

Department of Anthropology

The Anthropology Department at the University of Kansas

Anthropologists are concerned with the origin, history, and future of the human species. Our mission is to further our understanding of past and present human societies in their cultural, biological, and environmental contexts. As flows of people, ideas, money, and goods are crossing borders at unprecedented speeds, we are encountering human diversity now, more than ever before. The discipline provides students the knowledge and skills they will need to navigate these complex, multicultural, and rapidly changing worlds. Because we study what it is to be human, the field is one of the most wide-ranging of the academic disciplines.

The Anthropology Department currently offers courses in three main subdisciplines of anthropology: archaeology which is concerned with studying the human past based on the material culture left behind; biological anthropology which investigates human evolution and human variation; and socio-cultural anthropology analyzes the many ways humans organize themselves to live together, and communicate. Anthropologists explore past and present patterns of cultural meaning and power relationships on local and global scales, studying a variety of topics including technology, economy, social and political organization, language, ritual, and religion. Anthropologists across all of the subdisciplines apply holistic, comparative, and evolutionary perspectives and a range of methodologies in their research. We are committed to fieldwork and the application of this knowledge to helping people better understand one another.

Why Study Anthropology at KU?

Students have many reasons for wanting to major in anthropology. Some are curious about the origins of the human species. Others are fascinated by the diversity of human experiences in ancient and modern periods. Some students intend to pursue international careers, where they will use languages and work in cultural contexts very different from those in which they were raised. Others plan to work in museums collecting and curating human cultural resources. Some wish to pursue graduate training in one of the field's subdisciplines, while others seek to use their anthropological training as preparation for professional schools, including law, medicine, public health, journalism, business, and engineering. There are many professions where the broad scientific, humanistic, and multicultural knowledge available through the study of anthropology can be useful—in education, healthcare, law, social work, business, human resources, public affairs, cultural resource management, or laboratory research.

Anthropological Research Opportunities at KU

- Visit the **KU Anthropological Genetics Research Laboratories** (<https://kuanthgen.org/>) for more information regarding our research laboratories. Beginning with the construction of a state-of-the-art ancient DNA lab in 2016, our facilities now include a contemporary DNA laboratory, as well as multiple teaching laboratories for molecular methods and traditional osteological and paleoanthropological classes. Our research foci are on human and non-human population histories and paleoecological reconstruction

from sedimentary DNA. We prioritize ethical principles and cultural sensitivity in working in close collaboration with all partners.

- Visit the **Archaeological Research Center** for more information regarding KU's archaeological curation facility, which is located in historic Spooner Hall on the main campus and offers research space and support to Anthropology faculty and graduate students, Archaeology staff, Museum Studies interns, affiliate curators and research associates and visiting scholars.
- **Field Experiences** (<https://anthropology.ku.edu/field-experience/>): Anthropology faculty often offer field schools and other field experiences in archaeology, biological anthropology, and cultural anthropology. Undergraduates and graduate students have recently conducted independent research or participated in collaborative research in the United States, (including Alaska), Mexico, Central, and South America, Africa, and Asia.

Undergraduate Programs

Undergraduate course work in anthropology is fundamental to a liberal arts education. It serves students majoring in anthropology, preparing them for postgraduate professional training. It also enhances the educational experience of students who are non-majors by providing them with an anthropological perspective they can apply to their own discipline and career.

Courses for Nonmajors

Most courses are open to non-majors. In particular, ANTH 100 General Anthropology, ANTH 150/ANTH 309 Becoming Human, and ANTH 160/ANTH 360 The Varieties of Human Experience are recommended for students interested in anthropology who do not intend to major in it.

Graduate Programs

The graduate program consists of 15 faculty members and about 40 students, giving a student-professor ratio of about 2.5 and allowing a great deal of direct interaction between faculty and students. The department awards M.A. and Ph.D. degrees and has successfully placed most recipients of graduate degrees in professional positions.

The department offers graduate training in archaeology, biological anthropology, and sociocultural anthropology. It has expertise in applied anthropology, anthropological and molecular genetics, medical anthropology, migration, visual anthropology, Indigeneity and Indigenous archaeology, archaeology and paleoecology of hunter-gatherers, evolution of complexity, geoarchaeology, and early technology. Geographic strengths include Latin America, Native North America, eastern Asia, north Africa, and the contemporary United States

The department is closely associated with the Laboratory of Biological Anthropology and the Center for Archaeological Research.

Courses

ANTH 100. General Anthropology. 3 Credits. GE3S SBS

This course is an introduction to the discipline of Anthropology. Our goal is to understand human diversity in the past, present, and future through the lenses of the four primary fields of Anthropology: Archaeology, Biological Anthropology, Linguistic Anthropology, and Sociocultural Anthropology. Students will be introduced to major concepts, research approaches, important findings, and critical controversies within the discipline as a whole. We will investigate such questions as: How did humans evolve? How have human cultures and languages developed? What tools, technologies, and new kinds of knowledge and expertise emerge in the face of global environmental, social, political, and economic change?

ANTH 106. Introductory Linguistics. 3 Credits. AE42 GLBC

This course provides an introduction to the scientific study of human language, surveying a number of areas that are central to linguistic theory (sound, structure, and meaning). The course builds fundamental skills in analyzing linguistic data, drawing on examples from languages spoken all over the world. A key goal of the course is to present the argument that all language varieties have systematic rules. Students will be asked to critically examine this argument, drawing on empirical research in linguistics. (Same as LING 106.)

ANTH 107. Introductory Linguistics, Honors. 3 Credits. AE42 GLBC

This course provides an introduction to the scientific study of human language, surveying a number of areas that are central to linguistic theory (sound, structure, and meaning). The course builds fundamental skills in analyzing linguistic data, drawing on examples from languages spoken all over the world. A core goal of the course is to present the argument that all language varieties have systematic rules. Students will be asked to critically examine this argument, drawing on empirical research in linguistics. (Same as LING 107.)

ANTH 108. Introduction to Cultural Anthropology. 3-4 Credits. GE3S SWT SBS

An introduction to the nature of culture, language, society, and personality. Included in this survey are some of the major principles, concerns, and themes of cultural anthropology. The variety of ways in which people structure their social, economic, political, and personal lives. Emphasized are the implications of overpopulation, procreative strategies, progress and growth of cultural complexity, developments in the Third World, and cultural dynamics in Western as well as in non-Western societies.

ANTH 110. Introduction to Archaeology. 3-4 Credits. GE3S SBS

A general introduction to the history methods, theories, and principles of the study of archaeology. Lectures, and discussions sections cover the essential archaeological approaches, methods and practice: what is the material evidence that archaeologists collect, and how they collect and analyze it in order to understand humans of the past, their social organization, economy, subsistence, diet, technology, trade, exchange, symbol systems; how geological, palaeoenvironmental, paleontological, and genetic evidence contribute to archaeology and what was the effect of environmental and climate change on human evolution and global dispersal; what is the role of knowing the past, public archaeology, culture heritage preservation, and archaeological ethics in the modern world. Discussion sections will be used to examine material covered in lectures and in readings related to specific topics, and to explore relevant visual materials - archaeological artifacts, collections, and media sources.

