Bachelor of Science in Physics

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department's research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billionths of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse careers ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Undergraduate program in physics and astronomy

We welcome all students curious about the universe around them. This includes not only students planning on graduate study in STEM, but also students from other disciplines where a background in foundational physical science and critical thinking can be useful – examples include teaching and medicine – and anyone seeking to include astronomy and physics as part of their general education. The department offers BA degrees in astronomy and physics and BS degrees in astronomy, physics, and engineering physics; degrees in astronomy and physics are granted through the College of Liberal Arts and Sciences whereas engineering physics degrees are granted through the School of Engineering. The BS physics degree includes an interdisciplinary track that allows students to take elective courses in other STEM disciplines and a pre-medicine emphasis for students interested in health professions. We also offer minors in astronomy and physics and a certificate in astrophysics of origins. We involve our undergraduate majors in cutting-edge research practically from the day they join the department; research is a requirement of both the BS Astronomy and BS Physics degrees. The breadth of our research program affords our students exposure to a number of different fields and we are justifiably proud of our undergraduate researchers who routinely publish papers, attend conferences, and/or conduct research abroad (in locales such as Antarctica, Chile, and CERN).

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.S. Degree in Physics

Physics Bachelor of Science (B.S.) General Education Requirements

All students pursuing the Bachelor of Science in Physics must complete the KU Core requirements in addition to the degree and major requirements. For details regarding the Bachelor of Science in Physics, please see the KU Core section of the catalog.

Bachelor of Science in Physics

Advanced Mathematics
Vector Calculus. Satisfied by:
- MATH 127 Calculus III 4
  or MATH 147 Calculus III, Honors
Elementary Linear Algebra. Satisfied by:
- MATH 290 Elementary Linear Algebra 2-3
  or MATH 291 Elementary Linear Algebra, Honors
  or MATH 590 Linear Algebra
Differential Equations. Satisfied by:
- MATH 320 Elementary Differential Equations 3

Advanced Physics
Majors must complete a course in each of the following areas:
General Physics III. Satisfied by:
- PHSX 313 General Physics III 3
Intermediate Physics Lab. Satisfied by:
- PHSX 316 Intermediate Physics Laboratory I 1
Introductory Quantum Mechanics. Satisfied by:
- PHSX 511 Introductory Quantum Mechanics 3
Mechanics I. Satisfied by:
- PHSX 521 Mechanics I 3
Electricity and Magnetism. Satisfied by:
- PHSX 531 Electricity and Magnetism 3
Thermal Physics. Satisfied by:
- PHSX 671 Thermal Physics 3
Undergraduate Research or Honors Research. Satisfied by:
- PHSX 503 Undergraduate Research 1-4
  or PHSX 501 Honors Research
Required Electives (Majors must complete one of the following options, Preprofessional, Interdisciplinary, or Pre-Medicine)
- Preprofessional Option 26-27
  Computing and Programming. Satisfied by:
  - EECS 138 Introduction to Computing: ______
    or EECS 168 Programming I
    or EECS 169 Programming I: Honors
  Mechanics II. Satisfied by:
  - PHSX 621 Mechanics II
Electromagnetic Theory. Satisfied by:
- PHSX 631 Electromagnetic Theory
Quantum Mechanics. Satisfied by:
- PHSX 711 Quantum Mechanics I
Advanced Physics Labs. Satisfied by both of the following:
- PHSX 516 Physical Measurements
- PHSX 536 Electronic Circuit Measurement and Design
Physics Elective. Satisfied by any PHSX lecture or laboratory course numbered 500 or higher and not part of the other specific requirements for the major.
Math Elective. Satisfied by one of the following:
- MATH 558 Introductory Modern Algebra
- MATH 581 Numerical Methods
- MATH 590 Linear Algebra
- MATH 628 Mathematical Theory of Statistics
- MATH 646 Complex Variable and Applications
- MATH 647 Applied Partial Differential Equations
- MATH 648 Calculus of Variations and Integral Equations
- MATH 660 Geometry I
- MATH 661 Geometry II
- any 700-level MATH lecture course except MATH 701 and MATH 715

Interdisciplinary Option 25-30
Computing and Programming. Satisfied by:
- EECS 138 Introduction to Computing: ______
  or EECS 168 Programming I
  or EECS 169 Programming I: Honors
Advanced Physics Labs. Satisfied by one of the following:
- PHSX 516 Physical Measurements
- PHSX 536 Electronic Circuit Measurement and Design
Advanced Physics. Satisfied by two of the following:
- PHSX 621 Mechanics II
- PHSX 631 Electromagnetic Theory
- PHSX 711 Quantum Mechanics I
- PHSX 516 Physical Measurements
  1
- PHSX 536 Electronic Circuit Measurement and Design
  1
Physics Elective. Satisfied by any PHSX lecture or laboratory course numbered 500 or higher and not part of the other specific requirements for the major.
Math Elective. Satisfied by one of the following:
- PHSX 518 Mathematical Physics
- PHSX 718 Mathematical Methods in Physical Sciences
- MATH 526 Applied Mathematical Statistics I
- MATH 530 Mathematical Models
- MATH 558 Introductory Modern Algebra
- MATH 581 Numerical Methods
- MATH 590 Linear Algebra
- MATH 628 Mathematical Theory of Statistics
- MATH 646 Complex Variable and Applications
- MATH 647 Applied Partial Differential Equations
- MATH 648 Calculus of Variations and Integral Equations
- MATH 660 Geometry I
- MATH 661 Geometry II
  1
- any 700-level MATH lecture course except MATH 701 and MATH 715
Allied Science Fields. Satisfied by the completion of 2 advanced courses in 1 allied science field chosen from the following:
Biology. Satisfied by two of the following:
- BIOL 400 Fundamentals of Microbiology
- BIOL 412 Evolutionary Biology
- BIOL 416 Cell Structure and Function
- BIOL 595 Human Genetics
- BIOL 600 Introductory Biochemistry, Lectures
- BIOL 636 Biochemistry I
Physics Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Departmental Honors in Physics and Astronomy

Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate’s final semester, achieve a minimum GPA of 3.5 in the major, in all courses taken in residence and elsewhere; and (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 597, ASTR 503, PHSX 501 or PHSX 503. A grade of B or better must be earned in one of the following: ASTR 597, ASTR 503, PHSX 501 or PHSX 503. In addition, all our all of our department’s honors requirements include student research, for which results shall be presented in at least one of the following forms: (1) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript; (2) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline specific meeting); or (3) presentation of a poster at an appropriate venue. A student who plans to graduate with honors in physics and astronomy must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during his/her junior
year but in any case no later than enrollment for the final undergraduate semester.
