6 of the final 30 hours may be taken for nonresident credit, with advance permission. Nonresident credit may fill only elective requirements not in the major field of study.

**Transfer of Credit**

CredTran (http://creditransfer.ku.edu/) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Only grades of C or higher are accepted as transfer credit toward degrees.

**Graduate University Regulations**

For information about all university regulations, see Regulations (p. 14) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/). A few examples specific to the School of Music are shown below.

**Absences**

A leave of absence may be granted on request. View the Graduate Studies policy on leaves of absence (https://documents.ku.edu/policies/Graduate_Studies/leaveofabsence.htm).

**Credit/No Credit**

The Credit/No Credit option is authorized, as of spring 2012, for graduate students (USR Article II, 2.2.7). The full explanation can be found in the KU Policy Library under University Senate Rules and Regulations (http://catalog.dept.ku.edu/wrong/schools/gs/regulations/).

**Incompletes**

The letters W and I may be given. The letter I indicates incomplete work that may be completed without re-enrollment in the course. The letter W indicates withdrawal for which no credit or grade point is assigned. For more information, see USRR Article II, Section 3 (https://documents.ku.edu/policies/governance/USRR.htm#art2sect3).

**Maximum and Minimum Semester Enrollment**

The normal maximum enrollment is 16 hours during fall or spring semesters or 6 hours during the summer session. Students may exceed the normal maximum enrollment only with the permission of the dean. International students must comply with the credit requirements for their visa status.

**Probation and Dismissal**

Upon falling below a cumulative graduate grade-point average of B (3.0), computed with the inclusion of grades earned at KU for all courses acceptable for graduate credit, the student is placed on probation by the Graduate Division of the school or college. The grades of P, S, U, and I, for which no numerical equivalents are defined, are excluded from the computation. If the student’s overall graduate average has been raised to B by the end of the next semester of enrollment after being placed on probation, the student may be returned to regular status. If not, the student is not permitted to re-enroll unless the Graduate Division acts favorably on a departmental recommendation for the student to continue study.

For more information regarding Probation and Dismissal, see the Graduate Studies Policy library (http://www.graduate.ku.edu/policies-processes/).

**Required Work in Residence**

For information about the doctoral residence requirement, see the Graduate Studies policy on graduate credit, including transfer credit, in the Graduate Studies section of the online catalog or the KU Policy Library (http://catalog.dept.ku.edu/201314/schools/gs/regulations/#12).

**Courses**

**ACMP 527. Accompanying. 1-4 Hours.**

Individual instruction in vocal and/or instrumental accompanying. Open to junior, senior, and graduate pianists with permission of instructor. IND.

**ACMP 529. Performance Class in Accompanying. 1 Hour.**

A class in the performance of vocal and instrumental accompaniment. Prerequisite: Completion of ACMP 527 or permission of instructor. IND.

**ACMP 727. Accompanying. 1-4 Hours.**

Individual instruction in vocal and or instrumental accompanying. Prerequisite: Consent of instructor. IND.

**ACMP 811. Advanced Accompanying. 2-4 Hours.**

For graduate students majoring in accompanying. May be repeated for credit. Summer session limit one to three hours. IND.

**ACMP 822. The Accompanist's Literature. 3 Hours.**

A course in which major vocal and instrumental works are studied with vocal or instrumental participants. LEC.

**Courses**

**BAND 202. Wind Ensemble. 0-1 Hours.**

Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor. LAB.

**BAND 204. Symphonic Band. 0-1 Hours.**

For freshmen and sophomores. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. ACT.

**BAND 206. University Band. 0-1 Hours.**

For freshmen and sophomores. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard band repertoire. May be repeated for credit. Prerequisite: Permission of director. ACT.

**BAND 209. Basketball Band. 0-1 Hours.**

Men's and Women's Basketball Bands. Placement by audition. Prerequisite: Participation/enrollment in the Marching Jayhawks, BAND 210/410. ACT.
BAND 210. University Marching Band. 0-1 Hours.
For freshmen and sophomores. Open to all qualified University students, regardless of major. Public performances include presentation of maneuvers and pageantry at all home football games as well as several trips each season. Three two-hour rehearsals per week. Offered fall semester only. Membership by audition. May be repeated for credit. ACT.

BAND 301. Workshop in: ____. 0-3 Hours.
May be repeated for credit. IND.

