Bachelor of Science in Physics

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department's research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billionths of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse situations ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Undergraduate program in physics and astronomy

We welcome all students curious about the universe around them. This includes not only students planning on graduate study in STEM, but also students from other disciplines where a background in foundational physical science and critical thinking can be useful – teaching, medicine, e.g. – and anyone seeking to include astronomy and physics as part of their general education. The department offers BA degrees in astronomy and physics and BS degrees in astronomy, physics, and engineering physics; degrees in astronomy and physics are granted through the College of Liberal Arts and Sciences whereas engineering physics degrees are granted through the School of Engineering. The BS physics degree includes an interdisciplinary track that allows students to take elective courses in other STEM disciplines and a pre-medicine emphasis for students interested in health professions. We also offer minors in astronomy and physics and a certificate in astrophysics of origins. We involve our undergraduate majors in cutting-edge research practically from the day they join the department; research is a requirement of both the BS Astronomy and BS Physics degrees. The breadth of our research program affords our students exposure to a number of different fields and we are justifiably proud of our undergraduate researchers who routinely publish papers, attend conferences, and/or conduct research abroad (in Antarctica, Chile, CERN, e.g.).

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.S. Degree in Physics

Physics Bachelor of Science (B.S.) General Education Requirements

All students pursuing the Bachelor of Science in Physics must complete the KU Core requirements in addition to the degree and major requirements. For details regarding the KU Core requirements, please see the KU Core section of the catalog.

Foundational Physics and Mathematics (8.5)

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. All honors equivalents are also acceptable to fulfill PHSX major requirements. These hours do not contribute to the minimum number of hours required for the major.

Calculus I. Satisfied by:
MATH 125 Calculus I 4
or MATH 145 Calculus I, Honors

Calculus II. Satisfied by:
MATH 126 Calculus II 4
or MATH 146 Calculus II, Honors

Seminar in Physics, Astronomy, & Engineering Physics. Satisfied by:
PHSX 150 Seminar in Physics, Astronomy and Engineering Physics 0.5

General Physics I. Satisfied by one of the following:
PHSX 211 General Physics I
& PHSX 216 and General Physics I Laboratory
PHSX 213 General Physics I Honors

General Physics II. Satisfied by one of the following:
PHSX 212 General Physics II
& PHSX 236 and General Physics II Laboratory
PHSX 214 General Physics II Honors

General Science Requirements (8)

Foundations of Chemistry I. Satisfied by:
CHEM 130 General Chemistry I 5
or CHEM 150 Chemistry for Engineers
or CHEM 170 Chemistry for the Chemical Sciences I
or CHEM 190 Foundations of Chemistry I, Honors

Computing and Programming. Satisfied by:
Bachelor of Science in Physics

EECS 138  Introduction to Computing: ______ excluding Fortran or C++  3

or EECS 168  Programming I

Advanced Mathematics (9)

Vector Calculus. Satisfied by:

MATH 127  Calculus III  4

or MATH 147  Calculus III, Honors

Elementary Linear Algebra. Satisfied by:

MATH 290  Elementary Linear Algebra  2

or MATH 291  Elementary Linear Algebra, Honors

Applied Differential Equations. Satisfied by:

MATH 320  Elementary Differential Equations  3

Math Elective. Satisfied by one of the following: (3-4)  3-4

Advanced Physics (69-78)

Majors must complete a course in each of the following areas:

General Physics III. Satisfied by:

MATH 521  Mechanics I  3

Intermediate Physics Lab. Satisfied by:

MATH 531  Electricity and Magnetism  3

Introductory Quantum Mechanics. Satisfied by:

MATH 532  Introductory Quantum Mechanics  3

Mechanics I. Satisfied by:

MATH 533  Mechanics II  3

Electricity and Magnetism. Satisfied by:

MATH 534  Quantum Mechanics I  3

Thermal Physics. Satisfied by:

MATH 535  Thermal Physics  3

Undergraduate Research or Honors Research. Satisfied by:

MATH 536  Undergraduate Research  1-4

or MATH 501  Honors Research

Physics Elective. Satisfied by any PHSX lecture or laboratory course numbered 500 or higher and not part of the other specific requirements for the major.

Physics Required Electives (Majors must complete one of the following options, Preprofessional or Interdisciplinary)  16-19

Preprofessional Option  17

Majors choosing this option must complete 17 credit hours in advanced physics as follows:

Mechanics II. Satisfied by:

PHSX 621  Mechanics II

Electromagnetic Theory. Satisfied by:

PHSX 631  Electromagnetic Theory

Quantum Mechanics. Satisfied by:

PHSX 711  Quantum Mechanics I

Advanced Physics Labs. Satisfied by both of the following:

PHSX 516  Physical Measurements  1

PHSX 536  Electronic Circuit Measurement and Design  1

Interdisciplinary Option  16-19

Majors choosing this option must satisfy Advanced Physics Labs, Advanced Physics, and Allied Science Fields categories as follows:

Advanced Physics Labs. Satisfied by one of the following:

PHSX 516  Physical Measurements  1

PHSX 536  Electronic Circuit Measurement and Design  1

Advanced Physics. Satisfied by two of the following:

PHSX 621  Mechanics II

PHSX 631  Electromagnetic Theory

PHSX 711  Quantum Mechanics I

PHSX 516  Physical Measurements  1, 2

PHSX 536  Electronic Circuit Measurement and Design  1, 2

Allied Science Fields. Satisfied by the completion of 2 advanced courses in 1 allied science field chosen from the following:

Biology. Satisfied by two of the following:

BIOL 350  Principles of Genetics

BIOL 400  Fundamentals of Microbiology

BIOL 412  Evolutionary Biology

BIOL 416  Cell Structure and Function

BIOL 600  Introductory Biochemistry, Lectures

BIOL 636  Biochemistry I

BIOL 638  Biochemistry II

Chemistry. Satisfied by two of the following:

CHEM 598  Research Methods (UKanTeach students only)

CHEM 310  Fundamentals of Organic Chemistry

CHEM 530  Physical Chemistry I

Geology. Satisfied by two of the following:

GEOL 360  Field Investigation

GEOL 562  Structural Geology

GEOL 572  Geophysics

GEOL 575  Seismic Exploration

GEOL 576  Potential Fields Exploration

GEOL 577  Environmental Geophysics

1  Course not used to satisfy Core Knowledge and Skills requirement above.

2  This course will not count as one of the two Advanced Physics Courses if it has already counted toward the one required Advanced Physics Lab.
Physics Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 30 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Departmental Honors in Physics and Astronomy

Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate’s final semester, achieve a minimum GPA of 3.25 overall and 3.5 in the major, in all courses taken in residence and elsewhere; and (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 597, ASTR 503, PHSX 501 or PHSX 503. A grade of B or better must be earned in one of the following: ASTR 597, ASTR 503, PHSX 501 or PHSX 503. In addition, all of our department’s honors requirements include student research, for which results shall be presented in at least one of the following forms: (1) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript; (2) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline specific meeting); or (3) presentation of a poster at an appropriate venue. A student who plans to graduate with honors in physics and astronomy must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during his/her junior year but in any case no later than enrollment for the final undergraduate semester.
