years of the modern language and, for Chinese language students, one year of classical Chinese or the demonstrated equivalent.

Students not meeting this prerequisite may be admitted with deficiencies provided they achieve this level of proficiency outside the minimum of 30 graduate credit hours required for the degree.

- 2 lecture courses dealing with East Asia.

Entrance requirements for a concentration in East Asian cultures are

- At least 2 years of an East Asian language. Students not meeting this prerequisite may be admitted with deficiencies provided they achieve this level of proficiency outside the minimum of 30 graduate credit hours required for the degree.

Requirements for Chinese or Japanese Language and Literature Concentration
1. A minimum of 30 graduate credit hours:
   a. Fourth-year level of language courses.
   b. At least 18 credit hours must be taken in the department in residence.
   c. 6 of these 18 credit hours must demonstrate research capacity in the student’s major language in lecture courses or seminars.
   d. EALC 700 Introduction to East Asian Studies and the relevant bibliography course must be included.
   e. No more than 3 hours of directed readings courses may be included in the required 30 hours.
   f. Students are expected to take at least one course at the 500 level or above in the literature of their concentration.
   g. Students must take at least one course that deals wholly with an East Asian country outside their concentration.

2. A thesis (3 credit hours) involving significant use of materials in the student’s major language.

Requirements for East Asian Cultures Concentration
1. A minimum of 30 graduate credit hours:
   a. Third-year level of language courses.
   b. At least 24 credit hours, taken in the department in residence.
   c. EALC 700 Introduction to East Asian Studies must be included in the student’s curriculum.
   d. Students are expected to select 1 of the East Asian cultures concentrations.
   e. Students may not take more than 3 hours of directed readings.
   f. Students may, in consultation with the department graduate advisor, take other credit hours in a discipline or disciplines closely related to their studies.
   g. Students must take at least one course at the 500 level or above in the literature of their concentration.

2. A thesis (3 credit hours) that must deal with a subject in the concentration chosen by the student.

Asian Languages and Cultures degrees, combines into 4 years and one
The J.D./M.A. EALC program, which leads to the J.D. and M.A. in East
Asian Languages and Cultures

Joint Degree Program in Law and East Asian Languages and Cultures

Joint Degree Program in Law and East Asian Languages and Cultures
The J.D./M.A. EALC program, which leads to the J.D. and M.A. in East
Asian Languages and Cultures degrees, combines into 4 years and one
summer of full time study the Juris Doctor program offered by the School
of Law and the Master of East Asian Languages and Cultures program
offered by the Department of East Asian Languages and Cultures in the
College of Liberal Arts and Sciences.

Growing interdependence with East Asia, particularly with China, provides
a need for lawyers versed in culture and language. A joint degree in
Law and East Asian Languages and Cultures opens many doors for its
recipients. One can find opportunities in international trade and finance,
immigration law, and other related fields, as well as a greater ability to
work with clients from various backgrounds.

Funding
Joint J.D./M.A. students are eligible and strongly encouraged to apply
for a Foreign Language and Area Studies (FLAS) (http://flas.ku.edu)
fellowship through the Center for East Asian Studies. FLAS fellowships include:
 • Summer award - up to $5,000 for tuition and a stipend of $2,500 for
  living expenses for summer language study equivalent to 1 full year of
  language study
 • Academic Year award - full KU tuition and a $15,000 stipend for
  living expenses for academic year study that includes 2 semesters of
  language and 6 credits or more of East Asian culture courses.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be
admitted as either a degree-seeking or non-degree seeking student.
Policies and procedures of Graduate Studies govern the process of
Graduate admission. These may be found in the Graduate Studies
(p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the
online catalog for information regarding program-specific admissions
criteria and requirements. Special admissions requirements pertain to
Interdisciplinary Studies degrees, which may be found in the Graduate
Studies section of the online catalog.

Admission to the Joint Program
To be admitted to the joint J.D./M.A. EALC Program, an applicant must
hold an earned baccalaureate degree from an accredited college or
university, complete the admission processes, meet the admission
requirements for both the School of Law and the Department of East
Asian Languages and Cultures, and be admitted to both programs no
later than the end of the first year of study in Law or the completion of
more than 16 credit hours in EALC. Full-time study is required for the
joint J.D./M.A. EALC program. The Law School Admission Test (LSAT)
is the only standardized test required for an applicant to the joint degree
program.

For information about applying to the Law School, see the school website
(http://www.law.ku.edu/admissions). For information about applying to the
EALC Department, please visit the graduate admissions page
(https://ealc.drupal.ku.edu/admission) of the EALC Department website, or
contact the EALC Department Graduate program directly at ealc@ku.edu.

Degree Requirements
To receive the J.D./M.A. EALC, a student must successfully complete
a minimum of 106 credit hours, 81 in the School of Law and 25 in the
Department of East Asian Languages and Cultures. The School of Law
requires a 2.0 grade point average, while the Graduate School requires a

3.0 GPA for all courses counting toward the M.A. in EALC portion of the degree.

**J.D. Requirements**

Students must complete all required first year School of Law courses (29 credit hours) prior to enrolling in courses for the joint degree. In addition to these course requirements, the School of Law has an upper-class writing requirement, a residence requirement, and a time limit for completion of the degree.

In addition to the 44 TOTAL credit hours of coursework required of all law students, students in the joint J.D./M.A. EALC program must complete an additional 12 credit hours of coursework consisting of courses in any two of the following four areas of concentration:

- **International Trade (6)**
  - LAW 944 International Trade Law 3
  - LAW 864 Advanced International Trade Law 3

- **International Commerce (3)**
  - LAW 945 International Commerce and Investment 3

- **Public International Law (3)**
  - LAW 974 Public International Law 3

- **Comparative Law (6)**
  - LAW 879 Comparative Law 3
  - LAW 918 Islamic Law 3

Students may choose courses to complete the remaining hours necessary to reach the total of 81 hours of law school credit needed for the joint degree from any part of the Law School curriculum.

Please refer to the current School of Law Catalog for further details about the requirements for the J.D. portion of the degree.

**EALC Requirements**

Students shall consider the degree in East Asian Cultures to be interdisciplinary in nature:

1. A minimum of 22 graduate credit hours plus 1 of the two options listed in part 7.
2. Each student is expected to select 1 of the East Asian Cultures (Japan, China, or Korea) for concentration and to include in his or her program at least two courses dealing wholly with an East Asian culture outside of his or her concentration. Up to 2 courses can be pan-East Asian courses including the student’s country of concentration.
3. Students must complete a third year of language of the country of concentration.
4. EALC 700, Introduction to East Asian Studies, must be included in the student’s curriculum if the course is offered during the time the student is in resident study.
5. No more than 3 hours of directed reading in a language may count toward the M.A. degree.
6. Students are required to take 1 course in the literature or thought of the country of concentration at 500 level or above.
7. Students are required to fulfill 1 of the following requirements:
   a. Write a thesis (3 credit hours) which must deal with a subject within the concentration chosen by the student, or
   b. Practical thesis: Hold an internship or job in the country of concentration for a period of at least 8 weeks, at the advisor’s approval, and write a 40 page analysis of the cultural aspects of the experience (3 credits)

Students MUST consult with the EALC Director of Graduate Studies (DGS) immediately upon admission to the joint program to determine an enrollment plan and obtain a list of current approved joint courses. Joint students must also consult with the DGS during advising periods each semester.

Third and fourth year Chinese, Japanese, and Korean language courses fulfill the requirements, as well.

<sup>1</sup> There is no credit toward the degree for first and second year language. First and second year language are 10 credits each. Third year language is 10 credits and counts toward the degree.

**East Asian Studies**

Founded in 1959, the Center for East Asian Studies (CEAS) at the University of Kansas is the only East Asian resource center in the Great Plains region. CEAS supports East Asian language instruction and promotes East Asian studies across the curriculum. Seventy affiliated faculty members teach in 29 departments and 10 professional schools at KU, offering over 250 courses fully or partially devoted to East Asia.

**Courses**

- **CEAS 200. Topics in East Asian Studies:** _____ 1-3 Hours U.  
  An introductory interdisciplinary topics course addressing contemporary issues related to one or more East Asian countries. Format and content will vary. Does not count toward the EALC major or minor requirements unless otherwise indicated by EALC in the Schedule of Classes. LEC.

- **CEAS 500. Seminar in East Asian Studies:** _____ 1-3 Hours U.  
  An interdisciplinary seminar addressing contemporary issues related to one or more East Asian countries. Prerequisites to be determined by instructor(s) on the basis of course content. Does not count toward the EALC major or minor requirements unless otherwise indicated by EALC in the Schedule of Classes. LEC.

- **CEAS 610. Minorities in Japan. 3 Hours S.**  
  This course offers a sociological and historical exploration of Japan’s minorities: the Ainu, Okinawans, Burakumin, and Zainichi Koreans
who are often excluded from narratives of Japanese history. Exclusion of the minority issue not only overlooks the existence of minority populations in Japan but also contributes to misconceptions of Japan as a homogeneous country. The course objective is to challenge the conventional master narrative of racial and cultural homogeneity. We shed light on Japan's minorities, their historical experiences, current struggles, and future challenges. Prerequisite: An introductory East Asian Studies course or consent of instructor. LEC.

CEAS 704. Contemporary East Asia. 3 Hours.
This graduate seminar explores rapidly changing societies in contemporary East Asia, particularly China, Japan, and Korea. The course provides a critical overview of East Asia and its diversity and complexity using cross-cultural perspectives and interdisciplinary social science approaches, and situates East Asian societies in the context of globalization. (Same as EALC 704.) LEC.

CEAS 802. Research Seminar. 3 Hours.
Students will work with the instructor and, when appropriate, an additional faculty advisor to design, research and write up a research paper on an East Asian topic of their choosing. Students enrolling in this course are expected to have taken a social science research methods class prior to taking this course and to apply those methods to the research process. A core course for the MA in Contemporary East Asian Studies. Prerequisite: Permission of the instructor. SEM.

Master of Arts in Contemporary East Asian Studies

The MA in Contemporary East Asian Studies is a new interdisciplinary degree program focused on 20th and 21st-century East Asia that will provide students with 1) in-depth, interdisciplinary knowledge of the modern history, politics, economies, and societies of one East Asian country, e.g., China, Korea, or Japan; 2) broad knowledge of modern East Asia, and 3) social science research skills and methods appropriate to international area studies.

Admission Criteria and How to Apply

To be considered for admission to the M.A. program in Contemporary East Asian Studies, students must meet the following criteria:

- B.A. or B.S. degree or the equivalent
- Minimum 3.0 grade-point average in their bachelor’s degree
- Proficiency in an East Asian Language at either the second or third level, depending on the concentration.

To apply to the CEAS M.A. program in Contemporary East Asian Studies, submit an application and supporting documentation online through the Office of Graduate Studies Application (http://www.graduate.ku.edu/01-04_apply.shtml) website. Before applying, please be aware that the following items will need to be uploaded with the online application:

1. A two-page statement of purpose explaining your educational and academic objectives.
2. One official transcript for all post-secondary education.
3. Three letters of recommendation, each accompanied by the Graduate Letter of Recommendation Form (http://graduate.ku.edu/sites/graduate.drupal.ku.edu/files/docs/ApplicationProcess/KULetterOfRecForm.pdf) [PDF].
4. Official Graduate Record Examination (GRE) result. All applicants including international applicants are required to submit a GRE score from the General test (verbal, quantitative, analytical writing).
5. International students must submit TOEFL scores taken within the past two years. The Applied English Center (http://www.aec.ku.edu) may also require incoming international students to complete an examination to show their English proficiency upon arrival in Lawrence. Information about the minimum acceptable English scores is available through the KU Office of International Programs (http://www.international.ku.edu) and through the Office of Graduate Studies (http://www.phd.ku.edu/06-01_eng_prof.shtml).
6. A writing sample that demonstrates your writing skills and basic research capacity.
7. A current C.V. (Curriculum Vitae) or resume.
8. An application fee paid by credit card or by electronic check (For the amount (http://policy.ku.edu/graduate-studies/application-fees-graduate-students). Domestic applications are normally $55 and international applications are normally $65).

Although May 1 is the final deadline for submitting an application for a Fall semester start, our graduate committee will complete a first round review of applications on or before April 1. To ensure that your application is included for first priority consideration, please ensure that all materials are received no later than March 15.

Students are encouraged to apply for the Fall semester admission. However, it may be possible for students to begin the program in the Spring or Summer semesters. Please contact the Director, Dr. Megan Greene at mgreene@ku.edu or the Assistant Director, Dr. Ayako Mizumura at mizu@ku.edu to discuss this option.

If you wish to learn more about the coming M.A. program in Contemporary East Asian Studies at The University of Kansas, please contact:

Ayako Mizumura, Assistant Director
Center for East Asian Studies
ceasma@ku.edu (mizu@ku.edu)
Megan Greene, Director
Center for East Asian Studies
mgreene@ku.edu

The Center for East Asian Studies (CEAS) at The University of Kansas will offer a new M.A. program in Contemporary East Asian Studies, beginning with the 2013-2014 school year. This 12-month interdisciplinary area studies program focused on 20th and 21st century East Asia will provide students with

1. in-depth interdisciplinary knowledge of the modern history, politics, economy, and society of one East Asian country;
2. broad knowledge of modern East Asia; and
3. social science research skills and methods appropriate to international area studies.

A wide range of course options across academic disciplines will enable students to earn expertise in their target country while also enhancing their regional knowledge and global perspectives. With the creation of this program, KU has become one of the few universities in the United States to offer an M.A. program focusing on contemporary East Asia that can be completed in 12 months by students with prior language preparation.
All candidates for the M.A. degree are required to complete 30 semester hours of graduate credit, including an introductory course, a social science methods course, and a research seminar, at a satisfactory level, and to demonstrate proficiency in an East Asian Language at either the second or third level, depending on the concentration. In addition to completing required coursework, students must prepare at least one research paper and successfully pass an oral defense of that paper to the satisfaction of an M.A. examination committee.

There are two concentrations to choose from: 1. Contemporary East Asia (http://ceas.drupal.ku.edu/curriculum) 2 Foreign Affairs Studies (FAS): Contemporary East Asia in Global Content (http://ceas.drupal.ku.edu/foreign-affairs-studies-fast-contemporary-east-asia-global-context).

If you are a Foreign Area Officer interested in our program, please read Information for FAOs. (http://ceas.drupal.ku.edu/overview-0)

Department of Ecology and Evolutionary Biology

Ecology and Evolutionary Biology Graduate Programs

The department comprises a large number of biologists with a variety of research interests. 3 broad overlapping themes capture the interests and activities in EEB — biodiversity and macroevolution, ecology and global change biology, and evolutionary mechanisms. The department offers graduate study leading to Master of Arts and Doctor of Philosophy degrees in botany, entomology, and ecology and evolutionary biology. General information about the department and its faculty, current graduate students, admission, and financial support may be found on the department's website (http://www2.ku.edu/~eeb).

Neotropical biodiversity is a special area of concentration among EEB faculty. Many faculty members have courtesy appointments in the Latin American Area Studies Program, which fosters multidisciplinary research in Latin America across the campus. KU is a member of the Organization for Tropical Studies, and many faculty members and students participate in advanced, field-oriented OTS courses. Graduate students can receive fellowships for courses, e.g. BIOL 786 Fundamentals of Tropical Biology, or research projects in Costa Rica. Other EEB faculty have research concentrations in Asia, Africa, Antarctica, and elsewhere, creating a genuinely global reach for EEB research activities.

(B.A. and B.S. degree programs in biology are listed under Biology Undergraduate Programs (p. 1166).)

Facilities

Departmental physical facilities include laboratories, natural history collections, and field-study sites near the university. Most laboratory facilities are in Dyche Hall, Higuchi Hall, McGregor Herbarium, Haworth Hall, and the Public Safety Building. Special facilities in Haworth include controlled-environment rooms, greenhouses, and various instrument rooms, including an excellent electron microscope laboratory.

The natural history collections are housed by the Biodiversity Institute and include approximately 8 million specimens, including mammals, birds, reptiles, amphibians, fishes, arthropods and other invertebrates, parasites, and plants, as well as fossils of vertebrates, arthropods, other invertebrates, and plants. Collections support diverse research in evolutionary biology, paleobiology, and ecology including systematics, phylogenetics, biogeography, morphology, behavior, biodiversity informatics, and biotic surveys and inventories. The BI also has leading facilities for diverse analyses of biodiversity information, including well-equipped spatial analysis laboratories, and extensive facilities for molecular systematics.

The Kansas Biological Survey is a KU research and service unit and a nonregulatory state agency, whose mission is to gather information on the kinds, distribution, and abundance of plants and animals in Kansas, and to compile, analyze, interpret, and distribute this information broadly. KBS is a nationally recognized leader in several fields of environmental research and maintains a strong tradition of natural history studies. Scientists at KBS study terrestrial ecosystem ecology, aquatic ecology, water quality, biodiversity, ecology and population biology of animals and plants, and conservation and restoration of natural communities. KBS researchers routinely use technologies such as satellite and airborne remote sensing, aerial photography, and Geographic Information Systems.

KBS administers the University of Kansas Field Station, 3,400 acres of field-sites dedicated to environmental research and education. KUFS sites are in the transition zone between the Eastern Deciduous Forest and Tallgrass Prairie biomes and include woodland, prairie, old fields, and wetlands. The Fitch Natural History Reservation and Baldwin Woods are used primarily to study unmanipulated ecological processes in undisturbed habitats. The John H. Nelson Environmental Study Area is used for experimental ecological studies and has experimental ponds, a dedicated lake and watershed, a common garden, small-mammal enclosures, and a succession facility.

Courses

BIOL 100. Principles of Biology. 3 Hours NB GE3N / N. Intended for non-science majors. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. An honors section, BIOL 101, is offered for students with superior academic records. BIOL 100 and BIOL 102 (or BIOL 101 and BIOL 103, honors) satisfy the College natural science with laboratory requirement. Concurrent enrollment in BIOL 102 is recommended. LEC.

BIOL 101. Principles of Biology, Honors. 3 Hours NB GE3N / N. Intended for non-science majors with superior academic records. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. Concurrent enrollment in BIOL 102 or BIOL 103 is recommended. BIOL 101 and either BIOL 102 or BIOL 103 satisfy the College natural science with laboratory requirement. Prerequisite: Membership in the College Honors Program or consent of instructor. LEC.

BIOL 102. Principles of Biology Laboratory. 1 Hour U / LFE. Intended for non-science majors. Exercises are designed to give the student hands-on experience with selected topics from the associated lecture course (BIOL 100). An honors laboratory (BIOL 103) is offered for students with superior academic records. Prerequisite: Concurrent enrollment in BIOL 100 is recommended. LAB.

BIOL 103. Principles of Biology Laboratory, Honors. 1 Hour U / LFE. Intended for non-science majors with superior academic records. Exercises are designed to give the students hands-on experience with selected topics from the associated lecture course (BIOL 101). Prerequisite: Membership in the College Honors Program or consent of instructor. Concurrent enrollment in BIOL 101 is recommended. LAB.
BIOL 105. Biology Orientation Seminar. 1 Hour N.
Introduces interested students to information about majoring in the biological sciences at the University of Kansas. Students learn about degree requirements, academic advising, research opportunities, and career options, as well as how to align academic and professional goals. Graded on a satisfactory/unsatisfactory basis. LEC.

BIOL 110. Microorganisms in Your World. 3 Hours NB / N.
A course for students who are not science majors. Designed to acquaint students with some microbial activities which affect their lives. Includes the historical development of microbiology, the basic principles of microbial growth, disinfection, antibiotics, infection, and immunity; and some commercial, agricultural, and industrial uses of microorganisms. Emphasis is on infectious diseases. Not open to students with any credit in microbiology. May not be counted as a prerequisite for any other microbiology course. LEC.

BIOL 116. Introduction to Evolutionary Biology. 3 Hours N / LFE.
An account of evolutionary thinking from classical to contemporary time. The emphasis is on mainstream developments (Darwinism, Mendelism, the Modern Synthesis, Cultural Ecology), but certain social issues will be examined (social Darwinism, creationism). LEC.

BIOL 120. Insects in Your World. 3 Hours NB GE3N / N.
Students will learn about the global impact of insects on human concerns, both positive (pollination and decomposition) and negative (competition with humans for food, fiber, and shelter, and disease transmission) while developing an appreciation for the ways in which scientists work with real problems involving insects. The course will cover the overwhelming abundance and diversity of insects, and their life history, ecology, behavior, and physiology. This course is intended for both nonbiology and biology majors. Format: two lectures and one discussion section per week. LEC.

BIOL 150. Principles of Molecular and Cellular Biology. 4 Hours NB GE3N / N / LFE.
An integrated lecture and laboratory course for biology majors and students planning to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture and three hours of laboratory per week. An honors section (BIOL 151) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130, CHEM 190, CHEM 150, or CHEM 170, or consent of instructor. LEC.

BIOL 151. Principles of Molecular and Cellular Biology, Honors. 4 Hours NB GE3N / N / LFE.
An integrated lecture and laboratory course for students with superior academic records who are biology majors or who plan to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture and three hours of laboratory per week. Prerequisite: Membership in the University Honors Program and concurrent or prior enrollment in CHEM 130, CHEM 190, CHEM 150, or CHEM 170, or consent of instructor. LEC.

BIOL 152. Principles of Organismal Biology. 4 Hours NB GE3N / N / LFE.
An integrated lecture and laboratory course for biology majors and students who plan to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture and three hours of laboratory per week. An honors section (BIOL 153) is offered for students with superior academic records. Prerequisite: BIOL 150 or BIOL 151 with a grade of C- or higher; or consent of instructor. LEC.

BIOL 153. Principles of Organismal Biology, Honors. 4 Hours NB GE3N / N / LFE.
An integrated lecture and laboratory course for students with superior academic records who are biology majors or planning to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture and three hours of laboratory per week. Prerequisite: BIOL 150 or BIOL 151 with a grade of C- or higher and membership in the University Honors Program; or consent of instructor. LEC.

BIOL 155. Principle Lab in: ____. 1-3 Hours U / LFE.
This introductory laboratory exposes the students to basic principles in biology and modern experimental techniques through an open-ended authentic research experience directed by a faculty member. Prerequisite: Consent of instructor. LEC.

BIOL 177. First Year Seminar: ____. 3 Hours NB GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in biology. Does not contribute to major requirements in biology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

BIOL 200. Basic Microbiology. 3 Hours NB GE3N / N.
Introduction to bacteria and viruses. Topics include historical development of microbiology, bacterial structure and growth, enzymes and energy production, disinfection, antibacterial drugs, gene transfer, viral replication, infection and immunity, with emphasis on infectious diseases. Can be substituted for BIOL 201 as a prerequisite for other microbiology courses by consent of department. Not open to those with credit in BIOL 110, BIOL 201, BIOL 400, or BIOL 401. Prerequisite: A course in high school biology and a course in high school chemistry. This course is not recommended for first semester freshmen. LEC.

BIOL 203. Introductory Microbiology Laboratory. 2 Hours U / LFE.
Laboratory exercises to complement BIOL 200. Prerequisite: BIOL 200. May be taken concurrently. LAB.

BIOL 210. Introduction to Clinical Laboratory Sciences. 1 Hour U.
An introductory overview of medical technology as a profession including types of analyses performed, specialties, interrelationships in the health care system and a visit to a clinical laboratory. This course will enable those considering a major in medical technology to have a clear definition of the profession. This course does not meet any degree requirements in biology. No prerequisite. (Same as CLS 210.) LEC.

BIOL 215. Plants Through Time. 3 Hours NB / N.
Examines the evolution of plants and their environments from the origin of life to the present, including the historical development of the biosphere, mass extinctions (past and present), and social implications of future climate changes and deforestation. Not recommended for students with credit in GEOL 121. LEC.

BIOL 225. Evolution and the History of Life. 3 Hours GE3N / N.
This introductory course for non-majors focuses on the significance of the history of life and the fossil record for our understanding of evolution. Key events in the history of life are considered, including the origins of life, the eukaryotic cell, and humans, and also various mass extinctions. The focus is on general scientific and evolutionary principles and mechanisms that can be extracted from the study of the fossil record. It also uses the
lessons of the fossil record to consider the prospects for our own species.

LEC.

**BIOL 240. Fundamentals of Human Anatomy. 3 Hours N.**
Introduction to the gross anatomy of the human body. Covers the spatial arrangement and appearance of structures throughout the body, including visual identification of these structures. Musculoskeletal relationships, and the anatomy of major organ systems, are emphasized. Not intended for biology majors. Prerequisite: BIOL 100, or equivalent. LEC.

**BIOL 241. Human Anatomy Observation Laboratory. 2 Hours U / LFE.**
One of the two laboratories in gross anatomy designed to complement BIOL 240. Emphasizes the three-dimensional appearance and spatial relationships of anatomical structures through supervised observations of pre-dissected human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy observation laboratory. Prerequisite: Concurrent or prior enrollment in BIOL 240 is required. LAB.

**BIOL 242. Human Anatomy Dissection Laboratory. 3 Hours U / LFE.**
One of the two laboratories in gross anatomy designed to complement BIOL 240. Provides an opportunity to develop a comprehensive three-dimensional understanding of anatomical structures and spatial relationships while gaining substantial dissecting experience. Student perform supervised dissection of human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy laboratory. Concurrent or prior enrollment in BIOL 240 is required. LAB.

**BIOL 246. Principles of Human Physiology. 3 Hours N.**
An introduction to the physiological and biochemical processes and general physiological principles necessary to sustain life. Organ and organ system processes are emphasized. Intended for students majoring in allied health or sports related curricula who require a course in human physiology. Not intended for biology majors. Prerequisite: BIOL 100 or equivalent. LEC.

**BIOL 247. Principles of Human Physiology Laboratory. 2 Hours U / LFE.**
Designed to complement BIOL 246. Uses experiments and simulations to demonstrate laboratory techniques and representative processes in areas of human physiology. Concurrent or prior enrollment in BIOL 246 required. LAB.

**BIOL 350. Principles of Genetics. 4 Hours N.**
Why are related individuals more similar than unrelated individuals and what is the basis for heritable traits? From Mendel's discoveries of the patterns of genetic inheritance, to the study of transmissible hereditary factors, genetics is central to understanding the biological sciences. Topics include molecular genetics and genetic engineering; Mendelian genetics and mapping; control of gene expression; cytogenetics; epigenetics and non-Mendelian genetics; and population and quantitative genetics. Examples are taken from a wide variety of organisms, including viruses, bacteria, plants, fungi, insects, and humans. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 with a grade of C- or higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL 152 or BIOL 153 with a grade of C- or higher; or consent of instructor. LEC.

**BIOL 360. Principles of Genetics, Honors. 4 Hours N.**
The science of genetics aims to explain why individuals differ from one another and how these differences are inherited. Honors Genetics covers all core topics in fundamental genetics: Mendelian inheritance, meiosis and recombination, mutation, molecular genetics, population genetics, quantitative genetics and genomics. Special attention given to the practice of genetics and the complex relationship between genotype, phenotype and environment. A broader goal of Honors Genetics is to provide students a framework for understanding recent advances in medical genetics and the modern era of personal genomics. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 with a grade of C- or higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL 152 or BIOL 153 with a grade of C- or higher and membership in the University Honors Program; or consent of the instructor. LEC.

**BIOL 400. Fundamentals of Microbiology. 3 Hours NB GE3N / N.**
Fundamental principles of microbiology with emphasis on physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics, pathogenesis and immunity, industrially important microorganisms. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of the instructor. LEC.

**BIOL 401. Fundamentals of Microbiology, Honors. 4 Hours N.**
Honors section of BIOL 400 and BIOL 612. by application and invitation. Prerequisite: BIOL 151, two semesters of college chemistry, and membership in the University Honors Program, or consent of the instructor. LEC.

**BIOL 402. Fundamentals of Microbiology Laboratory. 2 Hours U / LFE.**
Laboratory exercises designed to complement BIOL 400 or BIOL 700. Prerequisite: BIOL 400 or BIOL 612, or BIOL 400 or BIOL 612 concurrently. LAB.

**BIOL 405. Laboratory in Genetics. 2 Hours U / LFE.**
A laboratory program which includes written reports on fruit fly crosses, exercises on meiosis, probability and statistics, human genetics and computer simulations of genetics problems. Prerequisite: Concurrent or prior (preferred) enrollment in BIOL 350 or its equivalent. LAB.

**BIOL 408. Physiology of Organisms. 3 Hours N.**
A comprehensive and integrative approach to the study of organisms with an emphasis on physiological, ecological, structural, and behavioral adaptations to differing environments. Prerequisite: BIOL 152 or BIOL 153 and CHEM 130 or CHEM 190 or CHEM 170; or consent of the instructor. LEC.

**BIOL 409. Physiology of Organisms, Laboratory. 2 Hours U / LFE.**
The laboratory exposes the students to the structure and function of the major groups of animals and plants. Students use basic techniques of biological observation, such as microscopy and dissection, and experimental techniques to analyze plant and animal function. Prerequisite: Concurrent or prior enrollment in BIOL 408, or consent of the instructor. LAB.

**BIOL 410. Human Biogeography, Honors. 3 Hours N.**
Principles of evolution and earth change are used to examine distributions of human populations, wealth, and resources. Readings from the current literature will be included. Lecture and discussion. (Same as GEOG 410.) Prerequisite: BIOL 152 or BIOL 153 or GEOG 107 and membership in the University Honors Program or consent of instructor. LEC.

**BIOL 412. Evolutionary Biology. 4 Hours N.**
Introduction to the patterns and processes of organic evolution. Considered are the history of evolutionary thought, molecular evolution, genetics and microevolution, selection and adaptation, and speciation and macroevolution. Emphasis will be placed on how scientists study and document change over time in natural populations, methods for testing hypotheses about events in evolutionary history, and how discovering evolutionary mechanisms at one level of organization can help to explicate general processes in the natural world. Prerequisite: BIOL 152 and BIOL 350, or consent of the instructor. LEC.
BIOL 413. History and Diversity of Organisms. 3 Hours N / LFE.
An integrated lecture and laboratory course presenting an overview of the variety and ancestry of life on earth. Using representatives from prokaryotes, protists, plants, fungi, and animals, principles of phylogenetic reconstruction are illustrated and evolutionary trends in the life history features, functional morphology, and structural complexity of extant and extinct organisms are presented. Two hours of lecture and three hours of laboratory per week. Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor. LEC.

BIOL 414. Principles of Ecology. 3 Hours N.
Study of the principles underlying species population density changes, community structure and dynamics, biogeochemical cycles, and energy flow and nutrient cycling in ecosystems. Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor. LEC.

BIOL 415. Field and Laboratory Methods in Ecology. 2 Hours N.
This course complements BIOL 414 with field trips and laboratory exercises that illustrate the basic concepts of ecology. Topics covered include methodologies for quantitative sampling of terrestrial and aquatic systems, design of field studies, computer simulation and digital data analysis techniques, and scientific writing. Prerequisite: Concurrent or prior enrollment in BIOL 414. A statistics course is recommended. FLD.

BIOL 416. Cell Structure and Function. 3 Hours N.
Lecture survey of molecular cell biology with emphasis on experimental approaches to understanding cell function; topics include biological membranes and transmembrane transport, vesicular trafficking (secretion and endocytosis), cell signaling, cell motility and the cytoskeleton, and the regulation of the cell division cycle. Prerequisite: BIOL 150 or BIOL 151; BIOL 350 or BIOL 360; CHEM 130 or CHEM 190 or CHEM 170; and CHEM 135 or CHEM 195 or CHEM 175, or consent of the instructor. LEC.

BIOL 417. Biology of Development. 3 Hours N.
A general course designed to introduce students to the developmental biology of animals. Emphasis is placed on understanding how a single-celled fertilized egg develops into a complex multicellular organism by the processes of cell division, differentiation, growth, and morphogenesis. Lectures stress experimental approaches to investigating development, including classic embryology and modern molecular genetics. Prerequisite: BIOL 350 or consent of the instructor. LEC.

BIOL 418. Laboratory in: _____ 1-3 Hours U / LFE.
A varied program of laboratory and fieldwork designed to introduce students to investigative approaches in the study of the basic concepts of biological science. Students may enroll in more than one section. Prerequisite: BIOL 100, BIOL 101, BIOL 150, BIOL 151, or exemption. Each section may have additional prerequisites to be determined by instructor. LAB.

BIOL 419. Topics in: _____ 1-3 Hours N / LFE.
Courses on special topics in biology, given as need arises. May be lectures, discussions, readings, laboratory, or fieldwork. Students may select sections according to their special needs. IND.

BIOL 420. Seminar: _____ 1-3 Hours N.
The preparation and presentation of oral reports on selected topics from the recent research literature. Students may choose one interest group each semester, but may enroll in a given interest group only once. Enrollment in each interest group limited to twenty students. Prerequisite: Course work varying with the topic of the seminar, or consent of instructor. LEC.

BIOL 421. Topics in Molecular Biosciences: _____ 3 Hours N.
Lecture instruction and the preparation and presentation of oral and written reports on selected topics from the recent research literature in molecular biosciences. Students may enroll in a given topic only once. Prerequisite: Course work varying with the topic of the seminar; or consent of instructor. LEC.

BIOL 422. Non-laboratory Independent Study. 1-9 Hours AE61 / N.
Original study in discussion or preparation of review papers on selected topics of current interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor. IND.

BIOL 424. Independent Study. 1-9 Hours AE61 / N.
Original study in laboratory or field in selected topics of current research interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor. IND.

BIOL 425. Teaching Apprenticeship in Biology. 1-9 Hours N.
Involvement as teaching assistant for a course in Biology. Credit hours shall not exceed the credits offered for the course being taught. May be undertaken only with the consent of the Director of Undergraduate Biology and of the faculty member who will teach the course. Prerequisite: Consent of instructor and Director of Undergraduate Biology. FLD.

BIOL 426. Laboratory in Cell Biology. 3 Hours U / LFE.
Laboratory exercises will examine the function, organization, and composition of eukaryotic cells. Prerequisite: BIOL 150 or BIOL 151, CHEM 130 or CHEM 190 or CHEM 170; concurrent or prior enrollment in BIOL 416 or BIOL 536; or consent of the instructor. BIOL 350 or BIOL 360 is highly recommended. LAB.

BIOL 428. Introduction to Systematics. 3 Hours N.
Basic elements of systematic theory and practice; phylogenetic reconstruction using morphological and molecular data; interpretation of phylogenetic hypotheses; principles of nomenclature and classification; evolutionary processes and patterns of species diversity; discussion of the aims and needs of taxonomy; species and speciation; construction of keys; significance of biological collections. Prerequisite: BIOL 152 or BIOL 153. Not intended for students with advanced systematics background. LEC.

BIOL 430. Laboratory in Molecular Biology. 3 Hours U / LFE.
Practical experience in recombinant DNA technology and molecular cloning. Prerequisite: BIOL 416 or a course in biochemistry or microbiology. LAB.

BIOL 432. Human Behavioral Genetics. 3 Hours S.
A survey of human behavioral genetics for upper division undergraduates. Emphasis is on how the methods and theories of quantitative, population, medical, and molecular genetics can be applied to individual and group differences in humans. Both normal and abnormal behaviors are covered, including intelligence, mental retardation, language and language disorders, communication, learning, personality, and psychopathology. (Same as ANTH 447, PSYC 432, SPLH 432.) Prerequisite: Introductory courses in biology/genetics or biological anthropology and psychology are recommended. LEC.

BIOL 435. Introduction to Neurobiology. 3 Hours N.
Basic principles of neurobiology. The focus will be on the nature of communication among nerve cells and their targets. Topics will include the development, structure and function of nerve cells, chemistry of neurotransmission, processing and integration including the cellular and molecular basis of higher functions and neurological disorders. Prerequisite: BIOL 150 or BIOL 151. LEC.

BIOL 440. Advanced Human Anatomy. 6 Hours N / LFE.
Integrated lecture and laboratory course designed to provide students with a detailed understanding of the structure of the human body. Cadaver dissection will reinforce three-dimensional relationships discussed in
BIOL 448. Kansas Plants. 3 Hours N.
A study of common and important non-cultivated Kansas plants, with special emphasis on the ecology of the state; paleoecological and paleobotanical background of the central prairies and plains; present climate, physiography and vegetation; poisonous, edible, and medicinal plants; identification by means of simplified keys. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 449. Laboratory/Field Work in Human Biology. 1-3 Hours AE61 / N.
Faculty supervised laboratory or field research for Human Biology majors. Students design and complete a research project in collaboration with a Human Biology faculty member. (Same as ANTH 449, PSYC 449, and SPLH 449.) Prerequisite: Consent of instructor and Human Biology major. LEC.

BIOL 454. Brain Diseases and Neurological Disorders. 3 Hours N.
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., are discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Prerequisite: BIOL 408 or BIOL 416 or BIOL 435 or BIOL 646, or consent of instructor. LEC.

BIOL 461. Biodiversity of the Rainforest. 3 Hours N.
An introduction to birds, bats, and plants of the rainforest, with emphasis on general characteristics of each of the taxa and their relationship to the tropical ecosystem, as well as their particular anatomy, ecology, behavior, and diversity. Field work focuses on identification of birds and bats (at species level), plants (at family level), and on capturing and preservation techniques. Taught in Golfito, Costa Rica. Contact Undergraduate Biology, or the Office of Study Abroad. Prerequisite: BIOL 150 or BIOL 151 and BIOL 152 or BIOL 153, or equivalent. Fall and spring semester courses are taught in Spanish; therefore, four semesters of Spanish are required. Summer courses are taught in English. LEC.

BIOL 463. Introduction to Ornithology of the Tropics. 4 Hours N.
A theory and practice course on birds. Course covers morphology, reproduction, evolution, ecology, and behavior, as well as systematics of Costa Rican birds. Course includes field work on bird identification. Taught in Golfito, Costa Rica. Contact Undergraduate Biology, or the Office of Study Abroad. Prerequisite: BIOL 150 or BIOL 151 and BIOL 152 or BIOL 153, or equivalent. Fall and spring semester courses are taught in Spanish; therefore, four semesters of Spanish are required. Summer courses are taught in English. LEC.

BIOL 465. Marine Biology. 4 Hours N.
A theory and practice course on biotic relations, the role of organisms and marine biodiversity. It covers basic marine principles and physico-chemical processes (temperature, salinity, dissolved oxygen, nutrients, and pH in the water) and their effect on the abundance, and horizontal and vertical distribution of marine organisms. Course includes field work on data collection. Taught in Golfito, Costa Rica. Contact Undergraduate Biology, or the Office of Study Abroad. Prerequisite: BIOL 150 or BIOL 151 and BIOL 152 or BIOL 153, or equivalent. Fall and spring semester courses are taught in Spanish; therefore, four semesters of Spanish are required. Summer courses are taught in English. LEC.

BIOL 466. Fresh Water Ecology. 4 Hours N.
A theory and practice class on the study of rivers and lagoons. It includes systematics of rivers, lagoons, and reservoirs. Course includes theory and field work to monitor physical (stream topography, flow, edge vegetation), chemical (nutrients, temperature, pH levels, dissolved oxygen), and biological (collecting and identification of aquatic insects) conditions in rivers. Taught in Golfito, Costa Rica. Contact Undergraduate Biology, or the Office of Study Abroad. Prerequisite: BIOL 150 or BIOL 151 and BIOL 152 or BIOL 153, or equivalent. Fall and spring semester courses are taught in Spanish; therefore, four semesters of Spanish are required. Summer courses are taught in English. LEC.

BIOL 467. Marine Resources Management. 3 Hours N.
A theory and practice course which focuses on the techniques used for monitoring the growth of fish, shrimp, and mollusks, with the purpose of understanding the variables that could produce the best yields. The course covers ecology (population growth, competition, predators, ecosystem dynamics), and fishery biology (growth, fish yield, capture efficiency) applicable in the field experiments. Taught in Golfito, Costa Rica. Contact Undergraduate Biology, or the Office of Study Abroad. Prerequisite: BIOL 150 or BIOL 151 and BIOL 152 or BIOL 153, or equivalent. Fall and spring semester courses are taught in Spanish; therefore, four semesters of Spanish are required. Summer courses are taught in English. LEC.

BIOL 468. Ecology and Global Change. 3 Hours N.
Humans influence both natural and managed ecosystems. This course studies the effects of climate change, land-use change, and reductions in biodiversity on ecosystems. Emphasis is placed on how biological and physical processes may be perturbed by human influences. Topics include the greenhouse effect, species extinctions, human disease expansion, and the effects of global change on agricultural productivity. A combination of lectures and discussion address issues from a scientific basis and link these ecological issues to our everyday lives and society as a whole. Prerequisite: BIOL 152, BIOL 153, or equivalent, or permission of instructor. LEC.

BIOL 469. Introduction to Honors Research. 2 Hours N.
Intended for sophomores planning to enroll in the Biology Honors Program. Students interested in pursing Biology Honors discuss with Biology faculty members the rationale, methods, and interpretations of research being carried out in individual faculty labs to learn how scientific research is conducted. Prerequisite: At least 17 credit hours of college level natural sciences coursework or consent of instructor. LEC.
to human affairs. Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. LEC.

BIOL 502. Laboratory in Insect Biology and Diversity. 2 Hours U / LFE.
Lectures and discussions covering the basic nature and characteristics of insects, emphasizing their diversity, classification, ecological relationships, morphology, and behavior. Course provides practical application of principles covered in BIOL 500. Prerequisite: Concurrent or prior enrollment in BIOL 500 or the equivalent. LAB.

BIOL 503. Immunology. 3 Hours N.
Lectures on the nature and mechanisms of natural and acquired resistance including humoral and cellular immunity. Characteristics of antigens and antibodies and of their interaction; ontogeny and cellular basis of immune responsiveness, hypersensitivity; specific immunologic tolerance. Prerequisite: BIOL 400 or BIOL 401, or consent of instructor. LEC.

BIOL 504. Immunology Laboratory. 2 Hours U / LFE.
Laboratory designed to complement BIOL 503. Prerequisite: BIOL 503, or BIOL 503 concurrently. LAB.

BIOL 505. Social Insects. 3 Hours N.
Lectures and laboratory demonstrations on presocial and social insects, specifically termites, ants, wasps, and bees. Emphasis will be placed on evolution of social behavior and the place of social insects in sociobiology. Prerequisite: BIOL 152, BIOL 153, or equivalent. LEC.

BIOL 506. Bacterial Infectious Diseases. 3 Hours N.
Explores bacterial infectious diseases from the perspective of how disease is established and the mechanisms that underlie disease, as well as how to treat and prevent infectious disease. Not open to freshmen or sophomores. Prerequisite: BIOL 400 or BIOL 401, or consent of instructor. LEC.

BIOL 507. Pathogenic Microbiology Laboratory. 2 Hours U / LFE.
Laboratory to complement BIOL 506. Cultivation of pathogenic microorganisms, diagnostic procedures, and experiments to demonstrate various aspects of microbial pathogenicity and host responses. Prerequisite: BIOL 402 and BIOL 506 (or concurrent enrollment) or consent of instructor. LAB.

BIOL 509. Biology of Spiders. 3 Hours N.
An introduction to the evolution, anatomy, physiology, behavior, and ecology of spiders and other arachnids. Special topics include the action of spider venoms; the composition and uses of silk; courtship and mating; predation; social behavior; and the role of spiders in natural and agricultural ecosystems. Concurrent enrollment in BIOL 511 is encouraged. Prerequisite: BIOL 152, BIOL 153 or permission of instructor. LEC.

BIOL 510. Comparative Anatomy. 5 Hours N / LFE.
Structure, function, and evolution of the vertebrates. Lectures and laboratory study. A course designed for zoologists. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 511. Biology of Spiders Laboratory. 1 Hour U / LFE.
Topics will include comparative biology of arachnid orders (spiders, scorpions, harvestmen, mites, and others), external and internal anatomy of spiders, identification of common spider families and genera, and spider behavior. Students will be required to make a small collection (collect, preserve, and identify specimens). Prerequisite: BIOL 509; concurrent enrollment is preferred. LAB.

BIOL 512. General Virology. 3 Hours N.
Lectures and discussions covering the basic nature and characteristics of viruses from a general biological point of view: viruses of bacteria, animals and plants, physical-chemical properties; host cell-viral interactions; mode of replication of DNA and RNA viruses, tumor viruses. Prerequisite: BIOL 400, BIOL 401 or consent of instructor. LEC.

BIOL 513. Virology Laboratory. 2 Hours U / LFE.
Experiments involving cultivation, quantitation, and identification of animal viruses, continuous cell culture and primary chicken embryo culture techniques. Molecular biology techniques are used to demonstrate the steps in virus replication. The value of viruses as tools to understand normal cellular processes is emphasized in experiments which demonstrate the relative simplicity of viruses and the relative complexity of eukaryotic cells. Demonstrations include transformation of cells by tumor viruses and electron microscopy of virus particles. Prerequisite: BIOL 402 and BIOL 512, or consent of instructor. LAB.

BIOL 514. Principles of Ecology, Honors. 3 Hours N.
Honors section of BIOL 414 for students with superior academic records. Course covers core concepts on the ecology of individuals, populations, communities, and ecosystems. Relative to BIOL 414, topics are presented in greater depth with increased student participation and stronger emphasis on the primary scientific literature. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. Open only to students admitted to the University Honors Program or by consent of instructor. LEC.

BIOL 516. Microbial Physiology. 3 Hours N.
Elements of microbial physiology. Carbohydrate metabolism; enzymes and coenzymes; microbial nutrition; quantitative problems in microbial physiology; a survey of microbial metabolic types. Prerequisite: BIOL 400 or BIOL 612 and BIOL 402, and five hours of organic chemistry. LEC.

BIOL 517. Microbial Physiology Laboratory. 2 Hours U / LFE.
Laboratory designed to complement BIOL 516. Prerequisite: BIOL 516, or BIOL 516 concurrently. LAB.

BIOL 518. Microbial Genetics. 3 Hours N.
Bacteria and viruses as models of genetic systems. Mutagenesis and repair. Transformation, transductions, and recombination. Molecular biology of gene expression. Prerequisite: An introductory microbiology course. LEC.

BIOL 519. Microbial Genetics Laboratory. 2 Hours U / LFE.
Laboratory designed to complement BIOL 518. Prerequisite: BIOL 402, BIOL 518, or BIOL 518 concurrently. LAB.

BIOL 520. Marine Biology. 3 Hours N.
This introductory course covers biological, physical, and chemical ocean sciences, with an emphasis on ecological aspects. In addition to this Lawrence campus course, students may enroll for a supplementary 1 credit field trip class to a Caribbean coral reef island offered in December or January. Prerequisite: BIOL 414 or permission of the instructor. LEC.

BIOL 521. Insect Systematics. 4 Hours N.
A study of the diversity of insects, including the classification of all living and fossil orders and the more common families primarily on the basis of external morphology. The biology, ecology, phylogeny, and geological history of each order is covered. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 525. Aquatic Entomology. 4 Hours N.
Designed to enable students to develop skill in the area of identification of aquatic insects and to gain a detailed comprehension of their community structure and dynamics. The external morphology of all aquatic orders is covered, followed by consideration of specific physiological and behavioral adaptations that facilitate an aquatic existence. Includes
both lectures and laboratory exercises. Requirements include making a collection of aquatic insects. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 414 or BIOL 500. LEC.

**BIOL 526. Insect Physiology and Internal Morphology. 3 Hours N.**
Mechanisms and integration of the internal life-supporting systems of insects, emphasizing the interdependence of structure and function. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 408 and BIOL 500, or permission of instructor. LEC.

**BIOL 527. Primate Evolution and the Fossil Record. 3 Hours N.**
This course exposes students to fundamental concepts of paleontology and evolutionary biology using the mammalian order Primates as a high-profile case study. Primates are interesting partly because humans are primates. Hence, scientific understanding of human origins and human evolution must be grounded in knowledge of our nearest relatives. This course places human origins within the broader framework of how primates have evolved over the course of the Cenozoic Era, often in response to radical changes in the Earth's physical environment. Prerequisite: BIOL 413 or BIOL 414, or consent of the instructor. LEC.

**BIOL 528. External Morphology of Insects. 4 Hours N.**
A study of external structure common to all insect orders, with detailed comparative laboratory studies of representative species. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

**BIOL 529. Immature Insects. 3 Hours N.**
The classification, structure, and ecological distribution of immature insects, especially larvae of Holometabola. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 502 or permission of instructor. LEC.

**BIOL 530. Biodiversity Discovery and Assessment. 2 Hours N.**
An integrated lecture and laboratory course designed to provide an overview of modern methods in biodiversity exploration and discovery. Lectures cover the theory and practice of planning fieldwork in remote locations, documenting species and their natural history, how museum collections are made, calculating and comparing species richness estimates, and the process of describing and naming new species. The laboratory component provides students with an opportunity to experience these concepts in a practical setting. Prerequisite: BIOL 150, BIOL 152, or BIOL 153. LEC.

**BIOL 531. Tropical Fieldwork in Biodiversity Discovery. 1 Hour U.**
An introduction to modern field methods of assessing biodiversity. Fieldwork employs insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. Prerequisite: BIOL 152, 153, or consent of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged. LAB.

**BIOL 533. Biology of Fungi. 4 Hours N / LFE.**
A study of the major groups of fungi from slime molds to mushrooms. Emphasis on their activities in natural substrates, isolation techniques, parasitic and mutualistic relationships with other organisms, uses in research, industrial applications, production of mycotoxins and poisons, and physiological, genetic and reproductive behavior. Lectures, laboratory, and field trips. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

**BIOL 536. Cell Structure and Function (Honors). 3 Hours N.**
BIOL 536 is the honors version of BIOL 416. Completion of this class will satisfy the BIOL 416 requirement. Open to students in the Honors program or by permission of instructor. Prerequisite: BIOL 350 or consent of instructor. LEC.

**BIOL 540. General Invertebrate Zoology. 4 Hours N / LFE.**
Phylogeny, physiology, and embryology; evolutionary processes; characteristics of major ecological groupings. Laboratory will consider major taxonomic categories with emphasis on functional morphology and its evolutionary modifications. Prerequisite: BIOL 152 or BIOL 153. LEC.

**BIOL 541. Biology of Freshwater Invertebrates. 3 Hours N.**
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Prerequisite: BIOL 152 or BIOL 153; recommended BIOL 414 or BIOL 514, and/or BIOL 540. LEC.

**BIOL 545. Evolution of Development. 5 Hours N.**
An advanced course designed to expose students to evolutionary change in the developmental patterning of plant and animal form. This course includes a lecture component and a laboratory component to integrate multiple biological disciplines including comparative morphology, molecular evolution, developmental genetics and experimental development, to explore biodiversity at a mechanistic level. Lectures are designed to give students background on topics ranging from homology assessment to empirical examples of how changes in gene expression or function may have shaped morphological diversity. The laboratory complements these topics through observations of normal development in a diversity of plant and animal model organisms, and through conducting independent research experiments. Prerequisite: BIOL 350 or equivalent. LEC.

**BIOL 555. General Plant Physiology. 3 Hours N.**
The principal physiological processes of higher plants including photosynthesis, respiration, water relations, mineral nutrition, and factors associated with morphogenesis. Prerequisite: BIOL 408 or consent of instructor. LEC.

**BIOL 560. Histology. 3 Hours N.**
Study of detailed microscopic anatomy of cells, tissues, and organs of mammals. Examples are drawn from normal and abnormal tissue, histochemistry, and electron microscopy. Lecture and demonstrations. A course in anatomy and physiology is highly recommended. Prerequisite: BIOL 152 or BIOL 153. LEC.

**BIOL 570. Introduction to Biostatistics. 3 Hours N / LFE.**
Statistical concepts related to biological problems. Topics include the scientific method, data representation, descriptive statistics, elementary probability distributions, estimation and hypothesis testing, emphasizing the analysis of variation. Prerequisite: College algebra and ten hours of natural science. LEC.

**BIOL 571. Introduction to Biostatistics Laboratory. 2 Hours U / LFE.**
Introductory statistical analyses on microcomputers. Data entry and export; simple graphs and exploratory data analysis; descriptive statistics; sampling; point and interval estimation; one and two sample t-tests; Chi-square; regression and correlation; analysis of variance; and nonparametric methods. Prerequisite: BIOL 570 or equivalent (may be taken concurrently). LAB.
BIOL 582. Principles of Biogeography. 3 Hours N.
An introduction to the study of the distribution of life on earth. Covers geographical patterns of species diversity and the processes that give rise to those patterns: speciation, extinction, dispersal, vicariance, continental drift, ecological interactions, and phylogeny. Topics are presented within the framework of evolutionary history and include discussion of the biology of species on islands, terrestrial biomes, altitudinal zonation of species, latitudinal species gradients, historical factors governing species distributions, macroevolutionary trends in the fossil record, and application of modern molecular techniques for testing biogeographical hypotheses. Prerequisite: BIOL 152 or 153 and past or concurrent enrollment in BIOL 412, 413, 414, or 550; or permission of Instructor. LEC.

BIOL 583. Herpetology. 3 Hours N.
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematics, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion, thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry. LEC.

BIOL 592. Ichthyology. 4 Hours N / LFE.
A study of fishes. Lecture topics include the structure and adaptations of fishes to the aquatic environment and a survey of major fish groups with emphasis on their evolution and biogeography. Laboratory topics include a survey of fish diversity using specimens and the use of keys to identify fishes, with emphasis on the Kansas fish fauna. This course meets with BIOL 792. Students taking this course at the 700 level will have additional work required of them. Prerequisite: BIOL 152 and/or BIOL 413. LEC.

BIOL 593. Ornithology. 3 Hours N / LFE.
A lecture and laboratory course on the biology, evolution, and diversity of birds. Prerequisite: BIOL 412 (or BIOL 413), or permission of instructor. LEC.

BIOL 594. Forest Ecosystems. 3 Hours. Students learn basic concepts of forest productivity, forest water relations, forest hydrology, nutrient cycling, through soils and vegetation, nutrient uptake, carbon cycling, decomposition, linkages to aquatic ecosystems, and agents of disturbance to these cycles. The class spends a significant part of the semester exploring forest soil profiles and the challenges they present to different forest ecosystems. We discuss the function of forested ecosystems in a global context and identify and understand smaller-scale processes that drive forest function. Prerequisite: CHEM 135 or CHEM 195 or CHEM 175, and BIOL 414. LEC.

BIOL 595. Human Genetics. 3 Hours N.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: BIOL 350. LEC.

BIOL 598. Research Methods. 3 Hours N / LFE.
An introduction for pre-service teachers to the tools used by scientists to solve scientific problems. Topics include design of experiments and interpretation of their results, use of statistics, mathematical modeling, laboratory safety, ethical treatment of human subjects, writing scientific papers, giving oral presentations, and obtaining data from the scientific literature. Open only to students in the UKanTeach program. LEC.

BIOL 599. Senior Seminar: _____ . 1 Hour AE61 / N.
A synthesis and discussion of current trends in a discipline or disciplines related to one of the degrees offered in the biological sciences. Emphasis is placed on providing seniors with an appreciation of the discipline’s state-of-the-art and on developing skills for success in the next stage of a career in the biological sciences. Topics depend on the associated degree program. Prerequisite: Must be taken in the final year of a degree and students must have completed most of the course work required for one of the degrees in the biological sciences. LEC.

BIOL 600. Introductory Biochemistry, Lectures. 3 Hours N.
Designed to offer the essentials of the chemistry of the constituents of living organisms and the changes these constituents undergo (during life processes) in the human body and other living forms. Prerequisite: BIOL 150 or BIOL 151 and one semester of organic chemistry. LEC.

BIOL 601. Principles of Biochemistry Laboratory. 2 Hours.
Theory and methods in the development of protein separation and purification, enzyme structure/function, and enzyme kinetics derived from primary literature searches and readings. Prerequisite: Corequisite: BIOL 600; or consent of instructor. LAB.

BIOL 602. Plant Ecology. 3 Hours N.
Introduction to basic concepts, focused at community and species level. Architectural ecomorphology of plants and their physiological responses to physical factors: solar radiation, climate, and soils. Plant succession as an interaction among species differing in ecomorphology and life style. Classification and ordination of plant communities: practice and theory. Other topics include: species diversity and lognormal distribution as to abundance classes; species/area relations and theory of island biogeography; allelochemic defenses; genecology; paleoecology. Prerequisite: BIOL 414 or consent of instructor. Concurrent enrollment in parallel laboratory, BIOL 607, recommended. LEC.

BIOL 603. Systematic Botany. 3 Hours N / LFE.
A lecture/laboratory course providing hands-on experience with plant identification, a history of plant classification, the principles of nomenclature and character analysis, the basics of systematics theory, and a phylogenically-oriented introduction to vascular plant diversity. Prerequisite: BIOL 413 or equivalent. LEC.

BIOL 606. Ecological Plant Physiology. 3 Hours N.
Physiological responses of higher plants to environmental factors are discussed. Major topics are: water relations, heat transfer, resistance to water and temperature stress, dormancy, photoperiodism, photosynthesis and respiration under natural conditions, and effects of environmental pollution. Prerequisite: BIOL 408 or consent of instructor. LEC.

BIOL 607. Field and Laboratory Exercises in Plant Ecology. 2 Hours U / LFE.
Introduction to quantitative analysis of plant communities and correlated environmental parameters; field and/or laboratory measurements of ecophysiological traits and comparative ecomorphology of principal species. Prerequisite: BIOL 414. Concurrent enrollment in parallel lecture, BIOL 602, recommended, but not required. LAB.

BIOL 609. Current Progress in Microbiology. 1 Hour U.
A seminar course which will focus on current research in microbiology. A term paper will be required of each student. May be repeated for credit. Required of all majors in the senior year. Prerequisite: Two courses in microbiology. LEC.

BIOL 611. Molecular Systematics and Evolution. 4 Hours N / LFE.
An introduction to the use of molecular data in systematics and population biology. Topics include: evolution of genes and proteins; properties of mitochondrial DNA, chloroplast DNA, ribosomal RNA genes, protein-coding genes, and repetitive DNAs; laboratory methods for data collection; and data analysis. Prerequisite: BIOL 350. BIOL 550 or equivalent is recommended. LEC.

BIOL 612. Fundamentals of Microbiology. 3 Hours NB / N.
Lectures. Fundamental principles of microbiology with emphasis in physical and chemical properties of the bacterial cell; microbial
metabolism, cultivation, growth and death of bacteria; microbial genetics; pathogenesis and immunity, industrially important microorganisms. Meets with BIOL 400, but students will be given additional and more advanced assignments, and will carry higher expectations. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of instructor. LEC.

BIOL 613. Biology of Honeybees. 3 Hours N.
Social organization, evolution, behavior, morphology, communication, pollination biology, and ecology of honeybees. Experience will be gained with colony dynamics and behavior while working with bees in the field. Prerequisite: BIOL 152, BIOL 153, or consent of instructor. LEC.

BIOL 616. Medical Entomology. 3 Hours N.
A study of the major human diseases transmitted by arthropods with emphasis on the biology and ecology of vectors, vector feeding mechanisms as related to disease transmission, epidemiology of arthropod-borne diseases, and the impact of arthropod-borne diseases on humans. Laboratory work on recognition of vector species, information sources, and use of taxonomic keys. Prerequisite: BIOL 152 or BIOL 153 and a course in microbiology or consent of instructor. LEC.

BIOL 622. Paleontology. 3 Hours N.
A study of the structure and evolution of ancient life; the nature and diversity of life through time; the interactions of ancient organisms with their environments and the information that the study of fossils provides about ancient environments; the use of fossils to determine the ages of rocks and the timing of past events in earth history; and the patterns of extinction through time. (Same as GEOL 521.) Prerequisite: BIOL 100, BIOL 101, BIOL 152, BIOL 153, GEOL 105, or GEOL 304. LEC.

BIOL 623. Paleontology Laboratory. 1 Hour U / LFE.
Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as GEOL 523.) LAB.

BIOL 625. Behavioral Ecology and Sociobiology. 3 Hours N.
The role of natural selection in animal behavior, and the influence of behavior on population biology and social dynamics of animal species. Topics include: game theory and optimization as applied to animal behavior; altruism, cooperation and competition; kin recognition and interactions; group formation and dynamics, dominance, aggression, and territoriality; feeding strategies; reproductive behavior including mate choice, parental care, and mating systems. Prerequisite: BIOL 152; either BIOL 350, BIOL 412 or BIOL 414 recommended; or consent of instructor. LEC.

BIOL 630. Conservation and Wildlife Biology. 3 Hours N.
Examination of the concepts and processes involved in conservation of plant and animal populations and communities. Topics to be covered include conservation of endangered species, problems with invasions of exotic species and habitat fragmentation, wildlife management, and design of nature reserves. Prerequisite: BIOL 414, BIOL 412 strongly recommended. LEC.

BIOL 636. Biochemistry I. 3 Hours N.
First semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the physical structure of macromolecules and membranes, enzyme structure/function, and enzyme kinetics. Prerequisite: CHEM 335 or consent of instructor. LEC.

BIOL 637. Introductory Biochemistry Laboratory. 2 Hours U / LFE.
The laboratory portion of BIOL 600 or 636. Experiments have been selected to introduce the student to cell constituents and biochemical reactions. One four-hour laboratory and one-hour lecture each week. Prerequisite: BIOL 600 or BIOL 636, or concurrent enrollment. LAB.

BIOL 638. Biochemistry II. 3 Hours N.
Second semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the metabolism of carbohydrates, lipids, amino acids, proteins, and nucleic acids. Prerequisite: BIOL 636. LEC.

BIOL 639. Advanced Biochemistry Laboratory. 2 Hours U / LFE.
The laboratory portion of BIOL 638. One four-hour laboratory and a one-hour lecture each week. Experiments have been selected to familiarize students with experimental biochemical techniques using state-of-the-art methodology. Prerequisite: BIOL 637 and 638 (BIOL 638 may be taken concurrently). LAB.

BIOL 640. The Biology and Evolution of Fossil Plants. 3 Hours N.
A lecture course in which fossil plants, protists and fungi are examined throughout geologic time. Emphasis will be directed at paleoecology, biogeography and the stratigraphic distribution and composition of ancient floras. (Same as GEOL 528.) Prerequisite: BIOL 413 or permission of instructor. LEC.

BIOL 641. Laboratory in Paleobotany. 1 Hour U / LFE.
An examination of selected fossil plants throughout geological time and the techniques used to study them; laboratory will include identification and the use of plant fossils in biostratigraphy. (Same as GEOL 529.) Prerequisite: BIOL 413 or permission of instructor. Must be taken concurrently with BIOL 640. LAB.

BIOL 644. Comparative Animal Physiology. 3 Hours N.
Lecture and discussion of the basic mechanism of organic maintenance and integration; a comparative treatment of the uniformities and diversity of animal function; emphasis on environmental adaptations and evolutionary relationships. Prerequisite: BIOL 152 or BIOL 153, and a course in organic chemistry, or consent of instructor. A college physics course is recommended but not required. LEC.

BIOL 646. Mammalian Physiology. 4 Hours N.
Lectures and demonstrations. An intermediate course in the functions, mechanisms and interactions of mammalian organ systems. Discussions span topics from molecular to whole animal functions. Required for pharmacy students and strongly recommended for students planning advanced work in any area of physiology. The student is assumed to have the knowledge and ability to utilize their math and science background. Prerequisite: Five hours of organic chemistry, a course of college physics. LEC.

BIOL 647. Mammalian Physiology Laboratory. 2 Hours U / LFE.
Laboratory experiments in representative areas of mammalian physiology designed to complement BIOL 646. Not open to students with credit in BIOL 247. Prerequisite: Corequisite: BIOL 646. LAB.

BIOL 648. Systematics and Macroevolution. 3 Hours N.
An introduction to the theory of macroevolution and the fundamental principles of systematics. Intended for students planning to pursue advanced studies in organismal biology, evolution, and/or systematics. Topics in macroevolution will include hierarchy theory, species concepts, speciation and species selection. Methods of phylogenetic estimation will be discussed and include parsimony, Maximum likelihood and Bayesian inference. Evolutionary studies utilizing phylogenies including tests of homology, studies of character evolution, and biogeography will be discussed. An overview of classification and nomenclature will also be provided. Prerequisite: BIOL 412 or equivalent. LEC.

BIOL 650. Advanced Neurobiology. 3 Hours N.
The course builds on in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between
neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor. LEC.

BIOL 652. Comparative Animal Behavior. 3 Hours N.
A comparative analysis of behavior as an adaptive mechanism; emphasis on ontogenetic and evolutionary aspects of behavior. Prerequisite: BIOL 152 or BIOL 153; and BIOL 412. Alternatively, BIOL 412 may be taken as a corequisite. LEC.

BIOL 654. Comparative Animal Behavior, Laboratory. 1 Hour U / LFE.
Laboratory and field phase of BIOL 652. Students may elect sections according to their special interests. Prerequisite: Prior or concurrent enrollment in BIOL 652. LAB.

BIOL 655. Behavioral Genetics. 3 Hours N.
A survey of behavioral genetics in animals and humans. Emphasis is on how the methods and theories of quantitative, population and molecular genetics can be applied to individual and group differences in animals. Behaviors covered may include circadian rhythms, foraging, courtship, learning and memory, anxiety, social structures and human behaviors. Prerequisite: BIOL 350 or consent of instructor. LEC.

BIOL 656. Ecosystem Ecology. 3 Hours N.
An introduction to the patterns and processes that affect terrestrial ecosystems. Emphasis is placed on understanding nutrient cycles (e.g., carbon nitrogen phosphorous), hydrologic cycles, and patterns of net primary productivity. The role of both natural and anthropogenic disturbances in structuring terrestrial ecosystems is examined in the context of global land-use patterns. Discussion of current research literature will be expected. (Same as EVRN 656.) Prerequisite: BIOL 414 and CHEM 130. LEC.

BIOL 661. Ecology of Rivers and Lakes. 3 Hours N.
Study of the ecology and structure of creeks, rivers, ponds, lakes, and wetlands as well as some of the major human impacts. Prerequisite: One year of biology or permission of the instructor. BIOL 414 recommended. LEC.

BIOL 662. Aquatic Ecology Laboratory. 2 Hours U / LFE.
A field and laboratory course introducing biological, physical, and chemical characteristics of lentic (ponds and lakes) and lotic (creeks and rivers) habitats. Students learn sampling and monitoring techniques and how to classify aquatic biota at higher taxonomic levels. Corequisite: CHEM 130 or CHEM 190 or CHEM 170, and BIOL 661. LAB.

BIOL 664. Vertebrate Biology. 3 Hours N.
A laboratory course emphasizing principles of systematics and identification and the behavioral ecology of local vertebrate animals. Prerequisite: BIOL 152, BIOL 153 or consent of instructor. LAB.

BIOL 667. Chemical Communication in Sex, Feeding, and Fighting. 3 Hours N.
The course focuses on the role of chemical information molecules in the interrelationships among organisms, with particular attention to interactions (a) within and between animal species, (b) within and between plant species, (c) between animals and plants, (d) between predators and prey, and (e) between parasites and hosts. Prerequisite: BIOL 100 or BIOL 101 or BIOL 152 or BIOL 153 or consent of instructor. LEC.

BIOL 668. Evolutionary Ecology. 3 Hours N.
Emphasis will be on the themes that interface ecology and evolutionary studies. Topics will include selection theory; reproductive, foraging, and sex allocation problems; coevolution; patterns or morphological and behavioral adaptations; competition, predation, and population regulation. Special attention will be given to the philosophy and practice of resolving unanswered questions in evolutionary ecology. Prerequisite: BIOL 412 or permission of instructor. LEC.

BIOL 672. Gene Expression. 3 Hours N.
A study of the structure and expression of genes in prokaryotes and eukaryotes. Emphasis on the mechanisms of DNA, RNA, and protein biosynthesis. Prerequisite: A course in biochemistry or consent of instructor. LEC.

BIOL 673. Cellular and Molecular Neurobiology. 3 Hours.
Mechanisms of neural function and development will be considered at the cellular and molecular levels. Synaptic mechanisms of learning and memory, modulation of transmitter release, and the molecular basis of neurodegenerative disorders will also be discussed. Prerequisite: BIOL 435, BIOL 646, or permission of instructor. LEC.

BIOL 676. Mammalian Neuroanatomy. 3 Hours N.
Lectures, video tape demonstrations, and laboratory dissection of mammalian nervous system with some attention to human material. Major emphasis on nervous system structure as it relates to function. For neurobiology and pre-health science majors. Prerequisite: Corequisite: A course in neurobiology (BIOL 435, BIOL 650), or permission of the instructor. LAB.

BIOL 688. The Molecular Biology of Cancer. 3 Hours N.
The basic concepts of molecular biology are examined and used to probe the process by which a normal cell becomes a cancer cell. The course investigates DNA damage and repair, chemical carcinogenesis, gene cloning and manipulation, the control of gene expression in eukaryotes, tumor viruses, the roles of oncogenes and tumor suppressor genes in carcinogenesis, and cancer therapy. Prerequisite: BIOL 350 and BIOL 416; or BIOL 536; or consent of instructor. LEC.

BIOL 694. The Art of Becoming a Professional Scientist. 3 Hours N.
Discusses aspects of graduate education that are directed at students entering graduate school and that focus on how to be successful in the post PhD phases of a career, but that must be initiated early in the graduate student program of study. One three hour discussion per week. Senior standing and planning on entering graduate school. LEC.

BIOL 696. Vertebrate Neuroanatomy. 2 Hours N.
Major emphasis on nervous system structure as it relates to function. For neurobiology and pre-health science majors. Prerequisite: Corequisite: A course in neurobiology (BIOL 435, BIOL 650), or permission of instructor. LEC.

BIOL 699. Biology Honors Research Colloquium. 1 Hour AE61 / U.
Students pursuing Honors in Biology will meet weekly to discuss, both formally and informally, their honors research. Background information and experimental approaches of the research will be examined and critiqued. Prerequisite: Enrollment in Biology Honors program and consent of instructor. LEC.

BIOL 700. Conservation Principles and Practices. 3 Hours.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.
BIOL 701. Topics in: ______. 1-3 Hours.
Advanced courses on special topics in biology, given as need arises. Lectures, discussions, readings, laboratory, or field work. Students may select sections according to their special interests. LEC.

BIOL 702. Laboratory Practice: Radiation Safety Procedures. 0.75 Hours.
An introduction to the basic properties of radioisotopes, and the fundamental safety practices needed for the safe use of low levels of radioactive materials. Risks associated with radiation exposures and applicable state and federal regulations are discussed. (Normally the content of the first ten hours of BIOL 703.) Prerequisite: Senior standing in one of the sciences. LAB.

BIOL 703. Radioisotopes and Radiation Safety in Research. 1.25 Hour.
An introduction to the properties of radioactive materials, radiations, and their interaction with matter, methods of radiation detection and measurement, protective measures, applicable state and federal regulations, design and implementation of safety management systems in the research laboratory, design of tracer experiments, and the risks associated with radiation exposure. Prerequisite: BIOL 702 or concurrent enrollment in BIOL 702, algebra and two semesters of either physics or chemistry. LEC.

BIOL 704. Research Animal Methods. 3 Hours.
Lectures, discussions, and laboratory sessions. Selection of proper animal models for specific research studies. Various external influences that alter research data. Routine techniques including restraint, sample collection, injection, anesthesia and euthanasia. Prevention and handling of common research animal problems or diseases. Proper and humane animal care as defined by the Federal Animal Welfare Act. Prerequisite: Senior or graduate standing in one of the biological sciences or permission of instructor. LEC.

BIOL 706. Current Trends in Curation and Collection Management. 2 Hours.
Seminar course to provide students with a working knowledge of the primary issues and current trends in building, administration, and care of scientific collections. Topics include permits, collecting, accessioning, cataloging, preservation, preventive conservation, and access to collections and data. The course format consists of readings, lectures, guest speakers, discussions, and visits to scientific collections on campus. (Same as MUSE 710.) LEC.

BIOL 708. External Morphology of Insects. 4 Hours.
A study of external structure common to all insect orders, with detailed comparative laboratory studies of representative species. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 709. Immature Insects. 3 Hours.
The classification, structure, and ecological distribution of immature insects, especially larvae of Holometabola. Includes both lectures and laboratories. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 502 or consent of instructor. LEC.

BIOL 710. Insect Development. 3 Hours.
A study of the embryonic and postembryonic development of insects. Emphasis is placed on developmental physiology of the early embryonic stages, the morphogenesis of organ systems, and the action of hormones in postembryonic development. Laboratory includes demonstrations and histological and experimental work. Prerequisite: Consent of instructor or BIOL 500. LEC.

BIOL 711. Insect Systematics. 4 Hours N.
A study of the diversity of insects, including the classification of all living and fossil orders and the more common families primarily on the basis of external morphology. The biology, ecology, phylogeny, and geological history of each order will be covered. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500 and BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 712. Evolutionary Biology - Graduate. 3 Hours.
A thorough survey of evolutionary biology. Topics include: the history of evolutionary thought, genetics and the nature of variation, adaptation, speciation, coevolution, macroevolution, the comparative method, and the history of life. Prerequisite: BIOL 350 or equivalent or consent of instructor. LEC.

BIOL 714. Community and Ecosystem Ecology. 3 Hours.
Study of factors determining distribution of organisms, community structures, energy flow in ecosystems, and functional analysis of ecosystems. Discussion periods will include reading from current scientific literature. Prerequisite: Intended for graduate students in biology who did not have an undergraduate course in community ecology. Consent of instructor. LEC.

BIOL 716. Insect Physiology and Internal Morphology. 3 Hours.
Mechanisms and integration of the internal life-supporting systems of insects, emphasizing the interdependence of structure and function. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 408 and BIOL 500, or permission of instructor. LEC.

BIOL 717. Insect Ecology and Behavior. 3 Hours.
Lectures and laboratory demonstrations. A study of insect population dynamics, life history strategies, co-evolutionary interactions, foraging, and reproductive and social behaviors. Approaches from basic population biology and behavioral ecology are emphasized. Prerequisite: A course in ecology or behavior, or consent of instructor. LEC.

BIOL 718. Laboratory in Molecular Biology. 3 Hours.
Practical experience in recombinant DNA technology and molecular cloning. Given concurrent with BIOL 418. Prerequisite: BIOL 416 or course in biochemistry or microbiology. Training in radiation safety preferred. LAB.

BIOL 719. Light and Electron Microscopy. 3 Hours.
A lecture and laboratory class emphasizing the theoretical and practical use of light microscopes and scanning and transmission electron microscopes. A variety of approaches using light microscopy will be employed, including brightfield, phase, fluorescence, DIC, polarization, and darkfield optics. A variety of techniques will be used to prepare specimens and view them using scanning and transmission electron microscopy. Video and computer-aided analysis of images as well as conventional photographic techniques will be included. Prerequisite: Permission of instructor. LEC.

BIOL 720. Scientific Illustration. 3 Hours.
Lectures, demonstrations, and studio participation. Instruction in the preparation of illustrations for scientific publications, theses, and oral and poster presentations. Emphasis on basic drafting and layout skills, and pen and ink and tone renderings intended for publication. Attention given to preparation of photographs for publication and oral presentations. Instruction provided in use of specialized optical equipment for drawing. Prerequisite: Upper division or graduate standing and permission of instructor. LEC.
BIOL 721. Microbial Genetics. 3 Hours.
Bacteria and viruses as models of genetic systems. Mutagenesis and repair. Transformation, transductions, and recombination. Molecular biology of gene expression. This course is the graduate-level section of BIOL 518 and MCRB 510. Graduate students will be assigned additional and more advanced studies. Prerequisite: An introductory microbiology course or permission of instructor. LEC.

BIOL 725. Aquatic Entomology. 4 Hours.
Identification of aquatic insects and detailed study of their community structure and dynamics. The external morphology of all aquatic orders will be covered, followed by consideration of specific physiological and behavioral adaptations that facilitate an aquatic existence. Includes both lectures and laboratory exercises. Requirements include making a collection of aquatic insects. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 414 or BIOL 500 or permission of instructor. LEC.

BIOL 741. Biology of Freshwater Invertebrates. 3 Hours.
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Graduate students will be expected to submit either an original collection of freshwater invertebrates or write a research essay on a topic mutually agreed upon with the professor. Not open to students who have taken BIOL 541. Prerequisite: Graduate standing; recommended: undergraduate invertebrate biology class. LEC.

BIOL 742. Plant Population Biology. 3 Hours.
A survey of the major areas of plant population ecology and genetics including competition, demography, pollination ecology, gene flow, natural selection and mating systems. Each topic is introduced by a lecture and is further explored by discussion of the current literature. Prerequisite: BIOL 412 or equivalent. LEC.

BIOL 743. Population Genetics. 3 Hours.
Description and discussion of genetic variation in natural populations. The effects and interaction of selection, migration, mutation, mating systems, and finite population size on the maintenance of genetic variation. Discussion of the interface with evolution and population ecology. Prerequisite: BIOL 350 and BIOL 412 or equivalent. LEC.

A series of seven laboratory modules emphasizing quantitative methods and experimental analysis. Each module requires data collection analysis, and written interpretation. Modern instrumentation, including use of microcomputers, is emphasized. Topics include ecological modeling, ecological genetics, physiological ecology, community structure, mating and reproduction and precipitation and soil chemistry. Prerequisite: BIOL 412 or BIOL 414. LAB.

BIOL 745. Laboratory in Experimental Ecology. 3 Hours.
A lecture course emphasizing biochemical, developmental, and molecular aspects of cell structure and function. Prerequisite: BIOL 404 or BIOL 412 or equivalent. Intended for graduate students planning to specialize in systematics. LEC.

BIOL 747. Quantitative Genetics. 3 Hours.
A discussion of genetic traits for which individual gene differences do not separate a population into qualitatively distinct groups. Includes the estimation of heritability, genetic determination, and number of loci, and a study of selection theory. Prerequisite: BIOL 404 or BIOL 412 or equivalent and a course in statistics. LEC.

BIOL 749. Topics in Stable Isotopes in the Natural Sciences:. 2-3 Hours.
Isotopic compositions of substances provide powerful insights into many topics in the natural sciences. Applications of isotopic analyses of carbon, hydrogen, oxygen, and nitrogen to selected research topics such as plant resource use, food web analysis, paleoecology, paleodiet reconstruction, hydrology, and soils genesis will be examined. Knowledge of isotope chemistry is not required. (Concepts necessary to understand pertinent articles will be taught during the first class meetings.) May be repeated. (Same as GEOG 749.) LEC.

BIOL 750. Advanced Biochemistry. 3 Hours.
The structures and dynamics of proteins and nucleic acids will be developed in terms of well-understood examples which will also be used to discuss the function of major classes of proteins. The application of structural and dynamical principles to biological membranes and their function will also be discussed. Prerequisite: BIOL 807 and BIOL 808, a general biochemistry course, or permission of instructor. LEC.

BIOL 751. Plant Communities of North America. 3 Hours.
Physiognomic and floristic analysis of the vegetation, with emphasis on the Southwest; distribution of communities in relation to climate, substratum, and disturbance; recognition of dominant elements of vegetation through study of specimens and illustrative material. Prerequisite: BIOL 602. LEC.

BIOL 752. Cell Biology. 3 Hours.
A lecture course emphasizing biochemical, developmental, and molecular aspects of cell structure and function. Prerequisite: BIOL 807 and BIOL 808, or BIOL 416 or BIOL 536, or permission of instructor. LEC.

BIOL 753. Advanced Genetics. 3 Hours.
An advanced course in modern genetic analysis of eukaryotes. Course material will consist mainly of primary literature in the field of genetics. Topics covered include: genomic structure and genome projects; nature of mutations; mutant analysis; genetic recombination and mapping; analysis of gene function; genetic buffering; RNAI and epigenetics; and the genetics of model organisms. This course is meant for graduate students in the Molecular Biosciences and Genetics programs. Prerequisite: BIOL 807 and BIOL 808, or a course in genetics and a course in biochemistry, or permission of the instructor. LEC.

BIOL 754. Brain Diseases and Neurological Disorders. 3 Hours.
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., will be discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Graduate students are required to present original research paper assigned by the instructor to the class in addition to the other assignments for all the students enrolled. Prerequisite: BIOL 150, or consent of instructor. LEC.

BIOL 755. Mechanisms of Development. 3 Hours.
Molecular aspects of differential gene function, signal transduction, and cell polarity in the regulation of morphogenesis. Prerequisite: BIOL...
BIOL 756. Cell and Tissue Culture Laboratory. 3 Hours.
An introduction to current laboratory methods of cell and tissue culture, intended to provide an understanding of and substantial experience in several aspects of animal cell growth, cell synchrony, cell nutrition, the production and selection of mutant cell lines, the production and use of heterokaryons and interspecific hybrids, cell transformation in vitro, the cultivation and characterization of differentiated cells in culture, enzyme induction, and cell karyotyping. LAB.

BIOL 757. Carcinogenesis and Cancer Biology. 3 Hours.
This course surveys the field of cancer research. The major goal is to introduce the breadth of cancer research while, at the same time, providing sufficient depth to allow the student to recognize problems in cancer and to design experiments which study cancer biology. Toward that end, the student should (at the conclusion of the course) be able to: define cancer, identify and discuss its causes; identify and discuss the genetic basis for cancer development and progression; discuss the theoretical basis for cancer therapy design and efficacy testing; discuss the biochemical, molecular and cellular events involved in the natural history of major human neoplasms. Prerequisite: Permission of instructor. LEC.

BIOL 767. The Vegetation of the Earth. 3 Hours.
A discussion of the world's vegetation in its natural condition and as affected by man. Included are aspects of its economic and cultural usefulness and the problem of its preservation. Prerequisite: BIOL 634. LEC.

BIOL 768. Plant Molecular Biology. 3 Hours.
Gene expression in chloroplasts, mitochondria, and plant nuclei, and regulatory interactions among these genomes. Special topics include the molecular biology of the photosynthetic apparatus, nitrogen fixation, stress and development, viruses and viroids, transposable genetic elements and gene evolution, and gene transfer and plant genetic engineering. Prerequisite: A course in biochemistry, cell or molecular biology, or permission of instructor. LEC.

BIOL 770. Plant Biochemistry. 3 Hours.
A detailed study of plant biochemistry with emphasis on metabolic and regulatory processes particularly characteristic or unique in plants. Prerequisite: BIOL 600 or equivalent. LEC.

BIOL 772. Gene Expression. 4 Hours.
A study of the structure and expression of genes in prokaryotes and eukaryotes. Emphasis on the mechanisms of DNA, RNA, and protein biosynthesis. This course meets concurrently with BIOL 672 and is open to graduate students seeking a more rigorous treatment of techniques in molecular biology that students receive in BIOL 672. Prerequisite: A course in biochemistry or consent of instructor. LEC.

BIOL 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as CHEM 775, MDCM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent or consent of instructor. LEC.

BIOL 777. Integrative and Developmental Neurobiology. 3 Hours.
Cellular processing of neural information both at the local level and in long distance integration. Local computing functions, and integration of these functions among the various areas to produce coherent movement and perceptions will be discussed. A description of forces guiding the development of the nervous system to form a coherent working system in both invertebrate and vertebrate animals will be presented, as will determinants of brain sexual dimorphism. Prerequisite: An upper level course in physiology or BIOL 520. LEC.

BIOL 780. Fisheries. 2 Hours.
Philosophy and practice of conservation as it applies to major world fisheries. Species principally utilized, factors affecting production, methods for appraisal and management of stocks. Historical and prospective roles of the fisheries in relation to human food supplies and recreational needs. Prerequisite: BIOL 412. LEC.

BIOL 781. Fisheries, Laboratory. 2 Hours.
Training in field and laboratory techniques for fishery research and management. Prerequisite: Concurrent or prior enrollment in BIOL 780. LAB.

BIOL 782. Principles of Biogeography. 3 Hours.
A synthesis of historical and ecological biogeography of plants and animals, treating vicariance, dispersal, and community patterns; lectures, readings, discussions. A course in systematics and a course in ecology are recommended. LEC.

BIOL 783. Herpetology. 3 Hours N.
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematics, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion, thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry. Students taking the course at the 700 level will have additional work required of them. Prerequisite: BIOL 152 Principles of Organismal Biology, and/or BIOL 413 History and Diversity of Organisms. LEC.

BIOL 784. Introduction to Museum Public Education. 3 Hours.
Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, GEOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 785. Museum Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, GEOL 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 786. Fundamentals of Tropical Biology. 1-8 Hours.
The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Primarily a field course, taught in Costa Rica; two sessions per year, February-March, July-August. FLD.

BIOL 787. Introduction to Museum Exhibits. 3 Hours.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, GEOL 781, HIST 723, and...
MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

**BIOL 788. The Nature of Museums. 3 Hours.**
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, GEOL 782, HIST 720, and MUSE 702.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

**BIOL 789. Field Course in Entomology. 1-6 Hours.**
Field experiences in various habitats, with an emphasis in ecology, systematics, behavior, and collection techniques. FLD.

**BIOL 790. Paleontology of Lower Vertebrates. 3 Hours.**
General account of the osteology, geological distribution, and evolution of the principal groups of fishes, amphibians, reptiles, and birds. Lectures and laboratory. (Same as GEOL 726.) LEC.

**BIOL 791. Paleontology of Higher Vertebrates. 3 Hours.**
Evolution of mammals, and anatomical modifications involved in the process as ascertained from the fossil record. Lectures and laboratory. (Same as GEOL 726.) LEC.

**BIOL 792. Ichthyology. 4 Hours.**
A study of fishes. Lecture topics include the structure and function of fishes; the adaptations of fishes to the aquatic environment; and a survey of major fish groups with emphasis on evolutionary relationships and biogeography. Laboratory topics include a survey of fishes using specimens, and the use of keys to identify fishes with emphasis on the Kansas fish fauna. A research paper using primary scientific literature is required. Prerequisite: Graduate standing or permission of the instructor. LEC.

**BIOL 794. Mammalogy. 3 Hours.**
A study of mammals, with emphasis on systematics, biogeography, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 100 or BIOL 413. LEC.

**BIOL 795. Biology of Amphibians. 3 Hours.**
Evolutionary biology of amphibians with emphasis on systematics, morphology, development, reproductive strategies, and distribution; lectures and laboratory. Prerequisite: BIOL 664 or permission of instructor. LEC.

**BIOL 796. Biology of Reptiles. 3 Hours.**
Evolutionary biology of reptiles with emphasis on systematics, morphology, reproductive strategies, and distribution; lectures and laboratory. Prerequisite: BIOL 664 or permission of instructor. LEC.

**BIOL 797. Field Course in Vertebrate Paleontology. 3-6 Hours.**
Training in the techniques of collecting vertebrate fossils, description and interpretation of the stratigraphy of fossiliferous sediments, and interpretation of the adequacy and bias of samples. FLD.

**BIOL 798. Principles and Practices of Museum Collection Management. 3 Hours.**
Lecture, discussion, and laboratory exercises on the nature of museum collections, their associated data, and their use in scholarly research; cataloging, storage, fumigation, automated information management and related topics will be presented for museums of art, history, natural history and anthropology. (Same as AMS 730, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

**BIOL 799. Natural History Museum Apprenticeship. 1-6 Hours.**
Provides directed, practical experience in collection care and management, public education, exhibits and administration with emphases to suit the particular requirements of each student. Full time for one semester or half time for two semesters. (Same as AMS 799, ANTH 799, GEOL 723, HIST 799, and MUSE 799.) FLD.

**BIOL 801. Topics in: ____. 1-3 Hours.**
Advanced courses on special topics in biology, given as need arises. Lectures, discussing readings, laboratory or field work. Students may select sections according to their special interests. LEC.

**BIOL 802. The Art of Becoming a Professional Scientist. 3 Hours.**
Discusses aspects of graduate education that are directed at the post PhD phases of a career, but that must be initiated early in the graduate student program of study. One 3-hour discussion per week. LEC.

**BIOL 804. Scientific Integrity: Molecular Biosciences. 1 Hour.**
This course introduces aspects and issues associated with being an ethical, responsible, and professional research scientist. Included topics are professional practices, regulations, and rules that define the responsible and ethical conduct of research. Graduate students will become familiar with and prepare to navigate through challenges that occur during a career in research science. The format of individual classes is expected to incorporate both instruction and discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.

**BIOL 806. Major Patterns in Insect Evolution. 3 Hours.**
Extensive reading and discussion of the primary literature on topics relating to major patterns in the evolutionary history of insects, including the fossil history of insects, the monophyly of arthropods, the origin of wings, the changing role of insects in ecological communities, the origins of social behavior, modes and mechanisms of speciation, and patterns of species diversity. Assigned readings require a solid background in evolutionary theory and insect biology, especially morphology, development, and classification. Prerequisite: Permission of instructor. LEC.

**BIOL 807. Graduate Molecular Biosciences. 6 Hours.**
An introduction to the advanced study of biochemistry, microbiology, genetics, cell and developmental biology, and neurobiology for all Molecular Biosciences graduate students. Topics can include macromolecular structure, metabolism, kinetics and thermodynamics, bioinformatics, prokaryotic and eukaryotic genetic mechanisms, cell structure and function, signal transduction, basic and pathogenic bacteriology, immunology, virology, membrane potentials, synaptic transmission, and sensory neurophysiology. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.

**BIOL 808. Graduate Molecular Biosciences for Medicinal Chemists. 4 Hours.**
An introduction to the advanced study of biochemistry, microbiology, and neurobiology for graduate students in Medicinal Chemistry. Prerequisite: Admission to the graduate program in Medicinal Chemistry and consent of instructor. LEC.

**BIOL 810. Seminar in Biochemistry. 1 Hour.**
Presentation and discussion of specific areas of recent research in biochemistry. This course may be taken more than once. LEC.

**BIOL 811. Advanced Molecular and Cellular Immunology. 2 Hours.**
Covers recent advances in immunoochemistry and immunobiology. Topics include structure and function of antibodies, hybridoma systems, idiotypes, induction and regulation of the immune response through cell interactions and cytokine action, and the role of immune activity in disease states such as hypersensitivity, autoimmunity, and cancer. Prerequisite:
BIOL 807 and BIOL 808, or an introductory course in immunology, or consent of instructor. LEC.

BIOL 812. Mechanisms of Host-Parasite Relationships. 2 Hours.
Emphasis is on virulence factors of microorganisms and the host response to infection. Topics will include pathogenesis of intracellular and extracellular parasites, bacterial adhesins, and toxins, and the role of innate and acquired immunity in host resistance and the response to infection. Prerequisite: BIOL 807 and BIOL 808, or a course in biochemistry, or consent of instructor. LEC.

BIOL 813. Advanced Bacterial Physiology. 2 Hours.
The intermediary reactions catalyzed by the bacterial cell during energy-requiring processes. Thermodynamic considerations of these processes are discussed. Knowledge of calculus is recommended. Prerequisite: BIOL 807 and BIOL 808, or a course in microbiology and a course in biochemistry, or consent of instructor. LEC.

BIOL 814. Advanced Molecular Virology. 2 Hours.
The course concentrates on evaluation of current literature concerning all aspects of molecular biology, biochemical characterization, and pathogenic mechanisms involved in host-virus interactions. Students will be expected to present articles and participate in discussions. Prerequisite: BIOL 807 and BIOL 808, or a course in virology, or consent of instructor. LEC.

BIOL 815. Advanced Molecular Genetics. 2 Hours.
A literature-based course that covers recent advances in microbial molecular genetics. Topics include transcription, translation, mutagenesis and repair, genetic exchange mechanisms, and regulation of gene expression. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics, or consent of instructor. LEC.

BIOL 816. Careers in Chemical Biology. 1 Hour.
Advanced course examining current research topics in chemical biology. An emphasis will be placed on career options open to PhD scientists in Chemical Biology, and preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as CHEM 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor. SEM.

BIOL 818. Techniques in Molecular Biosciences. 2 Hours.
This course provides an introduction to common techniques used for research strategies in molecular biosciences. The course will cover common techniques in cell biology, biochemistry, microbiology, and neurobiology. Information will be presented in lectures and through practical demonstrations. This course is primarily intended for first year graduate students in the Department of Molecular Biosciences. Prerequisite: Enrollment in the Molecular Biosciences Graduate Program or consent of instructor. LAB.

BIOL 840. Scientific Communication. 2 Hours N.
Principles of English communication skills for the professional scientist. The course explores the form, function, and practice (including ethics) of scientific communication, emphasizing elements of writing and speech that are important to clarity and precision. The course covers written and verbal communication of primary research results as well as composing correspondence, a curriculum vitae, reviews, etc. Prerequisite: Graduate standing. LEC.

BIOL 841. Biometry I. 5 Hours.
The application of statistical methods to data from various fields of biological research. Special emphasis is placed on practical computational procedures. Prerequisite: College algebra. LEC.

BIOL 842. Biometry II. 3 Hours.
This course is primarily devoted to special advanced topics in analysis of variance, analysis of covariance and regression analysis. Polynomial regression and multiple linear regression will be presented as well the general linear model. Elementary matrix algebra will be developed as needed. Prerequisite: BIOL 841. LEC.

BIOL 847. Phylogenetics. 3 Hours.
An introduction to the theory and practice of phylogenetic systematics. Includes principles of character analysis including determination of homology and determination of character polarity, testing alternate phylogenetic trees, and reconstructing trees using computer techniques. Also includes principles of constructing phylogenetic classifications and the nature of taxa in the phylogenetic system. Other topics, such as the nature of species and principles of biogeography are included. Prerequisite: Twenty hours natural history. LEC.

BIOL 848. Phylogenetic Methods. 4 Hours.
A survey of methods for inferring phylogenetic trees from character data and using phylogenies to address evolutionary questions. Lectures will present the relevant theory and algorithmic description of methods. Computer lab will familiarize students with software that implements the analyses discussed in lecture. Intended for graduate students specializing in systematics. Prerequisite: BIOL 845 and BIOL 841 or consent of instructor. LEC.

BIOL 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as CHEM 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.

BIOL 872. Gene Expression II. 3 Hours.
Second semester of a two-semester lecture course on gene expression. Emphasis on control of gene expression at the transcriptional and post-transcriptional levels. Prerequisite: BIOL 772 or consent of instructor. LEC.

BIOL 888. Topics in Evolutionary Morphology: ____. 2 Hours.
Presentation and discussion by graduate students and faculty of selected topics centering on observed changes in structure and function of organisms from a phylogenetic point of view. Presentation will include results of original research when possible and appropriate, and otherwise, will be based on syntheses of recent literature. RSH.

BIOL 890. Advanced Study in Microbiology. 1-10 Hours.
Original investigation by students at the master's degree level. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Ten or more hours of microbiology and consent of department. RSH.

BIOL 895. Human Genetics. 3 Hours.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: A course in genetics. LEC.

BIOL 899. Master's Thesis. 1-10 Hours.
Research which is to be incorporated into an M.A. thesis. Not more than ten hours may be earned. Graded on a satisfactory/unsatisfactory basis. THE.
BIOL 901. Graduate Seminar in Biochemistry and Biophysics. 1 Hour.
Advanced course examining current research topics in biochemistry and biophysics. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental admission. LEC.

BIOL 902. Graduate Seminar in Molecular, Cellular, and Developmental Biology. 1 Hour.
Advanced course examining current research topics in molecular, cellular, and developmental biology. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental permission. SEM.

BIOL 903. Graduate Seminar in Neurobiology. 1 Hour.
Advanced course examining current research topics in neurobiology. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental permission. LEC.

BIOL 904. Graduate Seminar in Microbiology. 1 Hour.
Advanced course examining current research topics in microbiology. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Enrollment in graduate school, and departmental permission. RSH.

BIOL 905. Advanced Molecular Genetics. 1-3 Hours.
A review of current literature in molecular genetics. RSH.

BIOL 906. Advanced Genetics. 1-3 Hours.
May be repeated for credit up to six hours. Review of current literature and genetic theory of selected topics such as population, molecular, quantitative, and physiological genetics. RSH.

BIOL 911. Research Topics in Plant Physiology and Biochemistry. 1-6 Hours.
Directed research on selected topics. Prerequisite: BIOL 770 or equivalent. RSH.

BIOL 918. Modern Biochemical and Biophysical Methods. 4 Hours.
This course emphasizes the use of techniques for solving problems of structure and function of biological macromolecules. Students will complete several modules that consist of lectures relating to theory and practical aspects of each methodological approach, and apply these techniques to solving a specific problem. Students will submit a paper describing the resulting data and conclusions. Prerequisite: BIOL 807, BIOL 808, and BIOL 818, or permission of instructor. LEC.

BIOL 925. Research Grant Proposal Preparation. 3 Hours.
This course introduces the basics of preparing a successful scientific grant application. Topics to be covered include how to develop a novel, fundable project, scientific writing and grantsmanship, and what criteria reviewers consider in evaluating grants. The course will be a mix of instruction and class discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.

BIOL 930. Ultrastructure and Cellular Mechanisms. 3 Hours.
Two lectures and one seminar-recitation. A detailed consideration of electron microscopic analyses of cell structure as related to cell function. Prerequisite: BIOL 416. LEC.

BIOL 943. Multivariate Data Analysis. 3 Hours.
Matrix formulation of multivariate models and data. Specific methods covered include Principal Components Analysis, Factor Analysis, Multiple Group Discriminant Analysis and Canonical Analysis, and Canonical Correlation Analysis. Prerequisite: BIOL 842 or knowledge of elementary matrix algebra. LEC.

BIOL 944. Topics in Quantitative Ecology: _____. 1-3 Hours.
Presentation and discussion by instructor and students of mathematical and statistical concepts in ecology. Topics are selected from texts or sets of readings. LEC.

BIOL 950. Evolutionary Mechanisms. 3 Hours.
Reading and discussions of evolutionary mechanisms from the genetic, ecologic, and systematic viewpoints. Prerequisite: BIOL 412. LEC.

BIOL 952. Introduction to Molecular Modeling. 3 Hours.
Introduction to theory and practice of contemporary molecular modeling, including molecular mechanics, molecular dynamics, computer graphics, data analysis, use of structure and sequence databases, docking, and homology modeling. Weekly computer laboratory section aimed at allowing participants to pursue independent research projects that incorporate modeling aspects. Lectures, laboratory manuals, program descriptions, and technical notes are presented on course web page. Prerequisite: Graduate standing or consent of instructor. LEC.

BIOL 968. Seminar in Vegetation Geography. 2-3 Hours.
(Same as GEOG 937.) LEC.

BIOL 985. Advanced Study. 1-10 Hours.
Individual investigations; laboratory, field or museum; or reading assignments in specialized topics not ordinarily treated in other courses. Graded on a satisfactory/unsatisfactory basis. RSH.

BIOL 999. Doctoral Dissertation. 1-12 Hours.
Original research that is to be incorporated into a Ph.D. dissertation. Graded on a satisfactory/unsatisfactory basis. THE.

Master of Arts in Ecology and Evolutionary Biology, Botany, or Entomology

Ecology and Evolutionary Biology Graduate Programs

The department comprises a large number of biologists with a variety of research interests. Three broad overlapping themes capture the interests and activities in EEB — biodiversity and macroevolution, ecology and global change biology, and evolutionary mechanisms. The department offers graduate study leading to Master of Arts and Doctor of Philosophy degrees in botany, entomology, and ecology and evolutionary biology. General information about the department and its faculty, current graduate students, admission, and financial support may be found on the department's website (http://www2.ku.edu/~eeb).

Neotropical biodiversity is a special area of concentration among EEB faculty. Many faculty members have courtesy appointments in the Latin American Area Studies Program, which fosters multidisciplinary research in Latin America across the campus. KU is a member of the Organization for Tropical Studies, and many faculty members and students participate in advanced, field-oriented OTS courses. Graduate students can receive fellowships for courses, e.g. BIOL 786 Fundamentals of Tropical Biology, or research projects in Costa Rica. Other EEB faculty have research concentrations in Asia, Africa, Antarctica, and elsewhere, creating a genuinely global reach for EEB research activities.
(M.A. and B.S. degree programs in biology are listed under Biology Undergraduate Programs (p. 1166).)

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

The departmental graduate admissions committee reviews the record of each applicant. Admission is based on background, preparation, test scores, and academic performance. The committee considers each candidate’s overall undergraduate record in the context of the institution(s) from which the record was received. A graduate student should have a broad undergraduate background in natural science and math, including calculus, physics, chemistry, organismal biology, genetics, ecology, and evolutionary biology. Faculty recommendations, honors, awards, undergraduate research experience, publications, and professional experience also are considered. Enthusiasm, scientific expertise, and clarity of writing as evidenced by the applicant’s essay are particularly important.

A bachelor’s degree or equivalent and a minimum overall grade-point average of 3.0 on a 4.0 scale is required for regular admission. The master’s degree is not a prerequisite for entering a Ph.D. program. Domestic applicants must provide a certified score report from the Graduate Record Examination for the general test (scores from the GRE biology subject test are optional). Non-native English speakers must provide evidence of English proficiency, typically in the form of certified scores from the Test of English as a Foreign Language or from the International English Language Testing System. For more details on admission requirements, visit the EEB website (http://www2.ku.edu/~eeb).

Applicants are encouraged to correspond with one or more faculty members before and during the application process, because students cannot be admitted without a faculty sponsor. Interested students are encouraged to visit campus to meet faculty members and graduate students. Graduate school is critically important in beginning a career, and the choice of a program in which to enroll should be made carefully.

The number of students admitted is limited. Qualified candidates may be denied admission because of lack of a faculty sponsor, financial support, or research facilities.

Applications and supplemental materials may be submitted online. Applications from underrepresented groups are encouraged. For a detailed description of the application process, visit the EEB website (http://www2.ku.edu/~eeb). All application materials for fall admission must be received no later than December 1. Only complete applications are considered. Send inquiries to the graduate coordinator (a4ashe@ku.edu).

**M.A. Degree Requirements:**

**Ecology and Evolutionary Biology**

**Options I (Thesis) and II (Nonthesis)**

Two options leading to the M.A. degree are offered. Option I (Thesis) is research-oriented and requires a thesis. Option II (Nonthesis) emphasizes broader graduate training without a concentration on research. For each option, the advisory committee must have at least 3 Graduate Faculty members, 2 of whom must be in EEB. No faculty member outside the department is required. A faculty member from a different department with a courtesy appointment in the student’s home department may serve in fulfillment of the committee majority.

**Required Course Work**

Most course work requirements are identified during the student’s preliminary advisory meeting. Students are expected to take graduate-level courses (or have equivalent knowledge) in ecology, evolution, and systematics. A student’s advisory committee may add course requirements during annual meetings. Listed below are specific course requirements for all master’s students in the EEB department:

1. Students must complete BIOL 701 Topics in Responsible Scholarship during the first year of graduate education in the fall semester. Students are expected to attend departmental seminars in subsequent semesters.
2. Students must complete BIOL 801 Core Topics in Current EEB Research Seminar during the first year of graduate study in the spring semester.
3. Students must complete a graduate-level course in statistics, typically fulfilled by completing BIOL 841 Biometry I. Alternatively, students may demonstrate equivalent background knowledge.
4. Students pursuing Option I (Thesis) must complete a minimum of 1 credit hour of BIOL 899 Master’s Thesis.

Master’s students must meet a credit-hour-completion requirement. Those in the thesis program must complete a minimum of 30 graduate-level credit hours with no more than 10 of the 30 from enrollment in thesis, research, or advanced study hours. Those in the nonthesis program must complete a minimum of 36 graduate level credit hours with no more than 12 of the 36 from enrollment in thesis, research, or advanced study hours.

**Master’s Defense for Option I (Thesis) Students**

During the final semester of enrollment, students pursuing the Option I (Thesis) master’s degree must present the results of thesis research in a public forum and complete a thesis defense. The thesis presentation should follow the standard departmental seminar format. The master’s thesis defense consists of a substantive test of the student’s knowledge of the field and the thesis topic, with approximately 50 percent of the time devoted to questions in the general examination realm, covering the full breadth of the candidate’s field of study (i.e., general knowledge of ecology and evolutionary biology). At the discretion of the student and advisor, the exam may be held on the same day as the thesis presentation, or the events may be held on separate days. The defense examining committee must be composed of 3 members of the Graduate Faculty, the majority of which must be tenured, or tenure-track EEB faculty with regular or dissertation status on the Graduate Faculty. In some cases it may be possible for committee members to attend the examination via mediated means such as tele/video-conferencing (for
details view the exam attendance policy (http://www.policy.ku.edu/graduate-studies/oral-exam-attendance). To pass the thesis defense, a student must receive a majority of passing votes from the examining committee. **Students must contact the EEB graduate coordinator 3 weeks prior to the anticipated presentation and defense** to request departmental and College permission to schedule the events.

Students planning to defend a master’s thesis must submit copies of the thesis to the entire examining committee and to the GPC no less than 2 weeks (or longer if requested by the student’s committee) in advance of the planned defense. The thesis should meet general formatting regulations (http://clas.ku.edu/coga/graduation/masters).

### Master’s Final Examination for Option II (Nonthesis) Students

During the final semester of enrollment in course work when nonthesis program activities are nearing completion, students pursuing the **Option II (Nonthesis)** master’s degree must successfully complete a general oral examination. The examination’s structure is similar to that of the doctoral oral comprehensive examination; however, the examination is shorter, and depth and breadth of knowledge required of the student are less comprehensive than expected of a successful doctoral aspirant. The examining committee must be comprised of at least 3 members of the Graduate Faculty, the majority of which must be tenured or tenure-track EEB faculty with regular or dissertation status on the Graduate Faculty. In some cases it may be possible for committee members to attend the examination via mediated means such as tele/video conferencing (for details view the exam attendance policy (http://www.policy.ku.edu/graduate-studies/oral-exam-attendance)). To pass the master’s final examination, a student must receive a majority of passing votes from the examining committee. **Students must contact the EEB graduate coordinator 3 weeks prior to the anticipated examination** to request departmental and College permission to schedule the event.

### Research

Upon completion of their work, students in M.A. **Option I (Thesis)** must submit a thesis reporting original research. The committee-approved thesis must be submitted electronically to Graduate Studies. Instructions for formatting and submitting the electronic thesis are online (http://www.graduation.ku.edu/electronic-thesis-and-dissertation). The thesis also must be submitted to the department as a PDF document. Paper copies of the title and acceptance pages containing the signatures of the examining committee members must be submitted to both the College and the department.

Students in M.A. **Option II (Nonthesis)** must conduct research with 1 or more faculty members involving work on a research problem that requires use of literature, and laboratory or field techniques. Nonthesis students must submit a comprehensive written report to the advisory committee. Examples of research problems that could be the basis of the written report include a literature review of a critical issue in a scientific discipline, original research, or other creative activity approved by the advisory committee. The committee-approved report must be submitted to the department as a PDF document. A paper copy of the title page containing signatures of the advisory committee members also must be submitted.

### Botany

**Options I (Thesis) and II (Nonthesis)**

Two options leading to the M.A. degree are offered. **Option I (Thesis)** is research-oriented and requires a thesis. **Option II (Nonthesis)** emphasizes broader graduate training without a concentration on research. For each option, the advisory committee must have at least 3 Graduate Faculty members, 2 of whom must be in EEB. No faculty member outside the department is required. A faculty member from a different department with a courtesy appointment in the student’s home department may serve in fulfillment of the committee majority.

### Required Course Work

Most course work requirements are identified during the student’s preliminary advisory meeting. Students are expected to take graduate-level courses (or have equivalent knowledge) in ecology, evolution, and systematics. A student’s advisory committee may add course requirements during annual meetings. Listed below are specific course requirements for all master’s students in the EEB department:

1. Students must complete BIOL 701 Topics in Responsible Scholarship during the first year of graduate education in the fall semester. Students are expected to attend departmental seminars in subsequent semesters.
2. Students must complete BIOL 801 Core Topics in Current EEB Research Seminar during the first year of graduate study in the spring semester.
3. Students must complete a graduate-level course in statistics, typically fulfilled by completing BIOL 841 Biometry I. Alternatively, students may demonstrate equivalent background knowledge.
4. Students pursuing Option I (Thesis) must complete a minimum of 1 credit hour of BIOL 899 Master’s Thesis.

Master’s students must meet a credit-hour-completion requirement. Those in the thesis program must complete a minimum of 30 graduate-level credit hours with no more than 10 of the 30 from enrollment in thesis, research, or advanced study hours. Those in the nonthesis program must complete a minimum of 36 graduate level credit hours with no more than 12 of the 36 from enrollment in thesis, research, or advanced study hours.

Students seeking an M.A. in botany must take a graduate-level course in at least 2 of the following 3 areas:

1. Plant ecology
2. Plant systematics or morphology
3. Plant development or physiology

### Master’s Defense for Option I (Thesis) Students

During the final semester of enrollment, students pursuing the **Option I (Thesis)** master’s degree must present the results of thesis research in a public forum and complete a thesis defense. The thesis presentation should follow the standard departmental seminar format. The master’s thesis defense consists of a substantive test of the student’s knowledge of the field and the thesis topic, with approximately 50 percent of the time devoted to questions in the general examination realm, covering the full breadth of the candidate’s field of study (i.e., general knowledge of ecology and evolutionary biology). At the discretion of the student and advisor, the exam may be held on the same day as the thesis presentation, or the events may be held on separate days. The defense examining committee must be composed of 3 members of the Graduate Faculty, the majority of which must be tenured, or tenure-track EEB faculty with regular or dissertation status on the Graduate Faculty. In some cases it may be possible for committee members to attend the examination via mediated means such as tele/video-conferencing (for details view the exam attendance policy (http://www.policy.ku.edu/)
Two options leading to the M.A. degree are offered. Option I (Thesis) is
Options I (Thesis) and II (Nonthesis)

Students planning to defend a master’s thesis must submit copies of the
thesis to the entire examining committee and to the GPC no less than
2 weeks (or longer if requested by the student’s committee) in advance
of the planned defense. The thesis should meet general formatting
regulations (http://clas.ku.edu/coga/graduation/masters).

Master’s Final Examination for Option II (Nonthesis) Students

During the final semester of enrollment in course work when nonthesis
program activities are nearing completion, students pursuing the Option
II (Nonthesis) master’s degree must successfully complete a general
oral examination. The examination’s structure is similar to that of the
doctoral oral comprehensive examination; however, the examination is
shorter, and depth and breadth of knowledge required of the student are
less comprehensive than expected of a successful doctoral aspirant. The
examining committee must be comprised of at least 3 members of the
Graduate Faculty, the majority of which must be tenured or tenure-track
EEB faculty with regular or dissertation status on the Graduate Faculty.
In some cases it may be possible for committee members to attend
the examination via mediated means such as tele/video conferencing
(for details view the exam attendance policy (http://www.policy.ku.edu/
graduate-studies/oral-exam-attendance)). To pass the master’s final
eamination, a student must receive a majority of passing votes from
the examining committee. Students must contact the EEB graduate
coordinator 3 weeks prior to the anticipated examination to request
departmental and College permission to schedule the event.

Research

Upon completion of their work, students in M.A. Option I (Thesis) must
submit a thesis reporting original research. The committee-approved
thesis must be submitted electronically to Graduate Studies. Instructions
for formatting and submitting the electronic thesis are online (http://
also must be submitted to the department as a PDF document. Paper
copies of the title and acceptance pages containing the signatures of the
examining committee members must be submitted to both the College
and the department.

Students in M.A. Option II (Nonthesis) must conduct research with 1 or
more faculty members involving work on a research problem that requires
use of literature, and laboratory or field techniques. Nonthesis students
must submit a comprehensive written report to the advisory committee.
Examples of research problems that could be the basis of the written
report include a literature review of a critical issue in a scientific discipline,
original research, or other creative activity approved by the advisory
committee. The committee-approved report must be submitted to the
department as a PDF document. A paper copy of the title page containing
signatures of the advisory committee members also must be submitted.

Entomology

Options I (Thesis) and II (Nonthesis)

Two options leading to the M.A. degree are offered. Option I (Thesis) is
research-oriented and requires a thesis. Option II (Nonthesis) emphasizes
broader graduate training without a concentration on research. For each
option, the advisory committee must have at least 3 Graduate Faculty
members, 2 of whom must be in EEB. No faculty member outside the
department is required. A faculty member from a different department with
a courtesy appointment in the student’s home department may serve in
fulfillment of the committee majority.

Required Course Work

Most course work requirements are identified during the student’s
preliminary advisory meeting. Students are expected to take graduate-
level courses (or have equivalent knowledge) in ecology, evolution,
and systematics. A student’s advisory committee may add course
requirements during annual meetings. Listed below are specific course
requirements for all master’s students in the EEB department:

1. Students must complete BIOL 701 Topics in Responsible Scholarship
during the first year of graduate education in the fall semester.
Students are expected to attend departmental seminars in
subsequent semesters.
2. Students must complete BIOL 801 Core Topics in Current EEB
Research Seminar during the first year of graduate study in the spring
semester.
3. Students must complete a graduate-level course in statistics, typically
fulfilled by completing BIOL 841 Biometry I. Alternatively, students
may demonstrate equivalent background knowledge.
4. Students pursuing Option I (Thesis) must complete a minimum of 1
credit hour of BIOL 899 Master’s Thesis.

Master’s students must meet a credit-hour-completion requirement. Those
in the thesis program must complete a minimum of 30 graduate-level
credit hours with no more than 10 of the 30 from enrollment in thesis,
research, or advanced study hours. Those in the nonthesis program must
complete a minimum of 36 graduate level credit hours with no more than
12 of the 36 from enrollment in thesis, research, or advanced study hours.

Students seeking an M.A. in entomology must take BIOL 500 Biology
of Insects and BIOL 502 Laboratory in Insect Biology and Diversity,
unless they have taken equivalent courses. Students who have taken
a course equivalent to BIOL 502 elsewhere still are encouraged to take
BIOL 502 to familiarize themselves with the local insect fauna. In addition,
students must take at least 1 of the following courses: BIOL 708 External
Morphology of Insects, BIOL 711 Insect Systematics, or BIOL 716 Insect
Physiology and Internal Morphology.

Master’s Defense for Option I (Thesis) Students

During the final semester of enrollment, students pursuing the Option I
(Thesis) master’s degree must present the results of thesis research in
a public forum and complete a thesis defense. The thesis presentation
should follow the standard departmental seminar format. The master’s
thesis defense consists of a substantive test of the student’s knowledge
of the field and the thesis topic, with approximately 50 percent of the
time devoted to questions in the general examination realm, covering
the full breadth of the candidate’s field of study (i.e., general knowledge
of ecology and evolutionary biology). At the discretion of the student
and advisor, the exam may be held on the same day as the thesis
presentation, or the events may be held on separate days. The defense
examining committee must be composed of 3 members of the Graduate
Faculty, the majority of which must be tenured, or tenure-track EEB
faculty with regular or dissertation status on the Graduate Faculty. In
some cases it may be possible for committee members to attend the
examination via mediated means such as tele/video-conferencing (for
degree in the biological sciences should complete all work for the doctoral degree within 4 to 5 years of initial enrollment at KU. A student beginning graduate study with only a bachelor’s degree in the biological sciences should complete all work for the doctoral degree within 5 or 6 years. The maximum tenure for EEB graduate students varies according to degree program. Master’s students are allowed a maximum of 4 years to complete the degree program, and doctoral students are allowed 8 years. If a student earns both an M.A. and a Ph.D. from KU, he or she has a total of 10 years to complete both degrees. Petitions to extend the time limits must be approved by the student’s advisory committee and forwarded to the EEB Graduate Program Committee for consideration before being forwarded to the College for final approval.

As required by the university, doctoral students must complete the equivalent of at least 3 academic years of full-time graduate study. This may include the time spent earning a master’s degree.

Doctor of Philosophy in Ecology and Evolutionary Biology, Botany, or Entomology

Ecology and Evolutionary Biology Graduate Programs

The department comprises a large number of biologists with a variety of research interests. 3 broad overlapping themes capture the interests and activities in EEB — biodiversity and macroevolution, ecology and global change biology, and evolutionary mechanisms. The department offers graduate study leading to Master of Arts and Doctor of Philosophy degrees in botany, entomology, and ecology and evolutionary biology. General information about the department and its faculty, current graduate students, admission, and financial support may be found on the department’s website (http://www2.ku.edu/~eeb).

Neotropical biodiversity is a special area of concentration among EEB faculty. Many faculty members have courtesy appointments in the Latin American Area Studies Program, which fosters multidisciplinary research in Latin America across the campus. KU is a member of the Organization for Tropical Studies, and many faculty members and students participate in advanced, field-oriented OTS courses. Graduate students can receive fellowships for courses, e.g. BIOL 786 Fundamentals of Tropical Biology, or research projects in Costa Rica. Other EEB faculty have research concentrations in Asia, Africa, Antarctica, and elsewhere, creating a genuinely global reach for EEB research activities.

(B.A. and B.S. degree programs in biology are listed under Biology Undergraduate Programs (p. 1166).)

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.
Graduate Admission

The departmental graduate admissions committee reviews the record of each applicant. Admission is based on background, preparation, test scores, and academic performance. The committee considers each candidate’s overall undergraduate record in the context of the institution(s) from which the record was received. A graduate student should have a broad undergraduate background in natural science and math, including calculus, physics, chemistry, organismal biology, genetics, ecology, and evolutionary biology. Faculty recommendations, honors, awards, undergraduate research experience, publications, and professional experience also are considered. Enthusiasm, scientific expertise, and clarity of writing as evidenced by the applicant’s essay are particularly important.

A bachelor's degree or equivalent and a minimum overall grade-point average of 3.0 on a 4.0 scale is required for regular admission. The master’s degree is not a prerequisite for entering a Ph.D. program. Domestic applicants must provide a certified score report from the Graduate Record Examination for the general test (scores from the GRE biology subject test are optional). Non-native English speakers must provide evidence of English proficiency, typically in the form of certified scores from the Test of English as a Foreign Language or from the International English Language Testing System. For more details on admission requirements, visit the EEB website (http://www2.ku.edu/~eeb).

Applicants are encouraged to correspond with one or more faculty members before and during the application process, because students cannot be admitted without a faculty sponsor. Interested students are encouraged to visit campus to meet faculty members and graduate students. Graduate school is critically important in beginning a career, and enthusiasm, scientific expertise, and clarity of writing as evidenced by the applicant’s essay are particularly important.

The number of students admitted is limited. Qualified candidates may be denied admission because of lack of a faculty sponsor, financial support, or research facilities.

Applications and supplemental materials may be submitted online. Applications from underrepresented groups are encouraged. For a detailed description of the application process, visit the EEB website (http://www2.ku.edu/~eeb). All application materials for fall admission must be received no later than December 1. Only complete applications are considered. Send inquiries to the graduate coordinator (a4ashe@ku.edu).

Ph.D. Degree Requirements:

Ecology and Evolutionary Biology

Required Course Work

Most course work requirements for EEB graduate students are identified during the student’s preliminary advisory meeting. Students are expected to take graduate-level courses (or have equivalent knowledge) in ecology, evolution, and systematics. A student’s advisory committee may add course requirements to a student’s degree program during annual meetings. Listed below are specific course requirements for all doctoral students in the EEB department:

1. Students must complete BIOL 701 Topics in Responsible Scholarship during the first year of graduate education in the fall semester. They are expected to attend departmental seminars in subsequent semesters.

2. Students must complete the BIOL 801 Core Topics in Current EEB Research seminar course during the first year of graduate study in the spring semester.

3. Students must complete a graduate-level course in statistics, typically fulfilled by completing BIOL 841 Biometry I. Alternatively, students may demonstrate equivalent background knowledge.

4. Students pursuing the doctorate must complete at least 1 credit hour of BIOL 999 Doctoral Dissertation.

Botany

Required Course Work

Most course work requirements for EEB graduate students are identified during the student’s preliminary advisory meeting. Students are expected to take graduate-level courses (or have equivalent knowledge) in ecology, evolution, and systematics. A student’s advisory committee may add course requirements to a student’s degree program during annual meetings. Listed below are specific course requirements for all doctoral students in the EEB department:

1. Students must complete BIOL 701 Topics in Responsible Scholarship during the first year of graduate education in the fall semester. They are expected to attend departmental seminars in subsequent semesters.

2. Students must complete the BIOL 801 Core Topics in Current EEB Research seminar course during the first year of graduate study in the spring semester.

3. Students must complete a graduate-level course in statistics, typically fulfilled by completing BIOL 841 Biometry I. Alternatively, students may demonstrate equivalent background knowledge.

4. Students pursuing the doctorate must complete at least 1 credit hour of BIOL 999 Doctoral Dissertation.

In addition, students seeking a Ph.D. in botany must take a specialty seminar focusing on a plant-related topic and must complete a graduate-level course in each of the following 3 areas:

1. Plant ecology
2. Plant systematics or morphology
3. Plant development or physiology

Entomology

Required Course Work

Most course work requirements for EEB graduate students are identified during the student’s preliminary advisory meeting. Students are expected to take graduate-level courses (or have equivalent knowledge) in ecology, evolution, and systematics. A student’s advisory committee may add course requirements to a student’s degree program during annual meetings. Listed below are specific course requirements for all doctoral students in the EEB department:

1. Students must complete BIOL 701 Topics in Responsible Scholarship during the first year of graduate education in the fall semester. They are expected to attend departmental seminars in subsequent semesters.

2. Students must complete the BIOL 801 Core Topics in Current EEB Research seminar course during the first year of graduate study in the spring semester.
3. Students must complete a graduate-level course in statistics, typically fulfilled by completing BIOL 841 Biometry I. Alternatively, students may demonstrate equivalent background knowledge.

4. Students pursuing the doctorate must complete at least 1 credit hour of BIOL 999 Doctoral Dissertation.

Students seeking a Ph.D. in entomology must take BIOL 500 Biology of Insects and BIOL 502 Laboratory in Insect Biology and Diversity unless they have taken equivalent courses. Students who have taken a course equivalent to BIOL 502 elsewhere still are encouraged to take BIOL 502 to familiarize themselves with the local insect fauna. In addition, students must take all 3 of the following courses: BIOL 708 External Morphology of Insects, BIOL 711 Insect Systematics, and BIOL 716 Insect Physiology and Internal Morphology.

**Assistantships**

Doctoral students must complete at least 2 semesters of half-time supervised teaching, curatorial, or research assistantships. Alternative experiences may be approved by the student's advisory committee.

**Research Skills and Responsible Scholarship**

All students aspiring to the Ph.D. are required by the Office of Graduate Studies to respond to the need for training in Research Skills and Responsible Scholarship (see official policy description at http://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship). As such, requirements in EEB include training in responsible scholarship (BIOL 701 Topics in Responsible Scholarship). In addition, students must develop, in consultation with their preliminary advisory committees, a list of additional research skills that will be necessary for successful completion of the doctoral program; these skills may include fluency in English (if not the native language); fluency (reading or speaking) in other foreign languages; and skills such as scientific illustration, phylogenetic methods, genomic analysis, geographic information systems, advanced mathematics and statistics, computer programming, biochemical analyses, advanced microscopy, and others. Students are strongly encouraged to develop foreign language skills pertinent to their research, in view of the need for effective communication in an increasingly global academic community. Research skills will be determined initially by the student's Preliminary Advisory and Research Advisory committees, with the potential for modification as specific dissertation plans evolve, proposed in a letter to the Graduate Coordinator of the department, and approved by the Graduate Program Committee; successful fulfillment will be determined by the student's Research Advisory Committee, documented in a letter to the Graduate Coordinator of the department, and approved by the Graduate Program Committee.

1. **Reading Knowledge of a Foreign Language**

Students without prior experience must enroll in a 3-credit-hour reading course in a major modern language and achieve a final grade of A or B. Students with prior knowledge of a language may choose instead to translate, in a set amount of time, a pre-approved passage from the scientific literature in that language. Approval of the foreign language requirement must be obtained from the instructor of the reading course, from an appropriate representative of a language department, or from a qualified individual from EEB or another department.

2. **Fluency in a Foreign Language**

Fluency in reading, writing, and speaking a language that is not native to the student is determined by a faculty member who is fluent in the chosen language. Whenever possible, a qualified faculty member from the department should make the determination; otherwise, the student should contact the appropriate language department to identify a qualified individual. The faculty member must submit a letter to the EEB graduate program committee indicating that the student is fluent.

If the student is not a native English speaker, the student's committee may determine fluency in reading, writing, and speaking English. Following the committee's determination, the student's advisor must provide a letter to the EEB graduate program committee indicating that the student is fluent.

3. **Other Research Skills**

Other research skills may be attained either through course work or through completion of a project. In either case, the skill must be approved in advance of its completion by the EEB Graduate Program Committee. A list of previously approved skills appears in the EEB Graduate Student Handbook (http://eeb.ku.edu/student-handbook). Other courses or projects can be added to this list by petitioning the EEB graduate program committee for pre-approval.

Students with no prior experience using the chosen research skill should take a course recommended by the department; students with experience might choose to develop a project. A qualified faculty member must approve the choice of a project. Upon completion, a letter that describes the project and is signed by the supervising faculty member should be submitted to the departmental graduate coordinator for documentation purposes.

**Note:** Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library (https://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship).

**Residence Requirement**

Graduate Studies requires all doctoral students to complete 2 terms, which may include 1 summer session, in full-time resident study at KU. See the KU Policy Library (https://policy.ku.edu/graduate-studies/doctoral-program-time-constraints) for details.

**Comprehensive Oral Examination**

The comprehensive oral examination tests the breadth of a student's knowledge and explores the student's ability to synthesize information and think critically. The examination should include, but is not limited to, questions relating to ecology, evolution, and systematics, as well as information about general biology. Examinations are conducted in English. Students are recommended to take the examination within four semesters of entering the program and are expected to complete the examination within six semesters. To be eligible to take the examination, both the research skills and responsible scholarship and doctoral residence requirements must be fulfilled and documented. All doctoral aspirants must prepare a dissertation proposal that follows the National Science Foundation Doctoral Dissertation Improvement Grant model. The dissertation proposal must be submitted to all members of the examination committee for review and approval at least 2 weeks before the examination. Students must contact the EEB graduate coordinator 3...
weeks before the anticipated examination to request departmental and College permission to schedule the event.

Doctoral committees must be comply with Graduate Studies Policy (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition) on committee composition.

A majority vote of the committee is required for the student to pass the examination. If the advisor or committee members wish, secret ballots may be used. To award Honors, at least 80 percent of the committee members must judge the student’s performance to be exceptional. An exceptional performance would be one that is judged to be in the top 10 percent of examinations in which the committee members have participated. If a student fails the comprehensive examination, another examination may be scheduled a minimum of 90 days after the first examination, but under no circumstances may a student take the examination more than twice.

A successful pass of the comprehensive oral examination is considered valid by the university for 5 years. Doctoral candidates who do not complete the dissertation within 5 years may be required to take the examination again to demonstrate current knowledge in the field.

Research Progress, Final Oral Examination, and Dissertation Defense

After passing the comprehensive oral examination and advancing to degree candidacy, doctoral students are expected to focus on completing original research and writing of the dissertation. Although opportunities for taking valuable courses may arise, the majority of a doctoral candidate’s enrollment should be in dissertation credits (BIOL 999 Doctoral Dissertation).

It is generally expected that the dissertation should be completed two to three years after advancing to candidacy. During these years, the student should continue to meet with his or her advisory committee on an annual basis to receive guidance on research progress. Committee membership should follow university requirements.

When the student and the faculty advisor are able to reasonably predict when the dissertation research and writing will be done, the dissertation defense and final oral examination may be scheduled. At least 5 months must have elapsed between successful completion of the oral examination and the date of the defense. Students must contact the EEB graduate coordinator at least 3 weeks prior to the anticipated defense date to request departmental and university approval of the defense.

A complete dissertation must be provided to the EEB Graduate Program Committee and to the student’s entire dissertation committee no less than 2 weeks (or longer if requested by the student’s committee) in advance of the planned defense. All members of the dissertation committee are required to read and comment on the work. 3 members are designated readers and provide a more detailed review. The dissertation must be written to meet general university regulations (http://www.graduate.ku.edu/electronic-thesis-and-dissertation).

The dissertation defense and final oral examination include a presentation of the candidate’s dissertation as a formal, public lecture. Whenever possible, the presentation should be part of the regular departmental seminar series. The presentation is followed by a question period, after which the final oral examination committee meets with the student for further discussion of the dissertation. A majority vote of the committee is required for the student to pass the examination; 80 percent of the committee must agree to award a student Honors. Both the dissertation and the presentation are considered in the decision. In rare cases it may be possible for committee members to attend the defense and examinations via mediated means such as tele/video-conferencing (for details view the exam attendance policy statement (http://www.policy.ku.edu/graduate-studies/oral-exam-attendance)). After passing the final oral examination, the student will make any corrections to the dissertation that are required. The final version will be submitted for approval to the department and the University.

Time Constraints

A student beginning graduate study with only a bachelor’s degree should complete all work for the master’s degree in 2 or 3 years after initial enrollment at KU. A student beginning graduate study with a master’s degree in the biological sciences should complete all work for the doctoral degree within 4 or 5 years. A student beginning graduate study with only a bachelor’s degree in the biological sciences should complete all work for the doctoral degree within 5 or 6 years.

The maximum tenure for EEB graduate students varies according to degree program. Master’s students are allowed a maximum of 4 years to complete the degree program, and doctoral students are allowed 8 years. If a student earns both an M.A. and a Ph.D. from KU, he or she has a total of 10 years to complete both degrees. Petitions to extend the time limits must be approved by the student’s advisory committee and forwarded to the EEB Graduate Program Committee for consideration before being forwarded to the College for final approval.

As required by the university, doctoral students must complete the equivalent of at least 3 academic years of full-time graduate study. This may include the time spent earning a master’s degree.

Department of Economics

Why study economics?

Because it will give you the tools you need to understand our increasingly interconnected world.

Undergraduate Programs

The study of economics offers students insight into some of the most fundamental issues facing societies today: what goods and services should we produce, how should they be produced, and how should they be distributed around the world? Economics is outstanding preparation for a career in finance, business, policy analysis, international relations, or any other field that requires rigorous analytic thinking. It also makes an excellent foundation for graduate study in economics, business, law, political science, or public administration.

Courses for Nonmajors

ECON 104 is recommended for students who want only an introductory course. Students planning to teach social sciences should consult the School of Education. Students who plan to enter the School of Business in the junior year should consult the School of Business. Students who plan to enter the School of Journalism should consult the School of Journalism and Mass Communications.

Graduate Programs

The economics department offers a Master of Arts degree and a Doctor of Philosophy degree and, in conjunction with the School of Law, a program in which one can earn the Master of Arts and Juris Doctor degrees. These
programs help students prepare for careers in education, government, and business.

Courses

ECON 104. Introductory Economics. 4 Hours SF GE3S / S.
An introduction to modern economics designed primarily for students who do not plan to major in economics. Topics include economic history, the operation of economic institutions, and the formation and execution of economic policies to meet the current problems of the domestic and international economy. Course may be offered in lecture or online format. Prerequisite: MATH 101 or MATH 104, or eligibility for MATH 115 or MATH 121. LEC.

ECON 105. Introductory Economics, Honors. 4 Hours SF GE3S / S.
An introduction to modern economics designed primarily for students who do not plan to major in economics. Topics include economic history, the operation of economic institutions, and the formation and execution of economic policies to meet the current problems of the domestic and international economy. Prerequisite: Consent of the Economics Department and MATH 101 or MATH 104, or eligibility for MATH 115 or MATH 121. LEC.

ECON 110. The Economics of Globalization. 3 Hours SF AE42 / S.
The course emphasizes the application of economic methods of analysis to the public policy issues that globalization creates. Topics covered may include the following: winners and losers from trade; links between trade and labor markets; links between trade and foreign investment; the international financial system and exchange rates; outsourcing and multinational corporations; international institutions and regional trade agreements. LEC.

ECON 142. Principles of Microeconomics. 3 Hours SF GE3S / S.
An analytical introduction to microeconomics. Topics include theory of markets, public policy, international trade, economic efficiency, and equity. Prerequisite: MATH 101 or MATH 104, or eligibility for MATH 115 or MATH 121. LEC.

ECON 143. Principles of Microeconomics, Honors. 3 Hours SF GE3S / S.
An honors section of ECON 142. An analytical introduction to microeconomics. Topics include theory of markets, public policy, international trade, economic efficiency, and equity. Prerequisite: Consent of the Economics Department and MATH 101 or MATH 104, or eligibility for MATH 115 or MATH 121. LEC.

ECON 144. Principles of Macroeconomics. 3 Hours SF GE3S / S.
An analytical introduction to macroeconomics. Topics include determination of aggregate income, employment, inflation, exchange rates, and the role of fiscal and monetary policy in dealing with unemployment, inflation, and economic growth. Prerequisite: MATH 101, MATH 104, or eligibility for MATH 115 or MATH 121. LEC.

ECON 145. Principles of Macroeconomics, Honors. 3 Hours SF GE3S / S.
An honors section of ECON 144. An analytical introduction to macroeconomics. Topics include determination of aggregate income, employment, inflation, exchange rates, and the role of fiscal and monetary policy in dealing with unemployment, inflation, and economic growth. Prerequisite: Consent of the Economics Department and MATH 101, MATH 104, or eligibility for MATH 115 or MATH 121. LEC.