BAND 404. Symphonic Band. 0-1 Hours.
For junior and seniors. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 406. University Band. 0-1 Hours.
For juniors and seniors. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard concert band repertoire. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 409. Basketball Band. 0-1 Hours.
Men's and Women's Basketball Band. Placement by audition. Prerequisite: Participation/enrollment in the Marching Jayhawks, BAND 210/410. ACT.

BAND 410. University Marching Band. 0-1 Hours.
For juniors and seniors. Open to all qualified University students regardless of major. Public performances include presentation of marching maneuvers and pageantry at all home football games as well as several trips each season. Membership by audition. May be repeated for credit. ACT.

BAND 459. Scoring for Field Band. 2 Hours.
Primary voicings and textural possibilities for wind and percussion instruments will be stressed as these resources relate to the arranging of music for marching and pep bands at the secondary level. (Same as MTHC 459.) Prerequisite: MTHC 214. LEC.

BAND 466. Directed Study: ____. 1-3 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. IND.

BAND 559. Scoring for Concert Band. 2 Hours.
Curriculum includes idiomatic writing, tonal balance, scoring for large percussion sections, and analysis of wind colors and instrumental combinations found in music of Holst, Vaughan Williams, Grainger, Stravinsky, Hindemith, and C. Williams. (Same as MTHC 559.) Prerequisite: MTHC 214 and MTHC 459. IND.

BAND 602. Wind Ensemble. 0-1 Hours.
Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor. LAB.

BAND 604. Symphonic Band. 0-1 Hours.
For graduate students. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. LEC.

BAND 630. Band Repertoire. 2 Hours.
A survey of selected band works from the standard repertoire. The works are to be analyzed in terms of style and form, and in terms of the rehearsal and performance problems inherent in the work. Also a study of the standard band repertoire from an educational viewpoint as well as from a programming viewpoint. LEC.

BAND 701. Workshop in: ____. 1-3 Hours.
May be repeated for credit. LEC.

BAND 803. Interpretation of Band Music. 1 Hour.
A study of the essential factors necessary for the understanding and subsequent interpretation of various compositions of advanced band music. In addition to the regular course work, students must participate in one of the university concerts bands, attend all rehearsals each week and play in concerts. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

BAND 866. Directed Study in: ____. 1-3 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. LEC.

Courses

BASN 100. Bassoon. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

BASN 101. Bassoon Reed Making. 0-1 Hours.
The principles of bassoon reed making, including profiling and shaping of bassoon cane and scraping of bassoon reeds. Open only to freshmen and sophomores. May be repeated for credit. LAB.

BASN 121. Bassoon. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

BASN 221. Bassoon. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

BASN 300. Bassoon. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

BASN 301. Bassoon Reed Making. 0-1 Hours.
The principles of bassoon reed making, including profiling and shaping of bassoon cane and scraping of bassoon reeds. Open only to juniors and seniors. May be repeated for credit. LAB.

BASN 321. Bassoon. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

BASN 421. Bassoon. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

BASN 622. Bassoon. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

BASN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed.
and as required by the degree program. Prerequisite: Corequisite: BASN 622. LEC.

BASN 711. Bassoon. 1-3 Hours.
For graduate students not majoring in bassoon. Audition required. May be repeated for credit. IND.

BASN 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

BASN 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in BASN 811. IND.

BASN 811. Bassoon. 3-4 Hours.
For graduate students majoring in bassoon. May be repeated for credit. Summer session limit three hours. IND.

BASN 899. Master's Recital. 1 Hour.
Master's Degree Recital. The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: BASN 811. THE.

BASN 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the bassoon during the seventeenth and eighteenth centuries. LEC.

BASN 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the twentieth century. LEC.

BASN 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in bassoon. May be repeated for credit. Summer session limit three hours. IND.

BASN 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

BASN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor: RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor: THE.

Courses

BRSS 252. Brass Choir. 0-1 Hours.
For freshmen and sophomores. Study and performance of large brass ensemble literature. May be repeated for credit. IND.

BRSS 652. Brass Choir. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of large brass ensemble literature. May be repeated for credit. IND.

BRSS 921. Seminar in Performance and Pedagogy: ______. 3 Hours.
Repertoire, performance practice, pedagogical, and stylistic concerns relating to the music for brass instruments throughout their history. Topics will include the physical development of the instruments, their usage as solo, chamber, and large ensemble instruments in both sacred and secular literature, and a survey of historical and modern bibliographic materials. May be repeated for credit when topics vary. IND.

