A theory and practice class on the study of rivers and lagoons. It includes systematics of rivers, lagoons, and reservoirs. Course includes theory and field work to monitor physical (stream topography, flow, edge vegetation), chemical (nutrients, temperature, pH levels, dissolved oxygen), and biological (collecting and identification of aquatic insects) conditions in rivers. Taught in Golfito, Costa Rica. Contact Undergraduate Biology, or the Office of Study Abroad. Prerequisite: BIOL 150 or BIOL 151 and BIOL 152 or BIOL 153, or equivalent. Fall and spring semester courses are taught in Spanish; therefore, four semesters of Spanish are required. Summer courses are taught in English. LEC.

**BIOL 477. Ecology and Global Change. 3 Hours. N.**
Humans influence both natural and managed ecosystems. This course studies the effects of climate change, land-use change, and reductions in biodiversity on ecosystems. Emphasis is placed on how biological and physical processes may be perturbed by human influences. Topics include the greenhouse effect, species extinctions, human disease expansion, and the effects of global change on agricultural productivity. A combination of lectures and discussion address issues from a scientific basis and link these ecological issues to our everyday lives and society as a whole. Prerequisite: BIOL 152, BIOL 153, or equivalent, or permission of instructor. LEC.

**BIOL 480. Biology and Diversity of Parasites. 3 Hours. N.**
Introductory lecture course to the field of Parasitology. Provides basic knowledge about the morphology and biology of parasitic animals. Coverage includes a diversity of protozoan and metazoan groups parasitizing animals, including humans (e.g., malaria, amoebas, hookworms, tapeworms). Some emphasis is given to groups of parasites of particular medical and/or economic importance. Selected principles of parasitism are introduced. Prerequisite: BIOL 152 or BIOL 153, or permission of instructor. LEC.

**BIOL 481. Parasitology Laboratory. 1 Hour. U.**
Laboratory course in the study of protozoan and metazoan parasites of animal, including humans, emphasizing their diversity, classification, morphology, and identification. One three-hour laboratory each week. Prerequisite: Concurrent or prior enrollment in BIOL 480. LAB.

**BIOL 494. Introduction to Mammalogy. 3 Hours.**
A study of mammals, with emphasis on evolution, biogeography, systematics, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 152 or 153 or permission of instructor. LEC.

**BIOL 499. Introduction to Honors Research. 2 Hours. N.**
Intended for sophomores planning to enroll in the Biology Honors Program. Students interested in pursing Biology Honors discuss with Biology faculty members the rationale, methods, and interpretations of research being carried out in individual faculty labs to learn how scientific research is conducted. Prerequisite: At least 17 credit hours of college level natural sciences coursework or consent of instructor. LEC.

**BIOL 500. Biology of Insects. 3 Hours. N.**
Lectures and demonstrations providing an introduction to the study of insects, including general classification, structure, phylogeny, identification, development, physiology, behavior, ecology, and relations to human affairs. Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. LEC.

**BIOL 502. Laboratory in Insect Biology and Diversity. 2 Hours. U.**
Laboratory and field studies of insects, emphasizing their diversity, classification, ecological relationships, morphology, and behavior. Course provides practical application of principles covered in BIOL 500. Prerequisite: Concurrent or prior enrollment in BIOL 500 or the equivalent. LAB.

**BIOL 503. Immunology. 3 Hours. N.**
Lectures on the nature and mechanisms of natural and acquired resistance including humoral and cellular immunity. Characteristics of antigens and antibodies and of their interaction; ontogeny and cellular basis of immune responsiveness, hypersensitivity; specific immunologic tolerance. Not open to those with credit in BIOL 524. Prerequisite: BIOL 400 or BIOL 401, or consent of instructor. LEC.

**BIOL 504. Immunology Laboratory. 2 Hours. U.**
Laboratory designed to complement BIOL 503. Prerequisite: BIOL 503, or BIOL 503 concurrently. LAB.

**BIOL 505. Social Insects. 3 Hours. N.**
Lectures and laboratory demonstrations on presocial and social insects, specifically termites, ants, wasps, and bees. Emphasis will be placed on evolution of social behavior and the place of social insects in sociobiology. Prerequisite: BIOL 152, BIOL 153, or equivalent. LEC.

**BIOL 506. Pathogenic Microbiology. 3 Hours. N.**
Lectures. Characteristics and mechanisms of pathogenic microorganisms and disease processes. Elements of host-parasite interactions. Not open to freshmen or sophomores. Prerequisite: BIOL 503, or consent of instructor. LEC.

**BIOL 507. Pathogenic Microbiology Laboratory. 2 Hours. U.**
Laboratory to complement BIOL 506. Cultivation of pathogenic microorganisms, diagnostic procedures, and experiments to demonstrate various aspects of microbial pathogenicity and host responses. Prerequisite: BIOL 402 and BIOL 506 (or concurrent enrollment) or consent of instructor. LAB.

**BIOL 509. Biology of Spiders. 3 Hours. N.**
An introduction to the evolution, anatomy, physiology, behavior, and ecology of spiders and other arachnids. Special topics include the action of spider venoms; the composition and uses of silk; courtship
BIOL 510. Comparative Anatomy. 5 Hours. N.
Structure, function, and evolution of the vertebrates. Lectures and laboratory study. A course designed for zoologists. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 511. Biology of Spiders Laboratory. 1 Hour. U.
Topics will include comparative biology of arachnid orders (spiders, scorpions, harvestmen, mites, and others), external and internal anatomy of spiders, identification of common spider families and genera, and spider behavior. Students will be required to make a small collection (collect, preserve, and identify specimens). Prerequisite: BIOL 509; concurrent enrollment is preferred. LAB.

BIOL 512. General Virology. 3 Hours. N.
Lectures and discussions covering the basic nature and characteristics of viruses from a general biological point of view: viruses of bacteria, animals and plants, physical-chemical properties; host cell-viral interactions; modes of replication of DNA and RNA viruses, tumor viruses. Prerequisite: BIOL 400, BIOL 401 or consent of instructor. LEC.

BIOL 513. Virology Laboratory. 2 Hours. U.
Experiments involving cultivation, quantitation, and identification of animal viruses, continuous cell culture and primary chicken embryo culture techniques. Molecular biology techniques are used to demonstrate the steps in virus replication. The value of viruses as tools to understand normal cellular processes is emphasized in experiments which demonstrate the relative simplicity of viruses and the relative complexity of eukaryotic cells. Demonstrations include transformation of cells by tumor viruses and electron microscopy of virus particles. Prerequisite: BIOL 402 and BIOL 512, or consent of instructor. LAB.

BIOL 514. Principles of Ecology, Honors. 3 Hours. N.
Honors section of BIOL 414 for students with superior academic records. Course covers core concepts on the ecology of individuals, populations, communities, and ecosystems. Relative to BIOL 414, topics are presented in greater depth with increased student participation and stronger emphasis on the primary scientific literature. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. Open only to students admitted to the University Honors Program or by consent of instructor. LEC.

BIOL 516. Microbial Physiology. 3 Hours. N.
Elements of microbial physiology. Carbohydrate metabolism; enzymes and coenzymes; microbial nutrition; quantitative problems in microbial physiology; a survey of microbial metabolic types. Prerequisite: BIOL 400 or BIOL 612 and BIOL 402, and five hours of organic chemistry. LEC.

BIOL 517. Microbial Physiology Laboratory. 2 Hours. U.
Laboratory designed to complement BIOL 516. Prerequisite: BIOL 516, or BIOL 516 concurrently. LAB.

BIOL 518. Microbial Genetics. 3 Hours. N.
Bacteria and viruses as models of genetic systems. Mutagenesis and repair. Transformation, transductions, and recombination. Molecular biology of gene expression. Prerequisite: An introductory microbiology course. LEC.

BIOL 519. Microbial Genetics Laboratory. 2 Hours. U.
Laboratory designed to complement BIOL 518. Prerequisite: BIOL 402, BIOL 518, or BIOL 518 concurrently. LAB.

BIOL 520. Marine Biology. 3 Hours. N.
This introductory course covers biological, physical, and chemical ocean sciences, with an emphasis on ecological aspects. In addition to this Lawrence campus course, students may enroll for a supplementary 1 credit field trip class to a Caribbean coral reef island offered in December or January. Prerequisite: BIOL 414 or permission of the instructor. LEC.

BIOL 521. Insect Systematics. 4 Hours. N.
A study of the diversity of insects, including the classification of all living and fossil orders and the more common families primarily on the basis of external morphology. The biology, ecology, phylogeny, and geological history of each order is covered. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 525. Aquatic Entomology. 4 Hours. N.
Designed to enable students to develop skill in the area of identification of aquatic insects and to gain a detailed comprehension of their community structure and dynamics. The external morphology of all aquatic orders is covered, followed by consideration of specific physiological and behavioral adaptations that facilitate an aquatic existence. Includes both lectures and laboratory exercises. Requirements include making a collection of aquatic insects. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 414 or BIOL 500. LEC.

BIOL 526. Insect Physiology and Internal Morphology. 3 Hours. N.
Mechanisms and integration of the internal life-supporting systems of insects, emphasizing the interdependence of structure and function. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 408 and BIOL 500, or permission of instructor. LEC.

BIOL 528. External Morphology of Insects. 4 Hours. N.
A study of external structure common to all insect orders, with detailed comparative laboratory studies of representative species. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 529. Immature Insects. 3 Hours. N.
The classification, structure, and ecological distribution of immature insects, especially larvae of Holometabola. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 502 or permission of instructor. LEC.

BIOL 533. Biology of Fungi. 4 Hours. N.
A study of the major groups of fungi from slime molds to mushrooms. Emphasis on their activities in natural substrates, isolation techniques, parasitic and mutualistic relationships with other organisms, uses in research, industrial applications, production of mycotoxins and poisons, and physiological, genetic and reproductive behavior. Lectures, laboratory, and field trips. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 536. Cell Structure and Function (Honors). 3 Hours. N.
BIOL 536 is the honors version of BIOL 416. Completion of this class will satisfy the BIOL 416 requirement. Open to students in the Honors program or by permission of instructor. Prerequisite: BIOL 350 or consent of instructor. LEC.

BIOL 540. General Invertebrate Zoology. 4 Hours. N.
Phylogeny, physiology, and embryology; evolutionary processes; characteristics of major ecological groupings. Laboratory will consider
major taxonomic categories with emphasis on functional morphology and its evolutionary modifications. Prerequisite: BIOL 152 or BIOL 153. LEC.

BIOL 545. Evolution of Development. 5 Hours. N.
An advanced course designed to expose students to evolutionary change in the developmental patterning of plant and animal form. This course includes a lecture component and a laboratory component to integrate multiple biological disciplines including comparative morphology, molecular evolution, developmental genetics and experimental development, to explore biodiversity at a mechanistic level. Lectures are designed to give students background on topics ranging from homology assessment to empirical examples of how changes in gene expression or function may have shaped morphological diversity. The laboratory complements these topics through observations of normal development in a diversity of plant and animal model organisms, and through conducting independent research experiments. Prerequisite: BIOL 350 or equivalent. LEC.

BIOL 555. General Plant Physiology. 3 Hours. N.
The principal physiological processes of higher plants including photosynthesis, respiration, water relations, mineral nutrition, and factors associated with morphogenesis. Prerequisite: BIOL 408 or consent of instructor. LEC.

BIOL 560. Histology. 3 Hours. N.
Study of detailed microscopic anatomy of cells, tissues, and organs of mammals. Examples are drawn from normal and abnormal tissue, histochemistry, and electron microscopy. Lecture and demonstrations. A course in anatomy and physiology is highly recommended. Prerequisite: BIOL 152 or BIOL 153. LEC.

BIOL 570. Introduction to Biostatistics. 3 Hours. N.
Statistical concepts related to biological problems. Topics include the scientific method, data representation, descriptive statistics, elementary probability distributions, estimation and hypothesis testing, emphasizing the analysis of variation. Prerequisite: College algebra and ten hours of natural science. LEC.

BIOL 571. Introduction to Biostatistics Laboratory. 2 Hours. U.
Introductory statistical analyses on microcomputers. Data entry and export; simple graphs and exploratory data analysis; descriptive statistics; sampling; point and interval estimation; one and two sample t-tests; Chi-square; regression and correlation; analysis of variance; and nonparametric methods. Prerequisite: BIOL 570 or equivalent (may be taken concurrently). LAB.

BIOL 582. Principles of Biogeography. 3 Hours. N.
An introduction to the study of the distribution of life on earth. Covers geographical patterns of species diversity and the processes that give rise to those patterns: speciation, extinction, dispersal, vicariance, continental drift, ecological interactions, and phylogeny. Topics are presented within the framework of evolutionary history and include discussion of the biology of species on islands, terrestrial biomes, altitudinal zonation of species, latitudinal species gradients, historical factors governing species distributions, macroevolutionary trends in the fossil record, and application of modern molecular techniques for testing biogeographical hypotheses. Prerequisite: BIOL 152 or 153 and past or concurrent enrollment in BIOL 412, 413, 414, or 550; or permission of Instructor. LEC.

BIOL 583. Herpetology. 3 Hours. N.
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematics, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion, thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry. LEC.

BIOL 592. Ichthyology. 4 Hours. N.
A study of fishes. Lecture topics include the structure and adaptations of fishes to the aquatic environment and a survey of major fish groups with emphasis on their evolution and biogeography. Laboratory topics include a survey of fish diversity using specimens and the use of keys to identify fishes, with emphasis on the Kansas fish fauna. This course meets with BIOL 792. Students taking this course at the 700 level will have additional work required of them. Prerequisite: BIOL 152 and/or BIOL 413. LEC.

BIOL 593. Ornithology. 3 Hours. N.
A lecture and laboratory course on the biology, evolution, and diversity of birds. Prerequisite: BIOL 412 (or BIOL 413), or permission of instructor. LEC.

BIOL 594. Forest Ecosystems. 3 Hours.
Students learn basic concepts of forest productivity, forest water relations, forest hydrology, nutrient cycling, through soils and vegetation, nutrient uptake, carbon cycling, decomposition, linkages to aquatic ecosystems, and agents of disturbance to these cycles. The class spends a significant part of the semester exploring forest soil profiles and the challenges they present to different forest ecosystems. We discuss the function of forested ecosystems in a global context and identify and understand smaller-scale processes that drive forest function. Prerequisite: CHEM 135 or CHEM 195 or CHEM 175, and BIOL 414. LEC.

BIOL 595. Human Genetics. 3 Hours. N.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: BIOL 350. LEC.

BIOL 598. Research Methods. 3 Hours. N.
An introduction for pre-service teachers to the tools used by scientists to solve scientific problems. Topics include design of experiments and interpretation of their results, use of statistics, mathematical modeling, laboratory safety, ethical treatment of human subjects, writing scientific papers, giving oral presentations, and obtaining data from the scientific literature. Open only to students in the UKanTeach program. LEC.

BIOL 599. Senior Seminar: ______. 1 Hour. AE61 / N.
A synthesis and discussion of current trends in a discipline related to one of the degrees offered in the biological sciences. Emphasis is placed on providing seniors with an appreciation of the discipline’s state-of-the-art and on developing skills for success in the next stage of a career in the biological sciences. Topics depend on the associated degree program. Prerequisite: Must be taken in the final year of a degree and students must have completed most of the course work required for one of the degrees in the biological sciences. LEC.

BIOL 600. Introductory Biochemistry, Lectures. 3 Hours. N.
Designed to offer the essentials of the chemistry of the constituents of living organisms and the changes these constituents undergo (during life processes) in the human body and other living forms. Prerequisite: BIOL 150 or BIOL 151 and one semester of organic chemistry. LEC.

BIOL 601. Principles of Biochemistry Laboratory. 2 Hours.
Theory and methods in the development of protein separation and purification, enzyme structure/function, and enzyme kinetics derived from primary literature searches and readings. Prerequisite or Co-requisite: BIOL 600; or consent of instructor. LAB.

BIOL 602. Plant Ecology. 3 Hours. N.
Introduction to basic concepts, focused at community and species level. Architectural ecomorphology of plants and their physiological responses to physical factors: solar radiation, climate, and soils. Plant succession
as an interaction among species differing in ecomorphology and life style. Classification and ordination of plant communities: practice and theory. Other topics include: species diversity and lognormal distribution as to abundance classes; species/area relations and theory of island biogeography; allelochemic defenses; genealogy; paleoecology. Prerequisite: BIOL 414 or consent of instructor. Concurrent enrollment in parallel laboratory, BIOL 607, recommended. LEC.

BIOL 603. Systematic Botany. 3 Hours. N.
A lecture/laboratory course providing hands-on experience with plant identification, a history of plant classification, the principles of nomenclature and character analysis, the basics of systematics theory, and a phylogenically-oriented introduction to vascular plant diversity. Prerequisite: BIOL 413 or equivalent. LEC.

BIOL 606. Ecological Plant Physiology. 3 Hours. N.
Physiological responses of higher plants to environmental factors are discussed. Major topics are: water relations, heat transfer, resistance to water and temperature stress, dormancy, photoperiodism, photosynthesis and respiration under natural conditions, and effects of environmental pollution. Prerequisite: BIOL 408 or consent of instructor. LEC.

BIOL 607. Field and Laboratory Exercises in Plant Ecology. 2 Hours. U.
Introduction to quantitative analysis of plant communities and correlated environmental parameters; field and/or laboratory measurements of ecophysiological traits and comparative ecomorphology of principal species. Prerequisite: BIOL 414. Concurrent enrollment in parallel lecture, BIOL 602, recommended, but not required. LAB.

BIOL 609. Current Progress in Microbiology. 1 Hour. U.
A seminar course which will focus on current research in microbiology. A term paper will be required of each student. May be repeated for credit. Required of all majors in the senior year. Prerequisite: Two courses in microbiology. LEC.

BIOL 611. Molecular Systematics and Evolution. 4 Hours. N.
An introduction to the use of molecular data in systematics and population biology. Topics include: evolution of genes and proteins; properties of mitochondrial DNA, chloroplast DNA, ribosomal RNA genes, protein-coding genes, and repetitive DNAs; laboratory methods for data collection; and data analysis. Prerequisite: BIOL 350. BIOL 550 or equivalent is recommended. LEC.

BIOL 612. Fundamentals of Microbiology. 3 Hours. NB / N.
Lectures. Fundamental principles of microbiology with emphasis in physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics; pathogenesis and immunity, industrially important microorganisms. Meets with BIOL 400, but students will be given additional and more advanced assignments, and will carry higher expectations. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of instructor. LEC.

BIOL 613. Biology of Honeybees. 3 Hours. N.
Social organization, evolution, behavior, morphology, communication, pollination biology, and ecology of honeybees. Experience will be gained with colony dynamics and behavior while working with bees in the field. Prerequisite: BIOL 152, BIOL 153, or consent of instructor. LEC.

BIOL 616. Medical Entomology. 3 Hours. N.
A study of the major human diseases transmitted by arthropods with emphasis on the biology and ecology of vectors, vector feeding mechanisms as related to disease transmission, epidemiology of arthropod-borne diseases, and the impact of arthropod-borne diseases on humans. Laboratory work on recognition of vector species, information sources, and use of taxonomic keys. Prerequisite: BIOL 152 or BIOL 153 and a course in microbiology or consent of instructor. LEC.

BIOL 622. Paleontology. 3 Hours. N.
A study of the structure and evolution of ancient life; the nature and diversity of life through time; the interactions of ancient organisms with their environments and the information that the study of fossils provides about ancient environments; the use of fossils to determine the ages of rocks and the timing of past events in earth history; and the patterns of extinction through time. (Same as GEOL 521.) Prerequisite: BIOL 100, BIOL 101, BIOL 152, BIOL 153, GEOL 105, or GEOL 304. LEC.

BIOL 623. Paleontology Laboratory. 1 Hour. U.
Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as GEOL 523.) LAB.

BIOL 625. Behavioral Ecology and Sociobiology. 3 Hours. N.
The role of natural selection in animal behavior, and the influence of behavior on population biology and social dynamics of animal species. Topics include: game theory and optimization as applied to animal behavior; altruism, cooperation and competition; kin recognition and interactions; group formation and dynamics, dominance, aggression, and territoriality; feeding strategies; reproductive behavior including mate choice, parental care, and mating systems. Prerequisite: BIOL 152; either BIOL 350, BIOL 412 or BIOL 414 recommended; or consent of instructor. LEC.

BIOL 630. Conservation and Wildlife Biology. 3 Hours. N.
Examination of the concepts and processes involved in conservation of plant and animal populations and communities. Topics to be covered include conservation of endangered species, problems with invasions of exotic species and habitat fragmentation, wildlife management, and design of nature reserves. Prerequisite: BIOL 414, BIOL 412 strongly recommended. LEC.

BIOL 636. Biochemistry I. 3 Hours. N.
First semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the physical structure of macromolecules and membranes, enzyme structure/function, and enzyme kinetics. Prerequisite: CHEM 335 or consent of instructor. LEC.

BIOL 637. Introductory Biochemistry Laboratory. 2 Hours. U.
The laboratory portion of BIOL 600 or 636. Experiments have been selected to introduce the student to cell constituents and biochemical reactions. One four-hour laboratory and one-hour lecture each week. Prerequisite: BIOL 600 or BIOL 636, or concurrent enrollment. LAB.

BIOL 638. Biochemistry II. 3 Hours. N.
Second semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the metabolism of carbohydrates, lipids, amino acids, proteins, and nucleic acids. Prerequisite: BIOL 636. LEC.

BIOL 639. Advanced Biochemistry Laboratory. 2 Hours. U.
The laboratory portion of BIOL 638. One four-hour laboratory and a one-hour lecture each week. Experiments have been selected to familiarize students with experimental biochemical techniques using state-of-the-art methodology. Prerequisite: BIOL 637 and 638 (BIOL 638 may be taken concurrently). LAB.

BIOL 640. The Biology and Evolution of Fossil Plants. 3 Hours. N.
A lecture course in which fossil plants, protists and fungi are examined throughout geologic time. Emphasis will be directed at paleoecology, biogeography and the stratigraphic distribution and composition of ancient floras. (Same as GEOL 528.) Prerequisite: BIOL 413 or permission of instructor. LEC.
BIOL 641. Laboratory in Paleobotany. 1 Hour. U.
An examination of selected fossil plants throughout geological time and the techniques used to study them; laboratory will include identification and the use of plant fossils in biostratigraphy. (Same as GEOL 529.) Prerequisite: BIOL 413 or permission of instructor. Must be taken concurrently with BIOL 640. LAB.

BIOL 644. Comparative Animal Physiology. 3 Hours. N.
Lecture and discussion of the basic mechanism of organic maintenance and integration; a comparative treatment of the uniformities and diversity of animal function; emphasis on environmental adaptations and evolutionary relationships. Prerequisite: BIOL 152 or BIOL 153, and a course in organic chemistry, or consent of instructor. A college physics course is recommended but not required. LEC.

BIOL 646. Mammalian Physiology. 4 Hours. N.
Lectures and demonstrations. An intermediate course in the functions, mechanisms and interactions of mammalian organ systems. Discussions span topics from molecular to whole animal functions. Required for pharmacy students and strongly recommended for students planning advanced work in any area of physiology. The student is assumed to have the knowledge and ability to utilize their math and science background. Prerequisite: Five hours of organic chemistry, a course of college physics. LEC.

BIOL 647. Mammalian Physiology Laboratory. 2 Hours. U.
Laboratory experiments in representative areas of mammalian physiology designed to complement BIOL 646. Not open to students with credit in BIOL 247. Prerequisite or Co-requisite: BIOL 646. LAB.

BIOL 648. Systematics and Macroevolution. 3 Hours. N.
An introduction to the theory of macroevolution and the fundamental principles of systematics. Intended for students planning to pursue advanced studies in organismal biology, evolution, and/or systematics. Topics in macroevolution will include hierarchy theory, species concepts, speciation and species selection. Methods of phylogenetic estimation will be discussed and include parsimony, Maximum likelihood and Bayesian inference. Evolutionary studies utilizing phylogenies including tests of homology, studies of character evolution, and biogeography will be discussed. An overview of classification and nomenclature will also be provided. Prerequisite: BIOL 412 or equivalent. LEC.

BIOL 650. Advanced Neurobiology. 3 Hours. N.
The course builds an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor. LEC.

BIOL 652. Comparative Animal Behavior. 3 Hours. N.
A comparative analysis of behavior as an adaptive mechanism; emphasis on ontogenetic and evolutionary aspects of behavior. Prerequisite: BIOL 152 or BIOL 153; and BIOL 412. Alternatively, BIOL 412 may be taken as a corequisite. LEC.

BIOL 654. Comparative Animal Behavior, Laboratory. 1 Hour. U.
Laboratory and field phase of BIOL 652. Students may elect sections according to their special interests. Prerequisite: Prior or concurrent enrollment in BIOL 652. LAB.

BIOL 655. Behavioral Genetics. 3 Hours. N.
A survey of behavioral genetics in animals and humans. Emphasis is on how the methods and theories of quantitative, population and molecular genetics can be applied to individual and group differences in animals. Behaviors covered may include circadian rhythms, foraging, courtship, learning and memory, anxiety, social structures and human behaviors. Prerequisite: BIOL 350 or consent of instructor. LEC.

BIOL 656. Ecosystem Ecology. 3 Hours. N.
An introduction to the patterns and processes that affect terrestrial ecosystems. Emphasis is placed on understanding nutrient cycles (e.g., carbon nitrogen phosphorous), hydrologic cycles, and patterns of net primary productivity. The role of both natural and anthropogenic disturbances in structuring terrestrial ecosystems is examined in the context of global land-use patterns. Discussion of current research literature will be expected. (Same as EVRN 656.) Prerequisite: BIOL 414 and CHEM 130. LEC.

BIOL 661. Ecology of Rivers and Lakes. 3 Hours. N.
Study of the ecology and structure of creeks, rivers, ponds, lakes, and wetlands as well as some of the major human impacts. Prerequisite: One year of biology or permission of the instructor. BIOL 414 recommended. LEC.

BIOL 662. Aquatic Ecology Laboratory. 2 Hours. U.
A field and laboratory course introducing biological, physical, and chemical characteristics of lentic (ponds and lakes) and lotic (creeks and rivers) habitats. Students learn sampling and monitoring techniques and how to classify aquatic biota at higher taxonomic levels. Co- or prerequisite: CHEM 130 or CHEM 190 or CHEM 170, and BIOL 661. LAB.

BIOL 664. Vertebrate Biology. 3 Hours. N.
A laboratory course emphasizing principles of systematics and identification and the behavioral ecology of local vertebrate animals. Prerequisite: BIOL 152, BIOL 153 or consent of instructor. LAB.

BIOL 667. Chemical Communication in Sex, Feeding, and Fighting. 3 Hours. N.
The course focuses on the role of chemical information molecules in the interrelationships among organisms, with particular attention to interactions (a) within and between animal species, (b) within and between plant species, (c) between animals and plants, (d) between predators and prey, and (e) between parasites and hosts. Prerequisite: BIOL 100 or BIOL 101 or BIOL 152 or BIOL 153 or consent of instructor. LEC.

BIOL 668. Evolutionary Ecology. 3 Hours. N.
Emphasis will be on the themes that interface ecology and evolutionary studies. Topics will include selection theory; reproductive, foraging, and sex allocation problems; coevolution; patterns or morphological and behavioral adaptations; competition, predation, and population regulation. Special attention will be given to the philosophy and practice of resolving unanswered questions in evolutionary ecology. Prerequisite: BIOL 412 or permission of instructor. LEC.

BIOL 669. Biology of Freshwater Invertebrates. 3 Hours. N.
A lecture, field, and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in lotic and lentic habitats. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Prerequisite: BIOL 540, BIOL 660, BIOL 661, or BIOL 663, or permission of instructor. LEC.

BIOL 672. Gene Expression. 3 Hours. N.
A study of the structure and expression of genes in prokaryotes and eukaryotes. Emphasis on the mechanisms of DNA, RNA, and protein
biosynthesis. Prerequisite: A course in biochemistry or consent of instructor. LEC.

BIOL 673. Cellular and Molecular Neurobiology. 3 Hours.
Mechanisms of neural function and development will be considered at the cellular and molecular levels. Synaptic mechanisms of learning and memory, modulation of transmitter release, and the molecular basis of neurodegenerative disorders will also be discussed. Prerequisite: BIOL 435, BIOL 646, or permission of instructor. LEC.

BIOL 676. Mammalian Neuroanatomy. 3 Hours. N.
Lectures, video tape demonstrations, and laboratory dissection of mammalian nervous system with some attention to human material. Major emphasis on nervous system structure as it relates to function. For neurobiology and pre-health science majors. Prerequisite or Corequisite: A course in neurobiology (BIOL 435, BIOL 650), or permission of the instructor. LAB.

BIOL 688. The Molecular Biology of Cancer. 3 Hours. N.
The basic concepts of molecular biology are examined and used to probe the process by which a normal cell becomes a cancer cell. The course investigates DNA damage and repair, chemical carcinogenesis, gene cloning and manipulation, the control of gene expression in eukaryotes, viral viruses, the roles of oncogenes and tumor suppressor genes in carcinogenesis, and cancer therapy. Prerequisite: BIOL 350 and BIOL 416; or BIOL 536, or consent of instructor. LEC.

BIOL 694. The Art of Becoming a Professional Scientist. 3 Hours. N.
Discusses aspects of graduate education that are directed at students entering graduate school and that focus on how to be successful in the post PhD phases of a career, but that must be initiated early in the graduate student program of study. One three hour discussion per week. Senior standing and planning on entering graduate school. LEC.

BIOL 695. Animal Communication and Sensory Ecology. 3 Hours. N.
Lectures and discussion sessions. A study of the propagation and perception of olfactory, acoustic, and visual signals produced by animals in the context of communication. Both physiological and evolutionary perspectives will be treated. Prerequisite: A course in behavior or consent of instructor. LEC.

BIOL 699. Biology Honors Research Colloquium. 1 Hour. AE61 / U.
Students pursuing Honors in Biology will meet weekly to discuss, both formally and informally, their honors research. Background information and experimental approaches of the research will be examined and critiqued. Prerequisite: Enrollment in Biology Honors program and consent of instructor. LEC.

BIOL 700. Conservation Principles and Practices. 3 Hours.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 701. Topics in: ____. 1-3 Hours.
Advanced courses on special topics in biology, given as need arises. Lectures, discussions, readings, laboratory, or field work. Students may select sections according to their special interests. LEC.

BIOL 702. Laboratory Practice: Radiation Safety Procedures. 0.75 Hours.
An introduction to the basic properties of radioisotopes, and the fundamental safety practices needed for the safe use of low levels of radioactive materials. Risks associated with radiation exposures and applicable state and federal regulations are discussed. (Normally the content of the first ten hours of BIOL 703.) Prerequisite: Senior standing in one of the sciences. LAB.

BIOL 703. Radioisotopes and Radiation Safety in Research. 1.25 Hour.
An introduction to the properties of radioactive materials, radiations, and their interaction with matter, methods of radiation detection and measurement, protective measures, applicable state and federal regulations, design and implementation of safety management systems in the research laboratory, design of tracer experiments, and the risks associated with radiation exposure. Prerequisite: BIOL 702 or concurrent enrollment in BIOL 702, algebra and two semesters of either physics or chemistry. LEC.

BIOL 704. Research Animal Methods. 3 Hours.
Lectures, discussions, and laboratory sessions. Selection of proper animal models for specific research studies. Various external influences that alter research data. Routine techniques including restraint, sample collection, injection, anesthesia and euthanasia. Prevention and handling of common research animal problems or diseases. Proper and humane animal care as defined by the Federal Animal Welfare Act. Prerequisite: Senior or graduate standing in one of the biological sciences or permission of instructor. LEC.

BIOL 706. Current Trends in Curation and Collection Management. 2 Hours.
Seminar course to provide students with a working knowledge of the primary issues and current trends in building, administration, and care of scientific collections. Topics include permits, collecting, accessioning, cataloging, preservation, preventive conservation, and access to collections and data. The course format consists of readings, lectures, guest speakers, discussions, and visits to scientific collections on campus. (Same as MUSE 710.) LEC.

BIOL 708. External Morphology of Insects. 4 Hours.
A study of external structure common to all insect orders, with detailed comparative laboratory studies of representative species. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 709. Immature Insects. 3 Hours.
The classification, structure, and ecological distribution of immature insects, especially larvae of Holometabola. Includes both lectures and laboratories. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 502 or consent of instructor. LEC.

BIOL 710. Insect Development. 3 Hours.
A study of the embryonic and postembryonic development of insects. Emphasis is placed on developmental physiology of the early embryonic stages, the morphogenesis of organ systems, and the action of hormones in postembryonic development. Laboratory includes demonstrations and histological and experimental work. Prerequisite: Consent of instructor or BIOL 500. LEC.

BIOL 711. Insect Systematics. 4 Hours. N.
A study of the diversity of insects, including the classification of all living and fossil orders and the more common families primarily on the basis of external morphology. The biology, ecology, phylogeny, and
BIOL 518 and MCRB 510. Graduate students will be assigned additional biology of gene expression. This course is the graduate-level section of repair. Transformation, transductions, and recombination. Molecular Bacteria and viruses as models of genetic systems. Mutagenesis and instructor. LEC.

Prerequisite: Upper division or graduate standing and permission of given to preparation of photographs for publication and oral presentations. Attention and poster presentations. Emphasis on basic drafting and layout skills, preparation of illustrations for scientific publications, theses, and oral and written interpretation. Modern instrumentation, including use of computer-aided analysis of images as well as conventional photographic techniques will be included. Prerequisite: BIOL 418 or BIOL 408 and BIOL 510, or permission of instructor. LEC.

BIOL 720. Scientific Illustration. 3 Hours.
Lectures, demonstrations, and studio participation. Instruction in the preparation of illustrations for scientific publications, theses, and oral and poster presentations. Emphasis on basic drafting and layout skills, and pen and ink and tone renderings intended for publication. Attention given to preparation of photographs for publication and oral presentations. Instruction provided in use of specialized optical equipment for drawing. Prerequisite: Upper division or graduate standing and permission of instructor. LEC.

BIOL 721. Microbial Genetics. 3 Hours.
Bacteria and viruses as models of genetic systems. Mutagenesis and repair. Transformation, transductions, and recombination. Molecular biology of gene expression. This course is the graduate-level section of BIOL 518 and MCRB 510. Graduate students will be assigned additional and more advanced studies. Prerequisite: An introductory microbiology course or permission of instructor. LEC.

BIOL 725. Aquatic Entomology. 4 Hours.
Identification of aquatic insects and detailed study of their community structure and dynamics. The external morphology of all aquatic orders will be covered, followed by consideration of specific physiological and behavioral adaptations that facilitate an aquatic existence. Includes both lectures and laboratory exercises. Requirements include making a collection of aquatic insects. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 414 or BIOL 500 or permission of instructor. LEC.

BIOL 746. Principles of Systematics. 4 Hours.
Lectures: historical and philosophical foundations of modern systematics; theory and practice of classifications; character analysis; phylogeny reconstruction; formulation and testing of systematic hypotheses; species concepts and speculation; the interface between systematics and evolutionary theory, particularly the origins of asymmetric diversity patterns, macroevolution, adaptation, coevolution, and the evolution of higher taxa; roles of paleontological, ontogenetic, biochemical, and molecular data in systematics; and biogeography. Laboratory work: practical applications of nomenclature, development of keys, descriptions and systematic revisions, character analysis, phylogeny reconstruction, hypothesis testing, interpretation of biogeographic patterns. (Three hours lecture and two hours laboratory per week.) Prerequisite: BIOL 628 or equivalent. Intended for graduate students planning to specialize in systematics. LEC.

BIOL 747. Quantitative Genetics. 3 Hours.
A discussion of genetic traits for which individual gene differences do not separate a population into qualitatively distinct groups. Includes the estimation of heritability, genetic determination, and number of loci, and a study of selection theory. Prerequisite: BIOL 404 or BIOL 412 or equivalent and a course in statistics. LEC.

BIOL 749. Topics in Stable Isotopes in the Natural Sciences: 2-3 Hours.
Isotopic compositions of substances provide powerful insights into many topics in the natural sciences. Applications of isotopic analyses of carbon, hydrogen, oxygen, and nitrogen to selected research topics such as plant resource use, food web analysis, paleoecology, paleoecological reconstruction, hydrology, and soil genesis will be examined. Knowledge of isotope
Chemistry is not required. (Concepts necessary to understand pertinent articles will be taught during the first class meetings.) May be repeated. (Same as GEOG 749.) LEC.

**Biol 750. Advanced Biochemistry. 3 Hours.**
The structures and dynamics of proteins and nucleic acids will be developed in terms of well-understood examples which will also be used to discuss the function of major classes of proteins. The application of structural and dynamical principles to biological membranes and their function will also be discussed. Prerequisite: BIOL 807 and BIOL 808, a general biochemistry course, or permission of instructor. LEC.

**Biol 751. Plant Communities of North America. 3 Hours.**
Physiognomic and floristic analysis of the vegetation, with emphasis on the Southwest; distribution of communities in relation to climate, substratum, and disturbance; recognition of dominant elements of vegetation through study of specimens and illustrative material. Prerequisite: BIOL 602. LEC.

**Biol 752. Cell Biology. 3 Hours.**
A lecture course emphasizing biochemical, developmental, and molecular aspects of cell structure and function. Prerequisite: BIOL 807 and BIOL 808, or BIOL 416 or BIOL 536, or permission of instructor. LEC.

**Biol 753. Advanced Genetics. 3 Hours.**
An advanced course in modern genetic analysis of eukaryotes. Course material will consist mainly of primary literature in the field of genetics. Topics covered include: genomic structure and genome projects; nature of mutations; mutant analysis; genetic recombination and mapping; analysis of gene function; genetic buffering; RNAi and epigenetics; and the genetics of model organisms. This course is meant for graduate students in the Molecular Biosciences and Genetics programs. Prerequisite: BIOL 807 and BIOL 808, or a course in genetics and a course in biochemistry, or permission of the instructor. LEC.

**Biol 754. Brain Diseases and Neurological Disorders. 3 Hours.**
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., will be discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Graduate students are required to present original research paper assigned by the instructor to the class in addition to the other assignments for all the students enrolled. Prerequisite: BIOL 150, or consent of instructor. LEC.

**Biol 755. Mechanisms of Development. 3 Hours.**
Molecular aspects of differential gene function, signal transduction, and cell polarity in the regulation of morphogenesis. Prerequisite: BIOL 807 and BIOL 808 for graduate students; BIOL 417 or equivalent for undergraduate students; or permission of instructor. LEC.

**Biol 756. Cell and Tissue Culture Laboratory. 3 Hours.**
An introduction to current laboratory methods of cell and tissue culture, intended to provide an understanding of and substantial experience in several aspects of animal cell growth, cell synchrony, cell nutrition, the production and selection of mutant cell lines, the production and use of heterokaryons and interspecific hybrids, cell transformation in vitro, the cultivation and characterization of differentiated cells in culture, enzyme induction, and cell karyotyping. LAB.

**Biol 757. Carcinogenesis and Cancer Biology. 3 Hours.**
This course surveys the field of cancer research. The major goal is to introduce the breadth of cancer research while, at the same time, providing sufficient depth to allow the student to recognize problems in cancer and to design experiments which study cancer biology. Toward that end, the student should (at the conclusion of the course) be able to: define cancer, identify and discuss its causes; identify and discuss the genetic basis for cancer development and progression; discuss the theoretical basis for cancer therapy design and efficacy testing; discuss the biochemical, molecular and cellular events involved in the natural history of major human neoplasms. Prerequisite: Permission of instructor. LEC.

**Biol 767. The Vegetation of the Earth. 3 Hours.**
A discussion of the world's vegetation in its natural condition and as affected by man. Included are aspects of its economic and cultural usefulness and the problem of its preservation. Prerequisite: BIOL 634. LEC.

**Biol 768. Plant Molecular Biology. 3 Hours.**
Gene expression in chloroplasts, mitochondria, and plant nuclei, and regulatory interactions among these genomes. Special topics include the molecular biology of the photosynthetic apparatus, nitrogen fixation, stress and development, viruses and viroids, transposable genetic elements and gene evolution, and gene transfer and plant genetic engineering. Prerequisite: A course in biochemistry, cell or molecular biology, or permission of instructor. LEC.

**Biol 770. Plant Biochemistry. 3 Hours.**
A detailed study of plant biochemistry with emphasis on metabolic and regulatory processes particularly characteristic or unique in plants. Prerequisite: BIOL 600 or equivalent. LEC.

**Biol 772. Gene Expression. 3 Hours.**
A study of the structure and expression of genes in prokaryotes and eukaryotes. Emphasis on the mechanisms of DNA, RNA, and protein biosynthesis. This course meets concurrently with BIOL 672 and is open to graduate students seeking a more rigorous treatment of techniques in molecular biology that students receive in BIOL 672. Prerequisite: A course in biochemistry or consent of instructor. LEC.

**Biol 775. Chemistry of the Nervous System. 3 Hours.**
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as CHEM 775, MDCM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent or consent of instructor. LEC.

**Biol 777. Integrative and Developmental Neurobiology. 3 Hours.**
Cellular processing of neural information both at the local level and in long distance integration. Local computing functions, and integration of these functions among the various areas to produce coherent movement and perceptions will be discussed. A description of forces guiding the development of the nervous system to form a coherent working system in both invertebrate and vertebrate animals will be presented, as will determinants of brain sexual dimorphism. Prerequisite: An upper level course in physiology or BIOL 520. LEC.

**Biol 780. Fisheries. 2 Hours.**
Philosophy and practice of conservation as it applies to major world fisheries. Species principally utilized, factors affecting production, methods for appraisal and management of stocks. Historical and prospective roles of the fisheries in relation to human food supplies and recreational needs. Prerequisite: BIOL 412. LEC.

**Biol 781. Fisheries, Laboratory. 2 Hours.**
Training in field and laboratory techniques for fishery research and management. Prerequisite: Concurrent or prior enrollment in BIOL 780. LAB.
BIOL 782. Principles of Biogeography. 3 Hours.
A synthesis of historical and ecological biogeography of plants and animals, treating vicariance, dispersal, and community patterns; lectures, readings, discussions. A course in systematics and a course in ecology are recommended. LEC.

BIOL 783. Herpetology. 3 Hours. N.
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematics, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion, thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry. Students taking the course at the 700 level will have additional work required of them. Prerequisite: BIOL 152 Principles of Organismal Biology, and/or BIOL 413 History and Diversity of Organisms. LEC.

BIOL 784. Introduction to Museum Public Education. 3 Hours.
Consideration of the goals of an institution's public education services, developing programs, of identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, GEOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 785. Museum Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, GEOL 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 786. Fundamentals of Tropical Biology. 1-8 Hours.
The tropical environment and biota; ecological relations, communities and evolution in the tropics. Primarily a field course, taught in Costa Rica; two sessions per year, February-March, July-August. FLD.

BIOL 787. Introduction to Museum Exhibits. 3 Hours.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, GEOL 781, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 788. The Nature of Museums. 3 Hours.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, GEOL 782, HIST 720, and MUSE 702.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 789. Field Course in Entomology. 1-6 Hours.
Field experiences in various habitats, with an emphasis in ecology, systematics, behavior, and collection techniques. FLD.

BIOL 790. Paleontology of Lower Vertebrates. 3 Hours.
General account of the osteology, geological distribution, and evolution of the principal groups of fishes, amphibians, reptiles, and birds. Lectures and laboratory. (Same as GEOL 725.) LEC.

BIOL 791. Paleontology of Higher Vertebrates. 3 Hours.
Evolution of mammals, and anatomical modifications involved in the process as ascertained from the fossil record. Lectures and laboratory. (Same as GEOL 726.) LEC.

BIOL 792. Ichthyology. 4 Hours.
A study of fishes. Lecture topics include the structure and function of fishes; the adaptations of fishes to the aquatic environment; and a survey of major fish groups with emphasis on evolutionary relationships and biogeography. Laboratory topics include a survey of fishes using specimens, and the use of keys to identify fishes with emphasis on the Kansas fish fauna. A research paper using primary scientific literature is required. Prerequisite: Graduate standing or permission of the instructor. LEC.

BIOL 794. Mammalogy. 3 Hours.
A study of mammals, with emphasis on systematics, biogeography, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 100 or BIOL 413. LEC.

BIOL 795. Biology of Amphibians. 3 Hours.
Evolutionary biology of amphibians with emphasis on systematics, morphology, development, reproductive strategies, and distribution; lectures and laboratory. Prerequisite: BIOL 664 or permission of instructor. LEC.

BIOL 796. Biology of Reptiles. 3 Hours.
Evolutionary biology of reptiles with emphasis on systematics, morphology, reproductive strategies, and distribution; lectures and laboratory. Prerequisite: BIOL 664 or permission of instructor. LEC.

BIOL 797. Field Course in Vertebrate Paleontology. 3-6 Hours.
Training in the techniques of collecting vertebrate fossils, description and interpretation of the stratigraphy of fossiliferous sediments, and interpretation of the adequacy and bias of samples. FLD.

BIOL 798. Principles and Practices of Museum Collection Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museum collections, their associated data, and their use in scholarly research; cataloging, storage, fumigation, automated information management and related topics will be presented for museums of art, history, natural history and anthropology. (Same as AMS 730, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 799. Natural History Museum Apprenticeship. 1-6 Hours.
Provides directed, practical experience in collection care and management, public education, exhibits and administration with emphasis to suit the particular requirements of each student. Full time for one semester or half time for two semesters. (Same as AMS 799, ANTH 799, GEOL 723, HIST 799, and MUSE 799.) FLD.

BIOL 801. Topics in: ______. 1-3 Hours.
Advanced courses on special topics in biology, given as need arises. Lectures, discussing readings, laboratory or field work. Students may select sections according to their special interests. LEC.

BIOL 802. The Art of Becoming a Professional Scientist. 3 Hours.
Discusses aspects of graduate education that are directed at the post PhD phases of a career, but that must be initiated early in the graduate student program of study. One 3-hour discussion per week. LEC.

BIOL 804. Scientific Integrity: Molecular Biosciences. 1 Hour.
This course introduces aspects and issues associated with being an ethical, responsible, and professional research scientist. Included topics are professional practices, regulations, and rules that define the responsible and ethical conduct of research. Graduate students
will become familiar with and prepare to navigate through challenges that occur during a career in research science. The format of individual classes is expected to incorporate both instruction and discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.

BIOL 806. Major Patterns in Insect Evolution. 3 Hours. Extensive reading and discussion of the primary literature on topics relating to major patterns in the evolutionary history of insects, including the fossil history of insects, the monophyly of arthropods, the origin of wings, the changing role of insects in ecological communities, the origins of social behavior, modes and mechanisms of speciation, and patterns of species diversity. Assigned readings require a solid background in evolutionary theory and insect biology, especially morphology, development, and classification. Prerequisite: Permission of instructor. LEC.

BIOL 807. Graduate Molecular Biosciences. 6 Hours. An introduction to the advanced study of biochemistry, microbiology, genetics, cell and developmental biology, and neurobiology for all Molecular Biosciences graduate students. Topics can include macromolecular structure, metabolism, kinetics and thermodynamics, bioinformatics, prokaryotic and eukaryotic genetic mechanisms, cell structure and function, signal transduction, basic and pathogenic bacteriology, immunology, virology, membrane potentials, synaptic transmission, and sensory neurophysiology. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.

BIOL 809. Graduate Molecular Biosciences for Medicinal Chemists. 4 Hours. An introduction to the advanced study of biochemistry, microbiology, and neurobiology for graduate students in Medicinal Chemistry. Prerequisite: Admission to the graduate program in Medicinal Chemistry and consent of instructor. LEC.

BIOL 810. Seminar in Biochemistry. 1 Hour. Presentation and discussion of specific areas of recent research in biochemistry. This course may be taken more than once. LEC.

BIOL 811. Advanced Molecular and Cellular Immunology. 2 Hours. Covers recent advances in immunochemistry and immunobiology. Topics include structure and function of antibodies, hybridoma systems, idiotypes, induction and regulation of the immune response through cell interactions and cytokine action, and the role of immune activity in disease states such as hypersensitivity, autoimmunity, and cancer. Prerequisite: BIOL 807 and BIOL 808, or an introductory course in immunology, or consent of instructor. LEC.

BIOL 812. Mechanisms of Host-Parasite Relationships. 2 Hours. Emphasis is on virulence factors of microorganisms and the host response to infection. Topics will include pathogenesis of intracellular and extracellular parasites, bacterial adhesins, and toxins, and the role of innate and acquired immunity in host resistance and the response to infection. Prerequisite: BIOL 807 and BIOL 808, or a course in biochemistry, or consent of instructor. LEC.

BIOL 813. Advanced Bacterial Physiology. 2 Hours. The intermediary reactions catalyzed by the bacterial cell during energy-requiring processes. Thermodynamic considerations of these processes are discussed. Knowledge of calculus is recommended. Prerequisite: BIOL 807 and BIOL 808, or a course in microbiology and a course in biochemistry, or consent of instructor. LEC.

BIOL 814. Advanced Molecular Virology. 2 Hours. The course concentrates on evaluation of current literature concerning all aspects of molecular biology, biochemical characterization, and pathogenic mechanisms involved in host-virus interactions. Students will be expected to present articles and participate in discussions. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics and a course in virology, or consent of instructor. LEC.

BIOL 815. Advanced Molecular Genetics. 2 Hours. A literature-based course that covers recent advances in microbial molecular genetics. Topics include transcription, translation, mutagenesis and repair, genetic exchange mechanisms, and regulation of gene expression. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics, or consent of instructor. LEC.

BIOL 816. Careers in Chemical Biology. 1 Hour. Advanced course examining current research topics in chemical biology. An emphasis will be placed on career options open to PhD scientists in Chemical Biology, and preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as CHEM 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor. SEM.

BIOL 818. Techniques in Molecular Biosciences. 2 Hours. This course provides an introduction to common techniques used for research strategies in molecular biosciences. The course will cover common techniques in cell biology, biochemistry, microbiology, and neurobiology. Information will be presented in lectures and through practical demonstrations. This course is primarily intended for first year graduate students in the Department of Molecular Biosciences. Prerequisite: Enrollment in the Molecular Biosciences Graduate Program or consent of instructor. LAB.

BIOL 840. Scientific Communication. 2 Hours. N. Principles of English communication skills for the professional scientist. The course explores the form, function, and practice (including ethics) of scientific communication, emphasizing elements of writing and speech that are important to clarity and precision. The course covers written and verbal communication of primary research results as well as composing correspondence, a curriculum vitae, reviews, etc. Prerequisite: Graduate standing. LEC.

BIOL 841. Biometry I. 5 Hours. The application of statistical methods to data from various fields of biological research. Special emphasis is placed on practical computational procedures. Prerequisite: College algebra. LEC.

BIOL 842. Biometry II. 3 Hours. This course is primarily devoted to special advanced topics in analysis of variance, analysis of covariance and regression analysis. Polynomial regression and multiple linear regression will be presented as well the general linear model. Elementary matrix algebra will be developed as needed. Prerequisite: BIOL 841. LEC.

BIOL 847. Phylogenetics. 3 Hours. An introduction to the theory and practice of phylogenetic systematics. Includes principles of character analysis including determination of homology and determination of character polarity, testing alternate phylogenetic trees, and reconstructing trees using computer techniques. Also includes principles of constructing phylogenetic classifications and the nature of taxa in the phylogenetic system. Other topics, such as the nature of species and principles of biogeography are included. Prerequisite: Twenty hours natural history. LEC.

BIOL 848. Phylogenetic Methods. 4 Hours. A survey of methods for inferring phylogenetic trees from character data and using phylogenies to address evolutionary questions. Lectures will present the relevant theory and algorithmic description of methods.
Computer lab will familiarize students with software that implements the analyses discussed in lecture, intended for graduate students specializing in systematics. Prerequisite: BIOL 845 and BIOL 841 or consent of instructor. LEC.

BIOL 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as CHEM 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.

BIOL 872. Gene Expression II. 3 Hours.
Second semester of a two-semester lecture course on gene expression. Emphasis on control of gene expression at the transcriptional and post-transcriptional levels. Prerequisite: BIOL 772 or consent of instructor. LEC.

BIOL 888. Topics in Evolutionary Morphology: ____. 2 Hours.
Presentation and discussion by graduate students and faculty of selected topics centering on observed changes in structure and function of organisms from a phylogenetic point of view. Presentation will include results of original research when possible and appropriate, and otherwise, will be based on syntheses of recent literature. RSH.

BIOL 890. Advanced Study in Microbiology. 1-10 Hours.
Original investigation by students at the master's degree level. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Ten or more hours of microbiology and consent of department. RSH.

BIOL 895. Human Genetics. 3 Hours.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: A course in genetics. LEC.

BIOL 899. Master's Thesis. 1-10 Hours.
Research which is to be incorporated into an M.A. thesis. Not more than ten hours may be earned. Graded on a satisfactory/unsatisfactory basis. Prerequisite: BIOL 416. LEC.

BIOL 901. Graduate Seminar in Biochemistry and Biophysics. 1 Hour.
Advanced course examining current research topics in biochemistry and biophysics. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental admission. LEC.

BIOL 902. Graduate Seminar in Molecular, Cellular, and Developmental Biology. 1 Hour.
Advanced course examining current research topics in molecular, cellular, and developmental biology. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental permission. SEM.

BIOL 903. Graduate Seminar in Neurobiology. 1 Hour.
Advanced course examining current research topics in neurobiology. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental permission. LEC.

BIOL 904. Graduate Seminar in Microbiology. 1 Hour.
Advanced course examining current research topics in microbiology. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Enrollment in graduate school, and departmental permission. RSH.

BIOL 905. Advanced Molecular Genetics. 1-3 Hours.
A review of current literature in molecular genetics. RSH.

BIOL 906. Advanced Genetics. 1-3 Hours.
May be repeated for credit up to six hours. Review of current literature and genetic theory of selected topics such as population, molecular, quantitative, and physiological genetics. RSH.

BIOL 911. Research Topics in Plant Physiology and Biochemistry. 1-6 Hours.
Directed research on selected topics. Prerequisite: BIOL 770 or equivalent. RSH.

BIOL 918. Modern Biochemical and Biophysical Methods. 4 Hours.
This course emphasizes the use of techniques for solving problems of structure and function of biological macromolecules. Students will complete several modules that consist of lectures relating to theory and practical aspects of each methodological approach, and apply these techniques to solving a specific problem. Students will submit a paper describing the resulting data and conclusions. Prerequisite: BIOL 807, BIOL 808, and BIOL 818, or permission of instructor. LEC.

BIOL 925. Research Grant Proposal Preparation. 3 Hours.
This course introduces the basics of preparing a successful scientific grant application. Topics to be covered include how to develop a novel, fundable project, scientific writing and grantsmanship, and what criteria reviewers consider in evaluating grants. The course will be a mix of instruction and class discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.

BIOL 930. Ultrastructure and Cellular Mechanisms. 3 Hours.
Two lectures and one seminar-recitation. A detailed consideration of electron microscopic analyses of cell structure as related to cell function. Prerequisite: BIOL 416. LEC.

BIOL 943. Multivariate Data Analysis. 3 Hours.
Matrix formulation of multivariate models and data. Specific methods covered include Principal Components Analysis, Factor Analysis, Multiple Group Discriminant Analysis and Canonical Analysis, and Canonical Correlation Analysis. Prerequisite: BIOL 842 or knowledge of elementary matrix algebra. LEC.

BIOL 944. Topics in Quantitative Ecology: ____. 1-3 Hours.
Presentation and discussion by instructor and students of mathematical and statistical concepts in ecology. Topics are selected from texts or sets of readings. LEC.

BIOL 950. Evolutionary Mechanisms. 3 Hours.
Reading and discussions of evolutionary mechanisms from the genetic, ecologic, and systematic viewpoints. Prerequisite: BIOL 412. LEC.

BIOL 952. Introduction to Molecular Modeling. 3 Hours.
Introduction to theory and practice of contemporary molecular modeling, including molecular mechanics, molecular dynamics, computer graphics, data analysis, use of structure and sequence databases, docking, and homology modeling. Weekly computer laboratory section aimed at allowing participants to pursue independent research projects that incorporate modeling aspects. Lectures, laboratory manuals, program descriptions, and technical notes are presented on course web page. (Same as MDCM 952.) Prerequisite: Graduate standing or consent of instructor. LEC.
BIOL 968. Seminar in Vegetation Geography. 2-3 Hours. (Same as GEOG 937.) LEC.

BIOL 985. Advanced Study. 1-10 Hours.
Individual investigations; laboratory, field or museum; or reading assignments in specialized topics not ordinarily treated in other courses. Graded on a satisfactory/unsatisfactory basis. RSH.

BIOL 999. Doctoral Dissertation. 1-12 Hours.
Original research that is to be incorporated into a Ph.D. dissertation. Graded on a satisfactory/unsatisfactory basis. THE.

BTEC 300. Introduction to Biotechnology. 3 Hours. N.
Review of techniques used in food, agricultural, pharmaceutical, industrial, and environmental biotechnology. Role of regulatory agencies during the discovery, development, and manufacture of new medical devices, biotechnology, biomedical, and pharmaceutical products. Guest presentations in biotechnology. Prerequisite: BIOI 416. LEC.

BTEC 330. Biotechnology Regulation and Documentation Processes. 3 Hours. N.
Current good manufacturing practices (GMP) as they apply in the biotechnology workplace. History, rationale, purpose, and GMP requirements applicable to the manufacturing, packaging, labeling, testing, and control of pharmaceutical products, and consequences of inaction. Prerequisite: BTEC 300. LEC.

BTEC 340. Biotechnology Research Methods and Applications. 3 Hours. N.
Introduction to fermentation and protein chemistry. Theory behind laboratory techniques and overview of industrial scale expression systems. Bacterial cell culture techniques, principles of fermentor operation and purification, documentation procedures, important tasks for clean room operations, including sanitization, sterilization, cleaning procedures, calibration, and environmental monitoring. Prerequisite: BTEC 300; BIOI 600. LEC.

BTEC 341. Principles of Bioprocessing Laboratory I. 1 Hour. N.
Laboratory sessions involve use of microbial expression vectors, fermentation systems, and large-scale purification of recombinant protein. Includes bacterial cell culture techniques, principles of bioreactor/fermentation operations and purification techniques, and calibration. Primary goal of this course is to provide students with an advanced background in bacterial upstream and downstream biotechnology. Prerequisite: BTEC 300; BTEC 340 or concurrent enrollment in BTEC 340. LAB.

BTEC 345. Microbial Genetics Laboratory. 4 Hours. N.
Research projects center on using molecular genetics to examine the biology of the bacterium Pseudomonas aeruginosa, an opportunistic pathogen often found in the lungs of cystic fibrosis patients. Students engage in independent projects to probe various aspects of P. aeruginosa physiology such as antibiotic resistance, phase variation, toxin production, secondary metabolite production, twitching motility, swarming behaviors, and more. Projects aim to discover the molecular basis for these processes using both classical and new, cutting-edge techniques. These include plasmid manipulation, genetic complementation, mutagenesis, PCR, DNA sequencing, enzyme assays, and gene expression studies. Prerequisite: BIOI 350; BIOI 402. LAB.

BTEC 414. Independent Study in Biotechnology. 1-3 Hours. N.
Independent project at a related bioscience industry partner or faculty in selected topics of current translational research interest. May be undertaken only with the consent of the major advisor who will guide the research after determining objectives with the interested industry partner or faculty. Prerequisite: Consent of instructor. IND.

BTEC 440. Biotechnology Research Methods and Applications II. 3 Hours. N.
Theory and practicum behind laboratory techniques and overview of industrial scale expression systems of insect or mammalian protein chemistry. Cell culture techniques, principles of bioreactor operation and purification, documentation procedures, important tasks for clean room operations, including sanitization, sterilization, cleaning procedures, calibration, and environmental monitoring are evaluated. Prerequisite: BTEC 340; BTEC 341. LEC.

BTEC 441. Principles of Bioprocessing Laboratory II. 1 Hour. N.
Mammalian cell culture techniques, principles of bioreactor operations and purification techniques, and calibration. The primary goal of this course is to provide students with an advanced background in mammalian upstream and downstream biotechnology. Prerequisite: BTEC 340 or concurrent enrollment in BTEC 440. LAB.

BTEC 450. Applied Bioinformatics. 3 Hours. N.
Overview of the fields of bioinformatics and genomics. Topics, tools, issues and current trends in these and related fields are discussed. Principles and practical application of bioinformatics tools in molecular biology and genetics are evaluated. The haploid human genome occupies a total of just over 3 billion DNA base pairs. This information is not contained in books, but stored in electronic databases. Computational biology utilizes infer function by comparative analysis. This course is designed for life scientists from all fields to introduce them to the power of bioinformatics and enable them to access and utilize biological information in databases for their own research. Prerequisite: BTEC 300; BIOL 570 or MATH 365 or PSYC 210. LEC.

BTEC 460. Introduction to Quality Control/Quality Assurance in Biotechnology. 3 Hours. N.
Quality control techniques, assurance issues, and management methods. Quality in design and planning, in the constructed project, and in production of goods and services. Prerequisite: BTEC 330. LEC.

BTEC 475. Bioseparations Laboratory. 2 Hours. N.
Develop novel and effective strategies for extraction and purification of recombinant and native biomolecules by understanding constraints posed by the biological system and the products. Research projects are geared toward developing cost-effective processes for recovery of industrial and biopharmaceutical products derived from a variety of native and/or transgenic sources. Prerequisite: BTEC 405; BTEC 441. LAB.

BTEC 494. Selected Topics in Biotechnology. 1 Hour. N.
Course work varies with the topic of the seminar. The preparation and presentation of oral reports on selected topics from recent translational research literature. Students may choose one interest group each semester, but may enroll in a given interest group only once. May be repeated for credit when topics vary. Prerequisite: BTEC 300 and approval of instructor. LEC.

BTEC 501. Ethical Issues in Biotechnology. 1 Hour. N.
Student investigations and discussions of current controversial issues in biotechnology. This course emphasizes thinking about new technologies in a rational and thoughtful way. Prerequisite: BTEC 300. LEC.

BTEC 541. Gene Expression Analysis: Microarrays. 2 Hours. N.
This course covers current theory, techniques, instrumentation, troubleshooting, analysis tools, and advanced protocols for microarray analysis. Students have the opportunity to utilize skills learned during lecture in a laboratory environment. At the conclusion of this course, students understand microarray experimental design, its tools, and analysis of generated data. Prerequisites: BTEC 300. LAB.
BTEC 542. Protein Expression in Insect Cells. 2 Hours. N.
Introduction to the insect cells expression system, and its advantages and disadvantages. Introduction to expression of recombinant proteins with baculovirus. Outline of antibody and antibody fragments as well as other complex proteins. Basic techniques used for growth and maintenance of insect cell cultures. The lab portion of the course provides students with practical experience in protein expression techniques in the insect cells expression system. Prerequisite: BTEC 300. LAB.

BTEC 545. RNA Interference and Model Organisms. 2 Hours. N.
Introduction and history of RNA interference technology. Principles, mechanism, and applications of RNA interference in model organisms. Laboratory sessions include RNA interference-mediated silencing of genes in plants, C. elegans, and mammalian cell culture. Prerequisite: BTEC 300. LAB.

BTEC 547. Bioanalytical Lab. 2 Hours. N.
Analytical methods used for testing biotherapeutics are examined. Emphasis is placed on assessing protein concentration, purity, identity and activity. The importance of sample processing, throughput and level of validation are explored as samples from upstream processing, downstream processing and final bulk are interrogated. Students also learn key concepts used to validate the performance of analytical methods. Prerequisite: BTEC 300. LAB.

BTEC 599. Biotechnology Capstone Experience. 3 Hours. N.
Supervised internship at a biotech company; or an independent thesis; or honors thesis with Honors Program. Prerequisite: BTEC 441 and approval of instructor. FLD.

M.A. in Biochemistry & Biophysics; Microbiology; or Molecular, Cellular, & Developmental Biology

Molecular Biosciences Graduate Programs

The department offers the Doctor of Philosophy and the Master of Arts in biochemistry and biophysics; microbiology; and molecular, cellular, and developmental biology. Programs in neurobiology and genetics also allow a research focus. Graduate students may pursue degree tracks in the disciplines of their choice but may also be involved in collaborative research. New students should confer with the graduate coordinator to plan a first-semester schedule. Until the student chooses a permanent advisor, the graduate coordinator advises him or her.

The department has established a level of enrollment appropriate for normal progress (course work and research effort) toward an advanced degree. These credit-hour requirements may exceed, but not fall below, minimum Graduate Studies requirements. A student must enroll full-time in residence for at least 2 regular academic-year semesters after the first year of graduate study. 9 credit hours constitute full-time enrollment. If the student holds a half-time research or teaching assistantship, 6 hours constitute full-time enrollment. The department expects graduate students who have not yet passed the comprehensive oral examination (including those with half-time assistantships) to enroll in at least 9 hours each semester and 3 hours each summer session. After passing the comprehensive oral examination, a doctoral candidate must be continuously enrolled, including summer sessions, until all degree requirements are completed. For the first 18 hours of post-comprehensive enrollment, the doctoral candidate must take a minimum of 6 hours a semester and 3 hours a summer session.

Graduate Teaching Assistantships and Graduate Research Assistantships are available. GTAs are appointed on a semester basis. GRAs are appointed on a semester, academic-year, or calendar-year basis.

During the first 2 semesters, a new Ph.D. graduate student follows a rotation schedule through 3 research laboratories. This program acquaints each student with the research conducted by each faculty member. Students then choose a home lab. This decision must be mutually agreed on with the major professor. Each graduate student must teach for at least 2 semesters.

(The B.S. degree in molecular biosciences (p. 1524) is offered on the KU Edwards Campus (http://edwardscampus.ku.edu).)

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The department adheres to minimum admission requirements. The number of new students accepted each year depends largely on availability of laboratory space, financial resources, grants, and the number of students leaving the program. The department maintains a full enrollment.

The department’s website (http://www.molecularbiosciences.ku.edu) has information about application procedures and a link for applying directly online. A completed application file must include

1. An application form and fee;
2. 1 copy of all academic transcripts (international students must provide 1 copy in English and 1 in the native language);
3. A résumé (1 to 2 pages);
4. General Graduate Record Examination scores (GRE must have been taken within 2 years of the initial semester);
5. Internet-Based Test of English as a Foreign Language (iBT) or IELTS scores for international students;
6. 3 recommendation letters; and
7. A statement of aims (1 to 2 pages) describing the applicant’s interests and professional goals.

All files must be complete and received in the department by December 15 each year. First consideration is given to those who meet this deadline. Applicants are informed of decisions in early March.

All supporting documentation should be uploaded online when you apply. If this is not possible, please send documentation to:

The University of Kansas
Department of Molecular Biosciences
M.A. Degree Requirements

General Requirements for All M.A. Students
Refer to each discipline for specific course requirements. General requirements include:

1. A minimum of 30 hours of graduate credit;
2. A minimum of 1 laboratory rotation during the first semester of graduate study;
3. Enrollment every semester in BIOL 701 Topics in Molecular Biosciences Seminar;
4. Completion of the following courses: BIOL 807 Graduate Molecular Biosciences and BIOL 818 Techniques in Molecular Biosciences;
5. A graduate committee established by the beginning of the spring semester of the first year;
6. A minimum of 1 annual graduate committee meeting until completion of the degree.

The following thesis options are available:

1. Write a thesis resulting from original research on a laboratory problem.
2. Publish a research paper in a national, refereed journal. Acceptance of the paper for publication constitutes publication for conferral of the degree.
3. Write a library thesis on a topic approved by the student’s graduate committee.

Specific M.A. Requirements: Biochemistry and Biophysics

BIOL 750 Advanced Biochemistry 3
BIOL 772 Gene Expression 3

Electives to satisfy the 30-hour requirement. Electives are determined in consultation with the graduate advisor and graduate committee.

Specific M.A. Requirements: Microbiology

Select at least three graduate courses from the following: 6

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 811</td>
<td>Advanced Molecular and Cellular Immunology</td>
</tr>
<tr>
<td>BIOL 812</td>
<td>Mechanisms of Host-Parasite Relationships</td>
</tr>
<tr>
<td>BIOL 813</td>
<td>Advanced Bacterial Physiology</td>
</tr>
<tr>
<td>BIOL 814</td>
<td>Advanced Molecular Virology</td>
</tr>
<tr>
<td>BIOL 815</td>
<td>Advanced Molecular Genetics</td>
</tr>
</tbody>
</table>

Plus electives to satisfy the 30-hour course requirement. No more than 6 of these hours can be below the 700 level. Electives are determined in consultation with the graduate advisor and graduate committee.

Specific M.A. Requirements: Molecular, Cellular, and Developmental Biology

BIOL 752 Cell Biology 3
BIOL 755 Mechanisms of Development 3
BIOL 753 Advanced Genetics 3

or BIOL 772 Gene Expression

Electives to satisfy the 30-hour course requirement. Electives are determined in consultation with the graduate advisor and graduate committee.

Ph.D. in Biochemistry & Biophysics; Microbiology; or Molecular, Cellular, & Developmental Biology

Molecular Biosciences Graduate Programs

The department offers the Doctor of Philosophy and the Master of Arts in biochemistry and biophysics; microbiology; molecular, cellular, and developmental biology. Lawrence, KS 66045-7566

Ph.D. Degree Requirements

General Requirements for All Ph.D. Students

All general requirements must be fulfilled. Refer to each discipline for specific course requirements. General requirements include:

1. At least 3 individual laboratory rotations during the first two semesters of graduate study;
2. Enrollment every semester in BIOL 701 Topics in: Molecular Biosciences Seminar;
3. Completion of the following courses: BIOL 804 Scientific Integrity: Molecular Biosciences, BIOL 807 Graduate Molecular Biosciences, and BIOL 818 Techniques in Molecular Biosciences;
4. A Research Skills and Responsible Scholarship requirement (satisfied by completion of BIOL 818) and a Responsible Scholarship requirement (satisfied by BIOL 804);
5. A minimum of 2 semesters of graduate teaching;
6. A graduate committee established before the beginning of the fall semester of the second year;
7. A minimum of 1 annual graduate committee meeting;
8. A written preliminary examination in the form of a research proposal completed by the end of the spring semester of the second year of graduate study (BIOL 925);
9. A comprehensive oral examination held no later than October 1 of the fall semester of the third year of graduate study (successful completion of the comprehensive oral examination admits the student to candidacy for the Ph.D. degree);
10. A dissertation based on original research presented to the dissertation examination committee for evaluation and presented and defended in a formal public lecture; and
11. Completion of the degree in 7 years.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Museum Studies Program

Museum Studies Graduate Program

These are exciting and challenging times for museums -- longstanding premises are being questioned, and many established practices are being reconsidered. Museum professionals today work in an environment far different than that of even a few years ago. Emerging technologies now allow museums to bring their collections and their programs to audiences well beyond the confines of museum buildings. With this expanded reach, museums are preparing for dramatic changes in the age, ethnicity, education, and economic status of their audiences. Exhibitions and public programs are evolving; more than ever, educators, curators, and designers are seeking ways to engage visitors in complex issues of broad concern. Behind the scenes, collection stewardship is being reevaluated in response to practical, political, and ethical concerns. Additionally, unprecedented scholarly attention is being directed toward the ways in which museums have acquired their collections, represented their subjects, and engaged with the public. In the midst of this transformation, long-standing assumptions about museums’ public value have been called into question, requiring museum leaders to craft new collaborations and community partnerships in order to survive.

To advance and thrive in this dynamic environment, twenty-first century museum professionals will need knowledge informed by practice, imagination tempered by rigor, and leadership stimulated by collaboration. This is what we can offer at the University of Kansas. Students take advantage of the superb facilities at KU, including the Dole Institute of Politics, Natural History Museum, Spencer Museum of Art, Spencer Research Library, and Wilcox Classical Museum, as well as nearby historical agencies, specialized libraries, and museums.

Courses

MUSE 701. Museum Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL 785, GEOL 783, and HIST 728.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor, LEC.

MUSE 702. The Nature of Museums. 3 Hours.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, BIOL 788, GEOL 782, and HIST 720.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor, LEC.

MUSE 703. Introduction to Museum Exhibits. 3 Hours.
Presentation of principles and practices of exhibit management, design, and production. Topics will include developing a master plan for museum exhibits; concept development; design, installation, and maintenance of exhibits; design theory; design process; label writing and editing; selection of materials architectural requirements and building codes; cost estimating; publicity; security; and exhibit evaluation. Consideration will be given to exhibition problems in public and private museums in the areas of anthropology, art, history, natural history, and technology. (Same as AMS 700, BIOL 787, GEOL 781, and HIST 723.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor, LEC.

MUSE 704. Principles and Practices of Museum Collection Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museum collections, their associated data, and their use in scholarly research; cataloging, storage, fumigation, automated information management and related topics will be presented for museums of art, history, natural history and anthropology. (Same as AMS 730, BIOL 798, GEOL 785, and HIST 725.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor, LEC.

MUSE 705. Introduction to Museum Public Education. 3 Hours.
Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, GEOL 784, and HIST 721.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor, LEC.

MUSE 706. Conservation Principles and Practices. 3 Hours.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, BIOL 700, GEOL 780, and HIST 722.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor, LEC.

MUSE 707. Practical Archival Principles. 3 Hours.
Study of the principles and practices applicable to the preservation, care, and administration of archives and manuscripts. Practical experience will be an integral part of this course. (Same as HIST 727.) LEC.

MUSE 710. Current Trends in Curation and Collection Management. 2 Hours.
Seminar course to provide students with a working knowledge of the primary issues and current trends in building, administration, and care of scientific collections. Topics include permits, collecting, accessioning, cataloging, preservation, preventive conservation, and access to collections and data. The course format consists of readings, lectures, guest speakers, discussions, and visits to scientific collections on campus. (Same as BIOL 706.) LEC.

MUSE 780. Special Topics: ______. 1-3 Hours.
Advanced courses on special topics in museum studies, given as need arises. Lectures, discussions of readings, and guest speakers. Topic for semester to be announced. Prerequisite: Graduate standing in Museum Studies Program or permission of instructor. LEC.

MUSE 782. Seminar in Current Museum Topics: ______. 1-3 Hours.
In-depth examination of specific topics currently of concern to museums and museum professionals. Topic for semester to be announced. Prerequisite: Graduate standing in Museum Studies Program, or permission of instructor. LEC.

MUSE 790. Advanced Study. 1-3 Hours.
Individual research in a specialized topic not ordinarily treated in a Museum Studies core course for which there is a member of the graduate faculty competent and willing to direct a research project. Prerequisite: Consent of instructor. RSH.
MUSE 792. Directed Readings. 1-3 Hours.
Directed reading in an area of Museum Studies in which there is no particular course in the Museum Studies program or in cooperating departments but in which there is a member of the graduate faculty competent and willing to direct a program study. Prerequisite: Consent of instructor. IND.

MUSE 799. Museum Apprenticeship. 1-6 Hours.
Provides directed, practical experience in research, collection care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. (Same as AMS 799, ANTH 799, BIOL 799, GEOL 723, and HIST 799.) FLD.

MUSE 910. Materials Conservation. 3 Hours.
Preservation and collection conservation theory and principles, including condition reporting, conservation of furniture and wooden objects, inorganic-based materials, metal objects, organic-based materials, paintings, photographic materials, textiles, three-dimensional objects, and works on paper. LEC.

MUSE 930. Preventive Conservation. 3 Hours.
Theory and principles of preventive conservation, with emphasis on its application to storage environment quality, archival supports and housing, basic bookbinding, composite objects, integrated pest management, light and lighting, paper evaluation and mending, temperature, and relative humidity. LEC.

MUSE 940. Conservation Assessment. 3 Hours.
Understanding the conservator-curator relationship; principles of conservation assessment, documentation, research, environmental monitoring, handling objects, photographic documentation, and development of a publishable preservation research project. LEC.

MUSE 980. Advanced Conservation. 3 Hours.
Application of conservation theory and practice to exhibition development, planning, and preparation; conservation bookbinding; health and safety in conservation; integrated pest management; ethics of conservation; parameters of professional conservation practice. LEC.

Master of Arts in Museum Studies

Museum Studies Graduate Program

These are exciting and challenging times for museums -- longstanding premises are being questioned, and many established practices are being reconsidered. Museum professionals today work in an environment far different than that of even a few years ago. Emerging technologies now allow museums to bring their collections and their programs to audiences well beyond the confines of museum buildings. With this expanded reach, museums are preparing for dramatic changes in the age, ethnicity, education, and economic status of their audiences. Exhibitions and public programs are evolving; more than ever, educators, curators, and designers are seeking ways to engage visitors in complex issues of broad concern. Behind the scenes, collection stewardship is being reevaluated in response to practical, political, and ethical concerns. Additionally, unprecedented scholarly attention is being directed toward the ways in which museums have acquired their collections, represented their subjects, and engaged with the public. In the midst of this transformation, long-standing assumptions about museums' public value have been called into question, requiring museum leaders to craft new collaborations and community partnerships in order to survive.

To advance and thrive in this dynamic environment, twenty-first century museum professionals will need knowledge informed by practice, imagination tempered by rigor, and leadership stimulated by collaboration. This is what we can offer at the University of Kansas. Students take advantage of the superb facilities at KU, including the Dole Institute of Politics, Natural History Museum, Spencer Museum of Art, Spencer Research Library, and Wilcox Classical Museum, as well as nearby historical agencies, specialized libraries, and museums.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

To be considered for admission to regular graduate status in the Museum Studies program, a student must hold a baccalaureate degree and have earned at least a B (3.0) grade-point average in previous academic work. Acceptance in the program is determined by the Museum Studies Admissions Committee. A student interested in applying for admission must submit the following:

1. A completed application, along with a non-refundable application fee, submitted online through the Office of Graduate Studies (http://www.graduat.ku.edu/apply).

2. Transcripts from all undergraduate or graduate institutions attended. You may upload a scanned version of your official transcript from your undergraduate institution to the online application. Please note: A printout from a student portal is NOT considered to be an official copy of your transcript. Official transcripts will be required upon admission to the program. In addition, please calculate (http://www.clas.ku.edu/undergrad/tools/gpa) your Junior/Senior GPA and include it on your resume.

3. A statement of academic objectives. This component of the application is very important. It should be a thoughtful, well-written, 2-3 page statement addressing such topics as (a) what it is about museums and museum studies that particularly interests you, (b) your career goals, and the area of museum work that most attracts you, (c) your relevant experience and background, (d) the match of KU’s program to your interests, an (e) anything else you think is important to your application. If you feel that your academic record does not reflect your potential, or if your test scores are below expectations, be certain to provide an explanation of any extenuating circumstances related to this issue.

4. 3 letters of recommendation. (Please use KU’s online letter of recommendation system when you apply).

5. GRE scores. To submit scores, use University code 6871, Department code 5101.

6. A resume or curriculum vitae listing your employment history, scholarships/fellowships, and awards.

7. A sample of your written academic work (10 pages maximum, please).
8. For international students only, TOEFL scores or acceptable alternative to demonstrate English proficiency.

9. For international students only, proof of financial support. Applications will not be considered without financial documentation.

Students are admitted to the M.A. program only in the fall semester. The Museum Studies Admissions Committee will begin considering applicants for Fall admission in mid-January and will accept applications until the deadline for the fall semester on May 1. Students who meet the January 15 deadline will be notified of admission decisions in early March. Applications completed after the January 15 deadline are much less likely to be considered for scholarship support and may be placed on an admissions waiting list.

M.A. Degree Requirements

The M.A. degree in museum studies requires 36 credit hours at the graduate level. Students in the Museum Studies Program complete courses in six areas:

1. The Museum Studies Core - 9 credit hours
2. Museum Professional Areas - 9 credit hours
3. Museum Conceptual Domains - 6 credit hours
4. Electives - 9 credit hours
5. Museum Experience (Internship) - 3 credit hours
6. Final Product (Research) - 3 credit hours

1. Museum Studies Core (9 credit hours)
The Museum Studies Core ensures that all Museum Studies students gain a comprehensive understanding of the theories, history, techniques, and problems common to museums, historical agencies and related institutions. The Capstone course, taken in a student’s third semester of study, provides an avenue for students to conduct research or other creative activities that advance the discipline of museum studies.

MUSE 702 The Nature of Museums 3
MUSE 780 Special Topics: _____ 3
MUSE 782 Seminar in Current Museum Topics: _____ 3

2. Museum Professional Areas (9 credit hours)
Students will develop expertise in one of the principal specialties of museum work by completing at least two courses in that area, at least one of which must be a Museum Studies (MUSE) course. Many courses in other departments could fulfill requirements; it is the responsibility of students, and their advisors, to ensure that individual courses meet program requirements based on the general relevance of the course and assurance that the student’s work in the class will be applicable to museum studies by meeting with instructors and examining syllabi.

LEADERSHIP AND MANAGEMENT
Courses cover areas such as administration, policy, fund raising, and legal issues related to the management of non-profit organizations.

MUSE 701 Museum Management 3
Examples of Courses in Other Departments and Programs:
LAW 867 Law and the Arts 2-3
MEMT 823 Seminar in: _____ 1-3
PUAD 828 Nonprofit Management and Policy 3
PUAD 830 Administrative Ethics 3
PUAD 855 Financial Management for Public and Not-for-Profit Organizations 3

INTERPRETATION
Interpretation includes developing skills in exhibition design and installation, graphics, and marketing, public programs, as well as innovative approaches to new and emerging technologies.

MUSE 703 Introduction to Museum Exhibits 3
MUSE 705 Introduction to Museum Public Education 3
Examples of Courses in Other Departments and Programs:
ADS 712 Design Strategies and Methods 3
BIOL 720 Scientific Illustration 3
THR 618 Scenography and the Musical Theatre 3

COLLECTIONS
Courses provide opportunities to develop expertise in the practices and policies associated with the management and care of the range of materials in museum collections.

MUSE 704 Principles and Practices of Museum Collection Management 3
MUSE 706 Conservation Principles and Practices 3
MUSE 707 Practical Archival Principles 3
Examples of Courses in Other Departments and Programs:
ANTH 520 Archaeological Ceramics 3
ANTH 582 Ethnobotany 3
ANTH 648 Human Osteology 4
BIOL 603 Systematic Botany 3
BIOL 746 Principles of Systematics 4
GEOL 725 Paleontology of Lower Vertebrates 3
TD 504 History of Textiles, Lecture 3
UBPL 760 Historic Preservation Planning 3

COMMUNITY CONNECTIONS
Courses enable students to develop skills in public programming, curriculum planning, visitor studies, audience development, and volunteer management.

MUSE 705 Introduction to Museum Public Education 3
Examples of Courses in Other Departments and Programs:
ABSC 719 Experimental Field Work in Community Settings 1-5
C&T 808 Qualitative Research: Curriculum Inquiry 3
COMS 855 Qualitative Research Methods in Communication Studies 3
COMS 855 Qualitative Research Methods in Communication Studies 3
HIST 601 Oral History 3
VAE 750 Introduction to Art Museum Education 1-4

3. Courses focusing on Museum Conceptual Domains (6 credit hours) The conceptual domains of museum work address in depth the conceptual and theoretical foundations of museums. Courses that emphasize conceptual domains will place museological subjects in broader historical and intellectual frameworks. Students may take courses which may be offered in one or several disciplines. Courses will be selected based on the general relevance of the course, and assurance that the student’s work in the class will be applicable to museum studies.

4. Electives and Other Museum Studies Courses (9 credit hours) Students are expected to deepen their knowledge of the field by taking courses in a subject area pertinent to their area of specialization. Courses will be selected with the approval of the student’s committee chair, as well as the course instructor.
5. **Museum Experience (3 credit hours)**

While enrolled in the Museum Studies program, students are required to gain at least 500 hours of museum experience, of which at least 250 hours must be in an approved, professionally supervised internship.

6. **Final Product and Examination**

Each student will be responsible for a final product, developed through research or other creative activity, that contributes to museum studies and demonstrates the student’s ability to engage conceptually and professionally with the discipline of museum studies.

**Museum Studies Graduate Certificate**

**Graduate Certificate in Museum Studies**

The course of study leading to the Certificate in Museum Studies comprises 15 credit hours at the graduate level. The Graduate Certificate in Museum Studies is designed to provide students with a solid grounding in the histories, concepts, and practices of the discipline of museum studies. The certificate program enables students to integrate knowledge of museum studies into their own academic disciplines or professional training. Completion of the certificate in museum studies represents an additional credential for graduate students from a variety of academic fields who are preparing for careers in research and teaching or professional practice. Enrollment in the program is open to students admitted to a regular KU graduate program or to non-degree-seeking graduate students admitted to the Graduate School.

The Museum Studies core curriculum will be the basis for the graduate certificate, which emphasizes the essential interdisciplinary and collaborative nature of museum work by drawing on a range of departments in the University. The program allows students to gain knowledge in preparation for doctoral study, as well as for employment in museums and related fields such as historic preservation, cultural resource preservation, archives, and government agencies.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree-seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Eligibility criteria for admission to the certificate program include a B.A. degree from an accredited institution with a 3.0 or higher GPA. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Graduate School. Completion of the program will appear on the graduate transcript.

**Current KU Students**

Current graduate students wishing to enroll in the Graduate Certificate program will apply through the Graduate School. A student must be in good standing with their graduate degree program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission. The application process entails completing the online application, paying a $30.00 application fee, and submitting materials required for the Museum Studies Certificate:

- a. A letter stating your interest in Museum Studies and its relationship to your graduate course of study,
- b. An unofficial copy of your KU transcript; and
- c. A letter of support from your graduate degree program.

**Non-KU Students**

Non-KU graduate students must complete an application to the Graduate School for admission into the certificate program and submit an application fee along with the following materials:

- a. A letter stating your interest in the Museum Studies Graduate Certificate program. In 2-3 pages, address such topics as (1) what about museums and museum studies particularly interests you, (2) how the Certificate will support or enhance your career goals, (3) the area of museum work most relevant to your career goals, (4) relevant experience and background information, (5) how KU’s program matches your interests, and (6) anything else you think is important to your application,
- b. A copy of your college transcript;
- c. 2 letters of recommendation from persons familiar with your academic work or potential for graduate study.

The Museum Studies Graduate Certificate will require 15 hours of course work including a 3 credit (minimum) research practicum or internship. The remaining 9 hours will be selected from courses in which there is a demonstrable component that has relevance to museum studies.

Department of Philosophy

Why study philosophy?
Because philosophy teaches you how to think about all aspects of your life and the world around you.

Undergraduate Programs
The department offers a range of courses in philosophy, both in the main systematic divisions of the subject and in its major historical periods. Philosophy courses are often suitable not only for majors but also for students whose main interests lie in other areas. Many philosophy courses satisfy requirements in other degree programs in the College and professional schools.

Argument and Reason Requirement
PHIL 148 and PHIL 310 each meet the College argument and reason requirement for the B.A. and B.G.S. degrees.

Interdisciplinary Course Work
The department offers courses in applied ethics, ethics, feminism, logic, and the philosophy of science to fit the needs and interests of nonmajors. Many of these may be taken without prerequisites. The nonmajor may wish to supplement work in other fields or schools with a series of related courses in philosophy. Some suggested programs to be supplemented with this type of interdisciplinary course work are business, prelaw, premedicine, and engineering; classics, art history, and literature; and natural sciences and mathematics. Lists of philosophy courses relating to these areas are available. Consult the director of undergraduate studies.

Graduate Programs
The department offers graduate programs in philosophy leading to the M.A. and Ph.D. degrees. With the School of Law, the department also offers a joint program in law and philosophy leading to the J.D. in law and the M.A. in philosophy. Our faculty (http://philosophy.ku.edu/faculty) is dynamic, professionally active, and committed to excellence in scholarship and teaching. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation.

Departmental Funding
While it is not guaranteed, the department has best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year (9 months) and come with a starting salary of about $14,500, a 100% tuition waiver, and qualify the student for University-subsidized group health insurance. The appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training, close mentoring, and the opportunity to teach courses in a variety of fields within Philosophy, providing them with a strong base of teaching experience upon entering the job market.

Additional Funding
There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding) for KU graduate students.

Courses
PHIL 140. Introduction to Philosophy. 3 Hours. HR GE11/GE3H / H. An introductory examination, based primarily on writings of major philosophers, of such central philosophical problems as religious belief, the mind and its place in nature, freedom and determinism, morality, and the nature and kinds of human knowledge. LEC.

PHIL 141. Introduction to Philosophy Honors. 3 Hours. HR GE11/GE3H / H. An introductory examination, based primarily on writings of major philosophers, of such central philosophical problems as religious belief, the mind and its place in nature, freedom and determinism, morality, and the nature and kinds of human knowledge. Prerequisite: Open only to students in the University Honors Program or by consent of department. LEC.

PHIL 148. Reason and Argument. 3 Hours. GE11/GE3H / H. An introduction to the theory and practice of logical analysis. Special emphasis is placed upon the logical appraisal of everyday arguments. LEC.

PHIL 150. Philosophical Communication. 3 Hours. GE22 / S. This course provides an introduction to philosophy, with a focus on the traditional philosophical practice of oral communication and argument. Through exploration of perennial philosophical questions (e.g., Are there different ways of knowing? What makes for a good life? Could computers have minds? Are we obligated to obey the law? What makes you the same person over time?), students develop their ability to participate in various forms of philosophical communication. In this course, students have the opportunity to teach course material to peers, engage in class debates over philosophical issues, and craft short presentations exploring a facet of the course topic. LEC.

PHIL 160. Introduction to Ethics. 3 Hours. HR AE51/GE11/GE3H / H. An introductory study of the nature of morality and of philosophical bases for the assessment of actions, agents, and institutions. Special emphasis will be placed upon the views of such important philosophers as Aristotle, Hume, Kant, and Mill. Some attention will be paid to applications of moral theory to practice. LEC.

PHIL 161. Introduction to Ethics Honors. 3 Hours. HR AE51/GE11/GE3H / H. An introductory study of the nature of morality and of philosophical bases for the assessment of actions, agents, and institutions. Special emphasis will be placed upon the views of such important philosophers as Aristotle, Hume, Kant, and Mill. Some attention will be paid to applications of moral theory to practice. Prerequisite: Open only to students in the University Honors Program or by consent of department. LEC.

PHIL 177. First Year Seminar: ______. 3 Hours. GE11 / U. A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Philosophy. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LAB.
PHIL 180. Introduction to Social and Political Philosophy. 3 Hours.  
HR AE51/GE3H / H.  
An introductory study, based primarily on classic philosophical texts, of such central issues as the justification of governmental authority, the social sources of power, the nature of a just distribution of social resources, competing conceptions of human nature, and the proper limits of governmental interference with individual liberty. LEC.

PHIL 181. Introduction to Social and Political Philosophy, Honors. 3 Hours. HR AE51/GE3H / H.  
An introductory study, based primarily on classic philosophical texts, of such central issues as the justification of governmental authority, the social sources of power, the nature of a just distribution of social resources, competing conceptions of human nature, and the proper limits of governmental interference with individual liberty. Prerequisite: Open only to students in the University Honors Program or by consent of department. LEC.

PHIL 350. Philosophical Issues in Religion. 3 Hours. HR AE51/GE3H / H.  
A philosophical analysis of theoretical and ethical issues that arise in the practice of the life sciences. Discusses the conceptual foundation of the life sciences-evolutionary theory and genetics. Critically explores the use of statistical and non-human-animal models. Examines ethical issues including problems that arise in human and other animal experimentation, obligations to the environment, proper use of patents, and conflicts in professional duties. LEC.

PHIL 355. Philosophical Issues in the Life Sciences. 3 Hours. HR AE51/GE3H / H.  
A philosophical analysis of ethical issues that arise in the practice of the life sciences. Discusses the conceptual foundation of the life sciences-evolutionary theory and genetics. Critically explores the use of statistical and non-human-animal models. Examines ethical issues including problems that arise in human and other animal experimentation, obligations to the environment, proper use of patents, and conflicts in professional duties. LEC.

PHIL 360. Moral Issues in Business. 3 Hours. AE51 / H.  
After a brief survey of techniques of moral argument and analysis, particular moral issues related to business will be discussed. These will include such topics as advertising, conflict of interest, personal and corporate responsibility, codes of conduct, private property, strikes, just wage, and the tension between moral ideals and business pressures. LEC.

PHIL 365. Moral Issues in the Professions. 3 Hours. H.  
An analysis of the nature and justification of standards of professional conduct. Issues of professional behavior that concern more than one profession such as fidelity to a client's interests, candor, confidentiality, obligations to human research subjects, obligations to uphold professional standards, professional strikes, and affirmative action will be discussed. LEC.

PHIL 368. Moral Issues in Sports. 3 Hours. H.  
This course is a philosophical investigation of the nature and value of sports. Provides students with an overview of ethical theory and considers principled answers to questions about the values of sports and about how those values can be sustained or demeaned. Students debate a variety of live controversies in sports today such as drugs, cheating, sexism, racism, the role of sports in educational institutions, Title IX, commercialization, and violence. LEC.

PHIL 370. Moral Issues in Medicine. 3 Hours. H.  
After a brief survey of techniques of moral argument and analysis, particular moral issues related to medicine will be discussed. The justification and limits of some rules of professional conduct that deal with such matters as confidentiality, truth-telling, and protection of medical research subjects will be considered. Issues relating to death and dying in medicine such as abortion, euthanasia, and the refusal of life-saving medical therapy also will be discussed. LEC.

PHIL 375. Moral Issues in Computer Technology. 3 Hours. AE51 / H.  
After surveying the nature of ethics and morality and learning some standard techniques of moral argumentation, we shall examine such topics as: property and ownership rights in computer programs and software; privacy in computer entry and records; responsibility for computer use and failure; the "big brother" syndrome made possible by extensive personal data banks; censorship and the world-wide web; computer illiteracy and social displacement; and ethical limits to computer research. Prerequisite: EECS 168 or permission of instructor. LEC.

PHIL 380. Environmental Ethics. 3 Hours. AE51 / H.  
After a brief survey of techniques of moral argument and analysis, particular moral issues related to the environment will be discussed. These will include such topics (one of which may be dealt with in depth) as animal rights, rights of future generations, wilderness preservation, population control, endangered species, and economics and public policy. Prerequisite: EVRN 148 or consent of instructor. LEC.

PHIL 384. Ancient Philosophy. 3 Hours. HR GE3H / H.  
A survey of the writings of such principal philosophers of the modern period as Descartes, Spinoza, Leibniz, Hobbes, Locke, Berkeley, Hume, and Kant. LEC.

PHIL 388. Analytic Philosophy: Frege to Quine. 3 Hours. AE41/GE3H / H.  
An examination of topics of philosophical interest that are important in the feminist movement such as the nature of sexism, the concept of sexual equality, the ethics of sexual behavior, the nature of love, feminist analyses of the value of marriage and family, the ethics of abortion, and justifications for preferential treatment of women. (Same as WGSS 381.) LEC.

PHIL 390. Issues in Philosophy. 3 Hours. AE51/GE3H / H.  
A survey of the works of such principal philosophers of the modern period as Descartes, Spinoza, Leibniz, Hobbes, Locke, Berkeley, Hume, and Kant. LEC.

PHIL 391. Feminism and Philosophy. 3 Hours. AE41/GE3H / H.  
A survey of the works of such principal philosophers of the modern period as Descartes, Spinoza, Leibniz, Hobbes, Locke, Berkeley, Hume, and Kant. LEC.

PHIL 399. Senior Essay. 3 Hours. AE61 / H.  
This course is required, in addition to regular major requirements, of those students wishing to work for departmental honors in Philosophy. Students wishing to enroll should first speak with the departmental adviser for
PHIL 500. Studies in Philosophy: _____, 1-6 Hours. H.
(Topic, instructor, and specific prerequisite to be announced in Schedule of Classes.) A study of particular philosophical problems or thinkers not covered by other courses. The course may be offered concurrently by different instructors under different subtitles, and may, with the consent of the chair, be taken more than once if content varies. LEC.

PHIL 504. Philosophy of Sex and Love. 3 Hours. H.
A discussion of philosophical issues such as the relation between love, autonomy, and friendship; heterosexual and homosexual relationships; marriage and adultery; rape and sexual harassment; prostitution; and pornography. LEC.

PHIL 506. Chinese Thought. 3 Hours. NW AE42/GE3H / H/W.
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as EALC 642 and HWC 524.) Prerequisite: Eastern Civilization course, or a course in Asian history, or a distribution course in Philosophy. LEC.

PHIL 508. Early Greek Philosophy. 3 Hours. H/W.
A study of the doctrines of Greek philosophy before Plato. Emphasis on the Pre-Socratic philosophers, with some attention paid to the Sophists and the Hippocratic corpus. (Same as GRK 508.) Prerequisite: PHIL 384, or GRK 301, or GRK 302, or GRK 303, or GRK 310, or GRK 312, or permission of instructor. LEC.

PHIL 555. Justice and Economic Systems. 3 Hours. H.
An examination of important representative theories of the justness of an economic system, with particular attention paid to such institutions as private property, a market economy, means and relationships of production, and principles of distribution to individuals. The theorists under consideration include Locke, Adam Smith, Marx and Engels, contemporary utilitarians, Rawls, and Nozick. Prerequisite: A course in ethics or an introductory course in economics or in business. LEC.

PHIL 557. Kant. 3 Hours. H.
A survey of the major works of Immanuel Kant, with attention to his critical method and its application to issues in theoretical philosophy, practical philosophy, aesthetics, or the philosophy of history. Prerequisite: PHIL 386. LEC.

PHIL 560. Nineteenth Century Philosophy. 3 Hours. H.
The development of philosophy in the 19th century. Special attention will be paid to such major figures as Hegel, Kierkegaard, Marx, Nietzsche, and Mill. Prerequisite: PHIL 386. LEC.

PHIL 562. Kierkegaard. 3 Hours. H.
A study of the thought of Soren Kierkegaard through examination of some of his major writings. Some attention is given to his influence on the development of existentialist philosophies. Prerequisite: PHIL 384 or PHIL 386. LEC.

PHIL 570. Nietzsche. 3 Hours. H.
A study of Nietzsche's major writings and ideas, with some attention to his philosophical influence. Prerequisite: PHIL 384 or PHIL 386 or permission of instructor. LEC.

PHIL 580. Marxism. 3 Hours. H/W.
A philosophical study of the classical texts of Marxism and of their contemporary development. Prerequisite: A course in philosophy or a course in political science. LEC.

PHIL 582. Existentialism. 3 Hours. H/W.
A study of the main themes and leading philosophers of the existentialist movement. Prerequisite: Two courses in philosophy. LEC.

PHIL 590. Phenomenology. 3 Hours. H.
A study of the main themes and leading philosophers of the phenomenological movement. Prerequisite: PHIL 386. LEC.

PHIL 592. Contemporary Continental Philosophy. 3 Hours. H.
A study of selected topics in 20th century European philosophy, such as hermeneutics, critical theory, and poststructuralism. Figures to be studied could include Heidegger, Gadamer, Adorno, Habermas, and Foucault. Prerequisite: PHIL 386. LEC.

PHIL 600. Readings in Philosophy: _____, 1-6 Hours. H.
Individual reading on topics not covered in course work. Prerequisite: Consent of instructor. IND.

PHIL 605. The Philosophy of Plato. 3 Hours. H.
A survey of the major works of Plato, with attention both to Plato's distinctive arguments and positions in the major areas of philosophy and to the distinctive literary form in which Plato presents his thinking. Prerequisite: PHIL 384. LEC.

PHIL 607. The Philosophy of Aristotle. 3 Hours. H.
A survey of the major works of Aristotle, with the aim of understanding Aristotle's distinctive formulations of central philosophical questions, the arguments he presents for his answers to those questions, and the systematic interconnections between his positions in the different areas of philosophy. Prerequisite: PHIL 384. LEC.

PHIL 608. Hellenistic Philosophy. 3 Hours. H.
Survey of Stoicism, Epicureanism, and Scepticism from their beginnings through the second century AD. Prerequisite: PHIL 384 and another course in philosophy. LEC.

PHIL 610. Symbolic Logic. 3 Hours. H.
Propositional calculus, predicate calculus, consistency, decidability of formal systems, the paradoxes and number concept will be covered. LEC.

PHIL 611. Topics in Symbolic Logic: _____, 1-3 Hours. H.
This course is a workshop in any of a variety of topics in symbolic logic of special importance to contemporary analytic philosophy, such as modal logic, tense logic, axiomatic set theory, Goedel's theorems, model theory, etc. May be repeated for credit as topics vary. Prerequisite: PHIL 310. LEC.

PHIL 620. Philosophy of Natural Science. 3 Hours. H.
An examination of conceptual and foundational issues in the natural sciences. Topics may include the methodology of science (the nature and status of laws, the precise way in which experiment contributes to theory) and puzzles concerning the content of science (the status of space and time, the problematic nature of quantum mechanics). Prerequisite: PHIL 310 or PHIL 610, or permission of instructor. LEC.

PHIL 622. Philosophy of Social Science. 3 Hours. H.
A critical examination of the methods, concepts, and practices of the social sciences. Topics to be considered may include: theories of explanation, methodological individualism vs. holism, objectivity, the role of rationality, myth and the unconscious in the explanation of behavior, and the value neutrality of science. Prerequisite: One previous course in philosophy, or permission of instructor. LEC.

PHIL 628. Philosophy of Logic. 3 Hours. H.
A systematic treatment of logical theory. Different types of logic will be studied along with their philosophical assumptions, motivations, implications, and uses. Prerequisite: PHIL 310 or PHIL 610. LEC.

PHIL 630. Philosophy of Mathematics. 3 Hours. H.
An examination of varying conceptions of the role and status of mathematical arguments. Topics may include realism/anti-realism, the consequences of Goedel's Incompleteness Theorems, the role of
mathematics in the sciences, and an examination of such historical thinkers as Plato, Frege, Russell, Wittgenstein, Goedel, and Hilbert. Prerequisite: PHIL 310 or PHIL 610, or permission of instructor. LEC.

PHIL 638. Philosophy of Language. 3 Hours. AE61 / H.
An examination of the nature of language using the methods of analytic philosophy. Topics may include meaning, truth, reference, language and thought, and the nature of linguistic rules. Prerequisite: PHIL 388 or permission of instructor. LEC.

PHIL 648. Theory of Knowledge. 3 Hours. AE61 / H.
An examination of the nature of knowledge. Topics may include the concept of knowledge, knowledge of the external world, induction, theories of justification, and scientific knowledge. Prerequisite: PHIL 384 and PHIL 386, PHIL 388 (which may be taken concurrently), or permission of instructor. LEC.

PHIL 650. Metaphysics. 3 Hours. AE61 / H.
An examination of some of the central issues in metaphysics. Topics may include causation, the mind-body problem, free will and determinism, modality, natural kinds, the nature of properties, and personal identity. Prerequisite: PHIL 384 and PHIL 386, PHIL 388 (which may be taken concurrently), or permission of instructor. LEC.

PHIL 654. Philosophy of Mind. 3 Hours. AE61 / H.
An examination of the nature of mind using the methods of analytic philosophy. Topics may include consciousness, perception, propositional attitudes, thought and language, action and intention, mind and body, the prospects for scientific psychology, and personal identity. Prerequisite: PHIL 388 or permission of instructor. LEC.

PHIL 662. Aesthetics. 3 Hours. H.
A study of some of the central themes and problems in aesthetics, such as the beautiful and the sublime in nature and the arts. Prerequisite: Two courses in philosophy or graduate standing. LEC.

PHIL 666. Rational Choice Theory. 3 Hours. H.
This course is an introduction to the philosophical issues surrounding individual decision theory, game theory, and social choice theory. This includes issues of scientific theory selection, the nature of preference, the uses of games to model social interaction, and the ethical and political implications of Arrow's impossibility theorem. Formal techniques of modeling and proof, akin to those used in logic and mathematics, will be used in much of the course. Prerequisite: Two courses in economics, a philosophy course numbered 500 or above, or consent of instructor. LEC.

PHIL 668. Political Philosophy. 3 Hours. H.
A systematic analysis of the concepts of politics, with reference to representative political theories. Prerequisite: A course in philosophy and a course in political science. LEC.

PHIL 670. Contemporary Ethical Theory. 3 Hours. AE51 / H.
An examination of some major moral philosophers and some important issues in ethical theory since the beginning of the twentieth century. Topics covered typically include intuitionism, emotivism, utilitarianism, virtue ethics, and the relationship between morality and rationality. Prerequisite: PHIL 160 or PHIL 161 or two courses in philosophy. LEC.

PHIL 671. Feminist Theories in Ethics. 3 Hours. H.
This course addresses the role (if any) that gender plays in constructing ethical theories. Topics include the impact of culture, affect, and the body on our understanding of gender differences and the importance of these differences for ethics. Prerequisite: PHIL 160 or PHIL 161, or two previous philosophy courses. LEC.

PHIL 672. History of Ethics. 3 Hours. AE51 / H.
An interpretive and critical examination of central texts in the history of moral philosophy, which may include works by Aristotle, Hume, Kant, and J.S. Mill. Prerequisite: PHIL 160 or PHIL 161 or two previous philosophy courses. LEC.

PHIL 674. Philosophy of Law. 3 Hours. H.
An examination of the concept of law and of legal reasoning. In addition, the course may consider such topics as natural law, legal excuses, the relations between law and morality, civil disobedience, civil liberties, the concept of property. Prerequisite: Two courses in philosophy or one course in philosophy and one course in law or consent of instructor. LEC.

PHIL 676. Medical Ethics: Life and Death Issues. 3 Hours. AE51 / H.
After a brief survey of techniques of moral argument and analysis especially as they pertain to the moral impermissibility of murder, particular moral and conceptual issues relating to death and dying in medical contexts will be addressed. Topics such as abortion, infanticide, suicide, euthanasia, the definition of death, and the right to refuse life-saving medical therapy will be included. Prerequisite: Two courses in biology or consent of instructor. LEC.

PHIL 677. Medical Ethics: Professional Responsibilities. 3 Hours. H.
After a brief survey of techniques of moral argument and analysis, particular moral issues related to the obligations of health care professionals and the rights of patients will be discussed. These will include such matters as confidentiality, truth-telling, informed consent, the ethics of research on human subjects, psychosurgery, the rights of the mentally ill, and the rights of the mentally retarded. Prerequisite: Two courses in biology or consent of instructor. LEC.

PHIL 684. Main Currents of Russian Thought I. 3 Hours. H/W.
A study of philosophical, theological and literary monuments designed to acquaint the student with the main cultural forces that have shaped Russian thought and manners. From the origins to Napoleonic times. (Same as SLAV 684.) LEC.

PHIL 686. Main Currents of Russian Thought II. 3 Hours. H/W.
A continuation of SLAV 684 from the age of Pushkin to the present. (Same as SLAV 686.) LEC.

PHIL 800. Tutorial. 3 Hours.
Intensive supervised training in and application of the techniques of research. Required of every graduate student seeking an advanced degree in the first or second semester of enrollment. Passing this tutorial constitutes partial fulfillment of the Ph.D. RSRS requirements. Consent of instructor required for repeating the course. Prerequisite: Graduate standing. RSH.

PHIL 805. Plato. 3 Hours.
Prerequisite: PHIL 508 or PHIL 605 or PHIL 607 or PHIL 608 or permission of instructor. LEC.

PHIL 807. Aristotle. 3 Hours.
Prerequisite: PHIL 508 or PHIL 605 or PHIL 607 or PHIL 608 or permission of instructor. LEC.

PHIL 820. Topics in the History of Philosophy: ______. 3 Hours.
This course may be offered by different instructors under different specified or permission of instructor. LEC.

PHIL 824. Hume. 3 Hours.
Prerequisite: PHIL 648 or PHIL 650 or PHIL 654 or permission of instructor. LEC.

PHIL 828. Kant. 3 Hours.
Prerequisite: PHIL 648 or PHIL 650 or PHIL 654 or permission of instructor. LEC.
PHIL 831. Hegel. 3 Hours.
Prerequisite: PHIL 560 or 500-600 level course as specified or permission of instructor. LEC.

PHIL 833. Nietzsche. 3 Hours.
A study of the philosophy of Friedrich Nietzsche. Prerequisite: PHIL 560 or PHIL 570 or permission of instructor. LEC.

PHIL 835. Frege. 3 Hours.
Gottlob Frege was the founder of the analytic movement in philosophy, having done seminal work in logic, the philosophy of language, and the philosophy of mathematics. This course will focus on his primary texts as well as his influence on present-day studies. Prerequisite: PHIL 628 or PHIL 630 or PHIL 638 or permission of instructor. LEC.

PHIL 843. Heidegger. 3 Hours.
Prerequisite: PHIL 560 or PHIL 562 or PHIL 570 or PHIL 582 or PHIL 590 or PHIL 592 or permission of instructor. LEC.

PHIL 848. Wittgenstein. 3 Hours.
Prerequisite: PHIL 638 or PHIL 650 or PHIL 654 or permission of instructor. LEC.

PHIL 850. Topics in Recent Philosophy: ____. 3 Hours.
This course may be offered by different instructors under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic, instructor, and specific prerequisite to be announced in Schedule of Classes. Prerequisite: 500-600 level as specified or permission of instructor. LEC.

PHIL 852. Quine. 3 Hours.
A systematic study of the major work of W. V. Quine and its influence on subsequent analytic philosophy. Topics will include Quine's theory of meaning, philosophical logic, and philosophy of science. Prerequisite: PHIL 638 or PHIL 648 or PHIL 650 or PHIL 654 or permission of instructor. LEC.

PHIL 855. Davidson. 3 Hours.
An examination of Donald Davidson's seminal work in philosophy of language and philosophy of mind. Among the topics to be considered will be meaning, truth, interpretation, action, and propositional attitudes. Prerequisite: PHIL 638 or PHIL 654 or permission of instructor. LEC.

PHIL 860. Topics in Philosophy of Science: ____. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 620 or PHIL 622 or PHIL 648 or PHIL 650 or permission of instructor. LEC.

PHIL 862. Topics in Logic: ____. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 610 or PHIL 628 or PHIL 630 or permission of instructor. LEC.

PHIL 866. Topics in Philosophy of Language: ____. 3 Hours.
This course may be offered under different subtitles and may be taken more than once if the subject matter varies sufficiently. Prerequisite: PHIL 638 or permission of instructor. LEC.

PHIL 870. Topics in Metaphysics: ____. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 650 or permission of instructor. LEC.

PHIL 872. Topics in Theory of Knowledge: ____. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 648 or permission of instructor. LEC.

PHIL 877. Topics in Philosophy of Mind: ____. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 654 or permission of instructor. LEC.

PHIL 880. Topics in Ethics: ____. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 670 or PHIL 672 or permission of instructor. LEC.

PHIL 884. Topics in Social and Political Philosophy: ____. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 555 or PHIL 666 or PHIL 668 or PHIL 674 or permission of instructor. LEC.

PHIL 885. Topics in Law and Philosophy. 3 Hours.
Explores various topics at the intersection of law and philosophy. Content varies but may include: What is freedom and what role should government play in a free society? What is equality and what is the best way to achieve it? What is the relationship between law and social justice? What is the source and value of human rights? Should social and economic rights be legally guaranteed? How should government redress historical injustices such as slavery, apartheid, and the Holocaust? Students must complete a substantial seminar paper. (Same as LAW 962.) LEC.

PHIL 886. Topics in Applied Ethics: ____. 3 Hours.
This course may be offered under different subtitles, such as professional ethics or some issue in business ethics (e.g., corporate responsibility) or in medical ethics (e.g., the definition of death); it may be taken more than once if the subject matter varies sufficiently. Topic, instructor, and specific prerequisite to be announced in Schedule of Classes. Prerequisite: PHIL 670 or PHIL 672 or 500-600 level course as specified or permission of instructor. LEC.

PHIL 888. Topics in the Philosophy of the Social Sciences: ____. 3 Hours.
This course may be offered under different subtitles, such as philosophy of a particular social science (e.g., economics, psychology) or a particular issue in the social sciences (e.g., ideology, reductionism), and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 622 or permission of instructor. LEC.

PHIL 890. Topics in Continental Philosophy: ____. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic, instructor, and specific prerequisites to be announced in the Schedule of Classes. LEC.

PHIL 899. Master's Thesis. 1.6 Hours.
Six hours of credit will be awarded upon completion of the master's thesis, but no more than six hours of credit may be obtained in this course altogether. Graded on a satisfactory/unsatisfactory basis. THE.
PHIL 900. Research in Philosophy: ____. 1-3 Hours.  
Intensive research in philosophy. This course may be taken through  
individual arrangement, or in connection with small research seminars  
which are offered occasionally. Students may only enroll for three hours  
in any given semester. May be repeated if content varies significantly.  
Prerequisite: Twelve hours of graduate work. RSH.

PHIL 901. Ph.D. Tutorial. 3 Hours.  
Independent research on any topic that a graduate student and a faculty  
member shall agree on. It shall result in a tightly focused 20-30 page  
paper. The student's written work will be repeatedly evaluated over the  
semester by the director, and the final product must be defended in  
an oral examination conducted by a three-member faculty committee  
(including the director). Prerequisite: Students must be admitted to the  
Ph.D. program and have successfully completed the Ph.D. core courses  
requirement. RSH.

PHIL 999. Dissertation. 1-12 Hours.  
This course may be taken more than once, but not for more than  
twelve hours of credit in any one semester. Graded on a satisfactory/  
unsatisfactory basis. THE.

Bachelor of Arts and Bachelor of  
General Studies in Philosophy

Why study philosophy?  
Because philosophy teaches you how to think about all aspects of your  
life and the world around you.

Undergraduate Admission  
Admission to KU  
All students applying for admission must send high school and college  
transcripts to the Office of Admissions. Unless they are college transfer  
students with at least 24 hours of credit, prospective students must send  
ACT or SAT scores to the Office of Admissions. Prospective first-year  
students should be aware that KU has qualified admission requirements  
that all new first-year students must meet to be admitted. Consult the  
Office of Admissions (http://admissions.ku.edu) for application deadlines  
and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://  
www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-  
level course work will transfer on the Office of Admissions (http://  
credittransfer.ku.edu) website.

Admission to the College of Liberal Arts  
and Sciences  
Admission to the College is a different process from admission to a  
major field. Some CLAS departments have admission requirements.  
See individual department/program sections for departmental admission  
requirements.

First- and Second-Year Preparation  
Although majors are not required to take courses in philosophy in their  
first 2 years, the department recommends that they do so. Prospective  
majors are encouraged to begin with one of the 100-level courses. These  
courses provide introductions to broad areas of philosophy, and students  
may apply one 100-level course toward the major requirements. PHIL  
310, PHIL 384, PHIL 386, and PHIL 388 are required prerequisites for  
upper-division work and should be taken early. Prospective majors should  
consult the director of undergraduate studies early to plan course work.

Requirements for the B.A. or B.G.S. Major  
 Philosophy Major Core Knowledge and Skills (6)  
 Majors must complete a course in each of the following areas:  
 Ancient Philosophy. Satisfied by:  
 PHIL 384 Ancient Philosophy 3  
 Modern Philosophy from Descartes to Kant. Satisfied by:  
 PHIL 386 Modern Philosophy from Descartes to Kant 3  
 Philosophy Major Required Electives (15)  
 Symbolic Logic. Satisfied by one of the following:  
 PHIL 310 Introduction to Symbolic Logic 3  
or PHIL 610 Symbolic Logic  
 Value Theory. Satisfied by completing one of the following courses:  
 PHIL 555 Justice and Economic Systems 3  
 PHIL 662 Aesthetics 3  
 PHIL 668 Political Philosophy 3  
 PHIL 670 Contemporary Ethical Theory 3  
 PHIL 672 History of Ethics 3  
 Metaphysics / Theory of Knowledge / Philosophy of Language /  
 Philosophy of Mind. Satisfied by completing one of the following  
courses:  
 PHIL 638 Philosophy of Language 3  
 PHIL 648 Theory of Knowledge 3  
 PHIL 650 Metaphysics 3  
 PHIL 654 Philosophy of Mind 3  
 19th/20th Century Philosophy. Satisfied by:  
 PHIL 388 Analytic Philosophy: Frege to Quine 3  
 1 course from those numbered PHIL 560 - PHIL 592 3  
 Additional Electives (6)  
 Satisfied by completing 6 additional hours of PHIL courses, 3 hours of  
 which must be at the at the 500-level or above.

Major Hours & Major GPA  
While completing all required courses, majors must also meet each of the  
following hour and GPA minimum standards:

Major Hours  
Satisfied by 27 hours of major courses, or 33 hours required if completing  
departmental honors course PHIL 499.

Major Hours in Residence  
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours  
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in  
the major.

Major Junior/Senior (500+) Hours  
Satisfied by a minimum of 12 hours from junior/senior courses (500+) in  
the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

A sample 4-year plan for the BA degree in Philosophy can be found here: Philosophy (http://catalog.ku.edu/liberal-arts-sciences/philosophy/ba-bgs/ ba-philosophy), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Philosophy will be coming soon.

**Departmental Honors**

To graduate with departmental honors, undergraduates must take 6 hours in philosophy in addition to the 27 hours required for the B.A. or B.G.S., for a total of 33 hours. The 6 additional hours include

- An additional course numbered 500 or above for a total of at least 15 hours at that level, and
- PHIL 499 Senior Essay.

A committee of 3 faculty members reads the finished essay, gives the candidate an oral examination over the essay, and determines whether it warrants honors. This committee must consist of the instructor in PHIL 499, the departmental honors coordinator, and a third member of the philosophy faculty.

Honors are not awarded to anyone who receives a grade lower than B in PHIL 499, whose final grade-point average in philosophy is lower than 3.5, or whose final KU or cumulative grade-point average is lower than 3.25. To be eligible for departmental honors, students must file a declaration of intent with the departmental honors coordinator no later than enrollment for the final undergraduate semester.

The most important element in departmental honors is the honors essay. Once a student has determined the area in which he or she wishes to work, he or she should arrange to write the essay under the guidance of a faculty member with appropriate expertise. Ideally, this work should be completed during a single semester. However, students often find it difficult to complete the essay in one semester. Therefore, we recommend that the essay be begun in the semester before the one in which the student intends to graduate (typically, in the fall semester of the senior year).

The honors essay should be intermediate between a master’s thesis and a term paper. It should normally be at least 20 pages (6,000 words) long. It should go beyond mere exposition, whether by criticism or by comparison of different works. Interpretations of rare or difficult texts may occasionally be accepted.

**Minor Hours and Minor GPA**

While completing all required courses (above), minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 junior/senior courses (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Master of Arts in Philosophy**

The philosophy department at the University of Kansas comprises of 13 faculty members and about 35 graduate students. The department has traditionally fostered teaching and research that reflects a number of different philosophical orientations and fields of philosophy. Courses are taught on a broad range of topics. Master’s theses and dissertations have had a similarly wide range of themes. The department's chief strengths are in history of philosophy (ancient, modern, 19th century), ethics, social-political philosophy, and analytic philosophy, including philosophy of language, philosophy of mind, and metaphysics. The department is in Wescoe Hall, the main humanities building.

The M.A. degree requires 30 hours of graduate course work, including a first-year graduate tutorial and at least 12 additional hours of seminar and/or thesis work. M.A. candidates must pass a comprehensive examination over their course work or must write and successfully defend an M.A. thesis.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the M.A. in Philosophy**

Apply to the graduate program via the Office of Graduate Studies online application system (http://wwwgraduate.ku.edu).

In addition to the general admission requirements (http://wwwgraduate.ku.edu/application-process) from the Office of Graduate Studies, applicants are expected to have taken the following seven courses or their equivalents as preparation for graduate work:

**Minor in Philosophy**

**Why study philosophy?**

Because philosophy teaches you how to think about all aspects of your life and the world around you.

**Requirements for the Minor**

Students selecting this option must complete at least 6 courses (18 hours) of philosophy elective courses

PHIL 384 and especially PHIL 386 are strongly recommended.
1. symbolic logic
2. history of ancient philosophy
3. history of modern philosophy
4. history of 20th-century analytic philosophy (roughly from Frege to Quine)
5. history of 19th/20th-century Continental philosophy
6. value theory
7. metaphysics/epistemology (broadly construed to include philosophy of language and philosophy of mind).

Students may be admitted without some of these courses, but they are expected to make up the deficiencies early in their graduate careers and outside of the minimum hours required for degree.

For additional information, including relevant deadlines and a list of required supplemental documentation to be submitted with the online application, please visit the graduate page of the Philosophy website (http://philosophy.ku.edu/graduate-admissions), or contact the department Graduate Program Coordinator, Cari Ann Kreienhop, ckreienhop@ku.edu.

Fast-Track M.A. (for Undergraduate Majors in Philosophy at KU)

The fast-track M.A. provides excellent KU undergraduates in Philosophy an opportunity to complete an MA in Philosophy within a year of completing the bachelor’s degree. Talented students who are planning to continue their studies at the doctoral level or to continue to law school will receive a competitive advantage by acquiring a graduate degree in less time than a traditional terminal M.A.

Admission Requirements
1. All requirements for a bachelor’s in philosophy from KU complete or in progress
2. GPA of 3.5 in philosophy
3. GRE not required, though the department will consider GRE scores as part of an application

Degree Requirements
Students must complete all of the following requirements for the Fast-Track M.A. within one calendar year post-bachelor’s:

1. 24 credit hours of graduate coursework (500-level or above) in philosophy post-bachelor’s with a grade of B or higher. At least 15 of these hours must be in courses numbered 800 or above. Students must complete two courses at the 500-level or above (or the equivalent) in each of these areas: history of philosophy, metaphysics and epistemology (broadly construed), and value theory. Courses taken during the undergraduate career may be counted toward these area requirements, but such work does not count toward the overall 24-hour graduate credit requirement unless the student took this course work for graduate credit and it has department approval.
2. PHIL 800 Tutorial with a grade of B or higher
3. An M.A. exam consisting in the oral defense of a seminar paper of the student’s choosing

Time Limits and Other Restrictions
Students must maintain a minimum GPA of 3.5 in the first semester of graduate study in order to maintain eligibility for the program. They will be subject to a formal mid-year review to ensure satisfactory progress towards completion of the degree.

A student who receives a bachelor’s degree in Spring or Summer begins the M.A. portion of the degree that Fall. The student must then complete all requirements for the Fast-Track M.A. by the first day of classes the following Fall. For example, if a student receives the bachelor’s in Spring 2014 and is accepted into this M.A. track, that student begins the additional year of coursework in Fall 2014 and must complete all requirements for the Fast-Track M.A. by the first day of classes in Fall 2015. Similarly, a student who receives the bachelor’s in the Fall begins the M.A. portion of the degree in the Spring. The student must then complete all requirements for the Fast-Track M.A. by the first day of classes the following Spring.

If a student does not complete the Fast-Track M.A. requirements within one year post-bachelor’s, the student may petition the department for admission to the standard 30-hour M.A. track. In extraordinary circumstances, for example, serious illness, students may petition the department to remain in the 24-hour track.

Application Deadlines
Students who receive a bachelor’s from KU in Spring or Summer must have a completed application with all supplemental documentation by August 1. Priority consideration is guaranteed for students whose applications are complete by April 30. Students who receive a bachelor’s in Fall must have a completed application by November 30.

Students that submit an application by January 15 may be considered for funding in the form of a graduate fellowship.

Interested students are encouraged to contact the department Director of Graduate Studies, Dr. Dale Dorsey, ddorsey@ku.edu, as early as possible during their undergraduate studies.

M.A. Degree Requirements
The department offers thesis and non-thesis M.A. options. Both require:

1. 30 credit hours of graduate work in philosophy with a grade of B- or higher, with a GPA of at least 3.0 over all courses in philosophy. At least 15 of these hours must be in courses numbered 800 or above and, for the thesis option, may include up to 6 hours of PHIL 899 Master’s Thesis. Students must complete two courses at the 500 level or above (or the equivalent) in each of these areas: history of philosophy, metaphysics and epistemology (broadly construed), and value theory. Courses taken during the undergraduate career may be counted toward these area requirements, but such work does not count toward the overall 30-hour graduate credit requirement unless the student took this course work for graduate credit and it has department approval.
2. PHIL 800 Tutorial must be taken in the first year of study
3. A final examination:
   a. For the thesis option, the student must submit an acceptable thesis and pass a 2-part oral or written examination including 1 part covering the material of the M.A. program generally and a second part devoted to a defense of the thesis.
   b. For the non-thesis option, the student must pass an oral examination covering the material of the M.A. program. The non-thesis option final exam can be satisfied by Ph.D. students who
successfully complete PHIL 901 Ph.D. Tutorial with a grade of B or higher.

Time Limits and Other Restrictions
Information on time limits may be found under Master’s Degree Requirements and Program Time Constraints in the Graduate Studies section of the online catalog. The rule for transferring credit toward the M.A. appears under General Regulations in the Graduate Studies section of the online catalog.

Juris Doctor and Master of Arts in Philosophy

Joint J.D.-M.A. Degree Program
The joint degree program leading to the J.D. and the M.A. in philosophy develops a student's understanding and appreciation of the converging disciplines of law and philosophy. The program combines into 3 years and 1 summer session the normal 3-year J.D. program offered by the School of Law and the 2-year M.A. in philosophy program offered by the Department of Philosophy in the College of Liberal Arts and Sciences. Students complete 81 credit hours in law and 21 credit hours in philosophy. Generally, students apply to the School of Law first, and then, if admitted, apply to the M.A. in Philosophy during the fall of their first year in the Law School. The J.D. and M.A. diplomas are then awarded concurrently after completion of joint degree program requirements.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Joint Program
The program is open to those who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records indicate that they have the capacity to complete the program. Applicants must meet the admission requirements and prerequisites of the School of Law and the Department of Philosophy. The only exception to this is that the Law School Admission Test (LSAT) is the only required entrance examination for such applicants (GRE is not required for either program). Students must apply and be admitted to each school separately. Generally, students apply to the School of Law first, and if admitted, apply later to the M.A. in Philosophy for a start date of the following Fall semester. A student who desires to enter the program while enrolled in the first year of the J.D. or M.A. in philosophy must consult and obtain approval from the School of Law, the Department of Philosophy, and the College of Liberal Arts and Sciences. No student may enter the combined program after completing more than 30 credit hours in the School of Law or 12 hours in the Department of Philosophy.

For information about applying to the Law School, see the school website (http://www.law.ku.edu/admissions). For information about applying to the M.A. program in Philosophy, please visit the graduate program page (http://philosophy.ku.edu/graduate-admissions) of the Philosophy department website, or contact the Graduate Program Coordinator, Cari Ann Kreienhop, ckreienhop@ku.edu.

It is essential for the student to consult the director of graduate studies in philosophy and a representative of the School of Law about specific courses required or recommended for this program.

For additional information, see the School of Law (p. 752) and the Guidelines and Information for Graduate Students available from the Department of Philosophy (http://philosophy.ku.edu).

Doctor of Philosophy in Philosophy

The philosophy department at the University of Kansas comprises of 13 faculty members and about 35 graduate students. The department has traditionally fostered teaching and research that reflects a number of different philosophical orientations and fields of philosophy. Courses are taught on a broad range of topics. Master’s theses and dissertations have had a similarly wide range of themes. The department’s chief strengths are in history of philosophy (ancient, modern, 19th century), ethics, social-political philosophy, and analytic philosophy, including philosophy of language, philosophy of mind, and metaphysics. The department is in Wescoe Hall, the main humanities building.

The Ph.D. degree requires 39 hours of graduate course work, including a first-year graduate tutorial and a research tutorial. Ph.D. candidates
also must satisfy the University’s Research Skills and Responsible Scholarship requirement, pass both a departmental examination over the research tutorial and an oral comprehensive examination, and write and successfully defend a dissertation. The M.A./J.D. degree combines into 3 years and 1 summer session the programs for both degrees.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 23699) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the Ph.D. in Philosophy**

Apply to the graduate program via the Office of Graduate Studies online application system (http://www.graduate.ku.edu).

In addition to the general admission requirements (http://www.graduate.ku.edu/application-process) from the Office of Graduate Studies, applicants are expected to have taken the following seven courses or their equivalents as preparation for graduate work:

1. symbolic logic
2. history of ancient philosophy
3. history of modern philosophy
4. history of 20th-century analytic philosophy (roughly from Frege to Quine)
5. history of 19th/20th-century Continental philosophy
6. value theory
7. metaphysics/epistemology (broadly construed to include philosophy of language and philosophy of mind).

Students may be admitted without some of these courses, but they are expected to make up the deficiencies early in their graduate careers and outside of the minimum hours required for degree.

For additional information, including relevant deadlines and a list of required supplemental documentation to be submitted with the online application, please visit the graduate page of the Philosophy (http://www.philosophy.ku.edu) website, or contact the department Graduate Program Coordinator, Cari Ann Kreienhop, ckreienhop@ku.edu.

**Ph.D. Degree Requirements**

A student preparing for a doctorate in philosophy must meet general requirements and, before officially enrolling in PHIL 999 Dissertation, must satisfy these special requirements:

Complete at least 39 credit hours of graduate work in regular philosophy courses numbered 500 or above with grades in each course of at least B– and an overall grade-point average of at least B in all graduate philosophy courses. At least 24 of these hours must be at the 800 level or above (including PHIL 800 Tutorial and PHIL 901 Ph.D. Tutorial). Beyond the 39-hour requirement, additional hours in PHIL 999 Dissertation are required as appropriate in accordance with the rules of the Office of Graduate Studies and the Department.

1. Complete PHIL 800 **Tutorial** with a grade of B- or higher in the first year of enrollment.
2. **Formal Philosophy Requirement:** Complete PHIL 610 Symbolic Logic or PHIL 666 Rational Choice Theory with a grade of B- or higher.
3. **Ph.D. Course Distribution Requirement:**

   **Metaphysics and Epistemology (6)**
   
   Select two of the following:
   
   - PHIL 620 Philosophy of Natural Science
   - PHIL 622 Philosophy of Social Science
   - PHIL 628 Philosophy of Logic
   - PHIL 630 Philosophy of Mathematics
   - PHIL 638 Philosophy of Language
   - PHIL 648 Theory of Knowledge
   - PHIL 650 Metaphysics
   - PHIL 654 Philosophy of Mind
   - PHIL 850 Topics in Recent Philosophy: ______
   - PHIL 860 Topics in Philosophy of Science: ______
   - PHIL 862 Topics in Logic: ______
   - PHIL 868 Topics in Philosophy of Language: ______
   - PHIL 870 Topics in Metaphysics: ______
   - PHIL 872 Topics in Theory of Knowledge: ______
   - PHIL 877 Topics in Philosophy of Mind: ______
   - PHIL 888 Topics in the Philosophy of the Social Sciences: ______

   **Value Theory (6)**
   
   Select two of the following:
   
   - PHIL 504 Philosophy of Sex and Love
   - PHIL 555 Justice and Economic Systems
   - PHIL 662 Aesthetics
   - PHIL 668 Political Philosophy
   - PHIL 670 Contemporary Ethical Theory
   - PHIL 671 Feminist Theories in Ethics
   - PHIL 672 History of Ethics
   - PHIL 674 Philosophy of Law
   - PHIL 676 Medical Ethics: Life and Death Issues
   - PHIL 677 Medical Ethics: Professional Responsibilities
   - PHIL 850 Topics in Recent Philosophy: ______
   - PHIL 880 Topics in Ethics: ______
   - PHIL 884 Topics in Social and Political Philosophy: ______
   - PHIL 885 Topics in Law and Philosophy
   - PHIL 886 Topics in Applied Ethics: ______

   **Ancient Philosophy (3)**
   
   Select one of the following:
   
   - PHIL 508 Early Greek Philosophy
   - PHIL 605 The Philosophy of Plato
   - PHIL 607 The Philosophy of Aristotle
   - PHIL 608 Hellenistic Philosophy
   - PHIL 805 Plato
   - PHIL 807 Aristotle
   - PHIL 820 Topics in the History of Philosophy: ______
Reduction of Credits

University graduate credit policy (http://policy.ku.edu/graduate-studies/graduate-credit) does not allow for a direct transfer of credits toward the Ph.D.; however, the department's requirement of 39 credit hours of acceptable graduate work for the Ph.D. may be reduced by departmental petition depending on the amount and quality of equivalent graduate work completed at another institution. At minimum, 24 hours of acceptable graduate work must be taken in the Department of Philosophy at KU.

Department of Physics and Astronomy

Why study physics and astronomy?

Because understanding the physical universe starts here.

Undergraduate Programs

The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics, and prepares students majoring in astronomy for graduate study in astronomy or related fields.

The physics curriculum includes course work for those who want a sound background in physics as part of their general education, for those who study physics as part of their training in other fields, and for those whose post-graduate plans include research or employment in physics or related fields.

Courses for Nonmajors

ASTR 191 is a survey of contemporary astronomy, taught at a level using basic mathematics; ASTR 391 offers an introduction to physical astronomy at a calculus-based level. PHSX 111 provides a general introduction to important physics topics and is taught at a level using basic algebra. The department offers two introductory physics sequences that include laboratory work. PHSX 114 and PHSX 115 cover the major fields of physics without calculus. PHSX 211 and PHSX 212, with labs PHSX 216 and PHSX 236, provide a calculus-based foundation in physics for students in physical science, engineering, and mathematics. PHSX 313 and the laboratory course, PHSX 316, provide an introduction to modern physics for majors in physics and some engineering and physical science programs.

Students in biological sciences, health sciences, physical sciences, mathematics, engineering, and prospective elementary and secondary teachers should see appropriate sections of this catalog and major advisors for guidance about required physics course work. Chemistry majors should note that PHSX 211 and PHSX 212 are prerequisites to advanced work in chemistry.

For programs in engineering physics (p. 629), see the School of Engineering section of the online catalog.

Graduate Programs

At the graduate level, the Department of Physics and Astronomy offers Master of Science and Doctor of Philosophy degrees in Physics and a Master of Science degree with a subspecialty in computational physics and astronomy.

Information about admission, requirements, and graduate programs is also on the Department of Physics & Astronomy web page.

Courses

ASTR 177. First Year Seminar: _____ 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Astronomy. Course is designed to meet the critical...
thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

**ASTR 190. Astronomy and Civilization. 3 Hours. N.**
A survey course that describes the interplay between the science of astronomy and cultural beliefs. It uses, among others, examples of how religious and philosophical tenets have enhanced or conflicted with scientific principles. Not for astronomy majors. LEC.

**ASTR 191. Contemporary Astronomy. 3 Hours. NP GE3N / N.**
The structure and evolution of the universe, from nearby planets to distant quasars, are examined. Topics include recent discoveries concerning planets, stars, pulsars and black holes as well as their evolution, the structure of the universe today and how it will be in the future. The emphasis is descriptive rather than mathematical. Prerequisite: Eligibility for MATH 101. LEC.

**ASTR 293. Astronomy Bizarre. 3 Hours. GE3N / N.**
An exploration of physical phenomena found in astrophysical extremes. Topics may include the following: the most violent explosions in the Universe (supernovae and gamma ray bursts; the biggest collisions in nature (galaxy interactions; the densest and most bizarre forms of matter (white dwarfs, neutron stars); the strongest magnetic fields (magnetars, pulsars); the amazing range of exo-planetary properties; and the mysteries of black holes. Prerequisite: Eligibility for MATH 101. LEC.

**ASTR 390. Undergraduate Problems. 1-3 Hours. AE61 / N.**
Undergraduate observational or theoretical problems in astronomy. Maximum credit, six hours. Prerequisite: Permission of department. IND.

**ASTR 391. Physical Astronomy, Honors. 3 Hours. NP GE12/GE3N / N.**
An honors, calculus-based introduction to astronomy and astrophysics, required for astronomy majors. Components of the Universe - from planetary systems, stellar systems, large scale structure and cosmology - are examined to illuminate the physics principles which govern their evolution. Prerequisite: MATH 125, and either permission of instructor, or participation in the University Honors Program. LEC.

**ASTR 394. The Quest for Extraterrestrial Life. 3 Hours. NP GE11 / N.**
An introduction to the search for planets around other stars and for life in the universe beyond the earth. A discussion of the astronomical conditions under which life might form and the biological conditions of life formation and evolution. Methods of searching for extraterrestrial life. Prerequisite: An introductory course in biology, astronomy or geology. LEC.

**ASTR 400. Topics in Astronomy: , 1-3 Hours. N.**
A course on special topics in astronomy. Course may be repeated for different topics. Each section may have additional prerequisites to be determined by the instructor. LEC.

**ASTR 503. Undergraduate Research. 1-4 Hours. AE61 / N.**
This course is for students seeking to fulfill the undergraduate research requirement. Students are expected to participate in some area of ongoing research in the department, chosen with the help of their advisor. At the end of the term, students will present their results in a seminar to other students and faculty. (Same as EPHX 503 and PHSX 503.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor. IND.

**ASTR 591. Stellar Astronomy. 3 Hours. N.**
Fundamentals of stellar astronomy including astronomical optics and techniques, coordinate and time systems, stellar spectroscopy, properties of normal, binary and variable stars. Prerequisite: PHSX 212 and PHSX 236. An introductory astronomy course is desirable. LEC.

**ASTR 592. Galactic and Extragalactic Astronomy. 3 Hours. N.**
A study of stellar groups, the interstellar medium, galactic structure and dynamics, galaxies, and cosmology. Prerequisite: ASTR 591 or consent of instructor. LEC.

**ASTR 596. Observational Astrophysics. 2 Hours. AE61 / N.**
Students acquire practical experience with astronomical equipment and data reduction techniques used in research and educational contexts. ASTR 596, combined with an independent research experience, provides a pathway for students to demonstrate creativity and integration of background knowledge. Prerequisite or corequisite: ASTR 591. LEC.

**ASTR 597. Analysis in Astrophysics. 1-3 Hours. AE61 / N.**
Individual students work on specialized research problems in the field of observational or theoretical astrophysics. Maximum credit, six hours. Prerequisite: ASTR 592. IND.

**ASTR 691. Astrophysics I. 3 Hours. N.**
An introduction to radiation processes, thermal processes, and radiative transfer in stellar atmospheres and the interstellar medium. (Same as EPHX 691 and PHSX 691.) Prerequisite: PHSX 313 or consent of instructor. LEC.

**ASTR 692. Astrophysics II. 3 Hours. N.**
The formation and evolution of stars, nucleosynthesis of the elements, and the physical processes of high energy physics. Prerequisite: ASTR 691 or consent of instructor. LEC.

**ASTR 791. Seminar in Astrophysics. 1-3 Hours.**
Seminar designed to cover current topics in the physics of the Universe beyond the solar system. Content will vary. Graduate students engaged in or preparing for research may repeat enrollments in this course. Open to undergraduates with twelve hours of physics/astronomy courses numbered 500 or above, or consent of instructor. LEC.

**ASTR 792. Topics in Advanced Astrophysics. 3 Hours.**
This course will address one or more of the following advanced topics in astrophysics: high energy astrophysics, nuclear astrophysics, galactic and extragalactic astrophysics, space physics, cosmology, astrobioynthesis, and the interstellar and intergalactic media (ISM/IGM.) This course may be repeated for credit if topical content differs. (Same as PHSX 792.) Prerequisite: ASTR 692 or permission of instructor. LEC.

**ASTR 795. Space Plasma Physics. 3 Hours.**
The physics of fully ionized gases in magnetic fields and their application to interplanetary processes, planetary radiation belts, and the surface of the sun. The motion of charged particles in magnetic fields, magnetohydrodynamic waves, the solar wind and the magnetosphere. (Same as PHSX 795.) Prerequisite: PHSX 621. Corequisite: PHSX 631. LEC.

**ASTR 815. Computational Physics and Astronomy. 3 Hours.**
Advanced computer applications in physics and astronomy. General discussion and illustration of problem organization and solution by numerical and other methods with examples from plasma, space, solid state, elementary particle, and nuclear physics and astronomy. Students will design, write, validate, and document a computer program to solve a physical problem. (Same as PHSX 815 and CHEM 914.) Prerequisite: Six hours of computer science courses numbered 300 or above, and six hours of physics and/or astronomy courses numbered 300 or above. LEC.

**ASTR 897. Seminar in Plasma and Space Physics. 1-3 Hours.**
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary. (Same as PHSX 897.) LEC.
PHSX 111. Introductory Physics. 3 Hours. NP GE11/GE3N / N. A one-semester survey of classical and modern physics, designed primarily for liberal arts students. Typical subjects include the laws of motion, gravity, electricity and magnetism, sound, light, quantum mechanics, atomic and subatomic physics. Subjects are treated mainly conceptually with some use of basic data. Prerequisite: Eligibility for MATH 104. LEC.

PHSX 112. Concepts in Physics, Honors. 3 Hours. NP GE3N / N. A discussion of important concepts in physics. While basic concepts such as force, energy, and mass will be introduced as needed, the emphasis will be on an understanding and appreciation of contemporary science. Prerequisite: Eligibility for MATH 104 and participation in the University Honors Program or permission of instructor. LEC.

PHSX 114. College Physics I. 1-4 Hours. NP GE11/GE12/GE3N / N. Principles and applications of mechanics, fluids, heat, thermodynamics, and sound waves. Three class hours and one laboratory per week. This course emphasizes the development of quantitative concepts and problem solving skills for students needing a broad background in physics as part of their preparation in other major programs, and for those who wish to meet the laboratory science requirement of the College. In special circumstances, permission to enroll in less than four hours may be obtained from the department. Not open to students with credit in PHSX 211 or PHSX 216 or PHSX 236. Prerequisite: MATH 104, or three and one-half years of college-preparatory mathematics including trigonometry and a score of 25 or higher on ACT mathematics. LEC.

PHSX 115. College Physics II. 1-4 Hours. N. A continuation of PHSX 114. Principles and applications of electricity, magnetism, light, atomic physics, and nuclear physics. Three class hours and one laboratory per week. In special circumstances, permission to enroll in less than four hours may be obtained from the department. Not open to students with credit in PHSX 212 or PHSX 236. Prerequisite: PHSX 114. LEC.

PHSX 116. Introductory Physics Laboratory. 1 Hour. U. A laboratory exploring classical and modern physics, designed primarily for liberal arts students. Experiments in motion gravity, electricity and magnetism, sound, light, atomic and subatomic physics are designed to teach physics concepts and basic laboratory techniques. One two-hour lab period per week. Counts as a laboratory science when preceded or accompanied by PHSX 111. Prerequisite: Eligibility for MATH 104. Corequisite: PHSX 111. LAB.

PHSX 150. Seminar in Physics, Astronomy and Engineering Physics. 0.5 Hours. N. This course is intended for all students in physics, astronomy and engineering physics. Course content includes topics of current interest in all fields of physics and astronomy. LEC.

PHSX 177. First Year Seminar: Physics. 3 Hours. GE11 / U. A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Physics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

PHSX 201. Transition to General Physics. 1 Hour. N. Classical mechanics and thermodynamics with calculus for students who have had a prior algebra-based course. Prerequisite: PHSX 114, either MATH 116 or 125; co-requisite MATH 126; and permission of the department. LEC.

PHSX 202. Calculus Supplement to College Physics II. 1 Hour. N. A calculus-based course in electricity and magnetism for students who have had a an algebra-based course in electricity and magnetism. This course, combined with PHSX 115, covers the content of PHSX 212. Prerequisite: PHSX 115 and permission of the department. Corequisite: MATH 126. LEC.

PHSX 210. General Physics I for Engineers. 3 Hours. GE11 / N. Introduction to classical mechanics and thermodynamics designed for students in the School of Engineering. Students not admitted to the School of Engineering must receive permission from instructor. PHSX 210 and PHSX 211 cannot both be taken for credit. Students with credit in PHSX 114 can obtain only one hour of credit. Prerequisite: MATH 121 with a grade of C or better; courses in high school physics and/or chemistry recommended. LEC.

PHSX 211. General Physics I. 1-4 Hours. NP GE11/GE12/GE3N / N. Study of electricity and magnetism, waves and sound. In special circumstances, permission to enroll for fewer than three hours credit may be obtained from the department. Students with credit in PHSX 114 can obtain only one hour of credit. Prerequisite: MATH 116 or MATH 125; co-requisite MATH 126; courses in high school physics and/or chemistry are recommended. LEC.

PHSX 212. General Physics II. 1-3 Hours. GE3N / N. An honors section of PHSX 211 and PHSX 216. Credit for fewer than five hours requires permission of the department. Recommended for students with a strong math background who are either in the University Honors Program or intending to major in a physical science. Courses in high school physics and chemistry are strongly recommended. Prerequisite: MATH 125; co-requisite MATH 126; and permission of instructor. LEC.

PHSX 214. General Physics II Honors. 1-4 Hours. N. An honors section of PHSX 212 and PHSX 236. Credit for fewer than four hours requires permission of the department. Recommended for students with a strong math background who are either in the University Honors Program or intending to major in a physical science. Prerequisite: PHSX 216 together with either PHSX 211 or PHSX 210; or PHSX 213, and permission of instructor. Co-requisite: MATH 127. LEC.

PHSX 216. General Physics I Laboratory. 1 Hour. N. Experiments in classical mechanics and thermodynamics. Counts as a laboratory science when accompanied by PHSX 210 or PHSX 211. Pre-or Corequisite: PHSX 210 or PHSX 211. LAB.

PHSX 236. General Physics II Laboratory. 1 Hour. N. Experiments in electricity and magnetism, waves and sound. Pre-or Corequisite: PHSX 212. LAB.

PHSX 313. General Physics III. 3 Hours. GE3N / N. Introduction to modern physics. Topics include special relativity, optics, and introductions to quantum mechanics and solid state physics. Prerequisite: PHSX 212 and PHSX 236 or PHSX 214 or EECS 220. Corequisite: MATH 320 or MATH 220. LEC.

PHSX 316. Intermediate Physics Laboratory I. 1 Hour. U. Experiments in optics and modern physics. Development of experimental skills, data reduction, error analysis, and technical writing. One lab meeting per week and one lecture per week on topics including error analysis and experimental design. Pre-or corequisite: PHSX 313. LAB.
PHSX 400. Topics in Physics and Astronomy: _______. 1-3 Hours. N.
A course on special topics in physics and astronomy, given as the need arises. Course may be repeated for different topics. Each section may have prerequisites to be determined by the instructor. LEC.

PHSX 500. Special Problems. 1-5 Hours. AE61 / N.
Work in some area of physics beyond the topics or material covered in other courses. For some problems, continued enrollment in consecutive semesters may be appropriate. Prerequisite: One junior-senior course in science in an area related to the problem and consent of instructor. IND.

PHSX 501. Honors Research. 1-4 Hours. AE61 / N.
This course is to enable students seeking departmental Honors in Astronomy, Engineering Physics, or Physics to fulfill the undergraduate research requirement. At the completion of the required 4 hours of total enrollment, a written and oral report of the research is required. (Same as EPHX 501.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor. IND.

PHSX 502. Seminar in Physics and Astronomy Instruction. 1-3 Hours. N.
One meeting per week to plan and report progress on projects which may include tutoring of students in personalized modes of study; developing, administering, and scoring test items; designing and improving demonstration and laboratory experiments. Amount of credit depends on projects contracted for and completed. (Distribution credit given for two-three hours only.) Prerequisite: Evidence of prior academic experience relevant to the student's proposed activities in the seminar and permission of instructor. LEC.

PHSX 503. Undergraduate Research. 1-4 Hours. AE61 / N.
This course is for students seeking to fulfill the undergraduate research requirement. Students are expected to participate in some area of ongoing research in the department, chosen with the help of their advisor. At the end of the term, students will present their results in a seminar to other students and faculty. (Same as ASTR 503 and EPHX 503.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor. IND.

PHSX 511. Introductory Quantum Mechanics. 3 Hours. N.
An introduction to quantum mechanics, emphasizing a physical overview. Topics should include the formalisms of non-relativistic quantum mechanics, the 3-dimensional Schrödinger equation with applications to the hydrogen atom; spin and angular momentum; multi-particle systems of Fermi-Dirac and Bose-Einstein particles; time-independent perturbation theory. (Same as EPHX 511.) Prerequisite: PHSX 313 and MATH 290. LEC.

PHSX 516. Physical Measurements. 4 Hours. N.
A laboratory course emphasizing experimental techniques and data analysis, as well as scientific writing and presentation skills. Experiments will explore a range of classical and modern physics topics. (Same as EPHX 516.) Prerequisite: PHSX 313, PHSX 316 and PHSX 521. (PHSX 521 may be taken concurrently.) LAB.

PHSX 518. Mathematical Physics. 3 Hours. N.
Applications of modern mathematical methods to problems in mechanics and modern physics. Techniques include application of partial differential equations and complex variables to classical field problems in continuous mechanics, unstable and chaotic systems, electrodynamics, hydrodynamics, and heat flow. Applications of elementary transformation theory and group theory, probability and statistics, and nonlinear analysis to selected problems in modern physics as well as to graphical representation of experimental data. Prerequisite: PHSX 313 and MATH 320 or permission of instructor. (Same as EPHX 518.) LEC.

PHSX 521. Mechanics I. 3 Hours. N.
Newton's laws of motion. Motions of a particle in one, two, and three dimensions. Motion of a system of particles. Moving coordinate systems. (Same as EPHX 521.) Prerequisite: PHSX 211 and PHSX 216, or PHSX 213; MATH 223; MATH 290; and MATH 220 or MATH 320. LEC.

PHSX 528. Geodynamics and Plate Tectonics. 3 Hours. N.
Study of physical processes in the solid Earth and of geophysical approaches to studying Earth systems at regional and global scales. Topics include global potential fields, thermal regime, rheology and Earth deformation, earthquakes and seismic structure, plate motions and global tectonics. (Same as GEOL 573) Prerequisite: An introductory course in geology; MATH 116 or MATH 122; and PHSX 115, PHSX 214, or PHSX 212 and PHSX 236. LEC.

PHSX 531. Electricity and Magnetism. 3 Hours. N.
The properties of electric and magnetic fields, including electrostatics, Gauss' Law, boundary value methods, electric fields in matter, electromagnetic induction, magnetic fields in matter, the properties of electric and magnetic dipoles, and of dielectric and magnetic materials. (Same as EPHX 531.) Prerequisite: PHSX 214, or PHSX 212 and PHSX 236; PHSX 521 or special permission; MATH 223; MATH 290; and MATH 220 or MATH 320. LEC.

PHSX 535. Electronic Circuit Measurement and Design. 4 Hours. N.
A laboratory course that explores the theory and experimental techniques of analog and digital electronic circuit design and measurements. Topics include transient response, transmission lines, transistors, operational amplifiers, and digital logic. (Same as EPHX 535.) Prerequisite: PHSX 214 or PHSX 212 and PHSX 236; PHSX 521 or special permission; MATH 223; MATH 290. PHSX 313 and 316 recommended. LAB.

PHSX 557. Topics in Mechanics, Properties of Materials, Thermodynamics. 1-3 Hours.
This course covers the principles and applications of classical mechanics, fluids, heat, thermodynamics and sound. Teaching of these topics is strongly emphasized. Some laboratory work is included. This course is intended for students accepted to the BS Education major in Physics. This course does not count towards Physics or Astronomy major requirements in the College of Liberal Arts and Sciences. Prerequisite: Math 115 and 116, and either PHSX 114 or PHSX 211. LEC.

PHSX 558. Topics in Electricity and Magnetism and Optics. 1-3 Hours.
This course covers the principles and applications of electricity, magnetism and optics. Teaching of these topics is strongly emphasized. Some laboratory work is included. This course is intended for students accepted to the BS Education major in physics. This course does not count towards Physics or Astronomy major requirements in the College of Liberal Arts and Sciences. Prerequisite: MATH 115 and 116, and either PHSX 115 or PHSX 212. LEC.

PHSX 559. Topics in Modern Physics. 1-3 Hours.
This course covers the principles and applications of quantum mechanics, atomic and nuclear physics. Teaching of these topics is strongly emphasized. Some laboratory work is included. This course is intended for students accepted to the BS Education major in physics. This course does not count towards Physics or Astronomy major requirements in the College of Liberal Arts and Sciences. Prerequisite: MATH 115 and 116, and either PHSX 115 or PHSX 313. LEC.

PHSX 594. Cosmology and Culture. 3 Hours. AE42 / N.
A survey of modern physical cosmology, its recent historical roots, and creation myths from many world cultures. An examination of the effects of these stories on their parent cultures. LEC.
PHSX 600. Special Topics in Physics and Astrophysics: _____. 3 Hours. N.
Different topics will be covered as needed. This course will address topics in physics and astrophysics not covered in regularly offered courses. May be repeated if topic differs. (Same as EPHX 600.) Prerequisite: Permission of instructor. LEC.

PHSX 601. Design of Physical and Electronic Systems. 4 Hours. AE61 / N.
A laboratory course emphasizing the application of physical principles to the design of systems for research, monitoring, or control. Topics include the use of microcomputers as controllers, interfacing microcomputers with measurement devices, and use of approximations and/or computer simulation to optimize design parameters, linear control systems, and noise. (Same as EPHX 601.) Prerequisite: Twelve hours of junior-senior credit in physics or engineering, including one laboratory course. LAB.

PHSX 615. Numerical and Computational Methods in Physics. 3 Hours. N.
An introduction to the use of numerical methods in the solution of problems in physics for which simplifications allowing closed-form solutions are not applicable. Examples are drawn from mechanics, electricity, magnetism, thermodynamics, and optics. (Same as EPHX 615.) Prerequisite: PHSX 313, MATH 320 or equivalent, and EECS 138 or equivalent. LEC.

PHSX 621. Mechanics II. 3 Hours. N.
Continuation of PHSX 521. Lagrange's equations and generalized coordinates. Mechanics of continuous media. Tensor algebra and rotation of a rigid body. Special relativity and relativistic dynamics. (Same as EPHX 621.) Prerequisite: PHSX 521. LEC.

PHSX 623. Physics of Fluids. 3 Hours. N.
An introduction to basic fluid mechanics in which fundamental concepts and equations are covered. Topics include hydrostatics, hydrodynamics, wave propagation in fluids, and applications in the areas such as astrophysics, atmospheric physics, and geophysics. (Same as EPHX 623.) Prerequisite: MATH 223; MATH 290; PHSX 212 and PHSX 236 (or PHSX 214 can replace PHSX 212 and PHSX 236.) LEC.

PHSX 631. Electromagnetic Theory. 3 Hours. N.
Maxwell's equations, wave propagation, optics and waveguides, radiation, relativistic transformations of fields and sources, use of covariance and invariance in relativity. Normally a continuation of PHSX 531. (Same as EPHX 631.) Prerequisite: PHSX 531. LEC.

PHSX 641. Introduction to Elementary Particle Physics. 3 Hours. N.
Experimental methods and elementary concepts in nuclear physics, including nuclear forces, alpha and beta decay, gamma radiation, nuclear structure, and reaction systematics. (Same as EPHX 641.) Prerequisite: PHSX 313 and PHSX 511. LEC.

PHSX 655. Optics. 3 Hours. N.
Geometric optics. Wave properties of light: interference, diffraction, coherence. Propagation of light through matter. Selected topics in modern optics, e.g., lasers, fibers. (Same as EPHX 655.) Prerequisite: PHSX 313 and PHSX 316. LEC.

PHSX 661. Introduction to Elementary Particle Physics. 3 Hours. N.
Properties and interactions of quarks, leptons, and other elementary particles; symmetry principles and conservation laws; broken symmetry; gauge bosons; the fundamental interactions, grand unified theories of strong, electromagnetic, and weak interactions; the cosmological implications of elementary particle physics. (Same as EPHX 661.) Prerequisite: PHSX 313 and MATH 320. LEC.

PHSX 671. Thermal Physics. 3 Hours. N.
Development of thermodynamics from statistical considerations. Techniques of calculating thermodynamic properties of systems. Application to classical problems of thermodynamics. Elementary kinetic theory of transport processes. Fermi-Dirac and Bose-Einstein systems. (Same as EPHX 671.) Prerequisite: PHSX 511. LEC.

PHSX 681. Concepts in Solids. 3 Hours. N.
Properties of common types of crystals and amorphous solids. Lattice vibrations and thermal properties of solids. Electrons and holes in energy bands of metals, semi-conductors, superconductors, and insulators. (Same as EPHX 681.) Prerequisite: PHSX 313 and PHSX 511. LEC.

PHSX 691. Astrophysics I. 3 Hours. N.
An introduction to radiation processes, thermal processes, and radiative transfer in stellar atmospheres and the interstellar medium. (Same as ASTR 691 and EPHX 691.) Prerequisite: PHSX 313 or consent of instructor. LEC.

PHSX 693. Gravitation and Cosmology. 3 Hours. N.
An overview of topics relevant to gravitation and modern cosmology: special relativity, tensor notation, the equivalence principle, the Schwarzschild solution, black holes, and Friedmann models. Cosmic black body radiation, dark matter, and the formation of large-scale structure. The idea of quantum gravity and an introduction to the current literature in cosmology. (Same as EPHX 693.) Prerequisite: PHSX 313 and MATH 320. LEC.

PHSX 700. Colloquium. 1 Hour.
Topics of current interest in physics, astronomy, and atmospheric science. Repeated enrollments are permitted. LEC.

PHSX 701. Major Experiments and Observations in Classical and Contemporary Physics. 1-3 Hours.
Critique, discussions, and interpretation of the most important discoveries and observations in physics. LEC.

PHSX 702. Introductory Physics Pedagogy. 1 Hour.
This course will address basic elements of pedagogy in specific relation to the teaching of physics and astronomy labs. It contains such elements as: peer and instructor evaluations of teaching, reading and discussion of pedagogical materials, development of online course material, and discussion of teaching methods. This course may be repeated for credit. Prerequisite: Permission of instructor. LEC.

PHSX 711. Quantum Mechanics I. 3 Hours.

PHSX 717. Graduate Seminar. 1 Hour.
First year graduate students meet to survey research opportunities in the department and develop skills in giving oral presentations in physics and related areas. Students will also learn about topics in responsible scholarship that may include: the origin of ideas and the allocation of credit, the treatment of data, scientific misconduct, intellectual property and entrepreneurship, the researcher in society, collaborative research, mentor/trainee responsibilities, and safe practices. LEC.

PHSX 718. Mathematical Methods in Physical Sciences. 3 Hours.
Review of complex variable theory; introduction to the partial differential equations of physical systems; Fourier analysis; special functions of mathematical physics; and chemistry. (Same as CHEM 718.) Prerequisite: Two semesters of junior-senior mathematics. LEC.
PHSX 721. Chaotic Dynamics. 3 Hours.
Topics covered may include the following: dynamical systems, attractors, sensitive dependence on initial conditions, chaos, one-dimensional maps, strange attractors and fractal dimensions, fat fractals, the horseshoe map, symbolic dynamics, linear stability of periodic orbits, stable and unstable manifolds, Lyapunov exponents, topological entropy, quasiperiodicity, strange nonchaotic attractors, nonattracting chaotic sets, fractal basin boundaries, renormalization group analysis, intermittency, crisis and chaotic transients. Prerequisite: Mechanics (PHSX 521, or its equivalent), ordinary differential equations (MATH 320, or its equivalent), and some computer programming knowledge. LEC.

PHSX 722. Geophysical Data Analysis. 3 Hours.
Fourier analysis, sampling theory, prediction and interpolation of geophysical data, filtering theory, correlation techniques, deconvolution. Examples will be chosen from various fields of geophysics. (Same as GEOL 772.) Prerequisite: MATH 250/AE 250/ARCE 250/CE 250/CPE 250/ECECS 250/EPHX 250/ME 250 and either GEOL 572 or GEOL 573 or PHSX 528. LEC.