ECON 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Economics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ECON 250. Study Abroad Topics in: ______. 1-5 Hours S.
This course is designed for the study of special topics in economics at the freshman/sophomore level. Coursework must be arranged by the office of KU Study Abroad and approved by the Economics Department. This course may be repeated for credit if content varies. LEC.

ECON 310. Topics in Applied Economics: ______. 3 Hours S.
(Topic, instructor, and specific prerequisites to be announced in the Schedule of Classes.) This course will focus on an area of applied economics of current interest. This course cannot be used to fulfill the elective course requirements for the Economics major or the Economics minor. LEC.

ECON 450. Study Abroad Topics in: ______. 1-5 Hours S.
This course is designed for the study of special topics in economics at the junior/senior level. Coursework must be arranged by the office of KU Study Abroad, approved by the Economics Department, and may count as an economics elective for economics majors. This course may be repeated for credit if content varies. LEC.

ECON 496. Research in Economics. 1-3 Hours AE61 / S.
A directed reading and research course for economics majors. The course involves the preparation of a research paper under the supervision of a faculty member whose area of interest and specialization corresponds with the area of study selected by the student. Prerequisite: Approval of major adviser and selected faculty member. IND.

ECON 497. Senior Research Honors. 1-3 Hours AE61 / S.
Open to seniors in the College who have a grade-point average of 3.5 or above in economics and a grade-point average of 3.25 or above in all courses. A directed reading and research course for qualifying seniors. Involves preparation of a research paper under the supervision of a faculty member whose area of interest and specialization corresponds with the area of study selected by the student. Prerequisite: Approval of major adviser and selected faculty member. IND.

ECON 498. Oswald Undergraduate Seminar in Economics. 3 Hours S.
Examine issues in economics of contemporary interest. Enrollment is limited to current Oswald, Boynton, and Pritchard scholarship holders. May be repeated for credit, but does not fulfill the elective course requirements for the Economics major or minor. Prerequisite: ECON 520, ECON 522, and permission of department. LEC.

ECON 505. History of Economic Analysis. 3 Hours S.
The history of intellectual efforts to understand economic phenomena and the impact of these efforts on the social and economic development of the modern world. Prerequisite: ECON 104 or ECON 142 and ECON 144. LEC.

ECON 510. Energy Economics. 3 Hours S.
The application of basic economic concepts and methods to the analysis of energy markets, regulation, and policies. Topics covered include energy trends and projections, economic growth and resource exhaustion, the organization and regulation of fossil fuel industries, nuclear power and non-conventional energy technologies, the world oil market, energy conservation, environmental pollution, and national energy policies in the U.S. and other developed as well as developing countries. Prerequisite: ECON 142 and ECON 144 or permission of instructor. LEC.

ECON 515. Income Distribution and Inequality. 3 Hours AE41 / S.
An analysis of the distribution of income and wealth in the United States and a few other developed countries. The concepts of economic inequality, economic justice, statistical measures of inequality and their applications will be discussed. Various theories of income distribution
ECON 516. Income Distribution and Inequality, Honors. 3 Hours AE1 / H.
This course examines the definition and impact of social and economic inequality. Beginning with a review of economic and philosophical perspectives of inequality, the course considers the measurement of inequality, current trends in U.S. and international inequality, and policies designed to eliminate inequality. The course requires both writing and quantitative analysis and includes a term paper. Students should be comfortable with methods of quantitative social science. The Honors section is taught as a seminar where philosophical perspectives on inequality are debated and discussed. Prerequisite: ECON 142 and ECON 144. Open only to students who have been admitted to the University Honors Program, or by consent of instructor. LEC.

ECON 520. Microeconomics. 3 Hours S.
The theory of consumption, production, pricing, and resource allocation. Not open for credit to students with credit in ECON 524. Prerequisite: ECON 142, ECON 144, and Math 116 or Math 122 (or equivalent). LEC.

ECON 521. Microeconomics Honors. 3 Hours S.
The theory of consumption, production, pricing, and resource allocation. Prerequisite: ECON 142 and ECON 144 and consent of department. LEC.

ECON 522. Macroeconomics. 3 Hours S.
The theory of national income and employment, the analysis of aggregate demand, the general degree of utilization of productive resources, the general level of prices, and related questions of policy. Prerequisite: ECON 142 and ECON 144. LEC.

ECON 523. Macroeconomics Honors. 3 Hours S.
The theory of national income and unemployment, the analysis of aggregate demand, the general degree of utilization of productive resources, the general level of prices, and related questions of policy. Prerequisite: ECON 142 and ECON 144 and consent of department. LEC.

ECON 526. Introduction to Econometrics. 3 Hours S.
An introduction to the statistical analysis of economic data and its application to economic inquiry. Includes extensive use of statistical software. Prerequisite: ECON 142, ECON 144, and MATH 526 or equivalent. LEC.

ECON 530. American Economic Development. 3 Hours H.
An introductory study of the development of the American economy from colonial times to the present. Investigates long-term trends in output, population, and output per capita, as well as short-term fluctuations, and the variables and institutions that determined these fluctuations and trends. (Same as HIST 628.) Prerequisite: ECON 104 or ECON 142 and ECON 144. LEC.

ECON 535. Economic History of Europe. 3 Hours S.
An introductory study of European economic history from the Middle Ages to the 1980s. Investigates the sources of economic growth, and the interaction between economic forces and social institutions. Topics covered will include the rise of commerce, the agricultural and industrial revolutions, imperialism, the Great Depression, and European recovery after World War II. (Same as HIST 528.) Prerequisite: ECON 104 or ECON 142 and ECON 144. LEC.

ECON 536. Economic Issues of the European Union. 3 Hours S.
A survey of the economies of the European Union, with a focus on the economic development of the member states since World War II, and an examination of the various economic issues confronting them today. (Same as EURS 536.) Prerequisite: ECON 104 or ECON 144. LEC.

ECON 540. Recent American Economic History. 3 Hours S.
An empirically oriented examination of the American economy designed to apply economic concepts to a wide variety of topics such as monetary and fiscal policy, income distribution, the Great Depression, poverty, population growth, the defense sector, education, research and development, technological change, and industrial organization. Prerequisite: ECON 104 or ECON 142 and ECON 144; ECON 520 and/or ECON 522 recommended. LEC.

ECON 550. Environmental Economics. 3 Hours U.
This course provides an overview of the theory and empirical practice of economic analysis as it applies to environmental issues. Topics include externalities (a type of market failure), the valuation of nonmarket goods, the practice of benefit-cost analysis, and the efficiency and cost effectiveness of pollution control policies. Most importantly, the course permits students to perform economic field research, using state-of-the-art techniques in a manner accessible to undergraduate students. (Same as EVRN 550.) Prerequisite: ECON 104 or ECON 142. LEC.

ECON 560. Economic Systems. 3 Hours S.
Critical analysis of economic theories underlying such economic systems as capitalism, different types of socialism, communism, and fascism. Comparative study of economic planning, production, distribution, price formation, economic institutions, and forms of government in countries under different economic systems. Prerequisite: ECON 104 or ECON 142 and ECON 144. LEC.

ECON 562. The Russian Economy. 3 Hours S/W.
An analytical survey of Russian economic development, with emphasis on the structure and operation of the Russian economy and transition issues. Prerequisite: ECON 104 or 142 and ECON 144 and consent of instructor. LEC.

ECON 563. Current Economic Issues of East Europe. 3 Hours S.
An institutional and theoretical analysis of the issues arising from the transition from a command economy to a free market-oriented economy. With emphasis on the former Soviet Union, topics will include: assessment of the central planning experience; changes in property rights and their effect on resource allocation; market mechanisms and how they work when market institutions are at the formative stage; and public interest under privatization. Prerequisite: ECON 142 and ECON 144. LEC.

ECON 564. Topics in Applied Economics: _______. 3 Hours S.
This course will focus on an area of applied economics of current interest. This course can be used to fulfill the elective course requirement for the Economics major. Prerequisite: ECON 142 and ECON 144. LEC.

ECON 570. Economics for Management Decisions. 3 Hours S.
Economic analysis of the firm with emphasis on managerial decisions in a business environment. Topics include supply and demand with applications, consumer behavior, quantitative demand analysis, production and cost, transactions costs and the organization of the firm, strategic decisions in alternative market environments, risk and uncertainty, imperfect information, and project evaluation. Prerequisite: ECON 142. LEC.

ECON 582. Economic Development. 3 Hours S.
An introduction to economic growth and development in high and low income countries, problems of development, and development policy. Prerequisite: ECON 104 or ECON 142. LEC.

ECON 583. Economic Issues of East Asia. 3 Hours S.
This course will study the economics of the East Asian countries, especially China, Japan, Korea, and Taiwan. Topics to be covered include economic growth, development and change, international trade, inflation, unemployment, income distribution, and urbanization. Emphasis will be on
ECON 584. Economic Development of Latin America. 3 Hours S. This course explores development strategies followed in the countries of Latin America and the Caribbean, and analyzes current debates over development strategy. Topics covered include: debt, structural adjustment, and multilateral lending agencies; trade policy, and regional or hemispheric integration; state intervention in the economy; the role of elites; environmental degradation and sustainable development; land reform and agricultural policy; transnational enterprises and foreign investment; women in work and the household: migration (rural-urban, and international); and grassroots development projects. Prerequisite: ECON 104 or ECON 144. LEC.

ECON 586. Economic Issues in China. 3 Hours S. This course studies the Chinese economy, especially during the post-1979 reform period, and its relationship to the development of the Greater China Circle (China, Hong Kong, and Taiwan). Topics to be covered include economic development during the pre-1979 reform period, economic reform, and its impacts on China, Hong Kong, Taiwan, and lessons from the Chinese economic reforms. Prerequisite: ECON 142 and ECON 144. LEC.

ECON 587. Economic Development of Africa. 3 Hours S. This course studies current economic issues facing African countries. It studies the general characteristics of several African economies and examines the impact of economic development policies, including those of international organizations, on the economies of Africa. Topics include poverty, income inequality, debt, foreign investment policies, trade policies, and government regimes. Prerequisite: ECON 104 or ECON 142 and ECON 144. LEC.

ECON 590. Game Theory. 3 Hours S. Analysis of strategic choice problems. Firms, voters, bargainers, animals, sports competitors, and persons in everyday life choose alternative options with the outcomes depending on the choices of one or more other similar decision makers. Strategies of rational choices will be derived and analyzed in economic and other environments. Prerequisite: ECON 142. LEC.

ECON 600. Money and Banking. 3 Hours S. The basic principles of money, credit, and banking and their relation to prices and business fluctuations; a study of commercial and central banking and the problems of credit control. Prerequisite: ECON 522. LEC.

ECON 604. International Trade. 3 Hours S. An introduction to the nonmonetary theory of international trade, the cause and pattern of trade, the gains from trade, and the contemporary issues in international economic policy. Prerequisite: ECON 520 or ECON 524. LEC.

ECON 605. International Finance. 3 Hours S. This course surveys theories of exchange rate and balance of payments determination. Included are the elasticity approach, Keynesian models, and the monetary approach. The mechanics of foreign exchange trading, balance of payments accounting, and the working of the international monetary system are also discussed. Prerequisite: ECON 522. LEC.

ECON 609. Sports Economics. 3 Hours S. The course covers the microeconomics of the sports industry. Topics include analysis of teams, leagues, players, incomes, strategies, history, and government policy. Prerequisite: ECON 520 or permission of instructor. LEC.

ECON 610. Resource Economics and Environmental Policy. 3 Hours S. Survey of the economics of natural resources, designed to introduce the student to the economic models and analytical methods commonly used in natural resource problems and policy issues. Topics covered include environmental pollution and regulation, environmental case studies and applications of cost-benefit analysis, theoretical models, policy issues in the utilization of renewable and nonrenewable resources, sustainable development, and global environmental problems. Prerequisite: ECON 520 or ECON 524 or permission of instructor. LEC.

ECON 620. Elements of Mathematical Economics. 3 Hours S. Selected aspects of economic theory with emphasis on those parts where the spirit of mathematical analysis, rather than dexterity, is utilized. The simplification of the subject matter is accomplished by stressing complete treatment of special cases such as a two commodity-two individual world. Prerequisite: ECON 520 or ECON 524 and MATH 116 or MATH 121. LEC.

ECON 622. Public Finance. 3 Hours S. A general introduction to the science of public finance. Topics covered include public expenditures, public revenues and public credit, and the shifting and incidence of taxation. Prerequisite: ECON 520 or ECON 524. LEC.

ECON 630. Industrial Organization and Antitrust Policy. 3 Hours S. An examination of the structure, conduct and performance of American industry applying the concepts and techniques of economic analysis. Topics covered include the theories of monopoly, competition and oligopoly, concentration, barriers to entry, price-fixing and other restrictive practices, mergers, technological change, and public regulation. The course will also focus on the historical development of American antitrust law. Prerequisite: ECON 520 or ECON 524. LEC.

ECON 631. Economics of Regulation. 3 Hours S. This course studies topics in the economic effects of industry regulation by administrative agencies as a substitute for market competition. Topics include various theories of regulatory behavior, the theory of natural monopoly, the economic effects of rate of return regulation on the performance of electric utilities, and the effects of recent social and environmental regulation. Prerequisite: ECON 520 or ECON 524. LEC.

ECON 635. Science and Technology in Economic Growth. 3 Hours S. An analytical and historical exploration of the roles that science and technology have played in the economic growth of industrial societies. This course will examine the forces that have shaped the rate and direction of technological change, and the impact of technological change on Western living standards. Topics covered will include factors influencing the pace of innovation, the diffusion of new technologies, international technology transfers, growth accounting, and models of aggregate economic growth. Prerequisite: ECON 520 or ECON 524. LEC.

ECON 640. Labor Economics. 3 Hours S. Analysis of labor markets and differences in wage rates and incomes. Topics include returns to education and training, labor unions, unemployment, anti-poverty programs, and other government policies influencing the labor market. Prerequisite: ECON 520 or ECON 524. LEC.

ECON 669. The Economics of Financial Markets. 3 Hours S. This course provides an introduction to the theory of finance and its use in the understanding of the economic role of financial markets. There are two central themes: the allocation of resources over time and the allocation of resources under uncertainty. Topics may include: household saving and investment, investment projects, valuation of financial assets, choice under uncertainty, portfolio choice, and capital asset pricing. Prerequisite: ECON 520 and ECON 526. LEC.
ECON 675. Introduction to Welfare Economics. 3 Hours S.
This course provides a nontechnical introduction to optimal resource allocation from the societal point of view as well as alternative individual mechanisms for achieving such an optimum. Prerequisite: ECON 520 or ECON 524. LEC.

ECON 680. Economic Growth. 3 Hours S.
This course studies growth with an emphasis on national evidence and macroeconomic policy issues. Classic and modern growth theories are developed and evaluated on the basis of how well they fit empirical evidence. Theories are developed in which productivity growth results from endogenous changes in technology or in the efficiency with which factors are utilized. The fundamental factors that affect productivity are examined, and they may include government policies, income inequality, geography, climate, resources and other factors. Prerequisite: ECON 522. LEC.

ECON 700. Survey of Microeconomics. 3 Hours.
A comprehensive survey of microeconomics, including the theories of consumption, production, distribution, pricing, and resource allocation. Prerequisite: ECON 520 and MATH 116 or MATH 121; and completion of ECON 142 and ECON 144, ECON 520, and ECON 522 with a grade-point average of at least 3.0 or graduate standing. LEC.

ECON 701. Survey of Macroeconomics. 3 Hours.
A comprehensive survey of the modern theory of national income determination with particular emphasis on the foundation of macroeconomic models and their empirical implementation. Prerequisite: ECON 522 and MATH 116 or MATH 121. LEC.

ECON 705. Development of Economic Thought. 3 Hours.
The development of economic thought from the time of the physiocrats through the modern period. Consideration is given to the works of the English Classical school, the school of Vienna, the historical school, the Lausanne school, and Cambridge school. In addition, the development of economic thought in the United States during the period is treated. Prerequisite: ECON 520 and ECON 522. LEC.

ECON 715. Elementary Econometrics. 3 Hours.
An elementary analysis of the problems of estimation, prediction, and hypothesis testing in the context of general linear, stochastic difference equation and simultaneous equations models. Applications of econometric theory to practical economic problems will be emphasized. Prerequisite: DSCI 301 or its equivalent; MATH 116 or MATH 121; and completion of ECON 142 and ECON 144, ECON 520, and ECON 522 with a grade-point average of at least 3.00 (B) or graduate standing. LEC.

ECON 716. Econometric Forecasting. 3 Hours.
An analysis of econometric forecasting techniques, including time-series models, single-equation regression models, and multiple-equation regression models. The course will examine forecasts of (a) macroeconomic variables, such as interest rates, investment, GNP, and the rate of inflation; and (b) market variables, such as price and quantity. Prerequisite: ECON 715 or ECON 817. LEC.

ECON 730. Topics in Industrial Organization. 3 Hours.
Advanced study of recent research in applied microeconomics and business behavior. Topics include vertical integration, collusion, multi-plant and multi-product operations, regulated industries, tying arrangements, and the empirical links between monopoly power and profitability. Prerequisite: ECON 630 or equivalent. LEC.

ECON 735. Science and Technology in Economic Growth. 3 Hours.
An analytical and historical exploration of the roles that science and technology have played in the economic growth of industrial societies. Topics covered include factors influencing the pace and character of technological innovation, national systems of innovation, the diffusion of new technologies, measurement of the benefits of new technologies, and the role of technology in various growth theories. Prerequisite: ECON 520, or ECON 524, or consent of instructor. LEC.

ECON 740. Theory of Economic Growth and Development. 3 Hours.
Advanced study of the theory of economic growth and development. Recent growth models, theory of underdevelopment, programming, policies and plans for development. Prerequisite: ECON 520 and ECON 522. LEC.

ECON 741. Economic Planning. 3 Hours.
A study of the techniques employed in the preparation of a national economic plan and of the policies required for its implementation. Special attention is given to the purposes of a plan, development strategies, investment requirements, and project appraisal. The development plans of several countries are examined to illustrate problems of planning economic development. Prerequisite: ECON 520 and ECON 522. LEC.

ECON 750. The Theory of International Finance. 2-3 Hours.
This course examines the modern, financial-asset market approach to exchange rate determination as well as dynamic exchange rate models. Possible topics may include exchange rate overshooting, exchange rate crises, and international policy coordination. Prerequisite: ECON 605 and MATH 116. LEC.

ECON 760. The Theory of Public Finance. 3 Hours.
An analysis of governmental fiscal activity and its economic effects with emphasis on the determination and incidence of budget policy. Prerequisite: ECON 520 and ECON 522; ECON 622 recommended. LEC.

ECON 765. Advanced American Economic Development. 3 Hours.
A study of the process of economic growth as it has occurred in the American economy, with emphasis on 19th century developments. The structural changes that accompanied growth and the impact of technological change are among the major topics considered. Prerequisite: ECON 520, ECON 522 and ECON 530, or consent of instructor. LEC.

ECON 766. Economic History. 3 Hours.
The development of market economies and economic institutions. The course will focus on Europe, but will include comparisons with other developed nations. Topics include: long-run economic growth, the rise of capitalistic agriculture and industry, the causes and consequences of technological change; changes in income distribution and economic organization; and the social and cultural effects of economic change. Prerequisite: ECON 520, ECON 522, and ECON 535 or ECON 530, or consent of instructor. LEC.

ECON 768. The Industrial Revolution. 3 Hours.
An examination of the development of the industrialization of England and its impact on the North Atlantic economy. Consideration will be given to the effects of demographic and technical changes upon economic structure and the changing economic relationships between nations. Prerequisite: ECON 520 and ECON 522 or consent of instructor. LEC.

ECON 769. Financial Economics. 3 Hours.
An introduction to the economic analysis of choice under uncertainty and asset pricing theory. Topics include the general equilibrium Arrow-Debreu model of complete markets; capital asset pricing model; stochastic dominance; portfolio frontiers; mutual fund separation theorems; arbitrage pricing theory; valuation of derivative securities. Both single-period models
and multi-period models will be discussed. Students should have some background in elementary linear algebra, calculus, and probability theory. Prerequisite: DSCE 301 and ECON 700 or equivalent. LEC.

ECON 770. Economics of the Labor Market. 3 Hours.
A theoretical and empirical analysis of labor supply and demand, human capital, information and labor mobility, unemployment, discrimination, and union behavior and influence. Prerequisite: ECON 520, and MATH 121 or MATH 115 and MATH 116. LEC.

ECON 790. Game Theory and Applications. 3 Hours.
This course covers basic game theory and applications. Topics covered include strategic games with complete information, Bayesian games (with incomplete information), extensive games with perfect information, and extensive games with imperfect information. Equilibrium concepts covered include Nash equilibrium, mixed-strategy Nash equilibrium, rationalizability, Bayesian Nash equilibrium, sub-game perfect Nash equilibrium, and sequential equilibrium. Depending on availability of time, additional topics may include strictly competitive games and repeated games. The course may include diverse applications such as in business strategy, auctions, voting, international trade, military conflicts, contracts, regulation, and industrial organization. Prerequisite: ECON 790 or consent of instructor LEC.

ECON 791. Game Theory and Applications II. 3 Hours.
This course is a continuation of game theory and applications (ECON 790). Topics may include rationality and common knowledge, multi-stage games and repeated games, coalitional games and the core, and sequential rationality, including possible applications such as signaling, reputation, and information transmission. Additional topics may include, among others, strictly competitive games, auctions, and evolutionary game theory. The course may include diverse applications within and outside economics. Prerequisite: ECON 790 or consent of instructor LEC.

ECON 800. Optimization Techniques I. 3 Hours.
Economic models involving the maximization of a scalar (vector) function subject to equality and inequality constraint where the variables are in a finite dimensional Euclidean space. Characterization of optimal points by way of first and second order derivatives and by way of saddle points. Duality theorems of mathematical programming. Prerequisite: Consent of instructor. LEC.

ECON 801. Microeconomics I. 3 Hours.
An advanced course in price and distribution theory. Prerequisite: ECON 800 or consent of instructor. LEC.

ECON 802. Microeconomics II. 3 Hours.
The study of the operation of the economic system taking into account the diversity of goods and services. Primary attention is centered upon the competitive economy. A study is made of the existence, uniqueness, stability, and comparative statics of equilibrium positions. In addition, a study is made of ways of evaluating alternative states of the economy in terms of systems of value judgments. This includes a discussion of the Arrow Impossibility Theorem; the notion of a Pareto-satisfactory process is introduced and the relationship between Pareto-optimal states and competitive equilibrium positions is studied. Prerequisite: ECON 801. LEC.

ECON 803. Growth Theory. 3 Hours.
The study of Harrod-Domar growth models; the Solow model; Uzawa's two sector model; n-sector growth models; the Ranz-Fei development models; and other application of growth theory to public policy. Prerequisite: ECON 700 and ECON 701. LEC.

ECON 805. Teaching Methods in Economics. 3 Hours.
The goal of the course is to enhance undergraduate student learning by refining and expanding the teaching techniques in the teaching assistant's arsenal. The course starts by discussing and illustrating the importance of setting the tone on the first day of class. Then the course turns to ways of creating intellectually exciting lectures and discussion sections. Active learning comes next as the course presents techniques to involve actively the students in their learning experience. Then the course examines ways for recognizing and broadening our teaching styles to include different learning styles. The course also discusses the evaluation of students by emphasizing the importance of matching the assessment of students with course objectives. This course will not assume any prior teaching experience. Prerequisite: Consent of instructor. LEC.

ECON 809. Optimization Techniques II. 3 Hours.
Economic models involving the maximization of an integral (a vector of integrals) subject to differential equality (inequality), integral equality (inequality), and finite equality (inequality) constraints. Characterization of optimal paths by way of first and second derivatives. Existence of optimal paths. Prerequisite: Consent of instructor. LEC.

ECON 810. Macroeconomics I. 3 Hours.
A survey of basic macroeconomic models, including Classical and Keynesian as well as more recent ones. Topics also cover monetary and fiscal stabilization policies, the role of rational expectations, and basic behavioral equations. Tradeoffs of inflation and unemployment are examined both theoretically and empirically. Prerequisite: ECON 809 or consent of instructor. LEC.

ECON 811. Macroeconomics II. 3 Hours.
Structure of dynamic models and intertemporal optimization. Monetary and real business cycle theories and long-run economic growth. Microeconomic foundations of macroeconomics, theories of explicit and implicit contracts, and implications of overlapping generations models. Prerequisite: ECON 810. LEC.

ECON 817. Econometrics I. 3 Hours.
An intensive study of the general linear model and distribution theory associated with the multivariate normal; stochastic difference equation; autocorrelation, errors in variables. Prerequisite: MATH 628. LEC.

ECON 818. Econometrics II. 3 Hours.
The study of estimation and hypothesis testing within the context of the stochastic simultaneous equations model. Prerequisite: ECON 817. LEC.

ECON 820. Applied General Equilibrium. 3 Hours.
A study of numerical applications of Walrasian general equilibrium theory to problems in public finance, international trade, and macroeconomics. The Arrow-Debreu model will be reviewed with emphasis on the use of Kakutanis fixed point theorem to prove existence of equilibrium. Fixed point algorithms used to solve the general equilibrium model will be studied. The Shoven-Whalley method for introducing taxes into the general equilibrium model will be discussed and extended to open economy models with tariffs and quotas. Finally, dynamic macroeconomic models will be studied and financial assets will be introduced in perfect foresight models. Prerequisite: ECON 801. LEC.

ECON 825. Tutorial. 0 Hours.
This course is designed to provide extra assistance for graduate students in economics. RSH.

ECON 830. Game Theory and Industrial Organization. 3 Hours.
A comprehensive introduction to game theory and the theory of industrial organization. Basic game theoretic equilibrium concepts will be discussed in the context of static games, games of incomplete information, and dynamic games. These concepts will be applied to the theory of industrial organization. Topics may include mechanism design, market failure, monopoly, imperfect competition and oligopoly, limit pricing, predatory pricing, innovation and technical change, advertising and signaling theory, collusion and coordination, regulation under incomplete information.
agency and auditing problems, incentives in hierarchies, job market signaling, insurance markets, nonlinear pricing and monopoly, and bargaining and long term relations. Prerequisite: ECON 801 and 802.

ECON 831. Economics of Regulation. 3 Hours.
This course provides an analytical introduction to the study of the economic rationale for and effects of government regulation of industry. Special emphasis will be placed on public utility regulation. Prerequisite: ECON 700. LEC.

ECON 835. Comparative Economic Systems. 3 Hours.
Comparative studies of the organization, operation, and performance of economic systems. Theoretical issues involving the comparison of different economic systems will be covered. Theoretical characterizations of different economic systems such as capitalistic economies, socialistic economies, and centrally planned economies, will be developed. Case studies of economic institutions and economic performance in various countries will be examined. Prerequisite: ECON 700 and ECON 701. LEC.

ECON 840. Microeconomic Issues in Development Economics. 3 Hours.
This course will examine the process and policies of economic development from a microeconomic perspective. Selected topics may include: the use of input-output matrices in development planning; price controls and corrections for their allocative distortions; international trade policies; transformations from planned to market economies; labor markets and labor mobility; and capital markets and capital mobility. LEC.

ECON 842. Theory of Economic Planning. 3 Hours.
Formal construction of the foundations of economic planning with emphasis on concise discussion of the logic behind the techniques utilized in economic planning. Topics that will be studied include: social welfare, short-term planning, price guided planning procedures, non-price guided planning procedures, long-term planning objectives, and characteristics of optimal plans. Prerequisite: ECON 802 or consent of instructor. LEC.

ECON 844. Macroeconomic Issues in Development Economics. 3 Hours.
This course will examine the process and policies of economic development from a macroeconomic perspective. Topics will include the theory of growth in the dual economy, the role of foreign trade in economic development, inflation and stabilization in developing economies, the problem of foreign debt, the relationship between financial and real development, and various development policies. Prerequisite: ECON 810 or consent of instructor. LEC.

ECON 850. The Advanced Theory of International Finance. 3 Hours.
This is an advanced course in international finance. Possible topics include optimizing, equilibrium models of exchange rate determination, empirical tests of international asset-pricing models, international policy coordination, and properties of different international monetary arrangements. Prerequisite: ECON 811. LEC.

ECON 851. The Theory of International Trade. 3 Hours.
The study of the pure theory of international trade; factor-price equalization, trade and welfare, general equilibrium in the international economy, comparative statics, and stability conditions. Prerequisite: ECON 700 and ECON 701. LEC.

ECON 855. Natural Resources. 3 Hours.
Advanced analysis of the economic relationships between natural resources, population, and environment. Emphasis is on the analytical techniques useful for solving the economic problems of natural resource allocation over time. Prerequisite: ECON 700. LEC.

ECON 860. Advanced Public Finance. 3 Hours.
A rigorous treatment of the economics of the public sector. Emphasis will be placed on government expenditure and taxation. Possible topics include tax incidence, optimal taxation, dynamic analysis of fiscal policy, public goods, and cost benefit analysis. Prerequisite: ECON 801 or permission of instructor. LEC.

ECON 866. Selected Problems in American Economic History. 3 Hours.
A critical study of selected aspects of American economic history with particular emphasis upon the testing of hypotheses that have been advanced to explain the growth and development of the American economy. Prerequisite: ECON 766. LEC.

ECON 869. Advanced Financial Economics. 3 Hours.
This course presents an analysis of financial markets and instruments, together with the quantitative tools essential for research in the field. The material will be presented in a discrete time setting and will stress the link between financial economics and equilibrium theory. Topics will include securities pricing in the absence of arbitrage, the theory of risk and utility in the basic portfolio problem, mean variance analysis and the CAPM, the Martingale properties of security prices, restricted participation, asymmetric information, and recent research results. Prerequisite: ECON 802 or consent of instructor. LEC.

ECON 870. Applied Microeconomics. 3 Hours.
This course introduces students to the data and empirical methods used in the fields of applied economics such as labor economics, public finance, and industrial organization. The course will focus on how to adjust for self-selection and identify causal relationships in applied microeconomic fields. Topics covered include economic data and statistical programming, instrumental variables, difference-in-differences, regression discontinuity, count data, sample selection, treatment effects, and duration models. Attention will be given to the suitability of the methods to the research question under consideration. Each topic will emphasize the proper application of the methods using the standard textbook treatment as well as assigned papers that examine the basic economic issues, the econometric techniques, and the applications to data. Prerequisite: ECON 817 and ECON 818, or consent of instructor. ECON 915 is recommended. LEC.

ECON 880. Selected Topics in Economic Theory: ______. 1-3 Hours.
An advanced course in economic theory that will study selected topics in economic theory such as consumer theory, linear economics, decision theory, stability of economic equilibrium, comparative statics, etc. Prerequisite: Consent of instructor. LEC.

ECON 899. Master's Thesis. 1-10 Hours.

ECON 901. Advanced Economic Theory I. 3 Hours.
Advanced study of current general equilibrium analysis, the mathematical tools involved in such analysis, and some applications to other branches of economic theory. Prerequisite: ECON 802 and ECON 810. LEC.

ECON 902. Advanced Economic Theory II. 3 Hours.
A continuation of the advanced study of general equilibrium analysis. Prerequisite: ECON 901. LEC.

ECON 910. Economic Theory Seminar-Workshop. 1-3 Hours.
This seminar-workshop is designed to study advanced research topics in the areas of microeconomic and macroeconomic theory, and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates in these areas of specialization. LEC.
ECON 911. Applied Macroeconomics. 3 Hours.
An advanced exploration of the microeconomic foundations of macroeconomics, neoclassical macroeconomics with and without money, Keynesian and neo-Keynesian macroeconomics, and economic stabilization, inflation, and unemployment. Prerequisite: ECON 802 and ECON 810. LEC.

ECON 912. Advanced Macroeconomics. 3 Hours.
An analysis of economic policy in dynamic economic models. The effects of various policies on the equilibrium, stability, and adjustment paths of the models will be considered. Both open and closed economies will be analyzed. Prerequisite: ECON 810. MATH 320 is recommended. LEC.

ECON 913. Monetary Economics. 3 Hours.
This course examines how money, monetary policy, and monetary institutions influence the macroeconomy. Modern theories of money demand are presented and critiqued. The function of commercial banks, non-bank financial intermediaries, and central banks in the money supply process is addressed. Interrelationships between the tools, the instruments, the operating procedures, the intermediate targets, and the goals of policy are examined. Additional topics may include the monetary transmission mechanism, the effect of uncertainty on optimal policy decisions, the rules versus discretion debate, the monetary implications of fiscal policy, the term structure of interest rates, the causes and consequences of bank runs and financial panics, and the optimal method of constructing weighted monetary aggregates. Prerequisite: ECON 811 or consent of instructor. LEC.

ECON 915. Advanced Econometrics I. 3 Hours.
The study of selected topics in applied cross-section econometrics for uses mainly in applied microeconomics, public finance, and labor economics. Topics include traditional econometrics of production and demand, latent variable models, panel data studies, probabilistic choice models, censored and truncated models, sample selection, disequilibrium models, duration studies, and semi- and non-parametric models. Prerequisite: ECON 818, or consent of instructor. LEC.

ECON 916. Advanced Econometrics II. 3 Hours.
A study of selected topics in applied time-series econometrics for use mainly in applied macroeconomics, international finance, and development economics. Topics include empirical applications of ARCH models, VAR models (study of impulse response function and variance decomposition), unit-root cointegration and long memory models. Bayesian unit root analysis, estimation and inference of dynamic general equilibrium models, model calibration and simulation are also possible topics of this course. Prerequisite: ECON 818, or consent of instructor. LEC.

ECON 917. Advanced Econometrics III. 3 Hours.
A study of structural and nonlinear time series approaches to econometric modeling and inference. The course emphasizes techniques needed to use economic theory in system-wide econometrics. Emphasis is placed on selection of functional form for approximation to theoretical functions and the use of duality theorems for derivation of the resulting econometric systems of equation. Inference with those models will be by nonlinear parametric, semi-parametric, and nonparametric methods. Prerequisite: ECON 818. LEC.

ECON 918. Financial Econometrics. 3 Hours.
This course is designed to provide a variety of new econometric tools useful to investigate financial data. It discusses how to measure and forecast financial volatility using models such as Stochastic Volatility, multivariate GARCH, and Dynamic Conditional Correlation models. It also covers Dynamic Factor models and State Space models, which can be used in many financial data analyses. The course will be particularly helpful for the students preparing dissertations in the field of finance, macro-finance, monetary economics, international finance, and development economics. It will also benefit the students interested in more practical use of tools in the field such as financial risk management, insurance, and commercial banking. Prerequisite: ECON 818. ECON 916 is recommended. LEC.

ECON 920. Econometrics Seminar-Workshop. 1-3 Hours.
This seminar-workshop is designed to study advanced research topics in the area of econometric theory and application, and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates in this area of specialization. LEC.

ECON 925. Economic Dynamics. 3 Hours.
A study of the concepts of equilibrium and stability in various economic frameworks; static economies, changing economies, and disaggregated and aggregated economies. Prerequisite: ECON 802. LEC.

ECON 930. Economic History Seminar-Workshop. 1-3 Hours.
This seminar-workshop is designed to study advanced research topics in the area of economic history, and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates in this area of specialization. LEC.

ECON 940. Economic Seminar-Workshop in: _____. 1-3 Hours.
This seminar-workshop is designed to study advanced research topics in the specified area of applied economics (public finance, monetary analysis, environment-energy, economic growth and development, urban economics, health care economics, natural resources, labor-manpower, international trade and finance, comparative economic systems, Soviet economics), and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates with dissertations in a specific area of applied economics. LEC.

ECON 950. Special Problems in Economics. 1-3 Hours.
LEC.

ECON 955. Advanced Topics in Natural Resources. 3 Hours.
Rigorous analysis of an Arrow-Debreu economy with natural resources and extensions (including optimal growth, planning procedures, and uncertainty). Investigation of current research topics in theoretical and applied resource economics. Required course for Ph.D. candidates writing dissertations in natural resources. Prerequisite: Consent of instructor. ECON 927 recommended. RSH.

ECON 970. Advanced Labor Economics. 3 Hours.
A survey of recent labor economics research. Topics include labor supply and demand, human capital investment, and unemployment. Prerequisite: ECON 770. LEC.

ECON 999. Doctoral Dissertation. 1-10 Hours.
THE.

Bachelor of Arts and Bachelor of General Studies in Economics

Why study economics?
Because it will give you the tools you need to understand our increasingly interconnected world.

Economics Majors
The economics department offers 3 degrees.

• The B.A. or B.G.S. major in economics is designed for the majority of students who will go on to professional graduate schools or into the work force.
• The Bachelor of Science degree in economics is designed for the student interested in going to graduate school in economics or a closely related field. It requires the minimum amount of preparation in economics and mathematics required to be successful in graduate study. Students interested in pursuing a Ph.D. in economics are strongly urged to double major in economics and mathematics.

**First- and Second-Year Preparation**

Students considering an economics major should enroll in ECON 142 (or ECON 143) Principles of Microeconomics or ECON 144 (or ECON 145) Principles of Macroeconomics no later than the end of the sophomore year. Students should also have completed at least 1 course in the calculus sequence (MATH 115 or MATH 121) by the end of the sophomore year.

**Requirements for the B.A. or B.G.S. Major**

**Economics Core Knowledge and Skills (15)**

Majors must complete a course in each of the following areas:

- Principles of Microeconomics. Satisfied by:
  - ECON 142 Principles of Microeconomics 3
  - or ECON 143 Principles of Microeconomics, Honors

- Principles of Macroeconomics. Satisfied by:
  - ECON 144 Principles of Macroeconomics 3
  - or ECON 145 Principles of Macroeconomics, Honors

- Microeconomics. Satisfied by:
  - ECON 520 Microeconomics 3
  - or ECON 521 Microeconomics Honors

- Macroeconomics. Satisfied by:
  - ECON 522 Macroeconomics 3
  - or ECON 523 Macroeconomics Honors

**Introduction to Econometrics. Satisfied by:**
- ECON 526 Introduction to Econometrics 3
- or ECON 715 Elementary Econometrics

**Economics Required Electives (6)**

Majors must complete 2 courses (6 hours) in economics outside of the core courses at the 500-level or above.

**Economics Required Capstone Elective Courses (9)**

Majors must complete 3 courses (9 hours) in economics outside of the core courses at the 600-level or above.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 30 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

(At least 3 of the required elective courses must be taken from the KU Department of Economics.)

**Major Junior/Senior Hours**

Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major. At least 9 hours of the required elective courses must be taken from the KU Department of Economics.)

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Major Junior/Senior Major Attempts**

Summary includes American Studies junior/senior (300+) hours attempted, including F’s and incompletes.

A sample 4-year plan for the BA degree in Economics here: Economics (p. 1334), or by using the left-side navigation.

Sample 4-year plans for the BGS and BS degrees in Economics can be found by using the left-side navigation.

**Departmental Honors**

Graduation with honors in economics is limited to undergraduate majors who have fulfilled these requirements:

1. Completed all economics major requirements and achieved a grade-point average of 3.5 or above in all economics courses and an overall average of 3.25 or above at the time of graduation.
2. Completed ECON 497 Senior Research Honors.
3. Submitted and defended a research paper before at least 3 faculty members of the Department of Economics.

Honors candidates should consult the department honors coordinator before enrolling the first semester of the senior year and file a declaration of intent form with the coordinator at that time.

**BA in Economics**

Below is a sample 4-year plan for students pursuing the BA in Economics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

### Total Hours: 120-129

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Bachelor of Science in Economics

Elective (Total Hours) 3

Elective (Total Hours) 3

Total Hours: 120-122

Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Science in Economics

Why study economics?

Because it will give you the tools you need to understand our increasingly interconnected world.

Economics Majors

The economics department offers 3 degrees.

• The Bachelor of Science degree in economics is designed for the student interested in going to graduate school in economics or a closely related field. It requires the minimum amount of preparation in economics and mathematics required to be successful in graduate study. Students interested in pursuing a Ph.D. in economics are strongly urged to double major in economics and mathematics.

• The B.A. or B.G.S. major in economics is designed for the majority of students who will go on to professional graduate schools or into the work force.

First- and Second-Year Preparation

Economics Prerequisite or Co-Requisite Knowledge

Majors must complete courses as specified in each of the following two areas. These hours do not contribute to the minimum number of hours required for the major.

College Algebra or Pre-Calculus (3)

Satisfied by:

MATH 101 College Algebra 3
or MATH 104 Precalculus Mathematics

Calculus I (5)

Satisfied by:

MATH 121 Calculus I (Students may complete MATH 115 and MATH 116 prior to completing MATH 122.) 5

Calculus II (5)

Satisfied by:

MATH 122 Calculus II 5

Vector Calculus (3)

Satisfied by:

MATH 223 Vector Calculus 3
or MATH 243 Vector Calculus, Honors

Elementary Linear Algebra (2)

Satisfied by:

MATH 290 Elementary Linear Algebra 2
or MATH 291 Elementary Linear Algebra, Honors

Statistics (3)

Satisfied by:

MATH 526 Applied Mathematical Statistics I 3
or DSCI 202 Statistics

Economics General Education Requirements

Written Communication - Core Skill and Critical Inquiry

Composition (0)

Satisfied by one of the following. Requirement must be completed during initial term of admission at KU.

ENGL 101 Composition
ACT English score of 27 or above or SAT English score of 600 or above
AP English Literature & Composition score of 3 or above
Equivalent transfer course

Critical Reading and Writing (0)

Satisfied by one of the following. Requirement must be completed within the first academic year at KU.

ENGL 102 Critical Reading and Writing
or ENGL 105 Freshman Honors English
AP English Literature & Composition score of 4 or above
Equivalent transfer course

Sophomore Reading and Writing II (0)

Satisfied by:

ENGL 203 Topics in Reading and Writing: _____
or ENGL 205 Freshman-Sophomore Honors Proseminar: _____
ENGL 209 Introduction to Fiction
ENGL 210 Introduction to Poetry
ENGL 211 Introduction to the Drama
AP English Literature & Composition score of 5 or above
Equivalent transfer course

Western Civilization - Exploration of One’s Own and Diverse Culture.

(Advising Alert: Requires sophomore-level standing. Courses at other universities may have the same title but may not meet this requirement.)

Western Civilization I - Ancient, Medieval & Early Modern Periods of Western Civilization (0)

Satisfied by:

Western Civilization II - Modern Western Civilization (6)

HUM 204 Western Civilization I 3
or HUM 114 Western Civilization I Honors

Satisfied by:

HUM 205 Western Civilization II 3
Humanities - Understanding the Human Condition. Satisfied by completing 3 courses at least 1 of the following categories: historical studies (requirement code HT), literature and the arts (requirement code HL), and philosophy and religion (requirement code HR). Approved courses may be searched for availability through the Kyou portal.

Social and Behavioral Sciences - Understanding Society and Behavior. Satisfied by completing 3 courses at least one in 1 of the following categories: individual behavior (requirement code SI), culture and society (requirement code SC), or public affairs (requirement code SF). Approved courses may be searched for availability through the Kyou portal.

Natural Science & Mathematics - Understanding the Natural World. Satisfied by completing 1 course in 3 of the 4 requirement codes: biological sciences (requirement code NB), earth sciences (requirement code NE), mathematical sciences (requirement code NM), and physical sciences (requirement code NP). Approved courses may be searched for availability through the Kyou portal. The purpose of this requirement is to expose students to several disciplines in an effort to help them make informed choices regarding potential majors or minors. Principal courses should be completed early in the curriculum.

Requirements for the B.S. Degree

Economics Core Knowledge and Skills (18)

Majors must complete a course in each of the five following areas:

- Principles of Microeconomics. Satisfied by:
  - ECON 142 Principles of Microeconomics
  - or ECON 143 Principles of Microeconomics, Honors

- Principles of Macroeconomics. Satisfied by:
  - ECON 144 Principles of Macroeconomics
  - or ECON 145 Principles of Macroeconomics, Honors

- Microeconomics. Satisfied by:
  - ECON 520 Microeconomics
  - or ECON 521 Microeconomics Honors

- Macroeconomics. Satisfied by:
  - ECON 522 Macroeconomics
  - or ECON 523 Macroeconomics Honors

Survey of Microeconomics. Satisfied by:

- ECON 700 Survey of Microeconomics

Introduction to Econometrics. Satisfied by:

- ECON 715 Elementary Econometrics

Economics Required Electives (18)

Majors must complete 6 courses (18 hours) in economics outside of the core courses at the 500-level or above.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

(At least 3 of the required elective courses must be taken from the KU Department of Economics.)

**Major Junior/Senior Hours**

Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

(At least 9 hours of the required elective courses must be taken from the KU Department of Economics.)

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major.

(At least 3 of the required elective courses must be taken from the KU Department of Economics.)

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

(At least 3 of the required elective courses must be taken from the KU Department of Economics.)

**Major Junior/Senior Hours**

Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

(At least 9 hours of the required elective courses must be taken from the KU Department of Economics.)

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major.

(At least 3 of the required elective courses must be taken from the KU Department of Economics.)

Below is a sample 4-year plan for students pursuing the BS in Economics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

</tbody>
</table>

Economics Required Electives. Majors must complete 4 ECON courses (12 hours) at the junior/senior level (300+).

Please note:

1 Satisfied by completing 3 courses in each of the following categories: historical studies (requirement code HT), literature and the arts (requirement code HL), and philosophy and religion (requirement code HR).

2 Satisfied by completing 1 course in 3 of the 4 requirement codes: biological sciences (requirement code NB), earth sciences (requirement code NE), mathematical sciences (requirement code NM), and physical sciences (requirement code NP).

3 Satisfied by completing 3 courses in each of the following categories: individual behavior (requirement code SI), culture and society (requirement code SC), or public affairs (requirement code SF).

4 The department requires 6 electives for the BS degree; at least 4 courses must be 600+.

5 ECON 700 and ECON 715 are only offered in the fall semester.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

Graduation with honors in economics is limited to undergraduate majors who have fulfilled these requirements:

1. Completed all economics major requirements and achieved a grade-point average of 3.5 or above in all economics courses and an overall average of 3.25 or above at the time of graduation.

2. Completed ECON 497 Senior Research Honors.

3. Submitted and defended a research paper before at least 3 faculty members of the Department of Economics.

Honors candidates should consult the department honors coordinator before enrolling the first semester of the senior year and file a declaration of intent form with the coordinator at that time.

Minor in Economics

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

Graduation with honors in economics is limited to undergraduate majors who have fulfilled these requirements:

1. Completed all economics major requirements and achieved a grade-point average of 3.5 or above in all economics courses and an overall average of 3.25 or above at the time of graduation.

2. Completed ECON 497 Senior Research Honors.

3. Submitted and defended a research paper before at least 3 faculty members of the Department of Economics.

Honors candidates should consult the department honors coordinator before enrolling the first semester of the senior year and file a declaration of intent form with the coordinator at that time.

Economics Required Electives. Majors must complete 4 ECON courses (12 hours) at the junior/senior level (300+).
Minor Hours & Major GPA
While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Junior/Senior (300+) Hours in Residence
Satisfied by a minimum of 9 hours of junior/senior (300+) resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours of junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all department courses in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Master of Arts in Economics

Financial Aid
Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml) administers grants, loans, and need-based financial aid.

Facilities and Services
In addition to KU computing and library facilities, students in the M.A. and Ph.D. programs may use the department's computer laboratory, which provides access to a variety of databases and econometric software packages useful for economics research.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
Applicants to the M.A. and M.A./J.D. programs should have taken a minimum of 2 courses in calculus (6 to 10 semester hours) and a statistics course. Students with little background in economics may be advised to take ECON 520 Microeconomics and/or ECON 522 Macroeconomics and/or ECON 526 Introduction to Econometrics as preparation for M.A. courses. ECON 520, ECON 522, and ECON 526 do not count toward completion of M.A. degree requirements.

Applications submitted before May 1 receive first consideration for fall or summer admission. Applications submitted before November 1 receive first consideration for spring admission.

Submit your graduate application online (http://graduate.ku.edu/application-process). Send all other requested application materials to the department:

The University of Kansas
Department of Economics
Graduate Secretary
Snow Hall
1460 Jayhawk Blvd., Room 415
Lawrence, KS 66045-7514

English Proficiency and Test of English as a Foreign Language or International English Language Testing System Scores
An applicant who has graduated with a baccalaureate degree or higher from an accredited institution of higher education in the U.S., U.K., Australia or Canada (excluding Quebec) automatically meets the English language proficiency requirement. All other students whose native language is not English are required to provide evidence of English language proficiency. The university accepts TOEFL and IELTS scores. The required scores are listed below.

<table>
<thead>
<tr>
<th>TOEFL (paper)</th>
<th>TOEFL (CBT)</th>
<th>TOEFL (IBT)</th>
<th>IELTS</th>

</tbody>
</table>

M.A. Degree Requirements
The Master of Arts degree program serves students with little previous background in economics as well as students who majored in economics as undergraduates. The program provides maximum flexibility for students to pursue their own special interests.

Candidates for the M.A. degree must complete a minimum of 30 semester hours of graduate work, including 9 hours of required core classes (ECON 700, ECON 701, ECON 715). At least 18 hours, including the required core courses, must be in economics; but students may take up to 12 hours in related areas, such as business administration, computer science, political science, or mathematics, subject to the approval of the M.A. advisor. No more than 9 hours of economics classes may be taken at the 500 and 600 levels. At initial enrollment, each candidate must discuss a preliminary plan of study with his or her graduate advisor. This plan may be revised over time.

Thesis and Nonthesis Options
Candidates may pursue either a thesis or a nontesis track. Students electing the thesis track must complete 24 hours of formal course work and 6 hours of thesis under the direction of a thesis supervisor. This work is to be devoted to the completion of a satisfactory thesis. An oral examination is held on completion of the thesis. Students electing the nontesis track must complete 30 hours of formal course work.

Written Comprehensive Examination
All candidates for the M.A. degree, including students enrolled in the M.A./J.D. program, must demonstrate proficiency in the application of economic
requirements for the combined degree are as follows:

Plan of Study

Most M.A. students complete the program in 2 academic years. Unless they must complete prerequisites, new M.A. students enroll in ECON 700 Survey of Microeconomics and ECON 715 Elementary Econometrics and 1 elective during the first fall semester. In the first spring semester, M.A. students enroll in ECON 701 Survey of Macroeconomics and 2 electives. Enrollments in subsequent semesters are electives until 30 credit hours are complete.

M.A.-J.D. Degree Program

Why study economics?

Because it will give you the tools you need to understand our increasingly interconnected world.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

M.A.-J.D. Degree Program

In this program a student can earn both the Juris Doctor (p. 725) and the Master of Arts in economics in 3 years and 1 summer session. The requirements for the combined degree are as follows:

1. Admission to the M.A./J.D. degree program must be approved by the School of Law (http://www.law.ku.edu), the Department of Economics (http://www.economics.ku.edu), and the College of Liberal Arts and Sciences (http://clas.ku.edu).
2. The program requires 100 credit hours of course work, of which 82 hours must be completed in the law school and 18 hours in the Department of Economics. The department gives credit toward the M.A. degree for 12 hours of pertinent work in the law school, and the law school counts 8 credit hours in economics toward the J.D. degree. The 8 hours of economics courses that count toward the J.D. degree can be chosen from certain courses numbered 500-799 and from all 800-900 level courses. Prerequisites continue to apply, as does the requirement that all students seeking the M.A. degree must have taken several foundation courses that do not count toward a graduate degree in economics: microeconomics, macroeconomics, and calculus. In addition, ECON 700, ECON 701, and ECON 715 must be included in the M.A. program. The student takes only law classes the first year and spreads out the 18 hours of credit in economics in the following semesters (e.g., one course per semester).
3. The M.A./J.D. degree is a nonthesis degree in economics.
4. A written comprehensive examination in economics is required of all candidates for the M.A./J.D. degree.

Doctor of Philosophy in Economics

Financial Aid

Financial aid may be awarded in the form of Graduate Teaching Assistantships or Graduate Research Assistantships. First consideration for financial aid is given to applications received before February 1. To be considered for GTAs, international students must include a score from the Test of Spoken English or a TOEFL-iBT examination that includes a speech component. A minimum iBT speaking score of 24 or an IELTS speaking score of 8 or a score of 50 on the TSE or SPEAK tests.

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding) for graduate students at KU.

Facilities and Services

In addition to KU computing and library facilities, students in the M.A. and Ph.D. programs may use the department’s computer laboratory, which provides access to a variety of databases and econometric software packages useful for economics research.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Applicants to the Ph.D. program should have taken 3 courses in calculus (12 to 15 semester hours) and a course in linear algebra.

Applications submitted before February 1 receive first consideration for financial aid for fall admission. Applications may continue to be submitted until May 1 for fall admission. Applications submitted before November 1 receive first consideration for spring admission.

Submit your graduate application online (http://graduate.ku.edu/application-process). Send all other requested application materials to the department:

The University of Kansas
Department of Economics
Graduate Secretary
Snow Hall
1460 Jayhawk Blvd., Room 415
Lawrence, KS 66045-7514
Students whose native language is not English usually have difficulty in the program unless their English is excellent. The university accepts TOEFL and IELTS scores. The required scores are listed below.

<table>
<thead>
<tr>
<th>TOEFL (paper)</th>
<th>TOEFL (CBT)</th>
<th>TOEFL (iBT)</th>
<th>IELTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>All part scores at least 53</td>

<td>Minimum overall score 6.0 with no part score below 5.5</td>
</tr>
</tbody>
</table>

Ph.D. Degree Requirements

Course Requirements

In addition to meeting general requirements, the Ph.D. candidate in economics must complete a minimum of 54 credit hours of course work, at least 48 of which must be in economics.

1. All Ph.D. candidates must complete these core courses in economic theory and quantitative methods
   - ECON 800 Optimization Techniques I 3
   - ECON 801 Microeconomics I 3
   - ECON 802 Microeconomics II 3
   - ECON 809 Optimization Techniques II 3
   - ECON 810 Macroeconomics I 3
   - ECON 811 Macroeconomics II 3
   - ECON 817 Econometrics I 3
   - ECON 818 Econometrics II 3
   - MATH 727 Probability Theory 3
   - MATH 728 Statistical Theory 3

2. Course work beyond these required core courses is a matter of choice for the student in consultation with his or her graduate advisor. The graduate advisor develops a program to assist the student in specialized interests. Each program must include a sufficiently broad range of topics in economics to prepare the student for comprehensive examinations.

Qualifying Examinations

Ph.D. degree aspirants must pass written qualifying examinations in microeconomics and macroeconomics after completion of the core courses in these areas, ordinarily at the beginning of the fourth semester of full-time study. A student who does not pass a qualifying examination may be permitted 1 retake, ordinarily at the end of the fourth semester of full-time study.

Fields of Specialization

Each student must demonstrate competence in at least 2 fields of specialization in economics by completing 2 courses in each of these areas. Current fields of specialization include financial economics, economic development, industrial organization, international economics, labor economics, econometrics, economic history, economic theory, and macroeconomics.

Seminar-Workshops and Responsible Scholarship

Beginning in the third year of the program, each student must enroll in ECON 910 and attend the weekly department seminars for 6 continuous semesters. Every doctoral student is required to have training in responsible scholarship pertinent to economics research. Each semester there will be 1 90-minute seminar on this topic led by either a faculty member or a visiting speaker.

Third-Year Paper

Each student must complete a third-year seminar paper. This would typically be in one of the fields of specialization. Usually the third-year paper becomes part of the student’s doctoral dissertation.

Comprehensive Oral Examination

Upon completion of most of the course work and other requirements for the doctoral degree, inclusive of research skills and residence requirements, the student must prepare a dissertation proposal under the direction of a thesis advisor and pass a comprehensive oral examination related to the dissertation proposal.

Dissertation

Following the comprehensive oral examinations, the candidate must organize and write a dissertation on his or her chosen topic under the supervision of a dissertation committee.

Final Oral Examination

The candidate must defend the dissertation successfully in a final oral examination.

Department of English

Why study English language and literature?

Because reading and writing shape the world.

KU’s English Department is at the core of the humanities, highlighting the “human” through our individual, one-on-one interactions with our students, our emphasis on community and global engagement, and our abiding interest in our shared humanity through the stories of others. We seek to challenge the mind and to engage the imagination of our students, to teach them to ask questions and to seek for answers. We encourage them to grapple with the complexity of a culturally and commercially interconnected world and the global networks and processes of cultural exchange. We believe that words and ideas will shape the world. We teach our students life-long skills, so that they learn to write clearly, creatively, and effectively—discovering themselves even as they lay a solid foundation for professional success.

A commitment to teaching and learning.

Our department is renowned for its tradition of excellence in teaching. The vast majority of our undergraduate classes have 20-35 students, and much of the class time is dedicated to active learning and engagement with texts and ideas. In the last ten years, faculty members in the department of English have won ten Kemper Fellowships for Excellence in Teaching, two Chancellors Club Teaching Professorships, a Career Achievement Teaching Award, and a wide variety of other university-level teaching and advising awards, and the department as a whole received the Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

A variety of career and life paths.

English students at all levels graduate and embark upon a variety of careers, including law, teaching, scholarship, publishing, library science, and journalism—as well as medicine, politics, design, and any number of other fields that value clear communication, interpretive skill, and critical and creative thinking.

Engaged and innovative scholarship.

KU's English Department has several core strengths that cross tracks and periods, including Global and Cross-Cultural Approaches; Literature, Rhetoric, and Social Action; Diversity Studies; Language, Literature and Science; and Popular Expressive Forms.

In the KU English Department, students work closely with nationally-renowned writers and researchers. Our faculty have won national awards that recognize excellence in research, including grants from the National Endowment for the Humanities, the American Philosophical Society, and the Newberry Library, among others. English Department faculty members have also received major research funding from the University of Kansas, including the Hall Center for the Humanities Research fellowships and Keeler Intra-University Fellowships for interdisciplinary work. Undergraduate students can work one-on-one with faculty mentors in the Honors Program, McNair Scholars Program, and Dean's Scholars Program, as well as through independent Directed Studies. Advanced graduate students have the opportunity to work collaboratively with faculty members as research assistants.

Undergraduate Programs

The English major prepares undergraduates for engagement with the world through language by helping them

- to cultivate the craft of writing in a variety of rhetorical contexts,
- to read and interpret a broad range of texts,
- to develop and sustain critical arguments, and
- to produce independent research.

The major is crafted to ensure students' familiarity with

- written forms and genres;
- a range of literary histories and writers;
- multiple regional and historical contexts of literature and language;
- the theories, methodologies, and terminology of English Studies; and
- the relationship between literature, language, and the larger culture.

Courses for Non-majors

Many English courses fulfill KU Core requirements; see catalog course listings for details. All students are encouraged to take a 200-level English course before enrolling in 300+ level English courses. For students following University requirements prior to Fall 2013, please consult the principal and non-Western course lists. English principal courses under the Literature and the Arts heading are designated HL. Prospective English teachers in the public schools should consult the requirements of the School of Education.

Transfer Credit

English undergraduate majors may take up to 6 hours out of residence with the prior approval of the Director of Undergraduate Studies.

Double Majors

Double majors within the College or dual-degree programs are encouraged.

Placement in English courses

In general, entering KU students should enroll in ENGL 101, with the following exceptions:

**ACT English Scores:**

- 31-36 — Enroll in ENGL 105. 1/2 of KU Core Goal 2.1 (Written Communication, 6 hours) complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.
- 27-30 — Enroll in ENGL 102 and petition for honors placement for possible admittance to ENGL 105. 1/2 of KU Core Goal 2.1 complete; ENGL 102 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.
- 00-26 — Enroll in ENGL 101. ENGL 101 + ENGL 102 fulfill KU Core Goal 2.1 and CLAS BA-specific writing requirement.

**SAT Verbal Scores:**

- 650 or higher — Enroll in ENGL 105. 1/2 of KU Core Goal 2.1 complete; ENGL 105 + an additional KU Core 2.1 course will fulfill CLAS BA-specific writing requirement.
Courses

ENGL 50. Basic Writing Skills. 3 Hours U.
A review of the basic skills of written English, with emphasis on sentence-level grammar. Recommended for all students who score 16 or below on the ACT English test. May be repeated for credit. LEC.

ENGL 100. Introduction to Literature. 3 Hours GE3H / H.
An introduction to critical thinking skills through the study of works of literature drawn from a variety of genres and methods of critical inquiry. This course does not fulfill any KU writing requirement. LEC.

ENGL 101. Composition. 3 Hours GE21 / U.
Instruction and practice in writing in a variety of rhetorical contexts, including academic ones. LEC.

ENGL 102. Critical Reading and Writing. 3 Hours GE21 / U.
Builds upon the instruction in writing of ENGL 101, emphasizing critical thinking through careful, thoughtful reading and writing. Also instructs in the evaluation and use of secondary sources. Prerequisite: Completion of ENGL 101 or its equivalent, or an ACT score of 27-31, or an SAT score of 600-649, or an AP exam score of 3 on either the Literature and Composition exam or the Language and Composition exam, or an IB score of 5. LEC.

ENGL 105. Freshman Honors English. 3 Hours GE21 / U.
Study of significant works of world literature. The primary aims are to develop reading and writing skills and to introduce the students to works of literature drawn from a variety of genres and historical periods. Prerequisite: An ACT score of 31-36, or an SAT score of 650 or higher, or an AP exam score of 3 on either the Literature and Composition exam or the Language and Composition exam, or membership in the University Honors Program. LEC.

ENGL 177. First Year Seminar: ____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in English. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ENGL 199. Orientation to English Studies. 1 Hour H.
Provides an overview of English Studies at the University of Kansas. Students learn about degree requirements and specializations; research, extracurricular, and study abroad opportunities; and career and internship options. Graded on a satisfactory/unsatisfactory basis. LEC.

ENGL 200. Study Abroad Topics in: ____. 1-6 Hours H.
This course is designed for the study of special topics in English. Coursework is completed through a KU study abroad program. Available only to KU study abroad participants. May be repeated for credit if content varies. Does NOT fulfill any part of the Freshman-Sophomore requirement. LEC.

ENGL 203. Topics in Reading and Writing: ____. 3 Hours GE11/GE21/GE3H / H.
In-depth reading and writing on a significant topic, theme, or genre. Includes a variety of textual types or a range of historical periods. Continued practice in critical reading and writing. May include but will not be limited to writing in literary genres. Prerequisite: Completion of ENGL 101 and ENGL 102, or their equivalent. LEC.

ENGL 205. Freshman-Sophomore Honors Proseminar: ____. 3 Hours GE11/GE21/GE3H / H.
Study of a major movement, topic, or theme in literature and culture. The primary aims are to further develop reading and writing skills and to consider significant cultural and artistic issues. Prerequisite: ENGL 105 or
ENGL 209. Introduction to Fiction. 3 Hours GE11/GE21/GE3H / H.
In-depth reading of and writing about prose fiction with emphasis on
critical analysis of a variety of narrative types from different historical
periods. Prerequisite: Completion of ENGL 101 and ENGL 102, or their
equivalent. LEC.

ENGL 210. Introduction to Poetry. 3 Hours GE11/GE21/GE3H / H.
In-depth reading of and writing about poetry with emphasis on critical
analysis of a variety of forms and techniques used in poems from different
historical periods. Prerequisite: Completion of ENGL 101 and ENGL 102,
or their equivalent. LEC.

ENGL 211. Introduction to the Drama. 3 Hours GE11/GE21/GE3H / H.
Study of plays selected to familiarize the student with dramatic
masterpieces and with the drama as a literary type. Prerequisite:
Completion of ENGL 101 and ENGL 102, or their equivalent. LEC.

ENGL 220. Introduction to Creative Writing. 3 Hours H.
In-depth reading and writing in multiple genres (e.g., poetry, fiction,
critical nonfiction, playwriting). Creative assignments combine with
critical analysis to help students identify, analyze, and employ forms
and techniques across various genres, audiences, and contexts. Written
assignments include creative works in multiple genres and critical
responses to reading. Prerequisite: ENGL 101 and ENGL 102, or their
equivalents. LEC.

ENGL 300. The Bible, the Classics, and Modern Literature. 3 Hours H.
An introduction to the nature and function of literature, emphasizing
Biblical, Classical, and other major cultural traditions and their influence
on British and American literature. Some ancient and modern works will
be studied in conjunction. Prerequisite: Prior completion of the KU Core
Written Communication requirement. Recommended: Prior completion of
one 200-level English course. LEC.

ENGL 301. Topics in British Literature to 1800: ____. 3 Hours H.
Study of British literary works before 1800. Topics may focus on a
particular genre, theme, topic, historical period, author, or group of
authors. May be repeated for credit as the topic changes. Prerequisite:
Prior completion of the KU Core Written Communication requirement.
Recommended: Prior completion of one 200-level English course. LEC.

ENGL 302. Topics in British Literature Since 1800: ____. 3 Hours H.
Study of British literary works since 1800. Topics may focus on a
particular genre, theme, topic, historical period, author, or group of
authors. May be repeated for credit as the topic changes. Prerequisite:
Prior completion of the KU Core Written Communication requirement.
Recommended: Prior completion of one 200-level English course. LEC.

ENGL 305. World Indigenous Literatures. 3 Hours NW AE42 / H.
A survey of contemporary world indigenous literatures that includes
those from North America, Australia, New Zealand, the South Pacific, the
Arctic, and Latin America. Texts are in English (original or translation).
Genres studied include the novel, poetry, and drama, supplemented by
works from the oral tradition, the visual arts, and film. (Same as GIST
305/ISP 305.) Prerequisite: Prior completion of the KU Core Written
Communication requirement. Recommended: Prior completion of one
200-level English course. LEC.

ENGL 306. Global Environmental Literature. 3 Hours AE42 / H.
An examination of a variety of literary and other representations of human
and non-human environments and environmentalism. Particular attention
will be paid to how race, gender, class, sexuality, and geography produce
and are produced by those representations. Prerequisite: Prior completion
of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 308. Introduction to Literary Criticism and Theory. 3 Hours
GE3H / H.
Study of significant problems in literary interpretation and methodology,
in which basic critical principles and approaches are systematically
examined and applied. These approaches might include, but are not
limited to, feminism, Marxism, deconstruction, psychoanalysis, and
cultural studies. Prerequisite: Prior completion of the KU Core Written
Communication requirement. Recommended: Prior completion of one
200-level English course. LEC.

ENGL 309. The British Novel. 3 Hours HL / H.
Study of five or more significant novels representative of developments
in the British novel of the eighteenth, nineteenth, and twentieth centuries.
Prerequisite: Prior completion of the KU Core Written Communication
requirement. Recommended: Prior completion of one 200-level English
course. LEC.

ENGL 310. Literary History I. 3 Hours H.
A study of literature in English, including major forms and movements,
from the medieval period to Romanticism. Prerequisite: Prior completion
of the KU Core Written Communication requirement. Recommended:
Prior completion of one 200-level English course. LEC.

ENGL 312. Major British Writers to 1800. 3 Hours H.
Outstanding works of British literature, from the earliest times to the close
of the eighteenth century, studied in chronological sequence and with
some attention to the characteristics of the various periods of English
literary history embraced. Prerequisite: Prior completion of the KU Core
Written Communication requirement. Recommended: Prior completion of
one 200-level English course. LEC.

ENGL 314. Major British Writers after 1800. 3 Hours H.
Outstanding works of British literature, from 1800 to the present, studied
in chronological sequence and with some attention to the characteristics
of the various periods of English literary history embraced. Prerequisite:
Prior completion of the KU Core Written Communication requirement.
Recommended: Prior completion of one 200-level English course. LEC.

ENGL 315. Studies in British Literature. 3 Hours HL AE42 / H.
For students enrolled in the annual summer Study Abroad program, an
interdisciplinary program conducted with other humanities departments.
British literature is studied in the context of visits to relevant sites such as
London, the Lake District, and Edinburgh. Prerequisite: Prior completion
of the KU Core Written Communication requirement. Approval for
enrollment in the Summer Institute through the Study Abroad office is
required. Recommended: Prior completion of one 200-level English
course. LEC.

ENGL 316. Introduction to Major American Writers. 3 Hours H.
Outstanding works of American literature, studied in chronological
sequence and with some attention paid to the characteristics of the
various periods of American literary history embraced. Prerequisite:
Prior completion of the KU Core Written Communication requirement.
Recommended: Prior completion of one 200-level English course. LEC.

ENGL 317. Topics in American Literature to 1865: ____. 3 Hours H.
Study of American literary works before 1865. Topics may focus on
a particular genre, theme, topic, historical period, author, or group of
authors. May be repeated for credit as the topic changes. Prerequisite:
Prior completion of the KU Core Written Communication requirement.
Recommended: Prior completion of one 200-level English course. LEC.
ENGL 318. Topics in American Literature Since 1865: _____. 3 Hours H.
Study of American literary works since 1865. Topics may focus on a particular genre, theme, historical period, author, or group of authors. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 320. American Literature I. 3 Hours H.
From the beginnings to 1865, with emphasis on the major writers and movements. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 322. American Literature II. 3 Hours H.
From 1865 to the present, with emphasis on the major writers and movements. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 323. Twentieth Century Literature and Culture. 3 Hours H.
The study of British and American literature, emphasizing important figures and movements since World War I. On occasion, the study of literature will be enriched with an investigation of other arts, such as music, film, and painting. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 324. Contemporary Authors: _____. 3 Hours H.
Study of one or more recent British and/or American authors. (Different authors in different semesters.) May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 325. Recent Popular Literature. 3 Hours HL / H.
Study of recent best sellers or other works of popular interest. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 326. Introduction to African Literature. 3 Hours NW AE42 / H/ W.
Reading, analysis, and discussion of contemporary fiction, poetry, and drama from sub-Saharan Africa. Brief attention is paid to historical development and to traditional literature. (Same as AAAS 332.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 327. Studies in Twentieth-Century Drama: _____. 3 Hours H.
A survey of major twentieth-century playwrights and theatre groups, to be selected by the instructor. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 328. Literature and Film: _____. 3 Hours H.
The comparative study of the literary and film treatments of a particular topic or theme, with special attention to the generic qualities of literature and film. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 329. Topics in Forms and Genres: _____. 3 Hours H.
An introductory study of a selected topic focused on a literary or rhetorical form or genre (e.g., Lyric Poetry, Captivity Narratives, Genre Theory). May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 330. Literary History II. 3 Hours H.
A study of literature in English, including major forms and movements, from the Romantics to the present. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 331. Chaucer. 3 Hours H.
Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 332. Shakespeare. 3 Hours H.
A study of ten to fourteen of Shakespeare's plays. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 334. Major Authors: _____. 3 Hours H.
Study of one or two major British and/or American authors. Different authors in different semesters. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 336. Jewish American Literature and Culture. 3 Hours AE41 / H.
An examination of Jewish American literature and culture from the 17th century to the present. Materials may include a broad range of literary genres as well as folklore, music, film, and visual art. (Same as JWSH 336.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 337. Introduction to U.S. Latino/a Literature. 3 Hours AE41 / H.
An historical survey of literature by U.S. Latino/a writers of Mexican, Puerto Rican, Cuban, Dominican, and Central/South American descent. Various genres, including oral forms such as corridos as well as novels, poetry, essays, and autobiographical writing, will be considered. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 338. Introduction to African-American Literature. 3 Hours AE41 / H.
An introduction to prominent works of African-American literature from the 18th century to the present as well as to the basic approaches to study and principles of this body of work, including its connection with African sources. Literature will include a wide variety of genres, and course materials may be supplemented by folklore, music, film, and visual arts. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 339. Introduction to Caribbean Literature. 3 Hours AE42 / H.
Reading, analysis, and discussion of fiction, poetry, and drama from the Caribbean, including a small selection of Spanish, French, and Dutch Antillean works in translation. (Same as AAAS 333.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 340. Topics in U.S. Ethnic Literature: _____. 3 Hours AE41 / H.
A study of literature by authors from one or more ethnic groups within the U.S., including but not limited to Asian American, African American, American Indian, Jewish American, Italian American, U.S. Latina/o.
Different topics in different semesters. May be repeated for credit as topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 341. American Literature of Social Justice. 3 Hours AE41 / H.**
An examination of U.S. literature that addresses situations of political and economic oppression or repression with the potential function of enlisting readers' sympathies in a project of social justice. The course focuses on U.S. literary texts dealing with social injustice and the curtailment of human and civil rights and addresses debates surrounding cultural authority and authenticity, identity politics, attempts to represent the voice of the "oppressed," revision of strategies used in slave narrative or in testimonio, and ethical and rhetorical appeals to an assumed readership. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 342. Topics in Transcultural Literature, Language, or Rhetoric: _____ 3 Hours H.**
An introduction to a topic in the literatures, languages, or rhetorics of diverse cultural groups in the US or the world. A supermajority of the works considered were originally written in English. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 351. Fiction Writing I. 3 Hours H.**
A study of narrative techniques and practice in the writing of fiction. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 352. Poetry Writing I. 3 Hours H.**
A study of prosody and practice in the writing of verse. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 353. Screenwriting I. 3 Hours H.**
An introduction to the practice of writing and evaluating scripts for film. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 354. Playwriting I. 3 Hours H.**
An introduction to the practice of writing and evaluating scripts for stage. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 355. Nonfiction Writing I. 3 Hours H.**
An introduction to the literary techniques of nonfiction and practice in the writing of one or more of the genre's subtypes, such as the personal essay, the familiar essay, the lyric essay, the memoir, nature writing, or travel writing. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 359. English Grammar. 3 Hours U.**
A course in traditional English grammar for students who wish to understand and be able to analyze English sentence structure. Students might apply the course to studies of style (their own or other authors'), rhetorical analysis, literary interpretation, or teaching. This course may be offered in either lecture or online format. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 360. Topics in Writing: _____ 3 Hours H.**
A writing course that helps students continue their writing practices at an advanced level, with a focus on particular varieties, purposes, audiences, media, or other issues in rhetorical writing. Topics vary (e.g., Writing for Social Action, Writing with Confidence, Writing Online, Writing for Style). May be repeated for credit as topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 361. Professional Writing: _____ 3 Hours H.**
Principles of writing for specific professional contexts, which might include such areas as business writing, legal writing, and literary or arts reviewing, etc. May be repeated for credit as topic varies. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 362. Foundations of Technical Writing. 3 Hours H.**
Introduces students to the principles of technical communication. Students learn to organize, develop, write, and revise various technical documents (e.g., letters, manuals, presentations, proposals, reports, resumes, websites) often needed in business, engineering and scientific settings. Includes an introduction to technical-writing software. This course fulfills the prerequisite for English 562 and English 564. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 380. Introduction to Rhetoric and Composition. 3 Hours GE3H / H.**
Introduces students to rhetoric and composition, a field that investigates questions about the nature, processes, teaching and historical, social and cultural contexts of writing. Students survey the themes, debates, and trends that inform the work of scholars in this field. Students also become acquainted with the historical traditions of discourse instruction, and the relevance of those traditions to our current understandings of writing. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 381. Topics in Rhetoric and Composition: _____ 3 Hours H.**
An introductory study of a selected topic in rhetoric or writing studies (e.g., Multimedia Rhetoric, Rhetoric of Social Action, Teaching Writing). May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 385. The Development of Modern English. 3 Hours H.**
An introduction to the history of the English language, with special attention to general structural changes throughout its history, especially changes in vocabulary and meaning, and past influences of other languages upon present usage. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 387. Introduction to the English Language. 3 Hours HL GE3H / H.**
A survey of the English language, its historical development, and its grammatical structure. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 388. Topics in English Language Studies. 3 Hours H.**
An introductory study of a selected topic in English language studies (e.g., World Englishes, Language and Literary Style, The Secret Life of English Words.) Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 390. Studies in: _____ 3 Hours H.**
A study of a specialized theme or topic in English studies. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.
ENGL 400. Teaching and Tutoring Writing. 3 Hours U.
Students explore theories and strategies of teaching and tutoring writing across academic disciplines. They learn more about themselves as writers as they build a repertoire of writing techniques useful in their studies, in the workplace, and in their personal lives. By observing and consulting in the writing center, they understand how reflection leads to responsible/responsive and engaged practice. (Same as LAS 400.) LEC.

ENGL 466. Literature for Children. 3 Hours H.
Wide reading in the great literature of the past and present suitable for children: folktales and epics, mythology, modern fantasy, fiction, poetry. Emphasis on extending the student's background and developing critical judgment. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 479. The Literature of: ______ 3 Hours H.
A study of the literary treatment of a particular aspect of British and/or American society. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 492. The London Review. 3 Hours AE42 / H.
This class meets one day a week throughout the semester and includes a nine-day visit to London over the spring break period. Students spend the early part of the semester selecting special interests, researching places to visit and study, and exchanging information. After the trip, students compile and publish a journal entitled "The London Review," which is comprised of essays, photos, art work, and other reflections about their experience in London. Prerequisite: Admission to University Honors Program or permission of instructor. LEC.

ENGL 494. Research Internship. 1-3 Hours H.
Practical research experience in English studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or outreach project. Credit hours are graded by faculty on a satisfactory/unsatisfactory basis. May be used as a component of the Research Experience Program (REP). Prerequisite: At least one 300-level English course, declaration of English major, and permission of instructor. INT.

ENGL 495. Directed Study: ______ 1-3 Hours H.
Work for advanced majors in fields or on topics not covered in course work. May be repeated for a total of up to six hours. Does not satisfy specific course requirements for the English major. May be counted as part of the total junior-senior credit hours required. Prerequisite: Completion of three junior-senior courses in English and consent of instructor. IND.

ENGL 496. Internship. 1-3 Hours H.
Practical experience in the use of English skills in supervised academic or professional settings. Credit hours are graded on a satisfactory/unsatisfactory basis, according to the written evaluation provided by the supervisor to the director. Prerequisite: At least one 300-level English course, declaration of English major, and permission of Undergraduate Director. INT.

ENGL 497. Service Learning Internship. 1-3 Hours H.
Practical experience in the use of English skills in a non-profit or advocacy context. Credit hours are graded by faculty on a satisfactory/unsatisfactory basis, according to the written evaluation student provided by the on-site supervisor and on the student's written reflective component assigned and evaluated by the supervising faculty member. May be used as a component of the Service Learning certification program. Prerequisite: At least one 300-level English course, declaration of English major, and permission of instructor. INT.

ENGL 498. Internship in English. 1-3 Hours H.
Practical experience in the use of English in non-traditional settings. Credit hours are graded by faculty on a satisfactory/unsatisfactory basis, according to the written evaluation provided by the supervisor to the director. Prerequisite: At least one 300-level English course, declaration of English major, and permission of Undergraduate Director. INT.

ENGL 506. Science Fiction. 3 Hours AE61 / H.
The development of science fiction as a literary genre, and as a literature of ideas for a future-oriented society. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 507. Science, Technology, and Society: Examining the Future through a Science-Fiction Lens. 3 Hours AE61 / H.
Science and technology offer many benefits to individuals and to societies, yet they also present many challenges. This course explores the past, present, and possible future effects of science and technology on society through readings and discussions of nonfiction articles in conjunction with science-fiction stories and novels. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 508. Contemporary Literary Theory. 3 Hours AE61 / H.
Study of selected works of literary theory and of current issues in literary studies. The course is designed for advanced undergraduates who intend to continue their study of literature in graduate school and for new graduate students who require a grounding in literary theory. According to each instructor's interest, the course may survey contemporary literary theory or may focus on a particular topic (e.g., authorship, canon formation, creativity, metaphor, narrative, rhetoric) or on a theoretical position (e.g., cultural studies, deconstruction, feminism, historicism, Marxism, psychoanalysis). A student may repeat the course with the permission of the appropriate director. Prerequisite: Completion of three junior-senior courses in English (or their equivalent) or graduate standing. LEC.

ENGL 520. History of the Book. 3 Hours AE61 / H.
Brief history of writing materials and handwritten books; history of printed books from the fifteenth century as part of cultural history; technical progress and aesthetic change. (Same as HIST 500.) LEC.

ENGL 521. Advanced Topics in British Literature 1800: ______. 3 Hours AE61 / H.
A Study of texts written before 1800. May be organized around a particular genre, historical period, a group of writers, or a theme. May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 522. Advanced Topics in British Literature After 1800: ______. 3 Hours AE61 / H.
A study of texts written after 1800. May be organized around a particular genre, historical period, group of writers, or a theme. May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 525. Shakespeare: ______. 3 Hours AE61 / H.
Intensive study of selected works. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 530. Irish Literature and Culture: ______. 3 Hours AE61 / H.
Study of topics in Irish literature and culture. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. (Same as EURS 512.) Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 531. James Joyce. 3 Hours AE61 / H.
A study of the major works of James Joyce, with the majority of the semester dedicated to Ulysses. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.
ENGL 532. Whitman and Dickinson. 3 Hours AE61 / H.
A study of selected works of Walt Whitman and Emily Dickinson.
Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 533. William Faulkner. 3 Hours AE61 / H.
A study of selected works of William Faulkner. Capstone course.
Prerequisite: Prior completion of at least one 300- or 400-level English course.

ENGL 534. Major Authors (Capstone): ____. 3 Hours AE61 / H.
Study of one or two major authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 536. Readings in the Holocaust. 3 Hours AE61 / H.
An examination of Holocaust literature, which may include fiction, nonfiction, poetry, drama, and film. Theoretical concerns may include such issues as memory, trauma, representation, imagination, exile, alienation, silence, the body and emotions, and intergenerational transmission. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 551. Fiction Writing II. 3 Hours AE61 / H.
Continuation of ENGL 351. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 351 or equivalent. LEC.

ENGL 552. Poetry Writing II. 3 Hours AE61 / H.
Continuation of ENGL 352. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 352 or its equivalent. LEC.

ENGL 553. Screenwriting II. 3 Hours AE61 / H.
A continuation of ENGL 353. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 353 or its equivalent. LEC.

ENGL 554. Playwriting II. 3 Hours AE61 / H.
A continuation of ENGL 354. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 354 or its equivalent. LEC.

ENGL 555. Nonfiction Writing II. 3 Hours AE61 / H.
Continuation of ENGL 355. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 355 or its equivalent. LEC.

ENGL 560. British Literature of the 20th Century: ____. 3 Hours AE61 / H.
Study of twentieth-century literary works. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 562. Advanced Technical Writing I. 3 Hours AE61 / H.
Stresses research methods in technical communication and simulates on-the-job training through live interviews and other forms of research. Students master the relevant software tools and begin to develop a technical-writing portfolio. Prerequisite: ENGL 362. LEC.

ENGL 563. Advanced Technical Writing and Editing. 3 Hours AE61 / H.
Students apply the principles of communicating business, scientific, and technical information to targeted readers. Concentration on the varying writing styles for online documents, proposals, reports, specifications, journal articles, and larger documents, as appropriate to their audience. Simulates an internship and helps students further develop a technical-writing or -editing portfolio. Students provide weekly status reports and a final report detailing their learning experience and present it to an appropriate technical communication class to help other students better understand the field. Prerequisite: Instructor permission. LEC.

ENGL 564. Advanced Technical Editing I. 3 Hours AE61 / H.
Students learn to use specialized vocabulary and editing tools such as proofreaders' marks, style guides, and standard editorial reference material; and they practice how to identify and correct common problems. Students usually work with writers in other technical writing courses, learning to work productively with other peoples' print and online documents. Students practice taking editing tests and develop a technical-editing portfolio. Prerequisite: ENGL 362. LEC.

ENGL 565. The Gothic Tradition. 3 Hours H.
This course explores and defines the Gothic tradition in British and American literature from its beginnings in the late eighteenth century to more recent twentieth-century texts in literature and film. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 566. American Literary Environmentalism. 3 Hours AE61 / H.
An examination of representations of nature and human/nature relations and their political, social and environmental consequences, with a special focus on the 19th and 20th centuries, including the writings of transcendentalists and conservationists, slave narratives, scientific writing on toxicity and other topics, and environmental justice literature. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 569. The Modern Tradition. 3 Hours AE61 / H.
An intensive study of the formative backgrounds of the "modern" spirit as it is expressed in imaginative literature. Readings from such influential spokesmen as W. James, Zola, Marx, Darwin, Henry Adams, Kierkegaard, Dostoevsky, Nietzsche, H. James, T.S. Eliot, Joyce, Auden, Rilke, Croce, Yeats, Malraux, Freud, Jung, D.H. Lawrence, Sartre, Camus, and Gide. Prerequisite: Prior completion of the freshman-sophomore English requirement or its equivalent. LEC.

ENGL 570. Topics in American Literature: ____. 3 Hours AE61 / H.
Different topics in different semesters. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 571. American Indian Literature: ____. 3 Hours NW AE41/AE61 / H/W.
The study of a wide range of American Indian literature, from various tribes and in a variety of genres. Satisfies the non-western culture course requirement. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 572. Women and Literature: ____. 3 Hours AE61 / H.
Different topics in different semesters. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 573. U.S. Latina/o Literature: ____. 3 Hours AE41/AE61 / H.
A study of the literature written by U.S. Latina/o writers of Mexican, Puerto Rican, Cuban, Dominican, and other Central/South American descent, in a variety of genres. Attention is given to the cultural and historical contexts of the literature and to the specificity of particular U.S. Latina/o groups. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.
ENGL 574. African American Literature: ______. 3 Hours AE41/AE61 / H.
A study of the literature written by African Americans from the pre-Civil War period to the present. Emphasis upon specific historical periods in the development of African American literature as well as on a critical analysis of major autobiographical, poetic, and fictional works. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 575. Literature of the American South. 3 Hours AE61 / H.
A survey of fiction, non-fiction, poetry, and drama written by selected writers of the American South from the pre-Civil War period to the present. The course will emphasize the critical analysis of individual texts as well as the cultural and historical context of the works. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 576. Advanced Topics in American Literature to 1865: ______. 3 Hours AE61 / H.
Study of American literary works before 1865. Topics may focus on a particular genre, theme, topic, historical period, author, or group of authors. May be repeated for credit as the topic changes. (Same as AMS 555.) Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 577. Advanced Topics in American Literature Since 1865: ______. 3 Hours AE61 / H.
Study of American literary works after 1865. Topics may focus on a particular genre, theme, topic, historical period, author, or group of authors. May be repeated for credit as the topic changes. (Same as AMS 555.) Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 578. Poetry, 1900-1945. 3 Hours AE61 / H.
A Study of English-language poetry of the early twentieth century. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 579. Poetry since 1945. 3 Hours AE61 / H.
A study of English-language poetry from the mid-twentieth century to the present. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 580. Rhetoric and Writing: ______. 3 Hours AE61 / H.
A study of rhetorical elements as the rhetoric of law, the rhetoric of education, persuasion in literature, literacy, and rhetorical genres. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 581. English Language Studies: ______. 3 Hours AE61 / H.
A study of selected topics in English language studies (e.g. World Englishes, Language and Literary Style, and The Secret Life of English Words). May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 587. American English. 3 Hours AE61 / H.
A study of the structure, history, and varieties of the English language in the United States from the period of colonization to the present. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 590. Studies in: ______. 1-3 Hours AE61 / H.
A study of a specialized theme or topic in English studies. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of the first-and second-year English requirement or its equivalent, and at least one 300- or 400-level ENGL course; or permission of instructor. LEC.

ENGL 592. Survey of: ______. 3 Hours AE61 / H.
A broad view of major works and authors in a particular period, genre, or mode. May be repeated for credit as the topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 596. Technical Communication Internship. 1-3 Hours AE61 / H.
Practical experience in the use of technical-writing or editing skills in supervised professional settings for which the student normally does not receive pay. A 1-3 hour internship requires 40-120 hours of documented on-site work in one semester (40 hours per credit). Credit hours are graded on a satisfactory/unsatisfactory basis, according to a written recommendation from the student's workplace manager, student work logs and self-evaluation, and an oral report. Prerequisite: Advanced Technical Writing I (English 562) and permission of instructor. LEC.

ENGL 598. Honors Proseminar: ______. 3 Hours AE61 / H.
Directed reading and participation in small discussion groups, each formed to consider a specific and limited subject during the semester. Written work will be required, and will be judged on both content and form. The course is part of a departmental program leading to Honors in English. Prerequisite: Admission must be approved by the departmental director of undergraduate studies. LEC.

ENGL 610. The Literature of England to 1500. 3 Hours AE61 / H.
A survey of the literature of medieval England (in translation). Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 620. Renaissance English Literature: ______. 3 Hours AE61 / H.
A broad view of literary works written between 1485 and 1660. Surveys may be offered with focus on a particular genre (poetry, drama, or prose), historical period (16th- or 17th-century literature), or group of authors (women writers). May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 633. Milton. 3 Hours AE61 / H.
A close reading of Paradise Lost, Paradise Regained, Samson Agonistes, and the minor poems, with illustrative selections of prose. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 640. British Literature, 1600-1800: ______. 3 Hours AE61 / H.
Study of literary works from the Restoration and eighteenth century. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 650. Romantic Literature: ______. 3 Hours AE61 / H.
Study of literary works from the British Romantic period. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 655. Victorian Literature: ______. 3 Hours AE61 / H.
Study of literary works from the Victorian period. Topics may focus on a particular genre, theme, historical period or group of authors. May be
repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 670. Literary Criticism to 1800. 3 Hours.**
An introduction to the major writings of literary criticism, in their historical context, from Plato and Aristotle to Samuel Johnson. LEC.

**ENGL 672. African Literature: ____. 3 Hours NW AE42/AE61 / H.**
An advanced study of a topic, genre, or area of written and/or oral African literature. Emphasis is placed on the critical analysis of major works, as well as their cultural and historical contexts. The course also addresses central critical and theoretical debates in the field. May be repeated for credit as the topic changes. Prerequisite: Prior completion of at least one 300- or 400-level English course, or permission of instructor. LEC.

**ENGL 690. Studies in: ____. 3 Hours AE61 / H.**
A study of a major topic of concern to English literature. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 706. Forms: _____. 3 Hours.**
A study of literary works belonging to a particular genre or to multiple genres (fiction, nonfiction, poetry, drama etc), either in a particular form (short story, essay, sonnet, etc.), concerned with a particular topic, or illustrative of a particular element of craft (voice, point of view, character development, etc.). Intended primarily for creative-writing students with an interest in developing their skills at reading as writers. May be repeated for credit as the topic varies. LEC.

**ENGL 707. Speculative Fiction Writing Workshop. 3 Hours.**
An intensive, 2-week course in writing speculative fiction, including genres such as slipstream, magical realism, fantasy, horror, and science fiction. The course is part of the Center for the Study of Science Fiction Summer Institute. Application period: January 1 - April 15. Application includes note to instructor expressing interest and one story. May be repeated for credit with instructor's permission. LEC.

**ENGL 710. Introduction to Old English. 3 Hours.**
A study of the grammatical features of the earliest form of written English, with readings in Old English prose and poetry. LEC.

**ENGL 714. Middle English Literature. 3 Hours.**
Reading of selected works in Middle English (exclusive of the works of Chaucer). LEC.

**ENGL 720. Chaucer: _____. 3 Hours.**
Intensive study of either the Canterbury Tales or Troilus and Criseyde and the earlier poems. May be repeated for credit up to a maximum of six hours. LEC.

**ENGL 725. Shakespeare: _____. 3 Hours.**
Intensive study of selected plays. May be repeated for credit as the topic changes. LEC.

**ENGL 726. Modern Irish Literature: _____. 3 Hours.**
Intensive study of topics in modern Irish literature. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. LEC.

**ENGL 727. Speculative Fiction Writing Workshop. 3 Hours.**
An intensive, 2-week course in writing speculative fiction, including genres such as slipstream, magical realism, fantasy, horror, and science fiction. The course is part of the Center for the Study of Science Fiction Summer Institute. Application period: January 1 - April 15. Application includes note to instructor expressing interest and one story. May be repeated for credit with instructor's permission. LEC.

**ENGL 730. Topics in Early Modern Literature: _____. 3 Hours.**
Intensive study of texts written between 1485 and 1800. The course may be organized around a particular genre (poetry, prose, drama), historical period (e.g. Elizabethan literature), a major author (e.g. Milton), group of authors (e.g. women writers), or theme (e.g. literature and politics 1660-1800). Students will be expected to read and apply relevant criticism and theory as well as study primary texts. May be repeated for credit as topic varies. LEC.

**ENGL 735. Shakespeare: _____. 3 Hours.**
Intensive study of selected plays. May be repeated for credit as the topic changes. LEC.

**ENGL 740. African Literature and Diaspora: _____. 3 Hours.**
An intensive study of the literatures of Africa and/or African diaspora (people of African descent dispersed around the world). This study will
focus on the major characteristics of a particular period, genre, mode, and/or theme in literatures such as African, Caribbean, Afro-Brazilian, African American, African Canadian, Black Critical theories pertinent to writers and their work will be covered. Topics may include studies in drama, poetry, or the novel; migration narratives; literature of a particular era, such as the Harlem Renaissance, Negritude, or the Black Arts Movement; representations of gender, etc. As topics vary by semester, the course may be repeated for credit. (Same as AAAS 774.) LEC.

ENGL 776. American Literature to 1900: _____ 3 Hours.
Intensive study of North American literary works before 1900. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. LEC.

ENGL 777. American Literature after 1900: _____ 3 Hours.
Intensive study of North American literary works after 1900. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. LEC.

ENGL 779. U.S. Poetries Since 1900. 3 Hours.
A colloquium for graduate students, sampling the range of poetries and poetics produced in the United States in the twentieth and twenty-first centuries. LEC.

ENGL 780. Composition Studies. 3 Hours.
This course surveys the field of composition studies, examining major issues and theories in the study of writing. The course may include theories from classical to contemporary rhetoric, composition theory from the twentieth century, and the most current debates in the study of writing. LEC.

ENGL 781. Criticism and the Teaching of Literature. 3 Hours.
A survey of selected critical theories and of the applicability of those theories to the teaching of literature. LEC.

ENGL 785. History of the English Language. 3 Hours.
Historical study of the phonology, morphology, syntax, vocabulary, and semantics of English; the relation between linguistic and cultural change. LEC.

ENGL 787. Modern English Grammar. 3 Hours.
A study of contemporary English: phonology, morphology, syntax, and usage. The emphasis is structural, but "traditional" grammar is referred to for contrast, example, and clarification. LEC.

ENGL 790. Studies in: _____ 3 Hours.
Examination of a significant topic in literature or the English language. May be repeated for credit as the topic varies. LEC.

ENGL 800. Methods, Theory, and Professionalism. 3 Hours.
Acquaintance with resources and practice in techniques that are essential to other graduate courses. Major concerns include the writing and documentation of scholarly papers; basic reference and bibliographical aids; critical approaches to literature and literary historiography; and the place of language and rhetoric in English studies today. LEC.

ENGL 801. Study and Teaching of Writing. 3 Hours.
A survey of major concepts and issues in the study of writing, especially as applied to teaching composition. Practices in writing pedagogy are also discussed, and students' teaching of composition is observed and explored. Required of and enrollment limited to new teachers of English 102. May not be repeated for credit toward graduate degree. Course graded on a satisfactory/unsatisfactory basis. FLD.

ENGL 803. Practicum in the Teaching of Creative Writing. 1 Hour.
A course for graduate teaching assistants pursuing the M.F.A. or Ph.D. with emphasis in Creative Writing. Normally taken in the third year. Concerns primarily the pedagogy of creative writing: workshop techniques, approaches to conferencing, revision strategies, and the like. Includes weekly group meetings as well as class visitsations and individual conferences. May not be repeated for credit towards graduate degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: ENGL 801 and 802. FLD.

ENGL 880. Topics in Composition Studies and Rhetoric: _____ 3 Hours.
Examination of selected topics in composition and rhetoric, such as literary studies, genre theory, dialogism, or writing across the curriculum. May be repeated for credit as the topic changes. Prerequisite: ENGL 780 or equivalent. LEC.

ENGL 885. Writing Center Theory and Administration. 3 Hours.
This course explores theories motivating writing center administration and practice. Students will investigate the multiple functions of writing centers, from writing labs associated with college composition instruction, to decentralized resources for writing faculty teaching writing across the disciplines, to elementary, secondary, and community support centers for writers, to online administrative perspective, design a research study and propose actions such as creating policy, developing curricula, designing materials, or conducting assessments. (Same as LAS 700.) Prerequisite: LAS 400, ENGL 400, or consent of instructor. LEC.

ENGL 896. Internship. 1-3 Hours.
Practical experience under professional supervision with the Writing Center, in editing, in theatrical production, or other activities relevant to the completion of an advanced degree in English. Prerequisite: Permission of Director of Graduate Studies. INT.

ENGL 897. Preparation for the M.A. Examination. 1-3 Hours.
An independent reading course for students preparing to take the M.A. examination. May not be repeated for credit towards graduate degree. Includes weekly group meetings as well as class visitations and individual conferences. Required of and enrollment limited to new teachers of English 102. May not be repeated for credit toward graduate degree. Course graded on a satisfactory/unsatisfactory basis. FLD.

ENGL 904. Seminar in Composition Theory: _____ 3 Hours.
Intensive study of one or more theoretical aspects of composition in English (e.g., rhetoric, text grammar, stylistics). Prerequisite: ENGL 800. LEC.

ENGL 905. Seminar in the English Language: _____ 3 Hours.
Close study of the English language in a particular period. Prerequisite: ENGL 800. LEC.

ENGL 908. Seminar in Literary Criticism: _____ 3 Hours.
Close study of one or more major critics, of a major critical school, or of a topic important in literary criticism. Prerequisite: ENGL 800. LEC.

ENGL 915. Seminar in Medieval English Literature: _____ 3 Hours.
Study may center on either Old or Middle English language and literature. Prerequisite: ENGL 800. LEC.

ENGL 916. Seminar in Chaucer: _____ 3 Hours.
Prerequisite: ENGL 800. LEC.
ENGL 920. Seminar in Renaissance English Literature: _____. 3 Hours.
Close study of one or two major authors or of a group of related works. Prerequisite: ENGL 800. LEC.

ENGL 926. Seminar in Shakespeare: _____. 3 Hours.
Prerequisite: ENGL 800. LEC.

ENGL 932. Seminar in Milton: _____. 3 Hours.
Prerequisite: ENGL 800. LEC.

ENGL 940. Seminar in Restoration and 18th Century British Literature: _____. 3 Hours.
One or two authors are read closely, or a group of related works is studied. Prerequisite: ENGL 800. LEC.

ENGL 950. Seminar in 19th Century British Literature: _____. 3 Hours.
Concentrated study of one or two major figures, or a group of significant writers, or an aspect of the literary scene. Prerequisite: ENGL 800. LEC.

ENGL 960. Seminar in 20th Century British Literature: _____. 3 Hours.
Concentrated study of one or two authors, or a group of significant writers, or an aspect of the literary scene. Prerequisite: ENGL 800. LEC.

ENGL 970. Seminar in American Literature: _____. 3 Hours.
Concentrated study of one or two authors or of historical periods or important movements. Prerequisite: ENGL 800. LEC.

ENGL 974. Seminar in Literatures of Africa and the African Diaspora: _____. 3 Hours.
Advanced study in a topic related to literature, language, and cultures of Africa and the African Diaspora, such as a concentrated study of one or two authors, a group of significant writers, an historical period or important movement, or an aspect of the literary or cultural scene of Black writing. May be repeated for credit as the topic varies. LEC.

ENGL 980. Seminar In: _____. 3 Hours.
Advanced study in a topic related to literature, language, theory, or a special skill such as analytical bibliography or editing. Prerequisite: ENGL 800. LEC.

ENGL 997. Preparation for the Doctoral Examination. 1-12 Hours.
An independent reading course for students preparing to take the Ph.D. comprehensive examination. May normally be taken in the semester or summer session immediately preceding the semester in which the comprehensive examination is taken. Does not count toward the residence requirement. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of the Director of Graduate Studies. RSH.

ENGL 998. Investigation and Conference: _____. 1-6 Hours.
Individual work in (a) language, (b) literature, (c) composition, or (d) the teaching of English, by properly qualified graduate students under the direction of appropriate members of the Graduate Faculty as assigned by the Graduate Director. Limited to 6 hours of credit toward the M.A. or Ph.D. degree; only on three-hour enrollment may substitute for a formal course in satisfying a field distribution requirement. Normally offered for only up to three credit hours in any one enrollment. Permission of the supervising faculty member and of the Graduate Director required for enrollment. RSH.

ENGL 999. Doctoral Dissertation. 1-12 Hours.
Graded on a satisfactory/unsatisfactory basis. THE.

Bachelor of Arts and Bachelor of General Studies in English

Why study English language and literature?

Because reading and writing shape the world.

KU’s English Department is at the core of the humanities, highlighting the “human” through our individual, one-on-one interactions with our students, our emphasis on community and global engagement, and our abiding interest in our shared humanity through the stories of others. We seek to challenge the mind and to engage the imagination of our students, to teach them to ask questions and to seek for answers. We encourage them to grapple with the complexity of a culturally and commercially interconnected world and the global networks and processes of cultural exchange. We believe that words and ideas will shape the world. We teach our students life-long skills, so that they learn to write clearly, creatively, and effectively—discovering themselves even as they lay a solid foundation for professional success.

A commitment to teaching and learning.

Our department is renowned for its tradition of excellence in teaching. The vast majority of our undergraduate classes have 20-35 students, and much of the class time is dedicated to active learning and engagement with texts and ideas. In the last ten years, faculty members in the department of English have won ten Kemper Fellowships for Excellence in Teaching, two Chancellors Club Teaching Professorships, a Career Achievement Teaching Award, and a wide variety of other university-level teaching and advising awards, and the department as a whole received the Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

A variety of career and life paths.

English majors graduate to a variety of careers, including law, teaching, scholarship, publishing, library science, and journalism—as well as medicine, politics, design, and any number of other fields that value clear communication, interpretive skill, and critical and creative thinking.

Engaged and innovative scholarship.

KU’s English Department has several core strengths that cross tracks and periods, including Global and Cross-Cultural Approaches; Literature, Rhetoric, and Social Action; Diversity Studies; Language, Literature and Science; and Popular Expressive Forms.

At the KU English Department, students work closely with nationally-renowned writers and researchers. Our faculty have won national awards that recognize excellence in research, including grants from the National Endowment for the Humanities, the American Philosophical Society, and the Newberry Library, among others. English Department faculty members have also received major research funding from the University of Kansas, including the Hall Center for the Humanities Research fellowships and Keeler Intra-University Fellowships for interdisciplinary work. Undergraduate students can work one-on-one with faculty mentors in the Honors Program, McNair Scholars Program, and Dean's Scholars Program, as well as through independent Directed Studies.
Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Undergraduate First- and Second-Year Preparation

Prospective English majors and minors are encouraged to complete their KU Core Goal 2.1 requirements and their BA degree-specific written communication requirements with English Department coursework (i.e., ENGL 101, 102 or 105, and 200-level ENGL courses). Students are strongly encouraged to take a 200-level English course before taking 300- and 400-level coursework in English. Prospective English majors are encouraged to consult with the Director or Associate Director of Undergraduate Studies in order to declare the major, review major and degree requirements, and become familiar with departmental opportunities.

Requirements for the B.A. or B.G.S. Major

The major in English requires 31 hours (34 for Honors English), of which 3 hours may be an appropriate 200-level English course. The Department offers three tracks in the major, with an Honors variation of each: General; Creative Writing; and Rhetoric, Language, and Writing.

As part of these 31 hours (34 for Honors English), all English majors must complete the Orientation to English Studies within their first two semesters as a declared major. In addition, they must also choose courses from each of the following 7 categories:

1. Individual Authors or Movements
2. Literary Theory
3. English Language or Rhetoric
4. Transcultural Approaches to Language, Literature, or Writing
5. Writing
6. Forms and Genres
7. Literary History (2 courses)

Note: courses may be listed in more than one category, but may only count in one category for an individual student. 2 courses must be at the 500 level or above (i.e., a capstone course); one additional course must be focused language, literature, or writing before 1850 (see course list at the bottom of this page). See Additional Requirements section of each track for requirements specific to that track.

General Track

General Track - orientation requirement:

ENGL 199 Orientation to English Studies

General Track, category requirements:

1. Individual Authors or Movements (3)
   - ENGL 301 Topics in British Literature to 1800: _____
   - ENGL 302 Topics in British Literature Since 1800: _____
   - ENGL 315 Studies in British Literature
   - ENGL 317 Topics in American Literature to 1865: _____
   - ENGL 318 Topics in American Literature Since 1865: _____
   - ENGL 324 Contemporary Authors: _____
   - ENGL 325 Recent Popular Literature
   - ENGL 327 Studies in Twentieth-Century Drama: _____
   - ENGL 331 Chaucer
   - ENGL 332 Shakespeare
   - ENGL 334 Major Authors: _____
   - ENGL 340 Topics in U.S. Ethnic Literature: _____
   - ENGL 479 The Literature of: _____
   - ENGL 521 Advanced Topics in British Literature 1800: _____
   - ENGL 522 Advanced Topics in British Literature After 1800: _____
   - ENGL 530 Irish Literature and Culture: _____
   - ENGL 531 James Joyce
   - ENGL 532 Whitman and Dickinson
   - ENGL 533 William Faulkner
   - ENGL 534 Major Authors (Capstone): _____
   - ENGL 560 British Literature of the 20th Century: _____
   - ENGL 565 The Gothic Tradition
   - ENGL 567 Modern Drama: _____
   - ENGL 568 American Literary Environmentalism
   - ENGL 570 Topics in American Literature: _____
   - ENGL 571 American Indian Literature: _____
   - ENGL 573 U.S. Latina/o Literature: _____
   - ENGL 574 African American Literature: _____
   - ENGL 575 Literature of the American South
   - ENGL 576 Advanced Topics in American Literature to 1865: _____
   - ENGL 577 Advanced Topics in American Literature Since 1865: _____
   - ENGL 578 Poetry, 1900-1945
   - ENGL 579 Poetry since 1945
ENGL 610  The Literature of England to 1500
ENGL 620  Renaissance English Literature: ______
ENGL 633  Milton
ENGL 640  British Literature, 1600-1800: ______
ENGL 650  Romantic Literature: ______
ENGL 655  Victorian Literature: ______
ENGL 674  African Literature: ______

2. Literary Theory (3)  3
ENGL 308  Introduction to Literary Criticism and Theory
ENGL 508  Contemporary Literary Theory
ENGL 660  Ecocriticism

3. English Language or Rhetoric (3)  3
ENGL 359  English Grammar
ENGL 380  Introduction to Rhetoric and Composition
ENGL 381  Topics in Rhetoric and Composition: ______
ENGL 385  The Development of Modern English
ENGL 387  Introduction to the English Language
ENGL 388  Topics in English Language Studies
ENGL 580  Rhetoric and Writing: ______
ENGL 581  English Language Studies: ______
ENGL 587  American English

4. Transcultural Approaches to Language, Literature, or Writing (3)  3
ENGL 305  World Indigenous Literatures
ENGL 306  Global Environmental Literature
ENGL 326  Introduction to African Literature
ENGL 336  Jewish American Literature and Culture
ENGL 337  Introduction to U.S. Latino/a Literature
ENGL 338  Introduction to African-American Literature
ENGL 339  Introduction to Caribbean Literature
ENGL 340  Topics in U.S. Ethnic Literature: ______
ENGL 341  American Literature of Social Justice
ENGL 342  Topics in Transcultural Literature, Language, or Rhetoric: ______
ENGL 360  Topics in Writing: ______ (as Pura Vida: Travel Writing and the Costa Rica Experience, only Pura Vida: Travel Writing and the Costa Rica Experience currently counts in this category.

ENGL 492  The London Review
ENGL 571  American Indian Literature: ______
ENGL 572  Women and Literature: ______
ENGL 573  U.S. Latina/o Literature: ______
ENGL 574  African American Literature: ______
ENGL 674  African Literature: ______

5. Writing (3)  3
ENGL 203  Topics in Reading and Writing: ______
ENGL 205  Freshman-Sophomore Honors Proseminar: ______
ENGL 209  Introduction to Fiction
ENGL 210  Introduction to Poetry
ENGL 211  Introduction to the Drama
ENGL 351  Fiction Writing I  creative writing workshop
ENGL 352  Poetry Writing I  creative writing workshop

ENGL 353  Screenwriting I  creative writing workshop
ENGL 354  Playwriting I  creative writing workshop
ENGL 355  Nonfiction Writing I  creative writing workshop
ENGL 360  Topics in Writing: ______
ENGL 361  Professional Writing: ______
ENGL 362  Foundations of Technical Writing
ENGL 400  Teaching and Tutoring Writing
ENGL 492  The London Review
ENGL 551  Fiction Writing II  creative writing workshop
ENGL 552  Poetry Writing II  creative writing workshop
ENGL 553  Screenwriting II  creative writing workshop
ENGL 554  Playwriting II  creative writing workshop
ENGL 555  Nonfiction Writing II  creative writing workshop
ENGL 598  Honors Proseminar: ______
ENGL 599  Honors Essay

6. Forms and Genres (3)  note: students not pursuing the Creative Writing Track may only count one creative writing workshop toward the major; creative writing workshops noted below.
ENGL 209  Introduction to Fiction
ENGL 210  Introduction to Poetry
ENGL 211  Introduction to the Drama
ENGL 309  The British Novel
ENGL 327  Studies in Twentieth-Century Drama: ______
ENGL 328  Literature and Film: ______
ENGL 329  Topics in Forms and Genres: ______
ENGL 332  Shakespeare
ENGL 351  Fiction Writing I  creative writing workshop
ENGL 352  Poetry Writing I  creative writing workshop
ENGL 353  Screenwriting I  creative writing workshop
ENGL 354  Playwriting I  creative writing workshop
ENGL 355  Nonfiction Writing I  creative writing workshop
ENGL 360  Topics in Writing: ______
ENGL 506  Science Fiction
ENGL 551  Fiction Writing II  creative writing workshop
ENGL 552  Poetry Writing II  creative writing workshop
ENGL 553  Screenwriting II  creative writing workshop
ENGL 554  Playwriting II  creative writing workshop
ENGL 555  Nonfiction Writing II  creative writing workshop
ENGL 567  Modern Drama: ______
ENGL 578  Poetry, 1900-1945
ENGL 579  Poetry since 1945

7. Literary History: 2 courses (6)  6
ENGL 312  Major British Writers to 1800
& ENGL 322  and American Literature II
ENGL 320  American Literature I
& ENGL 314  and Major British Writers after 1800
ENGL 310  Literary History I
& ENGL 330  and Literary History II
ENGL 312  Major British Writers to 1800
& ENGL 330  and Literary History II
ENGL 320  American Literature I
& ENGL 330  and Literary History II
The University of Kansas

ENGL 310 & ENGL 314
Literary History I and Major British Writers after 1800

ENGL 310 & ENGL 322
Literary History I and American Literature II

Total Hours 24

Additional 6 hours of English electives 6

Total Hours 6

Additional Requirements, General Track:

- One course (3 hours) in addition to 7. (Literary History) must focus on literature before 1850. *See course list at the bottom of this page. (p. 1359)
- Two courses (6 hours) must be capstone courses, i.e., at the 500 level or above.
- 27 hours must be at the junior/senior level.
- One 200-level course may count toward major requirements. No 100-level ENGL courses count toward major requirements except ENGL 199.

Notes:

- Only 1 (3 credits) creative writing workshop (fiction writing, nonfiction writing, poetry writing, screen writing or playwriting) may be applied as a major course for students not pursuing the creative writing track.
- Up to 6 credits combined of ENGL 494 (Research Internship) or ENGL 495 (Directed Study) may be applied as major electives.
- Up to 3 credit hours of ENGL 496 (Internship) or ENGL 497 (Service Learning Internship) may be applied as a major elective.

Creative Writing Track

Creative Writing Track - orientation requirement:

- Up to 3 credit hours of ENGL 496 (Internship) or ENGL 497 (Service Learning Internship) may be applied as a major elective.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 31 hours of major courses (34 for Honors English).

Major Hours in Residence
Satisfied by a minimum of 25 hours of KU resident credit in the major; exceptions by permission of Director of Undergraduate Studies only.

Major Junior/Senior Hours
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

ENGL 571 American Indian Literature: ______
ENGL 572 Women and Literature: ______
ENGL 573 U.S. Latina/o Literature: ______
ENGL 574 African American Literature: ______
ENGL 674 African Literature: ______

5. Writing (3) note: students not pursuing the Creative Writing Track may only count one creative writing workshop toward the major; creative writing workshops noted below.

ENGL 203 Topics in Reading and Writing: ______
ENGL 209 Introduction to Fiction
ENGL 210 Introduction to Poetry
ENGL 211 Introduction to the Drama
ENGL 351 Fiction Writing I creative writing workshop
ENGL 352 Poetry Writing I creative writing workshop
ENGL 353 Screenwriting I creative writing workshop
ENGL 354 Playwriting I creative writing workshop
ENGL 355 Nonfiction Writing I creative writing workshop
ENGL 360 Topics in Writing: ______
ENGL 361 Professional Writing: ______
ENGL 362 Foundations of Technical Writing
ENGL 400 Teaching and Tutoring Writing
ENGL 492 The London Review
ENGL 551 Fiction Writing II creative writing workshop
ENGL 552 Poetry Writing II creative writing workshop
ENGL 553 Screenwriting II creative writing workshop
ENGL 554 Playwriting II creative writing workshop
ENGL 555 Nonfiction Writing II creative writing workshop
ENGL 598 Honors Proseminar: ______
ENGL 599 Honors Essay

6. Forms and Genres (3) note: students not pursuing the Creative Writing Track may only count one creative writing workshop toward the major; creative writing workshops noted below.

ENGL 209 Introduction to Fiction
ENGL 210 Introduction to Poetry
ENGL 211 Introduction to the Drama
ENGL 309 The British Novel
ENGL 327 Studies in Twentieth-Century Drama: ______
ENGL 328 Literature and Film: ______
ENGL 329 Topics in Forms and Genres: ______
ENGL 332 Shakespeare
ENGL 351 Fiction Writing I creative writing workshop
ENGL 352 Poetry Writing I creative writing workshop
ENGL 353 Screenwriting I creative writing workshop

ENGL 354 Playwriting I creative writing workshop
ENGL 355 Nonfiction Writing I creative writing workshop
ENGL 360 Topics in Writing: ______
ENGL 506 Science Fiction
ENGL 551 Fiction Writing II creative writing workshop
ENGL 552 Poetry Writing II creative writing workshop
ENGL 553 Screenwriting II creative writing workshop
ENGL 554 Playwriting II creative writing workshop
ENGL 555 Nonfiction Writing II creative writing workshop
ENGL 567 Modern Drama: ______
ENGL 578 Poetry, 1900-1945
ENGL 579 Poetry since 1945

7. Literary History: 2 courses (6)

ENGL 312 Major British Writers to 1800 & ENGL 322 and American Literature II
ENGL 320 American Literature I & ENGL 314 and Major British Writers after 1800
ENGL 310 Literary History I & ENGL 330 and Literary History II
ENGL 312 Major British Writers to 1800 & ENGL 330 and Literary History II
ENGL 320/330 American Literature I
ENGL 310 Literary History I & ENGL 314 and Major British Writers after 1800
ENGL 310 Literary History I & ENGL 322 and American Literature II

Total Hours 24

Rhetoric, Language, and Writing courses (9 hours of the courses listed below, taken in addition to the RLW course taken in category 3 above; 3 of the 9 hours may be taken in category 6 or other categories as appropriate) (6) note: students not pursuing the Creative Writing Track may only count one creative writing workshop toward the major; creative writing workshops noted below.

ENGL 351 Fiction Writing I creative writing workshop
ENGL 352 Poetry Writing I creative writing workshop
ENGL 353 Screenwriting I creative writing workshop
ENGL 354 Playwriting I creative writing workshop
ENGL 355 Nonfiction Writing I creative writing workshop
ENGL 359 English Grammar
ENGL 360 Topics in Writing: ______
ENGL 361 Professional Writing: ______
ENGL 362 Foundations of Technical Writing
ENGL 400 Teaching and Tutoring Writing
ENGL 494 Research Internship or ENGL 495 Directed Study: ______
ENGL 496 Internship or ENGL 497 Service Learning Internship
ENGL 380 Introduction to Rhetoric and Composition
ENGL 381 Topics in Rhetoric and Composition: ______
ENGL 385 The Development of Modern English
ENGL 387 Introduction to the English Language
ENGL 388 Topics in English Language Studies
ENGL 551 Fiction Writing II creative writing workshop
ENGL 552 Poetry Writing II creative writing workshop
ENGL 553 Screenwriting II creative writing workshop
ENGL 554 Playwriting II creative writing workshop
ENGL 555 Nonfiction Writing II creative writing workshop
ENGL 580 Rhetoric and Writing: _____
ENGL 581 English Language Studies: _____
ENGL 587 American English

Additional requirements, Rhetoric, Language, and Writing Track:

- One course (3 hours) in addition to 7. (Literary History) must focus on literature before 1850. *See course list at the bottom of this page (p. 1359).
- Two courses (6 hours) must be capstone courses, i.e., at the 500 level or above.
- 27 hours must be at the junior/senior level.
- One 200-level course may count toward major requirements. No 100-level ENGL courses count toward major requirements except ENGL 199.

Note:

- Only 1 (3 credits) creative writing workshop (fiction writing, nonfiction writing, poetry writing, screen writing, or playwriting) may be applied as a major course for students not pursuing the creative writing track.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 31 hours of major courses (34 for Honors English).

Major Hours in Residence
Satisfied by a minimum of 25 hours of KU resident credit in the major; exceptions by permission of Director of Undergraduate Studies only.

Major Junior/Senior Hours
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

*Courses that fulfill the additional pre-1850 requirement (in addition to any relevant course taken for category 7):

ENGL 301 Topics in British Literature to 1800: _____ 3
ENGL 310 Literary History I 3
ENGL 312 Major British Writers to 1800 3
ENGL 315 Studies in British Literature 3
ENGL 317 Topics in American Literature to 1865: _____ 3
ENGL 320 American Literature I 3
ENGL 331 Chaucer 3
ENGL 332 Shakespeare 3
ENGL 521 Advanced Topics in British Literature 1800: _____ 3
ENGL 525 Shakespeare: _____ 3
ENGL 565 The Gothic Tradition 3
ENGL 610 The Literature of England to 1500 3
ENGL 620 Renaissance English Literature: _____ 3
ENGL 633 Milton 3
ENGL 640 British Literature, 1600-1800: _____ 3
ENGL 650 Romantic Literature: _____ 3

Sample 4-year plans for the BA degree in English with the following concentrations can be found here: English General Track (p. 1359), Creative Writing (p. 1360), and Language, Rhetoric, and Writing (p. 1361).

Sample 4-years plans for the BGS degrees in English can be found using the left-side navigation.

Departmental Honors

To be admitted to the English Honors major program, an undergraduate must have earned a 3.25 overall grade-point average, and a 3.5 grade-point average in English courses.

Honors English majors must complete at least 1 section of ENGL 598 Honors Proseminar: _____ and ENGL 599 Honors Essay. This requirement, in effect, adds 3 hours of capstone-level coursework to the student’s emphasis.

#### Total Hours: 120-123

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (http://college.ku.edu/undergrad/curriculum/ ba_ QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Before beginning 300+ level English courses it is recommended that students take a 200-level English course.
4. English majors must choose courses from each of the following 7 categories: Individual Authors or Movements, Literary Theory, English Language or Rhetoric, Transcultural Approaches to Language, Literature, or Writing, Writing, Forms and Genres, and Literary History (2 courses). In addition to the courses taken for the Literary History category, one additional course focusing on literature before 1850 (http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-english/ #Pre1850), must be taken. This 4-year plan provides suggestions for when to take these courses, but there is not a preferred order.
5. The Writing category includes Creative Writing workshops. For English majors not pursuing the Creative Writing track, only one Creative Writing workshop course can be used toward the major. Two courses are required from the Literary History category.
6. The Forms and Genres category includes Creative Writing workshops. For English majors not pursuing the Creative Writing track, only one Creative Writing workshop course can be used toward the major.
7. Two ENGL courses must be taken at the 500+ level, as required by the major; these courses may be used to fulfill major category requirements or major electives. Choose at least one ENGL 500+ level course that is approved to fulfill the Goal 6 requirement of the KU Core.
8. The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BA in English with concentration in Creative Writing

The BA in English with concentration in Creative Writing is designed for students who wish to specialize in the field of creative writing. This concentration offers a rigorous curriculum that includes courses in both the theoretical and practical aspects of writing. Students will develop their skills in areas such as composition, critical analysis, and creative expression. The program is offered by the Department of English and is administered through the College of Liberal Arts and Sciences.

#### Core Requirements

- **Composition**: Successful completion of ENGL 101 and ENGL 102 is required. Students who test out of Composition will still need to complete additional coursework.
- **Quantitative Reasoning**: ENGL 200+ Level Course/ from Writing category (Writing Category: Major Requirement).
- **Literary History**: 3 Elective or possible minor course (Total Hours).
- **Integration & Creativity**: 3 Elective or possible minor course (Total Hours).
- **Social Science**: 3 Elective or possible minor course (Total Hours).
- **Literary Theory**: 3 Elective or possible minor course (Total Hours).
- **Forms & Genres**: 3 Elective or possible minor course (Total Hours).

#### Major Requirements

- **Individual Authors or Movements**: 3 Elective or possible minor course (Total Hours).
- **Creative Writing**: 3 Elective or possible minor course (Total Hours).
- **Writing**: 3 Elective or possible minor course (Total Hours).

#### Electives

Students must complete 9 additional hours of electives, which may be chosen from a variety of courses offered by the Department of English and other departments.

### Course Options

- **ENGL 300+ from Individual Authors/Movements**: 3 Elective or possible minor course (Total Hours).
- **ENGL 500+ Elective**: 3 Elective or possible minor course (Total Hours).
- **LA&S 492**: Elective or possible minor course (Total Hours).

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. English majors must choose courses from each of the following 7 categories: Individual Authors or Movements, Literary Theory, English Language or Rhetoric, Transcultural Approaches to Language, Literature, or Writing, Writing, Forms and Genres, and Literary History (2 courses). In addition to the courses taken for the Literary History category, one additional course focusing on literature before 1850 (http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-english/#Pre1850), must be taken.
4. Creative writing students must complete workshops in at least two genres. For the purposes of the Creative Writing Tracks, the four major genres are: Fiction; Poetry; Playwriting, Screenwriting, and/or Scriptwriting; and Creative Non-Fiction.
5. Two ENGL courses must be taken at the 500+ level per major requirement.
6. Choose at least one of the required ENGL 500+ level courses, as required by the major, from the list of approved ENGL courses for Goal 6 of the KU Core.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Below is a sample 4-year plan for students pursuing the BGS in English, General Track. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

### BGS in English

#### Freshman

- **Fall**
  - Goal 2.1 Written
  - Communication (First Course, 2 Crs Required)
  - Goal 1.2 Quantitative Literacy
  - Goal 1.1 Critical Thinking
  - Elective (Total Hours)

- **Spring**
  - Goal 2.2 Communication
  - Goal 3 Natural Science
  - Goal 3 Humanities
  - Elective (Total Hours)

#### Sophomore

- **Fall**
  - Goal 4.1 US Diversity
  - BA_QR

- **Spring**
  - Goal 4.2 Global Awareness
  - Goal 4.1 US Diversity

#### Junior

- **Fall**
  - Goal 4.2 Global Awareness
  - ENGL 300+ from Literary History Category (Major Requirement)
  - Elective or possible minor course 300+ (Total Hours)

- **Spring**
  - Elective or possible minor course 300+ (Total Hours)

#### Senior

- **Fall**
  - ENGL 300+ from Literary History Category (Major Requirement)
  - Elective or possible minor course 300+ (Total Hours)
  - Elective or possible minor course 300+ (Total Hours)

- **Spring**
  - Elective or possible minor course 300+ (Total Hours)

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (http://college.ku.edu/undergrad/curriculum/ ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. English majors are encouraged to take a 200-level English course before beginning 300+ level English courses.

4. English majors must choose courses from each of the following 7 categories: Individual Authors or Movements, Literary Theory, English Language or Rhetoric, Transcultural Approaches to Language, Literature, or Writing, Writing, Forms and Genres, and Literary History (2 courses). In addition to the courses taken for the Literary Theory category, one additional course focusing on literature before 1850 (http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-english/ #Pre1850), must be taken.

5. A total of 12 hours in Rhetoric, Language, and Writing courses are required for students pursuing the Rhetoric, Language, and Writing track. 3 of the 12 credits will be fulfilled when completing the Rhetoric or Writing category. Three additional rhetoric, language, or writing courses may be chosen from other categories as appropriate.

6. Only one Creative Writing Workshop class is allowed to count toward the major.

7. Two ENGL 500+ level courses are required by the major. Attempt to choose at least one of the ENGL 500+ level courses from the list of approved Goal 6 courses for the KU Core.

---

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

1. Before beginning 300+ level English courses is is recommended that students take a 200-level English course.
2. English majors must choose courses from each of the following 7 categories: Individual Authors or Movements, Literary Theory, English Language or Rhetoric, Transcultural Approaches to Language, Literature, or Writing, Writing Forms and Genres, and Literary History (2 courses). In addition to the courses taken for the Literary History category, one additional course focusing on literature before 1850, must be taken. This 4-year plan provides suggestions for when to take these courses, but there is not a preferred order.
3. The Writing category includes Creative Writing workshops. For English majors not pursuing the Creative track, only one Creative Writing workshop can be used toward the major.
4. Two courses are required from the Literary History category.
5. Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.
6. The Forms and Genres category includes Creative Writing workshops. For English majors not pursuing the Creative Writing track, only one Creative Writing workshop course can be used toward the major.
7. One course (3 hours) in addition to Literary History (2 courses) must focus on literature before 1850.
8. Two ENGL courses must be taken at the 500+ level, as required by the major; these courses may be used to fulfill major category requirements or major electives. Choose at least one ENGL 500+ level course that is approved to fulfill the Goal 6 requirement of the KU Core.

**Total: 15**  

**Total Hours: 120**  

1. English majors must choose courses from each of the following 7 categories: Individual Authors or Movements, Literary Theory, English Language or Rhetoric, Transcultural Approaches to Language, Literature, or Writing, Writing, Forms & Genres, and Literary History (2 courses). In addition to the courses taken for the Literary History category, one additional course focusing on literature before 1850 must be taken.

2. One course (3 hours) in addition to Literary History (2 courses) must focus on literature before 1850.

3. Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional minor requirements.

4. Creative writing students must complete workshops in at least two genres. For the purposes of the Creative Writing Tracks, the four major genres are: Fiction; Poetry; Playwriting, Screenwriting, and/or Scriptwriting; and Creative Non-Fiction.

5. Two ENGL courses must be taken at the 500+ level per major requirements and at least one of the 500+ courses must be a creative writing course.

6. Choose at least one of the required ENGL 500+ level courses, as required by the major, from the list of approved ENGL courses for Goal 6 of the KU Core.

---

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Bachelor of Arts and Bachelor of General Studies in Literature, Language, and Writing**

**Why study English language and literature?**

Because reading and writing shape the world.

KU's English Department is at the core of the humanities, highlighting the "human" through our individual, one-on-one interactions with our students, our emphasis on community and global engagement, and our abiding interest in our shared humanity through the stories of others. We seek to challenge the mind and to engage the imagination of our students, to teach them to ask questions and to seek for answers. We encourage them to grapple with the complexity of a culturally and commercially interconnected world and the global networks and processes of cultural exchange. We believe that words and ideas will shape the world. We teach our students life-long skills, so that they learn to write clearly, creatively, and effectively—discovering themselves even as they lay a solid foundation for professional success.

**A commitment to teaching and learning.**

Our department is renowned for its tradition of excellence in teaching. The vast majority of our undergraduate classes have 20-35 students, and much of the class time is dedicated to active learning and engagement with texts and ideas. In the last ten years, faculty members in the department of English have won ten Kemper Fellowships for Excellence in Teaching, two Chancellors Club Teaching Professorships, a Career Achievement Teaching Award, and a wide variety of other university-level teaching and advising awards, and the department as a whole received the Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

**A variety of career and life paths.**

The Literature, Language, and Writing program at the Edwards campus helps to prepare undergraduate students for a variety of professions, including law, scholarship, publishing, library science, and marketing—as well as any number of other fields that value clear communication, interpretive skill, and critical and creative thinking.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.
Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.A. or B.G.S.

Literature, Language, and Writing Major

KU Edwards Campus

The undergraduate program in literature, language, and writing is offered in its entirety only at the KU Edwards Campus (http://edwardscampus.ku.edu), 12600 Quivira Rd., Overland Park, KS 66213. This program is designed for students who have earned an associate’s degree or equivalent hours and wish to complete the upper-level courses necessary for a bachelor’s degree.

Literature, Language, and Writing Program

The program includes professional writing courses. Internship opportunities may be pursued as credit toward the major, offering students the opportunity to develop communication skills in specific professional contexts.

In today’s rapidly changing work environment, employers are seeking people who can deal with concepts and abstractions, who are imaginative and creative, and who have good communication and people skills. A degree in English can help develop these skills, and it is good preparation for a variety of advanced professional degrees in areas such as business and law. English majors pursue a range of careers including editing, technical writing, advertising and public relations, teaching, market research, retail management, teaching English as a second language, nonprofit fund-raising and/or advocacy, Web design, speech writing, sales, video production, script reading, radio and television, and many others. Some career paths require an advanced degree or specialized post-graduate training, but an undergraduate degree in English is an excellent base from which to explore career options.

Contact the CLAS undergraduate advisor on the Edwards Campus, Dan Mueller, dmueller@ku.edu, 864-8659 (from Lawrence) or 913-897-8659 (outside of Lawrence) for more information.

Requirements for the B.A. or B.G.S. Major

Course Requirements

Literature, Language and Writing Core Knowledge and Skills (12)

Majors must complete a total of 4 courses (12 hours) satisfying the distribution indicated in each of the following 3 areas:

Literature Before 1900. Satisfied by two courses (6 hours) from the following:

<table>
<thead>
<tr>
<th>Course Code</th>

Writing or English Language Required Electives (9)

Majors must complete a total of 3 courses (9 hours) of writing and/or English language courses.

English Required Elective (9)

Majors must complete 3 courses (9 hours) of junior/senior level ENGL courses. Up to 6 credits combined of ENGL 494 (Research Internship) or ENGL 495 (Directed Study) may be applied as major electives; they may not count as English core equivalents. Up to 3 credit hours of ENGL 496 (Internship) or ENGL 497 (Service Learning Internship) can be applied as major elective credit. In addition, the following courses offered in other CLAS departments may be selected: HWC 304, HWC 308, HWC 312, FMS 373, FMS 773, THR 709.

Total Hours 30

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

A sample 4-year plan for the BA degree in Literature, Language, and Writing can be found here: Literature, Language and Writing (p. 1367), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Literature, Language, and Writing can be found using the left-side navigation.

Departmental Honors

To be admitted to the English Honors major program, an undergraduate student must have earned a 3.25 overall grade-point average, and a 3.5 grade-point average in English courses. The student should declare an English major, if enrolled in the College of Liberal Arts and Sciences, or an English concentration, if enrolled in the School of Business or the School of Education.

Honors English majors must complete at least 1 section of ENGL 598 Honors Proseminar: _____ and ENGL 599 Honors Essay. This requirement, in effect, adds 3 hours of capstone-level coursework to the student’s emphasis.

BA in Literature, Language & Writing

Below is a sample 4-year plan for students pursuing the BA in Literature, Language, & Writing. A 4-year plan for the BGS in Literature, Language, and Writing is coming soon. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

The Literature, Language & Writing major is only available to Edwards campus students.

---

The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3 Majors are required to complete two courses (6 hours) from courses that cover Literature Before 1900 (http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-literature/#requirementstext).

4 Major must complete 3 courses (9 hours) in writing and/or English language courses.

5 Majors must complete one course each in British and American Literature (http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-literature/#requirementstext).

6 Majors must complete 3 courses (9 hours) of junior/senior level ENGL courses. Up to 6 credits combined of ENGL 494 (Research Internship) or ENGL 495 (Directed Study) may be applied as major electives; they may not count as English core equivalents. Up to 3 credit hours of ENGL 496 (Internship) or ENGL 497 (Service Learning Internship) can be applied as major elective credit.

7 At least one major course must be taken at the 500+ level.

8 At least one major course should be chosen from the list of English courses approved to fulfill KU Core Goal 6 (http://kucore.ku.edu/courses).

Please Note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
A commitment to teaching and learning.

Our department is renowned for its tradition of excellence in teaching. The vast majority of our undergraduate classes have 20-35 students, and much of the class time is dedicated to active learning and engagement with texts and ideas. In the last ten years, faculty members in the department of English have won ten Kemper Fellowships for Excellence in Teaching, two Chancellors Club Teaching Professorships, a Career Achievement Teaching Award, and a wide variety of other university-level teaching and advising awards, and the department as a whole received the Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

A variety of career and life paths.

The English minor is an excellent complement to any major or professional degree. English students graduate to a variety of careers, including law, teaching, scholarship, publishing, library science, and journalism—as well as medicine, business, politics, design, and any number of other fields that value clear communication, interpretive skill, and critical and creative thinking.

Engaged and innovative scholarship.