Courses

CARI 100. Carillon. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

CARI 300. Carillon. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

CARI 621. Carillon. 1-4 Hours.
One or two lessons per week. For graduate students not majoring in carillon performance. May be repeated for credit. IND.

CARI 711. Carillon. 1-3 Hours.
For graduate students not majoring in carillon. Audition required. May be repeated for credit. IND.

CARI 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

CARI 804. History of Carillon Literature and Design. 3 Hours.
A survey of carillon literature and design. Prerequisite: Permission of instructor. LEC.

CARI 811. Carillon. 3-4 Hours.
For graduate students majoring in carillon. May be repeated for credit. Summer session limit three hours. Prerequisite: Permission of instructor. IND.

CARI 820. Studio Class in Carillon. 0 Hours.
Studio performance of repertoire for students enrolled in carillon. May be repeated. Prerequisite: Permission of instructor. IND.

CARI 899. Master's Recital. 1 Hour.
Master's Degree Recital. The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: CARI 811. THE.

Courses

CHAM 215. University Camerata. 0-1 Hours.
For freshmen and sophomores. Rehearsal and performance of string chamber music repertoire. May be repeated for credit. Prerequisite: Permission of instructor. LEC.

CHAM 216. Chamber Music. 0-1 Hours.
For freshmen and sophomores. The study of works for various combinations of instruments. May be repeated for credit. LAB.

CHAM 220. Baroque Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of seventeenth and eighteenth century chamber music using replicas of period instruments. May be repeated for credit. LAB.

CHAM 254. New Music Ensemble. 0-2 Hours.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor. ACT.

CHAM 320. Baroque Ensemble. 0-1 Hours.
For juniors and seniors. Study and performance of seventeenth and eighteenth century chamber music using replicas of period instruments. May be repeated for credit. LAB.

CHAM 336. Chamber Music. 0-2 Hours.
For juniors and seniors. The study of standard chamber music literature with or without piano. May be repeated for credit. LAB.
CHAM 615. University Camerata. 0-1 Hours.
For juniors, seniors, and graduate students. Rehearsal and performance of string chamber music repertoire. May be repeated for credit. Prerequisite: Permission of instructor. LEC.

CHAM 654. New Music Ensemble. 0-2 Hours.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor. ACT.

CHAM 820. Baroque Ensemble. 0-2 Hours.
Study and performance of seventeenth and eighteenth century chamber music, using replicas of period instruments. Primarily for woodwinds, strings, and keyboards. May be repeated for credit. IND.

CHAM 829. Advanced Chamber Music. 0-2 Hours.
A special study of chamber music works, with or without piano, with emphasis on problems of style and interpretation. May be repeated for credit. IND.

CHAM 929. Advanced Chamber Music. 0-2 Hours.
May be repeated for credit. IND.

Courses

CHOR 214. University Singers. 0-1 Hours.
Open through audition. Study and performance of significant choral music from the major periods of music history. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 216. Concert Choir. 0-1 Hours.
Open through audition. Study and public performance of significant choral music from the major periods of music history. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 218. KU Glee Club. 0-1 Hours.
A choral ensemble for tenors and basses. The group will study, rehearse, and perform traditional and contemporary choral music for tenors and basses. A formal audition is not required. May be repeated for credit. ACT.

CHOR 220. Oread Consort. 0-1 Hours.
A select choral ensemble of 16-20 singers specializing in challenging music of all periods. Open by audition to experienced sight readers and ensemble singers. Concurrent membership in another choir encouraged. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 222. KU Treble Choir. 0-1 Hours.
A choral ensemble for treble voices. The group will study, rehearse, and perform traditional and contemporary choral music for treble chorus. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 228. Summer Chorus. 0-1 Hours.
A choral ensemble that meets during the summer term. May be repeated for credit. ACT.

CHOR 242. Chamber Choir. 0-1 Hours.
Intensive study and public performance of significant choral literature. Membership by audition. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 254. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as MUSC 254.) Prerequisite: Permission of instructor. ACT.

CHOR 410. Choral Practicum. 1 Hour.
A choral ensemble directed by student conductors under the supervision of the choral faculty. May be repeated for credit. ACT.