PHSX 723. Seismology. 3 Hours.
General theory of seismic waves, wave field extrapolation (migration) by finite difference methods, construction of travel-time curves, reflection and attenuation coefficients, earthquake source mechanism, distribution and forecasting of earthquakes. (Same as GEOL 773.) Prerequisite: MATH 250/AE 250/ARCE 250/CE 250/CPE 250/ECECS 250/EPHX 250/ME 250 and either GEOL 572 or GEOL 573 or PHSX 528. LEC.

PHSX 724. Potential Fields in Geophysics. 3 Hours.
Reduction and interpretation of gravity and magnetic data with emphasis on exploration techniques. Spectral, analytical and modeling methods of analysis of gravity and magnetic anomalies are emphasized. Prerequisite: MATH 250/AE 250/ARCE 250/CE 250/CPE 250/ECECS 250/EPHX 250/ME 250 and either GEOL 572 or GEOL 573 or PHSX 528 or consent of instructor. LEC.

PHSX 727. Advanced Geophysics: _____. 1-3 Hours.
Topics to vary with demand and include heat flow, wave propagation, synthetic seismograms, groundwater exploration, geothermal exploration, electrical methods in exploration, rock mechanics-geotechnophysics, rock magnetism, geomagnetism, paleomagnetism, geophysical inverse theory, and others upon sufficient demand. May be repeated for different topics. (Same as GEOL 771.) Prerequisite: GEOL 572 or GEOL 573/PHSX 528 or consent of instructor. LEC.

PHSX 731. Molecular Biophysics. 3 Hours.
Methods and concepts in contemporary molecular biophysics are discussed. Particular emphasis is placed on the thermodynamics of macromolecular interactions and quantitative models of data analysis. Basic enzymology and biophysical spectroscopy will also be reviewed. Prerequisite: PHSX 212, MATH 122, and CHEM 188. LEC.

PHSX 741. Nuclear Physics I. 3 Hours.
Experimental methods in nuclear physics, elementary concepts and simple considerations about nuclear forces, alpha and beta decay, gamma radiation, nuclear structure, and reaction systematics. Prerequisite: PHSX 511. LEC.

PHSX 761. Elementary Particles I. 3 Hours.
Particle accelerators and detectors; quarks and leptons; invariance principles and conservation laws; strong, electromagnetic, and weak interactions of elementary particles; unification of electroweak and other interactions. Prerequisite: PHSX 711. LEC.

PHSX 781. Solid State Physics I. 3 Hours.
Classification of solids, structure and symmetry of crystals; lattice vibrations and thermal properties of solids; electric and magnetic properties; electron theory of metals and semiconductors; electronic and atomic transport processes; theory of ionic crystals. Prerequisite: PHSX 511 (or CHEM 648) and PHSX 671 (or CHEM 646). LEC.

PHSX 791. Seminar in Astrophysics. 1-3 Hours.
Seminar designed to cover current topics in the physics of the Universe beyond the solar system. Content will vary. Graduate students engaged in or preparing for research may repeat enrollments in this course. Open to undergraduates with twelve hours of physics/astronomy courses numbered 500 or above, or consent of instructor. LEC.

PHSX 792. Topics in Advanced Astrophysics. 3 Hours.
This course will address one or more of the following advanced topics in astrophysics: high energy astrophysics, nuclear astrophysics, galactic and extragalactic astrophysics, space physics, cosmology, astrobiophysics, and the interstellar and intergalactic media (ISM/IGM). This course may be repeated for credit if topical content differs. (Same as ASTR 792.) Prerequisite: ASTR 692 or permission of instructor. LEC.

PHSX 793. Physical Cosmology. 3 Hours.
Discussion of how fundamental laws of physics govern the evolution of the universe as a whole along with its structure. Survey of cosmogenetic clues in the observable universe, including observed structures, cosmic background radiation and evidence for dark matter. Development of the universe, including theories of initial conditions; cosmological phase transitions; generation of possible relics and dark matter; symmetry breaking; baryon asymmetry; nucleosynthesis; recombination, gravitational instability and the formation of structure; current experimental techniques. Prerequisite: PHSX 718. Recommended: PHSX 593. LEC.

PHSX 795. Space Plasma Physics. 3 Hours.
The physics of fully ionized gases in magnetic fields and their application to interplanetary processes, planetary radiation belts, and the sun. The motion of charged particles in magnetic fields, magnetohydrodynamic waves, the solar wind, the ionosphere, and the magnetosphere. (Same as ASTR 795.) Prerequisite: PHSX 621. Corequisite: PHSX 631. LEC.

PHSX 800. Graduate Problems. 1-5 Hours.
Advanced laboratory problems, special research problems, or library reading problems. Repeated enrollments are permitted. RSH.

PHSX 801. Advanced Topics. 1-3 Hours.
Lectures on advanced material not covered by regular courses. The topics are not limited but generally address recent experimental or theoretical developments in subjects such as superconductivity, nuclear physics, elementary particle physics, quantum field theory, gauge and unified theories, nonlinear or chaotic systems, space plasma physics, and astrophysics and cosmology. Repeated enrollments are permitted. LEC.

PHSX 811. Quantum Mechanics II. 3 Hours.
Time dependent perturbation theory. Gauge invariance and electromagnetic interactions. Quantization of the electromagnetic field and applications. The Dirac equation, its transformation properties and applications to relativistic problems. Scattering theory, elementary applications, and formal properties. Prerequisite: PHSX 711. LEC.

PHSX 815. Computational Methods in Physical Sciences. 3 Hours.
Advanced computer applications in physical science. General discussion and illustration of problem organization and solution by numerical and other methods with examples from physics, astronomy, and other physical sciences. Students will design, write, validate, and document a computer program to solve a physical problem. (Same as ASTR 815 and CHEM 914.) Prerequisite: Six hours of computer science courses numbered 300 or above, and six hours of physics and/or astronomy courses numbered 300 or above. LEC.
PHSX 817. Graduate Seminar. 1 Hour.
First year graduate students meet to survey research opportunities in the department and develop skills in giving oral presentations in physics and related areas. Prerequisite: Only one hour of 817 can count toward required hours for degree. LEC.

PHSX 821. Classical Mechanics. 3 Hours.
Vector and tensor notation; review of Newtonian mechanics; Lagrangian mechanics; linear vector spaces and matrix theory with applications to the theory of small oscillations; rigid bodies; Hamiltonian formalism. Special relativity. Prerequisite: Twelve hours of junior-senior courses in physics. LEC.

PHSX 831. Electrodynamics I. 3 Hours.
Electrostatics and magnetostatics; Maxwell's equations; plane waves; waveguides. Prerequisite: PHSX 718 and PHSX 821. LEC.

PHSX 841. Nuclear Physics II. 3 Hours.
Nuclear forces and the two-body problem; nuclear models; phenomenological treatment of nuclear reactions and decay processes. Prerequisite: PHSX 741 and PHSX 811. LEC.

PHSX 861. Elementary Particles II. 3 Hours.
Theoretical analysis of the standard model of strong and electroweak interactions. Applications to decay and scattering processes with comparison to experiments. Selected topics in non-perturbative physics. Examples of tests to probe beyond the standard model. Prerequisite: PHSX 761. Corequisite: PHSX 911. LEC.

PHSX 871. Statistical Physics I. 3 Hours.
Review of and advanced topics in thermodynamics; the Maxwell relations; the third law; phase transitions. Kinetic theory: the Boltzmann equation; transport phenomena. Statistical mechanics: ideal Maxwell-Boltzmann, Fermi-Dirac and Bose-Einstein gases; ensemble theory; derivation of the laws of thermodynamics. Prerequisite: PHSX 711 and PHSX 821. PHSX 671 is recommended. LEC.

PHSX 881. Solid State Physics II. 3 Hours.
More advanced topics in solid state physics that may include: diamagnetism, paramagnetism, ferromagnetism, and antiferromagnetism; electron and nuclear spin magnetic resonance; dielectric properties and ferroelectricity; photoconductivity and luminescence. Prerequisite: PHSX 631 and PHSX 711 (or CHEM 915). LEC.

PHSX 895. Plasma Physics. 3 Hours.
Magnetohydrodynamics, including discussion of shocks, waves, and stability theory; statistical mechanical foundations; kinetic theory; microstability; non-linear phenomena. Prerequisite: PHSX 795. LEC.

PHSX 897. Seminar in Plasma and Space Physics. 1-3 Hours.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary. (Same as ASTR 897.) LEC.

PHSX 899. Master's Research/Thesis. 1-10 Hours.
Research work (either experimental or theoretical) in physics for students working toward the master's degree. Repeated enrollments are permitted. THE.

PHSX 911. Quantum Mechanics III. 3 Hours.
Path integral formulation of quantum mechanics. Introduction to quantum field theory using the canonical approach and using the path integral approach. Application of perturbation theory in quantum electrodynamics. Selected applications in condensed matter, nuclear, and particle physics. Prerequisite: PHSX 811. LEC.

PHSX 912. Quantum Field Theory. 3 Hours.
Survey of problems in quantum field theory. Functional methods. Renormalization and renormalization group. Role of symmetries. Gauge field theories. Symmetry breaking. Prerequisite: PHSX 911. LEC.

PHSX 915. Relativity. 3 Hours.
Reviews of special relativity, manifolds, tensors, and geometry. General coordinate covariance and general relativity. Applications to classical theory of gravitation: weak field tests, isotropic, homogeneous cosmology, Schwarzschild solution. Selected advanced topics. Prerequisite: A total of 10 hours of junior/senior work in physics and mathematics, including at least concurrent enrollment in MATH 646. LEC.

PHSX 917. Seminar in Theoretical Physics. 1-3 Hours.
Graduate students engaged in or preparing for research may repeat enrollments in this course. Content will vary. LEC.

PHSX 931. Electrodynamics II. 3 Hours.
Inhomogeneous Maxwell's equations and multipole radiation fields; special theory of relativity; radiation from accelerated charges: scattering and dispersion. Prerequisite: PHSX 831. LEC.

PHSX 947. Seminar in Nuclear Physics. 1-3 Hours.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary. LEC.

PHSX 957. Seminar in Particle Physics. 1-3 Hours.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary. LEC.

PHSX 971. Advanced Statistical Mechanics. 3 Hours.
Advanced equilibrium statistical mechanics and introduction to nonequilibrium statistical mechanics. Topics include: the theory of liquids, critical phenomena, linear response theory and time correlation functions, Langevin dynamics, and molecular hydrodynamics. (Same as CHEM 950.) Prerequisite: PHSX 871 or CHEM 917. LEC.

PHSX 987. Seminar in Solid State Physics. 1-3 Hours.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary. LEC.

PHSX 999. Ph.D. Dissertation Research. 1-10 Hours.
Research work (either experimental or theoretical) in physics for students working toward the Ph.D. degree. Repeated enrollments are permitted. THE.

Bachelor of Arts in Astronomy

Why study astronomy?

Because understanding the physical universe starts here.

Undergraduate Programs

Astronomy programs are offered through the Department of Physics and Astronomy. The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics, and prepares students majoring in astronomy for graduate study in astronomy or related fields.

Courses for Nonmajors

ASTR 191 surveys a wide range of contemporary astronomy topics while ASTR 293 discusses a shorter list of astrophysically extreme objects in greater detail; both courses require eligibility for MATH 101. ASTR 394 is open to students with previous coursework in astronomy, geology
or biology; ASTR 391 offers an introduction to physical astronomy at a calculus-based level.

### Undergraduate Admission

#### Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

#### Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

#### Advising

Students considering a major in astronomy should confer early with a departmental representative about the selection of courses. The B.A. degree is appropriate for students who want a general education in astronomy as part of a broadly structured liberal education. The B.S. is a more specialized program with a substantial emphasis on physics content as well as astronomy. It provides preparation for a professional career or graduate work in astronomy, astrophysics, or related fields. A total of 120 credit hours is required for graduation.

### First- and Second-Year Preparation

All major programs in physics and astronomy share requirements in basic physics and mathematics including PHSX 150, a seminar course for majors. Completion of MATH 125 and MATH 126 in the first year allows students to start calculus-based physics foundation courses (PHSX 211 or PHSX 213, followed by PHSX 212 or PHSX 214, with labs PHSX 216 and PHSX 236) by the second semester. Majors are encouraged to take PHSX 213 and PHSX 214, the honors versions of PHSX 211 and PHSX 212. Students should take these courses and ASTR 391 in their first two years. B.S. astronomy majors normally complete additional course work in mathematics (MATH 223, MATH 290, and MATH 320), as well as PHSX 313 and PHSX 316, in the second year.

### Requirements for the B.A. Major in Astronomy

All students pursuing the Bachelor of Arts in Astronomy must complete the KU Core requirements and the College BA specific requirements, listed in the KU Core and College sections of the catalog.

### Additional general science requirements (22.5-34.5)

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

<table>
<thead>
<tr>
<th>Major Hours &amp; Major GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Calculus I. Satisfied by one of the following:</strong></td>
</tr>
<tr>
<td>Or equivalent</td>
</tr>
<tr>
<td>MATH 125</td>
</tr>
<tr>
<td>or MATH 145</td>
</tr>
</tbody>
</table>

| **Calculus II. Satisfied by one of the following:** |
| Or equivalent |
| MATH 126  | Calculus II  | 4 |
| or MATH 146 | Calculus II, Honors |

| **Seminar in Physics, Astronomy, & Engineering Physics. Satisfied by the following:** |
| PHSX 150  | Seminar in Physics, Astronomy and Engineering Physics  | 0.5 |

| **General Physics I. Satisfied by one of the following:** |
| PHSX 211  | General Physics I  | 1-4 |
| & PHSX 216 & General Physics I Laboratory |

| **General Physics II. Satisfied by one of the following:** |
| PHSX 213  | General Physics II  | 1-5 |
| & PHSX 236 & General Physics II Laboratory |

| **General Physics II Honors** |
| PHSX 214  | General Physics II Honors  | 1-4 |

| **Foundations of Chemistry I. Satisfied by one of the following:** |
| CHEM 130  | General Chemistry I  | 5 |
| CHEM 190  | Foundations of Chemistry I, Honors  | 5 |

### Astronomy Major Requirements (11)

Majors must complete each of the four following courses:

| **ASTR 391** Physical Astronomy, Honors  | 3 |
| ASTR 591  | Stellar Astronomy  | 3 |
| ASTR 596  | Observational Astrophysics  | 2 |
| ASTR 592  | Galactic and Extragalactic Astronomy  | 3 |

### Additional astronomy, astrophysics, or physics courses required for major (5)

In addition to the above specifically required courses, Astronomy BA candidates must complete at least 5 additional credits in physics or astronomy at the 300+ level. Students may enroll in ASTR 390 for undergraduate problems for 1 or more credit hours and in ASTR 503 (501 honors) for research credit. ASTR 394 is highly recommended. Other recommended courses include ASTR 691 and 692, PHSX 594, GEOL 572, PHSX 313/316 and other PHSX courses 500 and above; most of these course have pre-requisites that may require additional preparation in mathematics and/or physics.

### Major Hours & Major GPA

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

| **Major Hours** |
| Satisfied by 25.5 hours of major courses. |

| **Major Hours in Residence** |
| Satisfied by a minimum of 15 hours of KU resident credit in the major. |

| **Major Junior/Senior (300+) Hours** |
Satisfied by a minimum of 16 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Below is a sample 4-year plan for students pursuing the BA in Astronomy. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

This degree plan assumes students will have completed MATH 104, or equivalent prior to the freshman year, fall semester.

### Total Hours: 120.5-122.5

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. CHEM 130 requires MATH 115 eligibility for enrollment.
3. Majors are required to complete a minimum of 5 hours of 300+ level electives in Physics or Astronomy.
4. Course Timing is interchangeable between Junior and Senior years and is dependent on course offering/availability.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors in Physics and Astronomy

A student who plans to graduate with honors in physics and astronomy must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during his/her junior year but in any case no later than enrollment for the final undergraduate semester. All of our department’s honors requirements include student research, for which results shall be presented in at least one of the following forms:

a) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript

b) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline specific meeting)

c) presentation of a poster at an appropriate venue. Additional requirements are:
Undergraduate Programs

Astronomy programs are offered through the Department of Physics and Astronomy. The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics, and prepares students majoring in astronomy for graduate study in astronomy or related fields.

Courses for Nonmajors

ASTR 191 surveys a wide range of contemporary astronomy topics while ASTR 293 discusses a shorter list of astrophysically extreme objects in greater detail; both courses require eligibility for MATH 101. ASTR 394 is open to students with previous coursework in astronomy, geology or biology; ASTR 391 offers an introduction to physical astronomy at a calculus-based level.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-credit on the KU Core section of the catalog.

Advising

Students considering a major in astronomy should confer early with a departmental representative about the selection of courses. The B.A. degree is appropriate for students who want a general education in astronomy as part of a broadly structured liberal education. The B.S. is a more specialized program with a substantial emphasis on physics content as well as astronomy. It provides preparation for a professional career or graduate work in astronomy, astrophysics, or related fields. A total of 120 credit hours is required for graduation.

First- and Second-Year Preparation

All major programs in physics and astronomy share requirements in basic physics and mathematics including PHSX 150, a seminar course for majors. Completion of MATH 125 and MATH 126 in the first year allows students to start calculus-based physics foundation courses (PHSX 211 and PHSX 216 or PHSX 213, followed by PHSX 212 and PHSX 236 or PHSX 214) by the second semester. Majors are encouraged to take PHSX 213 and PHSX 214, the honors versions of PHSX 211/PHSX 216 and PHSX 212/PHSX 236. Students should take these courses and ASTR 391 in their first two years. B.S. astronomy majors normally complete additional course work in mathematics (MATH 223, MATH 290, and MATH 320), as well as PHSX 313 and PHSX 316, in the second year.

Requirements for the B.S. Degree in Astronomy

All students pursuing the Bachelor of Science in Astronomy must complete the KU Core requirements in addition to the degree and major requirements. For details regarding the KU Core requirements, please see the KU Core section of the catalog.

General science requirements (24.5-36.5)

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

Computing and Programming. Satisfied by one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EECS 138</td>
<td>3</td>
</tr>
<tr>
<td>EECS 168</td>
<td>4</td>

Bachelor of Science in Astronomy

PHSX 212 General Physics II 1-3
& PHSX 236 and General Physics II Laboratory
PHSX 241 General Physics II Honors 1-4
Foundations of Chemistry I. Satisfied by one of the following:
CHEM 130 General Chemistry I 5
CHEM 190 Foundations of Chemistry I, Honors

Advanced Mathematics Core Knowledge and Skills (11)
Vector Calculus. Satisfied by the following:
MATH 223 Vector Calculus 3
Elementary Linear Algebra. Satisfied by the following:
MATH 290 Elementary Linear Algebra 2
Elementary Differential Equations. Satisfied by the following:
MATH 320 Elementary Differential Equations 3
Math Elective. Satisfied by one of the following:
PHSX 518 Mathematical Physics
PHSX 718 Mathematical Methods in Physical Sciences
MATH 526 Applied Mathematical Statistics I
MATH 530 Mathematical Models
MATH 558 Introductory Modern Algebra
MATH 581 Numerical Methods
MATH 590 Linear Algebra
MATH 628 Mathematical Theory of Statistics
MATH 646 Complex Variable and Applications
MATH 647 Applied Partial Differential Equations
MATH 648 Calculus of Variations and Integral Equations
MATH 660 Geometry I
MATH 661 Geometry II
any 700-level MATH lecture course except MATH 701 and MATH 715.

Astronomy Requirements for Major (18-21)
Majors must complete the following seven courses:
ASTR 391 Physical Astronomy, Honors 3
ASTR 591 Stellar Astronomy 3
ASTR 592 Galactic and Extragalactic Astronomy 3
ASTR 596 Observational Astrophysics 2
ASTR 691 Astrophysics I 3
ASTR 692 Astrophysics II 3
ASTR 503 Undergraduate Research 1-4

Physics Core Knowledge and Skills (30)
Majors must complete courses as indicated in the following areas:
General Physics III. Satisfied by the following:
PHSX 313 General Physics III 3
Intermediate Physics Lab. Satisfied by the following:
PHSX 316 Intermediate Physics Laboratory I 1
Introductory Quantum Mechanics. Satisfied by the following:
PHSX 511 Introductory Quantum Mechanics 3
Physical Measurements or Electronic Circuit Measurement and Design. Satisfied by one of the following:
PHSX 516 Physical Measurements 4
PHSX 536 Electronic Circuit Measurement and Design 4
Mechanics I. Satisfied by the following:
PHSX 521 Mechanics I 3
Electricity and Magnetism. Satisfied by the following:
PHSX 531 Electricity and Magnetism 3
Thermal Physics. Satisfied by the following:
PHSX 671 Thermal Physics 3
Physics Elective. Satisfied by any PHSX lecture or laboratory course numbered 500 or higher (PHSX 693 recommended) (with the exception of PHSX 594), including:
ASTR 792 Topics in Advanced Astrophysics 3
PHSX 795 Space Plasma Physics
or PHSX 795 Space Plasma Physics
GEOL 572 Geophysics
PHSX 693 Gravitation and Cosmology (recommended)

Major Hours & Major GPA
While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior(300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Departmental Honors in Physics and Astronomy
A student who plans to graduate with honors in physics and astronomy must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during his/her junior year but in any case no later than enrollment for the final undergraduate semester. All of our department’s honors requirements include student research, for which results shall be presented in at least one of the following forms:

a) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript
b) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline specific meeting)
c) presentation of a poster at an appropriate venue. Additional requirements are:
Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate's final semester, achieve a minimum GPA of 3.25 overall and 3.5 in the major, in all courses taken in residence and elsewhere; (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 597, ASTR 503, PHSX 501 or PHSX 503. A grade of B or better must be earned in one of the following: ASTR 597, ASTR 503, PHSX 501 or PHSX 503.
Bachelor of Arts in Physics

Why study physics and astronomy?
Because understanding the physical universe starts here.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.A. Major in Physics
All students pursuing the Bachelor of Arts in Physics must complete the KU Core requirements and the College BA specific requirements, listed in the KU Core and College sections of the catalog.

Bachelor of Arts in Physics Major Course Requirements

Foundational Physics and Mathematics (17.5)
Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. All honors equivalents are also acceptable to fulfill PHSX major requirements. These hours do not contribute to the minimum number of hours required for the major.

Seminar in Physics, Astronomy, & Engineering Physics. Satisfied by:
PHSX 150 Seminar in Physics, Astronomy and Engineering Physics 0.5
General Physics I. Satisfied by one of the following:
PHSX 211 General Physics I
& PHSX 216 General Physics I Laboratory
PHSX 213 General Physics I Honors
General Physics II. Satisfied by one of the following:
PHSX 212 General Physics II
& PHSX 236 General Physics II Laboratory
PHSX 214 General Physics II Honors

Calculus I. Satisfied by:
MATH 125 Calculus I (or equivalent) 4
Calculus II. Satisfied by:
MATH 126 Calculus II (or equivalent) 4
Advanced Math Requirement (6)
MATH 127 Calculus III 4
Elementary Linear Algebra. Satisfied by:
MATH 290 Elementary Linear Algebra 2
Differential Equations. Satisfied by one of the following:
MATH 220 Applied Differential Equations
MATH 320 Elementary Differential Equations (recommended)

Advance Physics Major Requirements (17)
Majors must complete a course in each of the following areas:
General Physics III. Satisfied by:
PHSX 313 General Physics III 3
Intermediate Physics Lab. Satisfied by:
PHSX 316 Intermediate Physics Laboratory I 1
Introductory Quantum Mechanics. Satisfied by:
PHSX 511 Introductory Quantum Mechanics 3
Mechanics I. Satisfied by:
PHSX 521 Mechanics I 3
Electricity and Magnetism. Satisfied by:
PHSX 531 Electricity and Magnetism 3
Electronic Circuit Measurement and Design. Satisfied by:
PHSX 536 Electronic Circuit Measurement and Design 4
or PHSX 516 Physical Measurements

Physics Required Elective (3)
Satisfied by any lecture or laboratory course numbered 500 or higher. 3

Physics Major Hours & Major GPA
While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Concentration in Computational Physics

Physics Prerequisite or Co-requisite Knowledge (27)
Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

Programming I. Satisfied by:
This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to freshman year, fall semester.

Below is a sample 4-year plan for students pursuing the BA in Physics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

<table>

The University of Kansas

Bachelor of Science in Physics

Why study physics and astronomy?
Because understanding the physical universe starts here.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.S. Degree in Physics

Physics Bachelor of Science (B.S.) General Education Requirements

All students pursuing the Bachelor of Science in Physics must complete the KU Core requirements in addition to the degree and major requirements. For details regarding the KU Core requirements, please see the KU Core section of the catalog.

Foundational Physics and Mathematics (8.5)

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. All honors equivalents are also acceptable to fulfill PHSX major requirements. These hours do not contribute to the minimum number of hours required for the major.

Calculus I. Satisfied by:
MATH 125 Calculus I (or equivalent) 4
Calculus II. Satisfied by:
MATH 126 Calculus II (or equivalent) 4
Seminar in Physics, Astronomy, & Engineering Physics. Satisfied by:
PHSX 150 Seminar in Physics, Astronomy and Engineering Physics 0.5
Bachelor of Science in Physics

General Physics I. Satisfied by one of the following:

- PHSX 211 General Physics I
- & PHSX 216 and General Physics I Laboratory
- PHSX 213 General Physics I Honors

General Physics II. Satisfied by one of the following:

- PHSX 212 General Physics II
- & PHSX 236 and General Physics II Laboratory
- PHSX 214 General Physics II Honors

General Science Requirements (8)

Foundations of Chemistry I. Satisfied by:

- CHEM 130 General Chemistry I

Computing and Programming. Satisfied by:

- EECS 138 Introduction to Computing: _____ excluding Fortran or C
- or EECS 168 Programming I

Advanced Mathematics (9)

Vector Calculus. Satisfied by:

- MATH 127 Calculus III

Elementary Linear Algebra. Satisfied by:

- MATH 290 Elementary Linear Algebra

Applied Differential Equations. Satisfied by:

- MATH 320 Elementary Differential Equations

Math Elective. Satisfied by one of the following: (0)

- PHSX 518 Mathematical Physics
- PHSX 718 Mathematical Methods in Physical Sciences
- MATH 526 Applied Mathematical Statistics I
- MATH 530 Mathematical Models
- MATH 558 Introductory Modern Algebra
- MATH 581 Numerical Methods
- MATH 590 Linear Algebra
- MATH 628 Mathematical Theory of Statistics
- MATH 646 Complex Variable and Applications
- MATH 647 Applied Partial Differential Equations
- MATH 648 Calculus of Variations and Integral Equations
- MATH 660 Geometry I
- MATH 661 Geometry II
- any 700-level MATH lecture course except MATH 701 and MATH 715

Advanced Physics (24-27)

Majors must complete a course in each of the following areas:

General Physics III. Satisfied by:

- PHSX 313 General Physics III

Intermediate Physics Lab. Satisfied by:

- PHSX 316 Intermediate Physics Laboratory I

Introductory Quantum Mechanics. Satisfied by:

- PHSX 511 Introductory Quantum Mechanics

Physical Measurements or Electronic Circuit Measurement and Design. Satisfied by:

- PHSX 516 Physical Measurements
- or PHSX 536 Electronic Circuit Measurement and Design

Mechanics I. Satisfied by:

- PHSX 521 Mechanics I

Electricity and Magnetism. Satisfied by:

- PHSX 531 Electricity and Magnetism

Thermal Physics. Satisfied by:

- PHSX 671 Thermal Physics

Undergraduate Research or Honors Research. Satisfied by:

- PHSX 503 Undergraduate Research
- or PHSX 501 Honors Research

Physics Elective. Satisfied by any PHSX lecture or laboratory course numbered 500 or higher and not part of the other specific requirements for the major.

Physics Required Electives (13)

Majors must complete one of the following options: 13

Preprofessional Option

Majors choosing this option must complete 13 credit hours in advanced physics as follows:

Mechanics II. Satisfied by:

- PHSX 621 Mechanics II

Electromagnetic Theory. Satisfied by:

- PHSX 631 Electromagnetic Theory

Quantum Mechanics. Satisfied by:

- PHSX 711 Quantum Mechanics I

Second Advanced Physics Lab. Satisfied by one of the following:

- PHSX 516 Physical Measurements
- or PHSX 536 Electronic Circuit Measurement and Design

Interdisciplinary Option

Majors choosing this option must complete 13 credit hours in satisfying both categories as follows:

Advanced Physics. Satisfied by two of the following:

- PHSX 621 Mechanics II
- PHSX 631 Electromagnetic Theory
- PHSX 711 Quantum Mechanics I
- PHSX 516 Physical Measurements
- PHSX 536 Electronic Circuit Measurement and Design

Allied Science Field. Satisfied by the completion of 2 advanced courses in 1 allied science field chosen from the following:

Biology. Satisfied by two of the following:

- BIOL 350 Principles of Genetics
- BIOL 400 Fundamentals of Microbiology
- BIOL 408 Physiology of Organisms
- BIOL 412 Evolutionary Biology
- BIOL 416 Cell Structure and Function
- BIOL 600 Introductory Biochemistry, Lectures
- BIOL 636 Biochemistry I
- BIOL 638 Biochemistry II

Chemistry. Satisfied by two of the following:

- CHEM 598 Research Methods (UKanTeach students only)
- CHEM 310 Fundamentals of Organic Chemistry
- CHEM 530 Physical Chemistry I

Geology. Satisfied by two of the following:

- GEOL 360 Field Investigation
- GEOL 562 Structural Geology
- GEOL 572 Geophysics
Undergraduate Programs

Astronomy programs are offered through the Department of Physics and Astronomy. The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics, and prepares students majoring in astronomy for graduate study in astronomy or related fields.

Courses for Nonmajors

ASTR 191 surveys a wide range of contemporary astronomy topics while ASTR 293 discusses a shorter list of astrophysically extreme objects in greater detail; both courses require eligibility for MATH 101. ASTR 394 is open to students with previous coursework in astronomy, geology or biology; ASTR 391 offers an introduction to physical astronomy at a calculus-based level.

Requirements for the Minor in Astrobiology

Astrobiology Minor Course Requirements

Students selecting this minor must complete courses as specified in each of the following areas:

Minor Requirements

**Principles of Molecular and Cellular Biology (4)**

Satisfied by the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 150</td>
<td>Principles of Molecular and Cellular Biology</td>
<td>4</td>
</tr>
</tbody>

**Geology (3)**

Satisfied by one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 101</td>
<td>The Way The Earth Works</td>
<td>3</td>
</tr>
<tr>
<td>GEOL 105</td>
<td>History of the Earth</td>
<td>3</td>
</tr>
<tr>
<td>GEOL 121</td>
<td>Life Through Times: DNA to Dinosaurs</td>
<td>3</td>
</tr>
</tbody>
</table>

**Physical Astronomy, Honors (3)**

Satisfied by the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTR 391</td>
<td>Physical Astronomy, Honors</td>
<td>3</td>
</tr>
</tbody>
</table>

**Astrobiology Core (1-4)**

Satisfied by one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTR 394</td>
<td>The Quest for Extraterrestrial Life</td>
<td>1-4</td>
</tr>
<tr>
<td>ASTR 503</td>
<td>Undergraduate Research</td>
<td>1-4</td>
</tr>
</tbody>
</table>

**Astrobiology Required Electives (6)**

Student selecting this minor must complete 6 credit hours of course work in astronomy, biology, chemistry, geology, or physics at the 300-level or higher and not in the student's major field.

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

**Minor Hours**

Satisfied by a minimum of 19 hours of minor coursework.

**Minor Hours in Residence**

Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.
Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in courses in the minor. GPA calculations include all courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Minor in Astronomy

Why study astronomy?
Because understanding the physical universe starts here.

Undergraduate Programs
Astronomy programs are offered through the Department of Physics and Astronomy. The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics, and prepares students majoring in astronomy for graduate study in astronomy or related fields.

Courses for Nonmajors
ASTR 191 surveys a wide range of contemporary astronomy topics while ASTR 293 discusses a shorter list of astrophysically extreme objects in greater detail; both courses require eligibility for MATH 101. ASTR 394 is open to students with previous coursework in astronomy, geology or biology; ASTR 391 offers an introduction to physical astronomy at a calculus-based level.

Requirements for the Minor in Astronomy

Astronomy Minor Course Requirements
Students selecting this minor must complete courses as specified in each of the following areas:

General Physics I (5)
Satisfied by one of the following:

- PHSX 211 General Physics I
- & PHSX 216 and General Physics I Laboratory
- PHSX 213 General Physics I Honors

General Physics II (4)
Satisfied by one of the following:

- PHSX 212 General Physics II
- & PHSX 236 and General Physics II Laboratory
- PHSX 214 General Physics II Honors

General Physics III and Intermediate Physics Laboratory (4)
Satisfied by the following:

- PHSX 313 General Physics III
- & PHSX 316 Intermediate Physics Laboratory I

Physical Astronomy, Honors (3)
Satisfied by the following:

- ASTR 391 Physical Astronomy, Honors

Astronomy Required Electives. Satisfied by at least 5 hours in any combination of ASTR courses numbered above 300.

Minor Hours & Minor GPA
While completing all required courses (above), minors must also meet each of the following hour and grade-point average minimum standards:

- Minor Hours: 20 hours of minor courses.
- Minor Hours in Residence: 9 junior/senior (300+) hours of KU resident credit in the minor.
- Minor Junior/Senior Hours: 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Minor in Physics

Why study physics and astronomy?
Because understanding the physical universe starts here.

Requirements for the Minor in Physics

Physics Minor Course Requirements
Student selecting this minor must complete courses as specified in each of the following areas:

General Physics I. Satisfied by one of the following:

- PHSX 211 General Physics I
- & PHSX 216 General Physics I Laboratory
- PHSX 213 General Physics I Honors

General Physics II. Satisfied by one of the following:

- PHSX 212 General Physics II
- & PHSX 236 General Physics II Laboratory
- PHSX 214 General Physics II Honors

General Physics III and Intermediate Physics Laboratory. Satisfied by:

- PHSX 313 General Physics III
- & PHSX 316 Intermediate Physics Laboratory I

Mechanics I. Satisfied by:

- PHSX 521 Mechanics I

Electricity and Magnetism. Satisfied by:

- PHSX 531 Electricity and Magnetism

Physics Required Elective. Satisfied by any 3 credit hour PHSX course numbered 500 or above.

Minor Hours & Minor GPA
While completing all required courses (above), minors must also meet each of the following hour and grade-point average minimum standards:

- Minor Hours: 21 hours of major courses.
- Minor Hours in Residence: 9 junior/senior (300+) hours of KU resident credit in the major.
- Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 13 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in the minor. GPA calculations include all courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Master of Science in Physics**

**Why study physics and astronomy?**
Because understanding the physical universe starts here.

**Admission to Graduate Studies**
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**
Ordinarily, admission requires an undergraduate grade-point average of at least B (3.0 on a 4.0 scale), overall and in the major. A baccalaureate degree with a major in physics is desirable but not required. Recommended preparation consists of courses in mechanics, electromagnetic theory, thermal physics, introductory quantum mechanics, advanced laboratory, and at least one course in mathematics beyond differential equations. Working knowledge of computers and of an advanced programming language is helpful. A student with less than the recommended preparation may enroll in these courses for graduate credit.

Submit your graduate application online (http://www.graduate.ku.edu). Send all other requested application materials to the department:

**The University of Kansas**
Department of Physics and Astronomy
Graduate Coordinator
Malott Hall
1251 Wescoe Hall Dr., Room 1082
Lawrence, KS 66045-7572

**M.S. Degree in Physics**
The departmental web page with some additional information, e.g., milestones, can be found at http://www.physics.ku.edu/~physics/graduate/about.shtml

Candidates must complete a minimum of 30 credit hours of advanced lecture courses (numbered 500 or above) in physics and related subjects within a period of 7 years. Program requirements include

1. An undergraduate knowledge of physics. This must be certified by the department to be at an advanced undergraduate level (600-level KU courses). The certification must be achieved within 12 months (extension possible with recommendation of the graduate admission committee) of entering the program and may require additional coursework. Extension is possible with recommendation of the graduate admission committee. Certification can be achieved in several ways:
   a. A GRE physics score greater than or equal to 650; or
   b. The determination by the graduate director and graduate advisor, based on the diagnostic exam given on entering the program combined with the student's undergraduate record, that the student understands all major elements of undergraduate physics; or
   c. Successful completion with grade of B or better on all undergraduate courses that the graduate director and/or advisor recommends based on the results of part b. above. The student who has not succeeded in certifying his or her undergraduate physics knowledge in 1 of the above 3 ways could, within 12 months of starting the program, petition the Graduate Committee for an oral exam on undergraduate physics. The oral exam will be administered by a committee of 6 faculty members assigned by the department.
   d. A candidate for a Master's or Ph.D. degree who has not had the equivalent of 6 credit hours of advanced undergraduate laboratory course work (Junior/Senior level) is required to take 1 of the 3 advanced laboratory courses offered in the Department.

4. A minimum of 2 hours in PHSX 899 Master's Research/Thesis is required, with a maximum of 6 hours that count toward the master's degree. Ordinarily no more than 2 hours will be allowed unless a thesis or written report is presented.

5. The remaining 6 to 10 hours of advanced electives must be either advanced lecture courses or advanced undergraduate laboratory courses. (This proviso excludes seminars and special problems courses.)

**Communication Skills**
All graduate students, after their first semester, will deliver at least 1 oral presentation per semester. The talk should be at least 20 minutes long. For students not yet associated with a research group, the Graduate Seminar can serve as a venue. For more advanced students the seminar
of their research group would be a natural venue. The student does not need to be enrolled in the seminar to present a talk for this purpose. Off-campus venues such as collaboration meetings and physics conferences can also serve this purpose. When giving presentations, students should fill out a form available on the department web site and have it signed by 2 witnesses, 1 of which must be a Physics or Astronomy faculty and other a Ph.D. doing research in the department. The completed form must be handed to the office staff. Faculty members who sign off on the talks are expected to provide constructive feedback to the student. The graduate advisor will monitor student compliance with the requirement.

**General Examination**

Candidates must pass a general oral examination in physics. The examination is given shortly before completion of other work for the degree. A master’s thesis is not required but may be submitted if the candidate and the director of the candidate’s research believe it to be appropriate.

**M.S. Subspecialty in Computational Physics and Astronomy**

This degree is a subspecialty program for students with a background in physics, astronomy, computer science, mathematics, or engineering who wish to become familiar with computer-based approaches to problems in these fields. Minimum preparation expected includes a year’s course in general physics, mathematics through differential equations, and a knowledge of FORTRAN, C++, or another programming language.

A total of 30 hours of graduate credit is required. The 33 hours listed below under 2 and 3 may include certain undergraduate-level electrical engineering and computer science courses. (Only courses numbered 500 and above count as graduate credit.) Students entering the program may have satisfied several of these requirements, but a total of 30 hours of graduate credit is still required. No more than the required 6 hours of PHSX 899 Master’s Research/Thesis may be counted toward the degree.

Degree requirements include:

1. An undergraduate knowledge of physics. This must be certified by the department to be at an advanced undergraduate level (600-level KU courses). The certification must be achieved within 12 months (extension possible with recommendation of the graduate admission committee) of entering the program and may require additional coursework. Extension is possible with recommendation of the graduate admission committee. Certification can be achieved in several ways:
   a. A GRE physics score greater than or equal to 650; or
   b. The determination by the graduate director and graduate advisor, based on the diagnostic exam given on entering the program combined with the student's undergraduate record, that the student understands all major elements of undergraduate physics; or
   c. Successful completion with grade of B or better on all undergraduate courses that the graduate director and/or advisor recommends based on the results of part b above. The student who has not succeeded in certifying their undergraduate physics knowledge in 1 of the above 3 ways could, within 12 months of starting the program, petition the Graduate Committee for an oral exam on undergraduate physics. The oral exam will be administered by a committee of 6 faculty members assigned by the department.

2. Required Courses (21 credit hours)

- MATH 783  Applied Numerical Methods for Partial Differential Equations | 3 |

4. Communication Skills: All graduate students, after their first semester, will deliver at least 1 oral presentation per semester. The talk should be at least 20 minutes long. For students not yet associated with a research group, the Graduate Seminar can serve as a venue. For more advanced students the seminar of their research group would be a natural venue. The student does not need to be enrolled in the seminar to present a talk for this purpose. Off-campus venues such as collaboration meetings and physics conferences can also serve
this purpose. When giving presentations, students should fill out a form available on the department web site and have it signed by 2 witnesses, 1 of which must be a Physics or Astronomy faculty and another a Ph.D. doing research in the department. The completed form must be handed to the office staff. Faculty members who sign off on the talks are expected to provide constructive feedback to the student. The graduate advisor will monitor student compliance with the requirement.

5. Thesis: An important component of this degree is the completion and documentation of a successful computer project. A thesis must be presented that describes the basic physics involved in the project, the method of implementing the project, and a discussion of the results. An oral defense of the thesis is required before a committee of at least 3 members of the graduate faculty.

Please go to this website to see the University’s policy on time limits: https://documents.ku.edu/policies/Graduate_Studies/maprogramtimeconstraints.htm

Doctor of Philosophy in Physics

Why study physics and astronomy?

Because understanding the physical universe starts here.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Ordinarily, admission requires an undergraduate grade-point average of at least B (3.0 on a 4.0 scale), overall and in the major. A baccalaureate degree with a major in physics is desirable but not required. Recommended preparation consists of courses in mechanics, electromagnetic theory, thermal physics, introductory quantum mechanics, advanced laboratory, and at least one course in mathematics beyond differential equations. Working knowledge of computers and of an advanced programming language is helpful. A student with less than the recommended preparation may enroll in these courses for graduate credit.

Submit your graduate application online (http://www.graduate.ku.edu). Send all other requested application materials to the department:

The University of Kansas
Department of Physics and Astronomy
Graduate Coordinator
Malott Hall
1251 Wescoe Hall Dr., Room 1082
Lawrence, KS 66045-7572

Ph.D. Degree Requirements

The departmental web page with some additional information, e.g., milestones, can be found online (http://www.physics.ku.edu/~physics/graduate/about.shtml).

Residence

To become a Ph.D. candidate, i.e. to take the comprehensive exam:

The student must spend at least 2 semesters, which may include 1 summer session, in resident study at the University of Kansas.

To earn a Ph.D.:

The student must spend at least the equivalent of 3 full academic years in graduate study at this or another approved institution or laboratory. During this period of residence, the student must be involved full-time in academic or professional pursuits, which may include an appointment for teaching or research if the teaching/research is directed specifically toward the student’s degree objectives.

Graduate students with half-time assistantships usually require at least 4 years to complete all requirements. Maximum enrollment for students with no other departmental obligations is 16 hours a semester. In addition to satisfying the residence requirement, a student with a half-time assistantship must be enrolled for at least 6 hours each semester. A maximum of 12 hours is permitted if the student’s duties consist of research that partially fulfills degree requirements. A fellowship holder or full-time student with private support must be enrolled for at least 9 hours.

Time Limits

See the University’s policy on time limits (https://documents.ku.edu/policies/Graduate_Studies/docprogramtimeconstraints.htm).

Graduate Teaching Assistantship Eligibility

To be eligible for teaching assistantships, all graduate students who are not native speakers of English must achieve a minimum score of 50 on the SPEAK test. International students must pass an oral examination to demonstrate English fluency. Students who fail this examination should take courses from the Applied English Center.

Every student who receives a GTA appointment will be required to complete PHSX 702 Introductory Physics Pedagogy at the first offering of the course starting with the semester of the student’s initial GTA appointment. Failure to complete this class at the first opportunity may affect consideration for subsequent GTA appointments.

Preliminary Candidacy

To be admitted to preliminary candidacy, each graduate student must satisfy department requirements:

1. Undergraduate knowledge of physics must be certified at the department undergraduate level (600-level KU courses). The ways to achieve this certification are outlined above under Course Requirements.

A candidate for a Master's or Ph.D. degree who has not had the equivalent of 6 credit hours of advanced undergraduate laboratory course work (Junior/Senior level) is required to take 1 of the 3 advanced laboratory courses offered in the department.
Doctor of Philosophy in Physics

2. Achieve a minimum core course grade point average of 3.2. The core course GPA is computed from the following 5 equally weighted elements:

a. Average grade of 2 other PHSX lecture courses numbered 700 or higher, excluding PHSX 815 (computational physics) and PHSX 717 (graduate seminar).

b. The 2 "other PHSX lecture courses numbered 700 or higher" must be taken at KU, but students entering with graduate credit from other institutions may petition the Graduate Committee for transfer credit for any of the 4 named core courses. For the purposes of the core GPA, grades (of "B" or better) from the previous institution may be used for at most 3 of the 4 named courses. For the remaining course the student must obtain written certification of "B" performance or better from the instructor of the course at KU. Such certification may be obtained by taking the course, taking the final exam of the course (if there is one), or other means which the instructor may determine. An appropriate higher-level course may also be used to obtain certification in a core course (for example for PHSX 711 or PHSX 811, PHSX 931 for PHSX 831.)

c. Graduate students are normally expected to complete all core courses by the end of their second year of enrollment. Students who are required to complete an undergraduate physics certificate have 3 years to finish their core courses. Extensive Applied English Center (AEC) courses, prolonged illness, or extended military service might provide exceptional circumstances.

Decision on Preliminary Candidacy

Once Undergraduate requirements have been certified and sufficient information has been received regarding the required courses, the Graduate Committee will decide whether or not to admit the student to preliminary candidacy. This decision will be based upon the certification and on their core course GPA. The Graduate Committee Chair will report their decision to the Graduate Faculty.

Course Requirements

What follows are the default set of requirements for all Ph.D. candidates.

1. An undergraduate knowledge of physics. This must be certified by the department to be an advanced undergraduate level (600-level KU courses). The certification must be achieved within 12 months (extension possible with recommendation of the graduate admission committee) of entering the program and may require additional coursework. Extension is possible with recommendation of the graduate admission committee. Certification can be achieved in several ways:

- Grade obtained in PHSX 711 Quantum Mechanics I
- Grade obtained in PHSX 811 Quantum Mechanics II
- Grade obtained in PHSX 821 Classical Mechanics
- Grade obtained in PHSX 831 Electrodynamics I
- Average grade of 2 other PHSX lecture courses numbered 700 or higher

2. A GRE physics score greater than or equal to 650; or

3. Successful completion with grade of B or better on all undergraduate courses that the graduate director and/or advisor recommends based on the results of (2). The student who has not succeeded in certifying their undergraduate physics knowledge in one of the above 3 ways could, within 12 months of starting the program, petition the Graduate Committee for an oral exam on undergraduate physics. The oral exam will be administered by a committee of 6 faculty members assigned by the department.

4. A candidate for a Master's or Ph.D. degree who has not had the equivalent of 6 credit hours of advanced undergraduate laboratory course work (Junior/Senior level) is required to take 1 of the 3 advanced laboratory courses offered in the Department.

- PHSX 516 Physical Measurements
- PHSX 536 Electronic Circuit Measurement and Design
- PHSX 601 Design of Physical and Electronic Systems

A total of 11 advanced lecture courses (33 hours) is required. In addition, 1 hour of PHSX 700 Colloquium, 1 hour of PHSX 717 Graduate Seminar, and (for GTAs only) one hour of PHSX 702 Introduction to Physics Pedagogy are required.

2. Core courses:

- PHSX 711 Quantum Mechanics I
- PHSX 811 Quantum Mechanics II
- PHSX 821 Classical Mechanics
- PHSX 831 Electrodynamics I

3. Other required courses:

- PHSX 718 Mathematical Methods in Physical Sciences
- PHSX 815 Computational Methods in Physical Sciences (satisfies Research Skills requirement)
- PHSX 871 Statistical Physics I
- PHSX 931 Electrodynamics II

4. 2 additional PHSX lecture courses numbered 700 or above. This excludes PHSX 815 (computational physics) and PHSX 717 (graduate seminar). The 2 courses must be in different sub-fields of physics and they may not be used to simultaneously satisfy other degree requirements in force. (For example, if PHSX 911 is being used to satisfy the PHSX 811 core requirement, it may not also be used to satisfy the requirement for 2 lecture courses at the 700 level or above.)

5. 1 additional advanced PHSX lecture course (numbered 800 or above; excluding PHSX 815)

6. 1 credit hour of Colloquium is required (PHSX 700). See "Colloquium and Graduate Seminar for an explanation."

7. All graduate students, after their first semester, will deliver at least 1 oral presentation per semester. See "Communication Skills" for an explanation.

The courses listed above comprise the Department course requirements common to all students except those pursuing a multi-disciplinary plan of study, which is described below. There is no foreign language requirement. Subsequent work, consisting of advanced courses in appropriate fields and seminars, will be selected by the student and
the advisor on the basis of the student's need and intended field of specialization. There is no prescribed minimum number of hours for the Ph.D. degree. The student's dissertation committee will determine the adequacy of the student's courses and seminars and will specify the total course requirements. Neither the Graduate School nor the Department has a requirement for a minor.

Students who wish to pursue a more multidisciplinary plan of study may incorporate coursework from up to 2 other natural science, engineering, or mathematics (SEM) departments at KU by substituting non PHSX courses at the 600 level and above from these other disciplines for the 3 additional electives described in items c) and d) above. The research advisor, or in the absence of one, the Departmental Graduate Advisor (who is the default advisor for all students without a research advisor), shall approve all such outside course choices and provide documentation for the student file on the approved courses and their rationale.

Students who wish to take courses in the social sciences, humanities, or professional schools must submit a detailed plan of study that must be approved by the Physics and Astronomy Graduate Committee. Please note that while these unique plans involving non SEM fields will be considered, there is no guarantee that the plan of study will be approved.

Suggested Course Schedule

A sample academic schedule for a student who has a half-time teaching or research assistantship during the first 4 semesters is shown below. It includes the core courses for admission to preliminary candidacy (described in a subsequent section) and a set of lecture courses that meet the Ph.D. course requirements. It is the schedule for a full-time resident student with the normal preparation described above and who is working toward the Ph.D. degree. Students admitted with less preparation should begin with less advanced courses. Courses numbered 500 and above carry graduate credit.

The electives listed below, e.g. PHSX 741, PHSX 781, PHSX 795, PHSX 911, are purely an illustrative option. Students have the freedom to choose which non-required courses satisfy their elective requirements. Note that this sample schedule may also not apply for a student pursuing a more multidisciplinary plan of study.

Total Hours: 38

Communication Skills

All graduate students, after their first semester, will deliver at least 1 oral presentation per semester. The talk should be at least 20 minutes long.

For students not yet associated with a research group, the Graduate Seminar can serve as a venue. For more advanced students the seminar of their research group would be a natural venue. The student does not need to be enrolled in the seminar to present a talk for this purpose. Off-campus venues such as collaboration meetings and physics conferences can also serve this purpose. When giving presentations, students should fill out a form available on the department website and have it signed by 2 witnesses, 1 of which must be a Physics or Astronomy faculty and other a Ph.D. doing research in the department. The completed form must be handed to the office staff. Faculty members who sign off on the talks are expected to provide constructive feedback to the student. The graduate advisor will monitor student compliance with the requirement.

Colloquium and Graduate Seminar

All students must enroll in PHSX 700 Colloquium in the sixth semester. Students should have attended at least 75 percent of the regularly scheduled colloquia during the 6 semesters to achieve a passing grade. In Fall of the first year, each graduate student is required to enroll in and attend the graduate seminar (PHSX 717) in order to familiarize themselves with research programs in the Department and gain experience in oral presentations.

Research Skills and Responsible Scholarship

By the end of 1 year after being admitted to preliminary candidacy, the student must complete PHSX 815/ASTR 815, Computational Physics and Astronomy, with a grade of "B" or higher in order to satisfy the Research Skills requirement. Note that this course has significant prerequisites in undergraduate Computer Science. The Responsible Scholarship requirement is filled via completion of PHSX 717.

Computing Skill

Students must complete PHSX 815 Computational Methods in Physical Sciences/ASTR 815 Computational Physics and Astronomy with a grade of A or B, preferably within 1 year after admission to preliminary candidacy. This course has significant prerequisites in advanced undergraduate computer science and requires completion of a substantial computer program to solve a physical problem.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Comprehensive Examination

Graduate College requirements for the Comprehensive Examination can be found at https://documents.ku.edu/policies/Graduate_Studies/doccomprehensiveorals.htm.

After completing a major portion of the required course work and satisfying the computing skills requirement, the student must pass the comprehensive examination. The Department recommends at least 5 people for committee membership to the Graduate Division, which makes the final appointments. 1 committee member must come from outside of the Department to serve as a representative of the Graduate School. Requests to take the examination must be made to the Graduate Coordinator at least 3 weeks in advance of the date of the examination.

The student will write a 2000 to 4000 word paper on a topic in their chosen sub-field that is relevant to their thesis work. This paper must be presented to the committee at least 1 week in advance of the scheduled oral exam. The student will make a presentation at the oral examination...
based upon this paper, and will be examined on the contents of the talk, the paper, and works listed in the paper's bibliography. The bibliography must include at least 1 recent article from a peer-reviewed journal not authored by the student or the student's advisor. In addition, the committee may ask questions at the oral examination that cover the entire field of physics plus any related material (such as mathematics or chemistry) considered relevant by the examining committee.

In order to pass the comprehensive exam, the student must receive passing grades on both the written and oral components of the exam. The overall grade on this examination, determined by the examining committee, will be "Honors," "Satisfactory," or "Unsatisfactory."

Post-Comprehensive Requirements

Upon passing the comprehensive examination, the student becomes a candidate for the Ph.D. degree. The Graduate Division will then designate the candidate's dissertation committee based on the recommendation of the Department. Each candidate must complete a research project that has been approved by the committee. The committee establishes the candidate's course requirements and directs the research.

Unless granted a leave of absence, the candidate must be continuously enrolled full-time, including summer sessions, until all requirements for the degree are completed. During this time, the candidate must enroll in a minimum of 6 hours a semester and 3 hours a summer session until the completion of the degree or of 18 hours of post-comprehensive enrollment, whichever comes first. (Post-comprehensive enrollment may include the semester in which the comprehensive examination is passed.) After 18 hours of post-comprehensive enrollment, the candidate must continue to enroll each semester and each summer session until all requirements for the degree have been met. If the student petitions, they can enroll for only 1 hour of credit in spring, summer, and fall and still maintain their GTA or GRA status. For more information, see the Graduate Studies policy on GTA/GRA Certification of Eligibility to Enroll in Fewer than Six Hours (http://policy.ku.edu/graduate-studies/doctoral-GTA-eligibility-fewer-six-hours).

At least once each year after passing the comprehensive examination, the student should schedule a meeting with his or her dissertation committee to discuss progress towards the completion of the dissertation and any other concerns. A report of the committee's consensus of the meeting should be prepared by a member of the committee other than the student's advisor and placed in the student's file. Copies are to be given to the Departmental Chairman, the Graduate Committee Chair, the Graduate Advisor, the Departmental Director of Graduate Studies, and the student.

For more information, please view the Graduate Studies policy on post-comprehensive enrollment (http://policy.ku.edu/graduate-studies/doctoral-candidacy).

Final Oral Examination

The final oral examination will proceed according to the regulations of Graduate studies. These can be found at https://documents.ku.edu/policies/Graduate_Studies/docfinaloral.htm.

We refer to these requirements below, as they appeared on September 24, 2010, and we have inserted some modified requirements for those students who wish to pursue a more multidisciplinary dissertation topic.

It is the responsibility of the student to make sure that they satisfy the current university requirements.

Completion of the dissertation is the culminating academic phase of a doctoral program, climaxed by the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the dissertation is followed promptly by the final oral examination. When the completed dissertation has been accepted by the committee in final draft form, and all other degree requirements have been satisfied, the chair of the committee requests the Graduate Division to schedule the final oral examination. This request must be made in advance of the desired examination by at least the period specified by the Graduate Division (normally at least 3 weeks). The submission of the request must allow sufficient time to publicize the examination so that interested members of the university community may attend. At least 5 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination.

The committee for the final oral examination must consist of at least 5 members (the members of the dissertation committee plus other members of the Graduate Faculty recommended by the committee chair and the department and appointed by the Graduate Division). The Chair of the committee and 3 of the other 4 members must have appointments of some type within the Physics and Astronomy department. 1 member must be from a department other than the Physics and Astronomy department. The outside member represents Graduate Studies and must be a regular member of the Graduate Faculty. Before the examination, the Graduate Division provides a list of responsibilities to the Graduate Studies representative. The Graduate Studies representative is a voting member of the committee, has full right to participate in the examination, and provides a written report on any unsatisfactory or irregular aspects of the examination to the committee chair, department chair, Graduate Division, and Graduate Studies.

For students (and only those students) who are pursuing a multidisciplinary plan of study -- as defined by their substitution of courses from other departments for PHSX electives as described in the Course Requirements section -- up to 2 members of the committee, including the 1 required outside member, may be faculty from other SEM departments with regular, adjunct, or courtesy appointments at KU. The Chair must have an appointment of some type within the Physics and Astronomy department. (Exception: if the primary appointment of the Chair is outside the department, then only 1 additional committee member may be outside the Department of Physics and Astronomy.) NOTE: It is assumed that these research projects may involve interaction between physics and 1 or more other SEM disciplines; therefore, the external faculty members may come from up to 2 different departments. The Graduate Division ascertains whether all other degree requirements have been met and if reports of any previously scheduled final oral examinations have been submitted and recorded. Upon approval of the request, the final oral examination is scheduled at the time and place designated by the Graduate Division. This information must be published in a news medium as prescribed by the Graduate Faculty. Interested members of the university community are encouraged to attend these examinations. For every scheduled final oral examination, the department reports to the Graduate Division a grade of Honors, Satisfactory, or Unsatisfactory for the candidate’s performance. If an Unsatisfactory grade is reported, the candidate may be allowed to repeat the examination on the recommendation of the department.
Department of Political Science

Why study political science?

Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe.

Undergraduate Programs

Course work is for students studying contemporary political processes as part of their general education, for students majoring in allied social sciences, for students planning to enter professions such as law and teaching, and for majors in political science.

Courses for Nonmajors

Any of the 3 introductory courses apply to College social sciences principal course requirements. Several political science courses qualify as non-Western culture courses.

Public Affairs Internship Program

The department supervises integrated internships for majors who are second-semester juniors or seniors. They are offered during the spring semester in Topeka and Washington, D.C. Programs consist of up to 12 hours in political science—an internship, participation in an intern seminar, and directed readings. Students serve as interns in Topeka or Washington at least 4 days each week and attend weekly seminars. Students also may enroll in a directed readings course with a faculty member on campus. Readings provide a theoretical and analytical study program related to the internship and the seminar. Contact the department early in the fall semester.

Graduate Programs

The department offers M.A. and Ph.D. degrees for students interested in academic work in political science leading to teaching and research careers. Political science graduates also have found careers in the public, private, and not-for-profit sectors. Ph.D. students can pursue concentrations in U.S. politics, comparative politics, international relations, political theory, and public policy.

Fields of Graduate Study

For graduate study, courses in the department are divided into the following fields:

- U.S. political institutions and processes
- Comparative politics
- International relations
- Public policy
- Political philosophy and empirical theory

Courses

POLS 102. Introduction to Political Science as a Career. 1 Hour. S.
Provides an overview of the discipline of political science; emphasizes developing an understanding of opportunities in political science at the University of Kansas and careers with a political science degree. Major sub-fields within the discipline are discussed as well as the benefits of particular tracks within the departmental coursework. The course helps students plan their goals for their education and match those goals to career goals. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Enrollment by permission of the instructor only. LEC.

POLS 110. Introduction to U.S. Politics. 3 Hours. SF GE3S / S.
An introduction to basic American governmental institutions, political processes, and policy. LEC.

POLS 111. Introduction to U.S. Politics Honors. 3 Hours. SF GE3S / S.
Open only to students in the College Honors Program or by consent of instructor. LEC.

POLS 150. Introduction to Comparative Politics. 3 Hours. SF AE42/GE3S / S.
An introduction to the comparative study of political systems emphasizing governmental structures, parties, electoral techniques, and recent trends in the field. The course also considers major differences between (1) representative and autocratic systems, and (2) developed and underdeveloped nations. LEC.

POLS 151. Introduction to Comparative Politics Honors. 3 Hours. SF AE42/GE3S / S.
Open only to students in the College Honors Program or by consent of instructor. LEC.

POLS 170. Introduction to International Politics. 3 Hours. SF AE42/GE3S / S.
A study of the nation-state system including the role of nationalism, sovereignty, and power. Patterns of state action including neutralism, collective security, war, and cooperation through international organizations are stressed. Specific examples of contemporary international problems are also analyzed and discussed. LEC.

POLS 171. Introduction to International Politics Honors. 3 Hours. SF AE42/GE3S / S.
Open only to students in the College Honors Program or by consent of instructor. LEC.

POLS 177. First Year Seminar: _____ . 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Political Science. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

POLS 249. Study Abroad Topics in Political Science: _____. 1-6 Hours. S.
This course is designed for the study of special topics in Political Science at the freshman/sophomore level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

POLS 301. Introduction to Political Theory. 3 Hours. GE3S / S.
An examination of the perennial issues and major concepts in political philosophy. Ideas such as community, liberty, equality, justice, and democracy will be examined in order to understand the various meanings given to these concepts in political discourse and to understand the role to these ideas in various political theories. Prerequisite: Either POLS 110 or POLS 150 or POLS 170, or their honors equivalents. LEC.

POLS 302. Introduction to Political Theory, Honors. 3 Hours. S.
Prerequisite: Either POLS 110, POLS 150, or POLS 170, or their honors equivalents and open only to students in the College Honors Program, or by consent of instructor. LEC.

POLS 306. Political Science Methods of Inquiry. 3 Hours. GE12 / S.
An introduction to the social science methods of investigation and analysis that are used in political science as a discipline and, in many cases, in public and private sector analytical work as well. The nature of political science data sources and methods of data collection, the logic of social scientific inquiry, and key methods of data analysis are emphasized.
POLS 310. Contemporary Issues in U.S. Politics. 3 Hours. S.
An examination of issues and problems concerning government and politics in American society. This course is intended primarily for non-majors, and does not meet the junior/senior level course field distribution requirement. LEC.

POLS 320. Introduction to Public Policy. 3 Hours. GE3S / S.
Offers an introduction to the policy-making process covering policy formulation, adoption, and implementation. Overview of major theories of the policy-making process, the actors involved in the process, and the constraints and enhancements offered by the broader political environment. The theoretical frameworks are applied to several substantive policy areas. Prerequisite: POLS 110. LEC.

POLS 330. Introduction to Public Administration. 3 Hours. S.
Introduction to public administration, public policy and policy makings is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as PUAD 330.) Prerequisite: POLS 110. LEC.

POLS 331. Introduction to Public Administration, Honors. 3 Hours. S.
Introduction to public administration, public policy and policy making, for honors students, is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as PUAD 331.) Prerequisite: POLS 110. LEC.

POLS 340. Contemporary Issues in Comparative Politics. 3 Hours.
This course will survey selected current political issues around the globe. The focus of the course will be on understanding and analyzing the wide diversity of political phenomena that mark countries around the world. Topics may include such things as elections and electoral politics; political parties; government stability; democratization; ethnic, racial, caste, or religious conflict; protest and revolutionary movements; social movements (environmental, feminist, and others); and the politics of economic reform. This course is intended primarily for non-majors, and does not meet the junior/senior level course field distribution requirement. LEC.

POLS 350. Contemporary Issues in International Relations. 3 Hours. S.
Theoretical frameworks are applied to several substantive issues in international relations. Topics include global economic interdependence, regional conflicts and nationalism, United States military and economic policy in the post-Cold War era, the role of international organizations such as the United Nations and the European Community, global environmental problems and the contemporary role of international law. This course is intended primarily for non-majors and does not meet the junior/senior level course field distribution requirement. LEC.

POLS 355. Contemporary Issues in Political Theory. 3 Hours. S.
POLS 355 is a seminar course designed to introduce students to some of the major figures and issues in modern political theory, from Hobbes to Marx. The emphasis is on understanding major classics in western political thought. Prerequisite: POLS 301, or (for non-majors) completion of the Western Civilization requirement, or consent of instructor. LEC.

POLS 360. Politics in Literature. 3 Hours. S.
An examination and analysis of the portrayal of politics and political problems in literature. Classical and modern texts will be considered, including dramas, poems, and novels. Prerequisite: POLS 301, or (for non-majors) completion of the Western Civilization requirement, or consent of instructor. LEC.
POLS 504. Millenarian Movements. 3 Hours. S.
A historical survey of millenarian movements (the belief in imminent, total, ultimate, this-worldly, collective salvation), with particular attention to their psychological, sociological, and political dimensions. (Same as REL 504.) Prerequisite: POLS 301 or honors equivalent or for non-majors completion of Western Civilization requirement, or consent of instructor. LEC.

POLS 506. Honors Seminar in Political Research. 3 Hours. S.
Students will be exposed to a variety of topics related to the conduct of political science research. Emphasis will be on how one discerns what is known and what remains to be discovered about a research topic, the development of theories and the hypotheses about the unknown, and the collection of information for testing theories. Students will be expected to begin independent research on a topic that might eventually culminate in an honors thesis. This seminar is intended for political science majors who are in the honors or deans programs, who hold departmental scholarships, and/or who intend to write honors theses. Prerequisite: POLS 306. IND.

POLS 511. The Judicial Process. 3 Hours. S.
Covers judicial functions, organizations, personnel, and processes. Examines the goals of the law and the operations of the legal system in meeting these objectives. Focuses on norm enforcement, conflict resolution, and judicial policy-making. Prerequisite: POLS 110. LEC.

POLS 512. Latino Politics. 3 Hours. S.
An overview of the political position of Latinos/os in the United States. The focus is on the three largest Latino groups in the U.S.: Mexican-Americans, Cuban-Americans, and Puerto Ricans; as well as an examination of other South American and Central American populations in the U.S. The main topics include identity formation, the political circumstances of Latinos, relationship to the electoral process, political behavior, and the policy process. LEC.

POLS 515. American Political Parties. 3 Hours. S.
Survey of the development of the American political party system, stressing party organization, nominating systems, campaigns, elections, role of mass media, and party finances. Prerequisite: POLS 110. LEC.

POLS 516. Public Opinion and American Democracy. 3 Hours. S.
This course examines the construction, administration, and interpretation of public opinion polls. The course will also examine the role of public opinion in the democratic process and the formation of public opinion. LEC.

POLS 520. Political Communication. 3 Hours. H.
This course will focus on contemporary political communication theory and illustrate how such theories are exemplified in modern political contexts: political arguments and developing consensus, constitutional issues and hearings, the rhetorical presidency, the dissemination of political information, and political uses of definition. (Same as COMS 607.) Prerequisite: COMS 130 or COMS 150. LEC.

POLS 521. Rhetoric, Politics and the Mass Media. 3 Hours. H.
This course investigates the ways in which rhetorical strategies (persuasive and linguistic usage) permeate the relationship between politics and politicians and the mass media. We will analyze media coverage of political debates, the presidential use of radio, television and press conferences, and the network evening news coverage of political events to see how political decisions are influenced by and influence the media. (Same as COMS 335.) Prerequisite: COMS 130 or COMS 150. LEC.

POLS 528. Environmental Justice and Public Policy. 3 Hours. S.
This course provides an overview of environmental justice, both as a social movement and as a public policy initiative. Environmental justice examines the distribution of environmental externalities across different socio-economic and racial groups. We will discuss several different public policy areas that have been impacted by the environmental justice movement: hazardous waste facility siting, urban redevelopment and Brownfields, transportation policy, and Native American sovereignty. We will also touch upon international environmental policy in an environmental justice context. Throughout the course we will evaluate empirical issues in studying environmental justice. (Same as EVRN 528.) Prerequisite: POLS 306 or a statistics class or consent of instructor. LEC.

POLS 553. Comparative Environmental Politics. 3 Hours. S.
This course compares environmental politics and policies across a number of countries, including those in North America, Western Europe, East Asia, and Latin America. (Same as EVRN 553.) LEC.

POLS 561. Liberation in Southern Africa. 3 Hours. NW AE42 / S.
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as AAAS 561 and HIST 561.) LEC.

POLS 562. Women and Politics. 3 Hours. S.
This course exposes students to contemporary research on women and politics by surveying the sub-fields of political science. Topics include women's representation in the U.S., women and U.S. public policy, gender and legal theory, international women's movements, women and revolution, and women as political elites. We will examine the ways in which feminist theory and women's activism have challenged the narrow focus of the discipline as well as redefined women's place in society. (Same as WGSS 562.) Prerequisite: A 100-level POLS course or WGSS 201 or permission of instructor. LEC.

POLS 563. Comparative Political Economy. 3 Hours. S.
This course studies fiscal, monetarist, and trade policies to assess the usefulness and problems posed by these policy instruments across countries. This includes examining exchange rates, interest rates, budget deficit, trade deficit, and debt, to understand their composition and relevance to domestic economy, employment, investment, development, and international trade, the problems they pose, and how these may be overcome. We then examine when, how, and why government enacts these instruments across countries and regions. Prerequisite: POLS 150 or POLS 151. LEC.

POLS 564. Elections and Political Parties Around the World. 3 Hours. S.
An examination of the diverse forms of election rules and their consequences for political parties, politicians, and voters. The course will survey election rules in theory and practice; the design and re-design of election rules in new and established democracies; and how elections affect party strategies or governance and representation, and the types of party systems that emerge. The course will also incorporate intensive studies of election campaigns occurring during the semester that the course meets. Prerequisite: POLS 150. LEC.

POLS 565. Political Change in Asia. 3 Hours. S.
This course focuses on three periods of major political changes in Asia since 1945: independence from colonization; adoption of governance; and steps toward democratization. The focus on political change is to help students see that a) many countries initiate political reforms
domestically; b) the ability to implement changes is correlated to ability to win support; c) the constitutional process may favor some groups over others; d) the ability to mediate political stability depends on (a), (b), and (c). Prerequisite: POLS 150 or equivalent. LEC.

POLS 566. Social Welfare, Taxation, and the Citizen. 3 Hours. S.
Most developed countries provide for the basic needs of their citizens. Many provide health care, free education, and even retirement funding in exchange for taxes. The U.S. is an exception. The course presents taxation systems in most developed countries, then explores the dimensions of social welfare, and the differential roles of citizens in each country. The final section of the course outlines legislative and legal possibilities for U.S. citizens. Prerequisite: POLS 150. LEC.

POLS 600. Contemporary Feminist Political Theory. 3 Hours. S.
A detailed introduction to feminist thought post-1960. Examines feminism in relation to the categories of political theory: liberal feminism, socialist feminism, radical feminism, and postmodern feminism. Within these categories and separately, we will also consider feminism as it is influenced by women traditionally excluded from mainstream feminist thought, namely U.S. woman of color and women of post-colonial societies. (Same as WNSS 600.) Prerequisite: WNSS 201 or a 100-level POLS course or permission of instructor. LEC.

POLS 601. Political Ideologies. 3 Hours. S.
A systematic survey of the major political ideologies of the 19th and 20th centuries such as anarchism, socialism, liberalism, fascism, communism, and participatory democracy. Prerequisite: POLS 301, or (for non-majors) completion of the Western Civilization requirement, or consent of instructor. LEC.

POLS 602. American Political Ideas. 3 Hours. S.
A study of political movements and thinkers from the Puritan period to the present that have influenced the development of contemporary political ideas. Prerequisite: POLS 301, or (for non-majors) completion of the Western Civilization requirement, or consent of instructor. LEC.

POLS 603. Democratic Theory. 3 Hours. S.
Detailed study of the typical and perennial dilemmas that arise in theories of democratic governance with an emphasis on contemporary analytical investigations of democratic systems. Prerequisite: POLS 301, or (for non-majors) completion of the Western Civilization requirement, or consent of instructor. LEC.

POLS 604. Religion and Political Theory. 3 Hours. S.
An examination of the relationship between religious faith and politics in Western political thought and theory. The approach will be both historical and philosophical, beginning with Moses on the one hand, and the Greeks on the other. Texts will include biblical, Greek philosophical, Jewish and Christian philosophical and theological writings. (Same as REL 604.) Prerequisite: POLS 301, or for non-majors completion of Western Civilization requirement, or consent of instructor. LEC.

POLS 605. A Study of Political Thought in Antiquity. 3 Hours. S.
Possible authors for examination may include Homer, Hesiod, Plato, Aristotle, Cicero, and Augustine, among others. Central topics will include the problems of truth and knowledge, justice, power, human rule, and the relationship of the individual to the community. Prerequisite: POLS 301, or (for non-majors) completion of the Western Civilization requirement, or consent of the instructor. LEC.

POLS 607. Modern Political Theory. 3 Hours. S.
An analysis of works by various authors, with the intention of exploring the political ideas that emerge in conjunction with the appearance of modern science, the Enlightenment, the Industrial Revolution, and Romanticism. Topics will include the modern conceptions of the nature of being, truth, justice, and the relationship of the individual to the community. Prerequisite: POLS 301, or (for non-majors) completion of the Western Civilization requirement, or consent of instructor. LEC.

POLS 608. Social Choice and Game Theory. 3 Hours. S.
A survey of the political economic approach to individual and collective choice behavior called "rational choice." The course focuses on models of voting systems and other political institutions as seen from a game theoretic perspective. Prerequisite: Nine hours of political science and completion of the College of Liberal Arts and Sciences mathematics requirement for the B.A. degree. LEC.

POLS 609. Topics in Political Theory: ______. 3 Hours. S.
A study of selected theorists in relation to a topic in political theory. Sample topics include: revolution; authority and community; elements of political power; political elites: ideology, human nature in politics, political conflict, etc. Theorists will range from ancient to contemporary. Course is repeatable for different topics. Prerequisite: POLS 301, or (for non-majors) completion of the Western Civilization requirement, or consent of instructor. LEC.

POLS 610. Constitutional Law: Governmental Powers. 3 Hours. S.
The Supreme Court viewed as a political branch of our government. Special emphasis on the Court's role in determining powers of government and their relationships. Prerequisite: POLS 110. LEC.

POLS 611. Constitutional Law: Civil Liberties. 3 Hours. S.
The constitutional limits on governmental powers are studied with special emphasis on constitutional guarantees of individual freedoms. Prerequisite: POLS 110. POLS 610 is recommended. LEC.

POLS 612. Psychology in Politics. 3 Hours. S.
An examination of psychological perspectives on political phenomena. Topics include political personality, foreign policy decision making, international conflict and cooperation, voting behavior, and political participation and socialization. Prerequisite: Nine hours of political science, including POLS 110 and POLS 170. LEC.

POLS 613. Comparative U.S. State Politics. 3 Hours. S.
A systematic comparative analysis of structures, functions, and policies of state political systems. Prerequisite: POLS 110 or consent of instructor. LEC.

POLS 614. Urban Politics. 3 Hours. S.
A survey of the social, cultural, economic, and structural differences among cities and an investigation into how these factors affect urban politics and policies. Specific topics include leadership, governmental reform, citizen participation, inter-ethnic conflict, and economic development. Prerequisite: POLS 110. LEC.

POLS 615. Campaigns and Elections. 3 Hours. S.
This course examines the behavior of candidates, campaigns, and voters in the electoral process. Topics will include the role of media, the impact of money, the operations of political campaigns and the effect of campaign laws. LEC.

POLS 616. Interest Group Politics. 3 Hours. S.
Study of internal group organization and the politics of interests within the U.S. policy-making process. Prerequisite: POLS 110. LEC.

POLS 617. The Congress. 3 Hours. S.
Descriptive and comparative analysis of legislative institutions and processes in the United States, covering Congress and state legislatures. Prerequisite: POLS 110. LEC.

POLS 618. The Presidency. 3 Hours. S.
The office of the President of the United States, its place in the constitutional and political system. Emphasis is given to modern experience and current problems. Prerequisite: POLS 110. LEC.
POLS 619. Topics in American Politics: ______. 1-3 Hours. S.
A study of selected contemporary problems of policy or politics in the United States. Course is repeatable for different topics. Prerequisite: POLS 110. LEC.

POLS 620. Formulation of Public Policy. 3 Hours. S.
Analysis and evaluation of the structures and processes involved in the formulation of public policy at all levels of government. Prerequisite: POLS 110. LEC.

POLS 621. Public Policy Analysis. 3 Hours. S.
An introduction to the study and analysis of public policy with emphasis on the concepts and techniques of policy thinking. The methods of policy description, explanation, evaluation, and choice will be applied to a variety of policy topics, e.g., health care, defense, environmental protection, education, etc. Prerequisite: POLS 110. LEC.

POLS 622. Government and the Economy. 3 Hours. S.
An examination of the formulation and execution of government policies in the economy and the business sector; the impact of the economy and business on government policies and the impact of government policies on the economy and business. Prerequisite: POLS 110 or consent of instructor. LEC.

POLS 623. The Politics of Social Policy. 3 Hours. S.
An examination of the formulation and execution of key social policies in the United States, such as welfare policy, crime and drug control policy, disability rights policy, education policy, and social regulatory policy concerning controversial social issues such as abortion and gun control. Prerequisite: POLS 110. LEC.

POLS 624. Environmental Politics and Policy. 3 Hours. S.
Analysis of environmental politics and the formulation and implementation of environmental policy. Examines the history and development of environmental politics as well as current trends. Themes include interest groups, business interests, political institutions, and specific environmental policy issues. (Same as EVRN 620.) LEC.

POLS 625. Extremist Groups and Government Response. 3 Hours. S.
Examines left- and right-wing extremist political groups in America and how the government has developed policies and respond to these groups. Special attention will be given to the process of policy adoption and implementation and how the government might respond to extremist groups in the future. Issues and themes will include groups such as the left-wing terrorists of the 1960s and 1970s, right-wing anticommunist groups of the 1950s and 1960s, international terrorists acting in the U.S., hate crime, ecoterrorism, citizen militia groups, and pro- and anti-abortion extremist groups. Prerequisite: POLS 110. LEC.

POLS 626. Introduction to Survey Research. 3 Hours. S.
This course introduces the theory and methods used in survey research. The topics include types of surveys, type of sampling methods, questionnaire and codebook construction and analysis. Prerequisite: POLS 306. LEC.

POLS 627. Advanced Issues in Survey Research. 3 Hours. S.
This course focuses on the problems encountered while implementing surveys in specific populations (in the United States and Europe) and in developing countries. The course identifies problem areas such as in sampling and questionnaire design; and addresses how researchers overcome these problems. Prerequisite: POLS 306 and POLS 626. LEC.

POLS 628. The Politics of Public Health. 3 Hours. S.
This course examines the social, institutional and political context of public health policy in the United States. We will examine factors that shape the nation's public health, explore the role of government in reducing risk and promoting well being, and analyze the major institutions responsible for monitoring, protecting and promoting general public health. Themes include the social determinants of health, health disparities, emerging infectious diseases, food safety, transportation, and environmental health. (Same as EVRN 628.) Prerequisite: POLS 110 and POLS 306 are recommended. LEC.

POLS 629. Topics in Public Policy: _______. 1-3 Hours. S.
Examination of the U.S. political system and policy formulation and administration through intensive analysis of selected current public policy problems. Sample topics include the environment, education, and economic well-being. Course is repeatable for different topics. Prerequisite: POLS 110. LEC.

POLS 630. Politics of Identity. 3 Hours. AE41 / S.
This seminar explores the nature of identity and how identity is relevant to politics and policy with a focus on political attitudes and behavior, institutions, and public policy. Topics include individual and group identity, identities such as gender, racial, sexual orientation, and partisan, and the enduring importance of identity for understanding politics as well as the policy process. The approach is multidisciplinary but political science perspectives are relied on more heavily. (Same as WGSS 630.) Prerequisite: POLS 110 and POLS 306 are recommended. LEC.

POLS 634. Bureaucratic Politics. 3 Hours. S.
Examination of U.S. governmental agencies with special attention to their development and role in the American political system. Prerequisite: POLS 330. LEC.

POLS 640. Politics of Reproductive Policy. 3 Hours. S.
Reproductive policy has historically been a highly politicized policy arena, which has elicited attention from the political community as well as the public. This course moves beyond the popular rhetoric associated with reproductive issues, by critically investigating the history, development, implementation and the relative success of various reproductive policies in the United States. These policies are compared to, and assessed against, policies governing similar topics in various countries. (Same as WGSS 640.) Prerequisite: POLS 110 or consent of instructor. LEC.

POLS 644. Justice and Public Policy in Democratic Societies. 3 Hours. S.
Examines the ethical and philosophical choices that inform public policy in democratic societies. The guiding idea of the course is that public policies reflect underlying decisions about the nature of state authority and the just use of that authority. The theoretical focus is on modern European and American liberal democratic thought; the empirical focus is global. Among the policy issues examined in the course are public education, immigration, gender equality, same-sex marriage, and drugs. Prerequisite: POLS 150 or POLS 301. LEC.

POLS 645. Corruption, Crisis and Scandal. 3 Hours. S.
This course investigates political events and decisions that are considered illegal or illegitimate. Cases from the U.S. and around the world are considered. Issues discussed include the misuse of governmental power and funds, electoral fraud, and bribery. Conditions under which problems arise and reforms that address them are considered. Prerequisite: POLS 110 and POLS 150. LEC.

POLS 650. Palestinians and Israelis. 3 Hours. S.
Examines the international relations, political institutions, and social politics of these two ethnational communities in relation to each other. Specific topics include the historical evolution of the Israeli-Palestinian conflict, prospects for conflict resolution, electoral systems and political parties in the two nations, state-society relations, social movements, and roles of gender and religion. Prerequisite: Nine hours of Political Science, including POLS 150/POLS 151 or POLS 170/POLS 171, or permission of instructor. LEC.
POLS 651. Women and Politics in Latin America. 3 Hours. S.
This course examines the ways in which Latin American women have engaged in politics in the past two decades. Cases will draw from a variety of countries in Latin America. Students are expected to develop insights, through comparative analysis, into why women "do politics" in certain ways, the role of the State in women's politics, the (dis)advantages of various political strategies, and the ways in which political, economic, and social changes over time have affected women's political opportunities and interests. (Same as WGSS 651.) Prerequisite: Six hours of course work in Political Science and/or Women's Studies and/or Latin American Studies. LEC.

POLS 652. Politics in Europe. 3 Hours. S.
The study of the politics and government of Europe. Major countries are covered in depth, while smaller democracies are grouped according to political concepts. Prerequisite: POLS 150. LEC.

POLS 653. Gender, War, and Peace. 3 Hours. S.
This course explores ways in which militarization and warfare are gendered processes. We ask, what does war tell us about gender, and what does gender tell us about war? Though the majority of fighters are men, women are essential to war efforts. They also represent a high proportion of the casualties of war. Yet women are rarely examined in relation to war; thus we work to uncover women's experiences of war. We also look to women's contributions to the peace movement in terms of both theory and practice, asking: Is peace a feminist issue? Should feminists support women's access to combat positions or oppose the military? What if women ruled the world—would that end wars? Does militarized masculinity harm men more than benefit them? How do states mobilize citizens to war and how is the process gendered? (Same as WGSS 653.) Prerequisite: One of the following: POLS 150, POLS 151, POLS 170, POLS 171, WGSS 201, WGSS 202. LEC.

POLS 654. Politics and Government of Russia and the Central Eurasian States. 3 Hours. S/W.
The collapse of the Soviet system and the problems of transforming a central planned authoritarian state into a free market democracy. The roles of ethnic and national tensions, economic decay, and cultural factors. Prerequisite: Eight hours in the social sciences and/or history, including POLS 150, or consent of instructor. LEC.

POLS 655. Politics of East-Central Europe. 3 Hours. S/W.
This course analyzes Communist political theory in its application to the countries of East-Central Europe with consideration of their traditional backgrounds and their patterns of political, social, and economic developments. It constructs a theoretical model of the communist state and discusses its variations by description and comparison of the governments and political processes of Albania, Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Poland, Rumania, and Yugoslavia. Prerequisite: POLS 150 and three hours in the social sciences or East European history, or consent of instructor. LEC.

POLS 656. Governments and Politics of East Asia. 3 Hours. NW AE42 / S/W.
A comparative examination of the contemporary political institutions, processes and ideas of China, Japan, and Korea. (Same as EALC 656.) Prerequisite: POLS 150 or a course in East Asian studies. LEC.

POLS 657. Government and Politics of Southeast Asia. 3 Hours. NW AE42 / S/W.
An evaluation of the traditional and contemporary political institutions, behavior and ideas of the countries of Southeast Asia. Prerequisite: POLS 150 or a course in Asian history or Southeast Asian history. LEC.

POLS 658. Theories of Politics in Latin America. 3 Hours. S/W.
This course examines how political science can be used to explain the political dynamics of Latin America. The course will be devoted to understanding different theories about politics -- many of which have been devised by political scientists whose primary focus of study is not Latin America -- and examining their uses and limitations in understanding Latin America. Among the themes we will be examining are the relationships between economic growth, political culture, and democracy, the role of the military in politics, the political impact of new social movements (such as the women's movement and religious movements), theories of revolution, and understanding the prevalence of political corruption in the region. Along the way, we will analyze how political scientists attempt to develop hypotheses, gather data, and test theories. Prerequisite: POLS 150 or a social science course in Latin American topics. LEC.

POLS 659. Political Dynamics of Latin America. 3 Hours. S/W.
Study of the institutions, processes, and special problems of selected Latin American countries. Prerequisite: POLS 150 or a course concerning Latin America in the social sciences or history. LEC.

POLS 660. The Politics and Problems of Developing Countries. 3 Hours. NW AE42 / S/W.
A focus on topics pertinent to all of the underdeveloped areas such as the role of the military, styles of political leadership, land tenure systems, the role of the middle sectors, the nature of bureaucracy, the activity of the students, and foreign policy attitudes. Prerequisite: One of the following: POLS 652, POLS 653, POLS 654, POLS 655, POLS 656, POLS 657, POLS 658, POLS 659. LEC.

POLS 661. Politics of the Middle East. 3 Hours. NW AE42 / S/W.
Survey of domestic and international political developments in the Middle East. Topics include: emergence of the modern nation-state, the role of Islam, leadership patterns, competing political ideologies, prospects for democratization, foreign policy relations, and regional conflicts. Prerequisite: Nine hours in political science, including POLS 150 and POLS 170 or their honors equivalents, or permission of instructor. LEC.

POLS 663. Protest and Revolution. 3 Hours. S.
An exploration of what happens when protesters challenge a state. The course focuses on the interactions and outcomes of dissident and state conflict. Topics include the relation between coercion and protest, strategy, violence, terrorism as adaption, civil war and regime transition. Prerequisite: POLS 150. LEC.

POLS 664. Middle East Politics, Honors. 3 Hours. S.
Honors Version of POLS 661. Survey of domestic and international political developments in the Arab countries, Iran, Turkey, and Israel. Topics include state-society relations (e.g., forms of political organization, electoral politics, opposition movements, human rights, political Islam, gender), regional and international foreign relations, and the Arab-Israeli conflict. Prerequisite: Nine hours of Political Science, including POLS 150/151 and POLS 170/171, and membership in the University Honors Program; or by permission of instructor. LEC.

POLS 665. Politics in Africa. 3 Hours. NW AE42 / S.
A survey of politics in Africa, focused on the countries of sub-Saharan or Black Africa. The course includes a historical discussion of precolonial Africa, colonization and the creation of contemporary states, and the politics of independence, before examining contemporary political systems and the forces influencing patterns of politics on the continent. (Same as AAAS 600.) Prerequisite: POLS 150 or AAAS 105 or AAAS 305 or consent of instructor. LEC.

POLS 666. Political Economy of East Asia. 3 Hours. S.
This course provides basic understanding of fiscal, monetarist, and trade politics; how governments in East Asia use them to pursue growth;
the extent to which these governments follow or controvert economics
to pursue growth; and how the performances of economies in East
Asia relate to the U.S. and global economies. (Same as EALC 666.)
Prerequisite: POLS 150. LEC.

POLS 667. Islam and Politics. 3 Hours. NW AE42/AE51 / S.
This course gives students a basic understanding of political
Islam and democratic politics, political economy in Muslim societies,
fundamentalism in Islam, gender relations, identity politics and questions
on clash of civilizations are explored. (Same as SOC 640.) Prerequisite: A
principal course in sociology, POLS 150, or consent of instructor. LEC.

POLS 668. Reform in Contemporary China. 3 Hours. NW AE42 / H/W.
Examines the epochal changes that have occurred in China from Deng
Xiaoping's rise to power in 1978 to the present. Includes a focus on the
historical background of the revolutionary period before examining the
political and economic changes that spawned the 1989 "prodemocracy"
movement at Tiananmen. The course includes an analysis of the events
of the 1990s focusing on U.S.-China political and economic relations and the
destabilizing effects of inflation, infrastructural reform, political and
economic decentralization, and leadership succession. A previous course
on China is helpful, but not mandatory. (Same as EALC 585.) LEC.

POLS 669. Topics in Comparative Politics: _____, 2-3 Hours. S.
A study of selected contemporary problems of policy or politics affecting
several countries. Course is repeatable for different topics. Prerequisite:
POLS 150. LEC.

POLS 670. United States Foreign Policy. 3 Hours. S.
An evaluation of the formulation of United States foreign policy in the post-
World War II period. Economic, military, and diplomatic dimensions of
policy; internal and external influences on policy; theories of foreign policy
decision-making. Prerequisite: Nine hours of political science, including
POLS 170. LEC.

POLS 671. International Cooperation. 3 Hours. S.
An examination of the gains possible from international cooperation and the barriers to achieving cooperation. Theoretical perspectives on international cooperation will be explored along with cases such as trade, the environment, arms control, and the European community. Prerequisite: POLS 170 or consent of instructor. LEC.

POLS 672. International Political Economy. 3 Hours. S.
Structural theories of the international political economy provide the
framework for a consideration of the nature of hegemony, the
management problem of multinational corporations, the role of
international regimes and organizations, development, and dependency. Prerequisite: Nine hours of political science, including POLS 170. LEC.

POLS 673. International Organization. 3 Hours. S.
International organizations are examined with special emphasis devoted to the United Nations. A central theme of the course rests upon the
question of whether strengthened international organization offers the
only alternative to further world wars. Prerequisite: POLS 170 and three
additional hours of political science. LEC.

POLS 674. International Ethics. 3 Hours. H.
This course reviews how philosophical perspectives elucidate the role
ethics plays in foreign policy. It covers human rights doctrines, issues of
economic and political justice, just war theory (jus ad bellum) and just
conduct of war (jus en bello) and humanitarian intervention. Prerequisite: POLS 170 or POLS 171. LEC.

POLS 675. Russian Foreign Policy. 3 Hours. S/W.
Examination of the history of Soviet and Russian foreign policy and
current issues of foreign policy in the Post-Soviet era. Analysis of foreign
policy making in Russia and the other Post-Soviet states. Emphasis on the
changed nature of international security problems after the cold war and on the role of foreign policy in economic development. Prerequisite:
Eight hours in the social sciences or history, including either POLS 170 or
a course in Russian history. LEC.

POLS 676. International Relations of Asia. 3 Hours. S/W.
An intensive study of the problems of ideological conflict, diplomatic
relations, strategic arrangements, economic cooperation, and cultural
exchange in East and Southeast Asia with special emphasis upon the
roles of major world powers. (Same as EALC 676.) Prerequisite: POLS
170 or a course in East Asian studies. LEC.

POLS 677. U.S. National Security Policy. 3 Hours. S.
An investigation into (1) how security policy is made; (2) the evolution of changing assumptions, strategies and goals since 1945; and (3) the
present policy and its alternatives. Prerequisite: Six hours of political
science, including POLS 170. LEC.

POLS 678. Chinese Foreign Policy. 3 Hours. S/W.
In-depth examination of China's changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. (Same as
EALC 678.) Prerequisite: POLS 170 or a course in East Asian studies.
LEC.

POLS 679. International Conflict. 3 Hours. S.
Examination of the historical and theoretical issues surrounding the
sources and control of international conflict. Topics will include political and anthropological theories of conflict, the role of force in the
international system, international law and just war approaches, nuclear conflict, arms control, and nonviolent alternatives to conflict. Prerequisite: Nine hours of political science, including POLS 170; POLS 306 is recommended. LEC.

POLS 680. International Relations in Political Philosophy. 3 Hours. S.
A consideration of classical and modern theories of the international
system, such as the writing of Thucydides, Machiavelli, twentieth-century
realists, and others. Topics include, theories of the state, the role of ethics and normative judgments in the world order, the nature and use of power,
the relationship between domestic and international politics. Prerequisite:
POLS 301, or (for non-majors) completion of the Western Civilization
requirement, or consent of instructor. LEC.

POLS 681. Comparative Foreign Policy. 3 Hours. S.
An examination of theories that seek to explain the foreign policy behavior and decision making processes of states in international relations and a
survey of past and present foreign policies of several states in Latin
America, Western and Eastern Europe, Africa, the Middle East, and the
Far East. Prerequisite: Nine hours of political science, including POLS 150 and
POLS 170. LEC.

POLS 683. International Mediation, Honors. 3 Hours. S.
This seminar examines the theories about, research on, and the practice of international mediation and other forms of non-militarized third party
intervention used to address interstate, intrastate, and nonstate disputes. Specific topics include how mediation differs from other forms of non-
militarized peace-building and conflict resolution; the conditions for
mediation success (and how 'success' is defined; third party involvement
after protracted civil conflict; the role of third parties in the implementation
of peace agreements; the relationship between mediation, peace-building, and international law; and proactive conflict management. Prerequisite:
Nine hours of political science, including POLS 170/171 and membership in the University Honors Program, or by permission of instructor. LEC.

**POLS 684. International Law: The State and the Individual. 3 Hours. S.**

International law has assumed an increasingly significant role in international life. This course will examine major law including (but not limited to): the changing status and role of the state; rights of minorities and self-determination; the environment; and human rights. The course will examine the central questions and the relevant international legal principles associated with each issue. Prerequisite: Six hours of Political Science, including POLS 170. LEC.

**POLS 685. International Law: Laws of Armed Conflicts. 3 Hours. S.**

This course examines the principles, roles, and functions of international law in the conduct of war. As the course reviews the development and application of the basic rules of armed conflict, several current issues and conflicts are addressed including: the legitimate use of force; the proper definitions of combatants and civilians; actions that constitute war crimes, the legality of new weapons technology, and, if the laws of armed conflict apply to the current "war on terrorism." Prerequisite: Six hours of Political Science, including POLS 170. LEC.

**POLS 689. Topics in International Relations:. 2-3 Hours.**

A study of selected problems in international relations. Course is repeatable for different topics. Prerequisite: POLS 170. LEC.

**POLS 701. Political Theory. 3 Hours. S.**

This course is intended to introduce graduate and advanced undergraduate students to the kinds of activities engaged in by political theorists. Thus the course focuses on several approaches to doing political theory, such as interpreting the work of great political philosophers, clarifying political concepts, organizing and integrating political ideas, evaluating political practices, and creating new political perspectives. The course focuses on historical and contemporary treatments of both epistemological issues (the possibility and grounds for political knowledge) and selected substantive issues (e.g., the legitimacy of the state, the merits and limitations of democracy, the requirements of justice, and the nature and importance of ideologies). LEC.

**POLS 703. Social Choice and Game Theory. 3 Hours.**

A survey of the political economic approach to individual and collective choice behavior called "rational choice." The course focuses on models of voting systems and other political institutions as seen from a game theoretic perspective. Prerequisite: Nine hours of political science or admission into the M.A. or Ph.D. LEC.

**POLS 704. Quantitative Methods Primer in Political Science. 1 Hour.**

Provides an introduction of basic quantitative methods in political science to prepare graduate students for the quantitative methods sequence in the Ph.D. program; basic statistics, statistical analysis techniques, and probability are explored. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission of the Instructor. LEC.

**POLS 705. Research Design for Political Science. 3 Hours.**

Introduction to the discipline of political science, the philosophy of science, research design, and data acquisition. Prerequisite: Graduate standing or consent of instructor. LEC.

**POLS 706. Research Methods I. 3 Hours.**

An introduction to quantitative research methods, including probability theory, hypothesis-tests, and multiple regression. Includes regression diagnostics, the treatment of numeric and categorical predictors, interaction effects and elementary nonlinear models. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and lab sessions where computing applications are taught. LEC.

**POLS 707. Research Methods II. 3 Hours.**

This course covers basic techniques for multivariate analysis, focusing on multiple regression. Topics include interpretation of regression statistics, diagnostics for common problems, dummy variables, instrumental variables, basic time series methods including adjustment for autocorrelated error, logistic models, and nonlinear modeling; additional techniques may be covered at the discretion of the instructor. Prerequisite: POLS 706. LEC.

**POLS 708. Advanced Qualitative Research Methods. 3 Hours.**

An examination of qualitative research approaches frequently employed within political science. Topics may include the use of case studies, archival and documentary research, content analysis, interviewing and focus group techniques, ethnographic fieldwork, narrative and discourse analysis, and others. The course will examine the strengths and limitations of these methods in relation to major research traditions such as culturalist approaches, historical institutionalism, rational choice, and constructivism. Prerequisite: POLS 705 and either graduate standing or consent of instructor. LEC.

**POLS 709. Topics in Political Theory: ______. 3 Hours.**

At the discretion of the instructor, this course will select one or more important areas of political theory for in-depth analysis. Prerequisite: Six hours in Political Theory. LEC.

**POLS 710. American Public Philosophies. 3 Hours.**

Surveys scholarly attempts to describe and analyze critically the changing public philosophies that have dominated American society and politics. Liberalism, republicanism, ascriptiveism, and pluralism are examples of such public philosophies. Also considered are some philosophies that are important but have not dominated American politics. Transcendentalism, populism, communitarianism, racial nationalism, and religious fundamentalism are examples of such philosophies. Prerequisite: Graduate standing or consent of the instructor. SEM.

**POLS 711. The Psychological Base of Political Behavior. 3 Hours.**

Examination of the relations between psychological mechanisms and social milieu factors and individual political behavior. Particular attention is devoted to understanding the development of politically relevant psychological traits and dispositions, and to the methodology employed in studying the socio-psychological factors which underlie individual political behavior. Prerequisite: Twelve hours of political science and consent of instructor. LEC.

**POLS 712. The Electoral Process. 3 Hours.**

A study of the characteristics of voting behavior and the influences upon such behavior in the United States. Emphasis is placed upon relevant research findings concerning partisanship and participation in politics, and on the methodology employed in the study of political behavior. Prerequisite: Twelve hours of political science and consent of instructor. LEC.

**POLS 713. Law and Society. 3 Hours.**

A study of the province and function of law in the context of relevant social, economic, and political factors. The impact of these factors on the law will be illustrated through readings and discussions of selected case histories. Emphasis will be placed upon law as a social phenomenon rather than upon its technical aspects. Prerequisite: Twelve hours of political science and permission of instructor for undergraduates. LEC.

**POLS 716. Political Behavior. 3 Hours.**

A seminar for students interested in understanding the public opinion, voting, and other forms of political participation. This course will include a discussion of the formation, measurement of political attitudes as well as an examination of protest and other forms of extra-legal participation. Prerequisite: Graduate standing or consent of instructor. LEC.
POLS 719. Topics in the American Political Institutions: _____, 3 Hours.
A seminar to be offered as occasion demands, dealing with, but not limited to special topics in the presidency, congress, and judicial processes. Prerequisite: Graduate standing or consent of instructor. LEC.

POLS 720. The Scope of Public Policy, 3 Hours.
Introductory graduate course in the examination of public policy making. Considers institutions, basic theoretical frameworks, and standard methods, and places policy-making within a broad political context. Emphasizes American examples, but relevant comparative material is employed. Prerequisite: Twelve hours of political science. LEC.

POLS 722. Intergovernmental Relations, 3 Hours.
A survey of characteristic legal, political, and administrative relationships among different units of American government, with particular emphasis upon the role of state agencies. Prerequisite: Nine hours of political science. LEC.

POLS 726. Public Policy in Comparative Perspective, 3 Hours.
This seminar examines the application of policy theory in regional and comparative contexts. Much of the research examined focuses on comparative public policy, but select weeks focus on specific regions of the world. A key goal is to help students understand which theories of policy may be best suited for universal application. LEC.

POLS 754. Politics and Government of Russia and the Central Eurasian States, 3 Hours.
The collapse of the Soviet system and the problems of transforming a central planned authoritarian state into a free market democracy. The roles of ethnic and national tensions, economic decay, and cultural factors. Prerequisite: Eight hours in the social sciences and/or history, including POLS 150, or consent of instructor. LEC.

POLS 758. Revolutionary Politics of Latin America, 3 Hours.
Primarily a comparative analysis of the Mexican, Bolivian, and Cuban revolutions within a framework of theories of revolutions. Some attention also to revolutionary political groupings and conditions in other Latin American countries. Prerequisite: POLS 150 or a course concerning Latin America in the social sciences or history. LEC.

POLS 774. International Law, 3 Hours.
Study of topics in international law, relating these closely to the dynamics of international relations. Special emphasis will be given to regulating force, resolving disputes, the law of the sea, human rights, and emerging problem areas such as the environment, outer space, the oceanic seabed, and genocide. Prerequisite: Six hours of courses in international relations including POLS 170 and/or relevant courses in the social sciences and modern history. LEC.

POLS 789. Topics in International Relations, 2-3 Hours.
A study of selected problems in international relations. Prerequisite: Consent of instructor. RSH.

POLS 810. American Politics, 3 Hours.
A survey and critical examination of recent theoretical developments and research focusing on national institutions, electoral behavior, and policy-making processes. Emphasis is given to conceptualizing and analyzing the changing nature of the American political system. LEC.

POLS 812. Political Psychology, 3 Hours.
A critical examination of the principal areas in current literature in political psychology, including psychological perspectives on mass political behavior, elite decision making, and international relations. Attention will be given to articulating and evaluating theories, constructing research questions and programs, and comparing methodologies. LEC.

POLS 820. Policy Formulation and Adoption, 3 Hours.
Survey of the literature on the institutional, socioeconomic, and political forces influencing the formulation and adoption of public policy, as well as policy change, at all levels of government. Topics include problem definition, agenda setting, and the methods of decision-making. This is a research seminar so students will be required to conduct an original research project. LEC.

POLS 821. Policy Implementation and Analysis, 3 Hours.
An overview of the policy implementation process and the analysis of public policy. The course covers a variety of theories and methods related to the study of the implementation process, policy evaluation, policy analysis, and policy change and learning. Substantive policy areas covered include environmental regulation, education, criminal justice, public safety, and health care. LEC.

POLS 825. Urban Policy and Administration, 3 Hours.
This course explores the development, implementation and evaluation of public policy in the local government context. It examines a variety of policy tools used to address urban problems and applies theories of the policy process, intergovernmental relations, and institutions to municipal governance. (Same as PUAD 825.) LEC.

POLS 830. Advanced Research Methods for Public Policy, 3 Hours.
Research seminar organized around advanced quantitative and qualitative method skills for research on American and comparative politics and public policy. The course will combine advanced statistical estimation procedures (e.g., hazard analysis, event history analysis, hierarchical "contextual effects" models) with methods for the collection and integration of data. This course is intended to facilitate research efforts of students in the fields of American politics, comparative politics, and public policy. The course is open to Ph.D. students from other departments who have completed a course in intermediate regression analysis. Prerequisite: POLS 707 or similar graduate level course. LEC.

POLS 849. Law, Courts, and Public Policy, 3 Hours.
This course provides an overview of the role of law, litigation, and courts in the public policy process, with an emphasis on bureaucratic institutions. The course covers the main theories and empirical research on the policy effects of litigation and intervention, with a particular focus on civil rights in the areas of employment, policing, welfare, prisons, and environmental policy. (Same as PUAD 849.) Prerequisite: Graduate standing or consent of instructor. LEC.

POLS 850. Introduction to Comparative Politics, 3 Hours.
This course provides a graduate level introduction to the field of Comparative Politics. Among topics it will survey are: the history and development of the field; classic works and major founding concerns of the field; methodological and epistemological debates; competing paradigms which had characterized Comparative Politics (structural-functionalism, culturalists, state-centrists, institutionalists, rational choice, and other); theory building and the role of area studies. LEC.

POLS 851. Comparative Institutions and Government, 3 Hours.
This course provides a survey of the subfield of political institutions within Comparative Politics. Among the topics it will cover are: identifying regime types (democracy vs. non-democracy); comparative electoral systems; party systems; presidential vs. parliamentary systems; comparative legislatures; constitutional engineering and democratic transitions, and others. Prerequisite: POLS 850. LEC.

POLS 852. Comparative Political Economy, 3 Hours.
This course provides a survey of some of the major works, research traditions, and current debates in the subfield of comparative political economy. This includes such topics as: The political economy of development and underdevelopment; dependency and world systems.
theory; the relationship between economic development and democracy; capitalist development and democracy; the political economy of dual transitions; the political economy of privatization and structural adjustment; comparative welfare states; and comparative labor-business-government relations. Prerequisite: POLS 850. LEC.

POLS 853. Comparative Social Politics. 3 Hours.
This course provides a survey of some major research traditions and current debates in the subfield of political sociology. This includes such topics as: culture and politics; elites, social structures, and politics; the politics of cultural pluralism and ethnonationalism; social movements and protest; gender and politics; state-society relation; and religion and politics. Prerequisite: POLS 850. LEC.

POLS 870. International Relations. 3 Hours.
Critical evaluation of the major approaches to international relations and their application to conflict and conflict resolution, foreign policy, and international political economy. LEC.

POLS 878. Conducting and Analyzing Fieldwork in Developing Countries. 3 Hours.
An introduction to fieldwork and surveys conducted in developing and non-democratic countries. The course covers the challenges of conducting interviews and surveys in these countries. The intent is to develop the research skills necessary for data collection and fieldwork as well as evaluating an analyzing survey data collected by other researchers in developing countries. Prerequisite: POLS 705 or equivalent or consent of the instructor. SEM.

POLS 888. Contemporary China Studies. 3 Hours.
This course will review and analyze the current literature on China's social and political development, including a wide range of topics within political science. There is a rich body of literature within each topic such as civil society in China, legal reform, political culture, nationalism, gender issues, ethnicity, political behavior, elections, economic development, and inequality. This course will introduce key literature within each topic focusing on the debates among China scholars as well as how these debates fit in the general field of political science. (Same as EALC 888 and POLS 888.) Prerequisite: POLS 668 or permission of the instructor. LEC.

POLS 898. Non-Thesis Research. 1 Hour.
Research course used to fulfill continuous enrollment requirement for master's degree students. Hours cannot count toward degree. Must be graded Satisfactory/Unsatisfactory. RSH.

POLS 899. Thesis. 1-6 Hours.
Enrollment for writing thesis for master's degrees. THE.

POLS 904. Statistical Computing Foundations. 3 Hours.
This is an interdisciplinary course for social science researchers who need to develop routines to estimate and evaluate statistical models. It introduces tools for software development, primarily with the statistical programming language R (and related languages like C). Topics include code organization and optimization, concurrent version management, LaTeX document preparation, and high-performance computing on the KU Linux cluster. Examples from various fields are considered. Prerequisite: Two courses in graduate level statistics and familiarity with R. LEC.

POLS 905. Complex Adaptive Systems, Agent-Based Modeling and Computer Simulation. 3 Hours.
This seminar addresses the rapidly growing science of complex systems. Topics addressed include political, economic, ecological, and biological systems. Includes a survey of the theory of complexity and computer models that are used to study complex adaptive systems. The main focus is on agent-based models, but attention is also given to traditional cellular automata. Methods of designing, programming, and interpreting results of agent-based models are addressed. Students who have no formal training in computer programming are welcome in the course, but they should expect to do some extra work on fundamentals of programming. A preparatory course in Java, C++, Objective-C, or another object-oriented language would significantly facilitate the student's research effort. SEM.

POLS 906. Advanced Regression. 3 Hours.
Covers topics appropriate for a second course in regression analysis. The content will vary according to the interest of the instructor and students, but will generally include such topics as multiple imputation of missing data, the generalized linear model (GLM), and specialized models for longitudinal data. The course will include a review of the principles of maximum likelihood estimation and applications of matrix algebra and differential calculus in statistical applications. LEC.

POLS 907. Research Methods in International Studies. 3 Hours.
This course focuses on quantitative methods of research relevant to international relations and comparative politics. Topics will vary with the instructor and student interests, but may include time series analysis, classification algorithms, computer programming and computational modeling, simulation, event data and content analysis, and dynamic models. Prerequisite: POLS 707. LEC.

POLS 908. Individual and Collective Choice. 3 Hours.
This course surveys rational choice theories of politics as they are applied to decisions by individuals and groups. Models of individual behavior are drawn primarily from economics and decision theory. The primary approaches to collective choice are social choice theory and game theory. Prerequisite: POLS 707. LEC.

POLS 909. Topics in Methodology: ______. 3 Hours.
An intensive seminar in a method (or a variety of relevant methods) of theoretical or empirical research designed for Ph.D. students only. Emphasis is on deepening the understanding and ability to use advanced methods of analysis. Prerequisite: Admission to the Ph.D. program or consent of instructor. RSH.

POLS 910. Research Seminar in American Government. 2-3 Hours.
A faculty and advanced graduate student collegial research experience focusing on American politics, policy-making and administration, with faculty and students engaged in the production of scholarly research articles, books and conference papers. Topics will be chosen by individual students with consent of the seminar professor. LEC.

POLS 911. The U.S. Congress. 3 Hours.
This seminar employs various theoretical and methodological perspectives to explore the burgeoning post-1960 literature on Congress. Traditional subjects such as committees, parties, and elections are examined through applications of formal models, behavioral analyses, and participant observation. LEC.

POLS 912. Elections and Voting Behavior. 3 Hours.
A research seminar for students interested in theoretical and empirical approaches to the behavior of candidates, voters and contributors in campaigns and elections. The impact of campaign laws and other institutional influences will also be examined. LEC.

POLS 913. State and Local Politics. 3 Hours.
Research seminar on various aspects of state and local government, such as reformed institutions, fiscal stress, citizen participation, and various policy problems. LEC.

POLS 914. Political Behavior. 3 Hours.
Survey of various approaches to the analysis of political behavior, including an evaluation of each approach in terms of its utility in building
empirically-based political theory. Examples of the application of the various approaches will focus upon the American political process. LEC.

POLS 915. American Political Parties. 3 Hours.
A survey of the theories and research findings dealing with political parties in American politics, including third and minor parties. Topics to be covered include the development and evolution of the party system, the nature of party organization and the recruitment of party activists, the role of parties in the electoral process, the impact of parties upon public policy, and party reform. LEC.

POLS 916. Group Politics. 3 Hours.
The focus of this course is upon the theories and research findings dealing with political groups in American politics, including protest groups, movements, as well as conventional interest groups. Topics to be covered include group mobilization and maintenance, group involvement in the political party and electoral processes, methods and strengths of group influence, and the impact of political groups on the policy process. LEC.

POLS 917. The Presidency. 3 Hours.
An advanced research seminar for students interested in theoretical and empirical approaches to the American presidency. This seminar will examine the powers and organizations of the White House through a study of the literature. LEC.

POLS 919. Topics in U.S. Government and Politics: ______. 2-3 Hours.
A seminar to be offered as occasion demands, dealing with, but not limited to, bureaucracy, legislative policy, federalism, and special problems in U.S. politics. LEC.

POLS 920. Policy Analysis Research Seminar. 3 Hours.
Research seminar designed to apply public policy theory and policy analysis methods to evaluate the impact of public policies. Students will be required to design and conduct an original research project with the intention of presenting the work at a professional conference or publishing the work in a professional journal. LEC.

POLS 921. Public Law. 3 Hours.
This seminar is designed to initiate the advanced graduate student to research in judicial and jury behavior. Requirements include mastery of literature on the psychological foundations of legal judgment and research designed to test propositions derived from this literature. LEC.

POLS 929. Topics in Public Policy: ______. 1-3 Hours.
Study of selected topics in public policy. LEC.

POLS 940. Teaching Political Science. 1 Hour.
A discussion of teaching methods and approaches. Students are expected to develop a personal teaching portfolio that describes their outlook on teaching political science and provides sample teaching materials. This course must be taken by all graduate teaching assistants and assistant instructors during the first year of their appointment. Grades are issued on a pass/fail basis. LEC.

POLS 950. Research Seminar in International Studies. 2-3 Hours.
A faculty and advanced graduate student collegial research experience, focusing on comparative politics, area studies, and international relations, with faculty and students engaged in the production of scholarly research articles, books, and conference papers. Topics will be chosen by individual students with consent of the seminar professor. RSH.

POLS 951. Mobilization. 3 Hours.
A study of how politicians, interest group leaders, and dissident leaders exhort citizens to act in or preclude them from acting in politics. LEC.

POLS 952. Comparative Electoral and Party Systems. 3 Hours.
This research seminar addresses the major theoretical and empirical issues in the study of electoral and party systems. In addition to evaluating the classic works of Arrow, Duverger, Lipset and Rokkan, Rae, and Taagepera and Shugart, students will assess contemporary work on electoral and party systems that has evolved from this source material. The course will address the design and reform of electoral systems, institutional rules and the strategic environment they create for political actors, the role of institutional and social factors in the development of political party systems, and the role of election administration. Students will develop and present original research papers related to these topics. Prerequisite: POLS 850. LEC.

POLS 953. Comparative Legislatures. 3 Hours.
This research seminar addresses the major theoretical and empirical issues in the study of legislatures. Students will discuss the design of institutions, government formation, accountability, legislative process and role of committees, agenda setting, elections and parties, and representation. The course will familiarize students with the core debates in legislative studies, extend knowledge of regional variation in the design and function of representative institutions, develop skills in the analysis of legislative records, and enhance professional socialization. Prerequisite: POLS 810, POLS 850, or consent of instructor. SEM.

POLS 954. Politics in Post-Soviet States. 3 Hours.
In-depth study of the politics of Russia, Ukraine, and the other Post-Soviet states. Focus on the problems of transforming a centrally planned authoritarian system to a free market democracy. LEC.

POLS 955. Politics of Advanced Industrial Societies. 3 Hours.
Theory and research on the patterns of behavior that characterize the politics of North America, Europe, and developed regions of Asia. Topics include corporatism and alternative forms of interest intermediation, economic theories of socialization and electoral choice, and the role of the state; its finances, adaptation, and the problem of power and legitimacy. Prerequisite: POLS 850 or permission of instructor. LEC.

POLS 956. The Governments and Politics of Asia. 2-3 Hours.
A research seminar on selected subjects and issues in the governments and politics of selected Asian countries. The particular focus each year will depend upon the instructor. LEC.

POLS 957. Comparative Political Behavior. 3 Hours.
The course introduces students to the vast literature on comparative elections and comparative political parties. It pursues a twofold goal. First, the course surveys the large comparative electoral behavior literature. The themes covered in the first half include a discussion of why voters participate in elections, how voters form preferences, how psychological processes affect mass views, and how these, in turn, influence party preferences. Second, the course introduces students to the supply-side of politics and the role of political parties. This second part of the course, therefore, examines why parties form in the first place, what motives they have, what choices they offer in short, how and why parties compete. Together, the way voters form preferences and the logic of party formation illuminate a central element of the democratic process. LEC.

POLS 959. Topics in Comparative Politics: ______. 1-3 Hours.
Study of selective topics in comparative politics. LEC.

POLS 960. Politics of Developing Countries. 2-3 Hours.
LEC.

POLS 961. The Politics of Culturally Plural Societies. 3 Hours.
This is an advanced graduate seminar on the comparative study of politics in countries characterized by sub-cultural cleavages, including ethnicity, language, religion and race. The course will first survey and critique competing theoretical explanations for different patterns of conflict or peaceful cohabitation among such groups in a variety of world regions. Students will then examine the utility of these theories in individual in-depth research papers which will be presented in class and critiqued by seminar participants. LEC.
POLS 970. Foreign Policy Analysis. 3 Hours.
Designed to acquaint students with the principal theories, approaches and types of empirical analysis generally employed to explain and interpret the creation and implementation of foreign policy. Topics include rational actor models, collective and bureaucratic processes, societal influences, cognitive and psychological factors, and comparative foreign policy. Prerequisite: POLS 870. An undergraduate United States foreign policy class is recommended. LEC.

POLS 972. Theories of International Conflict. 3 Hours.
An in-depth survey of theories and research on international conflict. Topics will range from anthropological studies of conflict in primitive societies to contemporary theories of nuclear conflict. The course will also cover current empirical research methodology and results of research on international conflict, as well as models of conflict processes. Prerequisite: POLS 870. LEC.

POLS 973. International Political Economy. 3 Hours.
Provides an eclectic survey of major developments in the field. Topics include the intellectual origins of IPE; the historical evolution of the international system; North-South and Western trade, investment, and monetary relations; foreign aid, debt transfer, development, and international economic institutions (e.g., IMF, IBRD, MNCs, etc.). (Same as SOC 873.) Prerequisite: POLS 870 or consent of instructor. LEC.

POLS 974. International Mediation and Conflict Resolution. 3 Hours.
The course examines the theory and practice of international mediation and other forms of third party intervention used to resolve interstate and nonstate disputes. Topics include explanations of mediation success and failure, conditions of conflict escalation where mediation is likely to be counterproductive or resisted by recalcitrant disputants, the ethics of intervention, citizen diplomacy, and the role of international organizations such as the United Nations. Prerequisite: POLS 870. LEC.

POLS 977. Ethics in International Relations Theory. 3 Hours.
This course examines how issues of International Ethics have been treated in International Relations theory. This course begins by reviewing several theoretical perspectives of International Relations and how these perspectives have historically understood the role ethics plays in international politics. By the end of the semester, students should have a firm understanding of (1) the salient issues of international ethics in world politics and (2) whether and how IR scholars have (theoretically and methodologically) placed those issues in their research paradigms. The issue areas the course will cover include, but are not limited to, human rights doctrines, issues of economic and political justice, just war theory (jus ad bellum) and just conduct of war (jus en bello), and humanitarian intervention. The course will assess the role international law has played in stemming and/or punishing human rights abuses. Students will review several historical cases of genocide, as well as several cases of truth and reconciliation commissions. LEC.

POLS 978. Advanced Topics in International Relations Theory. 3 Hours.
Intensive examination of key theoretical debates in international relations. Topics covered will include Classical Realism and Liberalism, Neorealist/Neoliberal debate, and post-structural critiques of mainstream international relations theory. Prerequisite: POLS 870. LEC.

POLS 979. Topics in International Relations: ____. 3 Hours.
To be offered periodically when topics of special interest arise. LEC.

POLS 980. International Organizations. 3 Hours.
Considers theoretical and empirical work on international governmental and non-governmental organizations (IOs). Specifically highlights the evolving scholarly debates regarding the function, design, and delegation of authority to IOs as well as their behavior and change.

Explores these questions in depth through a wide range of cases, including comprehensive coverage of the United Nations, Bretton Woods Institutions, and the European Union, and their activities in issue areas concerning international security, trade, finance, development, humanitarian aid, and the environment. LEC.

POLS 981. Global Development. 3 Hours.
Considers the nature and problems of development and underdevelopment from a cross-regional and interdisciplinary perspective. Deals with the historical origins of the enormous disparities in wealth that exist today, both between and within countries. Considers the explanations for those differences, prescriptions for how to narrow them, and specific cases (both successes and failures) from various regions of the globe. LEC.

POLS 993. Directed Readings. 1-5 Hours.
Designed to meet the needs of graduate students whose study in political science cannot be met with present course. Prerequisite: Consent of instructor. RSH.

POLS 995. Directed Research. 2 Hours.
Designed for advanced graduate students who are concurrently enrolled or who will be enrolled in a subsequent semester in one of the Research Seminars in American Government or International Studies. Students enrolling in this course should have the prior approval of the faculty member with whom they wish to conduct the research. RSH.

POLS 997. Preparation for the Comprehensive Examination. 1-6 Hours.
An independent reading course for students preparing to take the Ph.D. comprehensive examination. May be taken for two semesters or six credits, whichever comes first. Graded on A, B, C, D, or F depending on the results of the comprehensive examination. RSH.

POLS 999. Doctoral Dissertation. 1-15 Hours.
Enrollment for writing doctoral dissertations. THE.

Bachelor of Arts and Bachelor of General Studies in Political Science

Why study political science?
Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe.

First- and Second-Year Preparation
Students should apply for admission during semester in which major admission criteria will be completed, normally no later than 60 hours, or for transfer students, during the initial term at KU. Application to this major after completion of 60 hours, or the initial KU term for a transfer student, will likely delay graduation.

Courses Required
Introduction to U.S. Politics. Satisfied by:
POLS 110 Introduction to U.S. Politics 3
or POLS 111 Introduction to U.S. Politics Honors
Select one of the following:

Introduction to Comparative Politics. Satisfied by one of the following:
POLS 150 Introduction to Comparative Politics
or POLS 151 Introduction to Comparative Politics Honors
Introduction to International Politics. Satisfied by one of the following:
POLS 170  Introduction to International Politics
or POLS 171  Introduction to International Politics Honors

Admission GPA
• Satisfied by a minimum 2.3 GPA in required admission courses designated above.
• University Course Repeat Policy will apply.

Requirements for the B.A. or B.G.S. Major

Political Science Core Knowledge and Skills (15)
Majors must complete a course in each of the following areas:
Introduction to U.S. Politics. Satisfied by one of the following:
POLS 110  Introduction to U.S. Politics  3
or POLS 111  Introduction to U.S. Politics Honors
Introduction to Comparative or International Politics. Satisfied by one of the following:
POLS 150  Introduction to Comparative Politics  3
or POLS 151  Introduction to Comparative Politics Honors
POLS 170  Introduction to International Politics  3
or POLS 171  Introduction to International Politics Honors
Introduction to Political Theory. Satisfied by one of the following:
POLS 301  Introduction to Political Theory  3
or POLS 302  Introduction to Political Theory, Honors
Political Science Methods of Inquiry. Satisfied by:
POLS 306  Political Science Methods of Inquiry  3

Political Science Required Distribution of Electives (6)
Majors must complete an elective course from at least 2 different subfields below.

Political Philosophy & Empirical Theory
Satisfied by one of the following:
POLS 501  Contemporary Political Thought
POLS 502  History of Political Thought
POLS 503  Politics in Literature
POLS 504  Millenarian Movements
POLS 600  Contemporary Feminist Political Theory
POLS 601  Political Ideologies
POLS 602  American Political Ideas
POLS 603  Democratic Theory
POLS 604  Religion and Political Theory
POLS 605  A Study of Political Thought in Antiquity
POLS 607  Modern Political Theory
POLS 608  Social Choice and Game Theory
POLS 609  Topics in Political Theory: ______
POLS 626  Introduction to Survey Research
POLS 627  Advanced Issues in Survey Research
POLS 644  Justice and Public Policy in Democratic Societies
POLS 680  International Relations in Political Philosophy  1

U.S. Political Institutions & Processes
Satisfied by one of the following:
POLS 511  The Judicial Process

POLS 512  Latino Politics
POLS 515  American Political Parties
POLS 516  Public Opinion and American Democracy
POLS 520  Political Communication
POLS 521  Rhetoric, Politics and the Mass Media
POLS 566  Social Welfare, Taxation, and the Citizen  1
POLS 610  Constitutional Law: Governmental Powers
POLS 611  Constitutional Law: Civil Liberties
POLS 612  Psychology in Politics  1
POLS 613  Comparative U.S. State Politics
POLS 614  Urban Politics
POLS 615  Campaigns and Elections
POLS 616  Interest Group Politics
POLS 617  The Congress
POLS 618  The Presidency
POLS 619  Topics in American Politics: ______
POLS 620  Formulation of Public Policy  1
POLS 630  Politics of Identity
POLS 645  Corruption, Crisis and Scandal
POLS 667  Islam and Politics
Public Policy & Public Administration
Satisfied by one of the following:
POLS 528  Environmental Justice and Public Policy
POLS 566  Social Welfare, Taxation, and the Citizen  1
POLS 620  Formulation of Public Policy  1
POLS 621  Public Policy Analysis
POLS 622  Government and the Economy
POLS 623  The Politics of Social Policy
POLS 624  Environmental Politics and Policy
POLS 625  Extremist Groups and Government Response
POLS 628  The Politics of Public Health
POLS 629  Topics in Public Policy: ______
POLS 634  Bureaucratic Politics
POLS 640  Politics of Reproductive Policy
Foreign Governments & Comparative Politics
Satisfied by one of the following:
POLS 553  Comparative Environmental Politics
POLS 561  Liberation in Southern Africa
POLS 562  Women and Politics
POLS 563  Comparative Political Economy
POLS 564  Elections and Political Parties Around the World
POLS 565  Political Change in Asia
POLS 600  Contemporary Feminist Political Theory  1
POLS 644  Justice and Public Policy in Democratic Societies  1
POLS 650  Palestinians and Israelis
POLS 651  Women and Politics in Latin America
POLS 652  Politics in Europe
POLS 653  Gender, War, and Peace
POLS 654  Politics and Government of Russia and the Central Eurasian States
POLS 655  Politics of East-Central Europe
Minor in Public Policy in the United States

Why study political science?
Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe.

Requirements for the Public Policy in the U.S. Minor

The Public Policy in the U.S. minor involves course work focused on domestic U.S. public policy and the political environment surrounding the making and implementation of policy.

Honors Experience
Recommended for students with a minimum grade point average of 3.5 in Political Science coursework and 3.25 overall. These averages must be achieved before the final semester.
Public Policy in U.S. Minor Electives (12)
At least 12 hours of POLS courses from approved list: 12
- POLS 528 Environmental Justice and Public Policy
- POLS 493 Directed Readings
- POLS 553 Comparative Environmental Politics
- POLS 566 Social Welfare, Taxation, and the Citizen
- POLS 613 Comparative U.S. State Politics
- POLS 614 Urban Politics
- POLS 620 Formulation of Public Policy
- POLS 621 Public Policy Analysis
- POLS 622 Government and the Economy
- POLS 623 The Politics of Social Policy
- POLS 624 Environmental Politics and Policy
- POLS 625 Extremist Groups and Government Response
- POLS 628 The Politics of Public Health
- POLS 629 Topics in Public Policy: _________
- POLS 630 Politics of Identity
- POLS 634 Bureaucratic Politics
- POLS 640 Politics of Reproductive Policy
- POLS 720 The Scope of Public Policy (graduate level)
- POLS 493 Directed Readings (if content is appropriate)

Minor Hours & Minor GPA
While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Junior/Senior Hours in Residence
Satisfied by a minimum of 12 hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Master of Arts in Political Science
Why study political science?
Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
Admission to M.A. or Ph.D. programs is based on the applicant’s undergraduate and/or graduate record, standardized test scores, and references from instructors. All applicants must complete a bachelor’s degree. A completed application must include

1. Online graduate application (http://graduate.ku.edu/application-process),
2. Graduate Record Examination results — verbal, quantitative, and analytical,
3. A 1- to 2-page statement of goals and research interests,
4. 3 letters of recommendation, preferably from faculty members,
5. A nonrefundable application fee (see Admission in the Graduate Studies (p. 2369) section of the online catalog), and
6. 1 official transcript from each college or university attended.

An official transcript is one that is sent directly from the registrar of the applicant’s school to the department. All these materials must be received before the application can be considered.

An applicant who wishes to be considered for regular fall admission and for a graduate teaching assistantship must complete the application by January 10 for the coming academic year. A student who wishes to be considered for fall admission but not for a teaching assistantship should submit the application by April 15 but may do so earlier.

Submit your graduate application online (http://www.graduate.ku.edu). Send all other requested application materials to the department:

The University of Kansas
Department of Political Science
Graduate Coordinator
Blake Hall
1541 Lilac Lane, Room 504
Lawrence, KS 66045-3129

M.A. Degree Requirements
All candidates for the M.A. degree must complete, at a satisfactory level,

1. 30 semester hours of graduate credit, 21 of which must be earned in courses at the 700 level or above;
2. Research methods through POLS 706; and
3. A comprehensive master’s oral examination.

The student selects a principal advisor from the Graduate Faculty by the end of the first year to choose courses and prepare for the comprehensive examination. The examination is administered by a 3-person M.A. committee that includes the student’s principal advisor and 2 other members of the KU Graduate Faculty selected by the student in consultation with the principal advisor. One member of the committee may be from another department (including Special Status members of the Graduate Faculty).

Directed readings courses in excess of 5 hours cannot be counted toward the 30 hours required for the degree. With prior written approval, candidates may count up to 6 graduate hours taken outside the department (either at KU or at another institution accredited by the
North Central Association of Colleges and Schools) toward the 30 hours required for the degree.

Applicants who have not completed at least 15 undergraduate credit hours in political science may be admitted with the provision that they complete additional hours of course work.

All candidates must fulfill the requirements of either the thesis or the non-thesis option for the Master of Arts degree.

**Thesis Option**

Upon completion and certification of an acceptable thesis, candidates may count 6 credit hours of thesis enrollment toward the 30 credit hours required for the M.A. degree.

**Non-thesis Option**

Candidates may substitute a minimum of two 800- or 900-level research courses plus satisfactory performance on a comprehensive written examination administered by the three-person M.A. committee before the oral examination.

**Doctor of Philosophy in Political Science**

**Why study political science?**

Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Admission to M.A. or Ph.D. programs is based on the applicant’s undergraduate and/or graduate record, standardized test scores, and references from instructors. All applicants must complete a bachelor’s degree. A completed application must include

1. Online graduate application (http://graduate.ku.edu/application-process),
2. Graduate Record Examination results — verbal, quantitative, and analytical,
3. A 1- to 2-page statement of goals and research interests,
4. 3 letters of recommendation, preferably from faculty members,
5. A nonrefundable application fee (see Admission in the Graduate Studies (p. 2369) section of the online catalog), and
6. 1 official transcript from each college or university attended.

An official transcript is one that is sent directly from the registrar of the applicant’s school to the department. All these materials must be received before the application can be considered.

An applicant who wishes to be considered for regular fall admission and for a graduate teaching assistantship must complete the application by January 10 for the coming academic year. A student who wishes to be considered for fall admission but not for a teaching assistantship should submit the application by April 15 but may do so earlier.

Submit your graduate application online (http://www.graduate.ku.edu). Send all other requested application materials to the department:

**The University of Kansas**
Department of Political Science
Graduate Coordinator
Blake Hall
1541 Lilac Lane, Room 504
Lawrence, KS 66045-3129

**Ph.D. Degree Requirements**

Students who complete the Master of Arts degree may be eligible to pursue the Ph.D. degree. The Ph.D. program requires work in 2 major subfields and 1 minor subfield.

The major fields must be drawn from those offered by the division (see Fields of Graduate Study). Before their first attempt at the written preliminary examination in any subfield, all Ph.D. students must complete at least 4 courses in that field, 3 of which are at the 700 level or above. Enrollment in directed research covering a particular subfield may be substituted for one of the four courses/seminars.

The minor field may be another of the subfields, a related field from an outside department, or an interdisciplinary program. The courses for the minor field must follow the same structure as outlined above for the major fields. Courses for the minor field may not be applied to another examination field.

Students should consult their major advisors to plan a schedule of coursework and seminar preparation in each of these subfields to provide adequate preparation for the written preliminary examination. Students must complete the majority of courses in their major fields, the research skills and responsible scholarship requirement, the Ph.D. residency requirement, and resolve any grades of incomplete before registering for preliminary examinations. The research skills and responsible scholarship requirement includes

**Option 1: Research Methods**

POLS 706 Research Methods I 3
POLS 707 Research Methods II 3
Select 1 research methods course approved by the major advisor and the graduate director

**Option 2: Research Methods and Foreign Language**

POLS 706 Research Methods I 3
POLS 707 Research Methods II 3
Select 1 of the following choices in a language approved by the student’s advisor as well as the graduate director:
2 semesters of a single foreign language no more than 5 years old at the time of certification
Demonstrated reading knowledge of a single foreign language

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

To become a Ph.D. candidate, the student must satisfactorily complete a comprehensive oral examination. No student may attempt the comprehensive oral examination until the 2 written preliminary examinations have been passed and the requirements of the minor subfield have been completed.

After passing the comprehensive oral examination, the doctoral candidate must write a dissertation approved by a departmental dissertation committee and pass a final oral defense of the dissertation to qualify for the Ph.D. degree.

Prelaw Preparation

Preparing for Law School

For admission to law school, an applicant must complete a bachelor’s degree and take the Law School Admission Test (LSAT). No particular course of undergraduate study is recommended, this comports with the views of the American Bar Association (http://www.americanbar.org/groups/legal_education/resources/pre_law.html) (ABA). However, the program should be sufficiently rigorous to provide the skills of comprehension and analysis essential in law study.

To prepare for law school, students should take courses that challenge and interest them, but no specific courses are required or recommended. The ABA recommends the development of numerous skills (http://www.lsac.org/jd/thinking-about-law-school/lawyers-skills) in preparation for a legal education—including analytical and problem solving skills; critical reading, writing, oral communication and listening skills; general research, task organization and management skills. Fulfilling or exceeding general education and major requirements satisfies many of these objectives. Consult the Pre-Law advisor about undergraduate courses beyond general education and major requirements.

It is strongly recommended that Pre-Law students view the Pre-Law Basics session online early in their undergraduate careers for more complete Pre-Law information.

Students should submit law school applications the fall semester before entering law school. For most students, this is fall of the senior year. Admission is highly competitive, and law schools examine a number of factors. Heavy reliance is placed on the undergraduate grade-point average and score on the LSAT. All grades on the transcript, including transfer work, are reported to Law School Admission Council (LSAC) and used by them to calculate their version of the applicant’s cumulative grade point average. The LSAT tests skills in reading comprehension, logical reasoning, and analytical reasoning. It is offered 4 times during the academic year: June, September/October, December, and February. Most applicants take the June or September/October test to submit applications early. The September/October test date sometimes coincides with midterm examinations, so, many students prefer to take the LSAT in June after their junior year. Students can register for the LSAT online through the Law School Admission Council (http://www.lsac.org). Law schools also consider personal statements, letters of recommendation, extracurricular activities, and the rigor of the academic curriculum in determining admission.

Many academic policy options, such as the Credit/No Credit (http://www.policy.ku.edu) option and the course-repeat policy (http://www.policy.ku.edu), have different consequences for law school applicants. For example, LSAC doesn’t recognize the course repeat policy, and calculates both grades as part of your cumulative grade point average. Consult the Pre-Law advisor before electing such options.

View the School of Law (p. 752) section of the online catalog.

Premedical Professions

Premedical Professions Preparation

Premedical Professions Advising

Premedical, premedicine, preoptometry, and preveterinary medicine are career interests rather than majors or formal programs. Students prepare by taking courses required for entry, studying to learn concepts and perform well academically, volunteering and shadowing to get experience, taking a standardized admissions test, and applying for admission to graduate-level professional schools.

For more information, visit the website (https://medadvising.ku.edu). Call 785-864-2834 to schedule an orientation or application meeting with the premedical advisor.

Predentistry

Predentistry is a career interest rather than a major or formal program. Students prepare by taking courses to meet dental school admission requirements, studying to learn concepts and perform well academically, and shadowing or working in dental practices. They take the Dental Admission Test (http://www.ada.org/dat.aspx) (DAT) and apply for admission to dental schools, usually in the summer between the junior and senior year. Most people complete an undergraduate bachelor’s degree and major before entering dental school.

Dental schooling is 4 years of graduate-level, professional education and training. There is no dental school in Kansas, however, there is an agreement for some seats for Kansas residents at the University of Missouri—Kansas City (UMKC) School of Dentistry.

Most dental schools require:

- English Composition I. Satisfied by:
  - ENGL 101 Composition 3
  - or ENGL 105 Freshman Honors English

- English Composition II. Satisfied by:
  - ENGL 102 Critical Reading and Writing 3
  - or ENGL 205 Freshman-Sophomore Honors Proseminar: _____

- Biology with Lab. Satisfied by:
  - BIOL 150 Principles of Molecular and Cellular Biology 4
  - or BIOL 151 Principles of Molecular and Cellular Biology, Honors

- General Chemistry I with Lab. Satisfied by one of the following: 5
  - CHEM 130 General Chemistry I
  - CHEM 170 Chemistry for the Chemical Sciences I
  - CHEM 190 Foundations of Chemistry I, Honors
Summer between the junior and senior year. Most people complete an
College Admission Test (https://www.aamc.org/students/applying/mcat)
and volunteering or working in health care settings. They take the Medical
requirements, studying to learn concepts and perform well academically,

Premedicine

Premedicine is a career interest rather than a major or formal program. Students prepare by taking courses to meet medical school admission requirements, studying to learn concepts and perform well academically, and volunteering or working in health care settings. They take the Medical College Admission Test (https://www.aamc.org/students/applying/mcat) (MCAT) and apply for admission to medical schools, usually in the summer between the junior and senior year. Most people complete an undergraduate bachelor’s degree and major before entering medical school.

Medical schooling is four years of graduate-level, professional education and training, followed by a three- to six-year residency program. The only medical school in Kansas is the KU School of Medicine.

Most medical schools require:

- English Composition I. Satisfied by:
  - ENGL 101 Composition 3
  - ENGL 105 Freshman Honors English
- English Composition II. Satisfied by:
  - ENGL 102 Critical Reading and Writing 3
  - ENGL 205 Freshman-Sophomore Honors Proseminar: ______
- Biology with Lab. Satisfied by:
  - BIOL 150 Principles of Molecular and Cellular Biology 4
  - BIOL 151 Principles of Molecular and Cellular Biology, Honors

General Chemistry I with Lab. Satisfied by one of the following:
- CHEM 130 General Chemistry I 5
  - CHEM 170 Chemistry for the Chemical Sciences I
  - CHEM 190 Foundations of Chemistry I, Honors

General Chemistry II with Lab. Satisfied by one of the following:
- CHEM 135 General Chemistry II 5
  - CHEM 175 Chemistry for the Chemical Sciences II
  - CHEM 195 Foundations of Chemistry II, Honors

Organic Chemistry I with Lab. Satisfied by one of the following:
- CHEM 330 Organic Chemistry I 5
  - CHEM 331 and Organic Chemistry I Laboratory
  - CHEM 335 Organic Chemistry II
  - CHEM 336 and Organic Chemistry II Laboratory

Some dental schools require additional mathematics, psychology, and/or biology courses.

For more information, visit the website (https://medadvising.ku.edu). Call 785-864-2834 to schedule an orientation or application meeting with the premedical advisor.

Some dental schools require additional mathematics, psychology, and/or biology courses.

For more information, visit the website (https://medadvising.ku.edu). Call 785-864-2834 to schedule an orientation or application meeting with the premedical advisor.

2014
Most optometry schools require:

- English Composition I. Satisfied by:
  - ENGL 101 Composition
  - or ENGL 105 Freshman Honors English

- English Composition II. Satisfied by:
  - ENGL 102 Critical Reading and Writing
  - or ENGL 205 Freshman-Sophomore Honors Proseminar: ________

- Biology I with Lab. Satisfied by:
  - BIOL 150 Principles of Molecular and Cellular Biology

Genetics. Satisfied by:

- BIOL 350 Principles of Genetics
  - or BIOL 360 Principles of Genetics, Honors

Statistics. Satisfied by one of the following:

- PSYC 210 Statistics in Psychological Research
- PSYC 211 Statistics in Psychological Research, Honors
- MATH 365 Elementary Statistics
- BIOL 570 Introduction to Biostatistics

The MCAT also requires knowledge from:

- Biochemistry. Satisfied by one of the following:
  - BIOL 600 Introductory Biochemistry, Lectures
  - or BIOL 636 Biochemistry I

- Psychology. Satisfied by one of the following:
  - PSYC 104 General Psychology
  - or PSYC 105 General Psychology, Honors

- Sociology. Satisfied by one of the following:
  - SOC 104 Elements of Sociology
  - SOC 105 Elements of Sociology, Honors
  - SOC 160 Social Problems and American Values
  - SOC 161 Social Problems and American Values, Honors

For more information, visit the website (https://medadvising.ku.edu). Call 785-864-2834 to schedule an orientation or application meeting with the premedical advisor.

Preoptometry

Preoptometry is a career interest rather than a major or formal program. Students prepare by taking courses to meet optometry school admission requirements, studying to learn concepts and perform well academically, and shadowing or working in optometry practices. They take the Optometry Admission Test (https://www.ada.org/oat) (OAT) and apply for admission to optometry schools, usually in the summer between the junior and senior year. Most people complete an undergraduate bachelor’s degree and major before entering optometry school.

Optometry schooling is four years of graduate-level, professional education and training. There is no optometry school in Kansas, however, there are agreements for some seats for Kansas residents at the University of Missouri—St. Louis School of Optometry, Northeastern State University of Oklahoma College of Optometry, and the Southern College of Optometry in Tennessee.

Most optometry schools require:

- English Composition I. Satisfied by:
  - ENGL 101 Composition
  - or ENGL 105 Freshman Honors English

- English Composition II. Satisfied by:
  - ENGL 102 Critical Reading and Writing
  - or ENGL 205 Freshman-Sophomore Honors Proseminar: ________

- Biology I with Lab. Satisfied by:
  - BIOL 150 Principles of Molecular and Cellular Biology

- or BIOL 151 Principles of Molecular and Cellular Biology, Honors

- or BIOL 152 Principles of Organismal Biology
- or BIOL 153 Principles of Organismal Biology, Honors

General Chemistry I with Lab. Satisfied by one of the following:

- CHEM 130 General Chemistry I
- CHEM 170 Chemistry for the Chemical Sciences I
- CHEM 190 Foundations of Chemistry I, Honors

General Chemistry II with Lab. Satisfied by one of the following:

- CHEM 135 General Chemistry II
- CHEM 175 Chemistry for the Chemical Sciences II
- CHEM 195 Foundations of Chemistry II, Honors

- Physics I with Lab. Satisfied by one of the following: 4-5
  - PHSX 114 College Physics I
  - PHSX 211 General Physics I
  - & PHSX 216 and General Physics I Laboratory
  - PHSX 213 General Physics I Honors

- Physics II with Lab. Satisfied by one of the following: 4
  - PHSX 115 College Physics II
  - PHSX 212 General Physics II
  - & PHSX 236 and General Physics II Laboratory
  - PHSX 214 General Physics II Honors

- Calculus I: Satisfied by one of the following: 3-5
  - MATH 115 Calculus I
  - MATH 121 Calculus I
  - MATH 141 Calculus I: Honors

- Microbiology with Lab. Satisfied by one of the following: 5
  - BIOL 400 Fundamentals of Microbiology
  - & BIOL 402 and Fundamentals of Microbiology Laboratory
  - BIOL 401 Fundamentals of Microbiology, Honors
  - & BIOL 402 and Fundamentals of Microbiology Laboratory

- Organic Chemistry with Lab. Satisfied by one of the following: 5
  - CHEM 310 Fundamentals of Organic Chemistry
  - & CHEM 331 and Organic Chemistry I Laboratory
  - CHEM 330 Organic Chemistry I
  - & CHEM 331 and Organic Chemistry I Laboratory
  - CHEM 380 Organic Chemistry I, Honors
  - & CHEM 331 and Organic Chemistry I Laboratory

- Psychology. Satisfied by:
  - PSYC 104 General Psychology
  - or PSYC 105 General Psychology, Honors

- Statistics. Satisfied by: 3
  - PSYC 210 Statistics in Psychological Research
  - PSYC 211 Statistics in Psychological Research, Honors
  - MATH 365 Elementary Statistics
  - BIOL 570 Introduction to Biostatistics

Most also require or recommend:

- Anatomy with lab: Satisfied by one of the following:
  - BIOL 240 Fundamentals of Human Anatomy
  - & BIOL 241 and Human Anatomy Observation Laboratory

- Biochemistry: Satisfied by:
  - BIOL 600 Introductory Biochemistry, Lectures
The Kansas State College of Veterinary Medicine requires:

- Kansas State College of Veterinary Medicine.
- Education and training. The only veterinary school in Kansas is the Veterinary schooling is four years of graduate-level, professional school.

Undergraduate bachelor's degree and major before entering veterinary summer between the junior and senior year. Most people complete an (GRE) and apply for admission to veterinary schools, usually in the well academically, and shadowing or working in veterinary practices.

Preveterinary medicine is a career interest rather than a major or Preveterinary Medicine

Preveterinary medicine is a career interest rather than a major or formal program. Students prepare by taking courses to meet veterinary school admission requirements, studying to learn concepts and perform well academically, and shadowing or working in veterinary practices. They take the Graduate Record Examination (http://www.ets.org/gre) (GRE) and apply for admission to veterinary schools, usually in the summer between the junior and senior year. Most people complete an undergraduate bachelor's degree and major before entering veterinary school.

Veterinary schooling is four years of grade-level, professional education and training. The only veterinary school in Kansas is the Kansas State College of Veterinary Medicine.

The Kansas State College of Veterinary Medicine requires:

English Composition I. Satisfied by:

- ENGL 101 Composition 3
- or ENGL 105 Freshman Honors English

English Composition II. Satisfied by:

- ENGL 102 Critical Reading and Writing 3
- or ENGL 205 Freshman-Sophomore Honors Proseminar: __________

Public Speaking, Satisfied by:

- COMS 130 Speaker-Audience Communication 3
- or COMS 131 Speaker-Audience Communication, Honors

Chemistry I with Lab. Satisfied by one of the following: 5

- CHEM 130 General Chemistry I
- CHEM 170 Chemistry for the Chemical Sciences I
- CHEM 190 Foundations of Chemistry I, Honors

Chemistry II with Lab. Satisfied by one of the following: 5

- CHEM 135 General Chemistry II
- CHEM 175 Chemistry for the Chemical Sciences II
- CHEM 195 Foundations of Chemistry II, Honors

General Organic Chemistry with Lab. Satisfied by one of the following: 5

- CHEM 310 Fundamentals of Organic Chemistry & CHEM 331 and Organic Chemistry I Laboratory
- CHEM 330 Organic Chemistry I & CHEM 331 and Organic Chemistry I Laboratory
- CHEM 380 Organic Chemistry I, Honors & CHEM 331 and Organic Chemistry I Laboratory
- General Biochemistry. Satisfied by one of the following: 4-6
- BIOL 600 Introductory Biochemistry, Lectures

Some require additional mathematics, psychology, and/or other courses.

For more information, visit the website (https://medadvising.ku.edu). Call 785-864-2834 to schedule an orientation or application meeting with the premedical advisor.

Department of Psychology

Why study psychology?

Because the understanding of mind, behavior, and the human experience is best achieved through the rigorous application of the scientific method.

Undergraduate Programs

Undergraduate courses are designed as part of a general education, for students preparing for careers in professional fields, and for students majoring in psychology, including those anticipating graduate work.

Preparation for Graduate Study

Students who plan to apply for graduate work in psychology should supplement their beginning course in methodology (PSYC 200/PSYC 201) and statistics (PSYC 210/PSYC 211) with a laboratory course (e.g., PSYC 618, PSYC 620, PSYC 622, PSYC 624, or PSYC 625). Methods (PSYC 200/PSYC 201) and Statistics (PSYC 210/PSYC 211) should be taken as early as possible in the undergraduate education. The laboratory course should be completed during the junior or senior year.

Preparation for Graduate Study

Students who plan to apply for graduate work in psychology should supplement their beginning course in methodology (PSYC 200/PSYC 201) and statistics (PSYC 210/PSYC 211) with a laboratory course (e.g., PSYC 618, PSYC 620, PSYC 622, PSYC 624, or PSYC 625). Methods (PSYC 200/PSYC 201) and Statistics (PSYC 210/PSYC 211) should be
taken as early as possible in the undergraduate education. The laboratory course should be completed during the junior or senior year.

**Graduate Programs**

The department offers a single doctoral degree in psychology, which may be earned in social, cognitive, quantitative, developmental, or clinical psychology. Students enter with the expectation of earning the Ph.D. The department does not admit students seeking the terminal master's degree. The department cooperates with related departments in joint Ph.D. programs in clinical child psychology (http://child.ku.edu), behavioral psychology, (http://www.absc.ku.edu) and child language (http://www.clp.ku.edu).

**Dual-title Ph.D. in Psychology and Gerontology**

This dual-title degree is an option available to students who have first been admitted to the doctoral program. The dual-title degree allows the pursuit of a single degree that incorporates study within a traditional discipline and training in an interdisciplinary field; the student is awarded one degree (Ph.D.) with both titles identified on the diploma (e.g., “Ph.D. in Psychology and Gerontology”).

This option is designed to appeal to students who are strong in a traditional discipline but also motivated to study across disciplinary lines. In the course of study, students can avail themselves of disciplinary depth and interdisciplinary breadth. At the post-doctoral stage, dual-title graduates will have enhanced career and employment opportunities, able to claim expertise in one or both titles of their degree when seeking positions in education and research.

More information about this option, its admissions requirements, and plan of study can be found on the department website or the website of the Gerontology program.

**Courses**

**PSYC 102. Orientation Seminar in Psychology. 1 Hour. S.**

Provides an overview of the discipline of psychology. Emphasizes developing an understanding of opportunities in psychology at the University of Kansas, exploring service-learning options related to the major, and helping students plan goals for their education through an understanding of their personal values and options within and outside the discipline. Open to KU-degree-seeking students only. Contact the Psychology Department to enroll in the course. Non-degree-seeking and non-KU students may enroll in the course by signing up with KU Continuing Education. Graded on a satisfactory/unsatisfactory basis. LEC.

**PSYC 104. General Psychology. 3 Hours. SI GE3S / S.**

A basic introduction to the science of psychology. LEC.

**PSYC 105. General Psychology, Honors. 3 Hours. SI GE3S / S.**

Open to students in College or Departmental Honors programs or by permission of instructor. LEC.

**PSYC 120. Personality. 3 Hours. SI GE3S / S.**

An introductory survey of personality theories, development, assessment and current research. LEC.

**PSYC 121. Personality, Honors. 3 Hours. SI GE3S / S.**

Open to students in College or Departmental Honors programs or by permission of instructor. LEC.

**PSYC 177. First Year Seminar:_____ 3 Hours. SI GE11.**

A limited-enrollment, seminar course for first-time freshmen, organized around current issues in psychology. May not contribute to major requirements in psychology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

**PSYC 200. Research Methods in Psychology. 3 Hours. S.**

An examination of the scientific "ways of knowing" employed by psychologists to discover the laws governing human behavior across a wide domain. The focus of the course is upon these methods and the statistical techniques that support them. Prerequisite: PSYC 104 and MATH 101 or equivalent placement. LEC.

**PSYC 201. Research Methods in Psychology, Honors. 3 Hours. S.**

An examination of the scientific "ways of knowing" employed by psychologists to discover the laws governing human behavior across a wide domain. The focus of the course is upon these methods and the statistical techniques that support them. Open to students in University and Departmental Honors programs or by permission of instructor. Not open to students taking PSYC 200. Prerequisite: PSYC 104 and MATH 101. LEC.

**PSYC 202. Study Abroad Topics in:_____. 1-4 Hours. S.**

This course is designed for the study of special topics in Psychology. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

**PSYC 210. Statistics in Psychological Research. 3 Hours. S.**

An introduction to statistical concepts and methods as they relate to analysis and interpretation of psychological data. Prerequisite: PSYC 104 and MATH 101 or equivalent placement. LEC.

**PSYC 211. Statistics in Psychological Research, Honors. 3 Hours. S.**

An introduction to statistical concepts and methods as they relate to analysis and interpretation of psychological data. Open only to student in University and Departmental Honors programs or by permission of instructor. Not open to students who have taken PSYC 210. Prerequisite: PSYC 104 and MATH 101 or equivalent placement. LEC.

**PSYC 318. Cognitive Psychology. 3 Hours. S.**

An introduction to contemporary research and theory in human learning and memory, relevant perceptual processes, and higher functions such as language. Prerequisite: PSYC 104 and one of the following: PSYC 200, PSYC 201, PSYC 210, PSYC 211, MATH 101, MATH 104 or equivalent placement. LEC.

**PSYC 319. Cognitive Psychology, Honors. 3 Hours. S.**

Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104 and one of the following: PSYC 200, PSYC 201, PSYC 210, PSYC 211, MATH 101, MATH 104 or exemption based on ACT or SAT score. LEC.

**PSYC 333. Child Development. 3 Hours. S.**

A survey course on the science and application of child and adolescent development; including physical, motoric, social, emotional, and cognitive changes from conception through adolescence. The course covers methods and theory, genetics, and may incorporate content on aggression, morality, parenting, media, and peers. Prerequisite: PSYC 104 and one of the following: PSYC 200, PSYC 201, PSYC 210, PSYC 211, MATH 101, MATH 104 or exemption based on ACT or SAT score. LEC.

**PSYC 334. Child Development, Honors. 3 Hours. S.**

A survey course on the science and application of child and adolescent development; including physical, motoric, social, emotional, and cognitive changes from conception through adolescence. The course covers methods and theory, genetics, and may incorporate content on aggression, morality, parenting, media, and peers. Open to students in University or Departmental Honors Programs or by permission of
instructor. Prerequisite: PSYC 104 and one of the following: PSYC 200, PSYC 201, PSYC 210, PSYC 211, MATH 101, MATH 104 or exemption based on ACT or SAT score. LEC.

PSYC 350. Abnormal Psychology. 3 Hours. S.
An examination of psychopathology including anxiety disorders, psycho-physiological disorders, affective disorders, and schizophrenic disorders. Disorders are considered from psychodynamic, behavioral, cognitive, and biological perspectives. Prerequisite: PSYC 104. LEC.

PSYC 351. Abnormal Psychology, Honors. 3 Hours. S.
Open to students in College or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104. LEC.

PSYC 360. Social Psychology. 3 Hours. S.
An introduction to the psychology of social behavior. Systematic consideration of such concepts as social influence, conformity and deviation, social attitudes and prejudice, socialization and personality, communication and propaganda, morale, and leadership. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104 and one of the following: PSYC 200, PSYC 201, PSYC 210, PSYC 211, MATH 101, MATH 104 or exemption based on ACT or SAT score. LEC.

PSYC 361. Social Psychology, Honors. 3 Hours. S.
An introduction to the psychology of social behavior. Systematic consideration of such concepts as social influence, conformity and deviation, social attitudes and prejudice, socialization and personality, communication and propaganda, morale, and leadership. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104 and one of the following: PSYC 200, PSYC 201, PSYC 210, PSYC 211, MATH 101, MATH 104 or exemption based on ACT or SAT score. LEC.

PSYC 370. Behavioral Neuroscience. 3 Hours. N.
A survey of topics related to the biological processes underlying behavior in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and neuropharmacology. Selected topics within the area of behavioral neuroscience are also covered, such as motivation, appetite, reward, homeostasis, biological rhythms, addiction, aggression, stress, emotion, and sleep. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 210 and PSYC 211. LEC.

PSYC 371. Behavior Neuroscience, Honors. 3 Hours. N.
A survey of basic topics related to the biological processes underlying behavior in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and neuropharmacology. Selected topics within the area of behavioral neuroscience are also covered, such as motivation, appetite, reward, homeostasis, biological rhythms, addiction, aggression, stress, emotion, and sleep. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: An introductory course in Psychology; an introductory course in Biology and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211. LEC.

PSYC 375. Cognitive Neuroscience. 3 Hours. N.
A survey of topics related to the biological processes underlying cognition in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and functional neuroanatomy. Selected topics within the area of cognitive neuroscience also covered, such as sensory processing, hearing, vision, learning and memory, attention, motor control, language, hemispheric asymmetry, executive function, and neuroplasticity. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211. LEC.

PSYC 380. Clinical Neuroscience. 3 Hours. N.
The organization and function of the nervous system as it relates to topics of interest to psychologists, including pain, anxiety, stress, sleep, depression, schizophrenia, akinetic and dyskinetic movement disorders, and senile dementia. Prerequisite: An introductory course in Psychology, an introductory course in Biology, and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211. LEC.

PSYC 381. Clinical Neuroscience, Honors. 3 Hours. N.
The organization and function of the nervous system as it relates to topics of interest to psychologists, including pain, anxiety, stress, sleep, depression, schizophrenia, akinetic and dyskinetic movement disorders, and senile dementia. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: An introductory course in Psychology, an introductory course in Biology, and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211. LEC.

PSYC 402. Study Abroad Topics in: ____. 1-4 Hours. S.
This course is designed for the study of special topics in Psychology equivalent to courses at the 300 to 600 level at KU. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

PSYC 405. Children and Media. 3 Hours. H.
The applied study of child development theories and research methods on the influences and effects of television and related visual media on childhood in the contexts of families, schools, and society. (Same as ABSC 405 and THR 405.) LEC.

PSYC 406. Individual Differences. 3 Hours. S.
A survey of the nature and sources of differences in human behavior and a consideration of the consequences of these differences for society. Prerequisite: PSYC 104. LEC.

PSYC 410. Intimate Relationships. 3 Hours. S.
A social psychological perspective on adult intimate relationships, examining friendship, dating, committed relationships, and the dissolution of committed relationships. Topics include romance, jealousy, self-disclosure, power, loneliness, and social support. Discussion of heterosexual and homosexual relationships, traditional forms (e.g., marriage) of relationships as well as alternative lifestyles (e.g. cohabitation) and gender-linked differences in relationships. Prerequisite: PSYC 104. LEC.

PSYC 415. Social and Cultural Sources of Self. 3 Hours. S.
An interdisciplinary exploration of the social and cultural sources of self-experience. The first part of the course emphasizes a general process: how the development and experience of self, though it might seem essentially personal, is shaped by social interaction. The second part of the course highlights particular cases: how self-experience may be constructed differently depending on the particular social and cultural settings a person inhabits. Cases include influences of gender, socioeconomic status, and age group on the construction of self-experience within societies from around the world, and ethnic-identity groups within the USA. Prerequisite: PSYC 104. LEC.

PSYC 418. Introduction to Cognitive Science. 3 Hours. S.
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an inter-disciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as LING 418, PHIL 418, and SPLH 418.) Prerequisite: Consent of instructor. LEC.
PSYC 420. Fundamentals of Personality. 3 Hours. S.
Clinical application of personality theories; personality development and assessment research. Prerequisite: PSYC 104. LEC.

PSYC 430. Cognitive Development. 3 Hours. S.
A basic survey course in the development of thinking and understanding in normal children. The course will cover Piaget's theory and information processing theories at the advanced undergraduate level. Topics include perception, attention, learning, memory, language, problem solving, and individual differences from birth to the mid-teens. Prerequisite: PSYC 104 or ABSH/HDFL 160. LEC.

PSYC 432. Human Behavioral Genetics. 3 Hours. S.
A survey of human behavioral genetics for upper division undergraduates. Emphasis is on how the methods and theories of quantitative, population, medical, and molecular genetics can be applied to individual and group differences in humans. Both normal and abnormal behaviors are covered, including intelligence, mental retardation, language and language disorders, communication, learning, personality, and psychopathology. (Same as ANTH 447, BIOL 432, SPLH 432.) Prerequisite: Introductory courses in biology/genetics or biological anthropology and psychology are recommended. LEC.

PSYC 435. Social and Personality Development. 3 Hours. S.
An introduction to social and personality development with consideration of both classic and contemporary theoretical viewpoints. The role of social contexts is considered (e.g., family, peers, communities), as well as biological influences (e.g., behavioral genetics). Topics include parent-infant attachment, peer relationships, aggression, etc. Prerequisite: PSYC 104. LEC.

PSYC 449. Laboratory/Field Work in Human Biology. 1-3 Hours. AE61 / N.
Faculty supervised laboratory or field research for Human Biology majors. Students design and complete a research project in collaboration with a Human Biology faculty member. (Same as ANTH 449, BIOL 449, and SPLH 449.) Prerequisite: Consent of instructor and Human Biology major. FLD.