KU’s English Department has several core strengths that cross tracks and periods, including Global and Cross-Cultural Approaches; Literature, Rhetoric, and Social Action; Diversity Studies; Language, Literature and Science; and Popular Expressive Forms.

At the KU English Department, students work closely with nationally-renowned writers and researchers. Our faculty have won national awards that recognize excellence in research, including grants from the National Endowment for the Humanities, the American Philosophical Society, and the Newberry Library, among others. English Department faculty members have also received major research funding from the University of Kansas, including the Hall Center for the Humanities Research fellowships and Keeler Intra-University Fellowships for interdisciplinary work. Undergraduate students can work one-on-one with faculty mentors in the Honors Program, McNair Scholars Program, and Dean’s Scholars Program.

Requirements for the Minor

The minor in English requires students to complete 18 hours of English coursework in one of two tracks: Regular or Creative Writing.

Requirements for the English Minor, Regular Track

18 hours, of which 12 hours must be selected from 4 of the following categories that comprise the common requirements of the English major, and of which at least 15 must be Jr/Sr hours. No more than 1 creative writing course may count for the regular track. ENGL 494, 495, 496, and 497 may not be applied to English minor requirements.

Categories:

1. Individual Authors or Movements
2. Literary Theory
3. English Language or Rhetoric
4. Transcultural Approaches to Language, Literature, or Writing
5. Writing
6. Forms and Genres
7. Literary History

For full course lists for each category, see the General Track of the English Major (http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-english/#Gen).

Requirements for the Creative Writing Track of the English Minor

18 hours, of which 12 hours must be creative writing workshops (see below) in at least two genres, and of which at least 15 must be jr/sr hours. For the purposes of the creative writing tracks of the major and minor, genres are 1) fiction; 2) poetry; 3) playwriting, screenwriting, and/or short storywriting; and 4) non-fiction. At least one workshop must be at the 500 level or above. ENGL 494, 495, 496, and 497 may not be applied to English minor requirements.

Creative Writing workshops:

ENGL 351 Fiction Writing I (3)
ENGL 352 Poetry Writing I (3)
ENGL 353 Screenwriting I (3)
ENGL 354 Playwriting I (3)
ENGL 355 Nonfiction Writing I (3)
ENGL 360 Advanced Composition: _____ (3)
ENGL 492 The London Review (3)
ENGL 551 Fiction Writing II (3)
ENGL 552 Poetry Writing II (3)
ENGL 553 Screenwriting II (3)
ENGL 554 Playwriting II (3)
ENGL 555 Nonfiction Writing II (3)
FMS 373 Intermediate Screenwriting (3)

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 12 hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the minor.

Minor Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/ Cumulative GPA Calculator.

Master of Arts in English

Why study English language and literature?

Because reading and writing shape the world.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

To be admitted to any of the department’s graduate degree tracks, a student must have a strong undergraduate record, particularly in the humanities. A grade-point average of at least 3.3 on a 4.0 scale normally is required. College courses should include at least 18 hours of junior/senior work in literature. Applicants are expected to have some familiarity with British and American literary history and the work of the major writers in English. Applicants for graduate work in literary studies and rhetoric-composition studies should be able to demonstrate, with writing samples, their ability to produce advanced analytical and interpretive scholarly writing. Candidates for admission must submit Graduate Record Examination scores in support of their applications. For complete admission information, see the English department website (http://english.ku.edu/graduate-admission).

All applicants must submit their graduate application online (http://graduate.ku.edu/prospective-students). All supplemental materials (transcripts, writing samples, letters of recommendation, etc.) may be attached electronically and submitted with the online application. Those who cannot submit supplemental materials electronically may mail them to the department:

The University of Kansas
Department of English
Graduate Applications
1445 Jayhawk Blvd., Room 3001
Lawrence, KS 66045-7594

Degree Requirements

Students in the B.A./M.A. program must complete all the requirements of the existing Bachelor's degree in English, 6 additional hours of 600-level or above coursework as pre-requisite to the M.A., and 24 hours of graduate-level M.A. coursework. All the course requirements of the regular M.A. (any of the M.A. tracks) are required for the B.A./M.A.

There are two significant differences from the regular M.A. that enable students to complete both a B.A. and M.A. in 5 years:

• Students begin taking 600-level or above coursework by their senior year.
• Students complete a portfolio requirement, to be evaluated by means of a final oral examination, in their last semester of graduate study. This requirement will be substituted in place of a thesis or text-based exam. The portfolio requirement is no less rigorous than the thesis or exam, but draws much more on previous work produced during the student’s graduate work. The portfolio involves written as well as oral components.

Students in the B.A./M.A. program can complete the required 6 hours of pre-requisite coursework and 24 hours of graduate credit coursework by taking 10 courses. These courses might be spread over their Senior and M.A. years, for example:

• 2 courses at 600 level or above during their Senior year, for 6 hours;
• 2 graduate courses during the Summer after their senior year for 6 hours, or one graduate course that summer for 3 hours and one the following summer.
• 3 graduate courses during the first semester of their M.A. year, for 9 hours;
• 2 graduate courses during the second semester of their M.A. year, for 6 hours;
• If students take fewer than 2 courses while an undergraduate or do not take a summer course, they might take 4 graduate courses in their final semesters of work toward the MA.

All B.A./M.A. students must complete:

English 897 Preparation for the MA Exam (3 hours). This course is completed during the last semester of their M.A. year, for which they prepare a portfolio of work from their graduate courses over which they will be examined.

M.A. Degree Requirements

While continuously enrolled, a student has a total of 7 years to complete the master’s degree; however, the expected time to degree is 2.5 to 3 years. The candidate’s program should be arranged in consultation with the director of graduate studies or a member of the departmental committee on graduate studies.

Students who elect to write a master’s thesis must enroll in ENGL 899. M.A. candidates in Options 1a, 1b, 2a and 2b must take at least 18 hours of their course work, in addition to ENGL 800, at the 700, 800, and 900 levels.

Option 1a—Literature

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. Exam option students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. Thesis option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours).

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Literary Studies: ordinarily 708, 709, 800, or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours (1 course) on Pedagogy: the 801-802 sequence (required for TAs), 780, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 1 course must be pre-1700; at least 1 must be 1700-1900; and at least 1 must be after 1900. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

5. Exam option (3 hours): the student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on a 30-item exam list of literary and / or theoretical texts, including at least 6 items from before 1700; at least 6 items from 1700-1900; and at least 6 items from 1900-present. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

6. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.

Option Ib—Literature and Literary Theory

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. Exam option students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. Thesis option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours).

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Literary Studies: ordinarily 708, 709, 800, or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours (1 course) on Pedagogy: the 801-802 sequence (required for TAs), 780, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 1 course must be pre-1700; at least 1 must be 1700-1900; and at least 1 must be after 1900. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

5. Exam option (3 hours): the student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on a 30-item exam list of literary and / or theoretical texts, including at least 6 items from before 1700; at least 6 items from 1700-1900; and at least 6 items from 1900-present. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

6. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.
(1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.

**Option 2a—Rhetoric and Composition**

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. Exam option students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. Thesis option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours).

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Rhetoric and Composition, ordinarily 780 (Composition Studies), or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours (1 course) on Pedagogy: the 801-802 sequence (required for TAs), 780, 781, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 6 hours in English Language Studies courses (including at least 1 seminar) beyond the courses used to fulfill requirements 2 (Methods and Theory) and 3 (Pedagogy).

5. 6 hours of elective courses

6. For students selecting the exam option, 6 hours in second exam area (rhetoric and composition, literature, literary theory), including at least 1 seminar.

7. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

8. Exam option (3 hours): The student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on 2 lists developed in consultation with advisors: a) a 15-item exam list of works in English Language Studies, and b) a 15-item exam list of works in a second area: literature, literary theory, or rhetoric and composition. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

9. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.

**Option 2b—English Language Studies**

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. Exam option students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. Thesis option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours).

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Rhetoric and Composition, ordinarily 780 (Composition Studies), or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours (1 course) on Pedagogy: the 801-802 sequence (required for TAs), 780, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours (6 courses) to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 6 hours in Rhetoric and Composition courses (including at least 1 seminar) beyond the courses used to fulfill requirements 2 (Methods and Theory) and 3 (Pedagogy).

5. 6 hours of elective courses

6. For students selecting the exam option, 6 hours in second exam area (rhetoric and composition specialty, English language studies, literature, literary theory), including at least 1 seminar.

7. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

8. Exam option (3 hours): The student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on 2 lists developed in consultation with advisors: a) a 15-item exam list of works in rhetoric and composition, and b) a 15-item exam list of works in a second area: literature, literary theory, English Language Studies, or specialty within rhetoric and composition. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

9. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.

**Master of Fine Arts in Creative Writing**

**Why study English language and literature?**

Because reading and writing shape the world.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

To be admitted to any of the department’s graduate degree tracks, a student must have a strong undergraduate record, particularly in the
humanities. Creative writing applicants need to submit writing samples that demonstrate an advanced level of writing skills in their respective genres. For complete admission information, see the English department website (http://english.ku.edu/graduate-admission).

All applicants must submit their graduate application online (http://graduate.ku.edu/prospective-students). All supplemental materials (transcripts, writing samples, letters of recommendation, etc.) may be attached electronically and submitted with the online application. Those who cannot submit supplemental materials electronically may mail them to the department:

The University of Kansas
Department of English
Graduate Applications
1445 Jayhawk Blvd., Room 3001
Lawrence, KS 66045-7594

Master of Fine Arts in Creative Writing
Degree Requirements

Requirements for the M.F.A. in Creative Writing (http://www2.ku.edu/~englishmfa) include

1. 4 graduate courses (12 hours) in literature, English or American.
2. 4 graduate courses (12 hours) in creative writing.
3. No more than 2 classes (6 hours) may be taken at the 600-level.
4. 7 to 9 hours in electives or practica, chosen from graduate courses in the Department of English, or approved courses in another department.
5. ENGL 899, Thesis (15 hours). Original writing in prose fiction, poetry, drama, or nonfiction prose.

Ph.D. in English Degree Requirements

Students entering the program with the B.A. have, while being continuously enrolled, 10 years to complete the M.A. and Ph.D. combined. Students entering with the M.A. have 7 years to complete the Ph.D.; however, the expected time to degree is 6-7 years for the M.A. plus Ph.D., and 4-5 years for the Ph.D.

Ph.D. Requirements: Literature and Creative Writing

1. At least 24 hours of credit in appropriate formal graduate courses beyond the M.A. or M.F.A. At least 15 hours (in addition to introduction to ENGL 800 if not taken for the M.A.) of this course work must be taken from among courses offered by the Department of English at the 700 level and above. ENGL 997 and ENGL 999 credits cannot be included among the 24 hours. Students may petition to take up to 6 hours outside the department.
2. Required courses: ENGL 800 and 2 seminars (courses numbered 900 or above) offered by the Department of English at KU beyond the M.A. ENGL 998 does not fulfill this requirement. Students with master's degrees earned elsewhere may be required by the director of graduate studies, acting on behalf of the graduate committee, to take additional course work.
3. A reading knowledge of 1 of the following languages: French, German, Greek, Hebrew, Italian, Japanese, Latin, Russian, Old English, or Spanish, and completion of the Responsible Scholarship and Research Skills requirement (usually fulfilled with ENGL 800).
4. ENGL 999, Dissertation (at least 12 hours).
5. A comprehensive examination, to be completed after satisfaction of formal course requirements. This examination, which has both written and oral components, consists of 3 areas of study.
6. In the semester following the comprehensive examination, a 90-minute review of the dissertation proposal, which is to provide formal direction for the dissertation.
7. At least 1 year of supervised quarter-time teaching for qualified candidates except for those who do not plan to undertake teaching careers or who have already had extensive teaching experience.
Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

**Ph.D. Requirements: Composition and Rhetoric, M.A. to Ph.D., standard track**

1. At least 24 hours of credit in appropriate formal graduate courses beyond the M.A. or M.F.A. At least 15 hours (in addition to introduction to ENGL 800 if not taken for the M.A.) of this course work must be taken from among courses offered by the Department of English at the 700 level and above. ENGL 997 and ENGL 999 credits cannot be included among the 24 hours. Students may petition to take up to 6 hours outside the department.

2. An introduction to the field: either ENGL 800 or ENGL 780.

3. 2 seminars (courses numbered 900 or above) offered by the Department of English at KU beyond the M.A., at least one of which should be in Rhetoric and Composition. ENGL 998 does not fulfill this requirement.

4. A reading knowledge of 1 of the following languages: French, German, Greek, Hebrew, Italian, Japanese, Latin, Russian, Old English, or Spanish, and completion of the Responsible Scholarship and Research Skills requirement (usually fulfilled with ENGL 800).

5. ENGL 999, Dissertation (at least 12 hours).

6. A comprehensive examination, to be completed after satisfaction of formal course requirements. This examination, which has both written and oral components, consists of three areas of study.

7. In the semester following the comprehensive examination, a 90-minute review of the dissertation proposal, which is to provide formal direction for the dissertation.

8. At least 1 year of supervised quarter-time teaching for qualified candidates except for those who do not plan to undertake teaching careers or who have already had extensive teaching experience.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

**Ph.D. Requirements: Composition and Rhetoric, B.A. to Ph.D. accelerated track**

Each student admitted to the Ph.D. program in composition and rhetoric is assigned a graduate advisor from among the faculty in composition and rhetoric, who will help the student plan an initial course of study. After the first semester, students may ask other faculty members in the field to serve as their graduate advisors, depending on availability. The students and their graduate advisors together design and monitor a coherent program of study, individualized to serve each student’s goals within current expectations for a Ph.D. in composition and rhetoric. As an interdisciplinary field, study in composition and rhetoric might involve work in other departments, programs, or schools as well as English, including, for example, communication studies, linguistics, education, psychology, American studies, women’s studies, or history.

Each student’s individualized program of study must meet the minimum requirements detailed below.

1. At least 36 hours of credit in appropriate formal graduate courses beyond the B.A. At least 30 hours of this course work must be taken from among courses offered at the 700 level and above. ENGL 997 and ENGL 999 credit hours cannot be included among the 36 hours.

2. Students in this specialization may take up to 12 hours outside the department without petition, with written approval by the students’ graduate advisors. Students may petition to take more hours outside the department, with the approval of their graduate advisors, and provided they can demonstrate how the courses fit within their programs of study.

3. A course on methods, theory, and professionalism: Either ENGL 800 Introduction to Graduate Study in English or ENGL 780 Composition Studies

4. A reading knowledge of one of the following languages: French, German, Greek, Hebrew, Italian, Japanese, Latin, Russian, Old English, or Spanish, and completion of the Responsible Scholarship and Research Skills requirement (usually fulfilled with ENGL 800).

5. At least 3 seminars (numbered 900 or above) offered by the Department of English at the University of Kansas, at least 2 of which should be in composition and rhetoric. ENGL 998 does not fulfill this requirement.

6. ENGL 999 Dissertation (at least 12 hours).

7. A comprehensive examination, to be completed after satisfaction of formal course requirements. This examination, which has both written and oral components, consists of 3 areas of study.

8. In the semester following the comprehensive examination, a 90-minute review of the dissertation proposal, which is to provide formal direction for the dissertation.

9. At least 1 year of supervised quarter-time teaching for qualified candidates except for those who do not plan to undertake teaching careers or who have already had extensive teaching experience.

10. A dissertation of substantial merit.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

**Environmental Studies Program**

**Why study environmental studies?**

The KU Environmental Studies Program provides a rigorous interdisciplinary education and stimulates exchange concerning the environment from natural science, social science, and humanities perspectives.

**Undergraduate Programs**

This interdisciplinary major gives students a fundamental knowledge of the human environment, the dimensions of human impact on the environment, and holistic approaches to solving problems resulting from this impact. The human environment includes all facets of human activity affecting the environment, such as philosophical and ethical issues, environmental resource use and misuse, population biology, and the chemistry of the atmosphere.

**Electives**

The goals of the program are
1. To provide a holistic view of the environment, one in which the synergistic nature of perturbations, natural and anthropogenic, can be understood and
2. To provide the technical and evaluative skills for active participation in an environmental career.

The environment is the central theme around which a liberal arts education is focused.

Students may declare an interest in environmental studies or a major in environmental studies by filling out the appropriate forms. CLAS Interest Code and Major Declaration forms are available from College Student Academic Services (http://clas.ku.edu/undergrad), 109 Strong Hall, or in the environmental studies office. Students are strongly encouraged to declare an environmental studies major as soon as possible.

Electives provide the opportunity to specialize, and these can be chosen by consulting the various pathways in the major (http://www.kumc.edu/school-of-medicine/pathology.html), which contain a list of faculty members associated with the pathway who are available to help decide on electives and environmental careers. An elective approval form must be submitted to 109 Strong Hall before a student is allowed to graduate. Forms may be obtained from the environmental studies office. Except for study abroad, a maximum of 8 hours of nonclassroom course work may be counted toward electives (e.g., internship or research).

**Exceptions and Substitutions**

All substitutions must be approved by a student's environmental studies faculty advisor. A student must submit a requirement substitution form to the environmental studies faculty advisor. Forms can be obtained from the environmental studies office.

**Internships**

Internships allow majors to develop new skills and test their abilities and educational backgrounds. Students can assess their career objectives in professional settings. Internships are done in city, county, state, and federal agencies and in environmental organizations and private companies or agencies. Students are encouraged to participate at the end of the sophomore or junior year. Completion of an internship by the end of the junior year provides an opportunity to make career changes and final elective selections before the senior year. It is not possible to participate in an internship after graduation. The applicant must have a grade-point average of 2.5 or above, must have completed 12 hours of required environmental studies courses, and must have a suitable internship opportunity. A maximum of 3 hours may be applied to the 12 hours of required electives.

**Professional Science Masters**

The Professional Science Masters professional graduate degree is designed for graduates of bachelor's programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

The P.S.M. degree is a unique professional degree grounded in natural science, technology, engineering, mathematics and/or computational sciences and designed to prepare students for direct entry into a variety of career options in industry, business, government, or non-profit organizations. P.S.M. programs prepare graduates for high-level careers in science that have a strong emphasis on such skill areas as management, policy, entrepreneurship, communication and project management. P.S.M. programs consist of 2 years of academic training in an emerging or interdisciplinary area, along with a professional component that may include internships and "cross-training" in workplace skills.

**Graduate Certificate in Environmental Studies**

The Graduate Certificate in Environmental Studies is designed to give students already admitted to a graduate program at KU the opportunity for interdisciplinary coursework in Environmental Studies, spanning the humanities, natural/physical sciences, and social sciences.

**Graduate Certificate in Environmental Assessment**

The Certificate in Environmental Assessment is designed for graduates of bachelor's programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

**Courses**

**EVRN 103. Environment and History. 3 Hours H.**

Nature is our oldest home and newest challenge. This course surveys the environmental history of the earth from the extinction of the dinosaurs to the present with a focus on the changing ecological role of humans. It analyzes cases of ecological stability, compares cultural attitudes toward nature, and asks why this ancient relationship seems so troubled. (Same as HIST 103.) LEC.

**EVRN 140. Global Environment I: The Discovery of Environmental Change. 5 Hours GE3N / U / LFE.**

This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as GEOG 140 and HIST 140.) LEC.

**EVRN 142. Global Environment II: The Ecology of Human Civilization. 5 Hours GE3S / U.**

This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature
and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as GEOG 142 and HIST 142.) LEC.

EVRN 144. Global Environment I: Discovery of Environmental Change, Honors. 5 Hours GE3N / U / LFE.
This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as GEOG 144 and HIST 144.) Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

EVRN 145. Global Environment II: The Ecology of Human Civilization, Honors. 5 Hours GE3S / U.
This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics will include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as GEOG 145 and HIST 145.) Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

EVRN 148. Scientific Principles of Environmental Studies. 3 Hours NB GE3N / N.
This course presents an overview of our understanding of environmental processes and issues. Topics include scientific principles, resource issues, pollution and global change, among others. This course gives students a rigorous understanding of interactions between humans and their environment and provides students with a scientific basis for making informed environmental decisions. (Same as GEOG 148.) LEC.

EVRN 149. Scientific Principles of Environmental Studies, Honors. 3 Hours NB GE3N / N / LFE.
This course presents an overview of our understanding of environmental processes and issues. Topics include scientific principles, resource issues, pollution and global change, among others. This course gives students a rigorous understanding of interactions between humans and their environment and provides students with a scientific basis for making informed environmental decisions. An honors section of EVRN 149, designed for superior students. (Same as GEOG 149.) Prerequisite: Membership in the University Honors Program or approval of instructor required. LEC.

EVRN 150. Environment, Culture and Society. 3 Hours SC GE3S / S.
An introduction to geographic approaches to the study of the environment, emphasizing societal and cultural factors that influence human interaction with the biosphere, hydrosphere, lithosphere and atmosphere. The course involves analysis of a broad range of contemporary environmental issues from the local to global scales. (Same as GEOG 150.) LEC.

EVRN 151. Environmental Ethics: A View From the National Parks. 3 Hours N.
To what extent are our National Parks protected from pollution, invasive species, mining, climate change and tourism? In this course students learn about the geologic processes that form our National Parks as well as the competing interests that stakeholders have on the land, through the application of specific case studies. (Same as GEOL 151.) LEC.

EVRN 170. Introduction to Kansas Landscapes. 1 Hour N.
A course focused on the land and environment of Kansas. Field trips provide students with direct experience of the diverse landscapes in our area. Coursework also emphasizes the dynamic nature of the current landscape and the natural and cultural processes that have shaped it. LEC.

EVRN 171. Understanding Kansas Landscapes. 1 Hour N.
An introduction to the research methods used by scholars in diverse fields, applied to environmental issues introduced in EVRN 170. Prerequisite: EVRN 170. LEC.

EVRN 172. Kansas Landscape Projects. 1 Hour N.
Students participate in the design and execution of a simple research project focused on a local environmental topic. Prerequisite: EVRN 170, and EVRN 171. LEC.

EVRN 177. First Year Seminar: _____: 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Environmental Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

EVRN 200. Study Abroad Topics In: _____: 1-6 Hours S.
This course is designed for the study of special topics in Environmental Studies. Coursework must be arranged through the Office of Study Abroad. May be repeated for credit if content varies. LEC.

EVRN 304. Environmental Conservation. 3 Hours GE3N / N.
A survey of current methods of describing and modeling the function, structure, and productivity of natural and anthropogenically modified earth resource systems, along with a discussion of contemporary views of what constitutes a natural landscape. Fundamental natural science principles about the interplay among lithospheric, atmospheric, hydroospheric, and biospheric components of earth systems are emphasized. Uses of natural resources, including fossil fuels, minerals, and water, are described with attention to the earth’s total energy budget. Human activities that affect preservation, conservation, and multiple uses of earth regions receive attention. Systems under stress through population and other contemporary forces serve as examples. (Same as GEOG 304.) LEC.

EVRN 320. Environmental Policy Analysis. 3 Hours N.
An historical and analytical study of the formulation, implementation, and consequences of environmental policy in the United States. Attention will be directed at relevant interest groups, issues specific to both rural and urban populations, relationships between national policies and international organizations concerned with environmental problems. Prerequisite: EVRN 148/GEOG 148; and EVRN 103/HIST 103, EVRN 347/HIST 347 or EVRN 150/GEOG 150. LEC.

EVRN 332. Environmental Law. 3 Hours U.
An introduction to how the American legal process improves, transforms, and damages the natural environment. Emphasizes and compares shifting responsibilities of legal forces and institutions: judges and litigants, legislators and statutes, agencies and administrations, and citizens and regulated entities. Prerequisite: EVRN 148 and EVRN 103/HIST 103, EVRN 347/HIST347 or EVRN 150/GEOG 150. LEC.
EVRN 335. Introduction to Soil Geography. 4 Hours N / LFE.
The course focuses on the properties and processes of soils as they occur in their environment. The student is introduced to the nature of soil as it functions as a body; genesis of soils; properties of soil solids, especially colloids; soil chemical composition, properties, and reactions; interaction between solid, liquid, and gaseous components in soils; plant-soil-water relationships; biological interactions with soil; classification of soils; and the distribution of soils on the landscape. Not open to students who have taken GEOG 535 or EVRN 535. (Same as GEOG 335.) Prerequisite: GEOG 104 or GEOL 101 or consent of instructor; BIOL 100 and CHEM 130 or CHEM 190 recommended. LEC.

EVRN 336. Ethics, Ideas and Nature. 3 Hours AE51 / H.
This course examines the ethical frameworks developed for thinking about, using, and protecting the natural world. Examples of topics include indigenous approaches to nature, the history of ecological ideas, environmental movements, the role of the state in managing resources, utilitarianism and progressivism, environmental lawmaking, wilderness advocacy, nature and theology, the rights of nature, and environmental justice. Students are introduced to the theories of duty ethics, justice ethics, utilitarianism, and rights ethics, and required to apply ethical decision making to contemporary and historical environmental issues. Multiple perspectives on the history of human interactions with nature demonstrate the importance of reflecting upon the value systems inherent in human-centered environmental ethics and nature-centered environmental ethics. (Same as HIST 336.) LEC.

EVRN 338. Permaculture Design. 6 Hours N.
Students learn how a local, sustainable design system known as permaculture design creates an ecologically sound and economically viable way of living. The course consists of lecture, field, and practicum sessions. Lecture topics include food security, permaculture ethics, ecological principles, system design, sustainable soils, food production, food forests, earth works, and construction of human habitats. LEC.

EVRN 347. Environmental History of North America. 3 Hours H.
A survey of changes in the landscape and in people's perceptions of the natural world from 1500 to present. Topics include agroecology, water and energy, the impact of capitalism, industrialism, urbanization, and such technologies as the automobile and the origins of conservation. (Same as HIST 347.) LEC.

EVRN 363. Introduction to Environmental Hydrology and Water Resources. 3 Hours N.
Water is vital to life on earth. In this course we cover components of the water or "hydrologic" cycle, how management has altered them, and how they are predicted to change with the changing climate. We discuss the evolution of water policy, its implications for managements and the economic impact of human perturbation on water. We study the physical processes that govern the water cycle, learn how they are measured, and estimate hydrologic fluxes. (Same as GEOG 363.) Prerequisite: GEOG 104 or GEOL 101 or GEOL 102. LEC.

EVRN 371. Environmental Geopolitics. 3 Hours S.
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as GEOG 371 and GIST 371.) LEC.

EVRN 385. Environmental Sociology. 3 Hours S.
This course invites students to study society and its impact on the environment. Environmental problems are social problems. This course will address such items as social paradigms, theories, inequalities, movements, and research. (Same as SOC 385.) LEC.

EVRN 410. Geospatial Analysis. 3 Hours N.
Focusses on applications of geospatial technologies to environmental issues using case study examples and data, and provide students with a foundational skill-set in geographic information systems, remote sensing, and GPS techniques. Prerequisite: EVRN/GEOG 148/149; EVRN/HIST 103, EVRN/GEOG 150 or EVRN/HIST 347. LEC.

EVRN 420. Topics in Environmental Studies: ______. 1-6 Hours N / LFE.
Courses on special topics in Environmental Science and/or Policy. These courses may be lecture, discussions, or readings. Students may enroll in more than one interest group but may enroll in a given interest group only once. LEC.

EVRN 425. Global Water Scarcity. 3 Hours S.
Though natural factors are introduced, this course focuses primarily on the human factors that contribute to global water scarcity. This course also discusses the consequences of water scarcity and its effects on society. Prerequisite: EVRN 148 or permission of instructor. LEC.

EVRN 433. Biogeography Field and Laboratory Techniques. 3 Hours N.
This course provides undergraduate students with practical experience in field data collection techniques and laboratory data analysis methods. During the first half of the semester, students work in the field using a variety of methods to measure such vegetation characteristics as: cover, density, biomass, leaf area, and canopy architecture. Students gain experience in the use of field instruments including a spectroradiometer, and techniques for quantifying biophysical attributes of vegetation. During the later part of the course, students learn to summarize their field data and examine relationships between the vegetation attributes and measurements made using remote sensing instruments. Recommended: GEOG 316 or an introductory statistics equivalent. (Same as GEOG 433.) FLD.

EVRN 460. Field Ecology. 3 Hours N / LFE.
An introduction to research methods for environmental science. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). It emphasizes the development of skills in data analysis and interpretation that are essential to a full understanding of environmental issues. Enrollment limited to environmental studies majors, or by instructor permission. Prerequisite: Junior or Senior standing, completion of the natural sciences requirement of the KU Core (GE3N), and either EVRN 320 or EVRN 332. FLD.

EVRN 490. Internship in Environmental Studies. 1-8 Hours AE61 / N.
Supervised practical experience in a specific environmental area of interest. The advisor will schedule regular meetings to evaluate progress and provide assistance. A written summary of the internship experience and evaluation will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Total credit may not exceed 8 hours. Prerequisite: Junior standing and consent of program director. Restricted to declared Environmental Studies majors. Restricted to students with a 2.5 overall GPA or above. INT.

EVRN 510. Advanced Environmental Applications in Geospatial Techniques. 3 Hours H/N.
This course focuses on applying advanced geospatial mapping and analysis techniques to "real-world" environmental issues. Course content may include lecture/lab time on advanced geospatial topics; a major class project, small-group projects, or individual projects; or half-semester internships with state agencies or campus entities that will culminate in an individual project. The specific nature of projects will be driven largely by student interest and ability, as well as agency center needs. Prerequisite: EVRN 410 or equivalent course; or permission of the instructor. LEC.
EVRN 519. Sociology of Global Food. 5 Hours U.
The Sociology of Global Food offers a critical examination of the global food system since the Industrial Revolution. Topics include the industrialization of agriculture, sustainable agriculture, and the role of food and agriculture in organizing society. This course discusses the emergence of current debates around food and agriculture including food activism, technological developments, human/environment relationships, and labor issues. There is a lab component to this course. (Same as SOC 519.) Prerequisite: Junior standing. LEC.

EVRN 526. Remote Sensing of the Environment I. 4 Hours N.
Introduction to study of the environment through air photos and satellite imagery, including principles of remote sensing, interactions of electromagnetic energy with the atmosphere and earth's surface, aerial photography, satellite systems, and sensors (electro-optical, thermal, and radar). Emphasis in the latter part of the course is on such applications as global monitoring, land cover mapping, forestry, agriculture, and oceanography. Laboratory emphasizes visual interpretation of aerial photography and satellite imagery and an introduction to digital image processing in the department's NASA Earth Science Remote Sensing Laboratory. (Same as GEOG 526.) Prerequisite: MATH 101 or equivalent. GEOG 538 recommended. LEC.

EVRN 528. Environmental Justice and Public Policy. 3 Hours S.
This course provides an overview of environmental justice, both as a social movement and as a public policy initiative. Environmental justice examines the distribution of environmental externalities across different socio-economic and racial groups. We will discuss several different public policy areas that have been impacted by the environmental justice movement: hazardous waste facility siting, urban redevelopment and Brownfields, transportation policy, and Native American sovereignty. We will also touch upon international environmental policy in an environmental justice context. Throughout the course we will evaluate empirical issues in studying environmental justice. (Same as POLS 528.) Prerequisite: POLS 306, or a statistics class, or consent of instructor. LEC.

EVRN 530. Biodiversity Discovery & Assessment. 2 Hours N.
An integrated lecture and laboratory course designed to provide an overview of modern methods in biodiversity exploration and discovery. Lectures cover the theory and practice of planning fieldwork in remote locations, documenting species and their natural history, how museum collections are made, calculating and comparing species richness estimates, and the process of describing and naming new species. The laboratory component provides students experience in documenting species and their natural history, processing and curating samples of natural history specimens, and the statistical analysis of biodiversity data. (Same as BIOL 530.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. LEC.

EVRN 531. Tropical Fieldwork in Biodiversity Discovery. 1 Hour U.
An introduction to modern field methods of assessing biodiversity. Fieldwork will employ insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. (Same as BIOL 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged. LAB.

EVRN 535. Soil Geography. 5 Hours N / LFE.
A broad study of the principles and properties of soils and their distribution on the landscape. Topics covered include: pedology, clay mineralogy, soil physics, soil chemistry, management of soils, soil biology, taxonomy, and soil geomorphology. Laboratory section and a field project are required. Not open to students who have taken GEOG 335 or EVRN 335. (Same as GEOG 535.) Prerequisite: GEOG 104 or GEOL 101 or consent of the instructor; BIOL 100 and CHEM 130 or CHEM 190 recommended. LEC.

EVRN 538. Soil Chemistry. 3 Hours N / LFE.
This course examines the chemical properties and processes of soils and methods of evaluation. Topics include solid and solution speciation, mineral solubility, soil colloidal behavior, ion exchange, surface complexation, soil salinity and sodicity, soil acidity, oxidation-reduction reactions, and kinetics of soil chemical processes. (Same as GEOG 538.) Prerequisite: GEOG 335 or GEOG 535 or EVRN 335 or EVRN 535, CHEM 135 or CHEM 195, MATH 125, or consent of the instructor. LEC.

EVRN 540. Ecohydrology. 3 Hours N.
Ecohydrology is the discipline that answers real world hydrologic and biologic questions through integrating knowledge from hydrology, ecology, atmospheric science and biogeochemistry. We focus on the key concepts, methodological approaches and analytical techniques utilized in ecohydrology to understand and quantify: plant water use, evolution of hydrologic properties, groundwater-surface water interactions, controls on landscape patterns, spatial and temporal patterns of soil moisture and nutrient concentrations, and vegetation competition. Students should leave the class having developed critical skills in: 1) reviewing scientific literature, 2) collecting environmental samples, 3) analyzing ecohydrologic data, 4) writing a scientific research paper, 5) working collaboratively and independently. (Same as GEOG 540.) Prerequisite: GEOG 104 or GEOL 101 or GEOL 102, or EVRN 363 or GEOG 336 or permission of instructor. LEC.

EVRN 542. Ethnobotany. 3 Hours S.
Course will involve lectures and discussion of Ethnobotany - the mutual relationship between plants and traditional people. Research from both the field of anthropology and botany will be incorporated in this course to study the cultural significance of plant materials. The course has 7 main areas of focus: 1) Methods in Ethnobotanical Study; 2) Traditional Botanical Knowledge - knowledge systems, ethnolinguistics; 3) Edible and Medicinal Plants of North America (focus on North American Indians); 4) Traditional Phytochemistry - how traditional people made use of chemical substances; 5) Understanding Traditional Plant Use and Management; 6) Applied Ethnobotany; 7) Ethnobotany in Sustainable Development (focus on medicinal plant exploration by pharmaceutical companies in Latin America). (Same as ANTH 582.) Prerequisite: ANTH 104, ANTH 108, EVRN 148, or consent of instructor. LEC.

EVRN 550. Environmental Economics. 3 Hours U.
This course provides an overview of the theory and empirical practice of economic analysis as it applies to environmental issues. Topics include externalities (a type of market failure), the valuation of nonmarket goods, the practice of benefit-cost analysis, and the efficiency and cost effectiveness of pollution control policies. Most importantly, the course permits students to perform economic field research, using state-of-the-art techniques in a manner accessible to undergraduate students. (Same as ECON 550.) Prerequisite: ECON 104, ECON 140, or ECON 142. LEC.

EVRN 553. Comparative Environmental Politics. 3 Hours S.
This course compares environmental politics and policies across a number of countries, including those in North America, Western Europe, East Asia, and Latin America. (Same as POLS 553.) LEC.

EVRN 562. United States Environmental History in the 20th Century. 3 Hours H.
Americans dramatically changed the natural world between 1900 and 2000. This course asks how transformed environments shaped the American experience during a century of technological innovation, democratic renewal, economic expansion, global conflict, and cultural pluralism. Topics include food and markets, energy and transportation, law and politics, protest and resistance, suburbanization, and
environmentalism's fate in a global information era. (Same as HIST 562.) LEC.

EV RN 563. U.S. Environmental Thought in the 20th Century. 3 Hours H.
Explores both leading and dissident ideas that Americans have had about the natural world since 1900. Broad chronological periods are explored in some depth, including the Progressive Era, New Deal, Cold War, the Sixties, and the Reagan Eighties. The course uses articles and books, as well as visual and aural forms of communication. Commercial speech, as well as scholarly and literary works, are considered. (Same as HIST 563.) Prerequisite: EV RN 148 or HIST 129, or by permission of instructor. LEC.

EV RN 611. Water Quality, Land Use, and Watershed Ecosystems. 3 Hours N.
Water quality issues are integrated with land use planning and the development of watershed management strategies. Interrelationships among the hydrologic cycle, atmospheric deposition, nutrient transformations and pesticide use are examined in regards to stream, lake, and groundwater quality. Prerequisite: CHEM 110 or CHEM 130 and BIOL 414, or consent of instructor. LEC.

EV RN 615. Capstone Project. 3 Hours AE61 / N.
The capstone project provides students with a broad-based, interdisciplinary educational experience and allows them to integrate and synthesize the knowledge they have gained in their environmental studies major. It rejoin the cohort that has separately pursued the BA/BGS and BS tracks and places them in situations in which they address real world environmental issues with a team approach and produce professionally meaningful analytical reports. Prerequisite: Junior standing; EVRN 320, EVRN 332, and EVRN 460. Restricted to declared Environmental Studies majors. LEC.

EV RN 616. Environmental Impact Assessment. 3 Hours N.
This course provides an overview of environmental laws and regulations. Additional focus is given to the process described in the National Environmental Policy Act (NEPA). Students will learn when NEPA is triggered, the difference between Environmental Impact Statements (EIS) and Environmental Assessments (EIA), and how to write an EIS/EIA. Prerequisite: An introductory course in environmental law, or consent of instructor. LEC.

EV RN 620. Environmental Politics and Policy. 3 Hours S.
Analysis of environmental politics and the formulation and implementation of environmental policy. Examines the history and development of environmental politics as well as current trends. Themes include interest groups, business interests, political institutions, and specific environmental policy issues. (Same as POLS 624.) LEC.

EV RN 624. Independent Study. 1-9 Hours AE61 / N.
A research course, in any of the fields of environmental studies, consisting of either experimental research, original policy analysis, or the preparation of an extensive paper based on library investigation. Project topic to be agreed upon in advance with supervising faculty member. Prerequisite: Consent of instructor. IND.

EV RN 625. Honors Research in Environmental Studies. 3 Hours AE61 / N.
A course giving eligible majors the opportunity to earn Departmental Honors by engaging in an intensive program of study leading to an original piece of research. Prerequisite: Senior standing, approval of the Environmental Studies Program, the Honors Project Director, and an overall 3.25 cumulative grade point average during the semester of enrollment. Restricted to declared Environmental Studies majors. IND.

EV RN 628. The Politics of Public Health. 3 Hours S.
This course examines the social, institutional and political context of public health policy in the United States. We will examine factors that shape the nation's public health, explore the role of government in reducing risk and promoting well being, and analyze the major institutions responsible for monitoring, protecting and promoting general public health. Themes include the social determinants of health, health disparities, emerging infectious diseases, food safety, transportation, and environmental health. (Same as POLS 628.) Prerequisite: POLS 110 and POLS 306 are recommended. LEC.

EV RN 635. Soil Physics. 3 Hours N.
Provides theoretical and practical foundations for understanding physical properties and processes of variably-saturated porous media. Focus is on the transport, retention, and transformation of water, heat, gas, and solutes through the soil. We examine modern vadose zone measurement methods, analytical tools, and numerical models for data collection and interpretation. (Same as GEOG 635.) Prerequisite: GEOG 335 or EVRN 335; or GEOG 535 or EVRN 535, and MATH 125, PHSX 114; or consent of instructor. LEC.

EV RN 636. Globalization and Environment. 3 Hours.
The focus is on the sociological facets of global environmental problems (e.g., climate change, biodiversity, fresh water problems, toxic waste; invasive species) and especially their relationship to globalization, growth, and what environmental sociologists have called the "human exemptionalist model." We address global environmental problems, political divisions over them, environmental movements and justice, and adaptation and mitigation strategies. The sociological literature on these issues and different environmental social theories are discussed (e.g., ecological modernization, treadmill theory, metabolic rift). Special attention is given to the impact of globalization and expansion of the global economy relative to the biosphere and consequent spikes in the consumption of resources and production waste. (Same as SOC 635.) Prerequisite: SOC 104 or EVRN 103 or EVRN 140 or permission of the instructor. LEC.

EV RN 656. Ecosystem Ecology. 3 Hours N.
An introduction to the patterns and processes that affect terrestrial ecosystems. Emphasis is placed on understanding nutrient cycles (e.g., carbon nitrogen phosphorous), hydrologic cycles, and patterns of net primary productivity. The role of both natural and anthropogenic disturbances in structuring terrestrial ecosystems is examined in the context of global land-use patterns. Discussion of current research literature will be expected. (Same as BIOL 656.) Prerequisite: BIOL 414 and CHEM 130. LEC.

EV RN 700. The Anthropocene: Interdisciplinary Perspectives on Environmental Change. 3 Hours.
Have human activities become so pervasive that we have initiated a unique human epoch of earth history? This introductory, interdisciplinary graduate seminar will explore this question while examining the ways that different disciplines approach the understanding of environmental change, its impact on natural and human systems, and how these understandings have changed over time. SEM.

EV RN 701. Climate Change, Ecological Change and Social Change. 3 Hours.
This interdisciplinary graduate seminar examines the history of climate change from natural and physical science, social science, and humanities perspectives. The class explores the ways that different disciplines approach understanding climate change and its impact on natural and human systems and how these understandings have changed over time. The course is team-taught by faculty from the natural and physical sciences, social sciences, humanities, and professional schools, and
EVRN 702. Energy, Ecology and Community in Kansas. 3 Hours.
This interdisciplinary graduate seminar examines the role of climate in shaping energy, ecology, and community in Kansas from natural and physical science, social science, and/or humanities perspectives. The class will combine lectures, group projects, and field research to understand the ways that climate change and energy production are reshaping the human and natural systems in Kansas and the Great Plains. The course is team-taught by faculty from the natural and physical science, social science, humanities and professional schools, and will include faculty guest speakers from KU and off-campus. LEC.

EVRN 720. Topics in Environmental Studies: _____, 1-6 Hours.
Courses on special topics in Environmental Studies. These courses may be lecture, seminars, or readings. Students may enroll in more than one interest group but may enroll in a given interest group only once. LEC.

EVRN 721. Environmental Regulation and Policy. 3 Hours.
This course provides a survey of the environmental regulations, environmental problems, and environmental solutions that must be dealt with by environmental scientists in agencies and industry. Considers both theoretical and practical/applied aspects of environmental practices. LEC.

EVRN 730. Environmental Toxicology. 3 Hours.
Examines the effects of toxic chemicals on individuals, populations, communities and ecosystems. Topics include major classes of pollutants, movement, distribution and fate of pollutants in the environment, mechanisms of action, toxicity testing, and environmental assessment. LEC.

EVRN 740. Soil Science for Environmental Assessment. 3 Hours.
Provides students with a solid understanding of soils in the environment, particularly as it relates to environmental assessment. Topics include soil geomorphology, soil physics/chemistry/biology, management of soils, and soil contaminants. Prerequisite: CHEM 130 or CHEM 190 recommended or consent of the instructor. LEC.

EVRN 745. Environmental Data Analysis and Statistics. 3 Hours.
Survey of common statistical methods for analyzing environmental data. Includes techniques for environmental monitoring, impact assessment, and site reclamation, as well as methods for handling censored data, time series, and spatial analysis. Sampling design, data interpretation, and presentation of statistical results will be emphasized. Prior coursework or practical experience in statistics is expected. Prerequisite: Permission of instructor. LEC.

EVRN 750. Environmental Air Quality Assessment. 3 Hours.
Addresses scientific, regulatory, and technical aspects of air quality monitoring, including pollutant formation and dispersion, pollution control, national emissions standards, and methods for monitoring pollutants and air quality. Prerequisite: CHEM 130 or CHEM 190 recommended or consent of the instructor. LEC.

EVRN 771. Project Management for Science Managers. 2 Hours.
Students will learn to use current project planning tools to develop project plans that aid in bringing a project to completion on time and within budget. They will demonstrate the ability to manage projects within a science organization. LEC.

EVRN 772. Organizational Management for Science Managers. 2 Hours.
Explores concepts and practices in leadership, organizational behavior and change management. Emphasis is placed on understanding dynamics of individuals and groups in organizational structures focused on research and innovation. Students will tackle organizational culture, management approaches, performance-building, and creativity and innovation management in science organizations. LEC.

EVRN 773. Management of People in Science Organizations. 2 Hours.
Explores the duties and responsibilities of a scientist placed in a supervisor/manager role. Addresses management of scientists and technicians as part of an integrated team, conflict management, recruitment and interviewing, professional development of employees, performance management, and an overview of human resources law and compliance. LEC.

EVRN 774. Financial Management in Science Organizations. 2 Hours.
The goal of this course is to gain an understanding of finance, budget, and accounting in a science organization. The student will learn how to interpret and understand basic financial statements; how to make good decisions based on them; learn essential accounting concepts and characteristics of accounting systems; and budgeting/forecasting in a science-based organization. LEC.

EVRN 775. Organizational Communication for Science Managers. 2 Hours.
Addresses challenges and approaches of communicating science concepts and results to technical and non-technical as well as internal and external audiences. Focuses on techniques to improve the effectiveness of written and oral communication, including technical writing of project and research proposals, scientific presentations, and effective workplace communications. LEC.

EVRN 776. Law, Ethics, and Intellectual Property for Science Managers. 2 Hours.
This course provides an overview of basic patent law, the patent process, patent interpretation (claims and prior art) and intellectual property law in science. It addresses elements of employment and business law for managers, regulatory standards, and codes of conduct/professional standards/ethics in a science organization. LEC.

EVRN 815. Professional Science Masters Capstone. 1-3 Hours.
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that includes an industry member. Students will develop an applied workforce project in the student’s place of employment for full time employees or an internship for full time students. The students will document their project in a written report and present their project to the Environmental Studies faculty (2), and the student's employer or representative if practical. Prerequisite: Minimum 20 credit hours completed in program. LEC.

EVRN 915. Capstone. 3 Hours.
The goal of this research seminar is to discuss individual students' research, culminating in the completion of a paper in Environmental Studies for presentation at a professional meeting and/or publication in a professional journal. SEM.
Bachelor of Arts and Bachelor of General Studies in Environmental Studies

Why study environmental studies?
The KU Environmental Studies Program provides a rigorous interdisciplinary education and stimulates exchange concerning the environment from natural science, social science, and humanities perspectives.

Requirements for the B.A. or B.G.S. Major

Environmental Studies Introduction to Science and Culture (16-18)
Majors must complete both of the following:

- Global Environment I: The Discovery of Environmental Change. Satisfied by:
  - EVRN 140 Global Environment I: The Discovery of Environmental Change
  - or EVRN 144 Global Environment I: Discovery of Environmental Change, Honors

- Global Environment II: The Ecology of Civilization. Satisfied by:
  - EVRN 142 Global Environment II: The Ecology of Human Civilization
  - or EVRN 145 Global Environment II: The Ecology of Human Civilization, Honors

Research Methods. Satisfied by one of the following: 3-4
- UBPL 538 Environmental Planning Techniques
- ECON/EVRN 550 Environmental Economics
- EVRN/GEOG 433 Biogeography Field and Laboratory Techniques
- EVRN 410 Geospatial Analysis
- EVRN 510 Advanced Environmental Applications in Geospatial Techniques
- GEOG 351 Environmental Geology
- GEOG 510 Human Factors

Statistics. Satisfied by one of the following: 3-4
- MATH 365 Elementary Statistics
- GEOG 316 Methods of Analyzing Geographical Data
- BIOL 570 Introduction to Biostatistics

Environmental Studies Core Knowledge and Skills (12)
Majors must complete a course in each of the following areas:
- Environmental Policy Analysis. Satisfied by:
  - EVRN 320 Environmental Policy Analysis 3
- Environmental Law. Satisfied by:
  - EVRN 332 Environmental Law 3
- Field Ecology. Satisfied by:
  - EVRN 460 Field Ecology 3
- Capstone Experience. Satisfied by:
  - EVRN 615 Capstone Project 3

Majors must select an option or design their own. Self-designed emphases must be approved in their entirety by an environmental studies advisor and the undergraduate studies director before implementation. Each option requires 4 courses at the 300+ level.

Major Hours & Major GPA
While completing all required courses, majors also must meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 40 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

A sample 4-year plan for the BA degree in Environmental Studies can be found here: Environmental Studies (p. 1381), or by using the left-side navigation.

Sample 4-year plans for the BGS degree and BS degree in Environmental Studies can be found using the left-side navigation.

Departmental Honors
To graduate with honors in environmental studies, an undergraduate must maintain a minimum overall grade-point average of 3.25 and 3.5 in the major. The student must also complete an individual honors research project in cooperation with a faculty mentor. This project normally represents 2 semesters of original work, the completion of 3 credit hours of EVRN 624 Independent Study, and 3 credit hours of EVRN 625 Honors Research in Environmental Studies. All 6 hours may be applied to the 12 hours of environmental studies electives required for the major. Upon completion of the research project, honors candidates are required to present the results of their work at the department’s Undergraduate Research Colloquium.

BA in Environmental Studies
Below is a sample 4-year plan for students pursuing the BA in Environmental Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. The BA degree requires an additional Quantitative Reasoning course with MATH 101 as a pre-requisite. MATH 365 fulfills this requirement as do the courses on this website (http://college.ku.edu/undergrad/curriculum/ba_QR). BIOL 570 and GEOG 316 do not, and will require another Quantitative Reasoning course to fulfill the BA degree requirements.
3. EVRN 332 and EVRN 460 are fall only courses; EVRN 320 is a spring only course.
4. A total of 12 hours of EVRN 300+ electives are required for the major. Students are encouraged to choose courses based on an emphasis area in consultation with an advisor.
5. Research Methods can be fulfilled by UBPL 538, ECON/EVRN 550, EVRN/GEOG 433, EVRN 410, EVRN 510, GEOL 351, or GEOG 510.
Bachelor of Science in Environmental Studies

Why study environmental studies?

The KU Environmental Studies Program provides a rigorous interdisciplinary education and stimulates exchange concerning the environment from natural science, social science, and humanities perspectives.

Requirements for the B.S. Degree

General Education Requirements

In addition to degree and major requirements, all students must complete the KU Core.

Environmental Studies Prerequisite or Co-requisite Knowledge

Mathematics (0)

Majors must complete the following:
- Calculus. Satisfied by one of the following:
  - MATH 115 Calculus I
  - MATH 116 and Calculus II
  - MATH 121 Calculus I

Statistics. Satisfied by one of the following:
- MATH 365 Elementary Statistics
- GEOG 316 Methods of Analyzing Geographical Data
- BIOL 570 Introduction to Biostatistics

Supporting Laboratory Science (0)

Majors must complete one of the following:
- Principles of Physical Geography and Intro Lab to in Physical Geography. Satisfied by:
  - GEOG 104 Principles of Physical Geography & GEOG 105 and Introductory Laboratory in Physical Geography

- Introduction to Geology, Honors and Geological Fundamentals Laboratory. Satisfied by:
  - GEOL 102 The Way The Earth Works, Honors & GEOL 103 and Geology Fundamentals Laboratory

- Introduction to Geology and Geological Fundamentals Laboratory. Satisfied by:
  - GEOL 101 The Way The Earth Works & GEOL 103 and Geology Fundamentals Laboratory

Biology and Ecology (0)

Majors must complete the following:
- Principles of Molecular and Cellular Biology. Satisfied by:
  - BIOL 150 Principles of Molecular and Cellular Biology
  - or BIOL 151 Principles of Molecular and Cellular Biology, Honors

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal.
Principles of Organismal Biology. Satisfied by:
BIOL 152 Principles of Organismal Biology
or BIOL 153 Principles of Organismal Biology, Honors

Principles of Ecology. Satisfied by:
BIOL 414 Principles of Ecology

Chemistry (0)
Majors must complete the following:

Foundations of Chemistry I. Satisfied by:
CHEM 130 General Chemistry I
or CHEM 190 Foundations of Chemistry I, Honors

Foundations of Chemistry II. Satisfied by:
CHEM 135 General Chemistry II
or CHEM 195 Foundations of Chemistry II, Honors

Environmental Studies Core Requirements

Environmental Studies Introduction to Science and Culture (10)
Majors must complete both of the following:

Global Environment I: The Discovery of Environmental Change. Satisfied by one of the following:
EVRN 140 Global Environment I: The Discovery of Environmental Change
or EVRN 144 Global Environment I: Discovery of Environmental Change, Honors

Global Environment II: The Ecology of Civilization. Satisfied by one of the following:
EVRN 142 Global Environment II: The Ecology of Human Civilization
or EVRN 145 Global Environment II: The Ecology of Human Civilization, Honors

Environmental Studies Core Knowledge and Skills (12)
Majors must complete a course in each of the following areas:

Environmental Policy Analysis. Satisfied by:
EVRN 320 Environmental Policy Analysis

Environmental Law. Satisfied by:
EVRN 332 Environmental Law

Field Ecology. Satisfied by:
EVRN 460 Field Ecology

Capstone Experience. Satisfied by:
EVRN 615 Capstone Project

Environmental Studies Required Electives/Options (0)
Majors must select an option or design their own. Self-designed emphases must be approved in their entirety by an environmental studies advisor and the undergraduate studies director before implementation. Each option requires 4 courses at the 300+ level.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 32 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Below is a sample 4-year plan for students pursuing the BS in Environmental Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

Environmental Assessment, Graduate Certificate in

Industries ranging from architecture, engineering and public policy require continued professional education for a variety of roles. The environmental assessment certificate provides certified specialization that professionals in these fields can add to existing credentials.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (http://graduate.ku.edu/application-process) for admission into the certificate program and submit an application fee along with the following materials:

- A Statement of Interest in the environmental assessment certificate program. This 1-2 page narrative should summarize your education, employment history, your long-term career goals, and how this certificate will help you achieve these goals.
- Official undergraduate transcript.
- A letter of recommendation from someone familiar with your academic work or qualified to offer judgment on your ability to undertake graduate-level work (former professor of instructor, workplace supervisor).
- A Statement of Interest in the environmental assessment certificate program and its relationship to your graduate course of study.
- An unofficial copy of your KU transcript.
- A letter of support from your graduate degree program (your advisor or graduate director).

Current KU graduate students wishing to enroll in the Graduate Certificate in Environmental Assessment program will apply through the Graduate School. A student must be in good standing with their graduate degree program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Graduate School. A student must be in good standing with their graduate degree program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Graduate School. A student must be in good standing with their graduate degree program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Graduate School. A student must be in good standing with their graduate degree program in order to participate in the certificate program.

Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies online catalog. Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Departmental Honors

To graduate with honors in environmental studies, an undergraduate must maintain a minimum overall grade-point average of 3.25 and 3.5 in the major. The student must also complete an individual honors research project in cooperation with a faculty mentor. This project normally represents 2 semesters of original work, the completion of 3 credit hours of EVRN 624 Independent Study, and 3 credit hours of EVRN 625 Honors Research in Environmental Studies. All 6 hours may be applied to the 12 hours of environmental studies electives required for the major. Upon completion of the research project, honors candidates are required to present the results of their work at the department’s Undergraduate Research Colloquium.

Certificate Requirements

The Certificate in Environmental Assessment is designed for graduates of bachelor’s programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils,
water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

**Environmental Studies, Graduate Certificate in**

The Graduate Certificate in Environmental Studies is designed to give students already admitted to a graduate program at KU the opportunity for interdisciplinary coursework in Environmental Studies, spanning the humanities, natural/physical sciences, and social sciences.

Thanks to the generous support of the late Ruben Zadigan, a limited number of scholarships are available for students enrolled in the certificate program. Applications for entering the certificate program are automatically reviewed for scholarship funding.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Prospective students must complete an application to Graduate Studies (http://graduate.ku.edu/application-process) for admission into the certificate program and submit an application fee along with the following materials:

To submit an application, proceed to http://www.graduate.ku.edu/01-04_apply.shtml and search for the Graduate Certificate in Environmental Studies and submit required materials.

Applicants must include a cover letter to the Environmental Studies Graduate Director explaining their interest in the certificate and how interdisciplinary training in Environmental Studies helps meet individual goals in research and training. A graduate GPA of 3.0 or higher is required, but provisional admittance can be granted for one semester to new graduate students.

The student's advisor must also write a letter of recommendation and the student must complete the coursework planning form (pdf) (http://esp.ku.edu/sites/esp.drupal.ku.edu/files/docs/EVRN%20Grad%20Cert%20Coursework%20Plan.pdf) and return it to the Environmental Studies Program office (252 Snow).

Submit your graduate application online (http://www.graduate.ku.edu).

**Scholarships**

Thanks to the generous support of the late Ruben Zadigan, a limited number of scholarships are available for students enrolled in the certificate program. Applications for entering the certificate program are automatically reviewed for scholarship funding.

**Science Management, Graduate Certificate in**

Completion of all six courses in the proposed curriculum with a grade of "B" or better in each of the six courses:

On January 15th, 2015, the KU-Edwards campus convened over 25 scientists, managers, executives, and human resources specialist from regional science-oriented companies and agencies in a Science Manager Curriculum Development Workshop. At this workshop, the general objectives of and needs were presented to the group, and facilitated small-group discussions were used to elicit from the participants the ideal skillset for a scientist-manager and the curriculum for a science manager program. Based on discussions with managers and scientist at companies and agencies, focus groups, and surveys, we have crafted a 12-credit-hour, 6-course curriculum designed to address the need for professional skills by science professionals.

**12 credit hours:**

**EVREN 771**: Project Management for Science Managers (2.0)

**EVREN 772**: Organizational Management for Science Managers (2.0)
EVRN 773: Management of People in Science Organizations (2.0)
EVRN 774: Financial Management in Science Organizations (2.0)
EVRN 775: Organizational Communication for Science Managers (2.0)
EVRN 776: Law, Ethics, and Intellectual Property for Science Managers (2.0)

Minor in Environmental Studies

Why study environmental studies?
The KU Environmental Studies Program provides a rigorous interdisciplinary education and stimulates exchange concerning the environment from natural science, social science, and humanities perspectives.

Requirements for the Minor

Environmental Studies Minor Core (15-20)

Principal of Environmental Studies. Satisfied by 1 of the following options:

- 3-5 hours

Global Environment I. Satisfied by one of the following:

- EVRN 140 Global Environment I: The Discovery of Environmental Change
- or EVRN 144 Global Environment I: Discovery of Environmental Change, Honors

Scientific Principles of Environmental Studies. Satisfied by one of the following:

- EVRN/GEOG 148 Scientific Principles of Environmental Studies
- or EVRN/GEOG 149 Scientific Principles of Environmental Studies, Honors

Environmental History and Culture. Satisfied by 1 of the following options:

- 3-5 hours

Global Environment II. Satisfied by one of the following:

- EVRN 142 Global Environment II: The Ecology of Human Civilization
- or EVRN 145 Global Environment II: The Ecology of Human Civilization, Honors

Environment and History. Satisfied by:

- EVRN/HIST 103 Environment and History
- Environment, Culture, and Society. Satisfied by:
- EVRN/GEOG 150 Environment, Culture and Society
- Environmental History of North America. Satisfied by:
- EVRN/HIST 347 Environmental History of North America
- Environmental Policy Analysis. Satisfied by:
- EVRN 320 Environmental Policy Analysis
- Environmental Law. Satisfied by:
- EVRN 332 Environmental Law
- Research Methods. Satisfied by 1 of the following options:
- 3-4 hours
- Geospatial Analysis. Satisfied by:
- EVRN 410 Geospatial Analysis

Field Ecology. Satisfied by:

EVRN 460 Field Ecology
- Environmental Economics. Satisfied by:
- ECON/EVRN 550 Environmental Economics
- Principles of Geographic Information Systems. Satisfied by:
- GEOG 358 Principles of Geographic Information Systems
- Biogeography Field and Laboratory Techniques. Satisfied by:
- EVRN/GEOG 433 Biogeography Field and Laboratory Techniques
- Environmental Planning Techniques. Satisfied by:
- UBPL 538 Environmental Planning Techniques
- Environmental Geology. Satisfied by:
- GEO 351 Environmental Geology

Environmental Studies elective at the Junior/Senior Level. Satisfied by 1 additional EVRN course at the Junior/Senior Level (300+).

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

- Minor Hours: Satisfied by 18 hours of major courses.
- Minor Hours in Residence: Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the major.
- Minor Junior/Senior Hours: Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.
- Minor Graduation GPA: Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Professional Science Masters in Environmental Assessment

The Professional Science Masters professional graduate degree is designed for graduates of bachelor’s programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

The Professional Science Master’s (PSM) is a relatively new interdisciplinary graduate degree that combines advanced coursework in science with a set of professional skills courses (project management, technical writing/communications, financial management), and a capstone/internship experience.
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Entering students are expected to have a B.S. degree in geography or in related physical science, earth science, mathematics, or engineering disciplines. Applicants should have a minimum Grade Point Average (GPA) of 3.0 on a 4.0 scale. Applicants with a GPA of less than 3.0 may be considered for admission on a probationary or provisional status. Entering students will be expected to have studied quantitative methods. Graduate Record Examination scores (verbal, quantitative and analytical) are required of all applicants.

The admissions requirements for the Professional Science Masters with a concentration in Environmental Assessment are as follows:

1. A 3.0 or higher grade point average (on a 4.0 scale)
2. GRE scores on the verbal and quantitative sections if G.P.A. is below 3.0.
3. Bachelor’s degree from an accredited institution
4. Submission of a letter of interest and at least two letters of recommendation
5. The student must have an undergraduate background of at least 20 semester hours in the natural and applied sciences
6. International students must also meet the English proficiency, visa/I20, and financial support requirements

All PSMs must include a core of business, communication, and project management skills.

Accelerated Professional Science Masters-Environmental Assessment

The Professional Science Masters professional graduate degree is designed for graduates of bachelor’s programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

The Professional Science Master’s (PSM) is a relatively new interdisciplinary graduate degree that combines advanced coursework in science with a set of professional skills courses (project management, technical writing/communications, financial management), and a capstone/internship experience.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Application Deadlines for FAST-TRACK:

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (http://catalog.ku.edu/graduate-studies) section of the online catalog.

Early Conditional Admission to the 4+1 Fast Track:

Students apply to the Environmental Studies Program in the spring of their junior year for permission to start the 4+1 track. However, acceptance
to the track does not guarantee acceptance to the PSM-Environmental Assessment graduate program the following year.

Requirements for Early Conditional Admission (Spring semester, Junior Year):

• All requirements for a B.S. degree in Environmental Studies from KU complete or in progress;

• Two letters of recommendation from faculty qualified to judge the student’s preparation for, and potential to successfully complete, the 4+1 accelerated track; at least one of the letters must be from an EVRN faculty member;

• Major and cumulative GPA of at least 3.2;

• Statement of interest that succinctly summarizes the students’ interests, education, their long-term career goals, and how the accelerated degree program will help them achieve those goals.

In spring of their senior year, a student on the 4+1 track must formally apply to the PSM-Environmental Assessment graduate program via the Graduate Studies website.

Requirements for Admission into the PSM-Environmental Assessment Graduate Program via the 4+1 Track

(Spring semester, Senior Year):

• In addition to the requirements listed above, students must have attained a grade of “B” or better in the graduate courses taken for elective undergraduate credit during the summer and/or fall to be considered for admission to Graduate Studies and continuation to the PSM-Environmental Assessment graduate degree program.

The University of Kansas

• In addition to the requirements listed above, students must have attained a grade of “B” or better in the graduate courses taken for elective undergraduate credit during the summer and/or fall to be considered for admission to Graduate Studies and continuation to the PSM-Environmental Assessment graduate degree program.

Degree Requirements:

The KU Environmental Studies accelerated undergraduate-graduate degree track allows qualified EVRN B.S. students to graduate in 5 years with a Professional Science Masters in Environmental Assessment. The fast-track M.A. provides excellent KU undergraduates in Environmental Studies an opportunity to complete an MA in Professional Science Masters-Environmental Assessment within a year of completing the bachelor’s degree.

1. Upon acceptance by the Program to the 4+1 track, the student will meet with the PSM-EA Program Director, the PSM Graduate Advisor, and the Undergraduate Advisor for Environmental Studies to plan the final year of undergraduate courses, graduate courses to be taken for elective undergraduate credit, and outline the schedule of courses.

2. Prior to applying for graduate admission in the final spring semester of undergraduate study (Year 4), the student will meet with the PSM-EA Program Director, the PSM Graduate Advisor, and the Undergraduate Advisor for Environmental Studies together to review the student’s performance in the PSM-EA graduate courses taken for elective undergraduate credit during the summer and/or fall. A grade of “B” or better must be attained in these courses to continue in the track.

3. Following completion and award of the undergraduate degree (end of Spring Semester Year 4), the admitted student will again meet with the PSM-EA Program Director and the PSM Graduate Advisor to review the courses taken in the final year of undergraduate studies and review/update the course plan for the fifth year of study. The student’s performance in the graduate courses taken for elective undergraduate credit will be evaluated. To continue in the track, students must earn a combined minimum GPA of 3.5 in the 9 credit hours of undergraduate courses.

4. If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in courses for graduate credit toward the PSM-EA degree until the baccalaureate degree has been conferred.

Students must complete all requirements for the PSM-EA 4+1 within 1 year post-bachelor’s. If a student does not complete the requirements within 1 year post-bachelor’s, or is at any time determined to be ineligible to continue on the accelerated track, the student may petition the program for admission to the standard 33-hour PSM-EA degree track. Upon acceptance, students will be expected to either 1) repeat for graduate credit PSM coursework taken only for undergraduate credit, or 2) take additional elective coursework to complete the 33 hours. Specific coursework requirements in each case will be by agreement with the adviser.

Total minimum credit hours required (9 of these credit hours will be completed for undergraduate credit) is 33 hours.
Varies. LEC.

European Studies Program

Why study European studies?

Because European studies broaden, deepen, and strengthen through interdisciplinary study a student’s knowledge and understanding of the enduring importance of our transatlantic partners, the Europeans.

Undergraduate Programs

The degree in European Studies is available as a co-major in conjunction with a bachelor’s degree major in another academic discipline. Students take advantage of this option by combining the co-major with modern European languages & literatures, History, Philosophy, or Global & International Studies, for example. The co-major also can be combined with a bachelor’s degree in a professional school, such as business or journalism. The European Studies co-major provides students with a solid foundation in the cultures, politics, languages, and history of Europe in preparation for graduate studies and/or careers in a wide variety of international fields. Studying with KU faculty in the broader disciplines such as social sciences, humanities, the arts, and business will enable students to increase their awareness and understanding of Europe’s past, present, and future and its significant role in our increasingly globalized world. The program offers personalized advising, interdisciplinary flexibility, diverse course offerings, opportunities to conduct research, frequent co-curricular activities, and many options for studying and completing internships abroad.

Courses

EURS 177. First Year Seminar: ____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in European Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

EURS 302. European Culture and Society 1945 to Present. 3 Hours HT AE42 / H.
The course provides historical, cultural, and political overviews of Europe since 1945 with particular emphasis on the contribution of French and Italian culture and society. The course emphasizes Europe’s contribution to Western intellectual thought, social movements, arts and literature, and global society. (Same as HWC 302.) LEC.

EURS 329. History of War and Peace. 3 Hours HL / H.
A study of the changing nature of warfare and the struggle to bring about peace. Topics include pacifism, the “military revolution” that created the first professional armies; the development of diplomatic immunity, truces, and international law; the peace settlements of Westphalia, Utrecht, Vienna, Versailles, San Francisco; the creation of peace movements and peace prizes; the evolution of total war, civil war; and guerrilla warfare involving civilians in the twentieth century; the history of the League of Nations and United Nations; and the rise of intergovernmental and non-governmental organizations. (Same as HWC 329.) LEC.

EURS 430. European Civilization in World Context: ____. 3 Hours HL AE42/GE3H / H.
An introduction to the literature of encounter between European and non-European civilizations, drawing on both Western and non-Western sources. The course may include European interactions with areas such as the Mediterranean Basin, Sub-saharan Africa, South and East Asia, and the Americas. World areas and historical periods chosen for study will vary from semester to semester according to the interest and field of the instructor. Not open to freshmen. (Same as HWC 430.) Prerequisite: HWC 114 or HWC 204 and HWC 115 or HWC 205. LEC.

EURS 435. Islam in Europe. 3 Hours AE42 / H.
Investigation of Muslim migration into Europe and day-to-day interactions of Muslims with other European populations. This is an integrated study of historical, political, religious and economic influences that determine Muslim experience in contemporary European culture. (Same as HWC 435.) LEC.

EURS 500. Seminar in European Studies. 3 Hours AE42/AE61 / H.
Provides an interdisciplinary approach to the study of modern European civilization. By discussing both classic and contemporary, controversial readings each week and writing several papers during the semester, students acquire an understanding of the development of modern European culture and society and Europe's contemporary problems. Topics for discussions and papers are drawn from the following subjects: the economic and political integration of European states; modernism and anti-modernism in European culture; imperialism, migration, and ethnic and racial division in European society; democracy versus dictatorship; American-European relations; mass culture, urban development, and the welfare state; and contrasts and comparisons between European Cultures--East and West, North and South. Seminar discussions are led by invited European Studies faculty as well as the instructor or instructors.
Required of all European Studies majors. Prerequisite: Junior standing or consent of instructor. LEC.

EURS 501. Senior Thesis in European Studies. 3 Hours AE61 / H.
European Studies majors will do research and write a substantial paper on a topic in the culture, economy, history, or politics of Europe. Topics will be approved by the European Studies Committee. Students will work with an advisor chosen from among the European Studies faculty and with the European Studies Coordinator. The majority of the students’ work will be done independently with their advisors, but students will meet with the European Studies Coordinator several times as a class to report on their progress and present their final drafts. Required of all European Studies majors. Prerequisite: Completion of EURS 500 and 15 hours toward the Co-Major. IND.

EURS 502. Senior Honors Thesis in European Studies. 3 Hours AE61 / H.
Open to European Studies majors doing their senior thesis for Honors. Prerequisite: Completion of EURS 500, 15 hours toward the Co-Major, and approval of Honors thesis by European Studies Committee. Completion of or concurrent enrollment in EURS 501. IND.

EURS 503. Europe Today. 3 Hours S.
This intensive, interdisciplinary seminar focuses on current social, political, and economic changes in Europe. Topics include European integration and the European Union, the conflict between nationalism and European consciousness, NATO and U.S.-European relations, and international business in Europe. The seminar will include guest lectures from an international array of scholars, political officials, and business representatives, as well as site visits to their institutions and companies. The seminar takes place in Brussels, Belgium, and enrollment is restricted to students accepted in the KU Summer Institute for European Studies study abroad program. LEC.

EURS 505. Studies in Exile Literature. 3 Hours H.
A multidisciplinary study of selected literary, scholarly, and creative works produced by those Europeans forced into exile, emphasizing their impact on culture and society both in Europe and in those countries in which the exiles resided. Examples: exile during the Nazi dictatorship in Germany (1933-1945), during Cold War crises (Berlin 1960, Prague 1968). LEC.

EURS 506. Culture and Politics of the Cold War in Western Europe. 3 Hours H.
An interdisciplinary overview of the Cold War period (1945-1985) focusing on Western European dimensions of the problem, based on the view that the Cold War structured political institutions, cultures, and societies in enduring ways that continue to be relevant today. LEC.

EURS 507. Research in European Collections. 1-3 Hours H.
This course allows students in the European Studies Co-Major and related disciplines to receive credit for research related to European Collections in one or more of the following institutions: Watson and Spencer Research Libraries, the Doyle Institute, the Eisenhower and Truman Presidential Libraries, the U.S. Army Combined Arms Research and Foreign Military Studies Office at Fort Leavenworth, the Linda Hall Library in Kansas City, and the Winston Churchill Collection at the Westminster College Library in Fulton, Missouri. May be taken in place of EURS 501 by European Studies Honors Students if taken for three credit hours. Permission of instructor necessary. IND.

EURS 508. Politics and Economics of Cultural Production in Western Europe. 3 Hours H.
Artists and intellectuals in their relation to state and society. This course is designed to introduce students (1) to the role European artists and intellectuals have often played in the arena of politics and (2) to the privileged place cultural production (arts, literature, media) occupies in the formation of various European identities and economies. LEC.

EURS 509. Introduction to the Study of Southern European Societies. 3 Hours H.
Social, historical, and economic study of Southern European societies with emphasis on modern period. Relevant to the study of European integration and EU enlargement. Consideration of the distinctive southern Mediterranean societies from the perspective of their collective identity as a regional economic and geopolitical bloc. LEC.

EURS 510. Scandinavian Life and Civilization. 3 Hours H.
This course is designed to impart a general knowledge of life in Denmark, Finland, Iceland, Norway, and Sweden with emphasis on social and cultural conditions, against a geographical and historical background, from the Viking Age to the present. Slides and other illustrated materials. (Same as SCAN 570.) LEC.

EURS 511. Topics in European Studies: ______. 3 Hours H.
A study of significant themes, movements, or problems in European history, literature, politics, society, or culture. May also relate European issues to issues in other world areas (Africa, North America, Asia, etc.) May be repeated for credit when topic varies. LEC.

EURS 512. Irish Literature and Culture: ______. 3 Hours H.
Study of topics in Irish literature and culture. Topics may focus on a particular genre, theme, historical period, or group of authors. May be repeated for credit as the topic changes. (Same as ENGL 530.) Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

EURS 536. Economic Issues of the European Union. 3 Hours S.
A survey of the economies of the European Union, with a focus on the economic development of the member states since World War II, and an examination of the various economic issues confronting them today. (Same as ECON 536) Prerequisite: ECON 104 or ECON 144. LEC.

EURS 550. Classics of Peace Literature. 3 Hours H.
A study of influential proposals for world peace from Erasmus’ The Complaint of Peace (1516) to the 1995 Hague Appeal for World Peace. Selected writings by such authors as Erasmus, Hugo Grotius, Jean-Jacques Rousseau, Immanuel Kant, Henry Thoreau, Henri Dunant, Berthe von Suttner, Woodrow Wilson, Mahatma Gandhi, and Martin Luther King, Jr., are considered. (Same as PCS 550.) Prerequisite: HWC 204 or HWC 205. LEC.

EURS 565. The Literature of Human Rights. 3 Hours H.
Examines in literature, art, and film from about 1800 to the present, both sides of the ongoing debate surrounding the idea that all human persons possess inalienable rights because all persons possess intrinsic value as persons, value independent of race, gender, caste or class, wealth, age, sexual preference, etc. Anti- and pro-rights proponents are paired and studied with equal care. (Same as PCS 565.) LEC.

EURS 580. Directed Study. 1-3 Hours AE61 / H.
Independent study and directed reading on special topics. Permission of the instructor who will supervise the student’s work is required. LEC.

EURS 581. Discussion Section in French. 1 Hour U.
The 1 credit hour course represents a foreign language discussion section to be attached to a major 3-credit hour EURS course (example: EURS 500). Foreign language discussion sections are an integral part of the KULAC program envisaged to reinforce foreign language proficiency. LEC.

EURS 582. Discussion Section in German. 1 Hour U.
The 1 credit hour course represents a foreign language discussion section to be attached to a major 3-credit hour EURS course (example: EURS
Courses

FARS 110. Elementary Farsi I. 5 Hours U / F1.
Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Five hours of class per week. LEC.

FARS 120. Elementary Farsi II. 5 Hours / F2.
Continuation of FARS 110. Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Five hours of class per week. Prerequisite: FARS 110 or departmental permission. LEC.

A continuation of FARS 120. Course emphasizes oral and written work in Farsi. Systematic review of grammar and introduction to reading in cultural texts. Prerequisite: FARS 120 or departmental permission. LEC.

FARS 220. Intermediate Farsi II. 3 Hours U / F4.
A continuation of FARS 210. Course emphasizes oral and written work in Farsi. Systematic review of grammar and introduction to reading in cultural texts. Prerequisite: FARS 210 or departmental permission. LEC.

FARS 310. Advanced Farsi I. 3 Hours U / FP.
Enhancement of speaking, comprehension, reading and writing abilities in Farsi. Readings from Farsi literature introduced. Prerequisite: FARS 220 or placement exam that establishes a level of proficiency in Farsi suited to Advanced Farsi I. LEC.

FARS 320. Advanced Farsi II. 3 Hours U / FP.
Enhancement of speaking, comprehension, reading and writing abilities in Farsi. Readings from Farsi literature introduced. Prerequisite: FARS 310 or placement exam that establishes a level of proficiency in Farsi suited to Advanced Farsi II. LEC.

FARS 593. Directed Study in Persian Culture and Literature: ______. 1-3 Hours U / FP.
This course is designed for students seeking proficiency in Farsi beyond FARS 320. The instructor directs the student through readings and materials in Farsi that add to the student's substantive knowledge of Iran and culture in the Farsi language. May be taken multiple semesters for credit with varying content. Prerequisite: FARS 320 and consent of instructor. LEC.

GIST 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Global International Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

GIST 201. Topics in: ______. 1-3 Hours U.
An interdisciplinary study of international topics. Designed especially for freshmen and sophomores. May be repeated for credit if content varies. LEC.

GIST 202. Topics in South Asian Studies: ______. 1-3 Hours U.
An interdisciplinary study of topics related to South Asia. Designed especially for freshmen and sophomores. May be repeated for credit if content varies. LEC.

GIST 203. Topics in Middle Eastern Studies: ______. 1-3 Hours U.
An interdisciplinary study of topics related to the Middle East. Designed especially for freshmen and sophomores. May be repeated for credit if content varies. LEC.

GIST 215. A Global History of Money: Aristotle to Bitcoin. 3 Hours H.
What is money? What does it enable, and why do we value it? Is money always the same thing? What are the relationships between money and wealth? Through examining how people across the world and over time used money and answered these questions, this course is an introduction to the global history of money in its myriad forms: gold coins, silver ingots, bonds, debts, cowry shells, and bricks of tea. It approaches money as a point of entry into themes in political, cultural, intellectual, and social history. As such, it is not a course in economic or business history, but a historical examination of how money has transformed our world. We read and view a wide range of secondary and primary sources, ranging from images of money itself to recent works by anthropologists, historians, and economists. (Same as HIST 215.) LEC.

GIST 250. Introduction to Globalization. 3 Hours S.
Along with an overview of the origins and historical development of globalization, the course addresses various aspects of the growth of transnational economic, cultural, institutional, and political interconnections, including the implications of rapidly-developing information technology and social media, international security in a transnational world, and the issues related to the movement of goods, people (immigration), images, ideas, and institutional forms across national borders. LEC.

GIST 301. Introduction to Global and International Studies. 3 Hours GE11 / S.
This course provides an overview to the major ways and themes involved in the study of world cultures, politics, and societies as applied by disciplines in the social sciences. Topics such as the construction and maintenance of cultures, comparative political systems, global and regional economies, popular culture, gender and the environment will be covered through their manifestations in particular regional and global contexts. LEC.

GIST 305. World Indigenous Literatures. 3 Hours NW / H.
A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as ENGL
305/ISP 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**GIST 308. Key Themes in Modern Global History. 3 Hours H.**  
A comparative historical analysis of major global developments from the late 15th century to the present. Some of the themes likely to be explored are empire-building, contact between cultures and colonial social relations; the attraction of cities, their role in a global economy and the shift to an urban world; and the impact of capitalism and industrialization on social organization including conflict between classes and changes in the nature of work. Students learn ways of interpreting primary historical documents and comparing historical investigations across time and space. (Same as HIST 308.) LEC.

**GIST 314. Globalization: History and Theory. 3 Hours H.**  
Explores the rise of global capitalism in the 19th and 20th centuries, contemporary debates about 21st century globalization, and the role of globalization in our everyday lives. Questions considered included: Is globalization an incremental process that has been going on for centuries, or is it a dramatic new force reshaping the post-Cold War world? Is it a cultural and social process or an economic and political one? Or is it all of these things? Not open to students who have completed HIST 315. (Same as HIST 314.) LEC.

**GIST 320. Love, Sex and Marriage in India. 3 Hours H.**  
This course addresses diverse aspects of the philosophies and expressions of intimacy and pleasure as found in India. Using old and new literature, including from the Kamasutra, as well as media, we examine the following: how and why in ancient times sensual pleasure was another path for ultimate bliss; how perspectives and traditions of intimacy have changed over time; diverse types of marriages; the culture and practice of arranged marriages; same-sex intimacy; and universal concepts of love. LEC.

**GIST 325. Peoples and Cultures of South Asia. 3 Hours S.**  
This course provides an introduction to the diversity of peoples in South Asia, including India, Pakistan, Nepal, Bangladesh and Bhutan. The particular cultures and language of the indigenous peoples in the region are highlighted through academic sources and the direct study of reproductions of these cultures in literature and film. LEC.

**GIST 350. Study Abroad Topics in: ____. 1-5 Hours U.**  
This course is designed for the study of special topics in global and international studies at the junior/senior level. Course work must be arranged through the KU Office of Study Abroad and approved by a faculty adviser in Global and International Studies. May be repeated for credit if content varies. LEC.

**GIST 354. Globalization: A Geographic Approach. 3 Hours S.**  
This course is designed to provide a broad overview of some major facets of the historical, economic, political, cultural, and geographical dimensions of contemporary globalization, the process by which individual regions and nations have become progressively linked to, and structured by, the world-system of states and markets, and the cultural contradictions associated with this process. (Same as GEOG 354.) LEC.

**GIST 371. Environmental Geopolitics. 3 Hours S.**  
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as EVRN 371 and GEOG 371.) LEC.

**GIST 376. Immigrants, Refugees, and Diasporas. 3 Hours H.**  
This course looks at people who choose to cross political borders, are forced to flee beyond them, or constitute ethnic minorities living outside a homeland. Examining these groups from a global historical perspective, this course explores how ethical debates about the rights of non-citizens and ethnic outsiders have evolved in the modern age. Students learn about important issues that have affected the lives of immigrants, refugees, and diasporas, including citizenship, mobility, cultural representation, asylum policies, and the concept of human rights. The course concludes with a look at contemporary manifestations of these issues, from debates over the place of Muslims in Europe to discussions about immigration policy in the United States. (Same as HIST 376.) LEC.

**GIST 424. Nationalism(s) in Turkey. 3 Hours S.**  
This course analyzes the major variations in nationalist paradigms existing in contemporary Turkey, including conservative nationalism, secular nationalism, religious (Islamic) nationalism, and Kurdish nationalism. Through the lens of seminal theories on the origins, development, and types of nationalism and the relevant historical background of the Turkish Republic, we explore how these competing visions of "the nation" and "homeland" have changed, fragmented and manifested themselves in everyday Turkish politics and society. LEC.

**GIST 493. Directed Readings. 3 Hours U.**  
Individual and supervised readings in a selected area of international studies. Course is repeatable with permission of the program director. LEC.

**GIST 495. Global Internship. 3 Hours U.**  
Semester-long internship with a business or organization located abroad or that provides a global or international working context for the interning student. A term paper is required. Prerequisite: Consent of instructor. INT.

**GIST 501. Topics in: ____. 1-3 Hours U.**  
An interdisciplinary study of international topics. Designed especially for juniors and seniors. May be repeated for credit if content varies. LEC.

**GIST 502. Advanced Topics in South Asian Studies: ____. 1-3 Hours U.**  
An interdisciplinary study of topics related to South Asia. May be repeated for credit if content varies. Prerequisite depends on specific topic offered. LEC.

**GIST 503. Advanced Topics in Middle East Studies: ____. 3 Hours U.**  
An interdisciplinary study of topics related to the Middle East. May be repeated for credit if content depends on specific topic offered. LEC.

**GIST 530. Politics and Society in the Contemporary Persianate World. 3 Hours S.**  
This course examines the major currents of political developments and their linkages with religion, culture and civil society in Turkey, Iran, Afghanistan, Pakistan and India since the late nineteenth century. During the "pre-modern" period, all these countries formed part of "the Persianate world," a region that extended from the Iranian plateau to the Balkans, Central Asia and the Indian subcontinent, mostly under the Turkic administrations, and tied together by trade, Islam, and Persian as the lingua franca. The dissemination of modern Western political thought and nationalism during the colonial period led to nation-states and the end of the linguistic domination of Persian in the region. Though each of these nation-states ultimately took a different trajectory, they each were faced with similar challenges that offer the basis for interesting comparisons between them. This course explores the trajectories of these countries in regard to the relations between the state, religion, and politics, various strands of nationalism, pluralism, religious and ethnic minorities, social equality, and democratization. Prerequisite: GIST 301 or POLS 150. LEC.
GIST 535. Literature and Society in the Contemporary Middle East. 3 Hours H.
This course offers a general introduction to the modern Middle Eastern literatures in English translation. Through analyses of selected short stories and novels from Arabic, Turkish and Persian literature, the students develop an understanding of the issues that shape everyday life in the Contemporary Middle East. The course investigates issues of nation and national identity, war, ethnicity, class, religion, and gender and sexuality. We use a variety of paradigms, namely nationalist, Marxist, feminist, and Islamist, to provide a theoretical framework for discussion of the selected works. No prior knowledge of Arabic, Turkish or Persian language is needed. Prerequisite: GIST 301. LEC.

GIST 550. Issues in Global Studies: ____. 3 Hours U.
An interdisciplinary study of topics with particular emphasis on issues of global importance—i.e. transnational and trans-regional. May be repeated for credit if content varies. Prerequisite: GIST 301. LEC.

GIST 601. Indigenous Peoples of the World. 3 Hours S.
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GEOG 601 and ISP 601.) Prerequisite: Permission of instructor. LEC.

GIST 610. Interdisciplinary Methods for Global Contexts. 3 Hours S.
An introduction to a variety of widely-employed quantitative and qualitative research methods in the social sciences and humanities, including methods such as statistical analysis, ethnography, and content analysis. LEC.

GIST 624. Social Movements in the Middle East. 3 Hours S.
Using the major theories and approaches comparatively applied to social movements around the world, this course critically analyzes historical and existing cases of social movements and "nonmovements" in the Middle East. We cover examples of Islamist (and post-Islamist), women's, nationalist, democratic, youth and labor movements and their impact on the region. Contextual factors like technology and social networking, regime type, institutions, and socioeconomic structures are also considered for their role in supporting or inhibiting collective action. Prerequisite: GIST 301 or POLS 150. LEC.

GIST 667. Islam and Politics. 3 Hours S.
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as compatibility of political Islam and democratic politics, political economy in Muslim societies, fundamentalism in Islam, gender relations, identity politics and questions on clash of civilizations are explored. (Same as POLS 667 and SOC 640.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor. LEC.

GIST 684. International Law: The State and the Individual. 3 Hours S.
International law has assumed an increasingly significant role in international life. This course examines major issues in international law including (but not limited to): the changing status and role of the state; rights of minorities and self-determination; the environment; and human rights. The course examines the central questions and the relevant international legal principles associated with each issue. Prerequisite: POLS 170. LEC.

GIST 685. International Law: Laws of Armed Conflict. 3 Hours S.
This course examines the principles, roles, and functions of international law in the conduct of war. As the course reviews the development and application of the basic rules of armed conflict, several current issues and conflicts are addressed including: the legitimate use of force; the proper definitions of combatants and civilians; actions that constitute war crimes, the legality of new weapons technology, and, if the laws of armed conflict apply to the current "war on terrorism." Prerequisite: POLS 170. LEC.

GIST 696. Diplomacy Lab. 1 Hour S.
This course is a supplemental research lab designed to partner with a jr/ sr level course offering this research lab option and an innovative program implemented by the US Department of State. Students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer. This one-credit hour course is intended to function as a special lab project and must be taken in conjunction with a standard course that has a diplomacy lab option. Prerequisite: GIST 301, POLS 150 or POLS 170. GIST undergraduate majors must have also taken GIST 610 or GIST 697. LEC.

GIST 697. Research and Diplomacy Lab. 1-3 Hours S.
This course is designed to provide students with basic tools and an understanding of interdisciplinary social science research and to simultaneously partner with an innovative program implemented by the US Department of State. While learning about the research process and research design, students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer with whom they have contact through videoconferencing throughout the semester. The team engages in extensive and systematic research to address the problem and presents their finding in a formal report presented to the State Department in the desired format. Prerequisite: GIST 301. LEC.

GIST 698. Capstone Seminar. 3 Hours AE61 / H.
A seminar designed to introduce students to the theory and practice of global and international studies. A research paper will be required. May not be repeated for credit. Prerequisite: 12 hours of junior/senior level and above courses that satisfy requirements for the major. LEC.

GIST 699. Capstone Seminar, Honors. 3 Hours AE61 / H.
A seminar designed to introduce honors students to the theory and practice of global and international studies. A research paper will be required. May not be repeated for credit. Prerequisite: 12 hours of junior/ senior level and above courses that satisfy requirements for the major. LEC.

GIST 701. Approaches to International Studies. 3 Hours.
This course examines various approaches to the study of cultures, politics, and societies in their global and international contexts through the exploration of a series of exemplary works of global/international research from a variety of disciplines (eg. anthropology, sociology, political science, economics, geography, history, etc.). The course will cover the major contributions of these disciplines in their approaches to global questions and themes and will provide a multi-disciplinary framework within which students can begin exploring their own global and international research questions. The course also provides an introduction to the major regions and many of the themes that students will be able to specialize in during the course of the MA program. LEC.

GIST 702. Globalization. 3 Hours.
A central issue in international studies is globalization, the increasing interconnectedness of societies and economies. This course examines globalization from an historical and contemporary perspective. Major topics include (but are not necessarily limited to) the historical expansion of the West since 1500, the growth of international economic institutions,
conflict among global cultures, the future of state sovereignty, and the challenges of economic integration. LEC.

GIST 703. The World Economy. 3 Hours.
An introduction to international trade and finance, theories of economic development, and international economic structures. Not appropriate for economics majors. LEC.

GIST 704. Global Cultures and Societies. 3 Hours.
Examination of the components of culture, economic and political anthropology, major global cultural areas, and the impact of cultural differences as expressed through language, literature, religion, thought, and motivation in cross-cultural communications. LEC.

GIST 705. Globalization in History. 3 Hours.
A study of the increasing interaction among world societies since 1500 and an investigation of the long-term developments behind current world problems. Major topics include Western expansion since 1500, the spread of state sovereignty, the formation of a world economy, and the spread of international institutions. Current issues will vary, but may include environmental crises, human rights, migration, free trade and the spread of consumer culture, ethnicity and nationalism, and international intervention within states. (Same as HIST 705.) LEC.

GIST 706. Comparative Governments. 3 Hours.
Survey of different governmental structures in the contemporary world and the ways these countries have confronted issues such as modernization and development, economic security, ethnic pluralism and conflict, and globalization. LEC.

GIST 708. Comparative Research Methods for Global Contexts. 1-3 Hours.
This course guides new graduate students through the process of designing and developing an original research project. The fundamentals of interdisciplinary research will be the instructional framework within which students will design their own original research project. Instruction regarding the review of literature, methodology, and how to structure and scale the project will be given. Students taking this course will be required to take the companion course, GIST 810. RSH.

GIST 710. Interdisciplinary Research Methods for Global Contexts. 3 Hours.
This course addresses the challenges for students engaged in research in an interdisciplinary and international context. The course will take issues for research and place them within the structure of a research design process, including formulation of a general question, the appropriation of theory, the grounding of a literature review, and the positing of a testable research question and/or hypothesis. Students will also be exposed to research methodologies and how these manifest themselves through the logic of the disciplines—such as anthropology, sociology, geography, political science, history and literature. With a final thesis project design in mind, students will be expected to be expected to be able to utilize the research tools of accessing secondary analytical data, archival research, SPSS, ArcView and methods such as survey construction, implementation, and analysis, interviews, content analysis, discoures analysis, case study, and GIS. Prerequisite: GIST 701 or consent of instructor. LEC.

GIST 750. Topics in International Studies: ______. 3 Hours.
A study of one or more selected topics in international studies. Course may be taken more than once. LEC.

GIST 793. Directed Readings. 1-5 Hours.
Individual and supervised readings in a selected area of international studies. Course is repeatable with permission of the program director. LEC.

GIST 810. Graduate Writing Experience. 1-3 Hours.
This course guides students through the process of effectively communicating the findings of original research through formal writing. The purpose of the course is to provide writing guidance and instruction to students conducting ongoing research, so that they are familiar with successful ways of communicating research to academic and professional audiences. Depending on the career objectives of the student, the writing project will be tailored to address the relevant audience--academic or professional. The fundamental components of the research writing process will be individualized to correspond with student's research goals. Prerequisite: GIST 709. RSH.

GIST 888. Contemporary China Studies. 3 Hours.
This course will review and analyze the current literature on China's social and political development, including a wide range of topics within political science. There is a rich body of literature within each topic such as civil society in China, legal reform, political culture, nationalism, gender issues, ethnicity, political behavior, elections, economic development, and inequality. This course will introduce key literature within each topic focusing on the debates among China scholars as well as how these debates fit in the general field of political science. (Same as EALC 888 and POLS 888.) Prerequisite: POLS 688 or permission of the instructor. LEC.

GIST 897. Examination Preparation. 1 Hour.
Independent study in preparation for the Comprehensive M.A. examination. Graded on satisfactory/unsatisfactory basis. May be repeated. LEC.

GIST 898. Thesis Writing. 3 Hours.
This course guides MA students through the crafting of their academic or professional thesis. The students begin the course with a literature review and data/research completed, and they will be directed through in-class workshops and deadlines with the intention to produce a full draft of their thesis. Students may choose to draft a thesis that fits either academic conventions for a similar body of research, or they may develop a body of research whose target would be a business or professional audience. Course is designed to assist students in the development of theses with varying methodologies, methods, and audiences on global and international topics. Prerequisite: GIST 710. THE.

GIST 899. Thesis. 1-6 Hours.
Enrollment for writing thesis for master's degree. THE.

Courses

HEBR 110. Elementary Israeli Hebrew I. 5 Hours U / F1.
A beginning course in modern Israeli Hebrew. Essentials of grammar, syntax and conversational practice; elementary reading and writing. Note: Students with other previous experience in Hebrew must take a placement exam. LEC.

HEBR 120. Elementary Israeli Hebrew II. 5 Hours U / F2.
A continuation of HEBR 110. Note Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 110. LEC.

HEBR 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hebrew. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HEBR 210. Intermediate Israeli Hebrew I. 3 Hours U / F3.
Further development of language skills; listening comprehension, oral efficiency, intermediate grammar and syntax, reading and writing.
Note: Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 120. LEC.

HEBR 220. Intermediate Israeli Hebrew II. 3 Hours U / F4.
A continuation of HEBR 210. Note: Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 210. LEC.

HEBR 230. Biblical Hebrew. 3 Hours U.
This course introduces students to the grammatical structure and vocabulary of biblical Hebrew. It includes basic biblical passages for students to translate into English and analyze. LEC.

HEBR 240. Biblical Hebrew II. 3 Hours U.
This is a continuation of Hebrew 230. It continues the study of the grammatical structure and vocabulary of biblical Hebrew, and includes biblical texts for students to translate and analyze. Prerequisite: HEBR 230 or permission of the instructor. LEC.

HEBR 340. Advanced Israeli Hebrew I. 3 Hours U / FP.
Advanced study of Modern Hebrew. This course is designed to strengthen linguistic skills, enrich vocabulary, and further the study of grammar and syntax. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or permission of the instructor. LEC.

HEBR 350. Advanced Israeli Hebrew II. 3 Hours U / FP.
Continued advanced study of modern Hebrew. Not open to native speakers of Hebrew. Prerequisite: HEBR 340 or permission of the instructor. LEC.

HEBR 395. Study Abroad Topics in Hebrew: ______. 3-6 Hours H.
This course is designed for the study abroad of special topics in Hebrew at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

HEBR 410. Studies in Modern Hebrew Literature. 3 Hours H / FP.
An introduction to Hebrew literature from the nineteenth century to the present day. The course emphasizes the development of basic interpretive skills and the understanding of basic literary movements, genres, and concepts. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent. LEC.

HEBR 420. Studies in Modern Hebrew. 3 Hours U / FP.
This course is designed to help students achieve fluency in speaking, writing, and understanding modern Hebrew. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent. LEC.

HEBR 490. Independent Study. 1-3 Hours U.
Intensive reading or research under faculty supervision. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent. IND.

Courses

HNDI 110. Beginning Hindi I. 5 Hours U / F1.
An introduction to modern standard Hindi that emphasizes acquisition of basic language skills (speaking, comprehension, reading and writing) through a combination of lecture, drill, and work with the Devanagari script. LEC.

HNDI 120. Beginning Hindi II. 5 Hours U / F2.
A continuation of Beginning Hindi I that builds on basic skills of speaking and comprehension, and the writing and reading of the Devanagari script developed in Beginning Hindi I. Prerequisite: HNDI 110 or placement exam that establishes a level of proficiency in Hindi suited to Beginning Hindi II. LEC.

HNDI 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hungarian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HNDI 210. Intermediate Hindi I. 3 Hours U / F3.
Enhancement of speaking, comprehension, reading and writing abilities in modern standard Hindi, with emphasis on grammar. Readings will be introduced from representative genres of Hindi literature. Prerequisite: HNDI 120 or placement exam that establishes a level of proficiency in Hindi suited to Intermediate Hindi I. LEC.

HNDI 220. Intermediate Hindi II. 3 Hours U / F4.
Enhancement of speaking, comprehension, reading and writing abilities in modern standard Hindi, with emphasis on grammar. Readings will be introduced from representative genres of Hindi literature. Prerequisite: HNDI 210 or placement exam that establishes a level of proficiency in Hindi suited to Intermediate Hindi II. LEC.

HNDI 301. Topics in Hindi Culture, Language and Literature: ______. 3 Hours U.
Investigation of special topics on Hindi culture, language and literature at the undergraduate level. May be repeated for credit when topic varies. LEC.

HNDI 310. Advanced Hindi I. 3 Hours U / FP.
Enhancement of speaking, comprehension, reading and writing abilities in Hindi. Readings are introduced from representative genres of Hindi literature. Prerequisite: HNDI 220 or placement exam that establishes a level of proficiency in Hindi suited to Advanced Hindi I. LEC.

HNDI 320. Advanced Hindi II. 3 Hours U / FP.
Enhancement of speaking, comprehension, reading and writing abilities in Hindi. Readings are introduced from representative genres of Hindi literature. Prerequisite: HNDI 310 or placement exam that establishes a level of proficiency in Hindi suited to Advanced Hindi II. LEC.

HNDI 593. Directed Study in Hindi Culture and Literature: ______. 1-3 Hours H.
This course is designed for students seeking proficiency in Hindi beyond HNDI 320. Instructor will direct the student through readings and materials in Hindi that will add to the students substantive knowledge of India and culture in the Hindi language. May be taken multiple semesters for credit with varying content. Prerequisite: HNDI 320, and consent of instructor. LAB.

Courses

JWSH 107. Living Religions of the West. 3 Hours HR AE42 / H.
A basic introduction to the major religious traditions of the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. Not open to students who have taken REL 109. (Same as REL 107.) LEC.

JWSH 124. Understanding the Bible. 3 Hours HR / H.
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in the history and religious life of the people who produced and used them. Cannot be taken concurrently with REL 311 or JWSH 321 or REL 315. Not open to students who have taken REL 125 or JWSH 125. (Same as REL 124.) LEC.

JWSH 125. Understanding the Bible, Honors. 3 Hours HR AE42/ GE3H / H.
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in history and religious life of the people who produced and used them. Open only to students in the University Honors Program or by
permission of instructor. Not open to students who have taken REL 124 or JWSH 124. (Same as REL 125.) LEC.

JWSH 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Jewish Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

JWSH 300. Topics in Jewish Studies: ______. 3 Hours H.
Examination of special topics in Jewish Studies. May be repeated if topic varies. LEC.

JWSH 311. Narratives of Jewish Life. 3 Hours HL AE42 / H.
The course focuses on the narratives through which Jews made sense of their lives under the impact of the forces of modernity, beginning in the "old world," and moving through the 19th century and into the 20th. The goal is to analyze how the imagination of Jewish writers was captured by the changes in social structures such as new educational, residential and occupational opportunities, leading to increased interactions with the gentile society. Students read and discuss literary works based in the shtetl in revolutionary Russia, and in America. We will also look at memoirs and letters written by ordinary Jews. All assigned texts will be in English. LEC.

JWSH 315. The Spanish Inquisition. 3 Hours AE42 / H.
A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as HIST 325 and SPAN 302.) LEC.

JWSH 318. Jews and Slavs in Eastern Europe. 3 Hours H.
Jews and Slavs have shared territory from the Middle Ages to the present day. The contact between these culturally and linguistically distinct groups have shaped many centuries of Eastern European history - from the extreme violence of the pogroms to long periods of peaceful coexistence and cooperation. "Jews and Slavs" examines the history and cultural geography of Slavic-Jewish contact from the perspectives of both communities. Through literature, film, journalism, and folklore, students learn about the profound influence Jews and Slavs have had on each other, the uneasy feelings that accompanied their interactions, and the creative and fascinating impact their interaction had on both cultures. (Same as SLAV 318.) LEC.

JWSH 321. Religion of Ancient Israel. 3 Hours H/W.
An introduction to the religion of ancient Israel through examination of biblical texts and archaeological evidence. Emphasis is placed on understanding the texts of the Hebrew Bible (Old Testament) in their historical and cultural contexts, including the relationship of their religious views to other religious perspectives current in ancient Israel and the Near East. Attention is given to the processes by which the biblical texts developed and came to be viewed as scripture. (Same as REL 311.) LEC.

JWSH 325. Introduction to Judaism. 3 Hours H.
Analyzes a selection of the core texts, teachings, and practices of Jewish religious traditions in terms of classical and contemporary understanding. (Same as REL 325.) LEC.

JWSH 326. The Talmud: Its Origins, Nature, and Evolution. 3 Hours H.
This course demystifies the Talmud, arguably the most central yet also the most mysterious text of rabbinic Judaism. Students are introduced to the scope, substance, styles, and major figures of the Talmud, and also learn how the text came into being over the course of several centuries. (Same as REL 326.) Prerequisite: REL 104, REL 107, or REL 124 or REL 125, or permission of the instructor. LEC.

JWSH 329. Politics and Conflict in Israel and Palestine. 3 Hours H.
This course focuses on various aspects of the Israeli-Palestinian conflict including its history from the Ottoman period to the present day, the social and political effects on Israeli and Palestinian life and citizenship, official and unofficial narratives, and international responses. LEC.

JWSH 335. History of Jewish Women. 3 Hours H.
This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women's gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women's lives in both Jewish and non-Jewish society. (Same as HIST 335, WGSS 335.) LEC.

JWSH 336. Jewish American Literature and Culture. 3 Hours AE41 / H.
An examination of Jewish American literature and culture from the 17th century to the present. Materials may include a broad range of literary genres as well as folklore, music, film, and visual art. (Same as ENGL 336.) Prerequisite: Prior completion of one 200-level English course. LEC.

JWSH 337. Religious Zionisms. 3 Hours HL AE42 / H.
A survey of the many types of Religious Zionism, from the origins of the movement to the present, from Left to Right, and from Jewish to Christian. The class asks questions about the relationship between religion and politics in Israel using case studies as examples, and also considers the views of religious Jewish anti-Zionists. No previous knowledge of Judaism or Israeli history is required. (REL 337.) LEC.

JWSH 338. Languages of the Jews. 3 Hours H.
From the beginning, Jewish history and culture is closely tied to language, from Hebrew and Aramaic to the languages of diaspora such as Yiddish and Ladino. Focusing on issues of language in society, this course will survey the languages spoken by the Jews throughout their long history in diverse communities around the world. We will learn about Hebrew as a spoken and a sacred language, examine how Jewish languages are born and die, and discuss the resurrection of Modern Hebrew in the state of Israel. All readings are in English. No prior knowledge of languages or linguistics is required. (Same as LING 338.) LEC.

JWSH 339. Languages of the Jews, Honors. 3 Hours H.
Honors version of JWSH 338 or LING 338, Languages of the Jews. Prerequisite: Membership in the University Honors Program or consent of instructor. (Same as LING 339.) LEC.

JWSH 340. Topics in Modern Jewish Literature: ______. 3 Hours.
This course treats Jewish literature in English or English translation in the 20th and 21st centuries either as a broad survey or according to specific themes. May be repeated for credit. LEC.

JWSH 341. Hitler and Nazi Germany. 3 Hours H/W.
An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. (Same as HIST 341.) LEC.

JWSH 343. The Holocaust in History. 3 Hours H.
The systematic murder of the Jews of Europe by the Nazis during World War II is one of the most important events of modern history. This course studies the Holocaust by asking about its place in history. It compares...
other attempted genocides with the Holocaust and examines why most historians argue that it is unique. Other topics covered include the reasons the Holocaust occurred in Europe when it did, the changing role of anti-Semitism, and the effects of the Holocaust on civilization. The course also discusses why some people have sought to deny the Holocaust. The course concludes by discussing the questions people have raised about the Holocaust and such issues as support for democracy, the belief in progress, the role of science, and the search for human values which are common to all societies. (Same as HIST 344.) LEC.

JWSH 344. Modern Jewish History. 3 Hours H.

This course examines the ways Jews and Christians have interacted with the impact of antisemitism and the Holocaust. (Same as REL 344.) Prerequisite: REL 124 or JWSH 124 or consent of instructor. LEC.

JWSH 345. Modern Jewish Thought. 3 Hours H.

This course explores the complex of interactions between Jews, Judaism, and modernity by examining the challenges to Jewish life and thought, community and culture, self-understanding and survival, from the early modern period to the present day. Through the lenses of religious, cultural, intellectual, and political expression, the course examines the social, economic, and demographic changes in Jewish communities in Western, Central and Eastern Europe, the United States, and Israel along with the Greek and Roman periods (ca. 250 B.C.E. - 135 C.E.). Select texts from the Hebrew Bible, the so-called apocrypha and pseudepigrapha, the Qumran scrolls, Philo, Josephus, related early Christian texts, and Rabbinic texts will be studied. (Same as REL 526.) Prerequisite: REL 124 or JWSH 124 or permission of instructor. LEC.

JWSH 350. Contemporary Jewish Identities. 3 Hours SC / H.

This course explores the variety of ways in which American Jews create Jewish identities as individuals and groups. It traces the emergence of the various current divisions within Judaism: Reform Judaism (which by definition, implies Orthodoxy), then Conservative Judaism, and then the later development of Reconstructionist Judaism. The course also explores other contemporary options for being Jewish: cultural Jews, secular Jews, unaffiliated Jews, religious Jews, and gay or lesbian or transgendered Jews. LEC.

JWSH 361. Jewish Film. 3 Hours HL / H.

An examination of the cultural history of the Jews through films that explore Jewish themes, including but not limited to: issues of tradition and modernity, religion and secularism, immigration, gender, Zionism, anti-Semitism, and the Holocaust. Films studied may be in English and in foreign languages (with English subtitles) like Yiddish, Hebrew, and Russian. LEC.

JWSH 395. Study Abroad Topics in Jewish Studies: _____ 3-6 Hours H.

This course is designed for the study of special topics in Jewish Studies at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

JWSH 490. Directed Study in Jewish Studies. 3 Hours AE61 / H.

Intensive reading or research under faculty supervision. Prerequisite: Consent of instructor. IND.

JWSH 491. Directed Study in Jewish Studies, Honors. 3 Hours AE61 / H.

Honors version of JWSH 490. Intensive reading or research under faculty supervision. Prerequisite: Membership in the University Honors Program or consent of instructor. IND.

JWSH 523. The Dead Sea Scrolls. 3 Hours H.

A study of the archeological evidence and texts from the Dead Sea area that provide primary evidence for Jewish religious belief and practice in the Greek and Roman periods (ca. 250 B.C.E. - 135 C.E.). (Same as REL 523.) Prerequisite: REL 124 or JWSH 124 or consent of instructor. LEC.

JWSH 525. Jews and Christians. 3 Hours H.

This course examines the ways Jews and Christians have interacted with and characterized one another at various points in their histories. Special emphasis is placed on the gradual separation of the two religious traditions in the 1st-4th centuries. (Same as REL 525.) Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor. LEC.

JWSH 526. Jewish History and Literature in the Greek and Roman Periods. 3 Hours H.

The history and literature of the Jewish people from the hellenistic period (late fourth century B.C.E. to the codification of the Mishnah 210 C.E.). Select texts from the Hebrew Bible, the so-called apocrypha and pseudepigrapha, the Qumran scrolls, Philo, Josephus, related early Christian texts, and Rabbinic texts will be studied. (Same as REL 526.) Prerequisite: REL 124 or JWSH 124 or permission of instructor. LEC.

JWSH 560. Modern Jewish Thought. 3 Hours H.

This course examines the ways how a number of prominent Jewish thinkers from the seventeenth century through the present have encountered and engaged the special challenges posed by modernity to religious traditions, including the challenge of science to the validity of miracles, the challenge of the secular state to religious authorities, and the challenge of historical studies to the integrity of scripture. Thinkers covered may include Spinoza, Mendelssohn, Frankel, Hirsch, Geiger, Hermann Cohen, Buber, Rosennzweig, Arendt, Scholem, Leo Strauss, Levinas, and Derrida. Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor. (Same as REL 560.) LEC.

JWSH 562. Judaism and Political Theology. 3 Hours H.

A consideration of the relationship between religion and politics in Judaism, and of the relevance of Judaism to broader discussions about religion and politics. Topics will include sovereignty, secularization, pluralism, democracy, and revolution. (Same as REL 572.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor. LEC.

JWSH 563. Judaism and Sexuality. 3 Hours H.

An exploration of the complex interactions of Judaism, Jewishness, and sexuality. The course serves as a basic introduction to traditional Jewish understandings of gender and power, love and sex, and the body and embodiment. It also introduces the changes undergone by this tradition under the impact of contemporary feminism and queer theory. (Same as REL 573, WGSS 573.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor. LEC.

JWSH 570. Studies in Judaism. 3 Hours H.

A study of the major intellectual sources of the Jewish tradition from the Mishna, Talmud, Midrash, prayerbook, philosophers, the Zohar, and the Shulchan Aruch. (Same as REL 570.) Prerequisite: A course in Religious Studies or Jewish Studies numbered 300 or above. LEC.

JWSH 572. Jewish Folklore. 3 Hours H.

Jewish folklore is extraordinarily rich and varied. From folklore to riddles, from legends about the exalted rabbis to irreverent jokes, folklore is central to the Jewish way of life. This course traces the extent to which oral elements appear in traditional Jewish literary texts such as the Bible; read and discuss folktales, and examine minor genres such as proverbs, riddles and jokes. Topics include the supernatural beings of Jewish folklore dybbuks, seductive female demons, and golems. Students acquire theoretical tools with which to analyze folklore (Jewish or otherwise), read stories, watch movies, and collect samples of folklore from informants. LEC.

JWSH 573. Jewish Folklore, Honors. 3 Hours H.

Honors version of JWSH 572. Jewish folklore is extraordinarily rich and varied. From folktales to riddles, from legends about the exalted rabbis to irreverent jokes, folklore is central to the Jewish way of life. This course traces the extent to which oral elements appear in traditional Jewish literary texts such as the Bible; read and discuss folktales, and examine minor genres such as proverbs, riddles and jokes. Topics include
the supernatural beings of Jewish folklore dybbuks, seductive female demons, and golems. Students acquire theoretical tools with which to analyze folklore (Jewish or otherwise), read stories, watch movies, and collect samples of folklore from informants. Open only to students in the University Honors Program or by permission of instructor. LEC.

**JWSH 600. Advanced Topics in Jewish Studies: _____, 3 Hours H.** Examination of advanced topics in Jewish Studies. May be repeated if topic varies. Prerequisite: Consent of instructor. LEC.

**JWSH 601. Senior Seminar in Jewish Studies, 3 Hours H.** Investigation of topics related to Jewish studies from an interdisciplinary perspective: Jewish culture, history, and religion. The course focuses on research methods and intensive writing. Open only to Jewish studies majors. Suggested for students with senior standing. SEM.

**JWSH 650. Service Learning in Jewish Studies. 3 Hours S.** This course, to be taken in the junior or senior year, is designed to give students the opportunity to apply the knowledge, concepts, and ideas gained in courses in Jewish studies to real-life situations in appropriate agencies and organizations. Open to students in the Jewish Studies program. Prerequisite: Permission of instructor. FLD.

### Courses

**TAJ 110. Elementary Tajik I. 5 Hours U.**
Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Five hours of class per week. LEC.

**TAJ 120. Elementary Tajik II. 5 Hours U.**
Continuation of TAJ 110. Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Five hours of class per week. Prerequisite: TAJ 110 or departmental permission. LEC.

**TAJ 210. Intermediate Tajik I. 3 Hours U.**
A continuation of TAJ 120. Course emphasizes oral and written work in Tajik. Systematic review of grammar and introduction to reading in cultural texts. Prerequisite: TAJ 120 or departmental permission. LEC.

**TAJ 220. Intermediate Tajik II. 3 Hours U.**
A continuation of TAJ 210. Course emphasizes oral and written work in Tajik. Systematic review of grammar and introduction to reading in cultural texts. Prerequisite: TAJ 210 or departmental permission. LEC.

**TAJ 310. Advanced Tajik I. 3 Hours U.**
Enhancement of speaking, comprehension, reading and writing abilities in Tajik. Readings from Tajik literature introduced. Prerequisite: TAJ 220 or placement exam that establishes a level of proficiency in Tajik suited to Advanced Tajik I. LEC.

**TAJ 320. Advanced Tajik II. 3 Hours U.**
Enhancement of speaking, comprehension, reading and writing abilities in Tajik. Readings from Tajik literature introduced. Prerequisite: TAJ 220 or placement exam that establishes a level of proficiency in Tajik suited to Advanced Tajik II. LEC.

**TAJ 510. Tajik for Geographers. 1 Hour H.**
The course is designed to facilitate the use of primary sources in Tajik for carrying out research in human geography of Tajikistan. TAJ 510 compliments REES 510. Prerequisite: TAJ 220, or consent of instructor. LEC.

**TAJ 532. Tajik For Sociologists. 1 Hour H.**
The course is designed to facilitate the use of primary sources in Tajik for carrying out research in sociology of Tajikistan. TAJ 532 compliments SOC 532. Prerequisite: TAJ 220, or consent of instructor. LEC.

---

**Co-Major in European Studies**

**Why study European studies?**

European studies broaden, deepen, and strengthen, through interdisciplinary study, a student’s knowledge and understanding of the enduring importance of our transatlantic partners, the Europeans.

**First- and Second-Year Preparation**

To complete the requirements for the degree in 4 years, prospective co-majors are encouraged to complete all general education and language requirements no later than fall semester of the junior year. Students should begin study of a western European language other than English or Russian as early as possible. For more information, contact the European Studies Advising Specialist, Laura Leonard, 785-864-3500, laleonnar@ku.edu.

During their first and second years, students are required to enroll in HIST 115 and in 1 additional course from the list below:

Choose 1 of the following: 3-4

- ECON 104 Introductory Economics
- ECON 144 Principles of Macroeconomics
- ECON 145 Principles of Macroeconomics, Honors
- GEOG 100 World Regional Geography
- GEOG 102 Principles of Human Geography
- POLS 150 Introduction to Comparative Politics
- POLS 151 Introduction to Comparative Politics Honors
- POLS 170 Introduction to International Politics
- POLS 171 Introduction to International Politics Honors
- HA 100 Introduction to Western Art History
- PHIL 180 Introduction to Social and Political Philosophy

**Note:** Enrollment in the above courses counts toward College principal course distribution requirements in the humanities and social sciences.

**Note:** European Studies co-majors are strongly encouraged to study abroad and should discuss this opportunity with the Advising Specialist or Academic Director early in their undergraduate career.

**Admission to the Co-Major**

**Admission Requirements**

1. Second-semester sophomore or junior standing.
2. Declared major in a department or admission to a professional school.

**Requirements for the Co-Major**

**European Studies Prerequisites or Co-requisites (18)**

Students selecting this co-major must complete the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Distribution</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 115</td>
<td>French Revolution to the Present: Europe 1789-Present</td>
<td>3</td>

Co-Major in European Studies

GEOG 102  Principles of Human Geography
POLS 150  Introduction to Comparative Politics
POLS 151  Introduction to Comparative Politics Honors
POLS 170  Introduction to International Politics
POLS 171  Introduction to International Politics Honors
HA 100    Introduction to Western Art History
PHIL 180  Introduction to Social and Political Philosophy

Students selecting this co-major must complete the following:

Second Language Skills (3 hours). Students must complete one semester beyond the College general education second language requirement (completion of a fourth-semester course) in a modern western European language (Danish, Dutch, French, German, Hungarian, Italian, Portuguese, Polish, Spanish, Swedish).

Seminar in European Studies. Satisfied by one of the following:
- EURS 500  Seminar in European Studies
- EURS 503  Europe Today

Upper-Division General European Studies Required Electives. Satisfied by three approved courses (9 hours), two of which must be from different departments. The following list is not exhaustive; visit the European Studies website or speak with the undergraduate advisor each semester for a complete list of approved general European Studies courses:

- ARCH 542  History of Architecture III: Modern
- ARCH 665  History of Urban Design
- ECON 535  Economic History of Europe
- ECON/EURS 536  Economic Issues of the European Union
- ECON 563  Current Economic Issues of East Europe
- EURS 302  European Culture and Society 1945 to Present
- EURS/HIST/PCS 329  History of War and Peace
- EURS 503  Europe Today
- EURS 505  Studies in Exile Literature
- EURS 506  Culture and Politics of the Cold War in Western Europe
- EURS 507  Research in European Collections
- EURS 508  Politics and Economics of Cultural Production in Western Europe
- EURS 509  Introduction to the Study of Southern European Societies
- EURS 511  Topics in European Studies: (when covering 2 or more countries)
- EURS 604  The European Union
- HA 533  European Art 1789-1848: Gender and Revolution
- HA 564  European Art, 1900-1945
- HA 565  Art Since 1945
- HIST 334  The Great War: The History of World War I
- HIST 340  The History of the Second World War
- HIST 343  The Holocaust in History
- HIST 380  Revolutionary Europe: The People in Arms
- HIST 527  Recent European History, 1870 to the Present
- HIST 528/ECON 535  Economic History of Europe
- HIST 529  Intellectual History of 19th Century Europe
- HIST 533  The History of Women and the Family in Europe, from 1500 to the Present
- HUM/EURS 430  European Civilization in World Context: ______
- IBUS 400  Special Topics in International Business: ______
- IBUS 410  Introduction to International Business
- PCS/EURS 550  Classics of Peace Literature
- PHIL 560  Nineteenth Century Philosophy
- PHIL 592  Contemporary Continental Philosophy
- POLS 652  Politics in Europe
- POLS 655  Politics of East-Central Europe
- POLS 669  Topics in Comparative Politics: (when covering Europe, among other regions)
- POLS 681  Comparative Foreign Policy
- POLS 689  Topics in International Relations: (when covering Europe, among other regions)
- SOC 500  Sociological Theory
- SOC 530  Industrial Revolution and Capitalist Development
- SOC 780  Advanced Topics in Sociology: ______ (when covering comparative social policy between the United States and Europe)
- THR 526  History of Theatre II

Upper-Division National or Regional European Studies Requirements (0)

Satisfied by two approved country- or region-specific courses (6 hours), two of which must cover two different countries or regions. This list is not exhaustive; go to the European Studies website or speak with the undergraduate advisor each semester for a complete list of approved upper-division national or regional European Studies courses.

- ARCH 632  Contemporary French Architecture
- ARCH 690  Architecture Study Abroad (France, Italy, Germany, or United Kingdom)
- ENGL 309  The British Novel
- ENGL 314  Major British Writers after 1800
- ENGL 315  Studies in British Literature
- ENGL 324  Contemporary Authors: ______ (when British or Irish)
- ENGL 327  Studies in Twentieth-Century Drama: ______ (when at least 50 percent British/Irish)
- ENGL 332  Shakespeare
- ENGL 334  Major Authors: ______ (when British or Irish)
- ENGL 479  The Literature of: ______ (when British or Irish)
- ENGL/EURS 530/EURS 512  Irish Literature and Culture: ______
- EURS 509  Introduction to the Study of Southern European Societies
- EURS 510  Scandinavian Life and Civilization
- EURS 511  Topics in European Studies: ______ (when country-specific)
- EURS 512/ENGL 530  Irish Literature and Culture: ______
- FREN 152  France and the French (taught in English)
- FREN 326  Introduction to French Literature
Satisfied by 24 hours of co-major courses.

**Co-Major Hours & Major GPA**

While completing all required courses, co-majors must also meet each of the following hour and grade-point average minimum standards:

**Co-Major Hours**

Satisfied by 24 hours of co-major courses.

**Major Hours in Residence**

Satisfied by 24 hours of KU resident credit in the co-major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the co-major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

No more than 12 hours may be shared between a 27-hour European studies co-major and another major.

Below is a sample 4-year plan for students pursuing the co-major in European Studies. The European Studies co-major must be completed along with a full major. The co-major requires 4th-semester language proficiency in a modern western European language (Danish, Dutch, French, German, Hungarian, Italian, Portuguese, Polish, Spanish, Swedish), as well as one additional semester of an advanced language course (i.e. one 300-level language course).

To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

**Capstone-Final Senior Course**

In the senior year, students complete one of the following options:

**Option A: Senior Thesis in European Studies.** Satisfied by EURS 501. A semester-long independent research project under the supervision of a faculty thesis director. Students should contact Lorie A. Vanchena, Academic Director of European Studies, vanchena@ku.edu, before registering for EURS 501.

**Option B.** Two additional upper-division European Studies courses. Satisfied by general European or country-specific electives chosen from the course lists above.

**Junior/Senior (300+) European studies courses.** Satisfied by 2 courses (6 hours) of general European or country-specific electives chosen from the course lists above.

Courses taken during a study abroad program in Europe may fulfill co-major requirements. Students should consult the Advising Specialist for European Studies about study abroad credit before their program departure.

**Note:** This list is not exhaustive. Visit the European Studies website or the program office each semester for a complete list of upper-division national or regional European Studies courses.

Total Hours: 120-121

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 The BA degree requires 4th-semester language proficiency. The European Studies Co-Major requires 4th-semester language proficiency specifically in a modern western European language (Danish, Dutch, French, German, Hungarian, Italian, Portuguese, Polish, Spanish, Swedish).

3 Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

4 An interdisciplinary perspective course is required for the European Studies Co-Major. Visit the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/european-studies/co-major/#requirementstext) tab for a list of approved courses.

5 This degree plan does not include specific major requirements as the European Studies Co-Major can be paired with any major. Most majors do include approximately 30 credit hours, of which 15 must be at the Jr/Sr level. Additionally, students typically take a Goal 6 Integration & Creativity course within their major.

6 The European Studies Co-Major requires one advanced language course beyond 4th-semester proficiency (i.e. one 300-level course).

7 3 courses (9 hours) of upper-division general European Studies elective courses are required. Two of which must be from different departments. Visit the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/european-studies/co-major/#requirementstext) tab for a list of approved courses, or meet with an undergraduate advisor in European Studies.

8 2 courses (6 hours) of upper-division National or Regional European Studies courses are required, which must cover two different countries or regions. Visit the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/european-studies/co-major/#requirementstext) tab for a list of approved courses, or meet with an undergraduate advisor in European Studies.

9 A seminar course in European Studies is required. This requirement can be fulfilled by one of two options:

Option A: Senior Thesis in European Studies. Satisfied by EURS 501. A semester-long independent research project under the supervision of a faculty thesis director. Students should contact Lorie A. Vanchena, Academic Director of European Studies, vanchena@ku.edu, before registering for EURS 501.

Option B. Two additional upper-division European Studies courses. Satisfied by general European or country-specific electives chosen from the course lists above.

* No more than 12 hours may be shared between a 27-hour European Studies co-major and another major.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

Honors in European Studies is open to co-majors who have earned, both at the time of entry into the program and at graduation, overall grade-point averages of 3.25 or higher and of 3.5 or higher in European studies. A student must complete all co-major requirements, including EURS 502 Senior Honors Thesis in European Studies, with a grade of A.

The senior honors thesis affords exceptional students the opportunity to work closely with an individual faculty member on a specific research project over an extended period of time, usually two semesters. The senior honors thesis may be combined with EURS 501 Senior Thesis in European Studies, substantially increasing the length and scope of the final thesis, or the senior honors thesis may be a separate extension of the senior thesis.

A student in EURS 502 must defend the thesis in a 1-hour oral examination with faculty. The examination committee is composed of 3 faculty members, 1 of whom must be the thesis director. The student selects the committee members in consultation with the thesis director. Students should consult Dr. Lorie A. Vanchena, Academic Director of European Studies, vanchena@ku.edu, early in their junior year.

Study Abroad

The European Studies program strongly encourages students to enroll in one of KU’s many study abroad programs in Europe.

European Studies participates in the Humanities and Western Civilization semester abroad program in Paris and Florence.

Summer language institutes offering upper-division courses in language of literary study may also qualify for European Studies co-major or minor
Minor in European Studies

Why study European studies?

European studies broaden, deepen, and strengthen, through interdisciplinary study, a student’s knowledge and understanding of the enduring importance of our transatlantic partners, the Europeans.

Requirements for the Minor

Students selecting this minor must complete the following:

**European Studies Minor Core Knowledge and Skills (18)**

- **Second Language Skills.** (3 hours) Students must complete one 3 semester beyond the College general education, second language requirement (which is the completion of a fourth-semester course) in a modern western European language (Danish, Dutch, French, German, Hungarian, Italian, Portuguese, Polish, Spanish, or Swedish).

  Foundational Course: Seminar in European Studies. Satisfied by:

- 1 approved modern European history course 3

- European Studies Minor Electives. 9

Select three of the four following options:

- 1 approved European politics course
- 1 approved European economics or business course
- 1 approved general European culture or history course
- 1 approved national or regional European course

A current list of approved courses for the minor is available on the European Studies website and from the Program’s Advising Specialist and Academic Director.

**Note:** No more than 1 course may be counted both in the minor and another degree or minor program.

**Minor Hours & Minor GPA**

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Junior/Senior (300+) Hours in Residence**

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Department of French and Italian

**Why study French, Italian, and Francophone studies?**

French, Italian, and Francophone studies ensure that our students succeed in an interconnected world.

**Undergraduate French**

The Department of French & Italian offers a comprehensive undergraduate program in French language, literature, and culture, as well as Francophone literature and culture from around the world.

In addition to first and second year courses in basics of grammar and conversation, advanced undergraduate courses in composition, literature, and culture are offered every semester. We offer a summer study abroad option in Paris, and a full semester study abroad program in Angers. Our summer and semester-long study abroad programs in Paris and Angers offer a wide variety of levels to students at all stages of linguistic competence. The major prepares students for a variety of careers in teaching or in graduate studies, as well as in fields such as interpreting, international business, art, art history, and travel. We encourage applicants from traditional and non-traditional backgrounds to investigate French as a major or as a minor field.

**Undergraduate Italian**

The Department of French & Italian offers a comprehensive undergraduate program in Italian language, literature, and culture, leading to the BA in French with the Italian Option or to the Minor in Italian. Italian offers courses in basic grammar, composition and conversation, literature and culture. The course sequence *Italy and the Italians* (ITAL 335-336) is also offered via ITV at the Edwards Campus in Kansas City. Our summer study abroad program in Florence offers a wide variety of levels to students at all stages of linguistic competence. The major prepares students for a variety of careers in teaching or in graduate studies, as well as in fields such as interpreting, international business, art, art history, architecture, and travel. We encourage applicants from traditional and non-traditional backgrounds to enrich their time at KU through the study of Italian.

**Graduate French**

The Department of French & Italian offers the M.A. and Ph.D. degrees in French and Francophone language, literature, and culture. Graduate study is supported through teaching assistantships offered to qualified candidates, who receive thorough training in language instruction. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation.

**Undergraduate Programs**

Course work in the Department of French and Italian gives undergraduates a valuable and useful linguistic tool; offers cultural training for students specializing in other fields; trains majors in the literature, culture, and civilization of France and Italy; and prepares prospective language teachers. The department welcomes qualified students from all disciplines, regardless of major.

**Placement**

In general, placement depends on the overall proficiency of the student and on what was accomplished in previous French or Italian courses. A
student entering KU with no previous French should enroll in FREN 110. A student entering KU with no previous Italian should enroll in ITAL 107, ITAL 110, or ITAL 155.

Students with past course work/experience in French should take the online French placement examination offered through the Ermal Garinger Academic Resource Center (http://egarc.ku.edu) at KU. Once the student has the placement score, he or she should contact the French language coordinator in the Department of French and Italian to determine which French course is appropriate for his or her level. A student who has four years of high school French and wants to continue the study of French beyond the language requirement generally enrolls in FREN 300 or FREN 326, depending on the placement examination results. Students who feel they are sufficiently prepared to test out of the language requirement may contact the department office to arrange to take a French proficiency test.

Any student with past course work or experience in Italian should contact the Italian program director in the Department of French and Italian to determine which Italian course is appropriate for his or her level.

Retroactive Credit
Students with no prior college or university French or Italian course credit are eligible for retroactive credit according to this formula:

- 3 hours of retroactive credit are awarded to a student with 2 or 3 years of high school French or Italian who enrolls initially at KU in a third-semester French or Italian course (FREN 230 or FREN 231 or ITAL 230) and receives a grade of C– or higher.
- 6 hours of retroactive credit are awarded to a student with 3 or 4 years of high school French or Italian who enrolls initially at KU in a fourth-semester French or Italian course (FREN 240 or FREN 241 or ITAL 240) and receives a grade of C– or higher.
- 9 hours of retroactive credit are awarded to a student with 4 years of high school French or Italian who enrolls initially at KU in a French or Italian course with a fourth-semester course as a prerequisite and receives a grade of C– or higher.

Courses for Nonmajors
All courses are open to nonmajors who meet requirements. Candidates for the B.S. degree in education who want to major or minor in French (p. 266) should consult the School of Education. Special concentrations in French and Italian are also available through business and journalism.

Graduate Program in French
The Department of French and Italian offers a comprehensive graduate program (M.A. and Ph.D.) in French and Francophone language, literature, and culture. Our faculty (http://www.frenchitalian.ku.edu/faculty) is dynamic, professionally active, and committed to excellence in scholarship and teaching. Although the major emphasis of teaching and research is French and Francophone literature, the department also offers courses in literary theory, cultural studies, and film. The department offers a balanced emphasis on all periods from medieval through twentieth and twenty-first centuries. Our students represent a diverse group, and we encourage equally applicants from traditional and nontraditional backgrounds. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation. Please visit the Graduate Program page (https://frenchitaliandev.drupal.ku.edu/overview-5) of the department website for additional information.

Departmental Funding
While it is not guaranteed, the department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs receive thorough training in language instruction, close mentoring, and the opportunity to teach French at a variety of levels, forming a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://frenchitaliandev.drupal.ku.edu/graduate-teaching) of our departmental website.

Additional Funding
Other funding opportunities for graduate students include the Office of Study Abroad’s Springer award; the department’s Cornell, Mahieu, and Magerus fellowships; awards for research abroad; and French university exchanges.

Visit the Graduate Studies website for additional information about funding opportunities (http://graduate.ku.edu/funding) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml) administers grants, loans, and need-based financial aid.

Courses
FREN 100. French for Reading Knowledge. 3 Hours U.
Special course for candidates for advanced degrees in other departments. Fundamentals of grammar and reading of material of medium difficulty. Intended primarily for graduate students, but open also to seniors planning graduate study. Does not satisfy any part of the undergraduate language requirement. Presupposes no previous study of French. Conducted in English. LEC.

FREN 104. Elementary French, Overseas. 1-5 Hours U.
Basic language instruction in French for beginners participating in study abroad programs in France or a French-speaking country. Graded satisfactory/unsatisfactory. LEC.

FREN 107. Elementary French I for the Professional Schools. 3 Hours.
Essentials of French grammar; practice in speaking, reading, and writing French. Introduction to French business culture. Three hours of class per week. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. LEC.

FREN 108. Elementary French II for the Professional Schools. 3 Hours U.
Essentials of French grammar; practice in speaking, reading, and writing French. Introduction to French business culture. Three hours of class per week. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: FREN 107 or equivalent. LEC.
FREN 109. Elementary French III for the Professional Schools. 3 Hours U.
Essentials of French grammar; practice in speaking, reading, and writing French. Introduction to French business culture. Three hours of class per week. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: FREN 108 or equivalent. LEC.

FREN 110. Elementary French I. 5 Hours U / F1.
Five hours of class per week. A balanced approach stressing understanding, speaking, reading, and writing. LEC.

FREN 111. Introduction to French I. 3 Hours U.
Introduction to French for special purposes; no previous French required. Provides basic familiarity with the French language, focusing on speaking, listening, reading and the essentials of French grammar. Introduction to the culture of the French-speaking world. Three class hours per week; may be delivered by videoconference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: Instructor permission required. LEC.

FREN 112. Introduction to French II. 3 Hours U.
Continuation of FREN 111. Further development of basic familiarity with the French language, focusing on speaking, listening, reading and the essentials of French grammar. Continued exploration of the culture of the French-speaking world. Three class hours per week; may be delivered by videoconference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: FREN 111 or permission of instructor. LEC.

