

Biochemistry

The Department of Biochemistry and Molecular Biology is dedicated to the advancement of knowledge of living systems at the molecular level and expanding the knowledge base of molecular medicine.

BIOC 910. Topics in Biochemistry and Molecular Biology. 1-4 Credits.

Special studies in a selected area of interest. Assignments may involve scholarly activity such as reading, writing, or small group discussions.

Prerequisite: Permission of department chairperson.

BIOC 913. Research in Biochemistry and Molecular Biology for Medical Students. 1-8 Credits.

Selected research problems with emphasis on biochemistry and molecular biology. Offered in Modules I-XII. Prerequisite: Permission of department chairperson.