PSYC 453. Psychological Foundations of Musical Behavior. 3 Hours. S.
Study of human musical behavior, including basic psychoacoustic phenomena, musical taste, functional music, musical ability, cultural organization of musical sounds, and the affective response. Prerequisite: General Psychology, MGMT 370, or consent of instructor. LEC.

PSYC 460. Honors in Psychology. 1-2 Hours. AE61 / S.
A seminar for juniors and seniors in the Honors Program in Psychology. Students who have been admitted to the Honors Program in Psychology may enroll for one credit for one or both semesters of their junior year and are required to enroll for two credits for both semesters in their senior year. IND.

PSYC 465. Stereotyping and Prejudice Across Cultures. 3 Hours. S.
This course covers a variety of theoretical views concerning the origins of stereotypes and the factors that maintain them, as well as how and when the revision of such beliefs take place. Analysis of various stereotypes (including gender and race) and the experience of prejudice across a variety of cultural contexts is examined. Many difficult social issues are discussed in depth. Prerequisite: PSYC 360 or PSYC 361; or consent of instructor. LEC.

PSYC 468. Psychology of Women. 3 Hours. S.
A survey of the psychological theories about women; similarities and differences in behavior of women and men; the effects of biological and social factors on the behavior of women and men; and issues of concern to women of different races, sexual orientations, ages, and so forth. (Same as WGSS 468.) Prerequisite: PSYC 104 or WGSS 201. LEC.

PSYC 470. Introduction to Contemporary Psychotherapies. 3 Hours. S.
Review of current psychotherapies with special references to their underlying philosophies, theories of personality, techniques, and effectiveness. Issues concerning the use of drugs in the treatment of mental disorders are also reviewed. Prerequisite: PSYC 104. LEC.

PSYC 472. Psychology of Sleep and Dreaming. 3 Hours. S.
This course reviews recent evidence on the roles of dreaming and dreamless sleep. Psychological, developmental, personality, and social psychological aspects are considered. Prerequisite: PSYC 104. LEC.

PSYC 475. Cognitive Neuroscience. 3 Hours. S.
The neurobiology of higher mental processes such as perception, attention, learning, memory, thinking, and language, as studied by techniques such as recording from individual neurons, electrical brain stimulation, brain damage, and brain scans and measurements of regional cerebral blood flow in conscious people. Emphasis will be placed on in-class analysis of original research articles. Prerequisite: One of the following courses - PSYC 318, 319, 370, 371, 380, or 381; or consent of instructor. LEC.

PSYC 480. Independent Study. 1-5 Hours. U.
Investigation of a special research problem or directed reading in an area not covered in regular courses. No more than 3 hours of PSYC 480 may be counted toward the minimum hours required for the major. Prerequisite: Consent of instructor. IND.

PSYC 481. Research Practicum. 1-5 Hours. U.
Guided participation in ongoing research programs to augment quantitative skills through direct practicum experience. No more than 3 hours of PSYC 481 may be counted toward the Psychology minor or the Psychology, Developmental Psychology, and Behavioral Neuroscience major requirements. Prerequisite: PSYC 200 or PSYC 201 or PSYC 210 or PSYC 211 or consent of instructor. RSH.

PSYC 482. Sensation and Perception. 3 Hours. S.
Introduction to human sensory and perceptual capabilities. Topics include: sensory systems, perceptual development, and perceiving color, objects, space, movement, sound, speech, touch, smell, and taste as well as various perceptual illusions. Prerequisite: PSYC 104. LEC.

PSYC 483. Undergraduate Internship in Psychology. 1-3 Hours. U.
Students conduct psychology focused fieldwork in an organization related to their professional/career goals. Credit hours are determined on the basis of 120 clock hours for 3 credit hours, 80 clock hours for 2 credit hours, and 40 clock hours for 1 credit hour. An internship plan (contract) is developed by the student in conjunction with the student's academic adviser and signed off by the academic adviser and an authorized agent of the internship site. At the conclusion of the internship experience, the authorized agent of the internship site writes the academic adviser indicating that the student has met the goals of the internship plan and the hours required. No more than 3 hours of PSYC 483 may be counted toward the minimum hours required for the major. Prerequisite: Admission to the Psychology major. FLD.

PSYC 490. Theories and Concepts of Child Development. 3 Hours. S.
An advanced course in the theories and basic concepts of child development. Coverage includes: (a) analyses of the general logic, assumptions, and principles of the five major approaches: normative-maturational, psychoanalytic, social learning theory, cognitive-developmental, and behavior analysis; (b) historical background of developmental theory; (c) social-cultural influences on theory construction; and (d) some cross-cultural perspectives. Not open to students previously
enrolled in HDFL 290. Prerequisite: PSYC 104, or HDFL 160, HDFL 161, HDFL 432, or consent of instructor. LEC.

PSYC 492. Psychology and Social Issues. 3 Hours. S.
A study of psychological aspects of selected social issues in contemporary American society. Race relations and the civil rights movement, Political extremism, Public opinion and social change. Social psychological approaches to a variety of social problems. Prerequisite: PSYC 360 or 361, or consent of instructor. LEC.

PSYC 499. Conceptual Issues in Psychology. 3 Hours. S.
This course examines classic issues in psychology--free-will and determinism, nature and nurture, the mind-body problem, approaches to human action, cultural influences on psychological theories, the evolution of intellectual paradigms, and inductive and deductive approaches to social scientific research--from multiple perspectives within psychology and related social sciences. Prerequisite: PSYC 104 or equivalent. LEC.

PSYC 500. Intermediate Statistics in Psychological Research. 3 Hours. U.
A second course in statistics with emphasis on applications. Analysis of variance, regression, analysis, analysis of contingency tables; possibly selected further topics. Prerequisite: Grade of B- or better in PSYC 210 or PSYC 211. LEC.

PSYC 502. Human Sexuality. 3 Hours. S.
An introduction to the field of human sexuality. Topics to be covered include sexual anatomy and physiology, fertilization, pregnancy, birth and lactation, contraception, human sexual response, sexuality across the life cycle, love, marriage, alternatives to marriage, sexual orientation, sex differences in behavior, parenthood, sexually transmitted diseases, sex and the law, and sex education. Prerequisite: PSYC 104. LEC.

PSYC 511. Laboratory Research in Infant Behavior. 3 Hours. S.
Optional course for students currently enrolled in PSYC 510 or may be taken after completion of PSYC 510. Will offer students practical experience in an infant research laboratory. Students must spend a minimum of nine hours a week (on three different half days) in laboratory. They will learn to observe and record infant behavior, to handle data from experiments and participate in the planning and discussion of laboratory research. Acquaintance with and involvement in the issues of obtaining informed consent and ethical aspects of infant research will be included. Prerequisite: Current enrollment or previous enrollment in PSYC 510 and consent of instructor. LAB.

PSYC 518. Human Memory. 3 Hours. S.
In-depth coverage of human memory phenomena, including phenomena concerning acquisition, storage and retrieval, unconscious forms of memory, memory monitoring and control, and practical aspects of memory such as autobiographical memory, mnemonic techniques and eyewitness memory. Prerequisite: PSYC 104. LEC.

PSYC 520. Memory and Eyewitness Testimony in Children. 3 Hours. S.
A review of the literature on the development of memory in young children, and the implications of this research for understanding children's eyewitness testimony. The course will present current research on children's long-term memory abilities, the impact of stress on recall performance, the effectiveness of various types of interviewing techniques, and the suggestibility of children's recollections. Policy issues and potential guidelines for the elicitation and evaluation of children's memory reports in both clinical and legal arenas will be discussed. Prerequisite: PSYC 104 or ABSC/HDFL 160, or consent of instructor. LEC.

PSYC 521. Women and Violence. 3 Hours. S.
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. The nature, prevalence, causes, and consequences of violence against women are discussed. (Same as WGSS 521.) Prerequisite: PSYC 104. LEC.

PSYC 531. Language Development. 3 Hours. S.
Introduction to the study of language development; emphasis on the psychological processes underlying syntactic, semantic, and pragmatic aspects of language development in children. Prerequisite: One of the following courses - PSYC 318, 319, 333, or 334; or consent of instructor. LEC.

PSYC 535. Developmental Psychopathology. 3 Hours. S.
A review of the literature on contemporary psychological and developmental disorders of children and youth. Course will present current models of psychopathology, classification systems, assessment methods, and treatment approaches designed for the individual, the family, and the community. Specific attention will be given to age, gender, and cultural differences and similarities. Topics include: anxiety disorders, oppositional behavior disorders, physical/sexual abuse, learning disabilities, and autism. (Same as ABSC 535.) Prerequisite: ABSC 160, PSYC 333, or consent of instructor. LEC.

PSYC 536. The Psychology of Language. 3 Hours. S.
A survey of recent research on psycholinguistics covering the perception, production, and comprehension of language. Topics include: the biological basis for language, the nature of comprehension processes, and memory for the syntactic, semantic, and pragmatic components of language. Prerequisite: One of the following courses - PSYC 318, 319, 333, or 334; or consent of instructor. LEC.

PSYC 545. Culture and Psychology. 3 Hours. S.
The course considers the relationship between culture and psyche. One theme throughout the course involves revealing the cultural grounding of psychological functioning. The second and complementary theme involves identifying the psychological processes involved in the phenomenon of culture. Prerequisite: PSYC 333, 334, 360 or 361 or consent of instructor. LEC.

PSYC 555. Evolutionary Psychology. 3 Hours. S.
A review of evolutionary theory and its application to human personality, cognition, interpersonal relationships, family dynamics, and development. Prerequisite: PSYC 104 and at least 3 additional hours in Psychology, or consent of instructor. LEC.

PSYC 565. Applied Developmental Psychology. 3 Hours. S.
An advanced study of the application of theories and concepts of developmental and behavioral psychology to a range of specific issues and problems of childhood and adolescence. This course will rely heavily upon the empirical research literature. Topics include contemporary social issues and child development, research in applied settings, assessment, intervention, and prevention, as well as program evaluation. (Same as ABSC 565.) Prerequisite: ABSC 160 or PSYC 333, and ABSC/PSYC 535. LEC.

PSYC 566. Psychology and the Law. 3 Hours. S.
An application of psychological processes and concepts to the American legal system. Among the topics covered are the socialization of legal attitudes, opinions about the purposes of the criminal justice system and especially of prisons, the concept of "dangerousness," the nature of jury decision making, and the rights of prisoners, patients, and children. LEC.

PSYC 570. Group Dynamics. 3 Hours. S.
A study of the processes underlying the dynamics of the group, including the observation of group phenomena and a consideration of their relation
to research findings. Prerequisite: PSYC 360 or 361, or consent of instructor. LEC.

**PSYC 572. Psychology and International Conflict. 3 Hours. S.**  
A study of psychological approaches to analysis and intervention in the field of international conflict and peace-making. Focus on major contributions and important paradigms for explanation and action. Prerequisite: PSYC 360 or consent of instructor. Background study in international relations or recent world history desirable. LEC.

**PSYC 578. Social Attitudes. 3 Hours. S.**  
An introduction to the study of attitudes focusing on problems of measurement and on empirical findings and theories of attitude acquisition and change. Prerequisite: PSYC 360, 361, or consent of instructor. LEC.

**PSYC 580. Research Lab. 1-5 Hours. S.**  
Supervised research under the guidance of a faculty member in the Department of Psychology. Students will be part of a collaborative laboratory environment, and will be involved in research design, data collection, and data analysis, and will take part in regularly scheduled laboratory meetings. Prerequisite: Permission of instructor. LEC.

**PSYC 581. Psychology of Religion. 3 Hours. S.**  
Consideration of the psychological antecedents of religious experience, the nature of religious experience, and the behavioral consequences of religion. Focus will be on psychological theory and research relevant to religious thought, feeling, belief, and behavior. (Same as REL 581.) Prerequisite: PSYC 104. LEC.

**PSYC 590. Nonverbal Communication. 3 Hours. S.**  
Examination of non-linguistic behavior in human communication, including proxemics (spacing), kinesics (movement and expression), and paralinguistics (voice quality). Includes phylogenetic and developmental perspectives, methods of analysis, applications to interpersonal problems. (Same as COMS 590.) Prerequisite: COMS 356 or PSYC 210 or PSYC 211. LEC.

**PSYC 592. Psychological Significance of Physical Illness and Disability. 3 Hours. S.**  
A lecture course to help students become more aware of and responsive to the psychological needs of persons with physical illnesses or disabilities. Emphasis is upon the meanings of such conditions in individuals' lives and the effects of treatment and rehabilitation settings on psychological adaptation. Prerequisite: PSYC 104. LEC.

**PSYC 598. Positive Psychology. 3 Hours. S.**  
An introduction to the core assumptions and research findings associated with human strengths and positive emotions. Also an exploration of interventions and applications informed by positive psychology in counseling and psychotherapy, and its application to school, work, family and other close relationships. (Same as EPSY 580.) Prerequisite: PSYC 104 or consent of instructor. LEC.

**PSYC 602. Basis and Nature of Individuality. 3 Hours. S.**  
Individuality in cognitive and personality attributes is surveyed, and analyzed by current psychological theory. The course includes topics on the structure of intellect and personality, cognitive theory, brain research and behavior genetics as relevant to the understanding of individuality. Prerequisite: An introductory course in psychology. LEC.

**PSYC 605. Health Psychology. 3 Hours. S.**  
Review of research and theory concerning the role of psychological factors in the development of physical illness and the contribution of psychologists to the treatment and prevention of physical illness. Prerequisite: PSYC 104. LEC.

**PSYC 608. Sex Role Development. 3 Hours. S.**  
An examination of the theory and literature on sex role development in childhood, adolescence, and adulthood. Particular attention is given to approaches stressing androgyny and variations on traditional roles. Processes of socialization into both traditional and non-traditional roles are stressed. Literature on females is emphasized, but male sex role development is also covered. Prerequisite: PSYC 104 or HDFL 160. LEC.

**PSYC 610. Advanced Personality. 3 Hours. S.**  
A survey of selected topics in the area of personality (e.g., defense mechanisms, aggression, interpersonal relations). Prerequisite: PSYC 120 or PSYC 420 or consent of instructor. LEC.

**PSYC 613. History and Systems in Psychology. 3 Hours. S.**  
A survey of the historical development of modern theoretical systems in psychology. Prerequisite: PSYC 104, plus twelve hours in psychology. LEC.

**PSYC 616. Foundations of Learning. 3 Hours. S.**  
A consideration of experimental findings and theories concerning classical and instrumental conditioning. Prerequisite: PSYC 104. LEC.

**PSYC 618. Experimental Psychology: Human Learning. 6 Hours. AE61 / S.**  
Lectures and laboratory research on human information processing as related to theories of word recognition, reading, and language comprehension. Major emphasis on experimental design, data analysis, interpretation, and scientific writing. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor. LEC.

**PSYC 620. Experimental Psychology: Sensation, Perception, and Cognition. 6 Hours. AE61 / S.**  
Lectures and laboratory work on human sensory processes and how they result in perceptions of the environment. Experience is provided in designing and implementing research as well as in the skills necessary for statistical analysis, interpretation of data, and scientific writing. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor. LEC.

**PSYC 622. Experimental Psychology: Social Behavior. 6 Hours. AE61 / S.**  
Lectures, laboratory and field work on various issues in research in social psychology (e.g., conformity, attitude change, social processes). Two two-hour periods a week and appointment for research. Prerequisite: PSYC 104, PSYC 360, and PSYC 210 or PSYC 211 or consent of instructor. LEC.

**PSYC 624. Experimental Psychology: Clinical Psychology. 6 Hours. AE61 / S.**  
Lectures and laboratory research on contemporary issues in clinical psychology. Emphasis on experimental design, data analysis, interpretation of data, and scientific writing. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor. LEC.

**PSYC 625. Experimental Psychology: Methods in Neuropsychology and Psychophysiology. 6 Hours. AE61 / S.**  
Lectures and laboratory work on psychophysiology and neuropsychology research methods. Overview of psychophysiological tools to measure the central and peripheral nervous systems. Experience designing and implementing neuropsychology and psychophysiology research. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor. LEC.

**PSYC 626. Psychology of Adolescence. 3 Hours. S.**  
Impact of factors of social environment and physical growth upon psychological development from puberty to young adulthood. (Same as
ABSC 626.) Prerequisite: PSYC 104, PSYC 333, or HDFL/ABSC 160. LEC.

PSYC 630. Clinical Psychology. 3 Hours. S.
The historical and empirical foundations of clinical psychology. Significant trends in theory, research, and social organization which have shaped clinical practice. A review of clinical practice. Prerequisite: PSYC 104. LEC.

PSYC 632. Advanced Child Behavior and Development. 3 Hours. S.
An advanced course in child development that includes a survey of the field's principles and theoretical approaches, and current issues in research and practice. Topics will include: prenatal development, cognition and language, social-emotional development, socialization influences in childhood, developmental psychopathology, and social policies. (Same as ABSC 632.) Prerequisite: ABSC/HD PL 160, PSYC 333, or instructor permission, and senior or graduate status. LEC.

PSYC 642. The Psychology of Families. 3 Hours. S.
Study of the family as a psychosocial system. Emphasis is placed on factors affecting contemporary families including family structures, development, communication patterns, disorders, and treatment approaches. Theory, empirical evidence, and practical principles that may lead to maximizing individual growth in the family unit are discussed. Prerequisite: PSYC 104. LEC.

PSYC 644. Behavioral Pharmacology. 3 Hours. S.
Addresses psychological and behavioral effects of drugs, including psychotropic medications. A central theme is that effects of drugs frequently cannot be characterized solely from a pharmacological perspective. Thus, emphasis is placed on examining the interaction of pharmacological and behavioral variables. For example, how do psychological factors moderate responses to drugs? The nature of this area assumes some knowledge of general psychology, research methods, biology, chemistry, neurophysiology, and the nervous system. Prerequisite: PSYC 104 or consent of instructor. LEC.

PSYC 646. Mental Health and Aging. 3 Hours. S.
Reviews recent research and application in the field of mental health and aging. Theoretical perspectives appropriate for understanding mental health issues with increased age are discussed. The epidemiology, assessment, diagnosis, and treatment methods associated with a variety of mental health conditions are surveyed. The community mental health resources available for older adults are discussed as well as practically-related issues such as evaluations of functional independence and competency among older adults. Prerequisite: PSYC 104 or consent of instructor. LEC.

PSYC 650. Statistical Methods in Behavioral and Social Science Research I. 4 Hours. S.
Elementary distribution theory; t-test; simple regression and correlation; multiple regression and multiple correlation; curvilinear regression; logistic regression; general linear model. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 790 will have different course requirements. Prerequisite: A grade of B- or better in a beginning course in statistics (e.g., PSYC 210 or PSYC 211, MATH 365, POLS 306, COMS 356, SOC 510, or equivalent) is recommended, or consent of instructor. LEC.

PSYC 651. Anova and Other Factorial Designs. 4 Hours. S.
Course covers one-way analysis of variance, linear trends, contrasts, post hoc tests; multi-way analysis of variance for crossed, blocked, nested, and incomplete designs; analysis of covariance; repeated measures analysis of variance; general linear model. Applications across the social, educational, and behavior sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 791 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 652. Behavior Therapy. 3 Hours. S.
A review of the principal techniques of behavior therapy, exclusive of operant-based therapies. Emphasis upon systematic desensitization, implosion, assertion training, and modeling techniques. Special attention given to outcome research relevant to the effectiveness of these techniques. Recommended: A course in abnormal psychology. Prerequisite: PSYC 104. LEC.

PSYC 678. Drugs and Behavior. 3 Hours. S.
A survey of the methods used to study the effects of drugs on behavior, and of the effect of selected drugs on behavior, particularly the narcotics, hallucinogens, and drugs used in the treatment of mental illness. Prerequisite: PSYC 104. LEC.

PSYC 679. Applied Nonparametric Statistical Methods. 4 Hours. S.
This course covers nonparametric statistical methods for testing hypotheses. Topics include a review of parametric statistics, sampling distributions, hypothesis testing, and motivations for using nonparametric techniques. In-depth coverage is given to distribution-free procedures, goodness-of-fit tests, resampling methods, and theory underlying nonparametric methods. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 879 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 685. Human Factors Psychology. 3 Hours. S.
Research techniques and methods useful in quantifying parameters of human performance that affect system functioning. Special emphasis is placed on modeling visual, auditory, and orienting systems and on human information processing. Prerequisite: PSYC 210 or PSYC 211 or consent of instructor. LEC.

PSYC 687. Factor Analysis. 4 Hours. S.
This course covers the theory behind, and application of, exploratory factor analysis. Topics include a review of multiple linear regression and matrix algebra. In-depth coverage is devoted to diagrams, model specification, goodness of fit, model selection, parameter estimation, rotation methods, scale development, and sample size and power issues. Extensions to confirmatory settings are elaborated. Both the theory underlying factor analytic techniques and hands-on application using software are emphasized. Applications across the social and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 887 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 689. Conceptual Issues in Human Sexuality. 3 Hours. S.
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as WGSS 689.) Prerequisite: PSYC 104 or WGSS 201. LEC.

PSYC 690. Seminar: _____ 1-5 Hours. U.
Discussion of current problems in psychological theory and research. Prerequisite: PSYC 104 and sophomore status. LEC.
PSYC 691. The Psychology of Aging. 3 Hours. S.
Social, psychological, and economic adjustments required by aging; changes in cognition, role and personality necessitated by advancing age. Prerequisite: PSYC 210 or PSYC 211 and one of the following: PSYC 318, PSYC 319, PSYC 350, PSYC 351, PSYC 360, PSYC 361, PSYC 370, PSYC 371, PSYC 380, or PSYC 381; or graduate standing; or consent of instructor. LEC.

PSYC 692. Test Theory. 4 Hours. S.
This course begins with recommendations for how to write a test, covers basics of classical test theory, and then emphasizes modern statistical methods for analyzing item data. Methods include factor analysis of categorical responses, methods for identifying measurement invariance (differential item functioning), and item response theory. Approximately one-half of the meetings are labs (primarily consisting of data analysis). The course is offered at the 600 and 800 levels with additional assignments at the 800 level. Prerequisite: PSYC 790/650 or equivalent, or consent of the instructor. LEC.

PSYC 693. Multivariate Analysis. 4 Hours. S.
Introduction to the central methods used in the analysis of multivariate data. Includes linear transformations, multivariate analysis of variance, multivariate multiple regression, discriminant analysis, canonical correlation, factor analysis, and an introduction to methods for clustering and classification. Applications across the behavior and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 893 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 694. Multilevel Modeling I. 4 Hours. S.
Introduction to statistical methods for modeling multilevel (hierarchically structured) data. Topics include a review of ordinary least squares regression analysis, random effects ANOVA, intraclass correlation, multilevel regression, testing and probing interactions, maximum likelihood estimation, model assumptions, model evaluation, and the analysis of longitudinal data. Emphasis will be on the theory underlying multilevel modeling techniques and hands-on application using software. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 894 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 695. Categorical Data Analysis. 4 Hours. S.
Introduction to multivariate analyses of count data, including error models, statistical inference, loglinear models, logit models, logistic regression, homogeneity, symmetry, and selected other topics. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 895 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 696. Structural Equation Modeling I. 4 Hours. S.
Introduction to statistical methods for modeling latent variables. Topics include a review of latent variables, covariance structures analysis, mean structures analysis, confirmatory factor analysis (CFA), structural equation modeling (SEM), multiple group CFA, longitudinal CFA, longitudinal SEM, and hierarchical CFA. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 896 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 697. Longitudinal Data Analysis. 3 Hours. S.
Reviews and contrasts various statistical models for the analysis of change. Course focuses on techniques to analyze longitudinal (repeated measures) data beyond the repeated-measures ANOVA framework. Applications across the behavioral and social sciences are emphasized. Students taking this course as PSYC 991 will have different course requirements. Prerequisite: PSYC 696 or equivalent, or consent of instructor. LEC.

PSYC 704. Research Practicum in Clinical Child Psychology. 3 Hours.
This course provides students in the Clinical Child Psychology Program with the opportunity to enhance and consolidate their research activities by fulfilling one of the elective course requirements. This practicum involves a contract with a research advisor and the program director. The contract includes definable products and dates for completion to prepare for submission for publication, develop a grant proposal, or conduct additional research project independent of other requirements in the program. The course is not to be taken as an overload, but is to be part of a full-time course schedule. May be repeated. (Same as ABSC 704, formerly HDFL 704.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. LEC.

PSYC 706. Special Topics in Clinical Child Psychology. 3 Hours.
A course offering detailed discussion of the literature and research methods of a special topic within clinical child and pediatric psychology. Topic and instructor may change by semester and will be announced in the Schedule of Classes. May be repeated. (Same as ABSC 706, formerly HDFL 706.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. LEC.

PSYC 710. Feminist Issues in Psychology. 3 Hours.
Detailed examination and discussion of psychological theory and research from a feminist perspective. Specific topics will vary. The goal of the course is to facilitate students’ ability to develop feminist critiques of existing research and theory as well as to generate nonsexist alternative approaches. Open to advanced undergraduates with consent of instructor. Prerequisite: Some familiarity with research methods in the social sciences. LEC.

PSYC 723. Advanced Cognitive Psychology. 3 Hours.
Advanced cognitive psychology reviewing theories of pattern recognition, attention, working memory, language comprehension and problem solving. Emphasis will be placed upon the application of these theories to real-life situations. Prerequisite: PSYC 104 and six additional credit hours in psychology, or permission of the instructor. LEC.

PSYC 725. Cognitive Neuroscience. 3 Hours.
A survey of the critical issues within cognitive and behavioral neuroscience. The course will provide information about neuronal physiology, functional neuroanatomy, and psychophysiological research methods. Human cognition and the neuropsychology that subserves the primary cognitive functions will be discussed. LEC.

PSYC 735. Psycholinguistics I. 3 Hours.
A detailed examination of issues in the processing of language. The course will provide a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processing will be examined. (Same as LING 735.) LEC.

PSYC 737. Psycholinguistics II. 3 Hours.
An in-depth examination of selected topics in psycholinguistics. Topics may include spoken language processing, written language processing,
neurolinguistics, prosody, and syntactic processing. (Same as LING 737.) 
Prerequisite: PSYC 735/LING 735 or consent of instructor. LEC.

PSYC 750. Advanced Seminar in Gender Identity and Sexual 
Orientation. 3 Hours.
Design and execution of research on the causes and consequences of 
variations in gender identity, sexual orientation or affectional preference, 
sex roles, and sex-linked behaviors. Prerequisite: Consent of instructor. 
LEC.

PSYC 757. Theories of Perception. 3 Hours.
A consideration of the facts and theories of human perception. The 
emphasis will be on vision, although hearing, smell, pain, and other 
senses will also be discussed. Of particular concern is the question 
of perceptual modifiability and the response of the human observer to 
unusual sensory environments. Prerequisite: PSYC 104. LEC.

PSYC 774. Advanced Social Psychology I. 3 Hours.
First semester of a two-semester course. Designed to provide a thorough 
background in social psychology and to motivate a continuing exploration 
of theoretical problems and issues in the field. Combines examination 
of historical development of theories and methods in social psychology 
with analysis of theoretical and methodological approaches to a variety of 
contemporary topics. LEC.

PSYC 775. Advanced Social Psychology II. 3 Hours.
A continuation of PSYC 774. LEC.

PSYC 777. Social Psychology: Theory, Research, and Clinical 
Applications. 3 Hours.
Basic theories in social psychology, as well as their applications to the 
process of coping with life events. The focus is on the nature of each 
theory, including the history and more recent developments; however, 
where clinical applications have been made of a particular theory, these 
will be discussed. LEC.

PSYC 780. Research Lab. 1-5 Hours. S.
Supervised research under the guidance of a faculty member in the 
Department of Psychology. Students will be part of a collaborative 
laboratory environment, and will be involved in research design, data 
collection, and data analysis, and will take part in regularly scheduled 
laboratory meetings. Prerequisite: Permission of instructor. LEC.

PSYC 782. Research Methods in Child Language. 3 Hours.
A survey of methods for studying phonological, morphological, syntactic, 
and semantic change during language development. Methods include: 
diary interpretation, language sample analysis, probe elicitation tasks, and 
clinical assessment. (Same as LING 782.) LEC.

PSYC 784. Proseminar in Communication and Aging. 1 Hour.
A weekly forum for students and faculty to discuss professional issues 
and interdisciplinary research in communication and aging. May be 
repeated for credit. (Same as COMS 784.) (Same as SPLH 784.) 
Prerequisite: Consent of instructor. LEC.

PSYC 787. Gerontology Proseminar. 3 Hours.
A proseminar coordinated by the Gerontology Center. The proseminar 
explores essential areas of gerontology for researchers and practitioners, 
providing a multidisciplinary (psychology, biology, sociology, and 
communication) perspective on aging. The proseminar surveys 
contemporary basic and applied research, service programs, and policy 
and management issues in gerontology. (Same as ABSC 787, AMS 767, 
COMS 787, and SOC 767.) (Formerly HDFL 787.) LEC.

Hours.
A course emphasizing the practical application of inferential statistics to 
a variety of research designs and outcome variables. Topics will include 
both parametric and nonparametric statistical procedures, and various 
aplications of both ANOVA and multiple regressions. Prerequisite: 
Graduate standing in the Department of Psychology or consent of 
instructor. LEC.

PSYC 790. Statistical Methods in Psychology I. 4 Hours.
Elementary distribution theory; t-test; simple regression and correlation; 
multiple regression and multiple correlation; curvilinear regression; logistic 
regression; general linear model. Applications across the behavioral 
and social sciences are emphasized. Course consists of three hours of 
lecture and a required one-hour lab session where computing applications 
are taught. Prerequisite: A beginning course in statistics and graduate 
standing, or consent of instructor. LEC.

PSYC 791. Statistical Methods in Psychology II. 4 Hours.
Continuation of PSYC 790. One-way analysis of variance, linear 
trends, contrasts, post hoc tests; multi-way analysis of variance 
for crossed, blocked, nested, and incomplete designs; analysis of 
covariance; repeated measures analysis of variance; general linear 
model. Applications across the social, educational, and behavior 
sciences are emphasized. Course consists of three hours of lecture and 
a required one-hour lab session where computing applications are taught. 
Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 795. Computing and Psychology. 3 Hours.
Introduction to the use of personal computers to facilitate and standardize 
administration of research protocols and to automate data collection. 
Lectures and projects emphasize direct application to research in the 
behavioral sciences. Prerequisite: Graduate standing in the Department 
of Psychology and consent of instructor. LEC.

PSYC 796. Computer Models of Brain and Behavior. 3 Hours.
An introduction to the techniques of computer modeling with applications 
in the study of brain-behavior mechanisms. Early and contemporary 
efforts to simulate the neuron, neural networks, and neural processes 
which regulate behavior, are reviewed. Application of modeling techniques 
in sample brain-behavior problem areas are used to illustrate the 
operation of thresholds, feedback, dynamic equilibrium, redundancy, 
plasticity, network structure, and similar constructs. Programming skill in 
a high-level language available on personal computers or mainframe is 
required. Prerequisite: EECS 128 or EECS 138 or PSYC 795, and PSYC 
370, or equivalent courses or experience. LEC.

PSYC 798. Introduction to Mathematical Methods in Psychology. 3 
Hours.
A first course in scaling and modeling psychological processes. 
Substantive areas treated selected from sensation, perception, learning, 
memory, preference, choice and decision processes, problem solving, 
games, social interaction, and individual differences. May be repeated 
with permission. Prerequisite: Previous course work beyond the 
introductory level in psychology or a closely related area, a course in 
statistics, and a course in calculus. LEC.

PSYC 799. Proseminar in Child Language. 2 Hours.
A review and discussion of current issues in children's language 
acquisition. May be repeated for credit. Students are graded S/F. (Same 
as ABSC 797, LING 799, and SPLH 799.) (Formerly HDFL 797.) LEC.

PSYC 800. Experimental Psychology: _____, 3 Hours.
An advanced survey of theory and research in a selected area of 
experimental psychology. Continual enrollment for four semesters is 
required of entering graduate students in experimental psychology. Open 
to other students with graduate standing in psychology or a closely related 
field. May be repeated with permission. LEC.
PSYC 802. Social-Psychological Aspects of Health, Disability, and Associated Life Stress. 3 Hours.
Disabling myths; perception of causes and effects of disease and disability; attitudes and interpersonal relations; hoping, coping, and reality issues; values; professional-client relations; public media and societal rehabilitation. A departmental core course for graduate students. LEC.

PSYC 803. Fundamentals of Psychological Assessment and Intervention with Children. 3 Hours.
Lecture and supervised experience covering the theoretical and empirical literature on assessment and intervention methods for children, adolescents, and families. Students will learn and demonstrate evidence-based clinical interviewing skills, behavioral observation techniques, risk assessment techniques, therapeutic communication approaches, strategies for providing assessment feedback to families, and ethical principles related to the provision of assessment and psychotherapy (including client file and resource management.) The course requires interaction with clinical populations and communication with referral sources. (Same as ABSC 803.) Prerequisite: Graduate student in clinical child psychology program. LEC.

PSYC 805. History of Psychology. 3 Hours.
A historical survey of basic concepts and theories in psychology with emphasis on their relationship to contemporary problems in theory. LEC.

PSYC 809. Professional Issues: Clinical Child Psychology. 1 Hour.
Consideration of special problems confronting the child and family oriented scientist-practitioner, and in the development of a professional identity. Topics include critical issues including ethical, legal, cultural, empirical, and clinical aspects of research and practice. May be repeated. (Same as ABSC 809, formerly HDFL 809.) Prerequisite: Graduate standing in clinical child psychology. LEC.

PSYC 811. Achievement and Intellectual Assessment in Clinical Child Psychology. 3 Hours.
Course covers the basic theory, research, administration, and reporting of psychological assessment of development, intelligence, and achievement for children, adolescents, and adults within cultural and developmental contexts. The range of psychological instruments examined includes, for example, WIAT, K-ABC, W-J, S-B, WISC, WAIS, and WPPSI. (Same as ABSC 811.) Prerequisite: Graduate student in clinical child psychology. LEC.

PSYC 812. Behavioral and Personality Assessment of Children. 3 Hours.
Lecture, laboratory, field work, and supervision appointment. Theory and applications in the psychological evaluation of children with standardized assessment techniques. The administration, scoring, interpretation, and reporting of behavioral and personality functioning in children. (Same as ABSC 812, formerly HDFL 812.) Prerequisite: Graduate standing in clinical child psychology. LEC.

PSYC 814. Advanced Child and Family Assessment. 3 Hours.
Lecture, laboratory, field work, and supervision appointment. Supervised experience in specialized psychological assessment approaches for children and families. Emphasis on interviewing, observation, psychometric scales, and consultation. Rationale, administration, analysis, and reporting of mental health functioning of children and families. Experience with clinical populations, and communication with referral sources. (Same as ABSC 814, formerly HDFL 814.) Prerequisite: Graduate student in clinical child psychology. LEC.

PSYC 815. Design and Analysis for Developmental Research. 3 Hours.
Coverage of the philosophy and basic principles of group-design research, with a special emphasis on designs that are appropriate for developmental studies. Designs for both experimental and quasi-experimental research are covered, and appropriate statistical procedures are presented concomitantly with the designs. Individual-difference analyses and statistical control issues are also addressed. LEC.

PSYC 816. Design and Analysis for Neuroimaging Research. 3 Hours.
Course covers research design and analysis issues for event-related potential (ERP) and functional magnetic resonance imaging (fMRI) studies. Repeated measures, statistical parametric mapping, principal components analysis, and independent components analysis techniques are covered. Both practical and theoretical aspects of these statistical techniques will be explored in Matlab environment. Matrix algebra recommended but not required. Prerequisite: PSYC 790 and 791 or equivalent are required. LEC.

PSYC 818. Experimental Research Methods in Social Psychology. 3 Hours.
Systematic discussion of the techniques of research in social psychology, with practice in the utilization of selected methods. Prerequisite: One course in social psychology in addition to introductory social psychology. LEC.

PSYC 819. Field and Evaluation Research Methods in Social Psychology. 3 Hours.
Basic principles and practices of field methods in basic and applied research in social psychology and related fields; relationships between field and laboratory studies; special emphasis on survey and evaluation research methods and study designs; client and respondent relationships; research and public policy. LEC.

PSYC 820. Advanced Child Development. 3 Hours.
A survey of the basic empirical research in the field of child development, covering intelligence, cognition, perception, attention, personality, social behavior, and socialization processes. These literatures are integrated and their implications for social application are addressed. (Same as ABSC 820, formerly HDFL 820.) Prerequisite: A course in child development or equivalent. LEC.

PSYC 821. Women and Violence. 3 Hours.
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. Research on the nature, prevalence, causes, and consequences of violence against women is discussed. (Same as WGSS 821.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor. LEC.

PSYC 825. Social Development. 3 Hours.
A lecture and discussion course in social development. It includes such topics as theoretical approaches to the study of social development, as well as the literature on family processes, peer relations, aggression and prosocial behavior, child abuse and neglect, family violence, child care, and the media. (Formerly PSYC 880.) (Same as ABSC 825.) Prerequisite: A course in child psychology or development. LEC.

PSYC 831. Advanced Human Learning and Memory. 3 Hours.
An in-depth analysis of current research and theory. Focus will be on experimental methodology in these areas. LEC.

PSYC 832. Clinical Health Psychology I: Health Promotion and Disease Prevention. 3 Hours.
An overview of the field of health psychology as applied to health promotion and disease prevention. Content areas include history and current research regarding behavioral and psychosocial risk factors for disease, as well as empirically supported assessment and therapeutic techniques for risk factor reduction and health promotion. Prerequisite:
Graduate student in psychology or health-related fields, or permission of instructor. LEC.

PSYC 833. Clinical Health Psychology II: Acute and Chronic Illness. 3 Hours.
An overview of the field of health psychology as applied to acute and chronic illness in adult, adolescent, and child populations. Content areas include psychosocial aspects of acute and chronic illness, including relevant empirically supported assessment and intervention strategies, adherence to medical regimens, pain, and enhancement of the psychologist's role in medical settings. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor. LEC.

PSYC 834. Clinical Health Psychology III: Physical Aspects of Health and Disease. 3 Hours.
An overview of physical manifestations of health and disease. Content areas include overview of anatomy and physiology of each body system, description of how deviations form normal anatomical development and physiological function result in common disorders, methods for distinguishing psychological from organic etiologies, indications of side effects of medications for common disorders, and description of roles of key members of health care team members. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor. LEC.

PSYC 835. Clinical Practicum IV: Health. 3 Hours.
Supervised assessment and treatment of individuals and families within a medical setting, as well as multidisciplinary consultation. Inpatient and outpatient clinical health psychology rotations may include pediatrics, oncology, pain, rehabilitation, and other health psychology related fields. Emphasis in selection of and training in psychological intervention strategies is on the use of empirically supported treatments where possible. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 970 and graduate student in clinical health psychology specialty. FLD.

PSYC 836. Clinical Practicum V: Health. 3 Hours.
Continuation of PSYC 835. Prerequisite: Graduate student in clinical health psychology specialty. FLD.

PSYC 838. Pain and Its Management. 3 Hours.
Focuses on biological, cognitive/affective, and social causes and effects of pain. Emphasis on basic research methods in pain, origins of pain, and how the experience of pain alters many aspects of the individual's life. Topics include anatomy and physiology of pain, impact of pain on a variety of aspects of individuals' lives, treatments for pain, and the role of various health care professionals in treating pain. Discussions also will include basic research methods in pain, tools for assessing pain, barriers to adequate pain management, and ethical/legal/public policy issues in working with pain patients. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor. LEC.

PSYC 839. Palliative Care in Health Psychology. 3 Hours.
Based on the biopsychosocial model, this course focuses on the current practice of palliative care in community and hospital settings by health care professionals. Classes will be discussion based, centered on current issues and controversies in care of the chronically ill and dying. Recent research will be highlighted, as will cultural perspectives on death. Students will be expected to identify applicable literature for presentation and class discussion, along with assigned readings. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor. LEC.

PSYC 840. Psychology of Women's Health. 3 Hours.
A seminar devoted to examination of psychosocial and behavioral factors in women's health. Content areas include women and the health care system, social roles and health, gender differences, and similarities in morbidity and mortality, gynecologic health, chronic diseases, and health-related behaviors. Prerequisite: Graduate student in psychology or health-related field, or by permission of instructor. LEC.

PSYC 841. Stress and Coping. 3 Hours.
Theories and research on conceptualization, assessment, and effects of stress. Focus on coping processes and other determinants of adjustment to stressful conditions. Discussion of psychological interventions for managing stress and trauma. Prerequisite: Graduate student in psychology or related fields. LEC.

PSYC 842. Specialized Health Psychology Practicum. 1-3 Hours.
Specialized advanced practicum in clinical health psychology, with an area of emphasis mutually defined by student and instructor. Prerequisite: Consent of instructor. FLD.

PSYC 843. Behavioral Pharmacology. 3 Hours.
Addresses psychological and behavioral effects of drugs, including psychotropic medications. A central theme is that effects of drugs frequently cannot be characterized solely from a pharmacological perspective. Thus, emphasis will be placed on examining the interaction of pharmacological and behavioral variables. For example, how do psychological factors moderate responses to drugs? The nature of this area assumes some knowledge of general psychology, research methods, biology, chemistry, neurophysiology, and the nervous system. Specific course structure will be modified to suit student interests. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor. LEC.

PSYC 844. Mental Health and Aging. 3 Hours.
Reviews recent research and application in the field of mental health and aging. Theoretical perspectives appropriate for understanding mental health issues with increased age are discussed. The epidemiology, assessment, diagnosis, and treatment methods associated with a variety of mental health conditions are surveyed. The community mental health resources available for older adults are discussed as well as practically-related issues such as evaluations of functional independence and competency among older adults. Prerequisite: Graduate student in psychology or related health field, or permission of instructor. LEC.

PSYC 845. Impression Formation and Interpersonal Behavior. 3 Hours.
Intensive investigations of the processes involved in impression formation and of the effects of established impressions upon interpersonal communications. (Same as COMS 835.) Prerequisite: PSYC 670 or COMS 535. LEC.

PSYC 846. Practicum in Clinical Child Psychology I. 1-3 Hours.
Introductory practicum experience for the Clinical Child Psychology Program. Orientation to psychological evaluation and treatment of children, adolescents, and their families and initial development of professional self-assessment skills. Students acquire specific clinical competencies through shadowing cases, assisting with interpretation of test of intelligence and academic achievement, conducting behavioral observations in field settings, and performing co-therapy of cases presenting to the KU Child and Family Services Clinic. May be taken in more than one semester. (Same as ABSC 846.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. FLD.

PSYC 847. Practicum in Clinical Child Psychology II. 1-3 Hours.
Intermediate practicum experience for the Clinical Child Psychology Program. Development of specific competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire specific clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services
Clinic. Students develop ability to identify specific treatment goals and select therapeutic interventions that are conceptually congruent with clients’ presenting problems and are based on sound empirical evidence. Students also develop the ability to integrate and synthesize test results, interview material, and behavioral observations into coherent case conceptualizations. May be taken in more than one semester. (Same as ABSC 847.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. FLD.

**PSYC 850. Assessment I: Foundations of Psychological Assessment. 3 Hours.**
Introduction to the history, methods and theory underlying psychological assessment techniques and methods. Students learn to administer, score, and interpret mental status exams and intelligence tests for children, adolescents and adults. Structured diagnostic assessments are introduced and practiced. Psychological report writing is introduced and practiced. The psychometric theory underlying the construction and validation of personality assessment instruments is reviewed. Prerequisite: Graduate student in clinical psychology or consent of instructor. FLD.

**PSYC 853. Advanced Acoustical and Psychological Aspects of Musical Behavior. 3 Hours.**
Study and experimental investigation of acoustic, psychoacoustic, and psychological phenomena as they influence music. Attention will be given to physical parameters; perception of pitch, loudness, and timbre; magnitude estimation; theories of consonance; experimental aesthetics; and measurement and prediction of musical ability. Each student will be expected to complete an experiment or quasi-experiment related to human musical behavior. (Same as MENT 953.) Prerequisite: PSYC 453 or equivalent; or consent of instructor. LEC.

**PSYC 855. Assessment II: Integrative Psychological Assessment. 3 Hours.**
Lecture, laboratory and field work. Students learn to administer, score and interpret various personality assessment instruments. Students apply skills acquired in previous coursework to write integrated psychological assessment reports based on anamnesis, structured interview data, intelligence tests, and both objective and projective personality assessment instruments. Prerequisite: PSYC 850 or consent of instructor. FLD.

**PSYC 863. Clinical Neuropsychology Across the Lifespan. 3 Hours.**
Reviews neural development and the brain-behavior relationships in intact, injured, and diseased brain systems. Details basic issues in clinical assessment and reporting of cognitive impairment resulting from developmental disorders, stroke, traumatic brain injury, and brain-disease. Selected topics include perception, speech, memory/dementia, judgment, and attention. Prerequisite: Graduate status and PSYC 961 or consent of instructor. LEC.

**PSYC 864. Clinical Neuropsychology. 3 Hours.**
Brain-behavior relationships in humans; structure and function of the brain; evaluation of function; the interpretation of neuropsychological data. Lecture and laboratory. LEC.

**PSYC 865. Advanced Psychological Assessment: Interview Based Techniques. 3 Hours.**
Lecture and fieldwork. Advanced clinical interviewing. Structured diagnostic interviewing. Coverage of specialized areas of clinical interviewing (e.g., motivational interviewing). Report writing focused on documentation of clinical and structured interviewing. Prerequisite: PSYC 855 or consent of instructor. FLD.

**PSYC 870. Cognitive Development. 3 Hours.**
A lecture/discussion course in cognitive development. The course will contrast the theory and research of Jean Piaget and his followers, with an information processing or cognitive psychology approach to issues. Topics include development of perception, attention and information getting; memory and metamemory; problem solving; discrimination learning and concept formation; and individual differences in cognitive styles and strategies. Prerequisite: A course in child psychology or development, a course in cognitive psychology, or consent of instructor. LEC.

**PSYC 872. Attention, Perception, and Learning in Infancy. 3 Hours.**
Coverage of the basic literatures on perceptual-cognitive behavior during the first three years of life, as assessed by measures of attention, perception, learning, and memory. Course material is approached from an information-processing framework. LEC.

**PSYC 875. Advanced Assessment: Integration of Assessment Techniques. 3 Hours.**
Lecture and fieldwork on selection, administration, scoring and interpretation and integration of data from personality and abilities tests. Focus on assessments includes history, theory and application in psychological assessment batteries. Emphasis on advanced training in objective personality assessment, projective personality assessment, psychometric theory and integrated report writing. Prerequisite: PSYC 855 or consent of instructor. FLD.

**PSYC 879. Applied Nonparametric Statistical Methods. 4 Hours.**
This course covers nonparametric statistical methods for testing hypotheses when the assumptions of ordinary parametric statistics are not met. Topics include a review of parametric statistics, sampling distributions, the logic of hypothesis testing, and motivations for using nonparametric techniques. In-depth coverage will be given to distribution-free procedures, sign tests, contingency tables, median tests, chi-square and other goodness-of-fit tests, rank correlations, randomness tests, Monte Carlo methods, resampling methods, tests of independence, 1-sample, 2-sample, and k-sample methods, permutation tests, and function smoothing and splines. There will be an emphasis on the theory underlying nonparametric methods. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 and 791 or equivalent, or consent of instructor. LEC.

**PSYC 881. Proseminar in Quantitative Behavioral and Social Sciences. 1 Hour.**
This course is an open forum discussion of issues, topics, and presentations in quantitative behavioral and social sciences. The course can be repeated for credit and is open to any graduate student in any discipline across the behavioral and social sciences. SEM.

**PSYC 882. Theory and Method for Research of Human Environments. 3 Hours.**
Conceptual and technical methods for analysis of behavioral environments; theory and research utilization of behavior settings and other ecobehavioral units. Prerequisite: Nine hours of social science including at least one course dealing with research methods and consent of instructor. LEC.

**PSYC 885. Altruism and Helping Behavior. 3 Hours.**
Review of contemporary research of prosocial behavior. Topics to be covered include the existence of altruism, why people do and do not help others, and the effect of institutional roles on the behavior of service professionals such as therapists, counselors, and social workers. LEC.
PSYC 886. Item Response Theory. 4 Hours.
This course covers the basic concepts and methods of item response models. Focal topics include the theory underlying IRT models and their general properties. Also covered are methods for checking model assumptions and interpreting IRT estimates. The course uses examples from the social and behavioral sciences to demonstrate how IRT methods can be used to inform and refine survey development, to assess measurement equivalence, link survey scores, and build item banks for short forms or computer-adaptive testing (CAT). Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 and 791 or equivalent, or consent of instructor. LEC.

PSYC 887. Factor Analysis. 4 Hours.
This course covers the theory behind, and application of, exploratory factor analysis. Topics include a review of multiple linear regression and matrix algebra. In-depth coverage is devoted to diagrams, model specification, goodness of fit, model selection, parameter estimation, rotation methods, scale development, and sample size and power issues. Extensions to confirmatory settings are elaborated. Both the theory underlying factor analytic techniques and hands-on application using software are emphasized. Applications across the social and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 888. Diversity Issues in Clinical Psychology. 3 Hours.
Review of individual differences pertaining to culture, ethnicity, race, gender, sexual orientation, age, etc., as these have an impact upon theory, research, assessment, and treatment issues in clinical psychology. (Same as ABSC 888.) Prerequisite: Graduate status in clinical psychology, or instructor permission. LEC.

PSYC 889. Conceptual Issues in Human Sexuality. 3 Hours.
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as WGSS 889.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor. LEC.

PSYC 891. Intelligence and Cognition. 3 Hours.
This course concerns the nature of intelligence. Theory and research on cognitive abilities, reasoning, and complex problem solving are surveyed. Special emphasis is given to contemporary cognitive ability research that applies both experimental and correlation methods to understand the nature of intelligence. LEC.

PSYC 892. Test Theory. 4 Hours.
This course begins with recommendations for how to write a test (with or without correct answers, for assessing a wide variety of constructs of interest in social and behavioral sciences), covers basics of classical test theory, and then emphasizes modern statistical methods for analyzing item data. Methods include factor analysis of categorical responses, methods for identifying measurement invariance (differential item functioning), and item response theory. Lectures and Laboratory. This course is offered at the 600 and 800 levels, with additional assignments at the 800 level. Prerequisite: PSYC 790/650 or equivalent, or consent of instructor. LEC.

PSYC 893. Multivariate Analysis. 4 Hours.
Introduction to the central methods used in the analysis of multivariate data. Includes linear transformations, multivariate analysis of variance, multivariate multiple regression, discriminant analysis, canonical correlation, factor analysis, and an introduction to methods for clustering and classification. Applications across the behavior and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 894. Multilevel Modeling. 4 Hours.
Statistical methods for modeling multilevel (hierarchically structured) data. Topics include a review of ordinary least squares regression analysis, random effects ANOVA, intraclass correlation, multilevel regression, testing and probing interactions, maximum likelihood estimation, model assumptions, model evaluation, and the analysis of longitudinal data. There will be a heavy emphasis on the theory underlying multilevel modeling techniques and hands-on application using software. Applications across the social, educational, and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 895. Categorical Data Analysis. 4 Hours.
Multivariate analyses of count data. Error models, statistical inference, loglinear models, logit models, logistic regression. Homogeneity, symmetry, and selected other topics. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 896. Structural Equation Modeling I. 4 Hours.
Introduction to statistical methods for modeling latent variables. Topics include a review latent variables, covariance structures analysis, mean structures analysis, confirmatory factor analysis (CFA), structural equation modeling (SEM), multiple group CFA, longitudinal CFA, longitudinal SEM, Hierarchical CFA, and Multi-trait Multi-Method SEM. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 897. Master's Thesis in Clinical Child Psychology. 1-10 Hours.
Supervised research experience completing thesis leading to master's degree. (Same as ABSC 897.) RSH.

PSYC 898. Proseminar: Professional Issues in Clinical and Health Psychology. 1 Hour.
Discussion of current theoretical, empirical, and applied issues in clinical and clinical health psychology involving students, faculty, guest speakers. Prerequisite: Graduate status in clinical psychology. RSH.

PSYC 899. Thesis. 1-10 Hours.
Graded on a satisfactory/unsatisfactory basis. THE.

PSYC 902. Proseminar in Experimental Psychology. 1 Hour.
Seminar in experimental psychology to be conducted in rotation by experimental psychologist. LEC.

PSYC 903. Proseminar in Social Psychology. 1 Hour.
A series of research talks on topics relevant to social and personality psychology featuring different weekly speakers from inside and outside the university. SEM.

PSYC 905. Psychopathology in Children. 3 Hours.
Diagnosis and treatment of psychological problems in childhood and adolescence. (Same as ABSC 905.) Preference given to graduate students in child clinical psychology, school psychology, and counseling
psychology. Prerequisite: Fifteen hours of graduate credit in psychology or consent of instructor. LEC.

PSYC 921. Seminar in Early Development. 3 Hours.
A seminar devoted to factors affecting early human development with some attention to theoretical formulations and the relevant animal literature. LEC.

PSYC 923. History and Systems of Developmental Psychology: Developmental Theory. 3 Hours.
An intensive study of traditional and recent developmental theories with an emphasis upon the role of heredity, early stimulation, reinforcement, and modification as each affects the course of the development of children. LEC.

PSYC 927. Seminar in Psychobiology. 3 Hours.
A detailed study of a specific research area dealing with the biological foundations of behavior. Each week articles will be assigned from the journal literature. LEC.

PSYC 930. Research Seminar on Intimate Relationships. 3 Hours.
Consideration of current psychological theory and research on adult intimate relationships: friendship, dating, committed relationships, dissolution of committed relationships. Students will be expected to be involved in on-going empirical research in the area. Prerequisite: Graduate level courses in research design and statistics. LEC.

PSYC 933. Seminar: The Measurement of Attitudes. 3 Hours.
An examination of the concept of attitude and the methods developed to assess the various aspects of attitudes. Prerequisite: PSYC 578 or consent of instructor. LEC.

PSYC 935. Seminar in Group Dynamics. 3 Hours.
Intensive examination of selected problems in the functioning of small groups. May be taken for two semesters. LEC.

PSYC 936. Group Therapeutic Techniques. 3 Hours.
LEC.

PSYC 943. Advanced Practicum in Clinical Child Psychology III. 1-3 Hours.
Advanced practicum experience for the Clinical Child Psychology Program. Development of advanced competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., formal case presentation), and modeling of clinical competencies for junior students. Students will demonstrate the ability to implement empirically derived therapeutic interventions in consideration of individual differences, cultural values, and individual preferences. Students in external practicum sites will demonstrate an understanding of evidence-based models of consultation and provision of consultation to care providers in professional contexts. May be taken in more than one semester. (Same as ABSC 943.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. FLD.

PSYC 944. Advanced Practicum in Clinical Child Psychology IV. 1-3 Hours.
Advanced practicum experience for the Clinical Child Psychology Program. Demonstration of advanced competencies in assessment, intervention, and consultation with children, adolescents, and their families through didactics, field experience, and supervision in the semester(s) prior to required clinical internship. Students demonstrate advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., integrated case presentation), and modeling of clinical competencies for junior students. Course requirements include the development of portfolios for demonstration of clinical competencies and application to clinical internships. May be taken in more than one semester. (Same as ABSC 944.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. FLD.

PSYC 946. Theories and Methods of Psychotherapy. 3 Hours.
Comparative examination and analysis of major theories and approaches to psychotherapeutic interventions, core principles of therapeutic change, scientific approaches to establishing treatment efficacy, current intervention issues. Prerequisite: Nine hours in graduate clinical psychology or consent of instructor. LEC.

PSYC 947. Advanced Practicum in Clinical Child Psychology V. 1-5 Hours.
Specialized practicum experience for the Clinical Child Psychology Program. Demonstration of advanced competencies related to supervision and consultation in clinical psychology. With faculty supervision, students will develop and demonstrate the ability to provide effective supervision to less advanced students in the program in selected cases appropriate to the service setting. Further development of advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum, and modeling of clinical competencies for junior students. May be taken in more than one semester. (Same as ABSC 947.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. FLD.

PSYC 949. Empirically Supported Treatment. 3 Hours.
This course provides an overview of theoretical and applied issues germane to the contemporary empirically supported treatments movement in clinical psychology. The course will include an in-depth examination of several psychotherapy protocols (e.g., cognitive therapy for depression) which have been identified as “empirically supported,” with considerable attention accorded to implementation of the characteristic techniques of such interventions. LEC.

PSYC 950. Clinical Supervision and Consultation: Theory & Research. 1 Hour.
Lecture, readings, and discussion of theory and research related to the practices of clinical supervision and consultation. Developmental and competency based approaches to supervision with exposure to other approaches. Professional issues, ethics, and multicultural aspects of supervision and consultation. Prerequisite: Previous or concurrent enrollment in PSYC 969 or consent of instructor. LEC.

PSYC 951. Clinical Supervision Practicum. 1-3 Hours.
Fieldwork in supervision under direction of instructor. Practice in supervision of clinical work, assessment, psychotherapy, and documentation. Prerequisite: Previous or concurrent enrollment in PSYC 950 and PSYC 969, or consent of instructor. FLD.

PSYC 955. Close Relationships and Adult Attachment: Theory, Research, and Current Controversies. 3 Hours.
Review of attachment theory literature and the research it has generated in clinical developmental, personality, and social psychology. The course will allow discussion of a wide range of issues including the evolution of behavioral systems that underlie close human relationships, the developmental roots of relational styles and affect-regulation processes, the role of mental representations in interpersonal behavior, and some of the attachment and close relationship processes involved in good and poor mental health. Prerequisite: Graduate standing or consent of instructor. LEC.
PSYC 956. Social Neuroscience. 3 Hours.
Acquaint students with the Social Neuroscience approach as well as recent findings using this approach. The course will focus on particular social phenomena and (a) evaluate the utility of current social neuroscience research examining these phenomena and (b) consider future experimental designs using the Social Neuroscience approach to further inform our understanding of each phenomenon. After being acquainted with foundational concepts, students will analyze findings in a number of core content domains (including emotions, emotion regulation, self, stereotyping, attitudes and beliefs, social decision making, cooperation, close relationships), focusing on neuroscience's contribution beyond traditional methods. Prerequisite: Graduate standing or consent of instructor. LEC.

PSYC 960. Advanced Psychopathology. 3 Hours.
Review of current nosology of adult psychopathological syndromes emphasizing development of diagnostic skills. Critical survey of recent research and theory related to the etiology, course, prognosis, and treatment of adult psychopathological conditions. Prerequisite: Graduate student status in clinical psychology, clinical child psychology, or counseling psychology. LEC.

PSYC 961. Biological Foundations of Psychopathology. 3 Hours.
A review of fundamental topics in the neurosciences and their relevance to selected psychopathological disorders. The fundamental topics are taken from genetics, neuroanatomy, neurophysiology, and neurochemistry. The disorders include schizophrenia, depression, anxiety disorders, Alzheimer's disease, Parkinson's disease, and Huntington's disease. Prerequisite: Graduate student in clinical psychology or consent of instructor. LEC.

PSYC 962. Advanced Personality. 3 Hours.
A survey of selected advanced topics in the area of personality. Includes review of theoretical and research issues in the area of personality. Prerequisite: Consent of instructor. LEC.

PSYC 963. Clinical Child Psychology Internship. 1 Hour.
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved clinical psychology field setting; supervision by qualified clinical child psychology faculty and field staff clinicians. Required of all clinical child psychology program students. An intensive guided experience in application of clinical child psychology theory, methods, and practices. Integrates scientific and clinical aspects of field. (Same as ABSC 963, formerly HDFL 963.) Prerequisite: Completion of Ph.D. comprehensive examinations and permission of clinical psychology faculty. LEC.

PSYC 964. Clinical Practicum I. 3 Hours.
Lecture, laboratory and field work, and supervision appointment. Psychological evaluation and treatment of individuals, couples, families, and groups; supervised, progressive experience in psychological treatment and in the clinical evaluation of intellectual, personality, and social functioning. Emphasis in selection of and training in psychological intervention strategies is on the use of empirically supported treatments where possible. Grading on Satisfactory/Fail basis. Prerequisite: Graduate student in clinical psychology program. LEC.

PSYC 965. Clinical Practicum II. 3 Hours.
A continuation of PSYC 964. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 964. LEC.

PSYC 966. Clinical Practicum III. 3 Hours.
A continuation of PSYC 964. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 964 or permission of instructor. LEC.

PSYC 967. Psychotherapy with Families. 3 Hours.
Clinical approaches to marriage and family therapy. Intensive consideration of the theoretical positions, research findings, clinical methods, and technical problems in marriage and family therapy. Prerequisite: PSYC 946. LEC.

PSYC 968. Research Methods in Clinical Psychology. 3 Hours.
Systematic consideration of research methods in clinical psychology including identification of a research problem, selection of the research design and assessment strategies, and methods of evaluating the results. The principles, pitfalls, artifacts, biases, and sources of controversy in research in this area are also covered. Prerequisite: Graduate standing in clinical or counseling psychology. LEC.

PSYC 969. Clinical Practicum IV. 3 Hours.
A continuation of PSYC 969. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 969 or consent of instructor. LEC.

PSYC 970. Clinical Practicum V. 3 Hours.
A continuation of PSYC 970. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 970 or consent of instructor. LFD.

PSYC 974. Clinical Psychology Internship. 1-3 Hours.
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved clinical psychology field setting; supervision by clinical psychology faculty and field staff clinical psychologists. Required of all clinical psychology program students. An intensive guided experience in the application of clinical psychology theory, methods, and practices. An emphasis upon the relationships between scientific and clinical functions. Integrations between research and clinical practice. Prerequisite: Completion of Ph.D. comprehensive examinations and consent of clinical psychology faculty. LEC.

PSYC 975. Professional and Ethical Problems in Clinical Psychology. 3 Hours.
Interprofessional relationships, case security, legal aspects, ethical code of practice, clinic administration, and problems in the clinical practice of psychology. Issues involving ethics in research will also be explored. Prerequisite: Consent of instructor. LEC.

PSYC 976. Therapeutic Interventions with Children. 3-5 Hours.
Clinical approaches to the therapeutic treatment of children with special emphasis on research findings and laboratory (practicum) experience. A survey of relationship therapies, operant strategies, system approaches, parent education and play therapy by the right therapist for a specific child with a particular problem. (Same as ABSC 976.) Prerequisite: Instructor permission. LFD.

PSYC 977. Specialized Clinical Practicum. 1-4 Hours.
Lecture; laboratory and field work, and supervision appointment. Specialized psychological services for the evaluation and/or treatment of the individual client or the group or the institution. Investigation of and experience in a special practicum area not covered in regular courses. Prerequisite: Students must consult with members of the clinical faculty and propose an acceptable project in advance of enrollment. LFD.

PSYC 980. Special Problems in Psychology. 1-5 Hours.
Investigation of a special research problem or directed reading in an area not covered in regular courses. Prerequisite: Consent of instructor. RSH.
PSYC 981. Teaching Psychology. 1 Hour.
Discussion of the problems and techniques of teaching psychology at the undergraduate level. A minimum of one credit of this course must be taken by all assistant instructors during the two semesters of the first year of their appointment in the department. Only three hours may count toward the Ph.D. degree. LEC.

PSYC 982. Issues in Scientific Conduct. 3 Hours.
Lectures and discussion on issues in the conduct of a scientific career, with emphasis on practical topics of special importance in behavioral science. Topics will include the academic and scientific roles of behavioral scientists, establishing a research lab, communicating research findings, tenure processes, gender equity, ethical conduct, and good scientific citizenship. Discussions will highlight important case studies. (Same as SPLH 982.) LEC.

PSYC 983. Methodology. 3 Hours.
Inferential problems in experimental psychology. Prerequisite: PSYC 790 and PSYC 791 or consent of instructor. LEC.

PSYC 984. Missing Data Analysis. 3 Hours.
The primary goal of the course is to promote a solid understanding of the logic and implementation of modern missing data techniques. The following topics are included: missing data theory, traditional missing data techniques, maximum likelihood estimation, EM algorithm, multiple imputation, planned missing data designs, and techniques for missing not at random data. Students will learn how to implement the missing data techniques in SAS, Mplus and R. Prerequisite: PSYC 790 and PSYC 896. LEC.

PSYC 988. Modeling of Intraindividual Observations. 4 Hours.
Many statistical methods are apt for modeling cross-sectional data or growth processes. These methods are often not ideal for researchers collecting intensive intra-individual observations, such as those from diary studies, ecological momentary assessments, and physiological data, which often exhibit complex, nonlinear changes over time. This course examines methods for extracting information from intensive intra-individual observations. This class will survey methods and concepts from areas such as dynamical systems, chaos theory, time series analysis and differential equation modeling. Some prior experience with R or related language strongly encouraged. Some prior experience with R or related language strongly encouraged. Prerequisite: PSYC 790 or equivalent and a course in Structural Equation Modeling or Multilevel Modeling (Hierarchical Linear modeling, Mixed Models.) LEC.

PSYC 990. Methods for Clustering and Classification. 3 Hours.
Statistical methods for identifying classes, clusters, and taxa. Topics include k-means, discriminant analysis, hierarchical clustering algorithms, additive trees, neural network models for clustering, latent class models, finite mixture models, and models for skills/cognitive diagnosis. Applications across the social and behavioral sciences are emphasized. Prerequisite: PSYC 790 and PSYC 791 or equivalent, or consent of instructor. LEC.

PSYC 991. Longitudinal Data Analysis. 3 Hours.
Reviews and contrasts various statistical methods for the analysis of change. Course focuses on various techniques to analyze longitudinal (repeated-measures) data beyond the repeated-measures ANOVA framework. Techniques covered included latent change scores, latent difference scores, individual-differences modeling of latent residual and change scores, intra-individual differences modeling (e.g., growth curve, mixed modeling) and growth mixture modeling. Applications across the behavioral and social sciences are emphasized. Prerequisite: PSYC 896 or equivalent, or consent of instructor. LEC.

PSYC 993. Seminar: ______. 1-5 Hours.
LEC.

PSYC 996. Structural Equation Modeling II. 3 Hours.
Continuation of PSYC 896. Advanced applications of modern methods for testing hypotheses on multivariate correlational data in the behavioral and social sciences. Topics include advanced confirmatory factor analysis, mediation and moderation among latent variables, latent growth curve modeling, and other latent variable mean and covariance structures analysis techniques. Applications across the behavioral and social sciences are emphasized. Prerequisite: PSYC 896 or equivalent, or consent of instructor. LEC.

PSYC 998. Doctoral Dissertation in Clinical Child Psychology. 1-10 Hours.
Research experience making original contribution to literature in clinical child psychology. (Same as ABSC 998, formerly HDFL 998.) THE.

PSYC 999. Dissertation. 1-12 Hours.
Graded on a satisfactory/unsatisfactory basis. THE.

Bachelor of Arts and Bachelor of General Studies in Psychology

Why study psychology?
Because the understanding of mind, behavior, and the human experience is best achieved through the rigorous application of the scientific method.

Admission to the Major

Admission Requirements

Application term
Students should apply to the major during the semester in which major admission criteria will be completed; normally no later than 60 hours, or for transfer students, normally during the initial term at KU. Application to this major after completion of 60 hours, or the initial KU term for transfer students, will likely delay graduation.

Courses Required

Orientation Seminar in Psychology Satisfied by:
PSYC 102 Orientation Seminar in Psychology 1

General Psychology. Satisfied by:
PSYC 104 General Psychology 3
or PSYC 105 General Psychology, Honors 3

Research Methods in Psychology or Statistics in Psychological Research. Satisfied by one of the following:
PSYC 200 Research Methods in Psychology 3
or PSYC 201 Research Methods in Psychology, Honors 3
PSYC 210 Statistics in Psychological Research 3
or PSYC 211 Statistics in Psychological Research, Honors 3

Core Psychology Course. Satisfied by one of the following: 3
PSYC 318 Cognitive Psychology
or PSYC 319 Cognitive Psychology, Honors
PSYC 333 Child Development
or PSYC 334 Child Development, Honors
PSYC 350 Abnormal Psychology
or PSYC 351 Abnormal Psychology, Honors
PSYC 360 Social Psychology
Bachelor of Arts and Bachelor of General Studies in Psychology

Admission GPA
A minimum 2.5 GPA is required in all courses listed above that have been completed at the time of application to the major. University Course Repeat Policy will apply.

The undergraduate advisory committee evaluates applications. Students providing documentation of meeting the criteria are admitted when they apply. Faculty members are aware of the dangers associated with relying solely on grade-point average in selecting students. The department is committed to promoting cultural diversity in its programs, and the undergraduate advisory committee is guided by principles of affirmative action.

Requirements for the B.A. or B.G.S. Major
B.A. or B.G.S. Major in Psychology

Psychology Major Course Requirements

Psychology Prerequisite or Co-Requisite Knowledge (3)
Majors must complete courses as specified in each of the following area. These hours do not contribute to the minimum number of hours required for the major.

College Algebra or Pre-Calculus. Satisfied by:
MATH 101 College Algebra
or MATH 104 Precalculus Mathematics

Psychology Core Knowledge and Skills (25)
Majors must complete a course in each of the following 9 areas:
Orientation Seminar in Psychology. Satisfied by:
PSYC 102 Orientation Seminar in Psychology
General Psychology. Satisfied by:
PSYC 104 General Psychology
or PSYC 105 General Psychology, Honors
Research Methods in Psychology. Satisfied by:
PSYC 200 Research Methods in Psychology
or PSYC 201 Research Methods in Psychology, Honors
Statistics in Psychological Research. Satisfied by:
PSYC 210 Statistics in Psychological Research
or PSYC 211 Statistics in Psychological Research, Honors

Note: A student may not take more than 3 of the following core courses before being admitted to the major.

Cognitive Psychology. Satisfied by:
PSYC 318 Cognitive Psychology
or PSYC 319 Cognitive Psychology, Honors

Child Development. Satisfied by:
PSYC 333 Child Development
or PSYC 334 Child Development, Honors

Abnormal Psychology. Satisfied by:
PSYC 350 Abnormal Psychology
or PSYC 351 Abnormal Psychology, Honors

Social Psychology. Satisfied by:
PSYC 360 Social Psychology
or PSYC 361 Social Psychology, Honors

Biological Psychology. One course required:
PSYC 370 Behavioral Neuroscience
PSYC 371 Behavior Neuroscience, Honors
PSYC 375 Cognitive Neuroscience
PSYC 380 Clinical Neuroscience
PSYC 381 Clinical Neuroscience, Honors

Psychology Required Electives (12)
Majors must complete 12 hours. at least 6 of these hours must be completed with courses numbered 300 or higher.

Psychology Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 37 hours of major courses. Note: No more than 3 hours of PSYC 480, PSYC 481, or PSYC 483 may count toward the minimum hours required for the major. (No more than a 6-hour combination of these courses may be counted toward the major.)

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours
Satisfied by a minimum of 21 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

A sample 4-year plan for the BA degree in Psychology can be found here: Psychology (http://catalog.ku.edu/liberal-arts-sciences/psychology/ba-bgs-psychology/ba), or by using the left-side navigation.

Sample 4-year plans for the BGS degree in Psychology and the BS in Behavioral Neuroscience will be coming soon.

Departmental Honors

Students may inquire about departmental honors as soon as they are admitted to the undergraduate major. The department website (http://psych.ku.edu) has details. Participation usually begins in the senior year. A 3.25 grade-point average overall and a 3.5 grade-point average in psychology courses are required. Students follow individualized courses of study arranged through the director. Students who complete PSYC 460, individual research, and a paper under the direction of an instructor may graduate with departmental honors.
Bachelor of Science in Behavioral Neuroscience

Why study psychology?
Because the understanding of mind, behavior, and the human experience is best achieved through the rigorous application of the scientific method.

Admission to the Major

Behavioral Neuroscience Major Admission Criteria

Application Term
Students should apply to the major during the semester in which major admission criteria will be completed; normally no later than 60 hours, or for transfer students, normally during the initial term at KU. Application to this major after completion of 60 hours, or the initial KU term for transfer students, will likely delay graduation.

Courses Required
Orientation Seminar in Psychology. Satisfied by:

PSYC 102 Orientation Seminar in Psychology 1

General Psychology. Satisfied by:

PSYC 104 General Psychology 3
or PSYC 105 General Psychology, Honors

Research Methods in Psychology or Statistics in Psychological Research. Satisfied by one of the following:

PSYC 200 Research Methods in Psychology 3
or PSYC 201 Research Methods in Psychology, Honors

PSYC 210 Statistics in Psychological Research
or PSYC 211 Statistics in Psychological Research, Honors

Core Psychology Course. Satisfied by one of the following:

PSYC 370 Behavioral Neuroscience
or PSYC 371 Behavior Neuroscience, Honors

PSYC 375 Cognitive Neuroscience

PSYC 380 Clinical Neuroscience
or PSYC 381 Clinical Neuroscience, Honors

Admission GPA
A minimum 3.0 GPA is required in all courses listed above that have been completed at the time of application to the major. University Course Repeat Policy will apply.

Requirements for the B.S. Degree

B.S. in Behavioral Neuroscience

Humanities (24 hrs.)

Written Communication - Core Skill and Critical Inquiry

Composition (0)
Satisfied by one of the following. Requirement must be completed during initial term of admission at KU.

ENGL 101 Composition

ACT English score of 27 or above or SAT English score of 600 or above

AP English Literature & Composition score of 3 or above
Equivalent transfer course

Critical Reading and Writing (0)
Satisfied by one of the following. Requirement must be completed within the first academic year at KU.

ENGL 102 Critical Reading and Writing
ENGL 105 Freshman Honors English

AP English Literature & Composition score of 4 or above
Equivalent transfer course

Sophomore Reading and Writing II (0)
Satisfied by one of the following:

ENGL 203 Topics in Reading and Writing: _____
ENGL 205 Freshman-Sophomore Honors Proseminar: _____
ENGL 209 Introduction to Fiction
ENGL 210 Introduction to Poetry
ENGL 211 Introduction to the Drama

AP English Literature & Composition score of 5 or above
Equivalent transfer course

Argument and Reason
Satisfied by one of the following: 3

COMS 130 Speaker-Audience Communication
PHIL 148 Reason and Argument
Equivalent course

Western Civilization - Exploration of One’s Own and Diverse Cultures
Advising Alert: Requires sophomore-level standing. Courses at other universities may have the same title but may not meet this requirement.

Satisfied by:

HWC 204 Western Civilization I 3
or HWC 114 Western Civilization I Honors
HWC 205 Western Civilization II 3
or HWC 115 Western Civilization II Honors

Humanities - Understanding the Human Condition
Satisfied by completing 2 courses (6 hrs.) in any of the following categories: historical studies (requirement code HT), literature and the arts (requirement code HL), philosophy and religion (requirement code HR) and humanities (requirement code H). Approved courses may be searched for availability through the Kyou portal.

Natural Science (14 hrs. minimum)
Satisfied by completing 2 of the following 4 sequences AND an extension of 1 sequence (1 additional advanced course), or an approved alternative (14 hrs. minimum).

Biology:

BIOL 150 Principles of Molecular and Cellular Biology & BIOL 152 and Principles of Organismal Biology

Chemistry:

CHEM 130 General Chemistry I & CHEM 135 and General Chemistry II

Physics:
PHSX 114 College Physics I
& PHSX 115 College Physics II

Biological Anthropology:
- ANTH 104/304 Fundamentals of Physical Anthropology
- ANTH 340 Human Variation and Evolution
  or ANTH 341 Human Evolution
  or ANTH 350 Human Adaptation
  or ANTH 442 Anthropological Genetics
  or ANTH 447 Human Behavioral Genetics

Mathematics (14 hrs. minimum)
Satisfied by completing a total of 4 mathematics courses totaling at least 14 hours, of which at least 6 hours must be calculus or calculus based. The 8 hours of calculus can be satisfied by taking at least one calculus I course (MATH 115 or 125) and one calculus II course (MATH 116 or 126). The remaining four to six hours of mathematics can be satisfied by taking a minimum of two additional math courses at any level (excluding MATH 002).

Computing (6 hrs. minimum)

Satisfied by:
- EECS 138 Introduction to Computing: _____

An additional course
The second 3 hours could either be a second semester of EECS 138 (focused on a second programming language) or be from an additional approved course that provides an opportunity to gain computing experience. This second course could be PSYC 480 or PSYC 481 if this Independent Study requires independent, original application of the student’s computing skills such as computer simulation of cognitive processes, or experience with computationally complex neuroscience techniques, such as brain imaging and mapping, or physiological data collection and analysis. (3)

The second 3 hours could either be a second semester of EECS 138 (focused on a second programming language) or be from an additional approved course that provides an opportunity to gain computing experience. This second course could be PSYC 480 or PSYC 481 if this Independent Study requires independent, original application of the student’s computing skills such as computer simulation of cognitive processes, or experience with computationally complex neuroscience techniques, such as brain imaging and mapping, or physiological data collection and analysis. (3)

Behavioral Neuroscience Major Course Requirements

Behavioral Neuroscience Prerequisite or Co-Requisite Knowledge (10)
Majors must complete courses as specified in each of the following areas. These hours do not contribute to the minimum number of hours required for the major.

Orientation Seminar in Psychology. Satisfied by:
- PSYC 102 Orientation Seminar in Psychology

General Psychology. Satisfied by:
- PSYC 104 General Psychology
  or PSYC 105 General Psychology, Honors

College Algebra or Pre-Calculus. Satisfied by:
- MATH 101 College Algebra (or equivalent)

or MATH 104 Precalculus Mathematics

Introductory Biology Course. Satisfied by
- BIOL 100 Principles of Biology
  or BIOL 150 Principles of Molecular and Cellular Biology

Behavioral Neuroscience Core Knowledge and Skills (28)
Majors must complete coursework in each of the following 4 areas:

Behavioral Neuroscience Courses (6 hours minimum). Satisfied by one of the following:
- PSYC 370 Behavioral Neuroscience
  or PSYC 371 Behavior Neuroscience, Honors
  or PSYC 375 Cognitive Neuroscience

Clinical Neuroscience
- PSYC 380 Clinical Neuroscience
  or PSYC 381 Clinical Neuroscience, Honors

Laboratory Courses (9 hours minimum). Satisfied by the following:
- PSYC 200 Research Methods in Psychology
  or PSYC 201 Research Methods in Psychology, Honors
- PSYC 625 Experimental Psychology: Methods in Neuropsychology and Psychophysiology

Quantitative Courses (9 hours minimum). Satisfied by one of the following:
- PSYC 210 Statistics in Psychological Research
  or PSYC 211 Statistics in Psychological Research, Honors

Applied Nonparametric Statistical Methods
- PSYC 687 Factor Analysis
- PSYC 692 Test Theory
- PSYC 693 Multivariate Analysis
- PSYC 694 Multilevel Modeling I
- PSYC 695 Categorical Data Analysis
- PSYC 696 Structural Equation Modeling I

Research Practicum
- PSYC 449 Laboratory/Field Work in Human Biology

Honors in Psychology
- PSYC 460 Honors in Psychology

Independent Study
- PSYC 480 Independent Study

Behavioral Neuroscience, Honors
- PSYC 481 Research Practicum

Elective Courses in Psychology or Other Disciplines (12)
Majors must complete 12 hours minimum (other electives may be accepted with permission of the B.S. director) Satisfied by:
- PSYC 418 Introduction to Cognitive Science
  or PSYC 318 Cognitive Psychology
- PSYC 432 Human Behavioral Genetics
- PSYC 482 Sensation and Perception
- PSYC 535 Developmental Psychopathology
- PSYC 555 Evolutionary Psychology
- PSYC 605 Health Psychology
- PSYC 630 Clinical Psychology
- PSYC 644 Behavioral Pharmacology
- PSYC 646 Mental Health and Aging
- PSYC 678 Drugs and Behavior
PSYC 691  The Psychology of Aging
LING 438  Neurolinguistics I
SPLH 320  The Communicating Brain: The Ultimate Personal Computer

Behavioral Neuroscience Major Hours & GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 40 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by 28 hours of junior/senior level major coursework.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Departmental Honors
Students may inquire about departmental honors as soon as they are admitted to the undergraduate major. The department website (http://psych.ku.edu) has details. Participation usually begins in the senior year. A 3.25 grade-point average overall and a 3.5 grade-point average in psychology courses are required. Students follow individualized courses of study arranged through the director. Students who complete PSYC 460, individual research, and a paper under the direction of an instructor may graduate with departmental honors.

Minor in Psychology
Why study psychology?
Because the understanding of mind, behavior, and the human experience is best achieved through the rigorous application of the scientific method.

Requirements for the Minor
Students selecting this minor must complete each of the following:

General Psychology (3)
Satisfied by:
PSYC 104  General Psychology 3
or PSYC 105  General Psychology, Honors

Psychology Required Electives - Choice Electives (6)
Satisfied by 2 courses chosen from:
PSYC 318  Cognitive Psychology
or PSYC 319  Cognitive Psychology, Honors
PSYC 333  Child Development
or PSYC 334  Child Development, Honors
PSYC 350  Abnormal Psychology
or PSYC 351  Abnormal Psychology, Honors
PSYC 360  Social Psychology
or PSYC 361  Social Psychology, Honors

Psychology Minor Remaining Electives (9)
The remaining elective courses may include any undergraduate courses offered by the Department of Psychology including:

PSYC 480  Independent Study
PSYC 481  Research Practicum
PSYC 483  Undergraduate Internship in Psychology

A maximum of 3 hours of PSYC 480 or PSYC 481 or PSYC 483, or any combination of these 3 courses totaling 3 hours may count toward the minor.

Psychology Minor Hours & Minor GPA
While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/ Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Minor in Social and Behavioral Sciences Methodology
Why study psychology?
Because the understanding of mind, behavior, and the human experience is best achieved through the rigorous application of the scientific method.

Requirements for the Social and Behavioral Sciences Methodology Minor
Social and Behavioral Science Methodology Minor Course Requirements
Students selecting this minor must complete each of the following:

Prerequisite Knowledge for Minor
Satisfied by a course in elementary statistics with a B- or better grade (e.g., COMS 356; MATH 365, MATH 526; POLS 306; PSYC 210; PUAD 332; SOC 510). This prerequisite does not count towards the SBSM minor hours.
Minor Course Requirements (17-19)
Statistical Methods in Behavioral and Social Science Research I.
Satisfied by:
PSYC 650 Statistical Methods in Behavioral and Social Science Research I (or equivalent) 4

Guided Research. Satisfied by a minimum of 3 hours of the following:
PSYC 480 Independent Study 3
or PSYC 481 Research Practicum

Specialized Methodology. Satisfied by a minimum of two courses from the following. The specific courses to be taken should be determined based on a student's research needs and overall career objectives.
PSYC 651 Anova and Other Factorial Designs
PSYC 687 Factor Analysis
PSYC 692 Test Theory
PSYC 693 Multivariate Analysis
PSYC 694 Multilevel Modeling I
PSYC 695 Categorical Data Analysis
PSYC 696 Structural Equation Modeling I
PSYC 697 Longitudinal Data Analysis

Minor Electives. Satisfied by additional graduate-level courses or guided research experience as needed to bring total hours completed to the minimum of 18 hours required for the minor. Options include:
PSYC 480 Independent Study
PSYC 481 Research Practicum
PSYC 483 Undergraduate Internship in Psychology
PSYC 651 Anova and Other Factorial Designs
PSYC 687 Factor Analysis
PSYC 692 Test Theory
PSYC 694 Multilevel Modeling I
PSYC 695 Categorical Data Analysis
PSYC 696 Structural Equation Modeling I
PSYC 697 Longitudinal Data Analysis

Social and Behavioral Methods Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Junior/Senior (300+) Hours in Residence
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the minor.

Minor Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/ Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Master of Arts in Psychology

Why study psychology?
Because the understanding of mind, behavior, and the human experience is best achieved through the rigorous application of the scientific method.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
Students enter the department with the expectation of earning the Ph.D. The department does not admit students seeking the terminal master’s degree.

Applicants must have earned either the bachelor’s degree or the master’s degree. Although most applicants have majored in psychology as undergraduates, this is not required. It is necessary, however, to have earned 15 credit hours in psychology, including a first course in statistics and a course in experimental psychology or psychological research methods. Admission is competitive. The Graduate Record Examination is required. The GRE subject test is preferred but not required. Prior research and relevant work experience, honors, awards, and other achievements are taken into account. The deadline for completed applications is December 1 for the following fall semester.

Submit your graduate application online (http://www.graduate.ku.edu). Have official transcripts sent to the Graduate Application Processing Center.

Send all other requested application materials to the department:
The University of Kansas
Department of Psychology
Graduate Officer
Fraser Hall
M.A. Degree Requirements

Within 2 years of first enrollment in the Ph.D. program, the student must earn at least 30 graduate credit hours, no more than 6 of which may be in courses offered by other departments. The student must complete an acceptable thesis based on an empirical study and pass an oral examination. The oral examination may cover the thesis as well as more general material. Courses required for the M.A. degree are determined in consultation with faculty of the program in which the student is enrolled as part of the process of development of an individualized program. No more than 6 thesis hours may be applied to the 30 hours required for the M.A.

Doctor of Philosophy in Psychology

Why study psychology?

Because the understanding of mind, behavior, and the human experience is best achieved through the rigorous application of the scientific method.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Students enter the department with the expectation of earning the Ph.D. The department does not admit students seeking the terminal master's degree.

Applicants must have earned either the bachelor’s degree or the master’s degree. Although most applicants have majored in psychology as undergraduates, this is not required. Dual-title Ph.D. Program in Psychology and Gerontology

KU is implementing a dual-title Ph.D. option in Psychology and Gerontology. The dual-title degree will enable students at KU to meet the challenge of undertaking graduate education in the emerging, interdisciplinary field of gerontology that is combined with training in established, traditional disciplines. Interested students apply and are admitted to the psychology Ph.D. program. After completing an M.A. in psychology, they may apply to undertake the dual-title option. The student’s diploma will carry the name of both fields.

This option is designed to appeal to students who are strong in a traditional discipline but also motivated to study across disciplinary lines. In the course of study, students can avail themselves of disciplinary depth and interdisciplinary breadth.

Ph.D. Degree Requirements

Although graduate education is offered through separate programs, each student prepares an individualized plan of study in consultation with faculty members. These plans indicate how the student proposes to fulfill the requirements for the M.A. and Ph.D. degrees, including all general requirements and conditions.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Social Psychology

Monica Biernat, Social Psychology Program Director

The social psychology program is an intensive research training experience seeking students who are committed to empirical, scholarly work. The major research interests of faculty members are stereotyping, prejudice, intergroup relations, person perception, close relationships, emotion and motivation, self and identity, culture.

In addition to course work, the central requirement of the program is continuous involvement in research. Research opportunities range from laboratory experimentation to field research. Depending on backgrounds and goals, students may move from one research setting to another or concentrate on a particular type of research throughout their training.

Requirements

Students are guided by individually tailored plans called contracts. These describe sequences of learning experiences developed by the student and a 3-member faculty committee. Beginning students are urged to enroll in basic courses in theory and research in social psychology and statistics. The contract specifies students’ long-range goals, specialties, other fields of psychology or related disciplines in which they will become proficient, proposed sequence of course work, research and teaching experiences they hope to obtain, plans for the M.A. proposal, comprehensive requirements and dissertation landmarks, and an approximate timetable. Contract details can be changed by agreement of the student and faculty committee.

The contract is a general framework that permits students’ graduate work to be adapted to their interests and abilities and provides a standard...
against which progress can be assessed. Students' contracts must specify how the research skills and responsible scholarship requirement is to be met. The research skills requirement typically is met by completion of 6 graduate courses in statistics and research design. The responsible scholarship requirement is met via coursework as specified in the contract, completion of online tutorials, and attendance at ethics proseminars. All contracts must comply with other departmental and general rules including residence and time limits.

Cognitive and Brain Sciences

Evanagelia G. Chrysikou, Cognitive and Brain Sciences Program Director

The cognitive and brain sciences program seeks students with the intellectual potential, motivation, and quantitative aptitude to engage in productive scholarship in a basic or applied area of interest.

Interdisciplinary training is also available in

- Cognitive neuroscience
- Developmental science
- Aging and cognition
- Child language
- Quantitative methods

The training program emphasizes the development of a broad-based foundation in theory, research methods, technical skills, and quantitative analysis for application in a variety of basic and applied research settings. Areas of focus of current faculty members include memory, cognitive development, language, perception, attention, aging, and cognition.

Recent graduates have found employment in academic programs, research organizations, and applied research units in industry and government. The rate of employment for graduates is high. General program requirements are listed below. Applicants are encouraged to consult the department’s website (http://psych.ku.edu) for details.

The admission process includes evaluation of submitted materials and may include additional interviews by individual faculty members, as appropriate. The program follows a mentorship model; students are admitted to work with specific faculty members rather than to the program at large. During the application process, applicants are encouraged to contact faculty members with whom they are interested in working.

General Program Requirements
(with recommended completion time)

- Research activity (continuous)
- Course requirements (before oral comprehensive examinations)
- Master’s thesis and oral defense (year 2 or 3)
- Written preliminary examination (year 3 or 4)
- Research skills and responsible scholarship requirement (year 3 or 4)
- Comprehensive oral examination (year 4 or 5)
- Dissertation and oral defense (year 5 or 6)

Course Requirements

Statistics/Methods Core (13)
(12 hours by the end of the third year)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 790</td>
<td>Statistical Methods in Psychology I</td>
</tr>
<tr>
<td>1 additional advanced</td>
<td>quantitative psychology course</td>
</tr>
</tbody>
</table>

Content Core (9)
(9 hours by the end of the second year)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 723</td>
<td>Advanced Cognitive Psychology</td>
</tr>
</tbody>
</table>

Plus 2 subsequent classes in spring semester; these have previously included:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 725</td>
<td>Cognitive Neuroscience</td>
</tr>
<tr>
<td>PSYC 737</td>
<td>Psycholinguistics II</td>
</tr>
<tr>
<td>PSYC 757</td>
<td>Theories of Perception</td>
</tr>
<tr>
<td>PSYC 831</td>
<td>Advanced Human Learning and Memory</td>
</tr>
<tr>
<td>PSYC 870</td>
<td>Cognitive Development</td>
</tr>
</tbody>
</table>

Breadth/Depth (12)
(12 hours before oral comprehensives)

<table>
<thead>
<tr>
<th>Category</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>Breadth I and II</td>
<td></td>
</tr>
<tr>
<td>Depth I and II</td>
<td></td>
</tr>
</tbody>
</table>

Breadth/depth courses may come from a number of sources, depending on student interests and advisor suggestions. Students are expected to use this requirement to gain additional specialization in 2 areas in addition to cognitive psychology. Examples include Quantitative (courses in psychology and PRE), Language (courses in linguistics or speech-language-hearing), Neuroscience (courses in psychology, biology, or pharmacology), Philosophy, or Computer Science. These courses also can be used to help meet research skills and responsible scholarship requirements with breadth goals set out by the advisor.

Seminar (continuous enrollment) (1)

<tbody>
<tr>
<td>PSYC 902</td>
<td>Proseminar in Experimental Psychology</td>
</tr>
</tbody>
</table>

Quantitative Psychology

Carol Woods, Interim Quantitative Psychology Program Director

The quantitative psychology (http://crmda.ku.edu) program provides a unique doctoral training experience. Graduate students are trained as quantitative specialists who can interface quantitative methods with substantive issues across the behavioral and social sciences. Students develop a substantial background in quantitative methods. Some students pursue more depth in quantitative content areas, and some pursue complementary expertise in a nonquantitative content area (e.g., clinical, cognitive, developmental, health, social). The exact nature of a student’s nonquantitative focus depends on the interests and goals of the student and the faculty mentor. Current methodological interests include psychometric methods, item response theory, structural equation modeling, multivariate statistics, multilevel modeling, differential equation modeling and dynamical systems, nonparametric statistics, and other topics in quantitative methods as applied in the behavioral and social sciences.

Recent graduates are employed in academic programs, basic research units in academic and organizational settings, applied research, and freelance consultation. Nearly all graduates proceed directly to full-time employment. About half the positions are academic, nearly all in upper-tier universities with graduate programs. Quantitative specialists have substantial technical expertise that provides an advantage in the job market. They often earn higher starting salaries and have access to additional income-enhancing activities such as grants and departmental consulting.
The program requires a total of 58 nonthesis hours (15 courses). Requirements are as follows:

**Quantitative Training**

**Quantitative Foundations (4)**
Quantitative foundations is 1 semester of basic psychological statistics, offered yearly:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 790</td>
<td>Statistical Methods in Psychology I</td>
<td>4</td>
</tr>
</tbody>
</table>

**Area-Specific Methodology (3)**
(1 course, 3 hours minimum). e.g.:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 815</td>
<td>Design and Analysis for Developmental Research</td>
<td>3</td>
</tr>
<tr>
<td>PSYC 816</td>
<td>Design and Analysis for Neuroimaging Research</td>
<td></td>
</tr>
<tr>
<td>PSYC 818</td>
<td>Experimental Research Methods in Social Psychology</td>
<td></td>
</tr>
<tr>
<td>PSYC 819</td>
<td>Field and Evaluation Research Methods in Social Psychology</td>
<td></td>
</tr>
</tbody>
</table>

**Quantitative Core (27)**
(7 courses, 27 hours minimum). The quantitative core is a more intense series of courses in fundamental quantitative areas, currently including (other courses may be substituted with the director's consent):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 791</td>
<td>Statistical Methods in Psychology II</td>
<td>9</td>
</tr>
<tr>
<td>PSYC 887</td>
<td>Factor Analysis</td>
<td></td>
</tr>
<tr>
<td>PSYC 879</td>
<td>Applied Nonparametric Statistical Methods</td>
<td></td>
</tr>
<tr>
<td>PSYC 892</td>
<td>Test Theory</td>
<td></td>
</tr>
<tr>
<td>PSYC 893</td>
<td>Multivariate Analysis</td>
<td></td>
</tr>
<tr>
<td>PSYC 894</td>
<td>Multilevel Modeling</td>
<td></td>
</tr>
<tr>
<td>PSYC 895</td>
<td>Categorical Data Analysis</td>
<td></td>
</tr>
<tr>
<td>PSYC 896</td>
<td>Structural Equation Modeling I</td>
<td></td>
</tr>
</tbody>
</table>

**Quantitative Concentration (9)**
(3 courses, 9 hours minimum). The quantitative concentration focuses on a range of specialized applications, currently including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 990</td>
<td>Methods for Clustering and Classification</td>
<td></td>
</tr>
<tr>
<td>PSYC 991</td>
<td>Longitudinal Data Analysis</td>
<td></td>
</tr>
<tr>
<td>PSYC 993</td>
<td>Seminar: _______ (Advanced Quantitative Topics)</td>
<td></td>
</tr>
<tr>
<td>PSYC 996</td>
<td>Structural Equation Modeling II</td>
<td></td>
</tr>
</tbody>
</table>

Advanced courses offered in other departments or schools also may be taken with the director's consent.

**Proseminar in Quantitative Behavioral and Social Sciences (6)**
(6 semesters, 1 hour a semester, 6 hours minimum)

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 881</td>
<td>Proseminar in Quantitative Behavioral and Social Sciences</td>
<td>6</td>
</tr>
</tbody>
</table>

The quantitative proseminar is an ongoing discussion series covering advanced topics and emerging issues.

Courses will be added to these offerings. In addition, students complete at least 1 semester of a research methodology course. Methodology courses associated with the different substantive foci are available.

**Minor Concentration (9)**

(3 courses, 9 hours minimum, e.g., Cognitive Psychology, Developmental Psychology, Health Psychology, Social Psychology, Education, Mathematical Statistics). The minor concentration is fulfilled by taking 3 or more courses in a specialized area, education (e.g., testing, evaluation), mathematical statistics, or a tailored curriculum that meets the goals and objectives of the student (e.g., business).

**General Requirements**

**Research Skills and Responsible Scholarship**

- Because the quantitative training track is all about research methods and statistics, the research skills requirement is met by completion of the core requirements in statistics and research design. The responsible scholarship requirement is additionally met via attendance at ethics proseminar presentations offered each semester, and through direct mentoring with the faculty advisor.
- M.A. thesis (1-9 hours plus public defense, typically completed by the end of the second year of training, 3-person committee).
- Comprehensive oral examinations (review paper, dissertation proposal, elaborate project, or written examination plus public defense, typically completed during the fourth year of training, 5-person committee with 1 outside member).
- Dissertation (1-12 hours plus public defense, 5-person committee with 1 outside member).

**Additional Graduate Experiences**

Quantitative psychology students have opportunities for experience in teaching, statistical consulting, and data analysis through employment in various settings. Students also are expected to participate and assist with our regular summer training institutes on advanced quantitative techniques. Opportunities may include teaching undergraduate statistics in psychology, research assistantships in quantitative projects, assisting in research at an institute such as the Institute for Life Span Studies (http://www.lsi.ku.edu), or working in the Center for Research Methods and Data Analysis (http://crmda.ku.edu). Students have access to quantitative workshops and brown-bag lunches offered regularly by the quantitative training program. Workshops are conducted by national leaders in quantitative methods. Special resources for attending national workshops and conventions are also available.

**Quantitative Minor**

A minor in quantitative psychology is offered for graduate students in any of the department’s major programs and for select programs in the College of Liberal Arts and Sciences (e.g., sociology). The quantitative minor is an addition to the regular program and does not replace any existing or future requirements of the student’s major program. Students desiring a major emphasis in quantitative psychology should apply directly to the quantitative psychology program.

The minor consists of advanced course work in statistics, measurement, and methodology. The quantitative minor provides the student with elevated levels of quantitative expertise to enhance the overall quality of the research program. It gives students a competitive edge in the job market. Many faculty positions now request expertise in both a specific content area and in quantitative methods. Advanced quantitative skills also offer students additional job opportunities. The quantitative minor provides the additional credentials needed to pursue these jobs.

The minor requires 5 courses in quantitative methodology beyond the basic foundations course requirement (PSYC 790). The classes normally
are taken in the department but can come from other departments with approval. Currently available courses include Analysis of Variance, Categorical Methods, Nonparametric Statistics, Multivariate Methods, Multilevel Modeling I, Structural Equation Modeling I and II, Test Theory, Factor Analysis, and regularly offered Advanced Topics in Quantitative Psychology seminars with varying topics.

For more information, contact Carol Woods, cmw@ku.edu (yhat@ku.edu).

**Developmental Psychology**

Andrea Greenhoot, Developmental Psychology Program Director

Training in developmental psychology is interdisciplinary and collaborative. The developmental emphasis profits significantly from affiliated faculty in other academic units such as Speech-Language-Hearing: Sciences and Disorders, the School of Education, and doctoral programs in Clinical Child Psychology, Child Language, Gerontology, and Neurosciences. The developmental emphasis is substantively linked to the Schiefelbusch Institute for Life Span Studies, the Kansas Intellectual and Developmental Disabilities Research Center, and the Center for Biobehavioral Neurosciences in Communication Disorders. Many of the developmental psychology faculty have affiliations with more than one entity on campus. This breadth offers students multidisciplinary exposure and experiences that train them to conduct cutting-edge research on developmental phenomena across the life span. The program includes a number of concentrations, including cognitive, social, evolutionary, language, and quantitative. Students work with a faculty mentor to customize a concentration that suits the needs of the student and the expertise of the available faculty. The program is appropriate for students who wish to be trained in the traditional divisions of psychology (e.g., cognitive-developmental, social-developmental, quantitative-developmental) as well as those whose interests may not fall squarely within traditional divisions.

**Curriculum**

The curriculum involves 35 hours of formal developmental courses in addition to master’s, research skills and responsible scholarship, and dissertation research hours. Students are expected to enroll in a biweekly Proseminar on Developmental Science (6 semesters minimum). The program allows students to pursue their developmental research interests and accumulate academic credentials that give access to the job market of their choice. Formal course requirements are as follows:

<table>
<thead>
<tr>
<th>Statistics, Design, and Professional Issues (13 hours, minimum) (13)</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 790 Statistical Methods in Psychology I 4</td>
</tr>
<tr>
<td>1 additional advanced quantitative psychology course 3</td>
</tr>
<tr>
<td>PSYC 815 Design and Analysis for Developmental Research 3</td>
</tr>
<tr>
<td>PSYC 982 Issues in Scientific Conduct 3</td>
</tr>
<tr>
<td>Core Developmental Courses (12 hours) (12)</td>
</tr>
<tr>
<td>PSYC 691 The Psychology of Aging 3</td>
</tr>
<tr>
<td>PSYC 870 Cognitive Development 3</td>
</tr>
<tr>
<td>PSYC 825 Social Development 3</td>
</tr>
<tr>
<td>PSYC 923 History and Systems of Developmental Psychology: Developmental Theory 3</td>
</tr>
</tbody>
</table>

**Concentration (9 hours, minimum)**

The concentration builds expertise in an area chosen by the student in conjunction with the faculty advisor. Courses offered outside the department may count toward the concentration. The concentration can be either very focused or a uniquely tailored hybrid of courses. Some examples of concentrations that students may create are listed below. Many related courses may be substituted for the same general theme of the concentration and students can create a concentration that fits with their interests and educational objectives. Possible concentrations include:

**General Cognitive Development**

- PSYC 723 Advanced Cognitive Psychology 3
- PSYC 800 Experimental Psychology: _____ (Cognition and Aging) 3
- PSYC 872 Attention, Perception, and Learning in Infancy 3

**Social-Personality Development**

- PSYC 777 Social Psychology: Theory, Research, and Clinical Applications 3
- PSYC 962 Advanced Personality 3

**Quantitative Developmental Methods**

- PSYC 896 Structural Equation Modeling I 4
- PSYC 996 Structural Equation Modeling II 3
- PSYC 893 Multivariate Analysis 4

**Note:** Such a concentration also lends itself to completing a graduate minor in quantitative psychology and satisfying the Research Skills and Responsible Scholarship (RSRS) requirements.

**Developmental Evolutionary Psychology**

- PSYC 993 Seminar: _____ (Developmental Evolutionary Psychology) 1-5
- BIOL 625 Behavioral Ecology and Sociobiology 3
- BIOL 668 Evolutionary Ecology 3

**Developmental Cognitive Neuroscience**

- PSYC 725 Cognitive Neuroscience 3
- PSYC 800 Experimental Psychology: _____ (Neuroscience Methods) 3
- PSYC 800 Experimental Psychology: _____ (Developmental Cognitive Neuroscience) 3

**Language Development**

- PSYC 735 Psycholinguistics I 3
- PSYC 993 Seminar: _____ (Research Methods in Language Development) 1-5
- SPLH 816 Language Development 3

**Developmental Research Skills and Responsible Scholarship (8 hours, minimum)**

The RSRS requirement generally is satisfied by taking 2 additional quantitative courses and PSYC 982 Issues in Scientific Conduct.Satisfying the RSRS requirement in this way also lends itself...
to the completion of a graduate minor in quantitative psychology (6 quantitative courses total are required for the minor).

For more information, contact Andrea Greenhoot, agreenhoot@ku.edu

Clinical Psychology

Rick Ingram, Director of Clinical Training

The clinical psychology program educates students to master knowledge in the field of scientific psychology so that they can generate new scientific knowledge and theory related to the field of clinical psychology, and can make independent contributions to the evolving base of skills and scientific knowledge required for clinical practice. All students take basic course work and practica in academic/research and clinical application. Students may take electives or practica to augment either aspect of training. About half the graduates pursue academic/research-oriented careers, and the rest undertake careers emphasizing applied activities (e.g., psychotherapy in community mental health centers or hospitals). Information is available from the graduate admission secretary or online (http://psych.ku.edu/clinical).

Health and Rehabilitation Specialty

Work centers on the psychosocial and biomedical aspects of physical health, illness, and disability. Students apply the knowledge and techniques to problems of prevention, assessment, treatment, and rehabilitation. A detailed overview is available from the graduate admission secretary or online (http://psych.ku.edu/clinical).

Requirements

Individual plans of study are designed to meet the standards established by state licensing boards and professional organizations. Individualization is achieved by selecting among alternate ways of meeting specific requirements and by selected electives or choosing the health and rehabilitation emphasis. The plan of study constitutes an agreement between the student and the entire clinical faculty. Program requirements:

General Core Requirements for Clinical Psychology (13-17 credit hours)

Quantitative Analysis of Behavior (6-7)

Responsible Scholarship Requirement

This is a new requirement. Satisfying this requirement will not necessitate additional credit-hour enrollments. Refer to the program website for the latest information.

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 968 Research Methods in Clinical Psychology</td>

</tr>
</tbody>
</table>

Students must also complete:

1. Online tutorial for Responsible Scholarship from Research & Graduate Studies
2. Online tutorial for IRB (institutional Review Board)
3. Online tutorial for HiPAA data (completed annually)

Thesis and Dissertation (18 hours)

The student must complete a master’s thesis based on an empirical study (minimum of 6 hours) and an empirical doctoral dissertation (minimum of 12 hours) and defend each in separate oral examinations. The thesis should be completed by the end of the second year and written in a form suitable for journal submission.

Electives/Independent Study (6 credit hours, minimum)

Because a minimum of 86 hours of graduate credit is required for the degree, the hours not included in the requirements above may be elective courses selected by the student and his or her advisor.

Examinations: Task

Each student must propose and demonstrate competence in one task or project. This task typically is done in the third year. It may be in applied/clinical, research/methodology, or program evaluation. A complete description is available from the clinic office or online (http://psych.ku.edu/clinical).

Upon completion of all degree requirements except the dissertation and internship, the student must pass the oral comprehensive examination. This examination addresses a proposal for the dissertation as well as related, general questions in the field. It should be taken before completion of 4 calendar years for students entering with the B.A. and 3 years for students entering with the M.A. The faculty believes that the student is best served by completing the entire dissertation before the internship.

Internship (3 hours)

Students must complete a 12-month predoctoral internship at a setting approved by the clinical psychology faculty. Clinical students may complete their internships at any setting approved by the American Psychology Association.

Department of Religious Studies

Why study religious studies?

Religions have been and remain among the most powerful forces shaping human history. Their discourses and practices inform the way we perceive ourselves, those around us, and existence at large, even when we are not actively religious. They are central to understanding both what divides us and unites us. The academic study of religion is a trans-disciplinary endeavor to understand from an objective perspective how religious traditions shape the lives of their adherents, without seeking to promote or disprove any specific belief system. Religious Studies acquaints students with the diversity of religious cultures and introduces them to key methods and theories employed in their examination as “religion.”

Undergraduate Programs

The undergraduate degree in the Department of Religious Studies is a research, analysis, and writing intensive program that features close work with faculty in small classroom settings. It seeks to develop a foundational knowledge of the world’s diversity of religious cultures and critical awareness of the ways in which religion shapes how we see and act toward ourselves, others, and the environment around us. Through the study of specific religious traditions and settings, students come away with a background that is invaluable to understanding and working with people of other cultures, whether in international business or simply as an informed global citizen.

Graduate Programs

The department offers a graduate program leading to the M.A. with a major in religious studies. The program enables students to pursue specialized advanced work that builds in tandem on the interests
of the students and the specializations of the faculty. At all levels, interdepartmental and interdisciplinary cooperation is encouraged as important to a comprehensive program. Continuing research in religious studies is an indispensable and foundational element, intimately related both to teaching and to the wider exchange and advancement of knowledge.

A library of some 15,000 volumes, owned by the Friends of the Department of Religious Studies at the University of Kansas, is housed with and used by the department in Irma I. Smith Hall. The Department of Religious Studies at KU is also in the unusual position of being able to provide substantial financial support for students seeking the MA degree.

Courses

REL 104. Introduction to Religious Studies. 3 Hours. HR AE42/GE3H / H.
This course introduces students to the academic study of religions. It acquaints students with key methods and issues in religious studies, and provides an introductory survey of selected religions. Not open to students who have taken REL 105. LEC.

REL 105. Introduction to Religious Studies, Honors. 3 Hours. HR AE42/GE3H / H.
This course introduces students to the academic study of religions. It acquaints students with key methods and issues in religious studies, and provides an introductory survey of selected religions. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 104. LEC.

REL 106. Living Religions of the East. 3 Hours. HR/NW AE42/GE3H / H/W.
A basic introduction to religion in India, China, and Japan with emphasis upon religions that affect the modern period. Not open to students who have taken REL 108/EALC 105. (Same as EALC 105.) LEC.

REL 107. Living Religions of the West. 3 Hours. HR GE3H / H.
A basic introduction to the major religious traditions of the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. Not open to students who have taken REL 109. (Same as JWSH 107.) LEC.

REL 108. Living Religions of the East, Honors. 3 Hours. HR/NW AE42/GE3H / H.
A basic introduction to religion in India, China, and Japan, with emphasis upon religions that affect the modern period. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 106/EALC 105. (Same as EALC 108.) LEC.

REL 109. Living Religions of the West, Honors. 3 Hours. HR AE42/GE3H / H.
A basic introduction to the major religious traditions in the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 107. LEC.

REL 124. Understanding the Bible. 3 Hours. HR AE42/GE3H / H.
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in the history and religious life of the people who produced and used them. Cannot be taken concurrently with REL 311 or JWSH 321 or REL 315. Not open to students who have taken REL 125 or JWSH 125. (Same as JWSH 124.) LEC.

REL 125. Understanding the Bible, Honors. 3 Hours. HR AE42/GE3H / H.
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in history and religious life of the people who produced and used them. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 124 or JWSH 124. (Same as JWSH 125.) LEC.

REL 130. Myth, Legend, and Folk Belief in East Asia. 3 Hours. NW / H/W.
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the world view of the ordinary peoples of East Asia. (Same as ANTH 293, EALC 130.) LEC.

REL 171. Religion in American Society. 3 Hours. HR AE41/GE3H / H.
A broad introduction to religion in American culture. This class emphasizes the well-established religions with large followings (viz. Judaism, Catholicism, Eastern Orthodoxy, and Protestantism). Some attention is also given to other religions active in America. Other topics covered include the relationship of church and state, religion in ethnic and racial minority groups, and women and religion. Not open to students who have taken REL 172. (Same as AMS 290.) LEC.

REL 172. Religion in American Society, Honors. 3 Hours. HR AE41/GE3H / H.
Honors version of REL 171. A broad introduction to religion in American culture. This class emphasizes the well-established religions with large followings (viz. Judaism, Catholicism, Eastern Orthodoxy, and Protestantism). Some attention is also given to other religions active in America. Other topics covered include the relationship of church and state, religion in ethnic and racial minority groups, and women and religion. Not open to students who have taken AMS 290. Open only to students in the University Honors Program or by permission of instructor. LEC.

REL 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Religious Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

REL 200. Study Abroad Introductions to: ______. 1-4 Hours. H.
This course is designed for the study of special topics in Religious Studies. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

REL 311. Religion of Ancient Israel. 3 Hours. H/W.
A study of the development of the Hebrew Bible from its earliest stages of oral tradition to its canonization with an emphasis on the relationship of the historical, intellectual, and cultural contexts shaping that development. (Same as JWSH 321.) Prerequisite: REL 124 or JWSH 124 or permission of instructor. LEC.

REL 315. History and Literature of Early Christianity. 3 Hours. H/W.
An examination of the literature produced by early Christians. In addition to New Testament texts, the course includes a broad range of diverse texts produced by early Christians, Jews, and others. Prerequisite: REL 124 or permission of instructor. LEC.

REL 325. Introduction to Judaism. 3 Hours. H.
Analyzes a selection of the core texts, teachings, and practices of Jewish religious traditions in terms of classical and contemporary understanding. (Same as JWSH 325.) LEC.
This course demystifies the Talmud, arguably the most central yet also
the most mysterious text of rabbinic Judaism. Students are introduced to
the scope, substance, styles, and major figures of the Talmud, and also
learn how the text came into being over the course of several centuries.
(Same as JWSH 326.) Prerequisite: REL 104, REL 107, or REL 124 or
REL 125, or permission of the instructor. LEC.

REL 330. Native American Religions. 3 Hours. NW AE41 / H.
A survey of religious traditions among selected Native American peoples.
Topics include religious freedom, ritual activity, cultural narrative (myth)
kinship, healing practices, ecology, government relations, impact of
colonization, impact of missionization, contact between cultures, and
secularization. Not open to students who have completed REL 331.
(Same as ISP 330.) LEC.

REL 331. Native American Religions, Honors. 3 Hours. NW AE41 / H.
A survey of religious traditions among selected Native American peoples.
Topics include religious freedom, ritual activity, cultural narrative (myth)
kinship, healing practices, ecology, government relations, impact of
colonization, impact of missionization, contact between cultures, and
secularization. Open only to students in the University Honors Program
or by permission of instructor. Not open to students who have completed
REL 330. (Same as ISP 331.) LEC.

REL 339. History of Religion in America. 3 Hours. H.
Survey of the development of religious institutions and ideas in America
from colonial times to the present. Emphasis is given to the mainstream
religious traditions (Protestant, Catholic, Jewish), but attention is also paid
to other phenomena, including nonwestern and native American religions.
LEC.

REL 341. Mysticism. 3 Hours. H.
The nature of mystical experience and reflection as expressed in selected
mystical literature of the world's religions. LEC.

REL 342. Religion and Literature. 3 Hours. H.
An examination of contemporary writings to explore the authors’
presuppositions concerning the nature of God, the nature of human
beings, the meaning of good and evil, the significance of human
existence, and the means of attaining fulfillment or salvation. LEC.

REL 345. Christianity. 3 Hours. H.
An introductory examination of the history, doctrines, and practices of
Christianity. Selected readings from the creeds, papal decrees, and major
Christian theologians. LEC.

REL 350. Islam. 3 Hours. NW AE42/GE3H / H/W.
Origins of Islam; the Prophet Muhammad; the Holy Koran; religious
symbols and moral mandates; historical developments. (Same as AAAS
349.) LEC.

REL 355. Muslim Societies. 3 Hours. H.
In this class we study Muslim societies throughout the world. We examine
variation between regions by looking at Muslim history and culture in
different countries, such as Pakistan, Indonesia, Mali, Bosnia, Egypt,
Yemen, and others. LEC.

REL 360. The Buddhist Tradition in Asia. 3 Hours. NW AE42/GE3H / H.
A historical and geographical survey of the Buddhist tradition from its
origins in India to modern day developments in the three major regional
Buddhist cultures of Southeast Asia, Tibet, and East Asia (China, Korea,
and Japan). Prerequisite: Prior coursework in Asian studies or permission
of instructor. LEC.

REL 365. Hinduism. 3 Hours. H.
An introduction to the diversity and richness of Hinduism from the Vedic
period to the present; explores Hindu practices, beliefs, and communities
using primary texts and extensive audio-visual resources. LEC.

REL 371. Religion and Society in Tension. 3 Hours. H.
Specific issues of conflict between the values of certain religious groups
and those of the larger society. Includes problems of church and state,
birth control and abortion, civil disobedience and dissent, education, war
and peace, and "civil religion. LEC.

REL 373. The Supreme Court and Religious Issues in the United
States. 3 Hours. H.
Historical study of the interpretation of the religion clauses of the First
Amendment with special reference to the questions of establishment, the
free exercise of religion, freedom of religious belief, worship, and action,
and religion and the public schools. Not open to freshmen. (Same as
HIST 373.) LEC.

REL 374. Religious Perspectives on Selfhood and Sexuality. 3 Hours.
H.
The nature of the self in its individual and social dimensions. Self
experienced and expressed in sexuality. Survey of viewpoints in religious
literature. LEC.

REL 375. The Supreme Court and Religious Issues in the United
States, Honors. 3 Hours. H.
Historical study of the interpretation of the religion clauses of the First
Amendment with special reference to the questions of establishment,
the free exercise of religion, freedom of religious belief, worship, and
action, and religion and the public schools. Open only to students in the
University Honors Program or by permission of the instructor. (Same as
HIST 375.) LEC.

REL 376. American Judaism: Life and Thought. 3 Hours. H.
A study of the conflicts between secularists and religiousists, between
Zionists and synagogue representatives, and the patterns of compromise
in American Jewish life. Questions of Americanism and Jewish survival,
support for the State of Israel, and the bureaucratic structure of rabbinical
training and philanthropy in America will be raised. LEC.

REL 377. Religious Ethics and Moral Decisions. 3 Hours. AE51 / H.
When faced with ethical dilemmas how do we decide what is the right
course of action? In what ways are our decisions affected by religious
ideas about morality? In this class we examine the ethical problems we
encounter every day in light of the solutions offered from various religious
traditions. Cases to be examined include issues of life and death, war
and peace, sexual morals, torture, the treatment of animals and the
environment. LEC.

REL 378. Religion and Moral Decisions, Honors. 3 Hours. H.
Honors version of REL 377. Introduction to religious viewpoints on
individual and social ethics. Influence of religious thought on the making
of moral decisions, and on value development. Examined in relation to
specific moral issues. Open only to students who have been admitted to
the University Honors Program or by permission of instructor. LEC.

REL 380. Philosophical Issues in Religion. 3 Hours. GE3H / H.
This course will consider, from a philosophical perspective, some of the
problems in religion which arise in the development of "Natural Theology"
broadly conceived. (Same as PHIL 350.) LEC.

REL 400. Study Abroad Special Topics: ______. 1-4 Hours. H.
This course is designed for the study of special topics in Religious Studies
equivalent to courses at the 300 to 600 level at KU. Coursework must be
arranged through the Office of KU Study Abroad. May be repeated for
credit if content varies. LEC.

</table>

The University of Kansas

1975
emphasis on the examination of primary documents. LEC.

REL 534. Studies in Ritual: ______. 3 Hours. H.
A study of ritual theory and a comparative study of ritual activity among selected religious traditions. May be taken more than once if content differs sufficiently. LEC.

REL 535. The History of Islam in Africa. 3 Hours. H/W.
A study of the history and institutions of Islam in Africa. Emphasis will be placed on the impact of Islam on African traditional religions and African civilization in general; the historiographical traditions of Islam in Africa. (Same as AAAS 542.) LEC.

REL 541. Gods and Goddesses of South Asia. 3 Hours. H.
This course explores the dynamic diversity of gods and goddesses in South Asian religious life through examination of their basic iconography, religious narratives and devotional poetry, temple images and architecture, ritual practices, performance traditions, and film. Prerequisite: An introductory course in religious studies or consent of instructor. LEC.

REL 543. Hindu Epics, Past and Present. 3 Hours. H.
This interdisciplinary course considers the roles that the two great Indian epics, the Mahabharata and the Ramayana, have played in the history of religion, literature, art, and politics in South Asia (and beyond). Prerequisite: An introductory course in religious studies or consent of instructor. LEC.

REL 545. Yoga in Theory, Practice, and History. 3 Hours. H.
Historical and thematic investigation into Yoga, including classical formulations, esoteric practices, and contemporary developments and debates. LEC.

REL 550. Gender Issues in Islam. 3 Hours. H.
Focusing on issues of gender, this course follows major religious developments in the Islamic tradition. Also examines how Muslim women have impacted those developments. LEC.

REL 551. Shari'a, Democracy, and Society. 3 Hours. H.
In this class we examine the question of whether or not democracy and shari'a can coexist. Is there a necessary opposition between democratic visions of society and the institutionalization of Islamic law? As a case study we look at changes in the modern Egyptian political system and the role religious ideals have played in these changes, especially the push for democracy. Prerequisite: An introductory course in religious studies or consent of instructor. LEC.

REL 552. Classical Islamic Literature. 3 Hours. NW / H.
An examination of major developments in classical Islamic literature in the Middle East and beyond, with attention to the poetic and prose works (in translation) that emerged from them. (Same as AAAS 552.) LEC.

REL 555. Buddhists and Buddhism in China. 3 Hours. NW AE42 / H.
A reading and media-rich survey of institutional, ritual, literary, educational, and exegetical practices that have shaped the lives of Buddhists in China, past and present. Alterities within the Buddhist tradition, and interactions with other religious options, are considered. (Same as EALC 555.) LEC.

REL 557. Modern Islamic Reform Movements. 3 Hours. H.
This course examines movements of renewal and reform in the Islamic world today. Also studies the conditions that gave rise to calls for reform throughout the Muslim majority world, as well as the impact reform movements have had on the practices and beliefs of Muslims today. LEC.
REL 558. Religion in Britain Since the Reformation: A Survey. 3 Hours. H.
This course deals analytically and synoptically with religion in Britain from the Reformation to the present with special reference to the Church of England, and focuses on the themes of ecclesiology, ecclesiastical polity, and political theology. It is essentially an examination of religious history from a perspective of history of ideas. (Same as HIST 558.) LEC.

REL 559. Religion in Britain Since the Reformation: A Survey, Honors. 3 Hours. H.
This course deals analytically and synoptically with religion in Britain from the Reformation to the present with special reference to the Church of England, and focuses on the themes of ecclesiology, ecclesiastical polity, and political theology. It is essentially an examination of religious history from a perspective of the history of ideas. Open only to students in the University Honors Program or by permission of instructor. (Same as HIST 559.) LEC.

REL 560. Classical and Contemporary Jewish Thought. 3 Hours. H.
An introduction to individual Jewish thinkers and collective projects from Philo to the present, including The Talmud and Midrash, Middle Age and Early Modern Jewish philosophical and Talmudic rationalism and mysticism. Considers such thinkers as Spinoza, Cohen, Soloveltchik, Rosenzweig, and Levinas. (Same as JWSH 560.) Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor. LEC.

REL 570. Studies in Judaism. 3 Hours. H.
A study of the major intellectual sources of the Jewish tradition from the Mishna, Talmud, Midrash, prayerbook, philosophers, the Zohar, and the Shulchan Aruch. (Same as JWSH 570.) Prerequisite: A course in Religious Studies or Jewish Studies numbered 300 or above. LEC.

REL 571. Religion in Kansas. 3 Hours. H.
A survey of religions active in Kansas in the past or present. The course has a strong fieldwork component in which students, after receiving training in fieldwork methods, conduct interviews and gather information to contribute to a public archive of religion in Kansas. FLD.

REL 580. Religious Perspectives on Illness, Health, and Healing. 3 Hours. H.
An examination of the perspectives of selected religious traditions on the meaning of illness and health, methods of diagnosis and treatment, and the place of these themes and experiences within each tradition. LEC.

REL 581. Psychology of Religion. 3 Hours. S.
Consideration of the psychological antecedents of religious experience, the nature of religious experience, and the behavioral consequences of religion. Focus will be on psychological theory and research relevant to religious thought, feeling, belief, and behavior. (Same as PSYC 581.) Prerequisite: PSYC 104. LEC.

REL 585. New Religious Movements (Western). 3 Hours. H.
A survey of the beliefs, practices, and social impact of religious minorities in the United States, both contemporary and historical, rooted primarily in Christianity and Judaism. LEC.

A survey of the beliefs, practices, and social impact of religious minorities in the United States, both contemporary and historical, which have developed primarily from sources other than Christianity and Judaism. LEC.

REL 601. Approaches to the Study of Religion. 3 Hours. H.
An introduction to the various methods by which social scientists, historians, philosophers, and theologians study the meaning, influence, and significance of religion as an integral part of society and its cultural heritage. Prerequisite: REL 104 required for undergraduate students. No prerequisite for graduate students. LEC.

REL 604. Religion and Political Theory. 3 Hours. S.
An examination of the relationship between religious faith and politics in Western political thought and theory. The approach will be both historical and philosophical, beginning with Moses on the one hand, and the Greeks on the other. Texts will include biblical, Greek philosophical, Jewish and Christian philosophical and theological writings. (Same as POLS 604.) Prerequisite: POLS 201, or for non-POLS majors completion of Western Civilization requirements, or consent of instructor. LEC.

REL 650. Sufism. 3 Hours. NW / H.
A survey of developments in Sufi (Islamic Mystical) thought, poetry, and ritual throughout Muslim history and across the Muslim world. (Same as AAAS 650.) Prerequisite: AAAS 349/REL 350 or permission of instructor. LEC.

REL 657. Gender in Islam and Society. 3 Hours. NW / H.
An investigation of the relationship between Islam, and gender roles and status in religious texts (Quran and Hadith) and in societies across the Muslim world, past and present. (Same as AAAS 657.) Prerequisite: AAAS349/REL 350 or permission of instructor. LEC.

REL 665. Religious Ethics. 3 Hours. H.
Main themes and traditions in ethical thought. Religious thought as basis of systems of ethics. Contemporary approaches to methods of value organization and moral choices. Prerequisite: A basic course in religious studies. LEC.

REL 667. Religious Perspectives on War and Peace. 3 Hours. H.
Views of war and peace in various faith traditions throughout the world. Examination of teachings and action of religious groups and selected individuals, including use of war rhetoric and differing theological and social understandings of peace. Lecture, seminar discussion, and research assignment require preparation and participation by students. Prerequisite: Junior standing or above. LEC.

REL 669. Human Conflict and Peace. 3 Hours. H.
Study of religious, cultural, and social traditions toward understanding the nature and purposes of human conflict. Analysis of various meanings of peace, with emphasis on study of nonviolent approaches to management of conflict. Class discussion, readings, and individual research projects. (Same as COMS 669.) Prerequisite: Junior standing or above. LEC.

REL 671. American Communes. 3 Hours. H.
An examination of utopian communities in North America from the seventeenth century to the present. The course will survey the history, literature, and social dynamics of representative communal societies and movements including the Shakers, the Hutterites, the Oneida Community, Catholic religious communities, egalitarian communities, and other religious and secular communities. LEC.

REL 677. Women in Christianity. 3 Hours. H.
An examination of the roles, images, and status of women in Christianity from its origin to the contemporary period and in its missionary expansion from the ancient Near East through Europe, North and South America, Africa, and Asia. LEC.

REL 704. Russian Orthodoxy in Historical Perspective. 3 Hours.
This course examines Russian Orthodoxy as a religious system and the institution of the Russian Orthodox Church from its first appearance in Russia to the present. It focuses on beliefs and practices of the clergy and the laity; institutional structures; the relationships between Church and State; interaction with non-Orthodox religious communities; responses to Soviet atheist policies; Orthodox influences on political theory, philosophy, literature, and the fine arts. (Same as REES 704.) LEC.
REL 727. Seminar in Religion, Text and Textuality. 3 Hours.
This seminar explores issues surrounding the production and use of authoritative religious texts (sacred texts) in religious traditions, including such topics as scripturality and canon, scriptural hermeneutics, and material and ritual dimensions of scriptural practice. Specific case studies and content to be selected by the instructor. SEM.

REL 732. Seminar in Western Religious Texts: _____. 3 Hours.
An analysis of selected religious text or texts from Judaism, Islam, or Christianity in translation. May be taken more than once if subject matter varies sufficiently. Prerequisite: REL 512, REL 515, REL 526, REL 530, REL 532, REL 539, or REL 570 or permission of the instructor. LEC.

REL 733. Seminar in Eastern Religious Texts: _____. 3 Hours.
Analysis of a selected religious text or texts from India, China, or Japan, in translation. May be taken more than once if subject matter varies sufficiently. (Same as EALC 733.) Prerequisite: REL 507, REL 508, REL 509, or permission of the instructor. LEC.

REL 772. Seminar in Religion and Modern Social Criticism: _____. 3 Hours.
Seminar focusing on religious issues in some important texts of modern social criticism from the French Revolution to the present day. Prerequisite: An introductory course in religion. LEC.

REL 773. Seminar in Religion and National Identity: _____. 3 Hours.
Analysis of selected issues wherein religion and the formation and definition of a selected nation or nations intersect. LEC.

REL 775. Seminar in Religion and Society in the West: _____. 3 Hours.
Analysis of selected Western religions and their relationships to selected Western societies. May be taken more than once if subject matter varies sufficiently. Prerequisite: REL 512, REL 515, REL 526, REL 530, REL 532, REL 539, or REL 570 or permission of the instructor. LEC.

REL 776. Seminar in Religion and Society in Asia: _____. 3 Hours.
Analysis of selected Asian religions and their relationship to selected Asian societies. May be taken more than once if subject matter varies sufficiently. (Same as EALC 776.) Prerequisite: REL 507, REL 508, REL 509, or permission of the instructor. LEC.

REL 777. Seminar in Religion and Gender. 3 Hours.
Examination of symbols, images, scriptures, rites, teachings and scholarship regarding gender definitions and performance in various religious traditions. LEC.

REL 787. Seminar in Ethical Issues in Health Care: _____. 3 Hours.
Interdisciplinary seminar, drawing on the literature of social, medical, and professional ethics, with special attention to religious perspectives on meanings of health and the delivery of health care. Of particular interest to health-related professions. Prerequisite: Permission of instructor. LEC.

REL 800. Readings. 1-4 Hours.
RSH.

REL 839. Topics in the History and Literature of Religion: _____. 3 Hours.
Selected studies, as announced in Schedule of Classes, in the history and religious literature of Judaism, Christianity, religion in America, Islam, and Asian religions. Course may be taken more than once if the subject matter varies sufficiently. Prerequisite: Permission of instructor. LEC.

REL 864. Topics in Religious Thought and Symbol: _____. 3 Hours.
Selected studies, as announced in Schedule of Classes, in Asian, Middle Eastern, and Western religious thought, mysticism, and religious ethics. Course may be taken more than once if subject matter varies sufficiently. Prerequisite: Permission of instructor. LEC.

REL 875. Topics in Religion and Society: _____. 3 Hours.
Special topics to be announced in Schedule of Classes, according to research interests of faculty and students. A particular aspect of the study of religion and culture will be emphasized. Course may be taken more than once if the subject matter varies. Prerequisite: Permission of instructor. LEC.

REL 877. Topics in Women and Religion: _____. 3 Hours.
Selected studies, as announced in Schedule of Classes, in the history and analysis of symbols, images, scriptures, rites, and teachings defining women’s roles in various religious traditions. Course may be taken more than once if the subject matter varies sufficiently. Prerequisite: Permission of instructor. LEC.

REL 899. Thesis. 1-3 Hours.
THE.
Bachelor of Arts and Bachelor of General Studies in Religious Studies

The undergraduate degree in the Department of Religious Studies is a research, analysis, and writing intensive program that features close work with faculty in small classroom settings. It seeks to develop a foundational knowledge of the world’s diversity of religious cultures and critical awareness of the ways in which religion shapes how we see and act toward ourselves, others, and the environment around us. Through the study of specific religious traditions and settings, students come away with a background that is invaluable to understanding and working with people of other cultures, whether in international business or simply as an informed global citizen.

Career Opportunities

Religious studies majors and minors develop expertise and skills that serve them well wherever life takes them. Our graduates have been successful in many different areas. Studying religion provides a solid foundation for work in fields as diverse as journalism, law, politics, nongovernmental organizations, ministry, and education. No matter what their intended careers, students benefit from the critical reading, writing, and analytical skills that the academic study of religion instills.

Admission to the Major

Application Term

Semester in which major admission criteria will be completed, normally no later than 60 hours, or for transfer students, during the initial term at KU. Application to this major after completion of 60 hours, or the initial KU term for transfer students, will likely delay graduation.

Courses Required

- **Composition.** Satisfied by ENGL 101 (unless the student has received a waiver or, for transfer students, an equivalent course).
- **Critical Reading and Writing.** Satisfied by ENGL 102 or ENGL 105 (unless the student has received a waiver or, for transfer students, an equivalent course).
- **Introduction to Religion.** Satisfied by REL 104.
- **Additional Religious Studies Course (Elective or Requirement).** Satisfied by any course with REL prefix.

Grade-Point Average Requirements

Satisfied by a 2.30 minimum GPA in required admission courses designated above. University Course Repeat Policy will apply.

Religious Studies Program

The curriculum is organized into the basic areas of Western, Eastern, and North American religions, and method and theory in the study of religion. A core of courses provides broad exposure to the range of issues, perspectives, and methods in the study of religion. The program encourages interdepartmental and interdisciplinary cooperation as part of a comprehensive program. This cooperation is reflected at the undergraduate level in cross-listed and cross-referenced courses and in the design of the major.

Requirements for the B.A. or B.G.S. Major

The major consists of at least 27 hours in religious studies. 15 hours must be in courses numbered 300 and above, and 8 of these junior/senior hours must be completed in residence at KU. The 27 hours may include no more than 12 transfer hours, no more than 12 hours from study abroad, and no more than 15 hours in combination of the two.

Religious Studies Major Course Requirements

**Religious Studies Core Knowledge and Skills (27)**

Majors must complete a course in each of the following areas:

- **Introduction to Religion.** Satisfied by:
  - REL 104 Introduction to Religious Studies 3
  - or REL 105 Introduction to Religious Studies, Honors

- **Understanding the Bible.** Satisfied by:
  - REL 124 Understanding the Bible 3
  - or REL 125 Understanding the Bible, Honors 3

- **Overview of Judaism, Christianity, or Islam.** Satisfied by 1 course (3 hours) chosen from the following:
  - REL 107 Living Religions of the West
  - REL 109 Living Religions of the West, Honors
  - REL 311 Religion of Ancient Israel
  - REL 315 History and Literature of Early Christianity
  - REL 325 Introduction to Judaism
  - REL 345 Christianity
  - REL 350 Islam
  - REL 570 Studies in Judaism

- **Overview of Religious Tradition other than Judaism, Christianity, or Islam.** Satisfied by 1 course (3 hours) chosen from the following:
  - REL 106 Living Religions of the East
  - REL 108 Living Religions of the East, Honors
  - REL 360 The Buddhist Tradition in Asia
  - REL 365 Hinduism
  - REL 507 Religion in India
  - REL 508 Religion in China
  - REL 509 Religion in Japan
  - REL 510 Religion in Korea
  - REL 555 Buddhists and Buddhism in China

- **Religion of North America.** Satisfied by 1 course (3 hours) chosen from the following:
  - REL 171 Religion in American Society
  - REL 172 Religion in American Society, Honors
  - REL 330 Native American Religions
  - REL 339 History of Religion in America
  - REL 373 The Supreme Court and Religious Issues in the United States
  - REL 375 The Supreme Court and Religious Issues in the United States, Honors
  - REL 377 Religious Ethics and Moral Decisions
  - REL 378 Religion and Moral Decisions, Honors
  - REL 585 New Religious Movements (Western)
  - REL 586 New Religious Movements (Nonwestern)
  - REL 671 American Communes
Religious Studies Required Electives. Satisfied by 3 courses (9 hours) within, or cross-listed with, the Religious Studies Department course offerings.

Capstone Experience. Satisfied by:

REL 490 Senior Seminar in Theories and Methods 3

**Religious Studies Major Hours & Major GPA**

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 27 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major, of which 9 must be at the junior/senior level (300+).

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

A sample 4-year plan for the BA degree in Religious Studies can be found here: Religious Studies (http://catalog.ku.edu/liberal-arts-sciences/religious-studies/ba-bgs/ba-religious-studies), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Religious Studies will be coming soon.

**Departmental Honors**
To be eligible for honors in religious studies, an undergraduate student must have a minimum grade-point average of 3.25 overall and of 3.5 in the department. The student must also complete and defend an individual research project, as evidenced by completion of at least 3 hours of REL 499: Undergraduate Honors Research with a grade of B or better. Interested students should contact the Undergraduate Director for more information.

**Minor in Religious Studies**
The undergraduate minor in the Department of Religious Studies is a research, analysis, and writing intensive program that features close work with faculty in small classroom settings. It seeks to develop a foundational knowledge of the world’s diversity of religious cultures and critical awareness of the ways in which religion shapes how we see and act toward ourselves, others, and the environment around us. Through the study of specific religious traditions and settings, students come away with a background that is invaluable to understanding and working with people of other cultures, whether in international business or simply as an informed global citizen.

**Career Opportunities**
Religious studies majors and minors develop expertise and skills that serve them well wherever life takes them. Our graduates have been successful in many different areas. Studying religion provides a solid foundation for work in fields as diverse as journalism, law, politics, nongovernmental organizations, ministry, and education. No matter what their intended careers, students benefit from the critical reading, writing, and analytical skills that the academic study of religion instills.

**Requirements for the Minor**

**Religious Studies Minor Course Requirements**
Students selecting this minor must complete a course in each of the following areas:

**Introduction to Religion (3)**
Satisfied by one of the following:

</table>
Satisfied by completing 6 additional hours in REL courses at the 300 level or above.

**Religious Studies Minor Hours & Minor GPA**

While completing all required courses (above), minors must also meet each of the following hour and grade-point average minimum standards:

**Minor Hours**
Satisfied by 18 hours of major courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

---

**Master of Arts in Religious Studies**

**Why study religious studies?**

Religions have been and remain among the most powerful forces shaping human history. Their discourses and practices inform the way we perceive ourselves, those around us, and existence at large, even when we are not actively religious. They are central to understanding both what divides us and what unites us. The academic study of religion is a trans-disciplinary endeavor to understand from an objective perspective how religious traditions shape the lives of their adherents, without seeking to promote or disprove any specific belief system. Religious Studies acquaints students with the diversity of religious cultures and introduces them to key methods and theories employed in their examination as "religion."

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

A B.A. in religious studies is not required for admission, but the department expects applicants to show on their transcripts significant exposure to the humanities and social sciences.

The department requires Graduate Record Examination scores for admission. Submit your graduate application online (http://wwwgraduate.ku.edu). Send all other requested application materials to

**The University of Kansas**
**Department of Religious Studies**
**Smith Hall, Room 109A**
**1300 Oread Ave.**
**Lawrence, KS 66045-7603**

---

**M.A. Degree Requirements**

**Concentration**

In addition to developing a general competence in the larger field of religious studies, its approaches, and its methods, students craft their programs of study around an area of concentration of their own design. Concentrations particularly supported by faculty expertise include:

- Indigenous religions
- Islamic studies
- Jewish studies
- Religion in the Ancient Near East and Mediterranean
- Religion in Asia
- Religion in the United States
- Religious ethics
- Theories and methods of studying religion

**Degree Requirements with Thesis**

The thesis track in religious studies comprises 3 aspects: required course work, portfolio exam, and thesis.

1. A candidate for this degree must complete 30 graduate credit hours with the following stipulations:
   - (a) At least 18 credit hours must be in courses in religious studies and the rest in fields related to a declared concentration.
   - (b) Course work must include at least 12 hours (4 courses) in the articulated concentration.
   - (c) Upon completion of 12 hours of course work, the student articulates an area of concentration and a program of study, which will culminate in the production and oral defense of a research portfolio. The student and the advisor determine whether the student will pursue a thesis or a nonthesis track and plan the remaining course work, including the acquisition of relevant linguistic and research skills.
   - (d) Each student must complete REL 601 Approaches to the Study of Religion the first year in the program.
   - (e) Each student must complete 2 seminars (total of 6 credit hours) from the following set of theory and method-oriented seminars:

<table>
<thead>
<tr>

• (g) Each student must complete 9 hours in courses numbered 700 or above, excluding REL 800 Readings and REL 899 Thesis. Courses at the 700 level in religious studies are conducted as seminars.

2. Each student must produce and give an oral defense of a research portfolio.

3. Each student must write and successfully defend a thesis that meets minimum department and general requirements. 3 hours in REL 899 Thesis may be credited toward fulfillment of the required 30 credit hours.

**Degree Requirements, Nonthesis**

The nonthesis track comprises 2 aspects: required course work and portfolio exam.

1. A candidate for this degree must complete 33 graduate credit hours with the following stipulations:

   • (a) At least 21 of the 33 graduate hours must be in courses in religious studies and the rest in fields related to an articulated concentration.

   • (b) Course work must include at least 12 hours (4 courses) in the articulated concentration.

   • (c) Upon completion of 12 hours of course work, the student articulates an area of concentration and program of study, which will culminate in the production and oral defense of a research portfolio. The student and the advisor plan the remaining course work, including the acquisition of relevant linguistic and research skills.

   • (d) Each student must complete REL 601 Approaches to the Study of Religion the first year in the program.

• (g) Each student must complete 9 hours in courses numbered 700 or above, excluding REL 800 Readings and REL 899 Thesis. Courses at the 700 level in religious studies are conducted as seminars.
2. Each student must produce and give an oral defense of a research portfolio.

Transfer of Credit

Transfer of graduate credit is allowed, including study abroad course credit, from other accredited institutions, up to a total of 6 hours. (View the policy on graduate credit, including transfer credit in the Graduate Studies (p. 2369) section of the online catalog.) Bachelor's degree graduates from KU are permitted to transfer 8 hours. The hours may be used only when the M.A. is completed within 6 years of the time the credit was given. Application for transfer must be made by the student and the advisor to the committee on graduate studies. Normally, such applications are not made until after 12 hours of KU course work have been completed. If the committee approves, applications are forwarded for approval.

Russian, East European, and Eurasian Studies Program

Why study Russian, East European & Eurasian Studies?

The interdisciplinary study of Russia, Eastern Europe, and Eurasia creates culturally informed citizens who can act on national and international issues. The University of Kansas Russian, East European & Eurasian Studies (REES) program covers a broad geographic region, home to rich and diverse cultures that have had an enormous impact on today's world. It is central to political, economic, cultural, and environmental issues of the present and the future.

Undergraduate Programs

The interdisciplinary bachelor's degree is available only as a co-major or minor in conjunction with a major in one of the traditional academic disciplines. The co-major or minor also can be combined with a bachelor's degree in such schools as business or journalism.

Graduate Programs

A KU masters degree in Russian, East European & Eurasian Studies (REES) offers future professionals a comprehensive and interdisciplinary knowledge of Russia, Ukraine, the South Caucasus, Central Asia, and countries of the West Slavic (Poland, Czech Republic) and South Slavic (Balkan) regions. The program develops language competency appropriate for a range of careers in the government, business, law, international development and non-profit sectors. And for those students interested in pursuing a PhD, the REES MA prepares for advanced graduate study in literature and the arts, history, political science, geography, and other disciplines.

ABOUT THE PROGRAM

The KU REES program is interdisciplinary and draws on over 60 faculty members and courses from 17 different KU departments and schools. Most REES MA students have completed an undergraduate major in the social sciences or humanities prior to beginning their graduate study, but successful REES graduate students have come from any number of other academic disciplines including business, law, and the sciences.

Our program requires advanced level competence in a REES-area language, which includes: Bosnian-Croatian-Serbian, Czech, Polish, Russian, Slovene, Tajik/Farsi, Turkish, Ukrainian, Uyghur, and Yiddish. It is recommended that incoming graduate students have at least 2 years of former language study or participate in an intensive summer or semester language program before they begin their REES MA at KU.

PROGRAM SCHEDULE

The traditional time period for a REES MA is 2 years, although 18-month and 12-month (see REES MA FAST Track) options are available. Most graduate students begin their program in a fall semester. Successful graduates of the program will complete 30 credit hours of intensive REES language and area studies. The 30 credit hours are broken down as follows: 2 methodology seminars (6 CR); 3 courses in your area of concentration (9 CR); 4 elective disciplinary courses outside of your area of concentration (12 CR); 1 second-semester advanced language course (3 CR).

METHODOLOGY SEMINARS

REES graduate students are required to take 2 methodology seminars intended to develop their advanced research skills using interdisciplinary and advanced target language resources. REES 898 is normally taken at the beginning of the degree program, and emphasizes the learning of tools and methods necessary to study the REES world area. REES 899 is taken towards the end of the degree program. In this seminar, students write an interdisciplinary capstone research paper using materials in the student’s chosen target language.

AREA CONCENTRATION AND ELECTIVE COURSES

The REES MA program offers courses in 5 thematic areas. MA students will take 3 courses in the thematic area of their choosing, determined by their personal interests and professional goals. They are then required to take one elective disciplinary course in each of the other 4 thematic areas for a full and complete understanding of the REES world area. The 5 thematic areas are: 1) Literature and the Arts; 2) History; 3) Political Science; 4) Philosophy & Religion; 5) Economics, Business & Geography.

MA PORTFOLIO AND FINAL EXAM PROCEDURE

CREES has replaced the traditional written MA exam and thesis with a progressive academic examination model known as the MA portfolio, a body of work that showcases the student’s interdisciplinary knowledge and expertise of the REES world area. At the end of the student’s final semester, the portfolio is read by a committee of 3 graduate faculty and tested through a 90-minute oral examination.

ADMISSION

While a student’s GPA and GRE scores are helpful in determining his/her overall academic potential, the department uses a holistic approach toward admissions, looking at all elements of the application packet before making a decision (language preparation, transcripts, letters of recommendation, GRE scores, statement of intent). CREES reviews applications on a rolling basis and graduate students are able to begin their program in the Fall, Spring, or Summer semesters. If you would like to be considered for priority admission and funding, please submit all materials by January 1st.

Center for Russian, East European, and Eurasian Studies

The Center for Russian, East European, and Eurasian Studies promotes language and area study in an integrated, interdisciplinary framework and in traditional academic disciplines. The center administers a co-
major and minor and M.A. degree programs in Russian, East European, and Eurasian studies and supports study abroad programs in the region, including in Croatia, Kazakhstan, and Ukraine. The center also coordinates and sponsors conferences, lectures, theatre, and outreach activities of interest to KU students, faculty members, K-12 teachers, and the community. It serves as a resource to the state, the Great Plains, and the nation.

The Center for Russian, East European & Eurasian Studies (CREES) at the University of Kansas (KU) has been a national leader for the study of the former Soviet Union and Eastern Europe since 1959. Our purpose and objectives are to:

- Promote the study of Russia, Eastern Europe, and Eurasia within an integrated, interdisciplinary framework, as well as within each of the traditional academic disciplines;
- Promote the study of languages in the Department of Slavic Languages and Literatures, at all levels of instruction and research;
- Promote better understanding of the societies and cultures of the Russian, Eastern European and Eurasian area through exchanges of students, faculty, and other forms of cooperation with universities and other institutions in those areas;
- Promote the study of Slavic languages and of Russia, Eastern Europe, and Eurasia in schools and colleges throughout Kansas and the surrounding area;
- Encourage coordinate, sponsor and support activities of interest to the students and faculty in the Russian, East European and Eurasian area;
- Serve as a local, regional, and national resource to educational, government, business, and community constituencies seeking information about the Russian, East European and Eurasian area.

HISTORY

KU first offered Russian language to its students in 1943. KU has offered credentials in some variant of Slavic or Soviet & East European Studies since 1959, and a master’s degree since 1968. It was first designated a US/ED National Resource Center in 1965. CREES Directors have included some of the top experts in Soviet and Russian history, Slavic Literature, Philosophy, and Political Science: Oswald P. Backus (1955-1965); Herb Ellison (1965-1968); Roy Laird (1969); James Scanlan (1969); William Fletcher (1970-1992); Maria Carlson (1993-2003); Paul D’Anieri (2003); Erik Herron (2003-2006); William J. Comer (2007); Edith W. Clowes (2008-2012); Mariya Y. Omelicheva (2012-present).

FACULTY

CREES has over 50 teaching faculty members, representing a broad range of cooperating departments of the KU College of Liberal Arts and Sciences and professional schools. Our faculty are internationally visible in their field and have extensive foreign experience. And our teaching faculty are supplemented by visiting foreign faculty and scholars who enhance & expand KU offerings and serve as regional resources each year.

Courses

REES 110. Understanding Russia and Eastern Europe. 3 Hours. SC AE42 / S.
A multidisciplinary introduction to the former communist states of Russia, the western Newly Independent States, Central Europe, and the Balkans. The course addresses the geography and history of the region, as well as the cultures of its peoples, as presented in literature, film, and music.

REES 184. Russian, East European, and Eurasian Studies Program

Special attention is devoted to the current political, economic, and social situations, as they are reflected by the transition from communism and the rise of nationalism. LEC.

REES 111. Understanding Russia and Eastern Europe, Honors. 3 Hours. SC AE42 / S.
A multidisciplinary introduction to the former communist states of Russia, the western Newly Independent States, Central Europe, and the Balkans. The course addresses the geography and history of the region, as well as the cultures of its peoples, as presented in literature, film, and music. Special attention is devoted to the current political, economic, and social situations, as they are affected by the transition from communism and the rise of nationalism. Prerequisite: Open only to students in the University Honors Program, or by permission of instructor. LEC.

REES 177. First Year Seminar: ____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Russian, East European, and Eurasian Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

REES 220. Societies and Cultures of Eurasia. 3 Hours. NW AE42 / S.
A broad, survey-type course that examines all the former Soviet republics-Ukraine, Belarus, Moldova, Lithuania, Latvia, Estonia, Georgia, Armenia, Azerbaijan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan-with additional coverage of neighboring regions. The course addresses the history of the region, literature, culture, geography, religion, and the building of post-Soviet states and societies. LEC.

REES 221. Societies and Cultures of Eurasia, Honors. 3 Hours. NW AE42 / S.
Examines the unique cultures and societies of the Eurasian region (Georgia, Azerbaijan, Armenia, Kazakhstan, Uzbekistan, Kyrgyzstan, Turkmenistan, Tajikistan and to a lesser degree, Russia, Mongolia and Afghanistan). For the better part of the 20th Century, this distinct region of the world was hidden beneath the communist veneer of the Soviet Union. With the collapse of the USSR, the countries of this region are returning to their historic roots, and this course introduces students to the history, politics, economics, literature and general culture of these countries. Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

REES 480. Topics in Russian and East European Studies: ____. 1-3 Hours. H.
Interdisciplinary examination of topics involving two or more disciplines in Russian, East European, and Eurasian studies. LEC.

REES 485. War and Peace in Russian Culture. 3 Hours. H/W.
Lectures, readings, oral discussion, and written analyses of selected major works of Russian writing and other modes of creative expression and discourse that treat the subject of war and peace, such as imaginative literature, works of history, memoirs, cinema, music, and painting. Reading examples are The Song of Igor's Campaign, Alexander Pushkin's The Captain's Daughter and A History of Pugachev, Leo Tolstoy's War and Peace, Nadezhda Durova's The Notes of a Girl-Cavalryman, Boris Pasternak's Doctor Zhivago, and George Kennan's Russia Leaves the War. Not open to students who have taken REES 685. LEC.

REES 492. Research Methods in Russian, East European, and Eurasian Studies. 3 Hours. AE61 / H.
Development of interdisciplinary research skills and familiarity with resources and issues in the study of Russian, East European, and Eurasian Studies. Preparation for REES 496. LEC.
REES 496. Capstone Research Seminar in Russian and East European, and Eurasian Studies. 3 Hours. AE61 / H.
Interdisciplinary original research conducted using at least one REES language and resulting in a research paper. Prerequisite: REES 492. LEC.

REES 498. Directed Readings. 1-3 Hours. H.
Individual and supervised readings in selected areas of Russian, East European, and Eurasian Studies. Prerequisite: Prior permission of instructor and either CREEES director or associate director. LEC.

REES 499. Capstone Research Seminar in Russian, East European, and Eurasian Studies, Honors. 3 Hours. AE61 / H.
Research and writing of a substantial paper, involving interdisciplinary original research and use of sources in at least one REES language, and presentation of this paper to an Honors committee of three REES faculty members. This thesis must be substantially different from any other Honors thesis. Prerequisite: REES 492. LEC.

REES 510. Understanding Central Asia. 3 Hours. NW AE42 / S/W.
An intensive, multidisciplinary survey of Central Asia, focusing on the former Soviet republics-Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan-with additional coverage of neighboring regions (the Caucasus and the Caspian basin, Afghanistan, and western China). The course addresses the history of the region (from the Silk Road to Soviet rule), geography, religion, and the building of post-Soviet states and societies. (Same as GEOG 590.) LEC.

REES 512. Siberia: Yesterday and Today. 3 Hours. NW AE42 / H/W.
An interdisciplinary course examining the development of Siberia from its beginnings to the present day. Topics to be covered are selected from the following list: topography and natural resources; conquest and exploitation by Russian and other European settlers; Siberia's role as a place of imprisonment and exile; the development of towns and transportation systems; Siberian historiography; Siberian Russian literature; and Siberia's place in Russia's economy and national defense. LEC.

REES 513. Siberia: Russia's Eastern Frontier. 3 Hours. NW AE42 / H/W.
An interdisciplinary course examining the terrain, peoples, and cultures of the vast expanse in northern Asia known as Siberia. Areas of inquiry include geology, archeology, ethnography, religions, folk culture, the arts, science and education, politics, and environmental problems. With an emphasis on the natural and social sciences, and exploration of the relationship between Siberia and its neighbors in all directions, including the United States (Alaska, "Russian America"), this course can be taken without duplication by students who have already taken REES 512 (or SLAV 512) Siberia Yesterday and Today. LEC.

REES 532. Russian Strategy and Military Power. 3 Hours. H.
Examines the central role the Russian military has played in its country's politics, society, and culture in the modern period. Treats Russia's victories and defeats in war, the course highlights the continuities in Russian strategic practices and illuminates the current and future strategic policies and military developments of the contemporary Russian state. LEC.

REES 573. Borderland Between Russia & Europe. 3 Hours. H/W.
Examines the history of relations between the governments, emerging national elites, and populations of Russia, Ukraine, Poland, and other East European countries, and the different regional perceptions and stereotypes, including the new post-Soviet states and their European neighbors. LEC.

REES 574. Ethnicity and Nationalism in Eastern Europe. 3 Hours. AE42 / H/W.
Examines the emergence and evolution of regional ethno-cultural and national identities in Eastern Europe. Discusses the theories and definitions of ethnicity, nationality, and nationalism, and offers a practical approach to understanding nationalism's and nationalist movements in Eastern Europe. LEC.

REES 646. Translation in Theory and Practice. 3 Hours. H.
Students undertake substantial work in the translation of non-technical writing. (e.g. poems, short stories, novels, essays, works of history, scientific treatises), from any REES language into English, and examine the practical and theoretical problems encountered in translation from the source to the target language. Prerequisite: BCRS 508, PLSH 508, RUSS 508, or permission of instructor. LEC.

REES 685. War and Peace in Russian Culture (in Russian). 3 Hours. H/W.
This course is taught in Russian. Lectures, readings, oral discussion, and written analyses of selected major works of Russian writing and other modes of creative expression and discourse that treat the subject of war and peace, such as imaginative literature, works of history, memoirs, cinema, music, and painting. Reading examples are Slovo o polku Igoreve. Pushkin’s Kapitanskaia dochka and Istoriiia Pugacheva, Tolstoy’s Voina i mir, Evgenii Tarle’s Napoleon, Pasternak’s Doktor Zhivago and Andrei Petukhov’s Pamiat’ o sluzhbe. Not open to students who have taken REES 485. Prerequisite: 3 years of Russian at the college level. LEC.

REES 687. Biography of a City: St. Petersburg. 3 Hours. AE42 / H.
Examination in depth of the historical, social, intellectual, and artistic development of St. Petersburg as a major urban center. LEC.

REES 704. Russian Orthodoxy in Historical Perspective. 3 Hours.
This course examines Russian Orthodoxy as a religious system and the institution of the Russian Orthodox Church from its first appearance in Russia to the present. It focuses on beliefs and practices of the clergy and laity; institutional structures; the relationships between Church and State; interactions with non-Orthodox religious communities; responses to Soviet atheist policies; Orthodox influences on political theory, philosophy, literature, and the fine arts. (Same as REL 704.) LEC.

REES 715. Seminar in the History of Russian Thought. 3 Hours.
Topics in the development of social radicalism and of philosophical positivism and materialism from Radischev through the Russian Marxists. A reading knowledge of Russian is desirable but not required. Prerequisite: REES 723 or PHIL 580. LEC.

REES 799. Directed Readings in Russian and East European Studies. 1-5 Hours.
RSH.

REES 895. Special Problems in Area Studies: _____. 3 Hours.
Interdisciplinary examination of topics involving two or more of the cooperating disciplines in Russian and East European studies. LEC.

REES 897. Research. 1 Hour.
Enrollment to fulfill Masters continuous enrollment rule. Prerequisite: Completion of all degree requirements except submission of seminar paper or comprehensive examination. RSH.

REES 898. Seminar in Russian and East European Studies. 3 Hours.
Mastery of interdisciplinary research skills, and knowledge of resources and scholarship on the study of Russian, east European, and Eurasian Studies. LEC.
REES 899. Capstone Research Seminar in Russian, East European, and Eurasian Studies. 3 Hours.
Research, write, and present a professional-quality paper, involving interdisciplinary original research, consultation with REES faculty, and substantial use of sources in at least one REES language. Prerequisite: REES 898. SEM.

Co-Major in Russian, East European, and Eurasian Studies

Why study Russian, East European & Eurasian Studies?
The interdisciplinary study of Russia, Eastern Europe, and Eurasia creates culturally informed citizens who can act on national and international issues. The University of Kansas Russian, East European & Eurasian Studies (REES) program covers a broad geographic region, home to rich and diverse cultures that have had an enormous impact on today’s world. It is central to political, economic, cultural, and environmental issues of the present and the future.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the Co-Major
Russian, East European, and Eurasian Studies Co-Major Course Requirements
Offered in conjunction with a major in another academic area; students take intensive REES language and course work to enhance their traditional disciplinary study. The most common REES co-major combinations are with Global & International Studies, Slavic Languages & Literatures, Political Science, and History.

Prerequisite Language Skills (30)
Students selecting this co-major must complete 4th semester proficiency in a Russian, Eastern European, or Eurasian language (take the courses for majors):

Bosnian-Croatian-Serbian:
- BCRS 208 Intermediate Bosnian/Croatian/Serbian II 3
Czech:
- CZCH 208 Intermediate Czech II 3
Polish:
- PLSH 208 Intermediate Polish II 3
Russian:
- RUSS 208 Intermediate Russian II 6
Slovenian:
- TAJ 210 Intermediate Tajik I 3
Turkish:
- TURK 208 Intermediate Turkish II 3
Uyghur:
- UYGR 202 Intermediate Uyghur II 3
Ukrainian:
- UKRA 208 Intermediate Ukrainian II 3
Yiddish:
- YDSH 216 Intermediate Yiddish II 3

Understanding Russia and Eastern Europe or Societies and Cultures of Eurasia (3)
Satisfied by one of the following:
- REES 110 Understanding Russia and Eastern Europe
- REES 111 Understanding Russia and Eastern Europe, Honors
- REES 220 Societies and Cultures of Eurasia
- REES 221 Societies and Cultures of Eurasia, Honors

REES language at the advanced level (0)
(6th semester)

Slavic Languages and Literatures (0)
500-level or above

REES Required Electives (0)
Satisfied by the completion of 1 course in each of the following categories:

Literature and the Arts
- ANTH 315 The Prehistory of Art
- HWC 520 Literature in Translation: _____ (Russian)
- SLAV 140 Introduction to Russian Culture
- SLAV 141 Introduction to Russian Culture, Honors
- SLAV 144 Survey of Russian Literature in Translation
- SLAV 145 Survey of Russian Literature in Translation, Honors
- SLAV 148 Introduction to Slavic Folklore
- SLAV 506 West Slavic Literature and Civilization (Polish and Czech)
- SLAV 520 Russian Phonetics, Phonology, and Inflectional Morphology
- SLAV 534 Tolstoy
- SLAV 561 Readings in Slavic Language: _____ (Slovene)
- SLAV 662 Russian Literary Modernism: 1880-1930
- SLAV 678 Readings in Slavic Linguistics
- SLAV 679 Topics in: _____ (Russian Language Pedagogy)
The University of Kansas

THR 302  Undergraduate Seminar in: _____ (Theatre and Genocide)

History

HIST 115  French Revolution to the Present: Europe 1789-Present
HIST 340  The History of the Second World War
HIST 444  Frozen in Time: Politics and Culture in the Cold War, 1945-75
HIST 510  Topics in: _____ (Siberia: Yesterday and Today)
HIST 564  Medieval Russia

American, European, & Global Studies

AMS 332  The United States in Global Context
SOC 332  The United States in Global Context
EURS 430  European Civilization in World Context: _____ (European Identity)
EURS 604  The European Union

Political Science

POLS 171  Introduction to International Politics Honors
POLS 654  Politics and Government of Russia and the Central Eurasian States
POLS 669  Topics in Comparative Politics: _____ (European Union Politics)
POLS 980  International Organizations

Economics, Geography, Business, Law

ECON 505  History of Economic Analysis
ECON 620  Elements of Mathematical Economics
EVRN 320  Environmental Policy Analysis
GEOG 379  Topics in Cultural Geography: _____ (Environmental Policy)
IBUS 701  International Business

Capstone (6)

Satisfied by the following, completed in the senior year.
Research Methods in Russian, East European, and Eurasian Studies.
Satisfied by:

REES 492  Research Methods in Russian, East European, and Eurasian Studies

Research Seminar in Russian, East European, and Eurasian Studies.
Satisfied by:

REES 496  Capstone Research Seminar in Russian and East European, and Eurasian Studies

Majors are strongly encouraged to study abroad. Please see your advisor about this opportunity.