FREN 113. Introduction to French III. 1.5 Hours U.
Continuation of FREN 112. Further development of basic familiarity with the French language, focusing on speaking, listening, reading and the essentials of French grammar. Continued exploration of the culture of the French-speaking world. Three class hours per week; may be delivered by videoconference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: FREN 112 or permission of instructor. LEC.

FREN 120. Elementary French II. 5 Hours U / F2.
Five hours of class per week. A balanced approach stressing understanding, speaking, reading, and writing. Prerequisite: FREN 110 or by departmental permission. LEC.

FREN 152. France and the French. 3 Hours HL AE42/GE3H / H.
A comprehensive, interdisciplinary survey of French culture that may include topics ranging from the earliest times to the present, with particular attention to literature, the arts, thought, politics, society, food, and customs. Taught in English. Does not fulfill any requirement in the French major or minor. LEC.

FREN 177. First Year Seminar: . 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in French. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

Third-semester course stressing oral and written work in French; systematic review of grammar and introduction to reading in cultural texts. (See also FREN 231, FREN 234.) Prerequisite: FREN 120 or by departmental permission. LEC.

FREN 231. Intermediate French I, Honors. 3 Hours U / F3.
Similar in approach and content to FREN 230; smaller class size; open to students who had done very good to excellent work in previous French classes. Prerequisite: Grade of B or A in FREN 120 or departmental permission. LEC.

One-semester course meeting five times a week for six hours credit. Material same as in FREN 230 and FREN 240. (FREN 234, FREN 240, FREN 241--each completes foreign language requirement.) Prerequisite: FREN 120 or by departmental permission. LEC.

Continuation of FREN 230. (FREN 234, FREN 240, FREN 241--each completes foreign language requirement.) (See also FREN 241.) Prerequisite: FREN 230, FREN 231, or by departmental permission. LEC.

Similar in approach and content to FREN 240; smaller class size; open to students who have done very good to excellent work in previous French classes. Prerequisite: A grade of A in FREN 230 or FREN 231, or departmental permission. LEC.

FREN 300. Intensive Review of French Grammar. 3 Hours H/W / FP.
Designed to provide essential skills for advanced courses. Prerequisite: FREN 234, FREN 240, FREN 241, or by departmental permission. LEC.

FREN 310. French Phonetics. 3 Hours GE3S / H/W / FP.
A course in practical phonetics with exercises stressing rhythm, intonation, and individual sounds. Prerequisite: FREN 240, FREN 241, or by departmental permission. LEC.

FREN 315. Le Francais Pratique. 1-6 Hours H/W / FP.
Supplementary non-major language course that can be a sequel to the first four semesters of French. Primarily for students studying abroad. Covers vocabulary study, oral exercises, discussion of texts, writing, and free conversation. Prerequisite: FREN 230/231 or FREN 234, FREN 240/241. LEC.

FREN 326. Introduction to French Literature. 3 Hours HL AE42/GESH / H / FP.
Analysis of selected texts from various genres; special emphasis on explication de texte. Prerequisite: FREN 300 (or with FREN 300), or by departmental permission. LEC.

FREN 330. French Language and Civilization I. 3 Hours H / FP.
A study of French grammar, conversation, and composition, with selected aspects of French civilization. Available to participants in the Summer Language Institutes, and selected Study Abroad programs. LEC.

FREN 340. French Language and Civilization II. 3 Hours H / FP.
A study of French grammar, conversation, and composition, with selected aspects of French civilization. Available to participants in the Summer Language Institutes, and selected Study Abroad Programs. LEC.

FREN 350. Applied French Grammar and Composition I. 3 Hours H/W / FP.
Systematic grammar review with extensive practice in writing French. Prerequisite: FREN 300 or FREN 326. LEC.

FREN 352. French for Journalism and Business. 3 Hours H/W / FP.
Practical acquisition of skills necessary to understand the language of journalism and business. Prerequisite: FREN 300. LEC.

FREN 375. Intermediate French Conversation. 3 Hours H/W / FP.
Three meetings per week. Guided discussions designed to increase fluency, improve pronunciation, and acquire vocabulary. Sections limited to twelve students. May be designated a KULAC class at the discretion of the instructor. Prerequisite: FREN 300 or concurrent enrollment in FREN 300. LEC.

FREN 376. Advanced French Conversation. 3 Hours H/W / FP.
Three meetings per week. Guided discussions designed to increase fluency, improve pronunciation, and knowledge of French culture and language. Classes have centered around topics such as the French...
Revolution, the Arts, Renaissance Festivals, and French cinema. Sections limited to twelve students. May be designated a KULAC class at the discretion of the instructor. Prerequisite: FREN 375. LEC.

FREN 401. Paris, City of Lights and Legends. 3 Hours HL AE42/GE3H / H.
An exploration of the French capital from its origins to present as emblem and icon of the social, literary, cultural, and political development of the French nation and of French ideals. Topics include great persons, events, works, symbols, and myths since the founding of the city to the present. Taught in English. Does not fulfill any requirement in the French major or minor. LEC.

FREN 405. French Literature in Translation. 3 Hours HL AE42/GE3H / H.
Readings and discussions of representative great masterpieces of French literature from the medieval Arthurian romances and chansons de geste to the present, with particular emphasis on the question of the interrelations of form and content. Includes such authors as Rabelais, Montaigne, Racine, Moliere, Voltaire, Balzac, Flaubert, Baudelaire, Proust, Gide, Camus, and Beckett. Conducted in English. A reading knowledge of French is extremely useful but not a requirement. LEC.

FREN 406. Introduction to French Culture Through Film. 3 Hours AE42/GE3H / H/W.
Discussion of great masterpieces of French film from the silent era to the present, with a particular emphasis on how film portrays and conveys important aspects of French culture past and present. The works of a variety of film-makers may be covered, and may include among others Georges Melies, Jean Vigo, Jean Renoir, Abel Gance, Rene Clair, Marcel Carné, Jean Cocteau, Alain Resnais, Jean-Luc Godard, Francois Truffaut, Agnes Varda, Louis Malle, Eric Rohmer, and Claude Berri. Films will be shown in French with subtitles in English. Knowledge of French is useful, but not required. LEC.

FREN 410. Survey of French Culture I. 3 Hours AE42/GE3H / H/W / FP.
A survey of the historical, philosophical, literary, and artistic development of France, from the beginning through the 17th century. Prerequisite: FREN 300 and FREN 326. May be designated a KULAC class at the discretion of the instructor. LEC.

FREN 420. Survey of French Culture II. 3 Hours AE42/GE3H / H/W / FP.
Continuation of FREN 410, from the 18th century to the present. Prerequisite: FREN 300 and FREN 326. May be designated a KULAC class at the discretion of the instructor. LEC.

FREN 430. La France d’Aujourd’Hui. 3 Hours AE42/GE3H / H/W / FP.
Social, political, and economic trends from 1939 to present, with emphasis on period since 1968. Prerequisite: FREN 300 and FREN 326. May be designated a KULAC class at the discretion of the instructor. LEC.

FREN 431. French-Speaking World (Outside France). 3 Hours AE42/GE3H / H/W / FP.
Cultures of the some 235 million persons in the five world areas whose everyday and/or official language is French: Canada; Caribbean (e.g., Haiti, Guadeloupe, Martinique); Europe (e.g., Belgium, Switzerland); Africa and Indian Ocean (23 former French or Belgian colonies); Pacific (e.g., Tahiti, New Caledonia). Also French-speaking settlers in the United States (Louisiana, South Carolina, New England, Kansas). French presence in Indo-China and the Near East. Prerequisite: FREN 300 and FREN 326. May be taken concurrently with FREN 300 and/or FREN 326. May be designated a KULAC class at the discretion of the instructor. LEC.

FREN 432. Francophone African Literature. 3 Hours NW AE42/GE3H / H/W.
This course is an introduction of 20th Century African literature written in French, covering selected works by major authors from both sub-Saharan Africa and the Maghreb. Attention will be given primarily to the novel, although some poetry will also be read. Topics and themes include negritude, African identity in the wake of colonialism, Islam, and women’s writing. Classes will be conducted in English. Students may read the texts in French or in translation. (Same as AAAS 432.) Prerequisite: ENGL 102 and a 200-level English course. LEC.

FREN 440. Studies in French Culture: _____. 3 Hours H/W / FP.
Representative topics are: History of Paris, Role of Women in French Literature and Culture, Interrelationships of the Arts, French-speaking African Culture, Culture of French Canada. May be repeated for credit with departmental permission; may also be repeated as part of major in French language and culture. Prerequisite: FREN 300 and FREN 326. May be designated a KULAC class at the discretion of the instructor. LEC.

FREN 450. French Literature of the Middle Ages. 3 Hours AE42/GE3S / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 300 and FREN 326. LEC.

FREN 455. French Literature of the Renaissance. 3 Hours AE42/GE3S / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 300 and FREN 326. LEC.

FREN 460. French Literature of the Seventeenth Century. 3 Hours AE42/GE3S / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 300 and 326. LEC.

FREN 462. French Literature of the Eighteenth Century. 3 Hours AE42/GE3S / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 300 and 326. LEC.

FREN 465. French Literature of the Nineteenth Century. 3 Hours AE42/GE3S / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 300 and 326. LEC.

FREN 470. French Literature of the Twentieth Century. 3 Hours AE42/GE3S / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 300 and 326. LEC.

FREN 480. Studies in French Literature: _____. 3 Hours H/W / FP.
A study of a period, theme, group of authors, or movement. Subject matter will vary; may be taken more than once if subject differs. Prerequisite: FREN 300 and FREN 326. LEC.

FREN 495. Directed Readings in French. 1-15 Hours AE61 / U / FP.
May be taken more than once, total credit not to exceed fifteen hours. Fields not covered by course work, and/or field of student’s special interest. Conferences. Counts as humanities when taken for two or three hours. Prerequisite: Twenty-five hours of French and consent of instructor. IND.

FREN 499. Honors in French. 3 Hours AE61 / H/W / FP.
Various topics in French or Francophone literature or culture. May be taken more than once, total credit not to exceed nine hours. Minimum of six hours of FREN 499 required for B.A. with Honors in French. Student must discuss Honors eligibility and their topic with a faculty member before enrolling. IND.
FREN 500. Advanced French Phonetics. 3 Hours GE3S / H/W / FP.
Advanced theory and practice of French pronunciation. Not open to
students who have taken FREN 310, except by departmental permission.
Prerequisite: FREN 300 or FREN 326 or graduate standing. LEC.
FREN 530. Studies in Film: ______. 3 Hours AE42/AE61 / H/W / FP.
Studies in an aspect of film, a director or group of directors. Emphasis on
French film. Given in French or English. LEC.
FREN 592. French Culture Through Film I, Beginnings to 1950. 3
Hours AE42/AE61 / H/W / FP.
A survey of the major public images of French culture as surveyed in
French silent and sound film from the early 1900s through World War II
and its immediate aftermath. Students will view and discuss a selection
of films that address crucial aspects of French culture such as (but not
limited to) gender, war and peace, daily life, art and artists, tradition and
revolution, city life versus country life, social classes, moral choice, and
individual freedoms. The course will include discussion of the cultural and
artistic significance of major French film movements like Poetic Realism.
In addition to viewing and discussing films, students will read and analyze
the writings of a number of French intellectuals, writers, and artists who
have had a major influence on French culture as it appears in films from
1900-1950. May be taught in French or English. For students who already
have some knowledge of French culture. LEC.
FREN 593. French Culture Through Film II, 1950-Present. 3 Hours
AE42/AE61 / H/W / FP.
A survey of the major public images of French culture as surveyed in
French silent and sound film from 1950 to present. Students will view and
discuss a selection of films that address crucial aspects of French culture
such as (but not limited to) gender, war and peace, daily life, art and
artists, tradition and revolution, city life versus country life, colonialism and
post-colonialism, social classes, moral choice, and individual freedoms.
The course will include discussion of the cultural and artistic significance
of major French film movements like the New Wave. In addition to viewing
and discussing films, students will read and analyze the writings of a number of French intellectuals, writers, and artists who have had a major
influence on French culture as it appears in films from 1950-present. May
be taught in French or English. For students who already have some
knowledge of French culture. LEC.
FREN 600. Studies in: ______. 3 Hours H/W / FP.
Topics vary by semester. May be repeated for credit. Prerequisite:
Departmental permission. LEC.
FREN 610. Theme et Version. 3 Hours H/W / FP.
Exercises in English-French and French-English translation, designed
to enable the student to write with greater clarity and precision in both
languages. LEC.
FREN 620. Expository French Writing. 3 Hours H/W / FP.
Intensive practice in writing French, designed to clarify fine points of
grammar and usage and to aid the student in developing an accurate and
graceful prose style. LEC.
FREN 680. Language Teaching and Advanced Conversation. 2-3
Hours U.
A summer course designed principally for secondary school language
teachers. Discussion of current theory in language acquisition integrated
into an intensive oral review of French. Meets three hours daily for two
weeks; includes lab. (Not applicable toward a major or graduate degree in
French.) LEC.
FREN 681. Language Teaching for Oral Proficiency. 1 Hour U.
A summer course designed principally for secondary school language
teachers. Provides an orientation to proficiency-based models in foreign
language instruction, national standards in the rating of foreign language
proficiency, and curriculum development sessions which address issues
of articulation in foreign language curricula. (Not applicable toward a
major or graduate degree in French.) (Same as GERM 681 and SPAN
681.) LEC.
FREN 700. Old French. 3 Hours.
Introduction to grammar and structure through the reading of
representative works. LEC.
FREN 701. History of the French Language. 3 Hours.
Major aspects of development and growth. Conducted in English. LEC.
FREN 702. Provençal. 3 Hours.
Introduction to grammar and structure of the language through a reading
of representative works from the Troubadour period. LEC.
FREN 703. Structure of Modern French. 3 Hours.
Linguistic analysis of the phonological, morphological, and syntactic
structure of modern French. Description in terms of current theories and
models. Application of linguistic analyses to the teaching of French. LEC.
FREN 704. Methods in French Language Instruction. 3 Hours.
This course provides an overview of current and historical approaches
to foreign language teaching, with reference to the instruction of French.
Past and current trends and methodologies of language instruction are
examined in order to acquaint students with various classroom
approaches. Research findings in second language acquisition are
explored and their implications discussed so as to show how these
findings lead to more effective classroom practices. LEC.
FREN 720. Introduction to Graduate Studies in French. 3 Hours.
This course is an introduction to the skills required of students doing
graduate degrees in French; areas covered include 1) introduction to
literary theory and criticism, 2) bibliography and research methods,
including database management software, 3) preparation and
presentations of a research/conference paper, 4) technology training,
including web design, on-line portfolio, and digital humanities, and 5)
professional ethics and awareness of the academic market and alternative
careers. LEC.
FREN 730. Introduction to French Poetry. 3 Hours.
A detailed introduction to versification, rhetoric, image and symbol as
they apply to the study of poetry. Texts will be chosen from one or more
periods of French literature and will include poems in verse and prose.
Considerations and readings on the history of French poetry, on the
composition of recueils, on poetic theory, and on the relation of poetry to
other genres and media may be incorporated. LEC.
FREN 732. Francophone Studies. 3 Hours.
Selected movements, themes, genres, topics in the cultures and/or
literatures of the French-speaking world outside France. May be repeated
for credit. LEC.
FREN 740. Medieval French Literature. 3 Hours.
Literary history of the period, with discussion of representative works read
for the most part in the original old French. LEC.
FREN 750. French Literature of the Sixteenth Century. 3 Hours.
A survey of the major writers, covering Rabelais, Sève, Louise Labé,
Marguerite de Navarre, Ronsard, Du Bellay, Montaigne, and d'Aubigné.
LEC.
FREN 763. French Drama of the Seventeenth Century. 3 Hours.
Development of baroque and classical French drama, with emphasis on
Corneille, Molière, and Racine. LEC.
FREN 765. Nondramatic French Literature of the Seventeenth Century. 3 Hours.
Esthetics of baroque and classicism. Emphasis on Descartes, Pascal, La Rochefoucauld, Mme de Lafayette, although other authors may be studied. LEC.

FREN 770. French Literature of the Eighteenth Century. 3 Hours.
Special attention paid to Montesquieu, Voltaire, Diderot, and Rousseau; also development of novel and drama. LEC.

FREN 782. French Novel of the 19th Century. 3 Hours.
Emphasis on major novelists of the century: Balzac, Stendhal, Flaubert, and Zola. LEC.

FREN 785. French Romantic Movement. 3 Hours.
Major Romantic writers viewed in context of intellectual, esthetic, and social milieu of period 1800-1850. LEC.

FREN 787. French Post-Romanticism. 3 Hours.
Literary movements developing out of reaction to Romanticism: Realism, Naturalism, Parnassianism. LEC.

FREN 790. Contemporary French Writers. 3 Hours.
Major 20th century authors, stressing Proust, Gide, Giraudoux, Claudel, Sartre, and Camus. LEC.

FREN 792. Proust. 3 Hours.
Principal movements, structures, and tensions of A la recherche du temps perdu. LEC.

FREN 795. Investigation and Conference. 1-3 Hours.
Readings and research projects in French language, literature, and culture for students at the MA level. Directed work to fulfill needs not met by available courses. One-three hours credit in any semester. Maximum credit for M.A.: Three hours. By special departmental permission only. LEC.

FREN 799. Masters Seminar. 1 Hour.
To meet Masters degree requirement for continual enrollment. This course will be graded satisfactory/unsatisfactory. FLD.

FREN 800. Studies in: _____, 3 Hours.
Study of topics not limited to one century. May be repeated for credit. LEC.

FREN 810. Criticism and Critical Methods. 3 Hours.
Literary criticism from historical, theoretical, and practical point of view. LEC.

Selected topics to be specified. Study of form, movements, or themes in the French Novel, not limited to one century. May be repeated for credit. LEC.

Selected topics to be specified. Study of form and theory of the French short story, not limited to one century. LEC.

FREN 842. Arthurian Literature in France. 3 Hours.
Origins and development of Arthurian legend; analysis of major texts. Prerequisite: FREN 700. LEC.

FREN 848. Studies in Medieval French Literature: ____, 3 Hours.
Various movements, themes, or genres. May be repeated for credit. Prerequisite: FREN 700. LEC.

FREN 850. Early Renaissance Literature. 3 Hours.
Emphasis on Rabelais, Marguerite de Navarre, Marot, Maurice Sceve and Louise Labe. LEC.

Various movements, themes, or genres. May be repeated for credit. LEC.

Various movements, themes, or genres. May be repeated for credit. LEC.

FREN 871. Literature of the Enlightenment in France. 3 Hours.
Philosophical thought in 18th century as reflected in literature. Emphasis on philosophies, with discussion of external influences. LEC.

FREN 872. Novel of the Eighteenth Century in France. 3 Hours.
Origins and development to Revolution; thematic analysis with attention to critical attitudes and their influence upon evolution of novel as genre. LEC.

FREN 878. Studies in Nineteenth Century French Literature: _____, 3 Hours.
Various movements, themes, or genres. May be repeated for credit. LEC.

FREN 887. Symbolist Movement in France. 3 Hours.
Works of major symbolist poets, including Baudelaire, Verlaine, Rimbaud, Mallarme, and Valery. LEC.

FREN 888. Studies in Nineteenth Century French Literature: _____, 3 Hours.
Various movements, themes, or genres. May be repeated for credit. LEC.

FREN 897. New Directions in the French Novel. 3 Hours.
Samuel Beckett to the nouveau roman. LEC.

Various movements, themes, or genres. May be repeated for credit. LEC.

FREN 899. M.A. Thesis. 1-6 Hours.
THE.

FREN 900. Seminar in French: _____, 3 Hours.
Topics in literary, linguistic, and cultural research. May be repeated for credit. LEC.

FREN 995. Investigation and Conference. 1-3 Hours.
Readings and research projects in French language, literature, and culture for PhD students. Directed work to fulfill needs not met by available courses. One-three hours credit in any semester. Prerequisite: By Special Departmental Permission only. RSH.

FREN 999. Ph.D. Dissertation. 1-12 Hours.
THE.

Courses

ITAL 100. Italian for Reading Knowledge. 3 Hours U.
Special course for candidates for advanced degrees. Fundamentals of grammar and reading of material of medium difficulty. Open to graduate students and to seniors planning graduate study. Does not satisfy any part of the undergraduate language requirement. Presupposes no previous study of Italian. Conducted in English. LEC.

ITAL 103. Elementary Italian Language and Civilization. 3 Hours H.
A systematic review of the fundamentals of Italian grammar through practice in conversation and writing, with an introduction to Italian culture. Available only to participants in study abroad programs. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. No prerequisite. LEC.

ITAL 107. Elementary Italian Conversation I. 3 Hours U.
First part of a two-course sequence (with 108) for students with no previous study of a foreign language and minimal linguistic background as well as for students in professional schools who plan to participate in
study abroad programs in Italy. Offers knowledge of essential grammar and basic oral communication skills through practice in grammar, listening comprehension, and conversation. Active participation required. Completion of both ITAL 107 and ITAL 108 is equivalent to ITAL 110 and allows students to enroll in ITAL 120. LEC.

ITAL 108. Elementary Italian Conversation II. 3 Hours U.
A continuation of ITAL 107. Second part of a two-course sequence for students with no previous study of a foreign language and minimal linguistic background as well as for students in professional schools who plan to participate in study abroad programs in Italy. Offers knowledge of essential grammar and basic oral communication skills through practice in grammar, listening comprehension, and conversation. Active participation required. Completion of both ITAL 107 and ITAL 108 is equivalent to ITAL 110 and allows students to enroll in ITAL 120. Prerequisite: ITAL 107 or Italian Coordinator's approval. LEC.

ITAL 110. Elementary Italian I. 5 Hours U / F1.
Introduction to Italian language and culture. Essentials of grammar and practice in speaking, understanding, reading, and writing. Active participation required. Five hours of class per week. LEC.

ITAL 120. Elementary Italian II. 5 Hours U / F2.
Five hours of class. Reading of simple texts; diction; speaking; elementary composition. Prerequisite: ITAL 110. LEC.

ITAL 152. Studies in Italian Heritage. 3 Hours AE41/GE11 / H.
A comprehensive, interdisciplinary survey of the ways in which the historical culture of Italy can be found in Lawrence, KS. Emphasis is on politics, sciences, philosophy, media, and immigration. Uses materials from various KU collections. Taught in English. Does not fulfill any requirement in the Italian major or minor. LEC.

ITAL 155. Intensive Basic Italian I. 3 Hours U / F1.
First part of a two-course sequence (with ITAL 156) for students with previous language study or strong linguistic background. Same content as ITAL 110 but accomplished in three hours of class per week. Active participation required. Prerequisite: Previous study of another language or permission of instructor. LEC.

ITAL 156. Intensive Basic Italian II. 3 Hours U / F2.
A continuation of ITAL 155. Second part of a two-course sequence for students with previous language study or strong linguistic background. Same content as ITAL 120 but accomplished in three hours of class per week. Active participation required. Prerequisite: ITAL 155 or permission of instructor. LEC.

ITAL 177. First Year Seminar: _____, 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Italian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ITAL 203. Intermediate Italian Language and Civilization. 3 Hours H.
A systematic review of Italian grammar through practice in conversation and composition, with an introduction to Italian culture. Available only to participants in study abroad programs. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: ITAL 120. LEC.

ITAL 230. Intermediate Italian I. 3 Hours U / F3.
Review and expansion of grammatical structures introduced in Elementary Italian I and II, with continued practice in speaking, understanding, reading, and writing, coordinated with the study of cultural texts. Active participation required. Prerequisite: ITAL 120 or ITAL 156. LEC.

ITAL 240. Intermediate Italian II. 3 Hours U / F4.
Continuation of ITAL 230. (ITAL 240 completes foreign language requirement.) Review and expansion of grammatical structures introduced in Elementary Italian I and II, with continued practice in speaking, understanding, reading, and writing, coordinated with the study of cultural texts. Active participation required. Prerequisite: ITAL 230. LEC.

ITAL 300. Composition and Conversation. 3 Hours H/W / FP.
Study of advanced grammatical structures with extensive practice in writing and conversation. Guided discussions on a variety of contemporary Italian literary, journalistic, and cinematic works. Active participation required. Prerequisite: ITAL 240 or permission of instructor. LEC.

ITAL 301. Introduction to Italian Literature I. 3 Hours AE42/GE3S / H/ W / FP.
Representative works and trends from origins to Renaissance. Prerequisite: ITAL 240 or reading knowledge of Italian. LEC.

ITAL 302. Introduction to Italian Literature II. 3 Hours AE42/GE3S / H/ W / FP.
Representative works and trends from 17th century to present. Prerequisite: ITAL 240 or reading knowledge of Italian. LEC.

ITAL 303. Italian Language and Civilization I. 3 Hours U / FP.
An advanced study of Italian grammar, conversation, composition, with selected aspects of Italian civilization. Available only to participants in the KU summer language institute or semester abroad program in Florence or Rome. Prerequisite: ITAL 240. LEC.

ITAL 304. Italian Language and Civilization II. 3 Hours U / FP.
An advanced study of Italian grammar, conversation, composition, with selected aspects of Italian civilization. Available only to participants in the KU summer language institute or semester abroad program in Florence or Rome. Prerequisite: ITAL 303. LEC.

ITAL 315. Advanced Composition and Conversation. 3 Hours H/W / FP.
Continuation of ITAL 300. Study of advanced grammatical structures with extensive practice in writing and conversation. Guided discussions on a variety of contemporary Italian literary, journalistic, and cinematic works. Active participation required. Prerequisite: ITAL 300 or permission of instructor. LEC.

ITAL 335. Italy and the Italians I. 3 Hours HL AE42/GE3H / H.
Survey of Italian culture with study of geography, history, government, education, Roman archaeology, and music. Lecture, discussion, and supportive readings. Not open to native speakers of Italian. LEC.

ITAL 336. Italy and the Italians II. 3 Hours GE11/GE3H/GE3S / H.
Survey of Italian culture with study of art and architecture, literary masterpieces in translation, science, culinary arts, and cinema. Lecture, discussion, and supportive readings. Not open to native speakers of Italian. LEC.

ITAL 340. Studies in Italian Culture: _____, 3 Hours AE42 / H / FP.
A study of particular aspects of and/or periods in Italian culture. May be repeated for credit with departmental permission. Prerequisite: ITAL 240 or permission of instructor. LEC.

ITAL 405. Italian Literature in Translation: _____, 3 Hours AE42/ GE3S / H/W / FP.
Major works representing various movements, themes, or genres. May be repeated with departmental permission. All work done in English. LEC.

ITAL 410. 19th and 20th Century Short Stories. 3 Hours AE42 / H/W / FP.
A survey of representative short stories of the 19th and 20th Centuries, including Verga, Panzini, Pirandello, Guareschi, Moravia, Calvino,
Bachelor of Arts in French

Why study French, Italian, and Francophone studies?

French, Italian, and Francophone studies ensure that our students succeed in an interconnected world.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

French and Italian Programs

The department offers the major in French, an option in Italian, and an option in French and Italian studies. Prospective majors should consult the department during or before the second semester of the sophomore year.

Students pursuing a major in French or an option in Italian are encouraged to take courses in European studies, European history, art history, and philosophy, as well as English and foreign languages, literatures, and linguistics. Students often combine a major in French or the option in Italian with majors in business, humanities, journalism, the sciences, premedicine, or prelaw.

Language majors are useful in a variety of careers. The study of languages, literatures, and cultures enhances personal growth and broadens professional horizons, allowing fuller participation in an increasingly global community.

First- and Second-Year Preparation

The normal course progression for first- and second-year students considering a major in French is FREN 110, FREN 120, FREN 230, and FREN 240. FREN 230 and FREN 240 may be replaced by FREN 234. Eligible students are encouraged to enroll in honors sections of third-semester French (FREN 231) and fourth-semester French (FREN 241). FREN 300 is the prerequisite for all other 300-level courses, although FREN 300 and FREN 375 may be taken concurrently. FREN 326 is the

Bachelor of Arts in French

Landolfi, and Bigiaretti. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor. LEC.

ITAL 420. 19th and 20th Century Poetry. 3 Hours AE42 / H/W / FP. A survey of 19th and 20th century poets and their works, including Leopardi, Pascoli, d’Annunzio, Govoni, Palazzeschi, Gozzano, Marinetti, Boccioni, Ungaretti, Montale, Quasimodo, and Pasolini. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor. LEC.

ITAL 430. Dante’s Masterpiece. 3 Hours AE61 / H/W / FP. Detailed study of Dante’s epic poem with a close reading of the Inferno. Prerequisite: ITAL 300 or demonstrated knowledge of Italian. LEC.

ITAL 440. Italian Renaissance and Early Modern Literature. 3 Hours H/W / FP. Detailed study of selected masterpieces of the Italian Renaissance from the 13th to the 18th centuries. Prerequisite: ITAL 300 or demonstrated knowledge of Italian. LEC.

ITAL 465. 19th and 20th Century Novels I. 3 Hours AE42/GE3S / H/W / FP. With Italian 466, a survey of representative 19th and 20th century novels including those of Manzoni, Pirandello, Svevo, Deledda, Vittorini, Moravia, Pavese, Pratolini, Buzzati, Ginzburg, and Calvino. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor. LEC.

ITAL 466. 19th and 20th Century Novels II. 3 Hours AE42/GE3S / H/W / FP. May be taken more than once, total credit not to exceed nine hours. Various fields of Italian literature. Prerequisite: Consent of instructor, given only to those having demonstrated ease in reading Italian. IND.

ITAL 499. Honors in Italian. 3 Hours AE61 / H / FP. Various topics in Italian literature or culture. Minimum of three hours of Italian 499 required for a B.A. with Honors in the Italian option of the French degree. Students must discuss Honors eligibility and their topic with a faculty member before enrolling. Honors paper must be written in Italian. LEC.

ITAL 502. Dante’s Divine Comedy I. 3 Hours AE61 / H/W / FP. Detailed study of Dante’s masterpiece. Attention will also be given to such matters as the development of the Italian language at Dante’s period and the relation of the Comedy to Dante’s other works. Prerequisite: Reading knowledge of Italian. LEC.

ITAL 503. Dante’s Divine Comedy II. 3 Hours AE61 / H/W. Continuation of ITAL 502. Prerequisite: Completion of ITAL 502. LEC.

ITAL 695. Graduate Directed Readings in Italian. 1-3 Hours U / FP. May be taken more than once, total credit not to exceed nine hours. Directed readings, conferences with instructor. Prerequisite: ITAL 495 or consent of instructor. IND.
Italian Option

French and Italian Major Prerequisite (3)
Majors must complete courses to gain fourth semester language proficiency. These hours do not contribute to the minimum number of hours required for the major.

Fourth Semester Proficiency. Satisfied by:
ITAL 240 Intermediate Italian II 3
or ITAL 241 Intermediate Italian II, Honors

Italian Core Knowledge and Skills (6)
Majors choosing this option must complete courses as indicated in following areas:

Composition and Conversation. Satisfied by:
ITAL 300 Composition and Conversation 3
ITAL 315 Advanced Composition and Conversation 3

Italian Literature. Satisfied by two courses (6 hours) chosen from the following:
ITAL 301 Introduction to Italian Literature I
ITAL 302 Introduction to Italian Literature II
ITAL 395 Directed Readings in Italian
ITAL 695 Graduate Directed Readings in Italian

Required Electives (0)
Satisfied by four courses (12 hours) chosen from the following:
ITAL 335 Italy and the Italians I
ITAL 336 Italy and the Italians II
ITAL 340 Studies in Italian Culture: ______
ITAL 405 Italian Literature in Translation: ______
ITAL 410 19th and 20th Century Short Stories
ITAL 420 19th and 20th Century Poetry
ITAL 430 Dante's Masterpiece
ITAL 440 Italian Renaissance and Early Modern Literature
ITAL 465 19th and 20th Century Novels I
ITAL 466 19th and 20th Century Novels II
ITAL 480  Studies in Italian Literature: _____
ITAL 502  Dante's Divine Comedy I
ITAL 503  Dante's Divine Comedy II
ITAL 495  Directed Readings in Italian
ITAL 695  Graduate Directed Readings in Italian

One approved 3-credit course offered by another department or program and with significant content related to Italian culture (300-500 level) may be counted toward the Italian BA Option.

Majors are strongly encouraged to study abroad. Please see your advisor about this opportunity.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 24 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**French and Italian Studies Option**

**Fourth Semester Proficiency (0)**
Majors must complete courses to gain fourth semester language proficiency. These hours do not contribute to the minimum number of hours required for the major.

Fourth Semester Proficiency. Satisfied by:
- FREN 240  Intermediate French II
- or FREN 241  Intermediate French II, Honors
- ITAL 240  Intermediate Italian II

**French and Italian Studies Core Knowledge and Skills (18)**
Majors choosing this option must complete courses as indicated in following areas:

**French Grammar and/or Composition**. Satisfied by one of the following:
- FREN 300  Intensive Review of French Grammar
- FREN 350  Applied French Grammar and Composition I
- FREN 352  French for Journalism and Business

**French Conversation**. Satisfied by one of the following:
- FREN 375  Intermediate French Conversation
- FREN 376  Advanced French Conversation

**Italian Grammar and Composition**. Satisfied by two courses (6 hours):
- ITAL 300  Composition and Conversation
- ITAL 315  Advanced Composition and Conversation

French Literature. Satisfied by two courses:
- FREN 326  Introduction to French Literature
- And an additional course chosen from the following:
  - FREN 432  Francophone African Literature
  - FREN 440  Studies in French Culture: _____
  - FREN 450  French Literature of the Middle Ages
  - FREN 455  French Literature of the Renaissance
  - FREN 460  French Literature of the Seventeenth Century
  - FREN 462  French Literature of the Eighteenth Century
  - FREN 465  French Literature of the 19th Century
  - FREN 470  French Literature of the Twentieth Century
  - FREN 480  Studies in French Literature: _____

Italian Literature. Satisfied by two courses (6 hours):
- ITAL 301  Introduction to Italian Literature I
- ITAL 302  Introduction to Italian Literature II

French Culture. Satisfied by one course (3 hours) chosen from the following:
- FREN 410  Survey of French Culture I
- FREN 420  Survey of French Culture II
- FREN 430  La France d’Aujourd’hui
- FREN 431  French-Speaking World (Outside France)
- FREN 440  Studies in French Culture: _____
- FREN 592  French Culture Through Film I, Beginnings to 1950
- FREN 593  French Culture Through Film II, 1950-Present

Italian Culture. Satisfied by one course (3 hours) chosen from the following:
- ITAL 335  Italy and the Italians I
- ITAL 336  Italy and the Italians II

Majors are strongly encouraged to study abroad. Please see your advisor about this opportunity.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 30 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Sample 4-year plans for the BA degree in French and Italian are available here: French Option (p. 1413), Italian Option (p. 1414), or French and Italian Option (p. 1415), or by using the left-side navigation.

**Departmental Honors in French**

Undergraduate students may graduate with honors in French by completing 6 hours of FREN 499, intensive honors tutorials on limited
areas of French or Francophone literature or culture. Consult the department early in the junior year. To begin honors work and to graduate with honors, students must have minimum grade-point averages of 3.25 in all courses and 3.5 in French.

**Departmental Honors in Italian**

Undergraduate students may graduate with honors in Italian by completing 3 hours of ITAL 499 and one approved 3-hour course in a relevant field in addition to the 24-hour requirement for the option. Consult the department early in the junior year. To begin honors work and to graduate with honors, students must have minimum grade-point averages of 3.25 in all courses and 3.5 in Italian.

**Summer Language Institute in Paris**

The department conducts a 6-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L’Étoile, a private language institute in the center of Paris. Before the stay in Paris, students spend 10 days to 2 weeks touring regions such as Normandy, Brittany, and the château country along the Loire River. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

**Summer Program in Florence, Italy**

A semester program is available in cooperation with CIDEF, the language institute of the Université Catholique de l'Ouest in Angers. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information. Year-long programs at French institutions are available through the International Student Exchange Program. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

**Semester and Year Programs in France**

The department conducts a semester program in Rome for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live with Italian families. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

**Semester Program in Florence, Italy**

The department conducts a semester program in Florence for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live with Italian families. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

**BA in French**

Below is a sample 4-year plan for students pursuing the BA in French. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

¹ The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

² Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

³ Typically KU Core Goal 6 is fulfilled by taking a major course approved for this goal. See the list of French courses available to fulfill Goal 6 by visiting the KU Core Website (http://kucore.ku.edu/courses/goal6).

⁴ Typically KU Core Goal 6 is fulfilled by taking a major course approved for this goal. See the list of Italian courses available to fulfill Goal 6 by visiting the KU Core Website (http://kucore.ku.edu/courses/goal6).
Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

1 ITAL 340 Studies in Italian Culture: _____ and ITAL 495 Directed Readings in Italian may be taken in place of ITAL 335 Italy and the Italians I and/or ITAL 336 Italy and the Italians II only by permission of the Italian advisor.

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of junior/senior (300+) KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Summer Language Institute in Paris

The department conducts a 6-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L'Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend 10 days to 2 weeks touring regions such as Normandy, Brittany, and the château country along the Loire River. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

Summer Program in Florence, Italy

The department conducts a 4- or 8-week summer program for elementary, intermediate, or advanced students of Italian. Students take courses in language and culture at an institute where all instructors are native speakers. Students live with Italian families and usually have weekends free to travel. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

Semester and Year Programs in France

A semester program is available in cooperation with CIDEF, the language institute of the Université Catholique de l’Ouest in Angers. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information. A faculty member from University of Kansas, or from Texas A&M University in alternate years, leads the spring semester program.

Year-long programs at French institutions are available through the International Student Exchange Program. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu).

Semester Program in Rome, Italy

The department conducts a semester program in Rome for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live in shared apartments with other students at the institute. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

Semester Program in Florence, Italy

The department conducts a semester program in Florence for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live with Italian families. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

**Master of Arts in French**

The Department of French and Italian offers a comprehensive graduate program (M.A. and Ph.D.) in French and Francophone language, literature, and culture. Our faculty (http://www.frenchitalian.ku.edu/faculty) is dynamic, professionally active, and committed to excellence in scholarship and teaching. Although the major emphasis of teaching and research is French and Francophone literature, the department also offers courses in literary theory, cultural studies, and film. The department offers a balanced emphasis on all periods from medieval through twentieth and twenty-first centuries. Our students represent a diverse group, and we encourage equally applicants from traditional and nontraditional backgrounds. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation. Please visit the Graduate Program page (https://frenchitaliandev.drupal.ku.edu/overview-5) of the department website for additional information.

**Departmental Funding**

While it is not guaranteed, the department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
M.A. Degree Requirements

- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach French at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://frenchitalian.ku.edu/graduate-teaching) of our departmental website.

Additional Funding

Other funding opportunities for graduate students include the Office of Study Abroad’s Springer award; the department’s Cornell, Mahieu, and Magerus fellowships; awards for research abroad; and French university exchanges.

Visit the Graduate Studies website for additional information about funding opportunities (http://graduate.ku.edu/funding) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml) administers grants, loans, and need-based financial aid.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A. Program in French

In addition to the general admission requirements (http://www.graduate.ku.edu/application-process) from the Office of Graduate Studies, applicants should have the equivalent of a major in French at the B.A. level, with a minimum of 9 hours of advanced undergraduate course work in French literature.

Submit your graduate application online (http://www.graduate.ku.edu/ku-graduate-application). For further information regarding the application process, including department-specific deadlines and required supplemental documentation, please visit the Admissions (http://www.frenchitalian.ku.edu/admission) page of the department website, or contact the department’s Graduate Program Coordinator, Morgan Swartzlander, mswartz@ku.edu.

FREN 900   Seminar in French: _____ (2 seminars of 3 hours each)

FREN 899   M.A. Thesis

As part of the 30-hour requirement, students may also take:

- A maximum of two graduate-level courses (up to 6 hours) outside the department. (e.g. Women, Gender and Sexuality Studies, Linguistics, Art History, etc.) This selection should be determined in consultation with the Director of Graduate Studies.
- A maximum of 3 hours of FREN 795 Investigation and Conference.

*In the event that a required course cannot be offered during the time when the student completes coursework, the student will take a substitute course in consultation with the DGS.

2. A reading knowledge of a second Romance language, Greek, Latin, German, Arabic, or other relevant language.

3. Comprehensive written and oral examinations.

Handbook for Graduate Students

A detailed presentation of departmental processes and regulations is included in the department’s Graduate Student Handbook (http://www.frenchitalian.ku.edu/graduate-program-manual).

Summer Language Institute in Paris

The department conducts a 6-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L’Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend 10 days to 2 weeks touring regions such as Normandy, Brittany, and the château country along the Loire River. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

Summer Program in Florence, Italy

The department conducts a 4- or 8-week summer program for elementary, intermediate, or advanced students of Italian. Students take courses in language and culture at an institute where all instructors are native speakers. Students live with Italian families and usually have weekends free to travel. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

Semester and Year Programs in France

A semester program is available in cooperation with CIDEF, the language institute of the Université Catholique de l’Ouest in Angers. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information. A faculty member from University of Kansas, or from Texas A&M University in alternate years, leads the spring semester program.

Year-long programs at French institutions are available through the International Student Exchange Program. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu).

Semester Program in Rome, Italy

The department conducts a semester program in Rome for elementary, intermediate, or advanced students. Students take courses in Italian
language and culture in a private language institute. All instructors are native speakers, and students live in shared apartments with other students at the institute. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

**Graduate Study Abroad**

Graduate students have the opportunity to serve as program assistants for the department’s Paris Summer Language Institute. The department also has a graduate exchange agreement with the Université de Franche-Comté, Besançon, France. The university has a Graduate Direct Exchange program with the École Supérieure de Commerce et d'Administration des Entreprises, Clermont Ferrand, France.

**Doctor of Philosophy in French**

The Department of French and Italian offers a comprehensive graduate program (M.A. and Ph.D.) in French and Francophone language, literature, and culture. Our faculty (http://www.frenchitalian.ku.edu/faculty) is dynamic, professionally active, and committed to excellence in scholarship and teaching. Although the major emphasis of teaching and research is French and Francophone literature, the department also offers courses in literary theory, cultural studies, and film. The department offers a balanced emphasis on all periods from medieval through twentieth and twenty-first centuries. Our students represent a diverse group, and we encourage equally applicants from traditional and nontraditional backgrounds. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation. Please visit the Graduate Program page (http://frenchitalian.ku.edu/overview-phyd-french) of the department website for additional information.

**Departmental Funding**

While it is not guaranteed, the department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach French at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (http://frenchitalian.ku.edu/funding-opportunities) of our departmental website.

**Additional Funding**

Other funding opportunities for graduate students include the Office of Study Abroad’s Springer award; the department’s Cornell, Mahieu, and Magerus fellowships; awards for research abroad; and French university exchanges. Visit the Graduate Studies website for additional information about funding opportunities (http://graduate.ku.edu/funding) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml) administers grants, loans, and need-based financial aid.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the Ph.D. Program in French**

In addition to the general admission requirements (http://www.graduate.ku.edu/application-process) from the Office of Graduate Studies, applicants should have the equivalent of the M.A. in French offered at KU.

Submit your graduate application online (http://www.graduate.ku.edu/ku-graduate-application). For further information regarding the application process, including department-specific deadlines and required supplemental documentation, please visit the Admissions (http://frenchitalian.ku.edu/graduate-admissions) page of the department website, or contact the department's Graduate Program Coordinator, Cari Ann Kreienhop, ckreienhop@ku.edu.

**Ph.D. Degree Requirements**

In addition to the general requirements for the Doctor of Philosophy (http://www.policy.ku.edu/graduate-studies/doctoral-degree-requirments), a student must complete the following departmental requirements:

1. 24 hours of post-M.A. work (exclusive of dissertation hours). Ph.D. students who did not receive their MA in French at KU must complete a total of 30 post M.A. hours, including*:

   FREN 704 Methods in French Language Instruction
   FREN 720 Introduction to Graduate Studies in French

   *Ph.D. students who have taken equivalent courses for either or both of these requirements as part of their M.A. studies elsewhere may petition the department for a waiver of FREN 704 and/or FREN 720 to reduce the total required hours. To determine equivalency, the student must submit course materials from the previous institution. Students petitioning this requirement should first consult with the DGS.

2. 6 hours of graduate-level coursework taken outside the department as an interdisciplinary minor field of concentration. These hours will count towards the 24 to 30 hours of post-MA coursework. Students may also apply these 6 hours of graduate-level coursework outside the department toward one of KU’s Graduate Certificates (e.g. African Studies, Women, Gender and Sexuality Studies, etc.).
3. During their last semester of coursework, Ph.D. students must enroll in 3 hours of FREN 995 Investigation and Conference, with the faculty member who typically will become the student’s dissertation director. These hours will count towards the 24 to 30 hours of post-MA coursework.

4. A successful written and oral comprehensive exam, which will be based on a portfolio containing the following items:
   - The 3 reading lists, highlighting which works have already been read
   - Prospectus draft and bibliography
   - Website. The website will include a professional profile, a CV, and pedagogical materials
   - A research paper that has been published or is publishable

5. At least 1 year of teaching in the department

6. A successful dissertation defense

**Research Skills & Responsible Scholarship Requirement**

The university also requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before attempting the comprehensive oral exam. For French doctoral students, this requirement is met by the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREN 704</td>
<td>Methods in French Language Instruction</td>
<td>3</td>
</tr>
<tr>
<td>FREN 720</td>
<td>Introduction to Graduate Studies in French</td>
<td>3</td>
</tr>
</tbody>
</table>

Proficiency in a second language, which can be a second Romance language, Latin, Greek, German, Arabic, or another language pertinent to the student’s career path and approved by the faculty. (Students specializing in medieval or Renaissance literature are strongly encouraged to take Latin.) Proficiency may be demonstrated by completion of the fourth-semester course (or equivalent) or by examination.

Departmental new graduate student orientation, held each Fall semester during the week prior to the first instructional week of classes.

**Handbook for Graduate Students**

A detailed presentation of departmental processes and regulations may be found in the department’s Graduate Student Handbook (http://www.frenchitalian.ku.edu/graduate-program-manual).

**Summer Language Institute in Paris**

The department conducts a 6-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L’Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend 10 days to 2 weeks touring regions such as Normandy, Brittany, and the château country along the Loire River. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

**Summer Program in Rome, Italy**

The department conducts a semester program in Rome for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers. Students live with Italian families and usually have weekends free to travel. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

**Semester and Year Programs in France**

A semester program is available in cooperation with CIDEF, the language institute of the Université Catholique de l’Ouest in Angers. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information. A faculty member from University of Kansas, or from Texas A&M University in alternate years, leads the spring semester program.

Year-long programs at French institutions are available through the International Student Exchange Program. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu).

**Semester Program in Rome, Italy**

The department conducts a semester program in Rome for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers. Students live with Italian families and usually have weekends free to travel. Consult the department (http://www.frenchitalian.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information.

**Graduate Study Abroad**

Graduate students have the opportunity to serve as program assistants for the department’s Paris Summer Language Institute. The department also has a graduate exchange agreement with the Université de Franche-Comté, Besançon, France. The university has a Graduate Direct Exchange program with the École Supérieure de Commerce et d’Administration des Entreprises, Clermont Ferrand, France.

**Genetics**

**Genetics Graduate Program**

The Genetics Program at KU offers graduate students an integrated and multidisciplinary training in genetics focused on research. Students have the opportunity to interact with a diverse faculty who use modern molecular and mathematical approaches to address many different questions in modern genetics, including molecular and developmental genetics, evolutionary and ecological genetics, and human genetics.

Genetics Program students earn a Ph.D. from a participating home department:

- Anthropology (p. 1108),
- Ecology and Evolutionary Biology (p. 1304),
- Molecular Biosciences, (p. 1637) or
- Philosophy (p. 1661).

A B.S. degree in biology (p. 1202) with a concentration in genetics is also available.

**Summer Program in Florence, Italy**

The department conducts a 4- or 8-week summer program for elementary, intermediate, or advanced students of Italian. Students take courses in language and culture at an institute where all instructors are native
Geography and Atmospheric Science

Why study geography?
Because people, places, and environments interact and evolve in a changing world.

Why study atmospheric science?
The study of atmospheric processes enables us to understand human interactions with the environment.

Career Counseling
A major in geography may lead to a career in cartography, environmental analysis, physical geography, regional analysis, urban and regional planning, or to work that requires some combination of geographic subfields.

Professors in the Department of Geography (http://www.geog.ku.edu) provide career counseling. For general questions, see the undergraduate coordinator. For career counseling, see these professors:

Atmospheric Science
Donna Tucker, 417 Lindley; David Braaten, 413C Lindley; Nate Brunsell, 214A Lindley; David Rahn, 201 Lindley; David Mechem, 230 Lindley; Kees van der Veen, 203 Lindley

Cartography
Margaret Pearce, 404 Lindley

GIS
Xingong Li, 404 Lindley; Stephen Egbert, 217C Lindley; Ting Lei, 207 Lindley

Human and Cultural Geography
Pete Shortridge, 209 Lindley; Chris Brown, 223 Lindley; Peter Herlihy, 202 Lindley; Shannon O’Lear, 219B Lindley; So-Min Cheong, 221 Lindley; Barney Warf, 219C Lindley; Jay Johnson, 402 Lindley; Margaret Pearce, 404 Lindley; Alexander Diener, 413A Lindley; Abel Chikanda, 204 Lindley

Physical and Environmental Geography
William Johnson, 420 Lindley; Kees van der Veen, 203 Lindley; Dan Hirmas, 415A Lindley; Pamela Sullivan, 420 Lindley

Regional Geography and Area Studies
Chris Brown, 223 Lindley; Shannon O’Lear, 219B Lindley; So-Min Cheong, 221 Lindley; Peter Herlihy, 202 Lindley; Pete Shortridge, 209 Lindley; Jay Johnson, 402 Lindley; Abel Chikanda, 204 Lindley

Remote Sensing/Environmental and Land-Use Analysis
Stephen Egbert, 217C Lindley

Undergraduate Programs
Geography integrates information from a variety of sources to study the nature of culture areas, the emergence of physical and human landscapes, and problems of interaction between people and the environment. Mapping and other techniques for gathering and displaying spatial information are integral parts of the field.

The atmospheric science program offers undergraduates a fundamental knowledge of the atmosphere and the weather it generates. Interactions between weather phenomena and human decisions and activities give the subject important applications. Several tracks lead to a Bachelor of Science degree.

Courses for Nonmajors
All geography courses below the 500 level are open to nonmajors, as are several above that level.

Graduate Programs
Geography
The graduate curriculum emphasizes broad geographic training while encouraging in-depth commitment to specialized concentrations. Students also are encouraged to take course work outside the department that complements their degree programs. Credit-hour requirements below are considered minimums for degree programs. Programs are tailored by the student and advisor to conform to the student’s interests and needs, as well as to fulfill the general degree requirements.

The central thrust of the department and the chief capabilities and interests of the faculty fall within these research-teaching areas:

1. Human geography including cultural geography, regional development, and environmental policy;
2. Geographic information science including cartography, geographic information systems, and remote sensing;
3. Physical geography including geomorphology, soils, and biogeography;
4. Regional geography including Africa, East Asia, Russia, Latin America, and the United States; and
5. Atmospheric science and climatology.

Atmospheric Science
The purpose of the program is to expand the student’s knowledge of fundamental atmospheric processes and how the atmosphere interacts with other parts of the environment. Students become familiar with quantitative research methods and how these various approaches can be used to address different problems in atmospheric science. Students gain an in-depth ability to learn specific skills and apply them toward thesis work. These skills consist of, for example, statistical analysis techniques, numerical modeling, or work with atmospheric instrumentation. The breadth of the program and the diverse research topics explored by the faculty are able to accommodate students with a variety of interests.

Courses
ATMO 105. Introductory Meteorology. 5 Hours NE GE3N / N / LFE. A lecture and laboratory course introducing students to the atmosphere, weather and climate phenomena, and their controlling physical processes. Topics covered include: the structure of the atmosphere, energy and energy budgets, climate and climate change, air pollution, clouds and precipitation, pressure and wind systems, severe weather, and weather forecasting. LEC.
ATMO 106. Introductory Meteorology, Honors. 5 Hours NE GE3N / N / LFE.
Honors version of ATMO 105. A lecture and laboratory course introducing students to the atmosphere, weather and climate phenomena, and their controlling physical processes. Topics covered include: the structure of the atmosphere, energy and energy budgets, climate and climate change, air pollution, clouds and precipitation, pressure and wind systems, severe weather, and weather forecasting. Prerequisite: Membership in University Honors Program or by permission of instructor. LEC.

ATMO 177. First Year Seminar: _______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Atmospheric Science. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ATMO 200. Unusual Weather. 3 Hours GE11/GE3N / N.
An introductory course which surveys the general principles and techniques of atmospheric science and illustrates their application through discussions of natural but unusual weather phenomena such as blizzards, hurricanes, tornados, and chinooks, of the effects of air pollution on weather, and of intentional human alteration of the atmosphere. LEC.

ATMO 310. Aviation Meteorology. 3 Hours N.
This course introduces students to meteorological events that affect aircraft operations. Application of meteorological observations including satellite and radar observations are discussed. Students learn about graphical displays of meteorological information. Numerical forecasting models and how their output is applied for aviation is also considered. Forecasting of weather events of particular interest to aviation such as ceiling, visibility, icing and turbulence is emphasized. Prerequisite: ATMO 105 or AE 245 or equivalent. LEC.

ATMO 321. Climate and Climate Change. 3 Hours N.
This course is designed to introduce students to the nature of the Earth's physical climate. It introduces the basic scientific concepts underlying our understanding of our climate system. Particular emphasis is placed on energy and water balances and their roles in evaluating climate change. The course also evaluates the impact of climate on living organisms and the human environment. Finally, past climates are discussed and potential future climate change and its impact on humans is evaluated. (Same as GEOG 321.) Prerequisite: ATMO 105 or GEOG 104. LEC.

ATMO 499. Honors Course in Atmospheric Science. 2-3 Hours AE61 / N.
Open to students with nine hours of upper level credit in Atmospheric Science, an average of at least 3.5 in all Atmospheric Science courses, and an overall average of at least 3.25. Includes the preparation of an honors paper and its defense before a committee of a least two regular faculty members. LEC.

ATMO 505. Weather Forecasting. 3 Hours N.
A first course in synoptic meteorology designed to introduce students to weather analysis and forecasting through the application of hydrodynamic and thermodynamic principles to operational analysis and forecasting. Topics include analysis and interpretation of surface and upper-air observations and data from satellites, radars, and wind profilers; chart and sounding analysis; and three-dimensional, conceptual models of weather systems. The course includes student-led weather briefings and analysis exercises. Prerequisite: ATMO 105 and MATH 125 or MATH 115. LEC.

ATMO 506. Forecasting Models and Methods. 3 Hours N.
Introduction to basic numerical weather prediction methods. Computer programs are used to apply numerical methods to weather data and to evaluate dynamical processes on numerical grids. Meteorological graphics packages are used to analyze current weather data and numerical model output. Current operational numerical models and output products are discussed. Prerequisite: ATMO 505, MATH 126, and EECS 138 or EECS 168. LEC.

ATMO 515. Energy and Water Balance. 3 Hours N.
A study of the distribution and circulation of water in the air-earth system as influenced by atmospheric processes and surface conditions. The solar and terrestrial radiation budget and the water balance at the earth's surface will be applied to agricultural and urban energy and water problems. Prerequisite: ATMO 105 or EECS 138. LEC.

ATMO 521. Microclimatology. 3 Hours N.
A study of climatic environment near the earth-atmosphere interface. Consideration of rural climates in relation to agriculture and urban climates as influenced by air pollution and other factors. Emphasis is on physical processes in the lower atmosphere, distribution of atmospheric variables, the surface energy budget and water balance. (Same as GEOG 521.) Prerequisite: ATMO 105 and MATH 125. LEC.

ATMO 525. Air Pollution Meteorology. 3 Hours N.
A study of background levels and concentrated sources of atmospheric pollution together with considerations of pollution buildup in urban areas as related to particular weather conditions. Inadvertent weather modifications and effects of atmospheric pollution on particular weather events and general climate will be discussed. Prerequisite: ATMO 105, MATH 125, EECS 138 and CHEM 130. LEC.

ATMO 531. Topics in Atmospheric Science: _______. 1-3 Hours N.
An investigation of special topics in atmospheric science. May include topics in dynamic, physical or synoptic meteorology or climatology as well as related topics in earth and physical sciences. May be repeated if topic differs. LEC.

ATMO 605. Operational Forecasting. 2 Hours N.
Students enhance their forecasting expertise by preparing forecasts for presentation to the public through a variety of media. Classroom activities include weekly map discussions and analysis of current weather situations. Forecasting topics such as forecast verification, aviation forecast products, severe weather, flash floods and watches and warnings are examined. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: ATMO 505. FLD.

ATMO 606. Forecasting Practicum - Private Industry. 2 Hours AE61 / N.
Practical experience in private industry working with current and/or archived meteorological data. Possibilities include the preparation of forecasts for TV stations and meteorological consulting firms, and working with environmental consulting firms to assess air pollution hazards. May be repeated two times for credit. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: ATMO 605. INT.

ATMO 607. Forecasting Intern - National Weather Service. 2 Hours AE52/AE61 / N.
Practical experience working in a National Weather Service forecasting center in analyzing weather data and preparing weather forecasts. May be repeated two times for credit. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: ATMO 605. INT.

ATMO 630. Synoptic Meteorology. 3 Hours N.
Interpretation, development, and analysis of synoptic charts. Prerequisite: ATMO 505 and ATMO 640. LEC.
ATMO 634. Physical Climatology. 3 Hours N.
Atmospheric processes are described and discussed in relation to the climate of the earth's surface. Such topics as the greenhouse effect, ozone depletion, and the effect of solar irradiance on climatic change will be included. The physical processes and relationships between various climatic features will be studied. Prerequisite: ATMO 505 and DSCI 301 or MATH 526. LEC.

ATMO 640. Dynamic Meteorology. 3 Hours N.
This course introduces the student to the fundamentals of fluid dynamics necessary for understanding large scale atmospheric motions. Fundamental physical laws of conservation of mass, momentum and energy are examined and applied to atmospheric flows. Rotation in the atmosphere is examined quantitatively in terms of both circulation and vorticity. Prerequisite: MATH 223 and PHSX 214 or PHSX 212 and PHSX 236. LEC.

ATMO 642. Remote Sensing. 3 Hours.
This course is designed to prepare students to effectively use remotely sensed data in operational or research settings for further work in this field. Topics include radiation and radiation transfer applied to active and remote sensing; radiative properties of space, sun, earth and atmosphere; instrument design considerations and operational characteristics; inversion methods for temperature or concentration profiling; surface temperature measurement; cloud top height determination; rain rate and wind velocity measurement; severe weather detection; satellite photograph interpretation. Prerequisite: ATMO 680, MATH 581. LEC.

ATMO 650. Advanced Synoptic Meteorology. 3 Hours N.
Analysis and interpretation of synoptic weather charts including treatment of numerical weather forecasting. Prerequisite: ATMO 630 and ATMO 660. LEC.

ATMO 660. Advanced Dynamic Meteorology. 3 Hours N.
Advanced study of the atmosphere including treatment of the vorticity equation. Prerequisite: ATMO 640 and MATH 220 or MATH 320. LEC.

ATMO 680. Physical Meteorology. 3 Hours N.
This course is designed to enhance the student's understanding of atmospheric processes through the study of these processes at molecular through micro scales. Topics include the properties and behavior of gases; transfer processes; phase change; solar and earth radiation; cloud drop, ice crystal and precipitation formation; atmospheric electricity; stratospheric chemistry. Prerequisite: MATH 223; PHSX 214, or PHSX 212 and PHSX 236. LEC.

ATMO 690. Special Problems in Meteorology. 1-3 Hours N.
Prerequisite: Nine hours in meteorology. IND.

ATMO 697. Seminar for Seniors. 1 Hour AE61 / N.
Current research in atmospheric science will be discussed. May be repeated for a total of two credit hours. Prerequisite: Senior level in atmospheric science. LEC.

ATMO 699. Undergraduate Research. 2 Hours AE61 / U.
Work on a research project under the supervision of a faculty member. Prerequisite: Nine credit hours in atmospheric science. May be taken up to three times for credit. IND.

ATMO 710. Atmospheric Dynamics. 3 Hours.
Presentation of contemporary approaches to the study of atmospheric dynamics. May include methodologies that provide insight into global, synoptic, mesoscale or microscale motions. Prerequisite: ATMO 660 or equivalent. LEC.

ATMO 720. Atmospheric Modeling. 3 Hours.
Illustration and application of contemporary approaches to mathematical and statistical description of atmospheric phenomena. Prerequisite: Consent of instructor. LEC.

ATMO 727. Atmospheric Storms. 3 Hours.
The physical processes and operating principles involved in the development and life cycles of extreme or unusual weather events including tornadoes, blizzards, lightning displays, and tropical storms. Prerequisite: Consent of instructor. LEC.

ATMO 731. Advanced Topics in Atmospheric Science: ____. 1-3 Hours.
Advanced investigation of special topics in atmospheric science. May include topics in dynamic, physical or synoptic meteorology or climatology as well as related topics in earth and physical sciences. May be repeated if topic differs. LEC.

ATMO 750. Numerical Weather Prediction. 3 Hours.
An exploration of the mathematical methods used to describe the current state of the atmosphere and to predict future states. Current operational numerical weather prediction techniques will be included. Prerequisite: ATMO 660. LEC.

ATMO 825. Seminar in Climatology. 2-3 Hours.
LEC.

ATMO 827. Seminar in Atmospheric Science. 1-3 Hours.
LEC.

ATMO 898. Readings in Atmospheric Science. 1-4 Hours.
Independent readings of special problems in Atmospheric Science. IND.

ATMO 899. Master's Thesis. 1-10 Hours.
Graded on a satisfactory/unsatisfactory basis. THE.

ATMO 998. Research in Atmospheric Science. 1-5 Hours.
Individual investigation of special problems in Atmospheric Science. RSH.

ATMO 999. Doctoral Dissertation. 1-10 Hours.
Enrollment course for writing doctoral dissertation in Atmospheric Science. Graded on a satisfactory/unsatisfactory basis. THE.

Courses

GEOG 100. World Regional Geography. 3 Hours SC AE42 / S.
An introductory survey of the environmental setting, historically formative periods, and present-day issues that distinguish the major culture areas of the world. LEC.

GEOG 101. World Regional Geography, Honors. 3 Hours SC AE42 / S.
An introductory survey of the environmental setting, historically formative periods, and present-day issues that distinguish the major culture areas of the world. Open only to students in the College Honors Program, or by consent of instructor. LEC.

GEOG 102. Principles of Human Geography. 3 Hours SC AE42/GE3S / S.
An examination of the relationships between humans and their environments. The course introduces students to basic concepts in human geography relating to economic activities, landscapes, languages, migrations, nations, regions, and religions. Serves as the basis for further course work in cultural, economic, political, population, and urban geography. LEC.

GEOG 103. Principles of Human Geography, Honors. 3 Hours SC AE42/GE3S / S.
An introduction to how human societies organize space and modify the world about them. Resultant patterns on the landscape are interpreted
through principles of space perception, cultural ecology, diffusion, land use, and location theory. Comparisons are made between urban and rural areas and between subsistence and commercial societies. Open to students who have been accepted into the College Honors Program. LEC.

GEOG 104. Principles of Physical Geography. 3 Hours NE GE3N / N. The components of the physical environment are discussed in order to familiarize the student with their distributions and dynamic nature. Major topics include the atmosphere, landforms, soils, and vegetation together with their interrelationships and their relevance to human activity. This course and GEOG 105 together satisfy the laboratory science requirement. Both courses are required for geography majors. LEC.

GEOG 105. Introductory Laboratory in Physical Geography. 2 Hours U / LFE. A laboratory course designed to complement GEOG 104 in satisfying the laboratory science requirement. It is required for geography majors. Laboratory exercises include a wide variety of analyses using data on the atmosphere, hydrosphere, biosphere, and lithosphere. Prerequisite: GEOG 104, which may be taken concurrently. LAB.

GEOG 107. Principles of Physical Geography, Honors. 3 Hours NE GE3N / N. Interactive processes among the systems of the earth are studied and discussed. Major topics include vegetation, soils, landforms, water, the atmosphere, and cycles of matter between these portions of the earth. The course includes lectures and critical discussions to address study problems in physical geography. Open only to students in the University Honors Program or by consent of the instructor. LEC.

GEOG 110. Geopolitics in the News. 3 Hours S. This course examines leading contemporary geopolitical events and processes through the lens of geography. It focuses on major political conflicts and struggles as they play out unevenly over space, contextualizing them within broader themes of neocolonialism, globalization, and the international system of nation-states. Emphasis is put on making issues commonly found in the media understandable to students by providing a relevant historical background and drawing comparisons among events. LEC.

GEOG 111. Maps and Mapping. 4 Hours H / LFE. How do people find their way from here to there or just around? Simple--they use maps. Maybe not maps on pieces of paper but maps in their heads: mental maps. Different people have different maps, even of the same place. Mapping is an ancient form of communication and maps have created ideas and opinions, promoted understanding and confusion. A non-technical approach to the transformation of space onto maps, to their content and structure, and their role and impact in human activity, past and present. Neither background in geography nor artistic skills are required. LEC.

GEOG 140. Global Environment I: The Discovery of Environmental Change. 5 Hours GE3S / U / LFE. This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 140 and HIST 140.) LEC.

GEOG 142. Global Environment II: The Ecology of Human Civilization. 5 Hours GE3S / U. This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 142 and HIST 142.) LEC.

GEOG 144. Global Environment I: The Discovery of Environmental Change, Honors. 5 Hours U / LFE. This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 144 and HIST 144.) Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

GEOG 145. Global Environment II: The Ecology of Human Civilization, Honors. 5 Hours U. This interdisciplinary course and its laboratory sections survey the history of humanity's relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity's engagement with the global environment using historical and present-day examples. (Same as EVRN 145 and HIST 145.) Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

GEOG 148. Scientific Principles of Environmental Studies. 3 Hours GE3N / N. This course presents an overview of our understanding of environmental processes and issues. Topics include scientific principles, resource issues, pollution and global change, among others. This course gives students a rigorous understanding of interactions between humans and their environment and provides students with a scientific basis for making informed environmental decisions. (Same as EVRN 148.) LEC.

GEOG 149. Scientific Principles of Environmental Studies, Honors. 3 Hours NB GE3N / N. This course presents an overview of our understanding of environmental processes and issues. Topics include scientific principles, resource issues, pollution and global change, among others. This course gives students a rigorous understanding of interactions between humans and their environment and provides students with a scientific basis for making informed environmental decisions. An honors section of GEOG 148 designed for superior students. (Same as EVRN 149.) Prerequisite:
GEOG 150. Environment, Culture and Society. 3 Hours SC GE3N / S.
An introduction to geographic approaches to the study of the environment, emphasizing societal and cultural factors that influence human interaction with the biosphere, hydrosphere, lithosphere, and atmosphere. The course involves analysis of a broad range of contemporary environmental issues from the local to global scales. (Same as EVRN 150.) LEC.

GEOG 177. First Year Seminar: ___. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Geography. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

GEOG 210. Computers, Maps, and Geographical Analysis. 3 Hours N.
This course will introduce students to a number of different methods for the visualization, representation, and analysis of geographical phenomena. Both field and computer-based techniques will be employed to demonstrate the concept of experimental design and the collection, processing, and analysis of geographical data. Topics include: 1) the unique nature of geographic data; 2) mapping techniques and technologies; 3) geographical information systems; 4) remote sensing (aerial photography and satellite imagery); and 5) methods of geographical analysis (e.g., statistic and spatial modeling). LEC.

GEOG 304. Environmental Conservation. 3 Hours NE GE3N / N.
A survey of current methods of describing and modeling the function, structure, and productivity of natural and anthropogenically modified earth resource systems, along with a discussion of contemporary views of what constitutes a natural landscape. Fundamental natural science principles about the interplay among lithospheric, atmospheric, hydrospheric, and biospheric components of earth systems are emphasized. Uses of natural resources, including fossil fuels, minerals, and water are described with attention to the earth's total energy budget. Human activities that affect preservation, conservation, and multiple uses of earth regions receive attention. Systems under stress through population and other contemporary forces serve as examples. (Same as EVRN 304.) LEC.

GEOG 311. Map Conception and Development. 4 Hours N / LFE.
An examination of the map process with emphasis on two areas: 1) the mental map formed during interaction with the environment and 2) the map as a physical object which emerges from mapping activity. A local area will serve as the laboratory/environment for the mapping activity including production and use. LEC.

GEOG 316. Methods of Analyzing Geographical Data. 4 Hours N / LFE.
Introduces the benefits and limitations of using quantitative methods to analyze geographical problems. Covers traditional descriptive (e.g., measures of central tendency) and inferential statistics (e.g., hypothesis testing) but also inherently geographical approaches such as shape and pattern analysis, and spatial autocorrelation. Laboratory emphasizes using the computer to explore and analyze geographical problems. LEC.

GEOG 319. Topics in Techniques: ___. 1-3 Hours N.
An investigation of special topics in Techniques. May include coursework in cartography, GIS, or remote sensing. May be repeated if topic differs. LEC.

GEOG 321. Climate and Climate Change. 3 Hours N.
This course is designed to introduce students to the nature of the Earth's physical climate. It introduces the basic scientific concepts underlying our understanding of our climate system. Particular emphasis is placed on energy and water balances and their roles in evaluating climate change. The course also evaluates the impact of climate on living organisms and the human environment. Finally, past climates are discussed and potential future climate change and its impact on humans is evaluated. (Same as ATMO 321.) Prerequisite: ATMO 105 or GEOG 104. LEC.

GEOG 331. Regional Geomorphology of the United States. 3 Hours N.
This course examines forces and processes affecting the earth's surface, and furthermore identifies and describes the physiographic regions that are the result of these processes. Special efforts are made to explore various photographic resources, satellite imagery, and internet sources or geomorphic data from a regional perspective since there is no wholly satisfactory text available for the course. A research paper is required. Prerequisite: An introductory earth science course or consent of instructor. LEC.

GEOG 332. Glaciers and Landscape. 3 Hours N.
Elements from glaciology, geology, and climatology are merged to examine the interactions between glaciers and their natural environments, including the processes involved in glacier formation, the relationship between glaciers and climate, the mechanisms of glacier flow, and interpretation of the Earth's glacial record. Emphasis is placed on an interdisciplinary approach to study environmental change and paleoclimate reconstruction. Prerequisite: GEOG 104 or GEOL 101, or consent of instructor. LEC.

GEOG 335. Introduction to Soil Geography. 4 Hours N / LFE.
This course focuses on the properties and processes of soils as they occur in their environment. The student is introduced to the nature of soil as it functions as a body: genesis of soils; properties of soil solids, especially colloids; soil chemical composition, properties, and reactions; interaction between soil, liquid, and gaseous components in soils; plant-soil-water relationships; biological interactions with soil; classification of soils; and the distribution of soils on the landscape. Not open to students who have taken EVRN 535 or GEOG 535. (Same as EVRN 335.) Prerequisite: GEOG 104 or GEOL 101 or consent of instructor; BIOL 100 and CHEM 130 or CHEM 190 recommended. LEC.

GEOG 336. Introduction to Environmental Hydrology and Water Resources. 3 Hours N.
Water is vital to life on earth. In this course we cover components of the water or "hydrologic" cycle, how management has altered them, and how they are predicted to change with the changing climate. We discuss the evolution of water policy, its implications for managements and the economic impact of human perturbation on water. We study the physical processes that govern the water cycle, learn how they are measured, and estimate hydrologic fluxes. (Same as EVRN 363.) Prerequisite: GEOG 104 or GEOL 101 or GEOL 102. LEC.

GEOG 338. Introduction to River Systems. 3 Hours N.
A course of fluvial geomorphology. Topics include the drainage basin, fluvial processes, river channel adjustment and forms, human disturbance and geomorphic response, and research methods in fluvial geomorphology. Field trip. Prerequisite: GEOG 104. LEC.

GEOG 339. Topics in Physical Geography: ___. 1-3 Hours N.
An investigation of special topics in Physical Geography. May include coursework under headings of soils, vegetation, climate, or geomorphology. May be repeated if topic differs. LEC.

GEOG 350. Physical Geography of Africa. 3 Hours N.
This course is a survey of the basic physical features of the African continent including structure and relief, rivers and lakes, soils and mineral resources. It includes characteristics and processes of African climates, and the ecology of Africa's four major biomes: tropical rain forest, savanna, steppe, and desert. Climatic and environmental variations...
of the past, emergence of humankind, and development of pastoral and farming systems are discussed. Contemporary environmental concerns also include deforestation and desertification, the impacts of drought, methods for monitoring African environments, and Africa's prospects in a 21st century suffering from global warming. (Same as AAAS 350.) LEC.

GEOG 351. Africa's Human Geographies. 3 Hours NW AE42/GE3H/GE3S / S/W.
An introduction to historical, cultural, social, political, and economic issues in Africa from a geographic perspective. The course begins with the historical geography of humanity in Africa, from ancient times through to the present. Other topics include cultural dynamics, demography, health, rural development, urbanization, gender issues, and political geography. Case studies from Eastern and Southern Africa will be used to illustrate major themes. (Same as AAAS 351.) LEC.

GEOG 352. Economic Geography. 3 Hours S.
This course offers an overview of contemporary economic geography with an underlying theme of uneven regional development. Topics examined include: the historical context in which capitalism emerged; the major theoretical approaches used to understand the temporal and spatial dynamics of capitalist society; a series of case studies of different economic sectors; and the global economy, including its development with respect to colonialism, neocolonialism, international trade, third world development, and population growth. LEC.

GEOG 354. Globalization. 3 Hours S.
This course is designed to provide a broad overview of some major facets of the historical, economic, political, cultural, and geographical dimensions of contemporary globalization, the process by which individual regions and nations have become progressively linked to, and structured by, the world-system of states and markets, and the cultural contradictions associated with this process. (Same as AAAS 354.) LEC.

GEOG 355. History and Philosophy of Geographic Information Science. 3 Hours N.
An examination of the development of geographic information science (GISc) from its roots in traditional geography, cartography, and remote sensing to modern geographic information systems (GIS). GIS is explored as a new scientific instrument, a "macroscope" for representing and analyzing complex earth processes, both physical and cultural. The societal benefits and risks of GIS are demonstrated and discussed. LEC.

GEOG 358. Principles of Geographic Information Systems. 4 Hours N / LFE.
An introduction to computer-based analysis of spatial data. Covers basic principles of collecting, storing, analyzing, and displaying spatial data. Emphasis is on problem-solving activities using common spatial analytical techniques (e.g., map overlay). The student will gain extensive hands-on experience with state-of-the-art GIS software. LEC.

GEOG 370. Introduction to Cultural Geography. 3 Hours GE3S / H.
Charts some of the major lines of research in cultural geography, including critical theory, political economy, poststructuralist thought, feminism, and global consumption. Through fieldwork, diverse research methods are applied to issues such as community development, cultural patterns on the landscape and global impacts on local economies. Prerequisite: GEOG 100, GEOG 101, GEOG 102 or GEOG 103; or consent of instructor. LEC.

GEOG 371. Environmental Geopolitics. 3 Hours S.
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as EVRN 371 and GIST 371.) LEC.

GEOG 372. Environmental Policy. 3 Hours N.
An historical and analytical study of the formulation, implementation, and consequences of environmental policy in the United States. Attention is directed at relevant interest groups, issues specific to both rural and urban populations, relationships between national policies and international organizations concerned with environmental problems. Prerequisite: GEOG 148 or EVRN 148; and either EVRN 103 or HIST 103, EVRN 347 or HIST 347, or GEOG 150 or EVRN 150. LEC.

GEOG 373. Political Geography. 3 Hours S.
Political Geography is concerned with spatial dynamics of power. It concerns issues such as territory, boundaries, and identity as well as feminist, post-colonial, geopolitical, and environmental perspectives. This class will consider the development of this subfield, the role it has played in imperial expansion, and ways in which more recent critiques have shaped political geography to be a means of understanding different forms of power and its relationship to people and places. Prerequisite: GEOG 100 or GEOG 102 or equivalent or consent of instructor. LEC.

GEOG 375. Intermediate Human Geography. 3 Hours S.
An examination of processes of cultural-economic interaction and patterns of human activity on a global scale. The topics cover the whole spectrum of human geography, with focus on urban-economic development, innovation and diffusion, and trade. Each week the third hour will be devoted to discussion of topics dealt with in lectures presented during the first two hours. Prerequisite: Introductory course in Geography or consent of the instructor. LEC.

GEOG 377. Urban Geography. 3 Hours S.
This course explores the city from the multiple perspectives of its inhabitants. The cultural viewpoints of place, gender, age, and ethnicity are stressed. Traditional topics such as urban hierarchy, functions of the city, suburbanization, and ongoing changes in core and peripheral areas also receive attention. The distinctive landscapes of individual North American cities are emphasized, but examples also are drawn from throughout the world. LEC.

GEOG 379. Topics in Cultural Geography: ______. 1-3 Hours S.
An investigation of special topics in Cultural Geography. May include coursework under headings of culture theory, material culture, language, foodways, or religion. May be repeated if topic differs. LEC.

GEOG 390. Geography of the United States and Canada. 3 Hours S.
A study of the different physical, economic, and cultural settings in the United States and Canada which form the basis for the various forms of livelihood. Emphasis on the United States. (Same as AMS 390.) Prerequisite: An introductory geography course or background in the United States or Canadian history, social science, or culture or consent of instructor. LEC.

GEOG 395. Environmental Issues of: ______. 3 Hours S.
This regional geography course examines contemporary environmental issues of a particular region of the world based on the expertise of the professor. Course emphasis is on the interaction of natural, socio-economic, and cultural factors of development that give rise to environmental problems. Students learn how local, national, and international government and non-governmental stakeholders address environmental problems. Course may be repeated with different professors. LEC.

GEOG 396. East Asia. 3 Hours NW AE42/GE3H/GE3S / S/W.
This course is an introduction to the contemporary politics, economy, and culture of Korea, China, and Japan in the context of globalization. In addition to the discussion of individual countries, the course examines the cross-cutting themes such as international relations, cultural exchange, and economic development in the region of East Asia. LEC.
GEOG 397. Geography of Kansas and the Plains. 3 Hours S.
A study of the different physical, economic, and cultural settings in Kansas and the Plains that form the basis for various kinds of livelihood. LEC.

GEOG 399. Topics in Regional Studies: ______. 1-3 Hours S.
An investigation of special topics in Regional Studies. May include coursework related to a specific country or region. May be repeated if topic differs. LEC.

GEOG 410. Human Biogeography, Honors. 3 Hours N.
Principles of evolution and earth change are used to examine distributions of human populations, wealth, and resources. Readings from the current literature will be included. Lecture and discussion. (Same as BIOL 410.) Prerequisite: BIOL 152 or 153 or GEOG 107 and membership in the University Honors Program or consent of instructor. LEC.

GEOG 418. Workshop in Production Cartography. 1-3 Hours AE61 / N.
Theory and practice of map production and other related graphics using the latest graphic and GIS software. Projects vary but include the processes of design and production, editing and quality control, and a final printed or operational product. Involves a weekly consultation session and laboratory time in KU Cartographic GIS Services. Prerequisite: Completion of GEOG 311 and consent of instructor. LEC.

GEOG 433. Biogeography Field and Laboratory Techniques. 3 Hours N.
This course provides undergraduate students with practical experience in field data collection techniques and laboratory data analysis methods. During the first half of the semester, students work in the field using a variety of methods to measure such vegetation characteristics as: cover, density, biomass, leaf area, and canopy architecture. Students gain experience in the use of field instruments including a spectroradiometer, and techniques for quantifying biophysical attributes of vegetation. During the later part of the course, students learn to summarize their field data and examine relationships between the vegetation attributes and measurements made using remote sensing instruments. Recommended: GEOG 316 or an introductory statistics equivalent. (Same as EVRN 433.) FLD.

GEOG 458. Geographical Information Systems: ______. 1-6 Hours N.
An introduction to the organization and components of geographic information systems and their software. Fundamental concepts and their implementation with applications to physical and human systems. LEC.

GEOG 490. Geographic Internship. 1-6 Hours AE61 / N.
Supervised practical experience. The student submits a proposal describing the internship prior to enrollment. Upon acceptance, regularly scheduled meetings with the advisor provide assistance, guidance and evaluation of progress in the professional experience. A written summary of the experience or outcomes of the research project are prepared independently by the student, a representative of the host agency, and a final report or product. Involves a weekly consultation and laboratory time in KU Cartographic GIS Services. Prerequisite: Completion of GEOG 311 and consent of instructor. LEC.

GEOG 498. Special Topics in Geography: ______. 1-5 Hours U.
Prerequisite: Fifteen hours of geography and permission of instructor. INT.

GEOG 499. Honors Course in Geography. 2-3 Hours AE61 / U.
Open to students with nine hours of upper level credit in geography, an average of at least 3.5 in all geography courses, and an overall average of at least 3.25. Includes the preparation of an honors paper and its defense before a committee of at least two regular faculty members. IND.

GEOG 500. Senior Capstone in Geography. 3 Hours AE61 / N.
The capstone project provides students with a broad-based, interdisciplinary educational experience and allows them to integrate and synthesize the knowledge they have gained in their studies. The course is designed to achieve several objectives: provide an overview of geography as a unified, coherent discipline with multiple perspectives, emphasize writing and analytical skills, introduce students to a major research project that integrates elements of physical and human geography, and cultivate knowledge of future professional development. Graduate students may take this course by permission only. Prerequisite: Nine hours in Geography and status as a senior major in the department; or permission of instructor. LEC.

GEOG 510. Human Factors. 4 Hours N.
An introduction to the concepts and theories underlying the study of human-technological systems. Human-machine interfaces and system properties and the environment are considered. Lecture-discussion sessions are supplemented by computer-supported laboratory and research activities. LEC.

GEOG 511. Intermediate Cartography: ______. 1-6 Hours N / LFE.
An investigation of special topics in cartography. Can be repeated for different topics. Prerequisite: A course in cartography and consent of instructor. LEC.

GEOG 513. Cartographic Design. 3 Hours S.
A study of graphic elements and their role in the visual and perceptual structure of the map image. Concepts and principles of design are stressed with particular emphasis on the figure-ground relationships, color and lettering. Prerequisite: GEOG 311. LEC.

GEOG 514. Visualizing Spatial Data. 4 Hours N / LFE.
Students use Visual Basic or other currently prominent programming language to visualize spatial data. Early projects cover basic principles such as color manipulation and spatial transformations. Later projects involve developing more sophisticated software for data presentation, data exploration, and map animation. Prerequisite: Some experience with Visual Basic or other programming language. LAB.

GEOG 516. Applied Multivariate Analysis in Geography. 3 Hours N.
An introduction to the application of multivariate statistical analysis in geography. Techniques covered include univariate and multivariate analysis of variance, multiple regression, logistic regression, principle components analysis, and spatial regression. Practical applications of the techniques in a geographical research context are emphasized. Students will learn how to use statistical packages such as SPSS. Prerequisite: GEOG 316 or equivalent. LEC.

GEOG 517. Data Handling and Map Symbolization. 3 Hours N.
An analysis of methods for manipulating and symbolizing spatial data. Techniques studied include dot, choropleth, proportional symbols, and isarithmic (contour) mapping. Topics covered include data classification, the use of color, and automated methods of interpolation (triangulation, inverse distance, and kriging). Emphasis is on developing maps that can be presented to the general public, although some consideration is given to visualization software that can be utilized by individuals to explore spatial data. Prerequisite: GEOG 111 or GEOG 210 or GEOG 311. LEC.

GEOG 519. History of Cartography. 3 Hours H.
A history of mapmaking worldwide from its origins to the present day. Emphasis on maps as historical records of evolving civilizations and cultural landscapes and methods of studying early maps. (Same as HIST 546.) LEC.

GEOG 521. Microclimatology. 3 Hours N.
A study of climatic environments near the earth-atmosphere interface. Consideration of rural climates in relation to agriculture and urban climates as influenced by air pollution and other factors. Emphasis is on physical processes in the lower atmosphere, distribution of atmospheric
variables, the surface energy budget, and water balance. (Same as ATMO 521.) Prerequisite: ATMO 105 and MATH 125. LEC.

GEOG 526. Remote Sensing of Environment I. 4 Hours N / LFE. Introduction to study of the environment through air photos and satellite imagery, including principles of remote sensing, interactions of electromagnetic energy with the atmosphere and earth's surface, aerial photography, satellite systems, and sensors (electro-optical, thermal, and radar). Emphasis in the latter part of the course is on such applications as global monitoring, land cover mapping, forestry, agriculture, and oceanography. Laboratory emphasizes visual interpretation of aerial photography and satellite imagery and an introduction to digital image processing in the department's NASA Earth Science Remote Sensing Laboratory. (Same as EVRN 526.) Prerequisite: MATH 101 or equivalent. GEOG 358 recommended. LEC.

GEOG 531. Topics in Physical Geography: ____. 1-3 Hours N. An investigation of special topics in physical geography. May include specific course work under the headings of geomorphology, climatology, soils, vegetation, quaternary, paleoenvironments, hydrology, etc. May be repeated, if topic differs. LEC.

GEOG 532. Geoarchaeology. 3 Hours N. Application of the concepts and methods of the geosciences to interpretation of the archeological record. The course will focus primarily on the field aspects of geoarchaeology (e.g., stratigraphy, site formational processes, and landscape reconstruction), and to a lesser extent on the array of laboratory approaches available. (Same as ANTH 517.) Prerequisite: GEOG 104, ANTH 110, or ANTH 310. LEC.

GEOG 535. Soil Geography. 4 Hours N / LFE. A broad study of the principles and properties of soils and their distribution on the landscape. Topics covered include: pedology, clay mineralogy, soil physics, soil chemistry, management of soils, soil biology, taxonomy, and soil geomorphology. Laboratory section and a field project are required. Not open to students who have taken GEOG 335 or EVRN 335. (Same as EVRN 535.) Prerequisite: GEOG 104 or GEOL 101 or consent of the instructor; BIOL 104 and CHEM 130 or 190 recommended. LEC.

GEOG 537. Elements of Plant Geography. 3 Hours N. An introduction to spatial and temporal variation in natural plant populations and communities. Included is an introduction to methods of analysis, and an overview of structure and process in the earth's major biomes. Prerequisite: GEOG 331; or an introductory biology/botany course and GEOG 104; or consent of instructor. LEC.

GEOG 538. Soil Chemistry. 3 Hours N / LFE. This course examines the chemical properties and processes of soils and methods of evaluation. Topics include soil and solution speciation, mineral solubility, soil colloidal behavior, ion exchange, surface complexation, soil salinity and sodicity, soil acidity, oxidation-reduction reactions, and kinetics of soil chemical processes. (Same as EVRN 538.) Prerequisite: GEOG 335 or GEOG 535 or EVRN 335 or EVRN 535, CHEM 135 or CHEM 195, MATH 125 or consent of the instructor. LEC.

GEOG 540. Ecohydrology. 3 Hours N. Ecohydrology is the discipline that answers real world hydrologic and biologic questions through integrating knowledge from hydrology, ecology, atmospheric science and biogeochemistry. We focus on the key concepts, methodological approaches and analytical techniques utilized in ecohydrology to understand and quantify: plant water use, evolution of hydrologic properties, groundwater-surface water interactions, controls on landscape patterns, spatial and temporal patterns of soil moisture and nutrient concentrations, and vegetation competition. Students should leave the class having developed critical skills in: 1) reviewing scientific literature, 2) collecting environmental samples, 3) analyzing ecohydrologic data, 4) writing a scientific research paper, 5) working collaboratively and independently. (Same as EVRN 540.) Prerequisite: GEOG 104 or GEOL 101 or GEOL 102, or EVRN 363 or GEOG 336 or permission of instructor. LEC.

GEOG 541. Geomorphology. 4 Hours N / LFE. A critical study of land forms in relation to tectons, climatic environment, and geologic processes. The use of geomorphic methods in the interpretation of Cenozoic history is emphasized. Laboratory exercises in analysis of field observations, maps, and photographs. Required field trip and fee. (Same as GEO 541.) Prerequisite: GEO 101 and GEO 103, GEO 104 and GEO 105, or GEO 103 and GEO 304. LEC.

GEOG 550. Environmental Issues in Africa. 3 Hours S. Acquaints students with the complexities of debates on environmental problems in Sub-Saharan Africa. Topics addressed may include deforestation, desert expansion, wildlife conservation, soil erosion, climate change, coral reef destruction, water resources development, mangrove preservation, the environmental effects of war, industrialization, and urbanization. Class presentations and projects synthesize the perspectives of both human and physical geography. (Same as AAAS 551.) Prerequisite: GEOG 104 or permission of instructor. LEC.

GEOG 552. Topics in Urban/Economic Geography: ____. 1-3 Hours S. An investigation of special topics in urban/economic geography. May include specific course work under the headings of energy, economic development, international trade, environmental perception, housing, transportation, and migration. May be repeated. LEC.

GEOG 553. Geography of African Development. 3 Hours NW AE42/GE3H/GE3S / S. Acquaints students with the values of social parameters of African agricultural and pastoral practice. Topics include customary land rights, African perspectives on the natural world, gender issues in African agriculture, and the urbanization of African cultures. The course also contrasts African views with those of Western development practitioners and donor agencies. Case studies from different countries are used to highlight the continent's regional differences. (Same as AAAS 553.) LEC.

GEOG 556. Geography of the Energy Crisis. 3 Hours S. A discussion and analysis of the basic facts and causes of energy problems on a national and world scale. Examines current production, consumption, efficiency, reserves, conservation, and other energy policy options, including adjustments that will affect consumer use, national politics, and strategic issues. Prerequisite: GEOG 102 or GEOG 375. LEC.

GEOG 557. Cities and Development. 3 Hours S. An intermediate level course in urban geography, with an emphasis on cities in the developing world. Example cities in Latin America and the Caribbean, Sub-Saharan Africa, the Middle East, South Asia, and/or Southeast Asia may be examined. The main focus is on the intersection between urbanization and economic development, but social, political, and cultural aspects of development in cities are considered. Other topics include the geographic impacts of European colonialism, urbanization and industrialization, rural-to-urban migration, urban structure and spatial dynamics, urban planning, and environmental sustainability. (Same as AAAS 557.) LEC.

GEOG 558. Intermediate Geographical Information Systems. 4 Hours N / LFE. An intermediate level course in geographic information science designed for advanced undergraduate and graduate level students who already have an introductory understanding of GIS. Emphasis will be placed on the application of spatial analytical techniques to geographical problem-
solving. Topics include spatial data structures, interpolation techniques, terrain analysis, cost surfaces, and database management technique. Students will apply knowledge gained in lecture and reading to natural resource, urban, and scientific applications using state-of-the-art GIS software. Prerequisite: GEOG 358 or consent of instructor. LEC.

GEOG 560. GIS Application Programming. 3 Hours N.
This course teaches programming within Geographic Information Systems. Students learn how to customize GIS applications to automate data processing and spatial analysis through programming languages. GIS programming concepts and methods are introduced from the aspects of spatial data management and analysis covering both the vector and raster data models. Prerequisite: GEOG 558 and a course in programming languages. LEC.

GEOG 570. Geography of American Indians. 3 Hours NW AE42/GE3H/GE3S/S.
A survey of the culture and history of selected indigenous peoples of the Americas. Emphasis is placed on the environmental setting, the settlement and subsistence patterns, and the impact of European colonization. Discussion includes present-day ethnic and resource issues. LEC.

GEOG 571. Topics in Cultural Geography: ____. 1-3 Hours S.
An investigation of special topics in cultural geography. May include specific course work under the headings of cultural theory and methodology, material culture, foodways, religion, and similar topics. May be repeated, if topic differs. LEC.

GEOG 574. Exploring Oceania. 3 Hours S.
Acquaints students with the culture and history of Oceania including its settlement and the impacts of European and American colonialism on Australasia, Melanesia, Micronesia and Polynesia. Emphasis is placed on applying broad geographical concepts to this vast Oceanic region through the lenses of development, media and migration studies. Prerequisite: GEOG 102 or GEOG 103; or consent of instructor. LEC.

GEOG 576. Cultural Geography of the United States. 3 Hours S.
Distributions of major culture elements including folk architecture, religion, dialect, foodways, and political behavior are systematically studied from a predominately historical perspective. These discussions are followed by a survey of the major culture regions in America. Although not absolutely necessary, familiarity with concepts treated in any of the following courses would be helpful: AMS 100, AMS 110, ANTH 108, ANTH 308, GEOG 102, or GEOG 390. (Same as AMS 576.) LEC.

GEOG 579. Geography of American Foodways. 3 Hours.
An interdisciplinary approach to food that explores the diversity of eating habits across the United States and the role of food as an indicator of cultural identity and change. Current regional and ethnic food consumption patterns are stressed. Topics include multiculturalism and regional identity, the symbiotic relationship between restaurant food and home cooking, the recent interest in farmers' markets and organic foods, and the importance of the food industry and the popular press in setting trends. (Same as AMS 579.) LEC.

GEOG 590. Understanding Central Asia. 3 Hours NW / S/W.
An intensive, multidisciplinary survey of Central Asia, focusing on the former Soviet republics-Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan-with additional coverage of neighboring regions (the Caucasus and the Caspian basin, Afghanistan, and western China). The course addresses the history of the region (from the Silk Road to Soviet rule), geography, religion, and the building of post-Soviet states and societies. (Same as REES 510.) LEC.

GEOG 591. Geography of Latin America. 3 Hours SC AE42/GE3S/S/W.
A study of the different physical, economic, and cultural settings in Latin America which form the basis for the various forms of livelihood. LEC.

GEOG 592. Middle American Geography. 3 Hours S.
This regional study of the natural environments and cultural-historical backgrounds of Mexico, Central America, and the Caribbean details the physical and historical processes that have shaped the cultural landscape. LEC.

GEOG 593. Central American Peoples and Lands. 3 Hours S.
This is a study of the natural and cultural history of the region's lands and peoples that focuses on the cultural geography of the surviving indigenous populations, including their culture area, culture history, cultural landscape, and cultural ecology. LEC.

GEOG 594. Geography of the Former Soviet Union. 3 Hours S/W.
An analysis of the spatial organization of the successor states to the USSR. A study of the diverse human and natural resources, demographic, cultural, and economic conditions. Prerequisite: An introductory geography course or background in Russian-East European history, social science, or culture, or consent of instructor. LEC.

GEOG 595. Geography of Eastern Europe. 3 Hours S/W.
A study of nations and regions of Eastern Europe, excluding Russia. Prerequisite: An introductory geography course or background in Slavic-East European history, social science, or culture or consent of instructor. LEC.

GEOG 597. Geography of Brazil. 3 Hours S.
Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Portuguese South America and the contemporary and cultural geography of Brazil. Course also includes a survey of Brazil's South American neighbors. LEC.

GEO 601. Indigenous Peoples of the World. 3 Hours S.
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GIST 601 and ISP 601.) Prerequisite: Permission of instructor. LEC.

GEOG 635. Soil Physics. 3 Hours N.
Provides theoretical and practical foundations for understanding physical properties and processes of variably-saturated porous media. Focus is on the transport, retention, and transformation of water, heat, gas, and solutes through the soil. We examine modern vadose zone measurement methods, analytical tools, and numerical models for data collection and interpretation. (Same as EVRN 635.) Prerequisite: GEOG 335 or EVRN 335; or GEOG 535 or EVRN 535, and MATH 125, PHSX 114; or consent of instructor. LEC.

GEOG 658. Topics in Geographic Information Science: _____. 1-6 Hours / LFE.
An investigation of special topics in geographic information science. May include specific coursework under the headings of methodology, basic research, thematic or regional applications, geographic information systems (GIS), Global Positioning System (GPS), and geostatistics. May be repeated if topic differs. LEC.

GEOG 670. Cultural Ecology. 3 Hours S.
Investigation of the interrelations between socio-cultural systems and the natural environment, including a survey of major theories and descriptive
studies. (Same as ANTH 695.) Prerequisite: An introductory course in geography or anthropology. LEC.

GEOG 710. Information Design. 3 Hours.
Concepts and principles for the organization of verbal, numerical, and graphic/spatial data and their application to the production of information displays and instruments. Examination of the evolution of the information design process from the traditional (communication system) perspective to interactive user-centered design approaches. The nature of human information processing in handling information for both visualization and analysis, with particular emphasis on decision-making and usability. Prerequisite: GEOG 510, INDD 510, PSYC 318, PSYC 685, or equivalent, or consent of instructor. LEC.

GEOG 711. Advanced Cartography: _____ 3 Hours.
An investigation of special topics in cartography. Can be repeated for different topics. Prerequisite: Consent of instructor. LEC.

GEOG 713. Practicum in Cartography. 1-6 Hours.
Experience in the organization and presentation of cartographic material in lecture, discussion, and laboratory formats. May be repeated to a total of six credits. Prerequisite: Consent of instructor. FLD.

GEOG 714. Field Experience. 3 Hours AE61.
Working in a new environment presents problems unlike those encountered in a classroom situation. Data collection techniques and exercises discussed in this off-campus course are intended to provide experience in dealing with an unfamiliar situation. Course location is dictated by the interests and composition of the student group; offered in the first three weeks of August. Geography majors are encouraged to attend. This course is required for graduate students. Fee required. Prerequisite: Junior-senior standing and fifteen hours of geography or consent of instructor. FLD.

GEOG 716. Advanced Geostatistics. 3 Hours.
An introduction to the practical application of advanced geospatial statistical techniques. Potential topics include: spatial regression, interpolation, clustering, and advanced nonparametric statistics. Knowledge of a statistical package and GIS is assumed. Prerequisite: GEOG 516 or equivalent and GEOG 358 or equivalent. LEC.

GEOG 719. Development of Geographic Thought. 2-3 Hours.
Critical analysis of the growth of geographic thought from antiquity to the present: emphasis on structure of modern geography. Prerequisite: Twenty hours of geography or consent of instructor. LEC.

GEOG 726. Remote Sensing of Environment II. 4 Hours.
An overview of techniques for computer analysis of digital data from earth orbiting satellites for environmental applications. Topics covered include: data formats, image enhancements and analysis, classification, thematic mapping, and environmental change detection. The laboratory exercises provide hands-on experience in computer digital image processing in the department's NASA Earth Science Remote Sensing Laboratory. Prerequisite: Introductory statistics and GEOG 526 or equivalent. LEC.

GEOG 731. Topics in Physical Geography: _____ 1-3 Hours.
An investigation of special topics in physical geography. May include specific course work under the headings of geomorphology, climatology, soils, vegetation, quaternary, paleoenvironments, hydrology, etc. May be repeated. RSH.

GEOG 733. Advanced Biogeography Field and Laboratory Techniques. 3 Hours.
This course provides graduate students with practical experience in field data collection techniques and laboratory data analysis methods. During the first half of the semester, students will work in the field using a variety of methods to measure such vegetation characteristics as: cover, density, biomass, leaf area, and canopy architecture. Students will gain experience in the use of field instruments including a spectroradiometer, and techniques for quantifying vegetation biophysical attributes. The laboratory analyses component will include: data summary, data entry, correlation, regression, MANOVA, cluster analysis, and data display, and reporting. Recommended: GEOG 516 or multivariate statistics equivalent. LEC.

GEOG 735. Soil Geomorphology. 3 Hours.
Examines the interaction of pedogenic and geomorphic processes during the Quaternary with an emphasis on strategies and methodologies employed in soil-geomorphic studies. Group research projects incorporating field data collection and analyses are required. Prerequisite: GEOG 335 or GEOG 535 or consent of the instructor. LEC.

GEOG 741. Advanced Geomorphology. 1-3 Hours.
Detailed discussions of processes and landforms characteristic of specific environments. Considered during separate semesters will be general methodology, and fluvial, arid regions, glacial, and shoreline geomorphology. Course may be taken more than once. (Same as GEOL 741.) Prerequisite: GEOG 541. LEC.

GEOG 749. Topics in Stable Isotopes in the Natural Sciences: 2-3 Hours.
Isotopic compositions of substances provide powerful insights into many topics in the natural sciences. Applications of isotopic analyses of carbon, hydrogen, oxygen, and nitrogen to selected research topics such as plant resource use, food web analysis, paleoecology, paleodiet reconstruction, hydrology, and soils genesis will be examined. Knowledge of isotope chemistry is not required. (Concepts necessary to understand pertinent articles will be taught during the first class meetings.) May be repeated. (Same as BIOL 749.) LEC.

GEOG 751. Analysis of Regional Development. 3 Hours.
An analytical approach to spatial organization of economic activities and aspects of growth and development. Location theory and the geography of trade and migration. A research paper is required. Prerequisite: GEOG 551, or a course in economics, or consent of instructor. LEC.

GEOG 752. Topics in Urban/Economic Geography: _____. 1-3 Hours.
An investigation of special topics in urban/economic geography. May include specific coursework under the headings of energy, economic development, international trade, environmental perception, housing, transportation, and migration. May be repeated. LEC.

GEOG 756. Energy Problems and the Economic-Physical Environment. 2-3 Hours.
This course investigates the economic, social, political, and environmental conditions of energy production, transport, and use: total energy consumption and mix, relations to the level and structure of the economy, substitutability of fuel and energy sources, resource endowment in an international setting. Prerequisite: GEOG 551 or a course in economics or consent of instructor. LEC.

GEOG 758. Geographic Information Science. 4 Hours.
This course integrates topics in geographical information science (GISc) with spatial analytical techniques to solve spatial problems. Focuses on the most current research in GISc and its relevance to the environmental sciences, natural resource management, and spatial decision-making. Students are expected to apply the concepts and techniques learned in this class to their own research projects. Prerequisite: GEOG 316 and GEOG 558, or consent of instructor. LEC.
GEOG 771. Topics in Cultural Geography: ______. 1-3 Hours.
An investigation of special topics in cultural geography. May include specific course methodology, material culture, foodways, religion, and similar topics. May be repeated. LEC.

GEOG 772. Problems in Political Geography. 3 Hours.
Case studies of regional and national power settings with particular emphasis upon the geographical analysis of political developments in unstable areas of the world. Prerequisite: GEOG 102 or GEOG 375. LEC.

GEOG 773. Humanistic Geography. 3 Hours.
A discussion and project-oriented course focused on ways of studying the character and meaning of places. Concepts examined include place image and image makers, landscapes as text, sense of place, vernacular regions, and alternate representations of space. Prerequisite: Graduate standing or fifteen hours of geography or consent of instructor. LEC.

GEOG 775. Seminar in Population Geography. 3 Hours.
Evaluation of problem formulation data gathering, research methods, and substantive knowledge in the geography of human populations. Concurrent auditing of GEOG 575 plus an additional meeting each week is required. Prerequisite: GEOG 575 and GEOG 516, and SOC 514. LEC.

A detailed description and analysis of selected regions of North America. Prerequisite: An introductory geography course or background in United States or Canadian history, social science, or culture or consent of instructor. LEC.

GEOG 791. Latin American Regions: ______. 3 Hours.
A description and analysis of the principal sources of geographic information pertaining to portions or all of Latin America. Prerequisite: GEOG 591 or concurrent auditing of GEOG 591, or consent of instructor. LEC.

GEOG 794. Regions of the Former USSR. 3 Hours.
A description and analysis of geographic data pertaining to the successor states to the USSR. Prerequisite: Fifteen hours of Geography courses or background in Russian, East European or Middle East studies, or consent of instructor. LEC.

GEOG 795. European Regions: ______. 3 Hours.
Prerequisite: Fifteen hours of geography, background in specified area, or consent of instructor. LEC.

GEOG 796. Asian Regions: ______. 2-3 Hours.
Prerequisite: Fifteen hours in geography courses or background in Asia, or consent of instructor. LEC.

GEOG 801. Indigenous Peoples of the World. 3 Hours.
A survey of the varied responses of global Indigenous peoples as a result of the imposition of externally-dominated economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law will be used. The course is offered at the 600 and 800 levels, with additional assignments at the 800 level. (Same as ISP 801.) LEC.

GEOG 802. Urban Geographic Information Systems. 3 Hours.
An advanced survey of urban GIS/LIS focusing on: (1) history; (2) the wide range of applications from Automated Mapping/Facilities Management (AM/FM) to topologically related GIS; (3) generic analytical functions in both raster and vector modalities; and (4) software employed, hardware platforms, and institutional settings. A limited experience in the use of GIS is provided from exercises employing ARC/INFO software. Prerequisite: Some experience with DOS based computing. LEC.

GEOG 805. History of Geographic Thought. 2 Hours.
A course to familiarize students with the history and philosophy of geography as a science and humanity. The course summarizes, reviews, and explores the ongoing relevance of 2,500 years of theoretical and methodological advancements in human and physical geography. LEC.

GEOG 806. Basic Seminar. 2 Hours.
The second of two courses required of M.A. students designed to provide experience in the development of research proposals and exposure to methodologies in geography. This course deals with approaches to geographic problems, and involves individual examination of special topics which require preparation, presentation, and critical evaluation of research proposals. LEC.

GEOG 818. Problems in Production Cartography. 1-3 Hours.
Advanced instruction in the theory and practice of producing maps and other related graphics for classroom instruction and research projects. Emphasis will be on current photo-mechanical and automated techniques. Prerequisite: By appointment. Consent of instructor. LEC.

GEOG 835. Practicum in Soil Mapping and Soil Erosion. 3 Hours.
This course is designed to give graduate students field experience in soil mapping and in the evaluation of soils for loss through processes of erosion. Prerequisite: GEOG 535 or equivalent or consent of instructor. FLD.

GEOG 858. Environmental Geographic Information Systems. 4 Hours.
An introduction to the use of GIS for environmental inventory, monitoring, and modeling. This course integrates the principles of landscape ecology with the analytical tools of GIS, remote sensing, and spatial analysis. Students will be taught GIS methodologies used to address real world problems and the use of GIS spatial analysis techniques to characterize landscapes and monitor their change. Prerequisite: GEOG 316 and GEOG 558 or equivalents, multivariate analysis recommended. LEC.

GEOG 890. Geographic Internship. 1-6 Hours.
Supervised professional experience. The student submits to the program committee a proposal describing the internship prior to enrollment. Upon acceptance, regularly scheduled meetings with the advisor provide assistance, guidance and evaluation of progress in the professional experience. A written summary of the experience or outcomes of the research project are prepared independently by the student, a representative of the host agency, and the advisor. Total credit not to exceed six hours. Prerequisite: Twelve hours of graduate level geography courses and consent of program committee. INT.

GEOG 898. Readings in Geography. 1-4 Hours.
RSH.

GEOG 899. Master's Thesis. 1-10 Hours.
Graded on a satisfactory/unsatisfactory basis. THE.

GEOG 911. Seminar in Cartography: ______. 1-4 Hours.
Study of selected topics in cartography. Can be repeated for different topics. Prerequisite: GEOG 513 or consent of instructor. LEC.

GEOG 912. Seminar in Quantitative Methods. 2-3 Hours.
LEC.

GEOG 926. Seminar in Remote Sensing. 2-4 Hours.
Study of selected topics in remote sensing theory and application. May include independent or group research and/or development work. Topic will be specified in advance. Prerequisite: GEOG 726 or consent of instructor. LEC.

GEOG 935. Seminar in Soil Geography. 2-3 Hours.
Subject matter varies but focuses on modern concepts and trends in soil geography. Sample topics include classification, paleopedology, and soil
genius. Field trip and fee may be required. Prerequisite: GEOG 735 or consent of instructor. LEC.

GEOG 937. Seminar in Vegetation Geography. 1-3 Hours. (Same as BIOL 968.) LEC.

GEOG 939. Seminar in Fluvial Systems. 2-3 Hours.
Study of selected topics in theory and method of fluvial systems. Samples include hydraulic geometry, the nature of alluvial sediments, and basin case studies. Topic will be specified in advance. LEC.

GEOG 957. Seminar in Urban and Economic Geography. 2-3 Hours. LEC.

GEOG 958. Seminar in Geographic Information Systems. 2-4 Hours.
Study of selected topics in analysis of digital geographic data. May include research and/or developmental work. Prerequisite: GEOG 758 or equivalent, or consent of instructor. LEC.

GEOG 970. Seminar in Cultural Geography: ______. 2-3 Hours.
Study of selected topics in the theory and method of cultural geography. Samples include religious patterns, folk architecture, and place-defining novels. Topic will be specified in advance. LEC.

GEOG 972. Seminar in Political Geography. 2-3 Hours.
Study of selected topics in the theory and method of political geography. Samples include insurgent states, electoral patterns, and political ecology. Topic will be specified in advance. Prerequisite: GEOG 772 or consent of instructor. LEC.

GEOG 975. Seminar in Population Geography. 2-3 Hours.
Study of selected geographic topics and problems dealing with the distribution of human populations. Prerequisite: GEOG 775 or consent of instructor. LEC.

GEOG 980. Seminar in Geography: ______. 1-3 Hours. LEC.

GEOG 990. Seminar in Regional Geography: ______. 1-3 Hours. (Selected areas to be specified.) LEC.

GEOG 998. Research in Geography. 1-5 Hours.
RSH.

GEOG 999. Doctoral Dissertation. 1-10 Hours.
Graded on a satisfactory/unsatisfactory basis. THE.

Bachelor of Arts and Bachelor of General Studies in Geography

Why study geography?
Because people, places, and environments interact and evolve in a changing world.

Why study atmospheric science?
The study of atmospheric processes enables us to understand human interactions with the environment.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Geography Programs

The B.A., B.G.S., and B.S. in geography provide general liberal arts enrichment, preparation for graduate work, and training for careers in geography and related fields. Geography may be combined with another program as a double major, or courses in another area may simply be added to those in geography.

First- and Second-Year Preparation
Students should begin the major by meeting the core requirements and preparing for major courses.

Requirements for the B.A. or B.G.S. Major

Geography Core Knowledge and Skills (18)

Majors must complete a course in each of the following areas:

Principles of Physical Geography. Satisfied by:

- GEOG 104 Principles of Physical Geography (Required Courses) 3
- or GEOG 107 Principles of Physical Geography, Honors

Introductory Laboratory in Physical Geography. Satisfied by:

- GEOG 105 Introductory Laboratory in Physical Geography 2
- Principles of Human Geography. Satisfied by:

- GEOG 102 Principles of Human Geography 3
- or GEOG 103 Principles of Human Geography, Honors

Computers, Maps and Geographical Analysis. Satisfied by:

- GEOG 210 Computers, Maps, and Geographical Analysis 3

Mapping. Satisfied by:

- GEOG 316 Methods of Analyzing Geographical Data 4
- or GEOG 358 Principles of Geographic Information Systems

Senior Capstone in Geography. Satisfied by:

- GEOG 500 Senior Capstone in Geography 3
- or GEOG 714 Field Experience

Geography Required Elective Hours (0)
Majors must complete five courses (15 hours) at the 200-500 level, in addition to the core above, from at least 3 of the following 4 groups, one of which must be a regional course:

- Physical Studies. Satisfied by:

- GEOG 148 Scientific Principles of Environmental Studies
- GEOG 304 Environmental Conservation

**Major Hours & Major GPA**

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 33 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

A sample 4-year plan for the BA degree in Geography can be found here: Geography (p. 1434), or by using the left-side navigation.

Sample 4-year plans for the BGS degree and BS degree in Geography can be found using the left-side navigation.

**Departmental Honors in Geography**
To be accepted as a candidate for honors, an undergraduate major must have completed at least 9 hours of upper-division credit in geography with a grade-point average of 3.5 in all geography courses and of at least 3.25 overall. In addition to outstanding work in geography, the program requires GEOG 499, an independent study course consisting of an honors paper.

The student presents the results of this paper in an oral examination to a committee of at least 2 faculty members, normally from the geography department, chaired by the GEOG 499 supervisor. To graduate with honors, the student must complete the paper and the examination and maintain the 3.5 and 3.25 grade-point averages.

**BA in Geography**
Below is a sample 4-year plan for students pursuing the BA in Geography. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

### Freshman

**Fall** | **Hours Spring** | **Hours**
--- | --- | ---
ENGL 101 (Goal 2.1 (2 crs req), BA Writing I) | 3 ENGL 102 (Goal 2.1 (2 crs req), BA Writing II) | 3
MATH 101 (Goal 1.2 Quantitative Reasoning) | 3 Quantitative Reasoning (Goal 1.2, BA Quantitative Reasoning) | 3
1st Semester Language (BA Second Language) | 5 2nd Semester Language (BA Second Language) | 5
First Year Seminar (Goal 1.1 Critical Thinking) | 3 GEOG 104 or 107 (Goal 3 Natural Science, Major Requirement) | 3
GEOG 100 (Goal 4.2 Global Awareness) | 3 GEOG 105 (BA Lab Requirement, Major Requirement) | 2

**Total Hours: 17**

### Sophomore

**Fall** | **Hours Spring** | **Hours**
--- | --- | ---
3rd Semester Language (BA Second Language) | 3 4th Semester Language, or 1st semester of Another Language (BA Second Language) | 3-5
Goal 2.2 Communication | 3 GEOG 210 (Major Requirement) | 3
Goal 3 Humanities | 3 GEOG Elective - First Category (Major Requirement) | 3
GEOG 102 or 103 (Goal 3 Social Science or Goal 4.2 Global Awareness, Major Requirement) | 3 Elective or possible minor course (Total Hours) | 3
Elective or possible minor course (Total Hours) | 3 Elective or possible minor course (Total Hours) | 3

**Total Hours: 15**

### Junior

**Fall** | **Hours Spring** | **Hours**
--- | --- | ---
GEOG Elective - Second Category (Major Requirement) | 3 Goal 5 Social Responsibility & Ethics | 3
GEOG Elective - Third Category (Major Requirement) | 3 GEOG 316 or 358 (Major Requirement) | 4
Elective or possible minor course 300+ (Total Hours) | 3 GEOG Elective - Any Category (Major Requirement) | 3
Elective or possible minor course 300+ (Total Hours) | 3 Elective or possible minor course 300+ (Total Hours) | 3
Elective or possible minor course 300+ (Total Hours) | 3 | 3

**Total Hours: 15**

### Senior

**Fall** | **Hours Spring** | **Hours**
--- | --- | ---
Goal 4.1 US Diversity | 3 GEOG 500 (Goal 6 Integration & Creativity, Major Requirement) | 3
GEOG Elective - Any Category (Major Requirement) | 3 Elective or possible minor course 300+ (Total Hours) | 3
LA&S 490 (Recommended, or elective) | 3 Elective or possible minor course 300+ (Total Hours) | 3
Elective or possible minor course 300+ (Total Hours) | 3 Elective or possible minor course 300+ (Total Hours) | 3
Elective or possible minor course 300+ (Total Hours) | 3 Elective or possible minor course 300+ (Total Hours) | 3

**Total Hours: 15**

**Total Hours: 120-122**

The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
Please visit the KU Core website. (http://kucore.ku.edu/courses) Geography. To view the list of courses approved to fulfill KU Core Goals, the same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BGS in Geography**

Below is a sample 4-year plan for students pursuing the BGS in Geography. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website. (http://kucore.ku.edu/courses)

1. MATH 101 or higher recommended as some elective options have a MATH pre-requisite.
2. Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.
3. Geography majors must complete five courses (15 hours) at the 200-500 level, from at least 3 of the following 4 groups: Regional Studies, Physical Studies, Geographic Information Science, Human Studies.
4. All major required Geography courses and most Geography elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Bachelor of Science in Geography**

**Why study geography?**

Because people, places, and environments interact and evolve in a changing world.
Why study atmospheric science?
The study of atmospheric processes enables us to understand human interactions with the environment.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Geography Programs

The B.A., B.G.S., and B.S. in geography provide general liberal arts enrichment, preparation for graduate work, and training for careers in geography and related fields. Geography may be combined with another program as a double major, or courses in another area may simply be added to those in geography.

First- and Second-Year Preparation

Students should begin the major by meeting the core requirements and preparing for major courses.

Requirements for the B.S. Degree

Geography B.S. General Education Requirements

Written Communication – Core Skill and Critical Inquiry.

Composition (0)

Satisfied by one of the following. Requirement must be completed during initial term of admission at KU.

- ENGL 101 Composition
- ACT English score of 27 or above or SAT English score of 600 or above
- AP English Literature & Composition score of 3 or above
- Equivalent transfer course

Critical Reading and Writing (0)

Satisfied by one of the following. Requirement must be completed during initial term of admission at KU.

- ENGL 102 Critical Reading and Writing
- AP English Literature & Composition score of 4 or above
- Equivalent transfer course

Sophomore Reading and Writing II (0)

Satisfied by one of the following:

- ENGL 203 Topics in Reading and Writing: _____
- ENGL 205 Freshman-Sophomore Honors Proseminar: _____
- ENGL 209 Introduction to Fiction
- ENGL 210 Introduction to Poetry
- ENGL 211 Introduction to the Drama
- ENGL 362 Foundations of Technical Writing (recommended)
- AP English Literature & Composition score of 5 or above
- Equivalent

Communications. Satisfied by COMS 130 (COMS 230, PHIL 148, PHIL 310 or exemption).

History or philosophy of science.

Select one of the following or consult undergraduate committee for approval of alternatives:

- HIST 103 Environment and History
- HIST 136 Early Science to 1700
- HIST 305 The Scientific Revolution
- HIST 306 Science and Western Culture
- HIST 311 Great Lives in Science
- HIST 347 Environmental History of North America
- HIST 360 Science and Religion
- HIST 407 History of Science in the United States
- PHIL 370 Moral Issues in Medicine
- PHIL 375 Moral Issues in Computer Technology
- PHIL 380 Environmental Ethics
- PHIL 620 Philosophy of Natural Science
- PHIL 622 Philosophy of Social Science
- GEOG 357 History and Philosophy of Geographic Information Science

Humanities - Understanding the Human Condition. Satisfied by completing 2 principal courses in the humanities. Approved courses may be searched for availability through the Kyous portal.

Social and Behavioral Sciences - Understanding Society and Behavior. Satisfied by completing 2 principal courses in the social sciences. Approved courses may be searched for availability through the Kyous portal.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours

Satisfied by 50 hours of major courses.

Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Physical Geography Option

Geography Prerequisite or Co-requisite Knowledge (29-31)

Calculus I. Satisfied by one of the following:
- MATH 125 Calculus I
Calculus II. Satisfied by one of the following:
- MATH 126 Calculus II
(MATH 220 and 320 are also recommended)

Physics I. Satisfied by one of the following: 4-5
- PHSX 211 General Physics I & PHSX 216 and General Physics I Laboratory (recommended)
- PHSX 114 College Physics I & PHSX 201 and Calculus Supplement to College Physics I & PHSX 216 and General Physics I Laboratory

Physics II. Satisfied by one of the following: 4-5
- PHSX 212 General Physics II & PHSX 236 and General Physics II Laboratory
- PHSX 115 College Physics II & PHSX 202 and Calculus Supplement to College Physics II & PHSX 236 and General Physics II Laboratory

Biology. Satisfied by:
- BIOL 150 Principles of Molecular and Cellular Biology & BIOL 152 Principles of Organismal Biology 8

Chemistry. Satisfied by:
- CHEM 130 General Chemistry I & CHEM 135 and General Chemistry II (or CHEM 190 and CHEM 195) 10

Information Technology. Satisfied by:
- EECS 138 Introduction to Computing: _____ 3

Geography Overview Courses (8)

Principles of Physical Geography. Satisfied by:
- GEOG 104 Principles of Physical Geography 3
or GEOG 107 Principles of Physical Geography, Honors

Introductory Laboratory in Physical Geography. Satisfied by:
- GEOG 105 Introductory Laboratory in Physical Geography 2
One course in Human or Regional Geography 3

Core System Courses (13)

Climate:
- GEOG 321 Climate and Climate Change 3
Geomorphology:
- GEOG 331 Regional Geomorphology of the United States 3
Soil Geography:
- GEOG 335 Introduction to Soil Geography or GEOG 535 Soil Geography 4
Hydrology and Glaciology:
- GEOG 332 Glaciers and Landscape 3

or CE 455 Hydrology

Techniques Courses (11)

Methods of Analyzing Geographical Data. Satisfied by:
- GEOG 316 Methods of Analyzing Geographical Data 4
Principles of Geographic Information Systems. Satisfied by:
- GEOG 358 Principles of Geographic Information Systems 4
One 500-level or above course from GIS Studies. (GEOG 526 Remote Sensing of Environment I recommended)

Senior Capstone (3)
Satisfied by one of the following:
- GEOG 500 Senior Capstone in Geography 3
or GEOG 714 Field Experience

Elective Courses (9)

Select two or more of the following: 6
Biogeography:
- GEOG 537 Elements of Plant Geography 3
Climate:
- GEOG 521 Microclimatology 3
Geomorphology:
- GEOG 532 Geoarchaeology 3
- GEOG 541 Geomorphology 3
Soil Geography:
- GEOG 538 Soil Chemistry 3
- GEOG 735 Soil Geomorphology 3
Other advanced courses in Physical Geography

Geographical Information and Analysis Option

Geography Prerequisite or Co-requisite Knowledge (6-11)

Calculus I. Satisfied by one of the following:
- MATH 125 Calculus I or MATH 145 Calculus I, Honors
Calculus II. Satisfied by one of the following:
- MATH 126 Calculus II or MATH 146 Calculus II, Honors

General Physics I. Satisfied by:
- PHSX 211 General Physics I (or PHSX 114 and PHSX 201) 1-4

General Physics II. Satisfied by:
- PHSX 212 General Physics II (or PHSX 115 and PHSX 202) 1-3

Visualizing Spatial Data. Satisfied by:
- GEOG 514 Visualizing Spatial Data 4
or EECS 138 Introduction to Computing: _____

Overview Geography Courses (0)

Principles of Physical Geography or Scientific Principles of Environmental Studies. Satisfied by one of the following:
- GEOG 104 Principles of Physical Geography & GEOG 105 and Introductory Laboratory in Physical Geography
- GEOG 107 Principles of Physical Geography, Honors & GEOG 105 and Introductory Laboratory in Physical Geography
- GEOG 140 Global Environment I: The Discovery of Environmental Change
Maps and Mapping or Computers, Maps, and Geographical Analysis. Satisfied by:

- GEOG 111 Maps and Mapping
- or GEOG 210 Computers, Maps, and Geographical Analysis

Principles of Human Geography. Satisfied by:

- GEOG 102 Principles of Human Geography
- or GEOG 103 Principles of Human Geography, Honors

2 GEOG 300+ courses. One in Physical and one in Human and/or Regional Geography

Core Geographic Information Science Courses (0)

Six courses, at least one from each category:

- Cartography and Visualization. Satisfied by:
  - GEOG 311 Map Conception and Development
  - GEOG 513 Cartographic Design
  - GEOG 517 Data Handling and Map Symbolization

- Geographical Information Systems. Satisfied by:
  - GEOG 358 Principles of Geographic Information Systems
  - GEOG 558 Intermediate Geographical Information Systems
  - GEOG 758 Geographic Information Science

Remote Sensing. Satisfied by:

- GEOG 526 Remote Sensing of Environment I
- GEOG 726 Remote Sensing of Environment II

Statistics. Satisfied by:

- GEOG 316 Methods of Analyzing Geographical Data
- GEOG 516 Applied Multivariate Analysis in Geography
- GEOG 716 Advanced Geostatistics

Senior Capstone in Geography (0)

Satisfied by:

- GEOG 500 Senior Capstone in Geography
- or GEOG 714 Field Experience

Geographic Information Science Electives (0)

Two other courses from geographic information science

Allied Field (9)

Three courses and nine hours minimum in one field (or a minor) (area studies, atmospheric science, biology, computer science, design, environmental studies, engineering, geology, psychology, urban planning).

Electives (14-23)

14-23 credit hours of any university courses.

**Geography Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 50 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Departmental Honors in Geography**

To be accepted as a candidate for honors, an undergraduate major must have completed at least 9 hours of upper-division credit in geography with a grade-point average of 3.5 in all geography courses and of at least 3.25 overall. In addition to outstanding work in geography, the program requires GEOG 499, an independent study course consisting of an honors paper.

The student presents the results of this paper in an oral examination to a committee of at least 2 faculty members, normally from the geography department, chaired by the GEOG 499 supervisor. To graduate with honors, the student must complete the paper and the examination and maintain the 3.5 and 3.25 grade-point averages.

**Bachelor of Science in Atmospheric Science**

The Bachelor of Science in Atmospheric Science (B.S.) is designed to meet the recommendations of the American Meteorological Society for a bachelor’s degree in meteorology/atmospheric science. There are four options, each of which meet these recommendations.

1. **General Option**

   This option is for students who want a broad background in atmospheric science. It is also the most suitable option for those who are aiming at a career in weather forecasting. It includes a third semester of synoptic meteorology as well as an air pollution course.

2. **Air Pollution Option**

   Students prepare for a career emphasizing environmental aspects of meteorology. This option includes an additional semester of chemistry as well as environmental studies.

3. **Hydrometeorology Option**

   Students prepare for a career involving the interface between meteorology and hydrology. These studies have important applications to flash floods, droughts and water supply. This option includes additional courses on fluid flow and hydrology from the School of Engineering.

4. **News Media Option**

   This option is for students who wish to enter careers whose main function is to provide information to the general public. It requires additional courses from the School of Journalism.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the...
Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Degree Requirements

Advising

Students who may decide to major in atmospheric science should confer early with a departmental representative about the selection of courses.

Requirements for the B.S. Degree in Atmospheric Science

4 specialized options are available for students who plan professional careers in meteorology or atmospheric science. The general meteorology option satisfies all the traditional professional meteorology requirements for employment with the National Weather Service, airlines, or other agencies. The air pollution meteorology option meets the need for trained specialists. The hydrometeorology option may lead to a career as a meteorologist in one of the many water-related activities in private and governmental agencies. The news media forecasting option can lead to a career forecasting the weather on television or radio. The B.S. degree with any of these specialties also prepares students to begin graduate programs in meteorology or atmospheric science.

Written Communication – Core Skill and Critical Inquiry

Composition (0)

Satisfied by one of the following. Requirement must be completed during initial term of admission at KU.

ENGL 101
ACT English score of 27 or above or SAT English score of 600 or above
AP English Literature & Composition score of 3 or above
Equivalent transfer course

Critical Reading and Writing (0)

Satisfied by one of the following. Requirement must be completed within the first academic year at KU.

ENGL 102 Critical Reading and Writing
or ENGL 105 Freshman Honors English
AP English Literature & Composition score of 4 or above
Equivalent transfer course

Sophomore Reading and Writing II (0)

Satisfied by one of the following:

ENGL 203 Topics in Reading and Writing: _____
or ENGL 205 Freshman-Sophomore Honors Proseminar: _____

ENGL 209 Introduction to Fiction
ENGL 210 Introduction to Poetry
ENGL 211 Introduction to the Drama
ENGL 362 Foundations of Technical Writing (recommended)
AP English Literature & Composition score of 5 or above
Equivalent

Communication - Core Skills and Critical Inquiry. Satisfied by: Completing COMS 130, COMS 131 (Honors), or COMS 150.

Humanities - Understanding the Human Condition. Satisfied by completing 1 course with requirement code H. Approved courses may be searched for availability through the Kyou portal.

Social and Behavioral Sciences - Understanding Society and Behavior. Satisfied by completing 2 principal courses in the social sciences. Approved courses may be searched for availability through the Kyou portal.

Atmospheric Science Prerequisite or Co-requisite Knowledge (40-43)

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

Computing and Programming. Satisfied by:
EECS 138 Introduction to Computing: _____ (Fortran preferred; C++ and Matlab accepted) 3

Scientific Principles of Environmental Studies. Satisfied by:
EVRN 148 Scientific Principles of Environmental Studies 3
Principles of Geographic Information Systems. Satisfied by:
GEOG 358 Principles of Geographic Information Systems 4

Calculus I. Satisfied by:
MATH 121 Calculus I (or equivalent) 5
or MATH 141 Calculus I: Honors

Calculus II. Satisfied by one of the following:
MATH 122 Calculus II (or equivalent) 5
or MATH 142 Calculus II: Honors

General Physics I. Satisfied by one of the following:
PHSX 211 & PHSX 216 General Physics I and General Physics I Laboratory
PHSX 213 General Physics I Honors

General Physics II. Satisfied by one of the following:
PHSX 212 & PHSX 236 General Physics II and General Physics II Laboratory
or PHSX 214 General Physics II Honors

Foundations of Chemistry I. Satisfied by:
CHEM 130 General Chemistry I 5
or CHEM 190 Foundations of Chemistry I, Honors

Vector Calculus. Satisfied by:
MATH 223 Vector Calculus 3
or MATH 243 Vector Calculus, Honors

Elementary Linear Algebra. Satisfied by:
MATH 290 Elementary Linear Algebra 2
or MATH 291 Elementary Linear Algebra, Honors

Applied Differential Equation. Satisfied by one of the following:
MATH 320 Elementary Differential Equations 3
or MATH 220 Applied Differential Equations

Statistics. Satisfied by:
MATH 526 Applied Mathematical Statistics I 3
or DSCI 202 Statistics

Numerical Methods. Satisfied by:
MATH 581 Numerical Methods 3

Atmospheric Science Core Knowledge and Skills (30)
Majors must complete all of the following:
Introductory Meteorology (5). Satisfied by:
ATMO 105 Introductory Meteorology 5
Climate and Climate Change (3). Satisfied by:
ATMO/GEOG 321 Climate and Climate Change 3
Weather Forecasting (3). Satisfied by:
ATMO 505 Weather Forecasting 3
Microclimatology (3). Satisfied by:
ATMO/GEOG 521 Microclimatology 3
Synoptic Meteorology (3). Satisfied by:
ATMO 630 Synoptic Meteorology 3
Dynamic Meteorology (3). Satisfied by:
ATMO 640 Dynamic Meteorology 3
Remote Sensing (3). Satisfied by:
ATMO 642 Remote Sensing 3
Advanced Dynamic Meteorology (3). Satisfied by:
ATMO 660 Advanced Dynamic Meteorology 3
Physical Meteorology (3). Satisfied by:
ATMO 680 Physical Meteorology 3
Seminar for Seniors (1). Satisfied by:
ATMO 697 Seminar for Seniors 1

Meteorology Option
Students selecting this major must select one of the following options:

General Meteorology Option
This option satisfies all the traditional professional meteorology requirements for employment with the National Weather Service, airlines, or other agencies.

Air Pollution Meteorology (3). Satisfied by:
ATMO 525 Air Pollution Meteorology 3
Operational Forecasting (2). Satisfied by:
ATMO 605 Operational Forecasting 2
Advanced Synoptic Meteorology (3). Satisfied by:
ATMO 650 Advanced Synoptic Meteorology 3

News Media Forecasting Option
This option can lead to a career forecasting the weather on television or radio.

Operational Forecasting (2). Satisfied by:
ATMO 605 Operational Forecasting 2
Advanced Synoptic Meteorology (3). Satisfied by:
ATMO 650 Advanced Synoptic Meteorology 3
Infomania: Information Management (3). Satisfied by:
JOUR 302 Infomania: Information Management 3
Writing for Media (3). Satisfied by:
JOUR 304 Media Writing 3
Multimedia Reporting (3). Satisfied by:
JOUR 415 Multimedia Reporting 3

Major Hours
Satisfied by 33 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours
Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://www.collegesas.ku.edu/GPAcalculator.shtml).

Concentration in Business
An undergraduate student may graduate from the School of Business with a concentration in atmospheric science.

Atmospheric Science Prerequisite or Co-requisite Knowledge (19-22)
Student selecting this minor must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

Computing and Programming. Satisfied by:

EECS 138 Introduction to Computing: ______ 3
Calculus I. Satisfied by:

MATH 121 Calculus I (or equivalent) 5
or MATH 141 Calculus I: Honors
Calculus II. Satisfied by:

MATH 122 Calculus II (or equivalent) 5
or MATH 142 Calculus II: Honors
General Physics I. Satisfied by:

PHSX 211 General Physics I 1-4
or PHSX 213 General Physics I Honors
Introductory Meteorology (5). Satisfied by:

ATMO 105 Introductory Meteorology 5

Atmospheric Science Required Courses (18)
Students selecting this minor must complete all of the following:

Climate and Climate Change (3). Satisfied by:

ATMO/GEOG 321 Climate and Climate Change 3
Weather Forecasting (3). Satisfied by:

ATMO 505 Weather Forecasting 3
Microclimatology (3). Satisfied by:

ATMO/GEOG 521 Microclimatology 3
Air Pollution Meteorology (3). Satisfied by:

ATMO 525 Air Pollution Meteorology 3
Dynamic Meteorology (3). Satisfied by:

ATMO 640 Dynamic Meteorology 3
Physical Meteorology (3). Satisfied by:

ATMO 680 Physical Meteorology 3

Departmental Honors in Atmospheric Science
To be accepted as a candidate for honors, an undergraduate major must have completed at least 9 hours of upper-division credit in atmospheric science with a grade-point average of 3.5 in all atmospheric science courses and an overall average of at least 3.25. In addition, the program requires ATMO 499, an independent study course consisting of the creation of an honors paper. The student presents the results of this paper in an oral examination to a committee of a minimum of 2 faculty members, normally from the geography department, and chaired by the ATMO 499 supervisor. To graduate with honors, the student must complete the paper and the examination and maintain the 3.5 and 3.25 grade-point averages.