CHOR 414. University Singers. 0-1 Hours.
Open through audition. Study and performance of significant choral music from the major periods of music history. For juniors and seniors. May be repeated for credit. LAB.

CHOR 416. Concert Choir. 0-1 Hours.
Open through audition. Study and public performance of significant choral music from the major periods of music history. For juniors and seniors. May be repeated for credit. LAB.

CHOR 418. KU Glee Club. 0-1 Hours.
A choral ensemble for tenors and basses. The group will study, rehearse, and perform traditional and contemporary choral music for tenors and basses. A formal audition is not required. May be repeated for credit. ACT.

CHOR 424. Opera Chorus. 1 Hour.
A chorus for opera or musical theatre productions. Open by audition in conjunction with the theatre department. May be repeated for credit. LAB.

CHOR 446. KU Treble Choir. 0-1 Hours.
A select choral ensemble of 16-20 singers specializing in challenging music of all periods. Open by audition to experienced sight readers and ensemble singers. Concurrent membership in another choir encouraged. For juniors, seniors, and graduate students. May be repeated for credit. LAB.

CHOR 620. Oread Consort. 0-1 Hours.
A select choral ensemble of 16-20 singers specializing in challenging music of all periods. Open by audition to experienced sight readers and ensemble singers. Concurrent membership in another choir encouraged. For juniors, seniors, and graduate students. May be repeated for credit. LAB.

CHOR 628. Summer Chorus. 0-1 Hours.
A choral ensemble that meets during the summer term. May be repeated for credit. ACT.

CHOR 630. Choral Repertoire. 2 Hours.
A survey of selected choral repertoire available for the high school choral conductor. Both sacred and secular choral literature from the major periods of music history will be studied and analyzed in terms of the problems therein which may be encountered by high school choral conductors. Fall semester and summer only. May be repeated for credit. Prerequisite: MERM 246, MERM 330, MERM 700, and/or consent of instructor. LEC.

CHOR 642. Chamber Choir. 0-1 Hours.
Intensive study and public performance of significant choral literature. Membership by audition. For juniors, seniors, and graduate students. May be repeated for credit. LAB.

CHOR 654. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as MUSC 654.) Prerequisite: Permission of instructor. ACT.

CHOR 701. Workshop in: _____. 0.5-3 Hours.
May be repeated for credit. LEC.

CHOR 805. Interpretation of Choral Music. 1 Hour.
A study of the essential factors necessary for the understanding and subsequent interpretation of various compositions of advanced choral music. Offered in the summer session only. LEC.

CHOR 820. Orchestral Bowing Techniques for Choral Conductors. 1 Hour.
Stylistic, expressive, and technical considerations essential for making effective bowing decisions. Prerequisite: A course in conducting. LAB.

CHOR 825. Choral Diction. 3 Hours.
Study of methods to teach and learn diction in choral music contexts. Attention to International Phonetic Alphabet, acoustic implications
of particular phonemes, and contributions of emerging technologies. Application of various languages, including English, Latin, Italian, French, German, and Spanish. (Same as MEMT 825.) LEC.

CHUR 826. Adolescent Changing Voices. 3 Hours.
Scientific approaches to the pedagogy of adolescent male and female voices during voice change. (Same as MEMT 826.) LEC.

CHOR 827. Children's Voices. 3 Hours.
Scientific approaches to understanding and working with unchanging children's voices. (Same as MEMT 827.) LEC.

CHOR 828. Science-based Voice Education. 3-6 Hours.
Comprehensive examination of vocal anatomy, respiration, phonation, resonance, articulation, and voice development, with particular attention to research-based vocal/choral pedagogies for working with child through senior adult voices. (Same as MEMT 828.) Prerequisite: Permission of instructor. LEC.

CHOR 830. Sacred Choral Repertoire. 2 Hours.
A study of anthems for Lectionary years A, B, and C. For church choir directors and church music majors. May be repeated for credit. Prerequisite: Consent of instructor. LAB.

CHOR 850. Choral Arranging. 2 Hours.
Techniques of arranging for large and small choral groups, with and without accompaniment. Prerequisite: MTHC 253 or consent of instructor. LEC.

CHOR 910. Research Methodologies in Choral Music. 3 Hours.
This course will provide the student with an overview of historical, analytical, qualitative, and quantitative approaches used in the research of choral music and issues related to teaching and conducting in the choral field. LEC.

