BACHELOR OF SCIENCE IN ENGINEERING PHYSICS

Engineering Physics Undergraduate Program
The engineering physics program is designed for undergraduates with an interest in both science and engineering. The program is focused on those students who wish to work in areas of rapid technological change, where a good background in the underlying science is an important ingredient to success in their careers. The curriculum includes classical and modern physics, mathematics, and their applications to one or more areas of engineering. The student learns the physical science and engineering principles underlying modern technology. Four design concentrations are offered:

• Aerospace systems
• Chemical systems
• Digital electronic systems
• Electromechanical control systems

Each option incorporates a significant design component and provides a strong base in one or more engineering disciplines. The degree is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

For programs in physics, see Physics and Astronomy (http://catalog.ku.edu/liberal-arts-sciences/physics-astronomy) in the College of Liberal Arts and Sciences section of the online catalog.

Educational Objectives
Engineering physics graduates will be capable of

• Completing or successfully progressing toward completion of an advanced degree in graduate or professional school,
• Using their analytical, problem-solving, and communications skills to conduct research or contribute to technology development projects, individually or as a team member,
• Using their background knowledge in physics and engineering fundamentals as a foundation for developing new knowledge and experience in their chosen disciplines.

Careers
Professional Opportunities
Engineering physics enables graduates to combine an extensive background in physics, the science that underlies modern technology, with an engineering degree. Their broad training and technical breadth provide a unique flexibility. They have the science background to pursue pure research opportunities, the engineering degree and design concentration to solve practical problems in industry or a variety of other settings, and the understanding to act as a communication link between highly diversified divisions of an organization. Engineering physics graduates typically work in aerospace and avionic industries, electronics industries, research and development laboratories, telecommunications, design and consulting firms, and government agencies, and as defense contractors. Many engineering physics graduates attend graduate or professional school before entering the work force.

Undergraduate Admission to the School of Engineering
Admission to the KU School of Engineering (and its degree programs) is selective.

Students may be admitted to an engineering or computer science degree program (http://engr.ku.edu/sites/engr.drupal.ku.edu/files/docs/pdfs/Majors_and_Curriculum_Guide_2014_Online.pdf) as freshmen (first year) students, but all admissions, for both in-state and out-of-state students, are selective. Applications are judged on several factors, such as high school record, scores on national tests, academic record at college or university level, and trend of grades and more. High school transcripts and ACT scores (or equivalent SAT scores) are required.

Minimum Academic Standards for Admission
To be considered for admission to the School of Engineering, beginning first-year students must meet or exceed the following minimum standards:

• Must be admissible (http://admissions.ku.edu/apply/requirements/usfresmen) to the University of Kansas by assured admissions or individual review AND
• Have a 3.0+ GPA AND
• Have a mathematics ACT score of 22 (or math SAT score of 540).

Important: Simply meeting these requirements won’t guarantee admission to a School of Engineering degree program. Students who perform beyond these minimums will have a better probability of being admitted to their selected major.

Minimum Academic Standards for Direct Admission into Degree Program for incoming Freshmen
Students with a 26+ Math ACT (600+ Math SAT) or meet eligibility requirements for MATH 125 (Calculus I) (http://catalog.ku.edu/liberal-arts-sciences/math/#undergraduatetext) may be admitted directly into their chosen major, with the exception of those seeking admission into an EECS program. Electrical Engineering, Computer Science, Computer Engineering, and Interdisciplinary Computing students must have a 28+ Math ACT (640+ Math SAT) or eligibility for MATH 125 for direct admission.

First-Year General Engineering Program
Students with a 22-25 Math ACT (540-580 Math SAT) or meet eligibility requirements for Math 104 (Pre-Calculus) (http://catalog.ku.edu/liberal-arts-sciences/math/#undergraduatetext) are admitted to the School of Engineering First-Year Experience non-degree program for undergraduate students.

First-year Engineering students have one academic year (two semesters and one summer) to transition into a degree program. Admission to a degree program is possible after one of the following is met:

• Complete 12+ credit hours at KU, earn a "B" or higher in Math 104 (Pre-Calculus), earn a "C" or higher in all science and engineering courses, and earn a KU GPA of 2.5+ OR
• Earn a "C" or better in MATH 125 (Calculus I), earn a "C" or better in all science and engineering courses, and earn a KU GPA of 2.5+

Pre-Engineering
Students not admitted directly to the School of Engineering or their major but who are admissible to the university may be admitted to the College
Bachelor of Science in Engineering Physics

of Liberal Arts and Sciences as a pre-engineering student. They can later re-apply to the School of Engineering during the semester they are completing the admission requirements for transfer students.

Transfer Admission Standards

Applications from all transfer students, whether from other institutions or from other academic schools at the University of Kansas, are evaluated on a case-by-case basis. Transfer students must be admissible (http://admissions.ku.edu/apply/requirements/ustransfer) to KU AND have a cumulative college transferable grade-point average of 2.5+ to be considered. In addition, students must have grades of "C" or better in those courses in math (must include MATH 125 Calculus I or equivalent), science, and engineering applicable to the engineering degree.

Students interested in the Information Technology program are admitted as juniors. They must have completed 60 hours of pre-requisite courses including foundational courses in math, science, and computer science and have a 2.5+ cumulative GPA or better. The Information Technology program resides at the Edwards Campus in Overland Park, KS. Click here (http://edwardscampus.ku.edu/overview-bachelors-information-technology) for more information.