BS in Geography with concentration in Geographical Information & Analysis
Below is a sample 4-year plan for students pursuing the BS in Geography with a concentration in Geographical Information & Analysis. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

Freshman

Fall  Hours Spring  Hours
ENGL 101 (Goal 2.1 Written Communication, 2 Crs Required, BS Writing 1) 3
ENGL 102 (Goal 2.1 Written Communication, 2 Crs Required, BS Writing 2) 3
Humanities (Goal 3 Humanities, BS Code H Course 1 of 2) 3
MATH 126 (Major Pre-requisite) 4
MATH 125 (Goal 1.2 Quantitative Literacy, Major Pre-requisite) 4
CHEM 130 (Goal 3 Natural Science, Major Pre-requisite) 5
COMS 130 (Goal 2.2 Communication, BS Communication) 3

15 15

Elective 300+ (Total Hours) 3 Elective 300+ (Total Hours) 3

Elective 300+ (Total Hours) 3 Elective 300+ (Total Hours) 3

Total Hours: 120-121

1 Geography BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.

2 Geography BS majors are required to take a course in History or Philosophy of Science. A list of possible courses can be found under the Degree Requirements tab.

3 All major required Geography courses and most Geography elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.

4 Six Geographic Information Science Core courses are required with at least one from each of the following categories: Cartography and Visualization, Geographical Information Systems, Remote Sensing, and Statistics. A list of courses for each can be found under the Degree Requirements tab.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

BS in Geography with concentration in Physical Geography

Below is a sample 4-year plan for students pursuing the BS in Geography with a concentration in Physical Geography. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

1 Geography BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.

2 A list of possible courses for History or Philosophy of Science can be found under the Degree Requirements tab.
All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.

Geography BS with a concentration in Physical Geography requires 9.0 hours of elective course work chosen from courses in the following categories: Biogeography, Climate, Geomorphology, Soil Geography, and other advanced courses in Physical Geography. A list of possible courses can be found on the Degree Requirements tab.

GEOG 526 is recommended.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in Geography

Why study geography?
Because people, places, and environments interact and evolve in a changing world.

Why study atmospheric science?
The study of atmospheric processes enables us to understand human interactions with the environment.

Requirements for the Minor in Geography
The department offers 2 minor options. The first is a general minor in geography. The second is specifically designed to give students a background in geographic information science. Students should carefully consider which minor best meets their academic goals before choosing one.

Geography General Option

Students selecting this minor must complete 6 GEOG courses (18 hours), 12 hours of which must be taken at the 300 level or above.
Geographic Information Science

Maps and Mapping/computers, Maps, and Geographical Analysis. Satisfied by:

- GEOG 111 Maps and Mapping 4
- or GEOG 210 Computers, Maps, and Geographical Analysis

Methods of Analyzing Geographical Data. Satisfied by:

- GEOG 316 Methods of Analyzing Geographical Data 4

Principles of Geographic Information Systems. Satisfied by:

- GEOG 358 Principles of Geographic Information Systems 4

Three additional courses from Geographic Information Science group 300-level or above.

Geography Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior (300+ Hours)**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F's and repeated courses. See the Semester/ Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Minor in Atmospheric Science

Why study geography?
Because people, places, and environments interact and evolve in a changing world.

Why study atmospheric science?
The study of atmospheric processes enables us to understand human interactions with the environment.

Requirements for the Minor in Atmospheric Science

Student selecting this minor must complete courses as specified in each of the following areas:

**Atmospheric Science Prerequisite or Co-requisite Knowledge (9-13)**

<table>

**Master of Arts in Geography**

Why study geography?
Because people, places, and environments interact and evolve in a changing world.

Why study atmospheric science?
The study of atmospheric processes enables us to understand human interactions with the environment.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.
Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Applicants without prior training in geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees. Graduate Record Examination scores (verbal, quantitative, and analytical) are required of all applicants.

**Joint Degree application for M.A. and M.U.P**

An interdisciplinary program combines in three years the degrees of MA in geography and Master of Urban Planning. Details, including degree requirements, are available in a separate booklet either online or from either of the two departments. Entering students should submit separate applications to each department.

Submit your graduate application online (http://graduate.ku.edu/prospective-students). Send all other requested application materials to the geography department:

**The University of Kansas**
Department of Geography
Lindley Hall
1475 Jayhawk Blvd., Room 213
Lawrence, KS 66045-7575

**Geography M.A. Degree Requirements**

The program continues the general training of the undergraduate degree but also provides for concentration in preparation either for employment or further study. The student takes courses in several areas of the discipline as well as at least three courses in an acceptable concentration. The 30-credit-hour minimum for the M.A. thesis program may include 6 hours outside the department and a maximum of 6 hours for the master’s thesis. The M.A. degree requires a proposal defense and a final oral examination. Students with 6 or more hours of incomplete are denied permission to enroll until these hours are reduced to the allowable limit (5 hours).

**Required Courses:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 805</td>
<td>History of Geographic Thought</td>
<td>2</td>

<tr>
<td>GEOG 980</td>
<td>Seminar in Geography: _____ (Colloquium for 1 credit hour during each of the first 2 semesters of residence at KU)</td>
<td>2</td>
</tr>
</tbody>
</table>

Two-day (non-credit) orientation before classes begin in the fall semester

**General Requirements:**

One course in Geographic Information Science
One course in Human/Regional Geography
One course in Physical Geography
Electives:

At least 3 courses in an approved area of concentration. (Courses taken to meet the “General” requirement may not be double counted here.)

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>GEOG 899</td>
<td>Master's Thesis</td>
<td>1-6</td>
</tr>
</tbody>
</table>

**Recommended:**

Non-credit 8-hour Responsible Scholarship session held before classes start in the spring semester

Detailed information on departmental regulations is included in Policies for Graduate Study in Geography available on the department’s website (http://www.geog.ku.edu).

**Joint Degree application for M.A. and M.U.P**

This interdisciplinary program combines in three years the degrees of MA in geography and Master of Urban Planning. Details, including degree requirements, are available in a separate booklet either online or from either of the two departments. Entering students should submit separate applications to each department. The joint degree entails 61 credit hours of coursework (39 in planning, 22 in geography) including a thesis.

Urban Planning and Geography have a long history of interaction and connection. Responsible planning in urban communities requires an understanding of the human and physical geographies of these communities, and contemporary planning practice demands familiarity with advanced geographic techniques and information systems. Conversely, expertise in geography—and particularly concentration in urban geography—may require an understanding of and competence to deal with the planning dynamics of urban communities.

The objective of this program is to meet the needs of both Urban Planning and Geography for interdisciplinary knowledge by offering a dual degree program for the graduate student who intends to engage professionally in both planning and geography. The program combines in three years the normal two year Master of Urban Planning (48 credit hours) and the normal two year Master of Arts (MA) degree in Geography (30 credit hours) offered by the College of Liberal Arts and Sciences.

**Geography Courses Required of All Combined Degree Candidates**

**Required**

### Master of Science in Atmospheric Science

**Why study geography?**

Because people, places, and environments interact and evolve in a changing world.

**Why study atmospheric science?**

The study of atmospheric processes enables us to understand human interactions with the environment.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

### Graduate Admission

Entering students are expected to have completed an undergraduate degree in a physical science (e.g., physics, chemistry, atmospheric science, oceanography), mathematics, or engineering and studied mathematics, including vector calculus and ordinary differential equations. Courses taken to remedy deficiencies may not count toward graduate degrees. Graduate Record Examination scores (verbal, quantitative, and analytical) are required of all applicants.

Submit your graduate application online (http://graduate.ku.edu/prospective-students). Send all other requested application materials to the geography department:

**The University of Kansas**

**Department of Geography**

**Lindley Hall**

**1475 Jayhawk Blvd., Room 213**

**Lawrence, KS 66045-7575**

### Atmospheric Science M.S. Degree Requirements

The purpose of the program is to expand the student's knowledge of fundamental atmospheric processes and how the atmosphere interacts with other parts of the environment. Students become familiar with quantitative research methods and how these various approaches can be used to address different problems in atmospheric science. Students gain an in depth ability to learn specific skills and apply them toward his/her thesis work. These skills consist of, for example, statistical analysis techniques, numerical modeling, or work with atmospheric instrumentation. The breadth of the program and the diverse research topics explored by the faculty are able to accommodate students with a variety of interests.

**Total Hours** 30
During the second semester in the program, the student must submit to his committee a thesis research plan. All M.S thesis proposals are expected to contain three basic elements:

1. A statement of the research problem or questions to be investigated.
2. A survey of relevant literature and how it relates to the student’s research problem
3. An outline of the general methodology, if not specific techniques, to be utilized in addressing the research problem or answering the basic research questions.

Thesis seminar and defense
Students are required to make a formal presentation to the faculty and fellow students in the form of a research seminar, and subsequently defend orally to their committee the results of their thesis research. Ideally, the final examination takes place immediately following the research seminar, but if necessary the two can be scheduled at separate times.

As part of their research training, graduate students are expected to attend departmental colloquia and seminars.

Details of the regulations on graduate study are included in the department’s Policies for Graduate Study in Atmospheric Science, available on the department’s website (http://www.geog.ku.edu).

Master of Science in Geography

Graduate Programs
Geography
The graduate curriculum emphasizes broad geographic training while encouraging in-depth commitment to specialized concentrations. Students also are encouraged to take course work outside the department that complements their degree programs. Credit-hour requirements below are considered minimums for degree programs. Programs are tailored by the student and advisor to conform to the student’s interests and needs, as well as to fulfill the general degree requirements.

The central thrust of the department and the chief capabilities and interests of the faculty fall within these research-teaching areas:

1. Human geography including cultural geography, regional development, and environmental policy;
2. Geographic information science including cartography, geographic information systems, and remote sensing;
3. Physical geography including geomorphology, soils, and biogeography;
4. Regional geography including Africa, East Asia, Russia, Latin America, and the United States; and
5. Atmospheric science and climatology.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
Entering students are expected to have a B.S. degree in geography or in related physical science, earth science, mathematics, or engineering disciplines. Applicants should have a minimum Grade Point Average (GPA) of 3.0 on a 4.0 scale. Applicants with a GPA of less than 3.0 may be considered for admission on a probationary or provisional status. Entering students will be expected to have studied quantitative methods. Graduate Record Examination scores (verbal, quantitative and analytical) are required of all applicants.

Applicants without prior training in geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees. Graduate Record Examination scores (verbal, quantitative, and analytical) are required of all applicants.

Submit your graduate application online (http://www.graduate.ku.edu). Send all other requested application materials to the geography department:

The University of Kansas
Department of Geography
Lindley Hall
1475 Jayhawk Blvd., Room 213
Lawrence, KS 66045-7575

The M.S. in Geography is of interest to students with a variety of different backgrounds because geography integrates concepts from various disciplines. There is also a nationwide interest in climate change, earth system science, and GIScience. Graduate study in physical geography and GIScience is quantitative in nature, and forms the core of many observational studies related to these fields of study.

The program requires a 30 credit hour minimum. Students must pass an oral examination and write a thesis. In addition, students are required to take the 2-day (non-credit) field trip before classes begin in the fall semester and GEOG 980 (Colloquium) for 1 credit hour during each of the first 2 semesters in residence at KU.

Core Courses
GEOG 805 History of Geographic Thought 2
GEOG 716 Advanced Geostatistics 3
Two-day required (non-credit) field trip before classes begin in the fall semester
GEOG 980 Seminar in Geography:_____ 1
Electives 9-10
1 course, 500 level or above, in each of the 3 areas in geography
GIScience
Physical Geography/Atmospheric Sciences
Regional/Human Geography
3 courses, 500 level or above, in an approved area of concentration 9-10
Physical Geography
GIScience, computer programming course must be one of the 3 electives for this concentration
Research
Doctor of Philosophy in Atmospheric Science

Atmospheric Science is the study of weather and climate. The atmosphere is a key component of the environment and affects many human activities ranging from daily weather prediction to the understanding of climate and human health. This program provides graduate students with the advanced training to address a host of meteorological and climate related issues facing humans today.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Entering students are expected to have a M.S. degree in atmospheric science or in another physical science, mathematics or engineering. Entering students will be expected to have studied mathematics, including vector calculus and ordinary differential equations. They should also have taken the equivalent of at least 2 semesters of calculus-based physics and one of chemistry. Graduate Record Examination scores are required of all applicants. Applicants should have a minimum Grade Point Average (GPA) of 3.0 on a 4.0 scale. Applicants with a GPA of less than 3.0 may be considered for admission on a probationary or provisional status.

Upon a student's admission to the department, the Graduate Studies Committee (GSC) will appoint an advisor. Early in the first semester (preferably in the first week of classes), the student should meet with this advisor to outline a tentative program of coursework for the degree. Such programs should be solidified by the time of enrollment for the second semester and submitted to the GSC for approval. The student and advisor then continue to discuss and update programs each semester, bearing in mind that any substantive changes must be approved by the GSC.

Electives are selected with approval of the committee and are tailored to fit the needs of the individual student (e.g. oriented to a subfield in meteorology, climatology, or other specializations) Sample courses include:

- ATMO 731 Advanced Topics in Atmospheric Science: ______
- MATH 647 Applied Partial Differential Equations
- MATH 781 Numerical Analysis
- GEOG 558 Intermediate Geographical Information Systems
- GEOG 758 Geographic Information Science
- GEOG 538 Soil Chemistry
- GEOG 756 Energy Problems and the Economic-Physical Environment
- BIOL 513 Virology Laboratory
- BIOL 570 Introduction to Biostatistics
- BIOL 594 Forest Ecosystems
- BIOL 841 Biometry I
- CE 730 Intermediate Fluid Mechanics
- CE 751 Physical Hydrology
- CE 779 Water Quality

Dissertation Research (30) 30

Comprehensive Examination Process

All candidates must pass a comprehensive written examination. Program sheets are available in the department office and must be filed before the oral examination can be scheduled. The student will have a thesis committee consisting of at least 5 faculty members. At least 4 of these faculty must regularly teach in the atmospheric sciences program. One of the faculty members on the committee must be from outside the Geography department.

RSRS Requirement

The Research Skill and Responsible Scholarship (RSRS) requirement will be met by 500 level or above in mathematics and/or engineering. Alternatively, 6 credits at the 500 level or above in a related discipline which are approved by the student’s graduate committee may also be used for the RSS requirement. The courses for the RSRS requirement must be taken during the PhD program. Students must participate in the existing Geography Department ethical scholarship program.

Dissertation Requirements

The student must submit a dissertation approved by his/her graduate committee. All candidates must pass a final oral examination and must submit an approved dissertation to UMI. The dissertation will be defended in a public presentation.

Doctor of Philosophy in Geography

Why study geography?

Because people, places, and environments interact and evolve in a changing world.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student.
Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Applicants without prior training in geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees. Graduate Record Examination scores (verbal, quantitative, and analytical) are required of all applicants.

Submit your graduate application online (http://graduate.ku.edu/prospective-students). Send all other requested application materials to the geography department:

**The University of Kansas**
Department of Geography
Lindley Hall
1475 Jayhawk Blvd., Room 213
Lawrence, KS 66045-7575

**Geography Ph.D. Degree Requirements**

The aspirant is expected to demonstrate proficiency in research and achieve a teaching competence in geography. The student may concentrate in 1 area or may offer a concentration in a second area in the department or an outside discipline. Whatever the choice, the student develops the plan of research and study with the advice and supervision of professors in the chosen area(s) of concentration who also sit on the student’s examination and dissertation committees. A minimum of 30 hours of course and seminar work in addition to dissertation credit usually is required beyond the M.A.

**Required Courses**

GEOG 805 (History of Geographic Thought); 2-day (non-credit) orientation before classes begin in the fall semester; GEOG 980 (Seminar in Geography: Colloquium) for 1 credit hour during each of the first 2 semesters of residence at KU; Non-credit 8-hour Responsible Scholarship seminar offered by the department.

**Research Skills Requirement**

Research skills are important elements of any graduate program and should complement the student’s research topic. Coursework necessary to meet this requirement should commence early in the program. Selection of a particular Research Skills option must be approved by the student’s advisor and committee members. A students Research Skills requirement may be met by 1 of the following:

1. Demonstrate a satisfactory capability in 1 research skill from the list below. The actual courses must be approved by the student's advisor and committee members.
   a. Computer Science--complete a computer-programming course in the Department of Electrical Engineering and Computer Science (e.g., C++, Fortran, or Visual Basic) with a grade of B or higher and create a substantial computer program that illustrates a geographic application of that language. Both the course and computer program must be approved by the Computer Programming Committee of the Department of Geography.
   b. Mathematics--complete 9 hours of courses at the 500-level or above with a grade of B or higher.
   c. Statistics--complete 9 hours of courses outside the Geography Department at the 500-level or above with a grade of B or higher.
   d. An outside discipline relevant to the student's field(s) of specialization within geography (e.g. anthropology, biology, economics, geology, history, or psychology) -- complete 9 hours of courses at the 500-level or above with a grade of B or higher.

Students whose native language is not English may, in some cases, use their native language to fulfill Research Skills but only if the language is considered an adequate research tool for their program and is endorsed by the student’s advisor and committee members. Using a native language to fulfill the Research Skills requirement must have GSC approval.

In addition, the department requires that any PhD student admitted after Fall 2011 must successfully complete the Responsible Scholarship seminar offered by the department.

**Handbook for Graduate Students**

Detailed information on departmental regulations is included in Policies for Graduate Study in Geography at the University of Kansas, available on the department's website (http://www.geog.ku.edu).

**Department of Geology**

**Why study geology?**

Because its leadership role among geoscience programs advances higher learning and serves society through the discovery, dissemination, and application of knowledge.

**Financial Aid**

**Undergraduate Scholarships**

The department awards scholarships from its endowment to meritorious incoming or continuing students in geology. Scholarships also are awarded to students enrolled in Field Camp or Field Investigation. For information, contact the chair.

**KU Financial Aid**

All undergraduates who wish to be considered for KU financial aid must complete applications with Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml).
Graduate Assistantships and Scholarships

All prospective graduate students are considered for employment and financial aid. Employment may be in the form of teaching assistantships or research assistantships. Research assistantships may be supported with funds from external grants, Geology Associates endowments, the Biodiversity Institute, or the Kansas Geological Survey, which is on campus. Duties, compensation, and conditions of awards are prescribed as much as possible before enrollment. The department also receives funds from corporations and endowments to support fellowships, which permit students to enroll full time without specific research or teaching duties.

Graduate students are eligible for scholarships from the Geology Associates Program. Endowed scholarships include the Angino, Hall, Henbest, Holden, Ireland, McGee, Moore, Patterson, Peoples, and Walters scholarship funds. Other scholarships are awarded from donations from individuals and corporations. Scholarships are awarded on the basis of academic excellence; some funds are designated for protected minorities or women.

Through the Selig Fund and other donations, the department supports graduate student field work. Through the McCollum Fund and other donations, the department underwrites partially some other research expenses, such as purchase of time on analytical equipment. Funding requires an acceptable thesis or dissertation proposal. Students who have no other sources of research support are given preference. Degree-seeking students may apply for loans from the Fritz, Horner, and Johns loan funds.

Visit the Graduate Studies website for information about funding opportunities (http://www.graduate.ku.edu/funding-opportunities) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml) administers grants, loans, and need-based financial aid.

Careers

Career Opportunities

Opportunities include environmental geology, engineering geology, and hydrogeology, as well as the oil and minerals industries, research, and teaching.

Practice as a professional geologist often requires course work and training beyond the baccalaureate level.

Licensure

Formal study of geology at an accredited college or university is a principal requirement for becoming licensed to practice geology. During the senior year, students who plan to become licensed geologists should take the Fundamentals of Geology examination, offered twice a year. Information on registration is available from the department office or from the Kansas Board of Technical Professions. After passing the examination and after further practice, candidates can sit for the Practice of Geology examination to become licensed. Regulations for licensure may vary from state to state.

Undergraduate Programs

Geology is an interdisciplinary science that applies the principles of chemistry, physics, biology, and other fields to the study of the earth, its resources, and its natural processes. The field has many subdisciplines and specialties that offer stimulating challenges and careers. KU offers broad undergraduate programs in geology and geophysics but emphasizes research in paleontology, sedimentology, crustal evolution, hydrogeology, geobiology, seismology, applied geophysics, glaciology, and geomorphology.

Courses for Nonmajors

The department offers several courses of interest to nonmajors who wish to learn more about geology and related areas such as environmental science, oceanography, and economic resources. Principal courses include GEOL 101, GEOL 105, GEOL 121, GEOL 171, GEOL 302, and GEOL 351. GEOL 103 may be taken in conjunction with either GEOL 101 or GEOL 105 to fulfill the CLAS laboratory science requirement. GEOL 304, GEOL 360, and GEOL 552 all offer opportunities to study more specialized aspects of the earth and do not require advanced prerequisites.

Summer Field Courses

All undergraduate degree programs require field courses during 2 summers. Students should plan to take GEOL 360 in the summer after completing the introductory course. GEOL 560 and GEOL 561 (if required by the program) ideally are taken in the summer between the junior and senior years. Substantial scholarship support is available for geology majors who enroll in those courses.

Combined Degree Programs

A student may combine an interest in geology with a degree in business, education, or journalism.

Graduate Programs

The department offers the M.S. and Ph.D. in geology but permits specialization in a number of areas of geology and in geophysics and hydrogeology. Active areas of instruction and research include geophysics, geomorphology, geochemistry, microbial biogeochemistry, paleontology, sedimentology, tectonics, and petroleum geology. Students also may work with faculty supervisors at the Kansas Geological Survey and at Kansas State University.

Courses

GEOL 101. The Way The Earth Works. 3 Hours GE3N / N. Introduction to the principles of earth science. Study of the formation, occurrence, and structure of minerals and rocks; action of streams, oceans, glaciers, and other agents in the formation and modification of the landscape; volcanism, earthquakes, and plate tectonics. Discussion of earth processes in the context of sustainable energy, environmental concerns, climate and other topical issues. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is recommended for students taking both. Course may be offered in lecture or online format. LEC.

GEOL 102. The Way The Earth Works, Honors. 3 Hours GE3N / N. Honors section of GEOL 101. An introduction to the principles of earth science. Study of the formation, occurrence, and structure of minerals and rocks; action of streams, oceans, glaciers, and other agents in the formation and modification of the landscape; mountain building, volcanism, earthquakes, and plate tectonics. Discussion of earth processes in the context of sustainable energy, environmental concerns, climate and other topical issues. Not open to students who have taken GEOL 101. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is
recommended for students taking both. Course may be offered in lecture or online format. LEC.

GEOL 103. Geology Fundamentals Laboratory. 2 Hours U / LFE.
A course in geologic laboratory studies. This course plus GEOL 101, GEOL 102, GEOL 105, GEOL 106, or GEOL 121 satisfies the College laboratory science requirement. Gives students practical, hands-on experience with identifying earth materials (rocks, minerals, fossils), understanding their relationships to earth processes, understanding topographic and geologic maps, interpreting results of surficial processes, and learning about deep-earth processes such as earthquakes. Includes short field trips to see geologic structures and results of local geologic processes. This lab course may be offered in on-campus lab or online format. Prerequisite: GEOL 101, GEOL 102, GEOL 105, GEOL 106 or GEOL 121. LAB.

GEOL 105. History of the Earth. 3 Hours NE GE3N / N.
An introduction to the physical and biological history of the earth, the methods used to decipher earth history, and the development of the geological sciences. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is recommended for students taking both. Not open to students who have taken GEOL 106 or GEOL 304. LEC.

GEOL 106. History of the Earth Honors. 3 Hours NE GE3N / N.
Honors section of GEOL 105. An introduction to the physical and biological history of the earth, the methods used to decipher earth history, and the development of the geological sciences. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is recommended for students taking both. Not open to students who have taken GEOL 105 or GEOL 304. LEC.

GEOL 121. Life Through Times: DNA to Dinosaurs. 3 Hours NB GE11/GE3N / N.
This course lead students on a journey through time to explore the interconnection between life and the geology of Earth, including our own complex relationship with the world around us. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is recommended for students taking both. Not open to students who have taken GEOL 105 or GEOL 304. LEC.

GEOL 151. Environmental Ethics: A View From the National Parks. 3 Hours N.
To what extent are our National Parks protected from pollution, invasive species, mining, climate change and tourism? In this course students learn about the geologic processes that form our National Parks as well as the competing interests that stakeholders have on the land, through the application of specific case studies. (Same as EVRN 151.) LEC.

GEOL 171. Earthquakes and Natural Disasters. 3 Hours NE GE3N / N.
Addresses the subject of natural disasters with concentration on earthquake effects and their mitigation. Briefly treats volcanic eruptions, tidal waves, floods, global warming, severe weather, and catastrophic meteorite impacts from the perspective of geological and human significance. Provides a basic background into earth-science processes. LEC.

GEOL 177. First Year Seminar: _______. 3 Hours GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in geology. May not contribute to major requirements in geology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

GEOL 302. Oceanography. 3 Hours NE GE3N / N.
Basic description of oceanography; description and discussion of the ocean as a dynamic system. Relationships between and dependence upon the interactions of submarine topography, water chemistry, wave action, and biota in understanding the ocean system. Review of part that humanity plays in perturbing the natural oceanic environment. Discussions of estuarine problems as related to the sea, cultural activities, and rivers. Course may be offered in lecture or online format. Prerequisite: An introductory science course. LEC.

GEOL 304. Historical Geology. 3 Hours N.
An introduction to the physical and biological history of the Earth, the methods used to decipher earth history, and the development of the geological sciences. Concepts of lithostratigraphy, chemostatigraphy and biostratigraphy, and methods of analysis of stratigraphic data focus on the interpretation of Earth history. Prerequisite: GEOL 101 and GEOL 103. LEC.

GEOL 311. Mineralogy and Structure of the Earth. 3 Hours GE3N / N / LFE.
Basic identification and properties of rocks and minerals in the context of whole-earth structure and evolution. Includes basic chemical equilibria for rock and mineral systems and their bearing on processes involved with formation and evolution of Earth's crust, mantle, and core. Two lectures and one lab per week. Prerequisite: GEOL 101, CHEM 130, and eligibility for MATH 125 or MATH 115. LEC.

GEOL 312. Mineral Structures and Equilibria Laboratory. 1 Hour U / LFE.
A laboratory to accompany GEOL 311. Presents more rigorous analysis of the structures, compositions, and chemical equilibria governing the formation and stability of common rock-forming mineral systems. Prerequisite: GEOL 311 (may be taken concurrently), CHEM 130, and eligibility for MATH 125 or MATH 115. LAB.

GEOL 315. Gemstones. 3 Hours N.
The properties, occurrence, description, determination, and mineral affinities of gems, ornamental stones, and gem materials. LEC.

GEOL 316. Geochemistry. 3 Hours N.
The course is intended to be an introduction to all types of geochemistry. It focuses on the chemistry of the natural world and the chemical evolution of the Earth over geological time. The course is composed of three modules: (a) geochemical fundamentals; (b) natural and anthropogenically perturbed aspects of the Earth's hydrosphere and its interaction with surficial rocks, sediments, soils, the biosphere and the atmosphere and (c) the origin and evolution of Earth (crust-mantle-core) and the solar system through nuclear and high temperature chemical processes. Prerequisite: GEOL 101, CHEM 130 or 190; and eligibility for MATH 115. LEC.

GEOL 331. Sedimentology and Stratigraphy. 4 Hours GE3N / N / LFE.
Basic principles used in the study of sedimentology and stratigraphy. Physical, chemical, and biological processes in sedimentary environments applied to the recognition of the depositional environment, preservation, and alteration of sedimentary rocks. Field and laboratory study of sedimentary rocks with emphasis on interpretation of original depositional environments and preservation in the stratigraphic record. Prerequisite: GEOL 101 and GEOL 103; and GEOL 304 or taken concurrently. LEC.

GEOL 351. Environmental Geology. 3 Hours NE GE3N / N.
An introductory course dealing with the implications of geologic processes and materials for civilization. Topics to be considered include: geologic hazards such as floods, landslides, earthquakes, and volcanism; the availability of water, mineral, and energy resources; and the environmental impact of resource utilization. The importance of recognizing geologic constraints in land use planning and engineering projects is emphasized and illustrated by examples. LEC.
GEOL 360. Field Investigation. 2 Hours N.
Summer session. A field-geology course that provides beginning geology students with an initial understanding of the nature of geological evidence in the field, the breadth of geological phenomena, and the importance of the interplay of information from many geological disciplines in solving problems. Given at various geologically diverse locations. Fee. Prerequisite: GEOL 101. LEC.

GEOL 370. Study Abroad in Greece: Natural Environment and Civilizations. 3 Hours N.
This course examines the profound influence of the natural environment on the development of civilizations and the course of history. Geologic processes responsible for natural resources, water, landscapes, natural hazards and climate are presented in the context of their impact on ancient Greek society. The class visits sites of geologic and historic interest such as Athens, Delphi, Mycenae and the Aegean Sea islands including Santorini volcano. Examples from other eras and regions of the world are discussed along with present-day analogues. Prerequisite: An introductory geology course or permission of the instructor. LEC.

GEOL 391. Special Studies in Geology. 1-6 Hours N.
Special reports upon subjects in which students have a particular interest. Prerequisite: Fifteen hours of geology. IND.

GEOL 399. Senior Honors Research. 2-5 Hours AE61 / N.
Normally two to five hours in any one semester with a maximum of eight hours. An undergraduate research course, in any of the fields of geology, open by permission of the department to seniors in the College who have an average grade of B or higher in geology courses. Prerequisite: Thirty hours of geology, five of which may be taken concurrently with this course. IND.

GEOL 501. Error Analysis. 1 Hour N.
This course covers basic error analysis as it applies to geology. The course will emphasize the description and propagation of errors in data collection and reduction. Subjects include: how to report data and associated errors, error propagation in simple and complex equations, the Normal, Gaussian, and Poisson distributions, linear and higher order regression, and X-squared test. Prerequisite: MATH 125. LEC.

GEOL 512. Igneous and Metamorphic Petrology. 3 Hours N.
The study of minerals, rocks and fluids within the earth’s crust and mantle to elucidate their mechanisms of formation and the pressure-temperature-composition conditions within the earth. The course emphasizes equilibrium thermodynamics, phase equilibria, fractionation mechanisms, tectonic control of petrogenesis, and quantitative analysis of mineral parageneses. Prerequisite: GEOL 311 and first semester calculus, or permission of instructor. LEC.

GEOL 513. Petrology Laboratory. 1 Hour U / LFE.
A laboratory course to accompany GEOL 512. Material covered will include the use of the polarizing microscope in study of rocks in thin sections; identification of rock-forming minerals in thin section; study of textures as guides to the crystallization process; calculations of chemical changes during fractional crystallization and partial melting. Students will also make extensive study of igneous and metamorphic rocks in hand specimens, accompanied by thin section study, with emphasis on composition, texture, and structure. Students must co-enroll in GEOL 512. Prerequisite: GEOL 312. Concurrent enrollment in GEOL 512 required. LAB.

GEOL 521. Paleontology. 3 Hours N.
A study of the structure and evolution of ancient life; the nature and diversity of life through time; the interactions of ancient organisms with their environments and the information that the study of fossils provides about ancient environments; the use of fossils to determine the ages of rocks and the timing of past events in earth history; and the patterns of extinction through time. (Same as BIOL 622.) Prerequisite: BIOL 100 or BIOL 152 or GEOL 105 or GEOL 304. LEC.

GEOL 523. Paleontology Laboratory. 1 Hour U.
Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as BIOL 623.) LEC.

GEOL 528. The Biology and Evolution of Fossil Plants. 3 Hours N.
A lecture course in which fossil plants, protists and fungi are examined throughout geologic time. Emphasis will be directed at paleoecology, biogeography and the stratigraphic distribution and composition of ancient floras. (Same as BIOL 640.) Prerequisite: BIOL 413, or permission of instructor. LEC.

GEOL 529. Laboratory in Paleobotany. 1 Hour U / LFE.
An examination of selected fossil plants throughout geological time and the techniques used to study them; laboratory will include identification and the use of plant fossils in biostratigraphy. (Same as BIOL 641.) Prerequisite: BIOL 413 or permission of instructor. Must be taken concurrently with GEOL 528. LAB.

GEOL 532. Stratigraphy. 4 Hours AE61 / N / LFE.
A study of the principles of lithostratigraphy, biostratigraphy, and sequence stratigraphy. Methods of analysis of stratigraphic data focus on the interpretation of earth history. The stratigraphic record of North America is presented for evaluation of its geologic history. Three lectures and one laboratory per week. Required field trip. Prerequisite: GEOL 101, GEOL 521, and GEOL 331. LEC.

GEOL 534. Volcanology. 3 Hours N.
Physical and geochemical volcanology. Considers relationship of tectonics and volcanism; types of magmas; rheology of lavas, pyroclastic density currents, and mass movements in volcanic environments; and interpretation of processes and conditions of formation of volcanic rocks from their field character. Field trips to ancient volcanic complexes. Prerequisite: GEOL 331 and GEOL 512, or permission of instructor. LEC.

GEOL 535. Petroleum and Subsurface Geology. 4 Hours N / LFE.
A general study of the occurrence, properties, origin, and migration of petroleum. Studies of various oil fields and oil-bearing basins. Laboratory studies include well logs, subsurface mapping, and cross-sections. Prerequisite: GEOL 331, GEOL 562, and GEOL 572; or CPE 527, or permission of instructor. LEC.

GEOL 536. Geological Log Analysis. 1 Hour U.
Application of well logging measurements to interpretation subsurface. LEC.

GEOL 537. Petroleum Reservoir Characterization. 3 Hours N.
Geological, geophysical, and engineering characterization of a petroleum reservoir. Includes mapping; petrophysical, production, and pressure analysis; and numerical modeling. Considers economic analysis of steps to improve oil recovery. Students who have completed GEOL 837 may not take GEOL 537 for credit. Prerequisite: GEOL 535 and permission of instructor. LEC.

GEOL 541. Geomorphology. 4 Hours N / LFE.
A critical study of landforms in relation to tectonics, climatic environment, and geologic processes. The use of geomorphic methods in the interpretation of Cenozoic history is emphasized. Laboratory exercises in analysis of field observations, maps, and photographs. Required field trip and fee. (Same as GEOG 541.) Prerequisite: GEOL 101 and GEOL 103, GEOG 104 and GEOG 105, or GEOL 304 and GEOL 103. LEC.
GEOL 551. Engineering Geology. 3 Hours N.
Consideration of geologic factors affecting engineering projects. Topics include: techniques of site exploration, engineering properties of soil and rock, geologic conditions important in the design of major structures, and geologic information useful in land-use planning. Prerequisite: An introductory course in geology or consent of instructor. LEC.

GEOL 552. Introduction to Hydrogeology. 3 Hours N.
Physical description of hydrogeologic media. Elementary groundwater hydraulics: analytical and graphical solutions for steady-state application. Well hydraulics and pumping tests. Basic groundwater geology. Effects of topography and geology on regional flow systems. Field and numerical delineation and analysis of groundwater flow systems and applications. Chemical characteristics of groundwater and their relationship to aquifer geology and hydrology. Investigations of groundwater quality and contamination. Prerequisite: Two semesters each of calculus, physics, and chemistry. LEC.

GEOL 560. Introductory Field Geology. 3 Hours AE61 / N.
Summer session. The study of the principles of field geology and the application of field methods to solve geological problems. Includes use of topographic maps and aerial photographs for geological mapping, the study of stratigraphic methods by measuring sections, and working field trips to areas of regional geological interest. Given at the University of Kansas Geology Field Camp near Canon City, Colorado. Fee. Prerequisite: GEOL 331, GEOL 360, and GEOL 562, or consent of instructor. FLD.

GEOL 561. Field Geology. 3 Hours N.
Summer session. The application of the principles of field geology to solve complex geological problems in the field. Given at the University of Kansas Geology Field Camp near Canon City, Colorado, or at other sites as appropriate. Fee. Prerequisite: GEOL 560. FLD.

GEOL 562. Structural Geology. 4 Hours N / LFE.
A study of primary and secondary rock-structures and their genesis. Includes techniques of structural analysis and introduces mechanics of rock deformations. Lectures, laboratory, and required field trip. Prerequisite: GEOL 311; PHSX 111, PHSX 114, or PHSX 211 and PHSX 216; and MATH 115 or MATH 126. LEC.

GEOL 572. Geophysics. 3 Hours N.
Introductory study of gravitational, magnetic, seismic, electrical, and thermal properties of the earth. Measurements, interpretation, and applications to exploration, earth structure, and global tectonics. Prerequisite: An introductory course in geology; MATH 116 or MATH 127; and PHSX 115 or PHSX 212 and PHSX 236. PHSX 115 or PHSX 212 may be taken concurrently. LEC.

GEOL 573. Geodynamics and Plate Tectonics. 3 Hours N.
Study of physical processes in the solid Earth and of geophysical approaches to studying Earth systems at regional and global scales. Topics include global potential fields, thermal regime, rheology and Earth deformation, earthquakes and seismic structure, plate motions and global tectonics. (Same as PHSX 528.) Prerequisite: An introductory course in geology; MATH 116 or MATH 126; and PHSX 115, PHSX 214, or PHSX 212 and PHSX 236. LEC.

GEOL 575. Seismic Exploration. 3 Hours N.
Application of seismic reflection and refraction techniques to the description of near-surface geology and the exploration for energy and mineral resources. Theory of seismic information, data collection, data processing using computers, and geologic interpretation. Prerequisite: A course in computer programming, either FORTRAN or C, which may be taken concurrently. An introductory geophysics course, such as GEOL 572. LEC.

GEOL 576. Potential Fields Exploration. 3 Hours N.
Use of gravity, magnetic, and electrical signals in the exploration for energy and mineral resources. Elementary potential field theory, data collection methods, data analysis, and interpretation using computers. Prerequisite: A course in computer programming, either FORTRAN or C, which may be taken concurrently. An introductory geophysics course, such as GEOL 572. LEC.

GEOL 577. Environmental Geophysics. 3 Hours.
Application of the methods of geophysical exploration to evaluate, mitigate, and prevent environmental problems below the surface of the earth. Development of fundamental principles and discussion of environmental case histories using seismic, gravity, magnetic, electromagnetic, electrical, and radar methods. Prerequisite: An introductory course in geology; MATH 116 or MATH 126; and PHSX 115, PHSX 214, or PHSX 236. LEC.

GEOL 578. Seismic Data Analysis and Interpretation. 3 Hours N.
Interpretation methods applied to seismic exploration and reservoir characterization. Topics include: rock physics, the convolutional model, synthetic seismograms, seismic response of hydrocarbon reservoirs, resolution, seismic velocity, depth conversion, seismic attributes, AVO, inversion, seismic anisotropy, 3-D D-D interpretation, S-wave and converted wave interpretation, laboratory use of commercial seismic interpretation software. Prerequisite: GEOL 575 or consent of the instructor. LEC.

GEOL 591. Topics in Geology: _____. 1-5 Hours N.
May include lectures, discussions, readings, laboratory, and field work in geology. Will be given as needed. May be taken more than once. LEC.

GEOL 711. X-Ray Analysis. 1-2 Hours.
Introduction to the theory and practice of X-ray diffraction and X-ray fluorescence analysis as applied to geological materials. Includes safety training necessary for the operation of X-ray analytical equipment in the department. Prerequisite: GEOL 311 and PHSX 115 or PHSX 212. LEC.

GEOL 712. Microstructures and Petrofabrics. 3 Hours.
This course is geared towards developing a qualitative and quantitative understanding of the fundamentals of rock and mineral deformation necessary to interpret comprehensively microstructural data. Microstructures and petrofabrics contain a wealth of information on kinematics, rheology, and boundary conditions of deforming rocks, important information that often goes unnoticed and unused. This course builds on knowledge acquired in undergraduate structural geology and petrology courses and will give students the tools for a more rigorous and sophisticated evaluation of thin sections and quantitative microstructural and textural data. Required field trip. Prerequisite: GEOL 512 and GEOL 562; or consent of the instructor. LEC.

GEOL 713. Advanced Petrology. 1 Hour.
Advanced topics in igneous and metamorphic petrology with emphasis on chemical and isotopic modeling. Course may be repeated, as topics covered vary. LEC.

GEOL 714. Thermochronology. 3 Hours.
This advanced course is intended to provide students with an in-depth understanding of the fundamentals and an appreciation of the complexities of thermochronology. The primary focus of this course is on modern thermochronological dating methods, a quantitative understanding of noble gas diffusion, data acquisition and interpretation, numerical modeling of complex thermochronological data, and hands-on laboratory experience in the KU thermochronology facilities. Prerequisite: MATH 122 and GEOL 717; or consent of the instructor. LEC.
GEOL 715. Geochemistry. 3 Hours.
Application of chemical equilibria and kinetics to geological environments and processes, with emphasis on processes involving solution equilibria. Includes introduction to thermodynamic aspects of equilibria. Prerequisite: CHEM 188 and MATH 122. LEC.

GEOL 716. Geologic Thermodynamics. 2 Hours.
Classical thermodynamics with an emphasis on phase equilibria, solid-solution chemistry, and modeling of natural systems. Prerequisite: Second semester calculus, or permission of instructor. LEC.

GEOL 717. Geochronology. 2-4 Hours.
Principles and applications of natural radioactive systems for geochronology and cosmochronology, including use of radiogenic isotopes as geochemical tracers. Prerequisite: GEOL 512 or consent of instructor. LEC.

GEOL 718. Stable Isotope Geochemistry. 1-3 Hours.
Principles and applications of equilibria among stable isotopes in the geological environment, with emphasis on the isotopic systems of hydrogen, carbon, and oxygen. Prerequisite: GEOL 715 or consent of instructor. LEC.

GEOL 721. Micropaleontology. 3 Hours.
Systematics, paleontology, evolution, and biostratigraphy of microfossils, particularly foraminifera, ostracodes, and conodonts. Preparation of material for study. Applications of micropaleontology to geologic problems. Prerequisite: GEOL 521 or BIOL 100 or 152. LEC.

GEOL 722. Paleocology. 3 Hours.
Principles of ecology as applied to the interpretation of past environments. Prerequisite: GEOL 521. LEC.

GEOL 723. Paleontology Museum Apprenticeship. 1-6 Hours N.
Provides directed, practical experience in care and management of paleontology collections, public education, exhibits, and museum administration with emphasis tailored to fit the needs and interests of each student. Students should expect to spend a minimum of five hours per week for each hour in which they are enrolled. (Same as AMS 799, ANTH 799, BIOL 799, HIST 799, and MUSE 799.) FLD.

GEOL 724. Paleobiogeography. 3 Hours.
The study of the coevolution of the Earth and its biota. The class will focus on using phylogenetic approaches with fossil taxa to study how tectonic change has influenced the evolution of life and also to determine what evolutionary patterns can tell us about the nature and sequence of geological events. Prerequisite: GEOL 521, or consent of the instructor. LEC.

GEOL 725. Paleontology of Lower Vertebrates. 3 Hours.
General account of the osteology, geologic distribution, and evolution of the principal groups of fishes, amphibians, reptiles, and birds. Lectures and laboratory. (Same as BIOL 790.) Prerequisite: GEOL 105 or GEOL 304, or GEOL 521. LEC.

GEOL 726. Paleontology of Higher Vertebrates. 3 Hours.
Evolution of mammals and anatomical modifications involved in the process as ascertained from the fossil record. Lectures and laboratory. (Same as BIOL 791.) Prerequisite: GEOL 105 or GEOL 304 or GEOL 521. LEC.

GEOL 727. Macroevolution. 3 Hours.
This course will present a broad survey of topics in macroevolution including the differences between micro- and macroevolutionary patterns and processes and the manners of formulating and analyzing macroevolutionary questions. Discussions will focus on the relevance of hierarchy theory and levels of selection; an overview of species concepts, both ontological and epistemological; and an analysis of the neo-Darwinian synthesis as related to innovations in evolutionary theory. In addition, the relevance of contingency and extinction to evolutionary theory will be emphasized. LEC.

GEOL 728. Paleopedology. 3 Hours.
Paleopedology is the study of ancient soils preserved in the geologic record. The course covers concepts of paleopedology and its applications to the interpretation of paleoenvironmental, paleoecologic, and paleohydrologic settings and its use in sequence stratigraphy and paleoclimatology. Prerequisite: GEOG 535, GEOL 331, or GEOL 532; or consent of the instructor. LEC.

GEOL 729. Ichnology. 3 Hours.
Ichnology is the study of organism-substrate interactions. The class will cover concepts and applications of ichnology in the marine and continental realms, including the behavior of such organisms as microbes, plants, invertebrates, and vertebrates preserved in the geologic record as trace fossils. Ichnology is applied in geology and in the petroleum industry to interpret ancient environments, hydrogeology, ecology, and climate. Prerequisite: GEOL 331, GEOL 521, or GEOL 532; or consent of the instructor. LEC.

GEOL 731. Terrigenous Depositional Systems. 4 Hours.
Processes that operate in recent sedimentary environments, responses of sediment to those processes, and criteria for determining depositional environments of ancient sedimentary rocks. Lectures, practical exercises, and field trips. Prerequisite: GEOL 331 or GEOL 532. LEC.

GEOL 732. Carbonate Depositional Systems. 3 Hours.
Patterns and processes of contemporaneous carbonate deposition and diagenesis, depositional models; applications to interpretation of carbonate rocks. Lecture, discussion, laboratory and field trips. Prerequisite: GEOL 532 (may be taken concurrently). LEC.

GEOL 741. Advanced Geomorphology. 1-3 Hours.
Detailed discussions of processes and landforms characteristic of specific environments. Considered during separate semesters will be general methodology, and fluvial, arid regions, glacial, and shoreline geomorphology. Course may be taken more than once. (Same as GEOG 741.) Prerequisite: GEOL 541. LEC.

GEOL 751. Physical Hydrogeology. 3 Hours.
Study of fluid flow in subsurface hydrologic systems. Investigation of the ground water environment including porosity, and hydraulic conductivity and their relationship to typical geologic materials. Examination of Darcy's law and the continuity equation leading to the general flow equations. Discussion of typical hydraulic testing methods to estimate aquifer parameters in various situations and apply these to water resource problems. Study of the basic mechanisms that determine the behavior of typical regional flow systems. (Same as CE 752.) LEC.

GEOL 753. Chemical and Microbial Hydrogeology. 4 Hours.
Lecture and discussion of chemical and microbiological controls on groundwater chemistry. Topics include thermodynamic and microbiological controls on water-rock reactions; kinetics; and microbiological, chemical and isotopic tools for interpreting water chemistry with respect to chemical weathering and shallow diagenesis. Origins of water chemistry, changes along groundwater flow paths, and an introduction to contaminant biogeochemistry will be discussed through the processes of speciation, solubility, sorption, ion exchange, oxidation-reduction, elemental and isotopic partitioning, microbial metabolic processes and microbial ecology. An overview of the basics of environmental microbiology, including cell structure and function, microbial metabolism and respiration, microbial genetics and kinetics of microbial growth will be covered. (Same as CE 753.) Prerequisite:
GEOL 754. Contaminant Transport. 3 Hours.
A study of the transport of conservative and non-conservative pollutants in subsurface waters. Case studies are used to illustrate and develop a conceptual understanding of such processes as diffusion, advection, dispersion, retardation, chemical reactions, and biodegradation. Computer models are developed and used to quantify these processes. (Same as CE 754.) Prerequisite: Introductory Hydrogeology or consent of instructor. LEC.

GEOL 761. Regional Field Geology. 1-5 Hours.
A detailed field study of a carefully selected area that includes features of several phases of geology. Field trip fee. Prerequisite: GEOL 561 or equivalent and departmental approval. FLD.

GEOL 763. Tectonics and Regional Geology. 3 Hours.
Topics vary with demand and include fundamental features of plate tectonics, interpretation and distribution of regional geology of mountain belts with emphasis on tectonic setting and processes, regional geology, and tectonics of selected mountain belts. Prerequisite: GEOL 562, GEOL 512, or GEOL 331, and GEOL 572. LEC.

GEOL 771. Advanced Geophysics: ___. 1-3 Hours.
Topics to vary with demand and include heat flow, wave propagation, synthetic seismograms, groundwater exploration, geothermal exploration, electrical methods in exploration, rock mechanics-tectonophysics, rock magnetism, geomagnetism, paleomagnetism, geophysical inverse theory, and others upon sufficient demand. May be repeated for different topics. (Same as PHSX 727.) Prerequisite: GEOL 572 or GEOL 573/PHSX 528 or consent of instructor. LEC.

GEOL 772. Geophysical Data Analysis. 3 Hours.
Fourier analysis, sampling theory, prediction and interpolation of geophysical data, filtering theory, correlation techniques, deconvolution. Examples will be chosen from various fields of geophysics. (Same as PHSX 722.) Prerequisite: MATH 250/AE 250/ARCE 250/CE 250/CPE 250/Eecs 250/EPhX 250/ME 250 and either GEOL 572 or GEOL 573 or PHSX 528. LEC.

GEOL 773. Seismology. 3 Hours.
General theory of seismic waves, wave field extrapolation (migration) by finite difference methods, construction of travel-time curves, reflection and attenuation of coefficients, earthquake source mechanism, distribution and forecasting of earthquakes. (Same as PHSX 723.) Prerequisite: MATH 250/AE 250/ARCE 250/CE 250/CPE 250/Eecs 250/EPhX 250/ME 250 and either GEOL 572 or GEOL 573 or PHSX 528. LEC.

GEOL 775. Near-Surface Seismology. 3 Hours.
Theoretical and applied study of all aspects of near-surface reflection, refraction, and surface-wave seismology from design and acquisition to interpretation. Prerequisite: MATH 250, GEOL 572, or consent of the instructor. LEC.

GEOL 776. Ground Penetrating Radar. 3 Hours.
Theoretical and applied study of radar methods used for imaging the subsurface. Topics include EM theory relating to wave propagation through earth environments, GPR data acquisition, processing and interpretation. Prerequisite: Consent of the instructor. LAB.

GEOL 780. Conservation Principles and Practices. 3 Hours.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, BIOL 700, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 781. Introduction to Museum Exhibits. 3 Hours.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, BIOL 787, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 782. The Nature of Museums. 3 Hours.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, BIOL 788, HIST 720, and MUSE 702.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 783. Museum Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL 785, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 784. Introduction to Museum Public Education. 3 Hours.
Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 785. Principles and Practices of Museum Collection Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museum collections, their associated data, and their use in scholarly research; cataloging, storage, fumigation, automated information management and related topics will be presented for museums of art, history, natural history and anthropology. (Same as AMS 730, BIOL 798, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 781. Advanced Topics in Geology: ___. 1-5 Hours.
Selected offerings in geology. Intended primarily for graduate students and qualified seniors. May include lectures, discussions, reading, laboratory and field work. May be taken more than once. LEC.

GEOL 837. Geoscience and Petroleum Engineering. 3 Hours.
Advanced geological, geophysical, and engineering characterization of a petroleum reservoir. Includes mapping; petrophysical, production, and pressure analysis; and numerical modeling. Considers economic analysis of steps to improve recovery. Students who have completed GEOL 537 may not take GEOL 837 for credit. LEC.

GEOL 851. Field and Laboratory Methods: Physical Hydrogeology. 1 Hour.
Introduction to field and laboratory methods commonly used in physical hydrogeology. Practical experience with common water
level measurement techniques, various well pumping techniques, well installation and geologic core sampling, and hydraulic testing. Prerequisite: Introductory course in hydrogeology and familiarity with computer use for data processing, or consent of instructor. FLD.

GEOL 852. Field and Laboratory Methods: Contaminant Transport. 1 Hour.
Introduction to laboratory methods for evaluating reactive transport parameters, followed by development and implementation of computer models. Students will gain experience building models starting from basic transport equations using a spreadsheet platform and, where appropriate, commercial software packages. Prerequisite: GEOL 751 (may be taken concurrently) or equivalent, or consent of the instructor. LAB.

GEOL 853. Field and Laboratory Methods: Chemical Hydrogeology. 1 Hour.
Practical experience in measuring unstable chemical parameters in groundwater, including pH, Eh, dissolved oxygen, temperature, alkalinity, specific conductance, and turbidity. Practical experience in collecting water samples for chemical analysis, choosing appropriate sample containers and preservation methods, and special techniques for collecting samples for determination of parameters sensitive to environmental changes such as oxygen level or temperature. Prerequisite: GEOL 753 (may be taken concurrently) or equivalent, or consent of the instructor. FLD.

GEOL 854. Field and Laboratory Methods: Geobiology. 1 Hour.
Practical experience in cultivating, enumerating and visualizing groundwater microorganisms. Geochemical and molecular techniques for studying microbial community diversity, biomineralization and mineral dissolution, and biodegradation of organic contaminants will be covered. Practical experience in collecting water samples for preservation of microorganisms sensitive to environmental changes such as oxygen level or temperature. Prerequisite: GEOL 753 (may be taken concurrently) or equivalent, or consent of the instructor. FLD.

GEOL 891. Special Studies in Geology. 1-5 Hours.
May be repeated. RSH.

GEOL 899. Master's Thesis. 1-12 Hours.
THE.

GEOL 921. Advanced Invertebrate Paleontology: _____. 1-3 Hours.
Detailed study of systematic, morphology, stratigraphic distribution and paleoecology of major groups of organisms in the fossil record. Specific group or groups covered will vary according to student and faculty needs and interests. May be repeated. Prerequisite: An introductory course in invertebrate paleontology. LEC.

GEOL 932. Carbonate Petrology. 3 Hours.
Study of the physical and chemical factors important in the genesis and diagenesis of carbonate rocks. Includes the application of principles learned from research on modern marine environments to the interpretation of ancient carbonates. Various analytical techniques are covered with emphasis on thin section petrography. Prerequisite: GEOL 331 and GEOL 732. LEC.

GEOL 933. Sandstone Petrology. 3 Hours.
Description, classification, and interpretation of sedimentary rocks, emphasizing petrographic methods applied to terrigenous rocks and interpretation of provenance of sedimentary sequences. Prerequisite: GEOL 511 and GEOL 531 or GEOL 532. LEC.

GEOL 991. Seminar in: _____. 1-5 Hours.
A review of the principles of the geological sciences. Fields considered are: geomorphology, igneous petrology, metamorphic petrology, invertebrate paleontology, groundwater, geochemistry, stratigraphy, sedimentation, micropaleontology, mineralogy, structural geology, and geophysics. Several may be taken concurrently. May be taken more than one semester. LEC.

GEOL 999. Doctoral Dissertation. 1-12 Hours.
THE.

Bachelor of Arts in Geology

Why study geology?
Because its leadership role among geoscience programs advances higher learning and serves society through the discovery, dissemination, and application of knowledge.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Geology Programs
The B.A. program allows many free electives for background courses in the sciences or liberal arts. The program permits study of traditional geology (with emphasis on the solid earth, the earth’s surface, or environmental geology and natural resources), environmental geology (with emphasis on water or urban environmental geology), or an individually tailored program.

Degree requirements may be altered to suit particular needs of a student upon petition to the undergraduate studies committee and in consultation with a geology faculty advisor. Special consideration is given to students with strong backgrounds in supporting sciences and students with superior records who decide to major in geology late in their programs.

First- and Second-Year Preparation
Students interested in geology should see a department advisor as soon as possible. They should enroll in mathematics, chemistry, and English in addition to Introduction to Geology and electives. Students should take GEOL 360 as soon as possible.
Advising

Developing a strong relationship with a faculty advisor helps students get the most out of their educational programs in the shortest time. Most courses for majors are offered in only one semester each year. Advisors can guide the student through complexities of the curriculum or into a specialized program.

Requirements for the B.A. Major

Geology Major Course Requirements

Geology Prerequisite or Co-requisite Knowledge (24-27)

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

Calculus I. Satisfied by:
- MATH 115 Calculus I (or equivalent) 3
- or MATH 121 Calculus I

Foundations of Chemistry I. Satisfied by:
- CHEM 130 General Chemistry I 5

Physics. Satisfied by one of the following:
- PHSX 111 Introductory Physics 3
- PHSX 114 College Physics I 1-4
- PHSX 211 General Physics I & PHSX 216 General Physics I Laboratory 5

Biology. Satisfied by:
- BIOL 100 Principles of Biology 4
- & BIOL 102 Principles of Biology Laboratory (or higher level biology course)

Information Technology. Satisfied by:
- EECS 138 Introduction to Computing: _____ 3

Geology Core Knowledge and Skills (24)

Majors must complete the following core courses:

Introduction to Geology. Satisfied by:
- GEOL 101 The Way The Earth Works 3

Geology Fundamentals Laboratory. Satisfied by:
- GEOL 103 Geology Fundamentals Laboratory 2

Mineralogy and Structure of the Earth. Satisfied by:
- GEOL 311 Mineralogy and Structure of the Earth 3

Sedimentology and Stratigraphy. Satisfied by:
- GEOL 331 Sedimentology and Stratigraphy 4

Field Investigation. Satisfied by:
- GEOL 360 Field Investigation 2

Paleontology. Satisfied by:
- GEOL 521 Paleontology 3

Introductory Field Geology. Satisfied by:
- GEOL 560 Introductory Field Geology 3

Structural Geology. Satisfied by:
- GEOL 562 Structural Geology 4

Geology Required Electives (15)

Majors must complete a minimum of 15 hours in geology or related courses. Several possible tracks of upper-level course work are given below.

General Geology Options

Concentrate on traditional geology with emphasis on the solid earth and the earth’s interior, earth surface processes, or environmental geology and natural resources.

Solid Earth (15)

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 30 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Sample 4-year plans for the BA degree in Geology with the following concentrations can be found here: General Geology (p. 1460) and Environmental Geology (p. 1461), or by using the left-side navigation.

Sample 4-year plans for the BS degree in Geology can be found using the left-side navigation.

**Departmental Honors**
Pursuit of departmental honors in Geology is by invitation from the Department of Geology honors coordinator.
Requirements include:
3.25 or higher KU GPA at graduation.
3.50 or higher KU geology-courses GPA at graduation.
Completion of at least 2 credit hours of GEOL 399.
Completion and successful defense of an honor's thesis.
Additional requirements and more information may be obtained from the Department of Geology honors coordinator and web site.

**BA in Geology with concentration in General Geology**

Below is a sample 4-year plan for students pursuing the BA in Geology with a concentration in General Geology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

**BA in Geology with concentration in Environmental Geology**

Below is a sample 4-year plan for students pursuing the BA in Geology with a concentration in Environmental Geology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Bachelor of Science in Geology

Why study geology?

Because its leadership role among geoscience programs advances higher learning and serves society through the discovery, dissemination, and application of knowledge.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Geology Programs

The B.S. program provides intensive training in geology and other sciences. B.S. majors may emphasize traditional geology, environmental geology (with a specialized track in hydrogeology), engineering geology, geophysics, or earth and space science licensure. The hydrogeology track, the engineering geology option, and the geophysics option combine basic training in geology with training in mathematics, engineering, physics, and geophysics. The environmental geology option combines training in geology with many different sciences.

Degree requirements may be altered to suit particular needs of a student upon petition to the undergraduate studies committee and in consultation with a geology faculty advisor. Special consideration is given to students with strong backgrounds in supporting sciences and students with superior records who decide to major in geology late in their programs.

First- and Second-Year Preparation

Students interested in geology, especially in the B.S. degree, should see a department advisor as soon as possible. They should enroll in level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 Geology majors are required to complete 15 hours of elective. The Environmental Geology track offers electives in Water, Geology, and the Environment; Urban Environmental Geology; and Other Electives. For a list of applicable electives see the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/geology/ba/#requirementstext) tab.

3 All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+)
mathematics, chemistry, and English in addition to Introduction to Geology and electives. Students should take GEOL 360 as soon as possible.

**Advising**

Developing a strong relationship with a faculty advisor helps students get the most out of their educational programs in the shortest time. Most courses for majors are offered in only one semester each year. Advisors can guide the student through complexities of the curriculum or into a specialized program.

**Requirements for the B.S. Degree**

The B.S. program provides intensive training in geology and other sciences. B.S. majors may emphasize traditional geology, environmental geology (with a specialized track in hydrogeology), engineering geology, geophysics, or earth and space science licensure. The hydrogeology track, the engineering geology option, and the geophysics option combine basic training in geology with training in mathematics, engineering, physics, and geophysics. The environmental geology option combines training in geology with many different sciences.

Degree requirements may be altered to suit particular needs of a student upon petition to the undergraduate studies committee and in consultation with a geology faculty advisor. Special consideration is given to students with strong backgrounds in supporting sciences and students with superior records who decide to major in geology late in their programs.

**General Geology Option**

**Written Communication - Core Skill and Critical Inquiry.**

Geology or Civil Engineering Required Electives (19)

Majors must complete three additional geology or civil engineering courses, at least two of which must be from the following:
GEOL 521  Paleontology  3  
GEOL 535  Petroleum and Subsurface Geology  4  
GEOL 715  Geochemistry  3  
GEOL 751  Physical Hydrogeology  3  

CE 770  Concepts of Environmental Chemistry  2  
CE 771  Environmental Chemical Analysis  1  
Electives may include an upper-division course in statistics:
MATH 365  Elementary Statistics  3  
or BIOL 570  Introduction to Biostatistics  

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 45 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Environmental Geology Option

Written Communication - Core Skill and Critical Inquiry.

Composition (3)
Satisfied by one of the following. Requirement must be completed during initial term of admission at KU.
ENGL 101  Composition  3  
ACT English score of 27 or above or SAT English score of 600 or above  
AP English Literature & Composition score of 3 or above  
Equivalent transfer course

Critical Reading and Writing (3)
Satisfied by one of the following. Requirement must be completed within the first academic year at KU.
ENGL 102  Critical Reading and Writing  3  
ENGL 105  Freshman Honors English  
AP English Literature & Composition score of 4 or above  
Equivalent transfer course

Sophomore Reading and Writing II (15)
Satisfied by one of the following:
ENGL 203  Topics in Reading and Writing: _____  3  
or ENGL 205  Freshman-Sophomore Honors Proseminar: _____
ENGL 209  Introduction to Fiction  3  
ENGL 210  Introduction to Poetry  3  
ENGL 211  Introduction to the Drama  3  
ENGL 362  Foundations of Technical Writing  3  
AP English Literature & Composition score of 5 or above  
Equivalent

Communications.
Satisfied by:
Environmental Geology. Satisfied by:

- GEOL 351 Environmental Geology 3
- Field Investigation. Satisfied by:
- GEOL 360 Field Investigation 2
- Paleontology. Satisfied by:
- GEOL 521 Paleontology 3
- Geomorphology. Satisfied by:
- GEOL 541 Geomorphology 4
- Introduction to Hydrogeology. Satisfied by:
- GEOL 552 Introduction to Hydrogeology 3
- Introductory Field Geology. Satisfied by:
- GEOL 560 Introductory Field Geology 3
- Structural Geology. Satisfied by:
- GEOL 562 Structural Geology 4
- Geophysics. Satisfied by:
- GEOL 572 Geophysics 3

Geology Required Electives (38-43)

Majors must complete additional courses to total at least nine hours numbered 500 or above. The following are recommended:

- GEOL 391 Special Studies in Geology 1-6
- GEOL 535 Petroleum and Subsurface Geology 4
- GEOL 715 Geochemistry 3
- GEOL 751 Physical Hydrogeology 3
- CE 770 Concepts of Environmental Chemistry 3
- & CE 771 and Environmental Chemical Analysis 3
- GEOG 535 Soil Geography 4
- GEOG 558 Intermediate Geographical Information Systems 4
- GEOL 753 Chemical and Microbial Hydrogeology 4
- BIOL 400 Fundamentals of Microbiology 3

Environmental Hydrogeology Track

Besides the general program above, a specialized track in hydrogeology satisfies degree requirements. In addition to College, supporting science, and geology courses, the environmental hydrogeology track requires the following mathematics and civil engineering/physics courses:

- MATH 220 Applied Differential Equations 3
- MATH 290 Elementary Linear Algebra 2
- CE 330 Fluid Mechanics 4
- or PHSX 623 Physics of Fluids

In addition, Technical Electives (9 hours). These normally are chosen from courses numbered 500 or above in geology, physics, mathematics, chemistry, engineering or computer science. Courses numbered below 500 must be approved by a geology advisor.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours

Satisfied by 49 hours of major courses.

Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.
### Major Junior/Senior Hours
Satisfied by a minimum of 45 hours from junior/senior courses (300+) in the major.

### Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

### Geophysics Option

#### Geology Core Knowledge and Skills (30)
Majors must complete the following core courses:

| GEOL 101  | The Way The Earth Works                                                                                   |
| GEOL 103  | Geology Fundamentals Laboratory                                                                             |
| GEOL 304  | Historical Geology                                                                                         |
| GEOL 311  | Mineralogy and Structure of the Earth                                                                      |
| GEOL 331  | Sedimentology and Stratigraphy                                                                              |
| GEOL 360  | Field Investigation                                                                                        |
| GEOL 512  | Igneous and Metamorphic Petrology                                                                          |
| GEOL 560  | Introductory Field Geology                                                                                 |
| GEOL 562  | Structural Geology                                                                                        |
| GEOL 572  | Geophysics                                                                                                 |

#### Additional Geology Courses (9)

| GEOL 575  | Seismic Exploration                                                                                       |

| GEOL 575  | Seismic Exploration                                                                                       |
GEOL 577  Environmental Geophysics
GEOL 578  Seismic Data Analysis and Interpretation
GEOL 772  Geophysical Data Analysis
GEOL 776  Ground Penetrating Radar

Technical Required Electives (6)
At least 6 hours from the list below or other 500 and above Geology, Physics, Mathematics, Engineering, or Computer Science.
GEOL 535  Petroleum and Subsurface Geology
GEOL 536  Geological Log Analysis
GEOL 552  Introduction to Hydrogeology
MATH 581  Numerical Methods

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 45 hours of major courses.

Major in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Earth and Space Science Licensure Option
This program fulfills the requirements for a Bachelor of Science degree in geology. The program also meets course requirements necessary to gain state licensure eligibility in earth and space science to become a secondary teacher in Kansas, but completion of the program does not guarantee the student's licensure. This list is a guideline. Contact the geology department for further information about meeting degree and additional licensure requirements. You may also contact the UKanTeach Office for information about similar tracks resulting in eligibility for licensure in this and other science and mathematics fields.

Written Communication - Core Skill and Critical Inquiry.

Composition (3)
Satisfied by one of the following. Requirement must be completed during initial term of admission at KU.
ENGL 101  Composition 3
ACT English score of 27 or above or SAT English score of 600 or above
AP English Literature & Composition score of 3 or above
Equivalent transfer course

Critical Reading and Writing (3)
Satisfied by one of the following. Requirement must be completed within the first academic year at KU.
ENGL 102  Critical Reading and Writing 3

or ENGL 105  Freshman Honors English
AP English Literature & Composition score of 4 or above
Equivalent transfer course

Sophomore Reading and Writing II (15)
Satisfied by one of the following:
ENGL 203  Topics in Reading and Writing: _______ 3
or ENGL 205  Freshman-Sophomore Honors Proseminar: _______
ENGL 209  Introduction to Fiction 3
ENGL 210  Introduction to Poetry 3
ENGL 211  Introduction to the Drama 3
ENGL 362  Foundations of Technical Writing 3
AP English Literature & Composition score of 5 or above
Equivalent

Communications.
Satisfied by:
COMS 130  Speaker-Audience Communication 3
or COMS 150  Personal Communication

Humanities - Understanding the Human Condition. Satisfied by completing 2 courses (requirement code H). Approved courses may be searched for availability through the Kyou portal.

Social and Behavioral Sciences - Understanding Society and Behavior. Satisfied by completing 2 courses (requirement code S). Approved courses may be searched for availability through the Kyou portal. An introductory course in economics is recommended.

Geology Prerequisite or Co-requisite Knowledge (32-37)
Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

Calculus I. Satisfied by:
MATH 121  Calculus I (Prerequisite: MATH 104; or MATH 103; or three years of college preparatory mathematics including trigonometry and a score of 28 or higher on ACT mathematics or 640 or higher on the SAT; or a qualifying score on the mathematics placement test. Students may complete MATH 115 and MATH 116 prior to completing MATH 122) 5

Calculus II. Satisfied by:
MATH 122  Calculus II 5

Chemistry. Satisfied by:
CHEM 130  General Chemistry I 10
& CHEM 135  and General Chemistry II

Physics. Satisfied by:
PHSX 211  General Physics I 2-5
& PHSX 216  and General Physics I Laboratory
PHSX 212  General Physics II 2-4
& PHSX 236  and General Physics II Laboratory

Biology. Satisfied by:
BIOL 150  Principles of Molecular and Cellular Biology 4
or BIOL 151  Principles of Molecular and Cellular Biology, Honors
BIOL 152  Principles of Organismal Biology 4
or BIOL 153  Principles of Organismal Biology, Honors
Geology Core Knowledge and Skills (31)
Majors must complete the following core courses:
Introduction to Geology. Satisfied by:
GEOL 101 The Way The Earth Works 3
Geology Fundamentals Laboratory. Satisfied by:
GEOL 103 Geology Fundamentals Laboratory 2
Historical Geology. Satisfied by:
GEOL 304 Historical Geology 3
Mineralogy and Structure of the Earth. Satisfied by:
GEOL 311 Mineralogy and Structure of the Earth 3
Sedimentology and Stratigraphy. Satisfied by:
GEOL 331 Sedimentology and Stratigraphy 4
Field Investigation. Satisfied by:
GEOL 360 Field Investigation 2
Paleontology. Satisfied by:
GEOL 521 Paleontology 4
& GEOL 523 and Paleontology Laboratory
Introduction to Hydrogeology. Satisfied by:
GEOL 552 Introduction to Hydrogeology 3
Introductory Field Geology. Satisfied by:
GEOL 560 Introductory Field Geology 3
Structural Geology. Satisfied by:
GEOL 562 Structural Geology 4

Space Science Core Knowledge and Skills (8)
Majors must complete the following core courses:
Introductory Meteorology. Satisfied by:
ATMO 105 Introductory Meteorology 5
Contemporary Astronomy. Satisfied by:
ASTR 191 Contemporary Astronomy 3

Earth and Space Required Electives (0)
Majors must complete one of the areas below:
Geology Focus. Satisfied by 4 hours in a geology course numbered 300 or above.
Astronomy Focus. Satisfied by 4 hours in astronomy courses numbered 300 or above. This can include three hours of GEOL 121 (if taken before the completion of 60 hours), or ASTR 390 or GEOL 399.

Research Methods (3)
Satisfied by:
CHEM 598 Research Methods 3

Professional Development Course Work (2)
A minimum grade of C is required in all courses.
Liberal Arts and Sciences. Satisfied by:
LA&S 290 Approaches to Teaching Science and Mathematics I 1
LA&S 291 Approaches to Teaching Science and Mathematics II 1
Curriculum and Teaching (19 hours). Satisfied by:
C&T 448 Reading and Writing across the Curriculum and 16 hours of courses approved by UKanTeach in curriculum and teaching. These should include courses such as Classroom Interactions (3), Knowing and Learning (3), Project Based Instruction (3), Student Teaching (6), and Special Topics Seminar (1).

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 46 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 34 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Departmental Honors
Pursuit of departmental honors in Geology is by invitation from the Department of Geology honors coordinator.
Requirements include:
3.25 or higher KU GPA at graduation.
3.50 or higher KU geology-courses GPA at graduation.
Completion of at least 2 credit hours of GEOL 399.
Completion and successful defense of an honor's thesis.
Additional requirements and more information may be obtained from the Department of Geology honors coordinator and web site.

BS in Geology with concentration in Earth & Space Science
Below is a sample 4-year plan for students pursuing the BS in Geology with a concentration in Earth and Space Science. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website. (http://kucore.ku.edu/courses)

BS in Geology with concentration in Engineering Geology

Below is a sample 4-year plan for students pursuing the BS in Geology with a concentration in Engineering Geology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

</table>

1 Geology BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.
2 All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.
3 GEOL 360, GEOL 560, and GEOL 561 are offered only in the summer.
4 The Earth and Space Science concentration must complete electives in one of the following two areas: Geology Focus or Astronomy Focus. Course specifics are listed under the Degree Requirements tab.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

1. All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.
2. GEOL 360, GEOL 560, and GEOL 561 are offered only in the summer.
3. The Engineering Geology concentration must complete three additional geology or civil engineering courses, at least two of which must be from the list provided under the Degree Requirements tab.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Total Hours: 119-120

1. All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.
2. Geology BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.
3. GEOL 360, GEOL 560, and GEOL 561 are offered only in the summer.
4. Majors with a concentration in Geophysics are required to complete 9.0 hours of additional Geology courses. A list of possible courses can be found on the Degree Requirements tab.
Minor in Geology

Why study geology?

Because its leadership role among geoscience programs advances higher learning and serves society through the discovery, dissemination, and application of knowledge.

Requirements for the Minor

The minor requires 18 to 23 hours of geology courses, of which 12 hours must be junior/senior hours or higher (courses numbered 300 or above).

Geology Minor Course Requirements (5)

Students selecting this minor must complete the following:

Introduction to Geology. Satisfied by:
GEOL 101 The Way The Earth Works 3

Geology Fundamentals Laboratory. Satisfied by:
GEOL 103 Geology Fundamentals Laboratory 2

Geology Required Electives (13)

Students selecting this minor must complete a minimum of 13 hours in geology courses. GEOL 311 and GEOL 331 are recommended because they are necessary as prerequisites for many upper-division courses.

Students must work with an advisor to select courses to complete the requirements for the minor. Students must turn in a signed Geology Minor Advising form and a Minor Declaration form to the department office, 120 Lindley Hall, before taking any courses numbered 500 or above.

Minor Hours

Satisfied by 18 hours of minor courses.

Minor Hours in Residence

Satisfied by a minimum of 9 hours of KU resident credit in the minor.

Minor Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Junior/Senior Graduation GPA

Satisfied by a minimum of 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Master of Science in Geology

Why study geology at the University of Kansas?

KU-Geology is a leader among geoscience programs, where students learn to serve society through the discovery, dissemination, and application of knowledge. Graduates may go on for further academic training or are employed in the energy and water industries, as well as in government agencies, with high levels of job satisfaction.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Admission is based on academic records including grade-point average and general preparedness in geology and supporting sciences, letters of recommendation, and the applicant’s stated academic and professional interests and goals. Results of the aptitude tests of the Graduate Record Examination are required. An attempt is made to balance the interests of students with the availability of faculty members to supervise them and laboratory space in which they may work. Consequently, new admissions in areas of geology that are heavily subscribed or in which the department has little expertise may be limited. As a result, some students who meet KU’s minimum standard for admission may be refused. Students who do not hold master’s degrees in geology normally are admitted to pursue the master’s degree. Students with exceptional records may be invited to study for the Ph.D. without first earning the M.S. degree.

Submit your graduate application online (http://www.graduate.ku.edu). Inquiries may be sent to the Department:

The University of Kansas
Department of Geology
Lindley Hall
1475 Jayhawk Blvd., Room 120
Lawrence, KS 66045-7594

M.S. Degree Requirements

Details of the regulations on graduate study are included in the department’s Ground Rules for Graduate Students, that is made available to admitted students online through Blackboard.

Prerequisites normally include credit in one year each of general biology, general chemistry, general physics, and calculus, plus junior- or senior-level courses in mineralogy, petrology, structural geology, paleontology, stratigraphy, geophysics, and a summer course in field geology. Students planning to specialize in geophysics also should have more advanced backgrounds in calculus and physics. Incoming graduate students meet with a departmental advisory review committee before enrollment to identify deficiencies and strengths and to set up curricula aimed at
providing a broad background in geology at the intermediate to advanced level during the first year. Some deficiencies may be waived at this time if they are deemed nonessential.

Geology has many subdisciplines, and the department tailors each student’s curriculum to the needs of the individual. There is no departmental core curriculum or list of required courses.

**Thesis Option (M.S. Degree)**

The master’s degree curriculum requires completion of 30 credit hours, including up to 6 credit hours for thesis research, and an acceptable master’s thesis. The student sets the curriculum in consultation with a 3-member advisory committee selected from the Graduate Faculty and approved by the Graduate Advisor. Course work counted toward the degree must be distributed to provide a comprehensive general knowledge of geology in addition to specialized knowledge required for the thesis. It may include courses in departments other than Geology.

Although the Department of Geology does not award a master’s degree in geophysics, students can specialize in geophysics at the master’s level. The requirements for the degree are overseen by geophysics faculty within the Department and scientists on the staff of the Kansas Geological Survey. Geophysics research projects are also supervised by Departmental geophysics faculty and scientists on the staff of the Survey. Similar arrangements with faculty outside the Department can be made for students specializing in geobiology, glaciology, hydrogeology, paleontology, sedimentology, or tectonics.

Students seeking to earn an M.S. in geology must maintain at least a 3.0 grade-point average in geology and supporting science courses and pass a final oral general examination with emphasis on the areas of geology relevant to the thesis project. This examination may be repeated once, if necessary.

**Nonthesis Option (M.S. Degree)**

A student may complete an M.S. degree program based primarily on course work and specialized skills. For this degree, a minimum of 36 credit hours of graduate-level study must be completed, including two written reports based on small projects (non-thesis with projects) or a single written report on a prescribed topic (non-thesis without projects). The student determines the structure of the curriculum and projects in consultation with an advisory committee of 5 faculty members. A student must declare an intention to follow the nonthesis option during the first semester of graduate study. The nonthesis degree is a terminal degree and normally cannot lead to doctoral study. In addition to maintaining a 3.0 grade-point average in course work, the student must demonstrate proficiency in the areas of geology covered by the program. This is accomplished by satisfactory performance on a series of written examinations assembled and administered by the advisory committee (non-thesis with projects) or an oral examination (non-thesis without projects). These constitute the final examination for the degree and may be repeated once, if necessary.

During or after the period of residence, a student who wishes to change to an M.S. (thesis) program or a Ph.D. program must petition the graduate studies committee.

**Doctor of Philosophy in Geology**

**Why study geology at the University of Kansas?**

KU-Geology is a leader among geoscience programs, where students learn to serve society through the discovery, dissemination, and application of knowledge. Graduates may go on for post-doctoral training or are employed in academia, the energy and water industries, as well as in government agencies, with high levels of job satisfaction.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Admission is based on academic records including grade-point average and general preparedness in geology and supporting sciences, letters of recommendation, and the applicant’s stated academic and professional interests and goals. Results of the aptitude tests of the Graduate Record Examination are required. An attempt is made to balance the interests of students with the availability of faculty members to supervise them and laboratory space in which they may work. Consequently, new admissions in areas of geology that are heavily subscribed or in which the department has little expertise may be limited. As a result, some students who meet KU’s minimum standard for admission may be refused. Students who do not hold master’s degrees in geology normally are admitted to pursue the master’s degree. Students with exceptional records may be invited to study for the Ph.D. without first earning the M.S. degree.

Submit your graduate application online (http://graduate.ku.edu/prospective-students). Inquiries may be sent to the Department:

**The University of Kansas**

**Department of Geology**

**Lindley Hall**

**1475 Jayhawk Blvd., Room 120**

**Lawrence, KS 66045-7594**

**Ph.D. Degree Requirements**

Doctoral students can specialize in any area of faculty expertise, including hydrogeology and geophysics. Prospective Ph.D. candidates are subject to the same initial requirements as master’s students. The master’s degree is not a prerequisite for doctoral aspirancy. A student with good background and good performance during the first 2 semesters may be invited to proceed directly toward the doctorate.

The student’s advisory committee and the student construct a curriculum that offers the best preparation for the chosen field of interest and satisfies the research skills requirement. Each student is expected to enroll in courses in supporting fields to develop a multidisciplinary
Department of Germanic Languages and Literatures

Why study Germanic languages and literatures?

Knowledge and appreciation of the language, literature, and culture of Central Europe will help us understand our own past, present, and future and will also provide students with translingual and transcultural competence that will help them participate actively and productively in our increasingly global world.

Libraries

Special Library Collections in German

The Rainer Maria Rilke Collection comprises more than 1,200 volumes, including all first editions, critical editions, translations, bibliographies, criticism, and various materials on the reception of his works. The Collection is located in the Max Kade Center for German-American Studies.

The Engel German Library is an endowed departmental library housing an expanding collection of reference works, standard editions, basic secondary literature, current German periodicals, newspapers and magazines, as well as tape recordings, records, slides, and audio-visual equipment.

Max Kade Center for German-American Studies

The center collects materials on German culture in the United States and fosters scholarship in German-American Studies, especially dialect, literary, and interdisciplinary cultural studies, including dissertation research. The materials—10,000 books, as well as magazines, journals, and other writings—were produced or brought to this country by German-speaking immigrants and, in the 20th century, by exiles from Nazi Germany. Among the holdings are materials from the Turner societies of New York, Milwaukee and Lawrence. The center sponsors lectures, symposia, workshops, and conferences; publishes the Yearbook of German-American Studies for the Society of German-American Studies; and houses the Linguistic Atlas of Kansas German Dialects.

For information, contact James Morrison, Interim Director, Sudler House, 785-864-7343 or 7342, german@ku.edu.

Undergraduate Programs

We offer students a diverse and challenging program in the language and cultural forms of German-speaking Europe, including literature, the arts, history, business, and politics. Our program is characterized by personalized advising, interdisciplinary flexibility, co-curricular activities, and opportunities to conduct independent research and to study and undertake internships abroad. Courses at the 100, 200, and 300 levels emphasize student involvement with the aim of developing students’ use of the German language, including the ability to comprehend, interpret, and produce spoken, written, and multimedia texts in different genres. Cultural topics are integrated into instruction starting in the first semester. At the 400 and 500 levels, survey courses provide students with a broader perspective on German cultural traditions, while other advanced courses often have a thematic focus.
All of our courses except GERM 315: German Literature and the Modern Era are taught in German. Majors have the option of taking two approved courses offered by other departments that are taught in English and include significant content related to German-speaking Europe; minors may take one such course. Courses taken in departments such as the history of art, philosophy, political science, Slavic languages & literatures, sociology, and theatre will enhance students’ study of the language and cultural forms of German-speaking Europe.

Both the German major and minor can be combined with majors and minors in other departments. Many students take advantage of this opportunity and combine their study of German with linguistics, business, philosophy, European studies, and history, for example.

The department on occasion offers a 4-semester proficiency sequence in a Scandinavian language (Swedish, Danish, or Norwegian) and in Dutch. The Department of Slavic Languages & Literatures offers a 4-semester Yiddish proficiency sequence. Courses for reading knowledge in German, Danish, and Dutch are also offered, subject to availability.

Placement

Students beginning the study of German at KU should take GERM 104. Students who have studied German before should take the online German placement examination and contact the department’s placement officer, Prof. Nina Vyatkina, vyatkina@ku.edu.

Retroactive Credit

Students with no prior college or university German course credit are eligible for retroactive credit as follows:

• 3 hours of retroactive credit are awarded to a student with 2 or 3 years of high school German who initially enrolls at KU in the third-semester German course (GERM 201) and receives a grade of C or higher.

• 6 hours of retroactive credit are awarded to a student with 3 or 4 years of high school German who initially enrolls at KU in the fourth-semester German course (GERM 202) and receives a grade of C or higher.

• 9 hours of retroactive credit are awarded to a student with 4 years of high school German who initially enrolls at KU in a German course with GERM 202 as a prerequisite and receives a grade of C or higher.

Students must be actively enrolled at the university when they apply for retroactive credit. There is a flat-rate charge of $50; you will receive a bill from the Bursar’s Office after the credit has been applied to your transcript. To apply for retroactive credit, you must bring the following 3 items to the Undergraduate Advisor:

• Copy of your high school transcript, available from the Office of Admissions at the Visitor Center

• A copy of your DPR

• A note stating that you wish to apply for retroactive credit for the German course(s) that you took in high school.

Advanced Placement

KU encourages students to take Advanced Placement Examinations in any of the areas under the College Entrance Examination Board (CEEB) program. KU gives credit only in certain courses with certain scores from the AP examinations.

The results of these examinations must be sent to KU directly from CEEB. Departments may grant advanced placement and/or credit on the basis of the test scores. No college grade is assigned when advanced placement credit is given. Instead, a credit is recorded on the student’s KU record. No fee, beyond that charged by CEEB, is assessed for such college credit or placement. For information on how Advanced Placement scores in English and mathematics affect graduation requirements and initial enrollment in all schools, see the College of Liberal Arts and Sciences Degree Requirements page and the English (p. 1342) and Mathematics (p. 1821) department pages. Contact the Office of Admissions (http://admissions.ku.edu), adm@ku.edu, for further information.

Credit by Examination

KU offers its own program of examinations for advanced credit. Applications are available online (http://www.registrar.ku.edu/forms). They must be approved by the Undergraduate Advisor and the chair of the department concerned and by the student’s dean or dean’s representative. A report of the examination taken, showing the hours of credit to be granted and the grade awarded, must be signed by the professor giving the examination, the chair, and the dean or dean’s representative.

At the discretion of each academic dean, grades of A, B, C, or D may be used to indicate degrees of achievement, or a grade of Credit may indicate satisfactory performance. No record is made of an unsatisfactory attempt. Credit by Examination grades are not included in the grade-point average that appears on the official transcript.

A fee is charged for each course. For current fee information, contact the Office of the University Registrar (http://www.registrar.ku.edu), kuregistrar@ku.edu.

Warning: Some medical schools do not accept credit by examination.

Native Speakers

Students who have completed secondary education in a German-speaking country are generally not eligible to enroll in German courses below the 400 level. The department reserves the right to disenroll such students.

Courses for Future Teachers

Candidates for the B.S. in Education majoring or minoring in German should consult the School of Education.

General Information about the Graduate Program

The Department offers the German Studies M.A. and Germanic Languages & Literatures Ph.D. Work toward the M.A. degree consists of a traditional curriculum providing important foundational knowledge. The curriculum includes historical surveys of the major literary periods and genres, of the structure and function of German and Germanic languages, knowledge of disciplinary methodologies employed in the field, development of language capacity, and control of writing and research strategies. Building on the M.A. foundational base, the KU Ph.D. degree program encourages students to develop their particular intellectual interests in collaboration with KU faculty and their areas of specialization. The graduate program focuses on the following areas:

• German literature

• Germanic linguistics/philology

• German second-language acquisition/applied linguistics

The Doctoral Program Profile (PDF) (http://graduate.ku.edu/sites/graduate.drupal.ku.edu/files/docs/dpp/DPP_A_GERM.pdf) gives a
retrospective overview of our time-to-degree and other statistics relevant to the graduate program and graduate-student experience. More information regarding areas of concentration is available on the Graduate Admission (http://germanic.ku.edu/graduate-admission) page of the departmental website.

**Departmental Funding**

While it is not guaranteed, the department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach German at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://germanic.drupal.ku.edu/gta-appointments-and-fellowships) of our departmental website.

Post-comprehensive students completing their dissertations are also eligible to apply for one of the the departmental Max Kade Dissertation Fellowships.

**Additional Funding**

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding) for KU graduate students.

**Contact**

For inquiries concerning the graduate program, please contact:

Professor William D. Keel (https://germanic.drupal.ku.edu/william-d-keel), Director of Graduate Studies and/or Cari Ann Kreienhop (https://germanic.drupal.ku.edu/cariann-kreienhop), Graduate Academic Advisor & Graduate Admissions Administrator.

**Courses**

**DANE 100. Danish Reading Course. 3 Hours U.**

Special course designed to enable graduate students to develop a reading knowledge of Danish as a research skill. Enrollment for undergraduate credit is required. Does not satisfy any part of the undergraduate language requirement. Not open to native speakers of Danish. LEC.

**DANE 101. Danish Reading Course II. 3 Hours U.**

Continuation of DANE 100 and introduction to reading Norwegian and Swedish. Not open to native speakers of Danish. Prerequisite: DANE 100 or equivalent. LEC.

**DANE 104. Elementary Danish I. 5 Hours U / F1.**

Essentials of grammar, practice in speaking, reading, and writing Danish. Five hours of recitation per week. Not open to native speakers of Danish. LEC.

**DANE 105. Elementary Danish I, Honors. 5 Hours H / F1.**

Course content similar to DANE 104, with additional work to expand the student’s cultural context and understanding. Not open to native speakers of Danish or students who have completed DANE 104. Prerequisite: Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

**DANE 108. Elementary Danish II. 5 Hours U / F2.**

Continuation of grammar; practice in conversation, composition, and reading. Five hours of recitation per week. Not open to native speakers of Danish. Prerequisite: DANE 104 or permission of instructor. LEC.

**DANE 109. Elementary Danish II, Honors. 5 Hours H / F2.**

Course content similar to DANE 108, with additional cultural study. Not open to native speakers of Danish or students who have completed DANE 108. Prerequisite: Open to students who received a grade of A in DANE 104 or an A or B in DANE 105. LEC.

**DANE 177. First Year Seminar: _____ . 3 Hours GE11 / U.**

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Danish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

**DANE 212. Intermediate Danish I. 3 Hours U / F3.**

A continuation of DANE 108. Structured grammar review, composition, conversation with readings of literary and cultural texts. Not open to native speakers of Danish. Prerequisite: DANE 108 or permission of instructor. LEC.

**DANE 213. Intermediate Danish I, Honors. 3 Hours H / F3.**

Course content similar to DANE 212, with additional cultural study. Not open to native speakers of Danish or students who have completed DANE 212. Prerequisite: Completion of DANE 108 with a grade of A, or DANE 109 with a grade of A or B. LEC.

**DANE 216. Intermediate Danish II. 3 Hours U / F4.**

A continuation of DANE 212. Structured grammar review, composition, conversation with readings of literary and cultural texts. Not open to native speakers of Danish. Prerequisite: DANE 212 or permission of instructor. LEC.

**DANE 217. Intermediate Danish II, Honors. 3 Hours H / F4.**

Course content similar to DANE 216, with additional cultural study. Not open to native speakers of Danish or students who have completed DANE 216. Prerequisite: Completion of DANE 212 with a grade of A, or DANE 213 with a grade of A or B. LEC.

**DANE 220. Intensive Danish. 16 Hours U.**

This course is designed to teach speaking, reading, writing, and comprehension skills of first and second year Danish in one semester. Classes are held for four hours a day Monday through Friday (8:30 a.m. - 12:20 p.m.). There are intensive drills in grammar, integrated language lab work, and homework assignments. Not open to native speakers of Danish. Prerequisite: Admission to Danish Institute at the University of Kansas. LEC.

**Courses**

**DTCH 100. Dutch Reading Course. 3 Hours U.**

Special course designed to enable graduate students to develop a reading knowledge of Dutch as a research skill. Enrollment for undergraduate credit is required. Does not satisfy any part of the undergraduate language requirement. Not open to native speakers of Dutch. LEC.
**Courses**

**DTCH 101. Dutch Reading Course II. 3 Hours.**
Continuation of DTCH 100. Not open to native speakers of Dutch. Prerequisite: DTCH 100 or equivalent. LEC.

**DTCH 104. Elementary Dutch I. 5 Hours U / F1.**
Essentials of grammar; practice in conversation, reading, and writing Dutch. Five hours of recitation per week. Not open to native speakers of Dutch. LEC.

**DTCH 105. Elementary Dutch I, Honors. 5 Hours U / F1.**
Similar to DTCH 104 with additional work to expand the student's cultural context and understanding. Not open to native speakers of Dutch or students who have completed DTCH 104. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

**DTCH 108. Elementary Dutch II. 5 Hours U / F2.**
Continuation of grammar, practice in conversation, composition, and reading. Five hours of recitation per week. Not open to native speakers of Dutch. Prerequisite: DTCH 104 or equivalent. LEC.

**DTCH 109. Elementary Dutch II, Honors. 5 Hours U / F2.**
Course content similar to DTCH 108, with additional cultural study. Meets 5 days a week. Not open to native speakers of Dutch. Prerequisite: Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

**DTCH 177. First Year Seminar: ______. 3 Hours GE11 / U.**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Dutch. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

**DTCH 212. Intermediate Dutch I. 3 Hours U / F3.**
A continuation of DTCH 108. Structured grammar review, composition, conversation, with readings of literary and cultural texts. Three class meetings per week. Not open to native speakers of Dutch. Prerequisite: DTCH 108 or equivalent. LEC.

**DTCH 213. Intermediate Dutch I, Honors. 3 Hours U / F3.**
Course content similar to DTCH 212, with additional cultural study. Three class meetings per week. Not open to native speakers of Dutch. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

**DTCH 216. Intermediate Dutch II. 3 Hours U / F4.**
A continuation of DTCH 212. Structured grammar review, composition, conversation, with readings of literary and cultural texts. Three class meetings per week. Not open to native speakers of Dutch. Prerequisite: DTCH 212 or equivalent. LEC.

**DTCH 453. Investigation and Conference: ______. 1-3 Hours H/W.**
Independent study and directed reading on special topics. Permission of the instructor who will supervise the student's work is required. Not open to native speakers of Dutch. IND.

**Courses**

**GERM 100. German Reading Course I. 3 Hours U.**
Primarily for graduate students in other departments but also open to seniors planning to pursue graduate study. Fundamentals of grammar and reading texts of medium difficulty. Does not count toward undergraduate language requirement. Previous study of German not necessary. Not open to native speakers of German. LEC.

**GERM 101. German Reading Course II. 3 Hours U.**
Continuation of GERM 100. Advanced grammar and reading advanced texts in the students' respective fields. Does not count toward undergraduate language requirement. Not open to native speakers of German. Prerequisite: GERM 100 or permission of instructor. LEC.

**GERM 104. Elementary German I. 5 Hours AE42 / U / F1.**
Introductory German; no previous German required. Development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on everyday topics and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 108. LEC.

**GERM 108. Elementary German II. 5 Hours AE42 / U / F2.**
Continuation of GERM 104. Further development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on everyday topics and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 201. Prerequisite: GERM 104 or placement by examination. LEC.

**GERM 111. Introduction to German I. 3 Hours U.**
Introduction to German for special purposes; no previous German required. Provides basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Introduction to the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement. LEC.

**GERM 112. Introduction to German II. 3 Hours U.**
Continuation of GERM 111. Further development of basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Continued exploration of the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: GERM 111 or permission of instructor. LEC.

**GERM 113. Introduction to German III. 1.5 Hour U.**
Continuation of GERM 112. Further development of basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Continued exploration of the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: GERM 112 or permission of instructor. LEC.

**GERM 124. German Cinema in Context. 3 Hours HL AE42 / H.**
Taught in English. Screening and analysis of German films from the early 20th century to the present. Readings, lectures, and discussions on the films' sources, ideologies, techniques, and artistic achievements. Does not count toward the German major or minor. LEC.

**GERM 125. German Cinema in Context (Honors). 3 Hours HL AE42.**
Course content similar to GERM 124. Taught in English. Screening and analysis of German films from the early 20th century to the present. Readings, lectures, and discussions on the films' sources, ideologies, techniques, and artistic achievements. Does not count toward German major or minor. LEC.
GERM 126. Introduction to the Arts in German-Speaking Europe. 3 Hours H.
Taught in English. Exploration of the arts in German-speaking Europe: major cultural periods, movements, art forms, and people (artists, architects, composers, writers, filmmakers) from the Middle Ages to the present. Consideration of the arts within the larger European historical and cultural context from which they emerged. Does not count toward the German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 328. LEC.

GERM 130. German-Speaking Europe and German-Speaking Europeans. 3 Hours AE42 / H.
A survey of contemporary German-speaking Europe that covers topics such as geography, the environment, technology, the arts, music, film, literature, politics, immigration, language, religion, customs. Focus on Germany, Austria, Switzerland, Belgium, Luxembourg, Liechtenstein. Taught in English. Does not count toward the German Studies major or minor. LEC.

GERM 132. The City of Berlin in German Culture. 3 Hours H.
Taught in English. Introduction to Berlin within the context of major German and European historical, social, intellectual, and artistic developments since 1800. Exploration of complex epochs such as the Bismarck, Nazi, Cold War, and post-unification eras through journalism, literature, sociological writings, and film. Does not count toward German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 332. LEC.

GERM 136. The German Transatlantic Experience. 3 Hours HT AE41 / U.
Taught in English. Introduction to the migration of German-speaking Europeans to North America, 17th century-present. Consideration of European and North American factors motivating migration, the journey to the New World, the experiences of immigrants and their descendants, and the ways in which German-speaking Europeans shaped the multicultural history of America. LEC.

GERM 148. Germanic Mythology, Religion, and Folklore. 3 Hours H/W.
Taught in English. Introduction to the pagan myths and beliefs of Teutonic antiquity and their survival in the popular traditions of Germanic countries, within the framework of comparative mythology, archaeology, and anthropology. Does not count toward the German major or minor. LEC.

GERM 177. First Year Seminar: _____, 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in German. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

GERM 201. Intermediate German I. 3 Hours AE42 / U / F3.
Continuation of GERM 108. Further development of students’ balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts in different genres and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 202. Prerequisite: GERM 108 or placement by examination. LEC.

Continuation of GERM 201. Further development of students’ balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts in different genres and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who successfully complete this course should take GERM 301. Prerequisite: GERM 201 or placement by examination. LEC.

GERM 203. Introduction to Business German: Deutsch im Berufsalltag. 3 Hours AE42 / H / F4.
Continuation of GERM 201; completes language proficiency sequence. Further development of students’ balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on the topics related to professional communication and to interpret, compare, and contrast German and American business cultural phenomena. Emphasis on interaction. Recommended for students planning to take GERM 352 and GERM 462. Not open to native speakers of German. Prerequisite: GERM 201 or placement by examination. LEC.

GERM 220. Special Studies in Germanic Languages. 1-5 Hours U.
Credits awarded for elementary instruction in a Germanic language while studying abroad. Transfer credits must be arranged through the KU Office of Study Abroad, with permission from the departmental undergraduate advisor. May be repeated for credit if content varies. LEC.

GERM 222. Special Studies in German: _____, 1-3 Hours H/W.
Credits awarded for the study of special topics in German while studying abroad. Transfer credits must be arranged through the KU Office of Study Abroad, with permission from the departmental undergraduate advisor. May be repeated for credit if content varies. LEC.

GERM 301. High Intermediate German I. 3 Hours AE42 / H/W.
Continuation of GERM 202. Further development of students’ use of German through reading and discussion of literary and non-literary texts (spoken, written, multimedia, combined with intensive grammar review). Introduction to expressive functions of German with emphasis on spoken and written communication. Not open to native speakers of German. Students who complete this course successfully should take GERM 302. Prerequisite: GERM 202 or placement by examination. LEC.

GERM 302. High Intermediate German II. 3 Hours AE42 / H/W.
Continuation of GERM 301. Refinement and expansion of students’ use of German. Reading and discussion in German of literary and non-literary texts (spoken, written, multimedia, combined with continued intensive grammar review). Emphasis on better understanding German grammatical structures and acquisition of vocabulary. Not open to native speakers of German. Students who complete this course successfully should take GERM 401. Prerequisite: GERM 301 or placement by examination. LEC.

GERM 315. German Literature and the Modern Era. 3 Hours H.
Introduction in English to German writers 1750-present. Discussion of themes such as technology, modern and postmodern developments, gender, war, politics, and culture in German-speaking Europe. Readings include works in translation by influential German writers. Open to first-year students and non-majors; qualifies for major or minor credit when taken with GERM 316, a one-hour discussion section. GERM 315 and GERM 316 are required for admission to all courses beyond GERM 402 (except GERM 444 and GERM 462). LEC.

GERM 316. Discussion Section for German Literature and the Modern Era. 1 Hour H.
Discussion section to be taken with GERM 315; German Literature and the Modern Era. Introduction to critical German vocabulary for discussing German-language literature in its historical and cultural context. Prerequisite: GERM 202 or placement by examination. GERM 315 qualifies for major or minor credit when taken with GERM 316. LEC.
GERM 320. Border Crossings in German Culture. 3 Hours HT AE42.
Taught in English. Exploration of writers, filmmakers, and artists who have emigrated from, or migrated to German-speaking Europe. Emphasis on both their transnational impact and their representations of border crossings. Topics may include exile communities before, during, and after World War II and multiculturalism in contemporary Germany, Austria, and Switzerland. Does not count toward German major or minor. LEC.

GERM 324. Magic, Monsters and the Occult in German Literature. 3 Hours HL AE42.
Taught in English. Reading and discussion of fictional and non-fictional works by German writers that address topics such as magic, monsters, the occult sciences, the Faust legend and pact with the devil, and the vampire. Consideration of the works' influence on other nations' literatures. Does not count toward the German major or minor.

GERM 325. Magic, Monsters, and the Occult in German Literature, Honors. 3 Hours HL / H.
Taught in English. For centuries German scientists, philosophers and poets have produced groundbreaking literature that has featured magic, monsters and the occult sciences. German poets introduced popular themes, such as the Faust legend and the pact with the devil, and they introduced one of the most popular monsters into literature - the vampire. In this course we read and discuss fictional and nonfictional works by German authors that address these themes, and we discuss the influence that these works have had on other nations' literatures. Does not fulfill any requirement in the German major or minor. Prerequisite: Membership in the University Honors Program or permission of instructor. LEC.

GERM 328. The Arts in German-Speaking Europe. 3 Hours HL AE42.
Taught in English. Exploration of the arts in German-speaking Europe: major cultural periods, movements, art forms, and people (artists, architects, composers, writers, filmmakers) from the Middle Ages to the present. Consideration of the arts within the larger European historical and cultural context from which they emerged. Does not count toward the German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 128. LEC.

GERM 330. Topics in: ______. 3 Hours H.
Taught in English. Interdisciplinary study of selected aspects of the society or culture of German-speaking Europe or of the European experience. Does not count toward the German major or minor. LEC.

GERM 332. Berlin in German Culture. 3 Hours HL AE42.
Taught in English. Introduction to Berlin within the context of major German and European historical, social, intellectual, and artistic developments since 1800. Exploration of complex epochs such as the Bismarck, Nazi, Cold War, and post-unification eras through journalism, literature, sociological writings, and film. Does not count toward German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 132. LEC.

GERM 333. German Conversation and Idioms. 3 Hours H.
Intensive practice in conversational German with instruction in proper pronunciation as well as an introduction to idiomatic usage. Only for students in the KU Summer Language Institute in Holzkirchen, Germany. Prerequisite: GERM 202 or equivalent fourth -semester German course. LEC.

GERM 335. Love and the German Middle Ages. 3 Hours H.
Taught in English. Introduction to German conceptions of love, marriage, and adultery in medieval and early modern German-speaking Europe. Exploration of the German contribution to discourse of love through theoretical, literary, and legal texts, as well as through visual and material culture. Examination of German discourse within the broader European context, and of similarities, differences, and continuities between medieval and modern constructs. Does not count toward German major or minor. LEC.

GERM 352. Business German: Deutsch Fur Den Beruf. 3 Hours H/W.
Extensive practice in business communication: terminology, texts and correspondence, oral practice in business situations. Not open to native speakers of German. Prerequisite: GERM 202 or placement by examination. LEC.

GERM 353. German Conversation. 3 Hours H/W / FP.
Further development of practical conversational skills for students with intermediate proficiency in German. Discussion of topics from everyday German life and current affairs, based on German newspapers and magazines. May be repeated but counts only once toward the major or minor. Not open to native speakers of German. Prerequisite: GERM 202. LEC.

GERM 375. Topics in Film of German-Speaking Europe: ______. 3 Hours H.
Examination of topics such as Expressionism, Turkish-German culture in contemporary German film, popular filmmaking, post-unification film, German literature as film, German film and national identity. Topics and periods vary. Prerequisite: GERM 302. LEC.

GERM 400. Introduction to German Literary Masterpieces. 3 Hours H/W / FP.
For students enrolled in the KU Summer Language Institute in Germany. Selected works of major German Language writers of the 19th and 20th centuries. Not open to native speakers of German. Prerequisite: GERM 302. LEC.

GERM 401. Advanced German I. 3 Hours H / FP.
Continuation of GERM 301. Expansion and refinement of proficiency in German (speaking, listening, reading, writing), increased understanding of German grammatical structures, development of a more sophisticated vocabulary, and introduction to stylistics through discussion and analysis of literary and nonliterary texts. Students successfully completing GERM 401 may take all other GERM courses at the 400 and 500 levels. Prerequisite: GERM 302. LEC.

GERM 402. Advanced German II. 3 Hours H / FP.
Continuation of GERM 401. Development of advanced proficiency in German through analysis and discussion of literary and nonliterary texts and practice in advanced composition. Emphasis in both discussions and papers on style and rhetoric and on developing skill in textual analysis. Focus on advanced German grammar and on style and idiomatic expression in spoken and written German. Prerequisite: GERM 401. LEC.

GERM 411. German Culture 1150-1750. 3 Hours AE61 / H / FP.
Exploration of major cultural periods and movements within the framework of historical and political change, with investigation of themes such as nation and national identity, founding myths, geography, and language. Study of forms of culture in German-speaking Europe, including visual art, music, literature, architecture, and the press. Prerequisite: GERM 316 and GERM 401. LEC.

GERM 412. German Culture 1750-Present. 3 Hours AE61 / H / FP.
Exploration of major cultural periods and movements 1750-present within the framework of historical and political change, with investigation of themes such as nation and national identity, founding myths, geography, and language. Study of forms of culture in German-speaking Europe, including visual art, music, literature, architecture, and the press. Prerequisite: GERM 316 and GERM 401. LEC.
GERM 453. Investigation and Conference: ____. 1-3 Hours H/W.
Independent study and directed reading on special topics. Permission of
the instructor who will supervise the student's work is required. Not open
to native speakers of German. IND.

GERM 452. The German Business Environment. 3 Hours H/W / FP.
Introduction to German business practices, including basic information
about German economic and corporate life. Especially designed for
students intending to participate in an internship with a German company
and those who wish to enhance their knowledge of basic business
German. Taught in German. Not open to native speakers of German.
Prerequisite: One 300-level German course. LEC.

GERM 475. Topics in German Studies: ____. 3 Hours H / FP.
Exploration of cultural forms such as literature, film, philosophy, social
institutions, linguistics, the arts, and the press. Examination of how
aesthetic meaning is produced and interpreted. Topics vary, and course
may address topics across a narrow or broad time frame. May be
repeated if content varies. Prerequisite: GERM 316 and GERM 401. LEC.

GERM 480. Literature and Culture of German-Speaking Europe
1150-1750. 3 Hours AE61 / H / FP.
Exploration of medieval and early modern literature within the framework
of major cultural movements and historical, political, and economic
change. Prerequisite: GERM 316 and GERM 401. LEC.

GERM 481. Literature and Culture of German-Speaking Europe
1750-1830. 3 Hours AE61 / H / FP.
Exploration of literature within the framework of major cultural movements
and historical, political, and economic change. Prerequisite: GERM 316
and GERM 401. LEC.

GERM 482. Literature and Culture of German-Speaking Europe
1830-1918. 3 Hours AE61 / H / FP.
Exploration of literature within the framework of major cultural movements
and historical, political, and economic change. Prerequisite: GERM 316
and GERM 401. LEC.

GERM 483. Literature and Culture of German-Speaking Europe
1918-Present. 3 Hours AE61 / H / FP.
Exploration of literature within the framework of major cultural movements
and historical, political, and economic change. Prerequisite: GERM 316
and GERM 401. LEC.

GERM 501. Advanced German III. 3 Hours H / FP.
Focus on usage-based grammar of contemporary German. Extensive
reading and analysis of grammatical structures in context and integration
of form, meaning, and use. Exploration of grammatical structures using
contemporary electronic textual analysis tools. Prerequisite: GERM 402.
LEC.

GERM 550. German Language Seminar: History of the German
Language. 3 Hours H / FP.
Introduction to basic concepts of German philology and historical
linguistics and exploration of the development of a national German
language. Prerequisite: GERM 316 and GERM 401. LEC.

GERM 560. German Language Seminar: Structure of the German
Language. 3 Hours H / FP.
This course provides an overview of the structure of modern standard
German. Students will explore different levels of the linguistic system of
German (including phonology, morphology, and syntax) and complete
practical exercises. Prerequisite: GERM 316 and GERM 401. LEC.

GERM 575. Topics in Genre: ____. 3 Hours H / FP.
Study of the definition, style, form, and content of a specific literary genre
in German-language literature and the social, cultural, political, and
economic factors that led to its emergence. Consideration of the genre's
suitability for particular writers or periods. Topic and period vary. May be
repeated if content varies. Prerequisite: GERM 316 and GERM 401. LEC.

GERM 579. Investigation and Conference: ____. 1-3 Hours AE61 / H /
W / FP.
Independent study and directed reading on special topics. Permission of
the instructor who will supervise the student's work is required. Prerequisite:
GERM 316 and GERM 401. LEC.

GERM 580. Senior Capstone Course: German-Speaking Europe
Today. 3 Hours AE61 / H / FP.
Focus on synthesizing students' knowledge of the history, culture, and
politics of German-speaking Europe 1945-present. Consideration of
scholarly articles, journalism, essays, literary texts, film, and the arts
on topics including cultural identity in post-unified Germany; European
integration; current debates and controversies; political parties and
leading political figures; role of literature, film, music, visual arts, media,
and popular culture; role of universities. Required of all German majors in
senior year. Prerequisite: GERM 316, GERM 401, and senior standing.
LEC.

GERM 589. Research for Departmental Honors. 3 Hours H / FP.
Research for a departmental honors project, on a topic chosen in
conjunction with the faculty advisor. Emphasis on independent study and
writing. Open to students with previous coursework in German at the 400
level, an overall 3.0 GPA, and at least a B+ average in advanced work
in German. Prerequisite: GERM 316, GERM 401, senior standing, and
permission of Undergraduate Advisor. LEC.

GERM 599. Departmental Honors Project. 3 Hours H / FP.
Continuation of GERM 598. Course consists of completion of
Departmental Honors project. Quality of project determines whether
student receives credit only or Honors in German. Prerequisite: GERM
598. LEC.

GERM 614. Course in Representative Authors: ____. 3 Hours AE61 / H.
Readings and discussions in German of selected literary works by a major
author (e.g., Goethe, Heine, Fontane, Brecht, Kafka, Grass, etc.). May be
repeated. Prerequisite: Two literature courses from GERM 400, GERM
408, and GERM 416 and two composition courses from GERM 340,
GERM 344, and GERM 348, or equivalent. LEC.

GERM 616. Topics in German Literature: ____. 3 Hours AE61 / H/W.
Readings and discussions in German of selected literary works on a
particular topic or theme (e.g., nature, women, art and literature, etc.).
May be repeated. Prerequisite: Two literature courses from GERM 400,
GERM 408, and GERM 416, and two composition courses from GERM
340, GERM 344, and GERM 348, or equivalent. LEC.

GERM 618. Topics in German Language and Linguistics: ____. 3
Hours AE61 / H/W.
Readings and discussions in German in an area of specialized language
or linguistic study (e.g., lexical fields, modern German dialects, etc.).
May be repeated. Prerequisite: Two literature courses from GERM 400,
GERM 408, and GERM 416, and two composition courses from GERM
340, GERM 344, and GERM 348, or equivalent. LEC.

GERM 620. Topics in German Culture and Folklore: ____. 3 Hours
AE61 / H/W.
Readings and discussions in German on some aspect of German culture
or folklore, including Landeskunde (study of contemporary Germany).
May be repeated. Prerequisite: Two literature courses from GERM 400,
GERM 408, and GERM 416, and two composition courses from GERM
340, GERM 344, and GERM 348, or equivalent. LEC.
GERM 626. Idiomatic Usage in Modern Colloquial and Literary German. 3 Hours AE61 / H/W.
Practical exercises in the systematic study of idioms and synonyms, designed to foster a more discriminating and effective usage of German. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416 and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent. LEC.

GERM 628. Translation into German (Advanced). 3 Hours AE61 / H/W.
Exercises in the translation of expository and stylistically sophisticated texts from various fields. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416 and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent. LEC.

GERM 630. Advanced German Grammar. 3 Hours AE61 / H/W.
Recommended for students intending to teach German. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416 and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent. LEC.

GERM 632. Deutscher Stil (Advanced German Composition). 3 Hours AE61 / H/W.
Training in writing reports and seminar papers in German. Recommended for students intending to do graduate work in German. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416 and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent. LEC.

GERM 681. Language Teaching for Oral Proficiency. 1 Hour AE61 / U.
A summer course designed principally for secondary school language teachers. Provides an orientation to proficiency-based models in foreign language instruction, national standards in the rating of foreign language proficiency, and curriculum development sessions which address issues of articulation in foreign language curricula. (Not applicable toward a major or graduate degree in German.) (Same as FREN 681 and SPAN 681.) LEC.

GERM 700. Introduction to Graduate Studies in German. 3 Hours.
An introduction to the skills required of students enrolled in graduate degree programs in German Studies; areas covered include 1) introduction to literary theory and criticism, 2) bibliography and research methods, including database management software, 3) preparation and presentations of a research/conference paper, 4) technology training, including web design, on-line portfolio, and digital humanities, and 5) professional ethics and awareness of the academic market and alternative careers. We will also be working on practical, professionally useful goals, such as how to (better) make use of technology, how to create a CV and modify it for different positions, how to write an abstract, and how to produce a conference paper. Course requirements will include a variety of smaller assignments and two larger projects, a web-based professional portfolio and an 8 to10-page conference paper. LEC.

GERM 701. Introduction to the Study of Literature. 3 Hours.
Introduction to methods of literary research and presentation of seminar papers. Exercises in the use of basic guides to the study of German language and literature, in the documentation of scholarly research, and in the writing of interpretive essays, based on reading and discussion of selected works from different periods of the departmental “Basic Reading List. LEC.

GERM 703. Methods of Literary Criticism. 3 Hours.
Differentiation of critical methods. Exercises in textual criticism. LEC.

GERM 704. German Stylistics. 3 Hours.
Stylistic analysis of literary texts; writing in German. LEC.

GERM 705. German Phonetics. 3 Hours.
A systematic study of German phonetics. Prerequisite: Graduate standing or consent of instructor. LEC.

GERM 710. Workshop for M.A. Students. 1 Hour.
Discussion of policies in the M.A. program, examinations, thesis proposals, writing of theses, grant proposals, conference presentations, publications of scholarship, and entrance into the academic job market. Required of all M.A. students in the first year in the program. Does not count toward completion of 30 hours of course work for the M.A. RSH.

GERM 711. History of the German Language. 3 Hours.
A comprehensive introduction to the basic concepts of German philology and various aspects of historical linguistics, including the nature of language and linguistic change, discoveries of the pioneer philologists of the 19th century regarding the prehistory of German, and the beginnings of a national German language. LEC.

GERM 712. The Structure of Modern Standard German. 3 Hours.
A comprehensive introduction to the structure and usage of contemporary German, including phonetics, phonology, morphology, syntax, text linguistics, semantics, pragmatics, and language variation. Students will listen to lectures, read texts on German linguistics, participate in discussions, and work extensively on linguistic problems involving German. LEC.

GERM 716. Topics in German Literature: _____ . 3 Hours.
Intensive study of a selected topic in German literature. May be repeated. Offered only in conjunction with GERM 616 when taught by a Max Kade Distinguished Visiting Professor. Graduate students will be assigned additional work. LEC.

GERM 718. Topics in German Language and Linguistics: _____ . 3 Hours.
Intensive study of a selected topic in German language and linguistics. May be repeated for credit. LEC.

GERM 721. Introduction to Middle High German Literature. 3 Hours.
The elements of Middle High German as required for reading medieval texts in the original. Intensive reading and literary study of at least one text in full. LEC.

GERM 732. Early Modern Period. 3 Hours.
Reading and discussion of major literary works of the period; combined with lectures and background readings on literary, cultural, and political history. LEC.

GERM 734. Age of Goethe. 3 Hours.
Reading and discussion of major literary works in the period; combined with lectures and background readings on literary, cultural, and political history. LEC.

GERM 736. Post-Romantic Nineteenth Century. 3 Hours.
Reading and discussion of major literary works in the period; combined with lectures and background readings on literary, cultural, and political history. LEC.

GERM 738. Twentieth Century. 3 Hours.
Reading and discussion of major literary works in the period; combined with lectures and background readings on literary, cultural, and political history. LEC.

GERM 740. Introduction to the Culture of German-Speaking Central Europe. 3 Hours.
An introduction to major cultural traditions, currents, and specific aspects that shaped and continue to characterize modern Germany, Austria and Switzerland. LEC.
GERM 751. Topics in German Studies: ______. 3 Hours.
Course covers key topics in German Studies and represents the expertise of faculty in the department as well as department-affiliated faculty. Topics will vary from semester to semester and instructor to instructor to allow flexibility for in-depth analysis of particular topics. May be repeated as topics vary. LEC.

GERM 753. Investigation and Conference: ______. 1-6 Hours.
To be taken only in exceptional cases. Permission of the instructor who will supervise the student’s work is required. RSH.

GERM 754. Studies in Humanism, Renaissance, and Reformation Literature: ______. 3 Hours.
LEC.

LEC.

GERM 756. Studies in Enlightenment Literature: ______. 3 Hours.
LEC.

GERM 760. Studies on Writers of the Age of Goethe: ______. 3 Hours.
LEC.

GERM 762. Studies in Romanticism: ______. 3 Hours.
LEC.

GERM 764. Studies in the Literature of the 19th Century: ______. 3 Hours.
LEC.

GERM 766. Studies in Literature since 1890: ______. 3 Hours.
LEC.

GERM 800. Seminar: Teaching German as a Second Language. 3 Hours.
Introduction to selected aspects of second-language acquisition, foreign-language pedagogy, and contrastive grammar, with the major concentration on practical guidance in teaching elementary German, in test preparation and grading, and in the use of equipment. LEC.

GERM 801. Practicum in GTAs. 1 Hour.
Discussion of matters relating to the teaching of German in specific courses. Required of all GTAs in each semester of teaching, unless enrolled in GERM 800. Does not count toward completion of 30 hours of coursework for the M.A. or 27 hours of course work for the Ph.D. IND.

GERM 822. Survey of Medieval German Literature. 3 Hours.
Text-oriented study of the literature of 750-1500 with selected readings in the original and in translation. Prerequisite: GERM 721. LEC.

GERM 823. Readings in Middle High German Epics: ______. 3 Hours.
Reading and literary analysis of one of the following: Nibelungenlied, Erich and Iwein, Tristan, Parzival. Prerequisite: GERM 721. LEC.

GERM 824. Readings in Middle High German Lyrics. 3 Hours.
Reading and literary analysis of one of the following: Minnesangs Fruhling, Walther von der Vogelweide. Prerequisite: GERM 721. LEC.

GERM 851. Studies in Germanic Philology: ______. 3 Hours.
Topics to be announced. Emphasis on studies in etymology, semantics, vocabulary, medieval dialects, linguistic theories. Prerequisite: GERM 711. LEC.

GERM 852. Special Topics in Literature: ______. 3 Hours.
Prerequisite: GERM 701. LEC.

GERM 854. Studies in the Works of: ______. 3 Hours.
In-depth study of the work of a major author in German literature. Prerequisite: GERM 701. LEC.

GERM 855. Introduction to German Applied Linguistics. 3 Hours.
Introduction to theories and topics in German applied linguistics. SEM.

GERM 860. Introduction to Modern German Dialects. 3 Hours.
Introduction to modern German dialects, methods of dialect research and aspects of linguistic assimilation and loss as well as a survey of German-American dialects. Prerequisite: Permission of instructor required. SEM.

GERM 898. Master’s Project. 3 Hours.
Faculty directed project that satisfies the requirements for the degree of Master of Arts in German Studies. Prerequisite: Restricted to German Studies MA students. Prerequisite: Restricted to German Studies MA students. RSH.

GERM 899. Master’s Thesis. 3 Hours.
May not be repeated. THE.

GERM 900. Workshop for Ph.D. Students. 1 Hour.
Discussion of policies in the Ph.D. program, research specializations, examinations, dissertation proposals, writing of dissertations, grant proposals, conference presentations, publication of scholarship, and entrance into the academic job market. Required of all Ph.D. students in the first year in the program. Does not count toward completion of 27 hours of course work for the Ph.D. LEC.

GERM 901. Gothic. 3 Hours.
Reading of selected Gothic texts. Historical and descriptive study of Gothic phonology and grammar, with an introduction to comparative Germanic grammar. Prerequisite: GERM 711. LEC.

GERM 902. Old Saxon. 3 Hours.
Introduction to the elements of its grammar and discussion of its role in the Germanic family of languages. Selected readings from the Helland and discussion of the entire work. Prerequisite: GERM 711. LEC.

GERM 903. Old High German. 3 Hours.
Reading and discussion of selected prose texts and poetic documents; phonological and grammatical features of the Old High German dialects. Prerequisite: GERM 711. LEC.

GERM 904. Gothic and Its Closest Relatives. 3 Hours.
A survey of the earliest Germanic languages with an emphasis on the comparative phonology and grammar of Gothic, Old High German, and Old Saxon as well as the reading of selections of major texts in those three languages. LEC.

GERM 951. Seminar in Germanic Philology: ______. 3 Hours.
LEC.

GERM 952. Seminar in Medieval German Literature: ______. 3 Hours.
LEC.

GERM 953. Investigation and Conference: ______. 1-6 Hours.
To be taken only in exceptional cases. Permission of the instructor who will supervise the student’s work is required. RSH.

GERM 954. Seminar in Humanism, Renaissance, and Reformation Literature: ______. 3 Hours.
LEC.

GERM 955. Seminar in Baroque Literature: ______. 3 Hours.
LEC.

GERM 956. Seminar in Enlightenment Literature: ______. 3 Hours.
LEC.

GERM 960. Seminar on Writers of the Age of Goethe: ______. 3 Hours.
LEC.

GERM 962. Seminar in Romanticism: ______. 3 Hours.
LEC.
GERM 964. Seminar in the Literature of the 19th Century: _____. 3 Hours.
LEC.

GERM 966. Seminar in Problems in Literature since 1890: _____. 3 Hours.
LEC.

GERM 967. Seminar in Special Topics: _____. 3 Hours.
LEC.

GERM 999. Doctoral Dissertation. 1-10 Hours.
THE.

Courses

HNGR 103. Survival Hungarian. 3 Hours U.
Practical training for people intending to live, study, travel, or work in Hungary. Focus on conversational skills. Intensive practice in speaking and listening, with vocabulary about Hungarian geography, culture, and business. Introduction to basic grammar. Not for native speakers LEC.

HNGR 104. Elementary Hungarian I. 5 Hours U / F1.
Essentials of grammar, practice in speaking, reading, and writing Hungarian. Five class meetings per week. Not open to native speakers of Hungarian. Prerequisite: HNGR 104 or equivalent. LEC.

HNGR 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hungarian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HNGR 212. Intermediate Hungarian I. 3 Hours U / F3.
A continuation of HNGR 108. Structured grammar review, composition, conversation, with readings of literary and cultural texts. Three class meetings per week. Not open to native speakers of Hungarian. Prerequisite: HNGR 108 or equivalent. LEC.

HNGR 216. Intermediate Hungarian II. 3 Hours U / F4.
A continuation of HNGR 212. Structured grammar review, composition, conversation, with readings of literary and cultural texts. Three class meetings per week. Not open to native speakers of Hungarian. Prerequisite: HNGR 212 or equivalent. LEC.

HNGR 453. Investigation and Conference: _____. 1-3 Hours U.
Independent study and directed reading on special topics. Prerequisite: Permission of instructor. IND.

SCAN 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Scandinavian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

SCAN 453. Investigation and Conference: _____. 1-3 Hours.
Independent study and directed reading on special topics. Prerequisite: Permission of instructor. IND.

SCAN 560. Scandinavia Past and Present. 3 Hours H.
This course presents a historical survey of Denmark, Finland, Iceland, Norway, and Sweden. In a comparative framework, the course focuses on a variety of central aspects that shaped Scandinavia from the Viking Age to the present. LEC.

SCAN 570. Scandinavian Life and Civilization. 3 Hours H/W.
This course is designed to impart a general knowledge of life in Denmark, Finland, Iceland, Norway, and Sweden, with emphasis on social and cultural conditions, against a geographical and historical background, from the Viking age to the present. Slides and other illustrated materials. (Same as EURS 510.) LEC.

SCAN 660. Representative Authors in English. 3 Hours H/W.
Intensive study of one or more major authors from the literatures of Scandinavia. May be repeated. LEC.

SCAN 661. Topics in Scandinavian Languages and Linguistics: _____. 3 Hours.
Intensive study of a selected topic in Scandinavian languages and linguistics. The course deals with the linguistic analysis of language rather than the acquisition of a particular language. May be repeated. Prerequisite: A course in linguistics. LEC.

SCAN 753. Investigation and Conference: _____. 1-3 Hours.
Independent study and directed reading on special topics. Permission of the instructor is required. RSH.

SCAN 906. Old Norse. 3 Hours.
Introduction to the grammar and reading of the prose literature of the "saga-age" (1100-1350). Varied selections from the literature provide the context in which the language is discussed. LEC.

SCAN 907. Readings in Old Norse Literature. 3 Hours.
Intensive discussion of a single longer saga or several shorter works, or a combination of these on a single theme. Dialectal differences between W.
Norse and older Germanic dialects will be noted. Prerequisite: SCAN 906. LEC.

Courses

SWED 104. Elementary Swedish I. 5 Hours U / F1.
Essentials of grammar, practice in speaking, reading, and writing Swedish. Five hours of recitation per week. Not open to native speakers of Swedish. LEC.

SWED 105. Elementary Swedish I, Honors. 5 Hours U / F1.
Similar to SWED 104 with additional work to expand the student's cultural context and understanding. Not open to native speakers of Swedish or students who have completed SWED 104. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

SWED 108. Elementary Swedish II. 5 Hours U / F2.
Continuation of grammar; practice in conversation, composition, and reading. Five hours of recitation per week. Not open to native speakers of Swedish. Prerequisite: SWED 104 or permission of instructor. LEC.

SWED 109. Elementary Swedish II, Honors. 5 Hours U / F2.
Course content similar to SWED 108, with additional cultural study. Meets 5 days a week. Not open to native speakers of Swedish. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

SWED 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Swedish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

SWED 201. Intermediate Swedish I. 3 Hours U / F3.
A continuation of SWED 108. Structured grammar review, composition, conversation with readings of literary and cultural texts. Not open to native speakers of Swedish. Prerequisite: SWED 108 or permission of instructor. LEC.

Course content similar to SWED 201, with additional cultural study. Three class meetings per week. Not open to native speakers of Swedish. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

SWED 203. Intermediate Swedish III, Honors. 3 Hours U / F3.
Course content similar to SWED 202, with additional cultural study. Three class meetings per week. Not open to native speakers of Swedish. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

SWED 216. Intermediate Swedish II. 3 Hours U / F4.
A continuation of SWED 202. Structured grammar review, composition, conversation with readings of literary and cultural texts. Not open to native speakers of Swedish. Prerequisite: SWED 202 or permission of instructor. LEC.

Course content similar to SWED 216, with additional cultural study. Three class meetings per week. Not open to native speakers of Swedish. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

SWED 300. Intermediate Swedish Composition and Conversation. 3 Hours H.
Extensive practice in writing and speaking Swedish with grammar and review and selected readings. Not open to native speakers of Swedish. Prerequisite: SWED 216 or equivalent. LEC.

Bachelor of Arts in German Studies

Why study Germanic languages and literatures?
Translingual and transcultural competence will help students participate actively and productively in our increasingly global world.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

The following should be completed as early as possible:

GERM 104 Elementary German I 5
GERM 108 Elementary German II 5
GERM 201 Intermediate German I 3
GERM 202 Intermediate German II 3

Requirements for the B.A. Major

Required Courses

After completion of GERM 202 Intermediate German II, students must complete 16 credits as follows:

GERM 301 High Intermediate German I 3
GERM 302 High Intermediate German II 3
GERM 315 German Literature and the Modern Era 3
GERM 316 Discussion Section for German Literature and the Modern Era 1
GERM 401 Advanced German I 3
GERM 580 Senior Capstone Course: German-Speaking Europe Today 3

GERM 580 Senior Capstone Course: German-Speaking Europe Today 3
GERM 315 and GERM 316 must be completed before students can take a course beyond GERM 402 (except GERM 462).

Admission to 400- and 500-level courses after GERM 402 (except GERM 462) without completion of GERM 315 and GERM 316 is only with permission of the Undergraduate Advisor.

**Elective Courses**
A minimum of 14 credit hours at the 300, 400, and 500 levels must be completed beyond the required courses. 12 of these credit hours must be at the 400 or 500 level. In exceptional cases, undergraduates may take courses at the 600 level with permission of the Undergraduate Advisor and the instructor.

With permission of the Undergraduate Advisor, 6 credit hours at the 300, 400, or 500 levels may be counted toward the major by completing two approved courses offered by other departments with significant content related to German-speaking Europe; permission of the Undergraduate Advisor is required. A 600-level course may be counted with approval of the Undergraduate Advisor.

Germanic languages & literatures majors are strongly encouraged to study abroad and should discuss this opportunity with the Undergraduate Advisor early in their undergraduate career.

**Major Hours & Major GPA**
While completing all required courses, majors must also meet each of the following hour and GPA minimum standards:

**Major Hours**
- Satisfied by 30 hours of major courses.

**Major Hours in Residence**
- At least 15 hours of coursework at the 300, 400, and 500 levels, including the senior capstone course, GERM 580, must be completed in residence at KU.

**Major Junior/Senior Hours**
- Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Below is a sample 4-year plan for students pursuing the BA in Germanic Languages and Literatures. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

**Total Hours: 120-121**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
GERM 104, GERM 108, GERM 201, GERM 202, GERM 203, GERM 301, and GERM 302 all fulfill Goal 4.2 Global Awareness. Completing one of these courses fulfills Goal 4.2; it does not matter which course a student takes to begin German language study.

Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors in German

To qualify for the B.A. in Germanic Languages & Literatures with Honors, the student must have a minimum grade point average of 3.25 overall and 3.5 in German at graduation. Students must complete an honors research project during their final year at KU. Topics are selected in consultation with the faculty project advisor from Germanic Languages & Literatures. Applications for departmental honors must be submitted by the end of the first week of classes, normally during the fall of senior year. Upon acceptance of an application, the student registers for the GERM 598 - GERM 599 sequence. The student presents the completed research project to the project advisor and two other members of the Departmental Honors Committee about one month before concluding his or her final semester at KU. A grade of B or higher in GERM 598 and GERM 599 is required for departmental honors. GERM 598 and GERM 599 may not be used to satisfy other course requirements.

Study Abroad

The department conducts two Summer Language Institutes in Germany for students in second-, third-, and fourth-year German. Students normally enroll for 6-9 credit hours and live with German families.

Juniors and seniors are encouraged to spend a semester or a full academic year at a university in Germany. Consult with the Office of Study Abroad and the Undergraduate Advisor early in your undergraduate career.

Graduating seniors may apply for Direct Exchange Program fellowships at universities in Germany. For information, consult the department (http://www2.ku.edu/~germanic) or the Office of International Programs (http://www.studyabroad.ku.edu).

Minor in German Studies

Why study Germanic languages and literatures?

Translingual and transcultural competence will help students participate actively and productively in our increasingly global world.

Requirements for the Minor

The minor requires 18 hours in courses numbered 300 and above. The prerequisite is completion of the proficiency sequence in German (GERM 202 or equivalent).

German Minor Course Requirements

Required Courses

After completion of GERM 202: Intermediate German II, students must complete the following two courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 301</td>
<td>High Intermediate German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 302</td>
<td>High Intermediate German II</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective Courses

12 additional hours at the 300, 400, and 500 levels. GERM 315 and GERM 316 are strongly encouraged because they are prerequisites for courses above GERM 402 (except GERM 462).

With approval of the Undergraduate Advisor, one approved 3-credit course offered by another department or program and with significant content related to German-speaking Europe (300-500 level) may be counted toward the German minor. A 600-level course may be counted only with approval of the Undergraduate Advisor.

Minor Hours & GPA

While completing required courses, minors must also meet each of the following hour and grade point average minimum standards:

Minor Hours

Satisfied by 18 hours of minor courses.

Minor Hours in Residence

Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior Hours

Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

Minor Graduation GPA

Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Master of Arts in German Studies

Overview

Work toward the M.A. degree consists of a traditional curriculum providing important foundational knowledge. The curriculum includes historical surveys of the major literary periods and genres, of the structure and function of German and Germanic languages, knowledge of disciplinary methodologies employed in the field, development of language capacity, and control of writing and research strategies.

Departmental Funding

While it is not guaranteed, the department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to
all incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach French at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://germanic.drupal.ku.edu/gta-appointments-and-fellowships) of our departmental website.

Post-comprehensive students completing their dissertations are also eligible to apply for 1 of the the departmental Max Kade Dissertation Fellowships.

**Additional Funding**

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding) for KU graduate students.