Courses

CHUR 222. Bales Chorale. 0-1 Hours.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit. ACT.

CHUR 320. Church Music Practicum. 0 Hours.
Methods and materials of church music. May be repeated. LAB.

CHUR 622. Bales Chorale. 0-1 Hours.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit. ACT.

CHUR 801. Church Music Seminar I. 3 Hours.
History of Jewish music; history of church music and the thought about church music through the Middle Ages. LEC.

CHUR 802. Church Music Seminar II. 3 Hours.
History of church music and the thought about church music from the period of the Renaissance/Reformations through the Baroque era with special emphasis on hymnody, and anthem literature. LEC.

CHUR 803. Church Music Seminar III. 3 Hours.
History of church music and the thought about church music from the 19th century to the present with special emphasis on hymnology, and anthem literature. LEC.

CHUR 804. Church Music Seminar IV. 3 Hours.
A survey of sacred choral literature focusing on the development of the motet, the mass, and the cantata. Prerequisite: Permission of instructor. LEC.

CHUR 805. Selected Topics in Church Music: ____. 1-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

CHUR 806. Service Playing and Improvisation I. 3 Hours.
Hymn playing, service playing techniques, anthem accompaniment, conducting from the console and improvisation. Prerequisite: Permission of instructor. LEC.

CHUR 807. Service Playing and Improvisation II. 3 Hours.
Continuation of CHUR 806. Prerequisite: Permission of instructor. LEC.

CHUR 808. History of Liturgy. 3 Hours.
The history of liturgy in Jewish and Christian traditions as well as historical criticism and interpretation of liturgy. LEC.

CHUR 809. The Judeo-Christian Tradition and the Arts. 3 Hours.
Readings, discussion and projects concerning architecture, visual art, literature, drama, poetry, dance, and film as they have developed in the Judeo-Christian tradition. LEC.

CHUR 810. Religion and the Arts. 3 Hours.
Issues in the relationship between religion and the arts. LEC.

CHUR 821. Church Music Colloquium I: Anthem Literature. 1 Hour.
A survey of significant anthem literature. Prerequisite: Permission of instructor. LEC.

CHUR 822. Church Music Colloquium II: Handbells. 1 Hour.
Handbell history, literature, performance, and rehearsal techniques. Prerequisite: Permission of instructor. LEC.

CHUR 823. Church Music Colloquium III: Children's Choirs. 1 Hour.
A study of the history and literature of children's choirs, vocal characteristics of children, and rehearsal procedures with the children's choir. Prerequisite: Permission of instructor. LEC.

CHUR 824. Church Music Colloquium IV: Hymnology. 1 Hour.
A study of the historical development of hymnody. Prerequisite: Permission of instructor. LEC.

CHUR 962. Improvisation. 2 Hours.
Applied study in improvisation at the organ. Prerequisite: Permission of instructor. LEC.

Courses

CLAR 100. Clarinet. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

CLAR 121. Clarinet. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

CLAR 221. Clarinet. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

CLAR 300. Clarinet. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

CLAR 321. Clarinet. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.
COND 245. Conducting I. 2 Hours.
A continuation of COND 245. Prerequisite: COND 245. IND.

COND 711. Choral Conducting I. 1-3 Hours.
Conducting technique, choral musicianship, and choral methods. Prerequisite: MEMT 246, MEMT 330, and/or consent of instructor. RSH.

COND 712. Choral Conducting II. 1-3 Hours.
Continuation of COND 711. RSH.

COND 745. Instrumental Conducting. 2 Hours.
A study of conducting techniques and problems in rehearsal and performance. Score analysis and repertoire development. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

COND 791. Score Reading. 2 Hours.
Development of skills in the reading of all clefs and the most common transpositions. Simultaneous reading of multiple lines and their practical rendition at the piano. May be repeated for credit. RSH.

COND 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

COND 811. Advanced Choral Conducting. 2-4 Hours.
A study of conducting techniques as they pertain to developing an expressive and precise choral ensemble. Participating in rehearsals under the supervision of instructor. May involve conducting in public performance. May be repeated for credit. Summer session limit one to three hours. Prerequisite: Four hours of conducting and/or consent of instructor. IND.

