Bachelor of Science in Computer Engineering

B.S. in Computer Engineering Program

Educational Objectives

Graduates who have earned the bachelor’s degree in computer engineering, within a few years following graduation, will have demonstrated technical proficiency, collaborative activities, and professional development.

Technical Proficiency

Graduates will have achieved success and visibility in their chosen careers as shown by technical accomplishments in industry, government, entrepreneurial activities, or academia.

Collaborative Activities

Graduates will have exercised shared responsibilities through activities such as contributions to multiperson or multidisciplinary technical projects, participation in professional society/organization functions, or performing collaborative research. In all such cases, graduates will have contributed to documentation of the collaborative activities.

Professional Development

Graduates will have demonstrated continual updating to extend their expertise and adapt to a changing environment through graduate studies; short courses, conferences, and seminars; or professional self-study. In addition, graduates will have demonstrated evidence of increasing technical and/or managerial impact.

Careers

Professional Opportunities

Computer engineers may work in computer elements and architectures, very large-scale integrated circuits for data processing and storage, embedded and real-time computer systems, or computer networking. Computer engineers may work in the computer industry, telecommunications, government and defense, software companies or consulting firms.

Undergraduate Admission to the School of Engineering

Admission to the KU School of Engineering (and its degree programs) is selective.

Students may be admitted to an engineering or computer science degree program (http://engr.ku.edu/sites/engr.drupal.ku.edu/files/docs/pdfs/Majors_and_Curriculum_Guide_2014_Online.pdf) as freshmen (first year) students, but all admissions, for both in-state and out-of-state students, are selective. Applications are judged on several factors, such as high school record, scores on national tests, academic record at college or university level, and trend of grades and more. High school transcripts and ACT scores (or equivalent SAT scores) are required.

Minimum Academic Standards for Admission

To be considered for admission to the School of Engineering, beginning first-year students must meet or exceed the following minimum standards:

- Must be admissible (http://admissions.ku.edu/apply/requirements/usfreshmen/) to the University of Kansas by assured admissions or individual review AND
- Have a 3.0+ GPA AND
- Have a mathematics ACT score of 22 (or math SAT score of 540).

Important: Simply meeting these requirements won’t guarantee admission to a School of Engineering degree program. Students who perform beyond these minimums will have a better probability of being admitted to their selected major.

Minimum Academic Standards for Direct Admission into Degree Program for incoming Freshmen

Students with a 26+ Math ACT (600+ Math SAT) or meet eligibility requirements for MATH 125 (Calculus I) (http://catalog.ku.edu/liberal-arts-sciences/math/#undergraduatetext) may be admitted directly into their chosen major, with the exception of those seeking admission into an EECS program. Electrical Engineering, Computer Science, Computer Engineering, and Interdisciplinary Computing students must have a 28+ Math ACT (640+ Math SAT) or eligibility for MATH 125 for direct admission.

First-Year General Engineering Program

Students with a 22-25 Math ACT (540-580 Math SAT) or meet eligibility requirements for Math 104 (Pre-Calculus) (http://catalog.ku.edu/liberal-arts-sciences/math/#undergraduatetext) are admitted to the School of Engineering First-Year Experience non-degree program for undergraduate students.

First-year Engineering students have one academic year (two semesters and one summer) to transition into a degree program. Admission to a degree program is possible after one of the following is met:

- Complete 12+ credit hours at KU, earn a “B” or higher in Math 104 (Pre-Calculus), earn a “C” or higher in all science and engineering courses, and earn a KU GPA of 2.5+ OR
- Earn a “C” or better in MATH 125 (Calculus I), earn a “C” or better in all science and engineering courses, and earn a KU GPA of 2.5+

Exploring Engineering

Students not admitted directly to the School of Engineering or their major but who are admissible to the university may be admitted to the College of Liberal Arts and Sciences as an Undecided student. They can later re-apply to the School of Engineering during the semester they are completing the admission requirements for transfer students.

Transfer Admission Standards

Applications from all transfer students, whether from other institutions or from other academic schools at the University of Kansas, are evaluated on a case-by-case basis. Transfer students must be admissible (http://admissions.ku.edu/apply/requirements/ustransfer/) to KU AND have a cumulative college transferable grade-point average of 2.5+ to be considered. In addition, students must have grades of “C” or better in
those courses in math (must include MATH 125 Calculus I or equivalent), science, and engineering applicable to the engineering degree.