**Contact**

For inquiries concerning the M.A. program, please contact:

Professor William D. Keel (https://germanic.drupal.ku.edu/william-d-keel), Director of Graduate Studies, and/or Cari Ann Kreienhop (https://germanic.drupal.ku.edu/cariann-kreienhop), Graduate Academic Advisor & Graduate Admissions Administrator.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**German Studies Graduate Admission**

In addition to the general admission requirements (http://www.graduate.ku.edu/application-process) from the Office of Graduate Studies, applicants to the M.A. program in German should have the equivalent of the German Studies B.A. offered at KU.

Submit your application through the Graduate Studies Office of Admissions application system (http://www.graduate.ku.edu). For additional information regarding admissions and the application process, including deadlines, department-specific prerequisites and required supplemental documentation, please visit the graduate admission (https://germanic.drupal.ku.edu/graduate-admission) page of the department website, or contact the department Graduate Academic Advisor, Cari Ann Kreienhop, ckreienhop@ku.edu.

</tr>
</tbody>
</table>

1 This German Studies Topics course is offered with specific topics and subtitles as needed in different semesters. Each semester it will cover key topics in German Studies and represents the expertise of faculty in the department as well as department-affiliated faculty. See current Graduate Student Handbook for possible topics.

**First Year Plan of Study:**

1st semester: Students choose a graduate advisor and begin compiling a course-based individual reading list. The reading list should consist of twenty primary and secondary works approved by the advisor.

2nd semester: Students declare their choice of thesis, non-thesis or project option and organize their reading list accordingly with the assistance of their advisor.

**Thesis Option Exam**

The Master’s Thesis (50 pages minimum) consists of a scholarly analysis of a chosen topic that is derived from a term paper and expanded to contribute new insights to the discourse surrounding the topic. Students enroll in German 899 Master’s Thesis during their third and fourth semesters (6 credits total) to develop and complete their thesis under the direction of a graduate faculty advisor.

**Variant within the non-thesis track: Master’s Project**

The Master’s Project (30 pages minimum) provides the opportunity to combine scholarly and practical learning. The project, which may be developed from an internship or a broader topic, such as digital Humanities, must be approved in advance by a graduate faculty advisor with whom the student enrolls in GERM 898 Master’s Project (3 credits).
Doctor of Philosophy in Germanic Languages and Literatures

Overview

Building on the M.A. foundational base, the KU Ph.D. degree program encourages students to develop their particular intellectual interests in collaboration with KU faculty and their areas of specialization. The graduate program focuses on the following areas:

- German literature
- Germanic linguistics/philology
- German second-language acquisition/applied linguistics

Ph.D. students studying literature and culture and those studying Germanic philology also benefit from the opportunity to choose a minor field of study. Students may choose a minor of up to 9 credit hours of coursework taken outside the department and chosen in consultation with their dissertation advisor. This minor may also consist of coursework combined with a project.

The Doctoral Program Profile (PDF) (http://graduate.ku.edu/sites/graduate.drupal.ku.edu/files/docs/dpp/DPP_A_GERM.pdf) gives a retrospective overview of our time-to-degree and other statistics relevant to the graduate program and graduate-student experience.

Departmental Funding

While it is not guaranteed, the department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach French at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://germanic.drupal.ku.edu/gta-appointments-and-fellowships) of our departmental website.

Post-comprehensive students completing their dissertations are also eligible to apply for one of the departmental Max Kade Dissertation Fellowships.

Additional Funding

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding) for KU graduate students.

Contact

For inquiries concerning the graduate program, please contact:

Professor William Keel (http://germanic.ku.edu/william-d-keel), Director of Graduate Studies, and/or Cari Ann Kreienhop (http://germanic.ku.edu/cariann-kreienhop), Graduate Academic Advisor & Graduate Admissions Administrator.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Germanic Languages & Literatures Graduate Admission

In addition to the general admission requirements (http://www.graduate.ku.edu/application-process) from the Office of Graduate Studies, applicants to the Ph.D. program in German should have the equivalent of the to the Master's Degree in German offered at KU.

Submit your application through the Graduate Studies Office of Admissions application system (http://graduate.ku.edu/prospective-students). For additional information regarding admissions and the application process, including deadlines, department-specific prerequisites and required supplemental documentation, please visit the graduate admissions (https://germanic.drupal.ku.edu/graduate-admission) page of the Germanic Languages and Literatures website, or contact the department Graduate Academic Advisor, Cari Ann Kreienhop, ckreienhop@ku.edu.

Ph.D. Degree Requirements

In addition to the general requirements for the Doctor of Philosophy degree concerning research skills, the oral comprehensive examination, the dissertation, and the final examination, a student must meet the following specific departmental requirements:

1. Normally a minimum of 27 credit hours (excluding GERM 999 Doctoral Dissertation) beyond that required for the M.A. For students in German Applied Linguistics, some of the courses may be taken outside of the department. Students in literature and culture and students in Germanic philology may choose a minor up to 9 credit hours of coursework outside the department in consultation with their advisor. This minor may consist of coursework combined with a project. The 9 hours of the minor are included in the required 27 credit hours. Required Courses: One research seminar in the area of specialization; Approved elective courses in the area of specialization; Approved elective courses for the outside minor area (depending on specialization).

2. At least 1 semester of half-time teaching or the equivalent (normally GERM 800 is required concurrently with the first semester of teaching).

3. a. A portfolio evaluation in the third semester of study after successful completion of 18 credit hours of coursework. For a detailed description of portfolio content, see the Graduate Handbook. Upon passing the portfolio evaluation and fulfilling all degree requirements,
students advance to the comprehensive examination in the fourth semester of their doctoral studies. b). A comprehensive written and oral examination in the fourth semester upon completion of all required coursework (27 credit hours in German Studies; for students in German Applied Linguistics and for students with a minor option, some of the courses will be taken outside of the department) and fulfillment of all degree requirements. The comprehensive examination consists of a 2-part written departmental preliminary examination based on the student’s submitted portfolio followed by an oral examination.

Research Skills & Responsible Scholarship

The University requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. For Germanic Languages and Literatures doctoral students, this requirement is met by the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 700</td>
<td>Introduction to Graduate Studies in German</td>
<td>3</td>
</tr>
<tr>
<td>GERM 800</td>
<td>Seminar: Teaching German as a Second Language</td>
<td>3</td>
</tr>
<tr>
<td>GERM 855</td>
<td>Introduction to German Applied Linguistics</td>
<td>3</td>
</tr>
</tbody>
</table>

Demonstrated reading knowledge of French and one other modern language, Latin or Greek. ¹

¹This requirement can be fulfilled by completing an approved course or by completing a proficiency examination. Language course may be taken in the summer. If that is not possible, a student may take the course during a Fall or Spring semester while also taking 2 three-credit hour graduate courses in German. Students specializing in medieval philology or older literature must select Latin as the second language for reading knowledge.

Graduate Handbook

For further details about the requirements for the Ph.D. see the department’s Graduate Handbook (https://germanic.drupal.ku.edu/graduate-handbook).

Gerontology Program

Graduate Study in Gerontology at KU consists of Master of Arts and Doctor of Philosophy degrees in gerontology, along with the option for a dual-title Ph.D. in Gerontology and selected social science disciplines.

They are administered through the Gerontology Center, a component of the Schiefelbusch Institute for Life Span Studies.

The Doctor of Philosophy degree in gerontology was approved by the Kansas Board of Regents during the 1996-97 academic year. KU is one of only several universities nationwide offering the Ph.D. in gerontology. KU’s gerontology graduate program is unique in that it is an interdisciplinary research degree emphasizing social and behavioral gerontology.

Faculty affiliated with the program include members of the College of Liberal Arts and Sciences, including the School of the Arts; and the Schools of Architecture, Design and Planning; Education; Engineering; Health Professions; Law; Medicine; Music; Nursing; Pharmacy; and Social Welfare.

The graduate program in gerontology gives students a broad, advanced educational experience in gerontology. It provides a common focus for all students, yet allows each student to design a course of study most appropriate for her or his career objectives. Courses give students a multidisciplinary perspective on the issues and problems of aging, built on a strong foundation in basic research on aging. The program prepares students for academic and research careers in gerontology, as well as for professional careers in private and public institutions and agencies providing services to older individuals.

Students seeking a terminal M.A. in gerontology are not admitted; the M.A. is offered only to those pursuing a Ph.D.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions.
criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Application and Admission

Any student who has completed at least a B.A. or B.S. degree at an accredited institution of higher education may apply to the Ph.D. program. Required application materials include a résumé, a personal statement of professional and educational goals in gerontology, 1 copy of all undergraduate and graduate transcripts, list of all courses taken that are relevant to gerontology, 3 letters of recommendation, and scores from the Graduate Record Examination. Applicants whose first language is not English must submit proof of proficiency in English. GRE and other scores should be from the last two years. Further information is available from the graduate advisor or on the program’s website (http://www.gerontology.ku.edu).

Submit your graduate application online (http://www.graduate.ku.edu). Send all other requested application materials to the department:

The University of Kansas
Gerontology Program
Admissions Committee
Dole Human Development Center
1000 Sunnyside Ave., Room 3090
Lawrence, KS 66045-7561

Program Requirements

For the Ph.D., the student must complete all general degree requirements, including residence, training in research skills and responsible scholarship, the written preliminary examination, the comprehensive oral examination, preparation of a dissertation, and the final oral examination.

Each student designs his or her own curriculum with the assistance of a support committee of 3 gerontology faculty members. All students are expected to acquire multidisciplinary training in gerontology by taking courses in the sociology, psychology, and biology of aging.

Students may enter the program with an acceptable master’s degree from KU or another institution. The admissions committee reviews master’s-level preparation for doctoral-level research. An acceptable level of preparation includes basic training in statistics, program assessment, or policy analysis and completion of an empirical research study or thesis.

Students entering the program without an acceptable master's degree must complete the M.A. in gerontology before the Ph.D.

The requirements for the M.A. in gerontology are as follows:

- Gerontology proseminar
- 6 hours of core courses in gerontology (selected from at least 2 of the following areas: biology of aging, psychology of aging, social gerontology)
- 12 hours of supplemental courses in gerontology and related fields
- 6 hours of basic statistics courses
- 3 hours of methodology
- 6 hours of thesis credit

For students who enter the program with master's degrees or who complete the M.A. in gerontology, minimum requirements for the Ph.D. are as follows:

- Gerontology proseminar
- At least 6 hours of core courses in gerontology (selected from at least 2 of the following areas: biology of aging, psychology of aging, social gerontology)
- At least 12 hours of additional supplemental courses in gerontology and related fields
- 6 hours of advanced statistics courses
- 6 additional hours of methodology
- Completion of written and oral comprehensive examination
- 6 hours of dissertation credit, completion of dissertation, and final oral examination

A list of courses meeting requirements in gerontology, statistics, and methodology is available from the graduate advisor.

Evaluation of Satisfactory Performance

The gerontology proseminar and core courses should be completed during the first 2 semesters. Students normally are expected to complete the M.A. degree in 2 years. The maximum time limit for completing all requirements for the M.A. degree is 3 years. Students normally are expected to complete the Ph.D. within 3 years of entering the program or of completing the M.A. The maximum time limit for completing all requirements for the doctoral degree is 8 years after admission to the doctoral program with an acceptable master’s degree or after completion of the M.A. degree in gerontology. Students who complete the M.A. degree in gerontology at KU and subsequently begin doctoral studies have a total enrolled time of 10 years to complete both degrees.

Written Preliminary Examination

Upon completion of the M.A., a major portion of the course requirements, and the research skills and responsible scholarship requirement, each student must pass a written preliminary examination. This examination covers two content areas reflecting the student’s area of concentration and integrates theoretical and methodological issues in gerontology.

Comprehensive Oral Examination

The comprehensive oral examination covers gerontology. The examination can take one of 5 forms:

1. A defense of the written preliminary examination,
2. A defense of a completed research project,
3. A defense of a prospectus for a future research project, including the dissertation,
4. A discussion of a major review paper written by the student,
5. A review of a research grant proposal and a simulated site visit defense of the proposal.

Dissertation Preparation and Final Oral Examination

Upon passing the comprehensive oral examination, the student becomes a candidate for the doctorate. Graduate Studies designates a dissertation committee based on the recommendation of the program. The dissertation committee includes at least three members of the gerontology program faculty.
After passing the comprehensive oral examination, the candidate must be continuously enrolled until all degree requirements have been met. When the completed dissertation has been accepted by the committee, but before it has been bound, and all degree requirements have been met, the program requests the final oral examination to be scheduled, allowing a minimum of 2 weeks to verify the requirements and publicize the examination. At least 5 months must elapse between successful completion of the comprehensive oral examination and the final oral examination.

Research Skills and Responsible Scholarship Requirement

Doctoral students must demonstrate competence in a research skill “distinct from, but strongly supportive of, the dissertation.” The program advisory committee establishes requirements for research skills, including the following options:

1. Demonstrated competency of a language, other than English, relevant to research in gerontology;
2. Competency in research methodology, including quantitative and/or qualitative data analysis;
3. Competency in both computer programming skills and computer applications.
4. A record of professional experience, publication, or presentation at professional meetings or a record of course work in a substantive area such as statistics beyond that required to satisfy the master’s or doctoral degree requirements in gerontology.
5. Successful completion of SPLH 982/PSYC 982 with a grade of B or higher.

Doctoral students are required to have training in responsible scholarship. Such topics may include protection of human subjects; welfare of laboratory animals; conflicts of interest; data management; mentor/student responsibilities; collaborative research; authorship, publication, plagiarism, copyright; peer review; professional practices; maintenance of confidentiality; and appropriate research conduct and research misconduct.

Please contact your advisor or the Director of Graduate Studies for more information about the Research Skills & Responsible Scholarship requirement. More information can also be found in the departmental Graduate Student Handbook.

Research Experience

All students are expected to be continuously involved in research under the supervision of the graduate advisor and support committee. Research involvement includes the design, execution, and dissemination of research on aging.

Courses

Cooperating departments and schools list courses related to aging. See the website (http://www.gerontology.ku.edu) for course listings from recent semesters.

Dual-title Ph.D. in Gerontology

Gerontology Graduate Programs

Graduate study in gerontology at KU consists of Master of Arts and Doctor of Philosophy degrees in gerontology, along with the option for a dual-title Ph.D. in Gerontology and selected social science disciplines.

They are administered through the Gerontology Center, a component of the Schiefelbusch Institute for Life Span Studies.

The Doctor of Philosophy degree in gerontology was approved by the Kansas Board of Regents during the 1996-97 academic year. KU is one of only several universities nationwide offering the Ph.D. in gerontology. KU’s gerontology graduate program is unique in that it is an interdisciplinary research degree emphasizing social and behavioral gerontology.

Faculty affiliated with the program include members of the College of Liberal Arts and Sciences, including the School of the Arts; and the Schools of Architecture, Design and Planning; Education; Engineering; Health Professions; Law; Medicine; Music; Nursing; Pharmacy; and Social Welfare.

The graduate program in gerontology gives students a broad, advanced educational experience in gerontology. It provides a common focus for all students, yet allows each student to design a course of study most appropriate for her or his career objectives. Courses give students a multidisciplinary perspective on the issues and problems of aging, built on a strong foundation in basic research on aging. The program prepares students for academic and research careers in gerontology, as well as for professional careers in private and public institutions and agencies providing services to older individuals.

Students seeking a terminal M.A. in gerontology are not admitted; the M.A. is offered only to those pursuing a Ph.D.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Application and Admission

Any student who has completed at least a B.A. or B.S. degree at an accredited institution of higher education may apply to the Ph.D. program. Required application materials include a résumé, a personal statement of professional and educational goals in gerontology, 1 copy of all undergraduate and graduate transcripts, list of all courses taken that are relevant to gerontology, 3 letters of recommendation, and scores from the Graduate Record Examination. Applicants whose first language is not English must submit proof of proficiency in English. GRE and other scores should be from the last two years. Further information is
available from the graduate advisor or on the program's website (http://www.gerontology.ku.edu).

Dual-title Ph.D. Program in Gerontology

This dual-title degree is an option available to students who have first been admitted to the doctoral program in one of these departments: Communication Studies, Psychology, and Sociology (as of January 2012). The dual-title degree allows the pursuit of a single degree that incorporates study within a traditional discipline and training in an interdisciplinary field; the student is awarded one degree (Ph.D.) with both titles identified on the diploma (e.g., "Ph.D. in Psychology and Gerontology").

This option is designed to appeal to students who are strong in a traditional discipline but also motivated to study across disciplinary lines. In the course of study, students can avail themselves of disciplinary depth and interdisciplinary breadth. At the post-doctoral stage, dual-title graduates will have enhanced career and employment opportunities, able to claim expertise in one or both titles of their degree when seeking positions in education and research.

Plan of Study

The dual-title Ph.D. integrates two programs of doctoral study for students who enter doctoral study having earned a Master's degree. To ensure integration of the fields in regard to coursework, examinations, and dissertation, the student's principal faculty advisor must be a faculty member in both fields; or, if this is not possible, the student must have co-advisors from each of the two fields.

The student completes required coursework in the traditional discipline and required coursework in Gerontology. Many theory, methods, and content courses for each side of the pairing can jointly fulfill requirements for both programs in the dual-title degree. Nonetheless, the dual-title student may require an additional semester to fulfill requirements in both programs. Course requirements for doctoral study in Gerontology and the partner discipline are those described in the programs' respective graduate student handbooks. The course requirements for the Gerontology Ph.D. are those listed in the preceding section under Gerontology Graduate Programs.

Evaluation of Satisfactory Performance

The programs' respective graduate student handbooks likewise describe procedures for written preliminary material, the Comprehensive Oral Examination, the dissertation, and the Final Oral Examination. With the consent of advisors in both programs, any required written preliminary examinations will be harmonized between the two programs. Comprehensive oral examination: The dual-title degree student's candidacy examination committee must be composed of faculty from the partner discipline as well as at least one faculty member from the Gerontology Program. The dual-title faculty member may be someone who is appointed in both programs. Typically, the dual-title member will participate in constructing and grading candidacy examination questions in gerontology. The comprehensive exam requirements for both programs must be met, including a defense of the prospectus for the dissertation.

Dissertation and final oral examination: The dissertation topic should integrate both fields and be defended before graduate faculty from both programs.

Application for Admission to the Dual-title Program

Students must enroll in the disciplinary Ph.D. program for at least one semester and be in good academic standing before applying to the dual-title Ph.D. Program. Students may inquire further about the dual-title option and admission procedures by contacting the graduate advisor of the Gerontology Doctoral Program. Before applying, students should likewise consult with their advisor in the department that admitted them to KU.

Students apply by means of a letter to Graduate Advisor of the Gerontology Doctoral Program. This letter should describe one's professional and educational goals in gerontology and also include one's reasons for pursuing the dual-title option. The letter should be accompanied by a resume and by a list of all courses previously taken in relevant areas such as sociology, psychology, human development, social welfare, biology, and health services. The Gerontology program may request access to recent materials that the student filed in order to apply for graduate study at KU (undergraduate and graduate transcripts, letters of recommendation, scores from the Graduate Record Examination, and, for international applicants, proof of proficiency in the English language), or the program may request updates of these materials.

If accepted to undertake the dual-title Ph.D. option, the student will select or be assigned an advisor who is a member of both programs. If this is not possible, the student must have two advisors, one from each field. The student will work with her or his advisor(s) in both programs to draft a joint plan of study that outlines the key courses and seminars that will fulfill the course requirements for both programs, to the extent that these are foreseeable. The advisor(s) will sign the joint plan of study to indicate discussion and approval of the plan.

Global and International Studies

Why study global and international studies?

Because global and international studies will give you the tools to understand the rapid and profound changes that are occurring around the world. Today's job market demands employees who are able to negotiate the cross-cultural, multilingual environment, increasingly the norm across the professions. The programs in Global and International Studies at KU emphasize cultural and language knowledge, overseas experience, critical thinking and research skills that give our students a leg up in both the general job market and in international careers. Our programs are strongly enhanced by the impressive array of international resources available at KU, such as KU's nationally-ranked Office of Study Abroad and the vast number of foreign languages offered, including many of the languages the US government considers "critical languages," which provide a huge advantage to graduates applying to foreign service and intelligence careers.
Undergraduate Programs

Global and international studies at KU offers an interdisciplinary program in which faculty and students think critically about some of the most fundamental issues facing societies today: population growth, politics and governance, migration, the global economy, poverty and inequality, religion, race and ethnicity, gender and sexuality, peace and conflict, and climate change. Through an investigation of these topics, global and international studies majors acquire an enriched understanding of the world today, which is not only a desirable end in itself but also a useful background for professionals whose careers may involve them in different geographical and cultural areas. A major in global and international studies is helpful for careers in journalism, foreign service, business and industry, education, law, politics and government, and social service agencies.

Students are also strongly encouraged to add to their global and international expertise by incorporating double-majors or minors in KU's other excellent regional studies programs (such as in Latin American Studies, Russian East European and Eurasian Studies, Slavic Languages and Cultures, African and African-American Studies, East Asian Languages and Cultures, European Studies, Jewish Studies and Middle East Studies), in Political Science, Geography, etc. or from other Schools (such as Business and Journalism). The possibility for overlapping coursework makes it an excellent strategic and efficient opportunity to further your educational expertise and portfolio on the global job market.

The co-major in European Studies is taken in conjunction with an undergraduate major in another academic discipline, such as with one of the majors in modern European languages & literatures, Business, Journalism, History, Philosophy, or Global & International Studies. The co-major provides students with a solid foundation in the cultures, politics, languages, and history of Europe in preparation for graduate studies and/or careers in a wide variety of international fields. Studying with KU faculty in the broader disciplines such as social sciences, humanities, the arts, and business, will enable students to increase their awareness and understanding of Europe's past, present, and future and its significant role in our increasingly globalized world. The program offers personalized advising, interdisciplinary flexibility, diverse course offerings, opportunities to conduct research, frequent co-curricular activities, and many options for studying and completing internships abroad.

Graduate Programs

The Master of Arts in Global and International Studies provides an analytically sophisticated understanding of the contemporary global arena and cultivates the skills and knowledge to operate in a world where traditional boundaries are disappearing. Through the 33 credit hour program, students develop a specialization in a world region and can pursue interests in global politics, society, and culture across a broad range of courses in the humanities and social sciences. Or, with our flexible thematic specialization, students can enhance their global knowledge with a 9-12 credit hour course cluster that would provide additional graduate certification in a variety of disciplines and professional fields, such as certification in Community Health and Development, African Studies, or the certification options available from the School of Business or the School of Public Administration.

Global and International Studies also offers an MA concentration in Foreign Affairs Studies with a focus on the Middle East and North Africa. This 30 credit hour program is designed for completion within 12 months and meets the needs of Foreign Area Officers in particular but is open to all interested in its curricular path. Students interested in this degree will take many courses from the Lawrence Campus but also some from the Edwards Campus in Overland Park, Kansas City.

Students interested in combining global knowledge with business expertise are able to take our Global MA/MBA dual degree program. The 56 credit hour degree program can be completed entirely through the Edwards Campus in Overland Park, Kansas City, and the curriculum is constructed to be able to be completed in 3 years. Students completing this dynamic program with organic overlap between Business and Global and International Studies will finish with both an MA (in Global and International Studies) and an MBA (from the School of Business).

Finally, for those who are interested in a shorter graduate curriculum to enhance their global knowledge for career enrichment and advancement, Global and International Studies now offers a Graduate Certificate. The 12 credit-hour (4 course) Certificate can be taken as part of a module embedded within another graduate degree program at KU or as a stand alone certificate program.

Campuses

Although students may take much of their coursework for these programs from the Lawrence campus, the core courses for the program are based at the KU Edwards Campus (http://edwardscampus.ku.edu). The School of Business, the School of Public Administration, and the department of Communication Studies also provide significant course options at the Edwards Campus that can be incorporated into the MA in Global and International Studies.

KU Edwards Campus

KU offers a variety of graduate and undergraduate programs on the KU Edwards Campus in Overland Park, Kansas. The Edwards Campus offers late-afternoon and evening classes, catering to working professionals. Students residing within the KC Metro area, including those on the Missouri side, are able to attend Edwards Campus courses at the in-state tuition rate. For more information, call the Edwards Campus at 864-8400 from Lawrence or 913-897-8400 from other locations.

Center for Global and International Studies

The Center for Global and International Studies (http://global.ku.edu) supports and promotes global and international studies at KU. In collaboration with International Programs and the area centers, CGIS works to provide a single point of contact for faculty with international expertise to help facilitate interdisciplinary research and teaching opportunities. Building on longstanding institutional strength in international studies, the center focuses on topics and themes of transnational scope and on world areas of economic and strategic importance not covered by the existing area studies centers. CGIS contributes to the preparation of students for careers in an increasingly interconnected world by housing undergraduate and graduate degrees in global and international studies, and by supporting the introduction of new course offerings and study abroad opportunities. In addition, the center offers outreach activities to K-12 teachers, businesses, and governmental agencies across the region and serves as a resource for the local and international community.
Courses

EURS 150. Study Abroad Topics in European Studies: _____. 1-5 Hours U.
This course is designed for the study of special topics in European Studies at the 100-level (Freshman/Sophomore level). Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in European Studies. May be repeated for credit if content varies. LEC.

EURS 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in European Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

EURS 302. European Culture and Society 1945 to Present. 3 Hours HT AE42 / H.
The course provides historical, cultural, and political overviews of Europe since 1945 with particular emphasis on the contribution of French and Italian culture and society. The course emphasizes Europe's contribution to Western intellectual thought, social movements, arts and literature, and global society. (Same as HWC 302.) LEC.

EURS 329. History of War and Peace. 3 Hours HL / H.
A study of the changing nature of warfare and the struggle to bring about peace. Topics include pacifism, the "military revolution" that created the first professional armies; the development of diplomatic immunity, truces, and international law; the peace settlements of Westphalia, Utrecht, Vienna, Versailles, San Francisco; the creation of peace movements and peace prizes; the evolution of total war, civil war; and guerrilla warfare involving civilians in the twentieth century; the history of the League of Nations and United Nations; and the rise of intergovernmental and non-governmental organizations. (Same as HIST 329 and PCS 329.) LEC.

EURS 350. Study Abroad Topics in: _____. 1-5 Hours H.
This course is designed for the study of special topics in European Studies at the Junior/Senior level. Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in European Studies. May be repeated for credit if content varies. LEC.

EURS 430. European Civilization in World Context: _____. 3 Hours HL AE42/GE3H / H.
An introduction to the literature of encounter between European and non-European civilizations, drawing on both Western and non-Western sources. The course may include European interactions with areas such as the Mediterranean Basin, Sub-saharan Africa, South and East Asia, and the Americas. World areas and historical periods chosen for study will vary from semester to semester according to the interest and field of the instructor. Not open to freshmen. (Same as HWC 430.) Prerequisite: HWC 114 or HWC 204 and HWC 115 or HWC 205. LEC.

EURS 435. Islam in Europe. 3 Hours AE42 / H.
Investigation of Muslim migration into Europe and day-to-day interactions of Muslims with other European populations. This is an integrated study of historical, political, religious and economic influences that determine Muslim experience in contemporary European culture. (Same as HWC 435.) LEC.

EURS 500. Seminar in European Studies. 3 Hours AE42/AE61 / H.
Provides an interdisciplinary approach to the study of modern European civilization. By discussing both classic and contemporary, controversial readings each week and writing several papers during the semester, students acquire an understanding of the development of modern European culture and society and Europe's contemporary problems. Topics for discussions and papers are drawn from the following subjects: the economic and political integration of European states; modernism and anti-modernism in European culture; imperialism, migration, and ethnic and racial division in European society; democracy versus dictatorship; American-European relations; mass culture, urban development, and the welfare state; and contrasts and comparisons between European Cultures—East and West, North and South. Seminar discussions are led by invited European Studies faculty as well as the instructor or instructors. Required of all European Studies majors. Prerequisite: Junior standing or consent of instructor. LEC.

EURS 501. Senior Thesis in European Studies. 3 Hours AE61 / H.
European Studies majors will do research and write a substantial paper on a topic in the culture, economy, history, or politics of Europe. Topics will be approved by the European Studies Committee. Students will work with an advisor chosen from among the European Studies faculty and with the European Studies Coordinator. The majority of the students' work will be done independently with their advisors, but students will meet with the European Studies Coordinator several times as a class to report on their progress and present their final drafts. Required of all European Studies majors. Prerequisite: Completion of EURS 500 and 15 hours toward the Co-Major. IND.

EURS 502. Senior Honors Thesis in European Studies. 3 Hours AE61 / H.
Open to European Studies majors doing their senior thesis for Honors. Prerequisite: Completion of EURS 500, 15 hours toward the Co-Major, and approval of Honors thesis by European Studies Committee. Completion of or concurrent enrollment in EURS 501. IND.

EURS 503. Europe Today. 3 Hours S.
This intensive, interdisciplinary seminar focuses on current social, political, and economic changes in Europe. Topics include European integration and the European Union, the conflict between nationalism and European consciousness, NATO and U.S.-European relations, and international business in Europe. The seminar will include guest lectures from an international array of scholars, political officials, and business representatives, as well as site visits to their institutions and companies. The seminar takes place in Brussels, Belgium, and enrollment is restricted to students accepted in the KU Summer Institute for European Studies study abroad program. LEC.

EURS 505. Studies in Exile Literature. 3 Hours H.
A multidisciplinary study of selected literary, scholarly, and creative works produced by those Europeans forced into exile, emphasizing their impact on culture and society both in Europe and in those countries in which the exiles resided. Examples: exile during the Nazi dictatorship in Germany (1933-1945), during Cold War crises (Berlin 1960, Prague 1968). LEC.

EURS 506. Culture and Politics of the Cold War in Western Europe. 3 Hours H.
An interdisciplinary overview of the Cold War period (1945-1985) focusing on Western European dimensions of the problem, based on the view that the Cold War structured political institutions, cultures, and societies in enduring ways that continue to be relevant today. LEC.

EURS 507. Research in European Collections. 1-3 Hours H.
This course allows students in the European Studies Co-Major and related disciplines to receive credit for research related to European Collections in one or more of the following institutions: Watson and Spencer Research Libraries, the Dole Institute, the Eisenhower and Truman Presidential Libraries, the U.S. Army Combined Arms Research and Foreign Military Studies Office at Fort Leavenworth, the Linda Hall Library in Kansas City, and the Winston Churchill Collection at the Westminster College Library in Fulton, Missouri. May be taken in place of
EURS 501 by European Studies Honors Students if taken for three credit hours. Permission of instructor necessary. IND.

EURS 508. Politics and Economics of Cultural Production in Western Europe. 3 Hours H.
Artists and intellectuals in their relation to state and society. This course is designed to introduce students (1) to the role European artists and intellectuals have often played in the arena of politics and (2) to the privileged place cultural production (arts, literature, media) occupies in the formation of various European identities and economies. LEC.

EURS 509. Introduction to the Study of Southern European Societies. 3 Hours H.
Social, historical, and economic study of Southern European societies with emphasis on modern period. Relevant to the study of European integration and EU enlargement. Consideration of the distinctive southern Mediterranean societies from the perspective of their collective identity as a regional economic and geopolitical bloc. LEC.

EURS 510. Scandinavian Life and Civilization. 3 Hours H.
This course is designed to impart a general knowledge of life in Denmark, Finland, Iceland, Norway, and Sweden with emphasis on social and cultural conditions, against a geographical and historical background, from the Viking Age to the present. Slides and other illustrated materials. (Same as SCAN 570.) LEC.

EURS 511. Topics in European Studies: ___. 3 Hours H.
A study of significant themes, movements, or problems in European history, literature, politics, society, or culture. May also relate European issues to issues in other world areas (Africa, North America, Asia, etc.) May be repeated for credit when topic varies. LEC.

EURS 512. Irish Literature and Culture: ___. 3 Hours H.
Study of topics in Irish literature and culture. Topics may focus on a particular genre, theme, historical period, or group of authors. May be repeated for credit as the topic changes. (Same as ENGL 530.) Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

EURS 536. Economic Issues of the European Union. 3 Hours S.
A survey of the economies of the European Union, with a focus on the economic development of the member states since World War II, and an examination of the various economic issues confronting them today. (Same as ECON 536) Prerequisite: ECON 104 or ECON 144. LEC.

EURS 550. Classics of Peace Literature. 3 Hours HL AE51/AE61 / H.
A study of influential proposals for world peace from Erasmus’ The Complaint of Peace (1516) to the 1995 Hague Appeal for World Peace. Selected writings by such authors as Erasmus, Hugo Grotius, Jean-Jacques Rousseau, Immanuel Kant, Henry Thoreau, Henri Dunant, Berthe von Suttner, Woodrow Wilson, Mahatma Gandhi, and Martin Luther King, Jr., are considered. (Same as PCS 550.) Prerequisite: HWC 204 or HWC 205. LEC.

EURS 556. The Literature of Human Rights. 3 Hours H.
Examines in literature, art, and film from about 1800 to the present, both sides of the ongoing debate surrounding the idea that all human persons possess inalienable rights because all persons possess intrinsic value as persons, value independent of race, gender, caste or class, wealth, age, sexual preference, etc. Anti- and pro-rights proponents are paired and studied with equal care. (Same as PCS 556.) LEC.

EURS 580. Directed Study. 1-3 Hours AE61 / H.
Independent study and directed reading on special topics. Permission of the instructor who will supervise the student’s work is required. LEC.

EURS 581. Discussion Section in French. 1 Hour U.
The 1 credit hour course represents a foreign language discussion section to be attached to a major 3-credit hour EURS course (example: EURS 500). Foreign language discussion sections are an integral part of the KULAC program envisaged to reinforce foreign language proficiency. LEC.

EURS 582. Discussion Section in German. 1 Hour U.
The 1 credit hour course represents a foreign language discussion section to be attached to a major 3-credit hour EURS course (example: EURS 500). Foreign language discussion sections are an integral part of the KULAC program envisaged to reinforce foreign language proficiency. LEC.

EURS 583. Discussion Section in Italian. 1 Hour U.
The 1 credit hour course represents a foreign language discussion section to be attached to a major 3-credit hour EURS course (example: EURS 500). Foreign language discussion sections are an integral part of the KULAC program envisaged to reinforce foreign language proficiency. LEC.

EURS 584. Discussion Section in Spanish. 1 Hour U.
The 1 credit hour course represents a foreign language discussion section to be attached to a major 3-credit hour EURS course (example: EURS 500). Foreign language discussion sections are an integral part of the KULAC program envisaged to reinforce foreign language proficiency. LEC.

EURS 604. The European Union. 3 Hours H.
The European Union, the union of 27 European countries, is a culmination of a long history of European unity. The European Union now encompasses population and economic strength rivalling that of the United States. This course examines selected topics in the history of European integration and the political, legal, economic, and social implications of the present European Union as well as its relations with the United States and other regions of the world. LEC.

Courses

FARS 110. Elementary Farsi I. 5 Hours U / F1.
Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Five hours of class per week. LEC.

FARS 120. Elementary Farsi II. 5 Hours F2.
Continuation of FARS 110. Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Five hours of class per week. Prerequisite: FARS 110 or departmental permission. LEC.

A continuation of FARS 120. Course emphasizes oral and written work in Farsi. Systematic review of grammar and introduction to reading in cultural texts. Prerequisite: FARS 120 or departmental permission. LEC.

FARS 220. Intermediate Farsi II. 3 Hours F4.
A continuation of FARS 210. Course emphasizes oral and written work in Farsi. Systematic review of grammar and introduction to reading in cultural texts. Prerequisite: FARS 210 or departmental permission. LEC.

FARS 310. Advanced Farsi I. 3 Hours U / FP.
Enhancement of speaking, comprehension, reading and writing abilities in Farsi. Readings from Farsi literature introduced. Prerequisite: FARS 220 or placement exam that establishes a level of proficiency in Farsi suited to Advanced Farsi I. LEC.

FARS 320. Advanced Farsi II. 3 Hours U / FP.
Enhancement of speaking, comprehension, reading and writing abilities in Farsi. Readings from Farsi literature introduced. Prerequisite: FARS 310
or placement exam that establishes a level of proficiency in Farsi suited to Advanced Farsi II. LEC.

**GIST 593. Directed Study in Persian Culture and Literature:** ___. 1-3 Hours U / FP.

This course is designed for students seeking proficiency in Farsi beyond FARS 320. The instructor directs the student through readings and materials in Farsi that add to the student’s substantive knowledge of Iran and culture in the Farsi language. May be taken multiple semesters for credit with varying content. Prerequisite: FARS 320 and consent of instructor. LEC.

**Courses**

**GIST 177. First Year Seminar:** ___. 3 Hours GE11 / U.

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Global International Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

**GIST 201. Topics in: **___. 1-3 Hours U.

An interdisciplinary study of international topics. Designed especially for freshmen and sophomores. May be repeated for credit if content varies. LEC.

**GIST 202. Topics in South Asian Studies:** ___. 1-3 Hours U.

An interdisciplinary study of topics related to South Asia. Designed especially for freshmen and sophomores. May be repeated for credit if content varies. LEC.

**GIST 203. Topics in Middle Eastern Studies:** ___. 1-3 Hours U.

An interdisciplinary study of topics related to the Middle East. Designed especially for freshmen and sophomores. May be repeated for credit if content varies. LEC.

**GIST 215. A Global History of Money: Aristotle to Bitcoin.** 3 Hours H.

What is money? What does it enable, and why do we value it? Is money always the same thing? What are the relationships between money and wealth? Through examining how people across the world and over time used money and answered these questions, this course is an introduction to the global history of money in its myriad forms: gold coins, silver ingots, bonds, debts, cowry shells, and bricks of tea. It approaches money as a point of entry into themes in political, cultural, intellectual, and social history. As such, it is not a course in economic or business history, but a historical examination of how money has transformed our world. We read and view a wide range of secondary and primary sources, ranging from images of money itself to recent works by anthropologists, historians, and economists. (Same as HIST 215.) LEC.

**GIST 250. Introduction to Globalization.** 3 Hours S.

Along with an overview of the origins and historical development of globalization, the course addresses various aspects of the growth of transnational economic, cultural, institutional, and political interconnections, including the implications of rapidly-developing information technology and social media, international security in a transnational world, and the issues related to the movement of goods, people (immigration), images, ideas, and institutional forms across national borders. LEC.

**GIST 301. Introduction to Global and International Studies.** 3 Hours GE11 / S.

This course provides an overview to the major ways and themes involved in the study of world cultures, politics, and societies as applied by disciplines in the social sciences. Topics such as the construction and maintenance of cultures, comparative political systems, global and regional economies, popular culture, gender and the environment will be covered through their manifestations in particular regional and global contexts. LEC.

**GIST 305. World Indigenous Literatures.** 3 Hours NW / H.

A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as ENGL 305/IP 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**GIST 308. Key Themes in Modern Global History.** 3 Hours H.

A comparative historical analysis of major global developments from the late 15th century to the present. Some of the themes likely to be explored are empire-building, contact between cultures and colonial social relations; the attraction of cities, their role in a global economy and the shift to an urban world; and the impact of capitalism and industrialization on social organization including conflict between classes and changes in the nature of work. Students learn ways of interpreting primary historical documents and comparing historical investigations across time and space. (Same as HIST 308.) LEC.

**GIST 314. Globalization: History and Theory.** 3 Hours H.

Explores the rise of global capitalism in the 19th and 20th centuries, contemporary debates about 21st century globalization, and the role of globalization in our everyday lives. Questions considered include: Is globalization an incremental process that has been going on for centuries, or is it a dramatic new force reshaping the post-Cold War world? Is it a cultural and social process or an economic and political one? Or is it all of these things? Not open to students who have completed HIST 315. (Same as HIST 314.) LEC.

**GIST 320. Love, Sex and Marriage in India.** 3 Hours H.

This course addresses diverse aspects of the philosophies and expressions of intimacy and pleasure as found in India. Using old and new literature, including from the Kamasutra, as well as media, we examine the following: how and why in ancient times sensual pleasure was another path for ultimate bliss; how perspectives and traditions of intimacy have changed over time; diverse types of marriages; the culture and practice of arranged marriages; same-sex intimacy; and universal concepts of love. LEC.

**GIST 325. Peoples and Cultures of South Asia.** 3 Hours S.

This course provides an introduction to the diversity of peoples in South Asia, including India, Pakistan, Nepal, Bangladesh and Bhutan. The particular cultures and language of the indigenous peoples in the region are highlighted through academic sources and the direct study of reproductions of these cultures in literature and film. LEC.

**GIST 350. Study Abroad Topics in:** ___. 1-5 Hours U.

This course is designed for the study of special topics in global and international studies at the junior/senior level. Course work must be arranged through the KU Office of Study Abroad and approved by a faculty adviser in Global and International Studies. May be repeated for credit if content varies. LEC.

**GIST 354. Globalization: A Geographic Approach.** 3 Hours S.

This course is designed to provide a broad overview of some major facets of the historical, economic, political, cultural, and geographical dimensions of contemporary globalization, the process by which individual regions and nations have become progressively linked to, and structured by, the world-system of states and markets, and the cultural contradictions associated with this process. (Same as GEOG 354.) LEC.
GIST 371. Environmental Geopolitics. 3 Hours S.
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as EVRN 371 and GEOG 371.) LEC.

GIST 376. Immigrants, Refugees, and Diasporas. 3 Hours H.
This course looks at people who choose to cross political borders, are forced to flee beyond them, or constitute ethnic minorities living outside a homeland. Examining these groups from a global historical perspective, this course explores how ethical debates about the rights of non-citizens and ethnic outsiders have evolved in the modern age. Students learn about important issues that have affected the lives of immigrants, refugees, and diasporas, including citizenship, mobility, cultural representation, asylum policies, and the concept of human rights. The course concludes with a look at contemporary manifestations of these issues, from debates over the place of Muslims in Europe to discussions about immigration policy in the United States. (Same as HIST 376.) LEC.

GIST 424. Nationalism(s) in Turkey. 3 Hours S.
This course analyzes the major variations in nationalist paradigms existing in contemporary Turkey, including conservative nationalism, secular nationalism, religious (Islamic) nationalism, and Kurdish nationalism. Through the lens of seminal theories on the origins, development, and types of nationalism and the relevant historical background of the Turkish Republic, we explore how these competing visions of "the nation" and "homeland" have changed, fragmented, and manifested themselves in everyday Turkish politics and society. LEC.

GIST 493. Directed Readings. 3 Hours U.
Individual and supervised readings in a selected area of international studies. Course is repeatable with permission of the program director. LEC.

GIST 495. Global Internship. 3 Hours U.
Semester-long internship with a business or organization located abroad or that provides a global or international working context for the intern student. A term paper is required. Prerequisite: Consent of instructor. INT.

GIST 501. Topics in: _____ 1-3 Hours U.
An interdisciplinary study of international topics. Designed especially for juniors and seniors. May be repeated for credit if content varies. LEC.

GIST 502. Advanced Topics in South Asian Studies: _____ 1-3 Hours U.
An interdisciplinary study of topics related to South Asia. May be repeated for credit if content varies. Prerequisite depends on specific topic offered. LEC.

GIST 503. Advanced Topics in Middle East Studies: _____ 3 Hours U.
An interdisciplinary study of topics related to the Middle East. May be repeated for credit if content varies. Prerequisite depends on specific topic offered. LEC.

GIST 530. Politics and Society in the Contemporary Persianate World. 3 Hours S.
This course examines the major currents of political developments and their linkages with religion, culture and civil society in Turkey, Iran, Afghanistan, Pakistan and India since the late nineteenth century. During the "pre-modern" period, all these countries formed part of "the Persianate world," a region that extended from the Iranian plateau to the Balkans, Central Asia and the Indian subcontinent, mostly under the Turkic administrations, and tied together by trade, Islam, and Persian as the lingua franca. The dissemination of modern Western political thought and nationalism during the colonial period led to nation-states and the end of the linguistic domination of Persian in the region. Though each of these nation-states ultimately took a different trajectory, they each were faced with similar challenges that offer the basis for interesting comparisons between them. This course explores the trajectories of these countries in regard to the relations between the state, religion, and politics, various strands of nationalism, pluralism, religious and ethnic minorities, social equality, and democratization. Prerequisite: GIST 301 or POLS 150. LEC.

GIST 535. Literature and Society in the Contemporary Middle East. 3 Hours H.
This course offers a general introduction to the modern Middle Eastern literatures in English translation. Through analyses of selected short stories and novels from Arabic, Turkish and Persian literature, the students develop an understanding of the issues that shape everyday life in the Contemporary Middle East. The course investigates issues of nation and national identity, war, ethnicity, class, religion, and gender and sexuality. We use a variety of paradigms, namely nationalist, Marxist, feminist, and Islamist, to provide a theoretical framework for discussion of the selected works. No prior knowledge of Arabic, Turkish or Persian language is needed. Prerequisite: GIST 301. LEC.

GIST 550. Issues in Global Studies: _____, 3 Hours U.
An interdisciplinary study of topics with particular emphasis on issues of global importance--i.e. transnational and trans-regional. May be repeated for credit if content varies. Prerequisite: GIST 301. LEC.

GIST 601. Indigenous Peoples of the World. 3 Hours S.
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GEOG 601 and ISP 601.) Prerequisite: Permission of instructor. LEC.

GIST 610. Interdisciplinary Methods for Global Contexts. 3 Hours S.
An introduction to a variety of widely-employed quantitative and qualitative research methods in the social sciences and humanities, including methods such as statistical analysis, ethnography, and content analysis. LEC.

GIST 624. Social Movements in the Middle East. 3 Hours S.
Using the major theories and approaches comparatively applied to social movements around the world, this course critically analyzes historical and existing cases of social movements and "nonmovements" in the Middle East. We cover examples of Islamist (and post-Islamist), women's, nationalist, democratic, youth and labor movements and their impact on the region. Contextual factors like technology and social networking, regime type, institutions, and socioeconomic structures are also considered for their role in supporting or inhibiting collective action. Prerequisite: GIST 301 or POLS 150. LEC.

GIST 667. Islam and Politics. 3 Hours S.
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as compatibility of political Islam and democratic politics, political economy in Muslim societies, fundamentalism in Islam, gender relations, identity politics and questions on clash of civilizations are explored. (Same as POLS 667 and SOC 640.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor. LEC.

GIST 684. International Law: The State and the Individual. 3 Hours S.
International law has assumed an increasingly significant role in international life. This course examines major issues in international
law including (but not limited to): the changing status and role of the state; rights of minorities and self-determination; the environment; and human rights. The course examines the central questions and the relevant international legal principles associated with each issue. Prerequisite: POLS 170. LEC.

GIST 685. International Law: Laws of Armed Conflict. 3 Hours S.
This course examines the principles, roles, and functions of international law in the conduct of war. As the course reviews the development and application of the basic rules of armed conflict, several current issues and conflicts are addressed including: the legitimate use of force; the proper definitions of combatants and civilians; actions that constitute war crimes, the legality of new weapons technology, and, if the laws of armed conflict apply to the current “war on terrorism.” Prerequisite: POLS 170. LEC.

GIST 696. Diplomacy Lab. 1 Hour S.
This course is a supplemental research lab designed to partner with a jr/sr level course offering this research lab option and an innovative program implemented by the US Department of State. Students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer. This one-credit hour course is intended to function as a special lab project and must be taken in conjunction with a standard course that has a diplomacy lab option. Prerequisite: GIST 301, POLS 150 or POLS 170. GIST undergraduate majors must have also taken GIST 610 or GIST 697. LEC.

GIST 697. Research and Diplomacy Lab. 1-3 Hours S.
This course is designed to provide students with basic tools and an understanding of interdisciplinary social science research and to simultaneously partner with an innovative program implemented by the US Department of State. While learning about the research process and research design, students enrolling in this course team up with a group of four or more students to address a real-world problem posed by a State Department officer with whom they have contact through videoconferencing throughout the semester. The team engages in extensive and systematic research to address the problem and presents their findings in a formal report presented to the State Department in the desired format. Prerequisite: GIST 301. LEC.

GIST 698. Capstone Seminar. 3 Hours AE61 / H.
A seminar designed to introduce students to the theory and practice of global and international studies. A research paper will be required. May not be repeated for credit. Prerequisite: 12 hours of junior/senior level and above courses that satisfy requirements for the major. LEC.

GIST 699. Capstone Seminar, Honors. 3 Hours AE61 / H.
A seminar designed to introduce honors students to the theory and practice of global and international studies. A research paper will be required. May not be repeated for credit. Prerequisite: 12 hours of junior/senior level and above courses that satisfy requirements for the major. LEC.

GIST 701. Approaches to International Studies. 3 Hours.
This course examines various approaches to the study of cultures, politics, and societies in their global and international contexts through the exploration of a series of exemplary works of global/international research from a variety of disciplines (eg. anthropology, sociology, political science, economics, geography, history, etc.). The course will cover the major contributions of these disciplines in their approaches to global questions and themes and will provide a multi-disciplinary framework within which students can begin exploring their own global and international research questions. The course also provides an introduction to the major regions and many of the themes that students will be able to specialize in during the course of the MA program. LEC.

GIST 702. Globalization. 3 Hours.
A central issue in international studies is globalization, the increasing interconnectedness of societies and economies. This course examines globalization from an historical and contemporary perspective. Major topics include (but are not necessarily limited to) the historical expansion of the West since 1500, the growth of international economic institutions, conflict among global cultures, the future of state sovereignty, and the challenges of economic integration. LEC.

GIST 703. The World Economy. 3 Hours.
An introduction to international trade and finance, theories of economic development, and international economic structures. Not appropriate for economics majors. LEC.

GIST 704. Global Cultures and Societies. 3 Hours.
Examination of the components of culture, economic and political anthropology, major global cultural areas, and the impact of cultural differences as expressed through language, literature, religion, thought, and motivation in cross-cultural communications. LEC.

GIST 705. Globalization in History. 3 Hours.
A study of the increasing interaction among world societies since 1500 and an investigation of the long-term developments behind current world problems. Major topics include Western expansion since 1500, the spread of state sovereignty, the formation of a world economy, and the spread of international institutions. Current issues will vary, but may include environmental crises, human rights, migration, free trade and the spread of consumer culture, ethnicity and nationalism, and international intervention within states. (Same as HiST 705.) LEC.

GIST 706. Comparative Governments. 3 Hours.
Survey of different governmental structures in the contemporary world and the ways these countries have confronted issues such as modernization and development, economic security, ethnic pluralism, and conflict, and globalization. LEC.

GIST 709. Research Design. 1-3 Hours.
This course guides new graduate students through the process of designing and developing an original research project. The fundamentals of interdisciplinary research will be the instructional framework within which students will design their own original research project. Instruction regarding the review of literature, methodology, and how to structure and scale the project will be given. Students taking this course will be required to take the companion course, GIST 810. RSH.

GIST 710. Interdisciplinary Research Methods for Global Contexts. 3 Hours.
This course addresses the challenges for students engaged in research in an interdisciplinary and international context. The course will take issues for research and place them within the structure of a research design process, including formulation of a general question, the appropriation of theory, the grounding of a literature review, and the posing of a testable research question and/or hypothesis. Students will also be exposed to research methodologies and how these manifest themselves through the logic of the disciplines—such as anthropology, sociology, geography, political science, history and literature. With a final thesis project design in mind, students will be expected to be expected to be able to utilize the research tools of accessing secondary analytical data, archival research, SPSS, ArcView and methods such as survey construction, implementation, and analysis, interviews, content analysis, discourse analysis, case study and, GIS. Prerequisite: GIST 701 or consent of instructor. LEC.

GIST 750. Topics in International Studies: ________ 3 Hours.
A study of one or more selected topics in international studies. Course may be taken more than once. LEC.
GIST 793. Directed Readings. 1-5 Hours.
Individual and supervised readings in a selected area of international studies. Course is repeatable with permission of the program director. LEC.

GIST 810. Graduate Writing Experience. 1-3 Hours.
This course guides students through the process of effectively communicating the findings of original research through formal writing. The purpose of the course is to provide writing guidance and instruction to students conducting ongoing research, so that they are familiar with successful ways of communicating research to academic and professional audiences. Depending on the career objectives of the student, the writing project will be tailored to address the relevant audience—academic or professional. The fundamental components of the research writing process will be individualized to correspond with student's research goals. Prerequisite: GIST 709. RSH.

GIST 888. Contemporary China Studies. 3 Hours.
This course will review and analyze the current literature on China's social and political development, including a wide range of topics within political science. There is a rich body of literature within each topic such as civil society in China, legal reform, political culture, nationalism, gender issues, ethnicity, political behavior, elections, economic development, and inequality. This course will introduce key literature within each topic focusing on the debates among China scholars as well as how these debates fit in the general field of political science. (Same as EALC 888 and POLS 888.) Prerequisite: POLS 668 or permission of the instructor. LEC.

GIST 897. Examination Preparation. 1 Hour.
Independent study in preparation for the Comprehensive M.A. examination. Graded on satisfactory/unsatisfactory basis. May be repeated. LEC.

GIST 898. Thesis Writing. 3 Hours.
This course guides MA students through the crafting of their academic or professional thesis. The students begin the course with a literature review and data/research completed, and they will be directed through in-class workshops and deadlines with the intention to produce a full draft of their thesis. Students may choose to draft a thesis that fits either academic conventions for a similar body of research, or they may develop a body of research whose target would be a business or professional audience. Course is designed to assist students in the academic or professional contexts with varying methodologies, methods, and audiences on global and international topics. Prerequisite: GIST 710. THE.

GIST 899. Thesis. 1-6 Hours.
Enrollment for writing thesis for master's degree. THE.

Courses

HEBR 110. Elementary Israeli Hebrew I. 5 Hours U / F1.
A beginning course in modern Israeli Hebrew. Essentials of grammar, syntax and conversational practice; elementary reading and writing. Note: Students with other previous experience in Hebrew must take a placement exam. LEC.

HEBR 120. Elementary Israeli Hebrew II. 5 Hours U / F2.
A continuation of HEBR 110. Note Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 110. LEC.

HEBR 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hebrew. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HEBR 210. Intermediate Israeli Hebrew I. 3 Hours U / F3.
Further development of language skills; listening comprehension, oral efficiency, intermediate grammar and syntax, reading and writing. Note: Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 120. LEC.

HEBR 220. Intermediate Israeli Hebrew II. 3 Hours U / F4.
A continuation of HEBR 210. Note: Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 210. LEC.

HEBR 230. Biblical Hebrew. 3 Hours U.
This course introduces students to the grammatical structure and vocabulary of biblical Hebrew. It includes basic biblical passages for students to translate into English and analyze. LEC.

HEBR 240. Biblical Hebrew II. 3 Hours U.
This is a continuation of HEBR 230. It continues the study of the grammatical structure and vocabulary of biblical Hebrew, and includes biblical texts for students to translate and analyze. Prerequisite: HEBR 230 or permission of the instructor. LEC.

HEBR 340. Advanced Israeli Hebrew I. 3 Hours U / FP.
Advanced study of Modern Hebrew. This course is designed to strengthen linguistic skills, enrich vocabulary, and further the study of grammar and syntax. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or permission of the instructor. LEC.

HEBR 350. Advanced Israeli Hebrew II. 3 Hours U / FP.
Continued advanced study of modern Hebrew. Not open to native speakers of Hebrew. Prerequisite: HEBR 340 or permission of the instructor. LEC.

HEBR 395. Study Abroad Topics in Hebrew: _______. 3-6 Hours H.
This course is designed for the study abroad of special topics in Hebrew at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

HEBR 410. Studies in Modern Hebrew Literature. 3 Hours H / FP.
An introduction to Hebrew literature from the nineteenth century to the present day. The course emphasizes the development of basic interpretive skills and the understanding of basic literary movements, genres, and concepts. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent. LEC.

HEBR 420. Studies in Modern Hebrew. 3 Hours U / FP.
This course is designed to help students achieve fluency in speaking, listening, and writing Modern Hebrew. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent. IND.

HEBR 490. Independent Study. 1-3 Hours U.
Intensive reading or research under faculty supervision. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent. IND.

Courses

HNDI 110. Beginning Hindi I. 5 Hours U / F1.
An introduction to modern standard Hindi that emphasizes acquisition of basic language skills (speaking, comprehension, reading and writing) through a combination of lecture, drill, and work with the Devanagari script. LEC.

HNDI 120. Beginning Hindi II. 5 Hours U / F2.
A continuation of Beginning Hindi I that builds on basic skills of speaking and comprehension, and the writing and reading of the Devanagari script developed in Beginning Hindi I. Prerequisite: HNDI 110 or placement
exam that establishes a level of proficiency in Hindi suited to Beginning Hindi II. LEC.

**HNDI 177. First Year Seminar: _____ . 3 Hours GE11 / U.**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hungarian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

**HNDI 210. Intermediate Hindi I. 3 Hours U / F3.**
Enhancement of speaking, comprehension, reading and writing abilities in modern standard Hindi, with emphasis on grammar. Readings will be introduced from representative genres of Hindi literature. Prerequisite: HNDI 120 or placement exam that establishes a level of proficiency in Hindi suited to Intermediate Hindi I. LEC.

**HNDI 220. Intermediate Hindi II. 3 Hours U / F4.**
Enhancement of speaking, comprehension, reading and writing abilities in modern standard Hindi, with emphasis on grammar. Readings will be introduced from representative genres of Hindi literature. Prerequisite: HNDI 210 or placement exam that establishes a level of proficiency in Hindi suited to Intermediate Hindi II. LEC.

**HNDI 301. Topics in Hindi Culture, Language and Literature: _____ . 3 Hours U.**
Investigation of special topics on Hindi culture, language and literature at the undergraduate level. May be repeated for credit when topic varies. LEC.

**HNDI 310. Advanced Hindi I. 3 Hours U / FP.**
Enhancement of speaking, comprehension, reading and writing abilities in Hindi. Readings are introduced from representative genres of Hindi literature. Prerequisite: HNDI 220 or placement exam that establishes a level of proficiency in Hindi suited to Advanced Hindi I. LEC.

**HNDI 320. Advanced Hindi II. 3 Hours U / FP.**
Enhancement of speaking, comprehension, reading and writing abilities in Hindi. Readings are introduced from representative genres of Hindi literature. Prerequisite: HNDI 310 or placement exam that establishes a level of proficiency in Hindi suited to Advanced Hindi II. LEC.

**HNDI 593. Directed Study in Hindi Culture and Literature: _____ . 1-3 Hours H.**
This course is designed for students seeking proficiency in Hindi beyond HNDI 320. Instructor will direct the student through readings and materials in Hindi that will add to the students substantive knowledge of India and culture in the Hindi language. May be taken multiple semesters for credit with varying content. Prerequisite: HNDI 320, and consent of instructor. LAB.

**Courses**

**JWSH 107. Living Religions of the West. 3 Hours HR AE42 / H.**
A basic introduction to the major religious traditions of the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. Not open to students who have taken REL 109. (Same as REL 107.) LEC.

**JWSH 124. Understanding the Bible. 3 Hours HR / H.**
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in the history and religious life of the people who produced and used them. Cannot be taken concurrently with REL 311 or JWSH 321 or REL 315. Not open to students who have taken REL 125 or JWSH 125. (Same as REL 124.) LEC.

**JWSH 125. Understanding the Bible, Honors. 3 Hours HR AE42/ GESH / H.**
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in history and religious life of the people who produced and used them. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 124 or JWSH 124. (Same as REL 125.) LEC.

**JWSH 177. First Year Seminar: _____ . 3 Hours GE11 / U.**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Jewish Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

**JWSH 300. Topics in Jewish Studies: _____ . 3 Hours H.**
Examination of special topics in Jewish Studies. May be repeated if topic varies. LEC.

**JWSH 311. Narratives of Jewish Life. 3 Hours HL AE42 / H.**
The course focuses on the narratives through which Jews made sense of their lives under the impact of the forces of modernity, beginning in the "old world," and moving through the 19th century and into the 20th. The goal is to analyze how the imagination of Jewish writers was captured by the changes in social structures such as new educational, residential and occupational opportunities, leading to increased interactions with the gentile society. Students read and discuss literary works based in the shtetl in revolutionary Russia, and in America. We will also look at memoirs and letters written by ordinary Jews. All assigned texts will be in English. LEC.

**JWSH 315. The Spanish Inquisition. 3 Hours AE42 / H.**
A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as HIST 325 and SPAN 302.) LEC.

**JWSH 318. Jews and Slavs in Eastern Europe. 3 Hours H.**
Jews and Slavs have shared territory from the Middle Ages to the present day. The contact between these culturally and linguistically distinct groups have shaped many centuries of Eastern European history - from the extreme violence of the pogroms to long periods of peaceful coexistence and cooperation. "Jews and Slavs" examines the history and cultural geography of Slavic-Jewish contact from the perspectives of both groups. Through literature, film, journalism, and folklore, students learn about the profound influence Jews and Slavs have had on each other, the uneasy feelings that accompanied their interactions, and the creative and fascinating impact their interaction had on both cultures. (Same as SLAV 318.) LEC.

**JWSH 321. Religion of Ancient Israel. 3 Hours H/W.**
An introduction to the religion of ancient Israel through examination of biblical texts and archaeological evidence. Emphasis is placed on understanding the texts of the Hebrew Bible (Old Testament) in their historical and cultural contexts, including the relationship of their religious views to other religious perspectives current in ancient Israel and the Near East. Attention is given to the processes by which the biblical texts developed and came to be viewed as scripture. (Same as REL 311.) LEC.
JWSH 325. Introduction to Judaism. 3 Hours H.
Analyzes a selection of the core texts, teachings, and practices of Jewish religious traditions in terms of classical and contemporary understanding. (Same as REL 325.) LEC.

JWSH 326. The Talmud: Its Origins, Nature, and Evolution. 3 Hours H.
This course demystifies the Talmud, arguably the most central yet also the most mysterious text of rabbinic Judaism. Students are introduced to the scope, substance, styles, and major figures of the Talmud, and also learn how the text came into being over the course of several centuries. (Same as REL 326.) Prerequisite: REL 104, REL 107, or REL 124 or REL 125, or permission of the instructor. LEC.

JWSH 329. Politics and Conflict in Israel and Palestine. 3 Hours H.
This course focuses on various aspects of the Israeli-Palestinian conflict including its history from the Ottoman period to the present day, the social and political effects on Israeli and Palestinian life and citizenship, official and unofficial narratives, and international responses. LEC.

JWSH 335. History of Jewish Women. 3 Hours H.
This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women's gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women's lives in both Jewish and non-Jewish society. (Same as HIST 335, WGSS 335.) LEC.

JWSH 336. Jewish American Literature and Culture. 3 Hours AE41 / H.
An examination of Jewish American literature and culture from the 17th century to the present. Materials may include a broad range of literary genres as well as folklore, music, film, and visual art. (Same as ENGL 336.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

JWSH 337. Religious Zionisms. 3 Hours HL AE42 / H.
A survey of the many types of Religious Zionism, from the origins of the movement to the present, from Left to Right, and from Jewish to Christian. The class asks questions about the relationship between religion and politics in Israel using case studies as examples, and also considers the views of religious Jewish anti-Zionists. No previous knowledge of Judaism or Israeli history is required. (REL 337.) LEC.

JWSH 338. Languages of the Jews. 3 Hours H.
From the beginning, Jewish history and culture is closely tied to language, from Hebrew and Aramaic to the languages of diaspora such as Yiddish and Ladino. Focusing on issues of language in society, this course will survey the languages spoken by the Jews throughout their long history in diverse communities around the world. We will learn about Hebrew as a spoken and a sacred language, examine how Jewish languages are born and die, and discuss the resurrection of Modern Hebrew in the state of Israel. All readings are in English. No prior knowledge of languages or linguistics is required. (Same as LING 338.) LEC.

JWSH 339. Languages of the Jews, Honors. 3 Hours H.
Honors version of JWSH 338 or LING 338, Languages of the Jews. Prerequisite: Membership in the University Honors Program or consent of instructor. (Same as LING 339.) LEC.

JWSH 340. Topics in Modern Jewish Literature: ______. 3 Hours H.
This course treats Jewish literature in English or English translation in the 20th and 21st centuries either as a broad survey or according to specific themes. May be repeated for credit. LEC.

JWSH 341. Hitler and Nazi Germany. 3 Hours H/W.
An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. (Same as HIST 341.) LEC.

JWSH 343. The Holocaust in History. 3 Hours H.
The systematic murder of the Jews of Europe by the Nazis during World War II is one of the most important events of modern history. This course studies the Holocaust by asking about its place in history. It compares other attempted genocides with the Holocaust and examines why most historians argue that it is unique. Other topics covered include the reasons the Holocaust occurred in Europe when it did, the changing role of anti-Semitism, and the effects of the Holocaust on civilization. The course also discusses why some people have sought to deny the Holocaust. The course concludes by discussing the questions people have raised about the Holocaust and such issues as support for democracy, the belief in progress, the role of science, and the search for human values which are common to all societies. (Same as HIST 343.) LEC.

JWSH 344. Modern Jewish History. 3 Hours H.
This course explores the complex of interactions between Jews, Judaism, and modernity by examining the challenges to Jewish life and thought, community and culture, self-understanding and survival, from the early modern period to the present day. Through the lenses of religious, cultural, intellectual, and political expression, the course examines the social, economic, and demographic changes in Jewish communities in Western, Central and Eastern Europe, the United States, and Israel along with the impact of antisemitism and the Holocaust. (Same as HIST 344.) LEC.

JWSH 350. Contemporary Jewish Identities. 3 Hours SC / H.
This course explores the variety of ways in which American Jews create Jewish identities as individuals and groups. It traces the emergence of the various current divisions within Judaism: Reform Judaism (which by definition, implies Orthodoxy), then Conservative Judaism, and then the later development of Reconstructionist Judaism. The course also explores other contemporary options for being Jewish: cultural Jews, secular Jews, unaffiliated Jews, religious Jews, and gay or lesbian or transgendered Jews. LEC.

JWSH 351. Jewish Film. 3 Hours HL / H.
An examination of the cultural history of the Jews through films that explore Jewish themes, including but not limited to: issues of tradition and modernity, religion and secularism, immigration, gender, Zionism, anti-Semitism, and the Holocaust. Films studied may be in English and in foreign languages (with English subtitles) like Yiddish, Hebrew, and Russian. LEC.

JWSH 395. Study Abroad Topics in Jewish Studies: ______. 3-6 Hours H.
This course is designed for the study of special topics in Jewish Studies at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

JWSH 400. Directed Study in Jewish Studies. 3 Hours AE61 / H.
Intensive reading or research under faculty supervision. Prerequisite: Consent of instructor. IND.

JWSH 491. Directed Study in Jewish Studies, Honors. 3 Hours AE61 / H.
Honors version of JWSH 490. Intensive reading or research under faculty supervision. Prerequisite: Membership in the University Honors Program or consent of instructor. IND.
JWSH 523. The Dead Sea Scrolls. 3 Hours H.
A study of the archeological evidence and texts from the Dead Sea area that provide primary evidence for Jewish religious belief and practice in the Greek and Roman periods (ca. 250 B.C.E. - 135 C.E.). (Same as REL 523.) Prerequisite: REL 124 or JWSH 124 or consent of instructor. LEC.

JWSH 525. Jews and Christians. 3 Hours H.
This course examines the ways Jews and Christians have interacted with and characterized one another at various points in their histories. Special emphasis is placed on the gradual separation of the two religious traditions in the 1st-4th centuries. (Same as REL 525.) Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor. LEC.

JWSH 526. Jewish History and Literature in the Greek and Roman Periods. 3 Hours H.
The history and literature of the Jewish people from the hellenistic period (late fourth century B.C.E. to the codification of the Mishnah 210 C.E.). Select texts from the Hebrew Bible, the so-called apocrypha and pseudepigrapha, the Qumran scrolls, Philo, Josephus, related early Christian texts, and Rabbinic texts will be studied. (Same as REL 526.) Prerequisite: REL 124 or JWSH 124 or permission of instructor. LEC.

JWSH 550. Modern Jewish Thought. 3 Hours H.
This course examines how a number of prominent Jewish thinkers from the seventeenth century through the present have encountered and engaged the special challenges posed by modernity to religious traditions, including the challenge of science to the validity of miracles, the challenge of the secular state to religious authorities, and the challenge of historical studies to the integrity of scripture. Thinkers covered may include Spinoza, Mendelssohn, Frankfurt, Hirsch, Geiger, Hermann Cohen, Buber, Rosenzweig, Arendt, Schollem, Leo Strauss, Levinas, and Derrida. Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor. (Same as REL 560.) LEC.

JWSH 562. Judaism and Political Theology. 3 Hours H.
A consideration of the relationship between religion and politics in Judaism, and of the relevance of Judaism to broader discussions about religion and politics. Topics will include sovereignty, secularization, pluralism, democracy, and revolution. (Same as REL 572.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor. LEC.

JWSH 563. Judaism and Sexuality. 3 Hours H.
An exploration of the complex interactions of Judaism, Jewishness, and sexuality. The course serves as a basic introduction to traditional Jewish understandings of gender and power, love and sex, and the body and embodiment. It also introduces the changes undergone by this tradition under the impact of contemporary feminism and queer theory. (Same as REL 573, WGSS 573.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor. LEC.

JWSH 570. Studies in Judaism. 3 Hours H.
A study of the major intellectual sources of the Jewish tradition from the Mishna, Talmud, Midrash, prayerbook, philosophers, the Zohar, and the Shulchan Aruch. (Same as REL 570.) Prerequisite: A course in Religious Studies or Jewish Studies numbered 300 or above. LEC.

JWSH 572. Jewish Folklore. 3 Hours H.
Jewish folklore is extraordinarily rich and varied. From folktales to riddles, from legends about the exalted rabbis to irreverent jokes, folklore is central to the Jewish way of life. This course traces the extent to which oral elements appear in traditional Jewish literary texts such as the Bible; read and discuss folktales, and examine minor genres such as proverbs, riddles and jokes. Topics include the supernatural beings of Jewish folklore dybbuks, seductive female demons, and golems. Students acquire theoretical tools with which to analyze folklore (Jewish or otherwise), read stories, watch movies, and collect samples of folklore from informants. LEC.

JWSH 573. Jewish Folklore, Honors. 3 Hours H.
Honors version of JWSH 572. Jewish folklore is extraordinarily rich and varied. From folktales to riddles, from legends about the exalted rabbis to irreverent jokes, folklore is central to the Jewish way of life. This course traces the extent to which oral elements appear in traditional Jewish literary texts such as the Bible; read and discuss folktales, and examine minor genres such as proverbs, riddles and jokes. Topics include the supernatural beings of Jewish folklore dybbuks, seductive female demons, and golems. Students acquire theoretical tools with which to analyze folklore (Jewish or otherwise), read stories, watch movies, and collect samples of folklore from informants. Open only to students in the University Honors Program or by permission of instructor. LEC.

JWSH 600. Advanced Topics in Jewish Studies: ______. 3 Hours H.
Examination of advanced topics in Jewish Studies. May be repeated if topic varies. Prerequisite: Consent of instructor. LEC.

JWSH 601. Senior Seminar in Jewish Studies. 3 Hours H.
Investigation of topics related to Jewish studies from an interdisciplinary perspective: Jewish culture, history, and religion. The course focuses on research methods and intensive writing. Open only to Jewish studies majors. Suggested for students with senior standing. SEM.

JWSH 650. Service Learning in Jewish Studies. 3 Hours S.
This course, to be taken in the junior or senior year, is designed to give students the opportunity to apply the knowledge, concepts, and ideas gained in courses in Jewish studies to real-life situations in appropriate agencies and organizations. Open to students in the Jewish Studies program. Prerequisite: Permission of instructor. FLD.

Courses

TAJ 110. Elementary Tajik I. 5 Hours U.
Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Five hours of class per week. LEC.

TAJ 120. Elementary Tajik II. 5 Hours U.
Continuation of TAJ 110. Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Five hours of class per week. Prerequisite: TAJ 110 or departmental permission. LEC.

TAJ 210. Intermediate Tajik I. 3 Hours U.
A continuation of TAJ 120. Course emphasizes oral and written work in Tajik. Systematic review of grammar and introduction to reading in cultural texts. Prerequisite: TAJ 120 or departmental permission. LEC.

TAJ 220. Intermediate Tajik II. 3 Hours U.
A continuation of TAJ 210. Course emphasizes oral and written work in Tajik. Systematic review of grammar and introduction to reading in cultural texts. Prerequisite: TAJ 210 or departmental permission. LEC.

TAJ 310. Advanced Tajik I. 3 Hours U.
Enhancement of speaking, comprehension, reading and writing abilities in Tajik. Readings from Tajik literature introduced. Prerequisite: TAJ 220 or placement exam that establishes a level of proficiency in Tajik suited to Advanced Tajik I. LEC.

TAJ 320. Advanced Tajik II. 3 Hours U.
Enhancement of speaking, comprehension, reading and writing abilities in Tajik. Readings from Tajik literature introduced. Prerequisite: TAJ 220 or placement exam that establishes a level of proficiency in Tajik suited to Advanced Tajik II. LEC.
Bachelor of Arts in Global and International Studies

Why study global and international studies?

Because global and international studies will give you the tools to understand the rapid and profound changes that are occurring around the world.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.A. Major

Global & International Studies Core Knowledge and Skills. (One course from the following list, plus GIST 301. These courses must be completed prior to the declaration of the major.)

Select one course from the following list:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ABSC 150</td>
<td>Community Leadership</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 108</td>
<td>Introduction to Cultural Anthropology</td>
<td>3-4</td>
</tr>
<tr>
<td>or ANTH 109</td>
<td>Introduction to Cultural Anthropology, Honors</td>
<td>3-4</td>
</tr>
<tr>
<td>ANTH 308</td>
<td>Introduction to Cultural Anthropology</td>
<td>3-4</td>

<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EALC 331</td>
<td>Studies In:_____</td>
</tr>
</tbody>
</table>
EALC 380  Popular Cultures of East Asia  
EALC 656  Government and Politics of East Asia  

**Latin America & the Caribbean (9)**  
Satisfied by completing the following course and two additional approved courses about Latin America and the Caribbean.  
LAA 300  Interdisciplinary Themes in Latin American Studies  

**Western Europe (9)**  
Satisfied by completing one of the following courses and two additional approved courses about Western Europe.  
EURS 302  European Culture and Society 1945 to Present  
EURS 503  Europe Today  
EURS 604  The European Union  

**Russia, Eastern Europe, & Central Asia (9)**  
Satisfied by completing one of the following courses and two additional approved courses about Russia, Eastern Europe and Central Asia.  
REES 492  Research Methods in Russian, East European, and Eurasian Studies  
REES 220  Societies and Cultures of Eurasia  
REES 110  Understanding Russia and Eastern Europe  

**Global & International Studies Substantive Specialization.** Students must take 3 courses in one of the specialization fields. The content of these courses must be global, trans-regional or relating to countries and regions outside of the student’s regional specialization. Of these 9 hours, a minimum of 6 must be at the 300 level of above.

**Comparative Political & Social Systems (9)**  
Satisfied by completing 3 approved courses in comparative political and social systems.  

**International Business and the Global Economy (9)**  
Satisfied by completing 3 approved courses about the global economy.  

**Culture, Ethnicity, and Belief (9)**  
Satisfied by completing 3 approved courses about culture, ethnicity, and belief systems.  

**Literature, Popular Culture, and the Arts in the Global Context (9)**  
Satisfied by completing 3 approved courses about literature, popular culture, and/or the arts in the global context.  

**Gender & Sexuality in the Global Context (9)**  
Satisfied by completing 3 approved courses about gender and sexuality in the global context.  

**The Global Environment (9)**  
Satisfied by completing 3 approved courses about the global environment.

---

**NOTE:** Students may not use the same class to fulfill both a regional expertise and a substantive specialization requirement. Not all courses which satisfy the regional expertise and substantive specialization requirements will be offered every year. Students may petition to have a course not on the list count toward the regional expertise or substantive specialization requirements. Petition forms can be downloaded from the website (http://global.ku.edu/academics-major.shtml) and should be submitted to the undergraduate advisor.

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**  
Satisfied by 33 hours of major courses.

**Major Hours in Residence**  
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**  
Satisfied by a minimum of 21 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**  
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Below is a sample 4-year plan for students pursuing the BA in Global and International Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2 Visit this website (http://college.ku.edu/undergrad/curriculum/ ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3 Satisfactory completion of admission requirements is required for admission to the Global and International Studies major. To review the admission requirements, please go here (http://catalog.ku.edu/ liberal-arts-sciences/global-international-studies/ba/#admissiontext). Included is a list of courses that fulfill the Core Knowledge admission requirement.
4 This major requirement can be fulfilled by completion of one additional foreign language course (3 hours) beyond the 4th semester proficiency language requirement (300 level or above), or any available additional language course (3-5 hours).

5 9 hours of Regional Expertise Coursework, and 9 hours of Substantive Specialization coursework is required for the major. Students may not use the same class to fulfill both a regional expertise and a substantive specialization requirement. Not all courses which satisfy the regional expertise and substantive specialization requirements will be offered every year. Students may petition to have a course not on the list count toward the regional expertise or substantive specialization requirements. Petition forms can be downloaded from the website (http://global.ku.edu/academics/ major.shtml) and should be submitted to the undergraduate advisor.

Please note:
All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

Departmental Honors. To graduate with honors in global and international studies, students must complete all requirements for the major plus GIST 699, Honors Capstone with a 3.5 grade-point average in the major and a 3.25 cumulative grade-point average. The honors seminar allows students to receive individualized assistance from a faculty member while they write their thesis.

To enroll in the program, students must have a 3.5 grade-point average in the courses making up the global and international studies major and a 3.25 cumulative grade-point average. Students must obtain approval of their research topic by a faculty member affiliated with the Center for Global and International Studies who will serve as their thesis director. Each student who completes an honor’s thesis must defend it in an oral examination before a thesis committee of three faculty members. The student’s thesis director chairs and chooses the committee in consultation with the student and the center director.

Bachelor of Arts in Jewish Studies

We offer an undergraduate major, minor and courses in Jewish Studies, Hebrew, and Yiddish, as well as co-sponsor courses in a variety of other units.

Among the oldest of academic interdisciplinary studies, dating back to the 19th century, Jewish studies explores Judaism, the Jewish people and culture, and their role in the shaping of human experience. The subject matter of Jewish studies makes it relevant to every department and program in the humanities and social sciences. The breadth of Jewish studies is extensive, with a strong foundation in biblical scholarship and the ancient world combined with more recent study of European, American, Mediterranean and Middle Eastern history. It can involve the study of almost every discipline -- religion, literature, folklore, sociology, anthropology, psychology, political science, philosophy, modern and ancient languages, art, music, film and theatre, law, social welfare, and women’s, cultural, and American studies. Jewish studies can benefit students exploring their own identity or pursuing an interest in Western civilization. Jewish studies prepares students for graduate school; for
careers in Jewish agencies, federations, and community centers or for pre-professional training. The Jewish studies minor can be readily integrated with several KU majors and programs, such as American studies, English, history, or religious studies.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Requirements for the B.A. Major**

Students take 30 credit hours structured according to the following plan:

- 2 Jewish culture or history courses;
- 2 religion courses relevant to Judaism;
- 2 capstone seminar course (JWSH 601), writing intensive; and
- 3 elective courses, allowing the student to explore Jewish Studies in greater breadth and depth.

**Culture or History (2 courses) (6)**

**Total Hours: 120**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. See the Degree Requirements tab for a list of courses that fulfill this major requirement.

4. Please note: the HEBR and YDSH Intermediate I and II courses listed on this four-year plan will fulfill both the BA Second Language requirement and the Language requirement in major. A complete list of courses that can count toward the Language requirement for the major is listed on the Degree Requirements tab. Not all the courses listed will fulfill the BA Second Language requirement. Students who use courses from the course list to fulfill the major Language requirement that do not also fulfill the BA Second Language requirement need to be sure that they either complete coursework or obtain a letter of proficiency to satisfy the BA Second Language requirement.

5. This major requires 3 courses of Jewish Studies major electives, which can be chosen from all the course lists provided under the Degree Requirements tab.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Departmental Honors**

The Jewish Studies Program invites undergraduate majors to apply for graduation with program honors. They must meet the following criteria:

1. The candidate will have an overall grade-point average of at least 3.25 and a grade-point average in Jewish Studies of 3.5 both at the time of declaring intention to seek honors and by graduation.
2. The candidate will fill out a declaration form (available on the JS Program’s website) and submit a copy of that form to Student Academic Services.

3. In consultation with the JS honors coordinator and with approval from a supervising professor, the candidate will declare the intention of seeking honors no later than the time of enrollment for the final undergraduate semester.

4. The candidate will enroll in JWSH 491 Directed Study in Jewish Studies, Honors for one or two semesters during which the student will write a substantial, original research paper to be submitted to the supervising professor as an honors essay. A grade of B or higher must be earned in this/these courses.

A committee of three faculty members (the supervising professor and two others) will approve the honors essay and will certify to the JS honors coordinator that the candidate has successfully completed the requirements to earn honors. The JS honors coordinator will certify to Student Academic Services that the Honors Program has been successfully completed.

**Co-Major in European Studies**

**Why study European studies?**

European Studies, through interdisciplinary study, broadens, deepens, and strengthens a student’s knowledge and understanding of the enduring importance of our transatlantic partners, the Europeans.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credit.transfer.ku.edu) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**First- and Second-Year Preparation**

To complete the requirements for the degree in 4 years, prospective co-majors are encouraged to complete all general education and language requirements no later than fall semester of the junior year. Students should begin study of a western European language other than English or Russian as early as possible. For more information, contact the European Studies undergraduate advisor, Laura Leonard, 785-864-3500, laleonar@ku.edu.

During their first and second years, students are strongly encouraged to enroll in HIST 115 French Revolution to the Present: Europe 1789-Present (3) plus 1 additional course from the list below:

- **ECON 104** Introductory Economics 4
- **ECON 144** Principles of Macroeconomics 3
- **GEOG 100** World Regional Geography 3
- **GEOG 102** Principles of Human Geography 3
- **POLS 150** Introduction to Comparative Politics 3
- **POLS 151** Introduction to Comparative Politics Honors 3
- **POLS 170** Introduction to International Politics 3
- **POLS 171** Introduction to International Politics Honors 3
- **HA 100** Introduction to Western Art History 3
- **PHIL 180** Introduction to Social and Political Philosophy 3

**Note:** Enrollment in the above courses counts toward College principal course distribution requirements in the humanities and social sciences.

**European Studies Prerequisites or Corequisites**

Students selecting this co-major must complete the following:

- **HIST 115** French Revolution to the Present: Europe 1789–Present. Satisfied by:
  - 3-4

  **Interdisciplinary Perspective. Satisfied by 1 course from the following:**
  - **ECON 104** Introductory Economics
  - **ECON 144** Principles of Macroeconomics
  - **ECON 145** Principles of Macroeconomics, Honors
  - **GEOG 100** World Regional Geography
  - **GEOG 102** Principles of Human Geography
  - **POLS 150** Introduction to Comparative Politics
  - **POLS 151** Introduction to Comparative Politics Honors
  - **POLS 170** Introduction to International Politics
  - **POLS 171** Introduction to International Politics Honors
  - **HA 100** Introduction to Western Art History
  - **PHIL 180** Introduction to Social and Political Philosophy

**Note:** Enrollment in the above courses counts toward College principal course distribution requirements in the humanities and social sciences.

**Note:** European Studies co-majors are strongly encouraged to study abroad and should discuss this opportunity with the undergraduate advisor early in their undergraduate career.

**Admission to the Co-Major**

**Admission Requirements**

1. Second-semester sophomore or junior standing.
2. Declared major in a department or admission to a professional school.

**Requirements for the Co-Major**

**European Studies Prerequisites or Corequisites**

Students selecting this co-major must complete the following:

- **Present (3) plus 1 additional course from the list below:**
  - **ECON 104** Introductory Economics 4
  - **ECON 144** Principles of Macroeconomics 3
  - **GEOG 100** World Regional Geography 3
  - **GEOG 102** Principles of Human Geography 3
  - **POLS 150** Introduction to Comparative Politics 3
  - **POLS 151** Introduction to Comparative Politics Honors 3
  - **POLS 170** Introduction to International Politics 3
  - **POLS 171** Introduction to International Politics Honors 3
  - **HA 100** Introduction to Western Art History 3
  - **PHIL 180** Introduction to Social and Political Philosophy 3

**Note:** Enrollment in the above courses counts toward College principal course distribution requirements in the humanities and social sciences.

**Note:** European Studies co-majors are strongly encouraged to study abroad and should discuss this opportunity with the undergraduate advisor early in their undergraduate career.
Students selecting this co-major must complete the following:

**Second Language Skills (3)**

Students must complete one semester beyond the College general education second language requirement (which is the completion of a fourth-semester course) in a modern western European language (Danish, Dutch, French, German, Hungarian, Italian, Portuguese, Polish, Spanish, or Swedish).

**Foundational Course: Seminar in European Studies (3)**

The University of Kansas

The major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

No more than 12 hours may be shared between a 27-hour European studies co-major and another major.

### Departmental Honors

Honors in European Studies is open to co-majors who have earned, both at the time of entry into the program and at graduation, overall grade-point averages of 3.25 or higher and of 3.5 or higher in European Studies. A student must complete all co-major requirements, including EURS 502 Senior Honors Thesis in European Studies, with a grade of A.

The senior honors thesis affords exceptional students the opportunity to work closely with an individual faculty member on a specific research project over an extended period of time, usually two semesters. EURS 502 Senior Honors Thesis may be combined with EURS 501 Senior Thesis in European Studies, substantially increasing the length and scope of the final thesis, or the senior honors thesis may be a separate extension of the senior thesis.

A student in EURS 502 must defend the thesis in a 1-hour oral examination with faculty. The examination committee is composed of 3 faculty members, 1 of whom must be the thesis director. The student selects the committee members in consultation with the thesis director. Students should consult a program advisor early in the junior year.

The European Studies program strongly encourages students to enroll in one of KU’s many study abroad programs in Europe.

European Studies participates in the Humanities and Western Civilization semester abroad program in Paris and Florence.

Summer language institutes offering upper-division courses in language or literature study may also qualify for European Studies co-major or minor credit. Contact a program advisor in the Office of Study Abroad (http://www.studyabroad.ku.edu), 108 Lippincott Hall, 785-864-3742.

### Minor in European Studies

#### Why study European Studies?

European Studies, through interdisciplinary study, broadens, deepens, and strengthens a student’s knowledge and understanding of the enduring importance of our transatlantic partners, the Europeans.

**GIST Regional Expertise.** Global & International Studies Regional Expertise Requirement (6 hours/2 courses). Students must take 2 courses on one of the following regions of the world: Africa; the Middle East; Asia; Latin America and the Caribbean; Western Europe; and Russia, Eastern Europe and Central Asia. Of these 6 hours, a minimum of 3 must be at the 300 level or above and at least 3 of these must be taken from a regional overview course listed with the respective regions below. Additional courses may be appropriate to fulfill the Regional Expertise and the Substantive Specialization requirement if approved by the Center for Global and International Studies.

- **Africa (6 Required).** Satisfied by completing either AAAS 542, AAAS 305 or AAAS 300 and 1 additional approved course about Africa.
- **The Middle East (6 Required).** Satisfied by completing either HIST 328 or POLS 661 and 1 additional approved course about the Middle East.
- **Asia (6 Required).** Satisfied by completing either EALC 331, EALC 380 or EALC 656 and 1 additional approved course about Asia.
- **Latin America & the Caribbean (6 Required).** Satisfied by completing LAA 300 and 1 additional approved course about Latin America and the Caribbean.
- **Western Europe (6 Required).** Satisfied by completing either EURS 302, EURS 503, or EURS 604 and 1 additional approved course about Western Europe.
- **Russia, Eastern Europe, & Central Asia (6 Required).** Satisfied by completing either REES 492, REES 220, or REES 110 and 1 additional approved course about Russia, Eastern Europe and Central Asia.

**GIST Substantive Specialization**

Global & International Studies Substantive Specialization Requirement (6 hours/2 courses). Students must take 2 courses in one of the specialization fields. The content of these courses must be global, trans-regional or relating to countries and regions outside of the student’s regional specialization.

- **Comparative Political & Social Systems.** Satisfied by 2 approved courses in comparative political and social systems.
• International Business and the Global Economy. Satisfied by 2 approved courses about the global economy.
• Literature, Popular Culture, and the Arts in the Global Context. Satisfied by 2 approved courses about literature, popular culture, and/or the arts in the global context.
• Culture, Ethnicity, and Belief. Satisfied by 2 approved courses about culture, ethnicity, and belief systems.
• Gender & Sexuality in the Global Context. Satisfied by 2 approved courses about gender and sexuality in the global context.
• The Global Environment. Satisfied by 2 approved courses about the global environment.

Global & International Studies Minor Foreign Language

Global & International Studies Foreign Language Course. Satisfied by completing one additional foreign language course (3 hours) beyond the 4th semester proficiency language requirement (300 level or above); or any available additional language course (3-5 hours).

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Minor in Jewish Studies

We offer an undergraduate minor and courses in Jewish Studies, Hebrew, and Yiddish, as well as co-sponsor courses in a variety of other units.

Among the oldest of academic interdisciplinary studies, dating back to the 19th century, Jewish studies explores Judaism, the Jewish people and culture, and their role in the shaping of human experience. The subject matter of Jewish studies makes it relevant to every department and program in the humanities and social sciences. The breadth of Jewish studies is extensive, with a strong foundation in biblical scholarship and the ancient world combined with more recent study of European, American, Mediterranean and Middle Eastern history. It can involve the study of almost every discipline -- religion, literature, folklore, sociology, anthropology, psychology, political science, philosophy, modern and ancient languages, art, music, film and theatre, law, social welfare, and women’s, cultural, and American studies. Jewish studies can benefit students exploring their own identity or pursuing an interest in Western civilization. Jewish studies prepares students for graduate school; for careers in Jewish agencies, federations, and community centers or for pre-professional training. The Jewish studies minor can be readily integrated with several KU majors and programs, such as American studies, English, history, or religious studies.

Requirements for the Minor

Jewish Studies Minor Course Requirements

Student selecting this minor must complete a course in each of the following areas:

Jewish Studies

Jewish Culture or History. Satisfied by one course, for example one of the following: (3)
- JWSH 300: Topics in Jewish Studies: Israeli Politics in Society
- JWSH 311 Narratives of Jewish Life
- JWSH 327 Jewish Secular Culture

Jewish Religion. Satisfied by one course, for example one of the following: (3)
- JWSH 300: Topics in Jewish Studies: The Story of the Talmud
- JWSH 321 Religion of Ancient Israel
- JWSH 325 Introduction to Judaism

Electives. Satisfied by: (12)
Any other JWSH course or appropriate cross-listed or cross-referenced courses in other units. (see below)

6 credit hours in Yiddish (YDSH) and/or in Hebrew (HEBR) at the 200-level or above may count among these 12 credit hours.
More HEBR or YDSH courses may be approved for the minor upon petition.

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all courses in the minor. GPA calculations include all courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

## Middle East Studies Minor

### Middle East Studies Minor

The minor in Middle East Studies provides students with in-depth knowledge of the Middle East and complements many majors within the College as well as other degrees across the University. In addition, the Middle East Studies minor prepares students for careers in international business, government, and other related fields.

### Requirements for the Minor

**Core Courses (6)**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>REL 350</td>
<td>Islam</td>
<td>3</td>
</tr>
<tr>

<td>Politics of the Middle East</td>
<td>3</td>
</tr>
<tr>
<td>or HIST 328</td>
<td>The Modern Middle East</td>
<td></td>
</tr>
</tbody>
</table>

**Electives (12)**

These courses allow students to deepen their knowledge of the countries and issues in the region. Students must take at least one course from each emphasis—i.e. social science and humanities, as listed below—but can choose to take three courses from one emphasis and one from the other or take two from each.

Regularly offered and upcoming elective options are:

- **Social science emphasis:** (minimum 3 credit hours)
  
  - ANTH 303  
    Peoples and Cultures of North Africa and the Middle East

### Master of Arts in Global and International Studies

**Why study global and international studies?**

The innovative and interdisciplinary field of Global and International Studies prepares students with the skills and knowledge to deal with contemporary global issues and to operate in a world where both problems and opportunities increasingly transcend national boundaries. KU’s Master of Arts in Global and International Studies is designed for both working professionals and recent graduates who seek a better understanding of international issues that shape public policy and the global economy and who want to have an impact in these areas.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section (p. 2280) of the online catalog.
Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Students are admitted for both fall and spring semesters. Applicants must submit the following materials:

1. An application with appropriate application fee,
2. 1 official transcript from each institution of higher education attended for undergraduate and graduate work,
3. A 500- to 1,000-word essay outlining relevant experiences and reasons for pursuing this degree,
4. A current résumé,
5. 3 letters of recommendation sent directly from the references, and
6. Graduate Record Examination scores (Law School Admission Test or Graduate Management Admission Test results are acceptable substitutes).

International students also must submit Test of English as a Foreign Language scores for an examination taken within the past 2 years, unless they hold degrees from English-speaking institutions.

All materials must be received before the application can be evaluated. More information about the application process can be found on the program’s website (http://global.ku.edu). In general, to enter this program, a student must have a bachelor’s degree from an accredited institution with at least a 3.0 grade-point average on a 4.0 scale; admitted students typically have grade-point averages well above 3.0. Materials are reviewed by a subcommittee of the program advisory committee, which also considers the applicant’s overall record and prospects for success.

Submit your graduate application (http://graduate.ku.edu/prospective-students) and fee online. Send all other application materials to the following address:

The University of Kansas Lawrence Campus
Global and International Studies Applications
Attn: Alyssa McDonald
1440 Jayhawk BLVD, 310 Bailey Hall
Lawrence, KS 66045

or

The University of Kansas Edwards Campus
Global and International Studies Applications
Attn: Michelle Welch
12600 Quivera Road
Overland Park, KS 66213

The new concentration, called the Foreign Affairs Studies (FAS) concentration, will allow a student to focus on a specific world area while earning the Global and International Studies MA. The first world area focus to be offered will be “Middle East and North Africa.”

The FAS concentration is designed to meet the needs of Army Foreign Affairs Officers (FAOs), but it is also expected to attract civilian students with comparable language training and in-country experience. It will allow such well-prepared students to deepen and diversify their area expertise and, because it will be an intensive program that will run fall-spring-summer, it will allow FAOs to complete the MA within the 12-month constraint set by the Army’s FAO program.

**M.A. Degree Requirements**

The Master of Arts in Global and International Studies is a 33-credit-hour degree. All students complete 3 required courses:

| GIST 701 | Approaches to International Studies |
| GIST 702 | Globalization |
| GIST 710 | Interdisciplinary Research Methods for Global Contexts |

In addition to the 3 required courses, students must then complete 7 graduate-level elective courses (21 credit hours). These electives form 2 coherent clusters:

**Regional Specialization Cluster:**

These courses in this cluster should give students focused knowledge about a selected region of the world. Up to 3 language courses (9 hours) at or above the 500 level may also count toward this requirement.

**Topic Specialization Cluster:**

This cluster must focus on a topic specialization approved by the student’s adviser. Students can choose current global and international themes, or they can select an existing graduate certification program offered by another department, such as certificates in community health and development, peace and conflict, women gender and sexuality studies, international business, public administration or communication studies.

For more on the regional and topical elective options, consult the GIST graduate student handbook (http://global.ku.edu/courses-offered) or contact one of the GIST graduate advisors.

For all students, the M.A. degree also requires evidence of current competence (equivalent to 2 years of successful college-level study) in a modern spoken and written language other than English; courses taken to complete this requirement generally do not count toward the degree. Students must meet all general requirements as well as program requirements.

**Thesis Option**

Students electing to write and defend a thesis must have their thesis project proposal approved by their thesis advisor prior to enrolling in GIST 898 Thesis Writing. Students choosing the thesis option must complete GIST 898. For guidelines and policy regarding the thesis, please consult the GIST graduate student handbook (http://global.ku.edu/thesis-option).
Non-thesis Options

Option #1 (Research Project and Oral Exam) – students selecting this option are required to take GIST 898 and complete a research project of more limited scope and scale than a thesis, and the project will be followed by an oral exam. For guidelines and policy regarding the research project option, please consult the GIST graduate student handbook (http://global.ku.edu/non-thesis-option).

Option #2 (Exam) – students choosing this option must take an additional 3 credit hours, corresponding to one of their 2 coherent elective clusters. In the final semester, the student must successfully complete a written examination over the core course content (GIST 701 and GIST 702) and the student’s regional and substantive areas of focus. This is followed by an oral exam. For guidelines and policy regarding the written and oral exam option, please consult the GIST graduate student handbook (http://global.ku.edu/non-thesis-option).

Global Master of Arts/Master of Business Administration

When you earn a Global MA/MBA, a dual degree program from the Center for Global and International Studies and the School of Business at the University of Kansas, you’ll receive a well-rounded education that not only supports your career goals, but also incorporates both the theoretical background and practical experience needed to succeed in today’s ever-changing global economy. This program synthesizes critical knowledge of the contemporary social, cultural, and political global context with the tremendous skills acquired from KU’s excellent MBA program. This dual degree option was designed in particular for working professionals who wanted to take advantage of the convenient options available at the Edwards Campus in Overland Park.

The Global MA/MBA Program includes 56 hours of coursework and is structured to be completed in three years. New students are admitted each fall semester. Classes are offered weekday evenings at the Edwards Campus. KU’s Global MA/MBA program is designed for business leaders, from the recent college graduate to the seasoned executive with an eye toward global opportunities. If you are looking to advance, re-brand, change industries, or start your own business, a Global MA/MBA dual degree will open the doors to new possibilities.

Admission to the Global MA/MBA Dual Degree Program

The Global MA/MBA program is open to those who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records, scores on the required standardized examination, and prior work experience indicate that they have the capability to complete the program. Admission to all programs in business is reviewed by the MBA Admissions Committee and the graduate admissions committee in Global and International Studies. Those who have not completed a baccalaureate degree are not eligible for enrollment in MBA courses.

Applicants for the Global MA/MBA graduate program must take the Graduate Management Admission Test (http://www.mba.com/us/the-gmat-exam/register.aspx) administered by Pearson VUE. The GMAT is administered in most foreign countries and by appointment at designated testing centers throughout the United States. The test typically is taken during the academic year before the term for which admission is sought. Students whose native language is not English or who have not completed a degree from a college or university in the United States, Great Britain, Canada, or Australia must also have a score of at least 600 for the MBA program on the Test of English as a Foreign Language. A minimum score of 57 on each of the three sections of the TOEFL is required. For students taking the computerized version of the TOEFL, an overall score of 250 is required, with a minimum score of 23 on each of the 3 sections of the test.

All applications for admission to the Global MA/MBA program must include:

1. Graduate application (http://graduate.ku.edu/ku-graduate-application);
2. 3 essays;
3. An official transcript from each college or university that conferred a degree;
4. 2 letters of recommendation from faculty members and/or employers;
5. Scores on the GMAT and scores on the TOEFL if required;
6. A $65 nonrefundable application fee ($75 for international applicants); and
7. A current résumé.

Completed applications are reviewed by the MBA committee and GIST committee and action is taken on them on a rolling basis. Each applicant is notified by email of the action taken on his or her application.

Admission to any graduate program in business is subject to and in accordance with all rules and regulations of the University of Kansas. See the Graduate Studies Admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study?num1_1=) in the KU online Policy Library for more information.

Submit your graduate application online (http://graduate.ku.edu/ku-graduate-application). Send original transcripts of all completed college and university coursework and all other requested application materials to the School of Business MBA Office:

The University of Kansas
School of Business
MBA Admissions Coordinator
Summerfield Hall
1300 Sunnyside Ave., Room 124
Lawrence, KS 66045-7543

Degree Requirements

To complete the Global MA/MBA dual degree program, students must meet the following sets of requirements, uniquely designed for this particular dual program. Within the dual program, the Master of Arts in GIST portion of the degree requires 30 credit hours, 6 of which are considered as overlapping with the MBA degree. All students complete 4 required courses (12 credit hours):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</tr>
</tbody>
</table>

Beyond this, students must also take 4 additional elective courses (12 credit hours) on regional or internationally-themed foci. Students could focus on a world region, such as the Middle East, Africa, Asia, Latin
Graduate Certificate in Global and International Studies

The Global & International Studies (GIST) certificate is a 12-unit/4-course certificate designed for KU graduate students from other disciplines and working professionals in the Kansas City area, but students located near the Lawrence campus or in graduate programs on the Lawrence campus are also welcome to consider the graduate certificate option. The graduate-level certificate coursework fits particularly well with the other graduate programs at the Edwards Campus (http://edwardscampus.ku.edu/about-ku-edwards-campus) in Overland Park and allows students to gain expertise in globalization and international issues in approximately one year (or less) of study.

Admissions for Current KU Graduate Students

Current KU graduate students must submit the following materials:

1. Online application (http://www.graduate.ku.edu/ku-graduate-application) along with a $30 application fee.
2. A letter of support from a departmental advisor.
3. A current copy of the student's KU advising report (DPR) showing a GPA of 3.00 or higher.

Admissions for Working Professionals

Working professionals seeking only the GIST certificate at KU must submit the following materials:

1. Online application (http://www.graduate.ku.edu/ku-graduate-application) along with a $30 application fee.
2. An official transcript copy from their degree-granting undergraduate institution showing a 3.00 GPA or higher. (Exceptions may be granted at the discretion of the admissions committee.)
3. A statement of purpose of 250-500 words describing the applicant’s interest in Global & International Studies and their professional goals.
4. A current resume. (Optional)

Admission Deadlines

We recommend that domestic applicants apply by August 1 for fall semesters and January 1 for spring semesters. International applicants should apply by June 15 for fall semesters and November 15 for spring semesters.

Questions? Please contact one of our graduate advisors, Michelle Welch (for Edwards campus applicants) at michele.welch@ku.edu, or Alyssa McDonald (for Lawrence campus applicants) at mcdonalda@ku.edu for more information.

The certificate requires the completion of one core course (either GIST 701 Approaches to International Studies or GIST 702 Globalization), an elective in a regional area, an elective in a topical area of focus, and one general internationally-focused elective. Students will work with the graduate advisor and graduate director to choose appropriate electives. You can view our certificate checklist here (http://global.ku.edu/sites/global.ku.edu/files/docs/CertificateChecklist_forWeb_Fall2014-Present.pdf).

Department of History

Studying history at the University of Kansas will expand your mind. Our course offerings introduce students to medieval witches and Samurai warriors, conspiracy cranks and Native American prophets, Chairman Mao and the Black Panthers. Students can take courses on the history of sexuality, or, if that isn't exciting enough, courses on natural disasters, wars, and plagues. With 35 tenured and tenure-track faculty, the Department of History covers the globe.

But studying history is more than just an entertaining adventure. Training in historical research, analysis, and writing develops skills that are essential in our information economy, and this preparation is especially useful to students planning to pursue graduate training and careers in law, public policy, journalism, education, and a universe of other possibilities, as our recent undergraduate and graduate alumni throughout the world can attest.

The Department of History at KU offers an outstanding undergraduate program with approximately 250 majors and an additional group of History minors. These students are taught by faculty who consistently win awards for their teaching as well as their research. Beyond the introductory level, class sizes are small, including two required seminars that are capped at fifteen students each, and the optional Senior Honors Thesis, which features direct one-on-one advising with a faculty mentor.

Our graduate program has consistently ranked in the top 25 among public research universities. With an average of 80 graduate students enrolled, we are primarily a doctoral program, granting Ph.D. degrees in standard
geographical areas such as the United States, Europe, Asia, Africa, the Middle East, and Latin America, as well as in thematic fields such as military, environmental, and gender and sexuality. Recent Ph.D. recipients have gone on to tenure-track positions at research universities, liberal arts colleges, junior colleges, and a variety of non-academic careers.

Finally, faculty in the Department of History are nationally and even internationally known for their research. The books and articles they have published just in the last two years are too numerous to list here, but you can scroll through the faculty page to gain a sense of their significance shaping our knowledge about the world. Their productivity plays an important role in helping KU maintain its position in the prestigious American Association of Universities.

Take some time to search through our website. You'll find information about our programs, our courses, and our prolific faculty, and you can hear the voices of undergraduates and graduate students who have passed through the Department. Please feel free to contact any of the administrative staff, faculty, and faculty officers with your questions.

**Undergraduate Programs**

The History Department at the University of Kansas is particularly distinguished in undergraduate teaching. Previous honors include the Excellence in Undergraduate Advising Award from the College of Liberal Arts and Sciences.

In addition, many History faculty members have won individual awards for their teaching, such as the Kemper Prize and Distinguished Professor awards. The department as a whole ranks well above the University average in student evaluations.

- Faculty (http://www.history.ku.edu/%7Ehistory/faculty) in the department are often nationally and internationally recognized leaders in their field, and they bring this advanced knowledge to bear on their teaching.
- Courses (http://www.catalogs.ku.edu/undergraduate/majors/History.pdf) in the department are usually small, and the larger courses always include Teaching Assistants, so students can receive individual attention and feedback on their work.
- Flexibility is a given in the department: students have only two required courses—a course on historical methods and a senior research seminar—and a choice of concentrating on any of ten fields, as well as the opportunity to design their own major. The department and faculty also have links to interdisciplinary work in Environmental Studies, African and African-American Studies, Indigenous Nations Studies, and other area studies programs.
- Resources for history research at KU are rich. Watson and Anschutz libraries help make up a major research library collection, and the Spencer Library offers such resources as the Wilcox Collection on extremist politics, the University Archives, and major collections in British history, among others.
- For more information, see the History Major Program Description (http://www.history.ku.edu/under/pdfs/UG%20Major%20Hand %20Out.pdf).

**Courses for Nonmajors**

The department offers courses that span time (from ancient to contemporary history) and space (North and South America, Europe, Asia, and Africa). The department offers courses in social history, including the history of women and the family, African-American and Native American history, and topical courses in such areas as politics, diplomacy, war and society, culture, the environment, ideas, cities, economics, and religion. History courses are cross-listed with a variety of departments and programs.

**Graduate Programs**

The Department of History (http://history.ku.edu) at the University of Kansas is a dynamic place, with a proud tradition of training scholars from across the globe who have transformed the practice of history. The program offers major or minor concentrations in the areas of United States, African American, Modern European, British & Imperial, Russian/ East European, East Asian, Latin American, African, Medieval, Women and Gender, Military, and Environmental History. KU offers its graduate students great flexibility in their choice of fields, as defined both by traditional geographical and chronological parameters and thematic topics. Students also have the opportunity to take coursework outside the department in fields such as Public History, Museum Studies, Environmental Studies, and the History of Medicine.

Primarily a doctoral program, the Department currently enrolls approximately 80 graduate students from throughout the United States and the world, including Japan, China, Peru, and Russia. Our students make up a very diverse group, and we encourage applicants from traditional and non-traditional backgrounds.

For statistics regarding our program, please see our Doctoral Program Profile (http://www_graduate.ku.edu/sites/graduate.drupal.ku.edu/files/ docs/dpp/DPP_A_HIST.pdf), which demonstrates our success at funding and placing current and recent graduates.

**Courses**

**HIST 101. Introduction to History: _____. 3 Hours HT GE11 / H.**

An introduction to the study of history. The course will expose the student to the major issues and methods of historical study. This will be done through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. LEC.

**HIST 102. Introduction to History, Honors: _____. 3 Hours HT / H.**

An introduction to the study of history. The course will expose the student to the major issues and methods of historical study. This will be done through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. Prerequisite: Membership in the College Honors Program or consent of department. LEC.

**HIST 103. Environment and History. 3 Hours H.**

Nature is our oldest home and newest challenge. This course surveys the environmental history of the earth from the extinction of the dinosaurs to the present with a focus on the changing ecological role of humans. It analyzes cases of ecological stability, compares cultural attitudes toward nature, and asks why this ancient relationship seems so troubled. (Same as EVRN 103.) LEC.

**HIST 104. Introduction to African History. 3 Hours NW GE11/GE3H / H/W.**

An introduction to important historical developments in Africa. Topics include empires, kingdoms, the slave trade, European colonialism, liberation movements, national identities, and a return to independence. (Same as AAAS 105.) LEC.
HIST 105. Introduction to Ancient Near Eastern and Greek History. 3 Hours NW GE3H / H/W.
A general survey of the political, social, and economic developments of Mesopotamia, Egypt, Asia Minor, and Greece from Paleolithic times to 323 B.C. LEC.

HIST 106. Introduction to Roman History. 3 Hours H/W.
A general survey of the political, social, and economic developments of ancient Rome from 753 B.C. to 475 A.D. LEC.

HIST 107. Introduction to the Ancient World. 3 Hours H.
This course covers the history of the ancient Near East, Greece and Rome with emphasis on the origins of agriculture, writing, cities, empires, and democracy. Students will be introduced to schemes of interpretation, critical readings, and analysis, primary sources, and evaluation of evidence. LEC.

HIST 108. Medieval History. 3 Hours HT / H/W.
The history of Europe from the Barbarian Invasions to the beginning of the 16th century. LEC.

HIST 109. The Black Experience in the Americas. 3 Hours HT AE41 / H/W.
An interdisciplinary study of the history of the African peoples of the New World, relating their cultures and institutions to the African background and to their peculiar New World experiences up to and including the nineteenth century. While the main emphasis is on the U.S.A., attention is also paid to the Caribbean and Latin America. Approaches include demography, economics, social and political developments, literature, and music. (Same as AAAS 106.) LEC.

HIST 110. Introduction to African History, Honors. 3 Hours NW / H/W.
An intensive version of AAAS 105/HIST 104. An introduction to important historical developments in Africa, mainly south of the Sahara. Topics include early history, empires, kingdoms and city-states, the slave trade, southern Africa, partition and colonialism, the independence era, military and civilian governments, and liberation movements. Approaches include literature, the visual arts, politics, economics, and geography. Open only to students in the University Honors Program or by consent of instructor. (Same as AAAS 115.) LEC.

HIST 111. Introduction to British History. 3 Hours GE11 / H.
This course will introduce students to the concepts, issues, and methods of historical study, at the same time as it explores the main processes and events which shaped the history of Britain and its imperial dependencies. Students will be introduced to the nature and validity of different historical interpretations, and to the purpose and merit of historical writings. LEC.

HIST 113. Europe 1500-1789, Honors. 3 Hours HT / H.
An introduction to early modern European history, with emphasis on the cultural, political, economic, and social processes and events which helped to shape the modern world: The renaissance, the rise of nation states, the Reformation, absolutism and constitutionalism, the Enlightenment, and the coming of the French Revolution. Not open to students who have taken HIST 114. This Honors course is a Humanities Historical Studies Principal Course. Prerequisite: Membership in the College Honors Program or consent of department. LEC.

HIST 114. Renaissance to Revolution: Europe 1500-1789. 3 Hours HT GE11 / H/W.
An introduction to early modern European history, with emphasis on the cultural, political, economic, and cultural forces which have helped to shape the modern world. The renaissance, the rise of nation states, the Reformation, absolutism and constitutionalism, the Enlightenment, and the coming of the French Revolution. LEC.

HIST 115. French Revolution to the Present: Europe 1789-Present. 3 Hours HT GE11/GE3H / H/W.
An introduction to recent European history, with emphasis on the social, political, economic, and cultural forces which have helped to create the Europe of today: the French Revolution, the romantic movement, the revolutions of 1848, nationalism, imperialism, Communism, and two World Wars, the cold war, and its aftermath. LEC.

HIST 116. French Revolution to the Present: Europe 1789 to Present, Honors. 3 Hours HT GE11/GE3H / H.
An introduction to recent European history, with emphasis on the social, political, economic, and cultural forces which have helped to create the Europe of today: The French Revolution, the romantic movement, the revolutions of 1848, nationalism, imperialism, Communism, and two World Wars, the cold war and its aftermath. Not open to students who have taken HIST 115. This Honors course is a Humanities Historical Studies Principal Course. Prerequisite: Membership in the College Honors Program or consent of department. LEC.

HIST 117. Russia, an Introductory History. 3 Hours HT AE42/GE3H / H/W.
A survey of the evolution of Russia from its origins to the present. The focus will be on the interaction of government and society and on internal and external pressures affecting modernization and reform, revolution, and territorial expansion. LEC.

HIST 118. History of East Asia. 3 Hours NW AE42 / H/W.
A survey of the history of China, Japan, Korea, and other cultures in East Asia from premodern to modern times. Students are introduced to the major currents of East Asian history and historical methods used to study them. Not open to students with credit in upper division East Asian history. LEC.

HIST 119. History of East Asia, Honors. 3 Hours NW AE42 / H/W.
A survey of the history of China, Japan, Korea, and other cultures in East Asia from premodern to modern times. Students are introduced to the major currents of East Asian history and historical methods used to study them. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HIST 120. Colonial Latin America. 3 Hours NW AE42/GE3H / H/W.
The principal focus is on the evolution and analysis of societies, economies, and religions of native American peoples, the impact of Spanish and Portuguese conquests and settlement, government, trade and culture upon native civilizations, the influence of African population and culture, and the creole nature of the resulting society in the colonial period. Changes in the society and economy which presaged the movements for independence are also discussed. LEC.

HIST 121. Modern Latin America. 3 Hours HT GE3H / H/W.
Students are introduced to historical analysis within the context of the emergence of national identities and the process of modernization in the region. It also discusses key processes such as urbanization and industrialization and examines social movements for reform or revolution in the 20th Century. The course compares social, cultural, economic, and political changes across a variety of countries since 1810, giving particular attention to the legacies of colonialism. In this way the course deals with interpretations of the processes and movements and major issues of Latin American historiography. LEC.

HIST 122. Colonial Latin America, Honors. 3 Hours NW AE42/GE3H / H/W.
The principal focus is on the evolution and analysis of societies, economies, and religions of native American peoples, the impact of Spanish and Portuguese conquests and settlement, government, trade and culture upon native civilizations, the influence of African
population and culture, and the creole nature of the resulting society in the colonial period. Changes in the society and economy which presaged the movements for independence are also discussed. Prerequisite: Membership in the College Honors Program or permission of instructor. LEC.

HIST 123. Modern Latin America, Honors. 3 Hours HT GE3H / W. Similar in content to HIST 121. Students are introduced to historical analysis within the context of the emergence of national identities and the process of modernization in the region. The course compares social, cultural, economic, and political changes across a variety of countries since 1810, giving particular attention to the legacies of colonialism. It also discusses key processes such as urbanization and industrialization and examines social movements for reform and revolution in the 20th century. In this way the course deals with interpretations of these processes and movements and major issues of Latin American historiography. Prerequisite: Membership in the University Honors Program or permission of instructor. LEC.

HIST 124. Latin American Culture and Society. 3 Hours SC AE42 / S. An introduction to the interdisciplinary study of Latin America, as manifest in the arts and literature, history, and in environmental, political, economic, and social realities. Explores and critiques the principal themes and methodologies of Latin American Studies, with an aim towards synthesizing contributions from several different disciplines. Emphasizes the unique insights and perspectives made possible by interdisciplinary collaboration and provides students with the basic knowledge base for understanding Latin America today. (Same as LAA 100.) LEC.

HIST 128. History of the United States Through the Civil War. 3 Hours HT GE3H / H. A historical survey of the United States from the peopling of the continent through the Civil War. This survey is designed to reflect the diversity of the American experience, to offer the student a chronological perspective on the history of the United States, and to explore the main themes, issues, ideas, and events which shaped that history. LEC.

HIST 129. History of the United States After the Civil War. 3 Hours HT GE3H / H. A historical survey of the American people from Reconstruction to the present. This survey is designed to reflect the diversity of the American experience, to offer the student a chronological perspective on the history of the United States, and to explore the main themes, issues, ideas, and events that shaped American history. LEC.

HIST 136. Early Science to 1700. 3 Hours H. Surveys the Western scientific tradition from roots in ancient Egypt, Mesopotamia, and Greece to the Scientific Revolution in seventeenth-century Europe. Focuses on the theoretical, methodological, and institutional development of the physical and bio-medical sciences. Addresses interactions of science with the technological, religious, philosophical, and social dimensions of Western culture. LEC.

HIST 137. History of Modern Science. 3 Hours H. Surveys the history of science from the seventeenth century to the present with study of the changing theoretical, institutional, and social character of the scientific enterprise. Addresses physical, biological, and social sciences with attention to the chemical revolution at the turn of the nineteenth century, evolutionary biology, the new physics of the early twentieth century, and the professionalization of social science. Relates scientific changes to historical developments in technology, religion, national traditions in Europe and the USA, and non-Western cultures. LEC.

HIST 140. Global Environment I: The Discovery of Environmental Change. 5 Hours GE3H / U. This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 140 and GEOG 140.) LEC.

HIST 142. Global Environment II: The Ecology of Human Civilization. 5 Hours GE3H / U. This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to humanity’s engagement with the global environment using historical and present-day examples. (Same as EVRN 142 and GEOG 142) LEC.

HIST 144. Global Environment I: The Discovery of Environmental Change, Honors. 5 Hours U. This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as GEOG 144 and EVRN 144.) Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

HIST 145. Global Environment II: The Ecology of Human Civilization, Honors. 5 Hours U. This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to humanity’s engagement with the global environment using historical and present-day examples. (Same as EVRN 145 and GEOG 145.) Open only to students in the University Honors Program or by permission of instructor. LEC.

HIST 160. Introduction to West African History. 3 Hours NW AE42/GE3H / H. This course treats West African history through the first part of the 20th century. The student is provided with a perspective on the major historical patterns that gave rise to West Africa’s development as an integral part of world history. Special attention is paid to anthropological geographical,
and technological developments that influenced West African political and socioeconomic changes. (Same as AAAS 160.) LEC.

HIST 177. First Year Seminar: ____. 3 Hours HT GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in history. May not contribute to major requirements in history. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

HIST 190. Warlords and Rebels in Asia. 3 Hours NW / H.
Warlords tear apart society and try to rebuild it according to their own terms. Rebels challenge the status quo. This course provides an introduction to East Asian political, social, and cultural history through a thematic lens. The class offers students a diverse variety of perspectives on social and political change in East Asia and encourages them to reflect on such themes in Western contexts as well. LEC.

HIST 191. Dawn of Japan. 3 Hours H.
Where did the Japanese come from? What connects Japan to other civilizations in Asia? How did people in Japan in the ancient period live and try to understand their place in the universe? What role did women play as rulers and arbiters of culture? This introductory course traces the origins of Japanese civilization from prehistoric times to the twelfth century introducing key political, social, and cultural developments including the arrival of Buddhism, the development of the first cities, and the rise of the imperial court. LEC.

HIST 206. Disasters in Mediterranean Antiquity. 3 Hours H.
This course examines a variety of natural and man-made disasters in the ancient Mediterranean world including floods, volcanic eruptions, earthquakes, famines, plagues, and tsunamis. Emphasis throughout is on exploring the range of impacts, responses, and attempts at recovery documented by ancient sources and proposed by modern scholars. The focus lies on primary evidence, ranging from the Bible to Greece and Rome via Egypt and Mesopotamia. The course aims to familiarize students with several types of catastrophic events that occurred in antiquity in order to gain an understanding of their effects on the environment and on decision making process. In addition to investigating what these disasters entailed, we seek to appreciate how they affected societies in various ways including economically, psychologically, and demographically, and how individuals and governments reacted and responded to these crises. LEC.

HIST 210. Brazil and Africa: Atlantic Encounters. 3 Hours H.
This is a survey course on the history of the relationships between Brazil and Western Africa from the sixteenth century onward. We examine the shape of the Atlantic world, the nature of the Portuguese empire in Brazil and Africa, the presence of Brazilian born agents in Western Africa, the cultural exchanges, the impact of colonial rule, and the responses of indigenous societies to these developments. Among the topics to receive attention are Brazil/Portuguese slave trade; slavery in Western Africa, urban and rural context of African slavery in Brazil; the family and religious life in both sides of the Atlantic; Brazilian communities in the coast of Africa; the abolition of slavery; and the long lasting relationships between Western Africa and Brazil. Students develop familiarity with major historical concepts, themes, and subjects. The course also aims to explore history as process to make sense of the past and the present. (Same as AAAS 210.) LEC.

HIST 215. From Aristotle to Bitcoin: A Global History of Money. 3 Hours H.
What is money? What does it enable, and why do we value it? Is money always the same thing? What are the relationships between money and wealth? Through examining how people across the world and over time used money and answered these questions, this course is an introduction to the global history of money in its myriad forms -- gold coins, silver ingots, bonds, debts, cowry shells, and bricks of tea. It approaches money as a point of entry into themes in political, cultural, intellectual, and social history. As such, it is not a course in economic or business history, but a historical examination of how money has transformed our world. We read and view a wide range of secondary and primary sources, ranging from images of money itself to recent works by anthropologists, historians, and economists. (Same as GIST 215.) LEC.

HIST 220. A Global History of Human Health. 3 Hours H.
This course surveys how human populations have experienced diseases including those induced by infectious microbes, environmental agents, and dietary causes from prehistoric hunter-gatherer societies to today's global population. Particular emphasis is on major transitions and historical events that have had to lead major epidemics. These transitions and events include but are not limited to the transition to agriculture, urbanization, imperial expansion, colonialism, industrialization, world wars, factory farming, and the transportation revolution. The development of medicine, public policies, and global health organizations is a central theme as is the development of global health disparities. Students are challenged to think historically and apply a long-term perspective to understand today's global health problems. LEC.

HIST 250. Study Abroad Topics in: ____. 1-5 Hours H.
This course is designed for the study of special topics in History at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

HIST 300. Modern Africa. 3 Hours NW AE42 / H/W.
A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as AAAS 305.) LEC.

HIST 301. The Historian's Craft. 3 Hours H.
This course introduces students to the practice and methods of the study of history and serves as the gateway to the major. Students learn (1) to think historically; (2) to understand how historians construct and write about the past through narratives, theory and analytical discussion; (3) to critically evaluate historical arguments and the material used to substantiate those arguments, including an introduction to the process of peer review; (4) to develop writing and research skills including the interpretation of primary sources; and (5) to master professional standards of presenting their findings. This course is required of all history majors and is a prerequisite for HIST 696 Seminar in: ____. Prerequisite: Open only to declared History majors or by consent of instructor. LEC.

HIST 302. The Historian's Craft, Honors. 3 Hours H.
This course introduces students to the practice and methods of the study of history and serves as the gateway to the major. Students learn (1) to think historically; (2) to understand how historians construct and write about the past through narratives, theory and analytical discussion; (3) to critically evaluate historical arguments and the material used to substantiate those arguments, including an introduction to the process of peer review; (4) to develop writing and research skills including the interpretation of primary sources; and (5) to master professional standards of presenting their findings. This course, or HIST 301 - its non-honors equivalent, is required of all history majors and is a prerequisite for HIST 696 Seminar in: ____. Prerequisite: Open only to students admitted to the University Honors Program who are declared History majors, or by consent of instructor. LEC.

HIST 303. Sin Cities. 3 Hours H.
This course offers a comparative global introduction to the history of the modern city by looking at the ways in which certain metropolises developed
an attractive underbelly of decadence at the same time as they sought to be centers of refined and orderly cosmopolitan life. The course examines topics such as popular culture, gambling, prostitution, crime, violence, nightlife, tourism, and corruption in the context of the increased social mobility that characterized the beginning of the industrial age and that has extended into the 21st century. Students investigate the changing relation between work and leisure, spectacle and consumerism, and urban space and the struggle for order. LEC.

HIST 304. 1642, 1688, 1776: Three British Revolutions. 3 Hours H.
Explains and analyzes the three revolutions in the English-speaking world which, more than any others, are held to have laid the foundations of modernity. Themes discussed include social, intellectual, and political developments, structures, and conflicts. 1642 and 1688 are treated in the setting of England’s relations with Scotland and Ireland, and against the background of European wars of religion. 1776 is analyzed in a transatlantic context as a civil war within the wider British polity. LEC.

HIST 305. The Scientific Revolution. 3 Hours H.
Describes and analyzes the factors producing a Scientific Revolution in early-modern Europe. Focuses on fundamental changes in astronomy-cosmology, physics, and biology from Copernicus to Newton. Examines the emergence of experimental method as an essential part of Western science. Portrays the development of new forms of scientific organization and the cultural frameworks that bore and shaped them. Surveys the various interpretations of this period expressed by current historians of science. LEC.

HIST 306. Science and Western Culture. 3 Hours H.
Analyzes the institutional, social, technological, and political circumstances of science in the Western tradition. Examines the place of science in pre-modern European settings. Emphasizes the shifting centers of national scientific prominence since the seventeenth century from Italy to Britain to France to Germany to the USA. LEC.

HIST 307. Modern Africa, Honors. 3 Hours NW AE42 / H.
An intensive version of HIST 300. A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as AAAS 307.) Prerequisite: Open only to students admitted to the University Honors Program, or by consent of the instructor. LEC.

HIST 308. Key Themes in Modern Global History. 3 Hours H.
A comparative historical analysis of major global developments from the late 15th century to the present. Some of the themes likely to be explored are empire-building, contact between cultures and colonial social relations; the attraction of cities, their role in a global economy and the shift to an urban world; and the impact of capitalism and industrialization on social organization including conflict between classes and changes in the nature of work. Students learn ways of interpreting primary historical documents and comparing historical investigations across time and space. (Same as GIST 308.) LEC.

HIST 309. History of Chemistry. 3 Hours H.
Birth of modern chemical science from roots in Greek natural philosophy, alchemy, Renaissance medicine, and technology. The Chemical Revolution of Lavoisier and Dalton. Maturity of chemistry in the 19th and 20th centuries, along with an examination of the growth of chemical institutions and the rise of chemical industry. Emphasis on developments from the 18th century to the present. (Same as CHEM 309.) LEC.

HIST 310. American Culture, 1600-1876. 3 Hours H.
An examination of the major historical shifts, trends, and conflicts that have shaped the multicultural nature of life in the United States from the initial European settlements to 1876. In addition to tracing developments in literature, architecture, drama, music, and the visual arts, this course will investigate patterns and changes in the popular, domestic, and material culture of everyday life in America. (Same as AMS 310.) Prerequisite: AMS 100 or AMS 110 or HIST 128. LEC.

HIST 311. Great Lives in Science. 3 Hours H.
This course examines the lives of selected great scientists. Lectures and biographical readings deal with scientists who lived in the period between the seventeenth century and the present. Through comparative biography, the course assesses the theoretical, methodological, institutional, and social development of modern science. LEC.

HIST 312. American Culture, 1877 to the Present. 3 Hours H.
An examination of the major historical shifts, trends, and conflicts that have shaped the multicultural nature of life in the United States from 1877 to the present. In addition to tracing developments in literature, architecture, drama, music and the visual arts, this course investigates patterns and changes in the popular, domestic, and material culture of everyday life in America. (Same as AMS 312.) LEC.

HIST 313. Conspiracies and Paranoia in American History. 3 Hours H.
The theme of conspiracy is a recurring motif in American history. This course uses a case-study method to revisit episodes such as the Salem witch trials, the movement against freemasonry, the Slave Power conspiracy, and more recent obsessions such as UFOs and the assassination of John F. Kennedy to explain why so many Americans have embraced conspiracy theories to explain mysterious events and dramatic social change. The course will rely on primary accounts, fiction, and film, as well as secondary historical literature, to examine both “real” and “imaginary” conspiracies and their effects on the politics, culture, and society of the United States. LEC.

HIST 314. Globalization: History and Theory. 3 Hours H.
Explores the rise of global capitalism in the 19th and 20th centuries, contemporary debates about 21st century globalization, and the role of globalization in our everyday lives. Questions considered include: Is globalization an incremental process that has been going on for centuries, or is it a dramatic new force reshaping the post-Cold War world? Is it a cultural and social process or an economic and political one? Or is it all of these things? Not open to students who have completed HIST 315. (Same as GIST 314.) LEC.

HIST 316. Ministers and Magicians: Black Religions from Slavery to the Present. 3 Hours H.
This course examines the history and diversity of African American religious expression from slavery until the present, emphasizing both mainstream and alternative faiths. It covers the religious world views of enslaved Africans, and examines faiths inside and outside of Christianity. Topics may include: independent black churches, magical practices, the Holiness and Pentecostal movements, black Islam, religious freemasonry, and esoteric faiths. The class emphasizes the influence of gender, class, race, migration, and urbanization on black religion. (Same as AAAS 316 and AMS 316.) LEC.

HIST 317. African American Women: Colonial Era to the Present. 3 Hours AE41 / H.
This interdisciplinary course covers the history of African American women, beginning in West and Central Africa, extending across the Middle Passage into the Americas, and stretching through enslavement and freedom into the 21st century. The readings cover their experiences through secondary and tertiary source materials, as well as autobiographies and letters, plays and music, and poems, novels, and speeches. (Same as AAAS 317, AMS 317, and WGSS 317.) LEC.
HIST 318. Indian Territory. 3 Hours H.
This course examines the cultural, social, economic, environmental, and political history of Indian Territory in what is now the state of Oklahoma. It surveys the diverse geographical regions, tribal cultures, the impact of Indian Removal Act, assimilation, acculturation, westward expansion, the Civil War, boarding schools, the Dawes Act, the Curtis Act, and land runs on Indian Territory residents. The course also treats post-Civil War violence, outlaws, and the role of tribal courts along with controversies over removals, Land Run celebrations, allotment scandals, and Osage oil murders. (Same as HWC 345 and ISP 345.) LEC.

HIST 319. History, Women, and Diversity in the U.S.. 3 Hours AE41 / H.
This survey course explores the history of being female in America through a focus on the ways differences in race, sexuality, ethnicity, class, and life cycle have shaped various aspects of women's lives. Themes to be explored could include, but are not limited to: social and political activism; intellectual developments; family; women's communities; work; sexuality; and culture. LEC.

HIST 320. From Goddesses to Witches: Women in Premodern Europe. 3 Hours HT GE11/GE3H / H.
This course examines the social, cultural, and political contexts of women's spirituality and their relations to gender relations in Europe from about 30,000 B.C.E. to the 16th century Protestant Reformation. Lectures move both chronologically and topically, covering such subjects as goddess-worshipping cultures, women's roles in Christian and Jewish societies, symbols of women, and male attitudes toward women. Students will be able to participate in weekly discussions of primary and secondary source readings about women. (Same as WGSS 320.) LEC.

HIST 321. From Mystics to Feminists: Women's History in Europe 1600 to the Present. 3 Hours HT AE42/GE11/GE3H / H.
This survey of women's history in Europe looks at changing patterns of women's economic roles and family structures in preindustrial and industrial society, the importance of women in religious life, cultural assumptions underlying gender roles, and the relationship of women to political movements, including the rise of feminism. (Same as WGSS 321.) LEC.

HIST 324. History of Women and the Body. 3 Hours H.
This course examines different notions about women and their bodies from a historical perspective. It discusses the arguments and circumstances that have shaped women's lives in relation to their bodies, and women's responses to those arguments and circumstances. This course covers a wide geographical and chronological spectrum, from Ancient societies to the present, from Latin America and the Middle East, to North America and Western Europe. (Same as WGSS 324.) LEC.

HIST 325. The Spanish Inquisition. 3 Hours AE42 / H.
A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as JWSH 315 and SPAN 302.) LEC.

HIST 326. Native American Civilizations and their European Conquerors. 3 Hours NW AE42/GE11/GE3H / H/W.
The societies, economies, and cultures of Native American peoples in Brazil, Peru, Mexico, and the Southwestern United States will provide the main focus of this course to understand the culture and values of those who preceded the Europeans in the Americas. European culture is also examined, including the motivations for exploration and conquest. The details of the particular conquests and how they affected the resulting composite society will also be discussed, using contemporary eye-witness accounts, films recreating the action, and modern accounts. LEC.

HIST 327. The Premodern Middle East. 3 Hours NW AE42 / H.
A survey of the history of the Middle East from the origins of Islam in the seventh century to the rise and consolidation of the Ottoman Empire in the eighteenth century. Lectures and discussions focus on diversity within the Middle East at the height of the Islamic empires. Topics include the life of Muhammad and early Islamic communities, expansion of Islam into Asia, Africa and Europe, intellectual strength in the medieval period, and the everyday lives of women, Christians, Jews and other minority groups. LEC.

HIST 328. The Modern Middle East. 3 Hours NW AE42 / H.
A survey of the history of the Middle East from 1800 to the present. Lectures and discussions focus on diversity within the Middle East over two centuries of major political and cultural change. Topics include causes for the decline of the Ottoman Empire, debates over modernization, European imperialism and the formation of nation-states, twentieth century cultural revolutions and women's activism, the Arab-Israeli conflict, and the revival of Islamic social movements. LEC.

HIST 329. History of War and Peace. 3 Hours HL / H.
A study of the changing nature of warfare and the struggle to bring about peace. Topics include pacifism, the "military revolution" that created the first professional armies; the development of diplomatic immunity, truces, and international law; the peace settlements of Westphalia, Utrecht, Vienna, Versailles, and San Francisco; the creation of peace movements and peace prizes; the evolution of total war, civil war and guerrilla warfare involving civilians in the twentieth century; the history of the League of Nations and United Nations; and the rise of intergovernmental and non-governmental organizations. (Same as EURS 329 and PCS 329.) LEC.