Russian, East European, and Eurasian Co-Major Hours & GPA

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

Co-Major Hours
Satisfied by 30 hours of co-major courses.

Co-Major Hours in Residence
Satisfied by a minimum of 9 hours of KU resident credit in the co-major.

Co-Major Junior/Senior (300+) Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the co-major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/ Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Below is a sample 4-year plan for students pursuing the co-major in Russian, East European, and Eurasian Studies (REES). The REES co-major must be completed along with a full major. The co-major requires 4th-semester language proficiency in Russian, Eastern European, or Eurasian language, as well as one additional semester of an advanced language course (i.e. 5th semester language course).

To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2 The BA degree requires 4th-semester language proficiency. The REES co-major requires 4th-semester language proficiency specially in a Russian, Eastern European, or Eurasian language.
3 Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
4 This degree plan does not include specific major requirements as teh REES co-major can be paired with any major. Most majors are approximately 30 credit hours, of which 15 credit hours must be at the Jr/Sr (300+) level.
5 The REES co-major requires 1 elective course from each of the following categories: Literature and the Arts; History; American, European, and Global Studies; Political Science; and Economics, Geography, Business, Law. There is not a specific order these must be taken, but it is recommended to take Jr/Sr level courses when possible.

Please note:
All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. Overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Honors

Departmental Honors

Honors in Russian, East European, and Eurasian studies is open to REES co-majors who have earned, both at the time of entry into the program and at graduation, an overall grade-point average of 3.25 or higher, and 3.5 or higher in courses that satisfy requirements for the REES co-major.

Students must complete REES 492 Research Methods in Russian, East European, and Eurasian Studies and REES 499 (Honors) Capstone Seminar in Russian, East European, and Eurasian Studies with a grade of B or better. The research paper produced in REES 499 must demonstrate the student’s proficiency in at least one of the REES languages through the use of foreign language sources. The paper is evaluated by an honors committee of at least three REES faculty members who have read and commented on the research paper and heard its oral defense. The committee is constituted by the student in consultation with either the director or associate director of CREES.

Study Abroad

Though not required, study abroad is strongly encouraged. Courses taken abroad may count toward the co-major if approved by the REES advisor.

Consult the Center for Russian, East European, and Eurasian Studies (http://www.crees.ku.edu) or the Office of Study Abroad (http://www.studyabroad.ku.edu) for information about programs.

Minor in Russian, East European, and Eurasian Studies

Why study Russian, East European & Eurasian Studies?

The interdisciplinary study of Russia, Eastern Europe, and Eurasia creates culturally informed citizens who can act on national and international issues. The University of Kansas Russian, East European & Eurasian Studies (REES) program covers a broad geographical region, home to rich and diverse cultures that have had an enormous impact on today’s world. It is central to political, economic, cultural, and environmental issues of the present and the future. Similar to the co-major, the minor complements traditional disciplinary study with REES coursework and general area knowledge.

Requirements for the Minor

Russian, East European, and Eurasian Studies Minor Course Requirements

Students selecting this minor must complete the following:

Understanding Russia and Eastern Europe or Societies and Cultures of Eurasia (3)
Satisfied by one of the following: 3
REES 110 Understanding Russia and Eastern Europe
or REES 111 Understanding Russia and Eastern Europe, Honors
REES 220 Societies and Cultures of Eurasia
or REES 221 Societies and Cultures of Eurasia, Honors
REES Required Electives (15)
Satisfied by the completion of 1 course in each of the following 5 categories: 15
Literature and the Arts
ANTH 315 The Prehistory of Art
HWC 520 Literature in Translation: _____ (Russian)
SLAV 140 Introduction to Russian Culture
SLAV 141 Introduction to Russian Culture, Honors
SLAV 144 Survey of Russian Literature in Translation
The University of Kansas

SLAV 145  Survey of Russian Literature in Translation, Honors
SLAV 148  Introduction to Slavic Folklore
SLAV 506  West Slavic Literature and Civilization (Polish and Czech)
SLAV 520  Russian Phonetics, Phonology, and Inflectional Morphology
SLAV 534  Tolstoy
SLAV 561  Readings in Slavic Language: _____ (Slovene)
SLAV 662  Russian Literary Modernism: 1880-1930
SLAV 678  Readings in Slavic Linguistics
SLAV 679  Topics in: _____ (Russian Language Pedagogy)
THR 302  Undergraduate Seminar in: _____ (Theatre and Genocide)

History
HIST 115  French Revolution to the Present: Europe 1789-Present
HIST 340  The History of the Second World War
HIST 444  Frozen in Time: Politics and Culture in the Cold War, 1945-75
HIST 510  Topics in: _____ (Siberia: Yesterday and Today)
HIST 564  Medieval Russia

American, European, & Global Studies
AMS 332  The United States in Global Context
SOC 332  The United States in Global Context
EURS 430  European Civilization in World Context: _____
(European Identity)
EURS 604  The European Union

Political Science
POLS 171  Introduction to International Politics Honors
POLS 654  Politics and Government of Russia and the Central Eurasian States
POLS 669  Topics in Comparative Politics: _____
(European Union Politics)
POLS 980  International Organizations

Economics, Geography, Business, Law
ECON 505  History of Economic Analysis
ECON 620  Elements of Mathematical Economics
EVRN 320  Environmental Policy Analysis
GEOG 379  Topics in Cultural Geography: _____
(Environmental Policy)
IBUS 701  International Business

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Master of Arts in Russian, East European, and Eurasian Studies

Why study Russian, East European, and Eurasian studies?
The interdisciplinary study of Russia, Eastern Europe, and Eurasia creates culturally informed citizens who can act on national and international issues.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Most applicants hold B.A. degrees in the social sciences or humanities with grade-point averages of 3.0 or higher. Students with B.S. or professional degrees are also eligible to apply. Some students may consider completing the M.A. degree in conjunction with academic or professional study in another department or school.

Students should submit the following application materials:

• Application for admission, sent to the Graduate Application Processing Center of the University of Kansas.
• A nonrefundable application fee (payable to the University of Kansas; see Admission in the Graduate Studies (p. 2369) section of the online catalog).
• 1 original transcript of all college-level work.
• Graduate Record Examination scores. International students should also submit Test of English as a Foreign Language scores.
• 3 letters of recommendation commenting on the student’s ability to succeed at graduate work. These letters should be accompanied by a signed waiver form, indicating whether the applicant has waived his or her rights to see the letter.
• A 2-page statement of the student’s educational and professional objectives.

Applications to begin the M.A. program should be submitted by January 1 for admission for the following fall semester. Applications may be accepted off-cycle; please consult with the graduate advisor.

Submit your graduate application online (http://www.graduate.ku.edu). Send all other requested application materials to the program:

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.
The Foreign Affairs Studies (FASt) concentration within the existing MA in Russian, East European, and Eurasian Studies is a new concentration that will (1) emphasize REES in Global Context and (2) place a greater emphasis on social sciences within REES coursework (The required GIST 710 Interdisciplinary Methods for Global Context emphasizes social science methodology). We expect the audience for this concentration to be primarily Foreign Area officers (FAOs) and others already in the workforce who need an intensive program that can be completed in a year. An intensive area studies program will also serve career needs of former Peace Corps volunteers and others who have the required language proficiency and first-hand knowledge of the given region. To this end, the course sequences and availability will make it possible to complete the FAST concentration in 12 months. The FAST REES will run Fall (12 credit hours) – Spring (12 credit hours) – Summer (6 credit hours), not necessarily in this sequence.

Students must successfully complete 30 hours of coursework:

Concentration in 1 of the following 5 disciplinary areas: history; political science; philosophy and religion; literature and the arts; geography/economics/business (2 electives, total 6hrs)

If a student chooses political science or geography/economics/business as area of concentration, GIST 710 Interdisciplinary Methods for Global Contexts is required along with another elective in this area.

If a student chooses literature/arts, history, or philosophy/religion as an area of concentration, GIST 710 can be used to replace the distribution requirement in political science or geography/economics/business.

25% or more of coursework in GIST 898 and GIST 710 must pertain to REES geographical area.

1 course each in the remaining 4 disciplinary areas (4 electives, total 12 hrs)

The Capstone seminar sequence: REES 898 and REES 899 (6hrs)

GIST 898 Thesis/Project Writing offered in the summer (3hrs)

Advanced Language Course at 500 level or above (3hrs).

**M.A. Degree Requirements**

A Master of Arts degree is awarded in 3 tracks: Russian, East European, and Ukrainian.

**Requirements for the Degree**

1. At least 1 course in a REES-area advanced foreign language.
2. 3 courses for a total of 9 credit hours, in the department or subject group of the student's special interest; at least 2 of these courses must be area specific.
   - The 5 thematic areas are
     - Literature and the Arts
     - History

3. 1 area course in each of the other 4 subject groupings, for a total of 12 hours.
4. Successful completion of REES 898 and REES 899, an interdisciplinary M.A. seminar (6 credit hours), develops advanced research skills. REES 898, which is normally taken at the beginning of the degree program, emphasizes learning the tools and methods necessary to study this region of the world. In REES 899, students write an interdisciplinary research paper using materials in the student’s chosen target language. Before enrolling in REES 899, the student must have completed an advanced language course in the target language.
5. Pass a comprehensive examination in addition to regular course examinations. Information about opportunities and requirements for graduate work with a Russian or East European concentration in any department at KU may be obtained from the department.

Requirements may be modified in special cases with the director’s approval, particularly for students with special needs such as Experienced Teacher Fellows, Foreign Area Officers, or candidates for degrees in the professional schools. All students are encouraged to study abroad.

**Plan of Study**

The plan of study is designed by the student in consultation with the advisor.

**Graduate Certificate in Russian, East European, and Eurasian Studies**

**Why study Russian, East European, and Eurasian studies?**

The interdisciplinary study of Russia, Eastern Europe, and Eurasia creates culturally informed citizens who can act on national and international issues.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

The Russian, East European, and Eurasian Studies (REES) graduate certificate is a 12-credit hour program of study designed primarily for graduate students in CLAS and the professional schools. The program allows the students to acquire context-based interdisciplinary knowledge and expertise of the REES area. The certificate allows for that expertise
to be officially recognized on the students’ KU transcript, enhancing the graduates’ career opportunities.

The main academic objectives of the graduate certificate include introducing and training graduate students in the current methodological approaches to the study of the REES area; allowing the students to acquire a deeper knowledge of the area from different disciplinary perspectives; and guiding the students in integrating their knowledge of the area, methodology, and a REES-area language. As a part of the capstone seminar, graduate certificate students write an original research paper on a REES-area topic that utilizes research in both English and the target language.

As a prerequisite to beginning the course sequence that leads to the certificate, the student must demonstrate a working knowledge of a REES-area language equivalent of at least 2 years of university study.

The CREES graduate certificate includes a 12-credit hour course sequence (4 3-credit hour courses). Out of the 4 courses, 2 are mandatory: the methodology seminars, REES 898 and REES 899.

- REES 898 is taken during the student’s first semester, as it lays out the foundation for interdisciplinary area studies in REES.
- 2 electives must be chosen from a list of REES-themed offerings from 2 different disciplines, of which 1 can overlap with the coursework taken by the student in his or her home department. The courses must be 500-level or higher and have at least 50% REES content.
- REES 899 is taken following the completion of the elective courses. The capstone seminar, in which the student identifies an original research topic, and under the professor’s supervision, produces a capstone paper of publishable quality, a part of which is a working bibliography which includes both English and foreign-language sources. REES 899 is used to demonstrate student knowledge of area studies content and methodology, and the capstone paper is the primary outcome of this course.

REES 898 and REES 899 are taken by both REES MA students and REES graduate certificate students. These students work together on acquiring tools for researching and writing about the REES area, and then applying these tools towards individual projects.

**Department of Slavic Languages and Literatures**

The Department of Slavic Languages & Literatures offers a full array of language, culture, literature, and linguistics courses for students interested not only in Russian, but also in Polish, Bosnian/Croatian/ Serbian, Ukrainian, and Turkish languages and cultures. The department also offers occasional coursework and independent study in Slovene, Czech, Yiddish, and other East European languages.

The department offers three degrees: the B.A., the M.A., and the Ph.D. The Bachelor of Arts degree program offers fundamental training in language and culture, while graduate training at the Masters and Doctoral levels focuses on Russian literature and culture, Slavic linguistics, and/or Slavic language pedagogy. The department also offers select study abroad programs. Working closely with KU’s Center for Russian, East European, and Eurasian Studies (CREES), the department offers an array of Slavic-related events throughout the year, including visiting distinguished lecturers, exhibits, and musical and theatrical performances.

Students participate in an active Russian Club, language tables, and the Graduate Students’ Organization.

For more information about the department and its people, visit the department’s web site (http://slavic.ku.edu). Look for the Old Bridge at Mostar at the very top of the page. Commissioned by Suleiman the Magnificent in 1557, the bridge metaphorically connects the Ottoman Empire with Europe -- it is the physical expression of the concept that Russia and the Slavs link the West and the East.

**Undergraduate Programs**

The undergraduate major in Slavic languages and literatures prepares students to pursue a range of careers connected with Russia and Central Europe, including those related to international work in business, government, nonprofit organizations, etc. The undergraduate major serves equally as solid preparation for graduate study in Slavic languages and literatures and related fields and for entrance to professional schools such as law or journalism. Students learn these languages to pursue careers with international dimensions; enhance job opportunities; connect with heritage, family, and communities; explore other literatures and cultures; and pursue personal interests.

The undergraduate program gives students solid functional language skills in speaking, reading, listening, and writing. Students develop the strategies and linguistic awareness to continue language study throughout their lives. The program acquaints undergraduates with the most significant works of the literature and culture of the Slavic region and gives them the tools and frameworks necessary to understand, analyze, and critique those works and place them in their cultural context. Students work with sources in English and in the original languages.

The department strongly encourages students to plan a substantial study abroad experience (at least a summer but preferably a semester or an academic year) as part of the major. Study abroad experience contributes to mastery of the language and facilitates students’ encounters with the people, practices, and attitudes of the culture in ways that can never be replicated on an American university campus.

**Placement**

Students may establish eligibility for enrollment in the second course in Polish, Russian, or Bosnian/Croatian/Serbian by having earned college credit in the first course in that language or by having studied the language in high school. Students with previous study should contact the department to arrange a consultation about enrollment at the appropriate level.

**Retroactive Credit**

Students with no prior college or university Russian course credit are eligible for retroactive credit according to this formula:

- 3 hours of retroactive credit are awarded to a student with 2 or 3 years of high school Russian who enrolls initially at KU in a third-level Russian course (RUSS 204) and receives a grade of C or higher.
- 6 hours of retroactive credit are awarded to a student with 3 or 4 years of high school Russian who enrolls initially at KU in a fourth-level Russian course (RUSS 208) and receives a grade of C or higher.
- 9 hours of retroactive credit are awarded to a student with 4 years of high school Russian who enrolls initially at KU in a Russian course with a fourth-level course as a prerequisite and receives a grade of C or higher.
Courses for Nonmajors

Some courses in Slavic literatures and cultures are taught in English and fulfill various goals and learning outcomes related to the KU CORE, as well as existing B.A. requirements in the humanities and non-Western culture.

Students may fulfill the College language requirement for the B.A. degree by taking 2 years in one of the following languages: Russian, Polish, Bosnian/Croatian/Serbian, Ukrainian, and Turkish.

Courses are available in Russian for special purposes (Russian for Reading, Russian for the Professions). RUSS 110 Intensive Elementary Russian (10 credit hours) frequently is offered in the summer.

Graduate Programs

The department offers programs leading to Master of Arts and Doctor of Philosophy degrees in Slavic Languages and Literatures.

Master of Arts

The Master of Arts degree in Slavic Languages & Literatures provides students with foundational knowledge of the language, literature, culture, and linguistics of a region of study (Russian, Polish, Bosnian-Croatian-Serbian). Working in a collegial and supportive departmental environment, M.A. students learn the general contours and common ground of the field; read key works embedded in their historical, cultural, stylistic, and genre contexts; learn various methodological and theoretical frameworks and strategies; improve their language capacity, and develop research, writing, interpretive, and technological skills.

Doctor of Philosophy

The Doctor of Philosophy degree in Slavic Languages & Literatures builds further on the foundational knowledge and the structured classroom learning that students engaged in during MA work. Working under the close mentorship of their advisors, PhD students develop a minor in a related field, learn advanced pedagogical and interpretive strategies, continue to improve language skills, and engage in self-motivated, independent study to develop a coherent area of specialization. Students complete their graduate study.

Students pursuing doctoral study in the department of Slavic Languages & Literatures concentrate their advanced work in one of three areas: Russian literature and culture; Slavic language pedagogy; and Slavic linguistics.

Departmental Funding

While it is not guaranteed, the department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Programs overview (http://slavic.ku.edu/ma-slavic-overview) page of our departmental website.

FLAS Fellowships

Students in the graduate program may also be eligible for a Foreign Language and Area Studies (FLAS) (http://flas.ku.edu) fellowship. FLAS fellowships include:

- Summer award - up to $5,000 for tuition and a stipend of $2,500 for living expenses for summer language study equivalent to one full year of language study
- Academic Year award - full KU tuition and a $15,000 stipend for living expenses for academic year study that includes two semesters of language and six credits or more of East Asian culture courses.

Students in the are strongly encouraged to apply (http://flas.ku.edu/how-apply) for this funding.

Additional Funding

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://www.graduate.ku.edu/funding-opportunities) for KU graduate students.

Courses

BCRS 104. Elementary Bosnian/Croatian/Serbian I. 5 Hours. U. First Semester. Five hours of recitation and drill in the spoken language per week. Essentials of grammar, practice in reading, writing and speaking Bosnian/Croatian/Serbian. LEC.

BCRS 105. Elementary Bosnian/Croatian/Serbian I, Honors. 5 Hours. U. Similar to BCRS 104 but with additional work aimed at accelerating the student's progress to proficiency and widening understanding of cultural context. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

BCRS 108. Elementary Bosnian/Croatian/Serbian II. 5 Hours. U. Second Semester. A continuation of BCRS 104. Prerequisite: BCRS 104. LEC.

BCRS 109. Elementary Bosnian/Croatian/Serbian II, Honors. 5 Hours. U. Continues BCRS 105. Similar to BCRS 108 but with additional work aimed at accelerating the student's progress to proficiency and widening understanding of cultural context. Prerequisite: BCRS 104 or 105. Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

BCRS 177. First Year Seminar: _____ 3 Hours. GE11 / U. A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Bosnian/Croatian/Serbian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

BCRS 204. Intermediate Bosnian/Croatian/Serbian I. 3 Hours. U. Second-year language course. Further development of communicative and cultural competencies with a content-based, interactive approach. Students develop the ability to understand and produce short written and spoken texts in BCS through engagement with a variety of authentic materials representative of cultural diversity of the studied area. They
contrast and compare features of individual BCS-speaking countries and their cultures as well as differing aspects of B/C/S and American life, culture, and values. Prerequisite: BCRS 108 or permission of the instructor. LEC.

BCRS 205. Intermediate Bosnian/Croatian/Serbian I, Honors. 3 Hours. U.
Similar to BCRS 204 but with additional work aimed at accelerating the student's progress to proficiency and widening understanding of cultural context. Prerequisite: Open only to students who have received an A in BCRS 108 or an A or B in BCRS 109, and who are admitted to the University Honors Program, or by permission of instructor. LEC.

BCRS 208. Intermediate Bosnian/Croatian/Serbian II, Honors. 3 Hours. AE42 / U.
A continuation of BCRS 204. Prerequisite: BCRS 204. LEC.

BCRS 209. Intermediate Bosnian/Croatian/Serbian II, Honors. 3 Hours. AE42 / U.
Similar to BCRS 208 but with additional work aimed at accelerating the student's progress to proficiency and widening understanding of cultural context. Prerequisite: BCRS 204 or 205. Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

BCRS 380. Intensive Croatian. 6 Hours. U.
This program consists of a six-week intensive language course in intermediate and advanced Croatian phonetics, conversation, and grammar, and is offered each summer in Croatia. In addition to the practical language work, there is a program of lectures on modern Croatian history, literature, and other cultural topics. Various excursions and tours bring the students into first-hand contact with the people, natural beauty and culture of Croatia. This program is a cooperative effort between the University of Kansas and faculty of the University of Zadar. LEC.

BCRS 504. Advanced Bosnian/Croatian/Serbian I. 3 Hours. H/W.
A practical Bosnian/Croatian/Serbian course involving the advanced study of the grammar, reading of texts on a variety of subjects, conversation and composition. Taught in Bosnian/Croatian/Serbian. Designed for students who have had two or more years of Bosnian/Croatian/Serbian language. Prerequisite: BCRS 208, or equivalent. LEC.

BCRS 508. Advanced Bosnian/Croatian/Serbian II. 3 Hours. H/W.
A practical Bosnian/Croatian/Serbian course involving the advanced study of the grammar, reading of texts on a variety of subjects, conversation and composition. Taught in Bosnian/Croatian/Serbian. Designed for students who have had two and one-half or more years of Bosnian/Croatian/Serbian language. Prerequisite: BCRS 504, or equivalent. LEC.

BCRS 675. Readings in Croatian. 1-6 Hours. H/W.
Individually tailored readings and independent work in Bosnian/Croatian/Serbian language and culture. Prerequisite: Two years of Bosnian/Croatian/Serbian, and consent of instructor. IND.

CZCH 104. Elementary Czech I. 5 Hours. U.
First semester. Essentials of grammar, practice in speaking and writing Czech. Simple readings from selected texts. LEC.

CZCH 108. Elementary Czech II. 5 Hours. U.
Second semester. A continuation of CZCH 104. Prerequisite: CZCH 104. LEC.

CZCH 177. First Year Seminar: _____ 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Czech. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

CZCH 204. Intermediate Czech I. 3 Hours. U.
Second-year course in the language with emphasis on reading, composition, and conversation. Prerequisite: CZCH 108. LEC.

CZCH 208. Intermediate Czech II. 3 Hours. U.
A continuation of CZCH 204. Prerequisite: CZCH 204. LEC.

CZCH 675. Readings in Czech. 1-6 Hours. H/W.
Prerequisite: Reading knowledge of Czech language, and consent of instructor. IND.

PLSH 104. Elementary Polish I. 5 Hours. U.
First Semester. Essentials of grammar, practice in reading, writing, and speaking Polish. LEC.

PLSH 105. Elementary Polish, Honors. 5 Hours. U.
Honors version of PLSH 104, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

PLSH 108. Elementary Polish II. 5 Hours. U.
Second semester. A continuation of PLSH 104. Prerequisite: PLSH 104. LEC.

PLSH 109. Elementary Polish II. 5 Hours. U.
A continuation of PLSH 105. Honors version of PLSH 108, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: PLSH 104 or PLSH 105. Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

PLSH 177. First Year Seminar: _____ 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Polish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

PLSH 204. Intermediate Polish I. 3 Hours. U.
Second-year course in the language with emphasis on reading, composition, and conversation. Prerequisite: PLSH 108. LEC.

PLSH 205. Intermediate Polish I, Honors. 3 Hours. U.
Honors version of PLSH 204, with additional work aimed at accelerating students' progress to proficiency and expanding their cultural competence. Prerequisite: Open only to students who have received an A in PLSH 108 or an A or B in PLSH 109, and who are admitted to the University Honors Program; or by permission of instructor. LEC.

PLSH 208. Intermediate Polish II. 3 Hours. U.
A continuation of PLSH 204. Prerequisite: PLSH 204. LEC.

PLSH 209. Intermediate Polish II, Honors. 3 Hours. U.
Honors version of PLSH 208, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: PLSH 204 or PLSH 205. Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

PLSH 312. Polish Language and Civilization in Poland: Summer Program. 8 Hours. H/W.
Polish grammar, conversation, and composition with select aspects of Polish civilization. Available only to participants in Polonicum, Warsaw University. LEC.

PLSH 504. Advanced Polish I. 3 Hours. H/W.
A practical Polish language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Polish. Designed for students who have had two
or more years of Polish language. Prerequisite: PLSH 208 or equivalent. LEC.

PLSH 508. Advanced Polish II. 3 Hours. H/W.
A practical Polish language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Polish. Designed for students who have had two and one-half or more years of Polish. Prerequisite: PLSH 504 or equivalent. LEC.

PLSH 675. Readings in Polish Language and Literature. 1-6 Hours. H/W.
Directed individual readings on various topics concerning Polish literature and/or language. Prerequisite: Two years or four semesters of Polish, and consent of instructor. IND.

RUSS 100. Russian Reading Course I. 3 Hours. U.
A continuation of RUSS 100. Completion and review of the fundamentals of grammar, with emphasis on reading and translation of learned, scientific, or technical writing and other material of an advanced nature. Each student will also have special assignments in his or her particular field. This course does not satisfy any part of the undergraduate language requirement. Presupposes no previous study of Russian. LEC.

RUSS 101. Russian Reading Course II. 3 Hours. U.
A continuation of RUSS 100. Completion and review of the fundamentals of grammar, with emphasis on reading and translation of learned, scientific, or technical writing and other material of an advanced nature. Each student will also have special assignments in his or her particular field. This course does not satisfy any part of the undergraduate language requirement. Presupposes no previous study of Russian. LEC.

RUSS 104. Elementary Russian I. 5 Hours. U.
First semester. Five hours of basic language acquisition and oral practice per week. Essentials of grammar, practice in comprehending, speaking, reading, and writing Russian. A continuation of RUSS 104. Prerequisite: RUSS 100. LEC.

RUSS 105. Elementary Russian I, Honors. 5 Hours. U.
Honors version of RUSS 104, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

RUSS 108. Elementary Russian II. 5 Hours. U.
Second semester. Five hours of basic language acquisition and oral practice per week. Essentials of grammar, practice in comprehending, speaking, reading, and writing Russian. A continuation of RUSS 104. Prerequisite: RUSS 104. LEC.

RUSS 109. Elementary Russian II, Honors. 5 Hours. U.
A continuation of RUSS 105. Honors version of RUSS 108, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: RUSS 104 or RUSS 105. Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

RUSS 110. Intensive Elementary Russian. 10 Hours. U.
Intensive course in elementary Russian providing the student with a complete survey of Russian grammar, and proficiency in understanding, reading, and speaking basic Russian. Twenty contact hours per week. Same content as RUSS 104 and RUSS 108 combined. LEC.

RUSS 150. Beginning Russian I. 3 Hours. U.
Fundamentals of Russian grammar, reading, speaking, and writing. Course designed to accommodate the needs of students regardless of age, educational background, or occupation. No previous knowledge of Russian or other foreign languages required. LEC.

RUSS 152. Beginning Russian II. 3 Hours. U.
Continuation of RUSS 150. Does not fulfill BA foreign language requirement. Prerequisite: RUSS 150 or equivalent. LEC.

RUSS 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Russian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

RUSS 204. Intermediate Russian I. 5 Hours. U.
This course is designed to develop speaking, reading, and listening proficiency within the context of a review of grammar. Prerequisite: RUSS 108, RUSS 110, or equivalent. LEC.

RUSS 205. Intermediate Russian II, Honors. 5 Hours. U.
Honors version of RUSS 204 with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: Open only to students who have received an A in RUSS 108 or an A or B in RUSS 109, and who are admitted to the University Honors Program, or by permission of instructor. LEC.

RUSS 208. Intermediate Russian II. 5 Hours. U.
Continuation of RUSS 204. Completes the undergraduate foreign language requirement. The course is designed to develop speaking, reading, and listening proficiency within the context of detailed grammatical review. Prerequisite: RUSS 204 or equivalent. LEC.

RUSS 209. Intermediate Russian II, Honors. 5 Hours. U.
Honors version of RUSS 208, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: RUSS 204 or 205. Open only to students admitted to the University Honors Program, or by permission of instructor. LEC.

RUSS 250. Continuing Russian I. 3 Hours. U.
Fundamentals of Russian grammar, reading, speaking, and writing. Course designed to accommodate the needs of students regardless of age, educational background, or occupation. Does not count towards the fulfillment of the undergraduate language requirement. Does not count towards the undergraduate major in Slavic. Prerequisite: RUSS 152 or equivalent. LEC.

RUSS 252. Continuing Russian II. 3 Hours. U.
A continuation of RUSS 250. Does not count towards the fulfillment of the undergraduate language requirement. Does not count towards the undergraduate major in Slavic. Prerequisite: RUSS 250 or equivalent. LEC.

RUSS 504. Advanced Russian I. 3 Hours. H/W.
A practical Russian language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Russian. Designed for students who have had four semesters of Russian. Prerequisite: RUSS 208 or RUSS 216. LEC.

RUSS 508. Advanced Russian II. 3 Hours. H/W.
A practical Russian language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Russian. Designed for students who have had two and one-half or more years of Russian language. Prerequisite: RUSS 504. LEC.

RUSS 512. Russian for the Professions I. 3 Hours. U.
This course focuses on the active mastery of language structures and vocabulary needed for people using Russian in professional capacities, particularly such as business and journalism. Materials will be drawn from the current Russian press and electronic media. Designed for students
who have had basic language training and want to develop specialized language skills. Prerequisite: RUSS 208 or RUSS 216. LEC.

**RUSS 516. Russian for the Professions II. 3 Hours. U.**
A continuation of RUSS 512. Prerequisite: RUSS 504, RUSS 512, or RUSS 522. LEC.

**RUSS 522. Problems in Translating Russian into English I. 3 Hours. H/W.**
Preparation of hitherto untranslated works, possibly with the intention of submitting for publication. Training and practice in the skills of oral interpretation. Prerequisite: Two years minimum of Russian language courses. LEC.

**RUSS 526. Problems in Translating Russian into English II. 3 Hours. H/W.**
A continuation of RUSS 522. LEC.

**RUSS 550. Advanced Conversation, Composition, and Grammar in Russia: Summer Program. 6 Hours. H/W.**
Held in Russia. Twenty-four hours of class work weekly, plus lectures and excursions, for six weeks at St. Petersburg University. Prerequisite: RUSS 208 or the equivalent of twenty-two hours of Russian language courses. LEC.

**RUSS 552. Advanced Russian Language at Saint Petersburg University: Semester Program. 14 Hours. H/W.**
Sixteen weeks of intensive Russian language and literature classes held at Saint Petersburg University, Russia. Classes in advanced phonetics, conversation, and grammar as well as lectures on literary and other cultural topics. Prerequisite: Minimum of five semesters of Russian language study at the college level or its equivalent. LEC.

**RUSS 552. Advanced Russian Language at Saint Petersburg University: Summer Program. 3 Hours. H/W.**
An introduction to the various forms of folklore among the Slavic peoples, with particular emphasis on the folk literature, customs, and artifacts of Russia, Poland, and the South Slavic countries. LEC.

**RUSS 600. Classics of Russian Culture. 3 Hours. H.**
This advanced Russian language class explores the monuments of Russian culture (1700-1980) in the context of the country's history, customs, artistic traditions and literary trends. It is designed to develop reading, writing, and speaking skills of advanced language students and includes the preparation of written and oral reports in Russian. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent. LEC.

**RUSS 604. Contemporary Russian Culture. 3 Hours. H/W.**
This advanced Russian language class explores issues in contemporary Russian culture (literature and the arts, societal trends and issues, politics, and national life) based on Russian film, television, and print materials. It is designed to develop reading, writing, and speaking skills of advanced language students who wish to develop high levels of fluency, accuracy, and idiomatic expressiveness. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent. LEC.

**RUSS 608. Russian Phonetics and Grammar. 3 Hours. H/W.**
A survey of fundamental issues in Russian phonetics, morphology, and syntax. The course will develop reading, writing, and speaking skills necessary for discussing and analyzing the major linguistic categories of Russian. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent. LEC.

**RUSS 612. Introduction to Russian Literature. 3 Hours. H/W.**
Readings for this advanced Russian language class will be drawn from representative prose, poetry, and drama of 19th or 20th century authors. The course will develop reading, writing, and speaking skills necessary for discussing and analyzing the major texts and literary trends of the Russian tradition. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent. LEC.

**RUSS 616. Stylistics. 3 Hours. H/W.**
Practical examination of the features of stylistic registers available in contemporary Russian, ranging from slang to colloquial speech to educated journalistic, scientific, and literary styles. The course will develop reading, writing, and speaking skills necessary for discussing and analyzing stylistic registers. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent. LEC.

**RUSS 675. Readings in Russian. 1-6 Hours. H/W.**
Prerequisite: Two years of Russian, and consent of instructor. IND.

**SLAV 104. Elementary Slavic Language I: _____, 5 Hours. U.**
First semester. Essentials of grammar, practice in speaking and writing a Slavic language. Simple readings from selected texts. Course may be used to teach the fundamentals of any Slavic language, for example, Slovenian, Macedonian, Slovak, etc. LEC.

**SLAV 108. Elementary Slavic Language II: _____, 5 Hours. U.**
Second semester. Essentials of grammar, practice in speaking and writing a Slavic language. A continuation of SLAV 104 in those languages whose fundamentals were being taught in SLAV 104. Prerequisite: SLAV 104 or equivalent (in same language). LEC.

**SLAV 110. Introduction to the Peoples and Cultures of Kazakhstan Through Russian. 1 Hour. U.**
This 8-week course prepares students of all majors with little or no knowledge of Russian to function effectively in the experiential internship program in Almaty, Kazakhstan, with appropriate cultural sensitivity and survival Russian-language skills. The focus is basic grammar and key vocabulary terms of Russian (e.g., reading signs, menus; understanding key conversational phrases). Weekly readings treat the history, business culture, and language politics of Kazakhstan. LEC.

**SLAV 140. Introduction to Russian Culture. 3 Hours. HT AE42/GE3H / H/W.**
An introduction to the principal achievements of Russian cultural history, with particular emphasis on literature, folklore, spirituality, and the visual arts. LEC.

**SLAV 141. Introduction to Russian Culture, Honors. 3 Hours. HT AE42/GE3H / H/W.**
An introduction to the principal achievements of Russian cultural history, with particular emphasis on literature, folklore, spirituality, and the visual arts. LEC.

**SLAV 144. Survey of Russian Literature in Translation. 3 Hours. HL AE42/GE3H / H/W.**
A survey of the principal works of Russian literature including such authors as Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Pasternak, Solzhenitsyn, and others. LEC.

**SLAV 145. Survey of Russian Literature in Translation, Honors. 3 Hours. HL AE42/GE3H / H/W.**
A survey of the principal works of Russian literature including such authors as Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Pasternak, Solzhenitsyn, and others. LEC.

**SLAV 148. Introduction to Slavic Folklore. 3 Hours. HL AE42/GE3H / H/W.**
An introduction to the various forms of folklore among the Slavic peoples, with particular emphasis on the folk literature, customs, and artifacts of Russia, Poland, and the South Slavic countries. LEC.
SLAV 149. Introduction to Slavic Folklore, Honors. 3 Hours. HL AE42/GE3H / H/W.
An introduction to the various forms of folklore among the Slavic peoples, with particular emphasis on the folk literature, customs, and artifacts of Russia, Poland, and the South Slavic countries. LEC.

SLAV 177. First Year Seminar: ____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Slavic. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

SLAV 204. Intermediate Slavic Language I: ____. 3 Hours. U.
Second-year level course in a Slavic language, for example, Slovenian, Macedonian, Slovak, with emphasis on reading, composition, and conversation. Prerequisite: SLAV 108 (in same language). LEC.

SLAV 208. Intermediate Slavic Language II: ____. 3 Hours. U.
Second-year level course in a Slavic language, for example, Slovenian, Macedonian, Slovak, with emphasis on reading, composition, and conversation. Prerequisite: SLAV 204 or equivalent (in same language). LEC.

SLAV 316. The Peoples and Cultures of Southeastern Europe Through Film. 3 Hours. HL AE42/GE3H / H.
This course presents an introduction to the study of the culture of the South Slavs and other peoples of Southeastern Europe, combining background modules in geography, linguistic culture, history, folklore and contemporary cultural criticism with critical viewings of artistic films. The course serves as an introduction to humanistic inquiry about the peoples and cultures of Southeastern Europe. LEC.

SLAV 317. The Peoples and Cultures of Southeastern Europe Through Film, Honors. 3 Hours. HL AE42/GE3H / H.
This course is similar in content to SLAV 316, but with an additional honors project. Prerequisite: Eligibility for or admission to the university Honors Program. LEC.

SLAV 318. Jews and Slavs in Eastern Europe. 3 Hours. H.
Jews and Slavs have shared territory from the Middle Ages to the present day. The contact between these culturally and linguistically distinct groups has shaped many centuries of Eastern European history - from the extreme violence of the pogroms to long periods of peaceful coexistence and cooperation. “Jews and Slavs” examines the history and cultural geography of Slavic-Jewish contact from the perspectives of both groups. Through literature, film, journalism, and folklore, students learn about the profound influence Jews and Slavs have had on each other, the uneasy feelings that accompanied their interactions, and the creative and fascinating impact their interaction had on both cultures. (Same as JWSH 318.) LEC.

SLAV 340. Introduction to the Languages and Peoples of Russia and East-Central Europe. 3 Hours. HT AE42/GE3H / H.
An overview of the languages and peoples of Russia and East-Central Europe, including the Slavic and Baltic languages, Romanian, and Albanian. Topics addressed include language prehistory, writing systems, and the relationship between language and national identity. Emphasis on language issues as a background to current events in order to impart an appreciation of the area, its uniqueness and complexity. Prerequisite: Membership in the College Honors Program or consent of instructor. LEC.

SLAV 370. War and Violence Russian Literature and Film. 3 Hours. S.
This course focuses on artistic representations of violence resulting from historical events such as World War II, Soviet collectivization, the Gulag, and political purges. We consider Soviet literature and film, including works by Isaac Babel, Andrei Platonov, Anna Akhmatova, and Alexander Solzhenitsyn. Readings in English. The course is offered at the 300 and 500 levels, with additional assignments at the 500 level. LEC.

SLAV 375. Topics in: ____. 1-3 Hours. H.
Exploration of Slavic cultural forms such as literature, film, linguistics, arts, and press. Topics vary, and course may address topics across a narrow or broad time frame. May be repeated if content varies. LEC.

SLAV 390. Slavic Folk Culture: ____. 3 Hours. H/W.
A broad exposure, both theoretical and practical, to various aspects of the traditional native culture of a particular Slavic country or ethnic group, including folk dance, song and musicianship, as well as forms of the material culture such as folk architecture, costumes and art in everyday life. Taught in the pertinent Slavic country in conjunction with the appropriate language course. LEC.

SLAV 495. Senior Capstone Seminar. 3 Hours. AE61 / H.
The Senior Capstone Seminar offers undergraduate majors an opportunity to define, design and execute a substantial research/creative project under the mentorship of a faculty member. The project integrates the knowledge and skills gained in the coursework for the major and across the undergraduate curriculum, and demonstrates the students competence in the field of Slavic studies. Prerequisite: Slavic major status, senior standing. LEC.

SLAV 499. Honors Thesis. 3 Hours. H/W.
Independent study and preparation of honors thesis. Required of all students working for a degree with honors in Slavic languages and literatures. IND.

SLAV 500. Russia Today. 3 Hours. H/W.
Study and discussion of contemporary problems in Russia and the former Soviet Union; readings in Russian, based on articles in newspapers, journals, etc. Conducted in Russian. Prerequisite: RUSS 208 or equivalent. LEC.

SLAV 502. Introduction to Russian Culture and Society: ____. 3 Hours. H/W.
An interdisciplinary course introducing the student to the principal features of Russian cultural and societal development in the modern era. Readings in English, no prerequisite for non-Russian majors. Majors and graduate students in Slavic languages and literatures will be required to do readings in Russian. LEC.

SLAV 503. Post-Soviet Communication. 3 Hours. H.
The course is designed to acquaint students with the shifting manner of public discourse in Post-Soviet Russia and help them to explore in some depth cross-cultural communication between America and Russia. In addition to contemporary and historical background on Russian communicative practices, students examine discourse in business development, mass media, marketing, and advertising. All readings in English. (Same as COMS 503). LEC.

SLAV 504. Introduction to East-Central European Culture and Society: ____. 3 Hours. H/W.
An interdisciplinary course introducing the student to the principal features of East-Central European cultural and societal development in the modern era. Countries that may be considered are: Poland, the Czech Republic,
Slovakia, Hungary, Romania, Bulgaria, the South Slavic countries, Latvia, Lithuania, Estonia, Belorussia, and Ukraine. LEC.

SLAV 505. Introduction to Czech Culture. 3 Hours. H.
This study-abroad trip offers a survey of Czech art, architecture, literature, theater, and film from the medieval period to the present with emphasis on the late 19th and 20th centuries. Combines 18 hours of lectures on campus and a ten-day trip to Prague. LEC.

SLAV 506. West Slavic Literature and Civilization (Polish and Czech). 3 Hours. H/W.
A survey of West Slavic Literature and Civilization (Polish and Czech) from its beginnings to the present with emphasis on the most important trends: Renaissance, Romanticism, Positivism/Realism, Modernism and Avant-guard; Socialist realism, and Post-modernism. The course combines lecture, discussion and small group activities. Movie clips, recordings, and slides are used to reflect various cultural dimensions of West Slavic Civilization. No knowledge of Polish or Czech is required. LEC.

SLAV 508. South Slavic Literature and Civilization. 3 Hours. NW AE42 / H/W.
An introductory survey of the literature and culture of the South Slavic peoples: the Slovenes, Croats, Bosniacs, Serbs, Montenegrins, Macedonians and Bulgarians. No language required. LEC.

SLAV 510. The Russian Literary Genius. 3 Hours. H/W.
Topics and problems in Russian cultural history as treated in the masterworks of Russian literature. Readings selected from the works of Pushkin, Tolstoy, Dostoevsky, Pasternak, Bulgakov, Solzhenitsyn, and other great Russian writers. Readings in English, no prerequisite for non-Russian majors. Russian majors will do some of the readings in Russian. LEC.

SLAV 514. Totalitarianism and Literature in Central Europe. 3 Hours. H.
This course asks how fiction written in Central Europe engaged and grappled with the totalitarian experience imposed by Nazi and Soviet forms of government. The course focuses on the works by 20th-century Polish, Czech, and Hungarian writers that deal with totalitarianism. (Same as HWC 514.) LEC.

SLAV 516. Film Adaptations of Polish and Czech Literature. 3 Hours.
A comparative study of several most representative and best works of 19th- and 20th-century Polish and Czech fiction and drama and their film adaptations. By providing a broad cultural and historical background of the works, the course offers a thorough introduction to modern culture of Poland and the Czech Republic. Readings and discussions are in English, and no knowledge of Polish or Czech is required. LEC.

SLAV 520. Russian Phonetics, Phonology, and Inflectional Morphology. 3 Hours. H/W.
An analysis of the phonological and morphological systems of contemporary standard Russian, including normative and dialectal pronunciation of speech sounds, phonemics, morphophonemic alterations, and nominal and verbal inflections. Graduate students enrolled in this course will be held to a more stringent curriculum and grading system. Prerequisite: Two years of Russian language study or the equivalent. LEC.

SLAV 522. The Grammatical Categories of Russian: Linguistic Units, Functions and Meanings. 3 Hours. H/W.
This course covers the main grammatical categories of Russian, including word formation, case, animacy, voice and reflexive verbs, imperatives, aspect, and word order. It is intended not only for linguists but anyone seeking a better understanding of the grammatical systems of Russian. Designed as a continuation of SLAV 520. Prerequisite: Two years of Russian language study or the equivalent. LEC.

SLAV 524. Russian Since the Revolution. 3 Hours. H/W.
An examination of changes in the Russian language during the course of this century. Topics covered include changes in pronunciation, morphological and syntactic variation, and the impact of foreign borrowings, particularly from English. Graduate students enrolled in this course will be held to a more stringent curriculum and grading system. Prerequisite: Two years of Russian language study or the equivalent. LEC.

SLAV 528. Comparative Study of Slavic Literatures. 3 Hours. H/W.
The course is intended as an introduction to the most significant writers and works in Slavic literatures. The emphasis will be on some of the themes and ideological concepts that have shaped the literatures of the Slavic world. Representative works of Turgenev, Dostoevsky, Mrozek, Rozewicz, Capek, Hasek, Djilas, Havel, Ivo Andric and others, will be studied. The diversity of expression and, at the same time, homogeneity of spirit in the works of these writers will be stressed. No knowledge of Slavic languages is required. LEC.

SLAV 530. Introduction to Russian Poetry. 3 Hours. H/W.
An introduction to the principles of Russian versification and to masterpieces of Russian poetry selected from the 18th, 19th, and 20th centuries. Students will learn to read, translate, and analyze poems in terms of rhyme, meter, euphony, metaphor, and other prosodic features. Emphasis will be placed upon preparing students for independent study and appreciation of Russian poetry in the original. Prerequisite: Language proficiency. LEC.

SLAV 532. Dostoevsky. 3 Hours. H/W.
A study of the life and works of Fyodor Dostoevsky. In translation. No prerequisite. LEC.

SLAV 534. Tolstoy. 3 Hours. H/W.
A study of the life and works of Leo Tolstoy. In translation. LEC.

SLAV 536. Turgenev. 3 Hours. H/W.
A study of the life and works of Ivan Turgenev. In translation; however, note that Russian majors will be required to read selected works in Russian. LEC.

SLAV 538. The Modern Polish Short Story. 3 Hours. H/W.
A study of the development of the Polish short story from Positivism to the present. Readings of major Polish writers including Prus, Sienkiewicz, Schulz, Borowski, Andrzejewski, and others. Emphasis on trends in the Polish short story within the context of West European literatures. No prerequisites. Readings in English. Students with knowledge of Polish will read some works in Polish. LEC.

SLAV 540. Language and Identity in East-Central Europe and the Former Soviet Union. 3 Hours. H.
The course treats the formation of modern nation states as defined by language, where the history of the linguistic community played a central, if mythic role. Focus is on sociolinguistic case studies of the connection between language and identity in the former USSR and Yugoslavia, as well as transnational groups defined by common language and culture. The impact of global English, EU membership, and migration on language and identity issues are also discussed. LEC.

SLAV 558. Readings in Slovene. 1-6 Hours. H.
Individually tailored coursework in Slovene, from beginning to advanced level. Can include development of all four skills depending on the needs of the student. Prerequisite: Consent of instructor. IND.
SLAV 560. Introduction to Slavic Language: ______. 3 Hours. H/W.
Basic introduction to the language, with emphasis on grammar and reading skills. Prerequisite: Two years of a different Slavic language at the college level. LEC.

SLAV 561. Readings in Slavic Language: ______. 1-6 Hours. H/W.
A course of readings and discussion of grammar in a Slavic language as a continuation of SLAV 560, for example, in Bulgarian, Macedonian, etc. Prerequisite: SLAV 560 or the equivalent. LEC.

SLAV 562. Russian Theatre and Drama from Stanislavski and Chekhov to the Present. 3 Hours. H/W.
A study of the development of Russian theatre and dramatic literature from 1898 to the present. Lectures and readings in English. (Same as THR 725.) LEC.

SLAV 564. The "Woman Question" in Nineteenth-Century Russian Literature. 3 Hours. H.
An exploration of the "woman question" in nineteenth-century Russia as treated in literary texts. Authors to be included are: Tolstoy, Turgenev, Dostoevsky, Chekhov, as well as women writers such as Karolina Pavlova and Evgenia Tur, and prominent literary and social critics. Readings in English. LEC.

SLAV 566. The Devil in Russian Literature. 3 Hours. H.
This course traces the various manifestations of the Devil through Russian and European folklore, myth, theology, culture, and literature. Although the focus is on Russian literature, classic European works are discussed, as they had a powerful impact on the modern Russian Conception of the Evil One. Readings in English. (Same as HWC 566.) LEC.

SLAV 568. Biblical Themes in Modern Russian Literature. 3 Hours. H.
An exploration of the creative process of modern Russian literature (1700 to present) through the ways in which Russian writers have responded to the Bible, the cornerstone of both Western and Eastern Christianity. LEC.

SLAV 570. War and Violence Russian Literature and Film. 3 Hours. S.
This course focuses on artistic representations of violence resulting from historical events such as World War II, Soviet collectivization, the Gulag, and political purges. We consider Soviet literature and film, including works by Isaac Babel, Andrei Platonov, Anna Akhmatova, and Alexander Solzhenitsyn. Readings in English. The course is offered at the 300 and 500 levels, with additional assignments at the 500 level. LEC.

SLAV 600. Biography of a City: ______. 3 Hours. H/W.
Examination in depth of the historical, social, intellectual, and artistic development of one or more Slavic urban centers. LEC.

SLAV 612. Introduction to Russian Literature of the Nineteenth Century. 3 Hours. H/W.
Pushkin, Dostoevsky, Tolstoy, and others with an introduction to Russian culture. Lectures and readings in Russian. Prerequisite: Three years of Russian language study or its equivalent. LEC.

SLAV 614. Russian Literature in Translation: ______. 3 Hours. H/W.
A survey of the principal Russian authors and literary works of the 19th and/or 20th century. Readings in English, no prerequisites for non-Russian majors. Students with a sound knowledge of Russian will be expected to do some of the readings in Russian. LEC.

SLAV 616. Introduction to Russian Literature of the Twentieth Century. 3 Hours. H/W.
A survey of recent Russian and Soviet literature. Lectures and readings in Russian. Prerequisite: Three years of Russian language study or its equivalent. LEC.

SLAV 626. The Cultural Impact of Ottoman Empire on the South Slavs. 3 Hours. H.
An examination of the cultural development of the South Slavs in the context of the Ottoman invasions and subsequent rule (14th-19th century), focusing on the frontier aspects of the Balkans, military culture, religion, economics and banditry, as well as other aspects of material and folk culture. No language requirement. Prerequisite: SLAV 316 or SLAV 508; or consent of instructor. LEC.

SLAV 630. Slavic Folklore. 3 Hours. H/W.
Introduction to the phenomena and problems of Slavic folklore. Prerequisite: Two years of Russian on the college level. LEC.

SLAV 635. Language, Culture and Ethnicity in Prehistoric Eastern Europe. 3 Hours. S.
The course is for students who wish to understand the prehistory of Eastern Europe with special attention to the Slavs. The interdisciplinary course examines East European prehistory from the perspectives of archaeology and linguistics, considering also how ideologies have influenced the interpretation of results. No language prerequisite. (Same as ANTH 696) LEC.

SLAV 642. Pushkin and Evgenij Onegin. 3 Hours. H/W.
Lectures, reading, and analysis of Pushkin's "novel in verse." Prerequisite: Three years of Russian language courses or the equivalent. LEC.

SLAV 650. The Russian Short Story. 3 Hours. H/W.
Readings from the short stories of major Russian writers of the 19th and/or 20th centuries, e.g., Pushkin, Gogol, Dostoevsky, Turgenev, Tolstoy, Chekhov; readings and discussion in English for non-Russian majors. Russian majors will be expected to read most stories in Russian. Prerequisite: None for non-majors in the department; two years of college-level Russian for majors. LEC.

SLAV 656. Russian Literature of the Eighteenth Century. 3 Hours. H/W.
Readings from Kantemir, Trediakovskiy, Lomonosov, Derzhavin, Karamzin, and others in their literary and intellectual contexts. Readings in Russian. Prerequisite: Three years of Russian language study or its equivalent. LEC.

SLAV 660. Nineteenth Century Russian Prose and Fiction. 3 Hours. H/W.
Readings from the prose works of Pushkin, Lermontov, Gogol, Turgeniev, Goncharov, Dostoevsky, and Tolstoy. In translation. No prerequisite for non-Russian majors. Russian majors will be required to have achieved senior standing and will read most works in Russian. LEC.

SLAV 662. Russian Literary Modernism: 1880-1930. 3 Hours. H/W.
Readings from late Tolstoy through the period of the 1920's. In translation; no prerequisites for non-Russian majors. Russian majors will be required to have achieved senior standing and will read most works in Russian. LEC.

SLAV 664. Soviet Russian Literature: 1930-1990. 3 Hours. H/W.
Readings in the period, in all genres. In translation; no prerequisites for non-Russian majors. Russian majors are required to have senior standing and read most works in Russian. LEC.

SLAV 666. Nabokov. 3 Hours. H/W.
A study of the life and works of Vladimir Nabokov. In translation. No prerequisite. LEC.
SLAV 675. Readings in Slavic Studies (English). 1-3 Hours. H.
Directed readings on Slavic culture in English. For non-majors.
Prerequisite: Instructor permission. LEC.

SLAV 678. Readings in Slavic Linguistics. 1-6 Hours. H/W.
Directed individual readings on various topics concerning Slavic
linguistics. Prerequisite: Proficiency in at least one Slavic language, and
consent of instructor. IND.

SLAV 679. Topics in: ______. 1-6 Hours. H.
Intensive study of a selected topic from Slavic languages, literatures,
linguistics, or pedagogy. IND.

SLAV 684. Main Currents of Russian Thought I. 3 Hours. H/W.
A study of philosophical, theological, and literary monuments designed to
acquaint the student with main cultural forces that have shaped Russian
thought and manners. From the origins to Peter the Great. (Same as PHIL
684.) LEC.

SLAV 686. Main Currents of Russian Thought II. 3 Hours. H/W.
A continuation of SLAV 684. From the age of Peter the Great to
revolutions of 1917. (Same as PHIL 686.) LEC.

SLAV 710. Introduction to Slavic Languages and Linguistics. 3
Hours.
The Slavic languages and peoples, including briefly: their origin,
prehistory, and early culture. Basic linguistic methodology as applied to
Slavic material from the beginnings of Slavic linguistics to the present.
LEC.

SLAV 711. Russian Poetry: Nineteenth Century. 3 Hours.
Readings from the works of the major poets, in Russian. Prerequisite:
Three years of Russian language study or the equivalent. LEC.

SLAV 712. Russian Poetry: Twentieth Century. 3 Hours.
Readings from the works of the major poets, in Russian. Prerequisite:
Language proficiency. LEC.

SLAV 714. Russian Theatre and Drama to 1900. 3 Hours.
A study of the development of Russian theatre and dramatic literature
from their beginnings to 1900. Readings in English. Students with
knowledge of Russian will read some works in Russian. LEC.

SLAV 715. Russian Drama and Theatre 1953 to the Present. 3 Hours.
A study of the development of Russian theatre and dramatic literature
from 1953 to the present. Readings in English. Students with knowledge
of Russian will read some works in Russian. LEC.

SLAV 716. History of Russian Literary Criticism: Late Eighteenth and
Nineteenth Century. 3 Hours.
A study of the various literary periods, such as sentimentalism,
romanticism, nationalism, realism, with particular reference to individual
literary critics and critical journals. LEC.

SLAV 719. Philosopihal and Aesthetic Thought of the Russian
Silver Age. 3 Hours.
A survey of the works of Solovyov, Florensky, Berdyaev, Merezhkovsky,
Ivanov, and others, and their relation to the literature and culture of the
Silver Age. LEC.

SLAV 721. Pushkin. 3 Hours.
A study of the life and works of Alexander Pushkin. Readings in Russian,
open to senior Russian majors and graduate students. Prerequisite: Three
years of Russian or the equivalent. LEC.

SLAV 726. Chekhov. 3 Hours.
A study of the life and works of Anton Chekhov. Open to senior Russian
majors and graduate students. Readings in Russian. Prerequisite: Three
years of Russian or the equivalent. LEC.
SLAV 806. East Slavic Linguistics. 3 Hours.
An examination of the linguistic phenomena and historical development of the East Slavic languages (Russian, Belorussian, and Ukrainian). Prerequisite: Graduate standing in Russian. LEC.

SLAV 808. West Slavic Linguistics. 3 Hours.
An examination of linguistic phenomena and historical development of the West Slavic languages (Polish, Czech, Slovak, and Upper and Lower Sorbian). LEC.

SLAV 810. South Slavic Linguistics. 3 Hours.
An examination of linguistic phenomena and historical development of Bulgarian, Macedonian, Croatian-Serbian, Slovene. LEC.

SLAV 820. Old Russian Literature: Beginnings to 1700. 3 Hours.
Readings of selected texts in Russian. Prerequisite: SLAV 752. LEC.

SLAV 822. Seminar in Russian Literature: Eighteenth Century. 3 Hours.
An investigation of specific themes or authors in the literature, culture, and thought of the 18th century. All readings in Russian. Prerequisite: Graduate standing and advanced Russian language. SEM.

SLAV 824. Proseminar in Methods of Teaching Slavic Languages I. 1-3 Hours.
Required for all teaching assistants, assistant instructors engaged in the teaching of Slavic languages and persons planning for careers in teaching Slavic languages. Combines discussion of theoretical teaching concepts with practical solution of problems arising concurrently in Slavic language courses. Students enrolled for two or three hours will study advanced Slavic grammar topics and stylistics as they apply to the teaching of Slavic languages. LEC.

SLAV 825. Investigation and Conference. 1-3 Hours.
Individual work in language or literature of the teaching of Slavic languages by qualified students under direction of members of the department. RSH.

SLAV 826. Proseminar in Methods of Teaching Slavic Languages II. 1-3 Hours.
Required for all teaching assistants, assistant instructors engaged in the teaching of Slavic languages and persons planning for careers in teaching Slavic languages. Combines discussion of theoretical teaching concepts with practical solution of problems arising currently in Slavic language courses. Students enrolled for two or three hours will study advanced Slavic grammar topics and stylistics as they apply to the teaching of Slavic languages. LEC.

SLAV 850. Seminar in Russian Literature: Nineteenth Century: _____ 3 Hours.
A regular seminar for graduate students, devoted to special problems in Russian literature. (Ancient Russian literature, Classicism, Romanticism, Realism, Symbolism, etc.) Designed to introduce the student to the more advanced methods in criticism, literary analysis, and research. Prerequisite: Graduate standing in Slavic Languages and Literatures, or permission of instructor. LEC.

SLAV 852. Seminar in Russian Literature: Twentieth Century. 3 Hours.
Various topics including pre- and post-Revolutionary poetry, the prose of the 1920s, the development of Socialist Realism, individual authors, etc. LEC.

SLAV 899. Ph.D. Seminar Slavic Linguistics. 3 Hours.
Topics in Slavic linguistics. Content will vary. May be repeated. Prerequisite: Ph.D. student in Slavic Languages and Literatures. LEC.

SLAV 912. Seminar: Topics in Contemporary Slavic Linguistics. 3 Hours.
Synchronic examination of specific topics, i.e., phonology, morphology, syntax, and lexicology of several Slavic languages. LEC.

SLAV 914. Seminar: Topics in Historical Slavic Linguistics. 3 Hours.
Diachronic examination of selected topics, i.e., phonology, morphology, syntax, or lexicology, of one or more Slavic languages. LEC.

SLAV 917. Seminar in Russian Culture and Society. 3 Hours.
Examination of selected topics in Russian cultural history, especially as treated in the works of Russian literature and intellectual history. Prerequisite: At least one course in Russian history, or one of the following courses—SLAV 502, SLAV 510, SLAV 684, SLAV 686, plus graduate standing. LEC.

SLAV 932. Seminar: Topics in Slavic Folklore. 3 Hours.
Investigation and concentrated study of one or more themes (e.g., mythology, demonology, life rituals, folklore and literature), figures (e.g., Baba Yaga), or genres (e.g., magic tales, bylins, riddles) of Slavic folklore. All readings in Russian. Prerequisite: SLAV 630. SEM.

SLAV 940. Seminar: Topics in Comparative Slavic Literature. 3 Hours.
Prerequisite: Graduate standing in Slavic Languages and Literatures. LEC.

SLAV 999. Dissertation. 1-6 Hours.
THE.

TURK 104. Elementary Turkish I. 5 Hours. U.
Basic language acquisition, including essentials of grammar, speaking, and writing standard (Osmanli) Turkish. LEC.

TURK 108. Elementary Turkish II. 5 Hours. U.
Continuation of TURK 104. Prerequisite: TURK 104. LEC.

TURK 177. First Year Seminar: _____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Turkish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

TURK 204. Intermediate Turkish I. 3 Hours. U.
Second-year course in Turkish language with emphasis on reading, composition, and conversation. Prerequisite: TURK 108. LEC.

TURK 208. Intermediate Turkish II. 3 Hours. U.
Continuation of TURK 204. Prerequisite: TURK 204. LEC.

TURK 314. Turkish Culture Through Film and Literature. 3 Hours. H.

Representative works of major authors and film directors will be discussed and analyzed in their historical, political and theoretical contexts. The course is offered at the 300 and 500 levels, with additional assignments at the 500-level. LEC.
of major authors and film directors will be discussed and analyzed in their historical, political and theoretical contexts. The course is offered at the 300 and 500 levels, with additional assignments at the 500-level. Prerequisite: REES 550 or permission of instructor. LEC.

TURK 675. Readings in Turkish: ______. 3 Hours. U.
Prerequisite: Two years of college-level Turkish and consent of instructor. May be repeated for credit if content varies. IND.

UKRA 104. Elementary Ukrainian I. 5 Hours. U.
First semester. Five hours per week of recitation and drill in the spoken language. Essentials of grammar, practice reading, writing and speaking Ukrainian. LEC.

UKRA 108. Elementary Ukrainian II. 5 Hours. U.
Second semester. Continuation of UKRA 104. Prerequisite: UKRA 104. LEC.

UKRA 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Ukrainian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

UKRA 204. Intermediate Ukrainian I. 3 Hours. U.
Second year course in Ukrainian language with emphasis on reading, composition, and conversation. Prerequisite: UKRA 108. LEC.

UKRA 208. Intermediate Ukrainian II. 3 Hours. U.
Second semester. Continuation of UKRA 204. Prerequisite: UKRA 204. LEC.

UKRA 512. Intensive Ukrainian Language and Culture I. 3 Hours. U.
A practical Ukrainian language course involving advanced study of the grammar, conversation, composition. Reading of texts on a variety of subjects (culture, literature, history, folklore etc.), taught in Ukrainian. Prerequisite: Three years of a Slavic language or permission of instructor. LEC.

UKRA 516. Intensive Ukrainian Language and Culture II. 3 Hours. U.
A practical Ukrainian language course involving advanced study of the grammar, conversation, composition. Reading of texts on a variety of subjects (culture, literature, history, folklore etc.), taught in Ukrainian. Prerequisite: Three years of a Slavic language or permission of instructor. LEC.

UKRA 675. Readings in Ukrainian Language. 1-6 Hours. H.
Directed individual readings on various topics concerning the Ukrainian language. Prerequisite: Two years of Ukrainian. IND.

YDSH 104. Elementary Yiddish I. 5 Hours. U.
Essentials of grammar, practice in speaking, reading, and writing Yiddish. Not open to native speakers of Yiddish. LEC.

YDSH 108. Elementary Yiddish II. 5 Hours. U.
Continuation of grammar, practice in conversation, composition, and reading. Not open to native speakers of Yiddish. Prerequisite: YDSH 104 or equivalent. LEC.

YDSH 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Yiddish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

YDSH 212. Intermediate Yiddish I. 3 Hours. U.
Structured grammar review, composition, conversation, with readings of literary and cultural texts. Not open to native speakers of Yiddish. Prerequisite: YDSH 108 or equivalent. LEC.

YDSH 216. Intermediate Yiddish II. 3 Hours. U.
A continuation of YDSH 212. Structured grammar review, composition, conversation, with readings of literary and cultural texts. Not open to native speakers of Yiddish. Prerequisite: YDSH 212 or equivalent. LEC.

YDSH 300. Studies in Yiddish: ______. 3 Hours. H.
Examination of special topics in Yiddish. May be repeated if topic varies. LEC.

YDSH 395. Study Abroad Topics in Yiddish: ______. 3-6 Hours. H.
This course is designed for the study abroad of special topics in Yiddish at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

YDSH 490. Independent Study. 1-3 Hours. U.
Intensive reading or research under faculty supervision IND.

Bachelor of Arts in Slavic Languages and Literatures

Why study Slavic languages and literatures?

Because Russia and the Slavs link the West and the East.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.A. Major

The student completes a minimum of 30 hours of study (29 hours for Russian emphasis) in one of 3 emphases: Polish, Russian, or South Slavic (Bosnian/Croatian/Serbian). The department encourages students to fulfill general education requirements from courses in the SLAV 140/SLAV 141, SLAV 144/SLAV 145, and SLAV 148/SLAV 149 series.
Beyond the minimum 27 hours, students are strongly encouraged to take additional courses in the Slavic department and appropriate background courses in the history, philosophy, and political science of the Slavic regions.

**Polish Studies Emphasis**

Majors choosing this option must complete courses as indicated in following areas:

### Prerequisite Knowledge and Skills (0)

The following courses provide fundamental skills for the major, but do not contribute to the minimum required hours for the major.

- Elementary Polish I. Satisfied by: PLSH 104
- Elementary Polish II. Satisfied by: PLSH 108
- Intermediate Polish I. Satisfied by: PLSH 204

### Polish Studies Emphasis Core Knowledge and Skills (15)

- Intermediate Polish II. Satisfied by: PLSH 208
- Advanced Polish I. Satisfied by: PLSH 504
- Advanced Polish II. Satisfied by: PLSH 508
- Readings in Polish Language and Literature. Satisfied by: PLSH 675
- West Slavic Literature and Civilization (Polish and Czech). Satisfied by: SLAV 506

### Required Electives (12)

Satisfied by 4 courses (12 hours) chosen from the following:

- SLAV 144/145: Survey of Russian Literature in Translation
- SLAV 318: Jews and Slavs in Eastern Europe
- SLAV 340/341: Introduction to the Languages and Peoples of Russia and East-Central Europe
- SLAV 504: Introduction to East-Central European Culture and Society
- SLAV 514: Totalitarianism and Literature in Central Europe
- SLAV 516: Film Adaptations of Polish and Czech Literature
- SLAV 635: Language, Culture and Ethnicity in Prehistoric Eastern Europe
- ECON 560: Economic Systems
- HIST 377: Everyday Communism in Eastern Europe
- HIST 557: Nationalism and Communism in East Central Europe from 1772 to the Present
- PHIL 580: Marxism (or other relevant course in philosophy)

**Senior Capstone Seminar. Satisfied by:** (3)

SLAV 495: Senior Capstone Seminar

Majors are strongly encouraged to study abroad. Please see your advisor about this opportunity.

**Major Hours & Major GPA**

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

### Major Hours

Satisfied by 30 hours of major courses.

### Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

### Major Junior/Senior (300+) Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

### Major Junior/Senior (300+) Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Russian Emphasis**

Majors choosing this option must complete courses as indicated in following areas:

### Prerequisite Knowledge and Skills (15)

The following courses provide fundamental skills for the major, but do not contribute to the minimum required hours for the major.

- Elementary Russian I. Satisfied by: RUSS 104
- Elementary Russian II. Satisfied by: RUSS 108
- Intermediate Russian I. Satisfied by: RUSS 204
- Russian Linguistics. Satisfied by one one course (3 hours, 200+) chosen from:
  - SLAV 340: Introduction to the Languages and Peoples of Russia and East-Central Europe
  - SLAV 341: Introduction to the Languages and Peoples of Russia and East-Central Europe, Honors
  - SLAV 520: Russian Phonetics, Phonology, and Inflectional Morphology
  - SLAV 522: The Grammatical Categories of Russian: Linguistic Units, Functions and Meanings
  - SLAV 524: Russian Since the Revolution
  - SLAV 540: Language and Identity in East-Central Europe and the Former Soviet Union

### Russian Emphasis Core Knowledge and Skills (26)

- Intermediate Russian II. Satisfied by: RUSS 208
- Advanced Russian Language. Satisfied by one of the following: RUSS 504 & RUSS 508

- Russian for the Professions I & Russian for the Professions II

- Russian Linguistics. Satisfied by one one course (3 hours, 200+) chosen from:
  - SLAV 340: Introduction to the Languages and Peoples of Russia and East-Central Europe
  - SLAV 341: Introduction to the Languages and Peoples of Russia and East-Central Europe, Honors
  - SLAV 520: Russian Phonetics, Phonology, and Inflectional Morphology
  - SLAV 522: The Grammatical Categories of Russian: Linguistic Units, Functions and Meanings
  - SLAV 524: Russian Since the Revolution
  - SLAV 540: Language and Identity in East-Central Europe and the Former Soviet Union
Russian Literature. Satisfied by 1 course (3 hours, 400+) chosen from:

- SLAV 510 The Russian Literary Genius
- SLAV 530 Introduction to Russian Poetry
- SLAV 532 Dostoevsky
- SLAV 534 Tolstoy
- SLAV 536 Turgenev
- SLAV 562 Russian Theatre and Drama from Stanislavski and Chekhov to the Present
- SLAV 564 The “Woman Question” in Nineteenth-Century Russian Literature
- SLAV 566 The Devil in Russian Literature
- SLAV 568 Biblical Themes in Modern Russian Literature
- SLAV 612 Introduction to Russian Literature of the Nineteenth Century
- SLAV 614 Russian Literature in Translation: ______
- SLAV 616 Introduction to Russian Literature of the Twentieth Century
- SLAV 642 Pushkin and Evgenij Onegin
- SLAV 650 The Russian Short Story
- SLAV 656 Russian Literature of the Eighteenth Century
- SLAV 660 Nineteenth Century Russian Prose and Fiction
- SLAV 662 Russian Literary Modernism: 1880-1930
- SLAV 664 Soviet Russian Literature: 1930-1990
- SLAV 666 Nabokov

Required Electives
Satisfied by 3 courses (9 hours) in Russian literature, linguistics, culture, or advanced language chosen in consultation with the major advisor. Note that only one (1) 100-level course (either SLAV 140/SLAV 141, SLAV 144/SLAV 145, or SLAV 148/SLAV 149) may count as a required elective for the Russian emphasis major.

SLAV 600  Biography of a City: ______
SLAV 684  Main Currents of Russian Thought I
SLAV 686  Main Currents of Russian Thought II

Literature
SLAV 510  The Russian Literary Genius
SLAV 530  Introduction to Russian Poetry
SLAV 532  Dostoevsky
SLAV 534  Tolstoy
SLAV 536  Turgenev
SLAV 562  Russian Theatre and Drama from Stanislavski and Chekhov to the Present
SLAV 564  The "Woman Question" in Nineteenth-Century Russian Literature
SLAV 566  The Devil in Russian Literature
SLAV 568  Biblical Themes in Modern Russian Literature
SLAV 612  Introduction to Russian Literature of the Nineteenth Century
SLAV 614  Russian Literature in Translation: ______
SLAV 616  Introduction to Russian Literature of the Twentieth Century
SLAV 642  Pushkin and Evgenij Onegin
SLAV 650  The Russian Short Story
SLAV 656  Russian Literature of the Eighteenth Century
SLAV 660  Nineteenth Century Russian Prose and Fiction
SLAV 662  Russian Literary Modernism: 1880-1930
SLAV 664  Soviet Russian Literature: 1930-1990
SLAV 667  Post-Soviet Literature
SLAV 668  Nabokov

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 20 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Slavic Cultures in Translation Track

Students choosing this minor track must complete courses as indicated in following areas:

West Slavic Literature and Civilization or South Slavic Literature and Civilization. Satisfied by:
SLAV 506  West Slavic Literature and Civilization (Polish and Czech)
or SLAV 508  South Slavic Literature and Civilization

Slavic Culture. Satisfied by two of the following:
SLAV 140/141  Introduction to Russian Culture
SLAV 144/145  Survey of Russian Literature in Translation
SLAV 148/149  Introduction to Slavic Folklore
SLAV 340/341  Introduction to the Languages and Peoples of Russia and East-Central Europe

Junior/Senior Slavic Literature and Culture. Satisfied by 3 junior/senior (300+) SLAV courses (9 hours) from the following:
SLAV 318  Jews and Slavs in Eastern Europe
SLAV 510  The Russian Literary Genius
The University of Kansas

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**South Slavic Studies Track**

Students choosing this minor track must complete courses as indicated in the following areas:

**Prerequisites (10)**
The following courses provide fundamental skills for the minor, but do not contribute to the minimum required hours for the minor.

- Elementary Bosnian/Croatian/Serbian I. Satisfied by:
  - BCRS 104  Elementary Bosnian/Croatian/Serbian I  5

**South Slavic Studies Required Courses (18)**

- Intermediate Bosnian/Croatian/Serbian I. Satisfied by:
  - BCRS 204  Intermediate Bosnian/Croatian/Serbian I  3

- Intermediate Bosnian/Croatian/Serbian II. Satisfied by:
  - BCRS 208  Intermediate Bosnian/Croatian/Serbian II  3

- South Slavic Literature and Civilization. Satisfied by:
  - SLAV 508  South Slavic Literature and Civilization  3

9 hours in South Slavic languages, history, cultures, or literatures at the 300 level or above, chosen from courses in the South Slavic studies emphasis are required. Electives. Satisfied by 3 courses (9 hours) chosen from the following:

- Intensive Croatian (summer in Croatia)
- Readings in Bosnian/Croatian/Serbian
- Economic Systems
- Everyday Communism in Eastern Europe
- Nationalism and Communism in East Central Europe from 1772 to the Present
- Marxism (or other relevant course in philosophy)
- Survey of Russian Literature in Translation
- The Peoples and Cultures of Southeastern Europe Through Film
- Introduction to the Languages and Peoples of Russia and East-Central Europe
- Readings in Slovene
- The Cultural Impact of Ottoman Empire on the South Slavs
- Slavic Folklore
- Language, Culture and Ethnicity in Prehistoric Eastern Europe
- Topics in: _____ (Slavic Culture)

**Minor Hours & Minor GPA**
While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Study Abroad**
The department, in conjunction with the Center for Russian, East European, and Eurasian Studies (http://www.crees.ku.edu), conducts summer institutes at universities in
to teach at a variety of levels, which provides a strong base of teaching experience upon entering the job market.

Additional Funding
There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://www.graduate.ku.edu/funding) for KU graduate students.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
Apply to the graduate program via the Graduate Studies online application system (http://graduate.ku.edu/application-process).

For additional information regarding departmental admissions requirements, deadlines and the application process, please visit the graduate page of the Slavic Languages and Literatures (http://slavic.ku.edu) website.

M.A. Degree Requirements
Prerequisites for Admission

- 30 semester hours of credit in an appropriate Slavic language and literature (of which 12 hours must have been taken on the junior/senior level), or the equivalent of such study.

Non-thesis Degree

1. At least 30 hours of graduate work in Slavic languages and literatures including SLAV 710 and SLAV 740, 3 courses in Slavic literature, 3 courses in Slavic linguistics, and 2 courses in either Slavic literature or linguistics. At least 1 of the literature or linguistics courses must be a graduate seminar.
2. A written and oral examination.

Thesis Degree

1. At least 24 hours of graduate work in Slavic languages and literatures, including SLAV 710 and SLAV 740, 3 courses in Slavic literature, and 3 courses in Slavic linguistics.
2. A thesis for which 6 credit hours may be allowed (not to be included in the 24-hour minimum).
3. A written and oral examination.

For students who plan to continue in the graduate program, the M.A. written and oral examination serves as a qualifying examination for advancement to Ph.D. work. For students who seek only the M.A. degree, successful completion of the M.A. written and oral examination signals the end of the program.
Students planning to work toward the Ph.D. may begin study of a second Slavic language during their M.A. work. Such study does not count toward M.A. degree requirements.

Students completing the M.A. degree without intent to continue to Ph.D. work have the opportunity, in consultation with the graduate advisor, to adjust their program to meet specific career goals.

**Study Abroad**

The department, in conjunction with the Center for Russian, East European, and Eurasian Studies (http://www.crees.ku.edu), conducts summer institutes at universities in

- L'viv, Ukraine; and
- Zadar, Croatia.

Arrangements can be made for students to study for one semester or a full academic year at these or other universities. Some scholarship support is available.

Consult the Slavic department (http://slavic.ku.edu) office or the Office of Study Abroad (http://www.studyabroad.ku.edu). Credit for non-KU programs is not automatic and is evaluated in consultation with the Slavic department undergraduate director.

Undergraduate and graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.

**Slavic Language Programs in Russia and Eastern Europe**

KU students may take intermediate or advanced Bosnian/Croatian/Serbian at a 6-week summer institute in Croatia or attend a summer language program in Poland.

Graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.

**Doctor of Philosophy in Slavic Languages and Literatures**

**Overview of Doctoral Program**

The Doctor of Philosophy degree in Slavic Languages & Literatures builds further on the foundational knowledge and the structured classroom learning that students engaged in during M.A. work. Working under the close mentorship of their advisors, Ph.D. students develop a minor in a related field, learn advanced pedagogical and interpretive strategies, continue to improve language skills, and engage in self-motivated, independent study to develop a coherent area of specialization. Students complete their graduate study.

While most KU Ph.D. students find positions as academics, some choose to pursue professional positions in academic support, digital humanities, research, and government service. See Ph.D. Alumni (http://slavic.ku.edu/doctor-philosophy-alumni-ku-slavic-department) on the Department’s website.

**Areas of Concentration**

Two concentrations are offered in the Ph.D. program:

- Russian Literature
- Slavic Linguistics

Additional information regarding academic opportunities in culture, intellectual history, folklore, or language pedagogy is available on the departmental Ph.D. Overview (http://slavic.ku.edu/phd-slavic-overview).

**Departmental Funding**

While it is not guaranteed, the department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Programs overview (http://slavic.ku.edu/phd-slavic-overview) page of our departmental website.

**FLAS Fellowships**

Students in the graduate program may also be eligible for a Foreign Language and Area Studies (FLAS) (http://flas.ku.edu) fellowship. FLAS fellowships include:

- Summer award - up to $5,000 for tuition and a stipend of $2,500 for living expenses for summer language study equivalent to one full year of language study
- Academic Year award - full KU tuition and a $15,000 stipend for living expenses for academic year study that includes two semesters of language and six credits or more of East Asian culture courses

Students in the graduate program are strongly encouraged to apply (http://flas.ku.edu/how-apply) for this funding.

**Additional Funding**

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding) for KU graduate students.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.
Graduate Admission

Apply to the graduate program via the Graduate Studies online (http://graduate.ku.edu/application-process) application system (http://www.graduate.ku.edu).

For additional information regarding departmental admissions requirements, deadlines and the application process, please visit the graduate page of the Slavic Languages and Literatures (http://slavic.ku.edu) website.

Ph.D. Degree Requirements

Students admitted to Ph.D. work in Russian literature or Slavic linguistics must fulfill M.A. requirements and pass the qualifying examination. Students also must fulfill all specific requirements in the concentration, master a western European language, participate in all in departmental colloquia, complete comprehensive examinations, and write a dissertation.

All Ph.D. students are expected to enroll in courses in their concentrations numbered 500 and above offered in a given semester

1. If they have not previously had the courses or their equivalent,
2. If it is judged that the course material aids in preparation for comprehensive examinations, and
3. If it is feasible to incorporate such courses into a given semester’s program.

Requirements for Ph.D. Concentration in Russian Literature

• Detailed knowledge of the history and development of Russian literature
• Oral and written competence in Russian language plus an orientation in its structure and history
• Reading competence in at least one West or South Slavic language and a general knowledge of the history of its literature
• 9 to 12 graduate semester credit hours in a minor subject either from outside or inside the department
• An acceptable dissertation

Requirements for Ph.D. Concentration in Slavic Linguistics

• Detailed knowledge of the structure and history of two Slavic languages, one of which is considered the student’s major language, plus reading competence in a third Slavic language
• Oral and written competence in the major Slavic language
• 9 to 12 graduate semester credit hours in a minor subject, either from outside or inside the department
• Basic knowledge of general and comparative linguistics
• An acceptable dissertation

Examinations

Qualifying Examination

All students must take the qualifying examination to be admitted to Ph.D. work. For KU students, the M.A. examination serves as the qualifying examination. Students who hold the M.A. degree from another institution but begin Ph.D. work at KU are required to take the qualifying examination within 2 semesters of entry into the program.

Research Skills & Responsible Scholarship Requirement

The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. Graduate students in Slavic Languages and Literatures must demonstrate (through course work or examination) reading competence in a western European language, preferably French or German. The student must also take part in all required graduate colloquia. These cover a variety of topics intended to promote and model responsible scholarship and professional development. Faculty and graduate students participate in three colloquia each semester. Issues of responsible scholarship are also imbedded in the curriculum.

Comprehensive Examination

Students may take written and oral comprehensive examinations after fulfilling all other requirements for the Ph.D., with the exception of the dissertation.

Dissertation Defense

Students demonstrate satisfactory completion of the Ph.D. program in their final oral defense of the dissertation and its field and by prompt submission of the thesis.

Study Abroad

The department, in conjunction with the Center for Russian, East European, and Eurasian Studies (http://www.crees.ku.edu), conducts summer institutes at universities in

• L’viv, Ukraine; and
• Zadar, Croatia.

Arrangements can be made for students to study for one semester or a full academic year at these or other universities. Some scholarship support is available.

Consult the Slavic department (http://slavic.ku.edu) office or the Office of Study Abroad (http://www.studyabroad.ku.edu). Credit for non-KU programs is not automatic and is evaluated in consultation with the Slavic department undergraduate director.

Undergraduate and graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.

Slavic Language Programs in Russia and Eastern Europe

KU students may take intermediate or advanced Bosnian/Croatian/Serbian at a 6-week summer institute in Croatia or attend a summer language program in Poland.

Graduate students at KU are encouraged to spend a summer, semester, and/or year studying and conducting research in their country of interest.
Department of Sociology

Why study sociology?
Sociology investigates the social institutions and processes that shape human behavior, histories, and opportunities.

Undergraduate Programs
The department educates sociologists for careers in teaching, research, and some applied fields. Undergraduate course work in sociology can contribute to professional training in architecture, business, education, journalism, law, medicine, public health, and social work.

Sociology majors can earn a Bachelor of Arts (BA) or Bachelor of General Studies (BGS). Both the BA and the BGS require a generous sampling of courses in the humanities, social sciences, and natural sciences. Because of its compatibility with other majors, many of our students earn double majors. For example, many sociology undergraduates also major in history, philosophy, political science, or anthropology, or earn a second degree in journalism.

Students majoring in a wide range of disciplines will find a minor in Sociology enhances their perspective on their field. Sociology is often the minor of choice for students majoring in Psychology, Anthropology, American Studies, Economics, Applied Behavioral Science, History, Political Science, and Global and International Studies and those in professional schools such as Journalism, Business, or Education.

Graduate Programs
The department offers a full graduate program in sociology leading to the M.A. and Ph.D. degrees, educating sociologists for careers in teaching and research and for fields of practical application. It also contributes to professional education in such fields as social welfare, social policy, architecture, education, journalism, personnel administration, business, and medicine. Aside from professional interests, the department offers instruction to assist students in deepening their understanding of social relations and, hence, of the social context of their own lives.

Dual-title Ph.D. in Sociology and Gerontology
This dual-title degree is an option available to students who have first been admitted to the doctoral program. The dual-title degree allows the pursuit of a single degree that incorporates study within a traditional discipline and training in an interdisciplinary field; the student is awarded one degree (Ph.D.) with both titles identified on the diploma (e.g., “Ph.D. in Sociology and Gerontology”).

This option is designed to appeal to students who are strong in a traditional discipline but also motivated to study across disciplinary lines. In the course of study, students can avail themselves of disciplinary depth and interdisciplinary breadth. At the post-doctoral stage, dual-title graduates will have enhanced career and employment opportunities, able to claim expertise in one or both titles of their degree when seeking positions in education and research.

More information about this option, its admissions requirements, and plan of study can be found on the department website or the website of the Gerontology program.

Courses
SOC 104. Elements of Sociology. 3 Hours. SC AE41/GE11/GE3S / S.
The study of social life, including how human groups are organized, how they change, and how they influence individuals. Consideration is given to a variety of human organizations and social institutions and how these groups and institutions both determine, and are determined by, human beings. This course may not be taken for credit by those who have taken SOC 304. LEC.

SOC 105. Elements of Sociology, Honors. 3 Hours. SC AE41/GE11/GE3S / S.
The study of social life, including how human groups are organized, how they change, and how they influence individuals. Consideration is given to a variety of human organizations and social institutions and how these groups and institutions both determine, and are determined by, human beings. Open only to students on dean’s honor roll or enrolled in Honors Program, or consent of instructor. May not be taken by those who also have credit for SOC 304. LEC.

SOC 110. American Identities. 3 Hours. SC AE41/GE3S / S.
An interdisciplinary introduction to individual and group identities over time. Students explore theories and methods relating to identity from various perspectives, such as race, class, gender, sexuality, age, religion, and region. Not open to students who have taken AMS 112 or SOC 112. (Same as AMS 110.) LEC.

SOC 112. American Identities, Honors. 3 Hours. SC AE41/GE3S / S.
An interdisciplinary introduction to individual and group identities over time. Students explore theories and methods relating to identity from various perspectives, such as race, class, gender, sexuality, age, religion, and region. Not open to students who have taken AMS 110 or SOC 110. (Same as AMS 112.) Prerequisite: Membership in the University Honors Program or approval by the American Studies Program. LEC.

SOC 130. Comparative Societies. 3 Hours. NW AE42 / S/W.
Description and analysis of the culture, structure, and development of societies that are historically unrelated to the traditions of Western civilization. LEC.

SOC 131. Comparative Societies, Honors. 3 Hours. NW AE42 / S.
Description and analysis of the culture, structure, and development of societies that are historically unrelated to the traditions of Western Civilization. Open only to students enrolled in the University Honors program or by consent of instructor. May not be taken by students who have credit in SOC 130. LEC.

SOC 132. American Society, Honors. 3 Hours. SC / S.
The social structure and organization of American society with special reference to long-term and recent social changes. Not open to students who have credit for AMS 330 or SOC 330. Open to College honors students, students on the dean's honor roll, and by permission of the department. LEC.

SOC 150. Self and Society. 3 Hours. SI AE51/GE11 / S.
Discusses the way our identities, values, and behavior have been and continue to be shaped by social and situational factors. Attention is paid to the influence of factors like language, culture, social roles, specific social institutions, and broad structures of inequality and power on how we see ourselves and others. May not be taken by anyone who has completed SOC 305 or its equivalent. LEC.

SOC 151. Self and Society, Honors. 3 Hours. SI / S.
Discusses the way our identities, values, and behavior have been and continue to be shaped by social and situational factors. Attention will be paid to the influence of factors like language and culture, social roles, specific social institutions, and broad structures of inequality and power on
how we see ourselves and others. This course may not be taken for credit by those who have taken SOC 305. Open only to students admitted to the University Honors Program or by consent of instructor. LEC.

SOC 160. Social Problems and American Values. 3 Hours. SF AE41/GE41 / S.
This course is designed to explore competing explanations for the causes of, and cures for, the enduring problems of American society. The course critically analyzes dominant definitions of social problems, the political and economic roots of these problems, and the public policies aimed at reducing them. May not be taken by anyone who has already completed SOC 306 or its equivalent. LEC.

SOC 161. Social Problems and American Values, Honors. 3 Hours. SF / S.
Explores competing explanations for the causes of, and cures for, the enduring problems of American society. Critically analyzes dominant definitions of social problems, the political and economic roots of these problems, and the public policies aimed at reducing them. This course may not be taken for credit by those who have taken SOC 160 or SOC 306. Open only to students admitted to the University Honors Program or by consent of instructor. LEC.

SOC 177. First Year Seminar: ____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Sociology. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

SOC 220. Sociology of Families. 3 Hours. SC AE41/GE3S / S.
Analysis of the family as a social institution primarily in the U.S. context. Topics considered are: current and historical changes in how the family is constituted, contrasting sociological theories of family relationships, sexuality in relation to family life, the coexistence of love and hate in families, family dissolution and reformation, and the care of children. A key theme is diversity: social class, gender, race/ethnicity, and age. May not be taken by anyone who has already taken SOC 308 or its equivalent. LEC.

SOC 230. Introduction to Social Inequality in the U.S.. 3 Hours. S.
By the end of this course, students will be able to describe the major dimensions of inequality in the U.S. (including race, class, and gender), understand the structural basis of inequality, critically assess how inequality exists in major social institutions, and understand how inequalities in race, class, and gender shape social interaction. LEC.

SOC 260. America's Latinos/Latinas. 3 Hours. U.
An introduction to the Latino/a population (Mexican-Americans, Puerto Ricans, Cuban-Americans, Dominican-Americans, and Central and South Americans) in the US. Students discuss how US and Latin American societies have shaped Latino incorporation into the United States. We also discuss contemporary political, cultural and social issues that pertain to Latinos/as in the US. (Same as AMS 260) LEC.

SOC 273. Women in Society. 3 Hours. S.
A sociological exploration of the image and status of women in society, including family, work, and politics. Socialization, education, and the women's movement are also analyzed. Includes an introduction to feminist theories in sociology. LEC.

SOC 295. Study Abroad Topics in: ____. 1-6 Hours. S.
This course is designed for the study of special topics in Sociology at the freshman/sophomore level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. No more than 6 hours of SOC 295 or SOC 495 may count towards the Sociology major or minor. LEC.

SOC 304. Principles of Sociology. 3 Hours. SC AE41/GE41/GE3S / S.
An introduction to sociological concepts, methods, and substantive findings more intensive than that provided in SOC 104. Students may take this course in lieu of SOC 104 to satisfy requirements for the major and the minor. This course may not be taken for credit by those who have taken SOC 104. LEC.

SOC 305. Principles of Self and Society. 3 Hours. SI GE11 / S.
Discusses the way we identify, values, and behavior have been and continue to be shaped by social and situational factors. Attention is paid to the influence of factors like language, culture, social roles, specific social institutions, and broad structures of inequality and power on how we see ourselves and others. This course provides a more intensive coverage of the subject matter than that provided in SOC 150. May not be taken by anyone who has already taken SOC 150 or its equivalent. LEC.

SOC 306. Principles of Social Problems. 3 Hours. SF / S.
This course is designed to explore competing explanations for the causes of, and cures for, the enduring problems of American society. The course critically analyzes dominant definitions of social problems, the political and economic roots of these problems, and the public policies aimed at reducing them. This course provides a more intensive coverage of the subject matter than that provided in SOC 160. May not be taken by anyone who has already completed SOC 160 or its equivalent. LEC.

SOC 308. Principles of Family Sociology. 3 Hours. SC / S.
Analysis of the family as a social institution primarily in the U.S. context. Topics considered are: current and historical changes in how the family is constituted, contrasting sociological theories of family relationships, sexuality in relation to family life, the coexistence of love and hate in families, family dissolution and reformation, and the care of children. A key theme is diversity: social class, gender, race/ethnicity, and age. This course provides a more intensive coverage of the subject matter than that provided in SOC 220. May not be taken by anyone who has already taken SOC 220 or its equivalent. LEC.

SOC 310. Introduction to Social Research. 3 Hours. S.
An introduction to the nature and methods of social research. Topics may include: hypothesis formulation and testing; how to design a research project, collect and analyze data; elementary statistical procedures; and ethical issues. Prerequisite: Six hours of Sociology credit, including Sociology 104. A minimum GPA of 2.3 in all SOC courses is strongly recommended for students planning to enroll in this course. LEC.

SOC 312. Population and Society. 3 Hours. AE41 / S.
An examination of the causes and consequences of population change in the United States and around the world with special focus on the impact of changes in populations on social institutions. We use social demographic perspectives to explore patterns of birth, illness, death, population concentration, population migration and immigration, and changes in these over time. Prerequisite: One of the following: SOC 104, SOC 110, SOC 150, SOC 160, or SOC 220. LEC.

SOC 320. Organizations in Society. 3 Hours. S.
An analysis of complex organizations in modern societies. Attention is given to the rise of bureaucracy in business and government; the way organizations influence and respond to their social cultural environments; and the various roles that individuals play in organizations. Prerequisite: A principal course in sociology. LEC.

SOC 326. Health, Gender, and Society. 3 Hours. S.
Comparative examination of the health status of men and women in relation to key elements of contemporary societies, including not only medicine and health care services, but also systems of social inequality and stratification, cultural constructions of gender, and social policies.
SOC 330. American Society. 3 Hours. AE41 / S.
The social structure and organization of American society with special reference to long-term and recent social changes. (Same as AMS 330.) Not open to students with credit for SOC 132. Prerequisite: A principal course in sociology. LEC.

SOC 332. The United States in Global Context. 3 Hours. AE42 / S.
Examines the influence abroad of US culture, policies and practices and the impact of other countries on US culture, society, and politics. Among the topics that may be examined are race, ethnicity, colonialism, imperialism, migration, technology, communications and media, popular culture, language, health, domestic and transnational organizations, as well as economic, political, religious, military and educational institutions. (Same as AMS 332). LEC.

SOC 340. The Community. 3 Hours. S.
Structures, functions, and processes of change in local communities; interrelations of towns and small cities with rural areas and metropolitan centers with their hinterlands. Prerequisite: A principal course in sociology or ANTH 108 or ANTH 308. LEC.

SOC 341. Urban Sociology. 3 Hours. S.
Examination of the process of urbanization in modern societies, including the size, growth, functions, and ecology of cities and systems of cities; such urban social institutions as the economy, politics, and the family; and major contemporary urban policies and problems. Each topic will be analyzed from several sociological perspectives. Prerequisite: A principal course in sociology. LEC.

SOC 342. Sociology of Immigration. 3 Hours. S.
International migration reshapes politics, economics, social relations, and racial/ethnic identities. Using the United States and other countries as case studies, we explore the variations among immigrant groups and their experiences in social institutions such as the family, religion, education, labor market, and government. We consider the influence of national origin, gender, class, and culture on immigration and reception experiences, as well as issues of assimilation, transnationalism and identity. Prerequisite: SOC 104. LEC.

SOC 351. Africa Today. 3 Hours. U.
An examination of Africa's social dynamics. Topics considered include: the origins of modern African societies, nations, and states; family structures and values; ethnicity, gender relations and patriarchy; social, political, economic and cultural institutions; African exceptionalism; contemporary African social dynamics; transnational migration; HIV/AIDS; political transitions; and Africa's place in the emerging global order. Prerequisite: SOC 104. LEC.

SOC 352. Sociology of Sex Roles. 3 Hours. S.
An examination of sex roles, sex stereotypes, and major issues involved in sex-role research. Emphasizes explanations of inequality between American males and females in the family and at work. The course is designed around lectures, panels, workshops, and films. LEC.

SOC 360. Sociology of Social Control. 3 Hours. S.
This course examines changing methods of social control in society. Social control can be formal (e.g., law and criminal justice system) or informal (e.g., families, peer groups). This course examines the ways that we, as a society, attempt to respond to matters such as deviance, illness, crime, and poverty. This course will survey the many varieties of formal and informal social control faced by individuals in society, and the ways in which individuals resist and conform to various disciplinary and control regimes. Prerequisite: a principal course in Sociology. LEC.

SOC 364. Society, Popular Culture, and the Media. 3 Hours. S.
An overview of sociological theory and research on culture created and distributed through the mass media and its role in shaping our common sense interpretations of our daily lives. Topics include the social organization of the media, the relation between popular culture and the media, themes communicated in various elements of popular culture, and how various groups interpret cultural messages and incorporate them in their lives. LEC.

SOC 365. Society, Popular Culture, and the Media, Honors. 3 Hours. S.
Similar in content to SOC 364. An overview of sociological theory and research on culture created and distributed through the mass media and its role in shaping our common sense interpretations of our daily lives. Topics include the social organization of the media, the relation between popular culture and the media, themes communicated in various elements of popular culture, and how various groups interpret cultural messages and incorporate them in their lives. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

SOC 370. Conflict Resolution. 3 Hours. S.
This course is an introduction to the field of conflict resolution. Collaborative approaches to dealing with conflict will be examined from the micro, interpersonal group level to the macro, organizational level. The causes and consequences of conflict will be presented as well as problem solving techniques for the resolution of conflict in social groups. LEC.

SOC 371. Marginal Groups and Subcultures. 3 Hours. S.
The sociological study of groups that differ from the mainstream practices of their societies and of conditions affecting their careers. The primary objectives are to introduce and analytically apply sociological conceptualizations of groups, group careers, group mainstream interactions, and participant orientations. The principal cases examined are the Hutterites, the Shakers, and the Oneida Community, supplemented by briefer analyses of a variety of other groups. Questions concerning the formation, organization, processes, participants, and transformations of groups are emphasized. LEC.

SOC 385. Environmental Sociology. 3 Hours. S.
This course invites students to study society and its impact on the environment. Environmental problems are social problems. This course will address such items as social paradigms, theories, inequalities, movements, and research. (Same as EVRN 385.) LEC.

SOC 410. Sociology of Death and Dying. 3 Hours. S.
This course covers theoretical, practical, cross-cultural and historical aspects of death and dying. Social, psychological, biomedical, economic and legal issues surrounding death and dying are explored. Students examine their own ideas, feelings, and attitudes towards death and dying, and reflect on the origins and significance of those beliefs. Prerequisite: Junior or Senior Standing. LEC.

SOC 420. Armed Forces and Society. 3 Hours. U.
Examines the military as a social institution. Students analyze both the internal organization and practices of the armed forces and the relationships between the military and other social institutions. It considers the historical forces that have shaped the present. Thus, past events and policies as well as current ones are covered in the course. The primary focus of this course is on the American military and its relationship to American society, but considers the armed forces of other societies. Prerequisite: SOC 104 or permission of instructor. LEC.

SOC 424. Sociology of Health and Medicine. 3 Hours. S.
This introductory course in medical sociology examines how social factors influence health and the organization of medical services. Students explore the distribution and experiences of illnesses across key social
categories (e.g., gender, social class, etc.) The course also addresses contemporary issues in health and medicine, such as how health care systems vary cross-nationally, the training of health care workers, patient-physician relationships, and the use of medical technologies. LEC.

**SOC 427. School and Society. 3 Hours. S.**
This course examines education as a social institution and the reciprocal relationship between schools and society. It focuses particularly on the relationship between education and inequality and on education in the U.S., but also includes international comparisons. LEC.

**SOC 450. Gender and Society. 3 Hours. AE41 / S.**
An overview of sociological theory and research on the social practices constructing men and women as “opposites” and creating systematic inequality between them in class-, race-, and nation-specific ways. We consider arguments and evidence that gender is something we are, something we do, a part of every social institution, and a major aspect of how we are organized as a society. LEC.

**SOC 454. Women and Work. 3 Hours. S.**
Sociological investigation of women’s changing relationship to paid and unpaid labor in the economy and the family. Several theories are compared in these contexts: Characteristics of employed women, including occupational distribution and pay; women’s experiences in “traditional” and “nontraditional” occupations, including professions and management; socialization and education for employment; integration of marriage, housework, and child care; anti-discriminatory laws and policies. Prerequisite: A principal course in Sociology. LEC.

**SOC 490. Internship in Sociology. 3 Hours. AE61 / S.**
The purpose of this course is to encourage students to think sociologically about social issues by working as volunteer interns for non-profit community or campus organizations. Enrollment must be approved by a faculty mentor and the departmental Undergraduate Studies Committee. For additional information go to the Sociology department website. Prerequisite: 21 credits in sociology with a 3.0 GPA and permission of the instructor. FLD.

**SOC 495. Study Abroad Advanced Topics in: _____, 1-6 Hours. S.**
This course is designed for the study of special topics in Sociology at the junior/senior level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. No more than 6 hours of SOC 295 or SOC 495 may count towards the Sociology major or minor. LEC.

**SOC 499. Honors Course. 3-6 Hours. AE61 / S.**
Intensive study and research under faculty direction including the writing of a thesis. Enrollment may be split between two semesters, but no grade will be given until completion of the thesis. Admission to honors candidacy is open only to majors who have shown a marked capability for independent study and have completed either SOC 310 or SOC 500. IND.

**SOC 500. Sociological Theory. 3 Hours. S.**
An introduction to the principal texts in sociological theory and the ideas that made them important. Primary materials are emphasized, ranging from medieval to the current age. The goal of the course is to show continuity and change in the theoretical tradition of sociology, and to demonstrate the continued importance of classical ideas. Prerequisite: SOC 104 or permission of instructor. LEC.

**SOC 510. Elementary Statistics and Data Analysis. 3 Hours. S.**
An introduction to social scientific data analysis, with an emphasis on descriptive and inferential statistics. Specific topics include sampling, measures of association and correlation, significance testing, the logic of causal inference, the use of computer programs for data analysis, multivariate analysis, and the critical evaluation of social science research findings. Prerequisite: SOC 310 and MATH 101, or instructor permission. LEC.

**SOC 519. Sociology of Global Food. 5 Hours. U.**
The Sociology of Global Food offers a critical examination of the global food system since the Industrial Revolution. Topics include the industrialization of agriculture, sustainable agriculture, and the role of food and agriculture in organizing society. This course discusses the emergence of current debates around food and agriculture including food activism, technological developments, human/environment relationships, and labor issues. There is a lab component to this course. (Same as EVRN 519.) Prerequisite: Junior standing. LEC.

**SOC 520. Groups and Associations. 3 Hours. S.**
A comparative study of groups, associations, and institutions as types of social systems with special attention to structural characteristics and organizational processes; the nature of membership and leadership, including recruitment, selection and training; the social position, relationship, and function of these groups in communities and societies. Prerequisite: A principal course in sociology. LEC.

**SOC 521. Wealth, Power, and Inequality. 3 Hours. AE41 / S.**
This class focuses on economic inequality and the political and social forces that create and sustain it in the United States and internationally. The variables of race, ethnicity, status, and gender are analyzed as they relate to the differences in the distribution of wealth and power, and attention is paid to how these multiple variables shape opportunities. LEC.

**SOC 522. American Racial and Ethnic Relations. 3 Hours. AE41 / S.**
Analysis of the basic sociological concepts that apply to majority/minority relations; with special emphasis on racial and ethnic interaction in the United States. (Same as AMS 522.) Prerequisite: A principal course in sociology. LEC.

**SOC 523. Sociology of Aging and the Life Course. 3 Hours. AE41 / S.**
An advanced survey of theory and research in social gerontology, giving primary attention to aging and the aged as affected by social organization, including such social institutions as familial, economic, political, and health care; organizational processes such as social stratification; and living environments including community and housing. In these contexts, certain demographic, cross-cultural, social-psychological, and physiological aspects of aging will also be considered. Prerequisite: A principal course in sociology. LEC.

**SOC 524. Sociology of the Economy. 3 Hours. S.**
An analysis of the social organization of production with attention being given to such topics as: world economic crises and their social bases, capitalist and socialist economies, primitive and advanced economic systems, multinational corporations, the nature of housework, and the transformation of economic systems. Prerequisite: A principal course in sociology. LEC.

**SOC 525. Sociology of Work. 3 Hours. S.**
A consideration of problems in the conceptual and empirical definition of occupations and professions. It will involve the examination of the process of professionalization, the differentiation and integration of labor, career patterns, the work situation, the study of leisure, and the social consequences of changes in occupations and professions. Prerequisite: A principal course in sociology. LEC.

**SOC 529. Globalization. 3 Hours. S.**
Addresses sociological aspects of the growth of transnational economic, cultural, institutional, and political interconnections, the freer and faster movement of goods, images, ideas, people, and institutional forms across national borders, and the consequences and problems of these processes. The focus is on recent (later 20th century to the
present) global restructuring in the context of historical shifts in capitalist
development. Prerequisite: SOC 104. LEC.

SOC 530. Industrial Revolution and Capitalist Development. 3 Hours. S.
Focuses on the social forces that generated industrial capitalism.
Emphasis will be on comparative social structures and their meaning
for the nature and quality of life. The transformation from medieval to
mercantilist to industrial capitalism will be analyzed in detail. Possibilities
of post-industrial society will be discussed. This course will consider
exclusively Western development. Prerequisite: A principal course in
sociology. LEC.

SOC 531. Global Social Change. 3 Hours. S.
Comparative study of social, economic, political, and ideological factors
influencing global social change, and analysis of different theoretical
orientations related to social change in various societies. Prerequisite: A
principal course in Sociology. LEC.

SOC 532. Sociology of the Middle East. 3 Hours. NW AE42/AE61 / S.
The sociological analysis of social, historical, and contemporary issues
pertaining to the Middle East and to relations between the Middle
East and other regions of the world. We use sociological theoretical
perspectives to address such topics as nationalism and identity; religion,
race and ethnicity; gender, socioeconomic development, and sociopolitical
and economic relations with the United States. Prerequisite: One of the
following: SOC 104, SOC 110, SOC 150, SOC 160, or SOC 220. LEC.

SOC 533. Industrialization in Developing Nations. 3 Hours. S.
Comparative study of problems associated with industrialization in
developing nations, including population problems, unemployment,
social and welfare problems, and various political issues. Prerequisite: A
principal course in sociology. LEC.

SOC 534. Global Ethnic and Racial Relations. 3 Hours. NW AE42 / S.
An examination of constructions of race and ethnicity around the world.
Emphasis is on the social, political, historical, cultural and economic
factors that lead to the creation of ethnic and racial identities, ethnic
conflict and accommodation, ethnic movements, and ethnic political
organization. Racial and ethnic relations in the U.S. are compared with
other countries. Major focus is placed on ethnicity in Africa, Asia, Latin
America, the Caribbean and/or the Middle East. (Same as AAAS 510 and
AMS 534.) LEC.

SOC 535. Gender in the Global Context. 3 Hours. S.
This course examines gender roles and identity in the global context and
focuses specifically on historical comparative analysis of women's participation
in--and impact on--social, political, economic, and cultural
aspects of their communities and nations. Major emphasis will be
placed on women in Africa, Asia, Latin America, and the Middle East.
Prerequisite: A principal course in Sociology. LEC.

SOC 536. Ethnicity in the United States: _____, 3 Hours. AE41 / S.
An examination of the history, sociology, and culture of U.S. ethnic
categories (e.g., American Indians, Latinos, Asian Americans, Jewish
Americans, Irish Americans). The specific group studied varies from
semester to semester. Course may be repeated for credit. (Same as AMS
536.) Prerequisite: A principal course in American Studies, Sociology, or
Anthropology, or permission of instructor. LEC.

SOC 560. Law and Criminal Justice. 3 Hours. S.
An analysis of the sources and procedures of development of the criminal
law and analysis of the practices of law enforcement, prosecution, and
judicial action, principally in the United States. Prerequisite: A principal
course in sociology. LEC.

SOC 561. Sociology of Deviance. 3 Hours. S.
General analysis of the ways in which individuals and actions come to be
defined as deviant in a society, including the political, economic, social,
and cultural processes of labeling, rulemaking, and rule breaking: Why
are some acts and groups considered deviant at some points in time
and in some places, but not in others? Prerequisite: A principal course in
sociology. LEC.

SOC 562. Sociology of Law. 3 Hours. S.
A survey of the effects of social structure, societal values, and social
change upon the creation and alteration of law. Various perspectives from
the social sciences will be employed in the introductory examination of
the general place of law in societies. The emphasis of the course will be on
the sociological analysis of law in Western history as well as the present.
Prerequisite: A principal course in sociology. LEC.

SOC 570. Social Conflict. 3 Hours. S.
The nature of social conflict, with special emphasis on the more persistent
conflict areas of modern social life such as industrial, racial, religious, and
national conflicts. Prerequisite: A principal course in sociology. LEC.

SOC 571. Collective Behavior. 3 Hours. S.
An analysis of such collective phenomena as crowd behavior, social
epidemics, fads, fashions, popular crazes, and mass movements; the
nature of the public; functional analysis of public opinion; the problems of
democracy as viewed from the standpoint of organizing collective action.
Prerequisite: A principal course in sociology. LEC.

SOC 572. Dispute Settlement. 3 Hours. S.
Processes of negotiation and mediation in settling disputes in
communities and organizations over controversial issues, policies, and
decisions. Knowledge of skills are developed through studying theories
and research findings, and by case analysis, role playing, and simulation.
LEC.

SOC 573. Sociology of Violence. 3 Hours. S.
This course will examine violence in social and political life. The causes
and consequences of various types of violence will be examined in a
variety of social settings. Examples include violence in the family, schools,
the workplace, violence in cities, and violence as a part of the political
process: assassination, revolution, coups, terrorism, and government
repression. Prerequisite: A principal course in sociology. LEC.

SOC 590. Sociology in the Community. 3 Hours. S.
The purpose of this course is to encourage students to develop their
understanding of the relationship between individual biography and social
organization while they contribute to their community by working as
volunteers in non-profit community or campus organizations. Not open to
students who have completed SOC 490. Prerequisite: SOC 310 and SOC
510. LEC.

SOC 598. Practicum in Crime and Delinquency Studies. 3-6 Hours. S.
A one- or two-semester course in which students are provided the
opportunity, as interns, to gain practical experience working in the criminal
justice system agency. A report in the format of a research paper is
required at the conclusion of the practicum. Open only to Crime and
Delinquency Studies majors. Prerequisite: Consent of the instructor. FLD.

SOC 600. Sociological Perspectives: _____, 3 Hours. S.
Analysis of various sociological perspectives and/or the application of
various perspectives to a given social phenomenon. May be repeated as
topics vary. Prerequisite: A principal course in sociology. LEC.

SOC 601. Introduction to Feminist Social Theory. 3 Hours. S.
Feminist theories accord a central role to gender and the oppression
of women in developing an analysis of social life. This course will
explore and evaluate accounts of social structure, social processes, and
consciousness developed from a feminist perspective. A broad range of theoretical models will be presented, drawing on liberal, historical materialist, psychoanalytical, cultural, and Black feminist theories. Prerequisite: A principal course in Sociology and at least junior standing. LEC.

SOC 610. Survey Research. 3 Hours. S.
Methods and techniques of collecting and analyzing data obtained by interviewing a sample of the population. Practice through field work and laboratory analysis. LEC.

SOC 615. Techniques of Demographic Analysis. 4 Hours. U.
Examines concepts of demographic measurement and analysis for the study of changes in size, composition and distribution of populations. Students learn to measure and analyze basic population components such as fertility, mortality, migration and health using rates, standardization, decomposition of differences and life tables. Provides an opportunity to develop quantitative skills in the context of human life course processes that might be extended to include the study of employment, incarceration, education and other phenomena. Involves some reliance on calculus, substantial use of statistical software and an extended research project. Course includes a laboratory component. Prerequisite: SOC 510 or equivalent, or permission of instructor. LEC.

SOC 617. Women and Health Care. 3 Hours. S.
Critical analysis of the current health status and health needs of women, exploring how lay, medical, and research assumptions have influenced both the clinical/scientific literature and the organization of health services. The course includes a focus on historical patterns in women's health issues and social change actions. (Same as HPM 620.) LEC.

SOC 619. Political Sociology. 3 Hours. S.
The study of politics and society in the United States and abroad, including power and authority-who has them, how are they acquired, when are they challenged; state formation, the expansion of central governments, and patterns of political domination; political and nationalist movements; the politics of gender, class, race, and ethnicity; political culture and ideology; ethnic and nationalist conflict; revolution and political change. Prerequisite: A principal course in sociology or consent of instructor. LEC.

SOC 620. Social Organization. 3 Hours. S.
Comparative analysis of social organization in simple and complex societies. Consideration of the process of differentiation, specialization, institutionalization, and change, with special attention given to the emergence of intergroup and interorganizational forms of social organization typical of complex societies. Prerequisite: A principal course in sociology. LEC.

SOC 621. Cross-Cultural Sociology. 3 Hours. NW AE42/GE3H/GE3S / S.
A systematic introduction to cross-cultural issues from the standpoint of sociology, designed to acquaint students with the full range of substantive and methodological issues that arise in comparative sociological inquiry, with a primary focus on non-western societies. Specific topics to be addressed may include war and peace, stratification and inequality, race and ethnicity, and political authority and power, all viewed in the light of cross-cultural research and theory. Prerequisite: A previous Sociology course or consent of instructor. LEC.

SOC 622. Sociology of Science. 3 Hours. S.
The social roles of science in relation to other institutions, to technology, and to social change; and, within the scientific community, enculturation, information-flow, creativity, decision-making, administration, and leadership. Prerequisite: A principal course in sociology. LEC.

SOC 625. Work Roles in Health and Medicine. 3 Hours. S.
A sociological examination of medical and health-care occupations and professions. The selection of careers, socialization processes, and the development of professional identities. Interactions among practitioners, health-care teams, consumers, and professional and community power structures. Control and coordination of work. The impact of increasing specialization and changes in the demographic makeup of client and professional populations. Coping with medical failure and other problems inherent in medical and health-care work. LEC.

SOC 626. Religion and Society. 3 Hours. S.
A comparative study of the nature of religion in human societies both primitive and civilized; the functioning of religion for the community and the individual; the analysis of belief, myths, rituals, sacred attitudes, cults, religious movements, and church organization. Prerequisite: A principal course in sociology or ANTH 108 or ANTH 308. LEC.

SOC 628. Families and Social Inequalities. 3 Hours. S.
This course examines families in the context of social inequalities based on race-ethnicity, social class, gender, and sexuality. It analyzes the link between family diversity and social inequalities in the U.S. and elsewhere and theorizes families using a critical lens that focuses on social policies and power relations that perpetuate social inequalities. We also explore the growing complexities of families and how they affect and are affected by other social institutions, especially the labor market. Prerequisite: SOC 220 or consent of instructor. LEC.

SOC 629. Sociology of Sport. 3 Hours. S.
Examination of organized sport as a social institution and its relation to other social institutions (e.g., political, economic, educational, and religious), with special emphasis on American society. Analysis of the social correlates of sports participation and a consideration of the role of sport in social change. (Same as AMS 629.) Prerequisite: A principal course in sociology. LEC.

SOC 630. Latin American Society. 3 Hours. S/W.
Aspects of the social organization of main Latin American nations, including, e.g., race/ethnicity, social class, gender, urbanization, socioeconomic development, revolution, and relations with the U.S. Emphasis on sociological theories of Latin American development. Prerequisite: A principal course in Sociology or ANTH 108 or ANTH 308, plus junior-senior or graduate standing. LEC.

SOC 634. The Sociology of Culture. 3 Hours. S.
An introduction to a branch of sociology, mainly European in origin, that considers the relation between social structure and "high" and "mass" culture. Specific theories of these relations will be applied to works of literature, the fine arts, or music. Some preliminary acquaintance with these subjects is desirable but not mandatory for admission to the course. LEC.

SOC 640. Political Islam. 3 Hours. NW AE42/AE51 / S.
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as compatibility of political Islam and democratic politics, political economy in Muslim societies, fundamentalism in Islam, gender relations, identity politics and questions on clash of civilizations are explored. (Same as POLS 667). Prerequisite: A principal course in sociology, POLS 150, or consent of instructor. LEC.

SOC 650. Transnational Migration. 3 Hours. S.
A historically-conscious, sociological exploration of political, cultural and health issues involved in transnational migration, this course invites the student to situate current transnational migration within specific historical social processes within both postcolonial Africa and the postcolonial West.
The course examines parallels from the experience of migration in other parts of the world, specifically Asia and Latin America. The aim is an understanding and appreciation of both the interconnectedness of the world's peoples and, crucially, of the world's histories. Prerequisite: SOC 104. LEC.

SOC 660. Sociology of Mental Illness. 3 Hours. S.
The sociology of mental illness concerns itself with the study of mental disorders as social phenomena. The course will be concerned with (1) the social factors and social processes that contribute to mental disorders, (2) the social definitions of mental disorders as forms of social deviance, (3) the social facets in the treatment and care of disordered persons, and (4) the social aspects of the prevention of mental disorders. Prerequisite: A principal course in sociology. LEC.

SOC 661. Causation of Crime and Delinquency. 3 Hours. S.
The individual and social processes that produce violation of legal norms, dealing with society's responses to these violations only insofar as the responses influence the violators. Prerequisite: A principal course in sociology. LEC.

SOC 662. Corrections. 3 Hours. S.
Legal systems for handling offenders and the development of the laws creating these systems. Emphasis on the various parts (police, courts, probation, penal institutions, and parole) of the system will vary. Prerequisite: A principal course in sociology. LEC.

SOC 671. Social Movements. 3 Hours. S.
Social movements as collective action to establish forms of social organization; consideration of reform, revolutionary, sectarian and fashion movements; ideology, esprit de corps, morale and leadership as factors in development and organization. Prerequisite: A principal course in sociology. LEC.

SOC 672. Sociology of War and Peace. 3 Hours. S.
Descriptive and analytic account of cold and hot wars. The concept of enemy. Types of war. Emphasis on personal and collective action in warlike situations. War and international politics. The ideologies of war from the classics to the present. Prerequisite: A principal course in sociology. LEC.

SOC 678. Individual Undergraduate Research. 1-12 Hours. AE61 / S.
Library or field research either as part of an ongoing project or as an independent study project. One to twelve hours. May be taken from one or more faculty during one or more semesters, the total hours not to exceed 12. No more than 3 credits may be applied to satisfy requirements for the sociology major. Prerequisite: Two courses in sociology and consent of instructor. IND.

SOC 699. Capstone in Sociology. 3 Hours. AE61 / S.
In this capstone course, students synthesize the knowledge gained in their substantive courses and use the skills developed in their methodology courses to design and conduct a research project on a current social issue or meeting the research needs of a local community group. The outcome will be a professional quality research report. Prerequisite: SOC 510. LEC.

SOC 707. Seminar in Historical Sociology. 1-4 Hours.
Each seminar will explore problems at the intersection of sociology and history. Topic, instructors, and hours of credit will be announced in the Schedule of Classes. Seminars will be offered by different instructors on different topics and students may take more than one topic. No prerequisite. LEC.

SOC 722. Sociology of Gender. 3 Hours.
This course will offer a range of sociological perspectives on the role of gender in society. The particular substantive focus will vary each semester to allow flexibility for in-depth analysis of gender relationships in such areas as politics, health and aging, and work. LEC.

SOC 760. Social Inequality. 3 Hours.
A comprehensive review of the major theoretical and empirical approaches used in the study of institutionalized social inequality. Reference to the origins, forms, cultural and structural variations and their changes over time, consequences and ideologies of social inequality. Prerequisite: A distribution course in sociology. LEC.

SOC 762. Seminar in Social Deviation and Control: _____. 3 Hours.
Advanced study of theory and practice relating to deviation. May be repeated as topics vary. Prerequisite: SOC 662 or SOC 661. LEC.

SOC 767. Gerontology Proseminar. 3 Hours.
A proseminar coordinated by the Gerontology Center. The proseminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (psychology, biology, sociology, and communication) perspective on aging. The proseminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as ABSC 787, AMS 767, COMS 787, and PSYC 787.) (formerly HDFL 787.) LEC.

SOC 770. Social Systems and Social Change in the United States. 3 Hours.
Analysis of approaches to the study of sociocultural change in America, with special emphasis on a systems perspective. Seniors by consent of instructor. LEC.

SOC 771. Intergroup Relations and Conflict in American Society. 3 Hours.
Analysis of the dynamics of intergroup relations (e.g., class, religious, ethnic, racial, political) in America with special emphasis on the examination of major theoretical and empirical approaches employed in the study of societal conflict and consensus. LEC.

SOC 780. Advanced Topics in Sociology: _______. 3 Hours.
Topics will vary from semester to semester and instructor to instructor to allow flexibility for in-depth analysis of particular topics. LEC.

SOC 790. Proseminar. 3 Hours.
Introduction to major disciplinary issues, departmental research specialties, faculty research interests, interdisciplinary connections, funding sources, and professional writing. Required of M.A. students entering the graduate program in sociology. May not be taken by those who have credit for SOC 990. Graded on satisfactory/unsatisfactory basis. LEC.

SOC 801. The Rise of Social Theory. 3 Hours.
This is less a survey of intellectual history than an effort to trace the "preclassical" roots of sociological theory. We explore the rise of paradigmatic concerns in the writings of such key figures as Aristotle, Marsilius of Padua, Martin Luther, Etienne de la Boetie, Michel de Montaigne, Charles de Montesquieu, Jean-Jacques Rousseau, Immanuel Kant, G.W.F. Hegel, Flora Tristan, and Ludwig Feuerbach, among others. LEC.

SOC 802. Modern Social Theory. 3 Hours.
This seminar will focus on the later 19th and early 20th century "theories of society," addressing the origins and developmental tendencies of Western modernity and their relation to premodern social orders. Primary texts of the major theorists (eg. Marx, Durkheim, Nietzsche, Weber, Simmel, and Mead) will be studied in historical context. The tradition's analytical and critical resources and problematic features will also be explored. Finally, the connections between this tradition and contemporary sociological approaches will be explored. LEC.
SOC 803. Issues in Contemporary Theory: ______. 3 Hours.
A critical examination of recent trends and debates in sociological theory. This is a thematically oriented course in which classical as well as contemporary views will be explored. Attention will be directed to theoretical issues under discussion in fields such as symbolic interactionism, semiology, ethnmethodology, critical theory, macrosociology, and others. LEC.

SOC 804. Sociology of Knowledge. 3 Hours.
This course reviews the major sociological approaches to the study of the relationship between thought and the social context within which it arises. A central concern is an examination of the relationship between ideology and social structures, particularly as expressed in the construction of official knowledge. LEC.

SOC 808. Feminist Theories. 3 Hours.
This course will explore and evaluate accounts of social structure, social processes, and consciousness developed in the feminist literature. We will review a range of theoretical arguments, including liberal, historical, materialist, psychoanalytic, cultural, and Black feminist theories. Some of the readings will focus on limitations and distortions within mainstream social theory; others will center on the development of alternative social theory using the standpoint of women as a point of departure. LEC.

SOC 810. Sociological Inquiry. 3 Hours.
The goals of this course are to understand the characteristics of sociologically interesting and rigorous research and to design a research proposal that shares those characteristics. The focus of students' proposals will be the M.A. thesis project for students at the M.A. level and the dissertation project for students at the Ph.D. level. Students will read books and articles representing a variety of research approaches (ethnographies, surveys, interviews, document analyses, historical studies, comparative research, etc.), and will analyze those approaches in order to understand their theoretical and methodological significance. Students will also distribute their proposals to the other students in the course for comment and critique. Assignments will include a completed M.A. thesis proposal for students at the M.A. level and a completed dissertation proposal for students at the Ph.D. level. Course may be repeated for credit toward graduate degree. Prerequisites: The course is open only to students enrolled in the Sociology graduate program. LEC.

SOC 811. Sociological Research. 3 Hours.
The use of the scientific method to study social phenomena including: the formulation and testing of hypotheses; techniques for collecting data; measuring social variables; interpreting research findings; the relationship of theory and facts. Course may be repeated for credit toward graduate degree. Prerequisite: The course is open only to students enrolled in the Sociology graduate program. LEC.

SOC 812. Analytic Methods in Sociology. 3 Hours.
Consideration of quantitative methods of analysis including both parametric and non-parametric techniques. Prerequisite: A course in statistics. LEC.

SOC 813. Field Methods and Participant Observation. 3-5 Hours.
Will acquaint the student both theoretically and empirically with the procedures and logics of the research techniques employed by individuals or small research teams conducting qualitative fieldwork. Prerequisite: A distribution course in sociology. FLD.

SOC 814. Health Services Research: Epidemiology, Evaluation, and Survey Methods. 3 Hours.
Students learn the logic, assumptions, designs, and procedures involved in conducting the major types of research found in the health services field. Students develop an informed basis for critically evaluating the methodological adequacy of research studies in the areas of descriptive and analytic epidemiology, program evaluation, and health-related survey research as well as working knowledge of the research process itself. Emphasis is placed on examining basic health services issues such as measuring quality of care, understanding the role of social factors in the etiology of disease, determining the health status and health needs of populations, and incorporating health services research into organizational policy and decision-making. LEC.

SOC 820. Political Sociology. 3 Hours.
This course offers an overview of the different perspectives and key arguments comprising the field of political sociology, including both classical and contemporary readings. The issues studied in this field include the nature of power and the nature of the state, relations between state and society, and social movements, political organization and civic participation, political culture, voting behavior, comparative political systems, warfare, democracy and economic development, citizenship, nationalism, revolutions, and globalization. LEC.

SOC 824. Health and Social Behavior. 3 Hours.
This course provides students with an analytic understanding of the organization, professional, and interpersonal behavior that characterizes contemporary health and health care. Emphasis is placed on examination and integration of conceptual frameworks theories, and research findings bearing on basic behavioral/managerial issues such as authority relations in health care settings, models of illness behavior and health services utilization, the impact of organizational structure on employee and client attitudes and behavior, and the culture of professional medicine in relation to patient care. LEC.

SOC 830. Latin American Society. 3 Hours.
Aspects of the social organization of main Latin American nations, including, e.g., race/ethnicity, social class, gender, urbanization, socioeconomic development, revolution, and relations with the U.S. Emphasis on sociological theories of Latin American development. Prerequisite: A principal course in sociology or ANTH 108 or ANTH 308, plus junior-senior or graduate student standing. LEC.

SOC 873. International Political Economy. 3 Hours.
Provides a broad survey of major developments in the field. Topics include the intellectual origins of international political economy; the historical evolution of the international system; North-South and Western trade, investment, and monetary relations; foreign aid, debt technology transfer, development, international economic institutions (e.g., International Monetary Funds, World Bank, Multinational Corporations, etc.). (Same as POLS 973.) LEC.

SOC 875. The Political Economy of Globalization. 3 Hours.
The course will acquaint students with recent developments in the global economy, including its impact on politics and society. Topics include theories of globalization, the role of the nation-state and international agencies in socioeconomic development, inequality from a global perspective, immigration and citizenship, globalization and democracy, and the rise of transnational social movements. LEC.

SOC 891. Individual Master's Readings. 1-6 Hours.
Individual study of special topics or problems by students working on a master's degree. RSH.

SOC 892. Teaching Seminar. 1-3 Hours.
Seminar on sociology course design and development. Topics covered include syllabus design, exam strategies and design, course design, content of and approaches to teaching introductory and other sociology courses, student grading and evaluation. Required of all teaching assistants assigned to courses in sociology. May not be repeated for credit toward graduate degree. LEC.
Bachelor of Arts and Bachelor of General Studies in Sociology

Why study sociology?
Sociology investigates the social institutions and processes that shape human behavior, histories, and opportunities.

First- and Second-Year Preparation

Admission GPA
- Satisfied by a minimum 2.5 GPA in required admission courses designated below.
- University Course Repeat Policy will apply.

Admission to the Major

Admission Requirements

Course Requirements

Math Requirement. Satisfied by one of the following:
- MATH 101 College Algebra
- MATH 104 Precalculus Mathematics

Equivalent ACT/SAT, equivalent course, or higher course

Elements of Sociology. Satisfied by one of the following:
- SOC 104 Elements of Sociology
- SOC 105 Elements of Sociology, Honors
- SOC 304 Principles of Sociology

Sociology Admission Elective. Satisfied by sociology elective course.

Grade-Point Average Requirements
- Satisfied by a minimum 2.5 GPA in required admission courses designated above.
- University Course Repeat Policy will apply.

Application Term
Students should apply to the major during the semester in which major admission criteria will be completed, normally no later than 60 hours, or for transfer students, during the initial term at KU. Application to this major after completion of 60 hours, or the initial KU term for transfer students, will likely delay graduation.

Requirements for the B.A. or B.G.S. Major

Sociology Core Knowledge and Skills (12)

Majors must complete a course in each of the following areas:

- Elements of Sociology. Satisfied by one of the following:
  - SOC 104 Elements of Sociology
  - SOC 105 Elements of Sociology, Honors
  - SOC 304 Principles of Sociology

Introduction to Social Research. Satisfied by:
- SOC 310 Introduction to Social Research

Elementary Statistics & Data Analysis. Satisfied by:
- SOC 510 Elementary Statistics and Data Analysis

Sociology Theory. Satisfied by:
- SOC 500 Sociological Theory
Minor in Sociology

Why study sociology?
Sociology investigates the social institutions and processes that shape human behavior, histories, and opportunities.

Requirements for the Minor

Sociology Minor

Elements of Sociology (3)
Satisfied by:
SOC 104 Elements of Sociology

Sociology Minor Electives (15)
Satisfied by 15 sociology hours at the Junior/Senior (300+) level

Upper-level sociology electives. Satisfied by 15 sociology hours at the Junior/Senior (300+) level

Additional sociology electives. Satisfied by 6 additional sociology hours at the upper or lower level

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 33 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major. At least 15 credit hours at the 300+ level, including SOC 310, SOC 510, and SOC 500, must be taken at KU.

Major Junior/Senior Hours
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Graduation Plan

With careful planning and commitment to a full-time course load, you can graduate in 4 years (http://clas.ku.edu/undergrad). Download a sample 4-year plan (http://clas.ku.edu/undergrad/advising/plans) for sociology.

Double Majors

Sociology majors may want to consider a second major in philosophy; history; women’s studies; area studies; or one of the natural or social sciences; or a second degree in journalism or other professional disciplines.

A sample 4-year plan for a BA degree in Sociology can be found here: Sociology (http://catalog.ku.edu/liberal-arts-sciences/sociology/ba-bgs/ba-sociology), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Sociology will be coming soon.

Departmental Honors

Working under the supervision of a faculty mentor, the undergraduate student must complete 6 hours of work in SOC 499 culminating in a superior thesis. The thesis must be certified by 3 members of the College faculty, at least 2 of whom must be from sociology, nominated by the candidate and approved by the departmental honors coordinator. The student also must achieve a grade-point average of at least 3.5 in sociology and 3.25 overall.

Doctor of Philosophy in Sociology

Why study sociology?
Sociology investigates the social institutions and processes that shape human behavior, histories, and opportunities.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The Department of Sociology at the University of Kansas offers a Ph.D. program in sociology. Upon admission, all students are enrolled as Ph.D.
students, but must complete all requirements for a M.A. degree during their progress toward the Ph.D. degree. Students are eligible to apply for the M.A. degree once these M.A. requirements are met.

To be considered for admission, applicants must have completed 15 credit hours in sociology, a course in sociological theory, and a course in statistics. Applications must include scores on the Graduate Record Examination aptitude tests. International applicants must submit scores on the GRE and either the Test of English as a Foreign Language or the academic format of the International English Language Testing System administered by the University of Cambridge ESOL Examinations.

Applications also must include:

- A statement of academic interests and professional goals,
- 3 recommendation rating forms and letters from individuals who can evaluate the applicant’s academic performance,
- 1 complete set of transcripts from all colleges and universities attended,
- A current résumé/curriculum vitae,
- A writing sample, and
- A nonrefundable application fee (see Admission in the Graduate Studies (p. 2369) section of the online catalog).

The applicant’s record should indicate considerable academic promise and a high level of motivation.

Submit your graduate application online (http://www.graduate.ku.edu).

The University of Kansas
Department of Sociology
Fraser Hall
1415 Jayhawk Blvd., Room 716
Lawrence, KS 66045-7540

Ph.D. Degree Requirements

For the Ph.D., students must complete all M.A. degree requirements and the following Ph.D. requirements:

1. Students must complete 54 total hours of graduate credits for a Ph.D. Within the first two years of the program, students must complete the following M.A. level requirements. The M.A. thesis must be supervised by a faculty member of the student’s choosing. If the students do not complete all the M.A. level requirements within the first two years of the program, the student will not become eligible for the renewal of their GTA/GRA funding.

2. a. In the first two years, the students must complete: 36 hours of graduate credit, including:

   • SOC 810 Sociological Inquiry
   • SOC 811 Sociological Research
   • SOC 812 Analytic Methods in Sociology
   • 1 additional graduate-level course in sociological methods,
   • 1 graduate-level course in sociological theory,
   • 5 graduate-level sociology seminars, and
   • 6 thesis hours in SOC 899
   • Begin compiling portfolios of their professional work.

b. Preparation and defense of an M.A. thesis

The defense of the M.A. thesis includes a general examination of sociological theory and research.

Completion of these requirements makes the student eligible to obtain the M.A. degree, and allows the student to proceed to doctoral study with the approval of the graduate committee.

Non-Thesis Terminal M.A.: Students who do not wish to continue on to the Ph.D. and who do not complete an M.A. thesis may be awarded a terminal M.A. if they fulfill all the M.A. requirements (see the section below on Non-Thesis (Terminal) M.A. Option for details).

3. After completing the requirements for a M.A. degree, students must attain the requisite levels of competence in the history and theory of sociology and in methods of sociological research by completing the courses listed below. Students must complete the following coursework requirements, totaling 18 graduate credit hours, with a minimum GPA of 3.0:

   • 1 graduate-level sociology methods course,
   • 2 graduate-level courses in sociological theory, and
   • 3 graduate-level sociology seminars

4. Complete the Research Skills and Responsible Scholarship (RSRS) requirement. The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. Doctoral students in sociology meet this requirement by completion of the following courses: SOC 810, SOC 811, SOC 812, SOC 910. Additional information about this requirement can be found under Doctoral Degree Requirements, Doctor of Philosophy (http://catalog.dept.ku.edu/201314/schools/gs/programs/#docreqs), Research Skills in the Graduate Studies section of the online catalog.

5. Students must compile portfolios of their professional work successfully demonstrating command of 2 fields of specialization within sociology and preparation to undertake dissertation research.

6. Pass an oral comprehensive examination and defense of dissertation proposal, within the first six semesters post-M.A. degree. The oral comprehensive examination and dissertation defense occurs at the same time. The oral comprehensive examination refers to an oral examination of the student’s understanding of the two fields of specialization. The dissertation committee must consist of at least five members, four of whom are members of the Sociology Department.

7. The candidate must continue to enroll in accordance with the University post-comprehensive enrollment requirements until all PhD degree requirements have been met.

*Individual Doctoral Readings courses (SOC 991) may not be used to meet these requirements except by approved petition.

*Individual Master’s Readings courses (SOC 891) may not be used to meet these requirements except by approved petition.

b. Preparation and defense of an M.A. thesis

The defense of the M.A. thesis includes a general examination of sociological theory and research.

Completion of these requirements makes the student eligible to obtain the M.A. degree, and allows the student to proceed to doctoral study with the approval of the graduate committee.

Non-Thesis Terminal M.A.: Students who do not wish to continue on to the Ph.D. and who do not complete an M.A. thesis may be awarded a terminal M.A. if they fulfill all the M.A. requirements (see the section below on Non-Thesis (Terminal) M.A. Option for details).

3. After completing the requirements for a M.A. degree, students must attain the requisite levels of competence in the history and theory of sociology and in methods of sociological research by completing the courses listed below. Students must complete the following coursework requirements, totaling 18 graduate credit hours, with a minimum GPA of 3.0:

   • 1 graduate-level sociology methods course,
   • 2 graduate-level courses in sociological theory, and
   • 3 graduate-level sociology seminars

*Individual Doctoral Readings courses (SOC 991) may not be used to meet these requirements except by approved petition.

b. Preparation and defense of an M.A. thesis

The defense of the M.A. thesis includes a general examination of sociological theory and research.

Completion of these requirements makes the student eligible to obtain the M.A. degree, and allows the student to proceed to doctoral study with the approval of the graduate committee.

Non-Thesis Terminal M.A.: Students who do not wish to continue on to the Ph.D. and who do not complete an M.A. thesis may be awarded a terminal M.A. if they fulfill all the M.A. requirements (see the section below on Non-Thesis (Terminal) M.A. Option for details).

3. After completing the requirements for a M.A. degree, students must attain the requisite levels of competence in the history and theory of sociology and in methods of sociological research by completing the courses listed below. Students must complete the following coursework requirements, totaling 18 graduate credit hours, with a minimum GPA of 3.0:

   • 1 graduate-level sociology methods course,
   • 2 graduate-level courses in sociological theory, and
   • 3 graduate-level sociology seminars

*Individual Doctoral Readings courses (SOC 991) may not be used to meet these requirements except by approved petition.

Non-thesis (Terminal) MA Option

A student who wishes to complete the MA degree but does not wish to continue on for the Ph.D., may choose the non-thesis MA option. Non-thesis students must complete 36 hours of graduate credit including:

1. SOC 810 Sociological Inquiry
2. SOC 811 Sociological Research
3. 2 graduate-level courses in sociological methods, including SOC 812 Analytical Methods in Sociology.
4. 1 graduate-level course in sociological theory, and
5. 7 graduate-level sociology seminars.

*Individual Master’s Readings courses (SOC 891) may not be used to meet these requirements except by approved petition. Completion of these requirements leads to the M.A. degree but does not allow the student to proceed to doctoral study.

A final oral examination over course work in sociology is also required.

Handbook for Graduate Students

A more detailed account of advising procedures, degree requirements, and program options is set forth in the department’s Manual of Graduate Study in Sociology, which is available online (https://sociology.drupal.ku.edu/overview-ma).

Department of Spanish and Portuguese

Why study Spanish and Portuguese?

Because fluency in more than one language and culture and analytical understandings of literary and cultural texts create educated citizens.

Undergraduate Programs

The department offers course work for students seeking proficiency in a foreign language and for majors in Spanish or a related field.

Placement

Students who have not studied Spanish in high school should seek permission to enroll in SPAN 104. For permission to enroll in this course, a student must show his or her high school transcript to the advising specialist in the Department of Spanish and Portuguese. Students who have had limited study of Spanish (1 to 3 years in high school or 1 semester of Spanish at another institution of higher learning, equivalent to SPAN 104) and are not placed in the intermediate level should enroll in SPAN 111. Only students who complete SPAN 104 at KU are eligible to enroll in SPAN 108.

Students with 2 to 4 years of high school Spanish can be placed in the intermediate level (SPAN 212, SPAN 216, SPAN 220, or SPAN 324) by taking the placement examination and consulting the advising specialist.

Students registered with Disability Resources (http://www.disability.ku.edu) should contact them for placement advising.

Retroactive Credit

Students with no prior college or university Spanish course credit are eligible for retroactive credit according to this formula:

- 3 hours of retroactive credit are awarded to a student who enrolls initially at KU in a third-level Spanish course (SPAN 212) and receives a grade of C or higher.
- 6 hours of retroactive credit are awarded to a student who enrolls initially at KU in a fourth-level Spanish course (SPAN 216) and receives a grade of C or higher.
- 9 hours of retroactive credit are awarded to a student who enrolls initially at KU in a 3-credit-hour Spanish course with a fourth-level course as a prerequisite and receives a grade of C or higher.

Students interested in retroactive credit should consult the department before enrolling.

Students entering KU with previous study of Portuguese should take the Portuguese placement examination administered by the department.

Courses for Nonmajors

Students may fulfill the College foreign language requirement by

1. Passing the proficiency examination or
2. Completing SPAN 216 or PORT 216 or
3. Completing a course in Spanish or Portuguese that has SPAN 216 or PORT 216 as a prerequisite.

Candidates for the B.S. in education who are majoring in Spanish or minoring in Brazilian Studies should consult the School of Education.

Graduate Programs

The department offers a full graduate program leading to the M.A. and the Ph.D. degrees. Students who complete their graduate studies with the M.A. degree are well prepared to enter a variety of fields, including international business, teaching, and government. The Ph.D. program takes advantage of the literature specialties of the faculty, and Ph.D. recipients generally go on to university or college teaching.

A detailed description is available from the departmental office as well as the department’s website (http://www2.ku.edu/~spanport). This includes specific distribution requirements, fields of specialization, and information on the comprehensive examinations. Students should request information and application forms as early as possible, especially if they plan to apply for financial aid.

Courses

PORT 104. Elementary Brazilian Portuguese I. 5 Hours. U.
Five hours of class per week, plus supplementary work in language laboratory. Essentials of grammar, elementary syntax and composition, easy reading. Emphasis on conversation. LEC.

PORT 106. Elementary Brazilian Portuguese, Accelerated I. 3 Hours. U.
Three meetings weekly, plus supplementary work in language laboratory. Designed for students proficient in Spanish (or with previous work in Portuguese) to acquire proficiency in Portuguese more rapidly. Covers the same material as PORT 104. Prerequisite: SPAN 216 or equivalent. LEC.

PORT 108. Elementary Brazilian Portuguese II. 5 Hours. U.
Five hours of class per week plus supplementary work in language laboratory. A continuation of PORT 104. Prerequisite: PORT 104. LEC.
PORT 110. Elementary Brazilian Portuguese, Accelerated II. 3 Hours. U.
A continuation of PORT 106. Prerequisite: PORT 106. LEC.

PORT 177. First Year Seminar: ____, 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Portuguese. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

PORT 212. Intermediate Brazilian Portuguese I. 3 Hours. U.
A review of Brazilian Portuguese grammar, with practice in reading, composition, and conversation through the study and discussion of Brazilian prose selections. Prerequisite: PORT 108 or PORT 110. LEC.

PORT 216. Intermediate Brazilian Portuguese II. 3 Hours. U.
A continuation of PORT 212. Prerequisite: PORT 212. LEC.

PORT 220. Intensive Intermediate Brazilian Portuguese. 3-6 Hours. U.
Five hours of class and an additional hour in the language laboratory. The course is designed for students who began the study of Portuguese in PORT 106 and PORT 110, and for superior students in PORT 104 and PORT 108. The material covered is the same as in PORT 212 and PORT 216. Prerequisite: PORT 110, PORT 108 with a grade of A or B, or consent of instructor. Open only to members of the Summer Language Institute in Vitoria-Vila Velha, Brazil. LEC.

PORT 300. Brazilian Culture. 3 Hours. HT AE42 / H.
Prehistoric and colonial Portuguese origins of Brazil and its independent development in the nineteenth and twentieth centuries. Key aspects of economic, political, and social factors; special attention to intellectual history. Readings in English. LEC.

PORT 320. Introduction to Portuguese and Brazilian Literatures. 3 Hours. H/W.
A more advanced reading course serving as an introduction to the study of Luso-Brazilian literature, with discussion in Portuguese of the material read. Prerequisite: A fourth semester course in Portuguese or consent of instructor. LEC.

PORT 340. Textual Analysis and Critical Reading. 3 Hours. HL / H.
Introduction to Brazilian cultural and literary studies. Critical readings and interpretation of Brazilian cultural expressions with emphasis on acquiring the skills and vocabulary for discussing and writing critical analyses. Conducted in Portuguese. Not open to students who have taken PORT 540. Prerequisite: Grade of A or B in PORT 216 or consent of instructor. LEC.

PORT 347. Brazilian Studies: ____, 3 Hours. H.
A topics course dedicated to the study of special historical moments, topics, authors, or themes in literary and cultural history. The course may cover multiple genres and periods. Course conducted in Portuguese and may be repeated for credit as the topic varies. Not open to students who have taken PORT 547. Prerequisite: PORT 216 or consent of instructor. LEC.

PORT 348. Portuguese Language and Brazilian Culture for Business. 3 Hours. H.
Cultural studies approach to contemporary Brazilian society for students interested in business. Explores how Brazilians negotiate their place in a global cultural context and how they perceive business (negocios). Readings include selections from literature, history, journalism, social analysis, and popular culture. Exercises help English speakers develop analytical skills as well as vocabulary and communication skills related to business and professional life in Brazil. Conducted in Portuguese. Not open to students who have taken PORT 548. Prerequisite: PORT 216 or consent of instructor. LEC.

PORT 356. Studies in Brazilian Film: ____, 3 Hours. H.
A theoretical and historical approach to Brazilian film with particular attention to thematic concerns, such as cultural and national identity, and of literary discourse. Given in Portuguese or English. May be repeated for credit as topic varies. Students will be expected to attend film screenings in addition to regular class meetings. Not open to students who have taken PORT 565. Prerequisite: Consent of instructor. LEC.

PORT 388. Intermediate Brazilian Portuguese Conversation. 1 Hour. U.
Two recitations weekly. Prerequisite: PORT 104 or PORT 106. LEC.

PORT 394. Special Readings in Brazilian Studies. 1-3 Hours. H.
Direct readings in (a) fields not covered by student's course work, and/or (b) field of student's special interest approved by the department. May be repeated for credit if content varies. Prerequisite: PORT 216 and three-hours upper-division credit in Portuguese, or consent of instructor. LEC.

PORT 471. Studies in Brazilian Culture and Civilization: ____, 1-3 Hours. H.
A study of Brazilian culture with emphasis on one or more of the following aspects: history, politics, ethnology, anthropology, religious and secular traditions, issues of cultural identity, music, art, architecture, and popular culture. Available only to study-abroad participants. May be repeated for credit if content varies. LEC.

PORT 475. Studies in Brazilian Literature: ____, 1-3 Hours. H.
A study of the literature of a particular author, group of authors, period, genre, region, or theme. Available only to study-abroad participants. May be repeated for credit if content varies. LEC.

PORT 488. Advanced Brazilian Portuguese Conversation. 1 Hour. U.
Two recitations weekly. More advanced than PORT 388. Prerequisite: PORT 108, PORT 110, or PORT 388. LEC.

PORT 490. Intensive Advanced Portuguese. 3-6 Hours. H/W.
Advanced composition, conversation, and stylistics, plus an introduction to Brazilian culture. Offered only during the Summer Language Institute in Brazil. Prerequisite: Four semesters of Portuguese, or consent of instructor. Open only to members of the Summer Language Institute in Vitoria-Vila Velha, Brazil. LEC.

PORT 509. Portuguese Phonetics and Phonology. 3 Hours. H/W.
A theoretical and historical approach to Brazilian film with particular attention to thematic concerns, such as cultural and national identity, and of literary discourse. Given in Portuguese or English. May be repeated for credit as topic varies. Students will be expected to attend film screenings in addition to regular class meetings. Not open to students who have taken PORT 565. Prerequisite: Consent of instructor. LEC.

PORT 547. Brazilian Studies: ____, 3 Hours. H.
A more intensive treatment of the content of PORT 347. Not open to students who have taken PORT 347. Prerequisite: Consent of instructor. LEC.

PORT 548. Portuguese Language and Brazilian Culture for Business. 3 Hours. H.
A more intensive treatment of the content of PORT 348. Not open to students who have taken PORT 348. Prerequisite: Consent of instructor. LEC.
PORT 560. Survey of Portuguese Literature. 3 Hours. H/W.
Emphasis on Gil Vicente, Camoes, Eca de Queiroz, and Fernando Pessoa. Prerequisite: A fourth semester course in Portuguese or consent of instructor. LEC.

PORT 565. Studies in Brazilian Film: ______. 3 Hours. H.
A more intensive treatment of the content of PORT 365. Not open to students who have taken PORT 365. Prerequisite: Consent of instructor. LEC.

PORT 611. Accelerated Basic Portuguese for Spanish Speakers. 3 Hours. U.
A continuation of PORT 611, with special emphasis on reading and writing skills. Prerequisite: PORT 611. LEC.

PORT 740. Survey of Brazilian Literature. 3 Hours.
A survey of Brazilian literature from 1500 to present. Prerequisite: A fourth semester course in Portuguese or consent of instructor. LEC.

PORT 742. The Brazilian Novel. 3 Hours.
The development of the novel in Brazil and analysis of representative works of the nineteenth and twentieth centuries. Prerequisite: A fourth semester course in Portuguese or consent of instructor. LEC.

PORT 746. The Brazilian Short Story. 3 Hours.
The development of the short story in Brazil and analysis of representative works of the nineteenth and twentieth centuries. Prerequisite: A fourth semester course in Portuguese or consent of instructor. LEC.

PORT 750. Brazilian Poetry. 3 Hours.
A study of the principal movements and an analysis of representative works from the colonial period to the present. Emphasis on modernists and post-modernists. Prerequisite: A fourth semester course in Portuguese or consent of instructor. LEC.

PORT 750. Brazilian Poetry. 3 Hours.
A survey of Brazilian cultural expressions and literature in the Twentieth Century. Conducted in Portuguese. Prerequisite: PORT 216 or consent of instructor. LEC.

PORT 800. Special Readings in Portuguese and Brazilian Literature. 1-3 Hours.
May be taken more than once; total credit not to exceed five hours. Directed private readings with conferences with instructor. Prerequisite: Consent of department. RSH.

PORT 875. Special Topics in Brazilian Cultural and Literary Studies: ______. 3 Hours.
Topics vary by semester. The course may be taken more than once, with full credit, provided there is no duplication in the material covered. Conducted in Portuguese. LEC.

PORT 930. Seminar in Portuguese Literature: ______. 3 Hours.
LEC.

PORT 970. Seminar in Brazilian Literature: ______. 3 Hours.
LEC.

SPAN 100. Spanish Reading Course. 3 Hours. U.
A special course for candidates for advanced degrees designed to aid them in obtaining a reading knowledge of Spanish. Intensive study of the fundamentals of grammar, proceeding to the reading of material of medium difficulty. Open to graduate students and to seniors who are applying for entrance to a graduate school. The course does not satisfy any part of the undergraduate language requirement. This course is primarily for graduate students who are fulfilling their language requirement(s) for advanced degrees. LEC.

SPAN 101. Orientation Seminar in Spanish and Portuguese. 1 Hour. H.
Provides an overview of the field of Hispanic Studies. Emphasizes developing an understanding of opportunities in Spanish and Portuguese at KU and the Spanish and Portuguese program curricula, exploring service-learning and other extracurricular options available at KU and beyond, and helping students plan goals for their education through an understanding of their personal values and aspirations as they relate to the field. Graded on a satisfactory/unsatisfactory basis. LEC.

SPAN 104. Elementary Spanish I. 5 Hours. U.
For beginning students of Spanish. Not open to students who have had any previous study of Spanish. Active preparation and participation required. Classes conducted in Spanish. Not open to native speakers of Spanish. Offered in fall semester. LEC.

SPAN 107. Elementary Spanish Conversation. 1-4 Hours. U.
Activities to improve elementary level conversation skills. Does not fulfill any portion of the College of Liberal Arts and Sciences foreign language requirement. Available only to study abroad participants. LEC.

SPAN 108. Elementary Spanish II. 5 Hours. U.
Only for students who have completed SPAN 104 at the University of Kansas. This course prepares students for Intermediate level study of Spanish. Active preparation and participation is required. Classes conducted in Spanish. Not open to native speakers of Spanish. Offered in spring semester. Prerequisite: SPAN 104. LEC.

SPAN 110. Intensive Elementary Spanish. 5 Hours. AE41 / U.
For students who have had some previous study of Spanish, but who do not place into the Intermediate level. This course prepares students for Intermediate level study of Spanish. Active preparation and participation required. Classes conducted in Spanish. Not open to native speakers of Spanish. Prerequisite: At least one previous high school or college course in Spanish. LEC.

SPAN 170. Hispanic Language, Culture and Civilization I-A: ______. 1-3 Hours. U.
For students in their first year of language study or the equivalent. An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major nor the language requirement. May be repeated for credit if content varies. LEC.

SPAN 171. Hispanic Language, Culture and Civilization I-B: ______. 1-3 Hours. U.
A continuation of SPAN 170. For students in their first year of language study or the equivalent. An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major nor the language requirement. May be repeated for credit if content varies. LEC.

SPAN 177. First Year Seminar: ______. 3 Hours. HL GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in Spanish. May not contribute to major
requirements in Spanish. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

SPAN 212. Intermediate Spanish I. 3 Hours. AE42 / U.
A fully integrated content-based and form-focused approach to intermediate-level Spanish. Students process and practice a wide range of vocabulary and grammatical structures in order to complete tasks that promote critical exploration of the Spanish-speaking world and the development of listening, reading, speaking, writing, and intercultural competencies. Classes conducted in Spanish. Not open to native speakers of Spanish. Prerequisite: SPAN 108 or SPAN 111 or placement. See departmental guidelines. LEC.

SPAN 213. Honors Intermediate Spanish I. 3 Hours. AE42 / U.
Not open to native speakers of Spanish. Prerequisite: SPAN 108 or SPAN 111 with grade of A, or permission of the department LEC.

SPAN 216. Intermediate Spanish II. 3 Hours. AE42 / U.
A continuation of SPAN 212. A fully integrated content-based and form-focused approach to intermediate-level Spanish. Students process and practice a wide range of vocabulary and grammatical structures in order to complete tasks that promote critical exploration of the Spanish-speaking world and the development of listening, reading, speaking, writing, and intercultural competencies. Emphasis on process writing. Classes conducted in Spanish. Not open to native speakers of Spanish. Prerequisite: SPAN 212 or placement. LEC.

SPAN 217. Honors Intermediate Spanish II. 3 Hours. AE42 / U.
Not open to native speakers of Spanish. Prerequisite: SPAN 212 or SPAN 213 with a grade of A, or permission of the department. LEC.

SPAN 220. Intensive Intermediate Spanish. 6 Hours. U.
This course is designed for students who would like to acquire proficiency in Spanish more rapidly. The material covered in the course is the same as in SPAN 212 and 216. Not open to native speakers of Spanish. Available only to study abroad participants in KU's Summer Language Institute in Barcelona, Spain. Prerequisite: SPAN 108 or SPAN 111, with a grade of A or B. LEC.

SPAN 270. Hispanic Language, Culture and Civilization II-A: _____. 1-3 Hours. U.
For students in their second year of language study or the equivalent. An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major nor the language requirement. May be repeated for credit if content varies. LEC.

SPAN 271. Hispanic Language, Culture and Civilization II-B: _____. 1-3 Hours. U.
A continuation of SPAN 270. For students in their second year of language study or the equivalent. An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major nor the language requirement. May be repeated for credit if content varies. LEC.

SPAN 300. Developments in Hispanic Cultures. 3 Hours. HL AE42 / H.
The development of social and cultural patterns in the Spanish-speaking world, including the intersection of those patterns with issues related to politics, economics and/or personal values. Assigned readings may be in English or in Spanish. Does not count toward the Spanish major. Prerequisite: SPAN 108, SPAN 109, or SPAN 111; or two years of high school Spanish. LEC.

SPAN 302. The Spanish Inquisition. 3 Hours. H.
A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as HIST 325 and JWSH 315.) LEC.

SPAN 322. Spanish Grammar: Form and Meaning in Context. 3 Hours. U.
Analysis of the most important morphological and syntactic phenomena with an emphasis on their form and function through a review of salient grammatical points in preparation for advanced work in Spanish. Recommended for students who have completed Spanish 216, 217, or 220 with a grade of C or higher, or placement through examination. Course does not count toward the Major. Prerequisite: Four semesters of college-level Spanish or the equivalent. Students who have taken Spanish 324 may take this course with the permission of instructor. LEC.

SPAN 323. Spanish Composition and Cultural Analysis. 3 Hours. U.
Systematic review of writing in Spanish, intensive study of vocabulary and stylistics for formal written communication, and development of essential writing and analytical skills for advanced courses in Spanish. Prerequisite: SPAN 216, or SPAN 217, or SPAN 220, or consent of instructor. LEC.

SPAN 324. Grammar and Composition. 3 Hours. U.
Systematic grammar review and development of essential writing skills for advanced courses in Spanish. Concurrent enrollment in SPAN 328 required. Recommended for students with a grade of B or better in SPAN 216, SPAN 217, or SPAN 220. Prerequisite: SPAN 216 or SPAN 217 with a grade of "C" or higher, or SPAN 220, or SPAN 322, or consent of instructor. LEC.

SPAN 326. Spanish for Health Care Workers. 3 Hours.
This course is designed to provide students with the linguistic and cultural competencies necessary to communicate with and help treat Spanish speaking patients with limited English proficiency. Includes a general review of pertinent grammar, specific vocabulary groups relating to assessment and care of patients, vocabulary to establish rapport, and discussions leading to cultural competencies. Not open to students who have completed SPAN 424 or above. Prerequisite: Completion of Spanish 216 with a grade of C or better. LEC.

SPAN 328. Intermediate Spanish Conversation. 2 Hours. U.
Conversational reinforcement of topics presented in SPAN 324 with an emphasis on oral communication skills in a cultural context. Concurrent enrollment in SPAN 324 required. Two class meetings per week. Not available to study abroad participants. Prerequisite: SPAN 216 or SPAN 217 with a grade of C or higher; or SPAN 220; or SPAN 322; or consent of instructor. LEC.

SPAN 329. Intermediate Spanish Conversation II. 1 Hour. U.
Two class meetings per week. Continuation of SPAN 328. Not open to native speakers of Spanish. Prerequisite: SPAN 328 or consent of instructor. LEC.

SPAN 330. Service Learning Internship Spanish I. 3 Hours. U.
An opportunity for students to utilize and improve their Spanish language skills in an internship or volunteer work in business, schools, government, hospitals, churches, and various types of service organizations. Students must have approval of instructor to register and must provide written confirmation of acceptance for volunteer work in an agency that provides service to a Spanish-speaking public before the course begins. Periodic supervisor evaluations and a reflection journal in Spanish are required, in addition to other materials requested by the instructor. Class format may
be an independent internship taken for variable credit under instructor supervision. Will not count toward Spanish major. Prerequisite: Students must have completed a minimum of 12 hours of Spanish in courses at the 200-level or above, and completion of SPAN 324 with a grade of B or better. LEC.

SPAN 340. Textual Analysis and Critical Reading. 3 Hours. HL GE3H / H/W.
Critical readings and interpretation of Hispanic literatures, with emphasis on acquiring the skills and vocabulary necessary for discussing and writing literary analyses. Prerequisite: SPAN 324 and SPAN 328 with a grade of B- or higher, or consent of instructor. LEC.

SPAN 346. Transatlantic Hispanic Cultures. 3 Hours. H.
This course offers an introductory overview of Hispanic cultures, focusing on the political, economic, social, linguistic, and artistic development that shaped the historical and cultural bonds between Latin America and Spain. Enhances the cultural competence acquired in previous Spanish classes and prepare students for upper-level work in the major. Taught in Spanish. Prerequisite: SPAN 324. A grade of "C" or better in SPAN 324 is strongly recommended for students enrolling in this course. Not open to students who have already taken SPAN 370, SPAN 371, SPAN 446, SPAN 447, SPAN 470, or SPAN 471. LEC.

SPAN 370. Hispanic Language, Culture and Civilization III-A: ____. 1-3 Hours. U.
An intensive orientation to the culture of Spanish-speaking countries. Also includes elements of grammar, conversation, and composition. Available only to study-abroad participants. Will not count toward the Spanish major. May be repeated for credit if content varies. LEC.

SPAN 371. Hispanic Language, Culture and Civilization III-B: ____. 1-3 Hours. U.
A continuation of SPAN 370. An intensive orientation to the culture of Spanish-speaking countries. Also includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major. May be repeated for credit if content varies. LEC.

SPAN 390. Interpretation of Hispanic Literature. 3 Hours. H.
A study of selected works in literary theory that are pertinent to the field of Hispanism and of selected problems in literary interpretation and comparative literature methodology, designed to examine and apply systematically basic critical principles and approaches to the field of Hispanic literature. Discussion of these approaches is related to the previous study of literature and deepened through individual papers written by participants and presented to the group. Does not count toward the major in Spanish. Prerequisite: Completion of one junior-senior course in a language and literature department. LEC.

