Nursing and Interprofessional Certificate Programs

The School of Nursing offers Post-Master's Nursing Certificate programs in Advanced Practice and Interprofessional Certificates in Health Informatics (post-masters) and Health Professions Educator (post-baccalaureate). Select the program link below for detailed information on admission and certificate requirements.

Advanced Practice Post-Master’s Certificate Programs

The advanced practice clinical certificate programs require that applicants have completed an advanced practice registered nurse (APRN) educational program from a nationally accredited school of nursing. Applicants must also have completed the following advanced practice prerequisite courses, either as part of their previous graduate degree or as post-graduate study through an accredited university: advanced health assessment, advanced pathophysiology, advanced pharmacology, and health promotion.

The Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) Certificate (19 credit hours) is designed to provide APRNs who have a baseline preparation in primary care with an opportunity for additional training in acute care, as part of an interprofessional healthcare team. The curriculum includes core concepts of the advanced practice nursing role in acute care settings, expanded models of acute care, care transitions, and age-related considerations of the adult/gerontology patient in acute care. The role of the AGACNP may include episodic management of a patient in a clinical specialty unit, following a caseload of patients during a hospitalization, or caring for patients across the acute care continuum.

Required didactic courses are offered online. Practicum courses use on-campus, face-to-face clinical learning experiences, with clinical placement opportunities within the University of Kansas Health System. Simulation spaces on the KU Medical Center campus are used for skills training. Application deadline is April 1 for Summer semester.

The Adult-Gerontology Primary Care Nurse Practitioner Certificate (16 credit hours) focuses on the knowledge and skills required to educate advanced practice nurses to provide primary health care to a diverse population of adults. The Adult-Gerontology Primary Care nurse practitioner focuses on assessment and management of common acute and chronic health problems of adult and older adult patients in primary care settings. A variety of practice settings are used: primary care or internal medicine clinics; occupational health clinics; home based care; long-term, assisted living or post-acute care; rural health clinics; and other sites serving adults and older adults.

Required didactic courses are offered online. Practicum courses NRSG 903, NRSG 904 and NRSG 905 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams. Application deadline is June 1 for Fall semester.

The Family Nurse Practitioner Certificate (16 credit hours) focuses on the knowledge and skills required to educate advanced practice nurses to provide primary health care to clients and families across the lifespan. Family Nurse Practitioners provide comprehensive health promotion services to ambulatory clients; evaluate presenting problems at the client’s initial contact with the primary care system; and continuing care to clients with acute and stable chronic illnesses.

Required didactic courses are offered online. Practicum courses NRSG 916, NRSG 917 and NRSG 918 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams. Application deadline is June 1 for Fall semester.

The Psychiatric/Mental Health Nurse Practitioner Certificate (24 credit hours) prepares advanced practice nurses to diagnose and treat common mental health conditions in general medical settings and to deliver effective psychiatric care in mental health settings. Students are prepared to apply knowledge and skills in interpersonal, psychotherapeutic, and psychopharmacologic interventions for individuals, groups, and families with psychiatric disorders. All courses are online and offered in sequence every other year. Spring 2020 will begin the next available course sequence. Cost Information for this certificate is available through Title IV-Federal Student Financial Aid. The Occupational Information Network (O*NET) is a free online database that contains hundreds of occupational definitions to help students, job seekers, businesses and workforce development professionals to understand today's world of work in the United States. Click this O*Net link (https://www.onetonline.org/link/summary/29-1171.00?redir=29-1199.03) for information on Nurse Practitioner.

The Nurse-Midwifery Certificate (23 credit hours) prepares advanced practice nurses to focus on the care and management of well women's primary and reproductive health care needs throughout the life span. The program content is family-centered, respectful of individual and cultural variations, and promotes health through individual choice and participation. Courses are offered online and on the KU Medical Center campus. Cost information for this certificate is available through Title IV-Federal Student Financial Aid. The Occupational Information Network (O*NET) is a free online database that contains hundreds of occupational definitions to help students, job seekers, businesses and workforce development professionals to understand today's world of work in the United States. The application deadline is June 1, 2020.

Interprofessional Certificate Programs

The Health Informatics Certificate (19-20 credit hours) is designed to prepare clinicians and health care managers with skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. The graduate will be prepared for entry and mid-level positions within IT departments, advanced clinical departments, and as consultants and/or staff in organizations specializing in computer operations and knowledge management. This certificate program is open to applicants with graduate degrees (or pursuing graduate degrees) in any health-related discipline. All classes are offered online.

The Health Professions Educator Certificate (12 credit hours) is an interprofessional program that affords broad opportunities and necessary skills to develop healthcare education expertise in various roles within academic and clinical settings. Students complete applied teaching projects in each educator course, including a final student teaching capstone. Students may complete the Health Professions Educator
Certificate as a post-baccalaureate student with a health-related degree, as a post-graduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All required courses are online.