Students interested in the Information Technology program are admitted as juniors. They must have completed 60 hours of pre-requisite courses including foundational courses in math, science, and computer science and have a 2.5+ cumulative GPA or better. The Information Technology program resides at the Edwards Campus in Overland Park, KS. Click here (http://edwardscampus.ku.edu/overview-bachelors-information-technology/) for more information.

Current KU Students admitted to other academic units may apply to the School of Engineering by completing a Change of School form (http://engineering.ku.edu/forms/). This must be turned in to the School of Engineering Dean’s Office by the appropriate deadlines indicated below.

Already Applied to KU, But Not Engineering?

Don’t worry. It’s not too late to change your mind if you’ve already applied to KU and selected a major outside the School of Engineering. If you think one of the 12 engineering or computer science majors is a better fit for your talents, you can still change your requested major — preferably before May 1 — and be considered for admission to the School of Engineering and all the benefits that go with it.

To update your application, visit Undergraduate Admissions (http://admissions.ku.edu/update-your-application/) and click on “Change application term, major, mailing address, and/or email address.”

Please contact a member of our recruitment team (studyengineering@ku.edu), 785-864-3881, if you have any difficulty.

Application Deadlines For New Freshman and Transfer Applicants

| September 15 | Priority deadline for current KU students to apply for spring admission to Engineering. |
| November 1   | Final deadline for scholarship consideration for incoming freshmen planning to enter in fall or summer semesters. |
| December 1   | Final deadline to apply for the Self Engineering Leadership Fellows Program for incoming freshmen |
| February 1   | Final deadline for scholarship consideration for transfer students planning to enter in fall or summer semesters. Applications available for the Engineering Learning Community |

Bachelor of Science in Computer Engineering Degree Requirements

The KU Core

This is the university-wide curriculum that all incoming undergraduate students will complete as part of their degree requirements. It comprises three general education goals and three advanced education goals. Associated with each goal is one or more learning outcomes:

- GE 1.1, Goal 1/Outcome 1, Critical Thinking;
- GE 1.2, Goal 1/Outcome 2, Quantitative Literacy;
- GE 2.1, Goal 2/Outcome 1, Written Communication (2 units);
- GE 2.2, Goal 2/Outcome 2, Oral Communication;
- GE 3H, Goal 3/Outcome 1, Arts & Humanities;
- GE 3N Goal 3/Outcome 2, Natural Sciences;
- GE 3S Goal 3 /Outcome 3, Social Sciences;
- AE 4.1, Goal 4/Outcome 1, Diversity;
- AE 4.2 Goal 4/Outcome 2, Culture;
- AE 5.1/5.2, Goal 5/Outcome 1/2, Social Responsibility & Ethics (course and/or practice);
- AE 6.1/6.2, Goal 6/Outcome 1/2, Integration & Creativity.

Details of the KU Core can be found at kucore.ku.edu (http://kucore.ku.edu/). Some required courses in the EECS curricula satisfy a KU Core goal and/or outcome. For these courses, the goal/outcome code is given in parentheses after the course on the pages below. Where required courses do NOT specifically satisfy KU Core goals (Goals 2, 3, and 4) students must choose from a list of several means to satisfy the required goals.

A total of 126 credit hours\(^1\) is required for the B.S. degree in computer engineering, as follows:

<table>
<thead>
<tr>
<th>Code</th>

---

\(^1\) Total of 126 credit hours is required for the B.S. degree in computer engineering.
Economics elective. Select one of the following:

Arts/Humanities/Social Science

Satisfy KU Core GE 2.2

Communications
to count towards a Professional Elective or additional Humanities or

Foreign language: Any foreign language course may be petitioned
toward the professional elective requirement.

ROTC Courses: Up to 6 hours of ROTC may be petitioned to count

Technical Writing: ENGR 504 or ENGL 362.

and Computing courses.

that applies towards a Business major or minor, except for Statistics

Business: Any course 200 and above from the School of Business

Math 526 and MATH 701.

Mathematics: Any MATH course numbered 500 or above, except

CHEM 110 if CHEM 130 or CHEM 150 has already been taken or will

PHSX 112, PHSX 114, PHSX 115, PHSX 212, PHSX 236, and

Natural science: Any course designated GE3N, except PHSX 111,

PHSX 116, PHSX 117, PHSX 118, PHSX 498, PHSX 645, and PHSX 692.