SPAN 424. Advanced Spanish Composition and Grammar. 3 Hours. H/W.
Extensive practice in writing, with attention to vocabulary, grammar usage, and discourse structure. Thorough review of syntax and grammar. Conducted in Spanish. Concurrent enrollment in SPAN 428 is strongly recommended. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 428. Advanced Spanish Conversation. 2 Hours. U.
Emphasis on developing fluid expression of opinions, ideas, and points of view through discussion of selected texts and cultural materials. Two class meetings per week. Concurrent enrollment in SPAN 424 recommended. Prerequisite: SPAN 340 or consent of instructor. A grade of C or higher in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 429. Spanish Phonetics. 3 Hours. H/W.
An analytical and practical study of contemporary Spanish phonetics. Prerequisite: SPAN 424 and SPAN 428, or consent of instructor. LEC.

SPAN 440. Hispanic Studies: ____. 3 Hours. H/W.
A topics course dedicated to the study of special historical moments, topics, authors, or themes in literary and cultural history. Readings may include selections from both Spain and the countries of Spanish America. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 441. Special Topics in Spanish Literature and Culture: ____. 1-3 Hours. H.
A topics course dedicated to the study of special historical moments, topics, authors, or themes in Spanish literary and cultural history. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. This course may be used to partially or fully fulfill 400-level peninsular Spanish literature requirement. Prerequisite: SPAN 340. LEC.

SPAN 442. Special Topics Latin American Literature and Cultures: ____. 1-3 Hours. H.
A topics course dedicated to the study of special historical moments, topics, authors, or themes in Latin American literary and cultural history. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. This course may be used to partially or fully fulfill 400-level peninsular Latin American literature requirement. Prerequisite: SPAN 340. LEC.

SPAN 446. Spanish Culture. 3 Hours. H/W.
A study of the development of Spanish culture with particular emphasis on history, customs and traditions, and literary trends and artistic tendencies that constitute Spain's specific contribution to Western civilization. Conducted in Spanish. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 447. Latin American Cultures: ____. 3 Hours. H/W.
The description and interpretation of Latin American cultures, with particular attention to history, ethnology, folklore, and the arts. The course may focus on particular countries or geographical areas. Conducted in Spanish. May be repeated for credit as topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 448. Spanish Language and Culture for Business. 3 Hours. H.
Cultural studies approach to contemporary Spanish American societies for students with an interest in business. Explores how individuals from Spanish American countries negotiate their place in a new cultural context, and how different groups in Spanish America perceive business (negocios). Readings include selections from literature, history, journalism, social analysis, and popular culture. Exercises help non-native speakers develop analytical skills as well as vocabulary and communication skills related to international business and professional life. Conducted in Spanish. Prerequisite: SPAN 323 or SPAN 324, or consent of instructor. LEC.

SPAN 450. Medieval Spanish Studies: ____. 3 Hours. H.
Reading and analysis of Spanish literature and culture to 1500. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or
better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 451. Early Modern Spanish Studies: _____, 3 Hours. H.
Reading and analysis of Spanish literature and culture from 1500 to 1800. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 452. Nineteenth Century Spanish Studies: _____, 3 Hours. H.
Reading and analysis of the literature and culture of Spain of the 1800s. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 453. Twentieth Century Spanish Studies: _____, 3 Hours. H.
Reading and analysis of the literature and culture of Spain from 1900 to the present. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 460. Colonial Spanish-American Studies: _____, 3 Hours. H.
Reading and analysis of Spanish-American literature and culture from the Conquest to Independence, organized by topic. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 461. Nineteenth Century Spanish-American Studies: _____, 3 Hours. H.
Reading and analysis of Spanish-American literature and culture from Independence to 1900, organized by topic. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 462. Twentieth Century Spanish-American Studies: _____, 3 Hours. H.
Reading and analysis of Spanish-American literature and culture from 1900 to the present, organized by topic. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 463. National Traditions in Spanish America: _____, 3 Hours. H.
Reading and analysis of Spanish-American literature and cultural history from the perspective of a selected nation or nations. The course explores the role of literature and cultural expression in constructing the modern nation and local traditions. Readings may cover selections from multiple genres, authors, and periods. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 464. Reading and Analysis of U.S. Latino/a Literatures: _____, 3 Hours. H.
The course covers multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course. LEC.

SPAN 470. Studies in Spanish Culture and Civilization: _____, 1-3 Hours. H.
A study of Spanish culture with emphasis on one or more of the following aspects: history, politics, ethnology, anthropology, religious and secular traditions, issues of cultural identity, music, art, architecture, and popular culture. Available only to study-abroad participants. Maybe repeated for credit if content varies. LEC.

SPAN 471. Studies in Spanish-American Culture and Civilization: _____, 1-3 Hours. H.
A study of Spanish American national or regional culture with emphasis on one or more of the following aspects: history, politics, ethnology, anthropology, religious and secular traditions, issues of cultural identity, music, art, architecture, and popular culture. Available only to study-abroad participants. Maybe repeated for credit if content varies. LEC.

SPAN 474. Studies in Spanish Literature and Culture: _____, 1-3 Hours. H.
A study of the literature and cultural production of a particular author, group of authors, period, genre, region, or theme. Available only to study-abroad participants. Maybe repeated for credit if content varies. LEC.

SPAN 475. Studies in Latin-American Literature and Culture: _____, 1-3 Hours. H.
A study of the literature and cultural production of a particular author, group of authors, period, genre, country, region, or theme. Available only to study-abroad participants. Maybe repeated for credit if content varies. LEC.
in the field. Prerequisite: SPAN 424 and SPAN 428, or consent of the instructor. LEC.

SPAN 522. Advanced Studies in Spanish Language: _____. 3 Hours. H/W.
Extensive language analysis and practice on one topic such as stylistics, translation, conversation/spoken discourse, or creative writing. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 424 and SPAN 428, or consent of the instructor. LEC.

SPAN 540. Colloquium on Hispanic Studies: _____. 3 Hours. AE61 / H.
An advanced course dedicated to the critical study of special historical moments, topics, authors or themes in literary and cultural history. This course is designed to provide sophistication, focus, and analytical depth in literary and cultural study through exploration of secondary sources as well as theoretical material. Reading may include selections from both Spain and the countries of Spanish America and may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 424 and six hours of 400-level Spanish literature courses. LEC.

SPAN 550. Colloquium on Spanish Film. 3 Hours. AE61 / H.
A theoretical and historical exploration of Spanish cinema with particular attention devoted to the films of Berlanga, Bunuel, Gutiérrez Aragón, Saura, Erice, and Almodóvar. Students will be expected to attend film screenings in addition to regular class meetings. Prerequisite: SPAN 424 and six hours of 400-level Spanish literature courses. LEC.

SPAN 560. Colloquium on Latin American Film. 3 Hours. AE61 / H.
An overview of Latin American cinema from its origins to the present with particular attention to thematic concerns, such as cultural and national identity, and of literary discourse. Students will be expected to attend film screenings in addition to regular class meetings. Prerequisite: SPAN 424 and six hours of 400-level Spanish literature courses. LEC.

SPAN 566. Latin American Folklore. 3 Hours. H.
An examination of Latin American folk traditions, the ways they are used to give meaning to life and to define local and national identity. Folk literature, songs, music, dance, foods, fiestas, and material culture are looked at in the light of current folklore theory. Lectures and discussion are in English; some readings may be in Spanish. Prerequisite: SPAN 424 and six hours of 400-level Spanish courses. LEC.

SPAN 568. Spanish Ballads. 3 Hours. H/W.
A study of the various types of ballads; traditional, artistic, and popular. Prerequisite: A survey of Spanish literature through the Golden Age. LEC.

SPAN 570. Studies in Hispanic Linguistics: _____. 3 Hours. U.
Theoretical and applied analysis of one or more of the following components of the Spanish language: phonology/phonetics, morphology, syntax, semantics, pragmatics. May be repeated for credit if content varies. Prerequisite: SPAN 424 and SPAN 428. LEC.

SPAN 681. Language Teaching for Oral Proficiency. 1 Hour. U.
A summer course designed principally for secondary school language teachers. Provides an orientation to proficiency-based models in foreign language instruction, national standards in the rating of foreign language proficiency, and curriculum development sessions which address issues of articulation in foreign language curricula. (Not applicable toward a major or graduate degree in Spanish.) (Same as FREN 681 and GERM 681.) LEC.

SPAN 717. History of the Spanish Language. 3 Hours.
The phonological and lexical development of the Spanish language from spoken Latin to the present; major dialectal features. Prerequisite: A course in Spanish phonetics. LEC.

SPAN 720. Syntax and Composition. 3 Hours.
Syntactical analysis of modern Spanish usage; principles of expository writing. Prerequisite: A course in advanced composition or structure, or graduate standing. LEC.

SPAN 722. Special Topics in Spanish Literature: _____. 2-3 Hours.
The content of this course will vary, and the course may be taken more than once with full credit, provided there is no duplication in the material studied. Prerequisite: A survey course in Spanish peninsular literature taught in Spanish. LEC.

SPAN 730. Topics in the Literature of 13th- and 14th-Century Iberia: _____. 3 Hours.
A theoretically informed study of representative works from 13th- and 14th-century Iberia. Course may be repeated for credit provided that the topic changes. LEC.

SPAN 733. Print Culture in Early Modern Spain. 3 Hours.
A survey of the literature produced during the period of early printed books with emphasis on the diffusion of new literary forms during the late 15th- and early 16th-centuries. LEC.

SPAN 735. Poetry and Sentimental Romance in Fifteenth-Century Castile. 3 Hours.
Survey of the poetry and prose of the fifteenth century with particular attention to the literature produced during the reign of Isabel de Castilla. LEC.

SPAN 739. Topics in Early Modern Spanish Drama: _____. 3 Hours.
Selected plays of such authors as Lope de Vega, Tirso de Molina, Calderón, and María de Zayas. Course may be repeated for credit provided that the topic changes. LEC.

SPAN 742. Topics in the Early Modern Spanish Prose: _____. 3 Hours.
From the Celestina to the middle of the seventeenth century. Course may be repeated for credit provided that the topic changes. LEC.

SPAN 744. Topics in Early Modern Spanish Poetry: _____. 3 Hours.
A theoretically informed study of selected works of poetry in Spanish from the 15th through 17th centuries. Course may be repeated for credit provided that the topic changes LEC.

SPAN 745. Don Quixote. 3 Hours.
Linguistic and literary study. Examination of traditional interpretations. The life and thought of Cervantes. Theoretical readings. LEC.

SPAN 752. Spanish Literature of the 19th Century. 3 Hours.
The neo-classic movement; the traditionalist reaction; the beginnings of Romanticism. Prerequisite: A survey course in Spanish literature from the 18th century to the present. LEC.

SPAN 754. Romanticism. 3 Hours.
The development of the Romantic movement in Spain. Prerequisite: A survey course in Spanish literature from the 18th century to the present. LEC.

SPAN 755. 19th Century Spanish Novel. 3 Hours.
The rise and development of realism. Prerequisite: A survey course in Spanish literature from the 18th century to the present. LEC.

SPAN 760. 19th Century Spanish Drama. 3 Hours.
A survey of the main currents and aesthetics in the nineteenth-century Spanish theatre: NeoClassicism, Romanticism, Costumbrismo, Realismo (Alta Comedia), NeoRomanticism, and the innovations of Galdos and Benavente. Prerequisite: A survey course in Spanish literature from the 18th century to the present. LEC.
SPAN 761. 20th Century Spanish Drama. 3 Hours.
A survey of major plays and playwrights of 20th century Spain with reference to critical theory of text as literature and performance. LEC.

SPAN 762. The Spanish Novel Since the Civil War. 3 Hours.
A study of the major works and movements occurring since the Spanish Civil War. LEC.

SPAN 764. Modern Spanish Poetry. 3 Hours.
Modern poetry of Spain, beginning with Becquer and ending with the “Generation of the 1920’s.” Close study of the works of the major poets; readings in poetic theory. Prerequisite: A general survey course of the literature of Spain of the 18th, 19th, and 20th centuries. LEC.

SPAN 765. Contemporary Spanish Poetry. 3 Hours.
Contemporary poetry of Spain, beginning with the “Generation of the 1920’s” and including the post-Civil War period. Close study of the work of several poets; readings in poetic theory. Prerequisite: A general survey course in the literature of Spain since the Golden Age. LEC.

SPAN 766. The Spanish Modernist Novel. 3 Hours.
A diachronic study of the syntax and morphology of Spanish from the thirteenth century to the present; sound change and orthography; evolution of literary styles. Prerequisite: A course in Spanish phonetics. LEC.

SPAN 770. Spanish-American Drama. 3 Hours.
Study of several exceptional plays of 20th century Spanish America in light of critical methodologies, national theatre movements, and performance aspects. LEC.

SPAN 771. Spanish-American Literature: ____. 3 Hours.
A survey by region or country (Mexican literature, Cuban literature, Argentine literature, Caribbean literature, etc.) of Spanish American literature from the beginning to the present, with emphasis on the 19th and 20th centuries. Course title will vary by country or region. Prerequisite: A survey course in Spanish American literature. LEC.

SPAN 772. The Modern Spanish-American Novel, 1900-1950. 3 Hours.
A study of selected novels in Spanish America from the 1900 to 1950. Topics may vary. Prerequisite: A course in Spanish American literature. LEC.

SPAN 773. The Modern Spanish-American Novel Since 1950. 3 Hours.
A study of selected novels in Spanish America since 1950. Topics may vary. Prerequisite: A survey course in Spanish American literature. LEC.

SPAN 774. Spanish-American Poetry. 3 Hours.
A study of the twentieth century poetic tradition in Spanish America, including major movements and a range of poets who represent the variety of writing in the genre until the 21st century. LEC.

SPAN 776. Spanish-American Short Story. 3 Hours.
A study of aspects of the short story tradition in Spanish America from its origins to the present. Topics may vary. Prerequisite: A survey course in Spanish American literature. LEC.

SPAN 781. Colonial Identities. 3 Hours.
This course centers on the dynamics of identity of Creoles, Amerindians, Blacks and members of the castes in colonial Spanish America. It concentrates on how members of these racial and ethnic groups relate to coloniality, space, place and gender. LEC.

SPAN 782. Spanish-American Prose Fiction: ____. 3 Hours.
A survey by region or country (Mexican Prose Fiction, Cuban Prose Fiction, Argentine Prose Fiction, Caribbean Prose Fiction, etc.) of Spanish American Prose Fiction from the beginning to the present, with emphasis on the 19th and 20th centuries. Course title will vary by country or region. Prerequisite: A survey course in Spanish American literature. LEC.

SPAN 784. Spanish-American Modernism and Vanguards. 3 Hours.
A study of the poetry and/or prose of modernismo and the vanguards in Spanish America. Prerequisite: One course in Spanish American literature or permission of instructor. LEC.

SPAN 785. Special Topics in Spanish-American Literature: ____. 2-3 Hours.
The content of this course will vary, and the course may be taken more than once, with full credit provided there is no duplication in the material covered. Prerequisite: A survey course in Spanish American literature. LEC.

SPAN 790. Spanish Linguistics: Theory and Application to Teaching. 3 Hours.
An introduction to linguistics and applied linguistics focused on the phonology, morphology, and syntax of Spanish, including work in tagmemics and transformational grammar. Part of the course deals with problems of language instruction, testing, and use of the language laboratory. LEC.

SPAN 792. Topics in the Picaresque Novel: ____. 3 Hours.
A theoretically informed study of the picaresque mode in Spanish and Spanish-American literature. Course may be repeated for credit provided that the topic changes. LEC.

SPAN 795. Literary Theory and Criticism. 3 Hours.
Systematic study of the development of theories of literature. Emphasis usually placed on twentieth century although scope may vary. Prerequisite: 700-level course in Spanish or concurrent enrollment. LEC.

SPAN 801. Teaching Spanish in Institutions of Higher Learning. 3 Hours.
Required of all teaching assistants who teach beginning Spanish at the University of Kansas for the first time. Instruction in classroom procedures for first year Spanish, demonstration of teaching techniques, and survey of current methodology. FLD.

SPAN 802. Colloquium in Methods of Teaching Spanish Language. 1-3 Hours.
Combines discussion of theoretical teaching concepts and development of pedagogical materials with practical solutions arising concurrently in Spanish languages courses. LEC.

SPAN 817. Spanish Historical Grammar. 3 Hours.
A diachronic study of the syntax and morphology of Spanish from the thirteenth century to the present; sound change and orthography; evolution of literary styles. Prerequisite: A course in Spanish phonetics. LEC.

SPAN 898. Investigation and Conference. 1-10 Hours.
Individually directed work to fill the student's needs not met by available organized courses. One to three hours of credit in any semester. Maximum total credit for the M.A. degree is three hours. May be taken with full credit as often as recommended by department. THE.

SPAN 922. Seminar in Spanish Literature and Culture: ____. 3 Hours.
An intensive investigation of a particular topic in Spanish Literature and Culture; content will vary in terms of topics, genres, and time periods covered. The course may be taken more than once with full credit, provided there is no duplication. Prerequisite: Graduate standing. LEC.

SPAN 940. Seminar in Trans-Atlantic Literatures and Cultures: ____. 3 Hours.
An intensive investigation of a particular topic in Spanish and Latin American Literatures and Cultures; content will vary in terms of topics,
genres, and time periods covered. The course may be taken more than once, with full credit provided there is no duplication. Prerequisite: Graduate standing. SEM.

SPAN 950. Seminar: Spanish Drama: _______. 3 Hours.
LEC.

SPAN 952. Seminar: Spanish Novel: _______. 3 Hours.
LEC.

Bachelor of Arts in Spanish

Why study Spanish and Portuguese?
Because fluency in more than one language and culture and analytical understandings of literary and cultural texts create educated citizens.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

Spanish Major Prerequisite or Co-Requisite Knowledge (6)

Majors must complete the following 2 courses. These hours do not contribute to the minimum number of hours required for the major. Majors must complete SPAN 324 in order to go on to advanced-level Spanish classes.

Intermediate Composition and Grammar. Satisfied by:

SPAN 324 Grammar and Composition

Intermediate Conversation. Satisfied by:

SPAN 328 Intermediate Spanish Conversation

Spanish Major Introductory Knowledge. Majors must complete the following 2 courses:

Textual Analysis and Critical Reading. Satisfied by:

SPAN 340 Textual Analysis and Critical Reading

Transatlantic Hispanic Cultures. Satisfied by:

SPAN 346 Transatlantic Hispanic Cultures

Requirements for the B.A. Major

Spanish Major Core Knowledge and Skills (26)

Majors must complete at least 1 course (3 hours) in each of following areas:

Literature: Peninsular Spanish Literary and Cultural Studies. Satisfied by 1 of the following:

SPAN 440 Hispanic Studies: _______. 3
SPAN 441 Special Topics in Spanish Literature and Culture: _______.

SPAN 450 Medieval Spanish Studies: _______.
SPAN 451 Early Modern Spanish Studies: _______.
SPAN 452 Nineteenth Century Spanish Studies: _______.
SPAN 453 Twentieth Century Spanish Studies: _______.

Literature: Latin American Literary and Cultural Studies. Satisfied by 1 of the following:

SPAN 440 Hispanic Studies: _______.
SPAN 442 Special Topics Latin American Literature and Cultures: _______.

SPAN 460 Colonial Spanish-American Studies: _______.
SPAN 461 Nineteenth Century Spanish-American Studies: _______.
SPAN 462 Twentieth Century Spanish-American Studies: _______.
SPAN 463 National Traditions in Spanish America: _______.
Language: Advanced Spanish Composition and Grammar. Satisfied by:

</tbody>
</table>

Majors are strongly encouraged to study abroad in a Spanish-speaking country. Please see your advisor about this opportunity.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 32 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Below is a sample 4-year plan for students pursuing the BA in Spanish. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

### Minor in Brazilian Studies

#### Why study Spanish and Portuguese?

Because fluency in more than one language and culture and analytical understandings of literary and cultural texts create educated citizens.

#### Requirements for the Brazilian Studies Minor

This program consists of 6 3-credit-hour courses (for a total of 18 credit hours) in which students pursue Brazilian studies beyond the 3 first semesters of basic language classes. In consultation with departmental advisors, students combine their course work in several academic departments.

#### Departmental Honors

Undergraduates contemplating honors work should consult their advisors. A declaration of intent form must be submitted to the department. The department notifies students of acceptance to candidacy. At graduation, the student must have a minimum grade-point average of 3.25 overall and 3.5 in Spanish. 6 hours in SPAN 496 Honors in Spanish generally are required, which may be fulfilled in a variety of ways as described here: each 3-hour SPAN 496 course will include a major research paper. While enrolled in SPAN 496, the student completes 2 courses, one in Peninsular literature and the other in Spanish American literature, from the following options:

1. Graduate courses at the 700 level;
2. Upper-division literature courses at the 500 level, including SPAN 540, SPAN 550, and SPAN 560 (only available to students who have already completed the 500-level capstone course);
3. An independent study course (may only be taken once for SPAN 496 credit).

The student attends 2 courses for SPAN 496 credit and writes 2 honors papers under the supervision of 1 or more faculty members. A committee of 3 faculty members evaluates these papers, and the student makes an oral summary of their content.

#### Study Abroad

The department offers summer programs in Barcelona, Spain; Buenos Aires, Argentina; and Salvador (Bahia), Brazil. KU offers semester/academic year programs in San José, Costa Rica; Buenos Aires, Argentina; and in Salamanca, Spain. More information is available from the Office of Study Abroad (http://www.studyabroad.ku.edu).

Graduate students have the opportunity to teach and conduct research during summer sessions in Puebla, Mexico; or Barcelona, Spain. The department also has a graduate exchange agreement with the University of Santiago de Compostela, Spain.

#### Total Hours: 120-121

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. The Spanish department recommends that students with prior Spanish experience begin with SPAN 111. Only students with no prior Spanish experience should begin in SPAN 104 and permission of an advisor is required for enrollment.
3. Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
4. Spanish majors must have completed 6 credit hours of Hispanic Literature (SPAN 440 or above) coursework before taking the Spanish Capstone course.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
areas, such as language, business, economics, film and media studies, geography, history, political science, and theatre.

**Brazilian Studies Minor Course Requirements**

Students selecting this minor must complete the following:

**Prerequisite Knowledge (0)**

Satisfied by Intermediate Brazilian Portuguese I-PORT 212 or equivalent placement.

**Requirements for the Minor (18)**

Satisfied by 3 courses from each of the following groups:

**Group I:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PORT 216</td>
<td>Intermediate Brazilian Portuguese II</td>
</tr>
<tr>
<td>PORT 220</td>
<td>Intensive Intermediate Brazilian Portuguese (Open only to students abroad)</td>

</tbody>
</table>

**Minor Hours & Minor GPA**

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all departmental courses in the field of study including F’s and repeated courses. See the Semester/ Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Study Abroad**

The department offers summer programs in Barcelona, Spain; Buenos Aires, Argentina; and Salvador (Bahia), Brazil. KU offers semester/academic year programs in San José, Costa Rica; and in Ronda, Spain. More information is available from the Office of Study Abroad (http://www.studyabroad.ku.edu).

Graduate students have the opportunity to teach and conduct research during summer sessions in Puebla, Mexico; or Barcelona, Spain. The department also has a graduate exchange agreement with the University of Santiago de Compostela, Spain.

**Minor in Spanish**

**Spanish Minor**

The Spanish minor provides students the opportunity to achieve cultural and linguistic competency, and to document their study of Spanish. It complements many majors within the College as well as other degrees across the University.

**Requirements for the Spanish Minor**

The minor requires 20 hours, as well as prerequisite knowledge.

**Prerequisites**

To advance to SPAN 340 students must earn a grade of B or better in SPAN 324 and 328, or have departmental consent.

**Minor Requirements (20)**

Students must complete 20 hours of coursework, including the following required courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 101</td>
<td>Orientation Seminar in Spanish and Portuguese</td>
</tr>
<tr>
<td>SPAN 324</td>
<td>Grammar and Composition</td>
</tr>
<tr>
<td>SPAN 328</td>
<td>Intermediate Spanish Conversation</td>
</tr>
<tr>
<td>SPAN 340</td>
<td>Textual Analysis and Critical Reading</td>
</tr>
<tr>
<td>SPAN 346</td>
<td>Transatlantic Hispanic Cultures</td>
</tr>
<tr>
<td>SPAN 424</td>
<td>Advanced Spanish Composition and Grammar</td>
</tr>
<tr>
<td>SPAN 428</td>
<td>Advanced Spanish Conversation</td>
</tr>
<tr>
<td>SPAN 440</td>
<td>441, 442, 450, 451, 452, 453, 460, 461, 462, 463.</td>
</tr>
</tbody>
</table>

**Minor Hours & GPA**

While completing required courses, minors must also meet each of the following hour and grade point average minimum standards:
Minor Hours
Satisfied by 20 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 19 hours from junior/senior courses (300+) in the major.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Study Abroad
The department offers summer programs in Barcelona, Spain; Buenos Aires, Argentina; and Salvador (Bahia), Brazil. KU offers semester/academic year programs in San José, Costa Rica; and in Ronda, Spain. More information is available from the Office of Study Abroad (http://www.studyabroad.ku.edu).

Graduate students have the opportunity to teach and conduct research during summer sessions in Puebla, Mexico; or Barcelona, Spain. The department also has a graduate exchange agreement with the University of Santiago de Compostela, Spain.

Master of Arts in Spanish

Why study Spanish and Portuguese?
Because fluency in more than one language and culture and analytical understandings of literary and cultural texts create educated citizens.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
1. The applicant must hold (or anticipate completing by the time of admission) a B.A. or B.S. degree from an accredited U.S. college or university or the equivalent degree from a foreign university, must have 15 semester hours of literature courses at the survey level or above in Spanish or the equivalent of the undergraduate major in Spanish at KU, and must have a minimum grade-point average of 3.0 on a 4.0 scale, both in Spanish and overall.
2. The selection committee gives strong consideration to letters of recommendation, the breadth and depth of preparation, and Graduate Record Examination scores, if available. Deficiencies in preparation specified by the selection committee may be made up early in the graduate program, although the time required to complete the degree is correspondingly greater.

Submit your graduate application online (http://www.graduate.ku.edu). Send all other requested application materials to the department:

The University of Kansas
Department of Spanish and Portuguese
Wescoe Hall
1445 Jayhawk Blvd., Room 2650
Lawrence, KS 66045-7594

M.A. Degree Requirements
The department offers the M.A. degree with a concentration in literature or language/literature/culture.

Literature Concentration Requirements
1. A minimum of 30 hours of graduate credit in literature, including one seminar in Peninsular literature or in Spanish-American literature.
2. A reading knowledge of another foreign language, as approved by the department.
3. A general examination in the field of Hispanic literature, partly written and partly oral.

Language/Literature/Culture Concentration Requirements
1. A minimum of 30 hours of graduate credit, as listed below.
2. A general examination, partly written and partly oral, based on the appropriate department reading lists for this degree.
   a. Language and Culture (12 hours), including courses in phonetics and the structure of Spanish if they have not been taken at the undergraduate level.
   b. Literature (12 hours), including at least 3 credit hours of course work in each of the three major genres (fiction, theatre, poetry). One course in this category must be a seminar.
   c. One additional course in the department (3 hours) in any field. (PORT 611 counts in this category.)
   d. One graduate-level course (3 hours) in a second language (excluding PORT 611).

Study Abroad
The department offers summer programs in Barcelona, Spain; Buenos Aires, Argentina; and Salvador (Bahia), Brazil. KU offers semester/academic year programs in San José, Costa Rica; and in Ronda, Spain. More information is available from the Office of Study Abroad (http://www.studyabroad.ku.edu).

Graduate students have the opportunity to teach and conduct research during summer sessions in Puebla, Mexico; or Barcelona, Spain. The department also has a graduate exchange agreement with the University of Santiago de Compostela, Spain.

Doctor of Philosophy in Spanish

Why study Spanish and Portuguese?
Because fluency in more than one language and culture and analytical understandings of literary and cultural texts create educated citizens.
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2369) section of the online catalog.

Please consult the Departments & Programs (p. 774) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission

1. The applicant must hold (or anticipate completing by the time of admission) an M.A. or M.S. degree from an accredited U.S. college or university or the equivalent degree from a foreign university; must have a minimum grade-point average of 3.0 on a 4.0 scale, both in Spanish and overall; and must meet general requirements.
2. Strong consideration is given to letters of recommendation, breadth and depth of preparation, and Graduate Record Examination scores, if available.

Submit your application online (http://www.graduate.ku.edu). Send all other requested application materials to

The University of Kansas
Department of Spanish and Portuguese
Wescoe Hall
1445 Jayhawk Blvd., Room 2650
Lawrence, KS 66045-7594

Ph.D. Degree Requirements

The degree of Doctor of Philosophy is offered with emphasis on Spanish or Spanish-American literature.

Requirements

Once admitted, the aspirant must

1. Present a reading knowledge of 2 foreign languages, other than Spanish, appropriate to the specialization;
2. Complete all course work prescribed by the advisory committee (this course work is to include a minimum of 5 seminars, at least 4 at KU, and a guideline of a minimum of 24 hours in Hispanic literatures at KU beyond the 30 hours required for the M.A. degree);
3. Present a minor in a field other than Spanish or Spanish-American literature;
4. Complete a minimum of 2 semesters of quarter-time teaching or 1 semester of half-time teaching in the Department of Spanish and Portuguese;
5. Research Skills and Responsible Scholarship Requirement. The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. Please contact your advisor or the director of graduate studies for specific requirements.
6. Pass a comprehensive examination, partly written and partly oral; and
7. Write and defend a dissertation.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

See also the general requirements for the Doctor of Philosophy degree in Graduate Studies (p. 2369) section of the online catalog and in the KU Policy Library.

Study Abroad

The department offers summer programs in Barcelona, Spain; Buenos Aires, Argentina; and Salvador (Bahia), Brazil. KU offers semester/academic year programs in San José, Costa Rica; and in Ronda, Spain. More information is available from the Office of Study Abroad (http://www.studyabroad.ku.edu).

Graduate students have the opportunity to teach and conduct research during summer sessions in Puebla, Mexico; or Barcelona, Spain. The department also has a graduate exchange agreement with the University of Santiago de Compostela, Spain.

Department of Speech-Language-Hearing: Sciences and Disorders

Why study speech, language, and hearing?

Because communication is central to human behavior, and the treatment of communication disorders requires specialized knowledge and skills.

Career Opportunities

Most states have laws mandating that speech-language pathologists and audiologists be licensed to practice their profession. The minimum requirement for licensure in most states is a master’s degree for speech-language pathology and the Au.D. for audiology.

Undergraduate Programs

Basic study in speech, language, and hearing is provided through B.A. and B.G.S. programs. Programs are designed for the student who seeks a career in speech, language, or hearing or is interested in normal communication development and communication disorders.

Graduate Programs

Graduate study at KU is offered through the Intercampus Program in Communicative Disorders with classes, research, and clinical work in Lawrence and at KU Medical Center in Kansas City.

Courses

SPLH 120. The Physics of Speech. 4 Hours. N.
An introduction to the acoustic structure of speech intended for nonscience majors. Emphasis will be placed on the methods and standards by which scientists measure and evaluate the physical characteristics of speech. Topics will include: simple harmonic motion, the propagation of sound waves, aerodynamic aspects of vocal fold vibration, resonance, digital speech processing, frequency analysis, and speech synthesis. Three class hours and one laboratory per week. (Same as LING 120.) Prerequisite: MATH 101 or 104 or equivalent. LEC.
SPLH 177. First Year Seminar: ______. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Speech-Language and Hearing. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

SPLH 250. Study Abroad Topics in: ______. 1-5 Hours. S.
A course designed to enhance international experience in topic areas related to speech-language-hearing at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission. LEC.

SPLH 261. Survey of Communication Disorders. 3 Hours. SI GE3S / S.
Provides a general understanding of normal and deviant speech, language, and hearing in adults and children. This course considers the normal development of communication behavior, the nature of communication disorders, and the interaction of speech pathology and audiology with allied fields (e.g., education, medicine, psychology, special education). LEC.

SPLH 320. The Communicating Brain: The Ultimate Personal Computer. 3 Hours. U.
This course introduces the study of human neuroscience with a particular focus on human communication. The course provides an overview of the relevant anatomical structures and function along with an introduction to the basic methods used to investigate central nervous system function. Students are introduced to the study of perceptual, motor, and language function in the nervous system through a series of examples drawn from normal function and clinical cases. The examples are selected to highlight how these systems develop and are influenced by experience, implantable devices developed to interface with the nervous system, and how computers and animals are used as models to learn about nervous system function. LEC.

SPLH 418. Introduction to Cognitive Science. 3 Hours. S.
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an inter-disciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as LING 418, PHIL 418, and PSYC 418.) Prerequisite: Consent of instructor. LEC.

SPLH 432. Human Behavioral Genetics. 3 Hours. S.
A survey of human behavioral genetics for upper division undergraduates. Emphasis is on how the methods and theories of quantitative, population, medical, and molecular genetics can be applied to individual and group differences in humans. Both normal and abnormal behaviors are covered, including intelligence, mental retardation, language and language disorders, communication, learning, personality, and psychopathology. (Same as ANTH 447, BIOL 432, PSYC 432.) Prerequisite: Introductory courses in biology/genetics or biological anthropology and psychology are recommended. LEC.

SPLH 449. Laboratory/Field Work in Human Biology. 1-3 Hours. AE61 / N.
Faculty supervised laboratory or field research for Human Biology majors. Students design and complete a research project in collaboration with a Human Biology faculty member. (Same as ANTH 449, BIOL 449, and PSYC 449.) Prerequisite: Consent of instructor and Human Biology major. FLD.

SPLH 450. Study Abroad Topics in: ______. 1-5 Hours. S.
A course designed to enhance international experience in topic areas related to speech-language-hearing at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission. LEC.

SPLH 451. Directed Study Abroad in Speech-Language-Hearing. 1-3 Hours. S.
An independent study designed to enhance international experience in topic areas related to speech-language hearing. Investigation of special topic or project selected by the student with advice, approval, and supervision by a KU SPLH instructor and an authorized agent of the study abroad site. Experience must be arranged through the Office of KU Study Abroad. Such study may take the form of directed reading and/or directed research/clinical observation. A daily journal and final report is required. A maximum of six hours of credit may be counted, with no more than three in a single area of study. Prerequisite: Consent of instructor IND.

SPLH 462. Principles of Speech Science. 3 Hours. N.
Survey of the physiology of speech production, and the physics of sound. Emphasis upon methodologies in the laboratory study of normal speech. Prerequisite: SPLH 120, or concurrent enrollment in SPLH 120 or consent of instructor. LEC.

SPLH 463. Principles of Hearing Science. 3 Hours. N.
This class discusses the concepts and principles relevant to normal hearing processing: anatomy, psychophysical methods, and basic subjective correlates of the auditory system. Prerequisite: SPLH 120, or concurrent enrollment in SPLH 120, or consent of instructor. LEC.

SPLH 464. Undergraduate Seminar in: ______. 1-3 Hours. S.
Course organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (Distribution credit given for two-three hours only.) LEC.

SPLH 465. Fundamentals of Clinical Phonetics. 1 Hour. S.
Introduction to classification of American English speech sounds based on articulatory phonetics. Practice in phonetic transcription and analysis of normal and abnormal speech. Laboratory exercises to give students hands-on experience with selected topics from lecture. Prerequisite or Corequisite: SPLH 120. LEC.

SPLH 466. Language Science. 3 Hours. S.
Introduction to structure/function of human languages as it relates to language development and disorders; processes involved in the expression and reception of language and the methodologies employed to study these processes. LEC.

SPLH 497. Mentored Research Experience. 2-8 Hours. AE61 / S.
Study may be directed toward either reading for integration of knowledge and insight in Speech-Language-Hearing, or original research in the field. Student creates a plan of activities at the beginning of each semester under the mentor's guidance. Student and mentor review this plan at the end of each semester to evaluate progress. In the final semester of enrollment, student must complete a written report or a public oral presentation detailing the purpose, methods, results, and impact of the research. This final product partially meets the requirements for Research Experience Certification. (Eight hours maximum credit, which may be distributed through 4 semesters. No student may enroll for less than two hours credit or more than 4 hours of credit in a given semester). Prerequisite: Consent of Departmental Research Experience Coordinator. IND.
SPLH 498. Departmental Honors Research. 2-8 Hours. AE61 / S. Study may be directed toward either reading for integration of knowledge and insight in Speech-Language-Hearing, or original research in the field. Student creates a plan of activities at the beginning of each semester under the mentor’s guidance. Student and mentor review this plan at the end of each semester to evaluate progress. In the final semester of enrollment, student must complete a written report or a public oral presentation detailing the purpose, methods, results, and impact of the research. This final product partially fulfills the requirements for Departmental Honors. (Eight hours maximum credit, which may be distributed through 4 semesters. No student may enroll for less than two hours credit or more than 4 hours of credit in a given semester). Prerequisite: Consent of Departmental Honors Coordinator. IND.

SPLH 499. Directed Study in Speech-Language-Hearing. 1-3 Hours. AE61 / S. Investigation of special topic or project selected by the student with advice, approval, and supervision of an instructor. Such study may take the form of directed reading and/or directed research/clinical observation. Individual reports and conferences. (Distribution credit given for two-three hours only.) A maximum of six hours of credit may be counted, with not more than four in a single area of study.) Prerequisite: Consent of instructor. IND.

SPLH 565. Language Sample Analysis Lab. 1 Hour. S. The study of the analysis of language produced by children with respect to its phonological, lexical, morphological, syntactic, and pragmatic characteristics. Prerequisite or corequisite: SPLH 566. LAB.

SPLH 566. Language Development. 3 Hours. S GE3S / S. Study of language acquisition in children, including phonologic, morphologic, syntactic, and semantic components. Methods of language measurement, the role of comprehension, and pragmatic aspects of language use are included. May be taught in lecture or online format. LEC.

SPLH 568. Introduction to Audiological Assessment and Rehabilitation. 4 Hours. U. Introduction to methods for assessing and treating hearing disorders in adults and children, as well as conditions that result in hearing loss. Course includes clinical observation and extensive hands-on experience with clinical techniques. Prerequisite: SPLH 663. LEC.

SPLH 571. Introduction to Speech-Language Pathology. 4 Hours. U. This course provides training in clinical management of communicative disorders in children and adults. Principles of evaluation, application of diagnostic information, intervention planning, intervention process, data collection and application, report writing, and interactions with parents and other professionals are examined. Participation in observation and laboratory activities is required. LEC.

SPLH 660. Research Methods in Speech-Language-Hearing. 3 Hours. AE61. Research Methods is about the methods used to conduct, describe, and evaluate science in communication disorders. Goals for learner outcomes include: 1) evaluation of research including adequacy of research to address scientific and clinical problems, 2) reading, summarizing and describing research through a literature review, 3) describing a hypothetical research study that addresses a specific question or hypothesis identified by the student, and 4) providing constructive peer reviews of research paper drafts. Prerequisite: 9 credits of SPLH course work; English 101 and ENGL 102 (or course meeting core skill in written communication); or consent of instructor. LEC.

SPLH 670. Beginning Clinical Practice in Audiology. 1-3 Hours. N. Testing of hearing using pure tone air and bone conduction tests with both normal and hearing-impaired individuals. Prerequisite: Completion of or concurrent enrollment in SPLH 668. FLD.

SPLH 672. Clinical Practice in Speech-Language Pathology. 3 Hours. S. Clinical practice with children and adults. Group and individual conferences with staff required. Repeatable once for credit. Prerequisite: SPLH 671 and overall GPA of 3.0. FLD.

SPLH 699. Speech-Language Pathology. 3 Hours. S. Concepts and principles relevant to the perception of speech with emphasis on the auditory system; acoustics, psychophysical methods, and basic subjective correlates of speech perception. Prerequisite: SPLH 662 and SPLH 663, or consent of instructor. LEC.

SPLH 761. Aural Rehabilitation. 3 Hours. Study of the communication problems associated with hearing loss. Introduction to aural habilitative intervention related to speech, language, and academic achievement in children with early hearing loss, as well as, communication strategies training for adults with acquired hearing loss. Prerequisite: SPLH 669 or equivalent. LEC.

SPLH 764. Seminar in: _____. 1-3 Hours. The subject matter of this seminar will be special topics from speech pathology and audiology. Special prerequisite may be established for a given topic. LEC.

SPLH 784. Proseminar in Communication and Aging. 1 Hour. A weekly forum for students and faculty to discuss professional issues and interdisciplinary research in communication and aging. May be repeated for credit. (Same as COMS 784.) (Same as PSYC 784.) Prerequisite: Consent of instructor. LEC.

SPLH 799. Proseminar in Child Language. 2 Hours. A review and discussion of current issues in children's language acquisition. May be repeated for credit. Students are graded S/F. (Same as ABSC 797, LING 799 and PSYC 799.) (Formerly HDFL 797.) LEC.

SPLH 816. Language Development. 3 Hours. Study of language acquisition in children, including the morphologic, syntactic, and semantic components. Methods of language measurement, the role of comprehension, and pragmatic aspects of language use will be included. Not open to students who have credit for SPLH 566. Laboratory by appointment. LEC.

SPLH 820. Developmental Phonological Disorders. 2 Hours. Focuses on speech and non-speech characteristics of children with developmental phonological disorders. Emphasis placed on collection and phonetic transcription of speech samples, phonological analysis of transcribed data, and decision-making processes in assessment and intervention. LEC.

SPLH 822. Dysarthria/Apraxia. 2 Hours. This course describes the neuroanatomic bases of motor-speech processes, the diagnosis, classification, assessment, prognosis, and treatment of dysarthria(s) and apraxia(s). LEC.

SPLH 824. Fluency Disorders. 2 Hours. The nature of stuttering in children and adults is discussed. Theories regarding etiology, development, and maintenance of the disorder are presented. Emphasis is placed on various clinical approaches to assessment, measurement, and treatment. LEC.

SPLH 826. Phonicatory Disorders. 2 Hours. This course reviews the function of the laryngeal and respiratory mechanisms including the parameters and processes of phonation.
Primary content addresses diagnosis, description, and treatment of organic and non-organic disorders of phonation. LEC.

**SPLH 828. Speech Disorders in Special Populations. 2 Hours.**
This course reviews anatomy and physiology of the velopharyngeal mechanism. Diagnosis and management of velopharyngeal dysfunction and associated problems considered. Anatomy, physiology, and rehabilitation associated with certain oral, pharyngeal, and laryngeal abnormalities discussed. Emphasis is on the speech problems of adults following medical management. Populations include individuals with laryngectomies, glossectomies, and tracheotomies. LEC.

**SPLH 832. Dysphagia. 2 Hours.**
This course covers normal and disordered swallowing. Evaluation and treatment of swallowing disorders, the dysphagia team, and dysphagia in special populations are considered. LEC.

**SPLH 836. Genetics of Communication and Learning Disorders. 2 Hours.**
This course focuses on the description, assessment, and treatment of communication problems associated with particular genetic syndromes (e.g., Down's, Turner's syndromes). Also covered are current data about the genetic factors involved in nonsyndromic communication and learning problems, such as those commonly seen in the schools. Ethical and practical issues in these areas are discussed. LEC.

**SPLH 840. Language Disorders of Children: Infants and Toddlers. 2 Hours.**
This course examines factors relating to language disorders in the birth to three population. At-risk populations, as well as those with known etiologies, are considered. Information on assessment, intervention, and service delivery models is addressed. Issues relating to Public Law 99-457 are also examined. LEC.

**SPLH 842. Language Disorders of Children: Preschool. 2 Hours.**
This course examines language disorders of preschool-age children in the late preschool years. The course includes information on incidence, characteristics, assessment, and intervention. Theoretical issues and their implication for language intervention are also examined. LEC.

**SPLH 844. Language Disorders of Children: School Age. 2 Hours.**
This course examines language development during the school years and how problems in this development interact with school performance. Emphasis is placed on the role of the speech-language pathologist in the early identification, assessment, and remediation of language-learning problems. LEC.

**SPLH 846. Language Disorders of Adults. 2 Hours.**
Neurological aspects of language processes, classification of aphasia, and assessment of language deficits are discussed. Management approaches including intervention strategies and rehabilitation are also considered. LEC.

**SPLH 848. Language Disorders of Special Populations. 2 Hours.**
This course focuses on the unique language impairments of individuals with mental retardation, autism, cerebral palsy, hearing impairments, dual sensory impairments, and other communication disorders (e.g., ADD). Language characteristics as well as assessment and intervention strategies are studied. LEC.

**SPLH 850. Language Disorders Secondary to Closed Head Injury and Dementia. 2 Hours.**
Neuroanatomy and physiology relevant to diffuse brain injury are discussed. Characteristics and intervention strategies relating to traumatic brain injury and dementia are studied. LEC.

**SPLH 852. Augmentative and Alternative Communication. 2 Hours.**
This course describes augmentative and alternative communication (AAC) assessment and intervention issues as they apply to children and adults with both congenital and acquired speech and/or language disabilities. Areas of study include AAC systems, assessment strategies and procedures, intervention strategies, and AAC information resources. LEC.

**SPLH 854. Reading Disorders. 2 Hours.**
This course addresses the perceptual, linguistic, and cognitive processes utilized in written communication. Acquired and developmental disorders of written language are examined in relation to issues concerning characteristics, etiology, early identification, assessment, and remediation. LEC.

**SPLH 860. Evaluation of Speech and Language. 2 Hours.**
Provides a general framework for speech and language evaluations. Issues related to initiation and termination of treatment are discussed. Practice is provided in evaluating norm- and criterion-referenced information used in diagnostic, referral, and treatment decisions. LEC.

**SPLH 861. Seminar in Research Methodology in Speech Pathology and Audiology: _____, 3 Hours.**
This seminar is concerned with the design, instrumentation, execution, and reporting of research in audiology and speech pathology. SPLH 760 or its equivalent and some statistics are recommended before entering this seminar. LEC.

**SPLH 862. Clinical Processes. 1 Hour.**
Orients student to clinical procedures, policies, requirements, and expectations of program. Therapy models, planning, and philosophies are discussed along with implementation and evaluation of therapy procedures. Professional issues are also considered. May be repeated for credit. LEC.

**SPLH 864. Advanced Clinical Practice in Speech-Language Pathology. 1-6 Hours.**
Students conduct supervised clinical work in a variety of settings. May be repeated for credit. Prerequisite: Department approval. Group and individual conferences with staff required. FLD.

**SPLH 866. Field Study in Speech-Language Pathology. 5-12 Hours.**
The field study provides work experiences in clinical and/or research activities. The student takes this course near the end of the degree program. Assignments include supervised work in a variety of approved settings. May be repeated for credit. Prerequisite: Advisor's consent. FLD.

**SPLH 868. Professional Seminar. 1 Hour.**
Forum for the presentation and discussion of scientific and professional issues by faculty and advanced graduate students. May be repeated for credit. LEC.

**SPLH 874. Research Practicum. 1-3 Hours.**
Application of research methodology in a laboratory situation. Emphasis is on direct participation in designing and conducting an experimental investigation in speech, language, or hearing. May be repeated for up to a maximum of 3 credits. Prerequisite: SPLH 660 or equivalent research methods course. RSH.

**SPLH 876. Independent Study in Problems of Speech, Language, and Hearing. 1-6 Hours.**
Investigation of special topics by individual master's level students. Paper required. Prerequisite: Consent of instructor. RSH.

**SPLH 880. Seminar in Speech-Language Pathology: _____, 1-3 Hours.**
May be repeated for credit. LEC.
SPLH 898. Investigation and Conference (For Master's Candidates). 1-8 Hours.
(Limited to eight hours credit toward the M.A. degree.) Directed research and experimentation for M.A. students in some phase of speech science. RSH.

SPLH 899. Master's Thesis. 1-6 Hours.
THE.

SPLH 900. Proseminar in Communicative Disorders. 1 Hour.
A weekly forum for students and faculty to discuss professional issues and interdisciplinary research in communicative disorders and related fields. May be repeated for credit. Limited to two hours credit counted toward an MA or AuD degree. Limited to four hours credit counted toward the PhD degree. Graded on satisfactory/unsatisfactory basis. SEM.

SPLH 961. Experimental Phonetics I. 3 Hours.
This course will provide a description of the acoustic properties of the major classes of speech sounds, and will describe how these properties are utilized perceptually. It will also provide an understanding of the acoustic theory of speech production, and will discuss the implications of that theory relative to the modification of impaired speech. LEC.

SPLH 962. Experimental Phonetics II. 3 Hours.
This course will examine the current methodologies utilized in speech physiology research, and will review the findings of recent research into the movement patterns of individual speech articulators. The course will emphasize the interpretation of individual research results in terms of an overall theory of speech motor timing and control. LEC.

SPLH 963. Seminar in Hearing Science. 3 Hours.
Considers more advanced research problems in hearing science including psychoacoustics, speech perception, physiology. Prerequisite: Consent of instructor. LEC.

SPLH 964. Seminar in: ______. 1-3 Hours.
The subject matter of this seminar will be special topics from speech pathology and audiology, including those related to research methodology and research or academic careers. Special prerequisites may be established for a given topic. LEC.

SPLH 966. Seminar in Language Development. 3 Hours.
The course pertains to relevant research regarding infant speech development, vocabulary development, linguistic development, articulation development, and language retardation. (Same as ABSC 920, formerly HDFL 920.) LEC.

SPLH 967. Seminar in Articulation. 3 Hours.
Research and important clinical procedures pertaining to discrimination, structural, and physiological considerations, causal factors in defective articulation, and principal therapeutic approaches are carefully examined. LEC.

SPLH 968. Seminar in Communication Disorders. 3 Hours.
Study in depth of the communication behavior associated with brain injury and/or oral anomalies. LEC.

SPLH 969. Laboratory Instrumentation for Speech and Hearing Research. 3 Hours.
Instruments for speech and hearing research, their design and application. Experimental projects using laboratory equipment. Designing equipment for special purposes. Prerequisite: SPLH 962, FLD.

SPLH 970. Independent Study in Problems of Speech and Hearing. 1-6 Hours.
Investigation of special topics by individual students. Paper required. RSH.

SPLH 972. Extensions of Clinical Management. 3 Hours.
This course is designed to provide didactic and practical experience in methods of obtaining diagnostic information and generalization of speech and language responses away from the clinical setting. Models for effecting behavioral change and data collection will be discussed and utilized. FLD.

SPLH 974. Research Practicum. 1-6 Hours.
Application of research methodology in a laboratory situation. Emphasis is on direct participation in designing and conducting an experimental investigation in speech or hearing. FLD.

SPLH 975. Directed Teaching: Speech Pathology and Audiology. 1-3 Hours.
Provides experiences in classroom and laboratory instruction under supervision of graduate faculty. Variable credit to reflect amount of instructional responsibility assumed. May be repeated up to a maximum of six semester hours. FLD.

SPLH 976. Independent Study in Grant Writing. 1-3 Hours.
Students will identify a funding agency appropriate for their research, learn the application procedures for that agency, and draft a grant application following the identified agency's format. The faculty mentor will arrange for a review of the grant application following the agency's review criteria and format. May be repeated up to a maximum of three credits. IND.

SPLH 982. Issues in Scientific Conduct. 3 Hours.
Lectures and discussion on issues in the conduct of a scientific career, with emphasis on practical topics of special importance in behavioral science. Topics will include the academic and scientific roles of behavioral scientists, establishing a research lab, communicating research findings, tenure processes, gender equity, ethical conduct, and good scientific citizenship. Discussions will highlight important case studies. (Same as PSYC 982.) LEC.

SPLH 998. Investigation and Conference (For Doctoral Candidates). 1-8 Hours.
(Limited to eight hours credit towards the Ph.D. degree.) Directed research and experimentation for Ph.D. students in some phase of speech science. RSH.

SPLH 999. Doctoral Dissertation. 1-12 Hours.
THE.

Bachelor of Arts and Bachelor of General Studies in Speech-Language-Hearing

Why study speech, language, and hearing?

Because communication is central to human behavior, and the treatment of communication disorders requires specialized knowledge and skills.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the
Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

### Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

### First- and Second-Year Preparation

Both the B.A. and the B.G.S. aspirant should fulfill the College general education requirements. Students also should complete SPLH 120, SPLH 261, SPLH 320, SPLH 465, SPLH 466, SPLH 463, and elective courses in human physiology, psychology, and linguistics during their first 2 years. Faculty members can help students select appropriate course work.

### Requirements for the B.A. or B.G.S. Major

#### Speech-Language-Hearing Prerequisite or Co-Requisite Requirements (0)

Majors must complete this requirement, however, these hours do not contribute to the minimum number of hours required for the major.

- Mathematics. Satisfied by one of the following:
  - MATH 101 College Algebra
  - MATH 104 Precalculus Mathematics
  - Or upper-level placement
- Statistics. An introductory statistics course (PSYC 210, MATH 365) is recommended.

#### Speech-Language-Hearing Introductory Knowledge (17)

Majors must complete a course in the following areas (recommended within first and second year):

- The Physics of Speech. Satisfied by:
  - SPLH 120 The Physics of Speech
- Survey Communication Disorders. Satisfied by:
  - SPLH 261 Survey of Communication Disorders
- The Communicating Brain: The Ultimate Personal Computer. Satisfied by:
  - SPLH 320 The Communicating Brain: The Ultimate Personal Computer
- Language Science. Satisfied by:
  - SPLH 466 Language Science
- Fundamentals of Clinical Phonetics. Satisfied by:
  - SPLH 465 Fundamentals of Clinical Phonetics
- Principles of Hearing Science. Satisfied by:
  - SPLH 463 Principles of Hearing Science

#### Speech-Language-Hearing Core Knowledge and Skills (18)

Majors must complete a course in the following areas:

- Language Sample Analysis Laboratory. Satisfied by:
  - SPLH 565 Language Sample Analysis Lab
- Language Development. Satisfied by:
  - SPLH 566 Language Development
- Research Methods in Speech-Language-Hearing. Satisfied by:
  - SPLH 660 Research Methods in Speech-Language-Hearing
- Principles of Speech Science. Satisfied by:
  - SPLH 462 Principles of Speech Science
- Introduction to Audiological Assessment & Rehabilitation. Satisfied by:
  - SPLH 568 Introduction to Audiological Assessment and Rehabilitation
- Introduction to Speech-Language Pathology. Satisfied by:
  - SPLH 571 Introduction to Speech-Language Pathology

#### Further Speech-Language-Hearing Study (0)

After completing the requirements, students with grade-point averages of 3.0 or higher may enroll in any one of the following:

- SPLH 670 Beginning Clinical Practice in Audiology
- SPLH 672 Clinical Practice in Speech-Language Pathology

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

#### Major Hours

Satisfied by 35 hours of major courses.

#### Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior Hours

Satisfied by a minimum of 28 hours from junior/senior courses (300+) in the major.

#### Major Junior/Senior Graduation GPA

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

A sample 4-year plan for the BA degree in Speech-Language-Hearing can be found here: Speech-Language-Hearing (p. 2041), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Speech-Language-Hearing will be coming soon.

### Departmental Honors

The honors program offers exceptional undergraduates the opportunity to work closely with individual faculty members on scholarly projects over an extended period of time. Students are admitted to the program and matched with faculty through an application process that occurs each semester during course enrollment. Contact the Honors Coordinator for details. The following are required:

1. A grade-point average at graduation of at least 3.25 overall and of 3.5 in the major.
2. Completion of 6 to 8 credit hours in SPLH 498 Departmental Honors Research. Students work under the direction of a faculty member. Students may change areas of interest or faculty supervisors at the beginning of a semester with the consent of the honors coordinator. In the final semester of SPLH 498 enrollment, students also must...
complete a written report or public oral presentation detailing the purpose, methods, results, and impact of the research. Academic credit but no honors designation is given to students who meet the requirements for any semester but do not complete all requirements for departmental honors.

**BA in Speech-Language-Hearing**

Below is a sample 4-year plan for students pursuing the BA in Speech-Language-Hearing. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

Total Hours: 16-16

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (http://college.ku.edu/undergrad/curriculum/ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. SPLH 120, SPLH 320, and SPLH 463 are preq-requisites for SPLH 568.
4. SPLH majors are recommended to take SPLH 498/499, AUD 550, or SPLH 670/672. (SPLH 670 and 672 require completion of major requirements and 3.0 GPA or higher.)

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Minor in Speech-Language-Hearing**

**Why study speech, language, and hearing?**

Because communication is central to human behavior, and the treatment of communication disorders requires specialized knowledge and skills.

**Requirements for the Minor**

**Speech-Language-Hearing Minor Course Requirements (15)**

Students selecting this minor must complete the following:

- Survey Communication Disorders. Satisfied by:
  - SPLH 261 Survey of Communication Disorders 3
Speech-Language-Hearing Required Electives. Satisfied by at least 4 12 SPLH courses (12 hours) from the following:

Courses with clinical content can be taken as directed study with the permission and support of a faculty mentor.

**Minor Hours & Minor GPA**

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Master of Arts in Speech-Language Pathology**

**MA in SLP Overview**

The master’s degree in speech-language pathology strives to produce highly skilled clinicians seeking to enter field and is typically completed in 5 full-time semesters, including a summer semester. Exceptions may occur for the student who has a number of prerequisites to complete or one who extends his/her program for additional thesis or course work. A master’s degree from KU will, in most circumstances, satisfy the American Speech-Language Hearing Association (http://www.asha.org)’s certification standards for continuing on to the clinical fellowship year. A certificate of clinical competence in speech-language pathology is awarded upon completion of a successful clinical fellowship.

**Eligibility and Requirements**

**Undergraduate Degree**

A bachelor’s degree with a cumulative 3.0 GPA on all college courses taken is required. It is expected that students will have obtained a broad general education to serve as a background prior to graduate study. Ideally students will have completed an undergraduate degree in speech pathology or a related field that will include the prerequisite course work listed below. Alternatively, students with an undergraduate degree in an outside field can be provisionally admitted under certain circumstances, as detailed below.

**Prerequisite Course Work**

At least 34 credits in speech pathology study (or equivalent courses), with minimum 3.25 GPA, is required on the following (or similar) courses:

**Clinical Prerequisites**

Students are required to have completed 25 clock hours of directed clinical observation before beginning graduate clinical practicum. If observation hours are needed, those will be provided during the first semester of enrollment in the program.

**Graduate Record Examination**

Official scores from the Graduate Record Examination must be submitted prior to admission. The following are minimal acceptable scores: GRE Verbal: 146 (revised scoring system) or 400 (old scoring system); GRE Quantitative: 144 (revised scoring system) or 400 (old scoring system); GRE Analytical Writing: 3.5. Students should keep in mind multiple factors are considered in admissions decisions in addition to GPA and GRE scores.

**Individual Qualities**

In addition to strong academic training and achievement, the program values diversity, leadership skills, clinical experience, and interpersonal expertise. Speech-language pathologists need to work effectively with clients and other professionals and take a lead role in advocating for their clients and the discipline. The admissions committee evaluates potential in this area through review of each student’s resume, personal statement, and letters of reference.

**Additional Requirements**

**Background Check**

The Joint Commission on Accreditation of Healthcare Organizations requires all incoming students to pay for a background check (http://www.kumc.edu/school-of-health-professions/background-checks-and-drug-screening-for-students.html). This one-time fee must be paid directly to the company performing the background investigation. You will be asked to provide information and make the payment once you have been officially accepted into the program. For more information, please see the School of Health Professions Background Check Instructions. (http://www.kumc.edu/school-of-health-professions/background-checks-and-drug-screening-for-students.html) A drug screening is required of all students participating in clinical settings.

**Technical Standards and Accommodations**

Please read the program technical standards (http://www.kumc.edu/school-of-health-professions/ipcd/speech-language-pathology-%28ma%29/technical-standards.html) carefully. Signed verification will be required of students after they have been accepted. Reasonable accommodations will be made for any accepted student who has a documented disability and can meet program expectations. Applicants with documented disabilities can request reasonable accommodations if needed during the admissions process.

**International Students:**

An applicant is considered an international student if he or she requires a visa, or currently resides in the U.S. with non-immigrant status, or currently resides in the U.S. while applying for permanent residency. Additional requirements and documentation, such as proof of English language proficiency, are required for international students to become eligible for KU programs. Please visit the KU Office of International
Student Services before applying. Read more: information for international students in the School of Health Professions. (http://www.kumc.edu/school-of-health-professions/information-for-international-applicants.html)

About Provisional Admission

Individuals who have not completed undergraduate prerequisite coursework in communication sciences and disorders may apply and may be admitted on a provisional basis if he or she has exceptionally strong academic credentials. The criteria for provisional admission include the following

1. General acceptability for admission to the program
2. Minimum overall undergraduate GPA of 3.7
3. Minimum GRE scores: Verbal 153 (revised scoring system) or 500 (old scoring system), Quantitative 148 (revised scoring system) or 590 (old scoring system)

Please note: Applicants meeting the above criteria are not guaranteed acceptance into the program.

For complete admission requirements please visit the IPCD website (http://www.kumc.edu/school-of-health-professions/ipcd/phd-programs.html).

Graduate Admission

Submit your graduate application online (http://graduate.ku.edu/application-process).

Contact ipcd@ku.edu (acarrasco@kumc.edu) with any questions.

Requirements for the M.A. Degree with a Major in Speech-Language Pathology

Prerequisite

• An acceptable bachelor’s degree
• 35 hours of credit in speech-language-hearing, including SPLH 120, SPLH 261, SPLH 320, SPLH 465, SPLH 466, SPLH 565, SPLH 566, SPLH 660, SPLH 462, SPLH 463, SPLH 568, and SPLH 571, or their equivalents
• 20 hours of credit in allied fields, including courses in physiology, linguistics, and psychology

Degree Requirements

The program requires 35 credit hours of experiences for breadth and an additional 12 to 16 hours for depth.

Required Graduate Experiences for Breadth (35)

Program without thesis

The non-thesis program has the same degree requirements as those described above for the M.A., except that the thesis is replaced with a minimum of 3 credits of additional research-related coursework, a research practicum experience, or an independent study course. The latter 2 options may include independent research projects or on-going laboratory activities.

Requirements for the M.S. in Education Degree with a Specialization in Deaf Education

For information, see Special Education (p. 450) in the School of Education section of the online catalog.

Doctor of Philosophy in Speech-Language Pathology or Audiology

The Intercampus Program in Communicative Disorders offers Ph.D. programs in both speech-language pathology and in audiology for post-baccalaureate study of normal and disordered aspects of communication. These programs are designed to prepare suitably qualified individuals for leadership positions in research and academia. A major focus of these programs is to advance the science of these fields, and to elucidate the scientific basis for the procedures and processes used in clinical practice.

A combined Au.D./Ph.D. track also is available. This track facilitates the completion of both degrees in a 6-year post-baccalaureate period. Students who wish to earn both Au.D. and Ph.D. degrees should contact their advisor.

Eligibility and Requirements

1. Undergraduate Degree

A bachelor’s degree with a cumulative 3.0 GPA is required. It is expected students will have obtained a broad general education to serve as a background prior to graduate study. Ideally students will have completed an undergraduate degree in speech pathology, audiology, or a related field that will prepare them for advanced study in their chosen area of focus. Students may have completed a
graduate degree in speech pathology, audiology, or related field but this is not required to pursue a Ph.D.

Degrees earned outside the United States must be evaluated for equivalency.

Please note: students may be accepted on a provisional admission basis if some requirements have not yet been met at the time of application.

2. Graduate Record Examination Score
An official score on the Graduate Record Examination (GRE) General Test is required and official results must be sent directly to the KU office. Recommended scores for the sections of the GRE are 300 combined total for Verbal and Quantitative, and 3.5 and above for Analytical Writing. For GRE information, visit www.gre.org (http://www.gre.org).

3. Grade Point Average
To pursue the PhD program, the applicant must meet the general KU requirements for admission as a graduate student. The minimum GPA requirements for admission to the Ph.D. program are as follows:

a. An undergraduate cumulative GPA of 3.0 or better is required for regular admission status.

b. Evidence of successful completion (equivalent grade of B or higher) of undergraduate or graduate course work relevant for advanced study in the student’s chosen area of focus.

4. Prior Research Engagement
The Ph.D. is a research degree where students pursue an individualized plan of study. Therefore, it is recommended students engage in research prior to applying to the Ph.D. program. Prior research engagement helps the prospective student identify the area of focus for PhD study and allows the admissions committee to evaluate potential aptitude for PhD study. A wide array of research engagement will be considered (e.g., employment on research grants, mentored research projects, research related course work).

5. PhD Program Mentor
Because PhD students pursue an individualized plan of study, a faculty mentor is a critical requirement of the program. Without a good match between the applicant’s interest and the faculty, even well-qualified applicants can be denied admission into the program.

Potential applicants should investigate by (1) reviewing faculty bio and laboratory information on this website, and (2) reading recent research articles written by KU faculty. Applicants are strongly encouraged to contact faculty who may be a good match to their interests prior to applying.

Within the guidelines established by Graduate Studies, no credit is actually transferred toward the doctorate; however, relevant prior graduate work will be taken into consideration in setting up individual programs of study leading to the Ph.D.

International Students:
An applicant is considered an international student if he or she requires a visa, or currently resides in the U.S. with non-immigrant status, or currently resides in the U.S. while applying for permanent residency. Additional requirements and documentation, such as proof of English language proficiency (http://iss.ku.edu/send-test-scores), are required for international students to become eligible for KU programs. Please visit the KU Office of International Student Services before applying.

More:
Information for international students in the School of Health Professions. (http://www.kumc.edu/school-of-health-professions/information-for-international-applicants.html)

English proficiency verification and KU’s Applied English Center (https://aec.ku.edu/english-proficiency-requirements)

For complete admission requirements please visit the IPCD website (http://www.kumc.edu/school-of-health-professions/ipcd/phd-programs.html).

Graduate Admission
Submit your graduate application online (http://graduate.ku.edu/application-process).

Contact ipcd@ku.edu (acarrasco@kumc.edu) with any questions.

Upon admission, the student and his or her adviser choose a doctoral advisory committee. The committee is responsible for guiding the student’s progress through the selected program of study.

Incoming students who have not completed a substantive graduate research project (e.g., a master’s thesis, Au.D. research project, etc.) must initiate a thesis-equivalent research project, under the direction of a three-member committee, during the first year of enrollment. This project must be completed before the comprehensive oral examination.

Acquiring a doctorate in speech-language pathology or audiology at a minimum requires the following:

- Completion of academic coursework
- Satisfactory completion of a dissertation including written and oral comprehensive examinations
- Satisfactory performance on annual reviews
- Completion of a preliminary research experience
- Satisfactory completion of a dissertation including written and oral prospectus, and written dissertation and oral defense of the dissertation
- Submission of the dissertation to the KU Office of Graduate Studies

Note that the above are the MINIMUM requirements. Each student’s plan of study will vary depending on entry skills (i.e., relevant knowledge and skills acquired through prior training, work or research experience), chosen specialization, and career aspirations.

Students in this program must meet the general requirements of the university including the research skills and responsible scholarship requirement (https://documents.ku.edu/policies/Graduate_Studies/Research_Skills_and_Responsible_Scholarship.htm) and fulfill the basic program requirements to receive the Ph.D. degree.
Different entry paths: Students with undergraduate, but not graduate, degree
Students without a master's degree have several options in pursuing the Ph.D. degree. Some decide to pursue a research emphasis plan of study. Others opt to work on clinical certification in the speech-language pathology or audiology programs while also in the Ph.D. program. This combined degree track involves a higher course load. Details may be found in the Ph.D. student handbook.

Students entering the Ph.D. program with a graduate degree will complete the Ph.D. program requirements outlined in the curriculum on this page, with some adjustments based on relevant skills acquired during prior graduate study.

Department of Women, Gender and Sexuality Studies

Why study women, gender and sexuality studies?
Because much of what people think they know about women, gender, and sex is myth.

Undergraduate Programs

Women, gender, and sexuality studies offers an interdisciplinary program of courses with primary or significant emphasis on women. Courses are offered by the department or are cross-referenced with the department.

Graduate Programs

The Department of Women, Gender and Sexuality Studies supports interdisciplinary research on topics pertaining to women, gender, and sexuality and administers an interdisciplinary program leading to a graduate certificate and a Ph.D. degree. Additional cross-referenced courses are available to complete requirements for the graduate certificate and doctoral degree. Students may pursue the graduate certificate in addition to a KU graduate degree or as a standalone program.

Courses

WGSS 101. Introduction to Women, Gender, and Sexuality Studies. 3 Hours. SC AE41/GE3S / S.
This course examines the extensive role of gender in human life and examines the ways that gender structures power relations among individuals and within economic, political, educational and other social structures, with special attention paid to women's issues and movements in the United States and globally. Through readings drawn from the fields of women's studies, gender studies, and sexuality studies, this course examines and explores alternatives to traditional and/or normative constructions of gender and sexuality, and also considers other markers of difference, such as disability, race, class, and religion, which intersect with gender identity and sexual identity. Similar in content to WGSS 201. Open only to students in the University Honors Program or by consent of the instructor. LEC.

WGSS 177. First Year Seminar: ____. 3 Hours. GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Women, Gender and Sexuality Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

WGSS 196. Study Abroad Topics in: ____. 1-6 Hours. S.
This course is designed for the study of special topics in Women's Studies. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

WGSS 301. Research Methods in Women, Gender and Sexuality Studies. 3 Hours. S.
This course explores feminist epistemologies and research methods. It focuses on research design, feminist critiques of dominant theories of knowledge, and the major methodologies employed in the social sciences and humanities. Prerequisite: WGSS 101. LEC.

WGSS 317. African American Women: Colonial Era to the Present. 3 Hours. H.
This interdisciplinary course covers the history of African American women, beginning in West and Central Africa, extending across the Middle Passage into the Americas, and stretching through enslavement and freedom into the 21st century. The readings cover their experiences through secondary and tertiary source materials, as well as autobiographies and letters, plays and music, and poems, novels, and speeches. (Same as AAAS 317, AMS 317, and HIST 317.) LEC.

WGSS 320. From Goddesses to Witches: Women in Premodern Europe. 3 Hours. HT GE11/GE3H / H.
This course examines the social, cultural, and political contexts of women's spirituality and their relations to gender relations in Europe from about 30,000 B.C.E. to the 16th century Protestant Reformation. Lectures move both chronologically and topically, covering such subjects as goddess-worshipping cultures, women's roles in Christian and Jewish societies, symbols of women, and male attitudes toward women. Students will be able to participate in weekly discussions of primary and secondary source readings about women. (Same as HIST 320.) LEC.

WGSS 321. From Mystics to Feminists: Women's History in Europe 1600 to the Present. 3 Hours. HT AE42/GE11/GE3H / H.
This survey of women's history in Europe looks at changing patterns of women's economic roles and family structures in preindustrial and industrial society, the importance of women in religious life, cultural assumptions underlying gender roles, and the relationship of women to political movements, including the rise of feminism. (Same as HIST 321.) LEC.

WGSS 324. History of Women and the Body. 3 Hours. H.
This course examines different notions about women and their bodies from a historical perspective. It discusses the arguments and circumstances that have shaped women's lives in relation to their bodies, and women's responses to those arguments and circumstances. This course covers a wide geographical and chronological spectrum, from Ancient societies to the present, from Latin America and the Middle East, to North America and Western Europe. (Same as HIST 324.) LEC.
WGSS 327. Perspectives in Lesbian, Gay, Bisexual, and Transgender Studies. 3 Hours. AE41 / S.
An exploration of the experiences and histories of people who identify as lesbian, gay, bisexual, and/or transgender (LGBT); of the influences on these experiences by individuals, the state, and legal and medical discourses; and of the intersections between sexual orientation, sexuality, ethnicity, class, and religion. LEC.

WGSS 330. Women in Contemporary African Literature. 3 Hours. NW AE42/GE3H / H.
A critical study of issues and questions raised about women in contemporary African literature and implications for the larger society through the analysis of theme, language, characterization, roles and functions of women in selected works. (Same as AAAS 340.) LEC.

WGSS 333. The Politics of Physical Appearance. 3 Hours. AE41/GE11 / S.
An interdisciplinary analysis of standards of physical attractiveness and cultural conceptions of women's bodies. Includes analysis of how these standards change across time and cultural groups, and of the impact of these standards on women as individuals and on social and political outcomes. LEC.

WGSS 335. History of Jewish Women. 3 Hours. H.
This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women's gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women's lives in both Jewish and non-Jewish society. There are no prerequisites for this course. (Same as HIST 335, JWSH 335.) LEC.

WGSS 345. Popular Culture in Africa: Spiritual Thrills, Romance and Sexualities. 3 Hours. H.
This course examines how the different constituents of popular culture mobilize, construct and structure gender, and spiritual and sexual identities in select contemporary African countries. Discussions also focus on how popular culture mediates the contesting spaces of indigenous local constructs and the push and pull of global forces to create geographic and contemporary specificities. (Same as AAAS 345.) LEC.

WGSS 351. Women and Leadership: The Legislative Process. 3 Hours. S.
Examines current and historical roles and impacts of women involved in legislatures. Explores what difference women make when they are public officials. Students meet with local women legislators, lobbyists and political officials. Students learn how to analyze issues, access power, lobby, and organize at the grassroots. The course is designed to prepare students for an optional legislative internship during the subsequent semester. LEC.

WGSS 363. Gendered Modernity in East Asia. 3 Hours. S.
This course explores rapidly changing gender relationships and the sense of being "modern" in East Asia by examining marriage and family systems, work, education, consumer culture, and geopolitics. The class seeks to understand how uneven state control over men and women shapes desires, practices, and norms and how men and women act upon such forces. Avoiding biological or social determinism, this course treats gender as an analytical category and examines how modern nation-states and global geopolitics are constituted and operated. (Same as ANTH 363 and EALC 363.) LEC.

WGSS 381. Feminism and Philosophy. 3 Hours. AE41/GE3H / H.
An examination of topics of philosophical interest that are important in the feminist movement such as the nature of sexism, the concept of sexual equality, the ethics of sexual behavior, the nature of love, feminist analyses of the value of marriage and family, the ethics of abortion and justifications for preferential treatment of women. (Same as PHIL 381.) LEC.

WGSS 389. The Anthropology of Gender: Female, Male, and Beyond. 3 Hours. NW AE42/GE21/GE3H/GE3S / S.
This course will introduce students to cultural constructions and performances of masculinity, femininity, and alternative genders across time and space. Topics and cases will be drawn from primarily non-Western cultures, ranging from Japanese markets to Pacific Rim gardens, and from Haitian voudou to Maya royal politics. This course uses research by anthropologists, linguists, biological anthropologists, and sociocultural anthropologists. (Same as ANTH 389.) LEC.

WGSS 396. Studies in: ______. 3 Hours. H.
The interdisciplinary study of selected and different aspects of women's studies in different semesters. LEC.

WGSS 397. Study Abroad Topic in: ______. 1-6 Hours.
This course is designed for the study of special topics in Women's Studies at the junior/senior level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

WGSS 430. Skin, Sex, and Disease. 3 Hours. H.
This course explores the complex historical relationships between gender, race, health, sickness, and oppression over time. Students examine the impact race and gender have on structuring experiences of health, sickness and health care; and examine the political activism surrounding definitions and concepts of health. LEC.

WGSS 440. Communication and Gender. 3 Hours. AE41 / S.
Focuses attention on the relationship between communication and gender, including both physical and psychological dimensions. Topics include: sex role orientations and stereotypes; perceived and actual differences in verbal and nonverbal communication behaviors; the influence of gender on communication in a variety of contexts. (Same as COMS 440.) Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

WGSS 468. Psychology of Women. 3 Hours. S.
A survey of the psychological theories about women; similarities and differences in the behavior of women and men; the effects of biological and social factors on the behavior of women and men; and issues of concern to women of different races, sexual orientations, ages, and so forth. (Same as PSYC 468.) Prerequisite: PSYC 104 or WGSS 201. LEC.

WGSS 498. Independent Study. 1-3 Hours. S.
Intensive reading or research under faculty supervision culminating in the writing of a paper or research report. IND.

WGSS 499. Honors in Women, Gender and Sexuality Studies. 3 Hours. S.
An individual research project under the direction of a specialist in the area of the student's interest. May be counted towards the total hours required for the major. Prerequisite: Majors only, with approval of the project adviser and the Women, Gender and Sexuality Studies honors coordinator. IND.

WGSS 510. History of American Women: Colonial Times to 1870. 3 Hours. H.
A survey of women's history in the United States, which will consider women's roles as housewives, mothers, consumers, workers, and citizens in pre-industrial, commercial and early industrial America. (Same as AMS 510 and HIST 530.) LEC.
WGSS 511. History of American Women: 1870 to Present. 3 Hours. AE41 / H.
A survey of women's history in the United States, which includes radical and reform movements, the impact of war and depression, professionalization, immigration, women's work, and the biographies of leading figures in women's history. (Same as AMS 511 and HIST 531.) LEC.

WGSS 512. History of Women and Work in Comparative Perspective. 3 Hours. H.
This course explores the connection between historical changes in the labor process and the occupational choices available to women in different countries. Through discussion and analyses of texts, students will evaluate the construction of a gendered division of work as shaped over time by economic, cultural, and political forces. The chronological and geographical focus may vary depending on the instructor. (Same as AMS 512 and HIST 532.) LEC.

WGSS 513. Modern American Women in Film and Literature. 3 Hours. H.
Exploration of the images both real and ideal found in twentieth century popular culture. By using popular culture as social history, it examines the connections between these images and the life experiences of women in the family, at work, in war, and in economic depression. LEC.

WGSS 515. Gender and Sexuality in Greek Culture. 3 Hours. H.
This course explores various approaches to the study of gender and sexuality in Greek antiquity. Contents will vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as CLSX 515.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and "Sexuality Studies; or permission of instructor. LEC.

WGSS 516. Gender and Sexuality in Roman Culture. 3 Hours. H.
This course explores various approaches to the study of gender and sexuality in Roman antiquity. Contents vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as CLSX 516.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and "Sexuality Studies; or permission of instructor. LEC.

WGSS 521. Women and Violence. 3 Hours. S.
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. The nature, prevalence, causes, and consequences of violence against women are discussed. (Same as PSYC 521.) Prerequisite: PSYC 104. LEC.

WGSS 530. Sex and Gender in New Media. 3 Hours. S.
This course examines the construction of sexuality and gender in new media platforms. Students will explore how contemporary media platforms are used to rely on dominant representations, and produce new or alternative expressions of identity, culture or political engagement. LEC.

WGSS 549. History of Feminist Theory. 3 Hours. H.
This discussion course will cover the development of feminist theories from the late Middle Ages to the 1970s. Reading will include Pisan, Wollstonecraft, Mill, Freud, Woolf, Beauvoir, Friedan, Daly, Kristeva, and others. (Same as HIST 649.) LEC.

WGSS 560. Race, Gender, and Post-Colonial Discourses. 3 Hours. H.
An examination of the ways in which the concept of race, gender, and post-colonialism frame African literatures from the Caribbean, North America, and the continent itself. The course will focus on these discourses grounding them in critical frameworks within which they can be contextually analyzed and evaluated, at the same time examining their impact in literary praxis and theory. (Same as AAAS 560.) LEC.

WGSS 562. Women and Politics. 3 Hours. S.
This course exposes students to contemporary research on women and politics by surveying the sub-fields of political science. Topics include women's representation in the U.S., women and U.S. public policy, gender and legal theory, international women's movements, women and revolution, and women as political elites. We will examine the ways in which feminist theory and women's activism have challenged the narrow focus of the discipline as well as redefined women's place in society. (Same as POLS 562.) Prerequisite: A 100-level POLS course or WGSS 201 or permission of instructor. LEC.

WGSS 563. Gender, Sexuality and the Law. 3 Hours. AE41/GE11 / H.
This course provides a broad introduction to Western legal systems (especially the American legal system) and then focuses on how sex, gender, and sexuality operate in and are understood by those systems and how the law is a site of social and political struggle. Topics may include intimate relations, First Amendment law, sexual harassment and employment discrimination; reproduction policies and governance; rape and sexual assault; gender identity discrimination; and the legal understandings and constructions of equal protection and due process. No prior knowledge of legal concepts is necessary. LEC.

WGSS 565. Gender, Culture, and Migration. 3 Hours. H.
This course brings a human face to the 21st century manifestation of globalization by focusing on the issues of culture, gender and migration. How do these three aspects create the "global village" amongst both the host and donor peoples? When people move from one place to another, what do they leave behind, what do they take with them? What is gained, or lost by the host community? What is the impact of migration on a specific group's and individual's sense of identity? How has migration affected the people's construction, understanding, and practice of gender? Given their primary roles in the home and within the culture, these questions and more are posed with particular attention to women. Migration theories, interviews and personal testimonies as well as literary and dramatic works are critical to our analyses of the issues raised and enable us to hold conversations with, and listen to the stories of the ordinary people who make globalization happen and sustain it. (Same as AAAS 565 and AMS 565.) LEC.

WGSS 570. Men and Masculinities. 3 Hours. H.
An intensive examination of the history and theory of masculinities in the Western world. Students become acquainted with some of the key theories of men and masculinities, and develop research projects on a topic negotiated with the instructor. (Same as HIST 626, HWC 570.) Prerequisite: An upper-division course in HIST, HWC, or WGSS; or permission of instructor. LEC.

WGSS 575. Body, Self and Society. 3 Hours. H.
An intensive examination of the role of the human body in the creation of personal and social identities in the Western world. Students become acquainted with contemporary theories of embodiment and the senses as they are applied to a variety of historical themes, and develop research projects on a topic negotiated with the instructor. (Same as HIST 625, HWC 575.) Prerequisite: An upper-division course in HIST, HWC, or WGSS; or permission of instructor. LEC.

WGSS 580. Feminism and Anthropology. 3 Hours. S.
This seminar will introduce students to feminism in anthropology, including feminist theories, methodologies, ethnographic styles, and the history of women in the discipline since the late 1800s. Emphasis is on the social contexts for feminist theory-building since the 1960s and changing ideas about gender and power. (Same as ANTH 580.) Prerequisite: One of the
WGSS 583. Love, Sex, and Globalization. 3 Hours. S.
Escalating transnational flows of information, commodities, and people have created innumerable kinds of "intimate" contacts on a global scale, such as mail order brides, child adoption, sex tourism, commodified romance, and emotional labor. Exploring the ways that cultural artifacts of intimacy are rendered, fetishized, and reified in a free market economy, this course examines how discourses on love and sex encounter, confront, and negotiate the logics of the capitalist market, the discrepant narratives of (colonial) modernity, and the ethics of pleasure. In so doing, this course navigates the treacherous interplay among emotion-specifically love, sex, and money, seeking the potential and limits of cultural politics of emotions. (Same as ANTH 583.) LEC.

WGSS 600. Contemporary Feminist Political Theory. 3 Hours. S.
A detailed introduction to feminist thought post-1960. Examines feminism in relation to the categories of political theory: liberal feminism, socialist feminism, radical feminism, and postmodern feminism. Within these categories and separately, we will also consider feminism as it is influenced by women traditionally excluded from mainstream feminist thought, namely U.S. women of color and women of post-colonial societies. (Same as POLS 600.) Prerequisite: WGSS 201 or a 100-level POLS course or permission of instructor. LEC.

WGSS 662. Gender and Politics in Africa. 3 Hours. S.
This course is designed to explore the field of gender and African politics. We begin by paying particular attention to African women's political roles during the pre-colonial and colonial society. Next, we examine the impetus, methods, and path of liberation struggles and how gender roles were shaped, shifted, and changed during these struggles. The majority of the class focuses on current issues in African politics, including gender ideologies such as gender, racial, sexual orientation, and partisan, and the enduring importance of identity for understanding politics as well as the policy process. The approach is multidisciplinary but political science perspectives are relied on more heavily. (Same as POLS 662.) LEC.

WGSS 651. Women and Politics in Latin America. 3 Hours. S.
This course examines the ways in which Latin American women have engaged in politics in the past two decades. Cases will draw from a variety of countries in Latin America. Students are expected to develop insights, through comparative analysis, into why women "do politics" in certain ways, the role of the State in women's politics, the (dis)advantages of various political strategies, and the ways in which political, economic, and social changes over time have affected women's political opportunities and interests. (Same as POLS 651.) Prerequisite: Six hours of course work in Political Science and/or Women's Studies and/or Latin American Studies. LEC.

WGSS 652. Jazz and American Culture. 3 Hours. H.
This course considers cultural and social histories of jazz, from the 1920s through the present day, as sites for exploring ideological struggles over such fields as race, class, gender, sexuality, democracy, capitalism, freedom, community, Americaness, and globalization in the U.S. The course will explore such questions as the following: What music was called jazz at what times and places? What did it mean to whom? Who played it? Who wrote about it? Who listened to it? Who danced to it? Who policed it? Who produced it? Who used it to rebel? Who used it to survive? What did all of these practices mean to participants? The course will examine struggles over social meanings in the U.S. through a study of jazz performance, labor, representation, marketing, consumption, censorship, and historiography. Prerequisite: A course in American studies, American history, or consent of instructor. (Same as AMS 650.) LEC.

WGSS 653. Gender, War, and Peace. 3 Hours. S.
This course explores ways in which militarization and warfare are gendered processes. We ask, what does war tell us about gender, and what does gender tell us about war? Though the majority of fighters are men, women are essential to war efforts. They also represent a high proportion of the casualties of war. Yet women are rarely examined in relation to war; thus we work to uncover women's experiences of war. We also look to women's contributions to the peace movement in terms of both theory and practice, asking: Is peace a feminist issue? Should feminists support women's access to combat positions or oppose the military? What if women ruled the world—would that end wars? Does militarized masculinity harm men more than benefit them? How do states mobilize citizens to war and how is the process gendered? (Same as POLS 653.) Prerequisite: One of the following: POLS 150, POLS 151, POLS 170, POLS 171, WGSS 201, WGSS 202. LEC.

WGSS 660. Human Reproduction: Culture, Power, and Politics. 3 Hours. S.
This seminar analyzes and critiques the socially constructed nature of reproductive practices and their articulation with relations of power. Topics range from contraception to menopause, infertility to population. Cases are drawn from a wide variety of cultural contexts. This course is the second part of a two-semester sequence (beginning with ANTH 650) that examines in detail biological and cultural determinants of human reproduction. (Same as ANTH 660.) Prerequisite: ANTH 650, or 6 hours in Women's Studies, or permission of instructor. LEC.

WGSS 662. Gender and Politics in Africa. 3 Hours. S.
This course is designed to explore the field of gender and African politics. We begin by paying particular attention to African women's political roles during the pre-colonial and colonial society. Next, we examine the impetus, methods, and path of liberation struggles and how gender roles were shaped, shifted, and changed during these struggles. The majority of the class focuses on current issues in African politics, including gender

following: ANTH 389, ANTH 460, WGSS 201; or permission of instructor. LEC.

WGSS 650. Service Learning in Women's Studies. 3 Hours. S.
This course, to be taken in the senior year, is designed to give students the opportunity to apply women's studies knowledge and ideas gained through course work to real-life situations in various agencies and women's centers. Open to Women's Studies majors and others with significant Women's Studies backgrounds. Permission of instructor is required. FLD.
and development; HIV/AIDS and women’s health; gender and militarism. We also explore women’s roles in political institutions; civil society organizations; trade and labor unions; and transnational movements. We also examine contemporary constructions of masculinity and femininity in African states and explore how these constructions affect social policy and national political agendas. (Same as AAAS 662.) LEC.

WGSS 665. Women, Health, and Healing in Latin America. 3 Hours. S.
This seminar uses a life-cycle approach to examine women’s health (physical, mental, and spiritual) and their roles as healers. Special consideration is given to the effects of development programs on well-being, access to health care, and hanging roles for women as healers. Cases will be drawn from a variety of Latin American contexts. (Same as ANTH 665 and LAA 665.) Prerequisite: 6 hours coursework in Anthropology and/or Women’s Studies and/or Latin American Studies. LEC.

WGSS 689. Conceptual Issues in Human Sexuality. 3 Hours. S.
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as PSYC 689.) Prerequisite: PSYC 104 or WGSS 201. LEC.

WGSS 696. Studies in: _______. 3 Hours. S.
Interdisciplinary study of different aspects of women’s studies in different semesters. LEC.

WGSS 701. Seminar in: _______.3 Hours.
A research seminar in women’s studies. Instructor and topic will vary. LEC.

WGSS 789. Anthropology of Gender: Advanced Seminar in the Four Fields. 3 Hours.
This seminar is intended primarily for graduate students in anthropology or other disciplines who share an interest in any of the subdisciplines of anthropology (archaeology, linguistics, biological anthropology, and sociocultural anthropology) and/or anthropological theories and methods. Undergraduates pursuing Honors or other major research projects are also encouraged to participate. Students will receive training in the contemporary theories, research, and pedagogies informing the anthropology of gender. Class participants will explore how these materials intersect with their current thesis or research projects and develop syllabi specific to their subdiscipline. (Same as ANTH 789). Prerequisite: Permission of instructor. LEC.

WGSS 797. Directed Readings. 1-3 Hours.
Directed reading in an area of women’s studies in which there is no appropriate course in the offerings of the Women’s Studies Program, but in which there is a member of the cooperating graduate faculty competent and willing to direct the program of study. RSH.

WGSS 800. History of Women, Gender and Sexuality Studies. 3 Hours.
An introduction to the field of women, gender, and sexuality studies, paying particular attention to its development, its reception and influence on academic disciplines, and its institutionalization. Prerequisite: Graduate standing and consent of the instructor. SEM.

WGSS 801. Feminist Theory. 3 Hours.
A survey of contemporary feminist theories produced within and across disciplines (including but not limited to, eco-feminism, and liberal, cultural, materialist, psychoanalytic, radical, and black feminist thought). Prerequisite: Graduate standing and consent of the instructor. LEC.

WGSS 802. Feminist Methodologies. 3 Hours.
An introduction to the methods used in feminist research in the humanities, social sciences, and natural sciences (e.g., quantitative and qualitative research methods, archival research, and oral histories). We will consider examples of applications of each method, the strengths and limitations of each method, and how each method relates to feminist theories and principles. Prerequisite: Graduate standing and consent of the instructor. SEM.

WGSS 803. Topics in Feminist Pedagogy: _______. 0.5 Hours.
The goal of the course is to teach students to teach. By reading core texts of feminist pedagogy, understanding critical theories, and attending seminars at the Center for Teaching Excellence selected by instructor and student, students will learn how to present knowledge and stimulate learning in the classroom, as well as such practical skills as leading discussion sections, preparing and presenting class sessions, developing syllabi, devising fair grading and helpful advising, and solving pedagogical problems like maintaining civility in the classroom and coping with academic misconduct. Must be repeated twice for a total of 1 credit hour while actively teaching. Prerequisite: Must be Women, Gender, and Sexuality Studies graduate students. SEM.

WGSS 804. Topics in Professional Development: _______. 1 Hour.
The goal of this course is to train students in the skills essential to becoming effective scholars and educators, and successful members of the profession. The material to be covered by these three iterations includes 1) the ethics and practice of feminist research (e.g., protection of human subjects, conflicts of interest, confidentiality, legal strictures); 2) the practical aspects of producing knowledge (e.g., writing research papers, proper citation methods, conference presenting, responding to peer reviews); and 3) acquiring and securing a place in the work force (e.g., CV preparation, job interviews, grant writing, getting promotion [and, in the academy, tenure]). Must be repeated three times for a total of 3 credit hours. Prerequisite: Must be Women, Gender, and Sexuality Studies graduate students. SEM.

WGSS 810. Comparative Sexualities. 3 Hours.
Employing an interdisciplinary and comparative perspective, this course introduces the study of human sexuality in various disciplines. Students will also gain an understanding of the historical development and cross-cultural analysis of sexuality research, including the methodological, theoretical, and ethical issues involved in investigating sexual behavior and meanings. Prerequisite: Graduate standing and consent of the instructor. SEM.

WGSS 821. Woman and Violence. 3 Hours.
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. Research on the nature, prevalence, causes, and consequences of violence against women is discussed. (Same as PSYC 821.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor. LEC.

WGSS 835. Colloquium in the History of Gender. 3 Hours.
This colloquium will cover theoretical and topical readings on the history of manhood, womanhood, and gender systems. (Same as AMS 835 and HIST 895.) LEC.

WGSS 836. Colloquium in United States Women’s History. 3 Hours.
This colloquium will cover theoretical and topical readings on the history of women in the United States from the pre-contact period to the present. It is designed to familiarize students with the most important and current historiography in the field. (Same as AMS 836 and HIST 896.) LEC.
WGSS 837. Comparative Colloquium in Women's History. 3 Hours.  
This colloquium will approach the history of women from a comparative  
perspective through theoretical and topical readings on women in at least  
two different cultures. (Same as AMS 837 and HIST 897.) LEC.

WGSS 873. Seminar in United States Women's History. 3 Hours.  
This research seminar will focus on the history of women in the United  
States from the pre-contact period to the present. Students will research  
and write a paper using primary sources, and present those papers to the  
seminar for evaluation. (Same as HIST 973 and AMS 973.) LEC.

WGSS 880. Advanced Feminist Anthropology: _____ 3-6 Hours.  
Intensive consideration of special problems in feminist anthropology.  
Topics for the semester to be announced. May be repeated for a total  
of six hours credit. (Same as ANTH 880.) Prerequisite: Permission of  
instructor. LEC.

WGSS 889. Conceptual Issues in Human Sexuality. 3 Hours.  
An examination of the social construction of sexuality and research  
methods and issues relevant to sexuality. These concepts are applied to  
various topics, such as defining and conceptualizing sex and gender,  
sexual dysfunction, sexual orientation, the social control of sexuality,  
sexual coercion and abuse, and abstinence-only sex education. The  
course does not cover anatomical or physiological aspects of sexuality.  
(Same as PSYC 889.) Prerequisite: Six hours in WGSS and/or PSYC, or  
permission of instructor. LEC.

WGSS 898. Research Colloquium. 3 Hours.  
This course is the "capstone" to the Women's Studies Graduate  
Certificate program. Members of the seminar will produce a major paper  
and will share their research. During the first part of the term a small  
number of visitors (professors at KU and/or visiting speakers from other  
universities) will be invited to assign readings and subsequently present  
their work on women and gender. Students will be expected to attend  
the Gender Seminar of the Hall Center for the Humanities. Prerequisite:  
WGSS 801 and at least 3 hours of other graduate work in the Women's  
Studies graduate certificate program, or by special permission. LEC.

WGSS 999. Doctoral Dissertation. 1-12 Hours.  
Original research that is to be incorporated into a PhD dissertation. THE.

Bachelor of Arts and Bachelor of General Studies in Human Sexuality

Why study women, gender and sexuality studies?

Because much of what people think they know about women, gender, and  
sex is myth.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college  
transcripts to the Office of Admissions. Unless they are college transfer  
students with at least 24 hours of credit, prospective students must send  
ACT or SAT scores to the Office of Admissions. Prospective first-year  
students should be aware that KU has qualified admission requirements  
that all new first-year students must meet to be admitted. Consult the  
Office of Admissions (http://admissions.ku.edu) for application deadlines  
and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://  
www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-  
level course work will transfer on the Office of Admissions (http://  
credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a  
major field. Some CLAS departments have admission requirements.  
See individual department/program sections for departmental admission  
requirements.

Electives - one elective course, or additional survey, core, or secondary course (3)

Special Topics Courses / Studies in ____ / Seminar in ____

Independent Study/Directed Study (e.g., WGSS 498) Internship Courses (e.g., PSYC 483: Undergraduate Internship) Honors Thesis/Senior Essay/Honors Essay Service Learning Courses (e.g., WGSS 650: Service Learning)

Human Sexuality Major Hours & Major GPA

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 30 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**

Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

A sample 4-year plan for the BA degree in Women’s Studies can be found here: Human Sexuality (p. 2052), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Human Sexuality will be coming soon.

**Departmental Honors in the Women’s Studies Major**

**Summary**

- 3.25 GPA KU overall & 3.5 GPA in the WS major
- A senior honors thesis related to WGSS written over two semesters (two three-credit courses)
- Double majors: earn Honors in both majors with one thesis that is relevant to both programs.

**GPA Requirements**

Students need a 3.25 GPA overall and a 3.5 GPA in their Women’s Studies major.

**Honors Thesis**

Student write an honors thesis that is pertinent to Women, Gender and Sexuality Studies. An honors thesis is a piece of original research or other project supervised by a faculty member of any department. In most cases, the result will be a written document of some length, but this could vary depending on the topic and what the student and thesis advisor agree on. A single thesis can be submitted to WGSS and to another department for Honors in both programs, if both programs agree.

The senior honors thesis or honors project must be approved by a three-member thesis committee (the thesis advisor and two other faculty members, at least one of whom must be either in WGSS or on the WGSS Advisory Board).
Students take 6 credit hours of honors thesis work (3 hours per semester for 2 semesters, earning a A or B in the first semester and a A the second. For these 6 hours, students can enroll in:

- WGSS 499—Honors in WGSS
- WGSS 498—Independent Study in WGSS
- two Honors Research courses or two Independent Studies in any department

The last option would be especially relevant if the student plans to submit one honors thesis to both WGSS and another department in order to receive honors in both programs, or if the student’s research advisor is not a member of the WGSS core faculty.

**Typical Timeline**

**Junior Year** (or very early in the first semester of the student’s last year):
Select a topic for a thesis; talk to professors about ideas; find a professor willing to supervise the thesis. **Inform the WGSS Honors Coordinator!**

First Semester of the Last Year: Enroll in 3 credit hours of WGSS 498 or 499 or in an Independent Study of another department. Begin researching the thesis topic. The student and thesis advisor should form a three-person faculty committee (the thesis advisor and two other faculty members, at least one of whom must be either in WGSS or on the WGSS Advisory Board). **Submit an Honors Intent Form by 1 March to College Student Academic Services, 109 Strong.**

Second Semester of the Last Year: Enroll in 3 credit hours of WGSS 498 or 499 or in an Independent Study of another department. Finish the thesis. Have the thesis committee read the thesis and vote to award Honors (or not). If the thesis is passed, the thesis advisor needs to sign the **Honors Certification Form**, which can be obtained by the student in the College Student Academic Services office, 109 Strong; after the advisor signs this form, it is then submitted back to the College Student Academic Services, 109 Strong, at least a week before the end of the graduation term. The thesis advisor should also notify the Honors Coordinator of the result.

Double Majors: Students who are satisfying double majors and pursuing Honors in both majors may use one honors thesis for both majors if they get approval from both departments. The thesis must be related to both majors, and the thesis committee must include faculty members from both departments. Students must fulfill both departments’ requirements for honors.

**BA in Human Sexuality**

Below is a sample 4-year plan for students pursuing the BA in Human Sexuality. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

| Total Hours | 120-123 |
The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

Visit this website (http://college.ku.edu/undergrad/curriculum/ ba_QR) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Choose one elective course from the list of approved survey, core, or secondary courses required for the major.

Choose one Core Course from each of the lists of approved Core Social Science and Core Humanities course lists.

Choose two additional Core Courses from either the Social Science or Humanities Core course list.

Choose two courses from the approved Secondary course list.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level, and 100 hours must be from within the College of Liberal Arts and Sciences.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Arts and Bachelor of General Studies in Women's Studies

Why study women, gender and sexuality studies?

Because much of what people think they know about women, gender, and sex is myth.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu) for application deadlines and specific admission requirements.

Visit the Office of International Student and Scholar Services (http://www.iss.ku.edu) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

It is recommended that students complete WGSS 101, the introductory course, and consult the undergraduate advisor.

Requirements for the B.A. or B.G.S. Major

Women's Studies Major Course Requirements

Women's Studies Core Knowledge and Skills (18)

Majors must complete a course in each of the following areas:

Introduction to Women, Gender, and Sexuality Studies. Satisfied by:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>WGSS 101</td>

Women’s Studies Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

**Minor in Human Sexuality**

**Why study women, gender and sexuality studies?**

Because much of what people think they know about women, gender, and sex is myth.
Requirements for the Minor

Human Sexuality Minor Course Requirements

The minor requires 18 hours. At least 12 hours must be at the junior/senior (300+) level or higher. Students selecting this minor must complete the following:

Survey Course of Human Sexuality (3)

Satisfied by one of the following:

- SW 303  Human Sexuality in Everyday Life
- PSYC 502  Human Sexuality
- HSES 489  Health and Human Sexuality

Methods (3)

- WGSS 301  Research Methods in Women, Gender and Sexuality Studies

Human Sexuality Discipline Perspective (9)

Human Sexuality Discipline Perspective. Satisfied by 3 core courses (9 hours) with a primary focus on sexuality. Students should take at least 1 humanities course and at least 1 social or biological science course.

Humanities Perspective. Satisfied by 1 of the following approved humanities electives:

- AAAS/HIST 598  Sexuality and Gender in African History
- CLSX/HWC 374  Gender and Sexuality, Ancient and Modern
- EALC 575  Love, Sexuality and Gender in Japanese Literature
- HIST 608  History of Sexuality
- PHIL 504  Philosophy of Sex and Love
- REL 374  Religious Perspectives on Sexuality and Gender
- WGSS 327  Perspectives in Lesbian, Gay, Bisexual, and Transgender Studies
- WGSS 330  Sex and Gender in New Media

Social Science or Biological Science Perspective. Satisfied by 1 of the following approved social or biological science elective:

- ANTH 359  Anthropology of Sex
- ANTH/WGSS 660  Human Reproduction: Culture, Power, and Politics
- PSYC 410  Intimate Relationships
- PSYC 555  Evolutionary Psychology
- PSYC/WGSS 689  Conceptual Issues in Human Sexuality
- WGSS/PSYC 521  Women and Violence
- WGSS/POLS 640  Politics of Reproductive Policy

Human Sexuality Required Electives (3)

Satisfied by 1 course (3 hours) chosen from any course above not used to satisfy a requirement or any of the following:

- AAAS 554/ANTH 545  Contemporary Health Issues in Africa
- ABSC 268  Introduction to Marriage and Family Relations
- ABSC/PSYC 626  Psychology of Adolescence
- AMS 344/WGSS 396  Case Study in American Studies: _____ (Colonial Era to the Present)
- ANTH/WGSS 389  The Anthropology of Gender: Female, Male, and Beyond
- COMS 344  Relational Communication
- COMS 440  Communication and Gender
- COMS 552  The Rhetoric of Women's Rights
- HIST/WGSS 324  History of Women and the Body
- PHIL 674  Philosophy of Law
- POLS/WGSS 600  Contemporary Feminist Political Theory
- PSYC 465  Stereotyping and Prejudice Across Cultures
- PSYC/WGSS 468  Psychology of Women
- PSYC 642  The Psychology of Families
- SOC 220  Sociology of Families
- SOC 617/HP&M 620  Women and Health Care
- SOC 628  Families and Social Inequalities
- WGSS 333  The Politics of Reproductive Policy
- WGSS/HWC 570  Men and Masculinities
- WGSS/HWC 575  Body, Self and Society

Other Information

Other courses might count by petition in any of the above categories depending on their content. Such courses could include special topics courses (e.g., WGSS/ WGSS 696 Studies in: _____; ENGL 590 Studies in: _____; PSYC 690 Seminar: _____), new courses, or other courses. For more information, see the department’s website, or contact the department. 1 course overlap is allowed between major requirements and minor requirements. Courses with a blank (____) at the end of their titles are typically topics or seminar courses that may be repeated for credit. Usually these courses offer different topics each time they are taught. Students should check with the course instructor about the requirements to take the course and what the topic will be when it is offered."

Human Sexuality Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).
Doctor of Philosophy in Women, Gender, and Sexuality Studies

Why study women, gender and sexuality studies?

Because much of what people think they know about women, gender, and sex is myth.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Admission requires a bachelor’s degree and acceptance by Graduate Studies. Submit your graduate application online (http://www.graduate.ku.edu). Send all other supporting materials to the department:

The University of Kansas Department of Women, Gender and Sexuality Studies
Bailey Hall
1440 Jayhawk Blvd., Room 213
Lawrence, KS 66045-7545

Ph.D. Program

The Ph.D. program requires completion of core and elective courses and demonstration of depth in a chosen concentration or track. Candidates must complete a minimum of 13 credit hours of required courses in WGSS and 15 credit hours of elective WGSS courses. In addition, the student must take a minimum of 18 credit hours (3 in theory, 3 in methods, and 3 in a designated field) in an approved concentration or track selected from the list below.

Students must also fulfill Research Skills and Responsible Scholarship requirement as outlined in the WGSS Graduate Handbook (available online). At the end of 30 hours of course work (21 in WGSS and 9 in a concentration), Students will take a qualifying exam in their fourth semester (administered by the instructors of WGSS 800, WGSS 801, WGSS 802). Results of this exam will determine whether or not the student is given a terminal M.A. and leaves the program or the student continues on towards the Ph.D. After completion of 31 credit hours and the Research Skills and Responsible Scholarship requirement, students take a comprehensive oral examination, the centerpiece of which is a portfolio of all major written work (exams, papers, syllabi), and a professional essay. Within 3 months of passing this exam the student defends a dissertation prospectus and enrolls in dissertation hours.

Concentrations

The WGSS graduate student handbook lists a selection of the approved courses in the concentrations.

Graduate Certificate in Women's Studies

Why study women, gender and sexuality studies?

Because much of what people think they know about women, gender, and sex is myth.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Admission requires a bachelor’s degree and acceptance by Graduate Studies. Submit your graduate application online (http://www.graduate.ku.edu). If you are applying to a specific M.A. or Ph.D. program, submit your application, fees, letters of recommendation, Graduate Record Examination scores, official transcripts, and any other requested materials to that program.

Students already in a KU graduate program must be in good standing with their graduate degree program in order to participate in the certificate program, must have a minimum GPA of 3.0, and must provide a letter of support from their graduate degree program. After they submit their KUGRAD form they will be asked to submit a current advising report to the Department.
Students not already in a KU graduate program will be asked (after they submit their KUGRAD form) to provide the WGSS Department with the following.

- a letter stating the student's interest in the WGSS Graduate Certificate Program;
- a copy of the student's latest college transcript (this does not need to be an official copy);
- and 2 letters of recommendation from persons familiar with the student's academic work or potential for graduate study

The University of Kansas Department of Women, Gender and Sexuality Studies
Bailey Hall
1440 Jayhawk Blvd., Room 213
Lawrence, KS 66045-7545

Graduate Certificate Requirements

The graduate certificate requires completion of 12 credit hours of graduate work, including 2 courses selected from WGSS 800 History of Women, Gender and Sexuality Studies; WGSS 801 Feminist Theory, and/or WGSS 802 Feminist Methodologies and two 3-credit electives chosen from a list of recommended graduate courses or approved by the graduate director.
School of Medicine

Founded in 1905, the KU School of Medicine is proud of its rich legacy as Kansas’ only medical school. Our mission is to enhance the quality of life and serve our community through the discovery of knowledge, the education of health professionals and by improving the health of the public.

The School of Medicine integrates excellent education, scientific discovery, outstanding clinical programs and dedication to community service. In addition to its commitment to educating the physician workforce of tomorrow, the school is an emerging leader in biomedical research and the health of the public. Graduate programs are offered in the biomedical sciences, biostatistics, public health, health policy and management, and clinical research.

Admission and degree requirements vary by program and are listed in the individual program descriptions. Requirements and course descriptions are subject to change. In most cases, use the catalog of the year student entered program. Other years’ catalogs (http://catalog.ku.edu/archives)

Therapeutic Science (p. 731)  Doctor of Philosophy in Therapeutic Science (p. 731)

Doctor of Medicine (M.D.)

At the University of Kansas School of Medicine, future doctors are welcomed into a culture of community, forming bonds with peers and mentors by learning together, not competing separately. Through this support system, students reach common goals of serving their community, unlocking the mysteries of medicine and promoting lifelong wellness.

Top rankings

Providing students with an outstanding medical education remains at the heart of the School of Medicine’s mission.

• U.S. News & World Report ranks the School of Medicine among the top programs for training primary care physicians.

Three diverse academic environments

The School of Medicine has campuses at three locations in Kansas and has gained a national reputation for educating family, primary-care and rural physicians.

• At the Kansas City campus, students train at a large academic medical center, which has attracted innovative and accomplished researchers because of a commitment to modern research facilities and state-of-the-art equipment.

• Wichita facilities provide a community-based medical education environment, where students learn through direct patient care inside three partner hospitals as well as in doctors’ offices across the state.

• The Salina program is designed for students with a strong interest in rural medicine, as well as for any student wishing to work with a small
group of peers on a rural regional campus with opportunities for early clinical experiences and for frequent interactions with the local clinical faculty.

On the left you will find links for more information about the School of Medicine including the administration, the programs offered, the campuses, and the course catalog for the School of Medicine.

Special Programs
KU Medical Alumni Academic Societies
As part of an effort to enhance student advising and mentoring and to develop professionalism in the students of the School of Medicine, the original seven academic societies were founded in the 1999-2000 academic year and named after past leaders of the School of Medicine. With campus expansion and the opening of the Salina campus in 2011, an eighth society, Lukert, was founded. Each society is headed by a faculty director, who also serves as an assistant dean for student affairs. Society members include School of Medicine faculty, KU Hospital physicians, and the School of Medicine students. The goals of the societies are to:

- enhance student-faculty interaction;
- enhance student interaction, particularly across classes;
- provide a structure for student advising;
- promote a sense of community for students and faculty; and
- encourage the development of professional attitudes and behaviors among students.

The KU Medical Alumni Academic Societies are a core component of the School of Medicine's Professionalism Initiative. The Societies allow for more individualized and small-group contact between students and faculty through encouraged, open discussions about professionalism in all academic settings. This atmosphere expands the formal curriculum for the teaching of Professionalism.

Societies sponsor periodic gatherings for students and faculty. These gatherings are both academic (e.g., invited speakers) and social (e.g., dinners). Faculty members serve as academic advisers for one to two students in each class. To the extent possible, students are matched with faculty based on interests. Faculty also may provide career advice for students and serve as resources for their advisees during their entire four years at the School of Medicine.

KUMC Women in Medicine and Science
The KUMC Women in Medicine and Science (WIMS) program in the Schools of Medicine, Nursing and Health Professions fosters equality in the academic community by promoting excellence through leadership, mentoring, and community involvement. The mission of the organization is to help faculty, trainees and students:

1. to be proactive and constructive in establishing and advancing the careers of women in medicine and science;
2. to educate women on relevant KU Policies and Procedures for career development and advancement;
3. to enhance and foster the professional development of all women faculty in the KUMC Schools of Medicine, Nursing and Health Professions through encouragement and mentoring, and to encourage growth, networking and quality within our KUMC community (local and national);
4. to promote the process of developing long-term, mutually beneficial relationships and cultivating new opportunities for collaboration through a supportive exchange of ideas and resources.

For information on programming and how to get involved, please contact one of their key individuals listed on http://www.kumc.edu/wims/contact-us.html

For more information, visit the WIMS website at http://www.kumc.edu/wims.html.

Medical Education Network Sites
The Medical Education Network Sites are an integral part of the School of Medicine's mission to implement rural health initiatives throughout the state. Each of the five sites represents a region of Kansas. Each region has a Medical Education Director (MED), a practicing physician who also works for the school's Office of Rural Medical Education to promote rural workforce development. MEDs help coordinate rural learning opportunities throughout Kansas. Many agencies in the state have this mission in common: the Health Policy Institute, State Data Board, Department of Health and Environment, and KUMC Offices of Admissions, Rural Health Education and Services, and Area Health Education Centers. The MEDs may work with these institutions and occasionally work with other health profession schools at KU and other Regents institutions to promote rural learning opportunities. Specific MEDs activities include:

- Support of local medical center educational programs
- Coordination of local premedical student recruitment activities
- Summer Rural Research and Practice Elective Program
- Scholars in Rural Health
- Identification and development of new health profession education sites.
Rural Track/Options

The need for rural primary care physicians continues to be critical in the majority of Kansas counties. KU-School of Medicine recently had a rural track where students spent a significant part of the clinical education in a rural setting. The rural track was in Salina which has now become a branch campus. New ways to provide rural training opportunities for students are in development.

In lieu of spending an extended period of time in one rural site, students currently have the option of receiving some of their training in Family Medicine, Surgery, Pediatrics, and Obstetrics and Gynecology in a rural site. Students can exercise this option for one of the clerkships or all of them as space permits. Students can spend from 2-6 weeks on site depending on the clerkship. Some students have spent as much as 14 weeks in rural learning sites during their 3rd year.

Nicodemus Project

Despite remarkable advances in science and health care, health disparities persist in the United States. Health disparities exist in Kansas, too, and the disparate morbidity and mortality and leading causes of death and disease for ethnic minorities in Kansas reflect those of the nation. In Kansas, African-American adults, for example, are at higher risk of death and disease due to heart disease, cancer, cerebrovascular accidents, and other chronic conditions. African-American Kansans have issues related to less access to high-quality health care and information about health promotion and disease prevention compared to nonminority Kansans.

The Nicodemus Project is a multidisciplinary, health screening, promotion of wellness, disease prevention, service learning, and community outreach project in a culturally sensitive setting. The Nicodemus Project takes place in the rural and historic African-American town of Nicodemus, Kansas, during the town’s Annual Homecoming Celebration, commemorating the exodus of former slaves to the promised land of Kansas. The Nicodemus project is coordinated and led by the School of Medicine's Office of Cultural Enhancement and Diversity. [http://www.kumc.edu/school-of-medicine/office-of-cultural-enhancement-and-diversity/nicodemus-free-health-clinic.html](http://www.kumc.edu/school-of-medicine/office-of-cultural-enhancement-and-diversity/nicodemus-free-health-clinic.html)

Scholars in Rural Health

The Scholars in Rural Health program identifies and encourages undergraduate students from rural Kansas to practice medicine in Kansas counties that are medically underserved. Using a rigorous admissions process, as many as 16 students are annually selected to participate in a two-year premedical curriculum featuring community-based primary care experiences and other activities. Selection criteria include completion of two years of undergraduate premedical education and evidence of high probability for return to a medically underserved area of Kansas. Students who successfully complete the program during their junior and senior years are assured admission to the School of Medicine. Additional information is available at [http://www.kumc.edu/school-of-medicine/education/premedical-programs/scholars-in-rural-health.html](http://www.kumc.edu/school-of-medicine/education/premedical-programs/scholars-in-rural-health.html)

Degree Programs

KU Medical Center includes the Schools of Health Professions, Medicine, Nursing, and an Office of Graduate Studies. Information about Health Professions or Nursing is available from those schools or in the appropriate sections of the KU Undergraduate Catalog and Graduate School Catalog.

Masters and Ph.D. Programs

For information about Masters and Ph.D. programs visit [http://catalog.ku.edu/](http://catalog.ku.edu/).

Combined M.D./Ph.D. Degree Programs

The purpose of the MD-PhD combined degree program is to prepare highly qualified and motivated post-baccalaureate students for careers as physician scientists in academic medicine and biomedical research. To promote a close-knit group of students, MD-PhD training at the University of Kansas Medical Center includes small group interactions with the program directors and monthly interactions with fellow students at all phases of their training. A formal peer-mentoring program allows students to advise and guide each other on issues related to research and clinical training, personal life-work balance, and professional development.

The program is conducted under the auspices of the Dean of Graduate Studies and the Executive Dean of the School of Medicine, with guidance from their MD-PhD Advisory Committee.

Information may be obtained from the MD-PhD Physician Scientist Training Program, 1123 Delp, Mail Stop 3062, KU Medical Center, 3901 Rainbow Blvd., Kansas City, KS 66160, (913) 588-5241, [http://www.kumc.edu/md-phd-program.html](http://www.kumc.edu/md-phd-program.html)

M.D./M.P.H. Program

The single M.D./Master of Public Health program is ideal for medical students interested in public health, community medicine, preventive medicine, and occupational medicine. The integrated, five-year curriculum prepares students for careers in both the public and private sectors including local, federal, and state health agencies; outcomes and disease management; research institutions; and private foundations. Candidates should demonstrate notable academic credentials and have at least one year of experience in a health-related field. Students in the dual program complete the three-semester, 42-hour M.P.H. requirements in addition to the four-year M.D. curriculum. The M.P.H. degree may be completed after years two or three of medical school. To obtain admission materials or for more information, call (913) 588-2720, or visit [http://mph.kumc.edu](http://mph.kumc.edu)

M.D./M.H.S.A. Program

The MD/MHSA program is ideal for medical students interested in practice, hospital, or health system management. Students in this program have several options for completing the MHSA requirements in addition to the four-year MD curriculum.

To obtain admission materials or for more information, call (913) 588-3763 or visit [http://www.kumc.edu/school-of-medicine/hpm.html](http://www.kumc.edu/school-of-medicine/hpm.html). To learn more about the M.D./M.H.S.A. joint degree program visit [http://www.kumc.edu/school-of-medicine/hpm/master-of-health-services-administration/joint-degree-programs/joint-mhsamd.html](http://www.kumc.edu/school-of-medicine/hpm/master-of-health-services-administration/joint-degree-programs/joint-mhsamd.html)

Medical School Requirements

Evaluation of Student Performance

Faculty members evaluate the academic achievement, acquisition of skills, and attitudes of medical students as superior, high satisfactory, satisfactory, or unsatisfactory. A 4.0 grade-point system is used to determine the student's class rank and grade-point average.
Repeating a Course
Repetition of any part of the curriculum is upon recommendation of the Academic and Professionalism Committee.

Withdrawal or Leave of Absence
Withdrawal or leave of absence may be granted by the Associate Dean of Student Affairs upon recommendation by the Academic and Professionalism Committee.

M.D. Degree Requirements
The degree of Doctor of Medicine is awarded by the medical faculty of the University of Kansas to a student who has satisfactorily completed the medical school curriculum. The student must also pass Steps 1 and 2 (Clinical Knowledge and Clinical Skills) of the United States Medical Licensing Examination (USMLE).

United States Medical Licensing
The National Board of Medical Examiners prepares and administers a three-part examination known as the United States Medical Licensing Examination. Steps 1 and 2 of the USMLE are taken while the student is enrolled in medical school. Step 3 may be taken by a physician who has passed Steps 1 and 2 and has served at least six months of an approved hospital residency. National Board certification is awarded to candidates who successfully pass all three parts of the test and satisfy the requirements of the medical licensing authorities of most states. To graduate from the University of Kansas School of Medicine, students must pass Steps 1 and 2 of the USMLE. Students must pass Step 1 to continue in the clinical program. Applications to take both Step 1 and Step 2 are available online at https://apps.nbme.org/ciw2/prod/jsp/login.jsp. Residents register for the Step 3 exam via the same website.

Private Support and Endowment
The University of Kansas School of Medicine depends on private gifts and bequests for many of its activities and functions. Grants from national foundations and agencies of the federal government are supplemented by gifts from individuals, often donated as memorials to or in honor of friends and relatives. The Kansas University Endowment Association maintains all funds separately, and many bear the names of the donors or of the persons honored or memorialized. Donations to the Endowment Association are used solely for the purposes designated by the donor without deductions for administrative costs or overhead. Endowment funds finance student loans, lectureships, scholarships, professorships, fellowships, and acquisitions for the Medical Center libraries. They also are used for general medical research and for special research in such fields as cancer, heart disease, and problems of aging. Both loan funds and scholarship funds benefit medical students. Funds received for scholarships are invested so that the income provides scholarships indefinitely. Both long-term and short-term loans are available. Long-term loans become payable one year after graduation. Short-term loans become payable within 90 days of issue. A complete list of endowment scholarships is available from the Office of Student Affairs or online at http://www.kumc.edu/school-of-medicine/osfa/scholarships-loans-and-contests.html.

Distinctions and Awards
The Academic Excellence Award is given to a senior student in recognition of outstanding academic performance.

The Advocacy Award - Kansas City is presented to a graduating student in recognition of high standards of character, conduct, and integrity and the promotion of those qualities in colleagues.

The Alpha Omega Alpha Honor Medical Society promotes scholarship and research in medical school, encourages high standards of character and conduct, and recognizes high attainment in medical science, medical practice, or related fields. Members of AOA elect new members each year as well as granting honorary memberships to those gaining recognition in fields related to medicine. Elected medical students from the Kansas Alpha Chapter, established in 1930, give promise of professional leadership and fulfillment of these ideals.

The Anesthesiology Academic Excellence Award is presented to a senior student for academic and clinical excellence in anesthesiology.

The Karl E. Becker Jr., M.D., Award is presented to a senior student from the Wichita campus for outstanding performance as a student clinician in anesthesiology. Dr. Becker was professor and chair of the Department of Anesthesiology from 1987 to 1998. This award honors his excellent teaching skills and dedication to medical education.

The Distinguished George E. “Ned” Burket, M.D., Award is presented to a senior medical student from the Wichita campus for excellence as a fourth-year student in family medicine. Dr. Burket practiced in Kingman, Kansas, for 32 years. As president of the American Academy of General Practice in 1968, he provided pivotal support in the transition of general practice to family practice. Dr. Burket was a founding member and president of the American Board of Family Practice and chair of the Residency Review Committee for Family Practice. For his distinguished efforts, he was elected to the Institutes of Medicine of the National Academy of Sciences in 1975.

The LeRoy A. Calkins Award is presented to a senior student for academic and clinical excellence in obstetrics and gynecology. The award is in memory of Dr. Calkins, who was chair of the Department of Obstetrics and Gynecology for 30 years, retiring in 1959. Dr. Calkins came to KU in 1929 from the University of Virginia, where he was department chair. He received his education and training, both M.D. and Ph.D., at the University of Minnesota. He was an outstanding teacher, a recipient of many national awards, and a leader in postgraduate and resident education. He founded many societies and groups that sought to reduce maternal-fetal mortality and morbidity in Kansas.

The Tom D.Y. Chin Preventive Medicine Excellence Award to a graduating senior who has excelled in public health or preventive medicine during their medical education in honor of Tom D.Y. Chin, M.D. Professor Emeritus Chin was Chair of the Department of Preventive Medicine from 1975 through 1989. He has a national and international reputation in infectious disease epidemiology and cancer epidemiology and has 30 years of dedicated service to the U.S. Public Health Service. He is an outstanding teacher, clinician, and leader in public health research both nationally and internationally. This award honors an individual who has some of the personal attributes and characteristics that illuminated Dr. Chin’s own distinguished career.

The Coghill Award is presented to a graduating medical student who has produced research of high quality and performed in a superior manner in courses in the Department of Anatomy and Cell Biology.

The P.G. Czarlinskly Family Award (in memory of Charley Czarlinsky, M.D.) is presented to a senior student from the Wichita campus for outstanding performance as a student clinician. The award recognizes integral development of superior skills in patient care and management,
as well as scholarly understanding and prudent application of the principles of clinical science. It also recognizes a significant contribution to the overall environment of health care and patient education.

The Daniel C. Darrow Certificate and Award are presented to a member of the graduating class who has distinguished himself or herself in pediatrics. Dr. Darrow was a professor of pediatrics at KU from 1954 until his retirement in 1962. The principles elucidated in his studies of fluid and electrolytes serve as a basis for our current management of children with body fluid disturbance. For these and many other scientific contributions, he was world famous. The members of the Department of Pediatrics give the certificate and award to an individual they believe has some of the personal attributes and characteristics that illuminated Dr. Darrow's distinguished career.

The Mahlon H. Delp Award - Kansas City is presented in memory of Dr. Delp, Professor Emeritus of Medicine, to a senior student in internal medicine who best demonstrates integrity, compassion, and dedication to the care of patients as individuals.

The Mahlon H. Delp Award - Wichita is presented in memory of Dr. Delp, Professor Emeritus of Medicine, to a senior student in internal medicine who best demonstrates the qualities of integrity, compassion, and dedication to the care of patients as individuals.

The Louise deSchweinitz Award is presented in memory of Dr. deSchweinitz to recognize the most outstanding student performance on the clinical rotation in pediatrics.

The Emergency Medicine Award is presented to a senior student for demonstrated clinical and academic excellence in emergency medicine. It is sponsored by the Society for Academic Emergency Medicine.

The Endocrine Society's Medical Student Achievement Award is presented to a senior medical student who has shown exceptional ability and interest in endocrinology. It encourages outstanding students to pursue careers in endocrinology and related fields of medicine and basic science.

James G. Price, MD, Award for Excellence in Family Medicine is presented to a graduating senior who excelled in the study of Family Medicine in memory of Dr. Price who left rural practice in Colorado to become the Chair of Family Medicine at the University of Kansas. He finished his career at KU as the Dean of the School of Medicine. During his illustrious career Dr. Price served as President of the American Academy of Family Physicians and the American Board of Family Practice. He was a member of the National Institute of Medicine and was selected as KU Honorary Alumnus in 2008. Dr. Price was an excellent teacher, valued mentor, skilled clinician, and trusted colleague. He was an iconic figure in the field of medicine and the consummate family physician.

The George J. Farha Award for Excellence in Surgery is presented to a student from the Wichita campus for excellence during the surgical clerkship. The award is given to a student who displays knowledge of surgery as well as honesty, integrity, and compassion in the care of patients. The funds for this award were collected by Dr. Farha's former residents to honor their teacher.

John D. Foret Urology Award is presented to an outstanding graduating student who has chosen to pursue a career in urologic surgery in recognition of their exemplary clinical and or research performance. The award is named in honor of Dr. John D. Foret, a native of San Diego, California, and a graduate of the University of Chicago School of Medicine. Dr. Foret came to the University of Kansas in 1953 to begin his postgraduate medical education. After completing his urology residency in 1958, Dr. Foret was appointed to the University of Kansas School of Medicine Faculty. He spent his entire career at KU, and was recognized as an outstanding clinician and educator. In 1993, Dr. Foret retired and was named Professor Emeritus of Surgery(Urology).

The Matthew Freeman Award in Social Justice is presented to a graduating medical student who has demonstrated how a commitment to social justice and equity can be combined with medicine.

Janet M. Glasgow Memorial Achievement Citations are presented to female medical students who graduate in the top 10 percent of their class.

The Janet M. Glasgow Memorial Award is presented to a female medical student who stands first in her graduating class. Sponsored by the American Medical Women's Association, this award was established by Dr. Maude Glasgow in honor of her sister, Janet M. Glasgow. Dr. Maude Glasgow was a pioneer in preventive medicine and public health. She received her degree in 1901 from Cornell University Medical College and went on to earn her degree in public health from New York University and Bellevue Medical College. Janet M. Glasgow unselfishly gave of her time and resources to see that her sister, Maude Glasgow, completed her medical education.

The Donald W. Goodwin, M.D., Award is presented to the senior student who is entering residency in psychiatry and is perceived by the faculty to be most likely to succeed in the profession. Dr. Goodwin was Chair of Psychiatry at the University of Kansas Medical Center from 1976 to 1991. Later he was University Distinguished Professor and Professor Emeritus. Dr. Goodwin embodied the inquisitive nature required of a modern academic psychiatrist who questions traditional approaches and savors empirical developments. The philosophy influenced his work in psychiatric diagnosis, alcoholism, and phobias. Dr. Goodwin's work has a lasting influence on the field and the character of psychiatry at KU Medical Center.

The Kyle Lee Gratny Memorial Award is presented in memory of Kyle Lee Gratny to a graduating medical student for distinguished performance in the neonatology division, Department of Pediatrics.

The Don Carlos Guffey Award is presented to a senior student who has demonstrated a keen interest in the history or philosophy of medicine by writing an outstanding paper in one of those disciplines. The award honors Don Guffey, M.D., the first chair of the Department of Obstetrics at KU Medical Center, who had a long-standing interest in the history of medicine.

The Donald W. Goodwin, M.D., Award is presented to the senior student who is entering residency in psychiatry and is perceived by the faculty to be most likely to succeed in the profession. Dr. Goodwin was Chair of Psychiatry at the University of Kansas Medical Center from 1976 to 1991. Later he was University Distinguished Professor and Professor Emeritus. Dr. Goodwin embodied the inquisitive nature required of a modern academic psychiatrist who questions traditional approaches and savors empirical developments. The philosophy influenced his work in psychiatric diagnosis, alcoholism, and phobias. Dr. Goodwin's work has a lasting influence on the field and the character of psychiatry at KU Medical Center.

The Kyle Lee Gratny Memorial Award is presented in memory of Kyle Lee Gratny to a graduating medical student for distinguished performance in the neonatology division, Department of Pediatrics.

The Russell F. Holcomb Award is presented for outstanding performance as a student in obstetrics and gynecology at KU Medical Center in memory of Dr. Holcomb, who was a resident in the Department of Obstetrics and Gynecology at KUMC. Dr. Holcomb served a one-year rotating internship from July 1, 1961, to June 30, 1962. He interrupted his medical career to serve three years as a medical officer in the U.S. Navy with a tour in South Vietnam. He returned to KU Medical Center on July 1, 1965, to complete his three years of residency, where he earned the respect of his peers and faculty of the department. The 1969 graduating class gave Dr. Holcomb the Resident Teaching Award. That class later initiated this award in his memory. Dr. Holcomb served as a chief resident his last year of residency plus serving a clinical fellowship with the American Cancer Society in this same year. Upon completion
of his residency, he practiced in the San Diego, California, area. Dr. Holcomb died in an automobile accident in Mexico, along with his wife and two sons, in 1973.

Honor in Medicine Award is awarded by the University of Kansas School of Medicine Honor Council to a student In recognition of their integrity, selflessness and high moral character.

The Norge W. Jerome Preventive Medicine Excellence Award is presented to an outstanding senior medical student who has excelled in public health or preventive medicine for minority populations during his or her medical education in honor of Norge W. Jerome, Ph.D., Professor Emerita, Department of Preventive Medicine. She conducted her first pioneering research more than 30 years ago, combining the fields of human nutrition and anthropology. This innovative approach launched the discipline of nutritional anthropology. Dr. Jerome has a strong record of public service and has been active in community development for close to 50 years, combining science with compassion to address the food, nutrition and health concerns of women, families, and communities in the United States and around the world. She serves as an inspiration to future generations of students.

The KAFP-Foundation Hostetter Award honors fourth year medical students who have promoted the values of Family Medicine during their medical school tenure.

The Paul C. Laybourne, M.D., Award is presented to the senior student who demonstrated the highest academic performance in the required psychiatry clerkship. Dr. Laybourne served the University of Kansas School of Medicine for more than 30 years. He was the founding director of the division of child psychiatry and served in that capacity until he retired. He was an important force in the evolution of child psychiatry in Kansas. An important early contribution was his pioneering work on the value of brief diagnostic and therapeutic general pediatric hospital evaluation for children with possible underlying emotional disturbance and overt physical symptoms. This approach helped demonstrate the critical value of integrating psychiatric evolution and management with the other aspects of general pediatric medical care.

The LMMSA Award is presented to a graduating student who has been significantly involved in the Latino Minority Medical Student Association's Kansas Chapter and the greater Kansas City hispanic community.

The Martin Award is presented to a senior student who has chosen radiology as a career for excellence in diagnostic radiology.

Dr. Ronald L. Martin Student Scholarship Fund. The KU School of Medicine-Wichita Department of Psychiatry and Behavioral Sciences established the Dr. Ronald L. Martin Student Scholarship to recognize the many years of dedicated service of Dr. Martin, Professor and Chair from 1990 to the time of his death in 1998. This fund makes three awards available to third- and fourth-year students at the University of Kansas School of Medicine-Wichita who have successfully completed the required psychiatry clerkship.

The MaryAnn McMullan Memorial Award is presented to a graduating medical student who best demonstrates the qualities of integrity, compassion and dedication to the care of the dying patient in memory of MaryAnn McMullan. Presented by the Division of Geriatric Medicine and Palliative Care, Department of Family Medicine.

Merck Manual Awards are presented to seniors who have demonstrated outstanding scholastic achievement.

The Dr. Herbert C. Miller Award is presented to a senior medical student in recognition of distinguished performance in research in the Department of Pediatrics.

The Roscoe Falls Morton, M.D., F.A.C.P., Memorial Fund Award (sponsored by the Roscoe Morton family, Arkansas City, Kansas) is presented to a graduating senior from the UKSM - Wichita campus for superior academic and clinical performance in internal medicine. The award recognizes the recipient's deep commitment to continued study of the principles of clinical science and special interest in internal medicine as a continued study and career.

The Thomas G. Orr Sr. Award is presented to the outstanding senior medical student in surgery in memory of Dr. Orr, chair of the Department of Surgery for 25 years. Dr. Orr joined the staff of the KU medical school in 1915 from Johns Hopkins and achieved national recognition as an officer in professional societies, author, teacher, and recipient of honorary Doctor of Science degrees and numerous other honors. His bibliography contained 231 published articles and two textbooks, evidence of his interest in the investigation of clinical problems, his contributions to research, and his influence on the future study of surgery.

The Conrad Osborne, M.D., Award is presented to a senior medical student from the Wichita campus for excellence as a third-year student in family medicine. This award honors Dr. Osborne, a graduate of the KU School of Medicine. Dr. Osborne was in the first group of family practice residents in the United States, graduating from the Wesley Family Practice Residency Program in 1970. Dr. Osborne embodied the principles of family practice, serving as a caring physician, talented teacher, and trusted mentor and friend to a generation of family physicians until his untimely death from lymphoma in 1993.

The Outstanding Student in Otolaryngology Award is presented to a senior student who exhibits not only an interest, but excellence, in clinical care, academic medicine and research, related to the field of Otolaryngology Head and Neck Surgery.

The Department of Ophthalmology Medical Student Award is presented to a senior student who demonstrates the most outstanding performance in the clinic, research and/or humanitarian arenas related to Ophthalmic care.

The Mary Packwood Memorial Award is presented to a graduating medical student who best demonstrates the qualities of integrity, compassion and dedication to the care of the older adult in memory of Mary Packwood. Presented by the Landon Center on Aging.

The Pride in the Profession Award is presented to a senior medical student who most appropriately characterizes the qualities of professionalism in medicine envisioned by Dean Deborah Powell, M.D., during her tenure at KUMC. The Pride in the Profession Award was established by Dr. Donald Hagen in honor of Dean Powell, who served as Executive Dean of the School of Medicine and Vice Chancellor for Clinical Affairs from 1997 to 2002. During her tenure, Dean Powell instituted programs of professionalism for students and faculty. She initiated the White Coat Ceremony to symbolize the students' entry into the medical profession. Dean Powell supported the establishment of the Academic Societies as part of her vision of the mentoring of students by practicing physicians. She continues to work with students and serves as an inspiration to future generations of students.
The Prakash Raghavan Clinical Student Award is presented to a senior from the Wichita campus in recognition of outstanding performance in clinical rotations.

The John B. Redford Distinguished Professorship Award is presented to a senior student for demonstrated academic and clinical excellence during the rehabilitation rotation.

The D. Cramer Reed Award recognizes a student who has displayed outstanding interest and aptitude in understanding health of populations and principles of effective disease prevention applied to individuals and groups. Dr. Reed was the founding dean of the KU School of Medicine - Wichita, founding dean of the College of Health Professions at Wichita State University, and founder of Wesley Medical Center's Health Strategies program, one of the first major health promotion and disease prevention programs in the United States.

The Daniel K. Roberts Medical Student Award for Excellence in Women's Health Care is presented to a medical student from the Wichita campus who exhibits excellence in clinical practice, education, and research in obstetrics and gynecology.

The Robert H. Robinson, M.D., Award is presented to a graduating student from the Wichita campus for superior academic and clinical performance in anesthesiology. Dr. Robinson was a long-time supporter of teaching medical students and residents in a clinical setting and is a former professor and the first chair of the Department of Anesthesiology at the KU School of Medicine - Wichita. This award honors the recipient's special interest in anesthesiology.

The Jack C. and Ruth M. Schroll Family Award is presented to an academically outstanding Kansan graduating senior, who has matched in either an OB-GYN or Dermatology Residency Program. This senior is of fine character and integrity with compassion for others. The Schroll family represents the following degrees from K.U.: Jack C. Schroll, 1944, MD, Residency OB-GYN, 1955; Ruth M. Prentice Schroll, BS, 1945; daughter, Kathryn Schroll Graves, MD, 1974, Residency Dermatology, 1979; son, John T. Schroll, MD, 1976, Residency OB-GYN, 1980; grandson, Jeffery Justin Graves, MD, 2007; Residency in Dermatology. The family represents a history of 55 doctors (MD and DO), including Dr. Jack Schroll's grandmother, Dr. Emma Hook Price, DO, 1901, Kirksville School of Osteopathy under Dr. A.T. Still, MD, founder of Osteopathy.

The Willard J. Smith, M.D., Award for Academic Achievement is presented to a graduating senior from the Wichita campus for superior academic performance. In recognition of Dr. Smith's contributions to the development of the clinical campus at UKSM - Wichita, the award is given to a student whose academic performance reflects a dedicated commitment to the scholarly acquisition and effective application of knowledge.

The Helmuth Sprinz Award is presented to a senior medical student whose academic achievements epitomize the spirit of Dr. Helmuth Sprinz. Dr. Sprinz was a distinguished faculty member of the KU School of Medicine from 1976 until his death in 1990. He was tireless in his effort on behalf of students, house staff, and faculty. He was particularly fond of working with, helping, and supporting students who were willing to expend extra effort to achieve their goals. Before joining the KU faculty, Dr. Sprinz enjoyed a distinguished career as a research pathologist and was Chief of Experimental Pathology at Walter Reed Army Institute of Research.

The Walter S. Sutton Prize is given annually to the medical student whose work in original research, preferably in genetics, is considered outstanding by the research committee. An honorable mention award is also made.

The W. Clarke Wescoe Award is presented to a senior student in recognition of outstanding achievement and the pursuit of excellence in the study of pharmacology and therapeutics. W. Clarke Wescoe, M.D., was a former chair and professor of pharmacology, former dean of the School of Medicine, former KU Chancellor, and former Chairman of the Board of Sterling Drug, Inc.

The Edward V. Williams Award is presented to a minority medical student who best reflects the integrity, compassion, and commitment to patient care exemplified by Edward V. Williams, M.D. Dr. Williams was the first African American to receive a medical degree from KU. He serves as an inspiration to future generations of students and countless others to achieve beyond expectations.

Curriculum

Curriculum Diagram (http://catalog.ku.edu/medicine-doctorate/curriculum/Curriculum_diagram_7-21-14.doc)

Core SOM Preclinical Phase

CORE 800. Foundations of Medicine. 0-8 Hours.
Foundations of Medicine is an 8-week, multidisciplinary course, taught by faculty members from basic science and clinical departments. This course integrates materials from the traditional disciplines of biochemistry, cell and molecular biology, histology, physiology, epidemiology, behavioral science, and preventive medicine. This course includes clinical skills instruction in medical history, physical examination, and cultural sensitivity. Patient cases are used where appropriate. Students partipate in small group discussions, problem-based learning sessions, laboratory exercises, clinical correlations, and lectures: they work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are evaluated by multiple-choice examination, clinical evaluation, and group activity preparation and participation.

Prerequisites: Medical School admission requirements. LEC.

CORE 805. Genetics and Neoplasia. 0-4 Hours.
This 4-week multidisciplinary course, taught by both basic science and clinical faculty, covers the molecular and chromosomal basis of human genetic disease, emphasizing the clinical significance of normal and abnormal genetic variation; single-gene and multifactorial diseases; and conditions caused by somatic mutation and epigenetic mechanisms. An emphasis is placed on neoplastic disorders. This course also examines the predictive value of genetic testing and the role of genetic counseling in clinical decision making; the principles of cancer therapeutics; and gender, ethnic, and behavioral considerations affecting prevention and treatment of cancer and other genetic diseases. This course includes clinical skills instruction in history-taking and physical examination of a standardized cancer patient. Students participate in large and small group discussion, laboratory exercises, problem based learning sessions, clinical correlations, clinical skills lab sessions, and lectures; and are evaluated by small group and clinical skills performance, and by USMLE-style objective examinations. Prerequisite: Successful completion of
Foundations of Medicine or permission of Associate Dean for Student Affairs. LEC.

CORE 810. Inflammation and Immunity. 0-4 Hours.
This 4-week multidisciplinary course, taught by faculty members from the Departments of Anatomy & Cell Biology, Microbiology, Pathology, Medicine, Family Medicine and Preventive Medicine, addresses the basic biology of the normal immune system and the basis for immunebased and inflammatory diseases. Topics will include normal lymphopoiesis and myelopoiesis, responses to infection, autoimmunity, allergy, transusions and transplantation, immune deficiencies and the appropriate therapies for these conditions. Therapies will include immunosuppressives, anti-inflammatory agents, vaccines and transplantation. The course integrates instruction on disease pathogenesis with clinical skills instruction (including history-taking and physical examination skills), considerations of epidemiological, ethical, social science aspects of medicine, disease prevention and the general approaches to therapy. Students participate in small group discussions, web-based instruction, labs, clinical skills lab sessions, and lectures. Students are evaluated based on their participation in small group discussion sessions and through standardized online summative examinations. Prerequisite: Successful completion of Foundations of Medicine, Genetics and Neoplasia, or permission of Associate Dean for Student Affairs. LEC.

CORE 815. Cardiopulmonary. 0-8 Hours.
This multidisciplinary course, taught by faculty members from Anatomy, Biochemistry, Medicine, Pathology, Pharmacology, and Physiology covers the normal/abnormal processes; principles of therapeutics; and gender, ethnic, and behavioral considerations affecting disease treatment and prevention of the cardiopulmonary system. This course also includes clinical skill instruction of patient interviewing and examination. Students participate in small group discussions, laboratory exercises, clinical correlations, clinical skills lab sessions, lectures and web-based directed self-study and are evaluated by performance in small groups and on exams. Prerequisite: Successful completion of Foundations of Medicine, Genetics and Neoplasia, Inflammation and Immunity, or permission of Associate Dean for Student Affairs. LEC.

CORE 820. Gastrointestinal System and Nutrition. 0-4 Hours.
This 4-week multidisciplinary course is taught by faculty members from the Departments of Anatomy and Cell Biology, Molecular and Integrative Physiology, and Pathology and Laboratory Medicine, Biochemistry and Molecular Biology, Pharmacology, Toxicology, and Therapeutics, Internal Medicine, Preventive Medicine, History and Philosophy of Medicine, Health Policy Management, Microbiology, Molecular Genetics, and Immunology, Family Medicine, and Surgery in the School of Medicine and the Department of Dietetics and Nutrition in the School of Allied Health. The course covers the normal/abnormal processes; principles of therapeutics; and gender, ethnic, and behavioral considerations of disease treatment and prevention of the gastrointestinal system including nutrition. This course also includes clinical skills instruction in the abdominal physical examination. Students participate in small group discussions, laboratory exercises, clinical correlations, clinical skills lab sessions, and lectures are evaluated by written tests, oral exams, and assessment of PBL and clinical skills performance. Prerequisite: Successful completion of Foundations of Medicine, Genetics and Neoplasia, Inflammation and Immunity, Cardiopulmonary, or permission of Associate Dean for Student Affairs. LEC.

CORE 825. Renal and Endocrine System. 0-4 Hours.
This 4-week multidisciplinary course, taught by faculty members from Anatomy, Biochemistry, Medicine, Pathology, Pharmacology, and Physiology covers the normal/abnormal processes; principles of therapeutics; and gender, ethnic, and behavioral considerations affecting disease treatment and prevention of the renal and endocrine systems. This course also includes clinical skill instruction of patient interviewing and examination. Students participate in small group discussions, laboratory exercises, clinical correlations, clinical skills lab sessions, lectures and web-based directed self-study and are evaluated by performance in small groups and on exams. Prerequisite: Successful completion of Foundations of Medicine, Genetics and Neoplasia, Inflammation and Immunity, Cardiopulmonary, Gastrointestinal Tract and Nutrition or permission of Associate Dean for Student Affairs. LEC.

CORE 830. Reproduction and Sexuality. 0-4 Hours.
This 4-week multidisciplinary course module is taught by faculty members from the Departments of Anatomy and Cell Biology, Pathology, Psychiatry and Behavioral Sciences, Gynecology and Obstetrics, Surgical Oncology, Urology, and Family Medicine. The course covers the normal/abnormal aspects of human reproduction and sexuality; principles of therapeutics; gender, ethnic, and behavioral considerations affecting sexual function; prevention and treatment of reproductive and sexual disorders. The course also includes clinical skill instruction in sexual history-taking and physical examination. Students participate in small group discussions, laboratory exercises, clinical correlations, patient and provider panels, clinical skills laboratory sessions, lectures, and web-based learning opportunities, and are evaluated by means of formative and summative examinations and assessment of participation in various learning activities. Prerequisite: Successful completion of Foundations of Medicine, Genetics and Neoplasia, Inflammation and Immunity, Cardiopulmonary, Gastrointestinal Tract and Nutrition, Renal and Endocrine Systems, or permission of Associate Dean for Student Affairs. LEC.

CORE 835. Musculoskeletal & Soft Tissue Systems. 0-4 Hours.
The (4-5) week multidisciplinary course, taught by faculty members from (Anatomy and Cell Biology, Orthopedic Surgery, Pathology, Pharmacology, Internal Medicine, Family Medicine, and Pediatrics departments), covers the normal/abnormal processes; principles of therapeutics (non-drug treatment will be emphasized); and gender, ethnic, and behavioral considerations affecting disease treatment and prevention of diseases of the musculoskeletel & soft tissue systems). This course also includes clinical skill instruction in an extremities physical examination. Students participate in small group discussions, laboratory exercises, clinical correlations, clinical skills lab sessions, and lectures and are evaluated by exams, attendance, participation, and professional behavior. Prerequisite: successful completion of the first year curriculum. LEC.

CORE 840. Brain and Behavior. 0-8 Hours.
This 8 week multidisciplinary course, taught by faculty members from Anatomy and Cell Biology, Molecular and integrative Physiology, Otolaryngology, Neurology, Pharmacology, Pathology, Internal Medicine, and Psychiatry, covers the normal/abnormal processes of the central and peripheral nervous system, including an introduction to the principles of therapeutics. The course combines and integrates several disciplines, including neuroanatomy, neurophysiology, neuropathology, introductory neuropharmacology, basic neurology and psychiatry. Prerequisite: Successful completion of Musculoskeletal & Soft Tissue Systems or permission of Associate Dean for Student Affairs. LEC.

CORE 845. Blood and Lymphoid System. 0-4 Hours.
This 4 week multidisciplinary course, taught by faculty members from Pathology and Laboratory Medicine, Internal Medicine, Pharmacology, and History and Philosophy of Medicine covers the normal/abnormal processes; principles of therapeutics; and gender, ethnic, and behavioral considerations affecting disease treatment and prevention of the blood and lymphoid system. The course also includes clinical skill instruction in history-taking and physical examination. Students participate in
lectures, problem-based learning sessions, and small group discussions. Students are evaluated by multiple choice examination and group activity preparation and participation. Prerequisites: Successful completion of Musculoskeletal & Soft Tissue Systems, Brain and Behavior or permission of Associate Dean for Student Affairs. LEC.

CORE 850. Infectious Diseases. 0-6 Hours.
This 6-week multidisciplinary course, taught by faculty members from the Departments of Pharmacology, Microbiology, Pathology, Internal Medicine, and Preventive Medicine, addresses the basic biology of the normal immune system and the basis for infectious and parasitic diseases. Topics will include normal immune responses to infection, immune deficiencies, bacteriologic, viral, fungal and parasitic infections, and the appropriate therapies for these conditions. Therapies discussed will include immunosuppressives, anti-microbials, and vaccines. The course integrates instruction on disease pathogenesis with clinical skills instruction (including history-taking and physical examination skills), consideration of epidemiological, ethical, social science aspects of medicine, disease prevention and the general approaches to therapy. Students participate in small group discussions, web-based instruction, labs, clinical skills lab sessions, and lectures. Students are evaluated based on their participation in small group discussions and through standardized online summative examinations. Prerequisites: Successful completion of Phase I, or permission of Associate Dean of Student Affairs. Successful completion of Musculoskeletal & Soft Tissue Systems, Brain and Behavior, Blood and Lymphoid System or permission of Associate Dean for Student Affairs. LEC.

CORE 860. Integration and Consolidation. 0-8 Hours.
This 8-week multidisciplinary module, taught primarily by faculty members from Pathology and Pharmacology, will consolidate and integrate materials from previous modules using pathophysiology and therapeutics as the focal point to highlight content required to successfully pass USMLE Step 1. The module will serve as a bridge between the basic and clinical sciences, as the students prepare to transition to clinical rotations. Faculty from Internal Medicine, Family Medicine, and School of Pharmacy will co-facilitate small group discussions. Students will be expected to participate in small group discussions, lectures and web-based self-study, and are evaluated by their overall performance in small groups and summative exams. Prerequisite: Successful completion of Musculoskeletal & Soft Tissue Systems, Brain and Behavior, Blood and Lymphoid System, Infectious Diseases, or permission of Associate Dean for Student Affairs. LEC.

Course credit hours are indicated after the course title.

Kansas City Clinical Required Course Descriptions

Third Year Requirements

FAPR 955. Family Medicine Clerkship. 0-8 Hours.
Students are introduced to the principles and practice of family medicine. They spend the majority of their time participating in the practice of a private family physician where they evaluate patients under direct supervision and recommend management. This practice experience is enhanced by case-based seminars and skills-based workshops with faculty and hospital call with family medicine residents. Evaluation is based on assessment by clinical supervisors, projects, a departmental exam, and the NBME Family Medicine Subject Exam. Prerequisites: Completion of Phase I (Years 1 and 2). CLN.

GERO 900. Geriatric Medicine Clerkship. 4 Hours.
This required 4-week Year 3 clerkship is sponsored by the Landon Center on Aging in collaboration with the Departments of Family Medicine, Internal Medicine, and Physical and Rehabilitation Medicine. The student will participate in the evaluation and care of older adults, with emphasis on the aging process and geriatric syndromes in both frail and successfully aging older adults. Students participate as a member of the health-care team in the medical practices of primary care physicians and geriatricians providing care to older adult patients. They help provide ambulatory care to older adults, as well as care in a variety of community-based long term care settings such as assisted living and nursing facilities, hospice, and home care. By the conclusion of this clerkship the students will be able to describe how to identify and address geriatric syndromes, expected decline of organ functions with aging, behavioral characteristics of the aged, special problems of drug treatment of older adults, and special strategies for providing medical care to complex older adult patients. Clinical experiences are augmented by web-based modules on geriatric topics, facilitated case discussions, and workshops. Evaluation is based on assessment of clinical performance by faculty members, an objective structured clinical exam, seminar participation, and a departmental written exam. Prerequisites: Medical Basic Science and Completion of Phase I (Years 1 and 2). CLN.

GYNO 900. OBSTETRICS/GYNECOLOGY CLERKSHIP. 0-6 Hours.
During this clerkship the student develops understanding of disease in women through history, physical examination, and laboratory studies. The clerkship includes study of biochemical, anatomical, and physiological changes of normal pregnancy and the effect of disease in altering the course of reproduction. Prerequisite: Medical Basic Sciences. FLD.

ICM 900. Issues in Clinical Medicine. 0 Hours.
This course enables students to apply the theoretical framework developed in ICM 801/802 and 850/851 to the patient care activities in which they participate during third-year clerkships. Through lectures and small group discussions students examine the ethical, legal and social aspects of medical practice and application of key principles to clinical practice. Students also explore career opportunities in medicine and factors to be considered in choosing a medical specialty. Students are evaluated through written assignments and participation in course activities. LEC.

MED 900. Internal Medicine Clerkship. 0-8 Hours.
General medicine orientation. Students will be assigned to Kansas University Medical Center, Bethany Medical Center, and Kansas City Veterans Administration Hospitals. FLD.

NEUR 900. Neurology Clerkship. 4 Hours.
The required four-week Neurology Clerkship is intended to familiarize students with the diagnosis and treatment of major neurological disorders. Effective interviewing and diagnostic skills, and competent performance of the neurological examination are emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Prerequisites: Completion of Phase I (Years 1 and 2). CLN.

PED 900. GENERAL PEDIATRICS CLERKSHIP. 0-6 Hours.
The student's activities will include rotations on the pediatric inpatient wards (taking histories, examining children, and making daily ward rounds with staff physicians) and the outpatient clinics and newborn nursery. Student evaluations are based primarily upon clinical performance, assessment of problem-solving skills and performance on a written multiple-choice examination given at the end of the clerkship. Offered in
modules I and II, III and IV, V and VI, VII and VIII, IX and X, XI and XII. Prerequisite: Medical Basic Sciences. FLD.

**PYCH 955. Psychiatry Clerkship. 4 Hours.**
The required four-week basic Psychiatry Clerkship is intended to familiarize students with the diagnosis and treatment of major psychiatric disorders. Effective interviewing and diagnostic skills, and competent performance of the mental status examination is emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Prerequisites: Completion of Phase I (Years 1 and 2). CLN.

**SURG 900. Junior Surgery Clerkship. 0-8 Hours.**
Surgical problems and diseases are studied utilizing lectures, skills laboratory experiences, study questions, clinical problem discussion and live patients. This course prepares the student to meet the pertinent aspects of the summative competencies of the University of Kansas School of Medicine during the third year of Medical School. A particularly useful goal of this course is to teach the student to identify life-threatening conditions that require urgent intervention. Although the skills of this course are necessary for an ambulatory practice, the skills that are taught in this course are most frequently seen and performed in the hospital setting. The student is expected to have a basic understanding of normal and abnormal body function. The student is expected to have completed successfully the basic course in physical diagnosis (years 1 and 2 of medical school). Prerequisite: first and second year medical years. LEC.

**Fourth Year Requirements**

**PMED 960. Population Health in Practice. 4 Hours.**
This required clerkship is designed to instruct fourth-year medical students about population-based approaches to health care and to facilitate the application of epidemiologic principles to clinical decision making. Using some of the basic concepts described under the auspices of community oriented primary care, students will learn how to define specific populations, ascertain their health care needs, formulate interventions to meet those needs and evaluate the impact of those interventions. Learning opportunities will develop and reinforce concepts related to health services organization and delivery, community dimensions of medical practice, occupational and environmental medicine, health care finances, access to medical care, and quality of medical care. This clerkship will include didactic teachings supplemented by course reading material and workshops that involve care studies and site visits. Learning experiences will allow the student to examine what it means for a physician to be part of a community and to explore the role that the community plays in the health of an individual. Practical application of course material will be emphasized. Prerequisite: Completion of third-year medical school curriculum. CLN.

**FAPR 900. Rural Preceptorship. 4 Hours.**
Since 1951 all medical students have completed, as a requirement of graduation, a rural preceptorship of at least four weeks with a practicing physician in the state of Kansas. The emphasis of the preceptorship is rural primary care (family medicine, general internal medicine and general pediatrics). Rural placements are made by the Course Administrator. The preceptor or site will provide housing while the student is on this rotation. The preceptor will expect the student to participate in all phases of professional life as a rural physician. Most sites have the student work in ambulatory clinic, hospital care, ER, nursing home, house calls, and night call. Students also are expected to participate in the civic, administrative and social activities of their preceptor. The preceptor will evaluate student performance based on school of medicine criteria. At the completion of the course the student will have: a working knowledge of the rural health care system, an understanding of the function of a physician in the context of community and an appreciation for the support systems needed for practice in rural Kansas. Offered in Modules I-XII. Prerequisite: Completion of year 3 clinical clerkships. IND.

**Subinternships (4)**
The four-week subinternship gives medical students an opportunity to become more proficient in a specific area of medicine. They provide a more comprehensive course than that of the third-year required course. Students select one of the following options to fulfill the requirement.

**FAPR 901. Subinternship in Family Medicine. 4 Hours.**
This clerkship is designed to prepare students for the responsibilities encountered as a first-year resident. Students will be required to perform the following: 1) actively participate in the management of a panel of inpatients on the Family Medicine Service, 2) participate in the care of outpatients in the Family Medicine Clinic, 3) take one in-house call weekly, and 4) take one OB call weekly. In fulfilling these responsibilities, some weekend participation will be necessary. Students will be expected to complete the same objectives listed in FAPR 950, but do so in an advanced manner incorporating a well-developed and organized approach to multifaceted clinical issues accompanied with a keen perception of non-clinical factors involved in Family Practice. A resident level examination will be administered covering both inpatient and outpatient topics. LEC.

**GYNO 901. Subinternship in Obstetrics and Gynecology. 4 Hours.**
The objective of this clerkship is to provide students with advanced experience in obstetrics and gynecology. Students will be assigned to the Obstetrics and Gynecology Service at KUMC. Students will participate in the management of common obstetrical and gynecologic conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Subinternship Selective requirement. LEC.

**MED 908. Subinternship in Internal Medicine. 4 Hours.**
The objective of this clerkship is to provide students with advanced experience in the management of acutely ill medical patients. Students will be assigned to one of five locations: KUMC; the Kansas City VAMC; the Leavenworth VAMC; or St. Catherine’s Hospital, Garden City. Students will participate in the diagnosis and treatment of common medical conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Subinternship Selective requirement. LEC.

**OTOR 901. Subinternship in Otolaryngology. 4 Hours.**
The objective of this clerkship is to provide students with advanced experience in otolaryngology. Students will be assigned to the Otolaryngology Service at KUMC. Students will participate in the management of common ENT conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Subinternship Selective requirement. LEC.

**PED 910. Subinternship in Pediatrics. 4 Hours.**
This selective is an extension of the basic pediatric clerkship. It is designed to permit senior medical students to take increasing responsibility of patient care under close supervision of the faculty. Students will learn skills in patient management by active participation in the daily activities of the pediatric residency program. This selective is entirely clinical. The student will work on the Pediatric Inpatient Unit at KUMC. Student performance will be evaluated by the faculty based on factual knowledge, practical skills, problem-solving abilities, and personal
behavior and values. On the first day of the rotation, students will report to
the senior pediatric resident assigned to the pediatric floor. Prerequisite:
PED 900 or equivalent. LEC.

PED 914. Philmont Adolescent Medicine. 4-8 Hours.
The Philmont Adolescent Medicine experience is in the high altitude
environment at Philmont Scout Ranch in New Mexico. Students
learn health screening, care of sports injuries, and diagnosis and
management of pediatric, medical, surgical, gynecologic problems,
primarily of teenagers, but also of children and adults. Supervision of
students consists of faculty members from Medicine Pediatrics, Surgery,
Neurology, Family Practice, Gynecology, and Physical Medicine in an
effort to give well rounded educational guidance to the students.
National Board, Part 1, must be passed in order to receive clinical elective
credit. One four week experience only counts toward clinical electives
requirements. Permission of Instructor. Prerequisite: Physical Diagnosis,
Pathology and Pharmacology. FLD.

PED 918. Pediatric Subinternship Selective - Outpatient. 4 Hours.
This selective is an extension of the basic pediatric clerkship. It
is designed to permit senior medical students to take increasing
responsibility of patient care under close supervision of the faculty.
Students will learn skills in patient care by active participation in the daily
activities of the pediatric outpatient clinic. This selective is entirely clinical.
The student will work in the Pediatric Outpatient Clinic at KUMC in a
variety of clinics. The specific clinics will be assigned by the Chief of the
Ambulatory Pediatric Section after consultation with the student. Student
performance will be evaluated by the faculty based on factual knowledge,
practical skills, problem-solving abilities, and personal behavior and
values. This course can still be taken for elective credit even if a student
already has met the subinternship selective requirement. Prerequisite:
PED 900 or equivalent. FLD.

PYCH 901. Subinternship in Psychiatry. 4 Hours.
The student will function as an intern on the Adult and Child Psychiatric
Services at the University of Kansas Medical Center and Kansas City VA
Hospital. Each student will work closely with faculty and residents and will
have an important role in the team care of hospital patients. The course is
designed to provide a transitional experience between the predoctoral and
residency stage of medical education allowing the student the opportunity
to take more responsibility for patients with support and active teaching
provided by faculty and residents. LEC.