COND 820. Advanced Choral Conducting and Rehearsal Techniques. 3 Hours.
Refinement of conducting and teaching skills in a choral setting. Focus on relationships between gesture and choral sound, rehearsal structure and optimal learning, and age-appropriate choral literature and development of musicality. (Same as MEMT 820.) LAB.

COND 821. Advanced Score Reading. 2 Hours.
Development of fluency in reading full scores at the piano. May be repeated for credit. Prerequisite: Two semesters of COND 791 or consent of instructor. RSH.

COND 822. Choral Literature - Late Baroque Era to Classical Era. 3 Hours.
LEC.

COND 823. Choral Literature - Romantic Era. 3 Hours.
LEC.

COND 824. Choral Literature - Contemporary Era. 3 Hours.
LEC.

COND 825. Choral Literature-Renaissance. 3 Hours.
The study of literature from the Renaissance to the Early Baroque period. LEC.

COND 845. Advanced Instrumental Conducting. 3 Hours.
A study of techniques needed to project the conductor's concept in rehearsal and performance. Participating in rehearsals under the supervision of the instructor. May involve conducting in public performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

COND 889. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: COND 811. THE.
COND 921. Seminar. 3 Hours.
Choral literature from 1450 to 1650. LEC.

COND 931. Seminar. 3 Hours.
Symphonic repertoire. LEC.

COND 932. Seminar. 3 Hours.
Operatic repertoire. LEC.

COND 933. Seminar. 3 Hours.
Solo repertoire with orchestra. LEC.

COND 941. Seminar: Band Literature ______. 3 Hours.
A study of literature for wind band including original works and transcriptions. May be repeated for credit when topic varies. LEC.

COND 961. Directed Performance. 3-4 Hours.
Open only to students who have been admitted to the D.M.A. program in conducting. May be repeated for credit. Summer session limit three hours. IND.

COND 965. Doctoral Recitals. 1 Hour.
Maximum credit, four hours. May be repeated for credit. THE.

COND 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in conducting. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

DBBS 100. Double Bass. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

DBBS 120. Double Bass Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin, and violoncello study. May be repeated. LEC.

DBBS 121. Double Bass. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

DBBS 221. Double Bass. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

DBBS 300. Double Bass. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

DBBS 320. Double Bass Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

DBBS 421. Double Bass. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

DBBS 622. Double Bass. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

DBBS 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: DBBS 622. LEC.

DBBS 711. Double Bass. 1-3 Hours.
For graduate students not majoring in double bass. Audition required. May be repeated for credit. IND.

DBBS 720. Double Bass Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

DBBS 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

DBBS 811. Double Bass. 3-4 Hours.
For graduate students majoring in double bass. May be repeated for credit. Summer session limit three hours. IND.

DBBS 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: DBBS 811. THE.

Courses

EUPH 100. Euphonium. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

EUPH 121. Euphonium. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

EUPH 221. Euphonium. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

EUPH 300. Euphonium. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

EUPH 321. Euphonium. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

EUPH 421. Euphonium. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

EUPH 622. Euphonium. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

EUPH 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: EUPH 622. LEC.

EUPH 711. Euphonium. 1-3 Hours.
For graduate students not majoring in euphonium. Audition required. May be repeated for credit. IND.

EUPH 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

EUPH 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in EUPH 811. IND.

EUPH 811. Euphonium. 3-4 Hours.
For graduate students majoring in euphonium. May be repeated for credit. Summer session limit three hours. IND.

EUPH 899. Master's Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

FLUT 100. Flute. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

FLUT 121. Flute. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

FLUT 131. Baroque Flute. 1-4 Hours.
One or two lessons per week. For freshmen and sophomores. May be repeated for credit. IND.

FLUT 221. Flute. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

FLUT 300. Flute. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

FLUT 321. Flute. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

FLUT 331. Baroque Flute. 1-4 Hours.
One or two lessons per week. For juniors and seniors. May be repeated for credit. IND.

FLUT 421. Flute. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

FLUT 422. Flute. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

FLUT 622. Flute. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

FLUT 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: FLUT 622. LEC.

FLUT 711. Flute. 1-3 Hours.
For graduate students not majoring in flute. Audition required. May be repeated for credit. IND.

FLUT 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

FLUT 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in FLUT 811. IND.

FLUT 811. Flute. 3-4 Hours.
For graduate students majoring in flute. May be repeated for credit. Summer session limit three credits. IND.

