Bachelor of Arts in Biochemistry

Why study biology?
Study biology because undergraduates should have the opportunity to explore the breadth of biology that allows them to succeed in their chosen paths beyond the university.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation
Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105. Students who have taken BIOL 100 and BIOL 102, have earned an A or B in both courses, and have decided to major in a biological science should consult a UBP advisor to request permission to substitute BIOL 100 and BIOL 102 for BIOL 150.

Majors and Concentrations
Bachelor's degree requirements in biology are modified as necessary. Current requirements are available in the UBP office and online (http://www.kuub.ku.edu). Major programs are offered in biochemistry, biology, human biology, and microbiology. Students may choose to concentrate in a range of specialties in the biological sciences, such as botany, cellular biology, developmental biology, environmental biology, ecology, entomology, genetics, marine biology, molecular biology, neurobiology, paleontology, physiology, systematics, or zoology (invertebrate or vertebrate).

Requirements for the B.A. Major in Biochemistry

Major Course Requirements

General Science Requirements (33-36)
Majors must complete the following general science requirements that 33-36 serve as foundational courses for this major.

Biology Orientation Seminar. Satisfied by:
BIOL 105  Biology Orientation Seminar

Chemistry I. Satisfied by one of the following:
CHEM 170  Chemistry for the Chemical Sciences I
CHEM 130  General Chemistry I
CHEM 190  Foundations of Chemistry I, Honors

Chemistry II. Satisfied by one of the following:
CHEM 175  Chemistry for the Chemical Sciences II
CHEM 135  General Chemistry II
CHEM 195  Foundations of Chemistry II, Honors

Organic Chemistry I. Satisfied by one of the following:
CHEM 330  Organic Chemistry I
CHEM 380  Organic Chemistry I, Honors

Organic Chemistry I Laboratory. Satisfied by:
CHEM 331  Organic Chemistry I Laboratory

Organic Chemistry II. Satisfied by:
CHEM 335  Organic Chemistry II

Calculus I and II. Students who plan to attend graduate school should enroll in MATH 125 and MATH 126. Satisfied by one of the following:
MATH 115  Calculus I
& MATH 116  and Calculus II
MATH 125  Calculus I
& MATH 126  and Calculus II

Physics. Satisfied by one of the following options:

Option 1: General Physics I & II
PHSX 211  General Physics I
& PHSX 216  and General Physics I Laboratory

PHSX 212  General Physics II
& PHSX 216  and General Physics II Laboratory

Option 2: College Physics I & II
PHSX 114  College Physics I
& PHSX 115  and College Physics II

Biochemistry Requirements (30)

Principles of Cellular & Molecular Biology. Satisfied by one of the following:
BIOL 150  Principles of Molecular and Cellular Biology
BIOL 151  Principles of Molecular and Cellular Biology, Honors

Principles of Organismal Biology. Satisfied by one of the following:
BIOL 152  Principles of Organismal Biology
BIOL 153  Principles of Organismal Biology, Honors

Principles of Genetics. Satisfied by one of the following:
BIOL 350  Principles of Genetics
BIOL 360  Principles of Genetics, Honors

Cell Structure & Function. Satisfied by:
BIOL 416  Cell Structure and Function
BIOL 636  Biochemistry I  4
Introductory Biochemistry Laboratory. Satisfied by:
BIOL 637  Introductory Biochemistry Laboratory  2
Biochemistry II. Satisfied by:
BIOL 638  Biochemistry II  3
Advanced Biochemistry Laboratory. Satisfied by:
BIOL 639  Advanced Biochemistry Laboratory  2
Senior Seminar in Biochemistry. Satisfied by:
BIOL 599  Senior Seminar: _____ (Must be taken in senior year.)  1

Biological Physical Chemistry. Satisfied by:
CHEM 510  Biological Physical Chemistry  3

Biochemistry Electives (6)
Satisfied by completing at least 6 hours of biology courses numbered 400 or higher. These courses must be selected in consultation with a biochemistry advisor. No more than 3 hours of BIOL 423 Non-Lab Independent Study and/or BIOL 424 Independent Study (combined) can be applied towards the elective requirement.

<table>
<thead>

<th>Major Hours &amp; Major GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:</td>
</tr>
</tbody>
</table>

**Major Hours**
Satisfied by 36 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Below is a sample 4-year plan for students pursuing the B.A. in Biochemistry. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

**Total Hours: 121-125**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. CHEM 170/CHEM 130 and BIOL 150 require a Math ACT score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course.
3. Concurrent or prior enrollment in CHEM 170/CHEM 130 is required.
MATH 125 and MATH 126 are recommended for students who plan to attend graduate school. MATH 125 requires MATH 103 or MATH 104, with a grade of C- or higher; or 3 years of college preparatory mathematics including trigonometry, with a score of 28 or higher on the ACT Mathematics exam.

CHEM 175/CHEM 135 and CHEM 335 and BIOL 638 and BIOL 639 are offered only in spring; BIOL 416, BIOL 636, and BIOL 637 and CHEM 510 are only in fall.

Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence.

6 hours of BIOL 400+ electives required. Consult a biochemistry advisor to select major electives.

BIOL 599 is approved to satisfy Goal 6. This goal can also be fulfilled by completion of an approved educational experience, or an approved integration of courses and/or experiences. See your advisor for more information.

* BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal.

**Departmental Honors**

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.25 overall and 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

**Study Abroad**

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.