SURG 900. Surgery Subinternship-Neurosurgery. 4 Hours.
This course is designed to provide advanced experience to the student
in the management of neurosurgical problems. The student is assigned
to the neurosurgical service at the University hospital for four weeks.
Students will participate with the surgical team in daily rounds, diagnosis,
out-patient experience, operative experience and post-operative
management of neurosurgical patients. Emphasis is placed on an
understanding of neurologic disease with special emphasis in physical
exam and diagnosis, management of basic neurosurgical emergencies
and management of common neurosurgical problems. Accommodates
three students in Modules I-XII. Prerequisite: SURG 900 and MED 900.
LEC.

SURG 910. Surgery Subinternship-Urology. 4 Hours.
This course is designed to provide advanced experience to the student
in the diagnosis and management of genitourinary disease. The student is
assigned to the Urology Service at KUMC or the VA Hospital for 4
weeks. Students are expected to participate with the urologic patients.
It is expected that the student will participate, as possible, at a resident
level of responsibility. Ward rounds, clinical conference, seminars and
case studies supplement clinical experience. The student participates
directly in patient care on the ward, in the out-patient department, and in
the operating room. Emphasis is placed on an understanding of alterations
in physiology secondary to pathology, management of fluids and
electrolytes, basic elements of pre- and post-operative care, and diseases
amenable to surgical treatment. In addition, concepts taught during
Surgery 900 are reemphasized and considered in more detail. We can
accommodate two students at KUMC and two students at VAH. This will be offered in Modules I-XII.
Prerequisite: SURG 900 and MED 900. FLD.

SURG 915. Subinternship-Orthopaedic Surgery. 4 Hours.
This subinternship is designed to allow the student to participate in
orthopedic clinical care. The student is assigned to the orthopedic
surgical service at KUMC for four weeks. The student participates with
the orthopedic surgery team in the diagnosis, surgical treatment and
postoperative management of orthopedic patients. The student will
participate directly in care of patients in the emergency department,
operating room, intensive care unit and orthopedic ward. Emphasis is
placed on the understanding of pre-op, intra-op and postop care of the
orthopedic patient. There is a limit of 4 students per rotation. Prerequisite:
Successful completion of basic clinical clerkships. CLN.

Critical Care (4)
The four-week critical care selective presents the knowledge, skills, and
attitudes required to care for very ill hospitalized patients. This allows the
student to focus on an interest in a particular specialty and ensures that all
students have basic knowledge and skills in critical care. Students select
one of the following options to fulfill the requirement.

Critical Care (4)
ANES 911. Critical Care: Post-Anesthesia Unit. 4 Hours.
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Post-Anesthesia Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

MED 905. Critical Care: Coronary Care Unit. 4 Hours.
The objective of this clerkship is to provide students with experience in the management of critically ill patients with cardiovascular disorders. Students will participate in the diagnosis and treatment of patients in the KUMC or Kansas City VAMC Coronary Care Unit. Clinical work will be supplemented by conferences, formal and informal lectures and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

MED 912. Critical Care: Medical Intensive Care Unit. 4 Hours.
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC or Kansas City VAMC Medical Intensive Care Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

PED 926. Critical Care: Neonatology. 4 Hours.
The student will be actively involved in the care and management of the high-risk and acutely ill neonate. Through a clinical participation, tutorial sessions and assigned reading emphasis will be placed on modern neonatal intensive care techniques and developmental physiology and biochemistry. Students may elect additional consecutive four-week periods to pursue aspects of neonatology in more detail, engage in investigative projects or acquire first-hand experience in the operation of a regionalized program for care of high-risk or acutely ill neonates in the state. Students wishing this additional four weeks should contact the Pediatric Department. LEC.

PED 930. Critical Care: Pediatric Intensive Care Unit. 4 Hours.
Principles of ongoing assessment and management of critically ill children with single and multiple organ failure will be presented. The teaching format will be formal and informal rounds at the bedside in the KUMC Pediatric ICU by faculty members of the Pediatric Critical Care Division. Integration of history-taking, physical examination skills, and laboratory and radiological assessment with pathophysiology will be emphasized. LEC.

SURG 927. Critical Care: Burn Center. 4 Hours.
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Burn Center. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

SURG 928. Critical Care: Neurosurgical Intensive Care Unit. 4 Hours.
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Neurosurgical Intensive Care Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

SURG 929. Critical Care: Surgical Intensive Care Unit. 4 Hours.
The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Surgical Intensive Care Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

Surgery (p. 2088)

Anatomy

Chair: Dale R. Abrahamson, Ph.D.

ATMY 910. Readings in Anatomy. 1-4 Hours.
Enrollees will select an area of major personal interest and narrow their efforts to some accepted idea in that field. They will delve into the support for this idea by all means available to them, be it scientific literature, opinions of practicing physicians and other medical scientists, or chart review, to come up with an evaluation that they consider satisfactory. The selected subject of interest can deal with any area of medicine since this is to be primarily an experience that promotes motivation for self-learning. Offered in Modules I-XII. LEC.

ATMY 915. Advanced Topics. 2-4 Hours.
Special studies which allow students to further their training in one or more areas. Assignments are tailored to fulfill the needs of the individual and usually include readings and laboratory work guided by frequent conferences with an advisor. Offered in modules I-XII. Prerequisite: Permission of department. IND.

ATMY 920. Research. 4 Hours.
Original independent study of a problem approved by the student's advisor or advisory committee. Offered in modules I-XII. Prerequisite: Permission of department. IND.

Anesthesiology

Chair: Talal W. Khan, M.D., Interim

Students may enroll in an elective module in which an experience in clinical anesthesia is offered, including the administration of anesthetics
under supervision. The student becomes proficient in the placement of peripheral intravenous lines and endotracheal tubes. The opportunity to place central venous lines and intra-arterial lines, as well as other critical care procedures, may also be provided. Lectures and case conferences are presented, enabling the student to manage patients with renal failure, chronic pulmonary disease, coronary artery disease, neuromuscular diseases, and central nervous system diseases. The student also becomes familiar with the basic concepts of cardiopulmonary resuscitation and has the opportunity to participate in the treatment of patients with chronic pain.

**ANES 910. Anesthesiology. 4 Hours.**
Students will work in the operating room suite in the mornings under the direct supervision of an instructor in anesthesia and will be made to feel that they are part of the cooperative, expert team caring for each patient. In addition, the basic fundamentals of anesthesiology will be taught by means of lectures, seminars, and conferences in the afternoons, as well as through clinical situations. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. LEC.

**ANES 912. Special Topics in Anesthesiology. 4 Hours.**
This elective is designed to provide the clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with department faculty, specific objectives, reading assignments, and the mechanism for student evaluation. Prerequisite: Medical basic sciences and departmental consent. CLN.

**Biochemistry**
Chair: Gerald Carlson, Ph.D.

The Department of Biochemistry and Molecular Biology is dedicated to the advancement of knowledge of living systems at the molecular level and expanding the knowledge base of molecular medicine.

**BIOC 910. Topics in Biochemistry and Molecular Biology. 1-4 Hours.**
Special studies in a selected area of interest. Assignments may involve scholarly activity such as reading, writing, or small group discussions. Prerequisite: Permission of department chairperson. LEC.

**BIOC 913. Research in Biochemistry and Molecular Biology for Medical Students. 1-8 Hours.**
Selected research problems with emphasis on biochemistry and molecular biology. Offered in Modules I-XII. Prerequisite: Permission of department chairperson. IND.

**Cardiothoracic Surgery**

**CTSU 910. Cardiotoracic Surgery. 4 Hours.**
Stressing pre-operative assessment and post-operative management. This elective module will allow the student to develop his/her skills in diagnosis of cardiac disease, interpretation of cardiac catheterization and arteriographic data, and management of patients undergoing cardiothoracic surgery. Participation in consultations, follow-up clinics, and conferences with cardiologists will be expected. Offered in modules I-XII. Prerequisite: SURG 900 and MED 900. CLN.

**Diagnostic Radiology**
Chair: Philip Johnson, M.D.

The diagnostic radiology department actively participates in all four years of the curriculum. The first year correlates radiology with anatomy as part of the presentation of the Department of Anatomy and Cell Biology. Various types of X-rays and imaging studies including vascular studies, MRI, and CT demonstrate the necessity of a firm foundation in anatomy and illustrate how changes in anatomy form the foundation of disease processes. This brings anatomy and the patient to a meaningful manner. During the third and fourth years, the department offers educational programs in four-week modules. Students serve rotations in radiology and nuclear medicine. Students receive basic instruction in principles of radiology and its different modalities and observe the tools and methodology of imaging. Radiology conferences are given daily and weekly as part of other departmental curricula, such as neurosurgery, neurology, cardiology, pediatrics, medicine, orthopedics, and gastroenterological conferences. The student is trained and guided in accumulating knowledge and skill in the imaging diagnosis of disease.

**DIAG 910. Diagnostic Radiology. 4 Hours.**
The student will work in all phases of diagnostic radiology including gastrointestinal, neuroradiology, pediatric radiology, cardiovascular and special procedure radiology. Offered in Modules I-IV, VII-XI. Prerequisite: Medical Basic Sciences. FLD.

**DIAG 911. Nuclear Medicine-University of Kansas Medical Center or Veteran Administration Hospital, Leavenworth. 4 Hours.**
The student will participate in examination of patients and use of radioisotopes in diagnosis (scanning techniques) and treatment. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. FLD.

**DIAG 913. Radiological Research. 4 Hours.**
Students may work with radiology staff in any of the following areas: radiological sciences, health physics, radiation biology, application of computers to radiology, radiological engineering, clinical research. Offered in modules I-XII. Prerequisite: Consent of instructor. IND.

**Emergency Medicine**
Chair: Dennis Allin, M.D.

**ERMD 919. Clinical Clerkship in Emergency Medicine. 4 Hours.**
This course will instruct students in the evaluation, management, and disposition of patients presenting to the Emergency Department with undifferentiated complaints. Students will be expected to evaluate patients of all groups and develop treatment plans under the direct supervision of Emergency Medicine faculty. In addition, students will actively participate in the resuscitation and stabilization of critically ill and traumatized patients. Prerequisite: SURG 900, MED 900, GYNO 900, PED 900, CLN.

**ERMD 921. Emergency Ultrasound. 4 Hours.**
Emergency ultrasound allows for rapid and accurate diagnostic information that can have significant benefits to patient outcomes. It involves performing and interpreting ultrasound at the patient’s bedside and is used to rapidly triage, diagnose, and treat medical conditions in modern emergency departments around the country. This course will instruct students interested in Emergency Medicine in the skills necessary to perform and interpret point-of-care ultrasound examinations. Students will be expected to learn the basic principles of point of care ultrasound, to recognize the indications of point of care ultrasound, and also to develop proficiency in performance and interpretation of the basic point of care ultrasound examinations performed in the Emergency Department. CLN.

**Family Practice**
Chair: Joshua Freeman, M.D.
Family practice is comprehensive, continuous medical care regardless of the age, sex, or affected organ system of the patient. It emphasizes the preventive aspects of health care and treatment of the patient in context of his or her family and community. Treatment of the whole person is a hallmark of family practice.

FAPR 905. Rural Family Medicine - Practice and Research. 4 Hours.
This elective is offered to students between the first and second years of medical school. It is designed to provide students with the opportunity to observe a rural family physician in the daily practice of medicine and to participate in the data collection involving delivery of medical care to patients seen in rural practices in Kansas. Students will spend two summer months on site with a rural family physician, observing the practice and performing data collection. At the beginning and end of the two month on site experience, students will spend eight days with faculty in the Department of Family Practice at KUMC. Prerequisite: Permission of the instructor. FLD.

FAPR 910. Clerkship in Family Medicine. 4 Hours.
The instructional objectives of the elective clerkship in family practice are to build on the skills and knowledge accumulated in the basic science areas and the other clinical specialty areas and reinforce them and apply them to the delivery of health services to the family unit and relate them to the individual, the family and the community. The clerkship, through supervised patient contact within the hospital and in the Family Practice Center and supervised teaching conferences, will amalgamate and reinforce the skills and previously gained clinical knowledge into the philosophy of primary health care delivery in breadth rather than depth. Offered in Modules I-XII. Prerequisite: Completed third year. FLD.

FAPR 915. Medicine and the Family. 2 Hours.
This elective course on medicine and the family teaches students about family dynamics as they relate to the practice of medicine. Specifically, the course focuses on the family life cycle, normal and dysfunctional families, marriage, "normal" sexual behavior, and sexual dysfunction. These concepts will be applied to an understanding of such common medical issues as: family planning, disability, health screening, risk factors, death and dying, and child safety. Students will also be encouraged to learn about their own families by completing genograms, "family circles," etc. Students will be graded via two examinations, one completed written project, and class attendance. Prerequisite: Permission of instructor. FLD.

FAPR 920. Research in Family Practice. 2-8 Hours.
Students desiring basic research experience in the context of Family Medicine may seek the sponsorship of a Family Practice faculty member and with that individual develop a written plan for the elective. The elective may vary in length from two weeks to three months and carries with it one credit hour for each sixty hours of time spent on the elective. Elective not available during July. FLD.

FAPR 925. Interdisciplinary Community Partnership. 4 Hours.
This course is designed as an interdisciplinary team approach to developing strategies for community health assessment and intervention. Students will work with a team that includes at least three other health professional students and at least one community "lay health advisor" to assess the health needs of a local neighborhood and develop and implement an appropriate intervention. The course will explore community needs and resources, assess and barriers to care, and culturally appropriate interventions. No courses currently exist which involve an equal partnership with medicine, allied health, social work and nursing.
This course is designed to give students the opportunity to learn to work as a team member with a variety of health care professionals, and to understand the valuable contribution of each group. Research has shown that students who are involved in the community during medical school continue to be actively involved in their chosen communities. This course is developed in concert with KU's Schools of Nursing, Allied Health and Social Welfare. This first year, two interdisciplinary teams will be assembled, working with 2 neighborhoods in the vicinity of KUMC. If this pilot is successful, more communities and teams will be assembled in future years. This is a year-long course that will span both fall and spring semesters. LEC.

FAPR 926. AIDS Care in the Community. 4 Hours.
This elective is a concentrated experience in AIDS medical care provided in a family practice setting. The focus is on diagnosis, treatment and psycho-social issues for men, women and children with HIV disease (including gynecologic, prenatal and delivery of infected women). Care throughout the spectrum of disease is emphasized. The course is an additional elective to be made available to clinical medical students in the fourth year of training. LEC.

FAPR 927. Palliative Care in a Community Setting. 4 Hours.
This elective is an end-of-life medical care experience including identification and treatment of medical problems associated with cancer, CHF, COPD, AIDS, and other life-shortening diseases. The course focus is on symptom management and psycho-social issues associated with dying. This course is an additional elective to be made available to clinical medicine students in the fourth year of training. LEC.

FAPR 935. PRIMARY CARE SPORTS MEDICINE. 4 Hours.
Students on this rotation will have the opportunity to learn the principles of primary care sports medicine. The rotation will be outpatient based and will include learning experiences in the sports medicine clinic, at the training room, and on the sidelines of high school and college sporting teams. Specific learning experiences will vary based on the sporting events that are available during the time of the elective. PREREQUISITE: Students must have completed all required third-year clerkships to participate in this elective. CLN.

FAPR 961. Community Based Geriatrics. 4 Hours.
Students on this rotation will have the opportunity to learn the principles of caring for older patients. The rotation will be based at the Landon Center of Aging and will include educational experiences in outpatient clinic, long-term care facilities, assisted living facilities and with hospice. This elective experience will build on the Year 3 Geriatrics clerkship by allowing the student to further develop their understanding and management skills in the care of older adults across the health care continuum. Students are invited to individualize their experience through a focus on a particular care setting or aspect of older adult care by arrangement with the clerkship director. CLN.

FAPR 962. Advanced Clinical Reasoning Skills. 2 Hours.
Clinical reasoning is a critical, often-underdeveloped skill in practicing physicians. Diagnostic errors are common among physicians and residents. In this course, you will learn to recognize common clinical reasoning errors, develop practice habits to help you improve your clinical reasoning, and develop reflective habits that help you determine why an error was made. You will learn how specific history, physical examination, and ancillary testing items make certain diagnoses more or less likely. This course will meet 10 times for 2 hours during a semester with course work between meetings. PREREQUISITE: Satisfactory completion of 6 months (4 six-week or 3 eight-week) of clinical clerkships. Concurrent clinical rotations for a minimum of 8 weeks over the semester. CLN.

FAPR 963. Cross-cultural Health Leadership Module I: Didactic. 1 Hour.
Cross-culturally competent care refers to physicians' "ability to communicate effectively and provide quality health care to patients from diverse sociocultural backgrounds." This course will train medical students in cross-cultural communication (CS) skills via interactive sessions in a student-based "learning community". In Module 1, students learn and
practice Association of American Medical Colleges (AAMC)-defined core topics for cross-culturally competent knowledge, attitude and skills. These are: 1) the definition of cultural competence, and providers' self-assessment of own relevant cultural experiences; 2) key aspects of cultural competence, including patients' healing traditions and systems, institutional cultural issues, and how these patients' explanatory illness narratives; 3) understanding how stereotyping and bias influence medical care; 4) the epidemiology of social determinants of health care disparities and collaboration with communities to address these; and 5) clinical communication skills to engage patients with different values, culture and beliefs than one's own, i.e. working with interpreters, and diagnostic, negotiating and problem-solving skills. In Module 1, we will use interactive faculty-facilitated didactic discussions, role play, case-studies, volunteer standardized patient interactions and out-of-class reading. Students will also conduct an in-depth case study with one cross-cultural patient and prepare a detailed patient narrative report describing both the patient's illness narrative and relevant cultural and social determinants of health impacting their health experience. Prerequisite: KUMC School of Medicine student. LEC.

FAPR 964. Cross-cultural Health Leadership Module 2: Service Learning Projects. 1 Hour.
Cross-culturally competent care refers to physicians' "ability to communicate effectively and provide quality health care to patients from diverse sociocultural backgrounds." This advanced course will train and mentor medical students in cross-cultural communication (C3) skills via participant-conducted service learning projects in voluntary clinical settings within a student-based "learning community". In Module 2, students will practice skills taught in Module 1, namely Association of American Medical Colleges (AAMC)-defined core topics for cross-culturally competent knowledge, attitude and skills (See Module 1 description). Participating students will collaborate to conduct service learning, quality improvement (Q1) projects to improve cross-culturally competent care in cross-cultural clinical settings in which they or their colleagues participate, e.g. (for M1/M2 students) Jaydoc, Bulldoc school-based health center, or clinical settings with permission of clinical faculty in those settings. Module 2 service learning projects will include 2 clinic-based "whole system events" to which participating students invite clinic faculty, staff and other student colleagues from students' practice settings. At the first event, students will present and discuss their proposed project to improve cross-culturally competent health care with clinic faculty and staff from the proposed setting. At the second event (at the end of the course), students will present the results of their project to their clinic faculty and student colleagues. Projects must address cross-cultural elements of clinical practice or cross-cultural communication skills; and be appropriate to the students' developmental stage of training (e.g. M1 students might conduct projects to improve M1 student skills using interpreters). Module 2 students will also participate in interactive sessions with faculty and other student participants, during which they will learn and discuss methodological approaches; and discuss challenging issues arising in their projects. Prerequisites: Prior participation in "Cross-cultural Health Leadership Module 1: Didactic" or Permission of Instructor LEC.

Gynecology and Obstetrics

Chair: Carl Weiner, M.D.

The Department of Obstetrics and Gynecology teaches anatomy, physiology, and endocrinology of reproduction in the basic science disciplines. During a clinical clerkship the student develops understanding of disease in women through history, physical examination, and laboratory studies. The clerkship includes study of biochemical, anatomical, and physiological changes of normal pregnancy and the effect of disease in altering the course of reproduction.

GYNO 914. Reproductive Endocrinology and Infertility. 4 Hours.
This clerkship will allow the medical student to develop skills in assessing and managing female patients who have complex reproductive endocrinology disorders. The student will also gain experience with diagnosis and the treatment options for female and male infertility. This clerkship will provide experience in office and operative procedures including laparoscopic procedures utilizing the laser and open procedures, which may include tubal reversal and myomectomy procedures. Prerequisite: GYNO 900, permission of instructor and clerkship director, John Calkins, M.D. FLD.

GYNO 915. Maternal Fetal Medicine. 4 Hours.
This clerkship will provide the medical student with advanced experience in high risk obstetrics. The student will be assigned to the Obstetrical Service at KUMC. The student will participate in the management of complicated obstetrical conditions in a role similar to that of a sub-intern. Prerequisite: GYNO 900; permission of instructor. LEC.

GYNO 916. Special Topics and Research. 2-4 Hours.
Offered in modules I-XII. Prerequisite: Permission of instructor. IND.

GYNO 918. Gynecologic Oncology. 4 Hours.
Subject material consists of the clinical science of oncology as applied to malignancies of the vulva, vagina, cervix, uterus, ovary and trophoblast. The student should be able to describe and define malignancies of the female genital tract in general terms and complete a clinical study in detail in the area of gynecologic oncology. The student will be evaluated by faculty judgment for general information, and a specific assessment of student projects will be performed. Offered in modules I-XII. Prerequisite: GYNO 900 and permission of instructor. LEC.

History & Philosophy of Medicine

Chair: Christopher Crenner, M.D., Ph.D.

A survey of the history and philosophy of medicine and the sciences applied to medicine from antiquity to the 20th century is offered. The changes and developments of medical theory, practice, organization, and education are traced and their relations with contemporary cultures examined. The following electives on aspects of medical history and philosophy are available.

HPMD 905. Narrative Ethics. 4 Hours.
Narative Ethics provides an essential complement to traditional philosophic ethics. Where an analytic approach to ethics reduces moral decisions to rational puzzles to be solved, a narrative approach examines a moral problem within the context of an individuals lived life, characterized by its own unique cultural and personal relationships, values, and commitments. Physicians need the narrative skills of a good reader in order to recognize and respond effectively to moral issues as they arise, to integrate concerns for values and beliefs into the routines of patient care, and to interpret patients moral choices within a framework of an individual life story. LEC.

HPMD 906. Medicine and the Movies. 0 Hours.
Utilizing film clips and video from the early 20th century to the present, the course provides a selected review of important topics in public health, medical institutions, and the professions of medicine and nursing. Consequently, students will become familiar with historical and social factors that have helped shaped medicine in the 20th century. LEC.
HPMD 908. Case Studies in Medical Ethics. 0 Hours.
Subject area to be arranged with faculty as independent study, offered only in August-December each year. IND.

HPMD 909. Ethical Issues In: _______. 4 Hours.
"Ethical Issues In__________" is a course offered to senior medical students who desire to spend a four-week block of time in the systematic examination of the set of ethical issues they are likely to encounter in their chosen post-graduate training program, e.g., ethical issues in psychiatry, ethical issues in OB/GYN, etc. The course consists of a guided literature search, regular tutorial sessions and preparation of a short research paper on a particular ethical issue or "case." The course is intended to offer the interested student a basic introduction to the reference tools and literature of contemporary medical ethics; assist the student in developing a critical perspective in ethical controversies within his/her chosen field; and, provide the student with basic analytical skills and approaches to particular ethical problems. Evaluation will be based on participation in tutorial sessions and the research paper. (Interested students should contact the Department of History and Philosophy of Medicine, (x7040) for additional information.) ALL STUDENTS ENROLLING IN THE COURSE MUST CONTACT THE DEPARTMENT AT LEAST ONE MONTH PRIOR TO ENROLLMENT DATE TO ALLOW FOR APPROPRIATE INDIVIDUALIZED PLANNING AND SCHEDULING. Prerequisite: Enrollment limited to senior medical students. (Junior medical students by special permission.) IND.

HPMD 910. Readings in the History of Medicine. 4 Hours.
Guided readings in an area chosen by the student after consultation. Weekly individual tutorials and group seminars. Offered in Modules I-XII. IND.

HPMD 911. Current Social and Ethical Problems of Medicine. 4 Hours.
Guided readings and discussion of one or more social or ethical problems currently facing medicine. Examples: Homosexuality, abortion, contraception, medical education, medicine as a social instrument, etc. Offered in modules I-XII. IND.

HPMD 914. Advanced Study in the History of Medicine. 4 Hours.
Sequel to readings in the history of medicine. Offered in Modules I-XII. Prerequisite: HPMD 910 and approval of chairperson. IND.

Interdisciplinary

IDSP 800. Special Programs. 1-8 Hours.
Electives taken during the basic science years of institutions other than KUMC or at KUMC but in departments that do not have an elective course number. These courses include, but are not limited to, a research training experience or a clinical training experience, during the summer session between the first and second years of medical school. The application form, obtained from the Office of Student Affairs, School of Medicine, must contain a written description of the educational experience, the reason for proposing such a program, and written indication of faculty or supervisory personnel of their willingness to evaluate the student's performance. Elective credit will be accrued at the rate of four credits for eight weeks, three credits for six weeks, two credits for four weeks, or one credit for two weeks. Prerequisite: Approval of student's special program mentor, special program advisor and Associate Dean for Student Affairs. FLD.

IDSP 801. Remedial Program. 0-12 Hours.
Medical students will be enrolled in this course when the Academic Committee of the School of Medicine recommends a remedial program for a student who has failed a course. Remediation may take place at KUMC or at another institution. Evaluation of the student's performance must be obtained from the remedial program director upon completion of the remedial program. Prerequisite: Approval of Associate Dean for Student Affairs. FLD.

IDSP 802. Diversity and Cultural Competency in Medicine. 3 Hours.
The primary purpose of this course is to provide medical students at the University of Kansas School of Medicine with the critical knowledge, skills, abilities and attitudes necessary for cultural competency in medicine. This course will empower student to develop the attitudes, skills, and knowledge base necessary to effectively serve diverse populations, especially the underserved, vulnerable and at-risk populations. In addition, students will learn more about diversity and diverse populations. Students will learn that diversity is each of us and all of us, and that it is necessary to treat each person as the unique individual he/she is. There are many complex issues surrounding the provision of health and social services in this state, the nation, and the world. Differences in language, age, culture, sexual orientation, life experiences, socioeconomic status, political and religious beliefs add challenging dimensions to health care delivery and education. The State of Kansas and the nation is becoming increasingly diverse. It is improbable that current medical students will become physicians who serve only those with whom they share a common background. Therefore, it is necessary that medical students learn to understand and appreciate those who differ from them so that the physician/patient relationship is one that is mutually beneficial. Those students who successfully complete this course will have the skills they need to be the world-class physician the future requires. LEC.

IDSP 803. Diversity and Cultural Competency in Medicine.. 3 Hours.
The primary purpose of this course is to provide medical students at the University of Kansas School of Medicine with the critical knowledge, skills, abilities, and attitudes necessary for cultural competency in medicine. This course will empower students to develop the attitudes, skills and knowledge base necessary to effectively serve diverse populations, especially the underserved, vulnerable, and at-risk populations. In addition, students will learn more about diversity and diverse populations. Students will learn that diversity is each of us and all of us, and that is it necessary to treat each person as the unique individual he/she is. There are many complex issues surrounding the provision of health and the world. Differences in language, age, culture, sexual orientation, life experiences, socioeconomic status, political, and religious beliefs add challenging dimensions to healthcare delivery and education. The State of Kansas and the nation is becoming increasingly diverse. It is improbable that current medical students will become physicians who serve only those with whom they share a common background. Therefore, it is necessary that medical students learn to understand and appreciate those who differ from them so that the physician/patient relationship is one that is mutually beneficial. Those students who successfully complete this course will have the skills they need to be the world class physician the future requires. FLD.

IDSP 804. Special Experience. 0 Hours.
Medical students will be enrolled in this course when the Associate Dean for Student Affairs, the Associate Dean for Academic and Student Affairs, or the Academic Committee approves a program for a student that may include a prolonged absence from the School of Medicine. The student's experience may include, but is not limited to, a fellowship, research, or Master's program. The student will not receive credit, a grade, or evaluation of their performance. LEC.

IDSP 805. Enrichment Program. 0 Hours.
Medical students will be enrolled in this course when the Associate Dean for Student Affairs, the Associate Dean for Academic and Student Affairs or the Academic Committee approves a program of study for a student who cannot enroll in the regular curriculum until a passing grade
is achieved on Step 1 or Step 2 of the USMLE. The student's experience may include, but is not limited to, a formal board preparation program. The student will not receive credit. FLD.

**IDSP 806. Personal/Professional Development. 0 Hours.**
Medical students will be enrolled in this course during the clinical years when no other rotations are scheduled for the student. IND.

**IDSP 850. Introduction to Clinical Research. 1 Hour.**
The course will provide a comprehensive overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical research among the various institutional entities involved with clinical research at The University of Kansas Medical Center such as the Research Institute (RI), General Clinical Research Center (GCRC) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on how to apply for funding (grantsmanship), critical appraisal of research studies, and how to present research data. LEC.

**IDSP 900. Special Program. 1-12 Hours.**
A special program is any scholastic activity that departs from the required or elective modules of the curriculum at KUMC and for which the student expects to receive credit toward the M.D. degree. Any student enrolled in medical school is eligible to apply. The application form is initiated in the Office of Student Records and Registration. In addition to this form, the application must contain a written description of the type of educational experience sought and the reason for proposing such a program; written indication of faculty or supervisory personnel of their willingness to participate in the program and to evaluate the student's performance; source of scholarship, fellowship, travel, or research fund when these funds constitute support of an integral part of the program. If the special program involves study in an area identifiable by department (medicine, surgery, Gynecology-Obstetrics, etc.) approval by the chairperson of the respective department or designate must be obtained. No more than two modules may be substituted by a special program. The application must be submitted at least two months before the expected starting date of the program. Offered in Modules I-XII. Prerequisite: Approval of Dean. FLD.

**IDSP 910. Medical Spanish-Level 1. 2 Hours.**
This is an entry level Medical Spanish course for students with minimal or no Spanish language education. Student completing this course will have acquired the language skills necessary to interact at a basic level in a medical context. Students will learn how to introduce themselves, greet patients, obtain personal information, ask about symptoms, and describe medical conditions. In addition, students will be able to hold basic conversations with patients about pain, diabetes, diet, trauma, cardiac issues, depression, and anxiety. Students will also be able to use and recognize basic cultural practices such as forms of address, family structure, beliefs about medicine as well as how to work with a translator. Prerequisites: Minimal to no knowledge of Spanish language and approval from the Dean of Student Affairs. LEC.

**IDSP 911. Medical Spanish-Level 2. 2 Hours.**
This is an intermediate-low level Medical Spanish class. In Medical Spanish level 2 students build on what they have learned in the previous level. They expand their vocabulary skills to include medical specialties and procedures as well as their ability to describe medical conditions. Students begin to learn to ask about and express past actions and conditions. They also learn to give specific advice and directions to medical personnel and patients. By the end of the course, students will be able to hold conversations on STIs and reproduction, MI symptoms and anatomy, respiratory concerns, pregnancy and prenatal-care, drug and alcohol abuse, strokes, surgery procedures, pharmacy and drugs and elder care. Students will also be able to understand culturally specific approaches such as the meaning of death, modern medicine and "fatalism" among many others. CLN.

**IDSP 912. Spanish for Health Care Workers. 4 Hours.**
OBJECTIVES: The general goals of the instructional program are to provide, within one month, a functional command of the language for basic interaction between health care providers and recipients. The following objectives will be emphasized in order to meet the goals of the program. Students will: 1. Develop and/or improve oral communication skills with emphasis on General American Spanish. 2. Demonstrate the basic phonology and fundamentals of syntax of the language. 3. Practice use of the most commonly used verbs in present and past tenses. 4. Accumulate a specialized vocabulary appropriate to most health care situations. 5. Sustain a limited conversation about appropriate topics with some degree of fluency and comfort. 6. Develop an appreciation and understanding of cultural differences within Hispanic cultures and backgrounds. 7. Demonstrate basic Spanish language skills by taking a history in Spanish from Spanish speaking real or simulated patient. Prerequisite: Permission of the instructor required; one year Spanish language coursework or the equivalent recommended. FLD.

**IDSP 950. Introduction to Clinical Research. 1 Hour.**
The course will provide a comprehensive overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical research among the various institutional entities involved with clinical research at The University of Kansas Medical Center such as Research Institute (RI), General Clinical Research Center (GCRC) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on how to apply for funding (grantsmanship), critical appraisal of research studies, and how to present research data. Must have instructor permission to enroll. LEC.

**IDSP 965. Health Data Theory and Practice. 2 Hours.**
Principles of database theory, modeling, design and manipulation will be introduced. Students will have experience using a relational database management system. Database manipulation will be explored using structured query language (SQL) to compose and execute query statements and critically evaluate the results. IND.

**IDSP 970. Introduction to Health Informatics. 2 Hours.**
This course will provide a broad survey of health informatics focused on five themes: health informatics foundations; clinical decision support; human factors/organization factors; public health informatics and current issues in health informatics including best practices. Students enrolled for the optional 3 credit offering will develop and demonstrate a practical, innovative small-group information technology (IT) project from one of the set of faculty recommended projects or from a student-proposed idea. IND.
health care system, it will be increasingly important for physicians to participate in these processes. LEC.

Internal Medicine

Chair: Amy O'Brien-Ladner, M.D., Acting Chair

Before being assigned to an inpatient medical service, all students learn techniques of obtaining a medical history and performing a physical examination as part of the required medical science course, Introduction to Clinical Medicine. Each student must then take a 12-week Basic Medicine Clerkship in internal medicine. After successful completion of this phase of education, students interested in obtaining greater mastery of the content and principles of internal medicine may choose from a variety of advanced clerkships and electives in medical subspecialties.

MED 901. General Medicine--Veterans Administration Medical Center. 4 Hours.
The student will be assigned to one of the general medical wards where the student will function in the role of subintern (e.g., the student will be assigned patients to work up and will be expected to assume partial responsibility for their diagnostic and therapeutic program). The number of patients assigned and the amount of responsibility given will vary with the student's ability. At all times the student will work closely with a staff physician or senior resident who will be responsible for the student's education. Offered in modules I-XII. Prerequisite: MED 900. FLD.

MED 902. Advanced Topics in Internal Medicine. 4 Hours.
Offered in modules I-XII. Prerequisite: MED 900 and special arrangement with department. FLD.

MED 903. Research Topics in Internal Medicine. 4 Hours.
Offered in modules I-XII. Prerequisite: Special arrangement with department. IND.

MED 906. Advanced General Medicine - Leavenworth Veterans Administration Medical Center. 4 Hours.
The student will function in the role of a sub-intern on the Medicine I Teaching Service. He/She will assume partial responsibility for the diagnostic and therapeutic program for assigned patients. The number of patients and level of responsibility will be accommodated to the individual's educational goals and ability. Emphasis will be placed on the clinical and practical approach to the patient including differential diagnosis, pathophysiology, and management strategies. At all time the student will work closely with the Chief, Medical Service who is in charge of the Teaching Unit. Evaluation of the student's performance during the clerkship will be based on faculty's assessment of the student's clinical and conference participation. Prerequisite: MED 900. FLD.

MED 907. Ambulatory Specialties Selective in Dermatology. 2 Hours.
Two week course composed of outpatient clinic experience, tutorial sessions, and audiovisual material available in the educational resource center (ERC) will enable the medical students to diagnose the most prevalent skin diseases and perform an adequate history and physical examination needed to establish these diagnoses. There will be a syllabus available from the secretaries in the dermatology office. There will be an opportunity to attend a monthly Kansas City Dermatological Society meeting on the third Thursday of most months, and attend at least twice weekly conferences given by the dermatology residents to the medical students. Some medical students will have the opportunity to spend two weeks with a dermatologist in private practice in the Kansas City area (or Topeka) instead of spending the time at the University of Kansas Medical Center Dermatology department. Those students are encouraged to attend the lectures given by the dermatology residents. LEC.

MED 909. Clinical Elective in General Medicine Consultation and Hospital Based Medicine Practice. 4 Hours.
The student(s) will be exposed to the arena of general medicine consultation and hospital based medicine practices. The students would be responsible for performing initial evaluation and work up of new general medicine and/or geriatric consultations as well as the ongoing care of the patient's medicine issues. This experience would be unique in that the attending of record is not a general internist but often a surgeon, rehab specialist, etc. The students would learn the art and science of being a consultant-from evaluating medical conditions as they arise in the surgical and rehabilitating patient communicating with referring physicians, providing concurrent care, diagnostically and therapeutically of serious ongoing medical issues. In addition, the student would become well versed in the pre-operative evaluation of patients, as this can be a substantial part of a general internist's practice. Finally, the student will gain insight to what it is like to have a hospital-based practice by working directly with two hospitalists for KUMC. One of the responsibilities of the elective would be to prepare and give a short presentation on an issue of consultative medicine that would be presented in small group format but could also be used in care-based format to present in other arenas if so desired. FLD.

MED 910. Clinical Cardiology. 4 Hours.
The clerkship in cardiology offers an experience in the clinical evaluation and treatment of patients with a variety of cardiovascular problems. The students, as sub-interns, will function on the cardiovascular service as an integral part in the care of the seriously ill patient with a wide range of problems. The students will make cardiovascular rounds with one of the members of the cardiology staff, during which time clinical skills in bedside diagnosis, auscultation and palpation will be emphasized and developed. They will have an opportunity to develop expertise in interpretation of electrocardiograms on a daily basis. The treatment of arrhythmias and heart failure will be stressed. They will also have an opportunity to evaluate in-hospital consultations as well as outpatient consultations and to see portooperative follow-up patients. They will have an opportunity to follow patients through cardiac catheterization procedures and to participate in the computation and assessment of the catheterization date. Indication for cardiovascular operations will be emphasized to weekly conferences. FLD.

MED 911. Coronary Care Unit and Electrocardiography--Veterans Administration Medical Center. 4 Hours.
The student will function as a subintern in the Coronary Care Unit with the cardiovascular fellow and cardiology subspecialty resident. The patient material consists of all the patients in the VA medical center with acute myocardial infarction, rule out acute myocardial infarction, pre-infarction syndrome and problem arrhythmias. The student will also develop expertise in electrocardiography and read a portion of the daily EKG's independently and in collaboration with the cardiovascular resident or fellow and the cardiologist. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 915. Comprehensive Care of the Complex Adult. 4 Hours.
The objective of this four week elective is to enhance the student's ability to care for complex adult patients in various systems of care. Clinically, the student will rotate through selected clinical centers of care at the University of Kansas. There will be a focus on three facets of the care: the clinical content and context, the patient's experience and the structure of the specific systems of care. Through experience, didactic presentations on systems of care, focused observation and reflection, the student will be able to better define the organization of clinical systems of care and to recognize how to "diagnose" and to help collaborate in improving systems of care. These skills will likely be of great benefit for understanding elements of the core competency of 'systems based
surveys, and curriculum development. In addition, students will be
needs assessments, grant development, health interventions, research
a comprehensive project related to a particular need of the agency and/
professionals trained in multiple disciplines, including but not limited to"}

direct mentorship will be provided by the GI resident or fellows and can participate in special GI procedures on patients, such
as endoscopy and motility studies. The clerk is instructed in proctoscopy
until he/she has mastered this as a routine procedure. Offered in modules
MED 900 or permission of instructor. FLD.

MED 920. Advanced Gastroenterology Clerkship. 4 Hours.
This clerkship is directed toward specific problems of gastrointestinal
disease. The clinical clerk is involved in ward care and ward work,
including admission work-up of patients, their daily care, staff rounds, X-
ray interpretation, treatment of specific GI disease, long term therapy, and
follow-up in the outpatient clinic. The clerk is supervised by the GI resident
or fellows and can participate in special GI procedures on patients, such
as endoscopy and motility studies. The clerk is instructed in proctoscopy
until he/she has mastered this as a routine procedure. Offered in modules
MED 900 or permission of instructor. FLD.

MED 921. Gastroenterology Clerkship--Veterans Administration
Medical Center. 4 Hours.
The manifestations of gastrointestinal disease will be presented to
the student by participation in consultation rounds and endoscopy.
The student will be a member of a team composed of a staff
gastroenterologist, a fellow, and a medical resident. At the completion
of the course, the student will be familiar with the manifestations
of gastrointestinal diseases, their diagnostic evaluation, and their
treatment. The student will learn the indications and contraindications
of gastrointestinal procedures. The student will be evaluated on a daily basis
by the staff gastroenterologist as the student interviews and examines
patients and makes recommendations for their diagnostic and therapeutic
measures on consultation rounds. Prerequisite: MED 900 or permission
of instructor. FLD.

MED 923. Gastroenterology--Special Programs. 4 Hours.
Combination of the preceding GI electives as desired by the student upon
consultation with the senior GI staff. Offered in modules I-XII. Prerequisite:
MED 900 and MED 920 or MED 921. FLD.

MED 925. Interdisciplinary Community Partnership. 4 Hours.
This course offers an interdisciplinary eight-week experience in diverse
settings outside of the tertiary care environment, dealing with community
health issues and their impact on individual and population health. Students
will be engaged in intensive on-site internships with organizations, e.g.,
social service and public health agencies, community-based indigent-
care clinics, which provide services related to disease prevention, health
promotion, quality of life, health insurance, poverty prevention, and other
healthcare issues. The students will gain insight into the hallallenges of
specific populations within the community, as well as the gencies and
programs that serve their needs. Direct mentorship will be provided by
professionals trained in multiple disciplines, including but not limited to
medicine, nursing, allied health, and social work. Students will complete
a comprehensive project related to a particular need of the agency and/or
the population that the agency serves. Common examples include:
needs assessments, grant development, health interventions, research
surveys, and curriculum development. In addition, students will be
required to complete an oral or poster presentation describing their
project, nd a comprehensive written report of their internship experience.
The overall emphasis of the course will be to enhance awareness to
expand knowledge, and to gain experience in working with individuals
and populations on the health care challenges they confront within their
families, their community and our society. FLD.

MED 930. Clinical Hematology. 4 Hours.
This will consist of inpatient and outpatient care, dealing with all
types of hematologic disorders. The student will be given experience
and instruction in morphology of peripheral blood and bone marrow.
Weekly conferences, didactic and participating study sessions with the
hematology staff will be conducted. Offered in modules I-XII. Prerequisite:
MED 900 or permission of instructor. FLD.

MED 935. Infectious Diseases--Advanced Clerkship. 4 Hours.
The students will be given the responsibility of participating actively in
the care of patients admitted to the division of infectious diseases under
close supervision by attending physicians and house officers. Students
will also be exposed to experiences in clinical microbiology as well as
medical consultations requested by other clinical services to the division
of infectious diseases. Offered in modules I-XII. Prerequisite: MED 900 or
permission of instructor. FLD.

MED 936. Infectious Disease Elective at Kansas City Veterans
Administration Medical Center. 4 Hours.
The Infectious Disease Section at the VA medical center is responsible
for an active inpatient consult service. The student will be responsible for
seeing the consult patients with the resident and/or Infectious Disease
fellow, recommending initial diagnostic and therapeutic management,
and presentations to the Infectious Disease staff physician. The clinical
experience will be supplemented with didactic discussions and an
introduction to medical microbiology in the clinical laboratory. Offered in
modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 940. Endocrinology and Metabolism, Clinical. 4 Hours.
Introduction to endocrinology and metabolism with special emphasis on
diagnosis and management of selected patients with this category of
disease. Students will participate directly in patient evaluation. Offered in
modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 941. Research Problems in Endocrinology and Metabolism. 8
Hours.
Two consecutive four-week modules that will provide the interested
student with laboratory and research experience necessary for clinical
investigation of specific problems in endocrinology and metabolism. The
student may either pursue an independent research problem or participate
in a research project currently under investigation by a staff member. The
student will be required to submit a written report and deliver a seminar
at a Sectional Research Conference. An objective of this course will be to
obtain data suitable for publication or presentation at Student Research
Day. Offered in modules I-XII. Prerequisite: Special arrangement with
staff. IND.

MED 950. Clinical Nephrology--University of Kansas Medical Center
or Veterans Administration Medical Center. 4 Hours.
The Division of Nephrology is active in both the University of Kansas
Medical Center and the Veterans Administration Medical Center. The
activities of this division center on the diagnosis and treatment of patients
with medical diseases of the kidney. Clinical clerks are assigned patients
on the inpatient service, the outpatient clinic and in the outpatient chronic
hemodialysis unit. The clerks are expected to function at a subintern
level. Under the guidance of the house staff they provide the primary
work up, write the admitting orders and assist in performing procedures
such as peritoneal dialysis and hemodialysis. Clerks and house staff meet
regularly with the attending staff nephrologist to discuss specific topics
in renal physiology and pathogenesis. A formal nephrology conference for all housestaff and students is held weekly. The clerk is encouraged to participate in one of the ongoing research projects. Three positions are available at the University of Kansas Medical Center and two at the Veterans Administration Medical Center. Offered in modules I-XII. Prerequisite: MED 900. FLD.

MED 951. Research Problems in Basic and Clinical Nephrology. 4-8 Hours.
Investigation of specific problems in nephrology. One or two modules consecutively. Offered in modules I-XII. Prerequisite: Arrangement with staff. IND.

MED 960. Pulmonary/Critical Care. 4 Hours.
Students will be assigned to the Respiratory Intensive Care Unit. Under direct supervision of a Senior Medical Resident and a Pulmonary/Critical Care Fellow they will participate in the care of patients hospitalized in the Respiratory Intensive Care Unit. Daily attending rounds emphasize correlation of clinical, radiographic, laboratory, and invasive physiologic data in managing critically ill patients. Extensive experience in ventilator management and invasive monitoring. Students are on pager contact so they may be notified and participate in critical care decision making. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 961. Pulmonary Medicine, Physiology. 4 Hours.
Students will be assigned to the pulmonary function laboratory to learn the technique and interpretation of pulmonary function tests. Under the immediate supervision of a pulmonary technician and a pulmonary disease fellow, students will observe, perform, and interpret the various tests of lung function. Clinical correlation will be obtained via attendance at inpatient, outpatient, and consultation rounds where clinical problems will be related to physiologic finds. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. LAB.

MED 962. Chest Disease Medicine–Veterans Administration Medical Center. 4 Hours.
The student electing the Chest Disease Service at the Veterans Administration Medical Center will be assigned as a subintern on Ward 11 West where he or she will be assigned to primary care of a small number of selected chest disease patients. The student will be directly responsible for the patients’ diagnostic and therapeutic management under the specific supervision of the chest disease fellow and chief of chest disease section, VA medical center. There will be seminar and didactic instruction on natural history of the frequently occurring chronic chest diseases. The student will assist in procedures such as fiberoptic bronchoscopy, pneu-thorax intubation, thoracentesis and pleural biopsy and will observe and perform common procedures of pulmonary function testing with patients. He or she will assist with chest disease consultations from other services with the chest disease resident and will be expected to attend and participate in all conferences of the chest disease section. The student will participate in inhalation therapy procedures including ventilator management. He or she will be expected to complete and discuss a small required reading list from selected texts and journal articles. The objective of the elective is to give a student concentrated but comprehensive actual experience in the management of the chest disease performance section of the VA medical center in writing at the completion of the elective. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 969. Clinical Oncology–Veterans Administration Medical Center. 4 Hours.
The student will participate in both in- and outpatient cancer management, consult rounds, and twice-weekly teaching conferences. Emphasis will be on clinical investigations of new and established anticancer drugs, and on the application of pharmacokinetic and cytokinetic studies to the treatment of cancer. Evaluation of the student's general clinical skills and acquisition of knowledge in oncology will include direct observation of clinical performance and conference participation, and a brief objective examination. Offered in modules I-XII. Prerequisite: MED 900. FLD.

MED 970. Clinical Oncology Clerkship. 4 Hours.
The student participates actively in the care of the oncology patient on an in- and outpatient basis. This includes consultation rounds. Clinical investigation with both conventional and experimental drugs will be stressed and an opportunity to treat patients by protocols will be given. Offered in modules I-XII. Prerequisite: MED 900 or permission of instructor. FLD.

MED 971. Advanced Studies in Clinical Oncology. 4 Hours.
This is an advanced course with emphasis on consultations with attending staff and fellows, investigative protocol studies and special projects, including lectures and conferences. There will be outpatient activity, but no inpatient care. Offered in modules I-XII. Prerequisite: MED 900 and MED 970 or MED 969. FLD.

MED 972. Palliative Medicine Across the Continuum of Care. 4 Hours.
This elective rotation will expose the student to palliative care patients at all stages of illness and coping with advanced disease processes, from the ICU to the inpatient and home hospice settings. The student will work with the Palliative Care Team of physicians, advanced practice nurses, Palliative Medicine fellows, and our social workers. Focus of clinical activity is on the interdisciplinary management of patient symptoms, inter-professional and interpersonal communication skills, clinical ethics in end of life decision making, and understanding health care system complexities for patients facing advanced, progressive illness. The student will spend a portion of the rotation with either Northcare Hospice or Kansas City Hospice and Palliative Care, working with their interdisciplinary team in the management of acute inpatient hospice patients and home hospice patients. Continuity for the student in care of patients who transition from the hospital to the inpatient or home hospice setting will be fostered. CLN.

MED 980. Clinical Allergy, Immunology, and Rheumatology. 4 Hours.
Students will participate in the weekly KUMC allergy and rheumatology outpatient clinics, as well as assist in subspecialty inpatient consultations. They will perform medical evaluations, select appropriate diagnostic procedures and define specific therapy on assigned patients under the supervision of the staff. They will receive orientation to clinical immunologic tests in current use and be expected to interpret the results of these appropriately. Regular lectures by the staff are given in areas of clinical immunology. With guidance they will choose a topic appropriate for seminar presentation at the end of this clerkship. Offered in modules I-XII. Prerequisite: MED 900 or permission of Instructor. FLD.

MED 981. Advanced Allergy, Immunology, and Rheumatology. 4 Hours.
The activities outlined in MED 980 will be continued, but the student will have more responsibility for patient evaluation and management. With guidance, another topic will be chosen for seminar presentation at the end of this clerkship. Offered in modules I-XII. Prerequisite: MED 900 and MED 980. FLD.

MED 982. Research Problems in Allergy, Immunology, and Rheumatology. 4 Hours.
Three consecutive modules are necessary to give the student adequate time to pursue an independent research problem or a project currently under investigation by a staff member. The student will be required to submit a written report and give a seminar at a division research
conference during the final module. Offered in modules I-XII. Prerequisite: Special arrangement with division. FLD.

MED 990. Geriatric Medicine - Leavenworth Veterans Administration Medical Center. 4 Hours.
The student will function in the role of a sub-intern, with supervised responsibility for management of patients in a special assessment unit for the elderly, a nursing home, and an outpatient clinic. In addition to daily teaching rounds, students will participate in seminars covering physiology of aging, altered presentation of illness in the elderly. Evaluation of the student’s performance during the clerkship will be based on faculty’s assessment of the student’s clinical skills and conference participation. Prerequisite: MED 900. FLD.

MED 995. Dermatology. 4 Hours.
This course is composed of outpatient clinic experience, tutorial sessions utilizing audiovisual aids extensively, and inpatient teaching rounds, as well as frequent review of pertinent aspects of dermatological allergy, microbiology, and histopathology. There will be opportunities to attend special weekly dermatological basic science lectures and grand rounds. Acquired skills in dermatological diagnosis (disease recognition, as well as analytical reasoning, or "problem solving") and in dermatological therapy will be evaluated by such means as oral quizzes and a written examination, but the final appraisal of each student will always be individualized. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. FLD.

MED 996. Research Problems in Dermatology. 4 Hours.
A four-week research elective in which the student undertakes an original investigation in dermatology or participates in an ongoing project, in either case under the direct supervision of a dermatology faculty member. A written report at the end of the module summarizing the student’s findings will be required. Modules I-XII, limited to one student per module. Prerequisite: Medical Basic Sciences and by special arrangement with staff. FLD.

MED 998. Advanced Studies in Geriatric Medicine. 4-12 Hours.
An advanced course of one to three months specially arranged for each student to encompass a clinical research project. There will be participation in clinics and consultations as appropriate. Offered in modules I-XII. Prerequisite: MED 900. RSH.

Microbiology, Molecular Genetics, and Immunology
Chair: Michael J. Parmely, Ph.D.

Presentations in bacteriology, virology, immunology, microbial genetics, microbial physiology, and mycology with emphasis on cell biology and pathophysiology of infectious diseases of humans.

MBIO 850. Microbiology. 9 Hours.
The course presents microbial physiology and microbial genetics with emphasis on the molecular biology of microorganisms; Immunology with emphasis on the defense mechanism, immune regulation and immunogenetics and selected coverage of etiologic agents of infection in bacteriology, parasitology, mycology, and virology. Lectures, small group conferences and tutorials. (Same as MICR 850.) Prerequisite: ATMY 820, cell and tissue biology, BIQC 800, and PHYS 800. LEC.

MBIO 910. Advanced Topics in Microbiology. 4 Hours.
Students will work with individual instructors in directed study or laboratory work. Offered in modules I-VIII. IND.

MBIO 911. Research in Microbiology, Molecular Genetics, and Immunology, 3-16 Hours.
Students will participate in research projects supervised by faculty members of the Department. Participants will be expected to conduct an individual research project, compile and interpret data, and communicate results and conclusions in a written or oral form. Student evaluations will be based on the supervisor's assessment of written and/or oral research reports. Offered in modules I-XII. Prerequisite: MBIO 850. IND.

Molecular and Integrative Physiology
Chair: Paul Cheney, Ph.D.
The Department of Molecular and Integrative Physiology approaches physiology on many levels, ranging from analysis of integrated body functions of the intact organism to study of the organ at molecular and cellular levels. The student is expected to become competent in examining such diverse physiological problems as analyzing the multiple adjustments to exercise in laboratory animals or humans or analyzing factors influencing the transport of molecules across cell boundaries. Students are encouraged to think in physiological terms, that is, in terms of cause and effect as determined by basic physical and chemical laws.

PHYS 910. Advanced Topics. 1-10 Hours.
Special studies designed and arranged on an individual basis to allow a student to pursue a particular subject through reading, special laboratory work, and conferences with a senior staff member. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. IND.

PHYS 911. Research. 4 Hours.
Original laboratory investigation conducted under the supervision of a senior staff member. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. LAB.

PHYS 912. Fundamentals of Biomedical Imaging. 2-4 Hours.
This is a multidisciplinary course designed to introduce 2nd, 3rd, and 4th year medical students to the fundamentals of existing imaging modalities for anatomy, structure and functioning biomedical sciences. The course will also be offered to Junior and Senior level undergraduate students as well as graduate students from other interdisciplinary areas including engineering, science, biology and biomedicine. Students must be in good academic standing. LEC.

Neurology
Chair: Richard Barohn, M.D.
The Department of Neurology is introduced to medical students in the first year that clinical correlation is offered in connection with the neuroanatomy courses. During the clinical modules, clinical neurology electives allow students to participate in the management of inpatients and outpatients on the neurological service and in the educational conferences that are part of the neurology department. Conferences include pediatric neurology, neuropathology, and neuroradiology. Students obtain some familiarity with interpretation of electroencephalograms and electromyograms and supervised experience in the evaluation of patients with neurological problems seen in consultation. Students are accepted into these electives only after at least one previous clinical module.
NEUR 931. Neurology Clinical Clerkship--University of Kansas Medical Center. 4 Hours.
The Neurology Section provides clinical experience and exposure to common neurological problems. The department is staffed by one full-time and three part-time neurologists. Students will be assigned to cases which have teaching value. He/She will be expected to carry out a detailed examination of the patients assigned and present them to the staff. The student is expected to take an active part in complete diagnostic evaluation and the management of patients. The main focus will be to develop skills of neurological examinations, interpretation of findings and clinical and anatomic correlation. The student can also take part in specialty clinics such as Movement Disorder, Memory, Cerebrovascular.

NEUR 932. Clinical Neurology--Veterans Administration Medical Center. 4 Hours.
The student will be assigned patients selected on the basis of their teaching value. He/she will be expected to carry out complete detailed examinations of each patient and assume responsibility for assisting in all phases of the patient's diagnostic evaluation. Emphasis will be on developing skills in examination, interpretation on findings and neuroanatomic correlation. During this elective, the student will participate actively in all teaching conferences held both at this hospital and at KUMC. In exceptional cases, by prior arrangement and if an opening is available, a student may split time between neurology services at KUMC and the VAMC. Offered in modules I-XII. Prerequisite: One clinical module or permission of instructor. FLD.

NEUR 933. Neurology--Advanced Topics. 4 Hours.
The Neurology Section provides clinical experience and exposure to common neurological problems. The department is staffed by one full-time and three part-time neurologists. Students will be assigned to cases which have teaching value. He/She will be expected to carry out a detailed examination of the patients assigned and present them to the staff. The student is expected to take an active part in complete diagnostic evaluation and the management of patients. The main focus will be to develop skills of neurological examinations, interpretation of findings and clinical and anatomic correlation. The student can also take part in specialty clinics such as Movement Disorder, Memory, Cerebrovascular.

NEUR 934. Advanced Clinical Neurology--Veterans Administration Medical Center. 4 Hours.
This course will consist of assumption of more responsibility concerning diagnostic formulation and management of the patient on clinical neurology. Offered in modules I-XII. Prerequisite: NEUR 931 or NEUR 932. FLD.

NEUR 935. Advanced Clinical Neurology - Veterans Administration Medical Center, Leavenworth. 4 Hours.
The Neurology Section provides clinical experience and exposure to common neurological problems. The department is staffed by one full-time and three part-time neurologists. Students will be assigned to cases which have teaching value. He/She will be expected to carry out a detailed examination of the patients assigned and present them to the staff. The student is expected to take an active part in complete diagnostic evaluation and the management of patients. The main focus will be to develop skills of neurologic examinations, interpretation of findings and clinical and anatomic correlation. The student can also take part in specialty clinics such as Movement Disorder, Memory and/or Cerebrovascular.

NEUR 936. Research Problems in Ophthalmology. 4 Hours.
Prerequisite: Medical Basic Sciences. FLD.

NEUR 930. Ophthalmology Outpatient Clinic. 4 Hours.
The number of openings in this course will depend upon the number of students registered for OPTH 910. If OPTH 910 is full there will be no openings in OPTH 911. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. FLD.

OPTH 910. General Ophthalmology. 4 Hours.
The program will be tailored to the interest of the individual student. Students will be given a program in Ophthalmology Outpatient Department and Surgery according to their interest. The student will be given instruction in the use of audio-visual aids in the department and reference readings. All departmental conferences and seminars are open to students. In the Outpatient Clinic the student will be instructed in the use of all special instruments and patient examination. Offered in modules I-VI and IX-XII. Prerequisite: Medical Basic Sciences. FLD.

OPTH 911. General Ophthalmology. 2 Hours.
The student will spend five mornings a week working in the Ophthalmology Outpatient Department and participating in the individual work-up of patients. The number of openings in this course will depend upon the number of students registered for OPTH 910. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. FLD.

OPTH 915. Research Problems in Ophthalmology. 4 Hours.
A 4 week course research elective in which the student has an opportunity to be exposed to vision research methods and to participate in ongoing research projects. In some circumstances this can be the introduction for continued part-time research. A written report will be due describing the project and the student's participation in the project. Prerequisite: Approval of chairperson and faculty mentor. LEC.

OPTH 916. Ambulatory Specialty Selective in Ophthalmology. 2 Hours.
Terms and abbreviations used in ophthalmology are not routinely used in other areas of medicine nor are they usually taught in year 1 or 2 of medical school. Knowledge of ophthalmic terms will allow better understanding of ophthalmology consults and notes. The student will be able to write more precise consult requests. Ocular anatomy, although taught in basic anatomy, is only reinforced in other areas of medicine at a superficial level. Better understanding of ocular conditions will allow the primary care physician to feel more comfortable treating certain common ocular conditions and know when to make appropriate referrals. LEC.

Ophthalmology
Chair: John E. Sulphin, M.D.
The Department of Ophthalmology teaches undergraduates primarily in conjunction with other departments. The goal is to stress the importance of the ocular examination as a part of the complete physical examination and the role of ocular changes in general disease. In addition, all students learn the diagnosis and management of specific ocular problems that any physician should know. An elective is available to the student at any level of training. This experience is a completely flexible, individual program planned with each student. The experience is designed not only for the student interested in ophthalmology but to provide in-depth experience in any aspect of the specialty for the undergraduate student.

Otorhinolaryngology
Chair: Daniel Bruegger, M.D., Interim
Diseases of the ear, nose, throat, head, and neck are presented in inpatient and outpatient otorhinolaryngology. The importance of understanding the anatomical structures for comprehension of examination, diagnosis, and treatment is emphasized.
70% of all medical decisions are based on data generated by biopsies to supervising clinical laboratory testing. It has been estimated that Pathologists play many roles in medicine, from interpreting surgical examinations using a CD-ROM computer program generated by the project will consist of a list of skills and procedures to be observed. The questions will be open-ended and will consist of 75 to 100 of hearing and in basic principles of acoustics, the vestibular system and psychoacoustics. Instruction will be provided in those areas where the interaction of the otolaryngologist and the general physician can best be utilized to the advantage of the patient. The objectives of this course are to acquaint the student with basic clinical otolaryngology and, in addition, the surgical aspect of the specialty. Participation in the operating room is emphasized along with inpatient and outpatient experience. Offered in modules I-XII. Prerequisite: Medical Basic Sciences. FLD. OTOR 915. Research Problems in Otorhinolaryngology. 4 Hours. One or more modules that provide the interested student with laboratory or clinical research experience necessary for investigation of research problems related to otorhinolaryngology. The student may pursue an independent research problem or participate in a project currently under investigation by a staff member. In either case, a faculty mentor must be identified. All projects must be reviewed and approved by the mentor at least one month in advance of the intended start date. Students will be required to submit a written report at the conclusion of the module. One objective of this course will be to generate data suitable for publication or presentation at the Student Research Forum. Prerequisite: Special arrangement with faculty mentor. LEC. OTOR 916. Ambulatory Specialties Selective in Otolaryngology. 2 Hours. The objectives of this two week selective course will be to expose the fourth year medical student to clinical and surgical aspects of otolaryngology head and neck surgery. This will be done in the form of three projects. The first project will consist of a pre test rotation at the Kansas Hospital. They receive hands-on exposure to pathology technical methodology in the surgical pathology suite, microbiology laboratory, and cytogenetics laboratory.

Pathology and Laboratory Medicine

Chair: Lowell Tilzer, M.D., Ph.D.

Pathologists play many roles in medicine, from interpreting surgical biopsies to supervising clinical laboratory testing. It has been estimated that 70% of all medical decisions are based on data generated by pathology departments. The department of Pathology and Laboratory Medicine at KUMC plays an integral role in the core curriculum and also offers elective courses to medical students interested in learning more about laboratory practice. Students in elective rotations participate in daily teaching conferences and specimen "sign-out" at the University of Kansas Hospital. They receive hands-on exposure to pathology technical methodology in the surgical pathology suite, microbiology laboratory, and cytogenetics laboratory.

PAON 920. Introduction to Molecular Medicine. 2 Hours. Introduction to Molecular Medicine is a two semester course for first year MD-PhD students taught by the Director of the MD-PhD Program, with other faculty from the basic science and clinical departments. Through lectures, small group discussion, evaluation of primary literature, and presentations/discussions with current KUMC faculty, students will be introduced to the process of investigating the molecular and cellular derangements that underlie human disease. Order of topics mirror, to some extent, the subjects of first-year modules. There will be particular emphasis on the diverse research methods and models systems used to investigate the molecular basis of disease and understanding how such investigations can be translated to answer clinically relevant questions. Students are evaluated by both group activity and individual preparation and participation. Prerequisites: Enrollment in the MD-PhD Program. LEC.

PAON 921. Diagnostic Pathology. 4 Hours. This elective is designed to introduce the student to the practice of pathology and the role of the pathologist in diagnosis and management, and will provide exposure to several subspecialty areas within the pathology department. An effort will be made to tailor the elective experience to the needs and interests of the individual student, including those interested in pathology as a career, and those interested in broadening their understanding of pathology in general, or in relation to their chosen field. The course consists of a two-week rotation in surgical pathology'autopsy, a one-week rotation in hematopathology, and a one-week rotation in cytopathology. The student will work closely with the pathology residents, fellows and faculty on service. In surgical pathology, students will have the opportunity to participate in a range of experiences, including supervised prosection of surgical specimens, microscopic evaluations, frozen section evaluations, ancillary techniques, and participation in the "sign-out" of surgical cases with the attending staff. Participation in autopsy procedures will take place as available. In hematopathology, the student will participate in the diagnosis of blood and bone marrow disorders and take part in daily sign-out of bone marrow biopsy specimens. In cytology, the student will assist in the work up and sign out of gynecologic and non-gynecologic cytologic specimens and participate in FNA procedures. At the end of the rotation, each student will present an interesting case they encounter during a formal PowerPoint presentation to faculty and residents. Final grade is based on attendance, participation in daily activities, knowledge of general concepts and practice of pathology, and final case presentation. Prerequisites: Completion of core clinical clerkships. LEC.

PAON 922. Special Topics in Pathology. 4 Hours. This rotation affords the student the opportunity to spend four weeks focused on a particular subspecialty of pathology or a pathology-based research elective. The department has subspecialists in dermatopathology, neuropathology, renal pathology, breast and hepatic pathology. The rotation consists of daily interpretation of subspecialty biopsies, participation in subspecialty conferences, slide set study, and assigned readings. Students participate in their own learning by setting their rotation objectives with faculty at the start of their elective and following through with a schedule of clinical, laboratory and core lecture conferences. Students will need to obtain the appropriate staff members'
permission for the rotation as follows: dermatopathology (Garth Fraga); neuropathology (Kathy Newell); renal pathology (Timothy Fields); breast pathology (Fang Fan); hepatic pathology (Maura O’Neil). Prerequisites: Completion of the core clinical clerkships and permission of the faculty. LEC.

Pediatrics

Chair: Michael Artman, M.D.

The Department of Pediatrics gives the student a comprehensive exposure to primary care and subspecialty pediatrics. The experience ranges from exposure to a sick newborn to care of an adolescent patient. Inpatient and outpatient services are available. Student participation includes history-taking and examination of pediatric patients, making daily ward rounds with the staff physician, and rotation through general and subspecialty outpatient clinics and the full-term nursery. Electives are available in the Children’s Rehabilitation Unit, Behavioral Pediatrics, and all other subspecialties in pediatrics. Research electives are also available with department faculty members.

PED 915. Pediatric Cardiology. 4 Hours.
Inpatient and outpatient clinical experience in children with cardiac disease will be provided. Daily pediatric cardiology ward rounds are conducted by the senior staff. Active participation in the pediatric cardiology clinics each week highlight the outpatient experience. Personal instruction will be given in cardiac physical diagnosis with stress on cardiovascular hemodynamics, evaluation of heart sounds and murmurs, electrocardiograms, and cardiac radiology. Significant responsibility in patient management will be delegated to the student who will function as a member of the pediatric cardiology team. The student will attend the various pediatric cardiology conferences and will follow children through the cardiac catheterization laboratory and the operative procedures. Opportunity will be available for participation in clinical investigative projects if the student so desires. Teaching conferences, seminar, and patient rounds will be made on the scheduled basis by a member of the senior pediatric cardiology staff. Offered in modules I-XII. Prerequisite: PED 900. FLD.

PED 916. Pediatric Subinternship Selective-Inpatient/Outpatient-Distant Site. 4 Hours.
This selective is an extension of the basic pediatric clerkship. It is designed to permit senior medical students to take increasing responsibility of patient care and management by active participation in the daily activities of a private pediatric practice. This selective is entirely clinical. The student will work with clinical faculty at a distant site. Most of the experience will likely be in an outpatient setting with some inpatient experience. Student performance will be evaluated by the faculty based on factual knowledge, practical skills, problem-solving abilities and personal behavior and values. Offered in all modules if sites are available. Prerequisite: PED 900 or equivalent and permission of the Pediatric Clerkship Director. LEC.

PED 917. Pediatric Hematology-Oncology. 4 Hours.
This course will include involvement in the diagnosis and care of children with hematologic and oncologic diseases. The student will be involved directly with these patients under the supervision of the pediatric hematology fellows. During this time, he or she should become conversant with the general area of pediatric hematology and be trained in the diagnostic procedures including bone marrow examination and other routine and special procedures used in this subspecialty area. The special emphasis placed on the psychological aspects of these diseases for the child and the family will be part of the training experience. The complications that commonly occur in patients on chemotherapy make these patients particularly appropriate for a broad experience. Offered in Modules I-XII. Prerequisite: PED 900. FLD.

PED 919. Developmental and Behavioral Pediatrics Elective. 4 Hours.
This course is designed to provide students with an in-depth understanding of children and their families. Students will learn about normal and atypical child development, behavioral and emotional problems commonly seen in Pediatrics (e.g., ADHD, depression, anxiety, oppositional behavior), and helping children cope with acute and chronic illnesses. Students will observe/participate in outpatient clinics in the Developmental Disabilities Center and Behavioral Pediatrics section (e.g., autism assessment, developmental medicine, telemedicine, feeding team, and behavioral pediatrics clinic), as well as in medical inpatient consultations. Within the curriculum there is ample opportunity to pursue individual interests related to children with developmental and behavioral problems. Expected to be offered in most Modules. One student per module. Prerequisite: PED 900 and permission of instructor. FLD.

PED 920. Pediatric SubInternship Selective-Inpatient. 4 Hours.
Students will participate in the evaluation and management of children with infectious diseases. Laboratory aspects of infectious diseases will be emphasized. Students will attend teaching conferences and seminars on various aspects of infectious diseases. Offered in modules I-XII. Prerequisite: PED 900 and permission of instructor. FLD.

PED 921. Pediatric Neurology. 4 Hours.
This module will serve to acquaint the student with the wide spectrum of neurological diseases of infancy, childhood, and adolescence. The student will become familiar with the neurological examination of the newborn, as well as assessment of the infant and child. During the elective rotation the student will become actively involved in the diagnosis and treatment of seizure disorders. The student will be exposed to routine laboratory procedures, such as lumbar puncture, EEG and brain scan, as well as special procedures, such as arteriography and pneumoencephalography. The student will be supervised by pediatric residents rotating through the pediatric neurology service and by staff physicians throughout all aspects of the module. Offered in modules I-XII. Prerequisite: PED 900. FLD.

PED 922. Pediatric Gastroenterology. 4 Hours.
The Pediatric Gastroenterology course will provide exposure to diseases of the gastrointestinal tract, liver and pancreas in infants and children. The student will obtain histories, physicals, and present cases on all Pediatric Gastrointestinal clinic and in-patients brought in for consultations. During endoscope, motility, and biopsy of the small bowel and liver, the student will obtain histories, physicals, and present cases on all Pediatric Gastrointestinal clinic and in-patients brought in for consultations. During endoscopy, motility, and biopsy of the small bowel and liver, the student will learn the indications and technique as applies to patients they have worked up. Each student will be required to present a 30-45 minute paper on a specific Pediatric Gastrointestinal subject at the end of the course. Evaluation for the course will be based on assessment of performance of patient care and oral presentation and knowledge of literature. Prerequisite: Completion of third year. LEC.

PED 923. Developmental or Behavioral Pediatrics Elective. 2 Hours.
This 2-week course is designed to provide students with a streamlined introductions to childhood developmental, emotional, and behavioral problems. Students will also learn about normal and atypical child development. Students participate in outpatient clinics, telemedicine, and medical inpatient consultations with faculty from developmental pediatrics, psychology, speech-language, physical therapy, and occupational therapy. Expected to be offered in most Modules. One student per module. Prerequisite: PED 900 and permission of instructor. CLN.

PED 924. Pulmonology. 4 Hours.
Students will participate in the evaluation and management of infants, children, and adolescents with chronic and acute pulmonary diseases in
the out-patient setting as well as performing in-patient consultations. The students will be involved directly with these patients under the supervision of the pediatric pulmonology faculty. CLN.

PED 925. Research in Pediatrics. 4-8 Hours.
Students will work on research programs arranged between them and the instructor. The purpose of the elective is to provide the student an opportunity to become familiar with clinical research involving children and pediatric problems, and to learn about research protocols and methods. Available areas of research include the newborn, cardiology, hematology, allergy, nephrology, neurology, endocrinology, infectious disease. Offered in modules I-XII. Prerequisite: Permission of instructor. IND.

PED 927. Pediatric Endocrinology and Metabolism. 4 Hours.
Students will participate in the diagnosis and management of pediatric-age patients with endocrine-metabolic problems. Emphasis is placed on the clinical problems that are unique to pediatric-age patients such as puberty, abnormalities of growth, and juvenile diabetes mellitus. Students are encouraged to become involved in patient management by participating in rounds, clinic, conferences, consultative evaluation and care of the inpatients, and other functions of the endocrinology-metabolism staff. Offered in modules I-XII. Prerequisite: PED 900. FLD.

PED 929. Allergy, Immunology, and Rheumatology. 4 Hours.
The Pediatric Immunology course will provide exposure to children with allergies, asthma, immunodeficiencies, autoimmune disease and arthritis. The approach to children with these disorders and the management of children with multisystem disease and chronic disease are emphasized. Students will be involved in the clinic and with consultations. The students will have exposure to ongoing research in these areas and will attend teaching conferences. Offered in modules I-XII. Prerequisite: PED 900. FLD.

PED 931. Nephrology. 4 Hours.
Students will participate in the evaluation and management of children with urinary tract diseases and fluid and electrolyte disorders. This elective will give the students the opportunity to develop clinical skills in assessing a child's hydration status and in assessing the effect of the child's kidney disease or metabolic disorder on other organ systems. Students will also have the opportunity to review radiologic imaging studies of the urinary tract, to perform urinalyses, and to participate in the care of patients who require acute hemodialysis, peritoneal dialysis, or continuous arterio-venous hemofiltration. Prerequisite: PED 900. FLD.

Pharmacology, Toxicology, & Therapeutics

Chair: Hartmut Jaeschke, Ph.D.

The medical pharmacology courses teach pharmacological principles and the essential facts necessary to select and prescribe appropriate medications to maximize the desirable and minimize the undesirable effects. Moreover, students are prepared to incorporate new information and the use of new drugs into their practice. The courses give students a variety of instructional aids to master the material, exposing them to concepts, facts, and therapeutic applications. Group discussions cultivate the ability to interpret, integrate, and synthesize essential information

PHRM 910. Research in Pharmacology. 4 Hours.
Selected research problems may be investigated under the direction of individual staff members. A description of current staff research projects is available from the department. Offered in modules I-XII. Prerequisite: Permission of department. IND.

PHRM 911. Readings in Pharmacology. 2-10 Hours.
Selected topics for reading in advanced texts and original papers in pharmacology. A paper and Journal Club presentation of the selected topic are required. Offered in modules I-XII. Prerequisite: Permission of department. IND.

Preventive Medicine and Public Health

Chair: Edward Ellerbeck, M.D., M.P.H

The multidisciplinary Department of Preventive Medicine and Public Health uses epidemiological methods to solve individual and population health problems. We are dedicated to the development of education, research, and service that emphasizes health promotion, disease prevention, health services, and public health science to improve health. We place special emphasis on a population health perspective that encompasses the ability to assess the health needs of a specific population; implements and evaluates interventions to improve the health of that population; and provides care for individual patients in the context of the culture, health status, and health needs of the population of which that patient is a member. Through required and elective courses, the department emphasizes the following content areas: evidence-based medicine; social and behavioral determinants of health (at an individual and population level); ethics; organization and financing of U.S. health care; the principles, practice, and financing of preventive care; cost-analytic approaches and information in prioritizing the use of resources; and describing population demographics.

PMED 910. Special Topics in Community Health. 4 Hours.
Independent study of community health issues and their implications for or impact on the health of society. Examples include infectious disease control, immunization programs, nutrition, air pollution, over-population, wellness, health promotion and life-style change programs, cancer epidemiology, care of disabled persons, mental health programs, the terminally ill or the elderly, poverty, sports, physical fitness programs, etc. Specific content will be defined primarily by interest, background, and wishes of the student. Emphasis will be placed on the methodology used in gaining information and the means by which a health professional can translate and channel such information effectively into educational processes of the community. Prerequisite: Permission of instructor. IND.

PMED 922. Advanced Selected Topics. 4 Hours.
Special studies tailored to the interests of students wishing to further their training in one or more areas concerning clinical medicine, environmental health or delivery of health care. Epidemiologic evaluation of a disease or health related problem is encouraged. This sequence will include readings, clinical studies, and field work when appropriate, guided by frequent conferences with an advisor. The objectives of the individual student will be dissected and declared at the initiation of the sequence and the attainment measured through a terminal seminar for elective credit or brief paper designed to fulfill the communication requirement. Prerequisite: Permission of instructor. IND.

PMED 925. Public Health Experience--Kansas City, Missouri, Health Department. 4-8 Hours.
Opportunities will be presented for students to work with a state or local health department either in studying public health problems in the community (e.g. teenage pregnancy, VC, lead poisoning) or through participation to health services under the supervision of the staff. Specific assignments will be developed individually for each student, who will meet
with the instructor once per week and present a seminar at the conclusion of this experience. IND.

**PMED 950. International Health Experience. 4-8 Hours.**
Within this elective are presented opportunities for the student to gain clinical and community health experiences in an international setting. The country selected is to be prearranged by the student with the assistance of faculty. Two modules are recommended for this elective. Prerequisite: Permission of instructor. LEC.

**PMED 956. Special Experiences--Environmental/Occupational Health. 4 Hours.**
Placements will be made to provide clinical or field experiences to study the health effects of both air and water pollution and environmental hazards as these relate to occupation. Arrangements will be made with local, state, or federal agencies (e.g. the Environmental Protection Agency or the Occupational Safety and Health Administration), private clinics, hospitals, industries, unions, or other organizations. Specific assignments will be developed individually for each student, who will meet with the instructor once per week and present a seminar at the conclusion of this experience. Offered in modules I-XII. Prerequisite: Permission of instructor. LEC.

**PMED 970. Principles of Epidemiology. 2 Hours.**
Basic concepts of epidemiology and methods for identification of factors influencing health and disease in human populations. Considerations are centered on physical, biological, psychosocial and cultural factors in relation to infectious and non-infectious diseases; interactions between agent, host, and environmental factors as determinants of health and disease; application of the epidemiologic approach to health services; retrospective and prospective analysis of morbidity and mortality data. LEC.

**Psychiatry**

Chair: William F. Gabrielli Jr., M.D., Ph.D.

Through participation of the Department of Psychiatry in the interdisciplinary clinical process course, first-year students are introduced via formal presentations and follow-up small-group discussions to the following relevant topics: the medical interview; the disturbed family; death, dying and loss; childhood growth and development; human sexuality; aging; addiction; anxiety; depression; and psychosis. Clinical training includes supervised experience in the treatment of hospitalized patients and clinic outpatients, using chemotherapy, other somatic treatments, interview techniques demonstrated in regularly held seminars using videotaped case material, and in weekly case conferences. The clerkship offers a thorough didactic review of such topics as psychopharmacology, child development and psychopathology, all major psychiatric syndromes, drug abuse and alcoholism, human sexuality and sexual dysfunction, and consultative psychiatric services.

**PYCH 911. Child Psychiatry. 4 Hours.**
Normal and abnormal growth and development. Clinical assessment of children and early adolescents. Interview and play therapy. Family counseling. Group work with parents. Offered in modules I-XII. Prerequisite: PYCH 955. FLD.

**PYCH 912. Emergency Psychiatry. 4 Hours.**
Exposure to patients with acute psychiatric disturbances. Students will learn how to assess psychiatric emergencies and provide initial treatment. The course involves exposure to community resources, multidisciplinary treatment and interaction with law enforcement and the court system. Clinical experience working with physicians caring for patients in the Emergency Department. Readings in emergency patient care and discussions with the attending physician are part of the course. Patient contact with patients in the Crisis Stabilization Center of the Emergency Department. Prerequisite: PYCH 955. LEC.

**PYCH 913. Ambulatory Psychiatry. 4 Hours.**
This course involves exposure to patients followed in an ambulatory psychiatry setting. Students will have the opportunity to learn to evaluate and manage a cross section of patients with psychiatric complaints. Clinical evaluations and exposure to actual patients. Students will first observe and later lead evaluation of patients and formulate treatment plans with attending physicians. Readings in ambulatory patient care and diagnosis interviewing are a part of the course. Patients will be ambulatory clinic patients at the KUMC outpatient clinic, the Kansas City-VA Hospital Mental Hygiene Clinic, a facility clinic location, or the community mental health centers. Prerequisite: PYCH 955. LEC.

**PYCH 914. Psychiatry in Medicine and Surgery. 4 Hours.**
Experience with psychiatric consultations to the medicine and surgery services. Evaluation of psychiatric problems in medical and surgical inpatients. Students will demonstrate effective interview technique and explain the basis for diagnosis and management. Supervisors will evaluate clinical skills. Offered in modules I-XII. Prerequisite: PYCH 955. FLD.

**PYCH 915. Psychiatry in Pediatrics. 4 Hours.**
Experience with psychiatric consultations to the pediatric services. Evaluation of psychiatric problems in pediatric inpatients and outpatients. Students will demonstrate effective interview technique and explain the basis for diagnosis and management. Faculty supervisors will evaluate clinical skills. Offered in modules I-XII. Prerequisite: PYCH 955. FLD.

**PYCH 916. Introduction to Psychotherapy. 4 Hours.**
The student will observe and participate in individual and group psychotherapy sessions in outpatient as well as inpatient settings. Child and adolescent patients as well as adult patients will be involved. These psychotherapy experiences will include: 1) Inpatient group psychotherapy for adult patients with an affective disorder 2) Inpatient group psychotherapy for adult patients with a substance use disorder 3) Inpatient group psychotherapy with acting-out adolescents 4) Family psychotherapy with parents of psychiatric child inpatients 5) Outpatient adult group psychotherapy with patients suffering from panic disorder 6) Outpatient adult group psychotherapy with patients suffering from a schizoaffective disorder 7) Outpatient adult individual cognitive therapy in a family practice setting 8) Outpatient adult interpersonal psychotherapy with less psychiatrically ill patients 9) Outpatient individual diagnosis specific psychotherapy. In addition, the student will provide brief, problem-focused individual psychotherapy three times weekly to at least one patient hospitalized on the adult inpatient service under the immediate supervision of Dr. Elizabeth C. Penick that will include a review of audiotaped psychotherapy sessions. The student will be provided a list of readings which he will discuss on a weekly basis with Dr. Penick. At the completion of the program, the student will have received a broad comprehensive introduction to the more commonly used approaches to psychotherapy. LEC.

**PYCH 918. Inpatient Psychiatry. 4 Hours.**
Advanced full-time experience in hospital treatment. Includes training in individual and milieu therapy, chemotherapy, etc. The student will function as a first-year resident insofar as the student is able to assume the required responsibilities of that position. Students electing this module will be evaluated by faculty supervisors on the basis of their clinical performance and the growth of their fund of psychiatric knowledge during the module. Offered in modules I-XII. Prerequisite: PYCH 955. FLD.
PYCH 919. Continuation of Inpatient Psychiatry. 4 Hours.
Students electing this module will be evaluated by faculty supervisors on the basis of their clinical performance and the growth of their fund of psychiatric knowledge during the module. Offered in modules I-XII. Prerequisite: PYCH 900 and PYCH 918. FLD.

PYCH 920. Research in Psychiatry. 4 Hours.
An approved psychiatric research project in an area of special interest to the student may be undertaken with the individual supervision of a faculty member within the sphere of whose own professional interests the student's topic of study lies. This elective experience will include the writing of a paper or presentation of a seminar reporting on the student's investigation and findings. Offered in modules I-XII. Prerequisite: PYCH 900. IND.

Radiation Oncology

Chair: Parvesh Kumar, M.D.

Students are introduced to the diagnosis, staging, and management of patients with cancer. The rationale and techniques of radiation therapy are emphasized.

RADO 910. Research in Radiation Oncology. 4 Hours.
The student will engage in original research in an aspect of Radiation Oncology: clinical radiation therapy, radiation biology, or radiation physics. The exact area will depend upon the background and interest of the student, and the availability of an appropriate faculty mentor. In consultation with faculty, the student will develop a research project addressing a topic in Radiation Oncology. The student will then perform the indicated research project. At the conclusion of the project, the student will prepare a document describing the research and the findings, and will present a research seminar to the department. Student achievement will be evaluated by three endpoints. There will be a faculty assessment of the conduct of the student during the project period. Secondly, the manuscript produced by the student will be evaluated as an indication of the student's accomplishments. Finally, the student will be evaluated by his or her performance during the research seminar and/or other scheduled presentations of the results. Prerequisite: Permission of instructor. LEC.

RADO 912. Radiation Oncology. 4 Hours.
Students will see consultations, follow up patients and on-treatment patients along with the staff. They will participate along with the faculty in simulation of patients, surgical procedures, brachytherapy procedures and other procedures that require physician participation. Students will attend conferences in radiotherapy, radiobiology, radiation physics and treatment planning conferences. They will attend site-specific multi-disciplinary and general multi-disciplinary conferences and present cases if required of these conferences. Students will be required at the end of their rotation to present to faculty, residents and staff in the department a topic in depth that involves radiation as a treatment modality. Students will be evaluated by their performance and conduct during their rotation with the faculty and by the quality of their presentation toward the end of the rotation. Offered in Modules I-XII. Prerequisite: Medical Basic Sciences and permission of instructor. FLD.

Rehabilitation Medicine

Chair: Raj Mitra, M.D.

Rehabilitation medicine is concerned with the evaluation and treatment of physical impairment and disability. It is an interdisciplinary field where the physiatrist (rehabilitation physician specialist) works with a team of health professionals (rehabilitation psychologists, physical therapists, occupational therapists, speech therapists) to develop and manage individualized treatment plans to maximize the functional recovery of the disabled individual following a catastrophic illness or injury. Rehabilitation embodies the concept of adding quality to longevity, and emphasizes a holistic approach to the patient with respect to psychological, social, vocational, and avocational adaptation to disability. Students interested in experiencing first hand the interdisciplinary approach learn which patients can benefit from rehabilitation and have the opportunity to participate in patient evaluation and team management of appropriate inpatients and outpatients on a regular basis. Students who desire this type of experience find the skills and knowledge thus gained useful in many aspects of medical practice. First-year students may participate in patient evaluation and clinical discussions of patients in this department as part of the clinical process.

REHB 910. Clerkship in Rehabilitation Medicine. 4 Hours.
The student will have the opportunity to participate in the traditional evaluation and management of disease and disability as well as being oriented toward the impaired performance of function as a result of these conditions. The student will obtain histories from and perform physical examinations on inpatients with particular emphasis on evaluation of function, e.g., neurologic, kinesiologic and self-care function. He/she will be involved in the analysis and management of musculoskeletal disorders common to many situations encountered in internal medicine, family practice, neurology, psychiatry, orthopedic surgery, and neurosurgery. In addition, the student will demonstrate an understanding of methods for function restoration. Evaluation in the course will be based upon at least five (5) case work ups in which the student will present his/her evaluation of function and make recommendations regarding restoration of function. The team approach to the management of these cases will be emphasized. Offered in modules I-XII. Prerequisite: Medical Basic Sciences; 1 required clinical clerkship. FLD.

Surgery

Chair: Romano Delcore, M.D., M.B.A., F.A.C.S., Interim

The Department of Surgery offers an introduction to surgical diseases as part of the required medical science course, Junior Surgery Clerkship. After successful completion of this phase of education, electives are offered in the surgical specialties and other surgical disciplines. These courses offer more specific and in-depth exposure than the basic core course.

SURG 911. Clinical Clerkship in General Surgery--Veterans Administration Medical Center. 4 Hours.
This is a clerkship at VA Medical Center (Kansas City or Leavenworth) in which the basic principals of patient evaluation and care are emphasized. Students practice the skills of history taking, physical examination, diagnostic procedures and of direct observation of the pathologic processes in assigned patients in the clinic, wards and operating room. Students participate in appropriate surgical and multidisciplinary conferences in which clinical problems are related to basic sciences and in which the expectations and the limitations of surgical treatment are discussed in clinical situations. Evaluation is based on clinical performance. Offered in Modules I-XII. Prerequisite: SURG 900 FLD.

SURG 913. Clinical Clerkship in Plastic Surgery. 4 Hours.
The medical student participates as an intern, functioning in the clinics, wards and operating room as an integral part of the service. Evaluation is based on clinical performance. Offered in Modules I-XII. Prerequisite: SURG 900. FLD.
SURG 914. Clinical Clerkship in Orthopedic Surgery. 4 Hours.
The principles of orthopedic evaluation and care are emphasized. Responsibility is to function as an extern in the clinics, wards and the operating room. Evaluation is based on clinical performance. Offered in Modules I-XII. Prerequisite: SURG 900. FLD.

SURG 916. Surgical Oncology. 4 Hours.
This rotation for medical students at a clinical level is designed to expose the student to procedures and techniques of modern surgical oncology. This experience includes: (1) Seeing all surgical oncology inpatient and outpatient consultations with the staff, (2) Operating room observation and participation with major cancer ablative procedures; e.g., radical lymphadenectomies, pelvic exenteration, major organ resections etc., (3) Clinical and laboratory exposure to immunotherapy and basic cancer immunology, (4) Exposure to special chemotherapeutic procedures; e.g., arterial infusion and perfusion, (5) Attendance at the combined medical surgical conference. The specific duties for each individual student is defined at the beginning of each module and will be changed to fit the specific needs and desires of each student. Evaluation is based on clinical performance. Offered in Modules I-XII. Prerequisite: SURG 900. FLD.

SURG 917. Clinical Clerkship in Urologic Surgery. 4 Hours.
This course is limited to one medical student at a time who has completed the Basic Surgery Clerkship, Surgery 900. Experience consists of care and evaluation of outpatients and inpatients requiring urologic diagnosis. Tutorial instruction and conferences are the prevalent means of instruction. Evaluation is based on clinical performance. Offered in modules I-XII. Prerequisite: SURG 900. FLD.

SURG 918. Clinical Clerkship in Neurologic Surgery. 4 Hours.
The principles of patient care and the physiological basis of neurological diagnosis are stressed. Experience consists of care and evaluation of outpatients and inpatients requiring neurosurgical diagnosis and treatment. Evaluation is based on clinical performance. Offered in Modules I-XII. Prerequisite: SURG 900. FLD.

SURG 921. Special Surgical Elective. 4 Hours.
Special clerkships or assignments not included in other elective courses which may be prearranged with and must be approved by the Course Director, Surgery 900, the Education Council, and the Department of Surgery. Evaluation is based on performance as determined by the sponsoring faculty member. Offered in Modules I-XII. Prerequisite: SURG 900 and by special arrangement with the section chief. FLD.

SURG 923. Care of Critically Ill Surgical Patient. 4 Hours.
The basic purpose of this clerkship is to provide the student with an opportunity to observe the management of the critically ill surgical patient. A physiological approach to the management of the surgical patient with shock, sepsis, renal failure, respiratory and cardiac failure is stressed. The student participates in the management and care of critically ill patients by assisting in the interpretation of physical the laboratory findings and proposing management responses to these findings. The student is encouraged to participate in ongoing clinical studies. An adjacent fully equipped laboratory is available for student use. Evaluation will be based upon clinical performance. Offered in Modules I-XII. FLD.

SURG 925. Ambulatory Specialties Selective in Urological Surgery. 2 Hours.
To optimize the health of men, women, and children, physicians must be able to diagnose, manage, and provide preventive advice concerning a wide range of conditions and symptoms pertaining to the genitourinary tract. The process depends on adequate patient assessment and appreciation of the epidemiology and pathophysiology of individual conditions, and the appropriate use of medical, surgical, and other interventions. Students will be on service in two week blocks. During that time they will participate in the following activities: Observe procedures in-patient and out-patient, out-patient experience at KUMC at the KC-VA, tutorial sessions, conferences, and in-patient rounds. SURG 926. Musculoskeletal Medicine. 4 Hours.
Clinical experience in the evaluation of common orthopedic disorders such as osteoarthritis, osteoporosis, sports injuries, and fractures; students will be involved in out-patient orthopedic clinics, orthopedic clinical conferences, and a directed, individualized study program. Prerequisite: All clinical rotations. CLN.

SURG 930. Orthopedic Advanced Clerkship. 4 Hours.
The principles of orthopedic evaluation and treatment are emphasized, through participation in the clinics, in-patient wards, and operating room. In addition, the student will learn relevant anatomy and surgical approaches by functioning as a prosector in the anatomy laboratory. Evaluation is based on clinical performance and participation in the dissections. Prerequisite: Surgery 900 CLN.

SURG 931. Rural Orthopedic Rotation. 4 Hours.
A rural orthopedic rotation in Garden City, Kansas. Students enrolled in this orthopedic rotation can expect to receive room and board from St. Catherine Hospital. The student will be expected to conduct themselves appropriately in a professional office. The student would be expected to form for the dress code of the office. The educational experience involves a clinical and surgical experience of general orthopedic practice with an emphasis on joint replacement, sports medicine, and hand surgery. The student could be expected to see patients with the attending physician in the office. The patient would be expected to participate in emergency room evaluations of orthopedic patients. The student would be expected to participate in the operating room with the attending physician. The scope of instruction would include musculoskeletal examination, instruction on the pathophysiology of musculoskeletal disease. A comprehensive written and video library is available for the student's use to aid in their education. The student can expect to learn aspects about radiology interpretation of musculoskeletal pathology. The student may also get experience with rehabilitation. The student will have an exposure to issues pertaining to worker's compensation including the opportunity to observe at depositions. Prerequisite: This course is appropriate for third and fourth year medical students with an interest in learning musculoskeletal diagnosis and treatment. CLN.

Clinical Electives in Wichita

Anesthesiology (p. 2089)
Emergency Medicine (p. 2090)
Family and Community Medicine (p. 2090)
Internal Medicine (p. 2091)
Obstetrics and Gynecology (p. 2092)
Ophthalmology (p. 2092)
Otorhinolaryngology (p. 2093)
Pathology (p. 2093)
Pediatrics (p. 2094)
Preventive Medicine and Public Health (p. 2095)
Psychiatry and Behavioral Sciences (p. 2095)
Radiology (p. 2096)
Special Programs (p. 2096)
Surgery (p. 2096)

Anesthesiology

Chair: Robert McKay, M.D.
ANSL 976. Anesthesiology. 4 Hours.
This course will acquaint students with various aspects of Anesthesiology. Students will learn essentials of the pharmacology of the various potent anesthetic agents, narcotics, barbiturates, tranquilizers, muscle relaxants and local anesthetics. They will acquire knowledge of pharmacology, physiology, anatomy, and biochemistry as they relate to anesthesia and some knowledge in the mechanics and physics of anesthesias machines and gas physiology in general. Student will receive training in Acute Care Medicine and Pulmonary Medicine. Student will be exposed to intensive and respiratory care, learn mechanics of ventilators and indications for use of ventilatory support. Students will be exposed to intensive and respiratory care, learn mechanics of ventilators and indications for use of ventilatory support. Students will learn pulmonary physiology and the use of diuretics and cardiotonic agents as they pertain to respiratory support to the patient in acute respiratory failure. Students will also be exposed to regional and spinal anesthesia, learning drug doses, techniques and indications for use. Prerequisite: Medical Basic Sciences. CLN.

ANSL 995. Special Topics in Anesthesia. 1-4 Hours.
This elective is designed to provide the clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with department faculty, specific objectives, reading assignments, and the mechanism for course evaluation. Prerequisite: Medical Basic Sciences and departmental consent. CLN.

Emergency Medicine

EMRM 976. Emergency Medicine. 2-4 Hours.
This rotation will introduce the student to the clinical practice of Emergency Medicine. The student will observe and participate as a member of the Emergency Department team, in handling a variety of patient problems and complaints, under the direct supervision of the full time Emergency physician. The student will develop patient evaluation skills, examining unscreened patients under faculty supervision. The information gained from performance of this history and physical exam will aid in the selective use of ancillary services to achieve the most efficient and effective emergency assessment in management of patients seen in the Emergency Department setting. The student will develop and improve skills in suturing, interpretation of radiographs and electrocardiograms, establishing IV lines, and other diagnostic studies and procedures commonly performed in the Emergency Department setting. The student will have clinical exposure to resuscitation techniques and problems. The student will develop an understanding of how Emergency Medicine Services relates to other departments and services. The student will assume appropriate responsibility for management of patient problems under the direct supervision of the Emergency Medicine faculty. The student's evaluation will consist of performance observed by assigned preceptor and director of Emergency Medicine Education. Prerequisite: Medical Basic Sciences and any two of the following four: SGRY 975, INMD 975, PDRC 975, or OBGN 975. CLN.

Family and Community Medicine

Chair: Rick Kellerman, M.D.

FCMD 976. Advanced Family Medicine-Greater Wichita Region. 4-8 Hours.
This course is tailored to the individual learning objectives of the student. Experiences include evaluation of outpatients and performance of procedures under direct supervision of volunteer faculty in the Wichita metro area. Assignments for call and case presentations are directed by the individual faculty. Evaluation is based on assessment of clinical performance and case presentations. Prerequisite: FCMD 950. CLN.

FCMD 977. Advanced Family Medicine-Rural Kansas. 4-8 Hours.
This course is tailored to the individual learning objectives of the student with interest in exploration of family medicine in a rural setting. Experiences include evaluation of outpatients and inpatients and performance of procedures under direct supervision of volunteer faculty in rural Kansas. Assignments for call and case presentations are directed by individual faculty. Evaluation is based on assessment of clinical performance and case presentations. Prerequisite: FCMD 950 and RLMD 976. CLN.

FCMD 978. Clinical Problems--A Community Perspective. 4 Hours.
This course is designed to provide an opportunity for the student to define and analyze clinical problems in community terms rather than individual terms. The student is assisted in developing a population-based study, including literature review, data collection and analysis, and procedures for submitting the work for scientific publication. Evaluation is based on assessment of community research skills. Prerequisite: Medical Basic Sciences. CLN.

FCMD 979. Ambulatory Care of the Elderly. 4 Hours.
This course is tailored to the individual learning objectives of the student with interest in geriatric care. Experiences include evaluation of patients under direct supervision of volunteer faculty in a variety of settings including inpatient, outpatient, nursing home and home visits. Assignments for call and case presentations are directed by the individual faculty. Evaluation is based on assessment of clinical performance and case presentations. Prerequisite: FCMD 950 and GERI 950. CLN.

FCMD 980. Advanced Family Medicine - A Residency Perspective. 4 Hours.
This course is tailored to the individual learning objectives of the student. However, it is designed for the student to function as a subintern at one of the three KUSM-W sponsored family practice residences - Via Christi or Wesley in Wichita or Smoky Hill in Salina. Experiences include evaluation of outpatients and inpatients and performance of procedures under direct supervision of residents and faculty. The individual residency directs assignments for in hospital call and case presentations. Evaluation is based on assessment of clinical performance and case presentations. Prerequisite: FCMD 950. CLN.

FCMD 981. Addiction Medicine. 2-4 Hours.
This elective will assist students to learn: 1) Diagnostic skills relevant to the identification of alcohol/drug dependency in patients of all ages whatever the presenting complaints 2) Management techniques including confrontation, inpatient and outpatient models of treatment, prognosis and aftercare including the role of community resources for patient and family 3) Preventive skills including an understanding of the epidemiology of addictive diseases and resources to identify and intervene with individuals and families at risk. The course will emphasize direct patient contact supported by required readings and didactic sessions with faculty members. Evaluation will be based on competence in this specialty at the end of the rotation, performance during the elective and completion of assignments. Prerequisite: FCMD 950. CLN.

FCMD 982. Sports Medicine. 2-4 Hours.
This course exposes medical students to the primary care/non-operative aspects of sports medicine. During this course, students will develop skills in the evaluation and management of athletes of all ages and athletic abilities who participate in a variety of sporting activities. The Sports Medicine course is offered at the KUSM-Wichita Family Medicine Residency at Via Christi Regional Medical Center in the Sports Medicine Center (located on the St. Joseph campus). The clinical component of the program includes examination and treatment of athletes in the clinic, at
the training room, and on the field. The student will be exposed to high
school, college, and professional athletes. They will become familiar with
the injuries and illnesses commonly seen by a team physician. Upon
completion of the course, students will have a basic understanding of
the skills to: * Conduct a preparticipation sports exam * Prevent sports-
specific injuries * Evaluate and treat injuries and illnesses in athletes *
Design home rehabilitation programs for sports injuries * Design criteria
for safe return to sports * Order appropriate diagnostic laboratory and
radiologic tests and interpret the findings * Apply casts and splints * Work
effectively with athletic trainers, personal trainers, physical therapists and
other health care professionals involved in the care of athletes * Advise
athletes on strength training, cardiovascular fitness, exercise prescription,
and sports nutrition. Medical students will be expected to participate in
small group discussions on aspects of Sports Medicine by doing selected
readings assigned by the course director. Students will also participate in
patient care along with physicians (including residents), athletic trainers,
and physical therapists in the clinic, in training rooms, and at athletic
events. Prerequisite: Senior Standing. CLN.

FCMD 983. In-Patient Maternal Care. 2 Hours.
This course is designed for fourth-year students who desire further
experience in maternal care in a Family Medicine setting. The student will
be assigned shifts three nights per week. During these shifts, the student
will attend rounds and lectures and will be involved in the management of
labor and delivery patients with Family Medicine residents and attending
physicians. The student will also attend Maternal Care lectures and will
complete readings assigned by course director. The course is offered
October, November, December and January. Prerequisites: FCMD 950
and senior standing. CLN.

FCMD 984. Care of the Underserved, Sedgwick County. 2-4 Hours.
This course exposes medical students to the primary care of patients in
Sedgwick County who are generally regarded as underserved due to
low socioeconomic level, minority status, culture and/or homelessness.
Clinically, the student will increase awareness, apply knowledge
and practice problem-solving skills in the care of patients who are
underserved. Most have limited socioeconomic resources and support
systems. The student will develop an understanding of health care
disparities and the role of the medical home in reducing disparities of
care. The rotation is conducted at GraceMed, a federally qualified health
center in Wichita. CLN.

FCMD 995. Special Topics in Family and Community Medicine. 2-8
Hours.
This elective provides an opportunity for clinical and/or research
experience in topics of special interest not otherwise represented in the
curriculum. Examples include Occupational Medicine, and Ambulatory
Procedures. The student, in consultation with departmental faculty,
will design specific objectives, activities, reading assignments, and the
mechanism for course evaluation. Prerequisite: Departmental consent.
CLN.

Internal Medicine

Chair: Jon P. Schrage, M.D.

INMD 977. Pulmonary Medicine. 4 Hours.
Students will work at a subintern level with pulmonary disease patients
on the service of the assigned pulmonary specialist, participate
in consultations, work in the Intensive Care Unit, and by special
arrangement in the Pulmonary Function Laboratory. Prerequisite: INMD
975. CLN.

INMD 979. Endocrinology. 4 Hours.
Student will learn to appreciate the normal physiology and
pathophysiology of selected diseases of the endocrine glands. In this
brief encounter he or she will study in particular thyroid abnormalities as a
model of the altered homeostasis occurring in endocrinopathies. Patients
with diabetes mellitus will be encountered and the reference to metabolic
perturbation of the acute and chronic complications of the same. Less
common problems will be assigned when patients are available. The
student will be expected to attend and participate in two seminars weekly
along with the resident on the endocrinology rotation. There are two
to four new work-ups weekly among hospital patients and selected
outpatients with individual patient follow-ups as required. Performance
will be evaluated by the faculty on written departmental forms. Critical
review of clinical ward and outpatient activities will equal 100 percent of
the grade. An in-depth topical summary may be submitted for extra credit
consideration (not required). Prerequisite: INMD 975. CLN.

INMD 981. Rheumatology. 4 Hours.
Medical students completing a four-week elective in Rheumatology should
be able to: 1) Perform a complete history and physical, with emphasis
on the those items (e.g., skin, joints) related to rheumatic diseases; 2)
Aspirate the knee; 3) Identify urate and calcium pyrophosphate dihydrate
crystals in synovial fluid; 4) List: a) historical and physical findings; b) X-
ray findings; c) modes of therapy for rheumatoid arthritis, degenerative
joint disease, gout, lupus and ankylosing spondylitis. Outpatient
and inpatient clinical performance - 100% of grade. Students will be evaluated
on the basis of meeting objectives 1-4 listed above. Prerequisite: INMD
975. CLN.

INMD 982. Hematology/Oncology. 4 Hours.
The student will learn the "team approach" to patient care, involving
the patient and family and other caregivers. Students will learn to
examine and interpret a peripheral smear. Students will also learn: the
fundamentals of bone marrow examination, the approach to evaluation
of anemia, the approach to patients with suspected malignancy and
the rationale behind chemotherapy, the evaluation of coagulopathies,
thrombotic states, bleeding disorders, nutritional deficiencies, and blood
therapy. Students will learn the natural history of common malignancies,
to perform therapeutic phlebotomy, bone marrow aspiration, and how
to interpret biopsy, bleeding time, and bone marrow pathology. Student
will perform patient work-ups, attend conferences, and rounds, including
interaction with the team (nurses, chaplains, social workers, occupational
therapists, volunteers). Prerequisite: INMD 975. CLN.

INMD 984. Nephrology. 4 Hours.
Students will be assigned patients at a sub-intern level from the inpatient
renal consultation services and the inpatient and outpatient hemodialysis
services. Renal physiology and pathophysiology will be emphasized plus
complicated fluid and electrolyte problems. Prerequisite: INMD 975. CLN.

INMD 985. Infectious Disease. 4 Hours.
The student will: 1) Learn about management of postoperative infection,
CNS infection, pulmonary infection, sepsis, fungal infection, etc. 2)
Learn data analysis techniques of infectious diseases specialist and
how (generally) microbiology laboratories work. 3) Learn principles
of antibiotic, antifungal, and antiviral therapy. Students are to attend
infectious diseases conferences. Students will see patients primarily
admitted to the Infectious Disease Office and work with selected
educational consultants. They will attend noon medicine conferences
and grand rounds at the assigned hospital. They will be supervised by
one physician. Students will have contact with 3 to 5 new patients a week
plus follow-up 3 to 4 patients. Clinical ward performance =100% of grade.
Student performance will be evaluated by faculty on written departmental
forms to assess: history-taking ability, expertise in performing physical
under the supervision of the Clerkship Director in Internal Medicine.

The student may elect an office practice experience in ambulatory cardiology and sharpening skills. Student will work with 3 to 5 patients per week. Clinical ward performance = 100% of grade. Student performance will be evaluated by faculty on written departmental forms to assess:

- Proficiency in physical diagnostic techniques,
- Introduction to non-invasive cardiology, including EKG, stress testing both exercise treadmill and nuclear procedures, M-Mode, and two dimensional echocardiography,
- Direct hands-on invasive procedures on patients that the attending works up, as well as other selected patients,
- Intensive care experience, including management and proficiency in dealing with acutely ill cardiac patients, and ascertaining the ability to use hemodynamic monitoring and intensive care treatment such as drugs, intra-aortic balloon, etc. Experience with both in-patients and outpatients will be offered. Primary emphasis will be placed on learning basic cardiology and sharpening skills. Student will work with 3 to 5 patients per week. Clinical ward performance = 100% of grade. Student performance will be evaluated by faculty on written departmental forms to assess: history-taking ability, expertise in performing physical exam, formulation of clinical judgment, diagnostic approach, rapport with nursing staff and fellow physicians. Prerequisite: INMD 975. CLN.

INMD 994. Ambulatory Care in Internal Medicine. 4 Hours.

The student may elect an office practice experience in ambulatory medicine with available faculty as arranged by Academic and Student Affairs and the department of Internal Medicine. The specific goals and objectives and the scope and type of clinical experience are constructed under the supervision of the Clerkship Director in Internal Medicine.

The office experience may be in general medicine or specialty practice. Prerequisite: INMD 975. CLN.

INMD 995. Special Topics in Internal Medicine. 2-8 Hours.

This elective is designed to provide clinical and/or research experience in general medicine or topics of special interest. The student will design, in consultation with the clerkship director and department faculty, specific objectives, reading assignments, and the mechanism for course evaluation. Prerequisite: INMD 975 and departmental consent. CLN.

Obstetrics and Gynecology

Chair: David A. Grainger, M.D., M.P.H.

OBGN 976. General Obstetrics and Gynecology. 4-8 Hours.

Supervised experience in labor and delivery, gynecologic surgery, and in-hospital management of the OB-GYN patient will be given. Scheduled conferences include weekly case conference and didactic lectures on Wednesday morning. Daily teaching and working rounds with attending staff will likewise be a very important part of the clerkship. Clinics meet daily. Deliveries/month: 325 (60 clinic); operations/month: 500 (60 clinic). Prerequisite: OBGN 975. CLN.

OBGN 977. Maternal-Fetal Medicine. 4 Hours.

The student will develop skills in assessment of high-risk obstetric and neonatal patients and will be a participating member of the perinatal transport team. Through development of a scientific paper on perinatal medicine (the specific subject to be determined in advance by the course director and student), the student will be able to illustrate his or her expanded knowledge in this subspecialty. The student on this elective will attend a weekly high-risk follow-up clinic, make rounds in the neonatal intensive care and intermediate nurseries with the assigned staff and resident physicians. The student will be on call for the perinatal transports team of obstetric and neonatal transports by ground and air, be on twenty-four hour birth room call every fourth night, devoting this call time to the delivery rooms. The student will attend all obstetric and neonatal conferences, attend a weekly conference with perinatologists and neonatologists, be invited on outreach education programs, and effort will be made to follow high-risk patients through labor-delivery-postpartum and neonatal care. The student will be evaluated by the supervising staff physician on patient care and on the completed paper on perinatal subject. Prerequisite: OBGN 975 and PDRC 975. CLN.

OBGN 979. Gynecologic Oncology. 4 Hours.

The objectives of this course for a senior medical student are as follows:
1) to introduce the student to gynecologic malignancies, their presenting symptoms, their evaluation, and treatment thereof; 2) management of treatment complications including management of chemotherapy problems and radiation problems; 3) management of medical problems associated with progressive malignancies. Prerequisite: OBGN 975. CLN.

OBGN 995. Special Topics in Obstetrics. 2-8 Hours.

This elective is designed to provide clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with department faculty, specific objectives, reading assignments, and the mechanism for course evaluation. Prerequisite: Departmental consent. CLN.

Ophthalmology

OTHO 976. Ophthalmology. 2 Hours.

The rotation is designed to familiarize the student with the private office and surgical procedures of a practicing ophthalmologist. Students will learn proper use of an ophthalmoscope and how to perform the ocular procedures.
exam. Students will observe surgical procedures, and participate in hospital rounds and private office visits. The student will be directly involved in all patient care as provided by the assigned ophthalmologist. Prerequisite: Medical basic sciences. CLN.

Otorhinolaryngology

OHIN 976. Otolaryngology--Ears, Nose, Throat. 2 Hours.
Students will observe the activities of a practicing otorhinolaryngologist and participate in the management of patients with ENT disorders. Students will observe and perform the examination of the anatomical areas and cavities of the head and neck. Students will accompany the assigned physician on all hospital rounds during office hours and when possible, observe surgical procedures. Prerequisite: Medical basic sciences. CLN.

Pathology

Chair: Thomas Kluzak, M.D.

PALO 976. Introduction to Clinical Pathology - St. Joseph. 4-6 Hours.
This elective serves to enhance the student's awareness of the role of the clinical laboratory in patient management. At the end of the elective, the student will be able to: 1) Describe the general methodology, interpretation and clinical implication of commonly ordered laboratory tests. 2) Suggest a planned approach to laboratory test, when given a patient's problem. An effort will be made to tailor the elective experience to the needs and interests of the individual student. If no specific interests are identified, a general elective will be arranged consisting of short rotations in the several clinical laboratory sections under the tutelage of supervisors, instructors, and pathologists. In each section, the student will observe testing procedures and may perform selected analyses at the discretion of the supervisor. Details of methodology will not be stressed, rather the emphasis will be on general principles, sampling, and interpretation. The student will attend daily departmental gross anatomic pathology conferences and didactic presentations in both anatomic and clinical pathology. The student will be encouraged, but not required to attend extra departmental conferences, such as the daily faculty practice noon conference. (Observation and participation in autopsies is also optional, but encouraged. The student may choose to spend time in surgical pathology or cytopathology.) The student will be required to make a formal presentation during the last week of the elective. This may consist of a case presentation with discussion of pertinent laboratory findings or the student may elect to present an analysis of a particular laboratory testing procedure, theory, or problem. Evaluation will be based upon the student's knowledge, acquisition, interest, and participation. Prerequisite: Medical Basic Sciences. CLN.

PALO 977. Laboratory Medicine. 4 Hours.
Several options are offered to the student within the Department of Laboratories as follows: 1) A general survey of Laboratory Medicine, including opportunities to view and assist in autopsies, a study of surgical pathology, some exposure to interpretation of immunoelectrophoretic studies, bone marrows, and other laboratory parameters of interest to medical students. 2) More selective and deeper evaluations such as the entire time in anatomic pathology including autopsy and surgical pathology. 3) Programmed courses of experience in chemistry, hematology, or microbiology. It is anticipated that the student will make preliminary contact with a member of the department indicating his or her interest and type of program he or she would like to be exposed to. The student will have the opportunity to attend the morning and afternoon conferences offered daily by the department together with the noon conferences offered by the general medical staff. It is hoped that the experience will be a pleasant and informative one and the student, as a possible pathology resident, will have the opportunity to survey the general field of pathology in a large institution primarily devoted to service and developmental pathology. Students are evaluated by the pathologist or medical technologist in the area which they are working and a report of the student's performance is submitted to the Medical School. Prerequisite: Medical Basic Sciences. CLN.

PALO 978. Introduction to Surgical Pathology. 4-6 Hours.
The student will understand and be able to describe orally, the role of the surgical pathologist in the diagnosis and treatment of common disorders, including: 1) breast masses, 2) suspicious mammographic lesions, 3) mass lesions of the lung, 4) enlarged lymph nodes, and 5) thyroid nodules. Differential diagnosis will be discussed. Using microscopic slides, the student will correctly identify major common surgical lesions of the breast, lung, lymph nodes, thyroid and colon. The student will describe how an intraoperative consultation is conducted, including the frozen section evaluation of resected tissue. The student will be assigned to work with a particular surgical pathologist in two-day blocks. On day 1 the student and pathologist will be in the operating room, performing intraoperative consultations, frozen sections and dissecting tissues removed at surgery. On day 2 they will examine the microscopic slides from selected cases received on the previous day. Depending upon the individual student's areas of major interest, he/she will accompany pathologists who perform fine needle aspiration biopsies and assist in their evaluation. The student will attend departmental conferences. Students will be evaluated according to the objectives above. Prerequisite: SGRY 975 or OBGN 975. CLN.

PALO 979. Introduction to Clinical Pathology - Wesley. 4 Hours.
Given a description of history and physical findings, the student will be able to select from a panel of tests those which, in the opinion of the faculty, would be most suitable for diagnosis management. The student will list no less than 5 legitimate reasons for performing laboratory tests and will discuss each of these using specific examples. The student will list not less than 4 conceptual definitions of "normal" and discuss the implications of each using specific examples. The student, using his/her understanding of the statistical nature of laboratory data, will discuss concepts of accuracy, precision, errors and clinical significance in 5 common laboratory tests of the student's choice. An effort will be made to tailor the elective experiences to the needs and interests of the individual student. In general, students will rotate through most areas of the clinical laboratory, and will gain experience in specimen collections, processing, test methodologies, and clinical interpretation. Students will report to their assigned areas by 7:30 a.m. and carry out assigned tasks then meet a member of the faculty in the late afternoon to go over the day's work and to discuss the clinical correlation of the tests reviewed that day. Students will attend the Departmental Teaching Conferences. Attendance at other clinical conferences, usually held at noon, is encouraged, but not required. Students will attend Medicine Morning Report with the Staff Pathologist each day at 8:00 a.m. Students will make one presentation at a Clinical Pathology Conference during their last week of rotation which may consist of a short lecture and a particular test or a patient presentation. The quality of the presentation will be evaluated and will form 50% of the grade. The other 50% will be determined from questions asked at the end of the presentation as determined by the objective given above. Prerequisite: INMD 975 or SGRY 975 or PDRC 975 or OBGN 975. CLN.

PALO 980. Introduction to Forensic Pathology. 2-4 Hours.
The student will understand and be able to describe orally, the basic principles of the medicolegal autopsy through observation of postmortem dissections and assisting the forensic pathologist. The student will learn the principles of death scene investigation. The student will appreciate the importance of toxicology in the correct determination of cause and manner
of death through the interpretation of toxicology reports and consultations with the chief forensic toxicologist. The student will understand the role of physical evidence collected at the scene and autopsy as it pertains to the determination of cause and manner of death. The student will be assigned to the autopsy suite and will be supervised by the on-duty designated forensic pathologist. As time permits the student will accompany the coroner or deputy coroner to court to observe trial testimony. Students will be evaluated according to the objectives listed above. Prerequisite: Medical basic sciences. CLN.

Pediatrics

Chair: Brian M. Pate, M.D.

PDRC 976. General Pediatrics. 4 Hours.
This is a four-week continuation of the basic pediatric clerkship for those students interested in additional pediatric experience. The program is flexible and should be arranged individually with the departmental chair. The experience may be either an inpatient or ambulatory experience or a combination of both. This experience carries with it increased responsibilities for patient care in areas selected by the student and arranged with the pediatric staff. Prerequisite: PDRC 975. CLN.

PDRC 977. Neonatology. 2-4 Hours.
The student will learn overview of neonatal medicine and develop skills and conceptual knowledge of newborns and premature infants. The student will attend X-ray conferences weekly, daily literature review, service rounds twice daily, pediatric grand rounds weekly and neonatal mortality review, as well as care for infants with special emphasis on NBICU. Prerequisite: PDRC 975. CLN.

PDRC 978. Ambulatory Pediatrics. 2-4 Hours.
This elective involves increased exposure to community and ambulatory pediatrics utilizing community resources including the pediatrician's office, the Public Health Department, Wesley Pediatric Clinic, Institute of Logopedics and other community resources. The program is flexible and can be broadly based in several areas or strictly confined to one area such as a continuous experience in the office of a community pediatrician. The program will be individually arranged with the department chairperson and the pediatric staff. The standard Elective Evaluation form will be utilized for the course. Prerequisite: PDRC 975. CLN.

PDRC 979. Medical Genetics. 2-4 Hours.
This elective is designed to give the medical student the opportunity to participate in the genetic evaluation of children with developmental delay, mental retardation, dysmorphic features or autism. By the end of the rotation the student will be familiar with common pediatric genetic syndromes and appropriate genetic testing strategy. The student will also get the opportunity to participate in telemedicine genetic clinics. Prerequisite: PDRC 975 or INMD 975. CLN.

PDRC 980. Pediatric Endocrinology. 2-4 Hours.
During the elective the student will learn diagnosis and management of endocrine problems in children. The student will participate in inpatient management, hospital and office consultation, and in a weekly endocrine clinic. Emphasis will be on the management of diabetes in children. Additional experience may be arranged through the Pediatric Department with other endocrinologists in the community. Prerequisite: PDRC 975. CLN.

PDRC 981. Diabetes. 2-4 Hours.
The student will learn to recognize and manage simple inpatient and outpatient problems related to controlling blood glucose levels in children and adults, discuss the psychosocial adaptation to their chronic illness, and perform as well as educate others in specific procedures involved in self care. The student will see patients with diabetes mellitus in the hospital clinic, attend team meetings, attend counseling staffing, do assigned readings, and report to the faculty. Evaluation of this clerkship will be based on rounds, conferences, lectures and performance on patient workups in hospital and in the clinic. Prerequisite: INMD 975 and PDRC 975. CLN.

PDRC 982. Pediatric Hematology/Oncology. 2-4 Hours.
The student will obtain histories, do physical examinations, write progress notes, conduct in-depth consultations regarding pediatric hematology and oncology problems, and will develop skills in diagnosis and therapy of pediatric oncology patients. The student will demonstrate knowledge of various procedures, such as bone marrow aspiration, administration of chemotherapy, and intrathecal medication. Prerequisite: PDRC 975. CLN.

PDRC 983. Pediatric Critical Care. 4 Hours.
This elective experience has been designed as a one-month rotation in the pediatric intensive care unit at Wesley Medical Center. Care will be provided to critically ill patients from the neonatal period through adolescence. Availability of the elective will be limited to one student per month, with possible exceptions based on the student's own objectives and educational needs. During this rotation the student will receive exposure to pediatric critical care subjects, and will be expected to convey an understanding of these processes during bedside rounds, in lectures, and during actual patient care. The student will participate in the educational endeavors of the critical care service, including lectures to other students and allied critical care staff such as nurses and respiratory therapists. The student will be expected to give brief presentations on topics which are identified during patient care. The student's final evaluation will be based primarily on the expression of an increased understanding of and confidence in the management of the diseases encountered in the PICU. Prerequisite: PDRC 975 and approval of instructor. CLN.

PDRC 984. Pediatric Allergy. 2-4 Hours.
Primarily a private office experience under the supervision of the physician, emphasizing an immunologic approach to allergy problems in pediatric patients. Prerequisite: PDRC 975. CLN.

PDRC 985. Pediatric Cardiology. 2-4 Hours.
Extensive clinical experience in children with cardiac disease will be provided. Daily pediatric cardiology ward rounds are conducted by the senior staff. Personal instruction will be given in cardiac physical diagnosis with stress on cardiovascular hemodynamics, evaluation of heart sounds and murmurs, electrocardiograms and cardiac radiology. Significant responsibility in patient management will be delegated to the student who will function as a member of the pediatric cardiology team. Ample opportunity will be available for participation in clinical investigative projects if the student so desires. Prerequisite: PDRC 975. CLN.

PDRC 986. Pediatric Neurology. 2-4 Hours.
The purpose of this elective is to acquaint the student with the wide spectrum of neurological diseases of infancy, childhood, and adolescence. The student will become familiar with the neurological examination of the newborn as well as the assessment of the infant and child. During the elective course the student will become actively involved in the diagnosis and treatment of seizure disorders. He or she will be exposed to routine laboratory procedures such as lumbar puncture, EEG and brain scan, as well as special procedures such as arteriography and pneumoencephalography. The student will be supervised by staff physicians and pediatric residents. Prerequisite: PDRC 975. CLN.

PDRC 987. Developmental Pediatrics. 2-4 Hours.
Students will become familiar with normal developmental patterns and will demonstrate the ability to perform and interpret developmental screening tests. Students will be able to recognize aberrant patterns of
development in an individual child and gain understanding of intervention services that are available for children with developmental delays. Students will be involved in the Development Clinic, Neonatal Follow-up Clinic, Heartspring (residential school for children with disabilities), and Rainbows United (early intervention provider for children under 5 years of age). These sites will allow the student exposure to a variety of children, with both normal development and those with behavioral and/or developmental problems. CLN.

PDRC 988. Pediatric Infectious Disease. 2-4 Hours.
This course is designed to familiarize students with infectious diseases of pediatric patients. Students will learn the rational selection of antimicrobials and their appropriate uses and recognize the reasons for failure of antimicrobial therapy. Students will learn basic immunology and both active and passive immunization. Students will learn the pathogenesis of fever and to recognize the common pediatric pathogens causing meningitis, bacteremia, respiratory tract infections, enteric infections, and skin infections. Students will attend outpatient clinics, daily hospital rounds on in-patients and new consultations, and daily meetings to discuss infectious disease topics. *Recommendation: Candidates for Med/Peds residency should enroll in 2 weeks of this course and 2 weeks INMD 986, (Adult) Infectious Disease. CLN.

PDRC 989. Pediatric Emergency Care. 2-4 Hours.
The student will spend time at the Pediatric Emergency Department, working closely with the faculty. Teaching and supervision is provided by board certified emergency medicine physicians and internal medicine/pediatrics physicians with faculty positions in the Department of Pediatrics. Expectations include participation in didactic instruction and patient care, literature searches of material as assigned or necessary for management of patients, understanding of evidence-based medicine in the care pediatric emergencies and participation in emergency department procedures under the guidance of the attending. The goals are for the student to become familiar with various pediatric emergencies, as well as understanding other situations in which children are brought into the ED. Prerequisite: PDRC 975. CLN.

PDRC 990. Pediatric Nephrology. 2-4 Hours.
During this elective, the student will learn to recognize and manage inpatient and outpatient problems related to pediatric nephrology. Participation in clinic, as well as hospital consultations will be involved, as well as reading assignments/discussions with faculty. Teaching and supervision is provided by a full-time, board certified pediatric nephrologist. A basic understanding of pediatric nephrology is essential to the pediatrician in general practice who will need to recognize a child suffering from a renal condition, manage those that generally do not require referral, and initiate management of those that will need the intervention of a nephrologist. Expectations include participation in daily instruction and patient care, literature searches of material as assigned or necessary for management of patients, and understanding of evidence-based medicine in the care of the nephrology patient. Prerequisite: PRDC 975. CLN.

PDRC 995. Special Topics in Pediatrics. 2-8 Hours.
This elective is designed to provide clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. This elective is designed to provide clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. Prerequisites: Medical Basic Sciences and Departmental consent. CLN.

---

**Preventive Medicine and Public Health**

Chair: Tracie Collins, M.D., M.P.H.

PVMD 976. CLARION. 2-4 Hours.
Students who participate in CLARION will develop a deeper understanding of healthcare as a system that requires highly performing interprofessional teams to achieve the six aims outlined by the Institute of Medicine. These aims include care that is safe, timely, equitable, effective, efficient and patient centered. Students will study with other students from other health professions disciplines under the direction of interprofessional course faculty and invited members of the community who will guide discussions each week to prepare students for analyzing and developing solutions to a fictional healthcare sentinel event. CLN.

PVMD 995. Special Topics in Preventive Medicine. 2-8 Hours.
This elective is designed to provide clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with Departmental faculty, specific objectives, reading assignments and the mechanism for course evaluation. CLN.

---

**Psychiatry and Behavioral Sciences**

Chair: Lyle Baade, Ph.D., Interim

PSCR 978. Child Psychiatry/Adolescent Psychiatry. 2-4 Hours.
The course will familiarize students with common psychiatric diagnoses and therapies for children and adolescents. Students will observe and participate in the evaluation and treatment of children and adolescents in inpatient, outpatient, and residential settings. They will attend staffings, family meetings, and relevant conferences. Faculty will provide supervision. Prerequisite: PSCR 950. CLN.

PSCR 979. Advanced Studies in Psychiatry. 2-8 Hours.
This course allows students to expand their knowledge and experience in Psychiatry with rotations of their own choosing. Experience can be modified to fit the individual's interests and needs. All students will have the core experience (attendance at Grand Rounds, Journal Club and readings assigned by Clinical supervisor). Students may choose one training site for four to eight weeks, subject to availability of supervision. Scheduling should be arranged with the Psychiatry Clerkship Director. Written evaluation by supervisor at the end of the course. Supervisor's evaluation comprises 100% of the grade. Prerequisite: PSCR 950. CLN.

PSCR 980. Geriatric Psychiatry. 2-4 Hours.
The student will experience caring for elderly and often medically ill patients with psychiatric symptoms and diagnoses on an acute geropsychiatry hospital unit, in outpatient settings, and in the nursing home and assisted living environment. Experience will be gained in assessing and managing complex medical and psychiatric conditions in elders. Objectives include: 1) Increase awareness of the common psychiatric conditions in elders. 2) Improve ability to assess, diagnose and treat common psychiatric conditions in elders who commonly have co morbid medical conditions. 3) Understand the impact of the elder's environment on psychiatric symptoms, and the necessity of managing the elder within the context of the psychosocial environment, especially the family unit. 4) Improve ability to manage complex pharmacotherapy. Teaching Methodology includes bedside clinical rounds, geropsychiatry small group discussions, lectures and assigned readings. Patient contact
would include elderly patients with common psychiatric conditions - affective disorders, dementias, anxiety disorders, psychotic disorders and comorbid medical conditions, acute care hospital geropsychiatry unit, outpatient clinic, and long term care facilities. Evaluation will be completed by supervisor. Prerequisite: PSCR 950 and INMD 975. CLN.

PSCR 981. Consultation/Liaison Psychiatry. 2-8 Hours.
The objective of this course is to increase the student’s knowledge and skills in evaluating patients with both psychiatric and medical illnesses in inpatient and outpatient settings, making recommendations, and communicating with referring physicians. These objectives will be met by direct patient contact, individual supervision, assigned readings, and attendance at conferences. Prerequisite: PSCR 950 and INMD 975. CLN.

PSCR 985. Clinical Psychopharmacology. 2-8 Hours.
The purpose of this elective is to obtain intensive and in-depth experience with the medical management of a variety of psychiatric disorders. During this rotation, the student will come in contact with patients suffering from a variety of psychiatric disorders and will gain further experience with a medical model approach to the management of these disorders. The student will learn basic pharmacokinetics principles which are broadly applicable to the pharmacologic management of patients with both psychiatric and non-psychiatric disorders. The student will learn pharmacodynamic principles and clinical neuroscience principles which are of special relevance to clinical psychopharmacology. Effort will be made to tailor the elective to maximize the exposure to a particular area or diagnosis, based on student interest. The student may choose to be involved in ongoing clinical psychopharmacology research, including an exposure to drug development and testing. Prerequisite: Pharmacology (2nd year) and PSCR 950. CLN.

PSCR 987. Outpatient Psychiatry. 2-8 Hours.
The objective of this course is to increase the student’s depth of knowledge regarding psychiatric disorders as they present in an outpatient setting. Emphasis will be on clinical skills including the psychiatric interview and diagnostic process and gaining a longitudinal perspective on psychiatric illness. In addition, the student will be introduced to psychotherapy theory and skills. Students will attend departmental academic events, teaching conferences and participate in intake evaluations performed by psychiatry residents. They will also participate in observing a selected number of ongoing cases in conjunction with residents. Students will evaluate patients for intake early in their rotation and follow these cases throughout their rotation. Prerequisite: PSCR 950. CLN.

PSCR 995. Special Topics in Psychiatry. 2-8 Hours.
This elective is designed to provide clinical experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with department faculty, specific objectives, reading assignments, and the mechanism for course evaluation. Prerequisite: Medical Basic Sciences and departmental consent. CLN.

Radiology

Chair: Charles McGuire, M.D.

RAD 976. Radiology. 4 Hours.
An elective in radiology will consist of four weeks, time to be spent in the hospital of the student’s choice. Most of the time spent by the student during the elective will be in diagnostic radiology but if the student so desires time may be spent in radiation therapy as well as nuclear medicine. The student will be expected to attend all the radiology conferences as well as the other appropriate conferences at which the radiology department contributes. Prerequisite: Medical Basic Sciences. CLN.

RAD 995. Special Topics in Radiology. 4 Hours.
This elective is designed to provide clinical experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with department faculty, specific objectives, reading assignments, and the mechanism for course evaluation. Prerequisite: Basic Science and Department Consent. CLN.

Special Programs

SPCP 974. Medical Research. 2-12 Hours.
This elective is available for pursuit of research efforts by students. Arrangements for time and facilities will be on an individual basis. Evaluation of Student performance will depend on the particular research project. Prerequisite: Approval of faculty supervisor, departmental chairperson, and Associate Dean for Academic and Student Affairs. CLN.

SPCP 976. Special Program: Domestic Off-Campus. 1-8 Hours.
The student will enroll in this rotation when desiring elective credit for an educational experience at an LCME accredited medical school other than KU, within the United States. Application process is initiated through the office of Academic & Student Affairs. A student may receive no more than 8 units of elective credit for off campus experience(s), which count toward the M.D. degree. Applications and information are available on the Academic and Student Affairs website. Prerequisite: Approval of the chair of the respective department and the Associate Dean for Academic and Student Affairs. CLN.

SPCP 977. Special Program: International. 4-8 Hours.
The student will enroll in this rotation when desiring elective credit for an educational experience at KU which is not otherwise defined by a current elective offering. Application process is initiated through the office of Academic & Student Affairs. A student may receive no more than 8 units of Special Program elective credit, which count toward the M.D. degree. Prerequisite: Approval of the chair of the respective department and the Associate Dean for Academic and Student Affairs. CLN.

SPCP 978. Special Program: On-Campus. 1-8 Hours.
The student will enroll in this rotation when desiring elective credit for an educational experience at KU which is not otherwise defined by a current elective offering. Application process is initiated through the office of Academic & Student Affairs. A student may receive no more than 8 units of Special Program elective credit, which count toward the M.D. degree. Prerequisite: Approval of the chair of the respective department and the Associate Dean for Academic and Student Affairs. CLN.

Surgery

Chair: Alex Ammar, M.D.

SGRY 972. Urological Surgery. 2-4 Hours.
Students will experience urologic surgery patient care during clinics in the office setting. Students will be assigned to the Urological service and perform history and physical and urological diagnosis examinations. Students will attend surgical conferences. Students will see both pre- and post-operative patients and assist with minor out-patient surgeries. CLN.

SGRY 977. Plastic Surgery. 2-4 Hours.
All student participation will be under the direct supervision of the staff. This clerkship is directed toward providing a variety of experiences in the field of plastic surgery. The student will participate in evaluating and treating outpatients and inpatients in a private office and hospital setting. The student will be involved with history taking, physical examination,
and evaluation of patients preoperatively. Attendance in the operating room will be emphasized as well as postoperative management of plastic surgery problems. The student will be introduced to the basic concepts of hand surgery ranging from acute surgical problems to that of congenital abnormalities. Complete care of the burn patient will be stressed. Tumors of the skin, head and neck, and congenital anomalies of the hands and face will be covered. Facial trauma and esthetic surgery will also be included in the curriculum. Prerequisite: SGRY 975. CLN.

SGRY 978. Orthopedic Surgery. 2-4 Hours.
Emphasis will be placed on the principles of orthopedic evaluation and care through obtaining a history, performing a physical examination, and outlining management on assigned orthopedic patients. The student's responsibilities will include rounds with attending orthopedic surgeon or the resident, clinic or office rotation and several orthopedic conferences and assigned lectures. Prerequisite: SGRY 975. CLN.

SGRY 979. Cardiothoracic Surgery. 2-4 Hours.
This clerkship is designed to give the student familiarity and basic understanding of cardiopulmonary disease entities with emphasis on pathophysiology, diagnosis, and management. Conferences as well as rounds with attending surgeons and resident staff comprise the essential part of this clerkship. Patients will be assigned to students for workup on a regular basis not to exceed three patients a week. Prerequisite: SGRY 975. CLN.

SGRY 980. Burn and Critical Care. 2-4 Hours.
This course will provide hands-on experience in burn management and critical care. The student will be assigned to the Burn Unit at Via Christi Regional Medical Center - St. Francis Campus. He/She will make daily rounds, assist in surgery, and participate in preoperative and postoperative care of patients admitted to the Burn Unit. He/She will be supervised by faculty and surgery residents. Patient Contact: 5-10 patients/day (inpatient and outpatient). Evaluation: Use form for clinical assessment and personal skills (Department of Surgery form currently being used). Prerequisite: SGRY 975. CLN.

SGRY 981. Neurosurgery. 2-4 Hours.
This elective will provide an in-depth exposure to neurosurgery. Student will have daily rounds, patient work-ups, surgery and office experience. He/she will be supervised by faculty and surgery residents assigned to neurosurgery. Patient contact is variable. Students will be evaluated on form for clinical assessment and interpersonal skills currently in use by the Department of Surgery. Prerequisite: SGRY 975. CLN.

SGRY 983. General Surgery Preceptorial. 2-4 Hours.
The clerkship provides in-depth exposure to hospital and office practice in general surgery. The student will make daily rounds, assist in office, perform patient work-ups, scrub on all surgical procedures on his/her patients, and attend conferences on consultant rounds, surgical grand rounds, and tumor and X-ray. Evaluation will be based on patient work-ups, technical skills, rapport with patients, paramedical personnel, and surgical team. Prerequisite: SGRY 975 and INMD 975. CLN.

SGRY 985. Pediatric Surgery. 2-4 Hours.
This course provides an introduction to common problems in pediatric surgery. The student will attend three to four conferences per week, make daily rounds, perform patient work-ups, and assist in surgery and office experience—both preoperatively and postoperatively. The student will have contact with approximately twenty-five patients per week and will be supervised by a faculty member. Evaluation will be based on clinical assessment and interpersonal skills. Prerequisite: SGRY 975 and PDRC 975. CLN.

SGRY 986. Peripheral Vascular Surgery. 2-4 Hours.
The objective is to learn to care for patients with peripheral vascular disease emphasizing diagnosis, examination, appropriate testing, including ultrasounds, vascular lab, angiography, and CT scans. Students will also be familiar with the natural history of peripheral vascular disease and the role of surgical and non-surgical treatments. In addition the student will gain knowledge of venous disease to include management and treatment of deep vein thrombosis and pulmonary embolism. The student will be expected to see patients on rounds, assist in surgery, and perform preoperative evaluation of patients with vascular disease. The student will see patients both as in-patients and out-patients. Prerequisite: SGRY 975. CLN.

SGRY 987. Senior Elective in Surgery. 4 Hours.
The student will be assigned to a teaching panel and will work closely with the attending surgeons and residents. The student will participate in the preoperative, intraoperative, and postoperative management of surgical patients. Exposure to acutely injured patients and acute surgical conditions in the emergency department will be an important aspect of this elective. As a result of these experiences the student will be able to: recognize acute surgical conditions and institute initial management, develop skills in surgical diagnosis, participate and assist in surgical procedures, elicit and perform an H & P on patients in an ambulatory care setting, and develop diagnostic skills in the ambulatory care setting. Prerequisite: SGRY 975. CLN.

SGRY 995. Special Topics in Surgery. 2-8 Hours.
This elective is designed to provide clinical and/or research experience in topics of special interest not otherwise represented in the curriculum. The student will design, in consultation with department faculty, specific objectives, reading assignments, and the mechanism for course evaluation. Prerequisite: Medical Basic Science and departmental consent. CLN.

SGRY 997. Sports Medicine. 2-4 Hours.
The student will experience Sports Medicine Care in the ambulatory setting. The student will evaluate sports related injuries in the office setting and also have the opportunity to observe surgical treatment in the arthroscopic surgery suite. The student will have the opportunity to participate in the on-site evaluation of athletic injuries through outreach sports medicine programming. Additional exposure to athletic training services will also be utilized. Prerequisite: Senior standing. CLN.

Postgraduate Training Programs

The KU School of Medicine provides two distinct residency and fellowship programs. Both programs are comprehensive in their training. One program is at the KU School of Medicine and Medical Center in Kansas City. The second program is at the KU School of Medicine — Wichita.

Kansas City Postgraduate Training Programs (http://www.kumc.edu/school-of-medicine/gme.html)
Wichita Postgraduate Training Programs (http://wichita.kumc.edu/education/graduate-medical-education.html)
Continuing Medical Education (http://kumcce.ku.edu)
Institute for Community Engagement (http://www.kumc.edu/community-engagement.html)

Masters and Ph.D. Programs

Founded in 1905, the KU School of Medicine is proud of its rich legacy as Kansas’ only medical school. Our mission is to enhance the quality of life and serve our community through the discovery of knowledge,
the education of health professionals and by improving the health of the public.

The School of Medicine integrates excellent education, scientific discovery, outstanding clinical programs and dedication to community service. In addition to its commitment to educating the physician workforce of tomorrow, the school is an emerging leader in biomedical research and the health of the public. Graduate programs are offered in the biomedical sciences, biostatistics, public health, health policy and management, and clinical research.

Admission and degree requirements vary by program and are listed in the individual program descriptions. Requirements and course descriptions are subject to change. In most cases, use the catalog of the year student entered program. Other years’ catalogs (http://catalog.ku.edu/archives)».

Click on the list of programs (p. 2062) link for a list of the programs offered.

Department of Anatomy and Cell Biology

The Anatomy and Cell Biology Graduate Program is designed to prepare the student for a career in independent research and/or teaching with concentrations in the following areas:

- Cell Biology
- Developmental Biology
- Neuroscience
- Renal Biology
- Reproductive Biology

The graduate program emphasizes acquiring the skills and knowledge required to perform and communicate the results of laboratory research. Individual research programs within the Department of Anatomy and Cell Biology are largely complementary and focus on understanding the biological processes that contribute to human health and disease. Experimental systems include the use of cell and tissue culture, as well as animal models such as hydra, sea urchin, frog, chick, zebrafish, and transgenic mice.

In 2014, the Department of Anatomy and Cell Biology brought in over $8 million in grant funding from the National Institutes of Health, placing it at the top of all departments within KUMC and 17th (out of 78) among all Anatomy and Cell Biology departments in the country. Faculty members and trainees also received funding from the American Heart Association, the Cystic Fibrosis Foundation, and various other agencies. Graduates of this program have obtained positions in industry, government, and consulting, as well as faculty positions at the college, university, and medical/graduate school level.

Courses

**ANAT 832. Electron Microscopy Techniques. 3 Hours.**
Basic methods in preparation of tissues and cells for ultrastructural studies; use of electron microscopy in specific research problems; interpretation of biological ultrastructure; reading assignments and discussion sessions. Prerequisite: ANAT 830, or consent of course instructor. LEC.

**ANAT 845. Graduate Histology. 2 Hours.**
This course will bridge student knowledge of systems/organs with cellular histology and is designed as an accelerated introduction to histological techniques, microscopy/optics, and histology. Classes meet once a week and the format includes a 1 hour lecture on individual tissues within related organ systems followed by 1 hour of microscopic observation. Prerequisite: Completion of the IGPBS core curriculum or consent of instructor. LEC.

**ANAT 846. Advanced Neuroscience. 5 Hours.**
Team taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as PHCL 846, PHSL 846 and NURO 846). Prerequisite: Permission of course director. LEC.

**ANAT 847. Developmental Neurobiology. 2 Hours.**
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as NURO 847 and PHSL 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor. LEC.

**ANAT 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.**
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer's, Parkinson's, Huntington's, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down's syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as NURO 848, PHCL 848, PHSL 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor. LEC.

**ANAT 868. Advanced Developmental Biology. 2 Hours.**
In-depth exposure to the classically important aspects of development using several different animal systems. The course addresses a selected number of topics and brings students up to date with regard to cutting edge research accomplishments in each topic. The materials selected are designed to qualify students for future teaching assignments in Developmental Biology and enhance their research capabilities. Prerequisite: IGPBS Core Curriculum or consent of instructor. LEC.

**ANAT 869. Grant Writing. 3 Hours.**
All aspects of preparing grant applications are covered. This includes writing an actual grant application containing all the usual elements of grants - budgets, biosketches, resources, and scientific text. In addition, different funding agencies, building research teams, the review process, responding to reviewers, and resubmitting grants will be covered. (Same as HPM 878 and NRSG 889.) Prerequisite: Appropriate research methods and statistics courses in student's current graduate program; and permission of the instructor. For students in the Outcomes Management and Research concentration, HPM 821. LEC.

**ANAT 870. Techniques in Anatomy and Cell Biology. 1-3 Hours.**
Advanced study allowing a student to pursue a particular research or educational skill through directed laboratory work. Prerequisite: Consent of instructor. LEC.

**ANAT 880. Advanced Topics: _____. 1-5 Hours.**
Special study allowing a student to pursue a particular subject through readings, laboratory work, and conferences with a faculty member. Prerequisite: Consent of instructor. IND.
ANAT 885. Seminar. 1 Hour.
Research-oriented presentations in a seminar format by students, faculty, and guests. LEC.

ANAT 890. Master's Research. 1-10 Hours.
Independent laboratory investigation approved by and under the supervision of the student's advisor, and in partial fulfillment of the requirements for the M.A. degree. Prerequisite: Consent of advisor. RSH.

ANAT 899. Master's Thesis. 1-6 Hours.
Preparation of the formal thesis based upon independent research and in partial fulfillment of the requirements for the M.A. degree. Credits will be given only after the thesis has been accepted by the department. Prerequisite: Consent of advisor. THE.

ANAT 900. Analysis of Scientific Papers. 1 Hour.
Research articles are analyzed by the student with the guidance of an instructor in terms of quality of scientific content and mechanics of the presentation. One or more articles are discussed in each tutorial session. The research topics and the instructor are chosen in accordance with the research interest of the student. LAB.

ANAT 990. Doctoral Research. 1-12 Hours.
Original and independent laboratory investigation, approved by and conducted under the supervision of the students' advisor and advisory committee, in partial fulfillment of the requirements for the Ph.D. degree. Prerequisite: Consent of advisor. LEC.

ANAT 999. Doctoral Dissertation. 1-12 Hours.
Preparation of the dissertation based upon original research and in partial fulfillment of the requirements for the Ph.D. degree. Credits will be given only after the dissertation has been accepted by the student's dissertation committee. Prerequisite: Consent of advisor. THE.

Master of Science in Cell Biology and Anatomy

The Master of Science (M.S.) program in Anatomy and Cell Biology prepares the student for a career at the advanced technical level in academia, industry, or government. Graduating students may also find teaching positions at the secondary or junior college level. Incoming students may not directly enroll in the M.S. program; entry will only be granted by the Departmental Director of Graduate Education upon the recommendation of the student's Research Advisory Committee.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

• Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
  Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
  • A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.

• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).

• A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.

• An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

• Three letters of recommendation.

• Prerequisite coursework:
  • One year of general chemistry
  • One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  • One year of biological sciences
  • One semester of calculus
  • One semester of physics

• Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer the applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs». 

Degree Requirements:

• Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.

• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

• Completion of a minimum of 30 credit hours.

• Enrollment in a minimum of one (1) credit hour the semester the student will graduate.

• Successful completion of either a thesis defense or general examination (p. 2398) the semester the student will graduate.

• If thesis option is chosen, then enrollment in a minimum of one (1) credit hour of ANAT 899 Master's Thesis and successful thesis submission and publication (p. 2398) (according to Office of Graduate Studies policy.)

• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):

Doctor of Philosophy in Cell Biology and Anatomy

Students that obtain a Ph.D. in Anatomy and Cell Biology are required to achieve the following expectations:

- Become knowledgeable in the areas of study included in the IGPBS (Interdisciplinary Graduate Program in the Biomedical Sciences) core curriculum.
- Obtain in-depth and up-to-date expertise in a specialized area of knowledge that is appropriate for the field of your dissertation research project.
- Make original and high quality contributions to the scientific literature in your chosen research field.
- To become familiar with the scientific literature through general and specialized journals in biological research, and to develop the ability to critically evaluate the original research in your own and related fields.
- Become skilled in organizing and communicating information in oral presentations, and to respond to critical questioning.
• Develop clarity, conciseness, and precision in writing, to aid in grant application writing and publication of your original research results.
• To learn how to ask incisive scientific questions and gain experience in the design, performance and interpretation of laboratory experiments and observations.
• To gain familiarity with the preparation and writing of grant applications.
• To prepare for the teaching as well as the research aspects of an academic career.
• To obtain instruction in research skills and responsible scholarship.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2126) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission Requirements:**

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
  - Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
  - A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
  - Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
  - A background check (p. 2395) is required during the admission process; it may affect the student’s eligibility to enter the program.
  - An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
  - Three letters of recommendation.
  - Prerequisite coursework:
    - One year of general chemistry
    - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
    - One year of biological sciences
    - One semester of calculus
    - One semester of physics
  - Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which the time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs may be found on the Interdisciplinary Graduate Program in Biomedical Sciences website.

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

**Degree requirements:**

- Degree requirements are normally completed within 5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2398) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 857 Biographics, GSMC 852 and GSMC 855 Introduction to Biomedical Research I and II (or equivalent) meets the Research Skills requirement.
  - Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2398) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2398). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
- Successful completion of the Post-Comprehensive Enrollment (p. 2398) requirement.
- Enrollment in a minimum of one (1) credit hour of ANAT 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2398) (dissertation defense.)
- Successful Dissertation Submission and Publication (p. 2398) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):

Other years’ catalogs may be found on the Interdisciplinary Graduate Program in Biomedical Sciences website.
• Students must be continually enrolled in ANAT 885 and ANAT 900 each fall and spring semester beginning with fall semester of their second year. These two courses may be waived for one semester after the student has completed all departmental requirements other than the dissertation defense.

• Successful completion of a minimum of two (2) credit hours of elective coursework related to specialized interests. Electives are chosen in consultation with the student’s advisor. Electives may be chosen from this list or students may select electives from courses offered by other departments.

- ANAT 846 Advanced Neuroscience 5
- ANAT 847 Developmental Neurobiology 2
- ANAT 848 Molecular Mechanisms of Neurological Disorders 3
- ANAT 868 Advanced Developmental Biology 2
- ANAT 869 Grant Writing 3
- ANAT 870 Techniques in Anatomy and Cell Biology 1-3
- ANAT 880 Advanced Topics: _____ 1-5

• Successful completion of two hour-long presentations in the regular departmental seminar series (or an equivalent seminar approved by the graduate education director) are to be given in two separate semesters, not including the one in which the student defends.

• Gain teaching experience by assisting in selected courses that are chosen in consultation with the student’s advisor and the graduate education director.

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (http://catalog.ku.edu/medicine/combined-md-phd/#degreerequirementstext) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

**Total Hours:** 19-30
The mission of the Department of Biochemistry and Molecular Biology is to:

- provide a dynamic research environment with programs in the disciplines of biochemistry and molecular biology
- provide a superior educational experience for graduate students and medical students
- provide a rich training environment for postdoctoral fellows
- provide service to our institution and community

Our areas of research strength include:

- Regulation of gene expression, emphasizing but not limited to transcription regulation.
- Protein folding and structure determination.
- Allosteric regulation of protein function.
- Signal transduction

Our faculty members are associated with a variety of cross-disciplinary centers within the university, including The Kidney Institute (http://www.kumc.edu/school-of-medicine/kidney-institute.html), the COBRE for Protein Structure and Function (http://psf.cobre.ku.edu), the COBRE for Novel Approaches for Control of Microbial Pathogens (http://www.kumc.edu/school-of-medicine/microbiology-molecular-genetics-and-immunology/cobre.html), the COBRE for Molecular Regulation of Cell Development and Differentiation (http://www.kumc.edu/school-of-medicine/anatomy-and-cell-biology/nih-center-of-biomedical-research-excellence-(cobre).html), the Cancer Center and the Institute for Reproductive Health and Regenerative Medicine (http://www.kumc.edu/school-of-medicine/irhrm.html).

Core services are available, which includes: a transgenic mouse facility; a biotechnology support center that offers DNA synthesis, sequencing, and microchip analysis; a state-of-the-art mass spectrometry facility (http://www.kumc.edu/mspc.html); in-house x-ray crystallographic equipment; and a variety of spectroscopy and calorimetry instruments, including advanced fluorescence equipment.

### Courses

**BCHM 801. Research in Biochemistry. 1-10 Hours.**
LEC.

**BCHM 802. Biochemistry Seminar. 1 Hour.**
Weekly meetings. LEC.

**BCHM 808. Methods for Analyzing Biomolecules. 3 Hours.**
Application of physical techniques to the study of biological macromolecules in solution. Emphasis on utilization of data obtained from such studies in interpreting biological processes at the molecular level. Course will be taught in the spring. Prerequisite: Consent of instructor. LEC.

**BCHM 850. Topics in Biochemistry. 1-3 Hours.**
Selected topics in biochemistry with varying subject matter. Students should inquire before enrolling. Topics are in-depth studies of current research areas. The course may consist of formal lectures and/or directed readings and studies. IND.

**BCHM 862. Biochemical Research-Literature Seminar. 1 Hour.**
Students and faculty meet once weekly to discuss the research of students or the current biochemical literature. The student is required to make one presentation. Prerequisite: Consent of instructor. LEC.

**BCHM 890. Master's Research. 1-15 Hours.**
Research for the M.A. degree. RSH.

**BCHM 899. Master's Thesis. 1-15 Hours.**
Restricted to the writing of the master's thesis. THE.

**BCHM 922. Advanced Molecular Genetics. 3 Hours.**
An in-depth analysis of the structure and function of gene regulatory proteins and the mechanisms of gene transcription, and DNA replication and repair. Lectures and discussion of current literature. Prerequisite: Consent of instructor. Course will be presented in the fall semester and will include several faculty leading discussions in their area of research interests. LEC.

**BCHM 923. Protein Structure and Function. 3 Hours.**
The relationship between protein structure, binding, and physiological function. Emphasis is on proteins as enzymes, structural components, and regulators. Course will be taught in the spring. Prerequisite: consent of instructor. LEC.

**BCHM 990. Doctoral Research. 1-15 Hours.**
Research for the doctoral degree. RSH.

**BCHM 999. Doctoral Dissertation. 1-15 Hours.**
Restricted to the writing of the doctoral dissertation. THE.

### Master of Science in Biochemistry and Molecular Biology

The M.S. in biochemistry and molecular biology normally leads to positions at the advanced technical level in academic research, industry, or government. It may lead to teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2126) Detailed instructions on how to
apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
  
  Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).

- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

- Three letters of recommendation.

- Prerequisite coursework:

  - One year of general chemistry
  
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  
  - One year of biological sciences
  
  - One semester of calculus
  
  - One semester of physics

- Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs». Degree requirements:

- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 7 years is allowed.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- Completion of a minimum of 30 credit hours.

- Successful completion of either a thesis defense or general examination (p. 2398) the semester the student will graduate. The option will be decided by the student’s advisor and must be approved by the departmental Graduate Committee.

If the thesis option is chosen, then enrollment in a minimum of one (1) credit hour of BCHM 899 Master’s Thesis is required and successful thesis submission and publication (p. 2398) (according to Office of Graduate Studies policy.)

If the general examination option is chosen, then enrollment in a minimum of one (1) credit hour the semester the student will graduate is required.

- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):

### Doctor of Philosophy in Biochemistry and Molecular Biology

The Ph.D. is required for careers in independent research in biochemistry and molecular biology. The Ph.D. most often is followed by one or more years of postdoctoral training in a specific area of research. Ph.D. degree holders in biochemistry and molecular biology may find positions in industry or government and, with some postdoctoral experience, may obtain faculty positions at the college or university level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website [http://www.kumc.edu/igpbs/how-to-apply.html](http://www.kumc.edu/igpbs/how-to-apply.html).

### Admission Requirements:
- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
  - A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
  - Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
  - A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.
  - An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
  - Three letters of recommendation.
  - Prerequisite coursework:
    - One year of general chemistry
    - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
    - One year of biological sciences
    - One semester of calculus
    - One semester of physics
  - Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. [Other years' catalogs »](http://www.kumc.edu/igpbs/how-to-apply.html).

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

### Degree requirements:
- Degree requirements are normally completed within 5-6 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2398) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 857 Biographics, GSMC 852 and GSMC 855 Introduction to Biomedical Research I and II (or equivalent) meets the Research Skills requirement.
  - Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2398) prior to the semester the Oral Comprehensive Examination is scheduled.
The requirement is met by enrollment in full-time status a minimum of two semesters.

- Successful completion of the Oral Comprehensive Examination (p. 2398). This will comprise (i) a written grant proposal that conforms to the NIH R01 guidelines; and (ii) oral examination that centers around material in the written proposal, as well as broader aspects of biochemistry and molecular biology. The topic may be broadly related to the student’s research area, but hypotheses should be developed independently by the student. Students are expected to complete the Oral Comprehensive Exam by the end of year 2. Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

- Successful completion of Post-Comprehensive Enrollment (p. 2398) requirement.

- Enrollment in a minimum of one (1) credit hour of BCHM 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.

- Successful completion of the Final Oral Examination (p. 2398) (dissertation defense.)

- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):

<table>

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (http://catalog.ku.edu/medicine/combined-md-phd/#degreerequirmentstext) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

The mission of the Department of Biostatistics is to provide an infrastructure of biostatistical and informatics expertise to support and enhance the research, service, and educational needs of the University of Kansas Medical Center and its affiliates. The global objectives of the department are as follows:

- To provide a leadership role in biostatistical and informatics research initiatives across the medical center.
- To provide the biostatistics and informatics cores for major initiatives.
- To ensure that researchers have ready access to biostatistical and informatics resources and support.
- To provide the infrastructure and expertise for centralized and project specific database development, management and analysis.
- To consolidate resources pertaining to biostatistics and informatics.

The biostatistics M.S. and Ph.D. programs were created to help meet the ever-increasing demand for biostatisticians to take leadership roles in careers as researchers and educators in academia, government, and industry. Faculty members are active researchers collaborating and consulting in research projects and initiatives at the Medical Center, in addition to pursuing their own research agendas and participating in curricular instruction. Expertise in the department includes linear, nonlinear, and longitudinal modeling; clinical trial and experimental design; survival analysis; categorical data analysis; robust statistics; psychometric methods; and Bayesian methodology.

The Department of Biostatistics is currently developing a Master of Science in Applied Statistics degree program. Program specifics and application details will be posted to our website once the program has been approved by the Kansas Board of Regents.

Courses

BIOS 704. Principles of Statistics in Public Health. 3 Hours.
Introductory course concerning the concepts of statistical reasoning and the role of statistical principles as the scientific basis for public health research and practice. Prerequisite: Permission of instructor. LEC.

BIOS 714. Fundamentals of Biostatistics I. 3 Hours.
First-semester course of a two-semester introductory statistics course that provides an understanding of the proper application of statistical methods to scientific research with emphasis on the application of statistical methodology to public health practice and research. This course focuses on basic principles of statistical inference with emphasis on one or two sample methods for continuous and categorical data. This course fulfills the core biostatistics requirement. Prerequisite: Calculus or Permission of Instructor. LEC.

BIOS 715. Introduction to Data Management using RedCap and SAS. 3 Hours.
This course will cover the utilization of Redcap and SAS for data management. Data collection and management using Redcap will be covered. Data cleaning and preparation for analysis will be covered using SAS. In addition, some of the basic descriptive analysis procedures will be covered in SAS. Pre-/Co-requisites: BIOS 704 or BIOS 714 or equivalent with permission of instructor. LEC.

BIOS 717. Fundamentals of Biostatistics II. 3 Hours.
Second level statistics course that provides an understanding of more advanced statistical methods to scientific research with an emphasis on the application of statistical methodology to public health practice, public health research, and clinical research. Special focus will be upon the utilization of regression methodology and computer applications of such methodology. Prerequisite: BIOS 714 or equivalent. LEC.

BIOS 720. Analysis of Variance. 3 Hours.
Methods for designed experiments including one-way analysis of variance (ANOVA), two-way ANOVA, repeated measures ANOVA, and analysis

Department of Biostatistics

The mission of the Department of Biostatistics is to provide an infrastructure of biostatistical and informatics expertise to support and enhance the research, service, and educational needs of the University...
of covariance are emphasized. Post- ANOVA tests, power and testing assumptions required in NOVA are discussed and applied. Outlier detection using robust estimators also are incorporated. Boxplots, histograms and scatterplots are used to display data. Prerequisite: PRE 710/711 or BIOS 714/717 or equivalent. Preferred: BIOS 715. Knowledge of statistical software, basic statistical plotting methods, p-values, two-sample t-test and simple linear regression is assumed. LEC.

BIOS 725. Applied Nonparametric Statistics. 3 Hours.
This course will study nonparametric methods in many situations as highlighted by the following topics: Students will learn how nonparametric methods provide exact p-values for tests, exact coverage probabilities for confidence intervals, exact experimentwise error rates for multiple comparison procedures, and exact coverage probabilities for confidence bands. This course will be using EXCEL and SAS to conduct various procedures. Prerequisite: Fundamentals of Biostatistics I (BIOS 714) or the equivalent or consent of instructor. LEC.