ANTH 115. World Prehistory. 3 Credits.

A general introduction to the evolution of human culture around the world from the Lower Paleolithic to the emergence of complex societies. This course covers what archaeology has revealed about the experience of humankind from the origins of stone tool use to the earliest urban settlements in the Middle East, Africa, Asia, Europe, and the Americas.

ANTH 150. Becoming Human. 3 Credits. GE3S SBS

This course examines the biological evolution and archaeological record of humanity from the earliest human origins to the origins of civilization, and asks: Where did we come from? What makes us human? Where are we going? By unraveling the fundamental connections between biological evolution and culture, our goal is to help students appreciate how knowledge of the human past is relevant to our modern lives, whether as a KU student today, or as a future parent, medical patient, consumer, or citizen. Not open to students that have taken ANTH 309.

ANTH 151. Becoming Human, Honors. 3 Credits. GE3S SBS

An honors section of ANTH 150 for students with superior academic records. Not open to students who have had ANTH 150. Prerequisite: Enrollment in the Honors Program.

ANTH 160. The Varieties of Human Experience. 3 Credits. AE42 GLBC

An introduction to basic concepts and themes in cultural anthropology by means of the comparative study of selected cultures from around the world, for the purpose of appreciating cultural diversity. Emphasis is on systems of belief and meaning. Not open to students who have taken ANTH 360.

ANTH 162. The Varieties of Human Experience, Honors. 3 Credits. AE42 GLBC

An honors section of ANTH 160 for students with superior academic records. Not open to students who have had ANTH 160 or ANTH 360.

ANTH 177. First Year Seminar: _____. 3 Credits. GE11 GLBC

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Anthropology. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of Academic Programs and Experiential Learning. Prerequisite: Open to Freshmen only (less than 30 hours).

ANTH 210. Archaeology's Greatest Hits. 3 Credits. GE3S SBS

This course is a broad survey of the most spectacular archaeological discoveries of our time. It tells the story of pioneers and scientist-adventurers in their quest for knowledge of human prehistory. These discoveries became historically significant because they embodied major theoretical advances and evolutionary leaps in our understanding of the past. While reviewing archaeology's greatest discoveries, this course will investigate many of the major events, such as the critical evaluation of evidence or the development of appropriate scientific techniques, that eventually established archaeology as a scientific endeavor.

ANTH 212. Archaeological Myths and Realities. 3 Credits. GE11

Archaeology is concerned with explaining mysteries of the human past ranging from the origins of human beings to the rise and fall of civilizations. This course is designed to guide students in investigations of mysteries that capture the popular imagination, but which many scientists do not wish to discuss. What is the scientific evidence for the Biblical account of Creation, the Great Flood, or the Tower of Babel? Was the Great Pyramid encoded with lost knowledge or predictions of the future? Did Chinese, Africans, Celts, or Vikings visit the Americas before Columbus? Is Stonehenge an astronomical observatory? Who built the giant statues on Easter Island? Where are the lost continents of Atlantis and Lemuria? The methods and theories of archaeology and anthropology will be used to address these and other questions.

We will develop methods of evaluating information available from various published and online sources to judge when a claim represents a revolutionary new idea or a strategy for extracting money from the uninformed? Students will learn to be critical consumers of scientific and non-scientific information, and our goal will be to identify ways to be skeptical while maintaining an open mind when confronted with conflicting claims.

ANTH 291. Study Abroad Topics in: _____. 1-5 Credits.

A course designed to enhance international experience in topic areas related to anthropology at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

ANTH 293. Myth, Legend, and Folk Beliefs in East Asia. 3 Credits. AE42 GLBC

A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the traditional world view of the peoples of East Asia. (Same as EALC 130, REL 130.)

ANTH 301. Anthropology Through Films. 3 Credits. AE42 GLBC

An exploration of the human ways through films. Cross-cultural interpretations by filmed records of varieties of interpersonal relations seen through such aspects of culture as hunting, war, marriage, religion, sex, kinship, and death. Patterns of interactions are analyzed by examples from cultures around the world, primarily the non-Western world.

ANTH 303. Peoples and Cultures of North Africa and the Middle East. 3 Credits. AE42 GLBC

This course familiarizes students with the peoples and cultures of North Africa and the Middle East. It examines the cultural, demographic, and religious diversity of the region, as well as the development of the early Islamic community and the formation of Islamic institutions. Issues such as religion and politics, inter-religious relations, nation-building, Islamic response to colonialism, Palestinian-Israeli conflict, Islamic resurgence, secularism, democratization, and gender, are also explored. (Same as AAAS 303 and REL 303.)

ANTH 304. Fundamentals of Biological Anthropology. 3 Credits. GE3N SBS

Biological anthropology is an exciting discipline concerned with humans as biological beings living in cultural and natural settings. We are interested in questions pertinent and important to the scientific, social, and political agendas of the world. Material covered in this class will encourage you to pursue questions about the relationship of humans to the rest of the animal kingdom, the origin, maintenance, patterning, and significance of human biological variation, the nature of heredity, and human evolution. We will discuss the human and primate fossil records, human variation, race, and genetics. Students can expect a strong emphasis on scientific literacy, that is, how the process of scientific inquiry works. When you finish this course, you will have the tools to distinguish between reliable and unreliable sources of scientific information and a solid grounding in the fundamentals of biological anthropology.

ANTH 305. Archaeology of the North American Arctic. 3 Credits.

This course provides students with an introduction to archaeology in the North American Arctic, with a focus on the last 6,000 years. Students will learn about the interplay of environment, culture, and behavior by examining primary and secondary archaeological sources. Students leave the course knowing how archaeological methods are applied in the North and the limits of these methods in constructing the past. Topics considered include cultural adaptations to changing climates,

human-animal interactions, migration and interactions, and subsistence-settlement strategies. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in ANTH 505.

ANTH 308. Fundamentals of Cultural Anthropology. 3 Credits. GE3S SBS

This course covers the fundamental concepts, theories, and practices of cultural anthropology. It teaches students how to think anthropologically through a survey of classic and contemporary ethnographic texts, spanning a range of geographic and cultural areas. Applying a holistic lens, students will critically analyze inequality, globalization, and human cultural differences across time and space. Topics will include: fieldwork and ethnography; racism; ethnicity and nationalism; gender, sexuality, and kinship; socioeconomic class; the global economy; politics and power; religion; health and development; and art and media. This course logically follows ANTH 160/ANTH 162/ANTH 360. Not open to students who have taken ANTH 108.