Current KU Students admitted to other academic units may apply to the School of Engineering by completing a Change of School form (http://engineering.ku.edu/forms). This must be turned in to the School of Engineering Dean’s Office by the appropriate deadlines indicated below.

Already Applied to KU, But Not Engineering?

Don’t worry. It’s not too late to change your mind if you’ve already applied to KU and selected a major outside the School of Engineering. If you think one of the 12 engineering or computer science majors is a better fit for your talents, you can still change your requested major — preferably before May 1 — and be considered for admission to the School of Engineering and all the benefits that go with it.

To update your application, visit Undergraduate Admissions (http://admissions.ku.edu/update-your-application) and click on “Change application term, major, mailing address, and/or email address.”

Please contact a member of our recruitment team (studyengineering@ku.edu), 785-864-3881, if you have any difficulty.

Application Deadlines For New Freshman and Transfer Applicants

<table>
<thead>
<tr>

**Design Concentrations**

**Aerospace Systems**

- AE 245 Introduction to Aerospace Engineering 3
- AE 345 Fluid Mechanics 3
- AE 421 Aerospace Computer Graphics 3
- AE 445 Aircraft Aerodynamics and Performance 3
- AE 507 Aerospace Structures I 3
- AE 545 Fundamentals of Aerodynamics 4
- AE 550 Dynamics of Flight I 4
- AE 551 Dynamics of Flight II 4
- AE 572 Fundamentals of Jet Propulsion 3
- C&PE 121 Introduction to Computers in Engineering 3
- C&PE 221 Chemical Engineering Thermodynamics 3
- CE 301 Statics and Dynamics 5
- CE 310 Strength of Materials 4
- EPHX 536 Electronic Circuit Measurement and Design 4

Select one of the following tracks:

**For the aircraft track**

- AE 508 Aerospace Structures II (3)
- AE 521 Aerospace Systems Design I (4)

**Or for the spacecraft track**

- AE 560 Spacecraft Systems (3)
- AE 523 Space Systems Design (4)

**Chemical Systems**

- C&PE 121 Introduction to Computers in Engineering 3
- C&PE 211 Material and Energy Balances 4
- C&PE 221 Chemical Engineering Thermodynamics 3
- C&PE 511 Momentum Transfer 3
- C&PE 512 Chemical Engineering Thermodynamics II 3
- C&PE 521 Heat Transfer 3

- C&PE 522 Economic Appraisal of Chemical and Petroleum Projects 2
- C&PE 523 Mass Transfer 4
- C&PE 524 Chemical Engineering Kinetics and Reactor Design 3
- C&PE 613 Chemical Engineering Design I 4
- C&PE 615 Introduction to Process Dynamics and Control 3
- C&PE 616 Chemical Engineering Laboratory I 3
- C&PE 623 Chemical Engineering Design II 2
- CHEM 135 General Chemistry II 5
- or CHEM 175 Chemistry for the Chemical Sciences II
- CHEM 330 Organic Chemistry I 3
- CHEM 530 Physical Chemistry I 3
- EPHX 536 Electronic Circuit Measurement and Design 4
- EPHX 511 Introductory Quantum Mechanics 3

**Digital Electronic Systems**

- EECS 140 Introduction to Digital Logic Design 4
- EECS 168 Programming I 4
- EECS 268 Programming II 4
- EECS 211 Circuits I 3
- EECS 212 Circuits II 4
- EECS 312 Electronic Circuits I 3
- EECS 360 Signal and System Analysis 4
- EECS 388 Embedded Systems 4
- EECS 443 Digital Systems Design 4
- EECS 448 Software Engineering I 4
- EECS 461 Probability and Statistics 3
- EECS 470 Electronic Devices and Properties of Materials 3
- EECS 541 Computer Systems Design Laboratory I 3
- EECS 542 Computer Systems Design Laboratory II 3
- EECS 645 Computer Architecture 3
- One EECS Elective (specific electives not required) 3
- EPHX 511 Introductory Quantum Mechanics 3

**Electromechanical Control Systems**

- EECS 140 Introduction to Digital Logic Design 4
- EECS 168 Programming I 4
- EECS 268 Programming II 4
- EECS 211 Circuits I 3
- EECS 212 Circuits II 4
- EECS 312 Electronic Circuits I 3
- EECS 360 Signal and System Analysis 4
- EECS 444 Control Systems 3
- or ME 682 System Dynamics and Control Systems
- EPHX 511 Introductory Quantum Mechanics 3
- ME 210 Introduction to Mechanics 1
- ME 228 Computer Graphics 3
- ME 311 Mechanics of Materials 3
- ME 312 Basic Engineering Thermodynamics 3
- ME 501 Mechanical Engineering Design Process 2
- ME 628 Mechanical Design 3
- ME 640 Design Project 2

**Credit for Foreign Language**
Foreign language courses are not applicable to this degree program.

**Graduation Plans**
A suggested graduation plan for each of the design concentrations is available on the Engineering Physics website (http://ephx.engr.ku.edu/overview-engineering-physics-bs).

**Departmental Honors**
Engineering physics undergraduates may graduate with departmental honors by achieving a minimum grade-point average of 3.5 in major courses taken in residence and at other institutions, by completing at least 1 credit hour of undergraduate research with a grade of B or better in EPHX 501 or EPHX 503, and the results presented in a manner specified by the Department. Please see your advisor (https://ephx.engr.ku.edu/advising) for details.
