Master of Arts in Applied Behavioral Science

The Department of Applied Behavioral Science offers a curriculum through which students learn how to examine and address problems of social importance across the lifespan. Students receive training in the application of behavioral science to improve the human condition through prevention and intervention. The department’s master’s program in applied behavioral science satisfies coursework requirements for Board Certification in Behavior Analysis and, in most states, licensure as a behavior analyst.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (http://catalog.ku.edu/graduate-studies/) section of the online catalog.

Please consult the Departments & Programs (http://catalog.ku.edu/ liberal-arts-sciences/) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A. Program

For admission in the fall semester, the deadline to submit applications and supporting materials is December 15th. Later applications receive consideration in the order of their receipt. Students may be admitted for the spring semester, but there is no filing deadline.

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to regular graduate status in the program, a student must hold a bachelor’s degree with a cumulative 3.0 GPA.

For admission with full graduate standing, the department recommends that applicants complete 12 credit hours of undergraduate or graduate coursework in behavior analysis, behavioral science, psychology, education, or related fields, and 6 hours in experimental methods, research design, or statistics.

Among the department’s application materials is a list of the faculty members (http://absc.ku.edu/faculty/) and descriptions of their research, scholarly, and professional interests. Applicants should select any faculty members whose research interests match their own. These faculty members review the applicant’s materials. An applicant is accepted when one of the faculty members consent to admit the student. This faculty member becomes the advisor of record.

A full list of the required application materials can be found on the Graduate Admission (http://absc.ku.edu/graduate-admission/) page of our departmental website (http://absc.ku.edu/). (http://absc.ku.edu/)

Non-native speakers of English must meet English proficiency requirements as described here (http://graduate.ku.edu/english-proficiency-requirements/).

M.A. in Applied Behavioral Science

Degree Requirements

The master’s program trains highly competent scientist-practitioners in applied behavioral science. It requires course work on the basic principles and conceptual foundations of behavioral science and its research methods but emphasizes course work and training in applied and intervention research (e.g., assessment, analysis, intervention, evaluation). Its objective is to advance empirically based solutions to problems of individual and societal importance, both local and global.

The master’s program follows a junior-colleague model. Students work closely with their advisors and join them in many aspects of professional development. This includes designing and conducting research, preparing manuscripts for presentation and publication, presenting and publishing those manuscripts, and engaging in all facets of the responsible conduct of research. Students typically work with one advisor, but may work with other faculty members or have co-advisors. If a student’s or advisor’s interests change, students are free to change advisors.

The M.A. degree requires 30 credit hours: 18 hours in a practicum, and research and elective courses. Students also must conduct, write up, and orally defend an empirically based thesis. The following 6 courses are required:

1. Ethical, Legal, and Professional Issues (3). Instruction in ethical principles in the conduct of research (e.g., informed consent, data analysis), legal issues in professional conduct (e.g., plagiarism, copyright), and professional skills (e.g., journal reviewing, professional communication). ABSC 841
2. Principles of Behavior I (3). The science of behavior (e.g., observation, experimentation), laboratory methods, basic behavioral principles (e.g., reinforcement, stimulus control), and their applications (e.g., early childhood, disabilities). ABSC 861
3. Research Methods I (3). Strategies and tactics of scientific research (e.g., objectivity, empiricism), the logic of experimentation (e.g., validity, reliability), measurement and direct observation, and experimental designs for single-subject and time-series analyses. ABSC 735
4. Conceptual Foundations I (3). The history and philosophy of behavioral science, contemporary advances in basic research for application, the analysis of everyday behavior (e.g., cognition, emotion), and current issues in the discipline and the profession (e.g., relations between basic and applied research). ABSC 800
5. Applied Behavior Analysis I (3). The characteristics of applied behavioral research (assessment, analysis, intervention, evaluation), and intervention research (clinical, community), applied procedures and programs, social validity, and ethical issues. ABSC 746
6. Experimental Analysis of Behavior (3) ABSC 799
7. Research or Intervention Practicum (3). A supervised practicum course in either basic or applied research or behavioral interventions.

ABSC 876 Practicum in Community Development 1-6

This course work also satisfies 6 of the course requirements and the thesis requirement in the doctoral program.

Master’s students are required to present the results of their research at a department professional seminar meeting. The presentation is comparable to what would be presented at a professional conference. Students answer questions from their peers and the faculty in attendance.

M.A. in Applied Behavioral Science Degree Requirements

The online master’s program trains highly competent scientist-practitioners in applied behavioral science. It requires course work on the basic principles and conceptual foundations of behavioral science and its research methods but emphasizes course work and training in applied and intervention research (e.g., assessment, analysis, intervention, evaluation). Its objective is to advance empirically based solutions to problems of individual and societal importance, both local and global.

The online master’s program follows a junior-colleague model. Students work closely with their advisors and join them in many aspects of professional development. This includes designing and conducting research, preparing manuscripts for presentation and publication, presenting and publishing those manuscripts, and engaging in all facets of the responsible conduct of research. Students typically work with one advisor, but may work with other faculty members or have co-advisors. If a student’s or advisor’s interests change, students are free to change advisors.

The online M.A. degree requires a minimum of 30 credit hours: 18 hours in 6 content areas (required courses), 3 hours in a practicum, and research and elective courses. Students also must conduct, write up, and orally defend an empirically based thesis. The following 6 courses are required:

1. ABSC 850 Principles of Behavior Analysis (3). The science of behavior (e.g., observation, experimentation), laboratory methods, basic behavioral principles (e.g., reinforcement, stimulus control), and their applications (e.g., early childhood, disabilities).

2. ABSC 851 Ethical, Legal, and Professional Issues in Applied Behavioral Science (3). Instruction in ethical principles in the conduct of research (e.g., informed consent, data analysis), legal issues in professional conduct (e.g., plagiarism, copyright), and professional skills (e.g., journal reviewing, professional communication).

3. ABSC 854 Experimental Analysis of Behavior (3). The basic principles of operant and respondent conditioning in the context of basic non-human and human subjects research.

4. ABSC 770 Within Subjects Research Methodology and Direct Observation (3). Strategies and tactics of scientific research (e.g., objectivity, empiricism), the logic of experimentation (e.g., validity, reliability), measurement and direct observation, and experimental designs for single-subject and time-series analyses.

5. ABSC 771 Introduction to Applied Behavioral Science (3). The characteristics of applied behavioral research (assessment, analysis, intervention, evaluation), intervention research (clinical, community), applied procedures and programs, social validity, and ethical issues.

6. ABSC 772 Conceptual Foundations of Behavior Analysis (3). The history and philosophy of behavioral science, contemporary advances in basic research for application, the analysis of everyday behavior (e.g., cognition, emotion), and current issues in the discipline and the profession (e.g., relations between basic and applied research).

7. ABSC 871 or ABSC 872 Research or Intervention Practicum (3). A supervised practicum course in either basic or applied research or behavioral interventions.

Master’s students are required to present the results of their research at a department professional seminar meeting. The presentation is comparable to what would be presented at a professional conference. Students answer questions from their peers and the faculty in attendance. Completing this requirement necessitates traveling to the Lawrence campus and presenting in person.