HIST 330. Revolt and Revolution in Early Modern Europe. 3 Hours H.
A study of forces giving rise to riots, rebellions, and revolution in Western Europe from 1600-1790. The course will examine social and ideological aspects of famine, religious persecution, taxation, war, landlord-peasant relations, and the increasing power of kings. LEC.

HIST 331. Atlantic Societies, 1450-1800: A Comparative History of European Colonization. 3 Hours GE3H / H.
This course offers a comparative history of the European (Portuguese, Spanish, French, English, and Dutch) colonization of the Americas. It examines the interaction among peoples and cultures across the Atlantic, from the age of European exploration to the start of the independence movements in the Americas. Themes that will receive special attention include: comparing patterns of colonization, the forging of American societies of European, Native American, and African cultures, the slave trade, and the history of sugar production. LEC.

HIST 333. Eurometro: Visions of the European Metropolis, 1849-1939. 3 Hours H.
This course investigates the interrelated symbols of the European metropolis during the "Age of Great Cities", from the filth of the sewers to the "filthiness" of prostitution. Students investigate gender and class in the metropolis by exploring a few stereotypes: the juvenile delinquent, the woman on the street, and the flaneur. The course format stresses discussion of common texts, including short readings of literature from the period and historical scholarship. Students also analyze contemporary photographs, art, architecture, and advertising. LEC.

HIST 334. The Great War: The History of World War I. 3 Hours H.
A historical survey of the causes, course, and consequences of the conflict, 1878-1919, stressing its socio-economic dimensions as well as its political ramifications and military aspects. Considerable use will be made of visual aids. No prerequisites. LEC.
HIST 335. History of Jewish Women. 3 Hours H.
This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women's gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women's lives in both Jewish and non-Jewish society. (Same as JWSH 335, WGSS 335.) LEC.

HIST 336. Ethics, Ideas, and Nature. 3 Hours AE51 / H.
This course examines the ethical frameworks developed for thinking about, using, and protecting the natural world. Examples of topics include indigenous approaches to nature, the history of ecological ideas, environmental movements, the role of the state of managing resources, utilitarianism and progressivism, environmental lawmaking, wilderness advocacy, nature and theology, the rights of nature, and environmental justice. Students are introduced to the theories of duty ethics, justice ethics, utilitarianism, and right ethics, and required to apply ethical decision making to contemporary and historical environmental issues. Multiple perspectives on the history of human interactions with nature demonstrate the importance of reflecting upon the value systems inherent in human-centered environmental ethics and nature-centered environmental ethics. (Same as EVRN 336.) LEC.

HIST 337. History, Ethics, Modernity. 3 Hours AE51 / H.
This course will examine the question "How has human dignity been preserved or violated in the modern age?" Cast in a global framework, some of the probable themes are the history of human rights; the moral universe of genocide; the (in)divinity of industrial work; the shifting status of the poor and the colonized and their treatment by the state and society; the impact of changing technology on ethics in war, peace, and the environment; and the violation of dignity as a factor in collective resistance. LEC.

HIST 338. African American Urban Community and Class in the Midwest. 3 Hours H.
This course provides historical perspective on African Americans and the politics of economic class within black urban spaces from the end of Reconstruction to the post-World War II era. It focuses on the development of an upwardly mobile urban black middle class, and impoverished black urban "underclass," since the 1960s. Students are encouraged to have taken one of three courses: AAAS 104, AAAS 106, or AAAS 306. (Same as AAAS 328.) LEC.

HIST 340. The History of the Second World War. 3 Hours H.
A survey of the origins, course, and consequences of the war, 1930-1945. Political, economic, military, and social aspects will be dealt with in the context of their global effects. Extensive use will be made of motion pictures and other media. LEC.

HIST 341. Hitler and Nazi Germany. 3 Hours H/W.
An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism in Germany and how Nazism led to the Second World War and the Holocaust. (Same as JWSH 341.) LEC.

HIST 343. The Holocaust in History. 3 Hours H.
The systematic murder of the Jews of Europe by the Nazis during World War II is one of the most important events of modern history. This course studies the Holocaust by asking about its place in history. It compares other attempted genocides with the Holocaust and examines why most historians argue that it is unique. Other topics covered include the reasons the Holocaust occurred in Europe when it did, the changing role of anti-Semitism, and the effects of the Holocaust on civilization. The course also discusses why some people have sought to deny the Holocaust. The course concludes by discussing the questions people have raised about the Holocaust and such issues as support for democracy, the belief in progress, the role of science, and the search for human values which are common to all societies. (Same as JWSH 343.) LEC.

HIST 344. Modern Jewish History. 3 Hours H.
This course explores the complex of interactions between Jews, Judaism, and modernity by examining the challenges to Jewish life and thought, community and culture, self-understanding and survival, from the early modern period to the present day. Through the lenses of religious, cultural, intellectual, and political expression, the course examines the social, economic, and demographic changes in Jewish communities in Western, Central and Eastern Europe, the United States, and Israel along with the impact of antisemitism and the Holocaust. (Same as JWSH 344.) LEC.

HIST 345. Hard Times: The Depression Years in America, 1929-1941. 3 Hours H.
An analysis of the experiences of the American people during the Great Depression. Attention will also be given to the global dimensions of the crisis, socioeconomic dislocation, cultural and institutional change, and the impact of the Asian and European wars. LEC.

HIST 346. Law and Society in America. 3 Hours H.
Law and lawyers have powerfully shaped American values and institutions. This course explores law's impact on American society from the age of European colonization through present. Topics include liberty, public order, race and ethnicity, the family, property, speech, environment, and self-government. The course also examines the changing images of lawyers and the law over time. Course materials include not just statutes and court decisions, but literature, imagery, and popular culture materials. LEC.

HIST 347. Environmental History of North America. 3 Hours H.
A survey of changes in the landscape and in people's perceptions of the natural world from 1500 to present. Topics include agroecology, water and energy, the impact of capitalism, industrialism, urbanization, and such technologies as the automobile, and the origins of conservation. (Same as EVRN 347.) LEC.

HIST 348. History of the Peoples of Kansas. 3 Hours H.
A survey of culture and society in Kansas from prehistory to the present. Topics include Native American life, Euro-American resettlement, Bleeding Kansas and the Civil War, agricultural settlement, urbanization and industrialization, depression and recovery, and modern Kansas in transition. Emphasis in the course will be on social and economic conditions, the experience of ethnic and racial groups, inter-racial relations, and the role of women. LEC.

HIST 350. The Korean War, 1950-1953. 3 Hours H.
An examination of the origins, pattern of development, and legacy of this still unsettled conflict, which in many ways set the tone for the entire post-1945 era of the Cold War. Points of emphasis will include the motives and policies of the major participants (Koreans, Americans, Chinese, and Soviets), as well as the effects of the war on their domestic politics and foreign policy positions. LEC.

HIST 351. American Indian and White Relations to 1865. 3 Hours H.
This course provides an intensive survey of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HWC 348, ISP 348.) LEC.

HIST 352. American Indians Since 1865. 3 Hours AE41 / H.
This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education,
intermarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will multiplex perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HWC 350 and ISP 350.) LEC.

HIST 353. Indigenous Peoples of North America. 3 Hours NW AE41 / H/W.
This course surveys the history of the first peoples to inhabit North America from prehistory to present. Commonly and collectively referred to as American Indians, indigenous peoples include a diverse array of nations, chiefdoms, confederacies, tribes, and bands, each of which has its own unique cultures, economies, and experiences in dealing with colonial and neocolonial powers. This class seeks to demonstrate this diversity while at the same time providing an understanding of the common struggle for political and cultural sovereignty that all indigenous nations face. Indigenous nations that have developed a relationship with the United States will receive primary focus, but comparative reference will be made to First Nations of Canada. LEC.

HIST 354. Spanish Borderlands in North America. 3 Hours AE51 / H.
The Northern frontier provinces of the Viceroyalty of New Spain from their exploration and occupation by Spain until their absorption by the United States. LEC.

HIST 355. U.S. Borderlands Since 1848. 3 Hours H.
This course discusses issues associated with the Mexican borderlands region after conquest and acquisition by the United States. Themes include race relations, immigration, labor, economics, politics, culture, and the environment. We discuss how the region was incorporated into the United States, and how this relationship is evolving. We also examine the notion of a borderlands region and whether or not this is a valid characterization for Kansas. LEC.

HIST 358. The Vietnam War. 3 Hours H.
This course is a survey of the Vietnam War. It covers the early days of Cold War, 1945-54, and all phases of the Vietnam War: the advisory phase (1955-64); the Americanization phase (1965-68); the Vietnamization Phase (1969-73); and the final phase, the Vietnam Civil War, 1972-75. This course covers the causes, course, conduct, and consequences of the war and in so doing provides a political, military, and social history of the war. LEC.

HIST 359. The Black Experience in the U.S. Since Emancipation. 3 Hours H.
An interdisciplinary study of the history and culture of Black people in American from Reconstruction to the present. Topics covered include an analysis of Reconstruction, Black leaders, organizations and movements, the Harlem Renaissance, migration, and race relations. Demographic variables covered include socio-economic class, education, political persuasion, and influence by avant-garde culture changes. (Same as AAAS 306.) LEC.

HIST 360. Science and Religion. 3 Hours H.
The interaction and significant confrontations between science and religion will be considered together with the religious responses to science and technology. LEC.

HIST 361. Youth, Sex, and Romance in Post-WWII United States. 3 Hours H.
Most people don’t think of sex and romance as having a history. And youth seems just a natural stage of life. But the nature of “courtship,” the definitions of sex, and the meaning of “youth” have changed dramatically over time, and people struggle over those definitions right up to the current day. In this class we try to make historical sense of those struggles by focusing on a volatile and complicated period in America’s history: the years from World War II through the recent past. LEC.

HIST 362. The American Way of War Since World War II. 3 Hours H.
This course is a survey of American Military History from World War II to current military operations. It covers the Cold War, the Korean War, the Vietnam War, both Persian Gulf wars, the global war on terrorism, and the war in Afghanistan. The course examines the causes, course, conduct, and consequences of the wars and covers advances in technology and doctrine, civil-military relations, foreign policy, and inter-service rivalry, providing a political, military, and cultural history of the wars. LEC.

HIST 365. Invention of the Tropics. 3 Hours H.
This course surveys the history of the tropical environment and its peoples from Europe’s first encounter to today’s ecotourism boom. It focuses on portrayals of the tropics in historical travel accounts and films. Through these sources, we seek to understand how science, technology, and tourism have been used, in turn, as instruments of progress and destruction, tools of empire and national liberation. Case studies are drawn from Latin America, Africa, Oceania, and Asia. LEC.

HIST 366. Old Regime and Revolution in France, 1648-1799. 3 Hours H.
This course explores the political, social and cultural system of early modern France. It culminates with study of the collapse of monarchy and establishment of republican government during the French Revolution. LEC.

HIST 367. Magic and Superstition in European History. 3 Hours AE42 / H.
This course traces the changing role and understanding of magic in European culture, religion, politics and science from the late Middle Ages through the early 20th century. Topics may include alchemy, miracles, magical healing, witchcraft, monsters and demonic possession. LEC.

HIST 368. A History of Afro-Latin America. 3 Hours GE3H / H.
This course examines the history of Africans and their descendants in Latin America. In this region, Africans could be found serving as militia commanders, laboring as skilled tradesmen, running their own businesses, working as household servants, and toiling on plantations. Students will study the varied experiences of these men and women across colonial and national boundaries. Topics include: acculturation/ Creolization, manumission, family formation, social networks, economic roles, political mobilization, and interaction with indigenous peoples. LEC.

HIST 369. Colonialism and Revolution in the Third World, Honors. 3 Hours NW AE42 / H.
This course will study the structure and dynamics of colonialism and neocolonialism in the third world beginning in the 19th Century and continuing to the 1980s. It will also examine responses to these systems, from small-scale resistance to nationalist revolutions. Attention will be given to the relationship between ideology and collective behavior. Case studies will be drawn from Africa, Asia, and Latin America. Prerequisite: Membership in the University Honors Program or permission of instructor. LEC.

HIST 370. Violence and Conflict in Latin American History. 3 Hours H.
This course treats the history of Latin America since the European conquest through the prism of violence and social conflict. It traces the roots of the region’s social collapse during the twentieth century to political and cultural factors in the colonial and early national periods. Using films and literature in addition to historical texts, the course discusses the sources of nationalism, civil wars, banditry, urbanization, violent dissent,
military dictatorships, human rights abuses and guerrilla insurgencies as well as the political uses of violence made by different social groups. LEC.

HIST 371. The Cultural History of Modern Latin America. 3 Hours H.
This course explores themes such as the evolution of national identities, the conflict between the city and the countryside, exile, the surrealist imagination and the cultural resistance against foreign influences through an examination of the literature, film, art, music, religions and popular and material culture of 19th and 20th century Latin America. LEC.

HIST 372. Violence and Conflict in Latin American History, Honors. 3 Hours H/W.
This course treats the history of Latin America since the European conquest through the prism of violence and social conflict. It traces the roots of the region's social collapse during the 20th century to political and cultural factors in the colonial and early national periods. Using films and literature in addition to historical texts, the course discusses the sources of nationalism, civil wars, banditry, urbanization, violent dissent, military dictatorships, human rights abuses, and guerrilla insurgencies as well as the political uses of violence made by different social groups. Not open to students who have taken HIST 370. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HIST 373. The Supreme Court and Religious Issues in the United States. 3 Hours H.
Historical study of the interpretation of the religion clauses of the First Amendment with special reference to the questions of establishment, the free exercise of religion, freedom of religious belief, worship, and action, and religion and the public schools. Not open to freshmen. (Same as REL 373.) LEC.

HIST 375. The Supreme Court and Religious Issues in the United States, Honors. 3 Hours H.
Historical study of the interpretation of the religion clauses of the First Amendment with special reference to the questions of establishment, the free exercise of religion, freedom of religious belief, worship, and action, and religion and the public schools. Open only to students in the University Honors Program or by permission of the instructor. (Same as REL 375.) LEC.

HIST 376. Immigrants, Refugees, Diasporas. 3 Hours H.
This course looks at people who choose to cross political borders, are forced to flee beyond them, or constitute ethnic minorities living outside a homeland. Examining these groups from a global historical perspective, it explores how ethical debates about the rights of non-citizens and ethnic outsiders have evolved in the modern age. Students learn about important issues that have affected the lives of immigrants, refugees, and diasporas, including citizenship, mobility, cultural representation, asylum policies, and the concept of human rights. The course concludes with a look at contemporary manifestations of these issues, from debates over the place of Muslims in Europe to discussions about immigration policy in the United States. (Same as GIST 376.) LEC.

HIST 377. Everyday Communism in Eastern Europe. 3 Hours H.
This course investigates through film, literature, memoirs, photography, architecture, and scholarship the experience of ordinary citizens under Soviet-style communism in Eastern Europe. We study the ways people supported, resisted, opposed, and merely got by under state socialism from the late 1940s to the collapse of Communism in 1989. LEC.

HIST 378. Beyond the Iron Curtain: Soviet Perspectives on the Cold War. 3 Hours AE42 / H.
This course reimagines the Cold War through Soviet eyes, challenging assumptions and offering less familiar perspectives on a global conflict. Analyzing Soviet and American mass media, popular culture, declassified documents, and personal stories, students investigate the following: Who started the Cold War, and who won it? Was it a time of relative peace or paranoia? How did the two sides view each other and did espionage help them know each other better? How did people and culture sometimes cross the iron curtain? What were the Soviets doing in places like Latin America and the Middle East? And why were both sides so concerned with Olympic athletes, ballet defectors, and cosmonauts? LEC.

HIST 379. Europe in Crisis: Empire, Extremism, and War, 1890-1945. 3 Hours H.
This course examines the sense of crisis that defined European life in the first half of the twentieth century, an era defined by economic spasms, cultural revolts, extreme political ideologies, and two massively destructive world wars. We will examine the period between 1890 and 1945 as a violent, at times apocalyptic, clash between three competing ideologies - communism, fascism, and liberal democracy -demonstrating how extremism both fed upon and created a sense of crisis. LEC.

HIST 380. Revolutionary Europe: The People in Arms. 3 Hours H/W.
A survey of the political, social, economic and cultural transformation of Europe in a century of turmoil, from the Old Regime through the liberal and national revolts of 1848, the Paris Commune and the Russian Revolution. LEC.

HIST 385. Themes in British History. 3 Hours H.
For students enrolled in the annual summer Study Abroad program. This course examines some of the main events and trends in British history, from the earliest times to recent British history. The specific historical themes investigated will depend upon the instructor. The course can be taken only via enrollment in the KU British Summer Institute in the Humanities. Prerequisite: Approval for enrollment in the Summer Institute through the Study Abroad office. LEC.

HIST 390. Topics in: _____. 3 Hours H.
A study of a specialized theme or topic in History. May be repeated for credit when topic varies. LEC.

HIST 391. Topics in (Honors): _____. 3 Hours H.
A study of a specialized theme or topic in History. May be repeated for credit when topic varies. Open only to students admitted to the University Honors Program. Prerequisite: Permission of instructor. LEC.

HIST 392. Huns, Turks, and Mongols: The Nomad Factor in Asian History. 3 Hours NW / H/W.
This course introduces the history of major nomadic powers in Eurasian Steppe and their impact in the world from the first Millennium BCE to around 1500 AD. The main topics include the culture of the Scythians, the Hun and Xiongnu confederacy, the Mongol conquest, and the Turkish empires in Central and West Asia. It investigates the natural and human forces that shape the identities of the nomads and their changing images in history. LEC.

HIST 393. The Silk Road. 3 Hours H.
A comprehensive introduction to the cultural influence and material exchange among major civilizations along the Silk Road. It covers the period of more than one thousand years between the 2nd and the 15th centuries CE, during which time forces wielded by the Persians, the Chinese, the Indians, the Tibetans and the Mongols shaped the geopolitical landscape of the vast region that spreads from the Caspian Sea to the Gobi Desert. Students explore the role of the Silk Road in the formation of the religious and ethnic identities of these civilizations, as well as their perceptions towards one another. Along with textual materials, the course uses extensive visual and musical materials to present interesting phenomena, such as Sogdian burial practice, Arab accounts of Tang China, Nestorian Christianity at the Mongol court, and Marco Polo's journey to the East. The course begins and concludes with discussion of
the contemporary significance of the Silk Road as a historical category. LEC.

HIST 394. Made in China: Chinese Business History. 3 Hours AE42 / H.
This course examines the development of business culture in China since 1900. Looking particularly at how it has transformed and adapted in response to China's own changing political environment as well as China's changing engagement with the West and Japan. We examine cases of western businesses in China and Chinese businesses in both China and the West. Topics include the rise of industrialism, the role of foreign investment, China's role in the global market place, the relationship between business and the state, state-run enterprises, factory life, entrepreneurialism, advertising, consumerism, and economic nationalism. LEC.

HIST 395. History of Sushi. 3 Hours AE42 / H.
Sushi, now served at Midwestern supermarkets and university cafeterias, reveals the transformation of an ancient Japanese dish into a global phenomenon. This course takes familiar Japanese dishes like sushi and ramen as starting points to ask how food accrues or sheds national characteristics in an age of globalization. To learn the origin of sushi and ramen, the class traces the evolution of the diet in the context of the development of Japanese civilization. Using the methodology of food history, course assignments include short research papers on Japanese foodstuffs; analyses of primary sources from statistics to comic books to movies; and short essays drawing from participant observation of Japanese foods now available locally. LEC.

HIST 397. From Mao to Now: China's Red Revolution. 3 Hours NW AE42/GE11 / H.
This course on China's Communist revolution considers the evolution of Maoism, or Chinese Communism, from its ideological origins through its implementation during and after the Chinese Communist revolution. It examines major Maoist movements such as Land Reform, the Great Leap Forward, the Cultural Revolution, and the cult of Mao. It further considers the globalization of Maoism by examining examples of other Maoist revolutions and revolutionaries in places like Cambodia, Peru, and Nepal. LEC.

HIST 398. Introduction to History of Japan: Anime to Zen. 3 Hours NW / H/W.
This course provides a foundation for study of Japanese history. It combines lectures on the scope of Japanese history over the past 2,000 years with discussions of topics key to the development of Japanese civilization such as religion and literature. We analyze how different media, such as film, Japanese animation (anime), and art can be used as historical sources, and how these shape our understanding of Japan. Students hone their ability to analyze both thematic and historical questions through writing assignments and discussions. LEC.

HIST 399. The Samurai. 3 Hours NW AE42/GE11 / H/W.
Japan's warrior class, the samurai, dominated politics and society for more than half of Japan's recorded history. This course traces the history of the samurai from their origins to the dissolution of their class in 1877, examining their military role, philosophy, and cultural contributions. It also considers continued references to the "spirit of the samurai" in the twentieth century. LEC.

HIST 401. Case Studies in: ______. 2-3 Hours H.
Examination of a limited aspect of a general subject; other aspects of the same subject may be offered other semesters. LEC.

HIST 402. Roman Military History. 3 Hours H.
The Defense of the Roman Frontiers. This course emphasizes the development of the frontiers of the Roman empire from Caesar to the late second century. It includes the origins of the Germans and their society, the Celtic background, and the relationship between the emperor and the army. LEC.

HIST 404. Technology: Its Past and Its Future. 3 Hours H.
An examination of the role of technology and its influence on society. The historical development of technology will be traced up to modern times with an emphasis on its relations to the humanities. Attention will be given to the future of different branches of technology and alternative programs for their implementation. (Same as ENGR 304.) LEC.

HIST 407. History of Science in the United States. 3 Hours H.
Traces the evolution of a scientific tradition in American culture. Examines the growth of scientific ideas and institutions under European and indigenous influences. Studies the interactions of science with technological, theological, political, and socio-economic developments. LEC.

HIST 410. The American Revolution. 3 Hours AE41 / H.
This course will focus on the meaning the American Revolution had for different groups of Americans. Particular emphasis will be on the relationship between ideology and experience, and the impact of the Revolution on such groups as women, slaves, Indians, African-Americans, the poor, merchants, and loyalists. LEC.

HIST 411. The New Republic: U.S. History 1787-1848. 3 Hours H.
This course traces the history of the United States from the debates over the ratification of the Constitution until 1848. Major topics include the republican experiment, the Market Revolution, the Age of Jackson, religious revivals and reform, slavery and the cotton kingdom, the Manifest Destiny. Historians view the period as vital to understanding the development of the society, economy, culture, and politics of the modern United States. LEC.

HIST 412. The Civil War in America, 1828-1877. 3 Hours H.
The United States from the rise of sectional conflict through the disintegration and reunification of the Union. LEC.

HIST 413. The Rise of Industrial America, 1877-1920. 3 Hours H.
The political, economic, social, and intellectual development of the United States from 1877 to 1920. LEC.

HIST 414. Gone with the Wind. 3 Hours H.
For four years, another country occupied part of what we now think of as the United States. The Confederate States of America was a short-lived experiment founded on the cornerstone of slavery that advocated small government, states' rights, agriculture, and patriarchy. Even before the Confederacy collapsed, though, none of those ideals was working out well in real life. Why, then, do so many Americans have such a hallowed view of the Confederate experience? This class discusses some military matters but focuses primarily on the homefront. LEC.

HIST 420. Dante's Comedy. 3 Hours H.
The complete Divine Comedy will be read in English translation, with equal stress on each of its three parts: the Inferno, the Purgatory, and the Paradise. No prerequisite. (Same as HWC 410.) LEC.

HIST 421. Economic and Social History of Later Medieval Europe, 1000-1500. 3 Hours H.
An introductory study of European economic and social history from the Tenth Century Crisis to the 1490s. This course investigates the causes of economic development and the interactions among market, nonmarket, and social institutions such as the family. Topics covered include trade, labor, technologies, consumerism, social unrest and the rise of social and economic thought. LEC.
HIST 424. Venice and Florence in the Renaissance. 3 Hours H.
Comparative urban study of Florence and Venice from the thirteenth through the sixteenth centuries. Principal subjects are the distinctive economies of the city-states, political developments, Renaissance humanism, patronage of the arts, family life, and foreign policy. LEC.

HIST 425. History of the Mediterranean World, 1099-1571. 3 Hours H.
This course examines Mediterranean civilizations from the First Crusade to the Battle of Lepanto. Topics include the commercial revolution, medieval colonization, the Byzantine and Ottoman states, shipping and navigation, and the Atlantic. Equal coverage of the eastern and western Mediterranean. LEC.

HIST 440. War and United States Society. 3 Hours H.
A survey of the American experience in military conflict, both foreign and domestic, from the colonial period to the present. In addition to the strategic and tactical aspects of war, the course will treat the political, economic, and social effects in their national and global contexts. Extensive use will be made of audio-visual materials. LEC.

HIST 444. Frozen in Time: Politics and Culture in the Cold War, 1945-75. 3 Hours H.
This course deals with the interactions between Cold War culture and domestic and international politics chiefly from the American and to some degree comparative perspective. It focuses on the period 1945-1975, and makes use of films, television, music, works of science fiction and related genres, and other cultural manifestations to examine such themes as programs of domestic and international repression, consensus politics, cultural imperialism, gender roles, and class, status, and racial dynamics in the context of what was perceived as bipolar rivalry. LEC.

HIST 450. Study Abroad Topics in: ____. 1.5-5 Hours H.
This course is designed for the study of special topics in History at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

HIST 451. Suburbia. 1.5 Hour H.
A history of the growth of suburban enclaves, from their emergence during the electric streetcar era to their dominance in the late 20th century. This short course features the analysis of class dynamics, racial exclusions, commuting, social conformity and the alienation of the young within a U.S. context, but some attention is given to comparisons with other parts of the world. LEC.

HIST 452. Chicago. 1.5 Hour H.
A history of the Midwestern metropolis from its origins as a swamp to an industrial port city. Topics covered in this short course may include the meat-packing industry, political corruption and reform, immigration and migration, the rise and demise of neighborhoods, transportation systems, working-class social movements, modern architecture and urban popular culture. LEC.

HIST 453. Anarchism: A Global History. 1.5 Hour H.
This short course examines the key theorists and organizers of the anarchist movement, beginning with its emergence in the 19th century and extending into its reappearance in the 21st century. It traces developments in Europe, South America, Asia and the United States. Topics may include the Paris Commune, credit unions, propaganda by the deed, wage slavery, resistance to authority, and the general strike. LEC.

HIST 454. Work. 1.5 Hour H.
This short course traces the evolution of work from pre-industrial times to the computerized workplace. Issues such as the meaning of work, dignity and respect, time efficiency and exploitation, unionization and strikes, workplace democracy, collectives and worker-owned businesses, laziness as a form of resistance to authority, leisure, the culture of commuting, and hierarchy and status are explored. The evolution of work in non-U.S. societies is analyzed comparatively. LEC.

HIST 455. Havana. 1.5 Hour H.
This short course examines the history of the Cuban port city from the era of Spanish colonialism to the "special period" of shortages and deprivations during the 1990s. Topics covered may include popular culture, Caribbean pirates, cigar factories and labor, urban slavery, Chinatown, social revolution, restructuring of urban public space, suburban expansion, modernist architecture, tourism, gambling and vice, historical preservation and the changing conditions of streetlife. LEC.

HIST 460. Topics in: ____. 1.5 Hour H.
An eight-week course devoted to a specific historical topic. May be repeated for credit as topics change. LEC.

HIST 461. The Asia-Pacific War, 1937-1945. 3 Hours H.
This course introduces students to the Asia-Pacific War, which began with the outbreak of fighting between Japan and China in July 1937 and ended with the unconditional surrender of the Japanese Empire to Allied forces in August 1945. The course revolves around three themes, which are explored through lecture, discussion, and extensive use of film and visual materials: the geopolitical and colonial origins of the conflict; the concept of total war and the political and social transformations it unleashed on all belligerent nations; and the ideologies on the home front justifying the mass slaughter of soldiers and civilians. There is also discussion about how people in Japan, the United States, China, Korea, and other countries remember the war in the postwar period. LEC.

HIST 470. Popular Culture in Latin America and Africa. 3 Hours NW / H.
This course offers a comparative assessment of the origins and practice of various forms of popular culture in the 20th Century in these two regions. Theories that explain the links between modernism and popular culture are discussed. Topics investigated may include the impact of spectacle on the urban environment, the legacies of colonialism in the sphere of culture, and the intersection of public space and popular culture. Forms such as music, cinema, street theater, and sports are explored. LEC.

HIST 471. Social History of South America. 3 Hours H/W.
The various republics of South America have experienced radical social change since the late 19th century. Compressed industrialization has propelled the accelerated growth of global megacities, mass immigration from Europe and Asia, and the rise of populist and socialist politics that address the needs of the working class. This course follows a thematic approach by examining collective violence, endemic poverty, shifting gender relations, labor conflict, public health, revolutionary movements, and dictatorships. LEC.

HIST 480. Travelers’ Tales of the Middle East. 3 Hours H.
This reading-intensive seminar examines the multiple visions of "the Orient" that appeared in the letters, memoirs, and novels of Western travelers to the Middle East in the nineteenth and twentieth centuries. We examine the rise of tourism and travel-writing within the Middle East and their links to European imperialism. Working closely with primary source documents, we question what these highly personal and often misinformed types of writing can tell us about the politics and culture of everyday life in the Middle East. LEC.

HIST 481. From Harem to the Streets: Gender in the Middle East, 1900-Present. 3 Hours H.
This reading-intensive seminar examines shifts in gender roles and expectations in the Middle East during the twentieth and twenty-first centuries. The course begins with the importance of harem within Middle Eastern society, and traces Middle Eastern women's increasingly public
presence in national movements, feminist activism, and peace protests as well as the impact of Western standards of marriage, child-rearing, beauty, and sexuality on gender roles. The course uses primary and secondary sources to analyze how gender identity is informed by religion and culture and grounded in specific historical moments. LEC.

HIST 490. Honors Course in History. 1-3 Hours AE61 / H.
May be taken more than once; total credit not to exceed six hours. Prerequisite: Approval of the Coordinator of the Honors Program of the Department of History. IND.

HIST 492. Readings in History. 1-4 Hours AE61 / H.
Investigation of a subject selected by the student with the advice and direction of an instructor. Individual reports and conferences. Two (2) Readings in History courses may be applied to the major and no more than one (1) may be applied to the minor. Prerequisite: Ten hours of college history including at least two upper-class courses and a "B" average in history. Consent of instructor. IND.

HIST 493. History Research Internship. 1-3 Hours H.
The course allows students to work with a faculty mentor and learn firsthand the tasks that historians undertake to research and present their findings. Potential student assignments include database entry and retrieval, translation, fact checking, and compiling sources. Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level history course; declared major in history; and permission of the instructor. INT.

HIST 494. Service Learning in History. 1-3 Hours AE61 / H.
This course is designed to give students the opportunity to apply historical knowledge and ideas gained through course work to real-life situations in volunteer service agencies and community centers. Open to History majors and others with significant History backgrounds. Permission of instructor is required. LEC.

HIST 498. Undergraduate History Honors Seminar. 3 Hours AE61 / H.
Required for students in the History major honors program, normally in the second semester of their honors projects. Prerequisite: Approval of the Coordinator of the Honors Program of the Department of History. Another seminar experience may be substituted, with the approval of the Honors Coordinator. LEC.

HIST 500. History of the Book. 3 Hours H.
Brief history of writing materials and handwritten books; history of printed books from the 15th century as part of cultural history; technical progress and aesthetic change. Offered every second year. (Same as ENGL 520.) LEC.

HIST 502. Development of Ancient Greece, ca. 1000-300 B.C.. 3 Hours H/W.
Emphasis on the ancient sources and texts, developments in political institutions and society, the changing definitions of personal, cultural, and national identities, and the cultural tensions between Greece and the cultures to the west and east, especially Italy and Persia. No knowledge of the ancient languages is required. (Same as CLSX 502.) LEC.

HIST 503. The Ancient History of the Near East. 3 Hours H.
History of the rise of civilizations in the ancient Near East from the earliest time to the Muslim conquest of the early seventh century, including the areas of Mesopotamia, Egypt, Syria, Palestine and Asia Minor. An archaeological approach is used in focusing attention on the cultural phenomena and achievements of the peoples of these areas, including the Babylonians, Assyrians, Persians, ancient Israelites, Greeks and Romans. LEC.

HIST 506. Roman Republic. 3 Hours H.
An investigation of the history of Rome from its origins to the end of the Republic in 31 B.C.E., emphasizing political, social and economic aspects of the development of Rome from a minor city to a world power. LEC.

HIST 507. Early Roman Empire. 3 Hours H.
A political, social, and economic investigation of the early Roman Empire from Augustus to Diocletian emphasizing how Rome held together a world-empire until economic and military problems forced a complete reorganization of the imperial system. LEC.

HIST 508. Late Roman Empire (284-527). 3 Hours H.
An investigation and analysis of the later Roman Empire from Diocletian to Justinian, emphasizing the Christianization of the empire, its division into Western and Eastern/Byzantine Empires, and the barbarian invasions. LEC.

HIST 509. Multinational Corporations: The Role of Money and Power. 3 Hours H.
This course explores the origins, historical evolution, and global expansion of multinational corporations since the 1880s. Particular attention is devoted to U.S.-directed multinational businesses with both market-oriented and supply-oriented direct investments abroad and the competitive advantages gained by American capital, management, and marketing expertise vis-a-vis foreign firms operating in Canada, Europe, Asia, Latin America, and Africa. An objective of the course is to assist the student of international business in understanding, analyzing, and addressing various complex, interrelated and interdependent trends and issues in the world community that have had a critical impact on business performance in the international marketplace. LEC.

HIST 510. Topics in: ______. 2-3 Hours H.
A study of a specialized theme or topic in History. May be repeated for credit when topic varies. LEC.

HIST 511. Foodways: Native North America. 3 Hours H.
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate, and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HWC 551 and ISP 551.) Prerequisite: Upper division course on indigenous / American Indian history, or permission of the instructor. LEC.

HIST 512. Foodways: Latin American. 3 Hours H.
This course explores the traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HWC 552 , ISP 552, and LAA 552.) Prerequisite: Upper division course on Latin America, or permission of the instructor. LEC.

HIST 513. Early Medieval Culture. 3 Hours H/W.
The formation of a new civilization in Western Europe between the decline of the Roman Empire and the First Crusade is the central stress in this topical study of the institutions and ideas characteristic of the Latin West, 300-1100. LEC.
HIST 515. The Crusades in Cross-Cultural Perspective. 3 Hours H.
This course examines the development and evolution of the crusade as well as the history of the crusading movement from the 11th to the 15th centuries. Through an analysis of documents from Christian, Jewish, and Muslim perspectives, this course aims to consider "the Crusades" in the broadest possible context. One of the key questions to be addressed in this course is: how did these expeditions to the Holy Land both reflect and influence cross-cultural relations in the medieval Mediterranean World? LEC.

HIST 516. Later Medieval Culture. 3 Hours H.
The civilization of Medieval Europe at its height (1100-1350); its subsequent disintegration and transformation. LEC.

HIST 517. Roots of Human Trafficking: Modern Slavery and Africa. 3 Hours H.
This reading-intensive seminar explores human trafficking in the modern world. It examines labor exploitation and commercialization in a historical perspective. The course aims to explore how imperialism led to the expansion of human trafficking and how women, men and children experienced labor exploitation in different ways. We examine how forced labor was/is behind the car and bicycle industries, sugar, coffee, and chocolate consumption. Today more than 27 million people are held, sold, and trafficked as slaves around the world. This course discusses similarities and differences between contemporary and historical slavery and analyzes why and how it persists nowadays. Readings include accounts of people held in bondage, case studies, and reports. Students develop familiarity with major historical concepts, themes, and subjects. Students also engage, investigate, and understand history as a process to explain how we make sense of the past and the present. Students carry on a research project throughout the semester about the historical roots of a modern case of slavery and/or human trafficking, producing original scholarship. (Same as AAAS 517.) Prerequisite: Successful completion of a history course numbered below 500, or permission of instructor. LEC.

HIST 519. European Intellectual History of the Seventeenth Century. 3 Hours H/W.
This course will trace the development of the European intellectual tradition in the crucial period of the seventeenth century. Such topics as the changing views on religion, the decline of Humanism, and the rise of natural science form the center of the course and will be studied against the background of social and political change. Class sessions will consist of discussions of both primary and secondary sources. LEC.

HIST 520. The Age of the Renaissance. 3 Hours H/W.
A survey of economic, political, social, and cultural developments in Italy in the 14th and 15th centuries, with special attention to those elements in the life of the age which look forward to the modern world. LEC.

HIST 521. The Age of the Reformation. 3 Hours H/W.
The Protestant revolt of the 16th century. LEC.

HIST 522. The Age of Religious Wars, 1540-1648. 3 Hours H/W.
The Catholic or Counter-Reformation and the wars of religion, including the Thirty Years War. LEC.

HIST 523. Europe between Absolutism and Revolution. 3 Hours H/W.
An investigation of why the major states of Europe underwent a crisis at the end of the 1700s that culminated in a wave of democratic revolutions, reforms, and the wars of Napoleon. LEC.

HIST 524. The French Revolution. 3 Hours H/W.
A study of the origins, development, and impact of the French Revolution, beginning with a description of France in the 18th century and ending with a look at France under Napoleon. LEC.

HIST 525. Modern France: From Napoleon to de Gaulle. 3 Hours H/W.
A survey of the history of modern France. Beginning with an exploration of the impact of the Revolutionary and Napoleonic era on French institutions, politics, and society, this course examines the search for a viable political system, the acquisition of a colonial empire, the church-state controversy, and the rise of socialism in the nineteenth century, and considers the impact of two world wars on French society, the rapid modernization of countryside and cities, and French political leadership from Clemenceau to Blum to de Gaulle in the twentieth century. LEC.

HIST 527. Recent European History, 1870 to the Present. 3 Hours H/W.
A study of the issues and themes that have shaped the contemporary European world, exploring European politics, economy, and society from the zenith of Europe's power and influence at the turn of the century through two world wars and into the contemporary era. This survey begins with the period of consolidation of a system of major national states in western Europe and ends with the search for alternatives to that system in the break-up of empires and movements for European unity in the post-World War II era. The course also considers the emergence of the states of central and eastern Europe and examines the impact of the Russian Revolution and the Soviet state on European affairs. Not open to those who have credit in either HIST 435 or HIST 436. LEC.

HIST 528. Economic History of Europe. 3 Hours S/W.
An introductory study of European economic history from the Middle Ages to the 1980s. Investigates the sources of economic growth, and the interaction between economic forces and social institutions. Topics covered will include the rise of commerce, the agricultural and industrial revolutions, imperialism, the Great Depression, and European recovery after World War II. (Same as ECON 535.) Prerequisite: ECON 104 or ECON 142 and ECON 144. LEC.

HIST 529. Intellectual History of 19th Century Europe. 3 Hours H/W.
A survey of significant currents of thought during this period. Attention to the problem of the relationship between ideas and the historical situation. LEC.

HIST 530. History of American Women--Colonial Times to 1870. 3 Hours AE41 / H.
A survey of women's history in the United States that will consider women's roles as housewives, mothers, consumers, workers, and citizens in preindustrial, commercial, and early industrial America. (Same as AMS 510 and WGSS 510.) LEC.

HIST 531. History of American Women--1870 to Present. 3 Hours AE41 / H.
A survey of women's history in the United States that will include radical and reform movements, the impact of war and depression, professionalization, immigration, women's work, and the biographies of leading figures in women's history. (Same as AMS 511 and WGSS 511.) LEC.

HIST 532. History of Women and Work in Comparative Perspective. 3 Hours H.
This course explores the connection between historical changes in the labor process and the occupational choices available to women in different countries. Through discussion and analyses of texts, students will evaluate the construction of a gendered division of work as shaped over time by economic, cultural, and political forces. The chronological and geographical focus may vary depending on the instructor. (Same as AMS 512 and WGSS 512.) LEC.
HIST 533. The History of Women and the Family in Europe, from 1500 to the Present. 3 Hours H/W.
This course examines how women’s roles and the family have changed in Europe from the early modern period to the present. It will consider the relation of women and the family to such cultural, social, and political changes as the Reformation, the French Revolution, middle class culture, industrialization, and the mass movements of the 19th and 20th centuries. LEC.

HIST 534. Captivity in America, 1492-1800. 3 Hours H.
Captivity, threatened and actual, shaped the lives of the people of North America. It profoundly influenced the ways in which individuals and communities thought about themselves and the people around them. Colonists feared captivity among Native Americans; centuries later, Americans in the early republic rallied to the cause of their countrymen captured by Barbary pirates. This course examines the impacts, cultural, social, religious, and otherwise, of a variety of forms of captivity in colonial British, Spanish, and French North America. Topics in this course may include the captivity of European explorers and settlers by Native American groups; the enslavement of peoples from Africa to European and Native American masters; prisoners of war; naval impressedmen; and the displacement and captivity of Native American individuals and communities. Prerequisite: Successful completion of prior history course numbered below 500. LEC.

HIST 537. France from the Renaissance to the French Revolution. 3 Hours H.
A study of the major political developments of early modern France, including absolutism, corporate institutions, and popular revolts, as well as an examination of the everyday life and beliefs of ordinary people. LEC.

HIST 538. European Intellectual History of the Eighteenth Century. 3 Hours H.
An examination of the writing, ideas, and language of the major thinkers of the Enlightenment, including Diderot, Hume, Kant, Lessing, Rousseau, and Voltaire. LEC.

HIST 541. British History, 1500-1660. 3 Hours H.
An introduction to the impact on the British Isles of the Reformation and Renaissance; the development of the Tudor state; Parliament; the Stuart monarchy; the Anglican counter-reformation; civil war; the Cromwellian experiment. LEC.

HIST 543. Modern Iran. 3 Hours NW / H.
A history of Iran from the sixteenth century to the present with an emphasis on religious, political, and cultural history. Topics will include the establishment of Shi’ism as the state religion in the sixteenth century, the evolution of religio-political thought among the Shi’ite clerical establishment, great power politics in the nineteenth century, European cultural and intellectual influence, nation-building and nationalism in the twentieth century, the Islamic revolution of 1979, and Iranian politics since the revolution. Prerequisite: HIST 327 and HIST 328. LEC.

HIST 544. Britain and Ireland from 1200 to 1500. 3 Hours H.
Survey of social, cultural, political, and economic developments with particular emphasis on interaction between Anglo-Norman/English and Celtic societies. LEC.

HIST 545. British History, 1660-1832. 3 Hours H.
A study of Britain’s recovery from civil war; state formation and national identity; ideological conflict; the Revolution of 1688; religion and secularization; social stability and commercial expansion; reform; threats to the state, and the American revolution; Britain’s survival of the French Revolution; the breakdown of the ancient regime in 1828-32. LEC.

HIST 546. History of Cartography. 3 Hours H.
A history of mapmaking worldwide from its origins to the present day. Emphasis on maps as historical records of evolving civilizations and cultural landscapes and methods of study early maps. (Same as GEOG 519.) LEC.

HIST 547. The Intellectual History of Europe in the Twentieth Century. 3 Hours H.
This course will examine in depth the leading developments in European thought from the 1920’s to the present. Topics will include: existentialism, philosophic hermeneutics, and postmodernism. LEC.

HIST 548. Rise of Modern Britain. 3 Hours H.
A study of the rise of modern Britain from the 1832 Reform Act, a major step on the path from aristocratic government to mass democratic politics. It covers the politics and society of the Victorian era, the extension of British influence overseas, the origins and social impact of two world wars, the creation of the Welfare State, the loss of Empire, and Britain’s entry into Europe. LEC.

HIST 551. Spain and Its Empire, 1450-1700. 3 Hours H.
This course will examine the society and culture of Spain in the period known as “the Golden Age.” Subjects that will receive attention include: rural and urban society, economic and political organization of the Spanish and American peoples in the early years of the conquest, the place of women in society, the social basis for “Golden Age” culture, and the debate over the “decline of Spain. LEC.

HIST 555. Aspects of British Political Thought. 3 Hours H.
This course will offer an introduction to a number of classic works in British political thought, placed against their historical background. Close reading of selected texts will be combined with contextual analysis. LEC.

HIST 556. Aspects of British Political Thought, Honors. 3 Hours H.
Similar in content to HIST 543. This course will offer an introduction to a number of classic works in British political thought, placed against their historical background. Close reading of selected texts will be combined with contextual analysis. Open only to students in the University Honors Program or by permission of the instructor. LEC.

HIST 557. Nationalism and Communism in East Central Europe from 1772 to the Present. 3 Hours H/W.
The peoples of East Central Europe under Hapsburg, Romanov, and German rule; the dissolution of the empires, independence and the role of the new states in the European balance of power; World War II, Soviet domination, and the recent role of East Central Europe in the Communist World. LEC.

HIST 558. Religion in Britain Since the Reformation: A Survey. 3 Hours H.
This course will deal analytically and synoptically with religion in Britain from the Reformation to the present with special reference to the Church of England, and focuses on the theses of ecclesiology, ecclesiastical polity, and political theology. It is essentially an examination of religious history from a perspective of the history of ideas. (Same as REL 558.) LEC.

HIST 559. Religion in Britain Since the Reformation: A Survey, Honors. 3 Hours H.
This course deals analytically and synoptically with religion in Britain from the Reformation to the present with special reference to the Church of England, and focuses on the theses of ecclesiology, ecclesiastical polity, and political theology. It is essentially an examination of religious history from the perspective of the history of ideas. Open only to students in the University Honors Program or by permission of instructor. (Same as REL 559.) LEC.
HIST 560. The Value of Freedom. 4 Hours H.
This course explores multiple definitions of freedom: its value, limitations, and evolving meaning. The course specifically focuses on four major contexts in which human beings have faced existential questions about freedom's value: politics, religion, work, and gender relations. The goals are to explore the ways in which other societies and epochs have valued freedom and balanced it against competing social goods and thus to attune students to the particularities of today's definitions and celebrations of freedom.

HIST 561. Liberation in Southern Africa. 3 Hours NW AE42 / H.
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as AAAS 561 and POLS 561.) LEC.

HIST 562. United States Environmental History in the 20th Century. 3 Hours H.
Americans dramatically changed the natural world between 1900 and 2000. This course asks how transformed environments shaped the American experience during a century of technological innovation, democratic renewal, economic expansion, global conflict, and cultural pluralism. Topics include food and markets, energy and transportation, law and politics, protest and resistance, suburbanization, and environmentalism's fate in a global information era. (Same as EVRN 562.) LEC.

HIST 563. U.S. Environmental Thought in the 20th Century. 3 Hours H.
Explores both leading and dissident ideas that Americans have had about the natural world since 1900. Broad chronological periods are explored in some depth, including the Progressive Era, New Deal, Cold War, the Sixties, and the Reagan Eighties. The course uses articles and books, as well as visual and aural forms of communication. Commercial speech, as well as scholarly and literary works, are considered. (Same as EVRN 563.) Prerequisite: EVRN 148 or HIST 129, or permission of instructor. LEC.

HIST 564. Medieval Russia. 3 Hours H.
Political, economic, social, cultural, and religious developments of Russia from the beginnings of the Russian state in the 9th Century through the 17th Century. LEC.

HIST 565. Imperial Russia. 3 Hours H/W.
The history of Imperial Russia from Peter the Great's reinvention of the empire in the eighteenth century to its demise in the revolutions of 1917. Placing Russia in a global context, the course examines change and continuity in politics, society, economy, and culture and looks at Russia as a diverse empire between Europe and Asia. Readings include historical scholarship and some of the classics of Russian literature. LEC.

HIST 566. Rise and Fall of the Soviet Union. 3 Hours AE42 / H/W.
An exploration of the Soviet Union's creation, evolution, collapse, and legacy in contemporary Russia and Eurasia. Drawing on historical scholarship, literature, music, and film, the course examines the major trends and developments in Soviet politics, ideology, society, economy, and culture. Special attention is paid to how the multiethnic Soviet state's rise and fall reflected broader changes in the world during the "Soviet century. LEC.

HIST 570. The Middle East After World War II. 3 Hours NW AE42 / H/W.
An intensive study of developments and changes in the Middle East since World War II. Topics and themes will vary, but may include the long-lasting effects of European imperialism, Big Oil and the energy crisis, the Arab-Israeli conflict and peace process, American intervention in the Middle East, minority communities, and the revival of Islamic and popular protest movements. LEC.

HIST 573. Latin America in the 19th Century. 3 Hours H/W.
The course will analyze the social, political, and economic problems of the Latin American nations from their independence to the Mexican Revolution (1910). Emphasis will be on the emergence and shaping of the new countries; their transition to modern industrializing societies; and the impact of this transition on Latin American society. LEC.

HIST 574. Slavery in the New World. 3 Hours H/W.
Slavery, slave culture, and the slave trade in the U.S., Latin America, and the Caribbean will be examined comparatively. Attention will also be given to African cultures, the effects of the slave trade on Africa, and the effects of African cultures on institutions in the New World. (Same as AAAS 574.) LEC.

HIST 575. History of Mexico. 3 Hours H/W.
Mexican history from preconquest days to the contemporary period. LEC.

HIST 576. History of the Caribbean and Central America. 3 Hours H/W.
A comparative examination of Central America and the Caribbean. Emphasis is on understanding the complex social, cultural, and political development of this broad region from the pre-Columbian period until the modern era. Topics include: conquest, colonization, racial and ethnic diversity, economic development, political conflict, and globalization. Prerequisite: HIST 120, HIST 121, or HIST 370. LEC.

HIST 579. The History of Brazil. 3 Hours H/W.
The history of Brazil from European discovery to the present with emphasis on social and economic change. Topics discussed will include the Indian, African, and European backgrounds, slave society, the frontier in Brazilian development, cycles of economic growth and regionalism, the role of foreign capital, industrial development, labor, urban problems, the military in government, and human rights. LEC.

HIST 580. Economic History of Latin America. 3 Hours H/W.
A study of the changing economic conditions in Latin America from Colonial times through the Twentieth Century and the effect of these conditions on Latin American society. Emphasis will be on the major theoretical issues of development economics, patterns of growth, and suggested strategies for economic development. Analysis will center on changes in agriculture, industry, labor, finance, transportation and technology, urbanization, immigration, role of women, export and commerce, and foreign involvement. LEC.

HIST 581. The Japanese Empire. 3 Hours GE3H / H.
Although the history of modern Japan was for a long time conventionally understood within the parameters of the nation-state, in fact modern Japanese identity coalesced around empire. This reading-intensive course explores the Japanese empire from its origins in the late nineteenth century to its collapse at the end of World War II in 1945, as well as the empires post-1945 legacies in Asia. Particular attention is paid to different forms of Japanese colonial domination practiced in Hokkaido, Okinawa, Taiwan, Korea, the South Seas Islands, Manchuria, occupied China, and Southeast Asia. We also study the ways in which the empire and colonial subjects, in turn, transformed Japanese state and society.
Furthermore, we examine transnational themes the Japanese empire shared with other modern empires in areas such as colonial violence, gender, migration, settlements, war mobilization, and historical memories of the colonial experience. Prerequisite: Successful completion of an East Asian history or culture course numbered below 500; or a history course numbered below 500; or permission of the instructor. LEC.

HIST 582. Ancient Japan. 3 Hours NW / H.
Course covers the history of Japan from the prehistoric era through the ancient period (approximately 10,000 BC to 1200 AD). Topics examined include the rise of Japanese Civilization, state formation, early capitals, belief systems, courtly culture in the Heian period (794-1185), and daily life. Writing assignments provide students with opportunities to gain familiarity with historical methods for analysis and to strengthen their written expressions. Not open to students who have taken HIST/EALC 586. LEC.

HIST 583. Imperial China. 3 Hours NW / H/W.
An intensive survey of China's traditional civilization and its history, with emphasis on the last centuries of imperial rule under the Sung, Yuan, Ming, and Ch'ing dynasties (to 1850). (Same as EALC 583.) LEC.

HIST 584. Modern China. 3 Hours NW AE42 / H/W.
An intensive survey of China’s history from the early 19th century to the present. Key topics include the decline of the traditional system, the rise of communism, the Maoist era, and the tensions of change and control in the 1980s and 1990s. (Same as EALC 584.) LEC.

HIST 585. Beer, Sake, Tea-Beverages in Japan History. 3 Hours AE42/GE3H / H.
Sake and tea are synonymous with Japan today, but the history of beverages from water to whiskey illuminates key developments in Japanese civilization. This course makes a thematic survey of Japanese beverages introducing the place of drinks in global history before examining their distinct context in Japan. Topics include the ritual consumption of beverages as in the tea ceremony; the place of alcohol in Japanese culture; locales for consuming beverages such as bars, teahouses and coffee shops; and the Westernization of taste preferences as characterized by the introduction of beer and wine. By taking this course, students gain insight into ways that beverages contribute to Japanese culture and help shape personal and national identity. Prerequisite: Successful completion of an East Asian history or culture course number below 500 or permission of the instructor. LEC.

HIST 587. Early Modern Japan. 3 Hours NW AE42 / H/W.
Early modern Japan (16th to 19th century) examines the history, culture, and patterns of life during an era of rigid social control but artistic brilliance. After an historical overview of the period, students will explore topics including the social structure, travel, religion, thought, and the formation of traditional cultural forms such as Kabuki theater. (Same as EALC 587.) LEC.

HIST 588. Japan, 1853-1945. 3 Hours NW / H/W.
This course provides an intensive survey of Japanese history from the arrival of Commodore Perry through the Pacific War. Social, economic, and political themes will be emphasized. Among the topics covered will be the Meiji Restoration, industrialization, Japanese imperialism, Taisho democracy, and wartime mobilization. (Same as EALC 588.) LEC.

HIST 589. Japan Since 1945. 3 Hours NW / H/W.
This course provides an overview of Japanese history from the end of World War II to the present day. Among the topics covered will be the Allied Occupation, postwar politics and social change, the economic "miracle," popular culture, women and the family, crime and punishment, the educational system, and Japan's place in the world. (Same as EALC 589.) LEC.

HIST 590. Cultural History of Korea. 3 Hours H.
This course examines the cultural history of Korea in periods prior to the 19th Century. Special attention is given to varying constructions of cultural value, heritage, and identity, together with the historically specific factors that engendered them. (Same as EALC 563.) LEC.

HIST 591. Food in History: West and East. 3 Hours H/W.
A survey of scholarship on food in the West and in East Asia, choosing works primarily by historians, but also by sociologists, geographers, and anthropologists. We consider how scholars have approached issues concerning food productions and consumption, what habits of eating reveal about daily life, and how and when food is embedded with historiography related to these topics, keeping in mind the famous maxim of the noted French gastronome Brillat-Savarin (d. 1826): "Tell me what you eat: I will tell you what you are. LEC.

HIST 592. Marxism in China. 3 Hours NW / H/W.
This course will examine selected topics in Modern Chinese history in the 19th and 20th centuries, with special emphasis on China's connections to Japan and Korea. (Same as EALC 592.) Prerequisite: A college-level course in East Asian history or culture, or consent of instructor. LEC.

HIST 593. Modern Korea. 3 Hours NW / H/W.
This course will examine selected topics in Modern Korean history in the 19th and 20th centuries, with special emphasis on Korea's connections to China and Japan. (Same as EALC 593.) Prerequisite: A college-level course in East Asian history or culture, or consent of instructor. LEC.

HIST 596. Defining Japan: Marginalized Groups and the Construction of National Identity. 3 Hours NW / H/W.
This course investigates the construction of national identity in modern Japan by examining the historical experiences of groups marginalized by mainstream society. We will explore the pressures of conformity, the pervasiveness of social ostracism and the surprising diversity in Japanese society. Among the groups discussed will be indigenous peoples (the Ainu, Okinawans), the Korean minority, the outcast class (burakumin), the sick and disabled, the yakuza, and political activists. (Same as EALC 596.) LEC.

HIST 597. Japanese Theater History. 3 Hours NW / H/W.
This course examines the historical development and characteristics of Japanese theater, with special attention to traditional theater and the genres of noh, kyogen, and kabuki in particular, tracing their origins in the pre-modern era and their continued performance today. To gain an understanding of the historical and artistic setting of these arts, lectures and readings will consider broader issues such as performance and ritual in religion and daily life, gender and representation, and folk theater. A portion of this class will include practical studies of theatrical forms including noh dance and kabuki music (shamisen). (Same as EALC 597.) LEC.

HIST 598. Sexuality and Gender in African History. 3 Hours NW AE42 / H.
An examination of the history of sexuality and gender in Africa with a focus on the 19th and 20th centuries. Major issues and methods in the historical scholarship on gender and sexuality will be covered. Topics of historical analysis include life histories, rites of passage, courtship, marriage, reproduction, education, masculinities, homosexuality, colonial control, and changing gender relations. Prior course work in African history is suggested. Graduate students will complete an additional project in consultation with the instructor. (Same as AAAS 598.) LEC.

HIST 599. The Rise and Fall of Apartheid. 3 Hours H.
This course will deal with the last fifty years of South African history during which apartheid came to be formulated, supported, and perpetuated, and the forces that were responsible for its disintegration by 1990. Reference will also be made to the transformation process since April 1994. (Same as AAAS 599.) LEC.

HIST 600. West African History. 3 Hours NW / H/W.
A study of the political, social, and economic development of West Africa until the colonial era. Major focus will be on the role of state formation,
HIST 601. Oral History. 3 Hours H.
This course explores the emergence of oral history as a methodology and focuses on the guidelines and ways to effectively use oral history in historical, journalistic, and social science research. The skills of collecting and sorting information gathered through eyewitness accounts, oral traditions, genealogies, investigative reporting procedures, and questionnaires are developed. The nature of the interview in relation to personal and public documents, ordinary conversation, and other related data sources will be considered in this course. LEC.

HIST 602. Religion in Britain 1785-1925. 3 Hours H.
This course offers an examination of religious thought and practice during the transition from a pre-industrial, unitary order to a modern urban, industrial, and secular society. It will stress the close study of a range of selected texts, including works by such authors and works as Paley, Horsley, Wilberforce, Thomas Arnold, Newman Maurice, essays and reviews, Jowett, Lux Mundi, Gore, and Temple. It will attend to continental European influences on British thought and set theological debate in the wider context of the intellectual history of the period. LEC.

HIST 603. History of Tibet. 3 Hours NW AE42 / H.
This course surveys the cultural and political history of Tibet from the eighth to the twentieth century. Through readings, lectures, and discussions, students gain familiarity with the dominant features of Tibetan civilization. Topics include the relationship between Tibet and the civilizations of India and China, Tibetan Buddhism, and the tensions between the struggle for Tibetan independence versus claims of Chinese sovereignty. The course also considers the Tibetan diaspora and the reception of knowledge about Tibetan civilization in the West. LEC.

HIST 604. Contemporary Greater China. 3 Hours NW AE42 / H.
This course considers contemporary China, Taiwan, and Hong Kong in comparative perspective. It begins in the early twentieth century so as to set up a comparison between Nationalist, Communist and Colonial China. It focuses on the evolution from the 1940s to the present studying the political, economic and social systems of the three regions that constitute what we now call ‘Greater China’ and considers, in particular, important points of difference and similarity between them. LEC.

HIST 605. Medieval Japan. 3 Hours NW AE42 / H.
Course examines the history of Japan from the end of the ancient period (c. 1200 AD) through the medieval era (approximately 1573). Issues covered include the formation and destruction of the Kamakura and Muromachi warrior governments, medieval religious life and culture. Writing assignments provide students with opportunities to gain familiarity with historical methods for analysis and to strengthen their written expression. Not open to students who have taken HIST/EALC 586. LEC.

HIST 608. History of Sexuality. 3 Hours H.
This survey course traces the changing conceptions of human sexuality from early civilizations to the present. It will include, but not be limited to, such topics as attitudes and beliefs, laws, sciences and medicine, cultural differences, and the impact of economic change on sexual definition and experience. LEC.

HIST 610. American Colonial History. 3 Hours H.
Examines colonial American history from the age of Columbus to the mid-1760s. The course seeks to place colonial American history into the larger historical context, particularly the expansion of the British Empire in the early modern period. Emphasis in the course will be on migration, social and economic conditions, and inter-racial relations. LEC.

HIST 611. Early American Indian History. 3 Hours H.
This course will focus on the history of American Indians, especially those of the eastern woodlands, from precontact times to the 1830's. Particular emphasis will be on the response of Indians to demographic catastrophe, the development of trade between Indians and colonists, and Indian responses to European colonization in British America and New France. The role of Indians in the American Revolution and the changes caused by Removal will also be treated. LEC.

HIST 612. History of Federal Indian Law and Policy. 3 Hours H.
This course offers a comprehensive examination of federal legislation and court decisions in the United States that have affected American Indians. The history of law and policy will be traced from the colonial period, but the major emphasis will be on the struggle of American Indians to preserve sovereignty in the 19th and 20th centuries. LEC.

HIST 613. Slavery and Freedom in the Age of Jackson. 3 Hours H.
This course focuses on the growing importance of the issues of slavery and freedom in the United States between 1815-1848. Recently, scholars have demonstrated that the period was one of disorienting, dramatic, and unprecedented change as politics, economics, racial and gender roles, and key institutions were permanently transformed. The course will examine these changes and how they, in turn, remade the values and identities of all Americans. LEC.

HIST 615. Rise of Modern America: Politics, Culture, and Society, 1900-1950. 3 Hours H.
The history of the United States in the First Half of the Twentieth Century. LEC.

HIST 616. Contemporary America, 1941-Present. 3 Hours H.
A history of the United States from its entry into World War II to the present. A study of such selected topics as women's history and feminism, race relations and the Afro-American civil rights movement, power, poverty, the military-industrial complex, McCarthyism, and presidential administrations. LEC.

HIST 617. America in the 1960's. 3 Hours H.
The people of the United States experienced significant social political, and cultural change during the 1960's. This course studies the history of these changes, focusing on the American people, the institutions that shaped their lives, and the social and political movements, and against change, that surfaced during this decade. Specific topics include: the struggle for racial equality, the Kennedy, Johnson, and Nixon administrations; the Vietnam War, the antiwar movement, New Left, and counterculture; feminism's rebirth; the white backlash; and the resurgence of political and cultural conservatism. Course requirements include readings, discussion, and original historical research and writing. LEC.

HIST 618. History of the American West to 1900. 3 Hours H.
A survey of Western history with emphasis on such topics as Native Americans and Indian-white relations, environment and resource use, exploration and discovery, expansionism and Manifest Destiny, economic development, urban, rural, and alternative communities, ethnic and racial experience, women and violence. Consideration will also be given to topics such as fur trade, mining, the cattle business, and agriculture. LEC.

HIST 619. History of the American Indian. 3 Hours NW / H/W.
A study of Indians in the United States from colonial times to the present. Consideration will be given to the political, social, and cultural history of selected Indian tribes and to Indian-white relations with particular attention to the Indian point of view. Other topics will include a comparative study of Indian policy of nations colonizing in America, cultural intermingling and cultural conflict, and current Indian problems. Slides, films, and guest speakers (including American Indians) will be used in the course. LEC.
HIST 620. History of Kansas. 3 Hours H.
A survey of the history of culture and society from prehistory to the present. Topics include Native American life, Euro-American settlement, Bleeding Kansas and the Civil War, agricultural settlement, urbanization and industrialization, depression and recovery, and modern Kansas in transition. LEC.

HIST 621. The American West in the 20th Century. 3 Hours.
A study of the post-frontier era and the struggle to create a regional identity, drawn from legends of the heroic past, varieties of racial and ethnic experience, political culture, and the possibilities of the land. LEC.

HIST 622. History of the Plains Indians. 3 Hours NW / H/W.
A history of the Plains Indians from the sixteenth century to the present. Consideration will be given to tribal culture and society, to the impact of the fur trade and international rivalries on tribes, and to Indian-white relations. LEC.

HIST 625. Body, Self and Society. 3 Hours H.
An intensive examination of the role of the human body in the creation of personal and social identities in the Western world. Students become acquainted with contemporary theories of embodiment and senses as they are applied to a variety of historical themes, and develop research projects on a topic negotiated with the instructor. (Same as HWC 575, WGSS 575.) Prerequisite: An upper-division course in History, Humanities and Western Civilization, or Women Gender and Sexuality Studies; or permission of instructor. LEC.

HIST 626. Men and Masculinities. 3 Hours H.
An intensive examination of the history and theory of masculinities in the Western world. Students become acquainted with some of the key theories of men and masculinities, and develop research projects on a topic negotiated with the instructor. (Same as HWC 570, WGSS 570.) Prerequisite: An upper-division course in History, Humanities and Western Civilization, or Women Gender and Sexuality Studies; or permission of instructor. LEC.

HIST 628. American Economic Development. 3 Hours H.
An introductory study of the development of the American economy from colonial times to the present. Investigates long-term trends in output, population, and output per capita, as well as short period fluctuations, and the variables and institutions that determined these fluctuations and trends. (Same as ECON 530.) Prerequisite: ECON 104 or ECON 142 and ECON 144. LEC.

HIST 629. The United States and the World to 1890. 3 Hours H.
The origins of American diplomacy from the wars of the 18th century and the Revolution to 1901. The foreign relations of the American government and the reactions of the American people to international problems. LEC.

HIST 630. The United States and the World, 1890-2003. 3 Hours H.
An examination of the history of United States foreign relations over the course of the twentieth century. Treats America's emergence as a world power before World War I, imperialism and interventionism, involvement in World War I and World War II, internationalism, the Cold War and America's anti-communist crusade, third world nationalism, responses to a global economy, and the obligations of a military superpower in a chaotic world. LEC.

HIST 631. The Contemporary Afro-American Experience. 3 Hours H.
A history of Afro-America from the end of the Civil War to the present. Consideration will be given to such topics as America's capitulation to racism, blacks in agriculture, blacks and the labor movement, Booker T. Washington and W.E.B. DuBois, civil rights protest, migration and urbanization, Marcus Garvey and black nationalism, the Harlem Renaissance, blacks during the New Deal, blacks in recent politics, the modern civil rights movement, ghetto uprisings, and the changing relationships among race, caste, and class. LEC.

HIST 636. Agriculture in World History. 3 Hours H.
A survey of the development of agriculture from prehistory through the present. The major themes of the course will be how various methods of farming have spread around the world, how new techniques have transformed agriculture, and how peasants and farmers have interacted with cities and governments. LEC.

HIST 640. Entrepreneurship in East Asia. 3 Hours NW / H.
An intensive examination of the history and current status of entrepreneurship in China, Japan, and other nations in East Asia. This course investigates the role of entrepreneurs in Asian economic development from the nineteenth century to the present, as well as the relationship between entrepreneurship and Asian cultural traditions. The opportunities and challenges of entrepreneurship in East Asia today are also considered. (Same as EALC 520.) LEC.

HIST 646. Witches in European History and Historiography. 3 Hours H.
This course examines witches, witchcraft, and magic in Europe in the late medieval and early modern period (approximately 1200-1700 C.E.). Particular emphasis will be on the variety of historical and anthropological approaches that have been used to study the subject and their meaning in the context of gender politics and gender theory. (Same as WGSS 646.) LEC.

HIST 649. History of Feminist Theory. 3 Hours H.
This discussion course will cover the development of feminist theories from the late Middle Ages to the present. Reading will include Pisan, Wollstonecraft, Mill, Freud, Woolf, Beauvoir, Friedan, Daly, Kristeva, and others. (Same as WGSS 549.) LEC.

HIST 653. American Constitutional History to 1887. 3 Hours H.
A historical study of the colonial origins, revolutionary development, creation of, struggle over and preservation of the American constitutional system from 1763 to 1887. LEC.

HIST 654. American Constitutional History Since 1887. 3 Hours H.
A historical study of the evolution of thought and practice of the constitutional system from the conflict over government regulation of business, through the expansion of executive and legislative power, to the evolution of protections of Bill of Rights guarantees by the Supreme Court and the reaction against that evolution. LEC.

HIST 660. Biography of a City: ______. 3 Hours AE42 / H.
These interdisciplinary, team-taught courses survey the artistic, intellectual, and historical development of the great cities of the world. London, Paris, and Rome have been offered in recent semesters, and other cities will be studied in the future. LEC.

HIST 661. Palestine and Antiquity. 3 Hours H.
A survey of the history of Palestine from biblical origins to the Muslim conquest, with emphasis on such topics as social and religious institutions, cultural and communal diversity, and relations between foreign powers and local authorities. The course further explores the roots of the present conflictual situation in this part of the Middle East. LEC.

HIST 670. Comparative Diasporas. 3 Hours H.
This course examines history from the point of view of diasporas, groups who move across established borders but maintain an identity linked to an original homeland. This course examines commonalities and differences in the diaspora experience by looking comparatively at a range of prominent cases, including the Jewish, African, Armenian, Greek, Turkish, German, Irish, Italian, South Asian, and Chinese diasporas, the "Gypsies," and the internal diasporas of multiethnic states like Russia.
The course also gives students the opportunity to pursue research on a diaspora of their own choosing. LEC.

**HIST 696. Seminar in: _____, 3 Hours AE61 / H.**
A seminar designed to introduce students to the theory and practice of historical inquiry. A research paper will be required. May not be repeated for credit. Prerequisite: Twelve hours of upper-class courses in history and completion of HIST 301 or consent of instructor. LEC.

**HIST 699. Philosophy of History. 3 Hours H.**
Topics will include: The nature of historical knowledge; the problems of historical inquiry; a critique of philosophies of history; and a study of history and related disciplines. (Same as PHIL 696.) Prerequisite: A distribution course in philosophy. LEC.

**HIST 705. Globalization in History. 3 Hours.**
A study of the increasing interaction among world societies since 1500 and an investigation of the long-term developments behind current world problems. Major topics include western expansion since 1500, the spread of state sovereignty, the formation of a world economy, and spread of international institutions. The current world problems investigated will vary, but may include issues such as environmental crises, human rights, migration, free trade and the spread of consumer culture, ethnicity and nationalism, and international intervention within states. (Same as GIST 705.) LEC.

**HIST 719. Colloquium in Medieval Latin. 3 Hours.**
An introduction to Medieval Latin for students pursuing medieval studies. The material covered will include selections from various literary works, the Vulgate, legal codes, legal documents, and other sources from the period 300-1500. May not be retaken for credit. Prerequisite: Four semesters of college Latin or the equivalent, and/or consent of instructor of Ancient-Medieval graduate advisor. LEC.

**HIST 720. The Nature of Museums. 3 Hours.**
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, BIOL 788, GEOL 782, and MUSE 702.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

**HIST 721. Introduction to Museum Public Education. 3 Hours.**
Consideration of the goals of an institution’s public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, GEOL 784, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

**HIST 722. Conservation Principles and Practices. 3 Hours.**
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, BIOL 700, GEOL 780, and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

**HIST 723. Introduction to Museum Exhibits. 3 Hours.**
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, BIOL 787, GEOL 781, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

**HIST 725. Principles and Practices of Museum Collection Management. 3 Hours.**
Lecture, discussion, and laboratory exercises on the nature of museum collections, their associated data, and their use in scholarly research; cataloging, storage, fumigation, automated information management and related topics will be presented for museums of art, history, natural history and anthropology. (Same as AMS 730, BIOL 798, GEOL 785, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

**HIST 727. Practical Archival Principles. 3 Hours.**
Study of the principles and practices applicable to the preservation, care, and administration of archives and manuscripts. Practical experience will be an integral part of this course. (Same as MUSE 707.) LEC.

**HIST 728. Museum Management. 3 Hours.**
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL 785, GEOL 783, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

**HIST 740. Topics in History for Educators: _____. 1-3 Hours.**
Reading and discussion of selected historical topics, designed specifically for K-12 educators. Pedagogical methods and resources for the study of history will be addressed. Prerequisite: Approval of the instructor. LEC.

**HIST 747. East Asian History and Culture for Teachers. 2 Hours.**
An advanced survey of the history, culture, and contemporary affairs of , China, Japan and Korea, specifically designed for K-12 educators who wish to incorporate East Asian topics into their classroom teaching. Pedagogical methods and resources for the study of East Asia will be emphasized. Topics covered will address relevant benchmarks in the state curricular standards in social studies, themes from the Advanced Placement world history examination, and the national standards in world history. (Same as EALC 747.) Prerequisite: Approval of the instructor. LEC.

**HIST 748. East Asian Historical Materials: _____. 3 Hours.**
The aim of the course is to provide students with the linguistic tools needed for archival research in East Asian history by assisting them in gaining experience reading primary and secondary language materials in Japanese and/or Chinese including texts in classical forms of these languages. After studying the rules of classical grammar and the particulars of historical materials as needed, students will read primary documents in conjunction with secondary readings in Japanese and/or Chinese. Fundamental aspects of paleography may also be introduced in this course depending on student need. Prerequisite: Capability of reading Japanese or Chinese and permission of the instructor. LEC.

**HIST 799. Museum Studies Apprenticeship. 1-6 Hours.**
Provides directed, practical experience in the collection, care, use, and/or management of historical materials. (Same as AMS 799, ANTH 799, BIOL 799, GEOL 723, and MUSE 799.) Prerequisite: Consent of instructor. FLD.

**HIST 800. Readings in: _____. 1-8 Hours.**
Prerequisite: Consent of instructor. RSH.
HIST 801. Colloquium in: _____ 1-6 Hours.
Reading and discussion of selected topics. LEC.

HIST 802. Seminar in: _____ 3 Hours.
Research Seminar on selected topics. SEM.

HIST 805. The Nature of History. 3 Hours.
Analysis of what historians do and how the profession of history has developed in terms of training, concepts, and practices in both research and teaching. Consideration also of the major controversies that have developed over historical method and historical interpretation, giving greatest emphasis to American and European historiography by providing a relationship to the leading concepts of world history. LEC.

HIST 806. Studies in: _____ 3 Hours.
The core course for each thematic major field in the graduate program in History. The course, offered in a colloquium style format, will serve as an introduction to the principal standard literature in the field, and will consider the full range of methodologies or approaches appropriate to the field. LEC.

HIST 807. Professional Development Colloquium in Pedagogy. 3 Hours.
This course will help train future professional historians to teach. It will focus on a variety of pedagogical topics for future college history faculty, including: developing students’ critical and analytical thinking; teaching research skills; promoting student involvement/participation; determining course goals; use of multi-media technology. In addition to attending class meetings of History 807, students will attend as observers throughout the semester one 500/600-level course in an area relevant to their future teaching and complete the readings assigned to the class. They will produce a course portfolio for an undergraduate course, including: a syllabus designed by the student; a set of assignments that will be part of that course, such as examinations and papers; sample lesson plans; an annotated bibliography of materials relevant to the subject-matter of the course. LEC.

HIST 808. Colloquium in Comparative History: _____ 3 Hours.
A readings-oriented course which explores themes in two or more geographic and/or chronological fields of history. The benefits and disadvantages of comparative methodologies will be analyzed. Topics will vary each term but may include the examination of such subjects as the history of urbanization, labor, colonialism, immigration, the family, political thought, or industrialization. Prerequisite: Varies with area of subtopic. LEC.

HIST 820. Colloquium on Popular Culture in Latin America. 3 Hours.
This course examines the history and theory of popular culture in 19th and 20th century Latin America from a cross-disciplinary perspective. Some of the topics covered could include: the historical development of urban popular culture from broadsides and newspapers to radio and telenovelas; the politics of music from the tango to the new song movement; folk art vs. High art in the definition of national identity; cultural imperialism; sports and public rituals as spectacles for the working class; relationship between mass culture and the novel; gender roles and social order as revealed in forms of popular culture; and the politics of the New Latin American Cinema. Discussions will be in English. No prerequisites. LEC.

HIST 822. Colloquium in the Urban History of Latin America. 3 Hours.
Explores the growth of the city and urban culture from the Spanish conquest to the present. Focus on such topics as crime, public health, leisure activities, artisans, unionization, residential patterns and transportation. LEC.

HIST 823. Colloquium on Colonial Latin America. 3 Hours.
Explores the historiography and major themes and problems of the history of colonial Latin America. Ordinarily this will involve reading and discussion of historiographical articles, major works in the field and works involving new approaches and perspectives. A long historiographical paper will be required. LEC.

HIST 824. Seminar on Labor in Latin America. 3 Hours.
Major problems in class conflict resulting from industrialization of peripheral economies. Focus on such topics as labor movements, worker-inspired revolutions, women in the workforce, the ideology of work, labor migration, occupational culture and worker’s relationship to the state. LEC.

HIST 825. Seminar in Latin American Foreign Relations. 3 Hours.
This seminar examines the history of Latin American attitudes and policies toward other parts of the world as well as among the Latin American nations themselves. Examples of topics of interest are anti-imperialism, Pan-Americanism, foreign cultural influences, non-intervention, international cooperation and conflict, dependency, transnational corporations, regional integration, international law and doctrine and national security. LEC.

HIST 826. Seminar in Twentieth Century South America. 3 Hours.
Research seminar which examines major topics in the recent history of the Andean and Southern Cone countries. Topics such as the history of poverty, the dirty wars and the rise of military regimes, the social collapse of Colombia, Argentina and Peru, and the persistence of traditional cultures in the face of capitalist transformations will be thoroughly explored. LEC.

HIST 827. Colloquium in the Social History of Latin America. 3 Hours.
Explores the historiography, methods and themes of Latin American social history from the conquest to the present. Sessions will focus on specific groups including the history of indigenous groups, peasants, slaves, women, families, workers, and the poor. A long historiographical paper will be required. LEC.

HIST 830. Colloquium in Eighteenth and Nineteenth-Century Britain. 3 Hours.
This course examines the varied elite and popular responses to the creation of a capitalist economy (agrarian and industrial) in Britain between 1750 and 1890. LEC.

HIST 831. Colloquium in Twentieth-Century Britain. 3 Hours.
This course examines the main developments in the political, social, and cultural history of Britain since 1890. The aim is to trace the relationship between political movements and socio-cultural attitudes and institutions. LEC.

HIST 833. Colloquium in British History, 1500-1660. 3 Hours.
Courses will engage with recent scholarship on the Renaissance and Reformation, the Civil War and the English Republic. LEC.

HIST 834. Colloquium in the History of the British Empire. 3 Hours.
The course will deal selectively with themes in the political and cultural interaction of the peoples of the British Isles with peoples overseas, the expansion and contraction of empire, and the rationales for these processes. LEC.

HIST 836. Colloquium in British Political Thought. 3 Hours.
This course provides an introduction to the rich tradition of British writings on politics through a close reading of a number of classic texts, interpreted in their historical settings. LEC.

HIST 837. Colloquium in British Religious History. 3 Hours.
This course will deal analytically and synoptically with religion in Britain from the reformation to the present with special reference to the Church of England, and will focus on the themes of ecclesiology, ecclesiastical polity, and political theology. LEC.
HIST 844. Colloquium on East Central Europe, 1772-1914. 3 Hours.
The colloquium covers the period beginning with the decline and partitions with Poland and ends with the outbreak of World War I. The major areas of study are the development of modern national consciousness among Poles, Czechs, Slovaks, Magyars, and Ukrainians, and the status of the Jews in these areas; economic, social, and educational development; and the rise of modern political parties. Prerequisite: HIST 557. LEC.

HIST 845. Eastern Europe, 19th and 20th Centuries. 3 Hours.
The course considers the challenges of modernity in Eastern Europe, with a focus on the lands of the former Habsburg Empire. The course is designed to introduce students to major issues in modern Eastern European history and historiography, with an emphasis on recent scholarship. Topics include: nationalism, identity formation, anti-Semitism, modernization and urbanization, World War I, interwar nation-states, World War II, Communist takeovers, everyday life under Communism, dissent, Solidarity, the collapse of Communism, and post-socialist transitions. LEC.

HIST 847. Colloquium in Russian History. 3 Hours.
A group readings course that begins with Russia in the medieval period and continues through the end of the twentieth century. Topics may vary each term, but may include such subjects as political, social, religious, gender, or intellectual history. The course will focus around significant interpretive issues and the historiography that address them. Basic familiarity with the chronology and the main problems of Russian history is assumed. LEC.

HIST 848. Colloquium in 20th Century Russia. 3 Hours.
The focus will be on reading and discussion of historical literature on the end of Imperial Russia, the Russian revolutions, and the Soviet Union and its aftermath. LEC.

This graduate seminar will focus on interactions between the so-called Old and New Worlds in the three centuries following Columbus' voyages. The course will pay particular attention to the changes in the lives of Europeans, Africans, and the peoples of the Americas as a result of the emergence of transatlantic economies, empires, and cultural systems. LEC.

HIST 855. Colloquium in Modern European History I - Renaissance to the French Revolution. 3 Hours.
This course will concentrate upon a number of selected topics in the history of Europe between the Renaissance and the French Revolution. Emphasis will be placed upon certain problems within this period and the recent historiography that deals with them. The first in a sequence of colloquia in Modern European History. Required for European history graduate students and students majoring in other fields whose secondary fields correspond to this time frame. LEC.

HIST 857. Colloquium in Modern European History II - Major Themes in Early Modern History. 3 Hours.
This course will concentrate upon a number of selected topics in early modern European history. Emphasis will be placed upon certain problems within this period and the recent historiography that deals with them. The second in a sequence of colloquia in Modern European History. Required for European history graduate students and students majoring in other fields whose secondary fields correspond to this time frame. LEC.

HIST 858. Colloquium in Modern European History III - French Revolution to the Present. 3 Hours.
From the French Revolution into the contemporary era. The third in a sequence of colloquia in Modern European History. Required for European history graduate students and students majoring in other fields whose secondary fields correspond to this time frame. LEC.

HIST 859. Colloquium in Modern European History IV - Major Themes in Modern History. 3 Hours.
This course will concentrate upon a number of selected topics in modern European history. Emphasis will be placed upon certain problems within this period and the recent historiography that deals with them. The fourth in a sequence of colloquia in Modern European History. Required for European history graduate students and students majoring in other fields whose secondary fields correspond to this time frame. LEC.

HIST 879. Colloquium on North American Environmental History. 3 Hours.
Intensive survey of significant works in the field from colonial times to the present, with attention to bibliography, research methods and needs, and leading issues in interpretation. LEC.

HIST 880. Colloquium in Iberian World History. 3 Hours.
A graduate colloquium focused on a historical topic that examines from a transregional perspective the historical foundations, development, and colonial heritage of regions and societies touched by Iberian expansionism. LEC.

HIST 881. Slavery in the Atlantic World. 3 Hours.
A graduate colloquium examining the historical roots, processes, experiences, and legacies of human slavery from local, regional, comparative, and global perspectives. LEC.

HIST 882. Gender, Sexuality, and Family in Iberian. 3 Hours.
A graduate colloquium that develops theoretical approaches and examines historical case studies focused on the social and cultural construction of gender roles, sexual identities, family structures, and living strategies for peoples and places touched by Iberian expansionism. LEC.

HIST 883. Ethnohistory of the Americas. 3 Hours.
A graduate colloquium that develops methodologies and examines historical case studies for the study of ethnicity, interethnic relations, and cultural hybridity from a hemispheric perspective, not only for indigenous peoples, but also for African-, Asian-, European-, or Pacific-derived groups, as well as new ethnic groupings and identities that emerged from their interaction. LEC.

HIST 890. Colloquium in American History 1492-1800. 3 Hours.
Study of the leading interpretations of major issues in the history of Colonial and Revolutionary America, including appropriate attention to new approaches and techniques in research. The first course in the sequence of colloquia in United States history. Required of all U.S. history graduate students. LEC.

HIST 891. Colloquium in 19th Century U.S. History. 3 Hours.
Study of the leading interpretations of major issues in the history of the United States in the 19th century. The third course in the sequence of colloquia in United States history. LEC.

HIST 892. Colloquium in 20th Century U.S. History. 3 Hours.
Study of the leading interpretations of major issues in the history of the United States in the 20th century. The third course in the sequence of colloquia in United States history. LEC.

HIST 895. Colloquium in the History of Gender. 3 Hours.
This colloquium will cover theoretical and topical readings on the history of manhood, womanhood, and gender systems. (Same as AMS 835 and WGSS 835.) LEC.

HIST 896. Colloquium in United States Women's History. 3 Hours.
This colloquium will cover theoretical and topical readings on the history of women in the United States from the pre-contact period to the present.
It is designed to familiarize students with the most important and current historiography in the field. (Same as AMS 836 and WGSS 836.) LEC.

**HIST 897. Comparative Colloquium in Women’s History. 3 Hours.**
This colloquium will approach the history of women from a comparative perspective through theoretical and topical readings on women in at least two different cultures. (Same as AMS 837 and WGSS 837.) LEC.

**HIST 898. Colloquium in Material Culture and History. 3 Hours.**
This course provides an overview of theories and methods used in material culture studies and their application to historical research, writing, and presentation. Topics may vary from semester to semester, but could include vernacular architecture, museum studies, anthropology, cultural geography, historical archeology, and perceptual theory. The course will consist of intensive reading, discussion, and written work. While it is not limited to a particular geographical or chronological area, or discipline, given the state of the field most topics will be drawn from U.S. history. LEC.

**HIST 900. Independent Research Seminar: _____ 3 Hours.**
Design and completion of an independent project, culminating in the production of a professional-quality paper based on original, primary source research. Prerequisite: Consent of the instructor. LEC.

**HIST 901. Research Seminar in Global History. 3 Hours.**
A research seminar oriented around cross-regional, comparative, and transnational aspects of history, culminating in production of a professional-quality paper based in original, primary source research. SEM.

**HIST 910. Seminar in Roman History: _____ 3 Hours.**
A research seminar in specialized aspects of Roman history. May be repeated for credit. LEC.

**HIST 913. Numismatics as a Basis for Study of Roman Noble Families of the Late Republic. 3 Hours.**
A seminar involving the study of the importance and influence of the noble families of Rome on Roman history (200-27 B.C.) with special emphasis on the literary and numismatic evidence. Reading knowledge of Latin will be essential for this course. LEC.

**HIST 914. The Major Roman Historians. 3 Hours.**
An analysis and criticism of the works of the most significant Roman historians from Sallust to Ammianus Marcellinus, including a comparison and contrast between the Latin and Greek historians who wrote during the Graeco-Roman period (150 B.C.-378 A.D.). LEC.

**HIST 918. Elements of Latin Paleography. 3 Hours.**
Introduction to the techniques of reading, dating, and localizing medieval Latin manuscripts. LEC.

**HIST 919. Seminar in Medieval Europe. 2-6 Hours.**
LEC.

**HIST 929. Seminar in Modern European History: _____ 2-5 Hours.**
A study of sources in some restricted fields and the presentation of research results. A reading knowledge of French or German or some other modern language is desirable. LEC.

**HIST 930. Seminar in British History. 3 Hours.**
A research seminar focusing on new, actively-investigated and controversial themes in British history, chiefly c. 1660-1832. LEC.

**HIST 932. Order and Disorder in Britain and America, c. 1750-1920. 3 Hours.**
The study of the history of crime and protest in their relationship with the wider social and political theory of Britain and America. Specific topics may include the impact of industrialization, the notion of the ‘moral economy,’ the legal and ideological nature of the death penalty, the crowd in history, and the administrative and intellectual developments in policing, prisons, and asylums. LEC.

**HIST 934. Seminar in Modern European History. 1-12 Hours.**
A research and thesis seminar offered by several members of the Standing Field Committee in Modern European History. Students seeking advanced degrees in European history from the Renaissance to the present will enroll each semester for work on their theses and dissertations. May be repeated. LEC.

**HIST 946. Seminar in the Middle East. 3 Hours.**
A research seminar in Middle East history, with emphasis on the 19th and 20th centuries. The European impact on and relationships with the Middle East are stressed. LEC.

**HIST 949. Seminar in Modern Russian History. 3 Hours.**
A focus on major problems of historical interpretation and research investigation from Peter the Great to the present. LEC.

**HIST 950. Seminar in Latin American History. 3 Hours.**
A research seminar focused on a major theme or problem in Latin American history. LEC.

**HIST 951. Seminar in Latin American Revolutions. 3 Hours.**
This seminar focuses on sweeping socio-political upheavals such as occurred in Mexico in 1910, Guatemala in 1944, Bolivia in 1952, Cuba in 1959, and Nicaragua in 1979. After considering various sociological and political theories of revolution the seminar searches for an understanding of the basic reasons for revolutions in the countries mentioned (and failure of revolutionary efforts elsewhere) and possible common characteristics of the Latin American revolutionary process. LEC.

**HIST 952. Seminar in Ideology, Violence and Social Change in Latin America. 3 Hours.**
Research seminar focusing on the role of ideas and ideologies, values and cultural norms in the history of Latin America. Political action, including rebellions, movements and strikes by the masses and efforts toward social control by elites will also be a major theme. Finally the course will examine the meaning of “social change” for Latin America and when it can be said that “social change” actually occurs. LEC.

**HIST 955. Seminar in East Asian History. 3 Hours.**
A research seminar in East Asian history. Prerequisite: Open only to graduate students having a reading knowledge of at least one East Asian language. LEC.

**HIST 962. Seminar in American History. 1-12 Hours.**
A research and thesis seminar offered by several members of the Standing Field Committee in United States History. Students seeking advanced degrees in United States history will enroll in the seminar for theses and dissertation credit. May be repeated. LEC.

**HIST 964. Seminar in American Colonial History. 3 Hours.**
An intensive, research-oriented study of American history from the 1580s to the 1760s. The course will cover both British America and New France. May be repeated. LEC.

**HIST 965. The American Revolutionary Experience. 3 Hours.**
An intensive, research-oriented study of American history from 1760 to1800. May be repeated. LEC.

**HIST 971. Recent American History, 1920 to the Present. 3 Hours.**
LEC.

**HIST 973. Seminar in United States Women’s History. 3 Hours.**
This research seminar will focus on the history of women in the United States from the pre-contact period to the present. Students will research and write a paper using primary sources, and present those papers to the seminar for evaluation. (Same as AMS 973 and WGSS 873.) LEC.
HIST 974. Seminar in American History: ______. 3 Hours.
A research course focusing on selected topics in history. LEC.

HIST 975. Seminar in the History of United States Foreign Relations. 3 Hours.
An intensive study of United States foreign policy during a selected period. LEC.

HIST 980. Seminar in the Trans-Mississippi West. 1-5 Hours. LEC.

HIST 981. Seminar in Environment and History. 3 Hours.
An inquiry into major issues and methods in environmental history, viewed from both an American and modern world perspective. LEC.

HIST 982. Colloquium in the History of the American West. 3 Hours.
Study of issues and interpretations in the history of the American West from prehistory to the present, including attention to new approaches and techniques in research. LEC.

HIST 986. Seminar in Historiography of Science. 3 Hours.
Examines the various patterns of interpretation influencing current historiography of science: the substance and impact of "internalist" history, which deals with the evolution of scientific ideas; the diversity of "externalist" history, which stresses interaction between the scientist's activity and social environment. Readings and discussions will assess intellectual, chronological, socio-economic, theological, philosophical, national, institutional and literary aesthetic influences on the history of science. LEC.

HIST 998. Portfolio Preparation. 1-6 Hours.
Writing and editing of materials in the student's professional portfolio. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission of the instructor. RSH.

HIST 999. Doctoral Dissertation. 1-12 Hours.
An inquiry into the source material upon a specific subject. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor. THE.

Bachelor of Arts and Bachelor of General Studies in History

Why study history?
Because it's our past, your future.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

History Program

The history major allows students to explore the richness and diversity of human experience in the past while building skills of analysis, interpretation, research, and communication. All history majors gain knowledge of significant historical transformations that have shaped the world. History majors learn to think critically, to conduct historical research, and to present the results of their research in clear and coherent writing.

First- and Second-Year Preparation

Prospective majors are encouraged to enroll in 1 or 2 introductory courses at the 100 or 200 level in the first 2 years. Many introductory history courses fulfill the College’s HT or NW principal course requirements, and prospective majors might choose one of them to explore their interests in history. Students who come to KU with AP or transfer credit should be aware that only 6 hours of history course work numbered 100-299 may be counted toward the major. Students interested in history as a major are encouraged to meet with a department advisor early in their careers at KU to discuss their academic goals and interests. Contact the undergraduate secretary to schedule an advising appointment.

Requirements for the B.A. or B.G.S. Major

History Major Core Knowledge and Skills (3)

Majors must complete a course in the following area:

The Historian's Craft. Satisfied by:
HIST 301 The Historian’s Craft 3
or HIST 302 The Historian's Craft, Honors

History Required Electives (24)

Majors must complete 5 courses (15 hours) in either category below; 24
3 courses (9 hours) are required from the other category below:

History Category I: Western Orientation. Satisfied by courses in
Ancient, Medieval, Modern Western Europe, History of Science,
Russia/Eastern Europe, United States:

HIST 103 Environment and History
HIST 105 Introduction to Ancient Near Eastern and Greek History
HIST 106 Introduction to Roman History
HIST 107 Introduction to the Ancient World
HIST 108 Medieval History
HIST 112 Introduction to British History
HIST 114 Renaissance to Revolution: Europe 1500-1789
HIST 115 French Revolution to the Present: Europe 1789-Present
HIST 116 French Revolution to the Present: Europe 1789 to Present, Honors
HIST 117 Russia, an Introductory History
HIST 128 History of the United States Through the Civil War
HIST 129 History of the United States After the Civil War

HIST 126 History of the United States After the Civil War

HIST 127 History of the United States Through the Civil War

HIST 129 History of the United States After the Civil War

### History Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

#### Major Hours

Satisfied by 30 hours of major courses. No more than 2 HIST 492 Readings in History courses may be applied to the major. Only courses taken in the Department of History or cross-listed in other units are accepted for credit toward the major.

#### Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior Hours

Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major. Of these 24 hours, at least 6 hours (two courses) must be taken at the 500-699 level (in addition to HIST 696).

#### Major Junior/Senior Graduation (300+) GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

### Graduation Plan

With careful planning and commitment to a full-time course load, you can graduate in 4 years. Consult the department for details.

### Double Majors

Many history majors choose to pursue a second major. Fulfilling the requirements of 2 majors in a timely fashion requires careful choice of courses. Consult a department advisor.

A sample 4-year plan for the BA degree in History can be found here: History (p. 1546), or by using the left-side navigation.

### Departmental Honors

The honors program in history allows exceptional undergraduates to work closely with faculty members on a research project. To graduate with honors, a student must complete the requirements for the major in history, including HIST 301 but excluding HIST 696 Seminar.

Students in the honors program also must take HIST 498 Undergraduate History Honors Seminar and HIST 490 Honors Course in History, directed research. Usually, HIST 490 is offered in the fall semester and HIST 498 in the spring. Or a prospective honors student may complete HIST 696 and, by invitation, enroll in HIST 490 to develop the seminar paper into an honors thesis.

Prospective honors candidates are encouraged to select a thesis topic and thesis director in the junior year. The honors seminar helps students write their theses and allows them to learn from each other in a small-group setting. The honors coordinator assists students during both semesters.

To enroll in the program requires at least

1. A 3.5 grade-point average in history and a 3.25 overall cumulative grade-point average, which must be maintained throughout the student’s final years of enrollment; and
2. Acceptance by a thesis director, a history faculty member, before entering the program.

Each student who completes an honors thesis must defend it in an oral examination before a thesis committee of 3 faculty members. The student’s thesis director chairs and chooses the committee in consultation with the student and the honors coordinator. In most cases, the committee is composed of history faculty members. A student who wants the committee to include faculty members from outside the department should inform the thesis director by March 1. A copy of the thesis is deposited in the department.

Petitions for exceptions to these regulations should be submitted to the honors coordinator.

### BA in History

Below is a sample 4-year plan for students pursuing the BA in History. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

</table>

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Must be a declared History major in order to enroll in HIST 301. See a departmental advisor to declare.

4. History majors must complete 5 courses (15 hours) in History electives that fulfill either Category I or Category II distribution within the major. 3 courses (9 hours) are required for the other category. Of these 24 hours, only two courses can be taken at the 100-299 level, and a minimum of 2 courses must be taken at the 500-699 level.

Please note:

- All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.
- The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Minor in History

Required Minor Course 300+ (BGS Requirement) 3 3 Required Minor Course 300+ (BGS Requirement) 3

Elective 300+ (Total Hours) 3 Elective (Total Hours) 3

Elective (Total Hours) 3 Elective (Total Hours) 3

Total Hours: 120

1 Must be a declared History major in order to enroll in HIST 301. See a departmental advisor to declare.

2 History majors must complete 5 courses (15 hours) in History electives that fulfill either Category I or Category II distribution within the major. 3 courses (9 hours) are required for the other category. Of these 24 hours, only 2 courses at the 100-200 level can apply toward the major and at least 2 courses must be taken at the 500-699 level.

3 Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in History

Why study history?

Because it’s our past, your future.

Requirements for the Minor

History Minor Course Requirements

Students selecting this minor must complete the following:

History Category I: Western Orientation (6)

Satisfied by two courses (6 hours) from the following: 6

HIST 103 Environment and History
HIST 105 Introduction to Ancient Near Eastern and Greek History
HIST 106 Introduction to Roman History
HIST 107 Introduction to the Ancient World

HIST 108 Medieval History
HIST 112 Introduction to British History
HIST 114 Renaissance to Revolution: Europe 1500-1789
HIST 115 French Revolution to the Present: Europe 1789-Present
HIST 116 French Revolution to the Present: Europe 1789 to Present, Honors
HIST 117 Russia, an Introductory History
HIST 128 History of the United States Through the Civil War
HIST 129 History of the United States After the Civil War
HIST 136 Early Science to 1700
HIST 140 Global Environment I: The Discovery of Environmental Change
HIST 142 Global Environment II: The Ecology of Human Civilization
HIST 303 Sin Cities
HIST 304 1642, 1688, 1776: Three British Revolutions
HIST 305 The Scientific Revolution
HIST 306 Science and Western Culture
HIST 308 Key Themes in Modern Global History

### History Minor Hours & GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

#### Minor Hours

Satisfied by 18 hours of minor courses.

#### Minor Hours in Residence

Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

#### Minor Junior/Senior (300+) Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

#### Minor Graduation GPA

Satisfied by a minimum of a 2.0 GPS in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

### Master of Arts in History

The Department of History (http://www.history.ku.edu) at the University of Kansas is a dynamic place, with a proud tradition of training scholars from across the globe who have transformed the practice of history. The program offers major or minor concentrations in the areas of United States, African American, Modern European, British & Imperial, Russian/East European, East Asian, Latin American, African, Medieval, Women and Gender, Military, and Environmental History. KU offers its graduate students great flexibility in their choice of fields, as defined both by traditional geographical and chronological parameters and thematic
topics. Students also have the opportunity to take coursework outside the department in fields such as Public History, Museum Studies, Environmental Studies, and the History of Medicine.

Primarily a doctoral program, the Department currently enrolls approximately 80 graduate students from throughout the United States and the world, including Japan, China, Peru, and Russia. Our students make up a very diverse group, and we encourage applicants from traditional and non-traditional backgrounds.

For statistics regarding our program, please see our Doctoral Program Profile (http://www.graduate.ku.edu/sites/graduate.drupal.ku.edu/files/docs/dpp/DPP_A_HiST.pdf), which demonstrates our success at funding and placing current and recent graduates.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Graduate applicants are expected to contact their prospective advisors in advance. It is useful to discuss shared research interests, and to inquire whether the faculty member is taking new students, and to decide whether this can become a productive relationship. This faculty advisor will then be able to more effectively advocate for the applicant’s candidacy based upon this correspondence.

Candidates requesting consideration for admission to the MA, MA/PhD, or PhD program in History must complete the online application through the KU Office of Graduate Studies (http://www.graduate.ku.edu/ku-graduate-application). Information about minimum requirements and codes for GRE or TOEFL tests can be found on this site. Note that documents, including a writing sample and transcripts, should be uploaded to the application. There is no need to send hard copies of application materials to the History Department. When you submit your online application, it is made available to the Department of History. The application deadline for Fall 2017 entry is January 1, 2017. International applicants need to submit their materials by December 15, 2016.

When you apply, specify to which program you intend to join: MA only, the MA/PhD, or the PhD. We recommend that candidates seeking admission directly into the PhD program first earn an MA in History or a related field. The application materials that each candidate must submit are:

- **Statement of Academic Objectives**, including a clear plan for graduate research in a specific field of study
- **Curriculum Vitae**
- **Writing Sample** demonstrating independent historical research and analysis (20-25 pages maximum)
  - Submit a writing sample that best represents your scholarly abilities: The Department is interested in reviewing your well-crafted, persuasively argued sample. Such papers are often derived from an upper-level undergraduate history class in which you conducted independent research and employed both primary and secondary sources. If you have an MA in history, the writing sample should be taken from your thesis or a major paper written in a graduate seminar.
- **GRE Scores**, conveyed from ETS to the University of Kansas (School Code 6871)
- **Official Transcript** from each institution that has granted you a degree, or at which you are currently enrolled
- Three letters of recommendation – The letters can be directly uploaded online directly by those who write the recommendations, or they can be mailed to the Department of History, ATTN: Graduate Administrator, 1445 Jayhawk Boulevard, Wescoe 3650, University of Kansas, Lawrence, KS 66045. A recommendation form for hard copy letters can be downloaded here (http://www.graduate.ku.edu/sites/graduate.drupal.ku.edu/files/docs/ApplicationProcess/KULetterOfRecForm.pdf).

M.A. Degree Requirements

The master’s program in history requires satisfactory completion of 30 credit hours of graduate courses including at least 6 hours in history research seminars and the passing of a comprehensive oral examination.

Soon after admission, the student should select a faculty member as his or her advisor. The advisor directs the student’s work and advises the student about selecting Option A or Option B.

Option A

3 fields of history

The fields are the equivalent of secondary fields drawn from 3 different major fields. With the consent of departmental advisors, when a student’s program warrants a substitution, she or he may substitute an allied field outside the department that provides vital support for the program (e.g., substituting international relations for U.S. diplomatic history). At least 9 hours of course work must be taken in each of the 3 fields. Students must take HIST 805.

9 hours of work in courses numbered HIST 801 or higher and 6 hours of research seminar are required. Normally, at least 3 hours of seminar under each program should be taken with the student’s program advisor, who chairs the oral examining committee.

All master’s candidates must produce 2 professional-quality, article-length papers (approximately 30 pages) in the 2 required seminars. The final oral examination for the master’s degree includes questions concerning the papers as well as coverage of the student’s major and secondary fields.

Option B

A major field and 1 secondary field

At least 2 history faculty members must serve on the student’s M.A. committee for the major field. At least 18 hours of course work in the major field and 9 hours in the secondary field must be taken. Students must take HIST 805.

9 hours of work in courses numbered HIST 801 or higher and 6 hours of research seminar are required. Normally, at least 3 hours of seminar under each program should be taken with the student’s program advisor, who chairs the oral examining committee.
All master’s candidates must produce 2 professional-quality, article-length papers (approximately 30 pages) in the 2 required seminars. The final oral examination for the master’s degree includes questions concerning the papers as well as coverage of the student’s major and secondary fields.

Doctor of Philosophy in History

The Department of History (http://www.history.ku.edu) at the University of Kansas is a dynamic place, with a proud tradition of training scholars from across the globe who have transformed the practice of history. The program offers major or minor concentrations in the areas of United States, African American, Modern European, British & Imperial, Russian/East European, East Asian, Latin American, African, Medieval, Women and Gender, Military, and Environmental History. KU offers its graduate students great flexibility in their choice of fields, as defined both by traditional geographical and chronological parameters and thematic topics. Students also have the opportunity to take coursework outside the department in fields such as Public History, Museum Studies, Environmental Studies, and the History of Medicine.

Primarily a doctoral program, the Department currently enrolls approximately 80 graduate students from throughout the United States and the world, including Japan, China, Peru, and Russia. Our students make up a very diverse group, and we encourage applicants from traditional and non-traditional backgrounds.

For statistics regarding our program, please see our Doctoral Program Profile (http://www.graduate.ku.edu/sites/graduate.drupal.ku.edu/files/docs/dpp/DPP_A_HIST.pdf), which demonstrates our success at funding and placing current and recent graduates.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Graduate applicants are expected to contact their prospective advisors in advance. It is useful to discuss shared research interests, and to inquire whether the faculty member is taking new students and to decide whether this can become a productive relationship. This faculty advisor will then be able to more effectively advocate for the applicant’s candidacy based upon this correspondence.

Candidates requesting consideration for admission to the M.A., M.A./Ph.D., or Ph.D. program in History must complete the online application through the KU Office of Graduate Studies (http://www.graduate.ku.edu/ku-graduate-application). Information about minimum requirements and codes for GRE or TOEFL tests can be found on this site. Note that documents, including a writing sample and transcripts, should be uploaded to the application. There is no need to send hard copies of application materials to the History Department. When you submit your online application, it is made available to the Department of History. The application deadline for Fall 2017 entry is January 1, 2017. International applicants need to submit their materials by December 15, 2016.

When you apply, specify which program you intend to join: M.A. only, the M.A./Ph.D., or the Ph.D. We recommend that candidates seeking admission directly into the Ph.D. program first earn an M.A. in History or a related field.

The application materials that each candidate must submit are:

• Statement of Academic Objectives, including a clear plan for graduate research in a specific field of study
• Curriculum Vitae
• Writing Sample demonstrating independent historical research and analysis (20-25 pages maximum)
  • Submit a writing sample that best represents your scholarly abilities: The Department is interested in reviewing your well-crafted, persuasively argued sample. Such papers are often derived from an upper-level undergraduate history class in which you conducted independent research and employed both primary and secondary sources. If you have an M.A. in history, the writing sample should be taken from your thesis or a major paper written in a graduate seminar.
• GRE Scores, conveyed from ETS to the University of Kansas (School Code 6871)
• Official Transcript from each institution that has granted you a degree, or to which you are currently enrolled
• Three letters of recommendation – The letters can be directly uploaded online directly by those who write the recommendations, or they can be mailed to the Department of History, ATTN: Graduate Administrator, 1445 Jayhawk Boulevard, Wescoe 3650, University of Kansas, Lawrence, KS 66045. A recommendation form for hard copy letters can be downloaded here (http://www.graduate.ku.edu/sites/graduate.drupal.ku.edu/files/docs/ApplicationProcess/KULetterOfRecForm.pdf).

Ph.D. Degree Requirements

Students normally must complete the M.A. degree before they are eligible to enter the Ph.D. program. Students who enter the M.A. program may either complete the degree or petition for direct admission to the Ph.D. program. This petition must be endorsed by the student’s advisor and the field committee and then be approved by the department’s graduate board.

In addition to general requirements, the following departmental requirements must be met. A minimum of 11 courses (33 credit hours) is required for the Ph.D. Students may choose between 2 options for their course work.

Research Skills and Responsible Scholarship

The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. In order to fulfill these requirements, all graduate students in History must take HIST 805 and become certified in a foreign language before taking the comprehensive oral exam.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and
 Responsible Scholarship are listed in the Graduate Studies section of the online catalog and in the KU Policy Library.

**Track A**

Students select a major and 2 secondary fields. The major field includes 6 courses (18 credit hours). The secondary fields include 2 courses (6 credit hours), for a total of 12 credit hours; 1 of the secondary fields may be taken in a discipline outside the department, but a student may offer all 3 fields in history. Students must take HIST 805.

For both Track A and Track B, the major and secondary fields are those listed in this catalog or approved by the graduate board.

The department requires proficiency, at the level the student’s committee deems necessary, in 1 or 2 foreign languages appropriate to the student’s fields of specialization. Students should present satisfactory evidence of proficiency in the first language before enrollment in the second semester of degree work. Appropriate proficiency in the second language (if necessary) must be achieved before the student may take the oral comprehensive examination.

Before taking the oral comprehensive examination, students must complete (in addition to the language requirement) a minimum of 5 colloquia and seminars, including 2 in the major field(s) and 1 in each secondary field. At least 2 of the 5 must be research seminars in which the student produces professional-quality, article-length papers (approximately 30 pages).

In lieu of written examinations, students compile portfolios of their professional work demonstrating command of their fields and their preparation to undertake dissertation research. Following presentation of the portfolio, students take an oral examination covering their fields of study and their dissertation proposals.

**Track B**

Students select 2 major fields, for which they take a total of 8 courses (24 credit hours), and 1 secondary field, for which they take 2 courses (6 credit hours). The secondary field may be taken in a discipline outside the department, but a student may offer all 3 fields in history. Under the major fields, students may choose a 4/4 or a 5/3 configuration for their 8 courses. Students must take HIST 805.

For both Track A and Track B, the major and secondary fields are those listed in this catalog or approved by the graduate board.

The department requires proficiency, at the level the student’s committee deems necessary, in 1 or 2 foreign languages appropriate to the student’s fields of specialization. Students should present satisfactory evidence of proficiency in the first language before enrollment in the second semester of degree work. Appropriate proficiency in the second language (if necessary) must be achieved before the student may take the oral comprehensive examination.

Before taking the oral comprehensive examination, students must complete (in addition to the language requirement) a minimum of 5 colloquia and seminars, including 2 in the major field(s) and 1 in each secondary field. At least 2 of the 5 must be research seminars in which the student produces professional-quality, article-length papers (approximately 30 pages).

In lieu of written examinations, students compile portfolios of their professional work demonstrating command of their fields and their preparation to undertake dissertation research. Following presentation of the portfolio, students take an oral examination covering their fields of study and their dissertation proposals.

**Department of History of Art**

**Why study the history of art?**

The study of the visual arts in their historical contexts enriches our understanding of human creativity and the human condition. It provides students with the cultural literacy and critical thinking, research, and communication skills that are relevant for a variety of careers, including in art museums, galleries, and collections, as well as schools, universities, publishers and archives. The study of art history can also provide the foundation for a career in other professions such as business, law, media, or government.

**Undergraduate Programs**

The curriculum introduces the student to the visual arts of the past and the present. Courses cover the arts of ancient, medieval, and early modern Europe, the Mediterranean, and the Near East, modern Europe, the United States, Africa, and East Asia, including China, Japan, Korea, and the art of Buddhism. Courses are offered in the history of photography, prints, and drawings.

Several introductory courses are offered every semester. These include 1- and 2-semester surveys in Western art (HA 100, HA 300, HA 150, and HA 151), HA 261 Introduction to Modern Art, HA 165 Introduction to Asian Art, HA 166 The Visual Arts of East Asia, HA 367 Art and Culture of Japan, HA 368 Art and Culture of China, HA 369 Art and Culture of Korea, and HA 330 Italian Renaissance Art.

**Courses for Nonmajors**

All courses are open to nonmajors if they have the necessary prerequisite, which in most cases is one of the introductory courses. An undergraduate advisor counsels nonmajors who need help selecting a course.

**Graduate Programs**

The department offers M.A. and Ph.D. degrees in European, American, and/or East Asian art history. The M.A. provides students with a broad knowledge of the visual arts in those fields, as well as an introduction to the basic concepts and methods of the discipline. The M.A. may be pursued as a terminal degree or as preparation to petition for specialized doctoral studies at KU or to apply elsewhere. The Combined M.A./Ph.D. is intended for students who want to pursue the Ph.D. in art history at KU, but who do not yet hold the M.A. degree in art history. The Ph.D. degree offers the opportunity for advanced research and concentration to students who hold the M.A. degree in art history from KU or elsewhere. Both the Combined M.A./Ph.D. and Ph.D. students are eligible for competitive funding packages and GTA, GRA, and GA positions.

**Courses**

HA 100. Introduction to Western Art History. 3 Hours HT AE42/GE3H. A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors.
Does not count toward the 30 required hours in the major. Not open to students with credit in HA 103, HA 150, HA 151, HA 160, HA 161, or HA 300. LEC.

HA 103. Introduction to Western Art History, Honors. 3 Hours HT AE42/GE3H / H.
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not fulfill the 30 required hours in the major. Not open to students with credit in HA 100, HA 150, HA 151, HA 160, HA 161, HA 300, or HA 303. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HA 105. Special Study: ____. 1-6 Hours H.
This course is designed for the study of special topics in art history at the introductory level, including courses taken in the study abroad program. May deal with individual artists, special themes, or other topics not generally covered in courses offered by the department. May be repeated for credit if content varies. LEC.

HA 150. History of Western Art: Ancient Through Medieval. 3 Hours HT AE42/GE3H / H.
A survey of the art of earlier periods in the West, from prehistoric times through the middle ages in Europe, with special emphasis on the relationship between artistic developments and cultural changes. Not open to students with credit in HA 160. LEC.

HA 151. History of Western Art: Renaissance to Contemporary. 3 Hours GE3H / H.
A survey of art in the West from the Renaissance to the contemporary period in Europe and America, with special emphasis on the achievements of individual artists in relation to the cultural movements of their times. Not open to students with credit in HA 161. LEC.

HA 160. History of Western Art: Ancient Through Medieval, Honors. 3 Hours HT AE42/GE3H / H.
A survey of the art of earlier periods in the West, from prehistoric times through the middle ages in Europe, with special emphasis on the relationship between artistic developments and cultural changes. Not open to students with credit in HA 150. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HA 161. History of Western Art: Renaissance to Contemporary, Honors. 3 Hours GE3H / H.
A survey of the art in West from the Renaissance to the contemporary period in Europe and America, with special emphasis on the achievements of individual artists in relation to the cultural movements of their times. Not open to students with credit in HA 151. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HA 165. Introduction to Asian Art. 3 Hours HT/NW AE42/GE3H / H/W.
An introduction to the visual arts of India, China, Korea, and Japan. Emphasis is placed on cultural context, including religion, social class and gender, and on cultural interactions between these countries. LEC.

HA 166. The Visual Arts of East Asia. 3 Hours HT/NW AE42/GE3H / H.
An introduction to the visual arts of China, Korea, and Japan, with equal time given to each country. Emphasis will be placed on cultural context, including religion, social class and gender, and on cultural interactions between the three countries. LEC.

HA 177. First Year Seminar: ____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in History of Art. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HA 261. Introduction to Modern Art. 3 Hours HT GE3H / H.
A general survey of painting, sculpture, architecture, and graphic art of the 19th and 20th centuries. Emphasis is placed on major movements and their artists, including Neo-Classicism, Romanticism, Realism, Impressionism, Post-Impressionism, Fauvism, Expressionism, Cubism, Surrealism, Abstract Art, Pop Art, and the developments of the contemporary period. LEC.

HA 300. Introduction to Western Art History. 3 Hours HT AE42/GE3H / H.
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not count toward the 30 required hours in the major. Not open to students with credit in HA 100, HA 103, HA 150, HA 151, HA 160, HA 161, or HA 303. LEC.

HA 303. Introduction to Western Art History, Honors. 3 Hours HT / H.
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not count toward the 30 required hours in the major. Not open to students with credit in HA 100, HA 103, HA 150, HA 151, HA 160, HA 161, or HA 300. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HA 305. Special Study: ____. 1-6 Hours H.
This course is designed for the study of special topics in art history, including courses taken in the study abroad program. May deal with individual artists, special themes, or other topics not generally covered in courses offered by the department. May be repeated for credit if content varies. LEC.

HA 307. Directed Readings. 1-6 Hours U.
Supervised study and research into special fields of art of particular interest to the student. Weekly consultation and reports. LEC.

HA 310. The Art and Architecture of Florence and Paris. 3 Hours H.
Taught in the Humanities and Western Civilization Program Abroad, this course examines the major movements that defined and shaped the art and architecture of Florence and Paris, with special attention to the Renaissance in Florence and the Gothic and modern periods in Paris. Through classroom lectures, readings, and visits to museums, churches, and other historic sites, selected works of art and architecture are analyzed in terms of their formal qualities, iconography, and cultural context. Prerequisite: Approval for enrollment in the Humanities and Western Civilization Study Abroad program through the KU Office of Study Abroad. LEC.
HA 311. The Art and Architecture of the British Isles. 3 Hours H.
Taught in the British Summer Institute in the Humanities Study Abroad program, this course offers an introductory survey of British art and architecture. Through classroom lectures, readings, and visits to museums, churches, and other historic sites, selected works of art and architecture are analyzed in terms of their formal qualities, iconography, and cultural context. Prerequisite: Approval for enrollment in the British Summer Institute in the Humanities Study Abroad program through the KU Office of Study Abroad. LEC.

HA 315. The Prehistory of Art. 3 Hours S.
A survey of prehistoric art focusing on the material record and interpretations of rock art (paintings, engravings on rock surfaces in rock-shelters, caves and in open air sites) and portable art created by prehistoric people. The emphasis is on the small-scale societies (hunter-gatherer and early food producers) around the world before the appearance of written records in respective geographic areas. Environmental, social and cultural contexts in which these art forms were created are discussed along with a review of past scholarship and current interpretive approaches to this old and enduring expression of human creativity. Course may be offered in lecture or online format. (Same as ANTH 315.) LEC.

HA 317. Greek and Roman Art. 3 Hours H/W.
A survey of the art of ancient Greece and Rome (ca. 1000 B.C.E. - 500 C.E.). Emphasis on major sites, architecture, sculpture, and painting. Illustrated lectures and discussion; use of the Wilcox Classical Museum. No knowledge of Greek or Latin is required. Not open to students who have taken both CLSX 526/HA 526 and CLSX 527/HA 537, except with permission of the instructor. (Same as CLSX 317, HWC 317.) LEC.

HA 330. Italian Renaissance Art. 3 Hours GE3H / H/W.
A survey of the art and architecture of Italy from c. 1300 to 1550. Special emphasis is placed on regional styles and the private, political, and devotional contexts in which works of art and architecture functioned. Some of the artists whose works are considered are Giotto, Duccio, Donatello, Botticelli, Leonardo, and Michelangelo. LEC.

HA 340. Special Study in Asian Art Before 1900: _____, 1-6 Hours H.
This course is designed for the study of special topics in Asian art before 1900, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 341. Special Study in Islamic Art, 14th-17th Century: _____, 1-6 Hours H.
This course is designed for the study of special topics in Islamic art of the 14th-17th centuries. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels LEC.

HA 342. Special Study in 18th/19th-Century European or American Art: _____, 1-6 Hours H.
This course is designed for the study of special topics in European or American art of the 18th and/or 19th centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels LEC.

HA 343. Special Study in 20th/21st-Century Art: _____, 1-6 Hours H.
This course is designed for the study of special topics in art of the 20th and/or 21st centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 353. Modern and Contemporary African Art. 3 Hours H.
In this course, we examine the development of artistic modernisms in Africa in historical context. We also study the content, production, patronage, and display of modern and contemporary African art. In doing so, we consider African artists' engagement with modernity, globalization, and contemporary issues, as well as interrogate influential myths and assumptions regarding African artists and the work they produce. Course themes include the workshop as a critical site, independence movements and the creation of national art forms, art as global commodity, and art in resistance, remembrance, and revolution. (Same as AAAS 353.) LEC.

HA 354. Japanese Prints. 3 Hours NW / H/W.
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized historically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500-levels with additional work required at the 500-level. LEC.

HA 361. Buddhist Art of Korea. 3 Hours H.
Introduction to the history of Buddhist temple buildings, paintings, sculptures and illuminated hand-scrolls in Korea from the 4th through the 19th centuries, with special emphasis on their stylistic, geographical, social, devotional and literary contexts. Current theories and controversies pertinent to the history and study of Korean Buddhist art are also addressed. Not open to students who have taken HA 561 or REL 511. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. Prerequisite: A college level introduction to Asian art history, or consent of instructor. LEC.

HA 362. Ceramics of Korea. 3 Hours H.
A survey covering the history of Korean ceramics from prehistoric times through the early modern period, with special emphasis on their stylistic, geographical, social and political context. Topics include celadon-glazed, stamped and slip-decorated stoneware, Korean ceramics related to the Japanese tea ceremony and Mingei pottery. Not open to students who have taken HA 562. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. Prerequisite: A college level introduction to Asian art history, or consent of instructor. LEC.

HA 363. Modern Korean Art and Culture. 3 Hours AE42 / H.
This course is a thematic introduction to Korean art and culture with an emphasis on modern and contemporary Korea. Pre-modern works are contextualized with respect to contemporary issues. Students learn how to conduct a comprehensive analysis of an artwork by considering the political, historical and social conditions of its time within a broader East Asian cultural framework. Prerequisite: An introductory course in art history at the college level, or consent of instructor. LEC.

HA 367. Art and Culture of Japan. 3 Hours NW AE42/GE3H / H/W.
An introduction to the arts of Japan in historical and cultural context. Visual arts are stressed. LEC.

HA 368. Art and Culture of China. 3 Hours NW AE42/GE3H / H/W.
An introduction to the arts of China in historical and cultural context. Visual arts are stressed. LEC.

HA 369. Art and Culture of Korea. 3 Hours NW AE42/GE3H / H/W.
An introduction to the arts of Korea in historical and cultural context. Visual arts are stressed. LEC.
HA 370. American Art. 3 Hours H.
A survey of American painting, sculpture, and architecture from colonial to recent times. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 372. Baroque Art in Europe. 3 Hours H.
This course surveys significant 17th-century paintings, sculpture and architecture that were produced in Italy, Spain, France and the Southern and Northern Netherlands. Artists whose works are discussed include Caravaggio, Bernini, Velazquez, Rubens, Rembrandt and Vermeer. Artistic elements of individual works, major changes in patronage, and the religious, political, economic and cultural contexts in which the art was produced are examined. Assigned readings present a range of methodological perspectives. LEC.

HA 376. West African Art. 3 Hours NW / H/W.
Introduction to the rich visual art traditions of West Africa. Emphasis is given to the major art-producing cultures of the Western Sudan and the Guinea Coast, including the pre-historic cultures of Nigeria, Mali, and Ghana. The diverse forms of figure sculptures and masquerade performance and meanings of these arts in historical and cultural contexts are examined. (Same as AAAS 376.) LEC.

HA 380. History of Photography. 3 Hours H.
An introduction to the history of photography as a means of artistic expression and visual communication. Special attention is placed on the relation between developments in photography and the artistic and cultural context of the time. LEC.

HA 388. Modern and Contemporary Visual Arts of Japan. 3 Hours H.
This course covers Japanese visual arts from the Meiji era (1868-1912) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan's modernization and modernity. The course is taught at the 300 and 500-levels with additional work required at the 500-level. LEC.

HA 390. Special Study in African Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in African art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 391. Special Study in Asian Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in Asian art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 392. Special Study in Ancient Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in ancient art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 393. Special Study in Medieval Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in medieval art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 394. Special Study in Renaissance Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in Renaissance art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 395. Special Study in Baroque Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in Baroque art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 396. Special Study in American Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in American art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 397. Special Study in Modern Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in modern art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 467. Art and Culture of Japan, Honors. 3 Hours NW / H/W.
An introduction to the arts of Japan using fundamental principles and analytical methods of art history. Emphasis is placed on cultural contexts of art production, including history and religion. Honors version of HA 367, with more classroom discussion and opportunities for original research. Prerequisite: Membership in the University Honors Program or permission of the instructor. Not open to freshmen or students with credit in HA 267 or HA 367. LEC.

HA 468. Art and Culture of China, Honors. 3 Hours NW / H/W.
An introduction to the arts of China using fundamental principles and analytical methods of art history. Emphasis is placed on cultural contexts of art production, including history and religion. Honors version of HA 368, with more classroom discussion and opportunities for original research. Prerequisite: Membership in the University Honors Program or permission of the instructor. Not open to freshmen or students with credit in HA 268 or HA 368. LEC.

HA 469. Art and Culture of Korea, Honors. 3 Hours NW / H/W.
An introduction to the arts of Korea using fundamental principles and analytical methods of art history. Emphasis is placed on cultural contexts of art production, including history and religion. Honors version of HA 369, with more classroom discussion and opportunities for original research. Prerequisite: Membership in the University Honors Program or permission of the instructor. Not open to freshmen or students with credit in HA 269 or HA 369. LEC.

HA 488. Chinese Painting, Honors. 3 Hours NW / H/W.
A survey of the development of painting in China, beginning with the earliest forms of figural and landscape depiction. Emphasis will be placed on the major painting traditions of the Song, Yuan, Ming, and Qing Dynasties. Prerequisite: An introductory course in art history or Eastern Civilizations and membership in the University Honors Program or consent of instructor. LEC.

HA 498. Honors Essay in Art History. 3 Hours AE61 / H.
Required for departmental honors. A course of directed research and the preparation of a paper on an art history topic, supervised by a professor. Prerequisite: A grade-point average of 3.5 in art history and 3.25 in all courses, and consent of a major advisor and supervising professor. IND.

HA 500. Prints and Printmakers. 3 Hours H.
The major historical achievements in the field of printmaking, the artists who produced prints, and the impact of their work on the visual arts.
Lectures supplemented by work with original material. Prerequisite: An introductory course in Western art history at the college level and three further hours of history of art or consent of instructor. LEC.

HA 505. Special Study: ______. 1-6 Hours H.
This course is designed for the study of special topics in art history on a trial basis, open to both undergraduate and graduate students. Prerequisite: An introductory-level course in art history, appropriate to the specific special study topic; or consent of instructor. LEC.

HA 506. Early Medieval and Romanesque Art. 3 Hours H.
This course examines the art of Europe from the Early Christian era through the Romanesque period, up to 1200. Architecture, sculpture, manuscript illumination, metalwork and painting are explored in relation to their political, religious and social contexts. Graduate students can expect to complete additional reading and writing assignments. Prerequisite: HA 100 or HA 150, or permission of the instructor. LEC.

HA 507. Gothic Art. 3 Hours H.
This course examines the art of Europe during the Gothic period, from 1140-1500. Architecture, sculpture, manuscript illumination, metalwork, painting and furniture are explored in relation to their political, religious and social contexts. Graduate students can expect to complete additional reading and writing assignments. Prerequisite: HA 100 or HA 150, or permission of instructor. LEC.

HA 508. The Italian Renaissance Home. 3 Hours H.
This course explores the history of domestic art and architecture in Italy, with a special emphasis on Florence, from c. 1350 to 1600. Palace architecture, religious works made for private devotions, the increasing use of mythological themes in painting and sculpture, birth tryps, painted cassoni, majolica, and various types of portrait are examined within the contexts of contemporary theories of virtue and magnificence, the rituals of marriage and childbirth, the public and private promotion of political and personal agendas, and changing tastes. In addition to acquiring an in-depth knowledge of the artistic and architectural milieu of Italian Renaissance homes and expanding their cultural understanding, students enrolled in this course engage in a series of assignments designed to build and hone their reading, critical thinking, visual analysis, research, and writing skills. The same assignments allow students to integrate their knowledge of and to think creatively about the period, objects, and buildings in question. A high expectation of class participation and the opportunity to present their research provide students with the opportunity to build and strengthen their oral communications skills. Prerequisite: HA 100, HA 150, HA 151, HA 330, or the equivalent, or consent of instructor. LEC.

HA 510. Medieval Manuscripts and Early Printed Books. 3 Hours H.
Students study the history of the book from 300 to 1500 A.D., concentrating on the role of visual imagery in books and the place of books in medieval and renaissance culture. In addition to discussing the relation between text and image, and studying the stylistic contexts for ancient, medieval, and Renaissance illumination and early woodcut illustration, participants in this course consider such additional topics as methods of book production, the development of cycles of illustration for religious and secular books, and the relationship between manuscripts and early printed books. Lectures and discussion are supplemented by visits to the fine collection of manuscripts, printed books, and facsimiles in the Kenneth Spencer Research Library. Prerequisite: An introductory course in Western art history at the college level, or consent of the instructor. LEC.

HA 525. Aegean Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaeans, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). No knowledge of Greek or Latin is required. (Same as CLSX 525.) LEC.

HA 526. Greek Archaeology and Art. 3 Hours H.
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with an emphasis on the major sites, monuments, and changing forms of social and artistic expression (architecture, sculpture, vase painting, and other arts). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. No knowledge of Greek or Latin is required. For advanced undergraduates and graduate students with backgrounds in the humanities; and for graduate students (especially those in History of Art and Classics). (Same as CLSX 526.) LEC.

HA 527. Late Medieval Art in Italy. 3 Hours H.
This course examines the history of paintings, sculptures and buildings produced in Italy from c. 1250 to 1400. Important individual works, artists, and decorative complexes, such as Giotto's Scrovegni (Arena) Chapel, are analyzed in terms of their stylistic, geographical, social, historical, devotional, and literary contexts. Current theories and controversies pertinent to the history and study of 13th- and 14th-century Italian art are also addressed. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor. LEC.

HA 529. Archaeology and Art of the Ancient Near East. 3 Hours H.
This course examines the art of the ancient Near East from the Early Dynastic period to the end of the Persian Empire (ca. 4000 B.C.E. - 30 B.C.E.). Includes lectures with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). No knowledge of Greek or Latin is required. (Same as CLSX 529.) LEC.

HA 530. Renaissance Art in Italy: The 15th Century. 3 Hours H/W.
The focus of this course is the history of Italian painting, sculpture, and architecture from 1400 to 1500. Special emphasis is placed on the diverse artistic styles and functions of works of art, as well as on the artists and patrons that produced them. Domestic art and the art and architecture of the 15th-century Italian courts are also discussed. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor. LEC.

HA 531. Renaissance Art in Italy: The 16th Century. 3 Hours H.
This course explores the history of Italian painting, sculpture, and architecture from c. 1500 to 1600. It focuses on the artistic centers of Florence, Rome, Parma, and Venice. Some of the artists whose works is considered are Leonardo, Michelangelo, Raphael, Pontormo, Titian, Cellini, and Giambologna. The history of 16th-century women patrons and artists is also addressed. Prerequisite: HA 100, HA 150, HA 151, or the equivalent, or consent of instructor. LEC.

HA 532. Michelangelo. 3 Hours H.
During the sixteenth century, the writer Ludovico Ariosto described the Florentine artist Michelangelo Buonarroti (1475-1564) as "divine." Since that time more has been written about Michelangelo than any other artist of the Italian Renaissance. His ability to work in diverse media, namely painting, sculpture, and architecture, as well as the power of his works, earned him this prominent position in the history of art and made him one of the most influential artists of the early modern period. This course will trace various aspects of Michelangelo's long, sometimes troubled, and vibrant career, focusing on issues such as his techniques, patrons,
and the innovative style of his works. Special emphasis will be placed on interpreting primary sources to understand better his life and works and place them within their artistic, historical, social, and religious contexts. Prerequisite: HA 100, HA 150, HA 151, HA 330, or the equivalent, or consent of instructor. LEC.

HA 533. European Art 1789-1848: Gender and Revolution. 3 Hours H.
This course will analyze painting in Europe from the late 18th century to the mid-19th century. Particular attention will be paid to the ways in which images represent and/or repress such themes as politics, history, gender, ethnicity, race, and class. Assigned readings present a variety of methodological perspectives—social-historical, feminist, formalist, and psychoanalytic. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 534. Art in France 1848-1900: Modernisms. 3 Hours H.
This course will examine painting in France from 1848 to 1900 with particular emphasis given to the visual articulation and/or repression of such constructs as gender, race, history, and ethnicity. Assigned readings present a variety of methodological perspectives—social-historical, feminist, formalist, and psychoanalytic. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 536. Islamic Art and Architecture in Africa. 3 Hours H.
Study of Islamic art and architecture in various cultural and geographical settings, from the first mosques of North African and the Swahili coast to contemporary Islamized masquerades in West Africa. We consider art objects and architectural sites in terms of religious practice, trade and commerce, ritual and political power, and contemporary expression. (AAAS 536.) Prerequisite: AAAS 102, AAAS 103, HA 100, or HA 150; or permission of instructor. LEC.

HA 537. Roman Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c.B.C.E. - 4th c.C.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome's influences on its provinces. Includes lectures with slides and discussion; use of the Wilcoxon Museum of Classical Antiquities. No knowledge of Greek or Latin is required. For advanced undergraduates and graduate students with backgrounds in the humanities; and for graduate students (especially those in History of Art and Classics). (Same as CLSX 527.) LEC.

HA 538. Pompeii and Herculaneum. 3 Hours H.
An interdisciplinary treatment of the art and archaeology of the ancient Roman cities of Pompeii and Herculaneum in Italy. Emphasis on the structures and decorations of major public spaces and houses and on aspects of cultural, social, political, commercial, and religious life from the period of the second century B.C.E. to 79 C.E., when Pompeii and Herculaneum were buried by the eruption of Mt. Vesuvius. Slide lectures and discussion. (Same as CLSX 538, HWC 538.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, History of Art, or permission of the instructor. LEC.

HA 539. History of Japanese Buddhist Art. 3 Hours H.
A survey of the Buddhist art of Japan that begins with the introduction of Buddhism in the sixth century and ends with contemporary Buddhist art. Students will also consider how Buddhist images function as part of the living religious tradition in Japan. Prerequisite: A survey of either Asian art, Japanese art, Asian religions, Japanese culture, or consent of instructor. LEC.

HA 540. Special Study in Asian Art Before 1900: _____. 1-6 Hours H.
This course is designed for the study of special topics in Asian art before 1900, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in Asian art history, or consent of the instructor LEC.

HA 541. Special Study in Islamic Art, 14th-17th Century: _____. 1-6 Hours H.
This course is designed for the study of special topics in Islamic art of the 14th-17th centuries. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 542. Special Study in 18th-19th Century European or American Art: _____. 1-6 Hours H.
This course is designed for the study of special topics in European or American art of the 18th and/or 19th centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 543. Special Study in 20th/21st-Century European or American Art: _____. 1-6 Hours H.
This course is designed for the study of special topics in art of the 20th and/or 21st centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 545. Early Chinese Art. 3 Hours NW / H.
A survey of Chinese art from Neolithic times through the Han Dynasty (ca. 200 B.C.E.). Emphasis will be placed on recent archaeological excavations and also on the development of bronze vessels of the Shang and Zhou Dynasties. Prerequisite: A college level introduction to Asian art history, or consent of instructor. LEC.