ANTH 309. Becoming Human. 3 Credits. GE3S SBS

A more intensive treatment of ANTH 150. This course examines the biological evolution and archaeological record of humanity from the earliest human origins to the origins of civilization, and asks: Where did we come from? What makes us human? Where are we going? By unraveling the fundamental connections between biological evolution and culture, our goal is to help students appreciate how knowledge of the human past is relevant to our modern lives, whether as a KU student today, or as a future parent, medical patient, consumer, or citizen. Not open to students that have taken ANTH 150.

ANTH 310. Fundamentals of Archaeology. 3 Credits. GE3S SBS

An introduction to the history, methods, theories, and principles of archaeology. This course covers essential archaeological approaches, methods and practices to answer such questions as: What is the material evidence that archaeologists collect and how do they analyze it in order to understand humans of the past, their social organization, economy, subsistence, diet, technology, trade, exchange, and symbol systems? How do geological, paleoenvironmental, paleontological, and genetic evidence contribute to archaeological understandings of human biological and social evolution? What was the effect of environmental and climate change on human evolution and global dispersal? How are knowledge of the past, public archaeology, culture heritage preservation, and archaeological ethics used in the modern world? Prerequisite: ANTH 150 or ANTH 309 or any archaeology course at the 200 level or higher or permission of instructor.

ANTH 311. Archaeology Roadshow. 3 Credits. LFE

This is a 15-day, interdisciplinary field-trip course in the archaeology and paleoecology of a specific region. It provides students with high-impact learning experiences in a field setting, centered on visits to national parks, archaeological sites, and ecological and paleoecological field locations. More specifically, students have daily field-lab assignments related to different components of archaeology and ecology, for example vegetation identification and analysis, geomorphological mapping and description, archaeological-site stratigraphic mapping and description, archaeological-site survey and recording, field-artifact analysis, and bison ecology and behavior "ethogram." Students complete learning modules as they tour important archaeological and paleontological sites with course instructor and local specialists. Course may be repeated once for credit if region varies. Prerequisite: Permission of instructor.

ANTH 314. Anthropology and the Jews. 3 Credits.

A disproportionately large number of founders of anthropology in the 20th century were Jews. The figure of the "Jew," as an abstract theoretical category, played a central role in some of the foundational

texts of sociocultural theory at the beginning of the 20th century. There were also the real, “empirical” Jewish communities around the world, undergoing massive upheavals, that were the objects of numerous anthropological studies. This course will explore these different layers of the relations of anthropology, Jews, and Jewishness. Is there something particularly “Jewish” in the work of Boas, Durkheim, and Gofman or in the anthropological perspective more broadly? What was the role of the “Jew” in how early-twentieth-century sociocultural theory thought about modernity? Was it influenced by the enduring legacy of anti-semitism? What are some of the ways in which anthropology has been studying and analyzing Jewish communities around the world? Students of anthropology and other social sciences will find in this course an opportunity to do a close reading, in workshop mode, of some of the classic works of 20th century sociocultural theory, as well as think about the roots of their disciplines in both racism and anti-racist pushback. Students of Jewish studies, on the other hand, will find an anthropologically informed discussion of Jewish identity and Jewishness, anti-semitism, and the lived reality of global Jewish communities. (Same as JWSH 314.)

ANTH 315. The Prehistory of Art. 3 Credits. GE3S SBS

A survey of prehistoric art focusing on the material record and interpretations of rock art (paintings, engravings on rock surfaces in rock-shelters, caves and in open air sites) and portable art created by prehistoric people. The emphasis is on the small-scale societies (hunter-gatherer and early food producers) around the world before the appearance of written records in respective geographic areas. Environmental, social and cultural contexts in which these art forms were created are discussed along with a review of past scholarship and current interpretive approaches to this old and enduring expression of human creativity. Course may be offered in lecture or online format.

ANTH 317. Prehistory of Europe and Asia. 3 Credits. GE3S SBS

A survey of 1.7 million years of prehistory from the peopling of the Eurasian supercontinent through the Bronze Age. The course focuses on the growth of culture, considering economy and technology, art and architecture. Topics include Neanderthals and Denisovans, emergence of modern humans during the Ice Age, transition to agriculture, and evolution of cultural complexity, comparing East and West. Prerequisite: A course in anthropology, history, geography, or permission of the instructor.

ANTH 318. Indigenous Histories & Archaeologies of the Great Plains. 3 Credits. GE3S SBS

This course explores the archaeology and lifeways of Indigenous peoples of the Great Plains, focusing on over 3,000 years of cultural development and change. Through the lens of Anthropological Archaeology, students will engage with the methods and perspectives that prioritize Indigenous knowledge systems, sovereignty, and collaboration in interpreting the archaeological record. Utilizing collections of Indigenous material culture, the course highlights the technological, artistic, and social diversity of Great Plains peoples, from the earliest inhabitants to contemporary Indigenous communities.

ANTH 319. Strategies for Survival. 3 Credits. GLBC

This course explores the major inventions and strategies humans have implemented throughout their long history to secure their survival. The class is meant as a tribute to human creativity, flexibility and resilience. It is designed for students to delve in the depth of the rich ethnographic and archaeological record to illustrate the diversity of small-scale societies and traditions across the world and throughout our prehistory. We will investigate human adaptive responses along four major themes: 1) population control with life-or-death strategies, such as infanticide or mating taboos, 2) Food procurement via hunting, gathering or farming, 3) invention and technological innovation, such as stone tools, fire, pottery,

and finally 4) social competition, as implemented through warfare or gifts and counter-gifts. These issues will be illustrated by archaeological and ethnographic case studies to establish when in our prehistory these adaptive mechanisms were adopted and how they have evolved through time.

ANTH 320. Language in Culture and Society. 3 Credits. AE41 AE61 SWT SBS

Language is an integral part of culture and an essential means by which people carry out their social interactions with the members of their society. The course explores the role of language in everyday life of peoples in various parts of the world and the nature of the relationship between language and culture. Topics include world-view as reflected in language, formal vs. informal language, word taboo, and ethnography of speaking. (Same as LING 320.)

ANTH 321. Language in Culture and Society, Honors. 3 Credits. AE41 AE61 SBS

An honors section of ANTH 320 for students with superior academic records. Not open to students who have had ANTH 320 or LING 320. (Same as LING 321.) Prerequisite: Membership in the University Honors Program or consent of instructor.

ANTH 325. Language, Gender, and Sexuality. 3 Credits. GE3S SBS

How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as WGSS 325.)

ANTH 330. Forensic Anthropology. 3 Credits.