BIOS 730. Applied Linear Regression. 3 Hours.
Simple linear regression, multiple regression, logistic regression, nonlinear regression, neural networks, autocorrelation, interactions, and residual diagnostics. Applications of the methods will focus on health related data. Prerequisite: 1) Fundamentals of Biostatistics I (BIOS 714) or the equivalent and 2) Fundamentals of Biostatistics II (BIOS 717) or Analysis of Variance (BIOS 720) or Permission of the Instructor. LEC.

BIOS 735. Categorical Data and Survival Analysis. 3 Hours.
An intermediate level statistics course that provides an understanding of the more advanced statistical methods to scientific research with emphasis on the application of statistical methodology to clinical research, public health practice, public health research and epidemiology. Prerequisite: BIOS 714, BIOS 715, and BIOS 717 or permission of the instructor. LEC.

BIOS 740. Applied Multivariate Methods. 3 Hours.
This course is an advanced statistical course for students who have had fundamental biostatistics and linear regression. Topics to be covered include Hotelling’s T-squared test, MANOVA, principal components, factor analysis, discriminant analysis, canonical analysis, and cluster analysis. More advanced topics such as Multidimensional Scaling or Structural Equation Modeling might be introduced if time allows. Computers will be extensively used through the whole course, and students are suggested to be familiar with some statistical software before taking this course. Although students are allowed to use the software they are comfortable with, SAS will be the primary statistical package used to demonstrate examples in this course. PREREQUISITES: BIOS 730 Applied Linear Regression or equivalents or permission of instructor. LEC.

BIOS 799. Introduction to Statistical Genomics. 3 Hours.
This survey course will provide a high-level introduction to various statistical and bioinformatics methods involved in the study of biological systems. In particular, this course will provide an overview of the analytical aspects involved in: the study DNA, RNA, and DNA methylation data measured from both microarray and next-generation sequencing (NGS) technologies. This course will be held in a block format with 4 hours of lectures a day for two weeks (one week in June and one week in July), with readings and homework assignments assigned throughout the summer semester. Prerequisites: BIOS 714 Fundamentals of Biostatistics I and BIOS 717 Fundamentals of Biostatistics II; Experience with a higher level programming language is preferred. LEC.

BIOS 805. Professionalism, Ethics and Leadership in the Statistical Sciences. 3 Hours.
This web-based course addresses issues in professionalism, leadership and ethics that are specific to students training to become statisticians, biostatisticians, and data scientists. Topics include use of sound statistical methodology, common threats to valid inference, effective communication and collaboration with content-area experts, maintaining transparency and independence, reproducible research, the publishing process (including authorship guidelines, plagiarism, peer review, intellectual property, etc.), conflict of interest, data security, and properties of effective leaders, among others. Prerequisite: Department consent. LEC.

BIOS 806. Special Topics in Biostatistics. 1-3 Hours.
This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Permission of the instructor. LEC.

BIOS 810. Clinical Trials. 3 Hours.
The design, implementations, analysis, and assessment of controlled clinical trials. Basic biostatistical concepts and models will be emphasized. Issues of current concern to trialists will be explored. Prerequisite: By permission of instructor. LEC.

BIOS 820. Statistical Computing/SAS Base L1. 3 Hours.
This is a graduate level course preparing a student for the SAS base programming certification exam. We will cover the topics required for a student to pass the SAS base programming certification exam given by SAS. To this end, topics we will study include, referencing files and setting options, creating list reports, understanding data step processing, creating and managing variables, reading and combining SAS data sets, do loops, arrays, and reading raw data from files. After the completion of the course the student should be able to create SAS programs to read data from external files, manipulate the data into variables to be used in an analysis, generate basic reports showing the results. Prerequisite: Permission of the Instructor LEC.

BIOS 821. Statistical Computing II. 3 Hours.
This is a graduate level course preparing a student for the SAS advanced programming certification exam. We will cover the topics required for a student to pass the SAS advanced programming certification exam given by SAS. To this end, topics we will study include array processing, use of data step views, using the data step to write SAS programs, efficient use of the sort procedure, introduction to the macro language in SAS, and accessing data using SAS PROC SQL. After the completion of the course the student should be able to create SAS programs to read data from external files, manipulate the data into variables to be used in an analysis, generate basic reports showing the results. Prerequisites: BIOS 820 or equivalent (SAS Certified BASE programmer for SAS or at least one year of experience as a data analyst/programmer). LEC.

BIOS 823. Introduction to Programming and Applied Statistics in R. 3 Hours.
This course will provide students with the opportunity to learn advanced statistical programming. The development of new statistical or computational methods often implies the development of programming codes to support its application. Much of this type of development is currently carried out in the R (or S-Plus) language. Indeed much of the recent development of statistical genetics is based on the R programming language and environment. This course provides an introduction to programming in the R language and it's applications to applied statistical problems. Prequisites: Some previous exposure to computer programming. Some basic statistics at the Applied Regression or Applied Design level and permission of instructor. LEC.

BIOS 825. Nonparametric Methods. 3 Hours.
This course is an introduction to nonparametric statistical methods for data that do not satisfy the normality or other usual distributional assumptions. We will cover most of the popular nonparametric methods used for different scenarios, such as a single sample, two independent or related samples, three or more independent or related samples, goodness-of-fit tests, and measures of association. Power and sample size topics will also be covered. The course will cover the theoretical
basis of the methods at an intermediate mathematical level, and will also present applications using real world data and statistical software. Prerequisite: Permission of instructor. LEC.

BIOS 830. Experimental Design. 3 Hours.
The emphasis of this course is on learning the basics of experimental design and the appropriate application and interpretation of statistical analysis of variance techniques. Prerequisite: Permission of instructor, BIOS 820 recommended. LEC.

BIOS 833. Sampling Methods. 3 Hours.
Students will be introduced to the design and analysis techniques when sampling from finite populations using simple, stratified, multistage, systematic, and complex sampling designs. Prerequisites: BIOS 830 and BIOS 872 or by permission of instructor. LEC.

BIOS 835. Categorical Data Analysis. 3 Hours.
This course provides an understanding of both the mathematical theory and practical applications for the analysis of data for response measures that are ordinal or nominal categorical variables. This includes univariate analysis, contingency tables, and generalized linear models for categorical response measures. Regression techniques covered for categorical response variables, such as logistic regression and Poisson regression methods, will include those categorical and/or continuous explanatory variables, both with and without interaction effects. Prerequisite: By permission of instructor; BIOS 820 and BIOS 840 are recommended. LEC.

BIOS 840. Linear Regression. 3 Hours.
This course is an introduction to model building using regression techniques. We will cover many of the popular topics in Linear Regression including: simple linear regression, multiple regression, model selection and validation, diagnostics and remedial measures. Throughout the semester, we will be utilizing primarily SAS. Prerequisite: By permission of the instructor. LEC.

BIOS 845. Survival Analysis. 3 Hours.
This course provides an understanding of both the mathematical theory and practical applications for the analysis of time to event data with censoring. This includes univariate analysis, group comparisons, and regression techniques for survival analysis. Parametric and semi-parametric regression techniques covered will include those with categorical and/or continuous explanatory variables, both with and without interaction effects. Prerequisites: BIOS 820, 835, 840, and 871, or by permission of instructor. LEC.

BIOS 850. Multivariate Statistics. 3 Hours.
This course will introduce the theory and methods of applied multivariate analysis. As the field of multivariate analysis is very wide and well developed, the course will focus on those methods that are more frequently used in biostatistical applications. Some knowledge of basic matrix algebra is necessary and will be reviewed as the course progresses. Theoretical exercises and analysis of data sets will be assigned to the student. Emphasis will be on biostatistical applications. Prerequisites: BIOS 820 Statistical Computing, BIOS 830 Experimental Design, BIOS 840 Linear Regression. LEC.

BIOS 855. Statistical Methods in Genomics Research. 3 Hours.
This survey course will provide a high-level introduction to various statistical and bioinformatics methods involved in the study of biological systems. In particular, this course will provide an overview of the analytical aspects involved in: the study DNA, RNA, and DNA methylation data measured from both microarray and next-generation sequencing (NGS) technologies. This course will be held in a block format with 4 hours of lectures a day for two weeks (one week in June and one week in July), with readings and homework assignments assigned throughout the summer semester. During the last week of the summer semester, students will be required to participate in a group seminar session in which they will present the results from their assigned genomics projects. Prerequisite: BIOS 820 Statistical Computing OR experience programming in a higher level programming language; BIOS 840 Linear Regression; OR by permission of the instructor. LEC.

BIOS 871. Mathematical Statistics. 3 Hours.
This course introduces the fundamentals of probability theory, random variables, distribution and density functions, expectations, transformations of random variables, moment generating functions, convergence concepts, sampling distributions, and order statistics. Prerequisite: By permission of instructor. LEC.

BIOS 872. Mathematical Statistics II. 3 Hours.
This course introduces the fundamentals of statistical estimation and hypothesis testing, including point and interval estimation, likelihood and sufficiency principles, properties of estimators, loss functions, Bayesian analysis, and asymptotic convergence. Prerequisite: BIOS 871 or by permission of instructor. LEC.

BIOS 880. Data Mining and Analytics. 3 Hours.
Students will be introduced to common steps used in data mining, such as accessing and assaying prepared data; pattern discovery; predictive modeling using decision trees, regression, and neural networks; and model assessment methods. Prerequisites: BIOS 820, 830, 835, 840, and 871, or by permission of instructor. BIOS 821 and 850 recommended. LEC.

BIOS 898. Collaborative Research Experience. 3 Hours.
This course provides students with experience in collaborative research under the supervision of an experienced researcher. The student will spend one semester working under an investigator or faculty member, making independent contributions to a research project. Prerequisites: BIOS 820, 830, 835, 840, 871, and 872, or by permission of instructor. LEC.

BIOS 899. MSCR Thesis. 3 Hours.
This course involves preparation of a formal thesis based on the research conducted by a student working toward the MS in Clinical Research and directed by a faculty member in the Department of Biostatistics. After the thesis has been completed, the student will be given an oral examination of the research methods and content. Prerequisites: Department of Biostatistics approval. LEC.

BIOS 900. Linear Models. 3 Hours.
This course introduces the theory and methods of linear models for data analysis. The course includes the theory of general linear models including regression models, experimental design models, and variance component models. Least squares estimation, the Gauss-Markov theorem, and less than full rank hypotheses will be covered. Prerequisites: BIOS 871 and BIOS 872 or by permission of instructor; BIOS 820 recommended. LEC.

BIOS 902. Bayesian Statistics. 3 Hours.
This course introduces Bayesian theory and methods for data analysis. The course includes an overview of the Bayesian approach to statistical inference, performance of Bayesian procedures, Bayesian computational issues, model criticism, and model selection. Case studies from a variety of fields are incorporated into the course. Implementation of models using Markov chain Monte Carlo methods is emphasized. Prerequisites: BIOS 871 and 872 or by permissions of instructor; BIOS 820 recommended. LEC.

BIOS 905. Theory of Statistical Inference. 3 Hours.
This course covers advanced aspects of statistical inference. It is aimed at preparing Ph.D. BIOS students for the Ph.D. comprehensive exam.
and will emphasize advanced biostatistical ideas as well as problem solving techniques. Prerequisites: Mathematical Statistics I, Mathematical Statistics II. By permission of instructor. LEC.

BIOS 906. Advanced Special Topics in Biostatistics. 1-3 Hours. This course allows exploration of special topics that are not routinely a part of the Biostatistics PhD curriculum. Prerequisite: Passing grade on the PhD Qualifying exam. Permission of the instructor. LEC.

BIOS 908. Advanced Clinical Trials. 3 Hours. This course provides an introduction to recent innovations in clinical trial designs and analysis methods. Topics include concepts of controls, randomization; common trial designs by phase of clinical development; sample size calculations; interim analysis; and adaptive clinical trials. Traditional frequentist and likelihood approaches to trial design and analysis will be covered in the first half of the course; the Bayesian approach (including adaptive clinical trial designs) will be emphasized in the second half of the course. Prerequisites: BIOS 810, BIOS 820, BIOS 830, BIOS 835, BIOS 840. BIOS 821 recommended. Permission of the Instructor. LEC.

BIOS 910. Generalized Linear Models. 3 Hours. This course on Generalized Linear Models (GLM) is designed for both the applied and theoretical statistician. In this course we introduce the theoretical foundations and key applications of generalized linear models. Prerequisites: BIOS 835 Categorical Data Analysis, BIOS 840 Linear Regression, BIOS 890 Linear Models or by permission of instructor. LEC.

BIOS 911. Nonlinear Models. 3 Hours. This course will involve both theory and applications of nonlinear models, with emphasis in biological, medical, and pharmaceutical research. Applications to dose-response studies, bioassay studies and clinical pharmacokinetics and pharmacodynamics studies will be discussed. Nonlinear mixed effects models will also be examined, as well as criteria for optimal experimental designs based on nonlinear models. This course will cover the theoretical basis of the methods at an intermediate mathematical level, and will also present applications using real world data and statistical software. Prerequisite: BIOS 890 Linear Models. LEC.

BIOS 915. Longitudinal Data Analysis. 3 Hours. A longitudinal study is a research study that involves repeated observations of the same individuals and events over extended periods of time. It is typically a type of observational study, though may have design components. In medical settings these studies and related models are used to observe the developmental path of a disease or treatment through time. Often this is in the context of follow-up and long-term study of both progress and potential side-effects. As the study involves the same individuals (subject to drop-out) through several time points, statistical methods must employ random effects or “mixed models” incorporating various correlation structures. This is typically done using generalized estimating equations and marginal model approaches. Bayesian methods may also be appropriate here. Students will, after completing this course, be able to design and analyze longitudinal studies. The computer package to be employed is SAS. Prerequisites: BIOS 820, BIOS 830, BIOS 840, BIOS 871, BIOS 872, and BIOS 890 or by permission of instructor. LEC.

BIOS 920. Latent Variable Analysis. 3 Hours. Latent variables refer to random variables whose realization values are not observable or cannot be measured without error, and their inferences rely on statistical models connecting latent and other observed variables. This course aims to introduce a family of such statistical models and their applications in biomedical and public health research. The course is designed as an elective course for students in the Biostatistics graduate program. We will use the statistical packages of M-plus, R, and/or SAS for the course. Prerequisite: BIOS 835 and BIOS 890, or by permission of instructor. Familiarity with vectors and matrices is strongly encouraged. LEC.

BIOS 999. Doctoral Dissertation. 1-9 Hours. Preparation of the doctoral dissertation based upon original research and in partial fulfillment of the requirements for the Ph.D. degree. Credits will be given only after the dissertation has been accepted by the student’s dissertation committee. Prerequisite: Successful completion of the Department of Biostatistics Ph.D. Comprehensive Exam and consent of advisor. LEC.

Master of Science in Biostatistics

The Biostatistics M.S. and Ph.D. programs were created to help meet the ever-increasing demand for biostatisticians to take leadership roles in careers as researchers and educators in academia, government, and industry. Faculty members are active researchers collaborating and consulting in research projects and initiatives at the Medical Center, in addition to pursuing their own research agendas and participating in curricular instruction. Expertise in the department includes linear, nonlinear, and longitudinal modeling; clinical trial and experimental design; survival analysis; categorical data analysis; robust statistics; psychometric methods; and Bayesian methodology.

The master's program in Biostatistics produces graduates that are prepared to function as biostatisticians or biostatistical consultants. Therefore, graduates gain an extensive understanding of biostatistical theory and practice and should be proficient in the application of statistical methods to one or more areas in the health sciences. At the completion of the M.S. degree in Biostatistics the graduate should be able to:

1. Demonstrate a broad knowledge and understanding of statistical theory and practice as applicable in the health sciences.
2. Function as a collaborator on a research team.
3. Take a leadership role in the design and implementation of a health science project.
4. Assume responsibility for the design and implementation of analyses for health science investigations.
5. Assist with the design and implementation of data management systems for large health science studies.
6. Prepare reports and publications resulting from health science studies.
7. Serve as an advocate for good statistical design in health science investigations.

The application process for the M.S. in Biostatistics is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website. Students are admitted for the fall semester only. Applications for the fall semester must be received by February 1st for consideration.

Admission requirements:

- A bachelor's degree in statistics, biostatistics, mathematics or applied mathematics from a regionally accredited institution documented by submission of an official transcript indicating the degree has
Degree requirements:

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement.
- A background check is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.
- Letter grade of "B" or better in Calculus I, II, & III (or the equivalent.)
- Successful completion of at least one of the following courses: linear algebra, differential equations, numerical analysis.
- Successful completion of a course in any computer programming language.
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- A current resume or curriculum vitae.
- A personal statement regarding your interest in biostatistics and in biomedical research.
- A personal interview is required of all applicants who meet the minimum admissions standards. If travel to the area is impossible, a telephone or on-line interview may be substituted.

Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

The M.S. in Biostatistics degree program consists of 36 credit hours including collaborative research experience, annual evaluations, and the successful completion of the master's general examination. The course plan consists of 27 credit hours from required biostatistics core courses which includes 3 credit hours of Collaborative Research Experience. This requirement ensures the completion of a research component through collaborative effort within or external to the department. Students also complete 9 credit hours of elective coursework.

Degree requirements:

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed.
- Completion of a minimum of 36 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Enrollment in a minimum of one credit hour the semester the student will graduate.
- Successful completion of a general examination (p. 2398) the semester the student will graduate. The general examination is given upon completion of the following courses: BIOS 820, BIOS 830, BIOS 835, BIOS 840, BIOS 871 and BIOS 872. The examination has three purposes: to assess the student's strengths and weaknesses; to determine whether the student should be awarded the M.S. degree; and, if it is a degree goal, to determine whether the student is prepared to continue into the Ph.D. program (p. 2112).

- Successful completion of the following Biostatistics courses:
  - BIOS 810 Clinical Trials 3
  - BIOS 820 Statistical Computing/SAS Base L1 3
  - BIOS 830 Experimental Design 3
  - BIOS 835 Categorical Data Analysis 3
  - BIOS 840 Linear Regression 3
  - BIOS 871 Mathematical Statistics 3
  - BIOS 872 Mathematical Statistics II 3
  - BIOS 898 Collaborative Research Experience 3
  - BIOS 900 Linear Models 3

- Successful completion of a minimum of 9 credit hours of elective coursework. Specific courses are determined in consultation with the student's advisor.
  - Successful completion of a minimum of 3 credit hours (maximum of 6) of elective coursework from courses offered by the department.
  - Successful completion of a minimum of 3 credit hours (maximum of 6) of elective coursework from courses offered outside the department.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

Annual Evaluations:

Students are evaluated each May by their graduate advisors and the director of the graduate program. These evaluations provide feedback to the student regarding the progress they are making in meeting program requirements, classroom performance, and research performance.

Doctor of Philosophy in Biostatistics

The biostatistics M.S. and Ph.D. programs were created to help meet the ever-increasing demand for biostatisticians to take leadership roles in careers as researchers and educators in academia, government, and industry. Faculty members are active researchers collaborating and consulting in research projects and initiatives at the Medical Center, in addition to pursuing their own research agendas and participating in curricular instruction. Expertise in the department includes linear, nonlinear, and longitudinal modeling; clinical trial and experimental design; survival analysis; categorical data analysis; robust statistics; psychometric methods; and Bayesian methodology.

The Ph.D. program produces biostatisticians who can develop biostatistical methodology that can be used to solve problems in public health and the biomedical sciences. In addition, graduates are prepared to apply biostatistical and epidemiology methodology for the design and analysis of public health and biomedical research investigations. Finally, graduates are well suited to function as collaborators or team leaders on research projects in the biomedical and public health sciences.

In addition to the characteristics outlined in the M.S. section of this proposal, graduates of the Ph.D. program in Biostatistics will have:

1. The ability to develop careers in academia, research institutes, government, and industry;
2. A broad understanding of current statistical methods and practices in the health sciences;
3. A solid theoretical training necessary for the development and study of new statistical methods;
4. The ability to assume all responsibilities of a statistician in collaborative health science research; in particular, the graduate will have experience in the design, data management, analysis, and interpretation of a variety of experimental and observational studies;

Experience in writing reports and giving oral presentations describing health science studies.

The application process for the Ph.D. in Biostatistics is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website. Students are admitted for the fall semester only. Applications for the fall semester must be received by February 1st for consideration.

Admission requirements:

- A master's degree in statistics, biostatistics, mathematics or applied mathematics from a regionally accredited institution or a terminal degree (M.D., Ph.D.) in another field with approval from the program. Students not meeting this criteria should apply to the M.S. program (p. 2110).

Completion of degree is documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement.
- A background check is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.
- A letter grade of a B or better in Calculus I through III (or equivalent.)
- Successful completion of at least one of the following courses: linear algebra, differential equations, numerical analysis.
- Successful completion of a course in any computer programming language.
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Three letters of recommendation.
- A personal statement regarding your interest in biostatistics and in biomedical research.
- A current resume or curriculum vitae.
- A personal interview is required of all applicants who meet the minimum admissions standards. If travel to the area is impossible, a telephone or on-line interview may be substituted.

Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

The typical program consists of 63 credit hours including collaborative research experience, annual evaluations, graduate examinations, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty.

Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D. The typical course plan consisting of 63 credit hours is designed for students who have not previously completed a M.S. in biostatistics or directly relevant area. The course plan for a student who has previously completed a M.S. in biostatistics or directly relevant area is customized to account for master's-level courses already taken; therefore the total credit hours required will vary.
Degree requirements:

- Degree requirements are normally completed within 4 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the Qualifying Examination. The qualifying examination is given upon completion of the following courses (or equivalent): BIOS 820, BIOS 830, BIOS 835, BIOS 840, BIOS 871 and BIOS 872. The examination has two purposes 1) to assess the student’s strengths and weaknesses and 2) determine whether the student is sufficiently prepared to continue in the Ph.D. program.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2398) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of BIOS 898 (or equivalent) meets the Research Skills requirement.
  - Successful completion of BIOS 810 and/or documented participation in the Biostatistics Graduate Students Association Seminar Series and completion of the KUMC Human Subjects Protection training module meets this requirement. Student must keep their certification current throughout their tenure in the Ph.D. program.
- Successful completion of the Residence Requirement (p. 2398) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2398). The comprehensive examination is typically given when a doctoral aspirant has completed the major portion of the course work at a satisfactory level and met all other prerequisites to the comprehensive examination. The examination assesses the student’s strengths and weaknesses and determines whether the student should continue in the Ph.D. program. There is both a written component to the exam and a subsequent presentation and defense of a dissertation proposal. Students are recognized as formal candidates for the Ph.D. only after they have passed the comprehensive examination.
- Successful completion of Post-Comprehensive Enrollment (p. 2398) requirement.
- Enrollment in a minimum of one credit hour of dissertation BIOS 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2398) (dissertation defense.) The candidate must present a dissertation showing the planning, conduct, and results of original research and scholarly activity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities as well as to demonstrate an intensive focus on a problem or research area. This work is carried out under the guidance of a dissertation advisor. When the completed dissertation has been accepted by the dissertation committee in final draft form and all other degree requirements have been satisfied the chair of the committee requests (at least 3 weeks before the date of the examination) Graduate Studies approval to proceed with the final oral examination.
- Successful Dissertation Submission and Publication (p. 2398) (according to Office of Graduate Studies policy.)
- Successful completion of the following Biostatistics courses (or equivalent):
  - BIOS 810 Clinical Trials 3
  - BIOS 820 Statistical Computing/SAS Base L1 3
  - BIOS 825 Nonparametric Methods 3
  - BIOS 830 Experimental Design 3
  - BIOS 835 Categorical Data Analysis 3
  - BIOS 840 Linear Regression 3
  - BIOS 845 Survival Analysis 3
  - BIOS 871 Mathematical Statistics 3
  - BIOS 872 Mathematical Statistics II 3
  - BIOS 898 Collaborative Research Experience 3
  - BIOS 900 Linear Models 3
  - BIOS 902 Bayesian Statistics 3
  - BIOS 910 Generalized Linear Models 3
  - BIOS 999 Doctoral Dissertation 1-6
- Successful completion of any elective coursework as determined in consultation with the student's advisor.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

**Annual Evaluations:**

Students are evaluated each May by their graduate advisors and the director of the graduate program. These evaluations provide feedback to the student regarding the progress they are making in meeting program requirements, classroom performance, and research performance.

The University of Kansas 2113
Upon completion of the Graduate Certificate in Statistical Applications, the student should be prepared to apply many of the common statistical methods to compliment his or her every day job duties. Course work in this proposal is designed with this purpose in mind:

1. Becoming familiar with statistical methods in research, business, and industry.
2. Function as a collaborator on a research team.
3. Critically evaluate the literature where statistical applications are used.
4. Take a leadership role in the implementation of a research project.
5. Prepare reports and publications resulting from research studies.
6. Serve as an advocate for proper statistical application and interpretation of results in his or her field.

The application for the Statistical Applications Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website.

Admission requirements:

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.
- A letter grade of B or better in calculus I (or equivalent), or a quantitative GRE score in the 70th percentile or higher.
- A letter grade B or better in a graduate-level introductory statistics course (e.g., BIOS 717 Fundamentals of Biostatistics II or equivalent.)

Note: Students not meeting this requirement may fulfill the requirement with completion of BIOS 717.

- Students currently enrolled in graduate programs at KUMC or KU must be in good standing (3.0 or higher GPA) and have a letter of approval from their current graduate program director and/or department chair indicating support to enroll in the certificate program.
- Students not meeting the above requirements may be eligible for provisional admission. Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Total Hours: 62-78

Statistical Applications Graduate Certificate

The Statistical Applications Graduate Certificate is awarded to those who have demonstrated specialized knowledge in a scientific field, but not to the level required by a postgraduate master's degree. The Graduate Certificate in Statistical Applications requires individuals to acquire sufficient knowledge and expertise to permit them to work at the frontier of their field through:

1. Becoming familiar with statistical methods in research, business, and industry.
2. Function as a collaborator on a research team.
3. Critically evaluate the literature where statistical applications are used.
4. Take a leadership role in the implementation of a research project.
5. Prepare reports and publications resulting from research studies.
6. Serve as an advocate for proper statistical application and interpretation of results in his or her field.

The application for the Statistical Applications Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website.

Admission requirements:

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.
- A letter grade of B or better in calculus I (or equivalent), or a quantitative GRE score in the 70th percentile or higher.
- A letter grade B or better in a graduate-level introductory statistics course (e.g., BIOS 717 Fundamentals of Biostatistics II or equivalent.)

Note: Students not meeting this requirement may fulfill the requirement with completion of BIOS 717.

- Students currently enrolled in graduate programs at KUMC or KU must be in good standing (3.0 or higher GPA) and have a letter of approval from their current graduate program director and/or department chair indicating support to enroll in the certificate program.
- Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs«.

Certificate Program Information:

No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking,
applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferment.

Graduate credit from another institution may not be transferred to a graduate certificate program.

The Statistical Applications Graduate Certificate requirements vary depending on whether the certificate student is currently seeking a post-graduate degree at any of the KU campuses or not. The certificate program consists of a minimum of 12 credit hours of coursework in statistical applications.

**Certificate requirements:**

- Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of 4 years is allowed.
- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate certificate coursework.
- Enrollment in a minimum of one (1) credit hour the semester program is completed. Graduate certificates may not be granted retroactively.
- Completion of a minimum of 12 credit hours. Note: A prolonged plan of study will occur for students without the prerequisite graduate-level introductory statistics course prior to enrolling in the certificate program (see Admissions [http://catalog.ku.edu/medicine/biostatistics/statappgradcert/#admissionstext]).
- Current KU post-graduate students must complete four (4) courses from the following list:
  - BIOS 715 Introduction to Data Management using RedCap and SAS
  - BIOS 720 Analysis of Variance
  - BIOS 725 Applied Nonparametric Statistics
  - BIOS 730 Applied Linear Regression
  - BIOS 735 Categorical Data and Survival Analysis
  - BIOS 740 Applied Multivariate Methods
  - BIOS 799 Introduction to Statistical Genomics

- Certificate students not currently seeking a KU post-graduate degree must complete the following two (2) courses:
  - BIOS 720 Analysis of Variance
  - BIOS 730 Applied Linear Regression

- Certificate students not currently seeking a KU post-graduate degree must complete two (2) elective courses from the following list:
  - BIOS 715 Introduction to Data Management using RedCap and SAS
  - BIOS 725 Applied Nonparametric Statistics
  - BIOS 735 Categorical Data and Survival Analysis

| BIOS 740 | Applied Multivariate Methods | 3 |
| BIOS 799 | Introduction to Statistical Genomics | 3 |

Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

**Statistics Graduate Certificate**

The Statistics Graduate Certificate is awarded to those who have demonstrated specialized knowledge in a scientific field, but not to the level required by a postgraduate master’s degree. The certificate program requires individuals to acquire focused knowledge in statistical theory, with an emphasis on application.

Upon completion of the Graduate Certificate in Statistics, the student should be prepared to apply many of the common statistical methods to compliment his or her every day job duties. Therefore the student must have a basic understanding of the statistical theory and practice and should be proficient in the application of common statistical methods to one or more areas application. At the completion of the Graduate Certificate in Statistics the student should be able to:
1. Demonstrate a basic knowledge and understanding of the statistical theory and practice as applicable to his or her field.
2. Function as a collaborator on a research team.
3. Critically evaluate the literature where statistical applications are used.
4. Take a leadership role in the design and implementation of a research project.
5. Assume responsibility for the design and implementation of analyses for a research project.
6. Prepare reports and publications resulting from research studies.
7. Serve as an advocate for proper statistical design and interpretation of results in his or her field.

The application for the Statistics Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the Department of Biostatistics (http://www.kumc.edu/school-of-medicine/department-of-biostatistics/biostatistics-graduate-program/prospective-students/admissions-procedure.html) website.

**Admission requirements:**

- A bachelor's degree from a regionally accredited institution documented by submission of an official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.
- Letter grade of B or better in calculus I – III (or equivalent.)
- Successful completion of at least one of the following courses: linear algebra, differential equations, numerical analysis.
- Successful completion of a course in any computer programming language.
- Three letters of recommendation.
- Students currently enrolled in graduate programs at KUMC or KU must be in good standing (3.0 or higher GPA) and have a letter of approval from their current graduate program director and/or department chair indicating support to enroll in the certificate program.

Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

**Certificate Program Information:**

No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student's application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral.

Graduate credit from another institution may not be transferred to a graduate certificate program.

The Statistics Graduate Certificate program consists of a minimum of 15 credit hours of statistical coursework that is comprised of 9 credit hours of required coursework and 6 credit hours of elective coursework.

**Certificate requirements:**

- Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of 4 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate certificate coursework.
- Enrollment in a minimum of (1) credit hour the semester program is completed. Graduate certificates may not be granted retroactively.
- Completion of a minimum of 15 credit hours.
- Successful completion of the following courses:
  - BIOS 830 Experimental Design 3
  - BIOS 840 Linear Regression 3
  - BIOS 871 Mathematical Statistics 3
- Successful completion of two (2) elective courses from the following list:
  - BIOS 820 Statistical Computing/SAS Base L1 3
  - BIOS 821 Statistical Computing II 3
  - BIOS 823 Introduction to Programming and Applied Statistics in R 3
  - BIOS 825 Nonparametric Methods 3
  - BIOS 833 Sampling Methods 3
  - BIOS 835 Categorical Data Analysis 3
  - BIOS 845 Survival Analysis 3
  - BIOS 850 Multivariate Statistics 3
  - BIOS 855 Statistical Methods in Genomics Research 3
Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

Total Hours: 9

This Plan of Study shows which semester a specific elective is offered. Select two (2) elective courses to meet the minimum requirements for certificate completion.

Department of Cancer Biology

The Department of Cancer Biology is a newly developed basic science department in the School of Medicine at the University of Kansas Medical Center. The missions of our department are:

1. To build a strong team of basic researchers with a collaborative and translational mindset who will discover fundamental characteristics of cancer cells that can lead to novel therapeutic and preventive approaches which reduce cancer incidence, morbidities and mortality;
2. To understand the molecular genetic and epigenetic, biochemical, cellular and physiologic bases of cancer etiology and progression;
3. To understand the interactions between tumor cells and the microenvironments in which they find themselves;
4. To educate the next generation of cancer researchers, clinicians and patients.

Our department is funded by grants from the National Cancer Institute, National Institutes of Health, American Cancer Society, Susan G. Komen for the Cure, the National Foundation for Cancer Research and from generous donations from patients, family and friends of the KU Cancer Center.

The department is currently developing a master’s degree program (Master of Science) and a doctoral (Ph.D.) program in Cancer Biology. The program specifics and application details will be posted to our website (http://www.kumc.edu/school-of-medicine/cancer-biology.html) once the program has been approved by the Kansas Board of Regents. Although no graduate program in Cancer Biology is offered at this time, we do offer a growing number of Cancer Biology (CBIO) courses that may be taken for graduate credit.

Courses

CBIO 800. Mechanisms of Tumor Development and Progression: Colloquium Format. 3 Hours.

Elective course. This upper level course examines the genetic alterations and cellular phenotypes involving cancer development in a practical manner. The course discusses the underlying molecular and biological principles that result from these genetic alterations and the methods/approaches to examine cancer phenotypes. By the end of the course, students should understand how cancer develops and how to design experiments to address the scientific hypothesis. In addition, students are expected to learn key points to give scientific presentation. The class will involve two, 1.5-hour lecture per week: one consists of didactic lecture and the other is student-led journal club related to the lecture topic. Prerequisite: College level biology. LEC.

CBIO 900. Carcinogenesis and Cancer Biology. 3 Hours.

This is a semester long course that presents a survey of core topics in cancer biology and builds upon core IGPBS courses. The survey includes topics of etiology, genetics, signaling, biochemistry, tumor progression, metastasis, major treatment modalities and overviews of major cancer types. Students are assessed based upon class participation, presentations and examinations. Prerequisites: Completion of GSMC 850, GSMC 851, GSMC 853 and GSMC 854 or the equivalent or permission of instructor. LEC.

Department of Health Policy and Management

The Department of Health Policy and Management prepares health services leaders and researchers who will advance systems of care delivery, promote effective health policy, and foster innovation and scholarly inquiry to improve and serve the health needs of Kansas citizens and beyond.

Teaching

The Department offers the following degree programs:

Masters of Health Services Administration (p. 2121)
PhD in Health Policy and Management (p. 2123)

Research

HP&M has an interdisciplinary faculty representing a variety of academic disciplines and teaching and research interests.

Service
Learn more about our faculty's outreach and service at local, state and national levels here (http://www.kumc.edu/school-of-medicine/hpm/faculty.html).

Courses

HP&M 610. The Health Care System. 4 Hours.
This course introduces students to the health care system of the United States. The course stresses the system's historical development, distinguishing features, financing, management, resources, and politics. Requirements include position papers, class discussions, examinations, and site visits to health care facilities LEC.

HP&M 620. Women and Health Care. 3 Hours.
A gender analysis of the organization of health care in the United States, using sociohistorical and sociological perspectives. Considers the health status and health care problems of women in relation to cultural aspects of medicine and health care; the roles of both informal and professional health care providers; the political economy of health care systems; and the relationship between gender and the state. (Same as SOC 617.) Prerequisite: HPM 601 or permission of instructor. LEC.

HP&M 810. The Health Care System. 3 Hours.
The structure and function of the components of the U.S. healthcare system are introduced in the context of the history, values and social forces that influenced its development and evolution. Students gain exposure to the concepts and vocabulary associated with aspects of the system, including delivery (providers, institutions, services), resources (finance, payment, insurance), population and public health, and outcomes (cost, access, quality). Healthcare outcomes from consumer, clinical, and societal perspectives are explored. LEC.

HP&M 819. Research for Health Care Leaders. 3 Hours.
Introduces epidemiology, survey research, and evaluation research. Examines quantitative and qualitative methods. Focuses on role of research in health policy and health management. Incorporates lecture, discussion, papers and presentations. LEC.

HP&M 822. Health Care Economics. 3 Hours.
This course introduces the core concepts from economics to healthcare with a focus on helping healthcare managers use economic tools in making sound decisions. The demand for healthcare products, the structure of insurance, and the supply of healthcare products are examined. Students will apply a variety of economic analyses to health policy and health system issues. LEC.

HP&M 825. Financial Concepts in Healthcare Management. 3 Hours.
Financial accountability is a critical responsibility of health services administrators. This course presents basic concepts and techniques for effective decision-making and stewardship, including financial statement analysis; strategic financial planning; capital formation; responsibility and cost accounting; operational, capital and cash budgeting; capital project analysis; and working capital management. LEC.

HP&M 827. Financial Applications in Healthcare Management. 3 Hours.
Administrative applications of economic and financial concepts are applied to support strategic and financial goals. The concept of integrating operational and strategic planning into a strategic financial plan is developed. This course will foster integration and confidence in performing and applying financial analytical procedures such as financial statement ratio analysis; revenue and expense forecasting (budgeting); credit worthiness determination; break-even analysis and working capital management in a variety of healthcare settings including long-term care and public health. Prerequisite: HPM 825, Financial Concepts in Healthcare Management. LEC.

HP&M 830. Health Care Management. 3 Hours.
This course introduces key concepts and skills for health care managers. Emphasizing self-discovery and professional development, the course examines how to become an informed employee, an effective team member, and a successful manager. Course topics include interpersonal skills, delegation, leadership, performance management, and organizational change. Learning methods include lectures, case analyses, experiential exercises, and discussion. Prerequisites: HPM 810 or permission of instructor. LEC.

HP&M 831. Reimbursement and Fiscal Policy. 2 Hours.
Reimbursement and fiscal policy practices impact the success and the economic well-being of healthcare institutions, payers and patients. This course develops the student's understanding of complex reimbursement methodologies from the perspective of providers and payers. Students will explore the strengths and weaknesses of the major methods of third party reimbursement, the types of managed care organizations and the payment methodologies employed. Students are also prepared to approach reimbursement policy issues both from the payer and the provider viewpoint. LEC.

HP&M 832. Governance and Health Law. 2 Hours.
A survey course of the law as it affects governance, health care administration and health care generally. This course will develop the student's understanding of health law and its impact on many aspects of health care governance and administration. The student should be able to identify and understand various legal issues they may encounter and when to engage legal counsel's advice. Prerequisite: HPM 810. LEC.

HP&M 833. Ethics. 2 Hours.
An introduction to the principles and concepts in the ethics of health services administration. The course will help students further develop their skills to recognize and analyze ethical dilemmas, and to explain, justify and evaluate the decisions they make in response to such dilemmas. LEC.

HP&M 837. Health Policy. 3 Hours.
This course examines the development, implementation, and evaluation of federal, state, and local health policy in the United States. Particular attention will be given to (1) the development of public institutions and policy goals; and (2) current policy problems such as cost controls, reimbursement, health services utilization, program assessment and evaluation, public health, and public/private investment and resource planning. Students will be expected to synthesize and integrate knowledge to apply theory and principles in ways consistent with professional practice as a health policy analyst. LEC.

HP&M 838. Rural Health Care. 3 Hours.
Provides students with (a) an understanding of major issues in rural health and the rural environment in which health care providers and administrators provide service; (b) an understanding of the demographics, economics, services and challenges associated with the health care delivery systems in rural America and (c) an overview of federal and state health policy and its effect on rural health systems. Special emphasis will be placed on identifying, understanding, and addressing rural health challenges from administrative and policy perspectives. Prerequisites: None. LEC.

HP&M 840. Organizational Foundations for Leading Change. 3 Hours.
Self-discovery as a foundation for professional development while exploring the concepts of leader, manager, and follower is emphasized. Analysis and prediction of an organization's stages of development and its capacity for linear and social change are introduced through the lens of complexity science. Political, legal, ethical, and other issues that constrain
and destabilize organizations and strategies to restore equilibrium are explored. (Same as NRSG 880). LEC LEC.

**HP&M 842. Roles, Functions and Care Models. 2 Hours.**
This course examines the nature and characteristics of the healthcare workforce needed to deliver direct, indirect, and support services. Healthcare worker roles are analyzed through the lens of key organizational functions and care delivery modalities. Common care delivery models, such as primary, team, and patient-centered care approaches to organizing care delivery are explored in various clinical settings, including acute and long-term care and community and public health entities. Administrative challenges and opportunities for managing a diverse workforce are presented. LEC LEC.

**HP&M 844. Communication for the Healthcare Executive. 2 Hours.**
This course focuses on attaining proficient communication skills to deliver high impact messages to stakeholders ranging from board members, to diverse communities of interest, to policymakers and regulators. Verbal and written skill development addresses executive presence to perform communication functions such as conducting an ‘ask’ from a policymaker or potential benefactor, using storytelling and data to shape critical messages to the media, and communicating value-driven memoranda to internal audiences. The use of emerging technologies to aid in communication effectiveness will also be presented. LEC LEC.

**HP&M 846. Managing Information Systems and Technology. 3 Hours.**
This course covers fundamental concepts of management information systems; current and developing health and business information systems of interest to managers in health services organizations; healthcare information system architecture; security and privacy issues; uses of healthcare information for clinical and strategic analysis and decision support; techniques required to develop and evaluate a technological request for proposal; and thoughts on the future of healthcare information systems including bio-informatics, community health systems and web-based access to health information. The course will also cover current information and issues regarding the latest technology applications. LEC LEC.

**HP&M 848. Designing Health Care Organizations. 2 Hours.**
This class examines how design affects a broad range of health care organizations. It considers designs for jobs, processes, equipment, buildings, and organizations, and explores implications for safety, customer satisfaction, worker satisfaction, productivity, effectiveness, and profitability. Students analyze varied cases that approach design as a management decision-making process. LEC.

**HP&M 850. Introduction to Operations. 3 Hours.**
Examines performance of health care organizations, sources of variation, methods of measurement, and strategies for improving performance. Considers several approaches to performance improvement and examines tools widely used in operations management. Incorporates lecture, discussion, and fieldwork. (Same as NRS 882.) LEC.

**HP&M 852. Strategic Marketing. 2 Hours.**
Provides students with a framework for executive-level, strategic market planning and analysis. Topics covered include: the strategic marketing organization; the impact of organizational culture on strategy development; environmental assignments and competitor analysis; market research; and the impact of the marketing fours (price, positioning, promotion, and product) in health care. LEC.

**HP&M 853. Strategic Management. 2 Hours.**
Explores internal and external analysis for health care organizations. Examines development, analysis, execution, and monitoring of strategies. Application of critical thinking skills to strategy. Lecture and discussion.

Prerequisites: Completion of HPM Level I courses or permission of instructor. LEC.

**HP&M 854. Human Resources and Workforce Development. 3 Hours.**
The focus of this course is to understand the leadership functions of human resource management in organizations to create a competitive edge through employee empowerment. Core human resource concepts are introduced and applied to optimize human capital within a variety of healthcare settings, including compensation and benefits, employee recognition, and employee/labor relations. National, regional and local strategies and workforce trends are discussed related to best practices for the selection, retention, and management as a healthcare employer of choice. (Same as NRSG 891). LEC LEC.

**HP&M 857. Evaluating Outcomes of Healthcare. 3 Hours.**
This course will trace the development of the outcomes research movement and provide examples of methodologies, assessment instruments and issues that guide outcomes research. It will also review the methods for linking research findings with clinical practice (i.e., clinical practice guidelines). Obstacles to acceptance of practice guidelines will be discussed. Finally, the translation of outcomes research methodology into programs to improve health quality will be presented. Prerequisite: Permission of instructor. LEC.

**HP&M 858. Health and Social Behavior. 3 Hours.**
Healthcare as a cultural and socio-behavioral system is presented. Using research and theory, students explore alternative perspectives on the nature of medicine and healing within comparative health systems, both U.S. and abroad. Students examine at an advanced level how healthcare organizational structures contribute to patient health outcomes and influence employee behaviors. The course reinforces the nature and characteristics of the health professions, particularly medicine and nursing perceptions, and the complex behavioral dynamics of health professionals with organizational leaders. LEC LEC.

**HP&M 859. Professional Development. 1 Hour.**
Prepares students for an initial professional job search. Explores professional networking, search strategies, resume construction, and interviewing. Reviews professional communication. Incorporates lecture, discussion, and fieldwork. Prerequisite: Permission of instructor. LEC.

**HP&M 860. Graduate Internship in Healthcare Services Administration. 1-3 Hours.**
Novice and experienced health services administrators function in applied settings. The internship is designed to meet the needs of individual students to advance their career functioning and set in motion a professional development plan. The inexperienced administrator will use the internship as a mid-curriculum opportunity to apply and synthesize in the practice setting knowledge, skills, and abilities. Students who come to the program with mid-level to advanced experience use the practicum to advance their career through exposure to additional experiences that extend their knowledge, skills, and abilities and demonstrates synthesis of program competencies. FLD FLD.

**HP&M 861. Capstone Seminar. 2 Hours.**
The knowledge, skills, and abilities learned throughout the program are validated in capstone experience. A case study approach will be used to synthesize and apply principles including, but not limited to, change theory and quality improvement, research and information technologies, strategy and communication tools, human resource management, financial and economic analysis, and advanced decision-making and management of organizational behavior. Students will present their cases to peers, faculty, and external reviewers for dialogue, critique, and a plan for professional skills development. IND RSH.
HP&M 862. Research Practicum in Health Services Administration. 3 Hours.
A course to explore applied research topics associated with specific health services delivery of management problems. Prerequisites: HPM 821 and HPM 830. RSH RSH.

HP&M 863. Independent Study. 1-3 Hours.
This course is designed to meet the needs of students who have a special interest that cannot be met by existing courses. IND IND.

HP&M 868. Field Immersion in Health Systems Issues and Trends. 1 Hour.
This field-based experience exposes students to a range of issues and trends in health care organizations - public and private, profit and non-profit. The aim is to engage students in the realities of health system challenges and problems, which can be informed by health services research. Site visits and contacts with executives and policy leaders serve as the basis for scholarly analysis. Prerequisite: Permission of the instructor. FL.

HP&M 869. Field Immersion in Health Systems Data Management. 1 Hour.
This field-based experience exposes students to current managerial realities and trends in information technology and data management within health care and policy settings. The aim is to engage students in information technology roles and functions, data set and performance metrics, available systems of technology support, and the scope of data collection, organization and management issues faced by health systems. Prerequisites: HPM 868 or permission of the instructor. FL.

HP&M 870. Research Inquiry I: Defining and Supporting the Research Problem. 1 Hour.
Students select a problem area, critically review and analyze the research literature related to it and develop a research question(s) and working hypotheses. The analysis of the problem integrates field experiences with relevant literature, and translates ideas from the practice and/or policy setting into the context of scholarly inquiry. Prerequisite: Permission of the instructor. FL.

HP&M 871. Research Inquiry II: Research Design. 1 Hour.
Students build on a problem area of interest with potential benefit to the health care field and examine methodologies that would support a hypothesis or significant research question. The course guides students in translating their questions into a credible, methodologically defensible research design, including overall strategy, measurement, study population and/or sample. Focus will be placed on critical analysis of design trade-offs and limitations. Prerequisites: HPM 870 or permission of the instructor. FL.

HP&M 872. Research Inquiry III: Data Analysis Techniques and Strategies. 1 Hour.
Students learn to assess and choose appropriate analytic techniques, whether qualitative or quantitative, and develop a data analysis and presentation plan. Emphasis is placed on evaluating the relative advantages and disadvantages of various analytic strategies in the context of a specific question and research design. Prerequisites: HPM 871 or permission of the instructor. FL.

HP&M 873. Statistical Applications Using Large Data Bases. 3 Hours.
The management of large data sets is a critical analytic skill for health policy and management research. This course exposes students to the various types and configurations of large data sets and provides hands-on analytic experience using an array of statistical techniques and procedures. Attention is placed on the criteria for designing and evaluating, including the trade-offs in selecting one plan over another. Students actually carry out an analysis plan for a variety of data types. Prerequisites: HPM 819, or permission of the instructor. LEC.

HP&M 874. Statistics for Decision Making. 3 Hours.
Elementary statistical techniques to include descriptive statistics, probability, sampling, and statistical inference of means and proportions; advanced statistical techniques include multivariate analysis of qualitative and quantitative variables using multiple linear and logistic regression. LEC LEC.

HP&M 875. Modeling in Health Services Research. 3 Hours.
Provides an opportunity for students to use a number of common analysis models in health services research. Emphasizes a conceptual understanding of appropriate modeling techniques and use of statistical software packages. The course focuses on application of methods to health services research questions, with emphasis on regression design and interpretation. Prerequisites: HPM 874 or permission of the instructor. LEC.

HP&M 876. Medicare and Medicaid. 3 Hours.
Provides students with an in-depth understanding of the three publicly financed health programs that impact virtually all aspects of the American healthcare system - Medicare, Medicaid and Children's Health Insurance Programs (CHIP). Explores history and evolution of each program, plus specific operational issues such as eligibility, financing, management reporting, state/federal coordination, quality of care and outcomes management and influence of recent legislation. Prerequisite: Permission of the instructor. LEC LEC.

HP&M 877. Women and Healthcare. 3 Hours.
A gender analysis of the organization of healthcare in the United States, using sociohistorical and sociological perspectives. Considers the health status and healthcare problems of women in relation to cultural aspects of medicine and healthcare; the roles of both informal and professional healthcare providers; the political economy of healthcare systems; and the relationship between gender and state. Prerequisite: HPM 810, or permission of instructor. LEC LEC.

HP&M 878. Grant Writing. 3 Hours.
The course is designed to take the principles and mechanics learned in introductory epidemiology and biostatistics and apply them in the design of epidemiologic studies. The strategy and data collection for studies will be emphasized rather than the methods of statistical analysis. The student will learn how to develop a proposal/grant that addresses the entire array of concerns regarding such studies and propose a realistic, scientifically justified study. (Same as ANAT 869 and NRSG 889.) Prerequisite: HPM 819 or HPM 821, and NRSG 886. LEC.

HP&M 879. Comparative Healthcare Systems. 3 Hours.
Critical examination of the structure and function of healthcare systems in major, advanced, capitalist countries (e.g., Canada, Japan, United Kingdom, France, Germany, and Sweden) in comparison to each other and to the healthcare system of the United States. Patterns in control and financing will be studied in relation to issues of cost, quality, access, and in relation to cultural values. Special attention will be placed on comparative analysis of reform efforts. Prerequisite: HPM 810 or permission of instructor. LEC LEC.

HP&M 880. Health Care and Social Policies in Sweden. 3 Hours.
Sweden leads the world in major health outcomes despite spending significantly less than the U.S. This course provides students the opportunity to visit Sweden and see the operation of its health care and social welfare system firsthand. Learn about Swedish history and culture as you re-examine many commonly held assumptions about both the U.S. and Sweden. An intensive schedule of site visits and lectures in the Stockholm-Uppsala area, assigned readings, and a major paper. LEC.
HP&M 882. Health Services Research Using Public Payer Data. 3 Hours.
Several contemporary health reforms have rendered analyses of public payer data more feasible and valuable for population health, health services research, and quality improvement. The addition of an outpatient drug benefit to standard inpatient and outpatient service coverage for Medicare, for example, has stimulated a growth industry in comparative effectiveness research and expanded policy research across the health care system. Pending expansion of States’ Medicaid programs under the Affordable Care Act will undoubtedly create the largest public health care insurance program in the United States. The Centers for Medicare Medicaid Services (CMS) have streamlined researchers’ access to national Medicare and Medicaid populations for health services and quality improvement projects through contracts with the Research Data Center at the University of Minnesota and the Chronic Condition Warehouse. In addition, Kansas Medicaid has invested in a Data Analytic Interface that offers ready access to the state’s employees, Medicaid beneficiaries, and private health insurance claims data for enterprising researchers including tremendous opportunities for state of the art, contemporary policy analyses. This is indeed an exciting and opportune time for students embarking on careers in health services, policy, and population health research. This course is designed to prepare students for real world analyses using standard public payer claims data. LEC.

HP&M 883. Cost-Effectiveness and Decision Analysis. 3 Hours.
This course examines techniques that are used in making clinical and management decisions when outcomes are uncertain. The course begins with a review of probabilistic decision making, then explores methods of analyzing choices with uncertain outcomes, stressing the use of decision trees and sensitivity analysis. The course examines cost minimization analysis, cost-effectiveness analysis, and cost benefit analysis. (SAME as PRVM 878). LEC LEC.

HP&M 884. Clinical and Administrative Data Analysis. 3 Hours.
This course presents advanced techniques in statistical analysis and information management to help understand, process, and use health services data. The three broad areas of health services data will be used: clinical, program, and population-based. Ways in which these data can be used as both management and research tools will be discussed. Implications for improving patient care and delivery of health services will be emphasized. Labs will stress the use of both manipulative techniques such as merging, matching, sorting, and file construction, as well as focus on analysis, using univariate, bivariate, and multivariate techniques. Recent methodology related to outcomes, case-mix, and performance assessment will be presented, and their application to health services administration demonstrated. LEC LEC.

HP&M 885. Instructional Methods in Health Services Education. 1 Hour.
An overview of pedagogical approaches and learning strategies for higher education courses in health policy and management. Content will include course organization, syllabus design, techniques for teaching in the classroom and online, learning styles, strategies for classroom management, and evaluation/grading methods. Prerequisites: HPM 868 or permission of the instructor. LEC.

HP&M 886. Applied Health Services Research. 3 Hours.
Students in this course apply the full spectrum of the research process to a specific hypothesis or research question, drawn from practical health systems observations and/or supported by critical analysis of the health services research literature. Moving step by step through the research process, students work to develop a complete research plan and proposal suitable to investigate their chosen question. Group discussion and guest researchers provide elaboration for each stage of research plan development. Prerequisites: HPM 872 and HPM 873 or permission of the instructor. RSC.

HP&M 887. Practicum in Health Services Education. 2 Hours.
Application of the approaches and methods described in HPM 885. Students will serve as a teaching assistant for one semester, working with a teaching mentor. In addition to assisting with the class, students will meet regularly with the mentor to critique and analyze content and classroom processes, plan and develop teaching activities, and evaluate learning and performance in the classroom. Prerequisite: HPM 868 or permission of the instructor. HPM 887 may be taken concurrently with HPM 885. LEC.

HP&M 890. Topics in Health Policy and Management. 1-3 Hours.
This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Consent of the instructor. IND LEC.

HP&M 901. Doctoral Seminar in Health Policy. 3 Hours.
Students will investigate, review, and critically analyze major concepts, theoretical and methodological approaches and sub-areas in the field of health policy research. The course will cover comparative health policy analyses as well as both micro and macro system perspectives. Prerequisite: Permission of the instructor. SEM.

HP&M 903. Doctoral Seminar in Health Management. 3 Hours.
Students will investigate, review and critically examine major concepts, theories, issues, methodological approaches and sub-areas in the health services management research literature. Special attention will be placed on using research to develop evidence-based practice and suggesting interventional strategies for complex problems, both micro- and macro-organizational. Prerequisite: Permission of the instructor. SEM.

HP&M 990. Advanced Topics in Health Policy and Management. 1-3 Hours.
This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Admission to a PhD program and consent of the instructor. IND. LEC.

HP&M 991. Individual Doctoral Readings. 1-3 Hours.
Individual study of special topics or problems by students working on a doctorate. Prerequisite: Admission to a PHD program and consent of the instructor. LEC.

HP&M 999. Dissertation. 1-12 Hours.
THE.

Master of Health Services Administration

The Master of Health Services Administration degree prepares students for leadership roles in the health care sector, including positions in hospitals, health care systems, long-term care facilities, clinics, insurance firms, health departments, and government agencies. The MHSA Program offers a systemic overview of the health care system, a clear perspective on contemporary health policy, a mastery of analytic methods, and a broad exposure to the practice of health care management. Classes are taught on the KUMC campus and offered in the late afternoon and evening.

Joint Degree Programs

The Department of Health Policy and Management offers 4 joint programs in conjunction with the Schools of Law, Nursing, and Medicine (MD program). Please contact the respective schools for complete information.
**JD/MHSA**

The JD/MHSA joint degree program combines into 4 years of full-time study the Juris Doctor (p. 768) (JD) program offered by the School of Law (http://www.law.ku.edu) and the Master of Health Services Administration (MHSA) program offered by the Department of Health Policy and Management. The program offers students who plan to practice health law or health services management a thorough academic grounding in both disciplines. Students must be admitted to each program to pursue the joint degree.

**MS in Nursing (Organizational Leadership)/MHSA**

The joint Master of Science in Nursing (Organizational Leadership)/MHSA degree program combines the MHSA degree offered by the Department of Health Policy and Management and the Master of Science (p. 2290) degree with the specialization in Organizational Leadership offered by the School of Nursing. This program gives students the opportunity to acquire training in the convergent fields of nursing and health services administration. The program combines course work, allowing the two degrees to be completed in 8 semesters. Students must be admitted to each program to pursue the joint degree.

**MD/MHSA**

The joint MD/MHSA degree program prepares students to enter careers as physician executives or to provide administrative support for their medical practice. As the health care environment becomes more complex and competitive, administrative skills can be extremely important to individuals starting careers in medicine or those seeking to enhance their current careers. The MSHA portion of the curriculum combines social science and business content in the context of health care and prepares students for management and executive positions in health care organizations. Students complete requirements for the MD degree as specified by the School of Medicine. MD programs are described in the School of Medicine Catalog (p. 2062). Both programs can be completed in 5 years. Students must be admitted to each program to pursue the joint degree.

**BSHIM/MHSA**

The joint Bachelor of Science in Health Information Management (p. 704) and Master of Health Services Administration program is offered through the Department of Health Policy and Management in association with the Department of Health Information Management. By participating in this intensive, full-time bridge program, students can achieve both degrees in five years. Students pursuing the BSHIM/MHSA will be prepared to assume management and executive positions in health-related organizations and to bring their expertise in health information management to these positions.

The application is an on-line process. Detailed instructions on how to apply and application deadlines are posted on the Health Policy and Management website (http://www.kumc.edu/school-of-medicine/hpm/master-of-health-services-administration.html). Students are admitted for the fall semester only.

**Admission requirements:**

- Bachelor’s degree from a regionally accredited institution, documented by submission of official transcript(s). The bachelor’s degree must be attained prior to entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
- A background check (p. 2395) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score not more than approximately five (5) years old sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895. An alternative graduate level examination score may be substituted on a case-by-case basis.
- A statement of goals/purpose. This brief essay should outline the applicant’s reasons for wanting to pursue graduate education in health administration and career objectives.
- Three letters of recommendation.
- Applicants must also have completed a prerequisite three (3) credit hour course in statistics.
- A personal interview is also required of all applicants who meet the minimum admissions standards. If travel to the area is impossible, a telephone or on-line interview may be substituted.

Applicants will be assessed based on these requirements. After an applicant has been admitted, the program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. To verify admissions requirements for past years, use the catalog of the year student entered the program. Other years’ catalogs (http://catalog.ku.edu/archives). The MHSA program is a 56 credit-hour graduate professional degree program and is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). (http://www.cahme.org)

**Degree requirements:**

- Degree requirements are normally completed within two (2) years of admission to the program although a maximum of seven (7) years is allowed. Part-time students normally complete requirements within four to five (4-5) years of admission to the program.
- Cumulative grade-point average (GPA) of at least a 3.0 for all program coursework.
- Completion of a minimum of 56 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of the following required courses (or equivalents):

Doctor of Philosophy in Health Policy and Management

Our PhD in Health Policy and Management prepares high-level health services researchers for careers in academic settings or in public and private organizations where advanced research, leadership and analytic skills are required.

Health services research is a multidisciplinary field that examines the uses, costs, quality, accessibility, delivery, organization, financing and health outcomes of healthcare systems in the U.S. and elsewhere. Health Services researchers investigate, compare and interpret the complexities of healthcare systems, including how social factors, financing systems, organizational structures and processes, health technologies, and individual and group behaviors affect access, cost and quality of care. The program is offered on a full-time basis only with course work at the KU Medical Center campus.

The application process is done online. Detailed instructions on how to apply and the application deadlines are posted on the Health Policy and Management website (http://www.kumc.edu/school-of-medicine/hpm/phd-in-health-policy-and-management/phd-admissions-criteria-process-and-timeline.html).

Admission requirements:

- A master's degree in health services administration or a related field (e.g. public health, public administration, business, social sciences, biological sciences, nursing) from a regionally accredited institution and documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from all other institutions attended post-baccalaureate are also required.
- A cumulative grade-point average (GPA) of at least a 3.5 on a 4.0 scale for all post-baccalaureate course work.

Students with degrees from outside the U.S. may be subject to transcript evaluation to determine that the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395) and additionally for this specific program, a minimum score of 50 on the TSE or SPEAK tests, a minimum iBT speaking score of 24, or a minimum IELTS speaking score of 8.
- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score not more than approximately 5 years old sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.
- Successful completion of a graduate level statistics course.
- Successful completion of a minimum of three (3) credit hours of graduate-level course work in each of these areas:
  - Health delivery systems
  - Health economics
  - Health care finance
  - Health care management

Degree requirements and course descriptions are subject to change. In most cases use the catalog of the year the student entered the program to determine requirements. Any courses taken as equivalents must be approved by the Graduate Director and the Office of Graduate Studies.

Total Hours: 56
• Health behavior/organizations
• Health policy

• Three letters of recommendation from individuals who can assess your academic background and potential for success in a doctoral program.
• A personal statement regarding your career objectives and purpose.
• A current resume or curriculum vitae.
• A copy of the applicant’s master’s thesis, graduate-level research paper or other example of the applicant’s scholarly research writing.

Applicants will be assessed based on these requirements. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, students should refer to the catalog content of the year they entered the program. Other years’ catalogs ».

The doctoral program is a post-master’s, competency-based program in health services research consisting of 3 stages. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D. The program, including dissertation, is designed to be completed in a minimum of 4-5 academic years (see Degree Plan tab.) Students are expected to maintain continuous, full-time enrollment.

**Stage 1** consists of basic courses in health policy, health systems and health care management, research and quantitative and qualitative research methods. A notable feature of this stage is that students begin to participate in the research process immediately upon beginning the program through a series of 1-credit-hour immersion courses, taken within the first 2 semesters along with other basic courses.

**Stage 2** involves specialization in a specific substantive area of either policy or management-related research or a combination, as well as advanced statistical analysis and research methods. Students also complete a teaching seminar and practicum.

**Stage 3** consists of the doctoral dissertation demonstrating the development, execution, and results of original research. Students work primarily with their dissertation advisor and doctoral committee at this stage in order to prepare and defend their dissertation proposal and to carry out and complete their dissertation research project. There are two options for the written dissertation, the traditional book format or a three publishable articles format. The written dissertation is formatted and published according to university guidelines.

**Degree requirements:**

• Degree requirements are normally completed within 4-5 years of admission to the program although a maximum of 8 years is allowed.
• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
• Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2398) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
• Successful completion of the required sequence of health services research methods courses (HP&M 819 (or equivalent), HP&M 870, HP&M 871, HP&M 872, HP&M 873, HP&M 875, HP&M 886 and HP&M 819) with a 3.0 grade point average meets the Research Skills requirement.

• Successful completion of the research ethics modules within HP&M 819 (or equivalent), HP&M 870 and HP&M 886 meets the Responsible Scholarship requirement.
• Successful completion of the KUMC Human Subjects Projection training module during the first semester of enrollment and annual training renewal until completion of the program.
• Successful completion of preliminary examinations in quantitative analysis, general health policy and management research, and a specialization area.
• Successful completion of the Residence Requirement (p. 2398) by enrollment in full-time status a minimum of two semesters prior to the semester the Oral Comprehensive Examination is scheduled.
• Successful completion of the Oral Comprehensive Examination (p. 2398). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
• Successful completion of the Post-Comprehensive Enrollment (p. 2398) requirement.
• Enrollment in a minimum of one (1) credit of HP&M 999 Dissertation the semester the student will defend dissertation and graduate.
• Successful completion of the Final Oral Examination (p. 2398) (dissertation defense.)
• Successful Dissertation Submission and Publication (p. 2398) (according to Office of Graduate Studies policy.)
• Successful completion of the following Health Policy and Management core courses:

Department of History and Philosophy of Medicine

The Programs and Mission

The Department of History and Philosophy of Medicine consists of four major units: the Academic Programs, the Clendening Library, the Clendening Museum, and the KU Medical Center Archives. The Department unites these programs in its mission to advance understanding and application of ethical, historical and social analysis of health, medicine and healing.

Using the combined resources of the department we strive to teach students and colleagues how historical and social factors influence health and health care; and we inform our teaching through scholarship in the history and philosophy of medicine that merits national recognition.

The Library and Archives act as careful stewards of the extensive historical collections and promote their use and appreciation; while seeking to add some color to the often drab aesthetic of medical practice.

Finally, through our ethics programs we seek to deepen a moral appreciation of medicine's role in healing through ethics education and scholarship in the medical school and ethics consultation in the University of Kansas Hospital.

Explore our featured resources:

- University of Kansas Medical Center Archives (http://www.kumc.edu/school-of-medicine/history-and-philosophy-of-medicine/kumc-archives.html)
- Writing Consult Center (http://www.kumc.edu/school-of-medicine/history-and-philosophy-of-medicine/education/writing-consult-center.html)

Although no graduate program is offered in this area, H&PM course work may be taken for graduate credit. Graduate level courses taught by History and Philosophy Medicine faculty are available through the Department of Health Policy and Management and the Department of
Preventive Medicine and Public Health on the medical center campus and the Department of History on the Lawrence campus.

Courses

H&PM 853. Responsible Conduct of Research. 1 Hour.
The purpose of this course is to engage research trainees in reading about, considering, and discussing the responsible conduct of science. The course is designed as an option for meeting current federal regulations, which require that all NIH training grants provide training in the responsible conduct of research. This course provides a concise overview of key subject areas in the responsible conduct of research. It is designed to make students aware of relevant guidelines, policies and codes relating to ethical research, as well as to provide the skills for identifying and resolving ethical conflicts that may arise in research. Cross-linked with PRVM 853. LEC.

Interdisciplinary Graduate Program in Biomedical Sciences

Graduate research at the University of Kansas Medical Center covers a rich and diverse range of topics in both basic and translational research. Basic research is geared toward understanding the basic biological systems that control life. By understanding these systems, rationale treatments to treat disease can be devised. The discovery and refinement of these rationale treatments is translational research. With such a range of research topics, it is often difficult to choose the best lab. The interdisciplinary program allows the student to make an informed choice of labs to enter. IGPBS students hear from every researcher who is able to take a new student into their lab during the Faculty Research Series. The student then selects 3 research rotations. At the end of the 3 rotations the student will choose the lab that is the best fit for their research goals. Once a lab is chosen, the student enters the chosen mentor’s department to complete the Ph.D.

The interdisciplinary program covers the first 2 semesters of graduate study. Students take a core group of courses that cover all aspects of cell biology, biochemistry, and cell signaling. Courses are both lecture based and discussion based. Students receive introductions to critical research techniques, work on problem sets, and critically evaluate our current knowledge base. In addition, students take courses in scientific ethics and scientific communication. Scientific communication covers graphic presentation of data and both written and oral communication.

At the end of the first year, students have built a considerable knowledge base and have skills in scientific communication, critical thinking, and problem solving. Students expand their knowledge base and skills by taking advanced courses in their chosen departments or programs. Our graduate program prepares students for successful careers in research.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
- A background check (p. 2395) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs are.

Beginning with the Fall semester of year two, the student enters the Ph.D. program their faculty mentor is associated with and completes the degree requirements listed in the catalog for that specific program.
Department of Microbiology, Molecular Genetics, and Immunology

The mission of the Department of Microbiology, Molecular Genetics and Immunology is to conduct high impact research that is relevant to human health and train the next generation of biomedical scientists and physicians who will advance our understanding of infection and immunity in ways that benefit humankind.

Our nationally recognized research programs, highly supported by NIH research funding (http://www.brimr.org/NIH_Awards/2010/NIH_Awards_2010.htm), cover a variety of topics within the following themes:

- microbial physiology and pathogenesis
- virology
- immunology and host defense

Funding also provides support for pre- and postdoctoral trainees and visiting scientists, as well as for hosting national and international researchers in the Microbiology seminar series.

Courses

MICR 801. Principles of Immunology. 1 Hour.
An introductory course in immunology; cells and tissues of the immune system; B and T cells and their receptors; major histocompatibility complex; antigen presentation; regulation of immune responses; immunity and vaccination. Prerequisite: IGPBS courses or permission of instructor. LEC.

MICR 802. Principles of Virology. 1 Hour.
An introductory course in virology; replication of RNA and DNA viruses; viral RNA processing and translation; reverse transcription; virus assembly; viral pathogenesis; viruses as vectors. Prerequisite: MICR 801 or permission of instructor. LEC.

MICR 803. Principles of Bacterial Genetics and Pathogenesis. 1 Hour.
An introductory course in bacteriology; cell structure and function; chromosome and plasmid replication; genetic engineering; bacteriophage; gene regulation; quorum sensing; antibiotics; protein secretion; bacterial pathogenesis. Prerequisite: MICR 801 MICR 802 or permission of instructor. LEC.

MICR 805. Teaching in Higher Education. 3 Hours.
Theoretical and practical aspects of teaching in a graduate degree program with emphasis on program and curriculum design, student assessment, communicating learning expectations, selecting optimal teaching methods aligned with expectations, understanding diverse learning styles, apprenticeship teaching, developing as a teacher and applying contemporary educational theory to the classroom or research laboratory. Prerequisite: Any graduate degree or current enrollment in a graduate degree program or permission of instructor. LEC.

MICR 808. Immunology. 3 Hours.
Molecular and cellular aspects of immunity. Specific topics will include immunoglobulin and receptor structure/function, attributes of antigenicity, antigen-antibody reactions, immunocompetent cells, cellular interactions, soluble mediators of immune responses and normal and abnormal immune regulation. Prerequisite: Permission of course director. LEC.

MICR 809. Tumor Immunology. 3 Hours.
Immune system and tumor growth; tumor immunotherapy. Analysis and applications of experimental systems and discussion of contemporary as well as classical primary literature in the field. Collaborative learning and communication skills emphasized. Prerequisite: IGPBS core curriculum or equivalent, or permission of instructor. LEC.

MICR 810. Fundamentals of Immunology. 2 Hours.
Immunee cells and soluble mediators of the innate and adaptive systems, antigen and pattern recognition, lymphocyte development and activation, immune effector mechanisms, mechanisms of immune-based diseases. Analysis and applications of experimental systems and discussion of contemporary as well as classical primary literature in the field. Collaborative learning and communication skills emphasized. Prerequisite: Introductory course work in cell and molecular biology; biochemistry and genetics. LEC.

MICR 811. Molecular Genetics of Bacteria and Phages. 2 Hours.
This 2-credit course is designed for students pursuing a graduate degree in a biomedical field. The goal of the course is to introduce the fundamental concepts of modern microbial genetics and to expose the students to commonly used experimental procedures in microbial and molecular genetics. Students will study both textbook and literature sources and will learn to apply research methods to understand the problems associated with the bacterial physiology and genetics. Active learning approaches in the classroom will require that students work collaboratively with others. Both written and oral communication will be emphasized as important learning outcomes in this course. Prerequisite: An introductory course in biology, genetics, chemistry or biochemistry. LEC.

MICR 812. Molecular Virology and Pathogenesis. 2 Hours.
This Virology course is aimed at graduate students who are pursuing a graduate degree in a biomedical field. It provides a contemporary understanding of how viruses are built, how they infect and replicate in host cells, how they spread and evolve, how they interact with host cells, how they eventually cause diseases, and how infection of a host can be prevented. Prerequisite: Introductory course work in cell and molecular biology, biochemistry and genetics. LEC.

MICR 820. Bacterial Genetics and Pathogenesis. 3 Hours.
Genetics of bacteria with emphasis on bacterial pathogens. Topics include: gene regulation, recombination, bacteriophages, transposons, genetic exchange, plasmids, genetics of virulence, bacterial adherence and colonization, immune evasion mechanisms, bacterial toxins, vaccines and antimicrobials, re-emerging bacterial diseases. Prerequisite: Introductory course work in cell and molecular biology, biochemistry and genetics or permission of instructor. LEC.

MICR 825. Virology. 3 Hours.
Molecular biology of animal viruses. Aspects of various virus groups to be covered include structure, replication, and host cell responses. Lectures and student seminars. Prerequisite: Permission of the course director. LEC.

MICR 830. Seminar in Microbiology. 1 Hour.
Reports on research and literature. LEC.

MICR 835. Research in Microbiology. 1-6 Hours.
This course is specifically designed to provide supervised research experience in various laboratories in the department. LEC.

MICR 855. Host-Pathogen Interactions. 3 Hours.
This course is designed for students pursuing a graduate degree in a biomedical field. Topics include host-pathogen interactions; pathogen adhesion; invasion and intracellular survival; cell death pathways; innate immunity; role of extracellular matrices. The course will cover various
bacterial and viral pathogens as well as eukaryotic pathogens such as fungus. Prerequisites: Introductory course work in cell and molecular biology, biochemistry and genetics or permission of instructor. LEC.

**MICR 890. Master's Research in Microbiology. 1-10 Hours.**
This course is designated for research leading to the master's degree. LEC.

**MICR 899. Master's Thesis in Microbiology. 1-10 Hours.**
This course is designated for thesis writing leading to a master's degree in Microbiology. THE.

**MICR 930. Advanced Topics in Microbiology. 1-8 Hours.**
An advanced approach to selected topics in any of the major disciplines in microbiology. Readings and conferences, or advanced laboratory techniques. LEC.

**MICR 990. Research for Ph.D. in Microbiology. 1-10 Hours.**
This course is restricted entirely to dissertation research. RSH.

**MICR 999. Dissertation for Ph.D. in Microbiology. 1-10 Hours.**
Restricted to actual writing of dissertation. THE.

---

**Master of Science in Microbiology**

M.S. degrees may be earned with a major emphasis in bacteriology, virology or immunology. M.S. program is designed to prepare for a diverse workforce of scientists, teachers and administrators who fill the broad science and engineering employment needs of the private and government sectors. It may also lead to teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission Requirements:**

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

  Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).

- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895. 

- Three letters of recommendation.

- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry

- One year of biological sciences
- One semester of calculus
- One semester of physics

- Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

**Degree Requirements:**

- Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of either a thesis defense or general examination (p. 2398) the semester the student will graduate.
- If thesis option chosen, then enrollment in a minimum of one (1) credit hour of MICR 899 Master’s Thesis and successful thesis submission and publication (p. 2398) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):

### Doctor of Philosophy in Microbiology

A Ph.D. is required for careers in independent academic research in microbiology and immunology. The Ph.D. degree is most often followed by two or more years of postdoctoral training in a specific area of research. Ph.D. graduates in microbiology, with appropriate postdoctoral experience, are ready to compete effectively for faculty positions at a college or university, senior level positions in biotech industry and government.

The faculty in this program have diverse research interests ranging from the molecular pathogenesis of infectious agents (bacteria and viruses) to the understanding of immune function. Students with undergraduate degrees in microbiology, biochemistry or other similar disciplines are encouraged to apply.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website [http://www.kumc.edu/igpbs/how-to-apply.html](http://www.kumc.edu/igpbs/how-to-apply.html).

**Admission Requirements:**

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).

- A background check (p. 2395) is required during the admission process; it may affect the student’s eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

- Three letters of recommendation.

- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
Degree requirements:

- One year of biological sciences
- One semester of calculus
- One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree requirements:

- Degree requirements are normally completed within 5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2398) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 857 Biographics, GSMC 852 and GSMC 855 Introduction to Biomedical Research I and II (or equivalent) meets the Research Skills requirement.
  - Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2398) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2398). This examination evaluates the student's ability to write and defend an original research proposal, design experiments, and interpret results in a sound and critical manner. Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
- Successful completion of the Post-Comprehensive Enrollment (p. 2398) requirement.
  - Enrolment in a minimum of one (1) credit hour of MICR 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.
- Successful completion of the Final Oral Examination (p. 2398) (dissertation defense.) The doctoral candidate prepares a written dissertation detailing the results of their original research.
- Successful Dissertation Submission and Publication (p. 2398) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):

- Successful completion of two of the following elective courses, one of which must be an advanced course in the student's research area. Courses are selected in consultation with the student's advisor. One of these courses must be completed prior to scheduling the oral comprehensive exam.
  - MICR 801 Principles of Immunology          | 1
  - MICR 802 Principles of Virology            | 1
  - MICR 803 Principles of Bacterial Genetics and Pathogenesis | 1
  - MICR 830 Seminar in Microbiology           | 1
  - MICR 835 Research in Microbiology          | 1-6          
  - MICR 990 Research for Ph.D. in Microbiology| 1-10         |
  - MICR 999 Dissertation for Ph.D. in Microbiology | 1-10      |

- Successful completion of additional elective coursework as determined in consultation with the student’s advisor or research committee. Electives may include the Microbiology courses listed below or courses from other departments.
  - MICR 805 Teaching in Higher Education      | 1
  - MICR 810 Fundamentals of Immunology        | 2
  - MICR 811 Molecular Genetics of Bacteria and Phages | 2
  - MICR 812 Molecular Virology and Pathogenesis| 2

- Successful presentation of a literature seminar.
- Participation in the Work in Progress series (meets monthly.)

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (http://catalog.ku.edu/medicine/combined-md-phd/#degreerequirementstext) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

#### Department of Molecular and Integrative Physiology

Research programs in the Department of Molecular and Integrative Physiology cover the range from analysis of genes to analysis of whole organisms and fall into three broad categories:

  - This area includes the investigation of physiology and pathophysiology in experimental models ranging from cellular preparations to intact animals and humans. Current research is directed at studies of the microvascular system, cardiac system, hypoxia and oxygen transport in the respiratory system, and plasma membrane and fluid transport within the renal system. Research also encompasses various aspects of cancer biology including both *in vitro* and *in vivo* approaches.

  - This area includes the investigation of neural function in normal and disease states, and addresses problems at different levels ranging from the regulation of nervous system genes to central nervous system mechanisms controlling arm movement in the intact animal. Current research includes the study of development, transplantation, demyelinating diseases, recovery of function following peripheral and central nervous system injury and stroke, motor and cognitive defects associated with HIV, neurophysiological, behavioral and molecular measures of early development, central mechanisms of hearing, neurotransmitters and plasticity.

  - This area includes the investigation of the hypothalamic-pituitary-gonadal axis, as well as uterine and placental function. Current studies are directed at mechanisms of hormone action, cell motility, cell-cell communication, cell and tissue differentiation and growth, cytokines and growth factors, gene expression...
and control of enzyme regulation in ovary, testis, sperm, hypothalamic-pituitary axis, preimplantation embryo, trophoblast/placenta and uterus. Mammalian and invertebrate reproductive models including transgenic and gene knockout mice provide fundamental information related to cell biology, endocrinology, and developmental biology.

The common thread is that all programs endeavor to understand biological function in health and disease. Nearly all faculty members have served on national advisory committees to major funding agencies such as the National Institutes of Health and as reviewers and editors to major scientific publications. The program provides outstanding didactic instruction and laboratory experiences that enable students to become effective teachers and independent investigators. The department offers the Ph.D. degree, and the combined M.D./Ph.D.degrees in conjunction with the School of Medicine. An M.S. degree may be granted in appropriate circumstances.

The faculty and graduate students participate in a variety of graduate level teaching programs in the Schools of Medicine and Health Professions. Extramural research support for fiscal year 2014 was 4.7 million dollars from the NIH. The Department of Molecular and Integrative Physiology ranks in the upper third of all physiology departments at public universities in the U.S. with respect to NIH funding.

Courses

PHSL 784. Faculty Research Programs. 1 Hour.
The new student will be introduced to the faculty research programs. Each faculty member will present his/her research interests using one or more of the following formats: laboratory demonstrations, computer simulations and lectures. The objectives are to assist the new student in selecting his/her area of dissertation research and acquainting the new student with the department research resources. LEC.

PHSL 834. Reproductive Physiology. 5 Hours.
All aspects of reproductive physiology including an in depth study of ovarian and testicular development/function, neuroendocrine development/function, implantation, placentation, puberty, pregnancy and fertility regulation are covered. Historical and current scientific literature will be used to support a graduate level text and didactic lectures. Prerequisite: a general endocrinology/physiology course, an equivalent course and/or consent of instructor. LEC.

PHSL 835. Integrative Physiology of Exercise. 3 Hours.
To understand how the major physiological systems of the body respond to exercise with an emphasis on integration and function. Historical and current scientific literature will be used to generate discussion and support didactic material. Fundamentals of exercise physiology will be covered, but a background in exercise physiology is not required. Prerequisite: a general physiology course, an equivalent course and/or consent of instructor. LEC.

PHSL 838. Advanced Topics. 1-3 Hours.
Special studies designed and arranged on an individual basis to allow a student to pursue a particular subject through reading, special laboratory work, and conferences with a senior staff member. LEC.

PHSL 840. Advanced Genetic Analysis. 3 Hours.
This course will focus on principles that underlie genetic analysis, including mutation, complementation, recombination, segregation, and regulation. The genetics of commonly used model organisms such as yeast, flies, worms and mice will be examined, classic genetic screens performed to study phage assembly, cell cycle regulation, sex determination and X-chromosome inactivation will be discussed and modern-day techniques used to study inheritance and gene function in various systems will be analyzed. Human genetic analysis will also be covered, including population genetics, techniques for gene mapping, inherited diseases, genetic testing and gene therapy. Through reading and discussion of scientific literature and problem-based homework and exams, students will learn how to evaluate and interpret genetic data as well as develop and design genetic strategies to solve current biological problems. Prerequisite: Completion of IGPBS Core Curriculum or equivalent, or permission of Course Director. LEC.

PHSL 842. Comprehensive Human Physiology. 5 Hours.
Advanced course on modern human physiology. The course focuses on organ systems of the human body including nervous, cardiovascular, endocrine, digestive, respiratory, reproductive and urinary systems. This course emphasizes the use of modern experimental approaches that take advantage of cellular and molecular technologies. Prerequisite: NONE LEC.

PHSL 844. Neurophysiology. 3 Hours.
Somatosensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as NURO 844.) Prerequisite: Introductory course in neuroscience and consent of instructor. LEC.

PHSL 846. Advanced Neuroscience. 5 Hours.
Team taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHCL 846 and NURO 846). Prerequisite: Permission of course director. LEC.

PHSL 847. Developmental Neurobiology. 2 Hours.
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847 and NURO 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor. LEC.

PHSL 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.
An in-depth coverage of pathogenic mechanisms in neurological diseases: cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer’s, Parkinson’s, Huntington’s, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down’s syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, NURO 848, and PHCL 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor. LEC.

PHSL 850. Research. 1-10 Hours.
Original laboratory investigation conducted under the supervision of a senior staff member. RSH.

PHSL 851. Seminar. 1 Hour.
Student participation (attendance and presentation) in weekly Departmental seminar series. The topics examined in these seminars are dictated by the interests of students and staff. Prerequisite: student must have passed their oral comprehensive exam. LEC.

PHSL 899. Master’s Thesis. 1-5 Hours.
Preparation of the formal thesis based on library research or independent research and in partial fulfillment of the requirements for the master's
degree. Credits will be given only after the thesis has been accepted by the student's thesis committee. THE.

**PHSL 999. Doctoral Dissertation. 1-10 Hours.**
Preparation of the Dissertation based on original research and in partial fulfillment of the requirements for the Ph.D. degree. Credits will be given only after the dissertation has been accepted by the student's dissertation committee. THE.

**Master of Science in Molecular and Integrative Physiology**

The Master of Science (M.S.) in Molecular and Integrative Physiology prepares the student for a career at the advanced technical level in academia, industry or government. It may also lead to teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2126) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

**Admission Requirements:**

- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
  Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).

- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

- Three letters of recommendation.

- Prerequisite coursework:

  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics

  Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

**Degree requirements:**

- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 7 years is allowed.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- Completion of a minimum of 30 credit hours.

- Enrollment in a minimum of one (1) credit hour of PHSL 899 Master's Thesis the semester the student will defend thesis and graduate.

- Successful completion of the thesis defense (p. 2398).

- Successful thesis submission and publication (p. 2398) (according to Office of Graduate Studies policy.)

- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):

  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4

- Successful completion of the following Physiology courses:

  - PHSL 842 Comprehensive Human Physiology (or equivalent) 5
  - PHSL 850 Research 1-10
  - PHSL 899 Master's Thesis 1-5

- Successful completion of elective coursework as determined in consultation with the student's advisor.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

Doctor of Philosophy in Molecular and Integrative Physiology

The Ph.D. in Molecular and Integrative Physiology prepares the student for a career in independent research in the broad area of Physiology. The Ph.D. is most often followed by one or more years of postdoctoral training in a specific area of research. Acquisition of a Ph.D. in Molecular and Integrative Physiology allows the individual to pursue positions in industry or government and following postdoctoral experience opportunities are available at the college or university level.

Upon acceptance into the graduate program in Molecular and Integrative Physiology, the student will select a research track for their subsequent studies. There are three different tracks available to the student:

- Cellular & Integrative Physiology
- Neuroscience
- Reproduction & Development

Each track has specialized curriculum requirements that must be followed for degree completion.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2126) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs can be found here.

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree Requirements:

- Degree requirements are normally completed within 6 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.
- Successful completion of the University's Research Skills and Responsible Scholarship (p. 2398) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 852 Biographics, GSMC 852 and GSMC 855 Introduction to Biomedical Research I and II (or equivalent) meets the Research Skills requirement.
  - Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2398) by enrollment in full-time status a minimum of two semesters prior to the semester the Oral Comprehensive Examination is scheduled.
• Successful completion of the Oral Comprehensive Examination (p. 2398). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

• Successful completion of the Post-Comprehensive Enrollment (p. 2398) requirement.

• Enrollment in a minimum of one (1) credit hour of PHSL 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.

• Successful completion of the Final Oral Examination (dissertation defense.)

• Successful completion of the Final Oral Examination (p. 2398).

• Successful Dissertation Submission and Publication (p. 2398) (according to Office of Graduate Studies policy.)

• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):

  GSMC 850 Proteins and Metabolism 2
  GSMC 851 Molecular Genetics 2
  GSMC 852 Introduction to Biomedical Research I 2
  GSMC 853 Cellular Structure 2
  GSMC 854 Cell Communication 2
  GSMC 855 Introduction to Biomedical Research II 2
  GSMC 856 Introduction to Research Ethics 1
  GSMC 857 Biographics 1
  GSMC 858 Introduction to Faculty Research 1
  GSMC 859 Research Rotations 1-4

• Successful completion of the following Physiology courses:

  PHSL 842 Comprehensive Human Physiology (or equivalent) 5
  PHSL 850 Research 1-10
  PHSL 851 Seminar 1
  PHSL 999 Doctoral Dissertation 1-10

• Successful completion of track-specific requirements. Choose from one of the three tracks: Cellular & Integrative Physiology, Neuroscience or Reproduction & Development in consultation with the student's advisor.

  • Cellular & Integrative Physiology
    • Minimum of six (6) credit hours of electives. Choose from the following courses:
      PHSL 835 Integrative Physiology of Exercise 3
      or PHSL 838 Advanced Topics
      or PHSL 840 Advanced Genetic Analysis
      or CBIO 800 Mechanisms of Tumor Development and Progression: Colloquium Format
      or CBIO 900 Carcinogenesis and Cancer Biology
      or other electives with approval by Graduate Director

  • Neuroscience
    • Minimum of six (6) credit hours of electives. Choose from the following courses:
      PHSL 844 Neurophysiology 3
      or PHSL 846 Advanced Neuroscience
      or PHSL 847 Developmental Neurobiology

or PHSL 848 Molecular Mechanisms of Neurological Disorders or other electives with approval by Graduate Director

• Reproduction & Development
  • Minimum of six (6) credit hours of electives. Choose from the following courses:
    PHSL 834 Reproductive Physiology 5
    and other electives with approval by Graduate Director

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (http://catalog.ku.edu/medicine/combined-md-phd/#degreerequirementstext) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

Neurosciences Program

The KU-L/KUMC bicampus Neuroscience Graduate Program (http://www.neuroscience.ku.edu) is designed to prepare the student for a research and/or teaching career with concentrations in neuroscience. The program emphasizes research and the skills and knowledge required to perform and communicate the results of research. Modern neuroscience researchers/educators must be versed in a number of areas: affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, MDCM 775, PTX 775, and PHCH 775.) Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor. LEC.

NURO 775. Chemistry of the Nervous System. 3 Hours.

The course will build an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics will include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor. LEC.

NURO 799. Neuroscience Seminar Series. 2 Hours.

Presentations of research papers by faculty, post-doctoral research associates, and graduate students. All graduate students in the Neuroscience program participate in this seminar series throughout their period of training. Each student has to present a seminar once every semester. Presentations by students are evaluated by other graduate students and faculty at the end of each seminar. Prerequisite: Graduate standing in the Neuroscience program. LEC.
NURO 800. Neuroscience Teaching Principles. 2 Hours.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in Neuroscience. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with faculty whom he or she is assisting in preparation of presentation materials and tests. Each student will be evaluated by the faculty mentor and by the students in the class taught. Prerequisite: Graduate standing in Neuroscience. LEC.

NURO 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, PTX 801, PHCH 801 and PHCH 802.) Prerequisite: Graduate standing in the Neuroscience program. LEC.

NURO 825. Research in Neuroscience. 1-10 Hours.
Original investigations at an advanced level in the areas of neuroscience. The research by each student will be performed in the laboratory of one of the faculty mentors of the graduate program in Neuroscience. Prerequisite: Graduate standing in the Neuroscience program. LEC.

NURO 844. Neurophysiology. 3 Hours.
Somatosensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as PHSL 844.) Prerequisite: PHSL 846 or equivalent and consent of instructor. LEC.

NURO 846. Advanced Neuroscience. 5 Hours.
Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHCL 846, and PHSL 846.) Prerequisite: Permission of the course instructor. LEC.

NURO 847. Developmental Neurobiology. 2 Hours.
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847 and PHSL 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor. LEC.

NURO 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer's, Parkinson's, Huntington's, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down's syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, PHCL 848, and PHSL 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor. LEC.

Hours and credit for this course to be arranged with the mentor. Independent investigation of a research problem in neuroscience, but of limited scope. Prerequisite: Graduate standing in the Neuroscience program and consent of mentor/instructor. THE.

Hours and credit for this course to be arranged with the mentor. Conduct of original investigation in neurosciences. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor. THE.

Master of Science in Neurosciences

The Neuroscience Master's program is a bi-campus graduate program that incorporates neuroscience faculty at the KU main campus in Lawrence and the KU Medical Center (KUMC). Neuroscience graduate students that matriculate at KUMC participate in the integrated IGPBS graduate program their first year and have the option of taking selected courses on the main campus after their first year. Students on the Lawrence campus take neuroscience courses on the Lawrence campus, but also participate in courses offered on the KUMC campus. Students and faculty from both campuses participate regularly via the Neuroscience Seminar series, which is conducted by video conference.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2126) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

• Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

• A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.

• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).

• A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.

• An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

• Three letters of recommendation.

• Prerequisite coursework:

  • One year of general chemistry

  • One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry

  • One year of biological sciences

  • One semester of calculus

  • One semester of physics

• Research experience (beyond labs associated with lecture courses) is strongly suggested.
Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs ».

**Degree Requirements:**

- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of either a thesis defense or general examination (p. 2398) the semester the student will graduate.
- If thesis option is chosen, then enrollment in a minimum of one (1) credit hour of NURO 899 Neuroscience Master's Thesis and successful thesis submission and publication (p. 2398) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4
- Successful completion of the following Neuroscience courses:
  - NURO 799 Neuroscience Seminar Series 2
  - NURO 899 Neuroscience Master's Thesis (if thesis option chosen) 1-11
  - ANAT 990 Doctoral Research 1-12
- Optional elective course as determined in consultation with the student’s advisor
  - ANAT 846 Advanced Neuroscience 5

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

The KU-L/KUMC bicampus Neuroscience Graduate Program (http://www.neuroscience.ku.edu) is designed to prepare the student for a research and/or teaching career with concentrations in neuroscience. The program emphasizes research and the skills and knowledge required to perform and communicate the results of research. Modern neuroscience researchers/educators must be versed in a number of areas of neural research, spanning from molecular neuroscience to systems neuroscience. As such, the course of study in the program is broadly based; you are encouraged to enroll in courses offered by other programs.
or departments. The research opportunities in the program are widely varied and will accommodate many interests.

Nearly all Ph.D. students in the Neuroscience Graduate Program at the KU School of Medicine are admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences (IGPBS). After the initial year of course work, students choose a neuroscience research mentor and then join the laboratory of the mentor. Coursework for the Neuroscience Graduate Program is offered at the KU Medical Center campus in Kansas City, Kansas as well as the University of Kansas in Lawrence. Several courses are taught on both campuses via videoconferencing. Comprehensive Exams for all students must be completed by the fall of the 3rd year in Graduate School. The program on the KUMC campus is directed by the KUMC Neuroscience Graduate Studies Committee consisting of the following faculty:

**KUMC Graduate Studies Committee Members:**
- Douglas Wright, PhD
- Dianne Durham, PhD
- John Stanford, PhD

Applications may be made online at: Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS) (http://www.kumc.edu/igpbs.html).

Inquires related to the KUMC portion of the program may be directed to the Program Director:
- Douglas Wright, Ph.D.
- Professor
- Director, Neuroscience Graduate Program, KUMC Campus
- Department of Anatomy & Cell Biology
- University of Kansas Medical Center
- Kansas City, KS 66160
- 913-588-2713 (office)
- 913-588-2710 (fax)
- dwright@kumc.edu (mpetroff@kumc.edu)

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

### Admission Requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
  - Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
- A background check (p. 2395) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. *Other years’ catalogs*.

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

### Degree Requirements:

- Degree requirements normally are completed within 5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2398) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
  - Successful completion of GSMC 857 Biographics, GSMC 852 and GSMC 855 Introduction to Biomedical Research I and II (or equivalent) meets the Research Skills requirement.
- Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (p. 2398) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
- Successful completion of the Oral Comprehensive Examination (p. 2398). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.
- Successful completion of Post-Comprehensive Enrollment (p. 2398) requirement.
• Enrollment in a minimum of one (1) credit hour of dissertation NURO 999 Neuroscience Doctoral Dissertation the semester the student will defend dissertation and graduate.

• Successful completion of the Final Oral Examination (p. 2398) (dissertation defense.)

• Successful Dissertation Submission and Publication (p. 2398) (according to Office of Graduate Studies policy.)

• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS (p. 2126)) courses (or their equivalent):

<table>

Final Oral Exam (dissertation defense) scheduled semester approved by committee to defend and graduate.

Total Hours: 23-122
Department of Pathology & Laboratory Medicine

The Department of Pathology & Laboratory Medicine crosses the bridge between basic science and clinical practice and involves the study and diagnosis of disease. We emphasize innovative, service-oriented programs that encompass a full spectrum of medical practice. Our Mission is to provide excellent teaching, research, patient care and community service and to meet the health needs of Kansas and the community at large. Our Aim is to provide a supportive work environment so that each individual can excel and pursue avenues that lead to recognition within the medical community and benefit healthcare at large.

The Department provides vital patient services to the Hospital, Greater Kansas City Metropolitan Area and outlying medical facilities through our clinical laboratory (http://www.kumc.edu/school-of-medicine/pathology/clinical-services.html) and anatomic (surgical) services (http://www.kumc.edu/school-of-medicine/pathology/anatomicsurgical-services.html). Faculty are board-accredited and the department provides a full spectrum of subspecialized expertise. The clinical laboratory processes over 3 million samples per year including the services of robotic automation and is accredited by the American Association of Blood Banks (AABB) (http://www.aabb.org/Pages/Homepage.aspx), College of American Pathologists (CAP) (http://www.cap.org/apps/cap.portal) and Foundation for the Accreditation of Cellular Therapy (FACT) (http://www.factwebsite.org). The core laboratory reviews over 30,000 surgical accessions and 10,000 surgical specimens per year, reflecting 9% year over year case growth; cytopathologists review 12,500 accessions per year. 2,300 bone marrow accessions are reviewed per year. The Department provides material to the University of Kansas Cancer Center’s Biospecimen Tissue Laboratory towards ongoing research and development of new and improved treatment modalities.

Basic Science research is conducted through our Division of Cancer & Developmental Biology (http://www.kumc.edu/school-of-medicine/pathology/researchbasic-science.html) and includes cancer biology, developmental biology and cell differentiation, stem cell biology and microbial and viral pathogenesis. Our laboratories are supported by external funding from sources including the NIH (http://www.nih.gov) as well as private resources; faculty and laboratories reside on both sides of the state line at the KUMC (http://www.kumc.edu) and Stowers Institute (http://www.stowers.org) campuses. Faculty numbers have increased dramatically since 2004, from 3 (2 at Stowers) in 2004 to 24 (5 at Stowers) in 2014.

The Department is committed to education (http://www.kumc.edu/school-of-medicine/pathology/education-programs.html) through its basic science research, medical and continuing medical education programs. Basic Science education is sponsored through our Graduate Program (http://www.kumc.edu/school-of-medicine/pathology/basic-science-graduate-program.html) and Postdoctoral programs and has grown commensurate with division laboratory expansion; there are currently 19 graduate students and 16 postdoctoral fellows enrolled in basic science programs and labs. Medical education is supported by our clinical and anatomic faculty and includes residency and postdoctoral hematopathology, surgical and cytopathology fellowships, post-sophomore fellowships, phase II elective rotations and phase I teaching services to the University of Kansas’ School of Medicine. Board accredited Continuing Medical Education is supported through a monthly Grand Rounds series that emphasizes current, applicable clinical and research topics; the department as well provides endowed subspecialty lectureships. Both

our research and clinical/anatomic divisions provide regularly scheduled programs targeting cutting-edge basic science, subspecialized pathology topics and translational research, encouraging advancement of patient care.

Please refer to pages included in this catalog on both Master of Science and Doctor of Philosophy in Pathology for additional information regarding each program.

Courses

PATH 800. General Pathology. 7 Hours.
The basic mechanisms of human disease, including cellular pathology, inflammation, diseases of immunity, neoplasia, infectious and circulatory diseases and aging are considered through the mechanisms of lectures, small-group problem based care study and autopsy demonstration. Prerequisite: Courses in cell biology, biochemistry, and physiology, or equivalents. LEC.

PATH 801. Systemic Pathology. 9 Hours.
Human disease is studied by organ systems to include cardiovascular, hematologic, renal, respiratory, gastrointestinal, genitourinary, musculoskeletal, endocrine, and nervous system diseases. The pathobiology of all major diseases occurring within each organ system are considered by lectures, problem based case study and autopsy participation. Since final comprehensive examination at the end of Pathology II will include material from both Pathology I and Pathology II. Prerequisite: Successful completion of Pathology LEC.

PATH 802. Special Pathology. 6 Hours.
A detailed study of diseases involving the endocrine, genitourinary, neuromuscular, and skeletal systems. Prerequisite: PATH 800 and courses in histology, biochemistry, and physiology, or equivalent. LEC.

PATH 803. Stem Cell Biology. 2 Hours.
Current concepts in the study of stem cells and the clinical potential in modern disease treatment. Students will learn concepts of stem cells: origin, regulation of pluripotency, and differentiative potential; experimental isolation and manipulation; and clinical application of isolated stem cells. Current scientific literature will be used to highlight recent advances in stem cell biology. Special emphasis will be placed on the ethical and legal issues surrounding the use of stem cells of both adult and embryonic origin. Prerequisite: Course in cell biology; consent of instructor. LEC.

PATH 804. Selected Topics in Signal Transduction. 1 Hour.
A survey of the basic principles and contemporary literature of signal transduction pathways involved in cancer development and developmental biology. Faculty lecture and student presentations will address selected topics in cellular signal transduction. Student seminars will focus on the scientific content of the publication with emphasis on appropriate presentation of background information, experimental methods, results and potential future directions. Critical discussion of papers will be provided by participating students and faculty. Prerequisite: Course in Molecular Biology. LEC.

PATH 805. Seminars in Pathology. 1 Hour.
Presentation of Pathology Department graduate student research-in-progress. Students will conduct a one-hour seminar in which updates of their current research project(s) in pathology will be reported. The seminars are interactive and students are encouraged to participate in discussion of the presented work. Prerequisite: Completion of the IGPBS core curriculum and status as a second-year graduate student; consent of instructor. RSC.
PATH 899. Master’s Thesis. 1-7 Hours.
THE.

PATH 903. Pathology Techniques Laboratory. 1-3 Hours.
A laboratory course in which students may select no more than three of the following: electron microscopy, fluorescence microscopy, cell typing, morphometrics, immunohistochemistry, flow cytometry, DNA probe, autopsy technique. LAB.

PATH 905. Cellular Biology and Pathophysiology of Bone. 3-5 Hours.
Normal bone development, ultrastructure of bone, and the calcification mechanism. Developmental and genetic abnormalities of bone including dwarfism and osteogenesis imperfecta. Metabolic bone diseases including osteoporosis, Paget's disease and osteomalacia. Methods of diagnosis by morphometry of undecalcified bone biopsy. Common primary bone tumors, and the mechanism of bone loss or bone over growth caused by metastatic malignant tumors. There will be practical laboratory portion. Prerequisite: PATH 800 or permission of instructor. LAB.

PATH 907. Infection and Immunity. 1 Hour.
Microbial factors, host reaction, and disease. Emphasis on recovery from infection, response to reinfection, the resultant clearance of microbes, or the development of chronic infection. Hypersensitivity phenomena will also be considered in the light of data from transplantation immunity. Prerequisite: PATH 800. LAB.

PATH 911. Research in Pathology. 1-10 Hours.
RSH.

PATH 912. Advanced Topics. 1-3 Hours.
Offered by arrangement. Prerequisite: Approval of the instructor and completion of the IGPBS core curriculum or its equivalent. IND.

PATH 913. Introduction to Grant Proposal Writing. 1 Hour.
This course will teach the fundamentals of writing a grant proposal with an emphasis on NIH proposals. This course is open to any graduate students interested in applying for pre-doctoral fellowships, and especially to graduate students in the Department of Pathology who will be conducting their comprehensive qualifying exams in the upcoming year. This course involves a combination of didactic lectures, student coursework and discussion. This course will include different principal investigators from the Pathology Department as guest speakers. Topics will include different sources of funding, grant submission and post-submission review process. However, the core component of this course will involve teaching the basic framework and components of an NIH R01 application. This course is designed to give practical structural guidance in scientific writing at a professional level and does not give guidance on specific research projects. Prerequisites: IGPBS coursework or equivalent, permission of instructor. LEC.

PATH 915. Advanced Pathology. 3 Hours.
A lecture and literature review course in which molecular, subcellular, and supracellular organization and function are considered in normal and disease states. Prerequisite: PATH 800. LEC.

PATH 939. Carcinogenesis and Cancer Biology. 3 Hours.

PATH 999. Doctoral Dissertation. 1-7 Hours.
THE.

Master of Science in Pathology

The Master of Science in Pathology provides comprehensive training in understanding the molecular basis of disease and the fundamental mechanisms of cell growth and differentiation. It prepares the student for either a career in advanced academia or lays the base for continued terminal education. It may also lead to teaching positions at the secondary or junior college level.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2126) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

- Bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
• Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. *Other years’ catalogs*. 

### Degree requirements:

- Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour of PATH 899 Master’s Thesis the semester the student will defend and graduate.
- Successful completion of a thesis defense (p. 2398).
- Successful thesis submission and publication (p. 2398) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographies 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4

- Successful completion of the following Pathology courses:
  - PATH 804 Selected Topics in Signal Transduction 1
  - PATH 805 Seminars in Pathology 1
  - PATH 911 Research in Pathology 1-10
  - PATH 899 Master’s Thesis 1-7

- Successful completion of a minimum of four (4) credit hours of advanced graduate coursework in fields related to molecular and cellular biology and experimental pathology. Specific courses determined in consultation with the student’s mentor. Recommended courses include but are not limited to:
  - PATH 803 Stem Cell Biology 2
  - PATH 806 Epigenetics 2
  - PATH 912 Advanced Topics 1-3
  - PATH 913 Introduction to Grant Proposal Writing 1
  - ANAT 868 Advanced Developmental Biology 2
  - BCHM 922 Advanced Molecular Genetics 3

- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):
  - CBIO 900 Carcinogenesis and Cancer Biology 3
  - PHSL 834 Reproductive Physiology 5

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

Doctor of Philosophy in Pathology

The Department of Pathology and Laboratory Medicine offers a graduate program leading to the PhD degree including research opportunities with emphasis on developmental biology and cell differentiation, cancer biology, stem cell biology, microbial and viral pathogenesis, gene regulation and experimental pathology. This curriculum is designed for advanced research study in molecular and cellular biology and experimental pathology.

The course requirements of the Pathology Department Graduate Program are designed to provide maximum flexibility for the student's specialized needs. Students enrolled in the program are required to take graduate coursework in fields related to molecular and experimental pathology and to choose electives from either Pathology or other Medical Center departments related to their major dissertation work. After passing the Comprehensive Examination, students will devote most of their time to laboratory experimentation and developing a research project. Substantial portions of the research efforts should result in published works in peer-reviewed scientific journals.

The Doctorate of Philosophy in Pathology and Laboratory Medicine provides comprehensive training in understanding the molecular basis of disease and the fundamental mechanisms of cell growth and differentiation. Subspecialized research interests in the arenas of cancer biology, stem cell biology and microbial and viral pathogenesis are supported through required and elective coursework and laboratory activities. A Pathology PhD will afford the student the flexibility of tailoring a course of study towards specific research interests and goals, and prepare the student for a career in advanced academia or positions in industry.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2126) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).

- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

- Three letters of recommendation.

- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics

- Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the PhD.

Degree requirements:

- Degree requirements are normally completed within 5 years of admission to the program although a maximum of 8 years is allowed.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2398) requirement prior to the semester the Oral Comprehensive Examination is scheduled.

- Successful completion of GSMC 857 Biographics, GSMC 852 and GSMC 855 Introduction to Biomedical Research 1 and II (or equivalent) meets the Research Skills requirement.

- Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.

- Successful completion of the Residence Requirement (p. 2398) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
• Successful completion of the Oral Comprehensive Examination (p. 2398). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

• Successful completion of the Post-Comprehensive Enrollment (p. 2398) requirement.

• Enrollment in a minimum of one (1) credit hour of PATH 999 Doctoral Dissertation the semester the student will defend dissertation and graduate.

• Successful completion of the Final Oral Examination (p. 2398) (dissertation defense.)

• Successful Dissertation Submission and Publication (p. 2398) (according to Office of Graduate Studies policy.)

• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):

• Successful publication in a peer-reviewed scientific journal before completion of the degree. The journal and its impact factor is subject to the approval of the student’s mentor.

Students enrolled in the MD-PhD Physician Scientist Training Program should review the Degree Requirements (http://catalog.ku.edu/medicine/combined-md-phd/#degreerequirementstext) section of this catalog for that program.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

Final Oral Exam (dissertation defense) scheduled as early as this semester if approved by committee to defend and graduate. Continued enrollment required until graduate.

Total Hours: 30-92

Department of Pharmacology, Toxicology, and Therapeutics

Pharmacology and Toxicology together form a discipline that examines the interactions of chemical substances with living systems. Pharmacology focuses on the properties of drugs, including their sites of action, processing by the human body, and therapeutic uses. Toxicology studies the adverse effects of chemicals such as environmental agents and synthetic compounds, including drugs and their metabolites, and the means to prevent or treat their effects. Because the study of chemicals requires an intimate knowledge of the biological systems affected.

Pharmacology and Toxicology are by necessity an integrative discipline that studies the effects of chemicals at the molecular, cellular, organ, organismal, and population levels.

Faculty members in the Department of Pharmacology, Toxicology & Therapeutics at KUMC have diverse research interests. These research topics are essential for developing new drugs and are fundamental to determining the safety of all chemicals. Thus, our students obtain a broad educational background that prepares them for a career in research and scholarly work in a variety of settings, including academia, the pharmaceutical or biotechnology industries, or governmental agencies. Our department faculty has an excellent record of training students, and our graduates have become scientific leaders in academia, government and industry.

During the last five years, the Department faculty has undergone major changes with the addition of several tenure-track and research-track faculty, with a major focus in liver pathobiology and toxicology. This was facilitated in part by a Center of Biomedical Research Excellence (COBRE) grant from the National Institutes of Health, and has been accompanied by major new equipment purchases. The Department is been housed in state-of-the-art research space in the Hemenway Life Science Innovation Center. These resources provide an exciting environment that fosters personal and professional development in an atmosphere with ample opportunities for independent scholarship and strong collaborative activities.

Research opportunities are available for graduate students in the laboratories of faculty members throughout the department. Pharmacology faculty members have research interests in molecular and cellular neuropharmacology, neurotrauma, and the role of hormones and diet constituents on brain function. In addition, department faculty members study pharmacokinetics of drugs (absorption, distribution, biotransformation and excretion) and the biology and functional significance of drug transporters such as organic anion transporting polypeptides (OATPs), organic cation transporters (OCTs), and ATP binding cassette transporters. Our faculty members’ research interests in Toxicology include the toxicity of environmental chemicals, mechanisms of drug- and chemical-induced hepatotoxicity (necrosis, apoptosis, autophagy, inflammation, fibrosis) and liver regeneration. Furthermore, they study the pathogenesis of hepatocellular carcinoma, alcoholic hepatitis, steatohepatitis and cholestatic liver disease, and the role of nuclear receptors in these disease processes. Likewise, in Therapeutics, faculty members use metabolomics approaches to study herbal medicines’ ability to cause drug interactions with prescribed drugs. In addition, studies are being performed to understand which drugs enter the liver by specific transporters, and how genetics determine why the response to drugs can vary between individual patients (pharmacogenomics).

Courses

PHCL 761. General Principles of Pharmacology. 1 Hour.
General principles of pharmacology, including pharmacokinetics, pharmacodynamics, adverse effects, pharmacotherapeutics plus miscellaneous agents (antacids, cathartics, biologicals). Open to advanced B.S. students and graduate students in Nursing, Allied Health, and other health related programs. Independent study program with use of computer assisted instruction, textbooks, syllabi, consultation with staff and exams as primary teaching instruments. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: An Enrollment Permission Form must be signed by the student and
the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 762. Pharmacology of the Autonomic Nervous System. 1 Hour.
General principles of the autonomic nervous system, cholinergics, muscarinics, nicotinics, neuromuscular blockers, beta adrenergics, alpha adrenergics, and miscellaneous ANS agents. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 763. Cardiovascular-Renal Pharmacology. 1 Hour.
Antihypertensives, antiarrhythmics, vasodilators, cardiac glycosides, serotonin, histamine, polypeptides, diuretics, antilipidemics. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 764. Pharmacology of the Central Nervous System. 1 Hour.
General principles of the central nervous system, stimulants, hallucinogens, depressants (hypnotics and sedatives), general and local anesthesia, antiparkinson agents, tranquilizers, analgesics and anticonvulsants. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 765. Chemotherapy. 1 Hour.
Principles of chemotherapy, sulfonamides, penicillins, aminoglycosides, anticancer and antifungal agents, antimalariais, broad spectrum antibiotics, antiparasitic agents, and antiseptics. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 766. Blood-Endocrine Pharmacology. 1 Hour.
General principles of endocrine function and use, thyroid drugs, insulin, sex hormones, oxytocics, adrenal steroids, antinfiammatory agents, blood drugs, anticoagulants and vitamins. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 767. Toxicology. 1 Hour.
General principles of toxicology, clinical toxicology, solvents, metals, gases and dusts, corrosives, plant and animal toxins, pesticides, radiation, miscellaneous. Students are encouraged to complete this course the semester they enroll. If this course is not completed, students will receive an Incomplete grade. Prerequisite: PHCL 761 and an Enrollment Permission Form must be signed by the student and the instructor. In addition, the enrollment card must be stamped by the instructor. LEC.

PHCL 809. Seminar in Pharmacology. 1 Hour.
Weekly meetings. LEC.

PHCL 846. Advanced Neuroscience. 5 Hours.
Team taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHSL 846 and NURO 846). Prerequisite: Permission of course director. LEC.

PHCL 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer's, Parkinson's, Huntington's, amyotrophic lateral sclerosis, and prion diseases), neurogenic diseases (e.g., lysosomal and peroxisomal disorders, Down's syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, NURO 848, and PHSL 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor. LEC.

PHCL 880. Essentials of Pharmacology. 4 Hours.
Introduction to Pharmacology for Graduate Students. Autonomic, Cardiovascular and Renal, Endocrine, Neuro, Antivirals Pharmacology. Autacoids; Workshop; Historical and Contemporary Methods used to Elucidate Mechanisms of Drug Action. Prerequisite: Successful completion of the Interdisciplinary Program in Biomedical Sciences or permission of the Instructor. LEC.

PHCL 890. Research in Pharmacology. 1-10 Hours.
For graduate students beginning their research training. RSH.

PHCL 898. Principles of Pharmacology. 1 Hour.
Chemical fundamentals in structure, actions and metabolism of drugs and toxicants. Included are molecular features of drugs and toxicants, steroisomerism, receptor theory, dose-response relationships, agonists and antagonists, absorption, pharmacokinetics and structure-activity relationships. LEC.

PHCL 899. Thesis in Pharmacology. 1-10 Hours.
For students in a master's program in pharmacology. THE.

PHCL 924. Clinical Pharmacology. 5 Hours.
Designed to give practical and theoretical experience with drug trials in humans. Includes animal experimentation when warranted. Clinical principles of drug therapy will be emphasized. IND.

PHCL 939. Carcinogenesis and Cancer Biology. 3 Hours.
Multidisciplinary approach. Cancer pathlogy. Mutagenesis, Genetics, Carcinogen metabolism. Signal Transduction, Apoptosis, Initiation and promotion. Tumor Immunology. Cell proliferation. Protooncogenes and suppressor genes. Hormonal carcinogenesis. Cancer epidemiology. Dietary and environmental causation and prevention. Cancer in various organ systems. (Same as PATH 939 and PTOX 939.) Prerequisite: Completion of one of the following: IGPBS modules 1-4 or equivalent or permission of instructor. LEC.

PHCL 990. Research for Dissertation in Pharmacology. 1-10 Hours.
Prerequisite: PHCL 890. RSH.

PHCL 999. Dissertation in Pharmacology. 1-10 Hours.
Prerequisite: Open to students of advanced standing enrolled in the doctoral program in Pharmacology. THE.

PTOX 830. Introduction to Clinical and Translational Cancer Research. 3 Hours.
Instruct students in developmental steps used in translating a basic science experiment with clinical applications into a proof of concept application and human trial. Multidisciplinary approach; lectures from faculty in Pharmacology, KU Cancer Ctr, KUMCRI. Curriculum: Levels of evidence-clinical impact, Pre-Clinical modeling, In-Vitro studies Animal models, Cancer Drug Development-pharmacokinetics toxicity, Pre-
Clinical Proof of Concept FDA, Creating a Pilot Study, Biostatistics 101, Phases of Clinical Trials, Data Collection, Support Staff, Regulatory and DSMBs, IRB and HIPPA, Funding Study: Grants Parma, Advertising study meeting accrual goals, Goals of Phase I study, Goals Objectives of Phase II Efficacy study, Phase 3 Multicenter Study: Value of Numbers Utilizing Cooperative Groups. Prerequisite: Completion of first 2 years of Med School or graduate school, or enrollment in MD/PhD program. Students no meeting one of these criteria will require permission from course instructor. LEC.

PTOX 887. Toxicologic Pathology. 4 Hours.
Introductory pathology course for graduate students preparing for a career in basic toxicology research. Topics to be presented and discussed include: cell injury, inflammation, repair and regeneration, immunopathology, neoplasia, tumor pathology, respiratory pathology, liver pathology, neuropathology, miscellaneous organ pathology, and lab animal clinical chemistry. LEC.

PTOX 889. Research in Toxicology. 1-10 Hours.
Introductory pathology course for planning on being research toxicologists. Topics to be presented and discussed: cell injury, inflammation, repair and regeneration, immunopath, neoplasia, tumor pathology, respiratory pathology, liver pathology, neuropathology, miscellaneous organ pathology, and lab animal clinical chemistry. LEC.

PTOX 989. Principles of Toxicology. 1 Hour.
Chemical fundamentals in structure, actions and metabolism of toxicants and drugs. Included are molecular features of toxicants and drugs, stereoisomerism, receptor theory, dose-response relationships, agonists and antagonists, absorption, pharmacokinetics, and structure-activity relationships. LEC.

PTOX 899. Thesis in Toxicology. 1-10 Hours.
For students in a master's program in toxicology. THE.

PTOX 917. Disposition of Xenobiotics. 2 Hours.
Principles of absorption, biotransformation, and excretion of xenobiotics. Prerequisite: PHCL 888 or departmental permission. LEC.

PTOX 918. Toxicology. 4 Hours.
Selected topics in environmental, forensic, and industrial toxicology. LEC.

PTOX 939. Carcinogenesis and Cancer Biology. 3 Hours.

PTOX 940. Techniques in Industrial Toxicology. 2 Hours.
A unique course where students are exposed to and have practical experience in techniques used for risk-assessment of chemicals. The course is taught with extensive input by industrial toxicologists who use these techniques on a daily basis. This course is offered at a local industrial setting. Prerequisite: PHCL 888; PTOX 917, PTOX 918, and PTOX 938, or departmental permission. LEC.

PTOX 990. Research for Dissertation in Toxicology. 1-10 Hours.
Prerequisite: PTOX 889. RSH.

PTOX 999. Dissertation in Toxicology. 1-10 Hours.
Prerequisite: Open to students of advanced standing enrolled in the doctoral program in toxicology. THE.

Master of Science in Pharmacology

Pharmacology and Toxicology both require an understanding of basic properties and actions of chemicals and the biological systems they affect. Pharmacology though, focuses more on the therapeutic actions of chemicals (particularly drugs) in the health sciences, the use of drugs as therapeutic agents in medicine or as tools in scientific research, and the development and regulation of pharmaceuticals. Pharmacologists perform many different duties including research and teaching in academic, nonprofit and industrial settings, and in consulting and public service.

The Master of Science (M.S.) in Pharmacology degree program provides an academic experience that emphasizes research skills and prepares students for a range of careers in varied employment settings or more advanced academic study. The M.S. curriculum provides a foundation of core concepts and skills through required coursework, but allows considerable flexibility for individualization through advanced electives and mentored research experiences.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2126) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
  Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
  A background check (p. 2395) is required during the admission process; it may affect the student’s eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

- Three letters of recommendation.

- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics

- Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above
requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

Degree Requirements:

- Degree requirements are normally completed within 3 years of admission to the degree program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of either a thesis defense or general examination (p. 2398) the semester the student will graduate.
- If thesis option chosen, then enrollment in a minimum of one (1) credit hour of PHCL 899 Thesis in Pharmacology and successful thesis submission and publication (p. 2398) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4

- Successful completion of the following Pharmacology courses:
  - PHCL 890 Research in Pharmacology 1-10
  - PHCL 898 Principles of Pharmacology 1
  - PHCL 899 Thesis in Pharmacology (if thesis option chosen) 1-10

- Successful completion of elective coursework as determined in consultation with the student’s advisor.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

### Master of Science in Toxicology

Pharmacology and Toxicology both require an understanding of basic properties and actions of chemicals and the biological systems they affect. Toxicology is, more specifically, the study of adverse effects of chemicals on living systems, the extent of damage they produce, the relationship between dose and effect, routes of exposure, and potential treatments. Toxicologists not only identify toxins, but also contribute to risk assessment, safety evaluation, and establishment of legal regulations. Toxicologists perform many different duties including research in academic, nonprofit and industrial settings, and in consulting and public service.

The Master of Science (M.S.) in Toxicology degree program provides an academic experience that emphasizes research skills and prepares students for a range of careers in varied employment settings or more
advanced academic study. The M.S. curriculum provides a foundation of core concepts and skills through required coursework, but allows considerable flexibility for individualization through advanced electives and mentored research experiences.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). - Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of either a thesis defense or general examination (p. 2398) the semester the student will graduate.
- If thesis option chosen, then enrollment in a minimum of one (1) credit hour of PTOX 899 Thesis in Toxicology and successful thesis submission and publication (p. 2398) (according to Office of Graduate Studies policy.)
- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2126) courses (or their equivalent):
  - GSMC 850 Proteins and Metabolism 2
  - GSMC 851 Molecular Genetics 2
  - GSMC 852 Introduction to Biomedical Research I 2
  - GSMC 853 Cellular Structure 2
  - GSMC 854 Cell Communication 2
  - GSMC 855 Introduction to Biomedical Research II 2
  - GSMC 856 Introduction to Research Ethics 1
  - GSMC 857 Biographics 1
  - GSMC 858 Introduction to Faculty Research 1
  - GSMC 859 Research Rotations 1-4
- Successful completion of the following Toxicology courses:
  - PTOX 889 Research in Toxicology 1-10
  - PTOX 898 Principles of Toxicology 1
  - PTOX 899 Thesis in Toxicology (if thesis option chosen) 1-10
- Successful completion of elective coursework as determined in consultation with the student's advisor.

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

Admission Requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree is conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.

- Successful completion of the Residence Requirement (p. 2398) prior to the semester the Oral Comprehensive Examination is scheduled.

- Responsible Scholarship (p. 2398) requirement prior to the semester the Oral Comprehensive Examination is scheduled.

- Successful completion of the University’s Research Skills and Ethics (or equivalent) meets the Responsible Scholarship requirement.

- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).

- A background check (p. 2395) is required during the admission process; it may affect the student’s eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

- Three letters of recommendation.

- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics

- Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree requirements:

- Degree requirements are normally completed within 6 years of admission to the program although a maximum of 8 years is allowed.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- Successful completion of the University’s Research Skills and Responsible Scholarship (p. 2398) requirement prior to the semester the Oral Comprehensive Examination is scheduled.

- Successful completion of GSMC 857 Biographics, GSMC 852 and GSMC 855 Introduction to Biomedical Research I and II (or equivalent) meets the Research Skills requirement.

- Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.

- Successful completion of the Residence Requirement (p. 2398) prior to the semester the Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.
• Successful completion of the Oral Comprehensive Examination (p. 2398). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

• Successful completion of the Post-Comprehensive Enrollment (p. 2398) requirement.

• Enrollment in a minimum of one (1) credit hour of PHCL 999 Dissertation in Pharmacology the semester the student will defend dissertation and graduate.

• Successful completion of the Final Oral Examination (dissertation defense.)

• Successful completion of the Final Oral Examination (dissertation defense.)

• Successful completion of the Final Oral Examination (dissertation defense.)

• Successful Dissertation Submission and Publication (according to Office of Graduate Studies policy.)

• Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS) courses (or their equivalent):

Doctor of Philosophy in Toxicology

Pharmacology and Toxicology both require an understanding of basic properties and actions of chemicals and the biological systems they affect. Toxicology is, more specifically, the study of adverse effects of chemicals on living systems, the extent of damage they produce, the relationship between dose and effect, routes of exposure, and potential treatments. Toxicologists not only identify toxins, but also contribute to risk assessment, safety evaluation, and establishment of legal regulations. Toxicologists perform many different duties including research in academic, nonprofit and industrial settings, and in consulting and public service.

The Doctor of Philosophy (Ph.D.) in Toxicology degree program prepares students for careers as independent scientists in academia, industry, or government through a broad-based curriculum and development of strong research design and communication skills. The Ph.D. didactic curriculum consists of a core of required discipline-based coursework, but is significantly individualized through advanced electives, seminars, extensive mentored research experiences, and consultation with the student’s selected advisory committee.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS) (p. 2126) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission Requirements:

• Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
  
  Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

• A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.

• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).

• A background check (p. 2395) is required during the admission process; it may affect the student’s eligibility to enter the program.

• An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.

• Three letters of recommendation.

• Prerequisite coursework:
  
  • One year of general chemistry
  • One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  • One year of biological sciences
  • One semester of calculus
  • One semester of physics

• Research experience (beyond labs associated with lecture courses) is strongly suggested.

Applicants will be assessed based on a combination of GPA, research experience, and GRE scores. Students not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs.

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Department of Preventive Medicine and Public Health

The Departments of Preventive Medicine and Public Health in Kansas City and Wichita are passionate about healthy communities and are committed to improving the health of people through teaching, research, and service. Our faculty, which includes physicians, epidemiologists, social scientists, and research scientists, conduct research and work in the community to harness public health and scientific discoveries for the benefit of all of our citizens.

TEACHING

Faculty and staff in the Departments of Preventive Medicine and Public Health are dedicated to offering degree programs to future public health practitioners as well as clinical researchers.

- Masters in Public Health program (http://mph.kumc.edu)
RESEARCH

- Health Disparity/Equity Research
- Obesity, Physical Activity and Nutrition
- Tobacco Control
- Cancer Screening and Prevention
- Health Services Research
- Epidemiology and Disease Surveillance
- Community Development and Leadership

SERVICE

Our faculty are committed to serving the public health community and serve as collaborative partners with local, state and national public health agencies. Learn more > (http://kansasmedical.edu/school-of-medicine/preventive-medicine-and-public-health/faculty-and-staff/faculty.html)

Courses

PRVM 800. Principles of Epidemiology. 3 Hours.
Basic concepts of epidemiology and methods for identification of factors influencing health and disease in human populations. Considerations are centered on physical, biological, psychosocial and cultural factors in relation to infectious and non-infectious diseases; interactions between agent, host, and environmental factors as determinants of health and disease; application of the epidemiologic approach to health services; retrospective and prospective analysis of morbidity and mortality data. LEC.

PRVM 803. Introduction to Clinical Research. 1 Hour.
Course will provide a comprehensive overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical research among the various institutional entities involved with clinical research at the University of Kansas Medical Center such as the Research Institute (RI), General Clinical Research Center (GCRC) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on how to apply for funding (grantsmanship), critical appraisal of research studies, and how to present research data. Prerequisite: Consent of Instructor. LEC.

PRVM 805. Public Health Seminar. 1 Hour.
This course will focus on public health practice. Guest lectures from national, state, and local public health agencies will present problems and how these problems are being addressed. Topics are expected to vary somewhat from year to year, depending on the priorities of the agencies. However, topics might include such issues as smoking prevention, automobile accidents, foodborne outbreaks, cryptosporidium outbreaks, lead poisoning in children, asthma in children, sexually transmitted diseases, diabetes, cancer control, nutrition, cardiovascular diseases, bioterrorism, legal issues and administration of public health. This course is the same as Public Health Grand Rounds. FLD.

PRVM 806. Special Topics.. 1-4 Hours.
In-depth, individualized investigation of special problems in community health. Designed especially for students with limited background in community health. Prerequisite: Permission of instructor. RSH.

PRVM 807. Introduction to Field Epidemiology. 3 Hours.
This course presents an overview of the methods used in epidemiologic field investigations. It provides students with a comprehensive review of the basic components of an outbreak investigation, an introduction to public health surveillance, and an overview of specific types of investigations in which a field epidemiologist might become involved, including traceback studies, environmental health assessments, noninfectious health event investigations, contact tracing, and forensic epidemiology. In addition, resources that often come into play in outbreak investigations are presented, such as public health laboratories, the incident command system, and geographic information systems. Prerequisite: PRVM 800. RSH.

PRVM 808. Clinical and Translational Research Seminar. 1 Hour.
This seminar will present locally and nationally recognized clinicians and researchers to discuss various areas of clinical research. The course is designed to expose students to a variety of ongoing research and features speakers from a variety of disciplines including physicians, epidemiologists, biostatisticians behavioral scientists, nursing faculty, nursing students, medical students, allied health faculty and others. Prerequisite: Permission of instructor. LEC.

PRVM 809. Introduction to Public Health. 3 Hours.
This course provides an introduction to the basic principles of public health practice, including an overview of the history, philosophy, and scope of public health in the United States and globally. It will provide an overview of the primary disciplines within public health: biostatistics, demography, environmental health sciences, epidemiology, global health, health policy and management, social and behavioral health, and the analytical tools employed to measure public health indicators. Prerequisite: None. LEC.

PRVM 810. Cardiovascular Disease Epidemiology. 3 Hours.
This will be a study of Cardiovascular Disease risk factors, expression, treatment, and prevention from a population-based standpoint. Participants will gain knowledge of cardiovascular disease prevalence, incidence, risk factors, outcomes, and prevention strategies. The goal of this course is to understand major aspects of cardiovascular epidemiology and current strategies for primary and secondary prevention of major cardiovascular diseases. Attention will be given to physiologic mechanisms leading to atherosclerosis; traditional and novel coronary heart disease risk factors; prevention methodologies for cardiovascular disease, and the role of lifestyle, dietary, and genetic factors in the development of cardiac and vascular diseases. The course will be evidence- and outcomes-based, with reference to landmark studies and major publications. Relevant historical breakthroughs and current controversies in CVD will be discussed using recent publications from the lay press and peer-reviewed journals. Emphasis will be placed on coronary artery disease and its clinical manifestations. Participants will learn to critically assess public health measures undertaken to recognize, manage, and treat atherosclerotic disease processes. LEC.

PRVM 811. Introduction to Pharmacoepidemiology. 3 Hours.
Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects on health. Evaluating a drug's effects commences when a chemical entity becomes a drug candidate, intensifies through clinical trials, and continues after products reach the market. These studies are critical for supporting the proper use of medications in terms of efficacy, effectiveness, and cost-effectiveness. This course provides a broad introduction to the principles of pharmacoepidemiology with a focus on applications in the medical literature. Prerequisite: PRVM 800. LEC.

PRVM 812. Introduction To One Health. 2 Hours.
“One Health” encompasses the complex interrelationships among humans and animals, humans and the environment, and animals and the environment. Incorporates original videos of leading subject matter experts and researchers, case studies, and scientific readings. It addresses zoonotic diseases (those that may be transferred between people and animals) and the need to coordinate efforts among veterinarians, public health professionals, and other stakeholders to improve health outcomes for people, animals, and the environment. Prerequisite: PRVM 800. LEC.
humans and animals) and environmental issues that impact human, animal, and ecosystem health. Topics include disease surveillance, the human-animal bond, the built environment, disaster response, sanitation, rural/suburban/urban interface, and food safety and security. Prerequisites: Two courses in the biological sciences. Course Format: This is an interactive online course led by the instructor. LEC.

PRVM 813. Chronic Disease Epidemiology. 3 Hours.
This course is required for students on the Epidemiology track but is open to other MPH students as well. It extends the methods and concepts of basic epidemiology to the prevention and control of major chronic diseases. Topics will include surveillance, risk factors, high risk populations, pathophysiology, and consequences. Students will also gain experience developing a proposal to conduct a screening, etiologic, or prevention study of selected chronic diseases. Prerequisite: PRVM 800 Principles of Epidemiology. LEC.

PRVM 814. Health Literacy. 3 Hours.
This is a graduate-level course designed to teach students about literacy and its implications on public health practice and research in the United States, with a focus on health literacy. Students will be introduced to the different types of literacy, including health, prose, quantitative, document, and computer, and how to evaluate them. In addition, students will learn how to lower literacy levels of health education materials for practical application. Cultural competency in literacy will also be discussed, with a focus on culturally competent health communication and education. LEC.

PRVM 815. Infectious Disease Epidemiology. 3 Hours.
This course emphasizes the underlying concepts of the epidemiologic approach as it relates to infectious diseases. Students will be introduced to principles and methods of disease surveillance and outbreak investigations using case studies. Essential concepts relating to vaccine efficacy and effectiveness in preventing infectious diseases, barriers to achieving adequate vaccine coverage, and how ongoing vaccine controversies relate to the scientific literature base will be covered. The evolving public health concerns of bioterrorism and antibiotic resistance will also be addressed. Characteristics of the agent, host, and environment that influence disease transmission will be examined in the context of control strategy identification. Instruction is primarily by online learning tools, with limited short lectures. Prerequisite: PRVM 800 Principles of Epidemiology. LEC.

PRVM 816. International Health. 3 Hours.
This course is divided into seven sections: 1) Global health introduction, 2) Health inequalities and the socio-economic context of disease, 3) Maternal and child health, the health of special populations, 4) The spread of infectious diseases, and HIV/AIDS, malaria, TB, 5) Globalizations and emerging infectious diseases, and nutrition, 6) Environmental health, and the health of effects of environmental change, 7) Global health payers and players, and global health priorities. Prerequisite: PRVM 800 Principles of Epidemiology or permission of the department/instructor. LEC.

PRVM 817. Gender, Race, Class, and Health. 3 Hours.
This graduate-level course examines the intersection of gender, race, and class and its effects on individual and public health. The theoretical orientation of this course is informed by Black feminist scholarship on intersectionality: that is, the intersecting oppressions of gender, sexuality, race, class, and nation. This theory is extended to contemporary public health and social problems through an examination of applied public health studies and interventions. Students' work will be grounded in theory, but they will learn to apply theory in fieldwork-based exercises and critical analysis of public health problems. LEC.

PRVM 818. Social and Behavioral Aspects of Public Health. 3 Hours.
The course provides an overview of social and behavioral aspects of public health including the relevance of psychological and social factors for health, the principles of health behavior change, the application of these principles in various health domains, and an introduction to health behavior and health promotion interventions. The course begins with the rationale for studying social and behavioral aspects of health and examines select social and behavioral factors (e.g., gender, socioeconomic status, race/ethnicity) as they relate to physical well-being. The course also focuses on well-established theories of health behavior and examines the role of psychological and social factors in specific health topics (e.g., obesity, cancer, cardiovascular disease, smoking). Prerequisite: None. LEC.

PRVM 819. An Introduction to Geographic Information Systems (GIS) for Health. 2 Hours.
This course will provide students with an overview of Geographical Information Systems (GIS) applied in the context of health (public health, allied health and health care). Students will be introduced to GIS and health applications used locally, nationally and internationally. They will learn about pertinent data, how to visualize the data, how to design maps that represent the data, how to use spatial data, how to geocode data, and how to prepare and analyze data. Real-life examples will be used throughout the course and students will gain hands-on experience using a GIS application. Students will also be kept abreast of any new GIS resources and trends or developments in GIS as relates to health. Prerequisite: Basic computer skills. LEC.

PRVM 820. Introduction to Oral Public Health. 3 Hours.
This course is a comprehensive introduction to oral public health in general as it relates to public health in general, within the context of the U.S. healthcare system. Course content includes: Basic organizational arrangements of health services in the U.S., concepts of public health and dental public health, public health problems and oral public health problems in the context of social and community factors and social determinants of health behavior, oral public health developments from a historical perspective, oral health/dental care financing and decision making; assessments of oral health status and need for care; population-based programs for oral disease prevention/health promotion, oral/dental public health research methodology and the practice of oral public health. LEC.

PRVM 821. Research Methods in Public Health. 3 Hours.
This is an introductory behavioral research methods, course. Students will learn about research designs, hypothesis formation, measurement, sampling, ethical issues in research, and pragmatic and research issues with evaluating behavioral interventions. Students will also learn how to critically evaluate and develop behavioral randomized clinical trials. Prerequisites: None. Social and Behavioral Aspects of Health and an Introductory statistics course are recommended but not required. LEC.

PRVM 823. Field Experience in Community Health Education. 1-3 Hours.
Internships with community agencies, community preceptors in areas of concentration. Prerequisite: Permission of instructor. FLD.

PRVM 825. Child and Family Health. 3 Hours.
Family, maternal, and child health problems will be addressed. Topics will include prenatal care (maternal health and habits); fetal growth factors, well baby care (immunizations, nutrition, growth, development, behavior); developmental disabilities; adoption; adolescence; child abuse; family as a support system; long-term medical and social outcomes of chronic illness/disability in children. Subjects are covered through lecture, discussion and field visits under the supervision of a pediatrician. Prerequisite: Permission of instructor. LEC.

PRVM 826. Epidemiology for Advanced Nursing Practice. 3 Hours.
Epidemiology for Advanced Nursing Practice is a 3 credit hour graduate level course designed to synthesize basic epidemiology with clinical
nursing concepts. The course is a core course for the Doctor of Nursing Practice degree in which basic concepts of epidemiology and methods for identification of factors influencing health and disease in human populations are discussed. Considerations are centered on: 1) Physical, biological psychosocial and cultural factors in relation to infectious and non-infectious diseases; 2) Interactions between agent, host, and environmental factors as determinants of health and disease; 3) Application of the epidemiologic approach to clinical nursing; and 4) Measures of disease occurrence and risk. Prerequisites: None. LEC.

PRVM 827. Public Health Administration. 3 Hours.
This course provides students with an overview of the core functions of public health: assessment, policy development, and assurance together with an introduction to the leadership and management skills necessary to provide leadership in public health. It uses both theoretical and practical material to develop basic administrative competencies necessary for practice in community and public health. Assignments are designed to provide practice in applying course materials. LEC.

PRVM 828. Public Health Program Development and Management. 3 Hours.
Framed within the context of the core public health functions, assessment, policy development, and assurance, this course provides students with an overview of the planning process within a community setting. This course will use both theoretical and practical material to develop basic competencies in planning, implementing, and evaluating health programs; however, the predominant focus will involve the planning process and operations of a public health program. Assignments are designed to provide practice in applying course materials. Prerequisites: PRVM 818 Social and Behavioral Aspects of Public Health, PRVM 800 Principles of Epidemiology, PRVM 827 Public Health Administration. LEC.

PRVM 830. Environmental Health. 3 Hours.
This course will identify specific health effects of environmental contaminants and discuss principles of prevention. Specific problem areas will include air and water pollution, solid waste disposal, food preservation, radiation, industrial hygiene, occupational skin and lung diseases, chemical carcinogens accidents, an agricultural health and safety. A number of guest lecturers and field trips will be utilized. LEC.

PRVM 832. Environmental and Occupational Epidemiology. 3 Hours.
Epidemiological concepts applied to problems in environmental and occupational health will be discussed. This course will focus on studies of workplace and environmental exposures, exposure assessment and monitoring, hazardous exposures and adverse health effects, and approaches to prevention. Specific health effects of exposure to toxic chemical and physical agents will be discussed, as well as reading, evaluating, and interpreting epidemiologic studies. Prerequisites: PRVM 800 Principles of Epidemiology and PRVM 830 Environmental Health or permission of instructor. LEC.

PRVM 834. Community Health Education and Promotion. 3 Hours.
Designed to teach students the core concepts in community health education and promotion, students will be introduced to the scientific and practical knowledge necessary to develop successful research and implement programs. Students will learn models of analysis, management of health promotion in the workplace, health education diagnosis, planning, and evaluation. A variety of examples will be used, including the Centers for Disease Control model, and other commonly recognized approaches to community health promotion. Prerequisites: PRVM 818 Social and Behavioral Aspects of Public Health or permission of instructor. LEC.

PRVM 835. Evaluation Methods in Public Health. 3 Hours.
Principles and procedures to evaluate health promotion and disease prevention programs. Includes data collection methods, instrument scale development, measurement, and evaluation designs. Case studies of disease prevention literature on evaluation will be analyzed. Prerequisite: Permission of instructor. LEC.

PRVM 836. Epidemiology in Aging. 3 Hours.
An overview of the aging process, review of current knowledge of epidemiology of selected diseases, such as dementia and osteoporosis, and falls that primarily affect aging individuals. Emphasis on epidemiologic designs, methods, and issues (e.g., low response rate and measurements) that are pertinent to research on aging individuals. Prerequisite: PRVM 800, BMTR 811/PRVM 804, or permission of instructor. LEC.

PRVM 838. Reproductive Epidemiology. 3 Hours.
Epidemiologic concepts applied to problems in reproductive health of men and women. Critical analysis of epidemiologic studies on sociocultural, individual and pregnancy-specific risk factors to reproduction. Field trips will be used to explore methods to reduce adverse reproductive health outcomes in populations (worksites, managed care organizations, local health departments). Literature synthesis skills are used in a project focused on preventing adverse reproductive outcomes in a defined population. LEC.

PRVM 841. Advanced Epidemiology I: Methods in Cross-Sectional and Case-Control Studies. 3 Hours.
This course will concentrate on concepts and application of various statistical techniques in the analysis of epidemiological data. Students will be oriented toward application of SAS in data analysis and interpretation of data from cross-sectional and case-control studies. Prerequisite: Principles of Epidemiology (PRVM 800), Fundamentals of Biostatistics I (BIOS 714), and Management of Public Health Data (PRVM 875) or Statistical Computing SAS Base (BIOS 820.) LEC.

PRVM 842. Advanced Epidemiology II: Methods in Longitudinal Studies. 3 Hours.
This course will concentrate on concepts and application of various statistical techniques in the analysis of epidemiological data. Students will be oriented toward application of SAS in data analysis and interpretation of data from longitudinal studies and controlled clinical trials. Prerequisite: Principles of Epidemiology (PRVM 800), Fundamentals of Biostatistics I (BIOS 714), Advanced Epidemiology (PRVM 841), and Management of Public Health Data (PRVM 875) or Statistical Computing SAS Base (BIOS 820.) LEC.

PRVM 843. Obesity and Public Health. 3 Hours.
Obesity is becoming epidemic and pandemic throughout the world. What are the personal public health consequences of this phenomenon? Are we as focused as we should be on the effects of this growing problem? This course reviews the basic definition of obesity and defines its known personal and public health effects: including issues of bias and stigmatization. The course further examines the epidemiology, and future predicated consequences of obesity and then examines personal models of treatment followed by examination of public health efforts to date. Finally, proposed interventions and areas for research are discussed and evaluated. Students apply principles of behavioral change and communication to develop proposed public health approaches to ameliorating the obesity problem in children and adults. Prerequisite: PRVM 800: Principles of Epidemiology and PRVM 818: Social and Behavioral Aspects of Public Health, or permission of instructor. LEC.

PRVM 844. Organization, Financing and Delivery of Health Care,. 3 Hours.
This course will demonstrate an understanding of the difference between health care and medical care and the place of medical care in the economic system; the role of social values and economic principles in societal decision making and the utilization of health care services;
the role of NEED in the utilization of health care services; the public and private financing of the health care system; the organization of resources and types of managed care systems; the unique payment and the reimbursement mechanisms in the health care system; and the role of government in the health care system. LEC.

PRVM 845. Cultural Competency in Public Health. 3 Hours.
This course provides students with a broad range of contemporary research and writings in the area of cultural competence in public health as it relates to health disparities and health interventions. Specific attention will be paid to examining self-awareness, developing cross-cultural competence, and identifying and utilizing culturally appropriate strategies in health promotion and prevention. Students emerge from this course with an understanding of how culture operates as a critical variable in health behaviors, planning health promotion and disease prevention strategies, and in addressing health disparities. LEC.

PRVM 846. Health Economics. 3 Hours.
This course is designed to explore the application of economic theories, principles and concepts to the U.S. medical care system. Students will demonstrate an understanding of: the difference between health care and medical care and the place of medical care in the economic system; the role of social values in economic principles and societal decision making; the determinants of supply and demand of medical care services with particular attention to the relationship between supplier and demand and need and demand; complements and substitutes as they apply to medical care services; the unique nature of the medical care product; the interrelatedness of markets; the principles of and demand for health insurance and its role in the demand for medical care services; the role of government in the medical care system. LEC.

PRVM 847. Seminar in American Indian Health Disparities. 1 Hour.
This is a graduate-level course designed to teach students about current research being done around the country to address health disparities faced by American Indian communities. Students will attend a weekly one-hour seminar on-line and will be given readings to accompany each lecture. Lectures will be done by faculty at various universities, as well as members of community organizations and/or tribes who are conducting research. Students may take the course multiple times; each seminar will be unique in terms of topics and accompanying readings, as well as lecturers. Some seminars may focus on a particular health topic for the full semester, e.g. - cancer or diabetes. This course is designed to be a seminar series that changes each time it is taught. Prerequisite: Permission of instructor. SEM.

PRVM 849. Qualitative Methods in Public Health. 3 Hours.
Qualitative research has diverged from its anthropology roots to become commonplace in marketing, business, clinical and public health settings. This course is focused on basic qualitative methodologies with applications in public health, health services research, health behavior, and quality improvement. This course reviews and gives real practice with strategic planning, choice of methods, logistics, and integration with quantitative methods. Students will receive hands-on experience with logistics and actual data collection using several methods. Students will present and discuss recent journal articles reporting qualitative studies in weekly "journal club" fashion. Students will present the results of their qualitative research in an oral class presentation and poster, and in an abstract submitted to a local, regional or national conference. Prerequisite: PRVM 800 or permission of instructor. LEC.

PRVM 851. Public Health Policy and Law. 3 Hours.
This course is designed to prepare public health leaders to live and work in a world of laws, and to play an active and effective role in policy making and analysis. Students will understand the source of national, state, and local statutes and regulations and understand the role of common law. Students will understand the policy process at the national, state, and local level, and develop skills analyzing legislation and influencing policy decisions. Students will understand the rule making process at the national and state level. LEC.

PRVM 853. Responsible Conduct of Research. 1 Hour.
The purpose of this course is to engage research trainees in reading about, considering, and discussing the responsible conduct of science. The course is designed as an option for meeting current federal regulations, which require that all NIH training grants provide training in the responsible conduct of research. This course provides a concise overview of key subject areas in the responsible conduct of research. It is designed to make students aware of relevant guidelines, policies and codes relating to ethical research, as well as to provide the skills for identifying and resolving ethical conflicts that may arise in research. LEC.

PRVM 855. Seminar in Women’s Health. 3 Hours.
Seminar in Women's Health is a 3 credit elective, graduate level course focusing on gender issues that are relevant in treatment approaches to various health issues, the differing health status of minority women, the involvement of women's health to include the entire life span and areas other than reproduction, the changing implications of health care and policy and men in women's health. No prerequisite. LEC.

PRVM 856. Community-Based Participatory Research. 3 Hours.
This is a graduate-level course designed to teach students the basic methods of conducting and evaluating community-based participatory research (CBPR). Students will be introduced to the five phases of CBPR, including partnership formation and maintenance, community assessment and diagnosis, defining the issue, documentation and evaluation of partnerships, and feedback, interpretation, and evaluation of partnerships. In addition, students will learn how to find funding mechanisms and journals that are appropriate for CBPR, as well as some of the key factors in writing about CBPR. Students will be introduced to a variety of examples of well-done CBPR and will learn what makes it different from other types of research done in community settings. PREREQUISITES: Social and Behavioral Aspects of Public Health or permission of instructor. LEC.

PRVM 857. Motivational Interviewing in Public Health Settings. 1 Hour.
The course is designed to introduce participants to Motivational Interviewing, its concepts, and to the subsequent skills required for helping people to change. This course will be cross-listed with DN 857. LEC.

PRVM 858. Public Health in Film. 2 Hours.
The Public Health in Film course will allow students the opportunity to address multiple public health issues throughout time via educational films and public health documentaries and discussion. Specific issues will include, but will not be limited to: polio, leprosy, cholera, tuberculosis, the bubonic plague, influenza, bioterrorism and natural disasters. LEC.

PRVM 859. Tobacco and Public Health. 3 Hours.
This course will provide an overview of tobacco as a public health problem and tobacco politics. Students will learn about the pharmacology of nicotine, the mechanisms leading to tobacco addiction and biologic factors that affect pharmacology and tobacco use such as the menstrual cycle and comorbid illnesses such as depression and others. Public health approaches to preventing tobacco use initiation will be studied, including which initiatives are most effective. State-of-the-art methods to assist smokers to quit will be reviewed, including pharmacologic interventions, counseling by health professionals and education/motivation support. Barriers to obtaining services will be explored, such as educational needs among various types of health professionals, and access to care in rural areas or among clients with certain types of health insurance. LEC.
PRVM 860. Community Nutrition. 3 Hours.
Comparative analysis of the demographic, geographic, and economic structure of various types of communities in Western and non-Western societies. Relationships between these compositional elements of a given community, its food and nutrition resources and services, and the nutritional status of its members. Development of alternative strategies for resource expansion and/or for delivering appropriate nutritional services to target communities. Prerequisite: Permission of instructor. LEC.

PRVM 861. Leadership in Public Health. 3 Hours.
This course is designed to enhance and develop leadership knowledge, skills, and competencies vital to develop change strategies, which will impact public health workforce in Kansas. This will also be achieved by specifically addressing the core functions (assessment, policy and assurance) of public health workers as well as the national Healthy People 2010 objectives. LEC.

PRVM 862. Terrorism, Emergency Preparedness and Response. 3 Hours.
Through lectures, tabletop exercises, and invited speakers, the course content will include the following topics: terminology and core competencies, public health infrastructure, collaboration and communication, roles and responsibilities, psychological effects of terrorism, agricultural and zoonotic bioterrorism, law enforcements and public health, epidemiology of BT diseases (including agent specific lectures), burn injuries, risk communication, Strategic National Stockpile (SNS), National Incident Management System (NIMS), public health law as related to bioterrorism, and public health laboratory response related to bioterrorism. LEC.

PRVM 863. Health Disparities in Public Health. 3 Hours.
This course is designed to enhance students’ understanding of the biopsychosocial factors that contribute to disparities in health and health care. This course will also review strategies developed to reduce health disparities. Prerequisite: PRVM 818 Social and Behavioral Aspects of Public Health is recommended. LEC.

PRVM 864. Global Public Health Impact of HIV/AIDS. 3 Hours.
Historically reviews the HIV pandemic to evaluate lessons learned in prevention and treatment of the disease and successes and failures of public policies to reduce the impact of HIV in various countries. Critically analyzes HIV prevention interventions (voluntary counseling and testing, prevention of mother-to-child transmission, promotion of safer sex practices, clean needle exchange, methadone or buprenorphine programs, treatment with antiretroviral therapy, pre- and post-exposure prophylaxis, vaccine and microbicide development) and challenges with their implementation. LEC.

PRVM 865. Ethical Issues in Public Health. 3 Hours.
Lectures and small group discussions explore public health ethics, social justice and autonomy as they relate to public health practice and health policy. Current issues in health policy are discussed including: the right to health and health care, bioterrorism, and health inequalities, poverty and power. Weekly small group discussions include cases on MCHP, obesity and “fat taxes,” resource allocation, and disparities in infant mortality. Student evaluation is based on class participation, a small group project, and a final paper based upon a case study addressing ethical issues relevant to the student's area of public health specialization. LEC.

PRVM 870. Environmental Health Law and Policy. 3 Hours.
This is a survey course that will provide a broad, practical understanding of some important local, state, and federal environmental statutes, regulations, and case law. This course will cover the fundamentals of environmental law, examining the history, development, and current status of environmental law and federalism in the United States.
PRVM 875. Management of Public Health Data. 3 Hours.
A 3 credit hour graduate level course concerning basic computing skills necessary for any advanced epidemiologic or administrative quantitative methods. This course covers basics of variable and dataset creation, building, maintenance and basic descriptive (not interpretive) analysis. The course is designed to be of use to students entering a variety of research, administrative and public health settings in public health, clinical and other fields. Software covered will include SAS, SPSS, Epi Info, KPHS, Microsoft-EXCEL and ACCESS. The course can stand alone, or prepare students for Biostatistics and Epidemiology courses. Public data presentations will be stressed to prepare students to communicate about data with the lay public. LEC.

PRVM 876. Health Services Research Using Public Payer Data. 3 Hours.
Several contemporary health reforms have rendered analyses of public payer data more feasible and valuable for population health, health services research, and quality improvement. The addition of an outpatient drug benefit to standard inpatient and outpatient service coverage for Medicare, for example, has stimulated a growth industry in comparative effectiveness research and expanded policy research across the health care system. Pending expansion of States’ Medicaid programs under the Affordable Care Act will undoubtedly create the largest public health care insurance program in the United States. The Centers for Medicare Medicaid Services (CMS) have streamlined researchers’ access to national Medicare and Medicaid populations for health services and quality improvement projects through contracts with the Research Data Center at the University of Minnesota and the Chronic Condition Warehouse. In addition, Kansas Medicaid has invested in a Data Analytic Interface that offers ready access to our state’s employees, Medicaid beneficiaries, and private health insurance claims data for entering researchers including tremendous opportunities for state of the art, contemporary policy analyses. This is indeed an exciting and opportune time for students embarking on careers in health services, policy, and population health research. This course is designed to prepare students for real world analyses using standard public payer data claims. LEC.

PRVM 877. Health Communication. 3 Hours.
This course is focused on community health education and promotion, especially designing and evaluating health communication programs for populations with shared risks, exposures or behaviors. Ways in which the general public receives and assigns meaning to health messages will be reviewed. The styles and weaknesses of specific health communication initiatives will be analyzed in terms of theoretical constructs, costs and outcomes. Students apply public health principles by designing a substantive health communication piece or educational material. Prerequisite: PRVM 800: Principles of Epidemiology and PRVM 818: Social and Behavioral Aspects of Public Health. Permission of instructor may be granted in lieu of these prerequisites. LEC.

PRVM 878. Cost-effectiveness and Decision Analysis. 3 Hours.
This course examines techniques that are used in making clinical and management decisions when outcomes are uncertain. The course begins with a review of probabilistic decision making, then explores methods of analyzing choices with uncertain outcomes, stressing the use of decision trees and sensitivity analysis. The course examines cost minimization analysis, cost effectiveness analysis, and cost benefit analysis. (Same as HPM 872) LEC.

PRVM 879. Financial and Human Resource Management. 3 Hours.
This graduate-level course covers principles and skills for financial and human resource management within public health organizations. It focuses on non-profit and public settings. Financial management topics include the principles and purposes of accounting, concepts related to finance, and financial strategic planning. Human resource management topics include job design and hiring, performance management, retention, compensation/benefits, legal issues, and termination. The focus of the course is twofold: 1) understanding the concepts behind financing and in gaining skills in interpreting and using financial information; 2) gaining skills in human resources management and resource development. The course is designed for people who are interested in public health administration, but should be useful to anyone with an interest in public health leadership in any setting. Prerequisite: Departmental permission.

PRVM 880. Seminar in American Indian Health. 3 Hours.
This is a graduate-level course designed to teach students about current issues in American Indian health, as well as provide a basic historic context for understanding these issues. Students will read current literature from the academic journals and will be exposed to research being done today in American Indian communities, some of which has not yet been published. In addition, students will gain an understanding of what health disparities exist in American Indian communities and some of the reasons why they exist, including access issues and other barriers to care, from both Western and Native points of view. Students will be exposed to some of the difficulties in conducting health research in Native communities and some of the more successful techniques to overcome barriers. Prerequisites: None. LEC.

PRVM 881. Performance Improvement in Public Health. 3 Hours.
This course provides students with an overview of performance improvement and management integrated within the core public health functions: assessment, policy development and assurance. It uses both theoretical and practical material to develop basic competencies necessary for performance management in community and public health settings. Key topics will include assessment tools and models, continuous quality improvement, evidence-based practice, performance improvement methods (epidemiologic measurement, measures of central tendency, problem identification and analysis, control charts) and the development of team-based problem solving and resolution. Prerequisite: PRVM 800 Principles of Epidemiology, PRVM 875 Management of Public Data; PRVM 827 Public Health Administration is preferred. LEC.

PRVM 891. Public Health Internship. 1-3 Hours.
Students will complete a 192 hour internship in a community setting (12 hours/week for the 16 week semester) during PRVM 891 Public Health Internship. The internship is a service-learning experience for which students should consider the contribution their activities will make to the internship setting as well as activities that will be undertaken to meet the student’s learning objectives. Prerequisites: MPH core and required courses. One of the MPH core courses may be taken concurrently with PRVM 891. LEC.

PRVM 893. Public Health Capstone. 1-3 Hours.
The public health capstone is a 192 hour (12 hours/week for the 16 week semester) culminating experience that requires students to synthesize and integrate knowledge and/or apply theories and principles learned to an area of public health. The capstone is meant to be taken at the end of the student’s degree program, and is designed to give the student an opportunity to apply their skills to a variety of problems or issues in public health. The capstone should be primarily focused on addressing concentration specific competencies. While the exact activities and outcomes of the capstone will differ across concentrations all capstones, regardless of concentration, must include a written report and an oral defense. Prerequisites: All MPH core and required courses, nine of the 12 concentration credits completed, PRVM 891 Public Health Internship, last semester of enrollment. LEC.
The University of Kansas

PRVM 899. Thesis. 1-3 Hours.
Preparation of a formal thesis based on the research conducted on a community health problem. After the thesis has been completed, the student will be given an oral examination on the research methods and content. Prerequisites: All MS-CR core and required courses completed or in progress in the student's final semester (This course may be repeated for a maximum of 6 credit hours). THE.

Graduate Certificate in Community-Based Participatory Research

The Department of Preventive Medicine and Public Health is passionate about healthy communities and is committed to improving the health of people through our teaching, research and service. Faculty, students and staff work closely with members of the community on a wide variety of public health topics that are driven by the needs of our community: tobacco control, cancer screening and prevention in underserved rural and minority communities, obesity, health care access and utilization, and health outcomes.

The Certificate Program in Community-Based Participatory Research offered by the Department of Preventive Medicine and Public Health on the Kansas City campus is designed to provide students and scholars with a strong foundation in community-based participatory research principles and methods. Formal training in community-based participatory research, epidemiology, health literacy, qualitative methods, and grant writing will allow scholars to enhance their current research skills.

Students may apply to the Certificate in Community-Based Participatory Research program on the Kansas City campus. The students that will participate in this certificate program can be from a broad spectrum of backgrounds including graduate students, residents, fellows and faculty working in the area of health disparities and underserved communities.

The application process is an online process. For detailed instructions on how to apply and the application deadlines contact Tanya Honderick (913) 588-2720. Admission to the Community-Based Participatory Research Graduate Certificate program is competitive. The program is offered on the Kansas City campus only.

Admission Requirements:
• A bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
  Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

• A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.

• Applicants, who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).

• A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.

• Submission of official scores on the Graduate Record Examination (GRE) or other professional test scores (such as the Graduate Management Admission Test, Medical College Admission Test, Law School Aptitude Test) that are not more than five years old. Official copy of scores should be sent from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895. Applicants who have earned a doctoral degree in the United States are exempt from this requirement.

• Three letters of recommendation from employers, instructors, or other persons who can assess the applicant’s aptitude for the program. Letters submitted per instructions for the online application process.

• A résumé or curriculum vitae.

• A personal written statement that describes the applicant’s career goals and motivation for seeking the certificate in community-based participatory research.

• One semester of college algebra.

• Students currently enrolled in graduate programs at KUMC or KU must be in good standing (3.0 or higher GPA) and have a letter of approval from their current graduate program director and/or department chair indicating support to enroll in the certificate program.

After an applicant has been admitted, the program may defer an applicant’s admission for one semester after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs →.

Certificate Program Information:
No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and referral.

Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements:
• Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of 4 years is allowed.

• Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate certificate coursework.

• Enrollment in a minimum of one (1) credit hour the semester the program is completed. Graduate certificates may not be granted retroactively.
• Successful completion of a minimum of 16 credit hours.
• Successful completion of the following courses:
  PRVM 800  Principles of Epidemiology  3
  PRVM 814  Health Literacy  3
  PRVM 853  Responsible Conduct of Research  1
  PRVM 856  Community-Based Participatory Research  3
  PRVM 872  Grant Writing  3

  **Total Hours: 13**

- Successful completion of a minimum of three (3) credit hours of elective coursework in health disparities. Specific courses determined in consultation with the student's advisor.
- Successful completion of the Human Subjects Tutorial.
- Successful completion of the ePortfolio Requirement.

Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

**Master of Public Health**

The University of Kansas Master of Public Health program (KU-MPH) is a fully accredited, 42 credit hour graduate program with concentrations in Epidemiology, Social and Behavioral Health, Environmental Health Sciences and Public Health Management. The program has been accredited by the Council on (http://ceph.org) Education for Public Health (CEPH) since 1998 and is offered through the Departments of Preventive Medicine and Public Health at the University of Kansas Medical Center in Kansas City and the University of Kansas School of Medicine-Wichita in Wichita. KU-MPH is also the only fully accredited MPH program in the state to become member of the Association of Schools and Programs of Public Health (ASPPH).