HA 546. Chinese Sculpture. 3 Hours H.
A survey of Chinese sculpture from the Shang dynasty through the Song dynasty (1600 BCE-1279 CE), focused on sculptural programs in native funerary art and Buddhist temples and cave-shrines. LEC.

HA 548. Buddhist Scriptures in Chinese Painting. 3 Hours H.
Examination of Chinese paintings based on the major Buddhist scriptures (sutras) popular in China from the 8th century through the early modern period. Readings include selections from the sutras (in translation). Emphasis is placed on the cultural and religious reasons why certain scriptural themes were selected for representation and on the distinctively Chinese interpretation of these themes in pictorial art. Prerequisite: An introductory course in Asian art history, Eastern Civilizations, or Eastern religions or consent of instructor. LEC.

HA 549. Chinese Painting. 3 Hours H.
An introductory survey of painting in China from the 7th through the 19th centuries. Prerequisite: One course in art history, or in East Asian languages cultures; or consent of instructor. LEC.

HA 550. Capstone in Art History: ____. 3 Hours AE61 / H.
An advanced course dedicated to the in-depth study of special topics in art history. Students conduct research on a question within the
parameters of the course topic and produce a research product that integrates knowledge from within the discipline of art history or in combination with other disciplines to generate new ideas. May be repeated for credit if content varies. Prerequisite: Junior or senior standing and twelve hours of art history, or consent of the instructor. LEC.

HA 554. Japanese Prints. 3 Hours NW / H/W.
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized thematically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Prerequisite: An introductory course in art history or consent of instructor. LEC.

HA 561. Buddhist Art of Korea. 3 Hours H.
Introduction to the history of Buddhist temple buildings, paintings, sculptures and illuminated hand-scrolls in Korea from the 4th through the 19th centuries, with special emphasis on their stylistic, geographical, social, devotional and literary contexts. Current theories and controversies pertinent to the history and study of Korean Buddhist art are also addressed. Not open to students who have taken HA 361. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as REL 511.) Prerequisite: A college level introduction to Asian art history, or consent of instructor. LEC.

HA 562. Ceramics of Korea. 3 Hours H.
A survey covering the history of Korean ceramics from prehistoric times through the early modern period, with special emphasis on their stylistic, geographical, social and political context. Topics include celadon-glazed, stamped and slip-decorated stoneware, Korean ceramics related to the Japanese tea ceremony and Mingei pottery. Not open to students who have taken HA 362. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. Prerequisite: A college level introduction to Asian art history, or consent of instructor. LEC.

HA 564. European Art, 1900-1945. 3 Hours H.
A detailed survey of modern European art from the turn of the century through World War II. Movements to be considered may include post-impressionism, cubism, constructivism, dada, and surrealism. Graduate students may be expected to do additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 565. Art Since 1945. 3 Hours H.
An international survey of modern and postmodern art since 1945. Topics to be covered may include abstract expressionism, pop, minimalism, happenings, and performance art, earth works, conceptual art, feminist art, photo-realism, crafts, and new media. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 566. Art From 1945 to the 1980s: Modernism to Post-Modernism. 3 Hours H.
An international survey of modern and post-modern art from World War II to the 1980s. Topics may include abstract expressionism, pop art, minimalism, happenings and performance art, earth works, conceptual art, feminist art, photo-realism, the craft revival, and new media. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151 or the equivalent, or consent of instructor. LEC.

HA 567. Contemporary Art. 3 Hours H.
An examination of recent developments internationally in art and visual culture. Emphases may include consideration of diverse critical perspectives, theoretical debates, post- and trans-national art, the impact of new media, and the internationalization of institutions, exhibitions, audiences, and markets. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 570. American Art. 3 Hours H.
A survey of American painting, sculpture, and architecture from colonial times to the present. (Same as AMS 580.) Prerequisite: An introductory course in Western art history at the college level. LEC.

HA 571. Modern Sculpture. 3 Hours H.
A survey of avant-garde sculpture in Europe and America from the late 19th century to recent times. Attention will focus on the work of major sculptors considered within larger artistic, cultural, and historical contexts. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 575. Northern Renaissance Art. 3 Hours H.
French, Netherlandish, and German art in the 15th and 16th centuries. Manuscripts, painting, prints, and sculpture from Jan Van Eyck to Pieter Brueghel, the Elder. Prerequisite: HA 100, HA 150, HA 151, or the equivalent, or consent of instructor. LEC.

HA 576. Northern Baroque Art. 3 Hours H.
Seventeenth-century art in the northern and southern Netherlands with emphasis on painting of Rubens and Rembrandt. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 577. Italian Baroque Art. 3 Hours H.
This course explores the history of art and architecture in Italy during the late sixteenth and seventeenth centuries. The visual culture of the Italian Baroque is examined in terms of style, patronage, and religious or secular function. Attention is also paid to art theory, practice, gender issues, and foreign artists working in Italy, as well as to understanding and interpreting primary sources. Prerequisite: HA 100/HA 300, HA 151, or consent of instructor. LEC.

HA 578. Central African Art. 3 Hours NW / H/W.
Introduction to the arts and cultures of Central Africa. Emphasis is given to the major art-producing cultures of the Equatorial Forest and the Southern Savanna regions of Cameroon, Gabon, Congo, Zaire, and Angola. The historical and cultural contexts for the visual arts associated with centralized leadership and non-centralized societies are explored. (Same as AAAS 578.) LEC.

HA 579. Southern Baroque Art. 3 Hours H.
This course surveys significant 17th-century paintings, sculpture and architecture produced in Italy, Spain and France. Artists whose works will be discussed include Caravaggio, the Carracci, Bernini, Borromini, Velazquez, Poussin, Claude Lorrai, de la Tour and the Leon Nain brothers. Artistic elements of individual works and their relationship to major changes in patronage and religious, political, economic and cultural contexts will be examined. Assigned readings will present a range of methodological perspectives. Prerequisite: An appropriate introductory course in Western art history at the college level, or consent of the instructor. LEC.

HA 580. History of Photography. 3 Hours.
An advanced introduction to the history of photography as a means of artistic expression and visual communication. Special emphasis will be
HA 581. American Art to 1860: Inventing a Nation. 3 Hours H.
A survey of major artists and movements in painting, sculpture, and allied arts, from the period of initial European settlement to the mid-19th century. Consideration will be given to developments in portraiture, history painting, landscape, still-life, statuary, and decorative arts. Attention will be paid both to formal developments and to cultural context. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 582. American Art 1860-1900: Gilded Age. 3 Hours.
A survey of major artists and movements in painting, sculpture, and allied arts in the later 19th century. Consideration will be given to developments in landscape painting and images of the American West, the impact of impressionism and other European movements, and the decorative programs of the Gilded Age. Attention will be paid both to formal developments and to cultural context. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 583. American Art 1900-1945: Rise of Modernism. 3 Hours H.
A survey of major artists and movements in painting, sculpture, and allied arts, from the urban realists to the emergence avant-garde at mid-century. Consideration will be given to the cosmopolitan tendencies of the 1910s and the 1920s, to regionalist impulses of the 1930s, and the assimilation of European modernism. Attention will be paid both to formal developments and to cultural context. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 584. Kansas Art, History, and Popular Culture. 3 Hours H.
An overview of the art and cultural history of Kansas (and Kansas City) from territorial days to the present. Emphasis is placed on key issues, figures and events. A general familiarity with American history is recommended. (Same as FMS 414). LEC.

HA 585. The Art of Buddhism. 3 Hours NW / H/W.
A survey of the Buddhist arts (architecture, sculpture, and painting) of India, China, and Japan. LEC.

HA 586. Japanese Painting. 3 Hours NW / H/W.
A survey covering the development of Japanese painting from the Kofun period to the early twentieth century. Topics include Buddhist and other religious paintings, narrative handscrolls, ink painting, decorative screens, ukiyo-e, and western-style paintings of the Meiji and Taisho periods. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: An introductory course in Asian art or consent of instructor. LEC.

HA 587. Japanese Sculpture. 3 Hours NW / H.
A survey of Japanese sculpture from the Kofun period (300-700 C.E.) to the present day. Emphasis is placed on works of Buddhist sculpture from the 7th through the 13th centuries. Prerequisite: An introductory course in Asian art history or consent of instructor. LEC.

HA 588. Modern and Contemporary Visual Arts of Japan. 3 Hours H.
This course covers Japanese visual arts from the Meiji era (1868-1912) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan's modernization and modernity. Prerequisite: an introductory course in art history or consent of instructor. This course is taught at the 300 and 500-levels with additional work required at the 500-level. LEC.

HA 589. Japanese Artistic Encounters with Europe and the United States. 3 Hours NW / H.
Consideration of Japanese artistic responses to visual culture from Europe and the United States. The course focuses upon Japanese art from the 16th century to the present. Prerequisite: A college-level introduction to Asian art history or consent of instructor. LEC.

HA 590. Special Study in African Art: ____. 1-6 Hours H.
This course is designed for the study of special topics in African art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history or African Studies, or consent of the instructor. LEC.

HA 591. Special Study in Asian Art: ____. 1-6 Hours H.
This course is designed for the study of special topics in Asian art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history or Asian Studies, or consent of the instructor. LEC.

HA 592. Special Study in Ancient Art: ____. 1-6 Hours H.
This course is designed for the study of special topics in ancient art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in Art History or Classics, or consent of the instructor. LEC.

HA 593. Special Study in Medieval Art: ____. 1-6 Hours H.
This course is designed for the study of special topics in medieval art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 594. Special Study in Renaissance Art: ____. 1-6 Hours H.
This course is designed for the study of special topics in Renaissance art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 595. Special Study in Baroque Art: ____. 1-6 Hours H.
This course is designed for the study of special topics in Baroque art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 596. Special Study in American Art: ____. 1-6 Hours H.
This course is designed for the study of special topics in American art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 597. Special Study in Modern Art: ____. 1-6 Hours H.
This course is designed for the study of special topics in modern art, including courses taken through study abroad. May be repeated for credit if content varies. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.
HA 600. Biography of a City: ______. 3 Hours H/W.
An interdisciplinary study of a city, covering its history, literature, and arts during the periods when the city's culture reached its height. LEC.

HA 676. West African Art. 3 Hours NW / H/W.
Introduction to the rich visual art traditions of West Africa. Emphasis is given to the major art-producing cultures of the Western Sudan and the Guinea Coast, including the archaeological cultures of Nigeria, Mali, and Ghana. The diverse forms of figure sculptures and masquerade performance and the meanings of these arts in historical and cultural contexts are examined. Upper division and graduate students can enroll for this course with appropriate course requirements. Not open to students who have taken AAAS 376/HA 376. (Same as AAAS 676.) LEC.

HA 677. African Design. 3 Hours NW / H/W.
A survey of sub-Saharan African media, emphasizing textiles, ceramics, metal and bead work, the artist's techniques, working methods and apprenticeship, and historical and contemporary cultural contexts, including the influence of tourism and the international art market on artistic production and style. Open to juniors, seniors, and graduate students only. (Same as AAAS 677.) Prerequisite: AAAS 376 or HA 376, or AAAS 578 or HA 578, or an introductory course in art history at the college level, or consent of instructor. LEC.

HA 679. African Expressive Culture: ______. 3 Hours NW / H/W.
An in-depth examination of an artistic tradition shared by a number of African cultures. Discussion includes historical development related to style, use and meaning and other relevant issues critical to the topic. Open to juniors, seniors, and graduate students only. (Same as AAAS 679.) Prerequisite: AAAS 376 or HA 376, or AAAS 578 or HA 578, or an introductory course in art history at the college level, or consent of instructor. LEC.

HA 704. Seminar on Christian Iconography. 3 Hours.
A study of subject matter in the visual arts and of modes of representing certain themes and categories of ideas and meanings in the history of art. Prerequisite: Nine hours of history of art and knowledge of a foreign language. SEM.

HA 705. Major Artist: ______. 1-3 Hours.
The study in detail of a single artist or of an artist and his school or shop. Prerequisite: An introductory course in Western art history at the college level and the 400-level course in the period in which the artist's work falls. SEM.

HA 706. Seminar on Special Problems in Art History: ______. 1-6 Hours.
Seminar dealing with particular art historical problems of a special and specific nature. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 707. Directed Readings. 1-6 Hours.
Supervised study and research into special fields of art of particular interest to the student. Weekly consultations and reports. RSH.

HA 710. Museum Techniques and Functions. 3 Hours.
Primarily for graduate students interested in pursuing a career in art museum work. The development of the museum idea, the activities of the art museum, as well as practical experience in the various fields of art museum curatorship and public activity are among the areas studied. SEM.

HA 712. Directed Museum Study. 1-6 Hours.
Supervised study and research projects related to art works in the permanent collections or special exhibitions of local museums of art. Planned in consultation with a faculty member and the director of the museum. RSH.

HA 715. Seminar in African Art. 3 Hours.
A concentrated study of a special topic relating to African Art studies. Different topics are offered in different semesters. (Same as AAAS 715.) Prerequisite: Nine hours of Art History and/or consent of instructor. SEM.

HA 716. Art of the Early Middle Ages in the West. 3 Hours.
A pro-seminar in the art of the West from the Migration Period through the art of the Carolingian Empire. SEM.

HA 719. Art Histories: Theory and Methodology. 3 Hours.
This course examines the major methodologies and theories that have shaped and continue to shape the field of art history. Through critical reading of primary, secondary, and interpretive texts, the course will analyze closely the history and current state of the discipline. Prerequisite: Nine hours of History of Art or consent of instructor. SEM.

HA 720. Asian Art: Theory and Method. 3 Hours.
This course examines important methodologies and theories of the past and present employed in the field of Asian art history. Through critical reading of primary documents and secondary scholarship, students will gain historical perspective on and practical tools for research in the history of Asian art and visual culture. Prerequisite: Nine hours of History of Art or consent of instructor. SEM.

HA 723. Romanesque Art. 3 Hours.
A study of Western European sculpture, painting, and architecture from the period of the Migrations, through the so-called "Dark Ages" to the creation of the Gothic style. Prerequisite: A survey of Medieval art. SEM.

HA 725. The Gothic Cathedral. 3 Hours.
The development and spread of Gothic architecture and sculpture in France, England, Spain, and Germany. Prerequisite: A college level introduction to Medieval art history. SEM.

HA 745. Dutch and Flemish Painting of the 17th Century. 3 Hours.
A detailed study of the art of Hals, Rembrandt and Vermeer, on the one hand, and of Rubens and Van Dyck on the other. Prerequisite: A survey of Northern Baroque art or consent of instructor. SEM.

HA 760. Proseminar in Korean Art. 3 Hours.
Intensive study of a selected topic in the visual arts of Korea; topics may focus on a particular genre, theme, historical period or group of artists, for example Buddhist painting and sculpture, Choson period landscape and genre painting, ceramics and lacquerware or modern and contemporary art in North and South Korea. May be repeated for credit up to a maximum of 12 hours. Prerequisite: Consent of instructor. SEM.

HA 762. Japanese Painting. 3 Hours.
A survey covering the development of Japanese painting from the Kofun period down to the early twentieth century. Topics will include Buddhist and other religious paintings, narrative handscrolls, suibokuga, decorative screens, genre paintings and ukiyo-e prints, and Western-style paintings of the Meiji and Taisho periods. Work requirements will be greater for students enrolled at the 700 level. Prerequisite: HA 265, or HA 267, or consent of instructor. LEC.

HA 778. Proseminar in Japanese Art. 3 Hours.
Critical analysis of readings on selected topics in Japanese art. May be repeated for credit up to a maximum of 12 hours. Prerequisite: Consent of instructor. SEM.

HA 789. Proseminar in Chinese Art. 3 Hours.
Critical analysis of readings on selected topics in Chinese art. May be repeated for credit up to a maximum of 12 credit hours. Prerequisite: Consent of instructor. SEM.

HA 805. Seminar in Graphic Arts: ______. 3 Hours.
A concentrated study of one or more artists, techniques, or movements. Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. Prerequisite: A course in graphic art, or in a discipline related to the field of the seminar. SEM.

HA 908. Problems in Connoisseurship West: ____. 3-6 Hours.
The analysis of the work of a specific artist, medium or period, and developing a knowledge of the methods and means of establishing standards of quality and authorship. Includes study in Spencer and/or Nelson Museums. Prerequisite: Nine hours of art history and a reading knowledge of a pertinent foreign language. SEM.

HA 822. Seminar in Buddhist Art: ____. 3 Hours.
A concentrated study of selected problems dealing with Buddhist art in Asia. Different topics are offered in different seminars. May be repeated for credit up to a maximum of twelve hours. Prerequisite: Reading knowledge of Chinese or Japanese and consent of instructor. SEM.

HA 824. Seminar in Edo Period Painting: ____. 3 Hours.
Special study of one or more schools of painting of the Edo period (1615-1868) in Japan. Individual works will be analyzed in depth. Prerequisite: A course in Japanese painting. SEM.

HA 870. Seminar in Photographic History: ____. 3 Hours.
Advanced study of photographic images as made and used in the nineteenth and twentieth centuries. Requires primary research. Prerequisites include study of nineteenth century history of art. Specific topics vary. SEM.

HA 898. Franklin Murphy Seminar in Art History: ____. 3 Hours.
This seminar is given each spring by the Murphy Lecturer of the year and includes two weeks of intensive study with a nationally known expert in a special field of art history. The other weeks of seminar meetings for the semester are conducted by the faculty member most closely specialized in this field. Prerequisite: Consent of supervising faculty member. SEM.

HA 899. Thesis. 1-6 Hours.
THE.

HA 906. Seminar on Special Problems in Art History: ____. 1-6 Hours.
Seminar dealing with particular art historical problems of a special and specific nature. Different topics are offered in different seminars. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 907. Directed Readings in Art. 1-12 Hours.
Supervised study and research into special fields of art of particular interest to the student. Weekly consultation and reports. Prerequisite: Nine hours of art history and a reading knowledge of a pertinent foreign language. RSH.

HA 910. Curatorial Problems: 3-8 Hours.
Primarily for the graduate student interested in art museum work. The student will engage in specialized research related to museum activities resulting in either a research paper, an exhibition, or a catalogue of some portion of the museum's holdings. Prerequisite: Nine hours of history of art and a reading knowledge of a pertinent foreign language. SEM.

HA 920. Seminar in Early Medieval Art: ____. 3 Hours.
A study of selected problems dealing with the art of the early Middle Ages. Different topics are offered in different seminars. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 925. Seminar in Late Medieval Art: ____. 3 Hours.
A study of selected problems dealing with the art of the later Middle Ages. Different topics are offered in different seminars. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 930. Seminar in Italian Renaissance Art: ____. 3 Hours.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 935. Seminar in Northern Renaissance Art: ____. 3 Hours.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 940. Seminar in 18th Century Art: ____. 3 Hours.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 945. Seminar in 19th Century Art: ____. 3 Hours.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 950. Seminar in 20th Century Art: ____. 3 Hours.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 955. Seminar in 21st Century Art: ____. 3 Hours.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 960. Seminar in Photography and Fine Art: ____. 3 Hours.
Advanced study of the relationships between photographic images, prints, painting, mass media, illustration, and other forms of visual expression. Specific periods and areas of emphasis will vary. Prerequisite: Advanced study of nineteenth century history of art. SEM.

HA 965. Seminar in American Art: ____. 3 Hours.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 980. Seminar in Chinese Art: ____. 3 Hours.
A concentrated study of one or two artists, monuments or movements. Different topics are offered in different semesters. May be repeated for credit up to a maximum of 12 credit hours. SEM.

HA 999. Doctoral Dissertation. 1-12 Hours.
THE.
Bachelor of Arts and Bachelor of General Studies in History of Art

Why study the history of art?

The study of the visual arts in their historical contexts enriches our understanding of human creativity and the human condition. It provides students with the cultural literacy and critical thinking, research, and communication skills that are relevant for a variety of careers, including in art museums, galleries, and collections, as well as schools, universities, publishers, and archives. The study of art history can also provide the foundation for a career in other professions such as business, law, media, or government.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

History of Art Programs

Bachelor's degrees with majors in the history of art are offered in the College of Liberal Arts and Sciences (B.A. and B.G.S.) and in the School of the Arts (B.F.A.). See Bachelor of Fine Arts in History of Art (p. 1926) in the School of the Arts Department of Visual Art section of the catalog for B.F.A. requirements.

Requirements for the B.A. or B.G.S. Major

1. Foundation Courses: (9)

<table>

HA 589 Japanese Artistic Encounters with Europe and the United States

3. Complete an art history course (3 hours) approved for Goal 6 in the KU Core. (The Goal 6 art history course may also fulfill one of the breadth requirements above, in which case an elective course should be taken for the final 3 required hours of art history.) (3)

4. Art history elective (0-3 hours; see number 3 above). (0)

Total Hours: (30)

Note: HA 100/HA 300 is a 1-semester survey of Western art history intended for non-majors and does not count toward the 30 required hours in art history. A student who takes HA 100 or HA 300 and then decides to major in art history must then also take either HA 150 or HA 151 (or both).

A student who already has credit in either HA 150 or HA 151, however, should not take HA 100 or HA 300.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

A sample 4-year plan for the BA degree in History of Art can be found here: History of Art (p. 1564), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in History of Art can be found using the left-side navigation.

Departmental Honors

The department invites art history undergraduate majors to apply for graduation with departmental honors. They must meet the following criteria:

1. An overall grade-point average of at least 3.25 and an art history grade-point average of 3.5 at the time of declaring intention to seek honors.
2. In consultation with the departmental honors coordinator and with approval from a supervising professor, declared intention of seeking honors no later than the time of enrollment for the final undergraduate semester.
3. Enrollment in HA 498 Honors Essay and full participation in a concurrent art history graduate seminar (numbered 700 or above) for which the student must write a substantial, original research paper to be submitted to the supervising professor as an honors essay.
4. Approval of the honors essay by the supervising professor and 2 other faculty members who, as a committee, certify to the departmental honors coordinator that the student has successfully completed the requirements to earn honors.

BA in History of Art

Below is a sample 4-year plan for students pursuing the BA in History of Art. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

**Total Hours: 120-123**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Breadth Requirement: One course (3 hours) in History of Art at the 300+ level is required from each of the following six categories: Art between 400-1400: European, Mediterranean, or Near Eastern, Art between 1300-1600: European, Mediterranean, or Near Eastern, Art between 1600-1700: European, Art between 1700-1900: European or American, Asian art before 1900, and Art after 1900. See an advisor for help choosing courses for each category.
4. An Art History course approved for Goal 6 Integration & Creativity is required. The department recommends that students take the HA or Studio Art course to satisfy Goal 6 in either the fall or spring semester of their fourth year. HA 498 and HA 550 fulfill a Goal 6 requirement.
5. A course may double count for a Breadth requirement within the major and also for Goal 6 of the KU Core. If one course is taken to fulfill both requirements, then an additional Art History elective at the 300+ level is required.

**BGS in History of Art**

Below is a sample 4-year plan for students pursuing the BGS in History of Art. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website. (http://kucore.ku.edu/courses)
Minor in History of Art

Why study the history of art?

The study of the visual arts in their historical contexts enriches our understanding of human creativity and the human condition. It provides students with the cultural literacy and critical thinking, research, and communication skills that are relevant for a variety of careers, including in art museums, galleries, and collections, as well as schools, universities, publishers, and archives. The study of art history can also provide the foundation for a career in other professions such as business, law, media, or government.

Requirements for the Minor

History of Art Minor Requirements

Students selecting this minor must complete a minimum of 6 History of Art courses. Satisfied by 18 hours of History of Art coursework. 12 of the 18 hours must be at the 300 level or above. With approval of the art history undergraduate advisor, 1 closely related course taught outside of the art history department (e.g., history of architecture or design) may count toward the minor.

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Master of Arts in History of Art

The M.A. provides students with a broad knowledge of the visual arts in European/American or East Asian art history, as well as an introduction to the basic concepts and methods of the discipline. The M.A. may be pur sued as a terminal degree or as a preparation for petition for specialized doctoral studies at KU or to apply elsewhere. The Combined M.A./Ph.D. is intended for students who want to pursue the Ph.D. in art history at KU, but who do not yet hold the M.A. degree in art history. All applicants are considered for competitive funding packages and GTA, GRA, and GA positions, however Combined M.A./Ph.D. students are given priority.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of
Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

M.A. and Combined M.A./Ph.D. applicants are expected to hold the B.A. or equivalent degree with an overall grade-point average of 3.3 or better and to have taken at least 6 college courses in art history or the equivalent, distributed to provide the basic foundation for advanced study. M.A. and Combined M.A./Ph.D. applicants should specify their area of proposed study (European/American art or East Asian art).

Completed applications must be submitted by January 1 for fall admission. The Graduate Record Examination general test is required.

Submit your graduate application online (http://www.graduate.ku.edu). The M.A./Ph.D. applicant must apply to the Combined M.A./Ph.D. program. Only one application fee is required.

The University of Kansas
Department of History of Art
Graduate Admissions
Spencer Museum of Art
1301 Mississippi St., Room 209
Lawrence, KS 66045-7500

**M.A. Degree Requirements**

The student must complete 30 hours of graduate credit, at least 21 of which must be in art history distributed according to department requirements (see department website). Students pursuing the degree in European/American art must take at least 18 credit hours at the 700-900 level 6 hours of which must be taken at the 800 level or higher. Students pursuing the degree in East Asian art history must take at least 15 credit hours at the 600 level or higher, 6 hours of which must be taken at the 800 level or higher (see department website for specifics). All course work must satisfy grade standards. The candidate must demonstrate proficiency in the reading of a foreign language, normally a major European language, Chinese, Korean, or Japanese.

A general written examination (in European/American art or East Asian art) must be passed for the M.A. degree. M.A. students who wish to be considered for admission to the Ph.D. program must complete and sign the Petition for Continuation in the Ph.D. Program form, which will be distributed at the M.A. exam and collected with the completed exam essays on day two of testing. It is expected that such students will already have expressed this interest to a potential major field advisor and received that faculty member’s support.

The student must pass the M.A. exam in order for his/her petition to be considered by the graduate faculty. After receiving departmental approval for the petition and completing all M.A. degree requirements, the student will automatically be entered into the Ph.D. program and will be expected to maintain his/her enrollment as per Graduate Studies guidelines. Students who do not submit the petition at the time of the M.A. exam will need to reapply for admission to the art history graduate program.

The Combined M.A./Ph.D. student does not need to submit the Petition for Continuation in the Ph.D. Program form. The student will be evaluated by the graduate faculty upon passing the M.A. exam to determine whether he/she remains eligible to continue to the Ph.D. or if the M.A. is the appropriate terminal degree. In most cases, Combined M.A./Ph.D. students will enter the Ph.D. program upon completion of the requirements for the M.A. degree.

**Handbook for Graduate Students**

A detailed presentation of departmental degree requirements and regulations is included in the department’s Graduate Student Handbook, available online (http://www2.ku.edu/~kuarthhis).

**Doctor of Philosophy in History of Art**

The department offers Ph.D. degrees in European/American and East Asian art history. The Ph.D. degree offers the opportunity for advanced research and concentration to students who hold the M.A. degree in art history from KU or elsewhere. The Combined M.A./Ph.D. is intended for students who want to pursue the Ph.D. in art history at KU, but who do not yet hold the M.A. degree in art history. Both the Combined M.A./Ph.D. and Ph.D. students are eligible for competitive funding packages and GTA, GRA, and GA positions.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Applicants for the Ph.D. are expected to hold an appropriate M.A. degree.

**Admission to the Ph.D. program for students who receive the M.A. degree from KU:**

The M.A. student who wishes to be considered for admission to the Ph.D. program must complete and sign the Petition for Continuation in the Ph.D. Program form, which will be distributed at the M.A. exam and collected with the completed exams on day two of testing. It is expected that such students will already have expressed this interest to a potential major field advisor and received that faculty member’s support. The student must pass the M.A. exam in order for his/her petition to be considered by the graduate faculty. After receiving departmental approval for the petition and completing all requirements for the M.A. degree, the student will automatically be entered into the Ph.D. program and will be expected to maintain his/her enrollment as per Graduate Studies guidelines.

M.A. students who do not submit the petition at the time of the M.A. exam will need to reapply for admission to the art history graduate program.

The Combined M.A./Ph.D. student does not need to submit the Petition for Continuation in the Ph.D. Program form. He/she will be automatically
evaluated by the graduate faculty upon successfully passing the M.A. exam to determine whether he/she remains eligible to continue to the Ph.D. or if the M.A. is the appropriate terminal degree. In most cases, Combined M.A./Ph.D. students will enter the Ph.D. program upon completion of the requirements for the M.A. degree.

Completed applications must be submitted by January 1 for fall admission. The Graduate Record Examination general test is required.

Submit your graduate application online (http://graduate.ku.edu/prospective-students).

The University of Kansas
Department of Art History
Graduate Admissions
Spencer Museum of Art
1301 Mississippi St., Room 209
Lawrence, KS 66045-7500

Ph.D. Degree Requirements

Ph.D. candidates must satisfy all general requirements. Ph.D. candidates must demonstrate proficiency in 2 research skills (normally foreign languages) relevant to their research; this requirement must be met before candidates are admitted to the comprehensive Ph.D. examinations. One of the 2 research skills is usually the foreign language that met the M.A. language requirement.

Normally, Ph.D. students are expected to complete no fewer than 21 and no more than 27 post-M.A. course credit hours. These credit hours must be taken at the graduate level. The graduate faculty reserves the right to require more than 27 post-M.A. course credit hours when appropriate.

Normally, Combined M.A./Ph.D. students are expected to complete no fewer than 15 and no more than 21 post-M.A. course credit hours. These credit hours must be taken at the graduate level. The graduate faculty reserves the right to require more than 21 post-M.A. course credit hours when appropriate.

Students must take both written and comprehensive oral examinations at the end of their course work. Both written and oral examinations cover the major area and 2 minor areas specified in the student's Doctoral Program of Study petition (see department's Graduate Student Handbook). The oral examination normally follows the written examination by 2 weeks.

The dissertation proposal must be approved by the student's primary advisor and the graduate faculty within three months of passing the comprehensive Ph.D. examinations. The student is strongly encouraged to work closely with his/her primary advisor immediately following the comprehensive examination to meet this deadline.

Upon acceptance of the dissertation in final draft form, the candidate must successfully pass the final oral examination (the dissertation defense) to complete the degree.

Research Skills & Responsible Scholarship Requirement

All graduate seminars include instruction in and discussion of appropriate research conduct and research misconduct; authorship, publication, plagiarism, copyright; peer review; and professional practices. For more information on the Research Skills and Responsible Scholarship requirement, please see the Graduate Studies section of the online catalog.

Handbook for Graduate Students

A detailed presentation of departmental degree requirements and regulations is included in the department's Graduate Student Handbook, available online (http://www2.ku.edu/~kuarthis).

University Honors Program

Honors Courses

Honors courses are open to qualified undergraduates in any school of the university.

University Honors Program

The University Honors Program (http://www.honors.ku.edu) provides opportunities for outstanding and creative undergraduate students in all schools at KU to develop their full potential during their undergraduate years. The Honors Program brings talented students together in honors classes and seminars to benefit from mutual interests and association. It brings students and faculty members together in a teaching and research environment that ensures high academic achievement and standards.

The program coordinates merit-based scholarship opportunities for qualified students, including KU awards such as the University Scholars Program. Honors Program staff are also responsible for the campus-wide nomination process for many competitive national awards, including the Goldwater, Truman, Rhodes, Marshall, Mitchell, and Udall scholarship. Students interested in these opportunities receive guidance from Honors Program staff for all aspects of these applications.

The Honors Student Council, the Honors Ambassador Program, and Peer Mentor Program provide opportunities for student leadership.

In general, honors classes are small, oriented to discussion, and taught by full-time members of the faculty. Most honors courses fulfill requirements and deal with introductory fundamentals and principles, but they are likely to do so in more depth than their non-honors equivalents. Honors courses are distinguished by the energetic atmosphere and critical thinking generated by the students in them and the faculty members who teach them.

Honors students are interested in expanding their knowledge and take a broad range of liberal arts and sciences courses. This is true of students in the professional schools (architecture, engineering, business, etc.) as well as students in the College of Liberal Arts and Sciences. Honors program advisors typically recommend that students explore their interests through the broad curriculum choices KU has to offer.

A first-year, semester-long tutorial experience provides an introduction to an academic area of study in an informal setting that allows students to get to know one another and the instructor. The tutorial explores the research methods of a discipline and acquaints the student with the research resources at KU.

Honors advising is personalized in meetings with honors staff, faculty fellows, and specially selected advisors from across the university. The program's staff facilitates early and frequent contact with academic advisors in the students' areas of interest. Honors students benefit from priority enrollment, which provides flexibility in planning one's academic curriculum.

The program does not require a minimum number of honors courses a semester. However, students in the program quickly discover that honors
courses engage the intellect, hold the interest, and create the enthusiasm for learning they seek at a university. Students in the professional schools are particularly encouraged to seek out honors course opportunities early, while their curricula still have breadth and flexibility.

Honors students are strongly encouraged to include research, study abroad experiences, internships, and community service in their academic programs. Consult Honors Program staff about applying these activities toward completion of honors requirements.

**Admission**

Students with strong high school curricula and excellent academic records are encouraged to apply to the University Honors Program. Students with composite ACT scores of 30 or above and unweighted high school grade-point averages of 3.75 or above are more likely to be documented. Applications are evaluated on the basis of high school curriculum, grades, an essay, activities, and standardized test scores. Applications from first- and second-year students currently attending KU, as well as incoming transfer students, are evaluated on the basis of college course work, an essay, and college activities. Review of applications begins in October and continues through April. Send inquiries to the University Honors Program, 1506 Engel Road, Lawrence, KS 66045-3845. View further information and the online application (http://www.honors.ku.edu).

**Completion of the Program**

Students graduate from the program by completing 8 honors units and the first-year, semester-long tutorial. The 8 units must be completed as follows:

1. 6 honors courses (may include graduate-level courses numbered 700 and above).
2. 1 out-of-classroom experience such as study abroad, departmental honors, documented research experience, approved and documented internship experience, or approved and documented community service.
3. The eighth unit may be from either category 1 or category 2. Students also must maintain a minimum 3.25 grade-point average.

**Nunemaker Center**

This unique building, with its modern architectural design, is the home of the Honors Program, near the Daisy Hill residence halls at 15th Street and Engel Road. The Honors Program is home to several faculty fellows who serve the program and bring additional resources to the program to complement the full-time staff. Faculty fellows are available for advising, consultation about majors and careers, and guiding research projects.

Students are encouraged to take advantage of the spaces available at Nunemaker, including several classrooms and study areas, a kitchen, comfortable lounges that include 2 fireplaces, and wireless Internet access. Nunemaker also serves as a gallery for undergraduate art. The center is open days and evenings.

**Courses**

**HNRS 177. First Year Seminar: ______. 3 Hours GE11 / U.**

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Honors. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

**HNRS 190. Freshman Honors Seminar. 1 Hour U.**

This seminar serves as an introduction to the Honors Program, to the research opportunities and other academic resources available at the University of Kansas and to specific disciplinary perspectives on an overarching theme. While closely examining a topic germane to the instructor, students develop skills in research, reading, writing and in-depth discussion. The instructor of the student's seminar also serves as the academic honors advisor for the enrolled students. Required of all freshman Honors students; open only to freshmen in the University Honors Program. LEC.

**HNRS 195. Transfer Honors Seminar. 1 Hour U.**

This seminar serves as an introduction to the Honors Program, and to the research opportunities and other academic resources available at the University of Kansas. This seminar fosters the transfer students' oral and written communication and the critical assessment of their academic and pre-professional goals. The instructor of the student's seminar also serves as the academic honors advisor for the enrolled students. Open only to transfer students in the University Honors Program. LEC.

**HNRS 250. Citizen Philanthropy: An Introduction to the Nonprofit World. 3 Hours AE51 / U.**

This interdisciplinary course explores the historical and economic roots of citizen generosity and the role of the nonprofit/philanthropic sector. This service learning course combines volunteer experiences and public service internships with research and exploration of the missions and ethical orientations of nonprofit organizations. The course is designed to explore the social and the ethical contexts of the nonprofit sector with opportunities to demonstrate social and civic responsibility. LEC.

**HNRS 300. Honors Commons Course. 3 Hours H.**

An opportunity to investigate a broad topic across various subjects and disciplines. In alliance with the University Commons at Spooner Hall, this course examines a problem or topic from perspectives of several disciplines across the arts, sciences, social sciences and humanities. The course is complemented by a dedicated annual university lecture series germane to the course's topic. Prerequisite: Membership in the University Honors Program. LEC.

**HNRS 310. University Scholars Seminar. 3 Hours U.**

An interdisciplinary survey to acquaint students with some of the main ideas, methods, and outstanding problems in various areas of scholarship. The organization of human knowledge inside and outside the university, as well as the implications of this organization for scholarship and society, are emphasized. Ideas and methods in various disciplines are contrasted and compared. Required of and open only to newly admitted students in the University Scholars Program. LEC.

**HNRS 320. Global Scholars Seminar. 3 Hours H.**

The Global Scholars Seminar is designed to foster academically talented and motivated undergraduate students' interest in global studies. Through interdisciplinary coursework, mentorship and research experience in global studies, the seminar provides cohorts of students with opportunities to develop their intellectual capabilities and interests to the fullest and better prepares them for careers, further study, and leadership roles in today's complex international arena. Required of and open only to newly admitted students in the Global Scholars Program. LEC.

**HNRS 370. Personal Writing Seminar. 1 Hour U.**

This seminar helps students develop their personal writing abilities. Students analyze language and rhetorical choices in the genre of the personal essay. Students demonstrate rhetorical flexibility within the genre, considering audience, purpose, and application of the material. Prerequisite: Permission of the University Honors Program. LEC.
HNRS 380. Critical Thinking and Advocacy Seminar. 1 Hour U.
The focus of this class is on honing the two basic skills of critical thinking and advocacy. In this seminar, students develop a basic system for critical analysis that can be applied generally; test that critical analysis system in a series of practicums to develop the skills necessary to apply it; and develop a basic system for designing effective and ethical persuasive messages. Prerequisite: Permission of the University Honors Program. LEC.

HNRS 430. Honors Interdisciplinary Seminar. 3 Hours U.
An opportunity to synthesize topic across various subjects and disciplines. This course examines a problem or topic from the perspectives of several disciplines. Open to qualified sophomores, juniors, and seniors in the University Honors Program. LEC.

HNRS 492. Topics and Problems on: ______. 1-6 Hours U.
An interdisciplinary study of different topics. Designed especially for juniors and seniors. LEC.

HNRS 495. Honors Directed Study. 1-3 Hours U.
Individual and supervised study of an interdisciplinary topic or topics. May be repeated for a total of up to 6 hours. Up to one 3-hour enrollment will count as one course toward completion of the University Honors Program. Prerequisite: Membership in the University Honors Program and consent of the instructor. IND.

HNRS 496. Honors Internship. 1-3 Hours U.
Students participate in an internship in an organization related to their professional/career goals. An internship plan is developed by the student in conjunction with the student's academic adviser and an authorized agent of the internship site. Prerequisite: Instructor permission required. INT.

HNRS 497. Honors Freshman Seminar Assistantship. 0 Hours.
Open to all Honors students selected to be Honors Freshman Seminar Assistants, regardless of major field. These students assist Seminar instructors in the teaching of an Honors seminar in various ways, including but not limited to: leading group discussion; engaging students in the learning process; developing classroom material; encouraging and guiding students to solve problems themselves and helping students prepare for their advising assignments. Offered fall semester only. May be repeated. LEC.

HNRS 520. University Scholars Junior/Senior Seminar. 2-3 Hours U.
An interdisciplinary seminar course designed for advanced-level students in the University Scholars Program. Faculty mentors are invited to attend. Will count toward completion of the University Honors Program. Prerequisite: HNRS 310 or concurrently. LEC.

Humanities Program

Why study Humanities and Western Civilization?

Integrated learning in humanities and western civilization fosters broad cultural understanding by exploring the connections among diverse areas of knowledge. Studying humanities and western civilization allows students to examine key issues relating to human experiences and the human condition from a variety of perspectives, including philosophy, history, religion, literature, art, and language. Such study provides excellent preparation for 21st century careers by preparing students to take part in the world around them, equipping them for success in many fields, including business, medicine, law, marketing, sales, and social services.

Undergraduate Programs

Courses for Nonmajors

All HUM courses are open to nonmajors. HUM 204, 205, 206, and PCS 120 are recommended for nonmajors for fulfilling KU CORE Goal 1.1 (Critical Thinking). HUM 110 and 204 are recommended for fulfilling KU CORE Goal 2.1 (Written Communication). HUM 110, 206, 250, 304, 308, 312, and 430 are recommended for fulfilling KU CORE Goal 3 (Breadth of Knowledge). HUM 204, 205, 302, 430, 435, 505, and 600 are recommended for fulfilling KU CORE Goal 4.2 (Culture and Diversity).

Humanities Programs

Students have unusual freedom to select courses from a variety of departments. They can create integrated interdisciplinary programs and work closely with a faculty advisor. Majors may choose a track in civilizations in a global context, world literatures, or peace and conflict studies. Depending on the track, majors may focus on a particular era or culture in Eastern or Western civilization, such as the Italian Renaissance or China during the Ming dynasty, from an interdisciplinary perspective. Or they may examine a theme or issue that cuts across disciplinary lines, such as classicism versus romanticism or ideas of war and peace.

Students should plan their studies within the general requirements and consult an advisor early in the major. During the senior year, the student enrolls in HUM 424 Senior Seminar in Humanities or PCS 650 Senior Seminar in Peace and Conflict Studies for 3 credit hours to produce a substantial project that reflects and utilizes the interdisciplinary perspectives of the humanities.

The Graduate Certificate program in Peace & Conflict Studies is designed to provide students with a focused program of study in the subject area and certification of the completion of the program on the graduate transcript. Enrollment in the program will be open to students admitted to a regular KU graduate program or to non-degree-seeking graduate status. A Graduate Certificate in Peace & Conflict Studies should be of interest and value to students across a broad range of humanistic and social scientific disciplines, especially in such fields as the international area studies programs, History, International Studies, Political Science, and Religious Studies. The certificate will enhance the credentials of students seeking careers in government service both civil and military, nongovernmental organizations, international business, law, and teaching.

Courses

HUM 110. Introduction to Humanities. 3 Hours HL GE21/GE3H / H.
An introduction to the humanities as a division of learning and to interdisciplinary study in the humanities. Topics include the history and role of the humanities in a liberal education, perspectives and methods in the humanities, the humanities and human diversity, and interdisciplinary approaches to understanding and interpreting texts. LEC.

HUM 111. Introduction to Humanities, Honors. 3 Hours HL GE21/GE3H / H.
An introduction to the humanities as a division of learning and to interdisciplinary study in the humanities. Topics include the history and role of the humanities in a liberal education; perspectives and methods in the humanities; the humanities and human diversity; and interdisciplinary approaches to understanding and interpreting texts. Prerequisite: Membership in the University Honors Program. LEC.
HUM 114. Western Civilization I Honors. 3 Hours AE42/GE11/GE21 / H.
A program of study using readings and writing to explore and understand the record of Western Civilization from the ancient world through the early modern period. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice. Prerequisite: Membership in the University Honors Program or permission of the department. LEC.

HUM 115. Western Civilization II Honors. 3 Hours AE42/GE11 / H.
A program of study emphasizing the reading and discussion of some of the influential writings and ideas that have shaped the intellectual and cultural heritage of the Western world. Western Civilization II includes readings from the modern period. Prerequisite: Membership in the University Honors Program or permission of department. LEC.

HUM 175. Kansas Environment and Culture. 3 Hours GE11 / H.
An introduction to the inhabitants of Kansas and their experiences of the unique landscapes found within the state. Through the use of sources such as letters, autobiographies, novels, art, architecture and film, this course explores how Kansas environments have shaped and been shaped by the humans that occupy them, and why Kansas has had a powerful hold on the American imagination. LEC.

HUM 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Humanities and Western Civilization. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HUM 204. Western Civilization I. 3 Hours AE42/GE11/GE21 / H.
A program of study using readings and writing to explore and understand the record of Western Civilization from the ancient world through the early modern period. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice. LEC.

HUM 205. Western Civilization II. 3 Hours AE42/GE11 / H.
A program of study emphasizing the reading and discussion of some of the influential writings and ideas that have shaped the intellectual and cultural heritage of the Western world. Western Civilization II includes readings from the modern period. LEC.

HUM 206. Contemporary Western Civilization. 3 Hours HL GE11/GE3H / H.
A sequel to the two Western Civilization courses which offers the opportunity to examine influential works of literature, philosophy, history, and political thought written since the end of World War II. In keeping with the decline of colonialism and the growth of global and multicultural civilization since 1945, the readings of the course are selected from both Western and non-Western writers. LEC.

HUM 240. Introduction to World Literature. 3 Hours GE21 / H.
This course provides an introduction to the field of world literature as an approach to critical reading and writing about literary works in a global context. Topics may include: what constitutes literature; challenges to reading works across time or within different cultural traditions; reading works in translation; history of writing technologies and canon formation; literature and market forces; and the literature of global encounters and exchanges. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice. LEC.

HUM 250. Civilizations and the Individual. 3 Hours HL GE3H / H.
Introduction to perennial themes that define human experience through reading and discussion of primary texts. Topics may include the nature of humanity; nature and the supernatural; the individual and the state. LEC.

HUM 251. Civilizations and Individual, Honors. 3 Hours HL GE3H / H.
Honors version of HWC 250. Introduction to perennial themes that define human experience through reading and discussion of primary texts. Topics may include the nature of humanity; nature and the supernatural; the individual and the state. Prerequisite: Membership in the University Honors Program, or permission of instructor. LEC.

HUM 300. Studies In: ______. 3 Hours H.
An interdisciplinary course, focusing on different topics and drawing on diverse media, cultures, and historical periods. Humanities-based, this course, depending on its topic, may include the arts, the social sciences, and the natural sciences. May be repeated for credit with different topics. LEC.

HUM 302. European Culture and Society 1945 to Present. 3 Hours HT AE42 / H.
The course provides historical, cultural, and political overviews of Europe since 1945 with particular emphasis on the contribution of French and Italian culture and society. The course emphasizes Europe's contribution to Western intellectual thought, social movements, arts and literature, and global society. (Same as EARS 302.) LEC.

HUM 304. World Literature I. 3 Hours HL GE3H / H.
The study of great books in English translation from antiquity through the fifteenth century from two or more national literatures. LEC.

HUM 308. World Literature II. 3 Hours HL GE3H / H.
The study of great books in English translation from the sixteenth, seventeenth, eighteenth, and early nineteenth centuries from two or more national literatures. LEC.

HUM 312. World Literature III. 3 Hours HL GE3H / H.
The study of great books in English translation in the modern period (late nineteenth and twentieth centuries) from two or more national literatures. LEC.

HUM 317. Greek and Roman Art. 3 Hours H/W.
A survey of the art of ancient Greece and Rome (ca. 1000 B.C.E.-500 C.E.). Emphasis on major sites, architecture, sculpture, and painting. Illustrated lectures and discussion; use of the Wilcox Classical Museum. No knowledge of Greek or Latin is required. Not open to students who have taken both CLSX 526/HA526 and CLSX 527/HA 537, except with permission of the instructor. (Same as CLSX 317, HA 317.) LEC.

HUM 320. Being Human in the Workplace. 3 Hours AE51 / H.
A study of what it means to be human and humane in the workplace. Topics include the concepts of work, the worker, and the workplace; workers’ rights; issues of discrimination; business ethics; privacy and confidentiality; bullying; whistle blowing; workplace environment. LEC.

HUM 324. Undergraduate Writing & Research Methods. 1 Hour H.
Preparation for senior thesis project required of HWC majors. Introduction to writing strategies, library investigation, and time management skills. Open to HWC majors and others engaged in research and writing at the undergraduate level. Class will proceed by discussion of skills, methods, and examples, and will culminate in a written proposal from each student. LEC.

HUM 325. Theory and Method in Interdisciplinary Studies in the Humanities. 3 Hours H.
An introduction to recent cultural theory and interdisciplinary methods used across the humanities and qualitative social sciences. Includes
examination of traditional views of the humanities and its implicit cultures along with discussion of new methodologies of cultural analysis. LEC.

HUM 328. Law and the Legal Profession. 3 Hours H.
An overview of Western Legal education, both in historical and modern contexts. Legal subjects such as constitutional law, contracts, property, the courts and ethics are also studied. Students gain perspective on law as a profession, and the legal environments in which we live. Note: this course does not guarantee admission to law school or constitute entry into the legal profession as a career. It is intended to provide information and help students identify interests in the field of legal study. LEC.

HUM 335. Introduction to Indigenous Studies. 3 Hours NW / H.
This course is an introduction to the study of modern and historic indigenous peoples. It surveys the concepts, methods and content relevant to Indigenous Studies, using case studies drawn from the diverse indigenous cultures. Special attention is paid to the various ways in which standard academic disciplines --history, anthropology, literature, law, political science, among others --contribute to the study of Indigenous cultures and current issues. The course illustrates that the social, political, religious, and economic aspects of indigenous life are interconnected and tribal histories and cultures cannot be understood without an awareness of these fields. (Same as ISP 335.) LEC.

HUM 345. Indian Territory. 3 Hours H.
This course examines the cultural, social, economic, environmental, and political background of Indian territory in what is now the state of Oklahoma. It surveys the diverse geographical regions, tribal cultures, the impact of the Indian Removal Act, assimilation, acculturation, westward expansion, the Civil War, boarding schools, the Dawes Act, the Curtis Act, and land runs on Territory residents. The course also treats post-Civil War violence, outlaws, and the role of tribal courts along with controversies over removals, Land Run celebrations, allotment scandals, and Osage oil murders. (Same as HIST 318 and ISP 345.) LEC.

HUM 348. American Indian and White Relations to 1865. 3 Hours H.
This course provides an intensive study of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HIST 351, ISP 348.) LEC.

HUM 350. American Indians Since 1865. 3 Hours AE41 / H.
This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education, intermarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will multiple perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HIST 352 and ISP 350.) LEC.

HUM 370. The Twentieth Century. 3 Hours H.
An integrated study of several disciplines such as history, philosophy, art, music, and literature as they relate to the twentieth century in one country, or one historical or aesthetic movement occurring during this time. LEC.

HUM 374. Gender and Sexuality, Ancient and Modern. 3 Hours H.
Classical Greek and Roman attitudes to gender and sexuality compared and contrasted with modern nations and behaviors. Attention is paid to literature (dramatic, philosophical, medical, and legal texts) and archaeological evidence (vase painting, sculpture, and domestic architecture). The course may include the following topics: age divisions and rites of passage from childhood to maturity; marriage; conception, birth, and infanticide; the family; love; homoeroticism; property and economics; and sexuality and the law, politics, and religion. No knowledge of Greek or Latin is required. (Same as CLSX 374.) LEC.

HUM 380. Modern Themes, Ancient Models: _______. 3 Hours H.
The study of the evolution of a cultural or literary tradition from the Graeco-Roman world into modern times. The theme of the course will normally vary from semester to semester; topics such as these may be examined: the analysis of a literary genre (e.g. drama, satire, lyric), the transformation of the ancient mythical heritage, the reception of ancient astronomy. Students should consult the Schedule of Classes for the theme of the course in a given semester. With departmental permission, may be repeated for credit as topic varies. (Same as CLSX 380.) LEC.

HUM 390. Comparative Literary Theory. 3 Hours H.
A study of selected works in literary theory and of selected problems in literary interpretation and comparative literary methodology, designed to examine and apply systematically basic critical principles and approaches. Study of approaches such as feminism, Marxism, deconstruction, psychoanalysis, and cultural studies are carried out through discussion and writing. Prerequisite: Completion of the freshman-sophomore English requirement or its equivalent. LEC.

HUM 410. Dante's Comedy. 3 Hours H.
The complete Divine Comedy will be read in English translation, with equal stress on each of its three parts—the Inferno, the Purgatory, and the Paradise. The poem will be explained for the general reader by specialists having a variety of perspectives. (Same as HIST 420.) LEC.

HUM 420. The Interrelations of the Humanities and the Arts. 3 Hours H.
An interdisciplinary seminar on the relations of several of the humanities and the arts. Topics will vary, but the interrelation of the humanities and arts will be the central focus. Not open to freshmen and sophomores; recommended in the junior year. Required of students majoring in humanities. LEC.

HUM 424. Senior Seminar in Humanities. 3 Hours AE61 / H.
A seminar to result in the student's integration of knowledge within the Humanities major. Students undertake a project that reflects and utilizes the interdisciplinary perspectives of the humanities. Options for the final project include a portfolio, web page, or significant writing project. Not open to freshmen and sophomores; recommended in the senior year. Prerequisite: Completion of at least 9 hours of upper division courses in the major. IND.

HUM 430. European Civilization in World Context: _______. 3 Hours HL AE42/GE3H / H.
An introduction to the literature of encounters between European and non-European civilizations, drawing on both Western and non-Western sources. The course may include European interactions with areas such as the Mediterranean Basin, Sub-saharan Africa, South and East Asia, and the Americas. World areas and historical periods chosen for study will vary from semester to semester according to the interest and field of the instructor. Not open to freshmen. (Same as EURS 430.) Prerequisite: HWC 114 or HWC 204 and HWC 115 or HWC 205. LEC.

HUM 435. Islam in Europe. 3 Hours AE42 / H.
Investigation of Muslim migration into Europe and day-to-day interactions of Muslims with other European populations. This is an integrated study of historical, political, religious and economic influences that determine Muslim experience in contemporary European culture. (Same as EURS 435.) LEC.
HUM 436. Islam in Europe, Honors. 3 Hours H.
Investigation of Muslim migration into Europe and day-to-day interactions of Muslims with other European populations. This is an integrated study of historical, political, religious and economic influences that determine Muslim experience in contemporary European culture. Prerequisite: Membership in the University Honors Program or permission of department. Not open to students who have completed EURS/HWC 435 LEC.

HUM 460. Animals in Art and Literature. 3 Hours H.
A study of the role of animals (especially mammals), both wild and domesticated, in defining the nature of human beings and human culture through the disciplines of religious studies, philosophy, history, art and literature. Both western and non-western courses are examined. LEC.

HUM 464. Visions in Art and Literature. 3 Hours H.
A study of the phenomenon of visions, their expression in various media, and theories of visionary experience from the humanities and social sciences, with a particular emphasis on critically evaluating the relationship between the visionary experience and its expression. (Same as REL 464). LEC.

HUM 468. Illness in Art and Literature. 3 Hours H.
An examination of how illness and health have been conceptualized, expressed, and explored in Western literature and art, as well as a consideration of issues and health from the perspectives of philosophy and religious studies. (Same as REL 468). LEC.

HUM 470. American Health Care: From Origins to Modern Models. 3 Hours H.
An interdisciplinary analysis of the historical origins and present currents within American medicine. This is an integrated study of basic historical, political, economic and professional influences that underlie the character and practice of health care in our century. LEC.

HUM 477. Gender and Religion. 3 Hours H.
Examination of the symbols, images, scriptures, rites and teachings that define gender in various religious traditions. (Same as REL 477.) LEC.

HUM 490. Roots of Federal Indian Policy. 3 Hours H.
This course introduces students to the basic concepts and ideologies of US Federal Indian policy. It surveys European intellectual trends that were influential in creating policies applied to colonized native peoples. The course explores the origins of such policies, including removals, "civilization programs," the reservation period, the Dawes (Allotment) Act, the New deal, termination, relocation, NAGPRA and tribal rights, in addition to issues surrounding American Indian identity, tribal membership and demographics. This course serves as a foundation for more in-depth study of Federal Indian Law pertinent to the Indigenous peoples of the United States. (Same as ISP 490.) LEC.

HUM 494. Humanities Directed Study: ____. 1-3 Hours AE61 / H.
Investigation of a subject in fields or on topics not covered in regularly scheduled courses. May be repeated for a total of 6 hours. Does not replace or satisfy specific course requirements for the HWC major. May be counted as part of the total junior-senior credit hours required. LEC.

HUM 500. Studies in: ____. 3 Hours H.
A study of significant themes, topics, or problems in the humanities. May also relate an issue in the humanities to the social sciences or natural sciences. May be repeated for credit when the topic varies. LEC.

HUM 505. Europe Today. 3 Hours AE42 / H.
An exploration of major social, political and economic developments post World War II including the rise of the European Union, the integration of Eastern and Western Europe, the growing role of Islam, attitudes towards the United States, and Europe's role in the world economy. Topics may vary based on current events. LEC.

HUM 508. Special Topics in World Literature: ____. 3 Hours H.
An examination of selected theoretical texts and literary works relevant to the emerging field of "world literature studies" that seeks to account for the ways that global relationships structure literary production, circulation, and reception. Topics and texts vary. May be taken more than once if content differs sufficiently. LEC.

HUM 510. Science, Technology, and Society. 2-3 Hours H.
The objective of this course is to provide members of the university community with information that enables them to judge the humanistic, moral, and ethical implications of scientific and technological developments. Formal presentations by guest lecturers, followed by question-and-answer periods, will alternate with panel discussions, symposia, etc., prepared by faculty members drawn from the various departments, schools, and organizational units of K.U. LEC.

HUM 514. Totalitarianism and Literature in Central Europe. 3 Hours H.
This course asks how fiction written in Central Europe engaged and grappled with the totalitarian experience imposed by Nazi and Soviet forms of government. The course focuses on the works by 20th-century Polish, Czech, and Hungarian writers that deal with totalitarianism. (Same as SLAV 514.) LEC.

HUM 520. Literature in Translation: ____. 3 Hours H.
Studies in one or more national literatures. Discussion and frequent critical papers. Prerequisite: Completion of one junior-senior level course in a language and literature department. LEC.

HUM 524. Chinese Thought. 3 Hours NW / H/W.
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as EALC 642 and PHIL 506.) Prerequisite: Eastern civilization course or a course in Asian history or a distribution course in philosophy. LEC.

HUM 530. Study of a Culture: ____. 3 Hours H/W.
An interdisciplinary study of elements that have contributed to the development of a particular civilization, such as Irish, Scottish, or Scandinavian. LEC.

HUM 538. Pompeii and Herculaneum. 3 Hours H.
An interdisciplinary treatment of the art and archaeology of the ancient Roman cities of Pompeii and Herculaneum in Italy. Emphasis on the structures and decorations of major public spaces and houses and on aspects of cultural, social, political, commercial and religious life from the period of the second century B.C.E. to 79 C.E., when Pompeii and Herculaneum were buried by the eruption of Mt. Vesuvius. Slide lectures and discussion. (Same as CLSX 538, HA 538) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, History of Art, or permission of the instructor. LEC.

HUM 540.Translation. 3 Hours H.
Students will undertake substantial work in the translation of non-technical writing, e.g., poems, short stories, novels, essays, from any foreign language to English, and examine the practical and theoretical problems encountered in or raised by translation. Prerequisite: Satisfactory completion of at least third-year foreign language work. LEC.

HUM 551. Foodways: Native North America. 3 Hours H.
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering...
from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HIST 511 and ISP 551.) Prerequisite: Upper division course on indigenous/ American Indian history, or permission of the instructor. LEC.

HUM 552. Foodways: Latin America. 3 Hours H.
This course explores the traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HIST 512, ISP 552, and LAA 552.) Prerequisite: Upper division course on Latin America, or permission of the instructor. LEC.

HUM 566. The Devil in Russian Literature. 3 Hours H.
This course traces the various manifestations of the Devil through Russian and European folklore, myth, theology, culture, and literature. Although the focus is on Russian literature, classic European works are discussed, as they had a powerful impact on the modern Russian conception of the Evil One. Readings in English. (Same as SLAV 566.) LEC.

HUM 570. Men and Masculinities. 3 Hours H.
An intensive examination of the history and theory of masculinities in the Western world. Students become acquainted with some of the key theories of men and masculinities, and develop research projects on a topic negotiated with the instructor. (Same as HIST 626, WGSS 570.) Prerequisite: An upper-division course in History, Humanities and Western Civilization, or Women Gender and Sexuality Studies; or permission of instructor. LEC.

HUM 575. The Body, Self and Society. 3 Hours H.
An intensive examination of the role of the human body in the creation of personal and social identities in the Western world. Students become acquainted with contemporary theories of embodiment and senses as they are applied to a variety of historical themes, and develop research projects on a topic negotiated with the instructor. (Same as HIST 625, WGSS 575.) Prerequisite: An upper-division course in History, Humanities and Western Civilization, or Women Gender and Sexuality Studies; or permission of instructor. LEC.

HUM 600. Biography of a City: _____. 3 Hours AE42 / H/W.
Examination in depth of the historical, social, and artistic growth and development of one major urban center. LEC.

HUM 620. Study of a Culture: _____. 3 Hours H/W.
An interdisciplinary study of elements that have contributed to the development of a particular civilization, such as Irish, Scottish, or Scandinavian. LEC.

HUM 701. Practicum in Teaching Humanities and Western Civilization. 1 Hour.
Discussion of matters relating to teaching in Humanities and Western Civilization courses. Sections may vary according to course topics. Required of all GTAs in the first year of teaching in the Program or for the first semester of a new teaching assignment. Does not count towards completion of coursework for the M.A. or Ph.D. in any field or department. Open only to GTAs employed by the Humanities and Western Civilization Program. Graded on a satisfactory/unsatisfactory basis. LEC.

HUM 770. Research in Men and Masculinities. 3 Hours.
An intensive examination of the history and theory of masculinities in the Western World since the sixteenth century. Students will become acquainted with some of the key theories of men and masculinities, examine in depth the interplay between manhood and modernity, and develop research projects on a topic negotiated with the instructor. May be repeated if content varies sufficiently. (Same as WGSS 775.) LEC.

HUM 775. Advanced Study in the Body and Senses. 3 Hours.
An intensive examination of the role of the human body in the creation of personal and social identities in the West since the sixteenth century. Emphasis is on understanding how contemporary theories of embodiment are applied to concrete historical or contemporary problems. May be repeated if course content varies sufficiently. (Same as WGSS 775.) LEC.

Courses

PCS 150. Study Abroad in Topics in Peace and Conflict Studies: _____. 1-5 Hours H.
This course is designed for the study of special topics in Peace Conflict Studies at the 100-200 level (Freshman/Sophomore level). Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in Peace Conflict Studies. May be repeated for credit if content varies. LEC.

PCS 220. Introduction to Peace and Conflict Studies. 3 Hours HT GE11/GE3H / H.
An introduction to the content and methods of peace studies. Peace studies is a multidisciplinary and interdisciplinary approach to the study of war and peace. Building on and integrating the work of various fields of study, the course examines the causes of structural and direct violence within and among societies and the diverse ways in which humans have sought peace, from conquest and balance of power to international organizations and nonviolent strategies. LEC.

PCS 221. Introduction to Peace and Conflict Studies, Honors. 3 Hours HT / H.
Honors version of PCS 220. An introduction to the content and methods of peace studies. Peace studies is a multidisciplinary and interdisciplinary approach to the study of war and peace. Building on and integrating the work of various fields of study, the course examines the causes of structural and direct violence within and among societies and the diverse ways in which humans have sought peace, from conquest and balance of power to international organizations and nonviolent strategies. Open only to students admitted to the University Honors Program or by permission of instructor. Not open to students who have completed PCS 220. LEC.

PCS 329. History of War and Peace. 3 Hours HL / H.
A study of the changing nature of warfare and the struggle to bring about peace. Topics include pacifism, the “military revolution” that created the first professional armies; the development of diplomatic immunity, truces, and international law; the peace settlements of Westphalia, Utrecht, Vienna, Versailles, San Francisco; the creation of peace movements and peace prizes; the evolution of total war, civil war; and guerrilla warfare involving civilians in the twentieth century; the history of the League of Nations and United Nations; and the rise of intergovernmental and non-governmental organizations. (Same as HIST 329 and EURS 329.) LEC.

PCS 350. Study Abroad in Topics in Peace and Conflict Studies: _____. 1-5 Hours H.
This course is designed for the study of special topics in Peace and Conflict Studies at the Junior/Senior level. Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in Peace and Conflict Studies. May be repeated for credit if content varies. LEC.
PCS 550. Classics of Peace Literature. 3 Hours HL AE51/AE61 / H.
A study of influential proposals for world peace from Erasmus' The Complaint of Peace (1515) to the 1995 Hague Appeal for World Peace. Selected writings by such authors as Henry Thoreau, Henri Dunant, Berthe von Suttner, Woodrow Wilson, Mahatma Gandhi, and Martin Luther King, Jr., are considered. (Same as EURS 550.) Prerequisite: HWC 204 or HWC 205. LEC.

PCS 555. Topics in Peace and Conflict Studies: . 3 Hours H.
This course offers specialized or interdisciplinary perspectives on historical, political, social, and religious movements, institutions, societies, agencies, or texts dealing with conflict resolution. May be repeated for credit with different topics. LEC.

PCS 556. Education for Peace and Non-Violence. 3 Hours H.
This course reviews the history, aims and methodology of peace education. Topics include examination of the roots and causes of social violence; educational initiatives that seek to reduce structural and direct violence; and teaching methodologies in the field of multicultural education and pedagogy. LEC.

PCS 560. Directed Study in Peace and Conflict Studies. 1-3 Hours AE61 / H.
Practicum or research under the supervision of a faculty member and with the approval of the Peace and Conflict Studies Minor. Individual conferences, reports, and papers, and, in the case of practicum, supervised experience with an approved organization or agency. Prerequisite: Completion of three core courses in the minor. IND.

PCS 565. The Literature of Human Rights. 3 Hours H.
Examines in literature, art, and film from about 1800 to the present, both sides of the ongoing debate surrounding the idea that all human persons possess inalienable rights because all persons possess intrinsic value as persons, value independent of race, gender, caste or class, wealth, age, sexual preference, etc. Anti- and pro-rights proponents are paired and studied with equal care. (Same as EURS 565.) LEC.

PCS 650. Senior Seminar in Peace and Conflict Studies. 3 Hours AE61 / H.
This capstone seminar provides a sustained and in-depth study of a particular topic in Peace and Conflict Studies, to be chosen by the instructor. Each student is required to carry out a substantive research project to produce a term paper or comparable work. Required for completion of minor. Prerequisite: Students must have completed at least nine hours in the minor before enrolling. LEC.

PCS 760. Investigation and Conference in Peace and Conflict Studies. 3 Hours.
Research under the supervision of a faculty member and approved for the Peace and Conflict Studies program. Individual conferences, reports, and papers; may be combined with classwork. Open only to graduate students. LEC.

PCS 801. Peace and Conflict Studies: Texts and Methods. 3 Hours.
An interdisciplinary study of the historic literature on human conflict and peacemaking and the methods used to analyze and interpret the literature. Peace literature encompasses a range of genres that include religious teachings, philosophical essays, political proposals, treaties and conventions, fiction, poetry, and drama. Approaches to solutions to human conflict cover a spectrum including political revolution, diplomacy and treaties, international law and organizations, and world government. Students produce a substantial graduate-level research project. PCS 801 is required for the Graduate Certificate in Peace and Conflict Studies, and to be taken as early as possible in the students program of study. Open only to graduate students. LEC.

PCS 850. Peace and Conflict Studies Research Seminar. 3 Hours.
The capstone of the Graduate Certificate program, providing a sustained and in-depth study of a particular topic in Peace and Conflict Studies, to be chosen by the instructor. The members of the seminar have the option of doing a research project or supervised practicum resulting in a substantial paper that integrates their work in the program. Required for the Graduate Certificate and open only to graduate students. Prerequisite: At least six hours of course work toward the Graduate Certificate including PCS 801. SEM.

Bachelor of Arts in Humanities

Why choose a degree in Humanities?
The BA in Humanities is an interdisciplinary degree program that provides excellent preparation for twenty-first century careers. Students choose from three major tracks and complete coursework in three or more humanities departments or programs across the university. The program's focus on values, ethics, and civil debate is also reflected in its emphasis on critical thinking, reading and writing, and on individualized student advising and a flexible curriculum.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.A. Major

Humanities Major Core Knowledge and Skills
The Humanities major requires a total of 30 credit hours. Students must take courses in at least 3 humanities or social science departments or programs with a maximum of 15 hours from 1 department (except HUM in which students will take more than 15 hours). 18 of the 30 credit hours must be in courses numbered 300 or above.

Note: Sharing course work (credit hours) between any of the HUM major tracks and another major is restricted to 6 hours.
All other courses taken toward the major must be approved by the HUM undergraduate coordinator.

Majors must choose 1 of the following tracks: Civilizations in a Global Context, World Literatures, or Peace and Conflict Studies.

Majors are strongly encouraged to study abroad. Please see your advisor about this opportunity.

**Track 1: Civilizations in a Global Context**

**Civilizations in a Global Context**

This track studies aspects of the cultures of Western civilization and of one non-Western civilization (e.g., Africa, Asia, the Middle East, or Latin America). It is designed to provide the student with knowledge of diverse civilizations and with methods for investigating their differences and commonalities. 30 credit hours, to include the following:

- 3 hours of introductory and capstone coursework:
  - HUM 110 / or HUM 111: Introduction to Humanities / Introduction to Humanities, Honors
  - HUM 206: Contemporary Western Civilization
  - HUM 250: Civilizations and the Individual
  - HUM 424: Senior Seminar in Humanities (The senior project for this track is to be a comparative and integrative study of a topic that bridges the two civilizations studied.)
  - HUM 430: European Civilization in World Context: _____

- 15 additional hours to include:
  - 6 hours in the “Masterpieces of World Literature” series:
    - HUM 304: World Literature I
    - HUM 308: World Literature II
    - HUM 312: World Literature III
  - 3 hours of additional literature coursework chosen from among the following:
    - either the third HUM Masterpiece of World Literature course
    - or any other HUM literature course upon approval from an advisor

- 9 hours of introductory and capstone coursework:
  - HUM 110 / or HUM 111: Introduction to Humanities / Introduction to Humanities, Honors
  - PCS 220: Introduction to Peace and Conflict Studies
  - PCS 650: Senior Seminar in Peace and Conflict Studies (students are required to carry out a substantive research project to produce a term paper or comparable work.)

- 21 additional hours to include:
  - 6 hours in the literature of a non-English-language European culture in translation (France, Germany, Italy, Spain, etc.). Students possessing a reading knowledge of one of the European languages are strongly encouraged to take one of the literature courses in the original language.
  - 6 hours in the literature of a non-Western culture in translation. Students possessing a reading knowledge of a Non-Western language are strongly encouraged to take one of the literature courses in the original language.

**Track 2: World Literatures**

This track offers literary-critical studies of both Western and non-Western literatures, designed to provide the student with knowledge of diverse literary traditions and methods for investigating their differences and commonalities. Majors choosing this option must complete 30 credit hours to include the following:

- 6 hours in the literature of one non-Western civilization (e.g., Africa, Asia, the Middle East, or Latin America). It is designed to provide the student with knowledge of one non-Western civilization (e.g., Africa, Asia, the Middle East, or Latin America).

**Introductory and Capstone Coursework (9)**

- 9 hours of introductory and capstone coursework:
  - HUM 110 / or HUM 111: Introduction to Humanities / Introduction to Humanities, Honors
  - HUM 206: Contemporary Western Civilization
  - HUM 250: Civilizations and the Individual
  - HUM 424: Senior Seminar in Humanities (The senior project for this track is to be a comparative and integrative study of a topic that bridges the two civilizations studied.)

- 21 additional hours to include:
  - 6 hours in the “Masterpieces of World Literature” series:
    - HUM 304: World Literature I
    - HUM 308: World Literature II
    - HUM 312: World Literature III
  - 3 hours of additional literature coursework chosen from among the following:
    - either the third HUM Masterpiece of World Literature course
    - or any other HUM literature course upon approval from an advisor

- 9 hours of courses from one of the three designated areas:
  - Area 1: The pursuit of social, economic and environmental justice, for example:
    - HIST 314: Globalization: History and Theory
    - POLS 364: African Politics
    - REL 667: Religious Perspectives on War and Peace
    - SOC 650: Transnational Migration
  - Area 2: The role of nation-states and of international norms and institutions, for example:
    - HIST 334: The Great War: The History of World War I
    - HIST 340: The History of the Second World War
    - POLS 661: Politics of the Middle East
    - REL/COMS 669: Human Conflict and Peace
  - Area 3: Wealth, Power, and Inequality
    - ECON 301: Microeconomics
    - HIST 314: Globalization: History and Theory
    - REL 667: Religious Perspectives on War and Peace

**Track 3: Peace and Conflict Studies**

This track provides students with opportunities to study issues of violence and methods of peace-making from an interdisciplinary humanities perspective. Majors choosing this option must complete 30 credit hours to include the following:

- Introductory and Capstone Coursework (9)
  - 6 hours of introductory and capstone coursework:
    - HUM 110 / or HUM 111: Introduction to Humanities / Introduction to Humanities, Honors
    - PCS 220: Introduction to Peace and Conflict Studies
    - PCS 650: Senior Seminar in Peace and Conflict Studies

- 21 additional hours to include:
  - 6 hours of interdisciplinary core courses, for example:
    - ANTH 501: Topics in Sociocultural Anthropology
    - GEOG/EVRN 371: Environmental Geopolitics
    - HIST 314: Globalization: History and Theory
    - HIST 334: African Politics
    - REL 667: Religious Perspectives on War and Peace
    - SOC 351: Africa Today
    - SOC 521: Wealth, Power, and Inequality
    - REL/COMS 669: Human Conflict and Peace
    - SOC 650: Transnational Migration

- 3 hours of coursework in the original language.

- Students possessing a reading knowledge of one of the European languages are strongly encouraged to take one of the literature courses in the original language.

- Students possessing a reading knowledge of a Non-Western language are strongly encouraged to take one of the literature courses in the original language.
Area 3: The impact of religious, philosophical, and cultural influences, for example:

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

- Satisfied by 30 hours of major courses.

**Major Hours in Residence**

- Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

- Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

- Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Sample 4-year plans for the BA degree in Humanities and Western Civilization with the following concentrations can be found here: Civilizations in Global Context (p. 1577), Peace & Conflict Studies (p. 1578), World Literatures (p. 1579), or by using the left-side navigation.

### Departmental Honors

An undergraduate student must maintain a minimum overall grade-point average of 3.25 and 3.5 in the major. Students must be recommended for honors by the advisor of the comprehensive project completed for HUM 424 Senior Seminar in Humanities. Members of the HWC advisory committee then evaluate the project to determine whether the student should be awarded honors.

### BA in Humanities with concentration in Civilizations in Global Context

Below is a sample 4-year plan for students pursuing the BA in Humanities with a concentration in Civilizations in Global Context. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

**Total Hours: 120-123**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete one additional Goal 2.1 course.
2. Visit this website (http://college.ku.edu/undergrad/curriculum/ ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. 6-9 hours (2-3 courses) in aspects of the cultures of Western Civilization, 1 of which must be an HWC course, is required.
4. 6-9 hours (2-3 courses) in aspects of the cultures of Non-Western Civilization is required.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

#### Total Hours: 120-123

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete one additional Goal 2.1 course.
2. Visit this website (http://college.ku.edu/undergrad/curriculum/ba QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Completion of 6 hours (2 courses) in the Masterpieces of World Literature series: HUM 304, HUM 308, HUM 312.
4. 3 hours (1 course) of additional literature coursework chosen from either the third HUM Masterpiece of World Literature course or any other HUM literature course upon approval from an advisor. Visit the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/ humanities-western-civilization/ba/#requirementstext) tab for an explanation of the type of coursework needed.
5. 6 hours in the literature of a non-English-language European culture in translation (France, Germany, Italy, Spain, etc.). Students possessing a reading knowledge of one of the European languages are strongly encouraged to take one of the literature courses in the original language.
6. 6 hours in the literature of a non-Western culture in translation. Students possessing a reading knowledge of a Non-Western language are strongly encouraged to take one of the literature courses in the original language.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific
Minor in Humanities

The minor in Humanities addresses the needs of students who seek to complement their major field of study with a solid grounding in the intellectual traditions and cultural practices of a particular area of world culture, or who wish to deepen and broaden their knowledge and understanding of a specific historical period. In addition, study in the humanities provides an excellent opportunity for students preparing for careers in the professions that require high standards of written and oral communication skills. Given its emphasis on text-based curriculum that encourages critical thinking, shared discussion, and written and oral analysis on significant topics, the Minor in Humanities prepares undergraduates to excel as they move forward into graduate or professional schools or the work force.

Requirements for the Minor

The Minor in Humanities requires 18 hours of coursework, 12 hours of which must be taken at the junior/senior level, and 3 of which may be shared with a student’s major.

Students selecting this minor must complete the following:

- HUM 110 Introduction to Humanities 3
- or HUM 111 Introduction to Humanities, Honors
- or HUM 250 Civilizations and the Individual
- HUM 205 Western Civilization II 3
- or HUM 206 Contemporary Western Civilization
- HUM 424 Senior Seminar in Humanities 3
- Three HUM courses numbered 300 and above (nine hours), chosen in consultation with an advisor, and focusing on a specific theme.

Minor in Peace and Conflict Studies

Why study Peace and Conflict Studies?

This multidisciplinary program enables students to examine conflict within and between societies as well as ways that humans address conflict through war, mediation, law, diplomacy, institutions, and peaceful resistance.

Requirements for the Minor

Students selecting this minor must complete each of the following:

- **Introduction to Peace and Conflict Studies (3)**
  - Satisfied by:
    - PCS 220 Introduction to Peace and Conflict Studies 3

- **Peace and Conflict Studies Core Knowledge and Skills (6)**
  - Satisfied by 2 courses (6 hours) from the following:
    - GEOG/EVRN 371 Environmental Geopolitics
    - HIST 314 Globalization: History and Theory
    - PCS 550 Classics of Peace Literature
    - POLS 679 International Conflict
    - REL 667 Religious Perspectives on War and Peace
    - SOC 650 Transnational Migration

- **Peace and Conflict Studies Required Elective (6)**
  - Satisfied by 2 courses (6 hours) from the following or from the core courses listed above:
    - ANTH 465 Genocide and Ethnocide
    - ENGL 479 The Literature of: _____
    -EURS 505 Studies in Exile Literature
    - EURS 565 The Literature of Human Rights
    - HIST 343 The Holocaust in History
    - HIST 369 Colonialism and Revolution in the Third World, Honors
    - HIST 370 Violence and Conflict in Latin American History
    - PCS 555 Topics in Peace and Conflict Studies: _____
    - PCS 560 Directed Study in Peace and Conflict Studies
    - PCS 565 The Literature of Human Rights
    - PHIL 555 Justice and Economic Systems
    - POLS 650 Palestinians and Israelis
    - POLS 671 International Cooperation
    - POLS 673 International Organization
    - POLS 685 International Law: Laws of Armed Conflicts
    - PSYC 572 Psychology and International Conflict
    - REL 669 Human Conflict and Peace
    - SOC 531 Global Social Change

- **Senior Seminar in Peace and Conflict Studies (3)**
  - Satisfied by:
    - PCS 650 Senior Seminar in Peace and Conflict Studies 3
Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Note:** Only 3 hours can be shared between the minor and any other minor or major. Students may not count more than 9 hours of course work from any one department toward completion of the minor.

Peace & Conflict Studies, Graduate Certificate in

Offered by the Humanities Program, Peace & Conflict Studies is a multidisciplinary and interdisciplinary approach to the study of human conflict. It examines the origins and nature of conflict within and among societies and the various ways in which humans address conflict. Through academic coursework and the possibility of practical experience, Peace & Conflict Studies offers students a concentrated program of study of one of the most central and urgent human issues: the causes and consequences of human conflict and the achievements and possibilities of building peaceful and equitable forms of social existence.

The Graduate Certificate program in Peace & Conflict Studies is designed to provide students with a focused program of study in the subject area and certification of the completion of the program on the graduate transcript. Enrollment in the program will be open to students admitted to a regular KU graduate program or to non-degree seeking graduate status. A Graduate Certificate in Peace & Conflict Studies should be of interest and value to students across a broad range of humanistic and social scientific disciplines, especially in such fields as the international area studies programs, History, International Studies, Political Science, and Religious Studies. The certificate will enhance the credentials of students seeking careers in government service both civil and military, nongovernmental organizations, international business, law, and teaching.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Students must complete 4 courses for a total of 12 graduate credit hours:

**Requirements (12)**

**Elective Courses**

Courses included for elective credit are reviewed by the Coordinating Committee and updated each year.

Indigenous Studies Program

**Indigenous Studies Graduate Program**

The Indigenous Studies master’s degree program provides students with in-depth knowledge of Indigenous peoples’ complex and diverse cultures and histories, as well as their impacts on the global society. Our multidisciplinary program offers students the advantage of studying relevant issues from a wide range of academic perspectives. The expertise of our affiliate faculty members includes Native American history, including medical and legal aspects; indigenous literature; ethnobotany; Indigenous peoples’ cultural survival and political activism; American Indian tribal governments; indigenous geographies and cartographic history; Native American religions; and much more.

Empowered by the resources on campus and in our community, we strive to provide unique learning opportunities for our students that go beyond the classroom. The mission of the multidisciplinary Indigenous Studies Program is to educate students and promote scholarship about the complexity and diversity of Indigenous peoples’ cultures and histories, and to provide students with the knowledge to understand and assess the U.S. tribes’ unique relationships to the U.S. government. Indigenous Studies encourages appreciation of the contributions of Indigenous peoples to the global society, provides students with an understanding of the difficulties confronting tribal nations and offers foundational knowledge to assist them in finding innovative solutions to solve those problems.

Financial Aid

The program may nominate outstanding students for KU graduate fellowships and awards. Consideration requires submission of an application by January 15.

The program offers a few scholarships for excellence in academic work. Consideration requires the submission of all application materials by February 1.

Visit the Graduate Studies website for information about funding opportunities (http://www.graduate.ku.edu/funding-opportunities) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml) administers grants, loans, and need-based financial aid.

Courses

ISP HW. Humanities or Non-West Culture. 3 Hours NW AE42 / H. LEC.
ISP 101. Introduction to Indigenous Nations Studies. 3 Hours NW / S.
An introduction to the study of Indigenous peoples. It surveys the concepts, methods, and content relevant to Applied Indigenous Studies, using case studies drawn from diverse cultures. The course illustrates that the social, political, religious, and economic aspects of American Indian life are interconnected and that tribal histories cannot be understood without an awareness of these fields. Students are introduced to controversies over how to research, write, and interpret American Indians, and will address the foundations of Indigenous Studies, and that is Indigenous concepts of decolonization, empowerment and Nation-building. The course explores how the lives of Indigenous people have been affected by colonization, while exploring the varying definitions of "colonialism", "colonizer" and the "colonized. LEC.

ISP 305. World Indigenous Literatures. 3 Hours NW AE42 / H.
A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as ENGL 305/GIST 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ISP 330. Native American Religions. 3 Hours NW AE41 / H.
A survey of religious traditions among selected Native American peoples. Topics include religious freedom, ritual activity, cultural narrative ("myth"), kinship, healing practices, ecology, government relations, impact of colonization, impact of missionization, contact between cultures, and secularization. Not open to students who have completed GINS 331. (Same as REL 330.) LEC.

ISP 331. Native American Religions, Honors. 3 Hours NW AE41 / H.
A survey of religious traditions among selected Native American peoples. Topics include religious freedom, ritual activity, cultural narrative ("myth"), kinship, healing practices, ecology, government relations, impact of colonization, impact of missionization, contact between cultures, and secularization. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have completed ISP 330. (Same as REL 331.) LEC.

ISP 335. Introduction to Indigenous Studies. 3 Hours NW / H.
This course is an introduction to the study of modern and historic indigenous peoples. It surveys the concepts, methods, and content relevant to Indigenous Studies, using case studies drawn from the diverse indigenous cultures. Special attention is paid to the various ways in which standard academic disciplines—history, anthropology, literature, law, political science, among others—contribute to the study of Indigenous cultures and current issues. The course illustrates that the social, political, religious, and economic aspects of indigenous life are interconnected and tribal histories and cultures cannot be understood without an awareness of these fields. (Same as HWC 335.) LEC.

ISP 345. Indian Territory. 3 Hours H.
This course examines the cultural, social, economic, environmental, and political background of Indian Territory in what is now the state of Oklahoma. It surveys the diverse geographical regions, tribal cultures, the impact of the Indian Removal Act, assimilation, acculturation, westward expansion, the Civil war, boarding schools, the Dawes Act, the Curtis Act, and land runs on Territory residents. The course also treats post-Civil War violence, outlaws, and the role of tribal courts along with controversies over removals, allotment scandals, and Osage oil murders. (Same as HIST 318 and HWC 345.) LEC.

ISP 348. American Indian and White Relations to 1865. 3 Hours H.
This course provides an intensive survey of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HIST 351, HWC 348.) LEC.

ISP 350. American Indians Since 1865. 3 Hours AE41 / H.
This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education, intermarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will multiple perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HIST 352 and HWC 350.) LEC.

ISP 490. Roots of Federal Indian Policy. 3 Hours H.
This course introduces students to the basic concepts and ideologies surrounding modern United States Federal Indian policy. It will survey the European intellectual trends that were influential in creating policies that were (and still are) applied to the colonized Native peoples. The course will explore the roots of US Indian policy, including removals, "civilization programs," the reservation period, the Dawes (Allotment) Act, the New Deal, termination, relocation, NAGPRA and tribal rights, in addition to the issues surrounding American Indian identity, tribal membership and demographics. This course serves as the foundation for more in-depth study into the complicated and ever-changing field of Federal Indian Law as it pertains to the Indigenous peoples of the United States. (Same as HWC 490.) LEC.

ISP 504. Topics in Indigenous Nations Studies: . 3 Hours NW / S.
This course concentrates on selected problems in the interdisciplinary field of Indigenous Nations Studies. Courses in this field utilize methods developed in various disciplines in order to examine issues related to the survival, self-sufficiency, mutual support, empowerment, and decolonization of Indigenous Peoples throughout the world. May be repeated for credit when the topic differs. Recommended for juniors or seniors, or for students who have completed ISP 101/GINS 101/INS 101. LEC.

ISP 510. Indigenous Women and Activism. 3 Hours NW / S.
Examines the roles of activist Indigenous women in politics, social work, academia, business, environmental and health issues. Compares and contrasts the ideology of the predominantly white feminist movement with the goals and concerns of the "Red Power" movement and emphasizes Indigenous socio-cultural values and concerns. Profiles prominent Indigenous female activists, tribal leaders and writers, in addition to topics of serious concern to Indigenous women: violence, racism, loss of culture and language, education, health care and other manifestations of continued colonization. LEC.

ISP 530. Indigenous Food and Health. 3 Hours NW / U.
This course investigates the historic diets of Indigenous peoples, including cultivation of crops, hunting and fishing methods, food preparation and seed preservation. The class traces through history the colonial policies and ideologies that caused the cultures to alter their ways of eating, resulting in unprecedented modern health problems and offers traditional cultural strategies for health recovery. LEC.
ISP 551. Foodways: Native North America. 3 Hours H.
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate, and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HIST 511 and HWC 551.) Prerequisite: Upper division course on indigenous / American Indian history, or permission of the instructor. LEC.

ISP 552. Foodways: Latin America. 3 Hours H.
This course explores the traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HIST 512, HWC 552 and LAA 552.) Prerequisite: Upper division course on Latin America, or permission of the instructor. LEC.

ISP 600. Research Methods and Indigenous Peoples. 1-3 Hours NW / U.
An introduction to the social science methods of investigation and analysis that are used in Indigenous Nations Studies as a discipline. The nature of Indigenous Nations Studies data sources and methods of data collection, the logic of social scientific inquiry, and key methods of data analysis are emphasized. In addition, the social and educational implications of the results are examined. Prerequisite: Permission of instructor. LEC.

ISP 601. Indigenous Peoples of the World. 3 Hours NW / U.
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GEOG 601 and GIST 601.) Prerequisite: Permission of instructor. LEC.

ISP 602. Indigenous Decolonization and Empowerment. 3 Hours NW / U.
An Indigenous focus of the foundation and impact of colonization, decolonization, empowerment and nation-building. Prerequisite: Permission of instructor. LEC.

ISP 603. Introduction to Indigenous Nations Graduate Studies. 3 Hours NW / U.
The goal of this course is two-fold: to introduce students to the academic discipline of Indigenous Nations Studies, its debates and contours, history, methods, and resources; and to develop the skills necessary to proceed successfully through the program. Key words and terms, critical thinking/reading/and writing skills, and research skills are emphasized. Guest lectures from ISP faculty members, librarian, and members of the Writing Center serve to complement and broaden assignments and discussions. Prerequisite: Permission of instructor. LEC.

ISP 611. Applied Indigenous Leadership. 3 Hours NW / U.
Trains students in the skills of grant writing, leadership, conflict resolution, public presentation, organization and program development as applicable to Indigenous peoples. Prerequisite: Permission of Instructor. LEC.

ISP 612. Native American Oppression, Resistance, and Liberation. 3 Hours NW / U.
An interdisciplinary examination of the effects of historical and contemporary forms of colonialism and postcolonial strategies of resistance practiced by Indigenous peoples within and beyond the borders of the United States. Prerequisite: Permission of instructor. LEC.

ISP 613. Issues Facing Indigenous Peoples. 3 Hours NW / U.
Explores the theories and methods of selected cultural, environmental, legal, political, and socio-economical issues confronting Indigenous societies throughout the world. Prerequisite: Permission of instructor. LEC.

ISP 614. Decolonizing Narratives. 3 Hours NW / U.
With the decolonizing potential of Indigenous literary and cultural productions, this course seeks to both answer and explore such questions as: How can literary and cultural texts such as novels, poetry, music, and film from world Indigenous communities function as decolonizing tools? Can decolonizing methodologies be applied to such texts? How do such texts contribute to and strengthen Indigenous political, intellectual, cultural, visual and rhetorical sovereignty? Includes an overview of Indigenous literature, films and documentaries from North America, the Pacific, Australia, and New Zealand. Prerequisite: Permission of instructor. LEC.

ISP 670. Indigenous Peoples' Health Status, Beliefs, and Behaviors. 3 Hours NW / U.
Explores the health status, beliefs, and behaviors of particular Indigenous cultures. Examines the role of internal and external influences on health, various mainstream and Indigenous models of health behavior, perceptions of illness and curing, health status, and healing practices. Focuses on the groups of the Maori of New Zealand, First Nations in Canada, Palestinian peoples in the Middle East, American Indians, and Indigenous Australians. Prerequisite: Permission of instructor. LEC.

ISP 673. Environmental Justice. 3 Hours NW / U.
An examination of the impact of environmental justice and security in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in responses and mitigation schemes. A survey of mining, dumping, and storage of toxic and radioactive waste activities as related to Indigenous peoples. Case study analyses of economic, military and mining interests contrasted with perspectives emerging from cultural traditions and beliefs of Indigenous peoples and communities. Prerequisite: Permission of instructor. LEC.

ISP 800. Indigenous Issues in the United States. 3 Hours.
This course will focus on contemporary issues relating to Indigenous peoples and nations within the United States, with particular emphasis on such issues as sovereignty, indigeneity, colonialism and decolonization. The course will address varied disciplinary approaches to this range of issues and will consider how this discourse bears upon scholarly conversations regarding broader themes in other selected fields of study. LEC.

ISP 801. Indigenous Peoples of the World. 3 Hours.
A survey of the varied responses of global Indigenous peoples as a result of the imposition of externally-dominated economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous
peoples seeking recognition and protection under international law will be used. The course is offered at the 600 and 800 levels, with additional assignments at the 800 level. (Same as GEOG 801.) LEC.

**ISP 802. Indigenous Decolonization and Empowerment. 3 Hours.** An Indigenous focus of the foundation and impact of colonization, decolonization, empowerment and nation-building. LEC.

**ISP 803. Introduction to Indigenous Nations Graduate Studies. 3 Hours.**
The goal of this course is two-fold: to introduce students to the academic discipline of Indigenous Nations Studies, its debates and contours, history, methods, and resources; and to develop the skills necessary to proceed successfully through the program. Unpacking key words and terms, critical thinking/reading/and writing skills, and research skills will be emphasized. Guest lectures will serve to complement and broaden assignments and discussions LEC.

**ISP 804. Special Topics: _____: 1-3 Hours.** Designed to fulfill program needs of the Indigenous Nations Studies master's program, this course may meet with appropriate professional or graduate courses. Can be repeated for credit when topic differs. LEC.

**ISP 805. American Indian Leadership. 3 Hours.** Students will analyze the qualities of American Indian leadership and will examine circumstances and backgrounds of Indian leaders as heroes and role models paying particular attention to how they responded as individuals, leaders, and as community members of their tribes. Besides surveying noted Indian leaders in treaty negotiations, allotment, removal, war, etc., the course will examine leaders in medicine, education, and recent American Indian history including attention to women leaders. Students will learn about the leaders’ tribes and cultures in addition to understanding the ethnohistory of Indian-white relations. LEC.

**ISP 806. Directed Readings. 1-3 Hours.** An individual readings course with a qualified instructor on a topic in Indigenous Nations Studies. LEC.

**ISP 807. Internship in Indigenous Nations Studies. 1-6 Hours.** Internships provide students the opportunity to obtain training and perform professional duties for academic credit at pre-approved indigenous-related agencies, organizations, and communities. Students are required to demonstrate a minimum of 60 contact hours for each one credit hour. To enroll, students must obtain the consent of a ISP faculty member and the Program's Curriculum Committee. May be repeated for credit. Prerequisite: permission from instructor. FLD.

**ISP 809. Indigenous Women: Gender and Sexuality. 3 Hours.** This course examines gender and sexuality among indigenous communities in the world. Ethnographies about indigenous women are used to explore a variety of gender and sexual identities. Gendered and sexualized identities are analyzed within broader societal contexts such as the division of labor, kinship, marriage household, and the control of resources. Power relationships are examined between sub-altern women and the larger society, nation and globalizing world in which they play a part. LEC.

**ISP 810. Indigenous Women and Activism. 3 Hours.** An examination of the roles and ideologies of prominent Indigenous female activists, tribal leaders and writers. LEC.

**ISP 811. Applied Indigenous Leadership. 3 Hours.** A preparation to train students in the skills of grant writing, leadership, conflict resolution, public presentation, organization and program development as applicable to Indigenous peoples. LEC.

**ISP 812. Native American Oppression, Resistance, and Liberation. 3 Hours.** An interdisciplinary examination of the effects of historical and contemporary forms of colonialism and postcolonial strategies of resistance practiced by Indigenous peoples within and beyond the borders of the United States. LEC.

**ISP 813. Issues Facing Indigenous Peoples. 3 Hours.** This course explores the theories and methods of selected cultural, environmental, legal, political, and socio-economical issues confronting Indigenous societies throughout the world. LEC.

**ISP 814. Decolonizing Narratives. 3 Hours.** With the decolonizing potential of Indigenous literary and cultural productions, this course seeks to both answer and explore such questions as: How can literary and cultural texts such as novels, poetry, music, and film from world Indigenous communities function as decolonizing tools? Can decolonizing methodologies be applied to such texts? How do such texts contribute to and strengthen Indigenous political, intellectual, cultural, visual and rhetorical sovereignty? An overview will be presented from Indigenous literature, films and documentaries from North America, the Pacific, Australia, and New Zealand. LEC.

**ISP 824. Federal Indian Law. 2.5-3 Hours.** Addresses the law and policy of the United States regarding Indian nations and their members. Issues include the origins and contours of federal plenary power over Indian affairs, the scope of inherent tribal sovereignty, the limits of state power in Indian country, civil and criminal jurisdiction, and gaming. (Same as LAW 914) Prerequisite: Permission from instructor. LEC.

**ISP 830. Indigenous Food and Health. 3 Hours.** Investigates the historic diets of Indigenous peoples, including cultivation of crops, hunting and fishing methods, food preparation and seed preservation. Traces through history the colonial policies and ideologies that caused the cultures to alter their ways of eating, resulting in unprecedented modern health problems. Will offer traditional cultural strategies for health recovery. LEC.

**ISP 862. Indigenous Archives. 3 Hours.** A discussion of what constitutes an archive, including the theory and methodology of archival collections, and an introduction to archiving as a profession. Includes a discussion of records management, with an emphasis on tribal archives collections and tribal records. Includes instruction on arrangement and description of tribal archival collections, funding, environmentally controlled storage, and disaster recovery planning. The class will specifically address the needs of tribal archives: tribal records, oral history interviews, photographs, litigation records, grant writing, and culturally sensitive materials. Students will learn about primary and secondary sources, different formats of writing professional research papers, and will produce a research paper at the end of the semester. LEC.

**ISP 863. Oral History. 3 Hours.** A discussion of the importance of the oral tradition in Indigenous nations and the difference between oral tradition and oral histories and myth. The class will concentrate on the methodologies of tribal oral history projects, from organizational aspects to personnel issues, equipment needed, sources of grant funding, interview methodology, as well as documentation and preservation of the interviews. The course will discuss how to share and make available these interviews and when access to them needs to be restricted. The students will conduct videotaped oral histories as part of the class exercises and get hands-on experience with the preservation, organization, and transcription of oral history projects. LEC.
ISP 864. Exhibiting Culture. 3 Hours.
A discussion of how museums and exhibits can be a vehicle for Indigenous community empowerment and the importance of Indigenous cultures to interpret their stories themselves. The class will also look at how different nations view the display and handling of their belongings and what kinds of belongings can or should be handled and displayed. LEC.

ISP 865. Grant Writing and Fundraising. 3 Hours.
A discussion of how to develop a grant writing and fundraising plan for a tribal project. Includes how to develop an idea or project and how to prepare a funding campaign. The students will produce a fundraising event and work on the various parts of an actual grant as the final class activity that will be designed to bring in funding to support KU Global Indigenous Nations Studies Program. LEC.

ISP 866. Indigenous Museum Management. 3 Hours.
A discussion of the community models of museum management, including museum administration, professional positions within a museum, museum exhibits, public education programs, security, and disaster planning. The course will compare and contrast museum management in European/American museums and tribal museums and how these management styles affect collection policies, exhibit policies, traditional care of collections, sacred and ceremonial item handling and display, NAGPRA and repatriation, and oral histories. LEC.

ISP 867. Indigenous Records Management. 3 Hours.
A discussion of what constitutes a record and how to manage records at the business or government level. Train students in hands-on records management techniques, policies, developing a records retention schedule, and how to plan and design a records management program for records pertaining to Indigenous nations. LEC.

ISP 868. Indigenous Records Management II. 3 Hours.
A discussion of what constitutes a record and how to manage records at the business or government level. This is a second level of records management leading to preparation for taking the certification examination. LEC.

ISP 869. Traditional Care of Collections. 3 Hours.
A discussion of on traditional care issues of handling and preserving of Indigenous belongings. The class will compare the methods of traditional care at tribal museums vs. conservation of Native items in mainstream museums. LEC.

ISP 870. Indigenous Peoples' Health Status, Beliefs, and Behaviors. 3 Hours.
This course is designed to explore the health status, beliefs, and behaviors of particular Indigenous cultures. The course examines the role of internal and external influences on health, various mainstream and Indigenous models of health behavior, perceptions of illness and curing, health status, and healing practices. The course will focus on the groups of the Maori of New Zealand, First Nations in Canada, Palestinian peoples in the Middle East, American Indians, and Indigenous Australians. LEC.

ISP 871. Community Health and Development. 3 Hours.
This course extends knowledge and skills for addressing issues in community health and development (e.g., substance abuse, adolescent pregnancy, child and youth development, prevention of violence). Students learn core competencies such as analyzing community problems and goals, strategic planning, intervention, and evaluation, and then apply these skills to issues that matter to them and to the communities they serve. (Same as ABSC 710.) LEC.

ISP 873. Environmental Justice. 3 Hours.
An examination of the impact of environmental justice and security in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in responses and mitigation schemes. A survey of mining, dumping and storage of toxic and radioactive waste activities as related to Indigenous peoples. Case study analyses of economic, military and mining interests contrasted with perspectives emerging from cultural traditions and beliefs of Indigenous peoples and communities. LEC.

ISP 874. Natural Resource Management: Indigenous Perspectives. 3 Hours.
An examination of resource management issues in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in the management schemes. Case study analyses of management techniques derived from European-based science with Indigenous traditions and beliefs. LEC.

ISP 875. Native and Western Views of Nature. 3 Hours.
A comparison of the attitudes and perspectives towards the natural world developed by different cultural traditions. A review of western attitudes and also the traditional ecological knowledge of Indigenous peoples toward management of natural resources, non-human animals, and the natural world. LEC.

ISP 876. Comparative Law. 2.5-3 Hours.
A general introduction to and comparison of major legal systems of the world, with special emphasis given to how those systems reflect differing cultural values in addressing common legal questions. A major goal of the course is to deepen the students' understanding of law and practice in the United States and to broaden their perspective of law beyond the boundaries of the common law systems. (Same as LAW 879.) Prerequisite: Permission from instructor. LEC.

ISP 877. Public Lands and Natural Resources. 2.5-3 Hours.
Devoted to the law and legal systems that govern the classification and use of one-third of America's land mass. Includes a survey of the acquisition and disposition of the public domain; general federal statutes and doctrines that affect public land law; and different forms of federal lands classifications, including national parks, scenic rivers, and grazing lands. (Same as LAW 975.) Prerequisite: Permission from instructor. LEC.

ISP 878. Water Law. 2.5-3 Hours.
A study of water rights including the riparian and prior appropriation doctrines for surface water, and the various doctrines for groundwater. Private and public water distribution organizations, and special water districts. Water pollution control. Interstate conflicts over water resources. Federal government involvement in water distribution including federal powers and programs. Indian and reserved rights. Kansas water law. (Same as LAW 995.) Prerequisite: Permission from instructor. LEC.

ISP 882. Native American Natural Resources. 2-3 Hours.
This course provides a detailed examination of natural resource law as it applies to Indian Country. Among the topics to be discussed are water law, environmental protection, and subsurface property rights. (Same as LAW 967.) LEC.

ISP 883. Sovereignty, Self-Determination and Indigenous Nations. 2-3 Hours.
Examines legal, governmental, political, social, cultural, and economic issues associated with American Indian tribal sovereignty and self-determination. Includes the source and scope of tribal sovereignty; the threats to tribal sovereignty; and the methods by which tribal sovereignty can be strengthened and revitalized. (Same as LAW 987.) Prerequisite: Permission from instructor. LEC.
ISP 896. Master’s Non-Thesis. 1-6 Hours.
Course for Indigenous Studies students completing a portfolio Master’s exam. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission from instructor. LEC.

ISP 899. Master’s Thesis. 1-6 Hours.
Course for Global Indigenous Nations Studies students completing Master’s thesis projects. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission from instructor. THE.

Indigenous Studies Minor

Indigenous Studies Minor

The minor in Indigenous Studies is designed to provide students with a focused program of study of the events, laws, policies, and treaties that have defined the relationship between the United States and Indigenous Nations and Peoples. This knowledge is essential to analysis of a broad variety of historical, political, religious and social issues in the U.S. Such issues are of paramount importance to ensure the students a solid grounding in the histories and cultures of the indigenous peoples of North America, while allowing them to gain disciplinary knowledge in preparation for graduate study or immediate employment in fields such as government service, museum/archival work, etc.

Requirements for the Minor

Indigenous Studies Minor Course Requirements

The Indigenous Studies minor requires 18 hours of Indigenous Studies courses, of which 12 must be in courses numbered 300 or above, with a 2.0 grade-point average.

One course taken at Haskell Indian Nations University is strongly recommended.

(Courses must have 30% or more content focused on indigenous peoples, and are approved by the ISP Executive Committee.)

ISP courses approved for the minor include:

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).
Master of Arts in Indigenous Studies

Indigenous Studies Graduate Program

The Indigenous Studies master's degree program provides students with in-depth knowledge of Indigenous peoples' complex and diverse cultures and histories, as well as their impacts on the global society. Our multidisciplinary program offers students the advantage of studying relevant issues from a wide range of academic perspectives. The expertise of our affiliate faculty members includes Native American history, including medical and legal aspects; indigenous literature; ethno- botany; Indigenous peoples' cultural survival and political activism; American Indian tribal governments; indigenous geographies and cartographic history; Native American religions; and much more.

Empowered by the resources on campus and in our community, we strive to provide unique learning opportunities for our students that go beyond the classroom. The mission of the multidisciplinary Indigenous Studies Program is to educate students and promote scholarship about the complexity and diversity of Indigenous peoples' cultures and histories, and to provide students with the knowledge to understand and assess the U.S. tribes' unique relationships to the U.S. government. Indigenous Studies encourages appreciation of the contributions of Indigenous peoples to the global society, provides students with an understanding of the difficulties confronting tribal nations and offers foundational knowledge to assist them in finding innovative solutions to solve those problems.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2280) section of the online catalog.

Please consult the Departments & Programs (p. 748) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Candidates requesting consideration for admission to the Master of Arts program in Indigenous Studies must complete the online application through the Office of Graduate Studies. Applicants should upload the supporting application documents listed below to the online application. There is no need to send copies of application materials directly to the Indigenous Studies Program.

Timelines

The Indigenous Studies Program accepts students on a rolling admissions basis. Students may apply to be admitted for either the fall or spring semesters. Priority consideration will be given to applications received by April 1 for the fall semester and by October 1 for the spring semester.

Application documents

- GRE verbal and analytical writing scores
- Transcript(s) from undergraduate or graduate institution(s) you have attended
  
  The Office of Graduate Studies requires a minimum 3.0 undergraduate GPA for admission

Applications can upload an unofficial, electronic copy of their transcripts with the application form

- Writing sample of at least 10 pages
- 5-page personal statement explaining how a Master's degree in Indigenous Studies will benefit you and why you will successfully complete the degree

Applications can upload their writing samples and statements as part of the application.

- Three letters of recommendation
  The letter of recommendation system works on the contact information provided by the applicant at the time of application.

M.A. Degree Requirements

Students pursuing the M.A. in Indigenous Studies must successfully complete a minimum of 30 graduate credit hours: a 9-hour core curriculum plus 21 hours taken according to either Plan A or Plan B.

Core Curriculum

ISP 800 Indigenous Issues in the United States. A 3-hour graduate-level course taught by the director of the ISP with guest presentations by faculty who study indigenous peoples from various disciplinary perspectives.

One 3-hour graduate-level course in the history of indigenous peoples of North America, e.g., HIST 801 Graduate Colloquium in Indigenous Peoples of North America.

One 3-hour graduate-level course with 50 percent or more content in Indigenous Peoples that has been approved by the executive committee, offered by certain departments such as English, History, and Humanities & Western Civilization.

Plan A: Non-Thesis Option

- 12 hours of approved coursework with content relevant to the field of indigenous studies approved by the student's graduate committee.
- 9 hours of electives.
- An M.A. examination: an oral examination in which the candidate defends his or her portfolio, which will be composed of the student's entire body of work completed in courses counted for the degree.

Plan B: Thesis Option

- 12 hours of approved coursework with content relevant to the field of indigenous studies approved by the student's graduate committee.
- 6 hours of electives.
- 3 hours of thesis on an approved subject with an oral defense.

Joint Degree with KU Law

The University of Kansas offers a joint degree program in Law and Indigenous Studies. As part of this unique program, students may graduate with both the J.D. and an M.A. in Indigenous Studies in three to four years, making it an ideal choice for students interested in tribal
law. Students must apply separately to the law school and the Indigenous Studies graduate program.

The program "aspires to facilitate the protection and strengthening of indigenous sovereignty, self-determination, and self-sufficiency" in indigenous nations throughout the Americas.

The University of Kansas was the third institution of higher learning in the United States to offer a joint degree program relating to indigenous peoples.

For more information, contact Elizabeth Kronk Warner, Law School, (785) 864-4659, elizabeth.kronk@ku.edu; or Michael Zogry, Indigenous Studies, (785) 864-5271, mzogry@ku.edu.

Graduate Certificate in Indigenous Studies

Indigenous Studies Graduate Program

The Indigenous Studies master’s degree program provides students with in-depth knowledge of Indigenous peoples’ complex and diverse cultures and histories, as well as their impacts on the global society. Our multidisciplinary program offers students the advantage of studying relevant issues from a wide range of academic perspectives. The expertise of our affiliate faculty members includes Native American history, including medical and legal aspects; indigenous literature; ethnobotany; Indigenous peoples’ cultural survival and political activism; American Indian tribal governments; indigenous geographies and cartographic history; Native American religions; and much more.

Empowered by the resources on campus and in our community, we strive to provide unique learning opportunities for our students that go beyond the classroom. The mission of the multidisciplinary Indigenous Studies Program is to educate students and promote scholarship about the complexity and diversity of Indigenous peoples’ cultures and histories, and to provide students with the knowledge to understand and assess the U.S. tribes’ unique relationships to the U.S. government. Indigenous Studies encourages appreciation of the contributions of Indigenous peoples to the global society, provides students with an understanding of the difficulties confronting tribal nations and offers foundational knowledge to assist them in finding innovative solutions to solve those problems.

Certificate Application and Admissions Procedure

Current Students

Current graduate students wishing to enroll in the Graduate Certificate program will need to apply through Graduate Studies (http://graduate.ku.edu/ku-graduate-application). The application process entails completing the online application, paying a $30.00 application fee, and submitting materials required for the Indigenous Studies Certificate:

- A letter stating your interest in Indigenous Studies and its relationship to your graduate course of study;
- An unofficial copy of your KU transcript;
- A letter of support from your graduate degree program.

A student must be in good standing with their graduate degree program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission.

Non-KU Students

Students who are not currently enrolled at KU must complete an application to Graduate Studies (http://graduate.ku.edu/ku-graduate-application) for admission into the certificate program and submit an application fee along with the following materials:

- A letter stating your interest in the Indigenous Studies Graduate Certificate program;
- A copy of your college transcript;
- Two letters of recommendation from persons familiar with your academic work or potential for graduate study.

Minimum requirements include a bachelor’s degree with a 3.0 or higher GPA. The GPA requirement may be waived at the discretion of the ISP Director.

Student Eligibility and Administration of the Program

Eligibility criteria for admission to the certificate program include a B.A. degree from an accredited institution with a 3.0 or higher GPA.

Students admitted to the certificate program may be enrolled either as a regular graduate student or admitted to Graduate Studies (http://graduate.ku.edu/ku-graduate-application) as a certificate seeking student.

Students must maintain grade-point averages of 3.0 or better in all courses taken to satisfy requirements of the Indigenous Studies Certificate. At the conclusion of the program, the student should ask the Indigenous Studies program to verify that the requirements for the certificate have been met.

Graduate Certificate

The Graduate Certificate in Indigenous Studies is designed to provide students with necessary knowledge of the events, laws, policies, and treaties that have defined the relationship between the United States and Indigenous Nations and Peoples. This knowledge is essential to analysis of a broad range of historical, political, religious and social issues in the U.S.

The program will provide students with a solid grounding in the histories and cultures of the indigenous peoples of North America. The certificate program enables students to integrate knowledge of indigenous issues into their own academic disciplines or professional training.

Completion of the certificate in Indigenous Studies represents an additional credential for graduate students from a variety of academic fields who are preparing for careers in research and teaching or professional practice. The certificate will also enhance the qualifications of students seeking careers with indigenous organizations, government, and museums, among many other options.

Enrollment in the program is open to students admitted to a regular KU graduate program as well as students who are not currently enrolled at KU.

Certificate Requirements

The Indigenous Studies Graduate Certificate requires 12 hours of coursework:

- ISP 800: Indigenous Issues in the United States (3 hrs)
9 hours of graduate-level coursework with 50% or more content in Indigenous Peoples; courses must be approved by the ISP Executive Committee.

Information Processing Studies Courses

Information Processing Studies

Information processing studies courses may be taken for credit, but are not a part of a specific degree program.

Courses

IPS 101. Elements of the Theory of Computation. 3 Hours NM / N. An introduction to the theoretical areas of computer science and their applications. Emphasis will be placed on the methods and standards by which computer science makes judgments and on what computers can and cannot accomplish. Among major topics covered are: how to read and to implement algorithms; what is memory and how much of it is required for various tasks; why computers cannot multiply; how finite-state machines compute; applications of finite-state machines to programming; recognizing languages; formal grammars. "Can machines think?" and other contemporary topics in the philosophy of computer science will be covered as time permits. Prerequisite: MATH 101 or MATH 104. LEC.

IPS 302. Journey Through Genius, Honors. 3 Hours N. The course explores some of the most significant and enduring ideas in mathematics: the great theorems, discoveries of beauty and insight that stand today as monuments to the human intellect. Emphasis will be placed on the methods and standards by which mathematics makes judgments. Among the major topics covered are: Euclid and the infinitude of primes, Archimedes determination of circular area, Cardano and the solution of the cubic, the Bernoullis and the harmonic series, a sample of Euler's number theory, Cantor and the transfinite realm. Along with the essential mathematics, the humanity of these great mathematicians is captured. Prerequisite: Membership in the University Honors Program, high school algebra and geometry, and permission of the instructor. LEC.

IPS 400. Topics in the Theory of Computing. 1-3 Hours. This course is designed to allow students to do further readings in the theory of computing beyond the material presented in IPS 101. Topics, scope, and meeting times to be arranged for the individual student. Prerequisite: IPS 101 and consent of instructor. LEC.

Institute for Leadership Studies

Institute for Leadership Studies

The Institute for Leadership Studies (ILS) supports KU's mission of educating students who can effectively engage in the process of leadership with innovative, interdisciplinary academic programs. Through the ILS these academic programs are collaboratively designed to educate and prepare students to make a difference from where they are with what they have, developing the courage and leadership skills to ignite positive change. In doing so, the ILS fulfills its mission to create leadership capacity among all of its stakeholders for thriving in the face of challenge, conflict, and change.

The ILS houses KU's interdisciplinary Leadership Studies Minor. First offered to KU students in the spring of 2001, the Leadership Studies Minor (LSM) began as a collaborative partnership between the Department of Communication Studies and the Student Involvement and Leadership Center. Believing that a complementary interdisciplinary approach allows students to develop a breadth of innovative capacity that can cross disciplinary boundaries, the LSM fosters a tolerance for ambiguity, empathy, perspective taking, and a self-awareness that promotes active reflection and elevates multiple perspectives in diagnosis and problem solving. Through a series of theoretical and experiential coursework in group and individual contexts, the minor's dynamic curriculum to provide a foundation from which students can engage their disciplinary content with greater efficacy to then foster effective leadership skills within their major content area.

Courses

LDST 201. Introduction to Leadership. 2 Hours S. This course introduces students to the study of the leadership process. The course covers theories and research on core themes of leadership, focusing on how course materials relate to students' own leadership experiences. Concurrent enrollment in LDST 202 is recommended. Students considering the Leadership Studies Minor must complete LDST 201 and LDST 202. Not open to seniors. LEC.

LDST 202. Introduction to Leadership Applications. 1 Hour S. This course focuses on the application of information learned in LDST 201. Activities and discussions emphasize application, analysis, and engagement with the process of leadership. Concurrent enrollment in LDST 201 is recommended. Students considering the Leadership Studies Minor must complete LDST 201 and LDST 202. Not open to seniors. Prerequisite: Corequisite: COMS 201 or LDST 201. LEC.

LDST 203. Introduction to Leadership, Honors. 3 Hours AE51 / S. This course combines an introduction to a theoretical, research-based approach to the study of leadership with hands-on application, analysis, and engagement with the process of leadership. Within a small group setting, students explore core leadership competencies and experiment with the process of leadership by engaging classmates and members of the university and local communities and addressing issues of concern within those communities. This course satisfies the LDST 201/LDST 202 prerequisite for the Leadership Studies Minor. Prerequisite: Admission to the University Honors Program, Instructor Permission. LEC.

LDST 260. Study Abroad Topics in Leadership Studies. 1-6 Hours S. This course is designed to enhance international experience in topic areas related to Leadership Studies at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. FLD.

LDST 271. Foundations of Adaptive Leadership. 3 Hours S. This course introduces students to the study of the leadership process with an emphasis on applying the Adaptive Leadership paradigm to current systems in which the student is engaged. Activities and discussions focus on analysis and diagnosis of current leadership cases, offering students opportunities to apply concepts to their own professional disciplines and systems. LEC.

LDST 272. Ethics and Diversity in Leadership. 3 Hours S. This course examines in-depth the role of ethics and diversity in effectively engaging in the process of Adaptive Leadership. Activities and discussion will focus on the application of theories of ethics and diversity as well as the development of core leadership competencies within student's own professional disciplines and systems. Prerequisite: LDST 271. LEC.

LDST 371. Leadership and Interpersonal Effectiveness. 3 Hours. This course examines the role of communication in effectively engaging others in the work of leadership. It is expected that participants will finish this course with knowledge of basic interpersonal principles,
theory, and applied research as it pertains to leadership and building strong relationships with others. This course is designed to develop participant's interpersonal competencies within their own professional disciplines and systems. It is comprised of discussion, activities, assignments, and exams. Topics such as interpersonal skills, self-regulation, impression formation, emotion, and conflict management, as they apply to communication and leadership contexts will be discussed. Prerequisite: LDST 271, LDST 272. LEC.

LDST 381. Survey of Leadership Theory and Application. 3 Hours S.
A survey and application of leadership theories and communication skills will enhance students' development of expertise in assessing organizations, identifying systems issues, and facilitating organization-and system-wide improvement in a variety of workplaces. Traditional approaches to leading, organizing, and communicating are contrasted with emerging approaches that promote sensitivity to diverse organizational cultures, populations, and challenges. Through examination of theoretical perspectives, the student will develop an ability to integrate the contributions of different points of view and ways of thinking crucial to accurately assess, design and lead high performing teams and organizations in a dynamic world. LEC.

LDST 431. Communication and Leadership. 3 Hours S.
This course provides an overview of the role of communication in leadership in a variety of contexts, including: interpersonal, small group, intercultural, organizational, and public sphere. It will include theoretical and experiential approaches to effective leadership communication. Prerequisite: Admission to Leadership Minor or consent of instructor. LEC.

LDST 460. Study Abroad Topics in Leadership Studies. 1-6 Hours S.
This course is designed to enhance international experience in topic areas related to Leadership studies at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. FLD.

LDST 470. Independent Study in Leadership Studies. 1-6 Hours S.
This course engages students in an investigation of a special topic or project selected by the student with advice, approval, and supervision of a Leadership Studies instructor. Such study may take the form of special research, individual reports and/or conferences. Prerequisite: Permission of Instructor, LDST 201, LDST 202. IND.

LDST 471. Case Study in Leadership Applications. 3 Hours S.
This course offers students an opportunity to practice effectively engaging in the process of Adaptive Leadership. Activities, readings, and discussion will focus on the application of core leadership competencies and theories of adaptive leadership within students own professional disciplines and systems as well as continuous active reflection. Prerequisite: LDST 271, LDST 272, LDST 371. LEC.

LDST 480. Internship in Leadership Studies. 1-6 Hours S.
Students complete leadership-centered fieldwork in an organization related to their career goals. Criteria for the organizations and work assignments suitable for internship credit are available through the Institute for Leadership Studies. An internship plan is developed with the field supervisor and internship faculty advisor. Reports and meetings are required. Prerequisite: Permission of Instructor. INT.

LDST 481. Survey of Ethics and Diversity in Leadership. 3 Hours S.
This course examines the implications and applications of various theories of ethics and diversity in effectively engaging in the process of leadership. Activities and discussion will focus on the application of theories of ethics and diversity within the student's professional disciplines and systems. This course is taught online in an 8-week format. Prerequisite: LDST 381. LEC.

LDST 490. Special Topics in Leadership Studies: _____. 3 Hours S.
This course is designed for the study of special topics in leadership studies. Course content addresses major topics and specialized issues in the field and topics change as needs and resources develop. May be repeated for credit if the content differs. Prerequisite: Permission of Instructor. LEC.

LDST 500. Directed Readings in Leadership Studies. 1-6 Hours S.
This course is designed for directed readings in selected areas of Leadership Studies. Individual and supervised readings address major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Permission of Instructor. IND.

LDST 532. Leadership Studies Practicum. 1-3 Hours AE61 / S.
Students engage in a variety of training programs and field experiences in which they learn about leadership, observe leaders in action, and involve themselves in leadership activities. Written assignments and group discussions are used to analyze their learning. Should be taken for a total of three credit hours, across more than one semester. Prerequisite: COMS 201 or LDST 201 and admission to the Leadership Studies minor. FLD.

LDST 535. Seminar in Leadership Strategies and Applications. 3 Hours S.
This seminar serves as the capstone course for the Leadership Studies minor. It includes advanced readings on leadership theory and practice, as well as major written and applied projects in which students integrate and demonstrate what they have learned in the program. Prerequisite: COMS 201 or LDST 201, COMS 431 or LDST 431, and admission to the Leadership Studies minor. LEC.

LDST 690. Special Topics in Leadership Studies: _____. 3 Hours S.
This course is designed for the study of special topics in Leadership Studies. Course content addresses major topics and specialized issues in the field and topics change as needs and resources develop. May be repeated for credit if the content differs. Prerequisite: Permission of instructor. LEC.

LDST 695. Advanced Special Topics in Leadership Studies: _____. 3 Hours S.
This course is designed to take advantage of special competence by an individual faculty member in Leadership Studies. Course content addresses timely topics and relevant issues in the field and topics change as needs and resources develop. May be repeated for credit if the content varies. Prerequisite: Permission of instructor. LEC.

Minor in Leadership Studies

Requirements for the Minor

Leadership studies is an 18-credit hour interdisciplinary minor offered through the communication studies department. The minor requires completion of COMS 201 and COMS 202 as prerequisites, and the additional 18-credit hours as identified below. Due to limited space capacity, top candidates will be given preferential permission to enroll in the subsequent COMS courses in the minor. Therefore, students may apply for admission to the minor while taking COMS 202 or upon completion of the course. Course work involves studying theory and research in leadership and applying it to the students’ leadership experiences. Communication studies majors may earn a minor in leadership studies, but the COMS courses required for the minor cannot be used to fulfill communication studies major requirements.

Introductory Coursework (0)
Minors must complete introductory leadership coursework. These hours do not contribute to the minimum number of hours required for the minor.

**Introduction to Leadership. Satisfied by:**
- COMS 201 Introduction to Leadership

**Introduction to Leadership Applications. Satisfied by:**
- COMS 202 Introduction to Leadership Applications

Minor Hours & GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses and 3 hours of 201/202 as the prerequisite to the minor.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 GPA in all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Why study leadership studies?**
The KU Leadership Studies Minor (LSM) believes that leadership is a process, not an outcome. Effective leadership starts with effective communication, and therefore students develop their learning around the adaptive leadership paradigm and develop core leadership competencies in order to mobilize others to tackle tough challenges and thrive.

**Requirements for the Minor**
Leadership studies is an 18-credit hour interdisciplinary minor offered through the communication studies department. The minor requires completion of COMS 201 and COMS 202 as prerequisites, and the additional 18-credit hours as identified below. Due to limited space capacity, top candidates will be given preferential permission to enroll in the subsequent COMS courses in the minor. Therefore, students may apply for admission to the minor while taking COMS 202 or upon completion of the course. Course work involves studying theory and research in leadership and applying it to the students’ leadership experiences. Communication studies majors may earn a minor in leadership studies, but the COMS courses required for the minor cannot be used to fulfill communication studies major requirements.

**Introductory Coursework (0)**
Minors must complete introductory leadership coursework. These hours do not contribute to the minimum number of hours required for the minor.

**Minor Hours & GPA**

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses and 3 hours of 201/202 as the prerequisite to the minor.

**Minor Hours in Residence**

Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Interdisciplinary Studies in Liberal Arts and Sciences**

**Cross-Departmental Degree Programs**

The College of Liberal Arts and Sciences offers graduate degrees that cross multiple departments and units. For information on these, see:

- Center for East Asian Studies (p. 1302);
- Center for Global and International Studies (p. 1495);
- Indigenous Studies Program (p. 1581);
- Center for Latin American & Caribbean Studies (p. 1593);
- Museum Studies Program (p. 1657); and
- Center for Russian, East European, and Eurasian Studies (p. 1759).

Cross-departmental studies that have no defined degree program may be authorized upon petition. See Interdisciplinary Studies in the Graduate Studies section of the online catalog for more information.

Graduate students in degree programs may add a graduate certificate in the following areas:

- American Studies
- African Studies
- Brazilian Studies
- Central American and Mexican Studies
- Chemical Biology
- City and County Management
- Community Health and Development
- Environmental Assessment
- Environmental Studies
- Global and International Studies
- Indigenous Studies
- Museum Studies
- Peace and Conflict Studies
- Performance Management
- Professional Workplace Communication
- Russian, East European, and Eurasian Studies
- Second Language Studies
- Women, Gender and Sexuality Studies

See Graduate Certificate Programs in the Graduate Studies section of the online catalog.

**Latin American & Caribbean Studies**

**Why study Latin American and Caribbean studies?**

Knowledge of Latin American and Caribbean culture, environment, and society is crucial to U.S. hemispheric relations and world understanding. KU's programs in Latin American and Caribbean Studies encourage the
development of foreign language, research, writing, and critical thinking skills.

What kind of job can I get?

Many employers have a strong interest in Latin America and in Spanish-speaking employees who have an interest in Hispanic cultures. Speakers of Portuguese with an interest in Brazil may find themselves in demand as U.S. interest in Brazil grows. Graduates from Latin American Area Studies have found jobs with the U.S. Foreign Service or other government agencies and with companies with business interests in Latin America. Many graduates are teachers, from elementary school to college. Others work with non-governmental organizations doing development and social service work in Latin America.

Although students may choose to single major, most find that double majoring in Latin American Studies and another discipline makes them particularly attractive to employers. Students who combine Latin American & Caribbean Studies with journalism can work for newspapers, radio and television stations, and advertising agencies that serve Latin American countries and Latina/o communities in the United States. A double major with business or social welfare prepares students to work with companies or social service agencies that serve Latin American customers or clients.

Other students complement their Latin American & Caribbean Studies major with a second major in fields such as history, political science, Spanish, economics, or anthropology. Many students go on for an advanced degree in Latin American & Caribbean Studies or other liberal arts disciplines such as history, sociology or economics. Most of these students plan to teach in post-secondary schools or do research in Latin American areas.

Some Latin American & Caribbean Area Studies graduates go on for advanced degrees in business, education, or journalism where they use their knowledge of Spanish and Portuguese languages and cultures to develop a special career niche for themselves. Like many fields in the liberal arts, Latin American and Caribbean Studies helps students build a broad background of knowledge, strengthen writing and critical thinking skills, and develop the flexibility of thought that today’s constantly changing workplace requires.

Undergraduate Programs

The program offers a range of opportunities for students from most academic disciplines to study this region. KU has particular depth in Central America, Mexico, Haiti, the Andes, Paraguay, and Brazil and professors and courses concerned with much of the rest of Latin America. KU has an excellent library collection on Latin America and is one of the few U.S. universities teaching Haitian Creole, Andean Quichua, and the Miskitu language of Nicaragua.

The B.A. degree provides a broad academic background with a regional focus, usually in conjunction with a second major, and a mastery of Spanish and other languages. The program enables students to take courses in many departments and lays the foundation for graduate work. Students are encouraged to pursue graduation with honors in Latin American and Caribbean studies.

Prospective majors should begin language study in Spanish or Portuguese as early as possible. The intensive language program is recommended for those without high school preparation. Core courses in Latin American and Caribbean Studies have been certified as meeting KU Core learning outcomes, enabling majors to complete significant portions of their general education requirements within the major.

All students must be advised by the program’s advisor (https://latamst.ku.edu/kimberly-moore) as early as possible; call the Center for Latin American and Caribbean Studies (http://latamst.ku.edu) at 785-864-4213 to make an appointment.

Graduate Programs

The Center for Latin American & Caribbean Studies administers an interdisciplinary program of substantive and language courses leading to the Master of Arts degree. Students may pursue the M.A. as a terminal degree for careers in the public or private sector or as preparation for additional graduate study. The center also offers 2 graduate certificates of 4 courses each in Brazilian Studies and Central American and Mexican Studies.

Center for Latin American and Caribbean Studies

The nationally recognized Center for Latin American and Caribbean Studies (http://latamst.ku.edu) promotes interdisciplinary study of the Americas and their languages through teaching, scholarship, outreach, study abroad, and international exchanges. It administers bachelor’s and master’s degree programs and graduate certificate programs in Central American and Mexican Studies and Brazilian Studies. Areas of particular strength are Central America, Mexico, Brazil, and Paraguay. Languages include Spanish, Portuguese, Quichua, Haitian Creole, and Miskitu. The center coordinates Latin American events on campus including lectures, films, exhibits, and theatrical performances. Exchanges and study abroad programs have been developed in Argentina, Costa Rica, Cuba, Mexico, Peru, and Brazil. The center offers outreach to schools, businesses, and the community and serves as a resource for the state, the region, and the nation.

Courses

KICH 110. Elementary Quichua I. 3 Hours U.
An orientation to Ecuadorian Quichua language and culture for beginning students. Includes elements of grammar, conversation, and composition. Quichua (a.k.a. Kejcha, Quechua, Kechua, Ketchua, Khetchua, or Runa Ximi) in its various forms is an indigenous language spoken by over six million people in Ecuador, Peru and Bolivia combined. LEC.

KICH 114. Elementary Quichua II. 3 Hours U.
Continuation of KICH 110. Prerequisite: KICH 110 or equivalent LEC.

KICH 230. Intermediate Quichua I. 3 Hours U.
Continuation of KICH 114. Prerequisite: KICH 114 or equivalent. LEC.

KICH 234. Intermediate Quichua II. 3 Hours U.
Continuation of KICH 230. Prerequisite: KICH 230 or equivalent. LEC.

Courses

KQKL 110. Elementary Kaqchikel Maya I. 3 Hours U.
An orientation to Kaqchikel Maya language and culture for beginning students. Includes elements of grammar, conversation, and composition. Kaqchikel is the first language of approximately 500,000 people of highland Guatemala and one of roughly 30 Mayan languages. LEC.

KQKL 114. Elementary Kaqchikel Maya II. 3 Hours U.
Continuation of KQKL 110. Prerequisite: Completion of KQKL 110 or equivalent. LEC.
KQKL 230. Intermediate Kaqchikel Maya I. 3 Hours U.
Continuation of KQKL 114. Prerequisite: Completion of KQKL 114 or equivalent. LEC.

KQKL 234. Intermediate Kaqchikel Maya II. 3 Hours U.
Continuation of KQKL 230. Prerequisite: Completion of KQKL 230 or equivalent LEC.

Courses

LAA 100. Latin American Culture and Society. 3 Hours SC AE42 / S.
An introduction to the interdisciplinary study of Latin America, as manifest in the arts and literature, history, and in environmental, political, economic, and social realities. Explores and critiques the principal themes and methodologies of Latin American Studies, with an aim towards synthesizing contributions from several different disciplines. Emphasizes the unique insights and perspectives made possible by interdisciplinary collaboration and provides students with a basic knowledge base for understanding Latin America today. (Same as HIST 124.) LEC.

LAA 102. Orientation Seminar in Latin American and Caribbean Studies. 1 Hour U.
LAA 102 is an online orientation seminar designed to introduce students to the Latin American and Caribbean Studies major at KU and help students place the major in the context of their overall undergraduate experience and career plans. The course provides students with introductory information about Latin America and the Caribbean and the nature of interdisciplinary inquiry, and an interdisciplinary major, and about resources available at KU and beyond for research and study related to the region. During the course, students also learn about typical careers pursued by Latin American and Caribbean Studies majors, reflect on their own educational and career goals, and determine whether the major matches those goals. Finally, the course provides students with information about requirements for the major, along with information about when required courses are offered and when they should be taken. LEC.

LAA 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Latin Area and Caribbean Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

LAA 300. Interdisciplinary Themes in Latin American Studies. 3 Hours AE51 / U.
This course offers an in-depth examination of several key themes in Latin American Studies. Emphasis is placed on exploring the utility of interdisciplinary methods and on becoming familiar with the theoretical framework that underpins the field. Prior completion of LAA 100 recommended. LEC.

LAA 302. Topics in Latin American Area Studies: ______. 3 Hours U.
Investigation of special topics on Latin America at the undergraduate level. LEC.

LAA 332. Language and Society in Latin America. 3 Hours NW AE42 / S.
This course will examine the cultural and social significance of Amerindian languages in Latin America. Spanish and Portuguese will be related in language situations to Amerindian languages, such as Quechua, Aymara, the Mayan languages, Nahuatl, and Guarani. Some African-substratum Creole languages will be used to illustrate the multifaceted relations between language and ethnic group, sex, nation, geography, social class, context, and social interaction. LEC.

LAA 333. Language and Society in Latin America, Honors. 3 Hours NW AE42 / S.