This course focuses on the study of forensic anthropology as related to medico-legal death investigation. It includes overview of the Coroner's System, death scene investigation techniques, DNA and Geoscience applications, statutes and laws, review of injuries and interpretations, child death investigation and its uniqueness, identification of the body, coordination with law enforcement and the legal world, how to obtain the necessary information in order to complete a case, cause vs. manner of death, types of death and how to identify, how to deal with families and the public, and social responsibilities associated with forensic science.

ANTH 340. Human Variation and Evolution. 3 Credits. GE3N SBS

An examination of biochemical and physical variability in contemporary human populations. Topics include: genetic basis of human diversity, evolutionary theory, population genetics, blood groups, biochemical variations, body size and shape, pigmentation, and other morphological characteristics. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 341. Human Evolution. 3 Credits.

The evolutionary processes and events leading to the development of humans and the humanlike forms from primate ancestors; fossil hominids and the origin of modern Homo Sapiens. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 343. Food, Nutrition and Culture. 3 Credits. GE3S SBS

The course is a cross-cultural survey of human dietary practices (foodways). Students are introduced to the concepts of nutrition, diet and

cuisine. Evolutionary and adaptive aspects of human diets and cuisines are considered. Nutritional, environmental/ technological, social and ideological aspects of regional and ethnic foodways are examined. Invited lecturers from different cultural traditions offer indigenous perspectives on their foodways.

ANTH 352. Controversies on the Living and the Dead. 3 Credits.

A critical analysis of conflicting perspectives on scientific and anthropological research, past and present. Topics considered include the nature of science, colonialism in anthropology and biology, origin stories and human evolution, the ethics of research in ancient and contemporary populations, eugenics, biological race, and the relationship between humans and our extinct hominin relatives. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 360. The Varieties of Human Experience. 3 Credits. AE42 GLBC

A more intensive treatment of ANTH 160. An introduction to basic concepts and themes in cultural anthropology by means of the comparative study of selected cultures from around the world, for the purpose of appreciating cultural diversity. Emphasis is on systems of belief and meaning. Not open to students who have taken ANTH 160.

ANTH 367. Introduction to Economic Anthropology. 3 Credits.

This course uses ethnographic case materials to explore the ways humans provision themselves under different social and environmental conditions. It introduces the basic theories, concepts, and debates of economic anthropology and provides a foundation for more advanced courses in this subdiscipline. Prerequisite: ANTH 108 or ANTH 160/ANTH 162 or ANTH 308 or ANTH 360 or permission of instructor.

ANTH 372. Religion, Power, and Sexuality in Arab Societies. 3 Credits. AE42 GLBC

This course examines theories of religion, discourse, power, gender and sexuality in their application to Arab societies. The course introduces different aspects of Arab cultures. Through canonical works, we study political domination, tribal social organization, honor, tribe, shame, social loyalty, ritual initiations and discuss how these issues speak generally to anthropological inquiry. Regionally specific works are then framed by an additional set of readings drawn from anthropological, linguistics, and social theories. (Same as AAAS 372 and REL 358.)

ANTH 379. Indigenous Traditions of Latin America. 3 Credits. AE42 GLBC

A survey of the major indigenous traditions of Mesoamerica, the Andes, and lowland tropical Latin America. Coverage emphasizes how indigenous cultural traditions and societies have both continued and changed since the European Invasion and addresses such current issues as language rights, territorial rights, sovereignty, and state violence. Students enrolled in the 600-level section will be required to complete additional research and class leadership tasks. Not open to students who have taken LAC 634. (Same as LAC 334.)

ANTH 380. Peoples of South America. 3 Credits.

A survey of native peoples and cultures of South America from the time of initial Western contacts to the present day.

ANTH 382. People and the Rain Forest. 3 Credits. AE42 GLBC

An analysis of the cultural origin, diversity, and unity of the peoples of the neotropics. Emphasizing the peoples of Amazonia, the course introduces students to topics associated with the economic, political, and cultural dimensions of social life in rain forest communities.

ANTH 389. The Anthropology of Gender: Female, Male, and Beyond. 3 Credits. AE42 GLBC

This course will introduce students to cultural constructions and performances of masculinity, femininity, and alternative genders across time and space. Topics and cases will be drawn from primarily non-Western cultures, ranging from Japanese markets to Pacific Rim gardens, and from Haitian voodoo to Maya royal politics. This course uses research by archeologists, linguists, biological anthropologists, and sociocultural anthropologists. (Same as WGSS 389.)

ANTH 391. Topics in Anthropology: _____. 3 Credits.

This course offers students an opportunity to study classical and emerging topics in the four primary fields of Anthropology: Biological Anthropology, Linguistics, Sociocultural Anthropology, and Archaeology. Concepts and approaches to each field will be used to investigate past and present examples from around the world. Topics will be examined with an emphasis on the unity of the anthropological approach.

ANTH 397. Museum Anthropology. 3 Credits. GE3S SBS

An introduction to the historical background, practice, and ethical issues involved in the creation, presentation, and dissemination of anthropological information in a museum setting. Students participate in the study of a collection of material culture (artifacts) from the Museum of Anthropology, culminating in development of a script for an exhibit.

ANTH 400. Topics in Anthropology, Honors: _____. 3 Credits.

Selected issues and theories in contemporary anthropology (cultural, linguistic, biological, archaeological) for honors students. Topic for semester to be announced. May be repeated for credit if content varies. Prerequisite: Admission to University Honors Program or permission of instructor.

ANTH 401. Integrating Anthropology. 3 Credits. AE61 CAP

Capstone course that integrates the primary fields of anthropology. Students apply concepts and approaches from each field to a particular topic in preparation for and presentation of a cross-disciplinary and integrative final project. Prerequisite: Completion of ANTH 150/ANTH 151 or ANTH 160/ANTH 162/ANTH 360 and any two other anthropology courses.

ANTH 406. Archaeological Research Methods. 3 Credits. LFE

A survey of basic field methods and laboratory procedures associated with specimen acquisition, preparation, analysis, classification, and measurement of archaeological materials. In this course students will apply archaeological methods to the study of stone tools, ceramics, and animal bone, learn which field and lab methods to use in a range of research scenarios, interpret human behavior on the basis of artifacts and features recovered from archaeological sites, use introductory flintknapping techniques to produce a stone tool, study the major dating and chronological methods used in archaeology, and complete labs and projects that require analysis and interpretation of archaeological materials. Prerequisite: ANTH 110 or ANTH 150/ANTH 151 or ANTH 310 or permission of instructor.

ANTH 415. The Rise of Civilization. 3 Credits.

A study of evolutionary processes leading to the birth of the early great urban civilizations of the Old World and the New World. Patterns of growth and similarities and differences in the rise of urban complexes and states in Mesopotamia, Egypt, the Indus Valley, and in Mexico/Guatemala and Peru. (Same as HIST 415.)