Engineering: IT 320, IT 330, IT 416, IT 430, IT 450 and any course

from any other engineering department numbered 200 or above,
except AE 211, ENGR 300, ENGR 490, ENGR 504, ME 208, ME

228, and any computing courses.

Mathematics: Any MATH course numbered 500 or above, except

except AE 211, ENGR 300, ENGR 490, ENGR 504, ME 208, ME

228, and any computing courses.

and professional courses:

EECS: Any course except EECS 137, EECS 138, EECS 315, EECS

316, EECS 317, EECS 318, EECS 498, EECS 645, and EECS 692.

Finance: Any course numbered 400 and above except

EECS courses can be considered but only with an accompanying petition.)

Partial Waiver of Upper Level Eligibility Requirements

To enroll in any upper-level EECS course (numbered 300 and above),
students must have fulfilled the Upper Level Eligibility Requirements
detailed above. Exceptions: EECS 312, EECS 361, EECS 368
and EECS 388 may be taken in the same semester as students are
completing their upper level eligibility. Students may also petition for a
Partial Waiver of Upper Level Eligibility Requirements by completing
the appropriate petition, found in the EECS office or at www.eecs.ku.edu
(http://www.eecs.ku.edu).

Double Major

If students wish to double-major (earn two degrees), they must fulfill all
the requirements for the degrees in question. They must also consult
the Engineering Dean’s office and the department and/or school of the
second major to find out if there are any additional requirements. If they
wish to obtain two degrees offered by the EECS department, the following
rule applies: a course that is required for one EECS degree program
may not be used to satisfy a Senior Elective or General Elective requirement of
another EECS degree program.

Computer Engineering 4-Year Graduation Plan

Freshman

Economics elective. Select one of the following:

Arts/Humanities/Social Science

Satisfy KU Core GE 2.1

Satisfy KU Core GE 4.1 and AE 4.2

1 Means of satisfying KU Core Goals are chosen from a variety of
options (see kucore.ku.edu). Hours listed are assuming the goals are satisfied with course work.

Course Prerequisites and Corequisites

Students must pass (at the appropriate grade level) all prerequisite
courses for a given course before taking the subsequent course. If
Course A is a Corequisite for Course B, Course A must be taken in the
same semester as Course B or be completed prior to taking Course B.

Upper Level Eligibility

In addition to prerequisites and co-requisites, EECS undergraduates
are required to earn Upper Level Course Eligibility by attaining grades
of C or better (C- does not qualify) in each of the following 16 courses:

KU Core GE 2.1 (both)

PHSX 210 & 216

MATH 125, 126, 127, 220, 290

EECS 101, 140, 168, 210, 202, 212, 221, 268

If students earn less than a C in any of the above listed courses, they
must repeat the course at the next available opportunity and must not
take a course for which that course is a prerequisite. It is the students’
responsibility to contact their advisors before beginning the new semester
regarding any required repetitions and the associated enrollment
adjustments (drops and adds).

To enroll in any upper-level EECS course (numbered 300 and above),
students must have fulfilled the Upper Level Eligibility Requirements
listed above. Exceptions: EECS 312, EECS 361, EECS 368
and EECS 388 may be taken in the same semester as students are
completing their upper level eligibility. Students may also petition for a
Partial Waiver of Upper Level Eligibility Requirements by completing
the appropriate petition, found in the EECS office or at www.eecs.ku.edu
(http://www.eecs.ku.edu).

Double Major

If students wish to double-major (earn two degrees), they must fulfill all
the requirements for the degrees in question. They must also consult
the Engineering Dean’s office and the department and/or school of the
second major to find out if there are any additional requirements. If they
wish to obtain two degrees offered by the EECS department, the following
rule applies: a course that is required for one EECS degree program
may not be used to satisfy a Senior Elective or General Elective requirement of
another EECS degree program.

1 Means of satisfying KU Core Goals are chosen from a variety of options (see kucore.ku.edu). Hours listed are assuming the goals are satisfied with course work.

### Departmental Honors

An undergraduate student may graduate with departmental honors in electrical engineering, computer engineering, computer science, or interdisciplinary computing by graduating with a minimum grade-point average requirement while maintaining full-time status. In addition, students must enroll in EECS 498 Honors Research for their last 2 semesters and must complete an independent research project paper and oral presentation to a panel of 3 judges. See the EECS Undergraduate Handbook for full details.