Our program mission is to provide teaching, research and service activities that prepare public health practitioners, health care providers and researchers to develop and apply population-based and individual approaches to maintaining and improving the public's health in the Heartland and the nation.

KU-MPH graduates serve in a wide variety of public health fields, including clinical medicine, research, health education.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Master of Public Health (http://www.kumc.edu/school-of-medicine/mph/admissions.html) website. Admission to the M.P.H. program is competitive. Students may apply in either Kansas City or Wichita and indicate their preference of campus choice as well as their choice for concentration on the application itself.

**Admission requirements:**

- A bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
  - Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor's degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395).
- A background check (p. 2395) is required during the admission process; it may affect the student's eligibility to enter the program.
- Submission of official scores on the Graduate Record Examination (GRE) or other professional test scores (such as the Graduate Management Admission Test, Medical College Admission Test, Law School Aptitude Test) that are not more than five years old. Official copy of scores should be sent from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895. Applicants who have earned a doctoral degree in the United States are exempt from this requirement.
- Three letters of recommendation from employers, instructors, or other persons who can assess the applicant's academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A résumé or curriculum vitae. Demonstration of one or more years of responsible work experience in the health field or a degree in a recognized health profession or other evidence of training or experience that indicates adequate preparation for the M.P.H. curriculum is preferred.
- A personal written statement that describes the applicant's career goals and motivation for seeking post-graduate training in public health.
- Responses to three short-answer questions that are part of the online application itself.
- One semester of college algebra or calculus is required to enter the social and behavioral health concentration, the public health management concentration, or the environmental health sciences concentration.
- Completion of one semester of calculus is required to enter the epidemiology concentration.
- Applicants to the environmental health concentration must also have completed at least one semester of undergraduate biology and one additional semester of biology or another physical science course.

After an applicant has been admitted, the program may defer an applicant's admission for one year after which time the applicant must submit a new application.
Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs.

The Master of Public Health program consists of at least 42 credit hours. Students complete credit hours in specified core courses in epidemiology, environmental health, public health administration, biostatistics, and the social and behavioral sciences along with an elective course. The specific degree requirements vary by the choice of concentration. The four concentrations are epidemiology, social and behavioral health, environmental health sciences, or public health management. All students complete a public health internship and capstone project as described below.

**Degree Requirements:**

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 4 years of admission to the program.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.

- Completion of a minimum of 42 hours.

- Successful completion of the following core courses (21 credit hours) regardless of concentration:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRVM 800</td>
<td>Principles of Epidemiology</td>
<td>3</td>
</tr>
<tr>

<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRVM 891</td>
<td>Public Health Internship</td>
<td>3</td>
</tr>
</tbody>
</table>

- Successful completion of three (3) credit hours of capstone including preparation and defense of a written project report developed from the capstone experience.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRVM 893</td>
<td>Public Health Capstone</td>
<td>3</td>
</tr>
</tbody>
</table>

- Successful completion of a concentration (minimum 12 credit hours.) Choose from Epidemiology, Social and Behavioral Health, Environmental Health Sciences or Public Health concentrations.

  - **Epidemiology concentration** - complete the following courses:

    | Course Code | Course Name                        | Credits |
    |-------------|------------------------------------|---------|
    | PRVM 813    | Chronic Disease Epidemiology       | 3       |
    | PRVM 815    | Infectious Disease Epidemiology    | 3       |

    **Total Hours** 12

    **Environmental Health Sciences concentration** - complete the following courses:

    | Course Code | Course Name                        | Credits |
    |-------------|------------------------------------|---------|
    | PRVM 832    | Environmental and Occupational Epidemiology | 3 |
    | PRVM 870    | Environmental Health Law and Policy | 3       |
    | PRVM 871    | Environmental Monitoring and Exposure Assessment | 3 |
    | PRVM 874    | Toxicology and Risk Assessment      | 3       |

    **Total Hours** 12

    **Public Health Management concentration** - complete the following courses:

    | Course Code | Course Name                        | Credits |
    |-------------|------------------------------------|---------|
    | PRVM 828    | Public Health Program Development and Management | 3 |
    | PRVM 851    | Public Health Policy and Law       | 3       |
    | PRVM 861    | Leadership in Public Health        | 3       |
    | PRVM 879    | Financial and Human Resource Management | 3 |

    **Total Hours** 12

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.
**Typical Plan of Study (Kansas City campus):**

Dual M.D.-M.P.H. Program
This is a five year program in which the medical student completes the requirements for the M.P.H. degree in one year. This can be accomplished either between the second and third, or between the third and fourth years of medical school. Students must complete all degree requirements for both the M.D. and the M.P.H. programs. They complete the M.P.H. concentration (either in Social and Behavioral Health or Public Health Management), in three semesters, beginning in the summer (June), and proceeding through fall (August) and spring (January), and finishing by the end of May. Please contact the respective academic units offering the degree for more information. The M.D. degree (p. 2062) is offered by the School of Medicine.

Joint Ph.D. in Behavioral Psychology-M.P.H. Program
The Department of Applied Behavioral Science on the Lawrence campus offers a 72-credit-hour doctoral program in behavioral psychology (p. 1459). Students learn about an array of content areas and theoretical perspectives and achieve proficiency in behavioral analysis,
developmental studies, or behavioral intervention. Both the departments of Applied Behavioral Science (http://www.absc.ku.edu) and of Preventive Medicine and Public Health (http://ph.kumc.edu) promote community/public health and development through collaborative research, teaching, and service.

The joint Ph.D./M.P.H. is ideal for students interested in prevention through community and public health. Students must apply for admission to the M.P.H. and Ph.D. programs separately. Applications are reviewed by the admissions committees of both programs. Students admitted to the joint program complete the 42-hour M.P.H. requirements as listed in the chart below in addition to the Ph.D. requirements. See the Doctor of Philosophy in Behavioral Psychology (p. 1459) section of this catalog for the Ph.D. degree requirements. Completion of ABSC 710, ABSC 875, and ABSC 876 also qualifies a student for a Graduate Certificate in Community Health and Development (p. 1461) offered by the Department of Applied Behavioral Science. Additional details about the certificate program may be found on their website (http://absc.ku.edu/graduate-certificate-community-health-and-development/#requirements).

Master of Science in Clinical Research

The University of Kansas Master of Science in Clinical Research program (MS-CR) is a 33 credit hour graduate program with the student’s thesis serving as their culminating project. The program is offered through the Departments of Preventive Medicine and Public Health at the University of Kansas Medical Center in Kansas City and the University of Kansas School of Medicine-Wichita in Wichita.

The MS-CR program provides students with formal training in clinical research, biostatistics, and epidemiology that will allow clinical scholars to enhance their current research skills. Graduates from the Master of Science in Clinical Research (MS-CR) program serve in a wide variety of fields, including clinical medicine, research, education, disease surveillance and academic settings. The University of Kansas MS-CR degree is designed to provide clinical scholars with a strong foundation in patient-oriented research principles and methods.

Admission and degree requirements are detailed in this section of the catalog. Other program information and application details may be found at our website. The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Clinical Research program (http://www.kumc.edu/school-of-medicine/preventive-medicine-and-public-health/education-and-training/ms-cr/admission-requirements.html) website. Admission to the M.S. in Clinical Research degree program is competitive. Students may apply in either Kansas City or Wichita and should indicate their preference of campus on the application itself.

Admission requirements:

- A bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. are required to submit an evaluation of their academic credentials performed by one of the established companies providing this service for a fee. The MS-CR program will accept evaluations from the World Education Service (http://www.wes.org) (WES) or Educational Credential Evaluators (http://www.ece.org) (ECE) and other companies on a case by case basis. The evaluation must be course by course and include degree equivalency and grade point average. The evaluation should be sent directly from the company to the MS-CR program.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (p. 2395). The Educational Commission for Foreign Medical Graduates (ECFMG) certificate is accepted in lieu of a TOEFL/IELTS score for applicants with a Medical Degree applying to this program.
- A background check (p. 2395) is required during the admission process; it may affect the student’s eligibility to enter the program.
- Submission of official scores on the Graduate Record Examination (GRE) or other professional test scores (such as the Graduate Management Admission Test, Medical College Admission Test, Law School Aptitude Test) that are not more than five years old. Official copy of scores should be sent from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895. Applicants who have earned a doctoral degree in the United States are exempt from this requirement.
- Completion of at least one semester of calculus is required.
- Three letters of recommendation from employers, instructors, or other persons who can assess the applicant’s academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A résumé or curriculum vitae. Demonstration of one or more years of responsible work experience in the health field or a degree in a recognized health profession or other evidence of training or
experience that indicates adequate preparation for the M.S. in Clinical Research curriculum is preferred.

- A personal written statement that describes the applicant's career goals and motivation for seeking post-graduate training in clinical research.

Applicants not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. *Other years' catalogs*. The M.S. in Clinical Research program consists of 33 credit hours. Students are required to complete six core courses: epidemiology, biostatistics, statistical computing (or data management), advanced epidemiologic methods, grant writing and responsible conduct of research for a total of 22 credit hours of core courses; 8 additional credit hours consist of electives. The final three credit hours are devoted to the student's thesis.

**Degree requirements:**

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 5 years of admission to the program.

- Completion of a minimum of 33 credit hours.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.

- Enrollment in PRVM 899 Thesis the semester the student defends their thesis.

- Successful completion of a thesis defense (p. 2398).

- Successful thesis submission (p. 2398) (according to Office of Graduate Studies policy.)

- Successful completion of the following core courses (22 credit hours):

  - PRVM 800 Principles of Epidemiology
  - PRVM 841 Advanced Epidemiology I: Methods in Cross-Sectional and Case-Control Studies
  - PRVM 853 Responsible Conduct of Research
  - PRVM 872 Grant Writing
  - BIOS 714 Fundamentals of Biostatistics I
  - BIOS 717 Fundamentals of Biostatistics II
  - BIOS 810 Clinical Trials
  - BIOS 815 Introduction to Data Management using RedCap and SAS (Kansas City campus only)
  - PRVM 875 Management of Public Health Data (Wichita campus only)

- Successful completion of elective courses (minimum of eight (8) credit hours). Specific courses determined in consultation with the student's advisor.

- Successful completion of a minimum of three (3) credit hours of thesis:

  - PRVM 899 Thesis

Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog of the year student entered the program.

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in the Swarthout Recital Hall (remodeled in 2015), Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Degrees

Undergraduate Degree Programs

The degree of Bachelor of Music is granted with majors in bassoon, clarinet, double bass, euphonium, flute, French horn, harp, musicology, music therapy, oboe, organ and church music, percussion, piano, saxophone, theory, composition, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

The degree of Bachelor of Arts in Fine Arts is granted with concentrations in applied music (on an instrumental or voice), jazz studies, musicology, and music theory.

The degree of Bachelor of Fine Arts is granted with a major in theatre and voice.

The degree of Bachelor of Music Education is granted with a major in music education.
Requirements for Graduation

Degrees from the School of Music are conferred on candidates who have satisfactorily completed a minimum of 120 credit hours for the B.A., B.M., B.F.A., and B.M.E. degrees, including required subjects. 45 credit hours must be in junior/senior-level courses, numbered 300 and above. A minimum 2.0 grade-point average, both cumulative and in KU courses, is required for graduation. 4 hours of the total in each case except the B.M.E. degree may be in physical education activity courses.

Remedial Courses

Remedial courses listed in the catalog and Schedule of Classes (https://classes.ku.edu/Classes/ExternalDisplay.action) are numbered below 100. Such courses include, but are not limited to, MATH 2 and MTHC 99. Such courses do not count toward graduation in the School of Music and may not be counted as distribution courses or electives.

Graduate Degree Programs

The School of Music offers these degree programs:

Master of Music

• Composition
• Conducting
• Musicology
• Music theory
• Performance

Master of Music Education

• Music education
• Music therapy

Doctor of Musical Arts

• Composition
• Conducting
• Performance

Doctor of Philosophy

• Music with an emphasis in musicology or music theory
• Music Education with an emphasis in music education or music therapy

The Kansas Board of Regents (http://www.kansasregents.org) has designated KU as the sole institution in the Regents system authorized to grant doctoral degrees in music.

Contact the school (http://music.ku.edu) for specific admission requirements. See also Admission in the Graduate Studies section of the online catalog.

View the list of School of Music academic programs (p. 2170).

Facilities

Murphy Hall

Murphy Hall, named for former KU Chancellor Franklin D. Murphy, houses the School of Music (http://music.ku.edu). It is a 5-level facility with offices for faculty members in applied music, music theory and composition, musicology, opera, music education, music therapy, and ensembles. Designed for music and theater, it contains 4 performance areas.

• Crafton-Preyer Theater provides a venue for plays, operas, musical theater shows, and concerts. It is a fully equipped, 1,188-seat proscenium stage facility.
• William Inge Memorial Theater is an intimate black-box facility with seating for up to 125, suitable for plays and small opera productions.
• Swarthout Recital Hall, a 340-seat facility with exceptional acoustics, is dedicated to faculty and student solo and chamber music presentations and occasional opera productions. Swarthout Recital Hall has been fully remodeled and re-opens to public performances in April, 2015.
• The Baustian Theater, a black-box facility for opera and musical theater productions, seats 125 and has a dressing room and wardrobe area, set construction and storage area, and office and performance control areas.

Murphy Hall also houses classrooms, practice rooms, rehearsal halls, and storage facilities for instruments and sheet music. The Electronic Music Studio contains a digital workstation for the recording and production of electronic music and video.

The Kansas Center for Music Technology in Murphy Hall promotes the development and application of current technologies in music instruction, research, and creative projects. Its Computer Center contains 32 fully networked multimedia workstations. KCMT has a library of commercially available software for evaluation, experimentation, and integration into existing courses. The lab also contains 3 high-end workstations for professional-quality digital audio, digital video, and DVD authoring. The library includes basic productivity and Internet software; music notation and sequencing, ear-training, CD-ROMs, and drill design software; and digital editing software for audio, video, multimedia, and Web authoring. Through workshops and music technology courses, KCMT helps faculty members and students develop innovative new software.

The Thomas Gorton Music and Dance Library in Murphy Hall houses more than 111,000 scores, books, sound recordings, videos, microforms, and serials, and has the leading music collection in the Great Plains. It features digital workstations; study carrels; comfortable seating; and public display of new acquisitions, current periodicals, and special exhibitions. Students can make full use of music and dance information resources. The Joe and Joyce Hale Media System allows remote listening and viewing from 30 locations in the library, including 328 media carrels, the seminar room, and the group study room. Media carrels have remote controls, MIDI music keyboards, mini-disk recorders, computers, and video monitors.

The Music Education and Music Therapy Complex in Murphy Hall contains a model music education classroom, a general music instruction classroom, large and small therapy clinical spaces, three research spaces, faculty offices, the Psychology and Acoustics of Music Laboratory, and the Music Therapy Clinic, a clinical training and research facility. In addition, the complex houses a Vocology Laboratory, which affords excellent resources for research-based understanding of singing voice phenomena. The stationary lab facilitates acquisition and analysis of voice data in a controlled environment. It also provides mobile configurations of resources for field-based research and pedagogy in voice studios, choir rehearsal areas, classrooms, and music therapy clinics. A Polycom system enables interactive distance delivery of music education and music therapy graduate courses throughout Kansas and anywhere in the world.
Lied Center

The Lied Center of Kansas (http://www.lied.ku.edu) is a 2,020-seat performing arts hall. On KU’s west campus at Irving Hill Road and Constant Avenue, it is the venue for the Lied Center Series. It also presents School of Music (http://music.ku.edu) productions, Student Union Activities (https://rockchalkcentral.ku.edu/?q=Student_9347) shows, and university and community events. The performing arts hall offers excellent acoustic quality and technical production capabilities. The stage features a 56-foot-wide proscenium opening, resilient wood floor, counterweighted rigging system, and ample wing space. There is a full complement of backstage support areas including seven dressing rooms, dance rehearsal studio, two warm-up rooms, a Greenroom, and a production office.

The Dane and Polly Bales Organ Recital Hall is acoustically designed for the teaching and performance of organ music. It has seating for 200 and is attached to the Lied Center main lobbies at two levels. It houses a 45-stop mechanical key-action (electric stop-action) organ built by Hellmuth Wolff et Associés, one of the finest builders of organs in the world. The hall is available to organ students for practice, lessons, and recitals. Its aesthetics are enhanced by three magnificent stained glass windows designed by Peter Thompson, former dean of Fine Arts.

Undergraduate Programs

The school acquaints undergraduates with music as an important field of a liberal culture, either as members of a discriminating public or as trained practitioners. It prepares students for careers in music and promotes scholarship and research. It offers curricula for teachers of music in public schools and institutions of higher education and special degree curricula for training music therapists.

View the list of School of Music academic programs (p. 2170).

Applied Music Lessons

All majors and nonmajors (as space permits) who wish to take lessons must first pass an audition. All music majors enroll in 121-level applied music courses until they have accumulated 4 credits (6 credits for performance majors) at which time they may enroll in the 221 level. Music majors who are not performance majors must accumulate 8 applied music credits before enrolling in the 321 level and 12 applied music credits before enrolling in the 421 level (or 422 level for the B.M.E.). Performance majors must accumulate 12 credits at the 121 and 221 levels before they enroll in 622 level.

Music majors pursuing the performance degrees, B.M. and B.F.A., are required to enroll in 3 credits of lessons to receive 50-minutes per week of studio instruction. Music majors pursuing the Music Education B.M.E., some Music B.A. degrees and the following B.M. degrees: Music Composition, Music Theory, Musicology and Music Therapy are required to enroll in 2 credits of lessons to receive 50-minutes per week of studio instruction. Music minors, some Music B.A. majors, non-music majors and students in music with a secondary area may enroll in 1 credit of lessons to receive 30-minutes per week of studio instruction. See degrees listed on the Programs page for specific credit-hour and recital requirements. The summer session limit on all music major lessons is 1 to 3 credit hours.

Students may state their preferences as to teachers for private lessons, but final authority rests with the director of the division. The minimum acceptable grade to remain in applied music lessons is a B-. A grade of B- or higher must be earned in each semester of lessons.

Courses for Nonmajors

Students in other KU schools may enroll in music courses for credit, subject to the availability of instructional time and as space permits. Most musicology courses and all ensembles are open to all KU students.

Students in the College of Liberal Arts and Sciences not majoring in music may elect an appropriate introductory course (MUSC 298, MUSC 305, MUSC 308, MUSC 309, MUSC 310, MUSC 312, MUSC 313, MUSC 336, MUSC 560 or MUSC 650). Minors in music are offered for students in other disciplines. Most degree programs accept up to 6 hours of electives in music ensembles and performance.

Junior/senior credit in applied music involves a prerequisite of 4 hours of university credit in sequence in the field concerned.

University Honors Program

The school encourages qualified students to participate in the University Honors Program (http://www.honors.ku.edu).

Ensembles

The University Symphony Orchestra performs works from the standard symphonic repertoire on campus and occasionally on tours. It combines with choral ensembles to present oratorios or other large works and assists in musical theatre productions and opera. In addition, the orchestra reads new orchestral works submitted by KU composers for the George Lawner Prize, an annual adjudicated competition co-sponsored by Music Theory and Composition and the KU Symphony Orchestra.

The Wind Ensemble presents 4 or more concerts annually and tours nationally and internationally. The Symphonic and University Bands perform 2 concerts each semester. The KU Jazz program includes 3 jazz ensembles, 2 jazz choirs, and several combos.

The Marching Jayhawks are part of the pageantry at football games. The Basketball Bands (Men’s and Women’s) and pep bands also perform for sports events.

The Bales Chorale, Chamber Choir, Concert Choir, Men’s Glee Club, University Singers, and Women’s Chorale perform concerts on campus, tour, and participate in combined choral and orchestral presentations such as the annual Holiday Vespers. All KU students are eligible through audition for placement in a choir.

The Collegium Musicum specializes in early music, both vocal and instrumental, using KU’s collection of replicas of early instruments. Helianthus is the performing arm of KU’s New Music Ensemble. Each semester it performs the finest available contemporary chamber music.

Recitals of music by KU student composers are presented each semester by the KU Composers Guild, a student organization. The Kansas Brass Quintet, Kansas Woodwinds, and Kansas String Quartet are faculty groups that present numerous concerts.
Visit the School of Music (http://music.ku.edu) for current information about recitals, concerts, and performances.

**Graduate Programs**

The School of Music offers Master of Music programs in composition, conducting, musicology, music theory, and areas of performance and Master of Music Education degree programs in music education or music therapy.

The Doctor of Musical Arts degree is offered in composition, conducting, and areas of performance. We offer the Doctor of Philosophy degree in music education with an emphasis in music education or music therapy and the Doctor of Philosophy degree in music with an emphasis in musicology or music theory.

View the list of School of Music academic programs (p. 2170).

The Kansas Board of Regents (http://www.kansasregents.org) has designated KU as the sole institution in the Regents system authorized to grant doctoral degrees in music.

**Graduate Credit for Nonmajors**

**Performance**

Permission to enroll for graduate credit in applied music is determined by audition. This audition should be scheduled with the major division faculty at the beginning of each semester.

**Music Education or Music Therapy**

Permission to enroll for graduate credit in music education or music therapy is determined by the information in the MERM Graduate Application Procedure (http://music.ku.edu/programs/memt/prospective/graduate/admissions.shtml) document.

**Ensembles**

The University Symphony Orchestra performs works from the standard symphonic repertoire on campus and occasionally on tours. It combines with choral ensembles to present oratorios or other large works and assists in musical theater and opera productions. In addition, the orchestra reads new orchestral works submitted by KU composers for the George Lawner Prize, an annual adjudicated competition co-sponsored by Music Theory and Composition and the KU Symphony Orchestra.

The Wind Ensemble presents 4 or more concerts annually and tours nationally and internationally. The Symphonic and University Bands perform 2 concerts each semester. The KU Jazz program includes 3 jazz ensembles, and several combos.

The Marching Jayhawks are part of the pageantry at football games. The Basketball Bands (Men’s and Women’s) and pep bands also perform for sports events.

The Bales Chorale, Chamber Choir, Concert Choir, Men’s Glee Club, University Singers and Women’s Chorale perform concerts on campus, tour, and participate in combined choral and orchestral presentations. All KU students are eligible through audition for placement in a choir.

The Collegium Musicum specializes in early music, both vocal and instrumental, using KU’s collection of early instrument replicas.

Helianthus is the performing arm of KU’s New Music Ensemble. Each semester it performs the finest available contemporary chamber music.

Recitals of music by KU student composers are presented each semester by the KU Composers Guild, a student organization. The Kansas Brass Quintet, Kansas Woodwinds, and Kansas String Quartet are faculty groups that present numerous concerts.

Visit the School of Music (http://music.ku.edu) for current information about recitals, concerts, and performances.

**Undergraduate Advising**

Music students are advised by music faculty members from their major area of study as well as from the School of Music Student Services office. Students in Music Education and Music Therapy are each assigned a specific faculty advisor.

Each entering first-year student is encouraged to attend KU’s summer First-Year Experience Orientation. At the summer orientation program, students are advised on course selection for the fall semester and given the opportunity to enroll.

Each semester before enrollment, students see their advisors to plan schedules and discuss academic and career interests. Students are encouraged to call on their advisors any time during the school year if they wish to change their schedules or discuss other matters. Consultation with an advisor is recommended before making schedule changes.

Music students should direct questions to the School of Music (http://music.ku.edu) Office of Student Services.

**Graduate Advising**

Graduate advising is handled by the student’s major professor.

**Undergraduate Scholarships**

**Academic Scholarships**, as well as grants, loans, and need-based financial aid, are available through Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml).

**Merit Scholarships in Music** are also available. Audition application and information is available on the school’s website (http://music.ku.edu/applyaudition).

**Tuition and Fees**

Information about KU tuition and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu). Tuition and fees are set by the Board of Regents and are subject to change.

**Graduate Fellowships and Assistantships**

For information about graduate assistantships, contact the School of Music.

Visit the Graduate Studies website for information about funding opportunities for graduate students at KU.
Financial Aid and Scholarships (http://financialaid.ku.edu) administers grants, loans, and need-based financial aid.

Tuition and Fees
Information about KU tuition and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu). Tuition and fees are set by the Board of Regents and are subject to change.

Undergraduate University Regulations
For information about all university regulations, see Regulations (p. 12) or visit the University of Kansas Policy Library (http://www.policy.ku.edu). A few examples specific to the School of Music are shown below.

Absences
The school defines excessive absence as absence in excess of the number of credit hours in the course. A student with excessive absences may be withdrawn from the course by the dean.

Change of School
To change from one school to another, the student must submit a Change of School form in the dean’s office of the school the student plans to enter. Deadlines are provided on the form.

Admission is competitive. Students must have minimum cumulative grade-point averages of 2.75 on a 4.0 scale from all colleges or universities including KU. Music admission is contingent upon a successful audition. Change-of-school applicants must meet the same requirements as transfer applicants.

Credit/No Credit
A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (https://documents.ku.edu/policies/governance/USRR.html#Art2sect2).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Graduation with Distinction and Highest Distinction
Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. The list is compiled each spring and includes July, December, and May graduates.

Honor Roll
Students with grade-point averages of 3.6 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

Incompletes
The letter I should not be used when a definite grade can be assigned for the work done. It is not given for the work of a student in any course except to indicate that some part of the work has, for reasons beyond the student’s control, not been done, while the rest has been satisfactorily completed. At the time an I is reported on the electronic roster, the character and amount of work needed, as well as the date required for completion and lapse grade if further work is not completed by this date, should be indicated.

If the instructor specifies that repetition of a portion of the classroom work is required, the student may attend classes but should not officially enroll in that course again.

A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade assigned by the course instructor, and shall be indicated on the student’s record.

Extensions to the time limit may be granted by the dean’s representative upon submission of a petition from the student containing the endorsement of the course instructor who assigned the I grade, or the department chairperson if the instructor is unavailable. After the I grade is converted to a grade of F or U, the grade may only be changed in accordance with USRR Article II, Section 3 (https://documents.ku.edu/policies/governance/USRR.html#Art2sect3).

Maximum and Minimum Semester Enrollment
The normal maximum enrollment is 20 hours during fall or spring semesters or 9 hours during the summer session. Students may exceed the normal maximum enrollment only with the permission of the dean.

Probation
Students may be dismissed at any time by the dean for excessive absences or for failure to make satisfactory progress in their studies.

A student not on probation who fails to earn a grade-point average of at least 2.0 in any semester is placed on probation for the following semester.

At the end of the semester in which the student has been on probation, he or she is removed from probation if the grade-point average for the semester is at least 2.0, with a minimum course load of 12 hours and a cumulative grade-point average of 2.0. A student whose course load is fewer than 12 hours or whose cumulative grade-point average is below 2.0 continues on probation even if the semester grade-point average is 2.0 or above.

At the end of the semester in which the student has been on probation, he or she is dismissed for poor scholarship if the grade-point average for the semester is below 2.0.

A student who has been dismissed for poor scholarship is not eligible to enroll again at any time, except with the special permission of the dean. A reinstated student is placed on final probation. If the student fails to achieve a minimum grade-point average of 2.0 for the semester, he or she is dismissed, and readmission is not granted.
Students who take courses at other institutions during the suspension may receive credit for such work only if it meets the approval of the dean.

**Required Work in Residence**

6 of the final 30 hours may be taken for nonresident credit, with advance permission. Nonresident credit may fill only elective requirements not in the major field of study.

**Transfer of Credit**

CredTran (http://credittransfer.ku.edu) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Only grades of C or higher are accepted as transfer credit toward degrees.

**Graduate University Regulations**

For information about all university regulations, see Regulations (p. 12) or visit the University of Kansas Policy Library (http://www.policy.ku.edu). A few examples specific to the School of Music are shown below.

**Absences**

A leave of absence may be granted on request. View the Graduate Studies policy on leaves of absence (https://documents.ku.edu/policies/Graduate_Studies/leaveofabsence.htm).

**Credit/No Credit**

The Credit/No Credit option is authorized, as of spring 2012, for graduate students (USRR Article II, 2.2.7). The full explanation can be found in the KU Policy Library under University Senate Rules and Regulations (http://catalog.dept.ku.edu/wrong/schools/gs/regulations).

**Incompletes**

The letters W and I may be given. The letter I indicates incomplete work that may be completed without re-enrollment in the course. The letter W indicates withdrawal for which no credit or grade point is assigned. For more information, see USRR Article II, Section 3 (https://documents.ku.edu/policies/governance/USRR.htm#art2sect3).

**Maximum and Minimum Semester Enrollment**

The normal maximum enrollment is 16 hours during fall or spring semesters or 6 hours during the summer session. Students may exceed the normal maximum enrollment only with the permission of the dean. International students must comply with the credit requirements for their visa status.

**Probation and Dismissal**

Upon falling below a cumulative graduate grade-point average of B (3.0), computed with the inclusion of grades earned at KU for all courses acceptable for graduate credit, the student is placed on probation by the Graduate Division of the school or college. The grades of P, S, U, and I, for which no numerical equivalents are defined, are excluded from the computation. If the student's overall graduate average has been raised to B by the end of the next semester of enrollment after being placed on probation, the student may be returned to regular status. If not, the student is not permitted to re-enroll unless the Graduate Division acts favorably on a departmental recommendation for the student to continue study.

For more information regarding Probation and Dismissal, see the Graduate Studies Policy library (http://www.graduate.ku.edu/policies-processes).

**Required Work in Residence**

For information about the doctoral residence requirement, see the Graduate Studies (p. 2369) section of the online catalog.

**Transfer of Credit**

View the Graduate Studies policy on graduate credit, including transfer credit, in the Graduate Studies section of the online catalog or the KU Policy Library (http://catalog.dept.ku.edu/201314/schools/gs/regulations/#12).

**Courses**

ACMP 527. Accompanying. 1-4 Hours.
Individual instruction in vocal and/or instrumental accompanying. Open to junior, senior, and graduate pianists with permission of instructor. IND.

ACMP 529. Performance Class in Accompanying. 1 Hour.
A class in the performance of vocal and instrumental accompaniment. Prerequisite: Completion of ACMP 527 or permission of instructor. IND.

ACMP 727. Accompanying. 1-4 Hours.
Individual instruction in vocal and or instrumental accompanying. Prerequisite: Consent of instructor. IND.

ACMP 811. Advanced Accompanying. 2-4 Hours.
For graduate students majoring in accompanying. May be repeated for credit. Summer session limit one to three hours. IND.

ACMP 822. The Accompanist's Literature. 3 Hours.
A course in which major vocal and instrumental works are studied with vocal or instrumental participants. LEC.

BAND 202. Wind Ensemble. 0-1 Hours.
Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor. LAB.

BAND 204. Symphonic Band. 0-1 Hours.
For freshmen and sophomores. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 206. University Band. 0-1 Hours.
For freshmen and sophomores. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard band repertoire. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 210. University Marching Band. 0-1 Hours.
For freshmen and sophomores. Open to all qualified University students, regardless of major. Public performances include presentation of maneuvers and pageantry at all home football games as well as several trips each season. Three two-hour rehearsals per week. Offered fall semester only. Membership by audition. May be repeated for credit. ACT.
BAND 301. Workshop in: _____. 0-3 Hours.
May be repeated for credit. IND.

BAND 404. Symphonic Band. 0-1 Hours.
For junior and seniors. Performances include concerts on campus and
tours throughout the area. Literature includes wind music, transcriptions,
and other standard concert band literature. May be repeated for credit.
Prerequisite: Permission of director. ACT.

BAND 406. University Band. 0-1 Hours.
For juniors and seniors. This concert organization performs on campus
as well as in other area concerts. The band studies and performs music
from the standard concert band repertoire. May be repeated for credit.
Prerequisite: Permission of director. ACT.

BAND 410. University Marching Band. 0-1 Hours.
For juniors and seniors. Open to all qualified University students
regardless of major. Public performances include presentation of
marching maneuvers and pageantry at all home football games as well as
several trips each season. Membership by audition. May be repeated for
credit. ACT.

BAND 459. Scoring for Field Band. 2 Hours.
Primary voicings and textural possibilities for wind and percussion
instruments will be stressed as these resources relate to the arranging
of music for marching and pep bands at the secondary level. (Same as
MTHC 459.) Prerequisite: MTHC 214. LEC.

BAND 466. Directed Study: _____. 1-3 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. IND.

BAND 559. Scoring for Concert Band. 2 Hours.
Curriculum includes idiomatic writing, tonal balance, scoring for large
percussion sections, and analysis of wind colors and instrumental
combinations found in music of Holst, Vaughan Williams, Grainger,
Stravinsky, Hindemith, and C. Williams. (Same as MTHC 559.)
Prerequisite: MTHC 214 and MTHC 459. IND.

BAND 602. Wind Ensemble. 0-1 Hours.
Study and performance of literature written for wind ensembles using
an instrumentation somewhat smaller than the traditional concert band.
Literature ranges from early wind and band music to contemporary avant-
garde wind ensemble literature. May be repeated for credit. Prerequisite:
Audition and permission of instructor. LAB.

BAND 604. Symphonic Band. 0-1 Hours.
For graduate students. Performances include concerts on campus and
tours throughout the area. Literature includes wind music, transcriptions,
and other standard concert band literature. May be repeated for credit.
Prerequisite: Permission of director. LEC.

BAND 630. Band Repertoire. 2 Hours.
A survey of selected band works from the standard repertoire. The
works are to be analyzed in terms of style and form, and in terms of the
rehearsal and performance problems inherent in the work. Also a study
of the standard band repertoire from an educational viewpoint as well as
from a programming viewpoint. LEC.

BAND 701. Workshop in: _____. 1-3 Hours.
May be repeated for credit. LEC.

BAND 803. Interpretation of Band Music. 1 Hour.
A study of the essential factors necessary for the understanding and
subsequent interpretation of various compositions of advanced band
music. In addition to the regular course work, students must participate in
one of the university concerts bands, attend all rehearsals each week and
play in concerts. May be repeated for credit. Prerequisite: Permission of
instructor. LAB.

BAND 866. Directed Study in: _____. 1-3 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. LEC.

BASN 100. Bassoon. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in
music. May be repeated for credit. IND.

BASN 101. Bassoon Reed Making. 0-1 Hours.
The principles of bassoon reed making, including profiling and shaping of
bassoon cane and scraping of bassoon reeds. Open only to freshmen and
sophomores. May be repeated for credit. LAB.

BASN 121. Bassoon. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated
for credit. IND.

BASN 221. Bassoon. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be
repeated for credit. Prerequisite: 121-level until the music major has
accumulated 4 credits (8 for performance majors). IND.

BASN 300. Bassoon. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May
be repeated for credit. IND.

BASN 301. Bassoon Reed Making. 0-1 Hours.
The principles of bassoon reed making, including profiling and shaping of
bassoon cane and scraping of bassoon reeds. Open only to juniors and
seniors. May be repeated for credit. LAB.

BASN 321. Bassoon. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance
majors. May be repeated for credit. Prerequisite: 221-level until the music
major has accumulated 8 credits. IND.

BASN 421. Bassoon. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance
majors. May be repeated for credit. Prerequisite: 321-level until the music
major has accumulated 12 credits. IND.

BASN 422. Bassoon. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being
performed and as required by the degree program. Not for performance
majors. IND.

BASN 622. Bassoon. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance.
May be repeated for credit. Prerequisite: Performance majors must
accumulate 16 credits at the 121/221 levels. IND.

BASN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor
of Music). Must be taken in the semester the senior recital is being performed
and as required by the degree program. Corequisite: BASN 622. LEC.

BASN 711. Bassoon. 1-4 Hours.
For graduate students not majoring in bassoon. May be repeated for
credit. Summer session limit one to three hours. IND.

BASN 811. Bassoon. 2-4 Hours.
For graduate students majoring in bassoon. May be repeated for credit.
Summer session limit one to three hours. IND.

BASN 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the bassoon
during the seventeenth and eighteenth centuries. LEC.

BASN 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the
twentieth century. LEC.
BASN 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in bassoon. May be repeated for credit. Summer session limit one to three hours. IND.

BASN 965. Doctoral Recitals. 1 Hour.
Maximum seven hours credit. May be repeated for credit. THE.

BASN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

BRSS 252. Brass Choir. 0-1 Hours.
For freshmen and sophomores. Study and performance of large brass ensemble literature. May be repeated for credit. IND.

BRSS 652. Brass Choir. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of large brass ensemble literature. May be repeated for credit. IND.

BRSS 921. Seminar in Performance and Pedagogy: brass. 3 Hours.
Repertoire, performance practice, pedagogical, and stylistic concerns relating to the music for brass instruments throughout their history. Topics will include the physical development of the instruments, their usage as solo, chamber, and large ensemble instruments in both sacred and secular literature, and a survey of historical and modern bibliographic materials. May be repeated for credit when topics vary. IND.

CARI 100. Carillon. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

CARI 300. Carillon. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

CARI 621. Carillon. 1-4 Hours.
One or two lessons per week. For graduate students not majoring in carillon performance. May be repeated for credit. IND.

CARI 711. Carillon. 1-4 Hours.
May be repeated for credit. IND.

CARI 804. History of Carillon Literature and Design. 3 Hours.
A survey of carillon literature and design. Prerequisite: Permission of instructor. LEC.

CARI 811. Carillon. 2-4 Hours.
For graduate students majoring in carillon. May be repeated for credit. Prerequisite: Permission of instructor. IND.

CARI 820. Studio Class in Carillon. 0 Hours.
Studio performance of repertoire for students enrolled in carillon. May be repeated . Prerequisite: Permission of instructor. IND.

CHAM 215. University Camerata. 0-1 Hours.
For freshmen and sophomores. Rehearsal and performance of string chamber music repertoire. May be repeated for credit. Prerequisite: Permission of instructor. LEC.

CHAM 216. Chamber Music. 0-1 Hours.
For freshmen and sophomores. The study of works for various combinations of instruments. May be repeated for credit. LAB.

CHAM 220. Baroque Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of seventeenth and eighteenth century chamber music using replicas of period instruments. May be repeated for credit. LAB.

CHAM 254. New Music Ensemble. 0-2 Hours.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor. ACT.

CHAM 320. Baroque Ensemble. 0-1 Hours.
For juniors and seniors. Study and performance of seventeenth and eighteenth century chamber music using replicas of period instruments. May be repeated for credit. LAB.

CHAM 336. Chamber Music. 0-2 Hours.
For juniors and seniors. The study of standard chamber music literature with or without piano. May be repeated for credit. LAB.

CHAM 615. University Camerata. 0-1 Hours.
For juniors, seniors, and graduate students. Rehearsal and performance of string chamber music repertoire. May be repeated for credit. Prerequisite: Permission of instructor. LEC.

CHAM 654. New Music Ensemble. 0-2 Hours.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor. ACT.

CHAM 820. Baroque Ensemble. 0-2 Hours.
Study and performance of seventeenth and eighteenth century chamber music, using replicas of period instruments. Primarily for woodwinds, strings, and keyboards. May be repeated for credit. IND.

CHAM 829. Advanced Chamber Music. 0-2 Hours.
A special study of chamber music works, with or without piano, with emphasis on problems of style and interpretation. May be repeated for credit. IND.

CHAM 929. Advanced Chamber Music. 0-2 Hours.
May be repeated for credit. IND.

CHOR 214. University Singers. 0-1 Hours.
Open through audition. Study and performance of significant choral music from the major periods of music history. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 216. Concert Choir. 0-1 Hours.
Open through audition. Study and public performance of significant choral music from the major periods of music history. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 218. KU Men's Glee Club. 0-1 Hours.
A choral ensemble for male singers. The group will study, rehearse, and perform traditional and contemporary choral music for men's chorus. A formal audition is not required. May be repeated for credit. ACT.

CHOR 220. Oread Consort. 0-1 Hours.
A select choral ensemble of 16-20 singers specializing in challenging music of all periods. Open by audition to experienced sight readers and ensemble singers. Concurrent membership in another choir encouraged. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 226. Women's Chorale. 0-1 Hours.
A choral ensemble for women singers. The group will study, rehearse, and perform traditional and contemporary choral music for women's chorus. For freshmen and sophomores. May be repeated for credit. ACT.

CHOR 228. Summer Chorus. 0-1 Hours.
A choral ensemble that meets during the summer term. May be repeated for credit. ACT.
CHOR 242. Chamber Choir. 0-1 Hours.
Intensive study and public performance of significant choral literature.
Membership by audition. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 254. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as MUSC 254.) Prerequisite: Permission of instructor. ACT.

CHOR 410. Choral Practicum. 1 Hour.
A choral ensemble directed by student conductors under the supervision of the choral faculty. May be repeated for credit. ACT.

CHOR 414. University Singers. 0-1 Hours.
Open through audition. Study and performance of significant choral music from the major periods of music history. For juniors and seniors. May be repeated for credit. LAB.

CHOR 416. Concert Choir. 0-1 Hours.
Open through audition. Study and public performance of significant choral music from the major periods of music history. For juniors and seniors. May be repeated for credit. LAB.

CHOR 418. KU Men's Glee Club. 0-1 Hours.
A choral ensemble for male singers. The group will study, rehearse, and perform traditional and contemporary choral music for men's chorus. A formal audition is not required. May be repeated for credit. ACT.

CHOR 424. Opera Chorus. 1 Hour.
A chorus for opera or musical theatre productions. Open by audition in conjunction with the theatre department. May be repeated for credit. LAB.

CHOR 446. Women's Chorale. 0-1 Hours.
A choral ensemble for women singers. The group will study, rehearse, and perform traditional and contemporary choral music for women's chorus. For juniors and seniors. May be repeated for credit. LAB.

CHOR 620. Oread Consort. 0-1 Hours.
A select choral ensemble of 16-20 singers specializing in challenging music of all periods. Open by audition to experienced sight readers and ensemble singers. Concurrent membership in another choir encouraged. For juniors, seniors, and graduate students. May be repeated for credit. LAB.

CHOR 628. Summer Chorus. 0-1 Hours.
A choral ensemble that meets during the summer term. May be repeated for credit. ACT.

CHOR 630. Choral Repertoire. 2 Hours.
A survey of selected choral repertoire available for the high school choral conductor. Both sacred and secular choral literature from the major periods of music history will be studied and analyzed in terms of the problems therein which may be encountered by high school choral conductors. Fall semester and summer only. May be repeated for credit. Prerequisite: MECT 246, MECT 330, MECT 700, and/or consent of instructor. LEC.

CHOR 642. Chamber Choir. 0-1 Hours.
Intensive study and public performance of significant choral literature. Membership by audition. For juniors, seniors, and graduate students. May be repeated for credit. LAB.

CHOR 654. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as MUSC 654.) Prerequisite: Permission of instructor. ACT.

CHOR 701. Workshop in: _____. 0.5-3 Hours.
May be repeated for credit. LEC.

CHOR 805. Interpretation of Choral Music. 1 Hour.
A study of the essential factors necessary for the understanding and subsequent interpretation of various compositions of advanced choral music. Offered in the summer session only. LEC.

CHOR 820. Orchestral Bowing Techniques for Choral Conductors. 1 Hour.
Stylistic, expressive, and technical considerations essential for making effective bowing decisions. Prerequisite: A course in conducting. LAB.

CHOR 825. Choral Diction. 3 Hours.
Study of methods to teach and learn diction in choral music contexts. Attention to International Phonetic Alphabet, acoustic implications of particular phonemes, and contributions of emerging technologies. Application of various languages, including English, Latin, Italian, French, German, and Spanish. (Same as MECT 825.) LEC.

CHOR 826. Adolescent Changing Voices. 3 Hours.
Scientific approaches to the pedagogy of adolescent male and female voices during voice change. (Same as MECT 826.) LEC.

CHOR 827. Children's Voices. 3 Hours.
Scientific approaches to understanding and working with unchanged children's voices. (Same as MECT 827.) LEC.

CHOR 828. Science-based Voice Education. 3-6 Hours.
Comprehensive examination of vocal anatomy, respiration, phonation, resonance, articulation, and voice development, with particular attention to research-based vocal/choral pedagogies for working with child through senior adult voices. (Same as MECT 828.) Prerequisite: Permission of instructor. LEC.

CHOR 830. Sacred Choral Repertoire. 2 Hours.
A study of anthems for Lectionary years A, B, and C. For church choir directors and church music majors. May be repeated for credit. Prerequisite: Consent of instructor. LAB.

CHOR 850. Choral Arranging. 2 Hours.
Techniques of arranging for large and small choral groups, with and without accompaniment. Prerequisite: MTHC 253 or consent of instructor. LEC.

CHOR 910. Research Methodologies in Choral Music. 3 Hours.
This course will provide the student with an overview of historical, analytical, qualitative, and quantitative approaches used in the research of choral music and issues related to teaching and conducting in the choral field. LEC.

CHUR 222. Bales Chorale. 0-1 Hours.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit. ACT.

CHUR 320. Church Music Practicum. 0 Hours.
Methods and materials of church music. May be repeated. LAB.

CHUR 622. Bales Chorale. 0-1 Hours.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit. ACT.

CHUR 801. Church Music Seminar I. 3 Hours.
History of Jewish music; history of church music and the thought about church music through the Middle Ages. LEC.

CHUR 802. Church Music Seminar II. 3 Hours.
History of church music and the thought about church music from the period of the Renaissance/Reformations through the Baroque era with special emphasis on hymnology, and anthem literature. LEC.
CHUR 803. Church Music Seminar III. 3 Hours.
History of church music and the thought about church music from the 19th century to the present with special emphasis on hymnology, and anthem literature. LEC.

CHUR 804. Church Music Seminar IV. 3 Hours.
A survey of sacred choral literature focusing on the development of the motet, the mass, and the cantata. Prerequisite: Permission of instructor. LEC.

CHUR 805. Selected Topics in Church Music: ______. 1-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

CHUR 806. Service Playing and Improvisation I. 3 Hours.
Hymn playing, service playing techniques, anthem accompaniment, conducting from the console and improvisation. Prerequisite: Permission of instructor. LEC.

CHUR 807. Service Playing and Improvisation II. 3 Hours.
Continuation of CHUR 806. Prerequisite: Permission of instructor. LEC.

CHUR 808. History of Liturgy. 3 Hours.
The history of liturgy in Jewish and Christian traditions as well as historical criticism and interpretation of liturgy. LEC.

CHUR 809. The Judeo-Christian Tradition and the Arts. 3 Hours.
Readings, discussion and projects concerning architecture, visual art, literature, drama, poetry, dance, and film as they have developed in the Judeo-Christian tradition. LEC.

CHUR 810. Religion and the Arts. 3 Hours.
Issues in the relationship between religion and the arts. LEC.

CHUR 821. Church Music Colloquium I: Anthem Literature. 1 Hour.
A survey of significant anthem literature. Prerequisite: Permission of instructor. LEC.

CHUR 822. Church Music Colloquium II: Handbells. 1 Hour.
Handbell history, literature, performance, and rehearsal techniques. Prerequisite: Permission of instructor. LEC.

CHUR 823. Church Music Colloquium III: Children’s Choirs. 1 Hour.
A study of the history and literature of children’s choirs, vocal characteristics of children, and rehearsal procedures with the children’s choir. Prerequisite: Permission of instructor. LEC.

CHUR 824. Church Music Colloquium IV: Hymnology. 1 Hour.
A study of the historical development of hymnody. Prerequisite: Permission of instructor. LEC.

CHUR 862. Improvisation. 2 Hours.
Applied study in improvisation at the organ. Prerequisite: Permission of instructor. LEC.

CLAR 100. Clarinet. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

CLAR 121. Clarinet. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

CLAR 221. Clarinet. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

CLAR 300. Clarinet. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

CLAR 321. Clarinet. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

CLAR 421. Clarinet. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

CLAR 422. Clarinet. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

CLAR 622. Clarinet. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

CLAR 623. Senior Recital. 1 Hour.
For graduate students not majoring in clarinet. May be repeated for credit. Summer session limit one to three hours. IND.

CLAR 811. Clarinet. 2-4 Hours.
For graduate students majoring in clarinet. May be repeated for credit. Summer session limit one to three hours. IND.

CLAR 921. Seminar. 3 Hours.
A study of clarinet repertoire and performance techniques from 1900 to the present. LEC.

CLAR 922. Seminar. 3 Hours.
A study of clarinet repertoire and performance techniques from 1900 to the present. LEC.

CLAR 923. Seminar. 3 Hours.
A study of clarinet repertoire and performance techniques from 1900 to the present. LEC.

CLAR 961. Directed Performance. 2-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

CLAR 970. D.M.A. Lecture-Recital. 1-4 Hours.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

COND 245. Conducting I. 2 Hours.
An introduction to the principles of conducting through exercises and musical examples designed to develop a specific technical skill. A study of the basic conducting patterns and their application. IND.

COND 345. Conducting II. 2 Hours.
A continuation of COND 245. Prerequisite: COND 245. IND.

COND 711. Choral Conducting I. 1-3 Hours.
Conducting technique, choral musicianship, and choral methods. Prerequisite: MEMT 246, MEMT 330, and/or consent of instructor. RSH.
COND 712. Choral Conducting II. 1-3 Hours.
Continuation of COND 711. RSH.

COND 745. Instrumental Conducting. 2 Hours.
A study of conducting techniques and problems in rehearsal and performance. Score analysis and repertoire development. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

COND 791. Score Reading. 2 Hours.
Development of skills in the reading of all clefs and the most common transpositions. Simultaneous reading of multiple lines and their practical rendition at the piano. May be repeated for credit. RSH.

COND 811. Advanced Choral Conducting. 2-4 Hours.
A study of conducting techniques as they pertain to developing an expressive and precise choral ensemble. Participating in rehearsals under the supervision of instructor. May involve conducting in public performance. May be repeated for credit. Summer semester limited to three hours. Prerequisite: Four hours of conducting and/or consent of instructor. IND.

COND 820. Advanced Choral Conducting and Rehearsal Techniques. 3 Hours.
Refinement of conducting and teaching skills in a choral setting. Focus on relationships between gesture and choral sound, rehearsal structure and optimal learning, and age-appropriate choral literature and development of musicality. (Same as MGMT 820.) LAB.

COND 821. Advanced Score Reading. 2 Hours.
Development of fluency in reading full scores at the piano. May be repeated for credit. Prerequisite: Two semesters of COND 791 or consent of instructor. RSH.

COND 822. Choral Literature - Late Baroque Era to Classical Era. 3 Hours.
LEC.

COND 823. Choral Literature - Romantic Era. 3 Hours.
LEC.

COND 824. Choral Literature - Contemporary Era. 3 Hours.
LEC.

COND 825. Choral Literature - Renaissance. 3 Hours.
The study of literature from the Renaissance to the Early Baroque period. LEC.

COND 845. Advanced Instrumental Conducting. 3 Hours.
A study of techniques needed to project the conductor's concept in rehearsal and performance. Participating in rehearsals under the supervision of the instructor. May involve conducting in public performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

COND 921. Seminar. 3 Hours.
Choral literature from 1450 to 1650. LEC.

COND 931. Seminar. 3 Hours.
Symphonic repertoire. LEC.

COND 932. Seminar. 3 Hours.
Operatic repertoire. LEC.

COND 933. Seminar. 3 Hours.
Solo repertoire with orchestra. LEC.

COND 941. Seminar: Band Literature ______. 3 Hours.
A study of literature for wind band including original works and transcriptions. May be repeated for credit when topic varies. LEC.

COND 946. Directed Performance. 2-4 Hours.
Open only to students who have been admitted to the D.M.A. program in conducting. May be repeated for credit. Summer semester limited to three hours. IND.

COND 965. Doctoral Recitals. 1 Hour.
Maximum credit, four hours. May be repeated for credit. THE.

COND 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in conducting. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

DBBS 100. Double Bass. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

DBBS 120. Double Bass Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin, and violoncello study. May be repeated. LEC.

DBBS 121. Double Bass. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

DBBS 221. Double Bass. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

DBBS 300. Double Bass. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

DBBS 320. Double Bass Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

DBBS 421. Double Bass. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

DBBS 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in the semester the senior recital is being performed and as required by the degree program. Corequisite: DBBS 622. LEC.
DBBS 711. Double Bass. 1-4 Hours.
For graduate students not majoring in double bass. May be repeated for credit. Summer session limit one to three hours. IND.

DBBS 720. Double Bass Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

DBBS 811. Double Bass. 2-4 Hours.
For graduate students majoring in double bass. May be repeated for credit. IND.

EUPH 100. Euphonium. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

EUPH 121. Euphonium. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

EUPH 221. Euphonium. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

EUPH 300. Euphonium. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

EUPH 321. Euphonium. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

EUPH 421. Euphonium. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

EUPH 422. Euphonium. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

EUPH 622. Euphonium. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

EUPH 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: EUPH 622. LEC.

EUPH 711. Euphonium. 1-4 Hours.
For graduate students not majoring in euphonium. May be repeated for credit. Summer session limit one to three hours. IND.

EUPH 811. Euphonium. 2-4 Hours.
For graduate students majoring in euphonium. May be repeated for credit. IND.

FLUT 100. Flute. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

FLUT 121. Flute. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

FLUT 131. Baroque Flute. 1-4 Hours.
One or two lessons per week. For freshmen and sophomores. May be repeated for credit. IND.

FLUT 221. Flute. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

FLUT 300. Flute. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

FLUT 321. Flute. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

FLUT 331. Baroque Flute. 1-4 Hours.
One or two lessons per week. For juniors and seniors. May be repeated for credit. IND.

FLUT 421. Flute. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

FLUT 422. Flute. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

FLUT 622. Flute. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

FLUT 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: FLUT 622. LEC.

FLUT 711. Flute. 1-4 Hours.
For graduate students not majoring in flute. May be repeated for credit. Summer session limit one to three hours. IND.

FLUT 731. Baroque Flute. 1-4 Hours.
May be repeated for credit. IND.

FLUT 811. Flute. 2-4 Hours.
For graduate students majoring in flute. May be repeated for credit. Summer session limit one to three credits. IND.

FLUT 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the baroque flute and recorder during the seventeenth and eighteenth centuries. LEC.

FLUT 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the twentieth century. LEC.

FLUT 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in flute. May be repeated for credit. Summer session limit one to three hours. IND.

FLUT 965. Doctoral Recitals. 1 Hour.
Maximum seven hours credit. May be repeated for credit. THE.
FLUT 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

FRHN 100. French Horn. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

FRHN 121. French Horn. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

FRHN 221. French Horn. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

FRHN 252. Horn Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the horn. May be repeated for credit. IND.

FRHN 300. French Horn. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

FRHN 321. French Horn. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

FRHN 421. French Horn. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

FRHN 422. French Horn. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

FRHN 622. French Horn. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

FRHN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: FRHN 622. LEC.

FRHN 652. Horn Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the horn. May be repeated for credit. IND.

FRHN 711. French Horn. 1-4 Hours.
For graduate students not majoring in French horn. May be repeated for credit. Summer session limit one to three hours. IND.

FRHN 811. French Horn. 2-4 Hours.
For graduate students majoring in French horn. May be repeated for credit. Summer session limit one to three credits. IND.

FRHN 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in French Horn. May be repeated for credit. Summer session limit one to two hours. IND.

FRHN 965. Doctoral Recitals. 1 Hour.
May be repeated for credit. THE.

FRHN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

GUIT 100. Beginning Group Guitar I. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

GUIT 102. Beginning Group Guitar II. 1 Hour.
A continuation of GUIT 100 or for beginning students with considerable music experience. Emphasis on guitar basics, using easy exercises, etudes, chord structure and scales, sight reading, including lead sheets. IND.

GUIT 120. Intermediate Group Guitar. 2 Hours.
A pedagogical approach to guitar literature of medium difficulty. A survey of standard methods, etudes, and literature through group performance and individual assignments. IND.

GUIT 121. Guitar. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

GUIT 122. Advanced Group Guitar. 2 Hours.
A survey of intermediate and advanced etudes as they apply to the representative and corresponding literature. Advanced technical studies. IND.

GUIT 221. Guitar. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

GUIT 300. Guitar. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

GUIT 321. Guitar. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

GUIT 421. Guitar. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

GUIT 422. Guitar. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performing majors. IND.

GUIT 622. Guitar. 1-4 Hours.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.
HARP 100. Harp. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

HARP 120. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 121. Harp. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

HARP 211. Harp. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

Applied music lessons for introductory music majors and non-majors. IND.

HARP 211. Harp. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

HARP 212. Harp. 1-2 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 8 credits. IND.

HARP 311. Harp. 1-2 Hours.
Applied music lessons for sophomores majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 211-level until the music major has accumulated 12 credits. IND.

HARP 312. Harp. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 311-level until the music major has accumulated 12 credits. IND.

HARP 312. Harp. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 311-level until the music major has accumulated 12 credits. IND.

HARP 411. Harp. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 311-level until the music major has accumulated 12 credits. IND.

HARP 412. Harp. 1-2 Hours.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

HARP 421. Harp. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 311-level until the music major has accumulated 12 credits. IND.

HARP 422. Harp. 1-2 Hours.
Applied music lessons for graduate students majoring in music. One or two lessons per week. For graduate students. May be repeated for credit. IND.

HARP 511. Harp. 1-4 Hours.
For graduate students not majoring in harp. May be repeated for credit. Summer session limit one to three hours. IND.

HARP 520. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 581. Harp. 2-4 Hours.
For graduate students majoring in harp. May be repeated for credit. Summer session limit one to three hours. IND.

HPCD 100. Harpsichord. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

HPCD 300. Harpsichord. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

HPCD 621. Harpsichord. 1-4 Hours.
One or two lessons per week. For graduate students. May be repeated for credit. IND.

HPCD 711. Harpsichord. 1-4 Hours.
Summer session limit one to two credits. May be repeated for credit. IND.

JAZZ 105. Jazz Theory. 2 Hours.
An introduction to jazz harmony: Scales, modes, chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines. Prerequisite: MTHC 105 or consent of instructor. ACT.

JAZZ 208. Jazz Ensemble. 0-1 Hours.
For freshmen and sophomores. A performance laboratory specializing in the preparation and presentation of jazz compositions and arrangements. Designed to provide today's student musician with the background and skills necessary to function successfully as a professional studio musician, or as a teacher of popular jazz music. May be repeated for credit. Prerequisite: Consent of director. ACT.

JAZZ 209. Jazz Combo. 0-1 Hours.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.

JAZZ 212. Vocal Jazz Ensemble. 0-1 Hours.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. May be repeated for credit. ACT.

JAZZ 224. Jazz Improvisation I. 2 Hours.
Study of techniques involved in jazz improvisation, including application of chord/scale relationships to basic blues and II-V-I chord progressions; transcriptions of recorded jazz solos; and memorization of jazz standards and patterns. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 225. Jazz Improvisation II. 2 Hours.
Study of advanced techniques in jazz improvisation, including third relationships, Coltrane changes, advanced reharmonization and altered pentatonic patterns and scales. Continuation of solo transcriptions, patterns and jazz standard memorization from Jazz Improvisation I. Prerequisite: JAZZ 224 or JAZZ 624 or permission of instructor. ACT.

JAZZ 230. Introduction to Jazz Piano. 2 Hours.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 305. Jazz Theory. 2 Hours.
An introduction to jazz harmony: Scales, modes, chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines. Prerequisite: MTHC 105 or consent of instructor. ACT.

JAZZ 409. Jazz Combo. 0-1 Hours.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.
**JAZZ 459. Jazz Arranging. 2 Hours.**  
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections. Prerequisite: JAZZ 105 or JAZZ 305 and JAZZ 230 or permission of instructor. ACT.

**JAZZ 608. Jazz Ensemble. 0-1 Hours.**  
For juniors, seniors, and graduate students. May be repeated for credit. ACT.

**JAZZ 612. Vocal Jazz Ensemble. 0-1 Hours.**  
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. For juniors, seniors, and graduate students. May be repeated for credit. ACT.

**JAZZ 624. Jazz Improvisation I. 2 Hours.**  
Study of techniques involved in jazz improvisation, including application of chord/scale relationships to basic blues and II-V-I chord progressions; transcriptions of recorded jazz solos; and memorization of jazz standards and patterns. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. LAB.

**JAZZ 625. Jazz Improvisation II. 2 Hours.**  
Study of advanced techniques in jazz improvisation, including third relationships, Coltrane changes, advanced reharmonization and altered pentatonic patterns and scales. Continuation of solo transcriptions, patterns and jazz standard memorization from Jazz Improvisation I. Prerequisite: JAZZ 224 or JAZZ 624 or permission of instructor. ACT.

**JAZZ 630. Introduction to Jazz Piano. 2 Hours.**  
Study of common jazz piano chord voicings, including two hand block choral voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

**JAZZ 659. Jazz Arranging. 2 Hours.**  
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections. Prerequisite: JAZZ 105 or JAZZ 305 and JAZZ 230 or permission of instructor. ACT.

**MEMT 111. Class Guitar for Nonmajors. 2 Hours.**  
Common chords, major and minor triads and major-minor sevenths, and fundamentals of music notation for guitar. Strumming and rudimentary finger picking. Performance of simple melodies on all six strings from standard notation. May be repeated for credit. IND.

**MEMT 112. Performance Media: _____ 0.5-1 Hours.**  
Laboratory class lessons in pedagogy and performance. May be repeated for credit in different specific media. LAB.

**MEMT 113. Performance Media: Brass. 1 Hour.**  
Knowledge and skills needed to teach brass instruments in music education settings. LAB.

**MEMT 114. Performance Media: Woodwinds. 1 Hour.**  
Knowledge and skills needed to teach woodwind instruments in music education settings. LAB.

**MEMT 115. Performance Media: Percussion. 1 Hour.**  
Knowledge and skills needed to teach and use percussion instruments in music education settings. LAB.

**MEMT 116. Performance Media: Computers, Synthesizers, and Electronics. 1 Hour.**  
Knowledge and skills needed to teach and use computers, synthesizers, and electronics. LAB.

**MEMT 118. Performance Media: Strings. 1 Hour.**  
Knowledge and skills needed to teach string instruments in music education settings. LAB.

**MEMT 119. Performance Media: Guitar. 1 Hour.**  
Knowledge and skills needed to teach and use guitar functionally in music education and music therapy settings. LAB.

**MEMT 120. Vocal Performance in English. 0-1 Hours.**  
Fundamentals of solo vocal performance with an emphasis on American diction and communicating the English language. IND.

**MEMT 150. Introduction to Music Therapy. 3 Hours.**  
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

**MEMT 160. Principles of Music Education. 1 Hour.**  
An overview of the music education field. History, philosophy, curricula, necessary skills and competencies for music educators, and alternative careers in music. LEC.

**MEMT 196. Group Leadership Skills in Music Therapy. 2 Hours.**  
Music therapy group leadership skills; leading group singing, playing accompanying instruments, and developing effective delivery skills. Prerequisite: MEMT 150 Introduction to Music Therapy/MEMT 760 Principles of Music Therapy. LEC.

**MEMT 229. Performance Clinic: _____ 1 Hour.**  
Designed to provide students with opportunities to sing and play instruments other than their principal instrument in ensembles. Materials chosen for suitability for secondary school ensembles. Techniques for care and maintenance of the voice and instruments. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

**MEMT 230. Performance Clinic: Band. 1 Hour.**  
Continued development of the knowledge and skills needed to teach band in music education settings. Prerequisite: MEMT 113 and MEMT 114, or MEMT 113 and MEMT 115, or MEMT 114 and MEMT 115, or permission of the instructor. LAB.

**MEMT 231. Performance Clinic: Choral. 1 Hour.**  
Continued development of the knowledge and skills needed to teach and use the singing voice in music education and music therapy settings. LAB.

**MEMT 232. Performance Clinic: Orchestra. 1 Hour.**  
Continued development of the knowledge and skills needed to teach string instruments in music education settings. Prerequisite: MEMT 118 or permission of the instructor. LAB.

**MEMT 246. Fundamentals of Conducting. 1 Hour.**  
This course deals with the techniques of the baton, with gestures, signs, and cures as generally used in conducting choral and instrumental organizations. It includes the essentials of conducting techniques in both the choral and instrumental types of ensemble performance. LAB.

**MEMT 250. Human Musical Learning and Development. 2 Hours.**  
Music learning and development from infancy through adulthood. Development of musical perception, cognition, performance skills, attitudes, and affective/aesthetic responses. Use of theoretical, knowledge-based rationale for building music instruction systems. LEC.

**MEMT 251. Clinical Techniques for Children. 3 Hours.**  
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring/evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. Prerequisite: MEMT 250. Corequisite: SPED 326. LEC.
MEMT 296. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring/evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 311. Intermediate Class Guitar. 2 Hours.
Instruction in playing barre chords, blues and Latin strums, major and minor scales, position studies, and special effects such as the Travis pick, hammer on, and slurring techniques. Prerequisite: MEMT 116-Guitar; or MEMT 111; or permission of instructor. IND.

MEMT 329. Rehearsal/Conducting Clinic: ____. 1 Hour.
Rehearsing and conducting ensembles appropriate for music education and music therapy. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

MEMT 330. Rehearsal/Conducting Clinic: Band. 1 Hour. GE22.
Knowledge and skills needed to rehearse and conduct band ensembles. Prerequisite: MEMT 230 and MEMT 246 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 331. Rehearsal/Conducting Clinic: Choral. 1 Hour. GE22.
Knowledge and skills needed to rehearse and conduct choral ensembles. Prerequisite: MEMT 231 and MEMT 246 for Music Education majors or MEMT 231. Corequisite: MEMT 246 for Music Therapy majors or permission of the instructor. LAB.

MEMT 332. Rehearsal/Conducting Clinic: Orchestra. 1 Hour. GE22.
Knowledge and skills needed to rehearse and conduct orchestral ensembles. Prerequisite: MEMT 232 and MEMT 246, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 341. Instructional Strategies in Music for Elementary Classroom Teachers. 2 Hours.
Child growth and development in music. Materials as they relate to a sequential music education curriculum in the elementary school. Prerequisite: Admission to the School of Education or the education division of the graduate school. LEC.

MEMT 349. Advanced Rehearsal/Conducting Clinic: ____. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct ensembles, including attention to more difficult literature with ensembles exhibiting increasing sophistication. May be repeated for credit. Prerequisite: Admission into Music Education Professional Sequence and with permission of the MEMT division. LAB.

MEMT 350. Advanced Rehearsal/Conducting Clinic: Band. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct band ensembles, including attention to more difficult concert band literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 330 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 351. Advanced Rehearsal/Conducting Clinic: Choral. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct choral ensembles, including attention to more difficult choral literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 331 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 352. Advanced Rehearsal/Conducting Clinic: Orchestra. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct string orchestra ensembles, including attention to more difficult string orchestra literature with ensembles exhibiting increasing sophistication.

Prerequisite: MEMT 332 and admission into Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 366. Introduction to Research in Music Therapy and Music Education. 2 Hours.
Investigative techniques in music therapy and music education with emphasis on small group and case study design and analysis. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

Theories and techniques for managing the music classroom and clinic setting for best professional practice. Understanding the self and environment as management factors. Field practice of management techniques. Prerequisite: MEMT 250 and admission into the Music Education Professional Sequence or Music Therapy Professional Sequence; or with permission from the MEMT Division. LEC.

MEMT 396. Clinical Practicum. 1-3 Hours.
Supervised clinical practice in on-campus or other approved setting. May be repeated for credit. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. FLD.

MEMT 407. The Exceptional Child in Music Education. 2 Hours.
Knowledge and knowledge needed to facilitate appropriate and productive integration of exceptional children and youth into music classroom settings. Prerequisite: MEMT 367, SPED 326, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 408. Vocal Pedagogy. 1 Hour.
Knowledge and skills needed to teach voice, with particular attention to lifespan voice anatomy, physiology, and acoustics, diagnosis and correction of vocal inefficiencies, teaching styles, repertoire choice, professional development, and acquaintance with current research in voice science and vocal pedagogy. Includes a voice teaching practicum. (Same as VOIC 408.) Prerequisite: MEMT 160, MEMT 231, MEMT 331 and admission into the Music Education Professional Sequence or the Music Therapy Professional Sequence; or with permission from the MEMT division. LEC.

MEMT 420. Teaching Elementary and Secondary General Music. 3 Hours.
Methods and materials for teaching music through singing, playing instruments, moving, listening, and creative activities to students in early childhood through adulthood, including those with disabilities. The course will also deal with music in diverse cultures and integrating music into the general curriculum. Prerequisite: MEMT 367 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 421. Advanced General Music Teaching. 1 Hour.
Enhanced methodology and pedagogy course for the general music classroom; advanced instruction in teaching children to improvise, sing, play classroom instruments, listen, move, and create music based on specific pedagogies; advanced instruction in assessment strategies. This course is for undergraduate music majors in their senior year. Prerequisite: MEMT 420 and admission to the Music Education Professional Sequence. LEC.

MEMT 431. Choral Diction for Music Educators. 1 Hour.
Knowledge and skills needed to teach choral diction in music education settings. Prerequisite: Admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.
MEMT 432. Approaches to String Pedagogy. 1 Hour.
An examination of the concepts and skills associated with the most influential past and current pedagogical approaches to string education. Prerequisite: Admission to the Music Education Professional Sequence. LEC.

MEMT 433. Jazz Techniques. 1 Hour.
Knowledge and skills needed to teach jazz techniques in music education settings. Prerequisite: Admission to the Music Education Professional Sequence. LEC.

MEMT 435. Marching Band Techniques. 1 Hour.
Knowledge and skills needed to teach and administer marching bands in music education settings. Prerequisite: Admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 450. Teaching Choral Music. 2 Hours.
Application of research-based skills for curriculum development, content selection, and development of teaching strategies for choral music programs to students in early childhood through adulthood including those with disabilities. Prerequisite: MEMT 331, MEMT 420, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 451. Teaching Instrumental Music. 2 Hours.
Application of research-based skills for curriculum development, content selection, and development of teaching strategies for instrumental music programs to students in early childhood through adulthood including those with disabilities. Prerequisite: MEMT 330, MEMT 420, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 454. Psychological Foundations of Musical Behavior II. 2 Hours.
Laboratory and field research in psychology of music. Prerequisite: MEMT 453 or concurrent enrollment. LEC.

MEMT 455. Psychology of Music. 3 Hours.
Psychological bases of music and human musical behavior. Study of musical sound perception, cognition, response, reproduction, and creation. Room Acoustics are studied. Research projects required. Prerequisite: MEMT 367, MEMT 420 (music education majors); and admission into the Music Education Professional Sequence or the Music Therapy Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 463. Approaches to String Pedagogy. 1 Hour.
This seminar style course will focus on supervision, Ethics, and Professional Involvement in AMTA. Prerequisite: MEMT 586. LEC.

MEMT 472. Music Education and Music Therapy Research Project. 1-3 Hours.
Clinical, laboratory, field, or historical research in music education or music therapy. May be repeated for credit. Prerequisite: MEMT 366 or equivalent, and permission of instructor. RSH.

MEMT 497. Independent Study in: _____. 1-4 Hours.
Only one enrollment permitted each semester; a maximum of four hours will apply toward the bachelor's degree. May be repeated for credit. Prerequisite: Recommendation of advisor and consent of instructor. IND.

MEMT 498. Student Teaching. 2-4 Hours. AE61.
A supervised teaching experience in an approved school setting, with level and subject area to be selected from either elementary general music or a secondary teaching area not covered in MEMT 496. This experience is a minimum of five weeks full time experience. It will begin the spring of the Senior Year right after the new year. Prerequisite: Admission into the Music Education Professional Sequence and MEMT 496. LEC.

MEMT 499. Internship in Teaching Music. 4-8 Hours. AE61.
A supervised internship experience leading to initial music teacher certification. The student assumes the total professional role as a teacher of music in an approved school setting with level and subject area to be the remaining area not experienced in MEMT 496 or MEMT 498. This experience is a minimum of twelve weeks full time experience. Prerequisite: Admission into the Music Education Professional Sequence and either completion of or concurrent enrollment with MEMT 498. LEC.

MEMT 500. Student Teaching in: _____. 1-6 Hours.
A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. May be repeated for credit. Prerequisite: Admission to the Student Teaching program. FLD.

MEMT 586. Seminar in Music Therapy Professional Development I. 1 Hour.
This seminar style course will focus on Internship Placement, Board Certification, and Professional Advocacy. Undergraduate Prerequisite: MEMT 463 and MEMT 464. Graduate Corequisite: MEMT 763 and MEMT 764. LEC.

MEMT 587. Seminar in Music Therapy Professional Development II. 1 Hour.
This seminar style course will focus on supervision, Ethics, and Professional Involvement in AMTA. Prerequisite: MEMT 586. LEC.

Successful completion of six months of full-time clinical experience (minimum of 1,040 hours) as a music therapy intern in an approved setting. May be repeated for credit. Prerequisite: Completion of senior year in music therapy or its equivalent at the graduate level. FLD.

MEMT 597. Individual Study in: _____. 1-15 Hours.
Successful completion of six months of full time clinical experience (minimum of 1040 hours) as a music therapy intern in an approved setting. May be repeated for credit. Prerequisite: Completion of senior year in music therapy or its equivalent at the graduate level. IND.

MEMT 598. Special Course: _____. 1-5 Hours.
A special course of study to meet current needs of education students -- primarily for undergraduates. May be repeated for credit. LEC.

MEMT 616. Advanced Pedagogy and Materials: _____. 1 Hour.
(FS) Techniques and materials appropriate for instruction in musical media. May be repeated for credit in different specific media. LAB.
MEMT 651. Sociocultural Influences on Musical Behavior. 3 Hours.
Cultural and social determinants of musical behavior. Musical value systems in contemporary cultures. Prerequisite: MTHC 214 or MEMT 341 or permission of instructor. LEC.

MEMT 670. Acoustics of Music. 3 Hours.
Study of physical aspects of sound, stressing the production, reproduction, transmission, and reception of musical sounds. Acoustics of musical instruments and auditoria, systems of tuning, wave phenomena in musical environments, behavior of the ear, and electrical analysis, synthesis, and recording are included. Laboratory. LEC.

MEMT 695. Developing Theoretical Framework for Evidence-Based Practice. 3 Hours.
The purpose of this course is to provide music therapy majors with the tools to read, evaluate, understand, and facilitate research in order to develop a theoretical framework for decision making in evidence based clinical practice. Prerequisite: MEMT 464 Music in Therapy or MEMT 764 Music in Therapy and admission to the Music Therapy Professional Sequence. LEC.

MEMT 707. Mainstreaming/Inclusion in Music Education. 2 Hours.
Skills and knowledge needed to facilitate appropriate and productive integration of children and youth with disabilities into music classroom settings. Prerequisite: MEMT 500 and SPED 431. LEC.

MEMT 710. Professional Development. 1 Hour.
Participation in approved professional development conferences. Requires documentation of attendance, an annotated time log of activities, and a short paper. May be repeated for up to 3 credit hours. FLD.

MEMT 711. Emerging Technologies for Choral Teaching and Learning. 2-3 Hours.
Applications of current digital and electronic technologies to choral ensemble teaching and learning. LEC.

MEMT 750. Measurement in Music Education Professional Practice. 3 Hours.
Skills and knowledge needed by professional music educators to assess and evaluate students, learning, instruction, curriculum, and programs. Measurement and evaluation techniques for cognitive, affective, and psychomotor learning in music. Criterion and norm reference measures in formative and summative evaluation. Use of evaluation data for improving instruction, curriculum, and program. Standardized tests. Reporting and interpreting evaluation results. LEC.

MEMT 753. Psychology and Acoustics of Music. 5 Hours.
Psychological and acoustical bases of music and human musical behavior. Study of musical sound production, transmission, perception, cognition, response, and reproduction. Laboratory component and research project required. LEC.

MEMT 760. Principles of Music Therapy. 3 Hours.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

MEMT 761. Clinical Techniques for Children. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 762. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 763. The Influence of Music on Behavior I. 3 Hours.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 764. Music In Therapy. 3 Hours.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, and evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 770. Measurement/Inclusion in Music Education. 2 Hours.
Skills and knowledge needed to facilitate appropriate and productive integration of children and youth with disabilities into music classroom settings. Prerequisite: MEMT 500 and SPED 431. LEC.

MEMT 711. Emerging Technologies for Choral Teaching and Learning. 2-3 Hours.
Applications of current digital and electronic technologies to choral ensemble teaching and learning. LEC.

MEMT 750. Measurement in Music Education Professional Practice. 3 Hours.
Skills and knowledge needed by professional music educators to assess and evaluate students, learning, instruction, curriculum, and programs. Measurement and evaluation techniques for cognitive, affective, and psychomotor learning in music. Criterion and norm reference measures in formative and summative evaluation. Use of evaluation data for improving instruction, curriculum, and program. Standardized tests. Reporting and interpreting evaluation results. LEC.

MEMT 753. Psychology and Acoustics of Music. 5 Hours.
Psychological and acoustical bases of music and human musical behavior. Study of musical sound production, transmission, perception, cognition, response, and reproduction. Laboratory component and research project required. LEC.

MEMT 760. Principles of Music Therapy. 3 Hours.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

MEMT 761. Clinical Techniques for Children. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 762. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 763. The Influence of Music on Behavior I. 3 Hours.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 764. Music In Therapy. 3 Hours.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, and evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 770. Measurement/Inclusion in Music Education. 2 Hours.
Skills and knowledge needed to facilitate appropriate and productive integration of children and youth with disabilities into music classroom settings. Prerequisite: MEMT 500 and SPED 431. LEC.

MEMT 711. Emerging Technologies for Choral Teaching and Learning. 2-3 Hours.
Applications of current digital and electronic technologies to choral ensemble teaching and learning. LEC.

MEMT 750. Measurement in Music Education Professional Practice. 3 Hours.
Skills and knowledge needed by professional music educators to assess and evaluate students, learning, instruction, curriculum, and programs. Measurement and evaluation techniques for cognitive, affective, and psychomotor learning in music. Criterion and norm reference measures in formative and summative evaluation. Use of evaluation data for improving instruction, curriculum, and program. Standardized tests. Reporting and interpreting evaluation results. LEC.

MEMT 753. Psychology and Acoustics of Music. 5 Hours.
Psychological and acoustical bases of music and human musical behavior. Study of musical sound production, transmission, perception, cognition, response, and reproduction. Laboratory component and research project required. LEC.

MEMT 760. Principles of Music Therapy. 3 Hours.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

MEMT 761. Clinical Techniques for Children. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 762. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 763. The Influence of Music on Behavior I. 3 Hours.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 764. Music In Therapy. 3 Hours.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, and evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 770. Measurement/Inclusion in Music Education. 2 Hours.
Skills and knowledge needed to facilitate appropriate and productive integration of children and youth with disabilities into music classroom settings. Prerequisite: MEMT 500 and SPED 431. LEC.

MEMT 711. Emerging Technologies for Choral Teaching and Learning. 2-3 Hours.
Applications of current digital and electronic technologies to choral ensemble teaching and learning. LEC.

MEMT 750. Measurement in Music Education Professional Practice. 3 Hours.
Skills and knowledge needed by professional music educators to assess and evaluate students, learning, instruction, curriculum, and programs. Measurement and evaluation techniques for cognitive, affective, and psychomotor learning in music. Criterion and norm reference measures in formative and summative evaluation. Use of evaluation data for improving instruction, curriculum, and program. Standardized tests. Reporting and interpreting evaluation results. LEC.

MEMT 753. Psychology and Acoustics of Music. 5 Hours.
Psychological and acoustical bases of music and human musical behavior. Study of musical sound production, transmission, perception, cognition, response, and reproduction. Laboratory component and research project required. LEC.

MEMT 760. Principles of Music Therapy. 3 Hours.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

MEMT 761. Clinical Techniques for Children. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 762. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 763. The Influence of Music on Behavior I. 3 Hours.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 764. Music In Therapy. 3 Hours.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, and evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.
MEMT 816. Current Trends in Music Education. 3 Hours.
A comprehensive study of the elements that contribute to current practice and successful music programs (many of all of these may be anticipated dependent upon the class participants' needs): curriculum, standards, assessment, classroom management, pedagogy, leadership, organizational structure, budget and finance, scheduling, federal mandates, and administrative practices. LEC.

MEMT 817. Methodologies in Music Education. 3 Hours.
A survey of music methodologies (general, vocal, instrumental) used by teachers at the pre-school, elementary, middle/junior high, and high school levels. LEC.

MEMT 818. Behavior Management in Music. 3 Hours.
A study of behavioral theories and techniques as applied to classroom and clinical settings for music professionals. Emphasis on a conceptual framework for human behavior and the ameliorative aspects of music. LEC.

MEMT 819. Music in Early Childhood. 2 Hours.
Child development as related to musical development, including implications for participation in music from birth through age seven. Current trends in goals, objectives, materials, equipment, facilities, training and evaluation will be discussed. LEC.

MEMT 820. Advanced Choral Conducting and Rehearsal Techniques. 3 Hours.
Refinement of conducting and teaching skills in a choral setting. Focus on relationships between gesture and choral sound, rehearsal structure and optimal learning, and age-appropriate choral literature and development of musicality. (Same as COND 820.) LAB.

MEMT 823. Seminar in: ____. 1-3 Hours.
May be repeated for credit. LEC.

MEMT 825. Choral Diction. 3 Hours.
Study of methods to teach and learn diction in choral music contexts. Attention to International Phonetic Alphabet, acoustic implications of particular phonemes, and contributions of emerging technologies. Application of various languages, including English, Latin, Italian, French, German, and Spanish. (Same as CHOR 825.) LEC.

MEMT 826. Adolescent Changing Voices. 3 Hours.
Scientific approaches to the pedagogy of adolescent male and female voices during voice change. (Same as CHOR 826.) LEC.

MEMT 827. Children's Voices. 3 Hours.
Scientific approaches to understanding and working with unchanged children's voices. (Same as CHOR 827.) LEC.

MEMT 828. Science-based Voice Education. 3-6 Hours.
Comprehensive examination of vocal anatomy, respiration, phonation, resonance, articulation, and voice development, with particular attention to research-based vocal/choral pedagogies for working with child through senior adult voices. (Same as CHOR 828.) Prerequisite: Permission of instructor. LEC.

MEMT 830. Leadership and Program Development in Music Education. 2-3 Hours.
A comprehensive study of the elements of management, leadership, organizational structure, budget and finance, federal mandates, and administrative practices. LEC.

MEMT 835. Practical Applications of Advanced Methodology in the Music Classroom. 2-3 Hours.
A comprehensive study and application of the elements that contribute to current practice in methodology and pedagogy in the music classroom, encompassing elementary general, choral, orchestral, and band music. LEC.

MEMT 838. Orff Applications in Music Education and Music Therapy. 2 Hours.
The use of the Orff-Shulwerk approach in music education and music therapy. Course includes historical background, philosophical approach and practical application of the process. Prerequisite: Admission to professional sequence or permission from MEMT division. LEC.

MEMT 840. Development and Application of Improvisation Skills. 2-3 Hours.
Development of individual and group improvisation skills and their applications in professional practice. LEC.

MEMT 845. Curriculum Development in Music Education. 3 Hours.
Developing a practical and useful music curriculum that aligns theoretical/philosophical position, program goals, course objectives, instructional materials, learning activities, and assessments. LEC.

MEMT 850. Measurement of Musical Behavior. 3 Hours.
Measurement theory applied to the development and administration of measures of musical ability, achievement, attitude, and performance for the use in individual and program evaluation. Classical and innovative methods for establishing reliability and validity. Each student will develop and evaluate a measure of some type of musical behavior appropriate for an educational or therapeutic setting. LEC.

MEMT 854. Music Therapy in Pediatrics. 2 Hours.
The use of music therapy in individual and group pediatric settings. Course includes an overview of childhood illnesses, associated medical terminology, and therapy techniques used as contextual and procedural support. Prerequisite: Admission to professional sequence or permission from MEMT division. LEC.

MEMT 855. Music Therapy in Hospice and Bereavement. 2 Hours.
The use of music therapy for hospice patients and their families, as well as clients who are grieving due to death of a loved one. Course includes historical, theoretical and practical perspectives. Prerequisite: Admission to professional sequence or permission from MEMT division. LEC.

MEMT 856. Neurologic Music Therapy. 2 Hours.
The scientific basis for the neurological influence of music on behaviors in physical functioning and cognitive functioning will be explored in rehabilitation and learning models. Clinical experience will be included. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor. FLD.

MEMT 857. Music Therapy in Gerontology. 2 Hours.
The theories and clinical applications of music therapy across the life span of older adults, including the young old, the middle old, and the old old. Special considerations will be given to persons with debilitating conditions including dementia, and to older persons' professional and family caregivers. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor. FLD.

MEMT 858. Music Therapy in Medical Care and Wellness of Adult Persons. 2 Hours.
The theories and practice of music therapy as enhancement to health and wellness and to medical interventions for adults will include applications within the medical setting and in the home setting. Interventions will include, among others, approaches for stress management, medical procedural support, pre-operative and post-operative support, follow-up care in catastrophic illness, interventions in post-traumatic stress disorder, and others. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor. FLD.
MEMT 860. Assessment in Music Therapy Professional Practice. 2 Hours.
Skills and knowledge needed to assess and evaluate clients, goals, treatments and their effectiveness, program outcomes, program quality, and quality of care. LEC.

MEMT 861. Current Trends in Music Therapy. 2 Hours.
A comprehensive study of the elements that contribute to current practice in music therapy, but not limited to, professional competencies, code of ethics, assessment and implementation of interventions, leadership, organizational structure, budget and finance, scheduling and management of contracts, grant writing, and other administrative practices. FLD.

MEMT 863. The Influence of Music on Behavior II. 2 Hours.
A laboratory and research course to accompany or follow MEMT 763. LAB.

MEMT 864. Philosophy and Theory of Music Therapy. 3 Hours.
Concentrated, interdisciplinary study of conceptual foundations for music therapy. LEC.

MEMT 890. Practicum in Music Therapy. 1-16 Hours.
Advanced music therapy practice including clinical work with a population of the student's choice which incorporates music therapy program design, implementation, and evaluation. The student will work in consultation with qualified Music Therapy staff. May be repeated for credit. FLD.

MEMT 891. Advanced Clinical Techniques. 3 Hours.
The student will articulate, test and refine music therapy clinical practice protocol(s) with a clientele(s) of choice. Students will work in consultation with qualified Music Therapy staff. FLD.

MEMT 892. Supervision in Music Therapy I. 3 Hours.
Study and application of theoretical models and supervisory roles applicable to music therapy clinical supervision. Students will review developmental levels for supervisors and practicum students. Supervision of music therapy clinical practicum students will be required. LEC.

MEMT 893. Supervision in Music Therapy II. 3 Hours.
A model of practicum supervision will be applied in music therapy clinical practicum supervision. Video and/or tape recordings of supervision conferences with practicum students will be reviewed in consultation with qualified music therapy staff. LEC.

MEMT 895. Master's Project. 1-3 Hours.
May be repeated for credit. RSH.

MEMT 897. Independent Study: ______. 1-4 Hours.
May be repeated for credit. Graded on satisfactory/unsatisfactory basis. Prerequisite: Consent of advisor and instructor. RSH.

MEMT 898. Comprehensive Examination. 1 Hour.
An independent course in preparation for the non-thesis M.M.E. degree final examination. The grade will be S or U as determined by performance on the examination. Graded on satisfactory/unsatisfactory basis. Prerequisite: Permission of the instructor. IN.

MEMT 899. Master's Thesis. 1-6 Hours.
May be repeated for credit. THE.

MEMT 900. Learning Theories and Music Education. 3 Hours.
(V) A broad survey of formal learning theories and other approaches to the teaching-learning situation, accenting implications for, applications to, and research needs in music education. LEC.

MEMT 911. Administration of Music Education Programs. 3 Hours.
A study of the administration of music education programs at all school levels; topics will include personnel, finance, curriculum, supervision, and articulation of the music program with other segments of the school and community. LEC.

MEMT 915. Teaching Music in Higher Education. 3 Hours.
Knowledge, skills, and dispositions for graduate students in music who are preparing to teach at the college level. This course is directed toward the end of developing competencies and understandings that will contribute to one's becoming an effective college/university teacher. LEC.

MEMT 920. Doctoral Seminar in Music Education and Music Therapy. 0-1 Hours.
This course will emphasize strategies and skills for successful completion of the doctoral program, as well as strategies and skills to prepare doctoral students to contribute to the profession as college teachers, researchers, master teachers, and arts administrators. Course may be repeated for zero credit. LEC.

MEMT 923. Seminar in ______. 1-3 Hours.
Graded on a satisfactory/unsatisfactory basis. May be repeated for credit.

MEMT 935. Advanced Acoustical and Psychological Aspects of Musical Behavior. 3 Hours.
Study and experimental investigation of acoustical, psychoacoustical, and psychological phenomena as they influence music. Attention will be given to physical parameters; estimation of pitch, loudness, and timbre; magnitude estimation; theories of consonance; experimental aesthetics; and measurement and prediction of musical ability. Each student will be expected to complete an experiment or quasi-experiment related to human musical behavior. (Same as PSYC 853.) Prerequisite: MEMT 453 or equivalent, or permission of instructor. LEC.

MEMT 956. Advanced Methods in Experimental and Descriptive Research in Music. 3 Hours.
An advanced study of experimental and descriptive research techniques with careful investigation of research design, experimental control, analysis and manuscript composition. Consideration of recent trends in research methods and their place in the scholarly schemata will be reviewed. Prerequisite: MEMT 812 or permission of instructor. LEC.

MEMT 972. Research in Music Education. 2-5 Hours.
For students who are sufficiently qualified to conduct original investigations in this field. Consent of instructor necessary. May be repeated for credit. IND.

MEMT 980. Advanced Topics: ______. 1-3 Hours.
A special course of study to meet current needs of education professionals -- primarily for post-master's level students. May be repeated for credit. IND.

MEMT 995. Field Experience in: ______. 1-5 Hours.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. May be repeated for credit. FLD.

MEMT 996. Practicum in College Teaching. 1-3 Hours.
College teaching experience, guided by a major professor in the department. Open only to doctoral aspirants or candidates. FLD.

MEMT 997. Individual Study: ______. 1-4 Hours.
May be repeated for credit. Graded on satisfactory/unsatisfactory basis. Prerequisite: Prior graduate course work in the area of study and consent of Instructor. IND.
MEMT 998. Seminar in: _____. 1-4 Hours.
May be repeated for credit. Graded on satisfactory/unsatisfactory basis. LEC.

MEMT 999. Doctoral Dissertation. 1-15 Hours.
May be repeated for credit. THE.

MTHC 99. Fundamentals of Music. 2 Hours.
An intensive study of music fundamentals. Open to music majors only. LEC.

MTHC 105. Theory I. 4 Hours.
The first semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Prerequisite: Music major or consent of instructor. LEC.

MTHC 115. Theory II. 4 Hours. GE11.
The second semester of an integrated two-year theory sequence that examines the harmonic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Prerequisite: MTHC 105. LEC.

MTHC 150. Introduction to Music Theory: Reading, Listening, Composing. 3 Hours.
An introductory course for non-music majors, emphasizing western art and vernacular styles of music. Students will participate in and interact with various parameters of music through the acquisition of basic musical skills. For freshmen and sophomores. LEC.

MTHC 205. Theory III. 4 Hours. GE11.
The third semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Prerequisite: MTHC 115. LEC.

MTHC 253. Composition. 2 Hours.
For music theory and composition majors. Creative writing using basic concepts in harmony, melody, and form. May be repeated for credit. Prerequisite: MTHC 115. IND.

MTHC 315. Theory IV. 4 Hours.
The fourth semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Prerequisite: MTHC 205. LEC.

MTHC 316. Tonal Form and Post-Tonal Techniques. 4 Hours.
A study of musical forms from the common practice period through the present day and analytical techniques for post-tonal music. The class is designed for music education and music therapy majors. Prerequisite: MTHC 205, music education, or music therapy major. LEC.

MTHC 350. Introduction to Music Theory: Reading, Listening, Composing. 3 Hours.
An introductory course for non-music majors, emphasizing western art and vernacular styles of music. Students will participate in and interact with various parameters of music through the acquisition of basic musical skills. For juniors and seniors. LEC.

MTHC 355. Readings in Music Theory: _____. 1-4 Hours.
Investigation of a subject by means of directed readings using primary scholarly sources. May be repeated for credit. Prerequisite: Consent of instructor. LEC.

MTHC 400. Graduate Review: Written Theory. 1 Hour.
A review of basic harmonic and voice-leading principles relevant to the common-practice period. For graduate students deficient in undergraduate harmonic theory. LEC.

MTHC 402. Graduate Review: Aural Skills. 1 Hour.
A review of aural and sight-reading skills relevant to the common-practice period. For graduate students deficient in undergraduate aural theory. LEC.

MTHC 410. Tonal Forms. 3 Hours.
Phrase structure and formal design in common-practice tonal music. Structural analysis of binary, ternary, rondo, sonata, variations, and contrapuntal, and multi-movement forms. Prerequisite: MTHC 205. LEC.

MTHC 432. Introduction to the Analysis Contemporary Music. 3 Hours.
Introductory course in the sequence, presenting the basic tools of post-tonal and 20th century composition, including, serial techniques, set theory, extended tertian harmony, minimalist techniques, contemporary tonality and other trends. Exploration of form and complex rhythmic structures as well as aural skills appropriate to the subject matter. Prerequisite: MTHC 315. LEC.

MTHC 433. Advanced Analysis of Contemporary Music. 3 Hours.
Analysis seminar, emphasizing intense study of larger contemporary works, using techniques learned in the first course (MTHC 732). Further content will vary according to the instructor. Includes aural skills work appropriate to the subject matter. Prerequisite: MTHC 432. LEC.

MTHC 459. Scoring for Field Band. 2 Hours.
Primary voicings and textural possibilities for wind and percussion instruments will be stressed as these resources relate to the arranging of music for marching and pep bands at the secondary level. (Same as BAND 459.) Prerequisite: MTHC 205. LEC.

MTHC 485. Composing and Arranging for Educational Ensembles. 2 Hours.
For music majors interested in learning to write for primary and secondary educational performing groups. Emphasizes conventional tonal practices and idiomatic, accessible writing for young players. Prerequisite: MTHC 205, MTHC 484, and MTHC 459. IND.

MTHC 498. Undergraduate Recital. 1 Hour. AE61.
Composition recital for undergraduate music composition majors. Prerequisite: Permission of instructor. IND.

MTHC 499. Senior Research Project. 1-4 Hours. AE61.
For seniors majoring in music theory who will normally enroll for two credits in each of the last two semesters. Students will write a scholarly paper on an approved topic. May be repeated for credit. IND.

MTHC 541. Eighteenth-Century Counterpoint. 3 Hours.
A study of eighteenth century style with analysis and original work. Prerequisite: MTHC 205. LEC.

MTHC 542. Sixteenth-Century Counterpoint. 3 Hours.
A study of sixteenth-century style with analysis and original work. Prerequisite: MTHC 541. LEC.

MTHC 543. Advanced Analysis of Contemporary Music. 3 Hours.
Analysis seminar, emphasizing intense study of larger contemporary works, using techniques learned in the first course (MTHC 732). Further content will vary according to the instructor. Includes aural skills work appropriate to the subject matter. Prerequisite: MTHC 432. LEC.

MTHC 559. Scoring for Concert Band. 2 Hours.
Curriculum includes idiomatic writing, tonal balance, scoring for large percussion sections, and analysis of wind colors and instrumental combinations found in music of Holst, Vaughan Williams, Grainger, Stravinsky, Hindemith, and C. Williams. (Same as BAND 559.) Prerequisite: MTHC 205 and MTHC 459. IND.

MTHC 563. Survey in Jazz Composition and Arranging. 3 Hours.
Analysis of jazz composition and orchestration, beginning with early procedures (Louis Armstrong through the “Big Band Era”) and culminating with analysis of scores by Gil Evans and Bob Brookmeyer. Prerequisite: Permission of instructor required. LEC.
MTHC 583. Composition. 2 Hours.
Advanced composition including larger forms in a variety of media. Composition majors will present a public recital of original works during the fourth semester of enrollment. May be repeated for credit. Prerequisite: MTHC 253 or consent of instructor. IND.

MTHC 610. Tonal Forms. 3 Hours.
Phrase structure and formal design in common-practice tonal music. Structural analysis of binary, ternary, rondo, sonata, variations and contrapuntal, multi-movement forms. LEC.

MTHC 655. Readings in Music Theory: ____. 1-4 Hours.
Investigation of a subject by means of directed readings of primary scholarly sources. May be repeated for credit. Prerequisite: MTHC 410 and consent of instructor. IND.

MTHC 670. Scoring for Voice. 3 Hours.
Composing and arranging for voice, including solo voice, choral and operatic settings. Prerequisite: Six hours of MTHC 253 and MTHC 541 and consent of instructor. LEC.

MTHC 674. Orchestration I. 3 Hours.
A study of the four families of orchestral instruments (woodwinds, brass, percussion, and strings) concentrating on ranges, transpositions, timbres, and techniques of the various instruments. Scoring projects concentrate on voicing and balance within the individual choirs of the orchestra. Prerequisite: MTHC 205. LEC.

MTHC 676. Orchestration II. 3 Hours.
A continuation of MTHC 674. Emphasis on scoring for full symphony orchestra and the large wind ensemble. Prerequisite: MTHC 674. LEC.

MTHC 678. Electro-Acoustic Composition I. 3 Hours.
Survey of concepts and practices of electronic sound synthesis. Required of music theory and composition majors, and open to other music majors by consent of department. Prerequisite: MTHC 315 or MTHC 316. LEC.

MTHC 680. Electro-Acoustic Composition II. 3 Hours.
Basic concepts and techniques of electronic composition. For majors in music theory and composition. Prerequisite: MTHC 678 and consent of division. LEC.

MTHC 732. Introduction to the Analysis of Contemporary Music. 3 Hours.
Introductory course in the sequence, presenting the basic tools of post-tonal and 20th century composition, including, serial techniques, set theory, extended tertian harmony, minimalist techniques, contemporary tonality and other trends. Exploration of form and complex rhythmic structures as well as aural skills appropriate to the subject matter. Prerequisite: MTHC 315 or MTHC 316. LEC.

MTHC 733. Advanced Analysis I. 3 Hours.
Analytical seminar, emphasizing intense study of larger contemporary works, using techniques learned in the first course (MTHC 732). Further content will vary according to the instructor. Includes aural skills work appropriate to the subject matter. Prerequisite: MTHC 732. LEC.

MTHC 732. Advanced Analysis of Contemporary Music. 3 Hours.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. (Same as MUSC 778.) LEC.

MTHC 789. Seminar on Selected Topics: ____. 0.5-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

MTHC 801. Advanced Analysis I. 3 Hours.
A bibliographic survey intended to explore aspects of both structure (rhythm, texture and timber) and methodology (semiotics, gesture and cognition) that variously complement the pitch-based approaches to musical interpretation associated with Schenkerian tonal analysis and pitch-class theory. Prerequisite: MTHC 732 Introduction to the Analysis of Contemporary Music or permission of instructor. LEC.

MTHC 802. Advanced Analysis II. 3 Hours.
A bibliographic survey intended to explore in depth the pitch grammars developed by composers of Western Art Music since circa 1910, and the various methodologies assembled to codify them. Prerequisite: MTHC 732 Introduction to the Analysis of Contemporary Music or permission of instructor. LEC.

MTHC 810. Advanced Tonal Form. 3 Hours.
An investigation of formal types, processes and functions in the instrumental tonal music of the eighteenth and nineteenth centuries. Prerequisite: Permission of instructor. LEC.

MTHC 820. Seminar in Schenkerian Analysis. 3 Hours.
A study of the theories and analytical methodologies developed by the Austrian theorist Heinrich Schenker. Prerequisite: MTHC 410 or permission of the instructor. LEC.

MTHC 825. Computers in Music and Music Research. 3 Hours.
A seminar designed to develop and explore the use and programming of microcomputers as an aid in research and the production of music. Topics will include composition and production tools for music, structured program design, data representation, and basic computer-assisted instruction models. Prerequisite: EECS 138 or equivalent or permission of the instructor. LEC.

MTHC 830. Pedagogy of Music Theory. 1-3 Hours.
Procedures for teaching theoretical concepts and skills. Survey of available texts and related materials. Three credits when offered during a full academic term; one-two credits when offered as a short-term institute. Prerequisite: MTHC 315 or MTHC 316 or permission of instructor. LEC.

MTHC 853. Advanced Composition. 1-6 Hours.
Essentially for theory and composition majors on the master’s level. May be repeated for credit. Summer session limit one to three hours. RSH.

MTHC 887. Advanced Orchestration. 3 Hours.
Prerequisite: MTHC 676, or consent of department. May be repeated for credit. RSH.

MTHC 889. Seminar on Selected Topics: ____. 0.5-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

MTHC 898. Recital. 1 Hour.
Recorded grade for MM Composition recital. LEC.

MTHC 899. Thesis. 1-6 Hours.
May be repeated for credit. THE.

MTHC 953. Advanced Composition. 1-6 Hours.
Essentially for theory and composition majors on the doctoral level. May be repeated for credit. Summer session limit one to three hours. RSH.

MTHC 965. Doctoral Composition Recital. 2 Hours.
May be repeated for credit. RSH.

MTHC 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

MTHC 999. Dissertation. 1-12 Hours.
May be repeated for credit. THE.

MUS 100. Directed Study: _____. 1-4 Hours.
This is an all-purpose fill in the blank course for freshmen and sophomores. It can be used when need arises. May be repeated for credit. IND.

MUS 140. Encounter with Music and Musicians. 3 Hours. H.
A study of concert and recital music as it relates to the performer and listener. Students will have interaction with professional musicians through live performances and discussions with the performers. Music performed on the concert and chamber music series and on concerts of music department faculty will be carefully examined. Baroque through modern music, jazz, and music of other cultures are the basic units in the course. Written research projects and reviews of performances are required. LEC.

A team-taught, performance-based survey for wind and string students of musical styles from the Baroque to present. Students will examine music from their perspective literature from several different perspectives including: historical, theoretical, technical, and expressive. The integration of these perspectives into the students' performance is the ultimate goal of the course. May be repeated for credit. Prerequisite: Approval of applied instrumental instructor. IND.

MUS 300. Directed Studies: _____. 1-4 Hours.
This is an all-purpose fill in the blank course for juniors and seniors. It can be used when need arises. May be repeated for credit. IND.

MUS 340. Encounter with Music and Musicians. 3 Hours. H.
A study of concert and recital music as it relates to the performer and listener. Students will have interaction with professional musicians through live performances and discussions with the performers. Music performed on the concert and chamber music series and on concerts of music department faculty will be carefully examined. Baroque through modern music, jazz, and music of other cultures are the basic units in the course. Written research projects and reviews of performances are required. LEC.

MUS 388. Curriculum and Pedagogy in: _____. 1 Hour.
Independent study. Prerequisite: Permission of instructor. LEC.

A team-taught, performance-based survey for wind and string students of musical styles from the Baroque to present. Students will examine music from their perspective literature from several different perspectives including: historical, theoretical, technical, and expressive. The integration of these perspectives into the students' performance is the ultimate goal of the course. May be repeated for credit. Prerequisite: Approval of applied instrumental instructor. IND.

MUS 586. The Business of Music. 3 Hours.
A course covering commercial aspects of the music business, including publishing, copyright law, recording, live performance, the motion picture and radio business, composition, teaching, and music merchandising. Prerequisite: Consent of the instructor. LEC.

MUS 686. Arts Administration: Presenting the Performing Arts. 3 Hours.
Considerations involved in booking, scheduling, and presenting music, theatre, and dance events. Locating and selecting artists, reading and negotiating contracts, fund raising, grant writing, working with support groups, marketing techniques, publicity, personnel, and finance management. LEC.

MUS 732. Twentieth Century Techniques before 1945. 3 Hours.
A study and analysis of music from the turn of the century to World War II. For non-music majors. Prerequisite: Permission of instructor. LEC.

MUS 733. Twentieth Century Techniques after 1945. 3 Hours.
A study and analysis of music from World War II to the present. For non-music majors. Prerequisite: Permission of instructor. LEC.

MUS 800. Directed Study: _____. 1-4 Hours.
This is an all-purpose fill in the blank course for graduate students. It can be used when need arises. May be repeated for credit. LEC.

MUS 888. Curriculum and Pedagogy in: _____. 1 Hour.
Independent study. Prerequisite: Permission of instructor. LEC.

MUSC 135. Masterworks of Music. 3 Hours.
Honors version of MUSC 136/MUSC 336. Open only to students in the University Honors Program or by permission of instructor. Designed to aid non-music majors in developing skills needed for listening to music. Emphasis on masterworks of Western music. A student may receive credit for only one of the four courses numbers: MUSC 135, MUSC 335, MUSC 136, MUSC 336. LEC.

MUSC 136. Masterworks of Music. 3 Hours. HT / H.
Designed to aid non-music majors in developing the skills needed for listening to music. Emphasis on masterworks of Western music. Open only to freshman and sophomore non-music majors. A student may receive credit in either MUSC 136 or MUSC 336, but not both. LEC.

MUSC 139. Introduction to Music in World Cultures. 3 Hours. NW AE42.
Addresses music as a social and cultural phenomenon shaping broader patterns of human activity. It examines the ideas, behaviors and beliefs people have about their music based on selected case studies of traditional and popular music from North America, Africa, Asia, and Latin America. The main goal of this course is to understand why people from different parts of the world do music the way they do. LEC.

MUSC 254. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as CHOR 254.) Prerequisite: Permission of instructor. ACT.

MUSC 256. Collegium Musicum, Instrumental. 0-1 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. ACT.

MUSC 298. Introduction to Jazz. 3 Hours. HT AE41 / H/W.
A survey of the history of jazz from its beginnings in the early twentieth century to the present. Open to music and non-music majors. LEC.

MUSC 299. American Popular Song. 3 Hours. H.
A survey of the American popular song in the twentieth century, with an emphasis on the composer's lyricists, and performers who made them popular. LEC.

MUSC 300. Jazz Styles, 1920-1980. 3 Hours. H.
A detailed study of the major styles of jazz that developed between 1920 and 1980, with an emphasis on aural recognition of their characteristics. LEC.

MUSC 301. Great Innovators of Jazz. 3 Hours. H.
A detailed study of the most innovative and influential figures in the history of jazz. LEC.

MUSC 302. The Broadway Musical. 3 Hours. AE41/GE3H / H.
A survey of the Broadway Musical from the early twentieth century to the present. LEC.
MUSC 303. The Film Musical. 3 Hours.
A survey of the film musical from the 1920s through the 1980s. LEC.

MUSC 305. Music of Latin America. 3 Hours. AE42 / H.
Designed for non-music majors, the course surveys the geographical and ethnographical sources of the many forms of music in Latin America. The various forms of music will be examined from historical, cultural, and stylistic perspectives. LEC.

MUSC 306. Introduction to Contemporary Music. 3 Hours. H.
A survey of concert music in Europe and the United States in the twentieth century. Not open to music majors. LEC.

MUSC 307. Music of Africa and the Middle East. 3 Hours.
Survey of the many musical traditions of Black Africa and the Middle East, emphasizing their cultural and social context. Open to both majors and non-majors. LEC.

MUSC 308. Music in East Asia. 3 Hours. AE42.
Study of musical cultures in China, Korea, and Mongolia, with a special focus on court music, musical theater, popular music, and the influence of East Asian music on the Western art music and vice-versa. LEC.

MUSC 309. History of Rock and Roll. 3 Hours. H.
Survey of the history of rock and roll, starting with its origins in rhythm and blues and continuing to the present day. Open to both majors and non-majors. LEC.

MUSC 310. History of Film Music. 3 Hours. HT.
A survey course for non-majors on the history of film music from silent films to the present. Students will use written texts, website materials such as streaming video and audio, and regular screening in an auditorium setting for assignments and papers. LEC.

MUSC 311. History of African American Music. 3 Hours.
This course examines the richness and diversity of African American music and its influence on the entire American musical landscape. Beginning with African retentions in African American music, the course will trace the history and development of both written and oral traditions from 1700 to the present day. LEC.

MUSC 312. Music in the Andes. 3 Hours. AE42.
This course examines the history, culture, and musical traditions of the Andean region: Peru, Ecuador, Bolivia, Chile, Columbia, and Venezuela. It focuses on a selection of indigenous rituals and popular music of mestizo and African American origin. By the end of the semester students will be acquainted with particular genres, instruments, and the social contexts with which they are associated. LEC.

MUSC 313. Music in Mexico and the Caribbean. 3 Hours. AE42.
This course examines the history, culture, and musical traditions of Mexico and the Caribbean. It focuses on a selection of rituals and traditional and popular music of the region. By the end of the semester students will be acquainted with various musical genres, instruments, and the social contexts with which they are associated. LEC.

MUSC 315. History of Country Music. 3 Hours.
Study of country music in the U.S. from the early 1920's to the present, including performers, styles, historical context, and technology. LEC.

MUSC 320. Music History I. 2 Hours. AE42.
Introduction to world music; and Western music to 1400. Prerequisite: One year of music theory. LEC.

MUSC 335. Masterworks of Music. 3 Hours.
Honors version of MUSC 136/MUSC 336. Open only to students in the University Honors Program or by permission of instructor. Designed to aid non-music majors in developing skills needed for listening to music. Emphasis on masterworks of Western music. A student may receive credit for only one of the four course numbers: MUSC 135, MUSC 335, MUSC 136, MUSC 336. LEC.

MUSC 336. Masterworks of Music. 3 Hours. HT / H.
Designed to aid non-music majors in developing the skills needed for listening to music. Emphasis on masterworks of Western music and writing about music. Open only to junior and senior non-music majors. A student may receive credit for either MUSC 136 or MUSC 336, but not both. LEC.

MUSC 337. Selected Topic in Music: ______. 1-3 Hours. HT / H.
A selected topic in music or an interdisciplinary topic in the fine arts. The course may be repeated for credit when topic varies. Open only to non-music majors. LEC.

MUSC 338. Selected Topic in Music: ______. 1-3 Hours.
The course may be repeated for credit when topic varies. Open only to music majors. Prerequisite: MUSC 320 or permission of instructor. LEC.

MUSC 339. Introduction to Music in World Cultures. 3 Hours. NW AE42.
Addresses music as a social and cultural phenomenon shaping broader patterns of human activity. It examines the ideas, behaviors and beliefs people have about their music based on selected case studies of traditional and popular music from North America, Africa, Asia, and Latin America. The main goal of this course is to understand why people from different parts of the world do music the way they do. LEC.

MUSC 340. Music History II. 3 Hours. GE3H.
Western Music from 1400 to 1750. Prerequisite: MUSC 320. LEC.

MUSC 394. Readings in Jazz and American Popular Music. 1-3 Hours.
Investigation of a subject by means of directed study of primary sources. Prerequisite: A grade of "A" or "B" in MUSC 298, or equivalent, and permission of instructor. IND.

MUSC 440. Music History III. 3 Hours. GE3H.
Western Music from 1750 to 1900. Prerequisite: MUSC 340. LEC.

MUSC 474. Graduate Review: Medieval. 1 Hour.
A review of the practice of Western art music composed between c. 437 and 1420. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. LEC.

MUSC 475. Graduate Review: Renaissance. 1 Hour.
A review of the practice of Western art music composed between c. 1420 and 1600. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. LEC.

MUSC 476. Graduate Review: Baroque. 1 Hour.
A review of the practice of Western art music composed between c. 1600 and 1750. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. LEC.

MUSC 477. Graduate Review: Classic. 1 Hour.
A review of the practice of Western art music composed between c. 1750 and 1815. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. LEC.

MUSC 478. Graduate Review: Romantic. 1 Hour.
A review of the practice of Western art music composed between c. 1815 and 1900. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. LEC.

MUSC 479. Graduate Review: 20th-21st Centuries. 1 Hour.
A review of the practice of Western art music composed between c. 1900 and the present day. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. LEC.
MUSC 480. Music History IV. 2 Hours. AE41.
Western music since 1900, classical and vernacular. Prerequisite: MUSC 440. LEC.

MUSC 481. Music of the Middle Ages. 3 Hours.
A concentrated survey of Western music from about 500 to 1400. Prerequisite: MUSC 320. LEC.

MUSC 482. Music of the Renaissance. 3 Hours.
A concentrated survey of Western music from about 1400 to 1600. Prerequisite: MUSC 340. LEC.

MUSC 483. Music of the Baroque Era. 3 Hours.
A concentrated survey of Western music from about 1600 to 1750. Prerequisite: MUSC 340 and MUSC 440. LEC.

MUSC 484. Music of the Classical Era. 3 Hours.
A concentrated survey of Western music from about 1750 to 1815. Prerequisite: MUSC 440. LEC.

MUSC 485. Music of the Romantic Era. 3 Hours.
A concentrated survey of Western music from about 1815 to 1900. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 486. Music of the Twentieth Century. 3 Hours.
A concentrated survey of Western music during the twentieth century. Prerequisite: MUSC 480. LEC.

MUSC 487. Music in America. 3 Hours.
A concentrated survey of music in the United States. Prerequisite: One course in the field of musicology or permission of the instructor. LEC.

MUSC 488. History of Opera. 3 Hours.
A concentrated survey of the history of opera. Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 489. History of Chamber Music. 3 Hours.
A concentrated survey of the history of chamber music. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 490. History of the Concerto. 3 Hours.
A concentrated survey of the history of the concerto. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 491. History of the Symphony. 3 Hours.
A concentrated survey of the history of the symphony. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 492. History of Wind Band Music. 3 Hours.
A chronological survey of the development of the wind band/ensemble and its music, using standard musical works from each historical period. Prerequisite: MUSC 440 and MUSC 480 or permission of the instructor. LEC.

MUSC 493. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. Prerequisite: MUSC 240, MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 494. Readings in Musicology: _____. 1-3 Hours.
May be repeated for credit. Prerequisite: Minimum average of B in MUSC 320, MUSC 340, MUSC 440, MUSC 480 or equivalent, and permission of instructor. IND.

MUSC 499. Senior Thesis. 2 Hours. AE61.
An original research project that will result in a scholarly paper of moderate size. May be repeated once for credit. IND.

MUSC 560. Music in World Cultures. 3 Hours. NW AE42 / W.
An introduction to music as part of the cultural experience in India, Southeast Asia, the Orient, and Africa, with comparisons to Western traditions and influences on contemporary music. LEC.

MUSC 565. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as CHOR 654.) Prerequisite: Permission of instructor. ACT.

MUSC 566. Collegium Musicum, Instrumental. 0-1 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. ACT.

MUSC 744. Readings in Jazz and American Popular Music. 1-3 Hours.
Investigation of a subject by means of directed study using primary scholarly sources. May be repeated for credit. Prerequisite: MTHC 410 and consent of instructor. LEC.

MUSC 748. Readings in Musical Instruments. 3 Hours.
Investigation of a subject by means of directed readings using primary scholarly sources. May be repeated for credit. Prerequisite: MTHC 410 and consent of instructor. LEC.

MUSC 749. Readings in Jazz and American Popular Music. 1-3 Hours.
Investigation of a subject by means of directed study of primary resources. Prerequisite: Permission of instructor. IND.

MUSC 753. Music of the Renaissance. 3 Hours.
Prerequisite: MUSC 340. LEC.

MUSC 754. Music of the Baroque Era. 3 Hours.
Prerequisite: MUSC 340 and MUSC 440. LEC.

MUSC 755. Music of the Classical Era. 3 Hours.
Prerequisite: MUSC 440. LEC.

MUSC 756. Music of the Romantic Era. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 757. Music of the Twentieth Century. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 758. History of Musical Instruments. 3 Hours.
Prerequisite: MUSC 340 or MUSC 440 or permission of instructor. LEC.

MUSC 759. Music in America. 3 Hours.
A survey of historical developments from the Pilgrims to the present. (Same as AMS 737.) Prerequisite: One course in the field of music history or permission of the instructor. LEC.

MUSC 760. History of Opera. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 761. History of the Mass. 3 Hours.
Prerequisite: MUSC 340 and MUSC 440, or permission of instructor. LEC.

MUSC 765. History of Chamber Music. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 766. History of the Concerto. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 767. History of the Symphony. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 768. History of Wind Band Music. 3 Hours.
A chronological survey of the development of the wind band/ensemble and its music, using standard musical works from each historical period. Prerequisite: MUSC 440, MUSC 480, or permission of instructor. LEC.

MUSC 775. History of Keyboard Music. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 777. History of Solo Vocal Music. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.
MUSC 778. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from
the ancient Greeks to the late twentieth century. (Same as MTHC 778.)
LEC.

MUSC 794. Readings in Musicology: _____. 1-3 Hours.
Investigation of a subject by means of directed reading of primary literary
sources. May be repeated for credit. Prerequisite: A grade average of
"B" in two musicology courses numbered 500 or above and consent of
instructor. IND.

MUSC 801. Music Bibliography and Research. 3 Hours.
Bibliography, research methods, and scholarly writing in music for
entering graduate students. Prerequisite: Permission of instructor. LEC.

MUSC 802. Advanced Music Bibliography and Research. 3 Hours.
Advanced bibliography and writing of research papers. Prerequisite:
MUSC 801. LEC.

MUSC 899. Thesis. 1-6 Hours.
May be repeated for credit. THE.

MUSC 902. Seminar in Musicology. 3 Hours.
A research course designed primarily for doctoral students in musicology.
Prerequisite: MUSC 801, or its equivalent. LEC.

MUSC 903. Seminar in Performance Practices. 3 Hours.
Primary and secondary sources in performance practices dealing mainly
with the seventeenth through nineteenth centuries, with implications
applicable to student's performance medium. LEC.

MUSC 940. Seminar on Selected Topics in Musicology: _____. 3
Hours.
Each semester a topic (to be inserted in the blank) will be the basis for
discussion, reports, and a research paper. May be repeated for credit
provided no course duplication takes place. LEC.

MUSC 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's
major field. Open only to candidates for the D.M.A. in performance. May
be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open
only to candidates for the D.M.A. in performance and conducting. May be
repeated for credit. Prerequisite: Consent of instructor. RSH.

MUSC 999. Dissertation. 1-12 Hours.
May be repeated for credit. THE.

OBOE 100. Oboe. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in
music. May be repeated for credit. IND.

OBOE 101. Oboe Reed Making. 0-1 Hours.
The principles of oboe reed making, including tube cane selection, pre-
gouging, gouging, shaping, tying and scraping reeds. Knife sharpening
and tool maintenance will also be covered. Open only to freshmen and
sophomores. May be repeated for credit. LAB.

OBOE 121. Oboe. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated
for credit. IND.

OBOE 131. Baroque Oboe. 1-4 Hours.
One or two lessons per week. For freshmen and sophomores. May be
repeated for credit. IND.

OBOE 221. Oboe. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be
repeated for credit. Prerequisite: 121-level until the music major has
accumulated 4 credits (8 for performance majors). IND.

OBOE 300. Oboe. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May
be repeated for credit. IND.

OBOE 301. Oboe Reed Making. 0-1 Hours.
The principles of oboe reed making, including tube cane selection, pre-
gouging, gouging, shaping, tying and scraping reeds. Knife sharpening
and tool maintenance will also be covered. Open only to juniors and
seniors. May be repeated for credit. LAB.

OBOE 321. Oboe. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance
majors. May be repeated for credit. Prerequisite: 221-level until the music
major has accumulated 8 credits. IND.

OBOE 331. Baroque Oboe. 1-4 Hours.
One or two lessons per week. For juniors and seniors. May be repeated
for credit. IND.

OBOE 421. Oboe. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance
majors. May be repeated for credit. Prerequisite: 321-level until the music
major has accumulated 12 credits. IND.

OBOE 422. Oboe. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being
performed and as required by the degree program. Not for performance
majors. IND.

OBOE 622. Oboe. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance.
May be repeated for credit. Prerequisite: Performance majors must
accumulate 16 credits at the 121/221 levels. IND.

OBOE 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor
of Music). Must be taken in semester the senior recital is being performed
and as required by the degree program. Corequisite: OBOE 622. LEC.

OBOE 711. Oboe. 1-4 Hours.
For graduate students not majoring in oboe. May be repeated for credit.
Summer session limit one to three hours. IND.

OBOE 731. Baroque Oboe. 1-4 Hours.
May be repeated for credit. IND.

OBOE 811. Oboe. 2-4 Hours.
For graduate students majoring in oboe. May be repeated for credit. IND.

OBOE 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the baroque
obo during the seventeenth and eighteenth centuries. LEC.

OBOE 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the
twentieth century. LEC.

OBOE 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted
to the D.M.A. curriculum in oboe. May be repeated for credit. Summer
session limit one to three hours. IND.

OBOE 965. Doctoral Recitals. 1 Hour.
Maximum seven hours credit. May be repeated for credit. THE.
OBOE 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Summer session limit one to three credits. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

ORCH 200. University Symphony Orchestra. 0-1 Hours.
For freshmen and sophomores. Four hours full rehearsal and one hour sectional (string only) rehearsal each week throughout the school year. An intensive study of the symphonic repertoire, instrumental and vocal accompaniments, and complete major opera. Two public concerts each semester and numerous out-of-town concerts, radio broadcasts, and local vespers performances. Acceptance for membership and playing positions is determined by tryout. May be repeated for credit. LAB.

ORCH 201. University Chamber Orchestra. 1 Hour.
Two hours of rehearsal per week. May be repeated for credit. Audition required. LAB.

ORCH 210. Repertory Orchestra. 1 Hour.
A reading orchestra, emphasizing standard orchestral works from Baroque through modern periods. Open to string, wind, and percussion instrument players of the community and university. (Does not count toward ensemble requirement for students with stringed instruments emphasis.) May be repeated for credit. LAB.

ORCH 600. University Symphony Orchestra. 0-1 Hours.
For juniors, seniors, and graduate students. May be repeated for credit. LAB.

ORCH 601. University Chamber Orchestra. 1 Hour.
Two hours rehearsal per week. May be repeated for credit. Audition required. LAB.

ORCH 701. Workshop in: ____. 0.5-3 Hours.
May be repeated for credit. LEC.

ORGN 100. Organ. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

ORGN 121. Organ. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

ORGN 221. Organ. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

ORGN 300. Organ. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

ORGN 320. Studio Class in Organ - Lab. 0 Hours.
Studio performance of works prepared under individual instruction. May be repeated. LAB.

ORGN 321. Organ. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

ORGN 421. Organ. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

ORGN 422. Organ. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

ORGN 502. Master Class in Organ - Lab. 0 Hours.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated. LAB.

ORGN 603. Institute for Organ and Church Music. 1-2 Hours.
A one-week intensive study program in performance, practice, and literature, advanced pedagogy, and church music. Normally offered during the summer session. May be repeated for credit. Graded S (satisfactory) or U (unsatisfactory). IND.

ORGN 608. Organ Pedagogy. 2 Hours.
For seniors and graduate students majoring in organ or by permission of instructor. May be repeated for credit. Materials and methods of pedagogy. Lectures, discussion, demonstration teaching, planning, and evaluation. One beginning or lower level organ student assigned to each class member with teaching done under supervision of class instructor. LEC.

ORGN 622. Organ. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

ORGN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: ORGN 622. LEC.

ORGN 702. Master Class in Organ - Lab. 0 Hours.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated. LAB.

ORGN 711. Organ. 1-4 Hours.
For graduate students not majoring in organ. May be repeated for credit. Summer session limit one to three hours. IND.

ORGN 720. Studio Class in Organ-Lab. 0 Hours.
Studio performance of works prepared under individual instruction. May be repeated for credit. IND.

ORGN 800. Organ Building and Design. 3 Hours.
Acoustics; design, construction, and maintenance of organs; organ consulting, examination of organs. LEC.

ORGN 801. History of Organ Literature and Organ Design I. 3 Hours.
Organ literature and organ design from the Middle Ages, the Renaissance, and the Spanish, Italian, and English Baroque. LEC.

ORGN 802. History of Organ Literature and Organ Design II. 3 Hours.
Organ literature and organ design in the Dutch and German Baroque with special emphasis on J.S. Bach. Prerequisite: Permission of instructor. LEC.

ORGN 803. History of Organ Literature and Organ Design III. 3 Hours.
French organ literature and organ design from the 17th century to the present. LEC.
ORGN 804. History of Organ Literature and Organ Design IV. 3 Hours.
German, North American, British, Scandinavian and Eastern European organ literature and organ design from the Classic era to the present. Prerequisite: Permission of instructor. LEC.

ORGN 805. Selected Topics in Organ. 1-3 Hours.
An exploration of selected topics in organ design and literature. Topics change by semester. May be repeated for credit. LEC.

ORGN 806. Organ Pedagogy. 3 Hours.
Philosophy, methods, and materials of organ pedagogy. Prerequisite: Permission of instructor. LEC.

ORGN 807. Organ Study Tour. 1-3 Hours.
Study of European or North American organs through reading and site visits to instruments. LEC.

ORGN 811. Organ. 2-4 Hours.
For graduate students majoring in organ. May be repeated for credit. Summer session limit one to three hours. IND.

ORGN 921. Seminar in Performance: ______, 3 Hours.
A detailed study of organ repertoire, performance practice, the history of organ building as it affects the performance of a particular body of literature, liturgical or other extra-musical contexts, and other influences on musical style. May be repeated for credit when topics vary. LEC.

ORGN 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. program in organ. May be repeated for credit. Summer session limit one to three hours. IND.

ORGN 965. Doctoral Recitals. 1 Hour.
Maximum credit, seven hours. May be repeated for credit. THE.

ORGN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

PCUS 100. Percussion. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

PCUS 120. Drum Set Technique. 1 Hour.
One lesson per week. Small group instruction. For freshmen and sophomores. A course designed to develop drum set technique, with emphasis placed on understanding the various styles of music to perform on the set: swing, jazz, rock, ethnic, Broadway shows. May be repeated for credit. IND.

PCUS 121. Percussion. 1-4 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

PCUS 221. Percussion. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

PCUS 300. Percussion. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

PCUS 320. Drum Set Technique. 1 Hour.
One lesson per week. Small group instruction. For juniors and seniors. A course designed to develop drum set technique, with emphasis placed on understanding the various styles of music to perform on the set: swing, jazz, rock, ethnic, Broadway shows. May be repeated for credit. IND.

PCUS 321. Percussion. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

PCUS 421. Percussion. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

PCUS 422. Percussion. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

PCUS 622. Percussion. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

PCUS 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: PCUS 622. LEC.

PCUS 711. Percussion. 1-4 Hours.
For graduate students not majoring in percussion. May be repeated for credit. Summer session limit one to three hours. IND.

PCUS 811. Percussion. 2-4 Hours.
For graduate students majoring in percussion. May be repeated for credit. Summer session limit one to three credits. IND.

PCUS 921. Seminar in Performance and Pedagogy. 3 Hours.
A study of the interpretive problems encountered in percussion music from the various historical periods, and a study of the performance practices in orchestral, band, chamber ensemble, and solo literature. LEC.

PCUS 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in percussion. May be repeated for credit. Summer session limit one to three hours. IND.

PCUS 965. Doctoral Recitals. 1 Hour.
May be repeated for credit. THE.

PCUS 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

PCUS 972. D.M.A. Document. 1-4 Hours.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

PENS 252. Percussion Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of works for various percussion instrument combinations. May be repeated for credit. LAB.

PENS 652. Percussion Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of works for various percussion instrument combinations. May be repeated for credit. LAB.
PIAN 100. Piano. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

PIAN 111. Elementary Keyboard Musicianship. 2 Hours.
The development of keyboard skills in sightreading, transposition, harmonization, improvisation, score reading, and playing by ear. Open to all students not majoring in music who have little or no music training. IND.

PIAN 121. Piano. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

PIAN 125. Piano. 1-4 Hours.
Small group instruction for the development of performance abilities encouraging exploration of creative potentials and self-directed study. For freshmen and sophomores. May be repeated for credit. Prerequisite: Permission of instructor. IND.

PIAN 144. Elementary Keyboard Skills I. 1 Hour.
The development of keyboard skills in sightreading, transposition, harmonization, improvisation, score reading, and playing by ear. Open to all music majors with little or no piano background. IND.

PIAN 148. Elementary Keyboard Skills II. 1 Hour.
A continuation of PIAN 144. IND.

PIAN 216. Chamber Music for Pianists. 1-2 Hours.
For freshmen and sophomores majoring in piano. The study of chamber music literature for piano and various instrumental combinations. Development of rehearsal conducting techniques and leadership skills through collaboration with other musicians. May be repeated for credit. LEC.

PIAN 221. Piano. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

PIAN 227. Two-Piano and Four-Hand Literature. 2 Hours.
Instruction in two-piano and duet repertoire for performance and sight-reading by advanced keyboard performers. IND.

PIAN 229. Performance Class in Accompanying. 1 Hour.
A class in the performance of vocal and instrumental accompaniment. Prerequisite: May be repeated for credit. IND.

PIAN 230. Creative Jazz Piano I. 1 Hour.
Group instruction in techniques of playing jazz. Prerequisite: Permission of instructor. IND.

PIAN 237. Accompanying for Dance. 1-3 Hours.
Instruction in dance accompanying. Open to freshman and sophomore pianists with permission of instructor. IND.

PIAN 284. Intermediate Keyboard Skills I. 2 Hours.
Continuation of PIAN 148. Prerequisite: Permission of instructor. IND.

PIAN 288. Intermediate Keyboard Skills II. 2 Hours.
Continuation of PIAN 284. Prerequisite: Permission of instructor. IND.

PIAN 300. Piano. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

PIAN 310. Advanced Keyboard Skills. 2 Hours.
The development of functional keyboard skills in sight reading, transposition, harmonization, improvisation, score reading, and playing by ear. Prerequisite: MTHC 115 or permission of instructor. IND.

PIAN 320. Piano Performance Class. 1 Hour.
Performances, lectures, and discussions of all aspects of performance. May be repeated for credit. Prerequisite: Consent of instructor. LAB.

PIAN 321. Piano. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

PIAN 325. Piano. 1-4 Hours.
For juniors and seniors. Small group instruction for the development of performance abilities, encouraging exploration of creative potentials, and self-directed study. May be repeated for credit. Prerequisite: Permission of instructor. IND.

PIAN 336. Chamber Music for Pianists. 1-2 Hours.
For juniors and seniors majoring in piano. The study of chamber music literature for piano and various instrumental combinations. Development of rehearsal conducting techniques and leadership skills through collaboration with other musicians. May be repeated for credit. LEC.

PIAN 402. Master Class. 1 Hour.
A class in the performance of advanced piano repertoire. Enrollment by permission of the department. IND.

PIAN 421. Piano. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

PIAN 422. Piano. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

PIAN 429. Performance Class Accompanying. 1 Hour.
A class in the performance of vocal and instrumental accompaniment. May be repeated for credit. LEC.

PIAN 430. Creative Jazz Piano II. 1 Hour.
Group instruction in advanced techniques of jazz improvisation with emphasis on various styles and interpretation of leading jazz performers. Prerequisite: Permission of instructor. IND.

PIAN 437. Accompanying for Dance. 1-3 Hours.
Instruction in dance accompanying. Open to junior and senior pianists with permission of instructor. IND.

PIAN 522. Piano Technology I. 1 Hour.
An introduction to the principles of design, theory of operation, maintenance, and tuning of the piano. Lecture and laboratory. Open to junior, senior, and graduate students. LEC.

PIAN 523. Piano Technology II. 1 Hour.
A continuation of PIAN 522, Piano Technology I. Application of principles of design, theory of operation, maintenance, and tuning of the piano. Prerequisite: PIAN 522. LEC.

PIAN 540. Piano Pedagogy I. 2-3 Hours.
Observation and research of the techniques and materials relevant to piano instruction at the elementary to intermediate levels. Additional topics pertinent to music education to include child development, learning, communication, and group dynamics. Prerequisite: Permission of instructor. LEC.

PIAN 546. Piano Pedagogy II. 2-3 Hours.
Observation and research of the techniques and materials relevant to piano instruction at the elementary to intermediate levels. Additional topics pertinent to music education to include child development,
learning, communication, and group dynamics. Prerequisite: PIAN 540 or permission of instructor. LEC.

PIAN 622. Piano. 1-4 Hours. AE61. Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

PIAN 623. Senior Recital. 1 Hour. Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: PIAN 622. LEC.

PIAN 624. Piano Workshop. 1-3 Hours. A short term course covering a piano-related topic. May be repeated for credit. LEC.

PIAN 640. Piano Pedagogy III. 2 Hours. Practicum in piano instruction at the elementary to intermediate levels. Students enrolled for this course are expected to participate in the Children's Piano Laboratory Program or the Campus Community Program. Prerequisite: PIAN 546 or permission of instructor. FLD.

PIAN 643. Piano Repertoire I. 3 Hours. Study and analysis of keyboard repertoire from its beginning through the Classical period. LEC.

PIAN 644. Piano Repertoire 2. 3 Hours. Study and analysis of keyboard repertoire of the Romantic and Modern periods. LEC.

PIAN 646. Piano Pedagogy IV. 1-2 Hours. Practicum in piano instruction at the elementary to intermediate levels. Prerequisite: PIAN 640 or permission of instructor. FLD.

PIAN 711. Piano. 1-4 Hours. For graduate students not majoring in piano. May be repeated for credit. Summer session limit one to three hours. IND.

PIAN 720. Piano Performance Class. 1 Hour. Performances, lectures, and discussion of all aspects of performance. May be repeated for credit. Prerequisite: Consent of instructor. IND.

PIAN 802. Master Class. 1 Hour. A class in the performance of advanced piano repertoire. Enrollment by permission of the department. Graded on satisfactory/unsatisfactory basis. IND.

PIAN 811. Piano. 2-6 Hours. For graduate students majoring in piano. May be repeated for credit. Summer session limit one to three hours. IND.

PIAN 840. Advanced Piano Pedagogy I: Group and Class Instruction. 3 Hours. The techniques and materials for the development of keyboard literacy at the elementary and intermediate levels. LEC.

PIAN 846. Advanced Piano Pedagogy II: Group and Class Instruction. 3 Hours. The techniques and materials for the development of keyboard literacy at the elementary and intermediate levels. Prerequisite: PIAN 840. LEC.

PIAN 921. Seminar in Performance and Pedagogy: ______. 3 Hours. A detailed study of repertoire, performance practice, pedagogical, and stylistic problems relating to keyboard music. May be repeated for credit when topics vary. LEC.

PIAN 961. Directed Performance. 2-4 Hours. Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in piano. May be repeated for credit. Summer session limit one to three hours. IND.

PIAN 965. Doctoral Recitals. 1 Hour. Maximum credit, seven hours. May be repeated for credit. THE.

PIAN 970. D.M.A. Lecture-Recital. 1-4 Hours. A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

PIAN 972. D.M.A. Document. 1-4 Hours. A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

REC 100. Laboratory in Music Performance. 0 Hours. This course deals with the performance of music. The goal is to increase the understanding of music and music performance through exposure to a wide variety of repertory and performance styles, mediums, techniques, and related issues. May be repeated. LAB.

RECO 119. Recorder. 1-4 Hours. For freshmen and sophomores. Group instruction at the beginning level, two hours per week. Thirty minutes per day practice expected. May not be repeated for credit. Prerequisite: Student must read music and own an alto recorder. IND.

RECO 319. Recorder. 1-4 Hours. For juniors and seniors. Group instruction at the beginning level, two hours per week. Thirty minutes per day practice expected. May not be repeated for credit. Prerequisite: Student must read music and own an alto recorder. IND.

SAXO 100. Saxophone. 1-2 Hours. Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

SAXO 121. Saxophone. 1-4 Hours. Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

SAXO 221. Saxophone. 1-4 Hours. Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

SAXO 300. Saxophone. 1-2 Hours. Applied music lessons for seniors majoring in music. May be repeated for credit. IND.

SAXO 321. Saxophone. 1-2 Hours. Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

SAXO 421. Saxophone. 1-2 Hours. Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

SAXO 422. Saxophone. 1-2 Hours. AE61. Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

SAXO 622. Saxophone. 1-4 Hours. AE61. Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.
SAXO 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: SAXO 622. LEC.

SAXO 711. Saxophone. 1-4 Hours.
For graduate students not majoring in saxophone. May be repeated for credit. Summer session limit one to three hours. IND.

SAXO 811. Saxophone. 2-4 Hours.
For graduate students majoring in saxophone. May be repeated for credit. Summer session limit one to three hours. IND.

SAXO 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance techniques from the saxophone's inception to 1950. LEC.

SAXO 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques from 1950 to the present. LEC.

SAXO 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in saxophone. May be repeated for credit. Summer session limit one to three hours. IND.

SAXO 965. Doctoral Recitals. 1 Hour.
Maximum seven hours credit. May be repeated for credit. THE.

SAXO 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

TROM 100. Trombone. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

TROM 121. Trombone. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

TROM 221. Trombone. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

TROM 252. Trombone Choir. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the trombone. May be repeated for credit. IND.

TROM 300. Trombone. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

TROM 321. Trombone. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

TROM 421. Trombone. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

TROM 422. Trombone. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

TROM 622. Trombone. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

TROM 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: TROM 622. LEC.

TROM 652. Trombone Choir. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the trombone. May be repeated for credit. IND.

TROM 711. Trombone. 1-4 Hours.
For graduate students not majoring in trombone. May be repeated for credit. Summer session limit one to three hours. IND.

TROM 811. Trombone. 2-4 Hours.
For graduate students majoring in music. May be repeated for credit. IND.

TROM 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in trombone. May be repeated for credit. Summer session limit one to three hours. IND.

TROM 965. Doctoral Recitals. 1 Hour.
May be repeated for credit. THE.

TROM 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

TRUM 100. Trumpet. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

TRUM 121. Trumpet. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

TRUM 221. Trumpet. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

TRUM 252. Trumpet Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the trumpet. May be repeated for credit. IND.

TRUM 300. Trumpet. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

TRUM 321. Trumpet. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

TRUM 421. Trumpet. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

TRUM 422. Trumpet. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

TRUM 622. Trumpet. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

TRUM 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: TRUM 622. LEC.

TRUM 652. Trumpet Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the trumpet. May be repeated for credit. IND.

TRUM 711. Trumpet. 1-4 Hours.
For graduate students not majoring in trumpet. May be repeated for credit. Summer session limit one to three hours. IND.

TRUM 811. Trumpet. 2-4 Hours.
For graduate students majoring in trumpet. May be repeated for credit. Summer session limit one to three hours. IND.

TRUM 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in trumpet. May be repeated for credit. Summer session limit one to three hours. IND.

TRUM 965. Doctoral Recitals. 1 Hour.
Maximum credit, seven hours. May be repeated for credit. THE.

TRUM 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

TUBA 100. Tuba. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

TUBA 121. Tuba. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

TUBA 221. Tuba. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

TUBA 300. Tuba. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

TUBA 321. Tuba. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

TUBA 421. Tuba. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

TUBA 422. Tuba. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

TUBA 622. Tuba. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

TUBA 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: TUBA 622. LEC.

TUBA 711. Tuba. 1-4 Hours.
For graduate students not majoring in tuba. May be repeated for credit. Summer session limit one to three hours. IND.

TUBA 811. Tuba. 2-4 Hours.
For graduate students majoring in tuba. May be repeated for credit. Summer session limit one to three hours. IND.

TUBA 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in tuba. May be repeated for credit. Summer session limit one to three hours. IND.

TUBA 965. Doctoral Recitals. 1 Hour.
May be repeated for credit. THE.
TUBA 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a topic pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

TUEU 252. Tuba-Euphonium Consort. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the tuba and euphonium. May be repeated for credit. IND.

TUEU 652. Tuba-Euphonium Consort. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the tuba and euphonium. May be repeated for credit. IND.

VIOA 100. Viola. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VIOA 120. Viola Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VIOA 121. Viola. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VIOA 221. Viola. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

VIOA 300. Viola. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

VIOA 320. Viola Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VIOA 321. Viola. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

VIOA 421. Viola. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

VIOA 422. Viola. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VIOA 622. Viola. 1-4 Hours. AE61.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: VIOA 622. LEC.

VIOA 711. Viola. 1-4 Hours.
For graduate students not majoring in viola. May be repeated for credit. Summer session limit one to three hours. IND.

VIOA 720. Viola Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in viola (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

VIOA 811. Viola. 2-4 Hours.
For graduate students majoring in viola. May be repeated for credit. Summer session limit one to three hours. IND.

VIOA 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in viola. May be repeated for credit. Summer session limit one to three hours. IND.

VIOA 965. Doctoral Recitals. 1 Hour.
May be repeated for credit to a maximum of seven hours. THE.

VION 100. Violin. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VION 120. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VION 121. Violin. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VION 221. Violin. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

VION 300. Violin. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

VION 320. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VION 321. Violin. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

VION 421. Violin. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

VION 422. Violin. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VIOA 720. Viola Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in viola (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

VIOA 811. Viola. 2-4 Hours.
For graduate students majoring in viola. May be repeated for credit. Summer session limit one to three hours. IND.

VION 100. Violin. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VION 120. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VION 121. Violin. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VION 221. Violin. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

VION 300. Violin. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

VION 320. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VION 321. Violin. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

VION 331. Baroque Violin. 1-4 Hours.
One or two lessons per week. For freshmen and sophomores. May be repeated for credit. IND.

VION 221. Violin. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

VION 300. Violin. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

VION 320. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VION 321. Violin. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

VION 331. Baroque Violin. 1-4 Hours.
One or two lessons per week. For juniors and seniors. May be repeated for credit. IND.

VION 421. Violin. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

VION 422. Violin. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.
VION 511. Workshop in Stringed Instrument Care and Repair. 2 Hours.
Students will perform repairs such as gluing cracks, applying tailpiece gut, setting and adjusting sound posts, and rehairing bows. Proper care and maintenance of the instrument will be stressed. Prerequisite: Junior standing with a background of stringed instrument study meriting departmental approval. LAB.

VION 622. Violin. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

VION 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: VION 622. LEC.

VION 711. Violin. 1-4 Hours.
For graduate students not majoring in violin. May be repeated for credit. Summer session limit one to three hours. IND.

VION 720. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VION 731. Baroque Violin. 1-4 Hours.
May be repeated for credit. IND.

VION 811. Violin. 2-4 Hours.
For graduate students majoring in violin. May be repeated for credit. Summer session limit one to three hours. IND.

VION 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violin. May be repeated for credit. Summer session limit one to three hours. IND.

VION 965. Doctoral Recitals. 1 Hour.
Maximum of seven hours credit. May be repeated for credit. THE.

VNCL 100. Violoncello. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VNCL 120. Cello Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VNCL 121. Violoncello. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VNCL 221. Violoncello. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

VNCL 300. Violoncello. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

VNCL 320. Cello Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VNCL 321. Violoncello. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

VNCL 421. Violoncello. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

VNCL 422. Violoncello. 1-2 Hours. AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VNCL 622. Violoncello. 1-4 Hours. AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

VNCL 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: VNCL 622. LEC.

VNCL 711. Violoncello. 1-4 Hours.
For graduate students not majoring in violoncello. May be repeated for credit. Summer session limit one to three hours. IND.

VNCL 720. Cello Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VNCL 811. Violoncello. 2-4 Hours.
For graduate students majoring in violoncello. May be repeated for credit. Summer session limit one to three hours. IND.

VNCL 961. Directed Performance. 2-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violoncello. May be repeated for credit. Summer session limit one to three hours. IND.

VNCL 965. Doctoral Recitals. 1 Hour.
May be repeated for credit to a maximum of seven hours. THE.

VOIC 100. Voice. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VOIC 104. Class Voice. 1 Hour.
A study of the fundamentals of singing; performance of songs; an approach to voice instruction in a group situation. May be repeated for credit. IND.

VOIC 120. Vocal Performance in English. 1 Hour.
Fundamentals of solo vocal performance with an emphasis on English diction and communicating the English language. IND.

VOIC 121. Voice. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VOIC 221. Voice. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (6 for performance majors). IND.

VOIC 270. Lyric Diction for Singers: ____. 1 Hour.
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to
voice and theatre/voice majors, and to others with approval of instructor.
May be repeated for credit as language varies. LEC.

**VOIC 300. Voice. 1-2 Hours.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

**VOIC 302. Repertoire for the High School Singer. 1 Hour.**
Designed for future educators of young voices. Vocal literature and issues related to students aged thirteen to eighteen. May substitute for one semester of the studio voice requirements for Music Education majors with vocal/choral emphasis. Prerequisite: Four semesters of private voice. LEC.

**VOIC 320. Vocal Performance Class II. 1 Hour.**
Solo vocal performance in a class situation with emphasis including the preparation, planning of repertoire, and interpretive skills appropriate to a recital. Designed for junior/senior voice and theatre-voice majors. Prerequisite: Permission of instructor. Eligibility for VOIC 622. IND.

**VOIC 321. Voice. 1-2 Hours.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

**VOIC 405. Vocal Literature I. 2 Hours.**
A survey of English song. LEC.

**VOIC 406. Vocal Literature II. 2 Hours.**
A survey of German song. LEC.

**VOIC 408. Vocal Pedagogy. 1 Hour.**
Knowledge and skills needed to teach voice, with particular attention to lifespan voice anatomy, physiology, and acoustics, diagnosis and correction of vocal inefficiencies, teaching styles, repertoire choice, professional development, and acquaintance with current research in voice science and vocal pedagogy. Includes a voice teaching practicum. (Same as MENT 408.) LEC.

**VOIC 412. Vocal Pedagogy and Advanced Repertoire II. 1 Hour.**
Continuation of VOIC 408. LEC.

**VOIC 421. Voice. 1-2 Hours.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

**VOIC 422. Voice. 1-2 Hours. AE61.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

**VOIC 440. Vocal Performance. 1 Hour.**
A class in the performance of vocal repertoire. IND.

**VOIC 470. Lyric Diction for Singers: ____, 1 Hour.**
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to voice and theatre/voice majors, and to others with approval of instructor. May be repeated for credit as language varies. LEC.

**VOIC 490. Opera Workshop. 0-4 Hours.**
The study of various aspects of opera, such as character development, aria, chorus, and opera scene study, staging, body movement, and audition techniques. May be repeated for credit. ACT.

**VOIC 492. Opera Production. 1-4 Hours.**
The preparation and performance of an opera role. May be repeated for credit. ACT.

**VOIC 500. Directed Study in: ____. 1-3 Hours.**
Investigation of a special topic or project. May be repeated for credit. Prerequisite: Consent of instructor. IND.

**VOIC 520. Vocal Coaching. 1 Hour.**
In-depth investigation of elements of vocal performance such as language, musical style, tradition, and dramatic content and the communication thereof in preparation for the senior recital. Open to undergraduates majoring in voice and theatre/voice in the senior year, with consent of instructor. May be repeated for credit. IND.

**VOIC 622. Voice. 1-4 Hours. AE61.**
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits at the 121/221 levels. IND.

**VOIC 623. Senior Recital. 1 Hour.**
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Corequisite: VOIC 622. LEC.

**VOIC 670. Advanced Lyric Diction for Singers: ____, 1 Hour.**
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to graduate students in voice and opera performance, and to others with approval of instructor. May be repeated for credit as language varies. LEC.

**VOIC 704. Vocal Repertoire: ____. 2 Hours.**
A survey of selected topics in vocal repertoire to be chosen from categories such as: Italian, German, French, and English songs, oratorio literature, and art songs by women composers. The course may be repeated for credit when topic varies. LEC.

**VOIC 705. Advanced Vocal Literature I. 3 Hours.**
An investigation of the development of French melodie. The course will include directed readings, writing, and performance. LEC.

**VOIC 706. Advanced Vocal Literature II. 3 Hours.**
An investigation of the development of German lieder. The course will include directed readings, writing, and performance. LEC.

**VOIC 707. Advanced Vocal Literature III. 3 Hours.**
An investigation of the development of songs in English. The course will include directed readings, writing, and performance. LEC.

**VOIC 711. Voice. 1-4 Hours.**
For graduate students not majoring in voice. May be repeated for credit. Summer session limit one to three hours. IND.

**VOIC 720. Vocal Performance Class II. 1 Hour.**
Solo vocal performance in a class situation with emphasis including the preparation, planning of repertoire, and interpretive skills appropriate to a recital. Advanced repertoire and appropriate level of vocal and musical comprehension shall be expected from the graduate student. Prerequisite: Consent of instructor. IND.

**VOIC 740. Vocal Performance. 1 Hour.**
A class in the performance of vocal repertoire. IND.

**VOIC 770. Special Studies in Voice: English Lyric Diction for the Choral Singer and Soloist. 1 Hour.**
A graduate level course designed for the choral director, public school music teacher and voice teacher. Techniques for achieving a distinct, unlabored English pronunciation will be studied. The International Phonetetic Alphabet will be employed. IND.

**VOIC 808. Vocal Pedagogy. 1 Hour.**
A course offering performers and beginning teachers of classical singing a basic overview of vocal production. The class will explore the empirical
and scientific principles of breathing, resonance, timbre, and other vocal features. Discussions of repertoire choices, vocal health, teaching styles, career development and other topics pertaining to the training of singers will be included. Added emphasis will be placed on historical and contemporary pedagogues through original research. LEC.

** VOIC 811. Voice. 2-4 Hours.**
For graduate students majoring in voice. May be repeated for credit. Summer session limit one to three hours. IND.

** VOIC 820. Vocal Coaching. 1-4 Hours.**
In-depth investigation of elements of vocal performance such as: language, musical style, tradition, dramatic content and the communication thereof. Open to graduate voice majors with consent of instructor. May be repeated for credit. ACT.

** VOIC 890. Opera Workshop. 0-4 Hours.**
The study of various aspects of opera, such as character development, aria, chorus, and opera scene study, staging, body movement, and audition techniques. May be repeated for credit. ACT.

** VOIC 892. Opera Production. 1-4 Hours.**
The preparation and performance of an opera role. May be repeated for credit. ACT.

** VOIC 900. Directed Study in: _______. 1-3 Hours.**
Investigation of a special topic or project. May be repeated for credit. Prerequisite: Consent of instructor. LEC.

** VOIC 921. Seminar in Performance: _______. 3 Hours.**
A detailed study of vocal repertoire, performance practice, and stylistic problems on a selected topic from areas such as oratorio, cantata, song cycles, vocal chamber music, song, or opera of specific composers (i.e., Verdi, Wagner, Mozart, Debussy, Poulenc, Wolf, Strauss), or twentieth century song. May be repeated for credit. LEC.

** VOIC 960. Vocal Pedagogy. 2 Hours.**
A study of the problems encountered in the teaching of vocal technique, such as breathing, resonance, tone color, dynamic control, and diction, and including sessions of supervised teaching. LEC.

** VOIC 961. Directed Performance. 2-4 Hours.**
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in voice. May be repeated for credit. Summer session limit one to three hours. IND.

** VOIC 965. Doctoral Recitals. 1 Hour.**
Maximum seven hours credit. May be repeated for credit. THE.

** VOIC 970. D.M.A. Lecture-Recital. 1-4 Hours.**
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. LEC.

** VOIC 972. D.M.A. Document. 1-4 Hours.**
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

** W&P 125. Wind and Percussion Pedagogy. 1 Hour.**
For freshmen and sophomores. Materials and concepts for teaching beginning and intermediate instrumental students; instrument repair, adjustments and modification; reed making and adjustment where appropriate; solo and ensemble repertoire. May be repeated for credit. Corequisite: Applied instruction for the appropriate instrument. (e.g. FRHN 121, PCUS 221). IND.

** W&P 130. Orchestral Repertoire. 1 Hour.**
For freshmen and sophomores. Weekly reading sessions for wind, percussion and harp students with the objective of acquainting the student with important orchestral passages for his or her particular instrument. May be repeated for credit. Enrollment controlled by the instructor in charge. IND.

** W&P 325. Wind and Percussion Pedagogy. 1 Hour.**
For freshmen and sophomores. Continuation of WP 125. May be repeated for credit. Corequisite: Applied instruction for the appropriate instrument. (e.g. FRHN 321, PCUS 622). IND.

** W&P 630. Orchestral Repertoire. 1 Hour.**
The study of orchestral literature for wind and percussion instruments. May be repeated for credit. Permission of instructor. IND.

** W&P 655. Independent Study in: _______. 1-4 Hours.**
May be repeated for credit. Prerequisite: Consent of advisor and instructor. IND.

** W&P 702. Special Studies in Woodwind Instrument Pedagogy. 1-3 Hours.**
Physiological factors of woodwind playing, teaching materials and techniques, practice methods, solo and chamber music repertoire, mouthpieces and reeds, discography, techniques of tone production, articulation, embouchure, and intonation. May be repeated for credit to a maximum of five hours. LEC.

** W&P 704. Special Studies in Brass Instrumental Pedagogy. 1 Hour.**
Physiological factors of brass playing, teaching materials and techniques, practice methods, solo and chamber music repertoire, mouthpieces, discography, techniques of tone production, articulation, embouchure, and intonation. May be repeated for credit to a maximum of five hours. LEC.

** W&P 706. Advanced Pedagogy Workshops in Orchestral Instruments. 0.5 Hours.**
Methods and materials of teaching fundamentals of the instruments. Lecture, class performance, class discussion, teaching demonstration, and library research. Summer session only. Prerequisite: Teaching experience or undergraduate instruction in the instrument, or permission of the instructor. LEC.

** W&P 708. Special Studies in Percussion Instrument Pedagogy. 1-3 Hours.**
The study of percussion pedagogy of Membrane Percussion; Keyboard Percussion; and Jazz/Rock/Commercial Drum Set, Marching and World Percussion. Study will include but not limited to such areas as teaching materials and techniques, repertoire, performance practice, and discography. Course may concentrate on one of the three areas listed above, or be taught as a survey course covering all three topics. May be repeated for credit to a maximum of five hours. LEC.

** WENS 252. Wind Ensemble. 0-1 Hours.**
For freshmen and sophomores. Study and performance of original works for various wind instrument combinations. May be repeated for credit. LAB.

** WENS 652. Wind Ensemble. 0-1 Hours.**
For juniors, seniors, and graduate students. Study and performance of original works for various wind instrument combinations. May be repeated for credit. LAB.

## Bachelor of Arts in Fine Arts in Music

### B.A. in Fine Arts in Music Degree Requirements

The B.A. in Fine Arts in Music is offered with a concentration in
• Jazz studies,
• Musicology,
• Music theory,
• Piano/organ/orchestral instruments, or
• Voice.

A total of 120 credit hours is required. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will gain knowledge in a variety of areas while pursuing the B.A. and may include any approved KU minor without adding extra credit hours to their degree program. Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities, as well as a senior performance recital.

With this degree, students will be well-rounded prospects for nearly any employer upon graduation. Students can also go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor's, master's, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble

1 each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams) each semester.

B.A. in Fine Arts in Music Degree Requirements

The B.A. in Fine Arts in music is offered with a concentration in

• Jazz studies (p. 2207),
• Musicology (p. 2208),
• Music theory (p. 2208)
• Piano/organ/orchestral instruments (p. 2209), or
• Voice (p. 2209).

A total of 120 credit hours is required. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum
average of 2.0 in all course work. Click a concentration above to be taken to that degree plan.

Basic Courses (21-41)

ENGL 101 Composition 3  
ENGL 102 Critical Reading and Writing 3  
MATH 101 College Algebra 3  
COMS 130 Speaker-Audience Communication 3  

Foreign language (0-20 hours): 0-20  
Jazz studies concentration: no foreign language  
Musicology, Music Theory and Piano, Organ or Orchestral Instrument concentration: 16 hours in same language  
Voice concentration: 10 hours of Italian and 10 hours of French or German  

Natural Science: any course that fulfills GE3N 3  
Social Science: any course that fulfills GE3S 3  
Social/Ethics: any course that fulfills AE51 or AE52 3  

Minor or non-music electives (18) 18  
Any KU approved minor. Must be declared in the department that houses your minor and completed with your music major.

Music Core (27)

MTHC 105 Theory I 4  
MTHC 115 Theory II 4  
MTHC 205 Theory III 4  
MTHC 315 Theory IV 4  
MUSC 320 Music History I 2  
MUSC 340 Music History II 3  
MUSC 440 Music History III 3  
MUSC 480 Music History IV 2  
MEMT 116 Performance Media: Computers, Synthesizers, and Electronics 1  
REC 100 Laboratory in Music Performance (2 to 4 semesters depending on your concentration) 0  

Concentrations

Choose 1 of the following concentrations:

Jazz Studies Concentration (54)

JAZZ 105/305 Jazz Theory 2  
JAZZ 224/624 Jazz Improvisation I 2  
JAZZ 225/625 Jazz Improvisation II 2  
JAZZ 230/630 Introduction to Jazz Piano 2  
JAZZ 459/659 Jazz Arranging 2  
Applied music lessons (8 semesters each for credit, includes senior recital) 8  
Jazz ensembles (4 semesters for credit) 4  
Jazz combo (4 semesters for credit) 4  
REC 100 Laboratory in Music Performance (2 semesters) 0  
Additional non-music electives required. Remember 45 total credits must be in courses numbered at the 300 level or above.

Musicology Concentration (38)

9 hours selected from courses numbered 602-778 9  
Applied music lessons (4 semesters each for credit) 4  
MUSC 499 Senior Thesis 2  

Ensembles (at least 2 semesters of Collegium Musicum each for credit) 4  
REC 100 Laboratory in Music Performance (4 semesters) 0  
Music electives 6  
Additional non-music electives. Remember 45 total credits must be in courses numbered at the 300 level or above.

Music Theory Concentration (38)

Upper-division music theory courses (MTHC courses numbered 300 and above) 9  
Applied music lessons (8 semesters for credit, includes senior recital) 8  
MTHC 499 Senior Research Project 2  
Ensembles (8 semesters each for credit) 8  
REC 100 Laboratory in Music Performance (4 semesters) 0  
Additional non-music electives. Remember 45 total credits must be in courses numbered at the 300 level or above.

Piano/Organ/Orchestral Instruments Concentration (34-42)

Applied music lessons (8 semesters each for 2 credits, includes senior recital) 16  
MUS 586 The Business of Music 3  
REC 100 Laboratory in Music Performance (4 semesters) 0  
Ensembles: 4-8  
Orchestral Instruments (8 semesters each for credit)  
Piano and Organ (4 semesters each for credit)  
Music electives: Piano and Organ only 0-4  
Additional non-music electives. Remember 45 total credits must be in courses numbered at the 300 level or above.

Voice Concentration (34)

Applied music lessons (8 semesters each for 2 credits, includes senior recital) 16  
Senior recital 0  
VOIC 120 Vocal Performance in English 1  
Vocal diction (2 semesters of VOIC 470) 2  
Vocal repertoire (VOIC 405 or VOIC 406) 2  
Ensembles (4 semesters each for credit) 4  
REC 100 Laboratory in Music Performance (4 semesters) 0  
Piano (Proficiency level of PIAN 284) 2  
Additional non-music electives. Remember 45 total credits must be in courses numbered at the 300 level or above.

**B.A. in Fine Arts in Music with concentration in Voice**
### Bachelor of Fine Arts in Theatre-Voice Program

#### Theatre and Voice

The Division of Voice offers 2 programs (Bachelor of Fine Arts and Bachelor of Music (p. 2224)) for singers interested in art song, opera, oratorio, concert, other classical pieces or vocal teaching. Students receive training in vocal technique, languages and diction, vocal repertoire, acting and the theatrical arts. Performance opportunities range from workshops to fully staged productions, allowing students to develop their talents at the most beneficial pace.

The Bachelor of Fine Arts (B.F.A.) in Theatre and Voice degree requires 124 credits. Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the in-depth exploration of music as well as performing a junior recital and a senior recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for theatre/musical productions, or create their own path in music or music-related endeavors.

#### The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

#### Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition). There is a limit of two times a prospective student may request an audition for