ANTH 418. Summer Archaeological Field Work. 1-8 Credits. AE61 CAP

Under the direction of a professional archaeologist, undergraduate and graduate students are taught proper procedures for the excavation and laboratory analysis of data from a prehistoric or historic archaeological site. Data gathered may be used for additional graduate research.

Enrollment by application; limited to twenty students. A fee for subsistence costs will be charged.

ANTH 419. Training in Archaeological Field Work. 1-6 Credits.

Undergraduate and graduate students are taught techniques of archaeological field work, including survey and excavation, as well as laboratory procedures, including artifact classification and curation.

ANTH 420. Archaeological Theory. 3 Credits.

This advanced undergraduate seminar reviews the history of scientific archaeological thought, major theoretical paradigms, and current trends in archaeology. Topics include the major theoretical "movements" in the development of anthropological archaeology and how other disciplines have influenced explanation in archaeology, particularly cultural anthropology, geology, history, and evolutionary biology. Prerequisite: Completion of an introductory course in ANTH or permission of instructor.

ANTH 430. Linguistics in Anthropology. 3 Credits.

The study of language as a symbolic system. Exploration into the interrelatedness of linguistic systems, of nonlinguistic communicative systems, and of other cultural systems. (Same as LING 430.)

ANTH 442. Anthropological Genetics. 3 Credits.

Principles of human genetics involved in biological anthropology. The genetics of non-Western populations considered within an evolutionary framework. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 445. Topics in Biological Anthropology: _____. 3 Credits.

Seminar concentrating on selected problems and issues in contemporary biological anthropology. Topic for semester to be announced. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 449. Laboratory/Field Work in Human Biology. 1-3 Credits. LFE AE61 CAP

This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as BIOL 449, SPLH 449, and PSYC 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor.

ANTH 462. Field Methods in Cultural Anthropology. 3 Credits. LFE

This course introduces students to ethical considerations, methods used in ethnographic fieldwork, field notes, coding data, analysis, and write-up. Students design and carry out research projects. Prerequisite: ANTH 108 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 360 or permission of instructor.

ANTH 465. Genocide and Ethnocide. 3 Credits.

This course provides students with a conceptual and historical synopsis of genocide and ethnocide from an anthropological perspective. Taking its lead from a human rights orientation, the course assesses why such atrocities must be confronted. This includes grappling with ethical, legal and definitional ambiguities surrounding the concepts of genocide and ethnocide. We will explore a range of cases in the 20th and 21st centuries, while focusing on diverse conditions leading to genocide,

ethnocide, population displacements, human trafficking and the modern phenomena of refugee camps. The course will analyze the role of the modern state, colonialism, political ideologies, ethnicity and nationalism as major forces underpinning ethnocide and genocidal campaigns. Based primarily on a select review of cases of ethnocide and genocide, the class examines how to spread global awareness and communal engagement by actively protecting human rights. (Same as GIST 465.)

ANTH 484. Magic, Science, and Religion. 3 Credits. GE3S

This course provides a comparative study of religion and systems of value and belief in non-Western cultures. (Same as REL 484.)

ANTH 491. Study Abroad Topics in: _____. 1-5 Credits.

A course designed to enhance international experience in topic areas related to topics in anthropology at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

ANTH 496. Reading and Research. 1-6 Credits.

Individual investigation of special problems in anthropology. Maximum of three credit hours in any one semester. Prerequisite: Permission of instructor.

ANTH 497. Field Experience. 1-6 Credits.

A supervised field or laboratory-based experience in the United States or abroad. Students may receive this credit for an independent or collaborative research project or in conjunction with field school participation. Students may also acquire credit for supervised placements in organizations, agencies, museums or other settings in which they apply anthropological knowledge to real-life situations and actively participate in organized work within a community. The field experience should not duplicate any other regularly available course. A contract between mentor and student is required at the beginning of the experience, and a reflection paper is required at the end of the experience. Students are strongly recommended to have completed at least one anthropology methods course prior to enrolling in Field Experience. Prerequisite: Permission and supervision by anthropology instructor required.

ANTH 499. Senior Honors Research. 3-6 Credits.

Individual research under the direction of one or more instructors in the department. Minimum of three credit (maximum of six credit) hours in any one semester. Prerequisite: A grade-point average of 3.50 in anthropology and 3.25 in all courses, and permission of instructor.

ANTH 500. Topics in Archaeology: _____. 3 Credits.

Seminar concentrating on selected problems and issues in contemporary archaeology. Topic for semester to be announced. Course may be repeated for a maximum of nine hours of credit. Prerequisite: Successful completion of a course in archaeology at any level, or by permission of instructor.

ANTH 501. Topics in Sociocultural Anthropology: _____. 3 Credits.

Course concentrating on selected problems, theories, and issues in contemporary sociocultural anthropology. Topic for semester to be announced.

ANTH 502. Topics in Anthropological Linguistics: _____. 3 Credits.

Course concentrating on selected problems, theories, and issues in contemporary anthropological linguistics. Topic for semester to be announced.

ANTH 503. Topics in Biological Anthropology: _____. 3 Credits.

Course concentrating on selected problems, theories, and issues in contemporary biological anthropology. Topic for semester to be announced.

ANTH 504. North American Archaeology. 3 Credits.

A general survey of the archaeology of North America. Detailed coverage of selected problems.

ANTH 505. Archaeology of the North American Arctic. 3 Credits.

This course provides students with an introduction to archaeology in the North American Arctic, with a focus on the last 6,000 years. Students will learn about the interplay of environment, culture, and behavior by examining primary and secondary archaeological sources. Students leave the course knowing how archaeological methods are applied in the North and the limits of these methods in constructing the past. Topics considered include cultural adaptations to changing climates, human-animal interactions, migration and interactions, and subsistence-settlement strategies. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in ANTH 305. Prerequisite: An introductory course in anthropology or permission of the instructor.

ANTH 506. Pre-Hispanic Mexico and Central America. 3 Credits.

A survey of indigenous, Pre-Hispanic cultures of Mexico and Central America, including Olmecs, Teotihuacan, Mayas, Zapotecs, Toltecs, and Aztecs. This course teaches how to interpret art, architecture, artifacts, and culture change in the context of iconography and symbols, metaphysical beliefs and ritual practices, crafts and technologies, trade and exchange, social inequality and conflict resolution, and the relationships among these cultures and their environments. (Same as HIST 571 and LAC 556.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, Indigenous Studies, History, or permission of instructor.

ANTH 507. The Ancient Maya. 3 Credits.

An intensive examination of current scholarship on the ancient Maya civilization of Mexico and Central America. The course will consider Maya culture from its roots in early villages of the Preclassic period to the warring city-states of the Postclassic period. Topics will include settlement and subsistence systems, sociopolitical evolution, art and architecture, myth and symbolism, and Maya hieroglyphic writing. An important theme of the course will be the relevance of the Precolumbian Maya for understanding complex societies and contemporary Latin American Culture. Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, or Indigenous Studies, or permission of instructor.

