Minor in Information Systems

Minor in Information Systems

Today's global marketplace continues to evolve at a fast pace as emerging technologies disrupt industries ranging from healthcare to finance to retail. Various professions, including accounting, finance, and supply chain management, advocate for greater development of cutting edge knowledge of the capabilities and operations of business information systems.

This minor program will enable business students who are not majoring in information systems to study the applications and capabilities of information systems and enhance their overall business knowledge.

This minor is only open to students in the B.S.B. degree program pursuing one of the business majors other than information systems (e.g., accounting, finance, business analytics, etc.).

This minor is not open to non-business students.