ANTH 508. Ancient American Civilizations: The Central Andes. 3 Credits.

An archaeological survey of the ancient peoples of Peru and neighboring countries in South America. The origins of complex societies on the coast and in the Andean highlands will be reviewed with special consideration of the role of "vertical" environments in the development of Andean social and economic systems. Cultures such as Chavin, Moche, Nazca, Huari, Tiahuanaco, Chimú, and the rise of the imperial Inca state will be examined through artifacts, architectural remains, and ethnohistoric documents. (Same as HIST 572 and LAC 558.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, History, or Indigenous Studies, or permission of instructor.

ANTH 509. Ancient Central America. 3 Credits.

This course will examine the Precolumbian cultures of the region situated between Mesoamerica to the north and the Central Andes to the south, focusing principally on the countries of Honduras, Nicaragua, Costa Rica, Panama, and Colombia. Once regarded as an "Intermediate Area" on the peripheries of the ancient civilizations to the north and south, the area of

southern Central America and northern South America is now recognized as a center of innovation from very remote times up until the Spanish Conquest. The archaeological remains of stone tools, pottery, jade carvings, gold and copper ornaments, and a wide variety of structures will be interpreted within the context of information on subsistence, settlement patterns, social organization and religious ideology. Issues of the relationships with populations of regions in major culture areas to the north and south will also be considered in detail. (Same as LAC 559.) Prerequisite: ANTH 110 or ANTH 115.

ANTH 510. Environmental Archaeology. 3 Credits.

This course is an interdisciplinary exploration of the paleoecological context in which past humans interacted with the natural environment, encompassing plants, animals, and landscape. The method and theory of environmental archaeology, as well as macro, micro, and molecular approaches to paleoenvironmental reconstruction will be covered. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in ANTH 312. Prerequisite: ANTH 110, ANTH 310, or permission of instructor.

ANTH 516. Hunters and Gatherers. 3 Credits. GE3S

The diversity of hunter-gatherer cultures documented in the ethnographic and archaeological records is considered on a global scale, with particular attention given to the relationships between environment, technology, and organization. The evolution of hunter-gatherers from the earliest hominids until their interaction with more complex societies is considered, with emphasis given to the variation and nature of change in these societies. Prerequisite: ANTH 108 or ANTH 150/151 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 310 or permission of instructor.

ANTH 517. Geoarchaeology. 3 Credits.

Application of the concepts and methods of the geosciences to interpretation of the archaeological record. The course will focus primarily on the field aspects of geoarchaeology (e.g., stratigraphy, site formation processes, and landscape reconstruction), and to a lesser extent on the array of laboratory approaches available. (Same as GEOG 532.) Prerequisite: GEOG 104, ANTH 110, or ANTH 310.

ANTH 519. Lithic Technology. 3 Credits.

An introduction to the analysis and interpretation of prehistoric stone industries. Topics discussed include origins and development of lithic technology, principles of description and typology, use and function of stone tools; interpretation of flint knapping. Prerequisite: An introductory course in archaeology.

ANTH 520. Archaeological Ceramics. 3 Credits.

Practicum in the method and theory of pottery analysis in archaeology. Topics include manufacturing techniques, classification, and compositional analysis of pottery artifacts, as well as strategies for interpreting the role of ceramic vessels in food production, storage, and consumption; social and ritual activities; trade and exchange; and the communication of ideas. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

ANTH 521. Zooarchaeology. 3 Credits.

This course is intended to complement faunal identification with practical involvement in analyses and interpretation of archaeological faunal assemblages using a variety of modern methods. Students will participate in the study of specific archaeological faunal remains, development of comparative zooarchaeological collections, and in middle-range research to document the variety of agents that affect faunal remains. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

ANTH 523. Great Plains Archaeology. 3 Credits. GE3S

A survey is provided of the archaeological record and its interpretations for the Great Plains area of North America. The records from earliest human occupation, variation in hunter and gatherer societies, to horticultural and farming societies, and the historic period are reviewed. The history of archaeological research in the region, explanatory frameworks and models, and discussion of changes in economy, technology, mobility, social organization, and population movements are among the topics of concern. Prerequisite: ANTH 110, ANTH 310, or permission of instructor.

ANTH 544. Origins of Native Americans. 3 Credits.

A survey of the genetic, linguistic, historic, archaeological, and morphological evidence for the origins of indigenous populations of the Americas. Prerequisite: An introductory course in physical anthropology, biology, or permission of instructor.

ANTH 545. Contemporary Health Issues in Africa. 3 Credits.

The course examines health and nutrition in African communities, using the methods of biological and medical anthropology. Fundamental to the approach taken in the course is the understanding that the health of human groups depends on interactions between biological and cultural phenomena in a particular ecological context. One topic will be selected per semester to examine in detail the full array of epidemiological factors contributing to patterns of specific diseases. AIDS, childhood diseases, and reproductive health of African women are among possible topics. Course material will be selected from scholarly and medical publications, as well as coverage in the popular media. The use of a variety of sources will enhance understanding of the biological and cultural issues involved, and will help students identify possible bias and misinformation in popular coverage of events such as famine or epidemic in African settings. Prerequisite: An introductory course in either Anthropology or African Studies.

ANTH 561. Indigenous Development in Latin America. 3 Credits. AE42

Surveys the history of the development enterprise since WWII, examines the marginalization and impoverishment of Latin America's indigenous peoples, and provides training to carry out projects for and with them to enhance their quality of life. Development is understood as not merely technological or economic, but also social, emotional, and educational. Students work in teams to design their own mock development project. A 3-credit non-obligatory companion course, Applied Anthropological Field School among the Ch'orti' Maya, will follow in the intersession after each version of this course. (Same as LAC 561.) Prerequisite: ANTH 100, ANTH 108, ANTH 160 or LAC 100; or consent of instructor.

ANTH 562. Mexamerica. 3 Credits. AE41

This class surveys the relations between Mexico and the U.S. as nation-states, and among Mexicans, Mexican Americans, and Anglo Americans (to a lesser extent other U.S. citizens) in historical perspective. Issues of sovereignty, national and ethnic identity, immigration, migration, labor relations, popular culture, media, and transnational economics are covered. (Same as LAC 562.) Prerequisite: ANTH 108 or ANTH 308 or ANTH 160 or ANTH 360 or LAC 100.

ANTH 570. Anthropology of Violence. 3 Credits.

Introduces students to the comparative and cross-cultural study of violence. The course begins by surveying different anthropological approaches to the study of violence, with special attention paid to classical social theorists as well as ethnographic works. Topics may include (post) coloniality and identity politics, nationalism, race, religion, and political culture; geographic areas to be covered may include Africa, Europe, Latin America, the Middle East, and South Asia. (Same as GIST 570.) Prerequisite: Junior standing or above or permission of instructor.

ANTH 582. Ethnobotany. 3 Credits.

Course will involve lectures and discussion of Ethnobotany - the mutual relationship between plants and traditional people. Research from both the field of anthropology and botany will be incorporated in this course to study the cultural significance of plant materials. The course has 7 main areas of focus: 1) Methods in Ethnobotanical Study; 2) Traditional Botanical Knowledge - knowledge systems, ethnolinguistics; 3) Edible and Medicinal Plants of North America (focus on North American Indians); 4) Traditional Phytochemistry - how traditional people made use of chemical substances; 5) Understanding Traditional Plant Use and Management; 6) Applied Ethnobotany; 7) Ethnobotany in Sustainable Development (focus on medicinal plant exploration by pharmaceutical companies in Latin America). (Same as EVRN 542 and ISP 542.) Prerequisite: EVRN 142, EVRN 145, EVRN 148, ANTH 150/151, ANTH 160/162/360 or permission of instructor.

ANTH 583. Love, Sex, and Globalization. 3 Credits.

Escalating transnational flows of information, commodities, and people have created innumerable kinds of "intimate" contacts on a global scale, such as mail order brides, child adoption, sex tourism, commodified romance, and emotional labor. Exploring the ways that cultural artifacts of intimacy are rendered, fetishized, and reified in a free market economy, this course examines how discourses on love and sex encounter, confront, and negotiate the logics of the capitalist market, the discrepant narratives of (colonial) modernity, and the ethics of pleasure. In so doing, this course navigates the treacherous interplay among emotions - specifically love, sex, and money, seeking the potential and limits of cultural politics of emotions. (Same as WGSS 583.) Prerequisite: Any previous course in ANTH or WGSS.

ANTH 587. Multidisciplinary Field School in Partnership with the Chorti Maya. 3 Credits.

Teams of interdisciplinary students partner with the Chorti Maya of Guatemala and Honduras to share information and experiences. One third of the course consists of readings and 4-5 orientation sessions on campus, and two thirds entails two weeks in Central America. Examples of activities might include historical research, water testing and improvement, photography, art, music, tourism consultation, marketing of crafts, human rights advocacy, web design, computer training, and museum work, among others. There are no prerequisites, but students with a working knowledge of Spanish will receive preference for admission. (Same as LAC 587.)

ANTH 595. The Colonial Experience. 3 Credits.

An anthropological and historical examination of the processes and dynamics of the colonial experience. Cross-cultural psychosocial phenomena that have profoundly affected the values and social organizations of both colonizers and colonized will be emphasized. Specific examples will be chosen from the former American, Japanese, and European colonial empires with emphasis on Asia.

ANTH 603. Shamanism Past and Present. 3 Credits.

This course explores shamanism, broadly defined as the practice of gaining insight through the use of ecstatic techniques (dance, drumming, trance, vision quests, and the use of psychotropic substances) for the purpose of interpreting existence and healing illnesses, through a consideration of theories and evidence for its practice from Upper Paleolithic times to the present day. Examples from the ancient cultures of Asia, Europe, Africa, Australia, and the Americas are used to explore current theoretical approaches in order to identify shamans and shamanism in the past. Issues of identifying shamans and shamanism in art and archaeological contexts are discussed. The course also explores the role that shamanism plays in a wide variety of cultures. The principal goal of the course is to provide a reasoned, critical interpretation of

shamanism in the context of contemporary debates about its definition and active practice. Prerequisite: ANTH 108 or ANTH 110 or ANTH 150 or ANTH 151 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 310 or ANTH 360 or permission of instructor.

ANTH 604. The First Americans. 3 Credits.

This class will review the ongoing scientific debate concerning the routes and chronologies of the earliest human migrations into the Americas. It surveys the history of the dispute over the antiquity of archaeological sites in North and South America, and investigates the paleontological, genetic, geological, and archaeological records for clues to the various peopling models and processes. As a counterpoint to the scientific approach, it also explores public arguments over the issue, to assess the socio-cultural and political repercussions of archaeological discoveries. Prerequisite: ANTH 150, ANTH 310, or permission of the instructor.

ANTH 605. Mortuary Practices in the Archaeological Record. 3 Credits.

Students study theories and methods of burial practices in the archaeological record. They learn about past communities; attitudes toward death and burial and how social organization, complexity, ideology, power, gender and age roles contribute to mortuary practices. The course examines a variety of Old and New World examples from different chronological periods through class presentations, debates and written assignments. The course focuses on comparisons and evaluation of traditional and current methods and approaches. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

ANTH 619. Field Concepts and Methods in Geoarchaeology. 3 Credits.

A field course taught during the three week summer session. Involves all-day excursions to different regions in order to introduce students to a variety of archaeological landscapes and environments. Focuses on the application of geoscientific concepts and methods in archaeological field investigations, emphasizing natural processes such as erosion, deposition, weathering, and biological and human activity that create and modify the archaeological record, and on soil-stratigraphic and geophysical approaches to landscape and site investigations.

ANTH 648. Human Osteology. 4 Credits. LFE

This course examines the structure and function of the human skeleton from an evolutionary and biomedical perspective. Students will learn to identify bones comprising the human skeleton and how osteological information aids in reconstructing sex, age, race, stature, and health status. Major transformations of the human skeleton from hominoid precursors, and some of the biomedical consequences of these transformations, will be addressed. (Same as BIOL 548.) Prerequisite: An introductory course in physical anthropology, biology, or permission of instructor.

ANTH 699. Anthropology in Museums. 3 Credits.

The course reviews the history of archeological, ethnographic, physical anthropological and other types of collections. It also considers current issues facing anthropologists, such as: contested rights to collections and the stories that accompany them; representation and interpretation of cultures; art and artifact; conceptualization, design and building of exhibitions; and anthropological research and education in the museum. (Same as MUSE 699.) Prerequisite: ANTH 150 or ANTH 108 or consent of instructor.

ANTH 701. History of Anthropology. 3 Credits.

Development of the field of anthropology and its relations with intellectual history. Emphasis on method and theory in historical context. Prerequisite: Consent of instructor or graduate standing.

ANTH 702. Current Archaeology. 3 Credits.

An introduction to fundamental theoretical orientations and methodological approaches in world archaeology. Case studies illustrate data acquisition, dating methods, culture history, paleoenvironmental models, and culture processes. Prerequisite: Consent of instructor or graduate standing.

ANTH 703. Current Biological Anthropology. 3 Credits.

The fundamental issues, methods, and theories in contemporary biological anthropology. Prerequisite: Consent of instructor or graduate standing.

ANTH 704. Current Cultural Anthropology. 3 Credits.

The fundamental issues, methods, and theories in contemporary cultural anthropology and anthropological linguistics. Prerequisite: Consent of instructor or graduate standing.

ANTH 707. Responsible Research and Scholarship in Anthropology. 3 Credits.

This course examines a range of issues critical to responsible research, scholarship, and practice in anthropology. Required for all doctoral students in Anthropology. Prerequisite: Graduate standing in anthropology or consent of instructor.

ANTH 741. Field Methods in Linguistic Description. 3 Credits.

The elicitation and analysis of phonological, grammatical, and discourse data from a language consultant. In-depth research on one language. Techniques of research design, methods of phonetic transcription, grammatical annotation, and analysis of language context. (Same as LING 741.) Prerequisite: LING 705 and LING 725 or consent of instructor.

ANTH 766. Topics in Biological Anthropology: _____. 3 Credits.

Topic for semester to be announced. Students may repeat the course for different topics. Prerequisite: Consent of instructor.

ANTH 770. Research Methods in Physical Anthropology. 3 Credits.

A practical course in the use of special laboratory techniques of biological anthropological research and methods of data presentation. Prerequisite: Consent of instructor.

ANTH 775. Seminar in Cultural Anthropology: _____. 3-9 Credits.

Intensive consideration of special problems in cultural anthropology. Topic for semester to be announced.

ANTH 777. Health & Human Rights: An Anthropological Approach. 3 Credits.

This course examines health and human rights through an anthropological lens, focusing on the intersections of political power, culture, and ethics. Emphasizing case studies from Latin America and the Amazon, students explore how global public health initiatives and transnational NGOs impact health outcomes, often influenced by historical trauma, violence, and metabolic syndrome. The course critically evaluates the legacies of colonialism on contemporary health disparities and human rights, while encouraging students to analyze visual representations of health and trauma using methodologies from visual anthropology. Through a combination of foundational readings, media analysis, and field-based case studies, students will gain the tools to address complex ethical challenges in cross-cultural health interventions and advocate for more just and effective global health practices. Prerequisite: ANTH 160, ANTH 360 or instructor permission.

ANTH 783. Doing Ethnography. 3 Credits.

Ethnography is both process and product. The product, a representation of a culture (or selected aspects of a culture), is based on fieldwork, the common term for the ethnographic process. This course explores how ethnographers prepare for the field, do their fieldwork, then report it.

ANTH 798. Introduction to Collections Management and Utilization. 3 Credits.

This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as AMS 730, BIOL 798, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student or consent of instructor.

ANTH 799. Museum Internship. 1-6 Credits.

Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as AMS 799, GEOL 723, and MUSE 799.)

ANTH 801. Proseminar I in Anthropology. 3 Credits.

This course is an introduction to graduate study in Anthropology at the University of Kansas. Students will be introduced to the history, theory, and current research in two subfields of Anthropology: archaeology and biological anthropology. Students will read foundational papers in these two fields in order to develop a framework for contextualizing more cutting-edge research by KU Anthropology faculty and other scholars. In addition, this course will provide professional development resources for graduate students with an overview of the resources available at KU to support their graduate studies, including internal and external funding sources, information about the design, ethics, and approval procedures for future research, peer review and advisor feedback on research proposals, integration into mentoring networks, and other activities focused on career and professional development. Graduate students will learn how to critically read academic papers, and begin to develop a proposal for their graduate research project.

ANTH 802. Proseminar II in Anthropology. 3 Credits.

This course continues graduate students' survey of the history and theory of each anthropological subfield with a focus on foundational readings in sociocultural and linguistic anthropology as well as current research by KU Anthropology faculty and scholars outside of the department. Students will continue to develop their professional skills by finishing their proposals for external funding, and presenting and critiquing each others' work. Students' finished proposals can form the foundation of their dissertation proposals, and all are encouraged to submit them for external funding.

ANTH 849. Seminar in Archaeology: _____. 2-4 Credits.

Subject matter of seminar to be announced for semester.

ANTH 851. Data Analysis in Archaeology: _____. 1-6 Credits.

A two-semester course designed to provide graduate students with basic principles in the analysis of archaeological data. Course content will include an introduction to archaeological systematics, analytical procedures, application of multivariate statistics, and computer applications. Topic for semester to be announced.

ANTH 853. Theory and Current Problems in Archaeology. 3 Credits.

Consideration of scientific methodology, basic assumptions of anthropological archaeology, relationship of archaeology and anthropology, and current theoretical and methodological trends in archaeology.

ANTH 876. Advanced Medical Anthropology: _____. 3-6 Credits.

This course provides advanced training in selected aspects of medical anthropology; the topic for a particular semester will reflect the current

interests of the instructor. It is expected that the course content will alternate between theoretical and applied emphases. May be repeated for a total of six hours credit. Prerequisite: Consent of instructor.

ANTH 889. Summer Archaeological Field Work. 1-8 Credits.

Under the direction of a professional archaeologist, undergraduate and graduate students are taught proper procedures for the excavation and laboratory analysis of data from a prehistoric or historic archaeological site. Data gathered may be used for additional graduate research. Enrollment by application; limited to twenty students. A fee for subsistence costs will be charged.

ANTH 895. Graduate Teaching in Anthropology. 1 Credits.

A course covering matters relating to pedagogy in anthropology. Topics covered will include current best practices for teaching, techniques to engage learners in inclusive communities of anthropological study, and specific matters arising from graduate students' experiences in teaching every week. Does not count toward coursework requirements for a graduate degree in anthropology. Required of all graduate teaching assistants assigned to courses in anthropology. Graded on a satisfactory/unsatisfactory basis. Prerequisite: A current GTA appointment in Anthropology.

ANTH 896. Graduate Research. 1-9 Credits.

Individual investigation of special problems in anthropology. Limit of six hours credit for the M.A. degree.

ANTH 897. Internship Research. 4-6 Credits.

Experiential learning in the application of anthropology through placement in business, government, community, research, or social service organization or agency. Students design and implement an anthropological project under faculty supervision. Prerequisite: Graduate standing in Anthropology.

ANTH 898. Internship Analysis. 1-6 Credits.

Experiential learning in the application of anthropology through placement in business, government, community, research, or social service organization or agency. This course is a sequel to ANTH 897. Students finish up any remaining research and deliver their findings to the client. They also prepare a written report and a verbal presentation for the Department of Anthropology. Prerequisite: ANTH 897 and Graduate standing in Anthropology.

ANTH 899. Master's Thesis. 1-12 Credits.

Limit of six hours credit for the M.A. degree. Graded on a satisfactory progress/limited progress/no progress basis.

ANTH 996. Graduate Research. 1-9 Credits.

Individual investigation of special problems in anthropology.

ANTH 999. Doctoral Dissertation. 1-12 Credits.

Dissertation hours. Graded on a satisfactory progress/limited progress/no progress basis.