FLUT 899. Master's Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

FLUT 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the baroque flute and recorder during the seventeenth and eighteenth centuries. LEC.

FLUT 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the twentieth century. LEC.

FLUT 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in flute. May be repeated for credit. Summer session limit three hours. IND.

FLUT 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

FLUT 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.
Courses

FRHN 100. French Horn. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

FRHN 121. French Horn. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

FRHN 221. French Horn. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

FRHN 252. Horn Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the horn. May be repeated for credit. IND.

FRHN 300. French Horn. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

FRHN 321. French Horn. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

FRHN 421. French Horn. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

FRHN 422. French Horn. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

FRHN 622. French Horn. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

FRHN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: FRHN 622. LEC.

FRHN 652. Horn Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the horn. May be repeated for credit. IND.

FRHN 711. French Horn. 1-3 Hours.
For graduate students not majoring in French horn. Audition required. May be repeated for credit. IND.

FRHN 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

FRHN 810. Elective Master’s Recital. 1 Hour.
Non-degree elective recital for Master’s students. Prerequisite: Concurrent enrollment in FRHN 811. IND.

FRHN 811. French Horn. 3-4 Hours.
For graduate students majoring in French horn. May be repeated for credit. Summer session limit three credits. IND.

FRHN 899. Master’s Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: FRHN 811. THE.

FRHN 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in French Horn. May be repeated for credit. Summer session limit three hours. IND.

FRHN 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit. THE.

FRHN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

GUIT 100. Beginning Group Guitar I. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

GUIT 102. Beginning Group Guitar II. 1 Hour.
A continuation of GUIT 100 or for beginning students with considerable music experience. Emphasis on guitar basics, using easy exercises, etudes, chord structure and scales, sight reading, including lead sheets. IND.

GUIT 120. Intermediate Group Guitar. 2 Hours.
A pedagogical approach to guitar literature of medium difficulty. A survey of standard methods, etudes, and literature through group performance and individual assignments. IND.

GUIT 121. Guitar. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

GUIT 122. Advanced Group Guitar. 2 Hours.
A survey of intermediate and advanced etudes as they apply to the representative and corresponding literature. Advanced technical studies. IND.

GUIT 221. Guitar. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

GUIT 300. Guitar. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

GUIT 321. Guitar. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

GUIT 421. Guitar. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.
GUIT 422. Guitar. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performing majors. IND.

GUIT 622. Guitar. 1-4 Hours.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

Courses
HARP 100. Harp. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

HARP 120. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 121. Harp. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

HARP 221. Harp. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

HARP 300. Harp. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

HARP 320. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 321. Harp. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

HARP 421. Harp. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

HARP 622. Harp. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

HARP 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: HARP 622. LEC.

HARP 711. Harp. 1-4 Hours.
For graduate students not majoring in harp. Audition required. May be repeated for credit. Summer session limit one to three hours. IND.

HARP 720. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

HARP 811. Harp. 2-4 Hours.
For graduate students majoring in harp. May be repeated for credit. Summer session limit one to three hours. IND.

Courses
HPCD 100. Harpsichord. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

HPCD 300. Harpsichord. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

HPCD 621. Harpsichord. 1-4 Hours.
One or two lessons per week. For graduate students. May be repeated for credit. IND.

HPCD 711. Harpsichord. 1-3 Hours.
For graduate students not majoring in harpsichord. Audition required. May be repeated for credit. IND.

Courses
JAZZ 105. Jazz Theory. 2 Hours.
An introduction to jazz harmony: Scales, modes, chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines. Prerequisite: MTHC 105 or consent of instructor. ACT.

JAZZ 208. Jazz Ensemble. 0-1 Hours.
For freshmen and sophomores. A performance laboratory specializing in the preparation and presentation of jazz compositions and arrangements. Designed to provide today's student musician with the background and skills necessary to function successfully as a professional studio musician, or as a teacher of popular jazz music. May be repeated for credit. Prerequisite: Consent of instructor. ACT.

JAZZ 209. Jazz Combo. 0-1 Hours.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.

JAZZ 212. Vocal Jazz Ensemble. 0-1 Hours.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. May be repeated for credit. ACT.

JAZZ 224. Jazz Improvisation I. 2 Hours.
Study of techniques involved in jazz improvisation, including application of chord-scale relationships to basic blues and II-V-I chord progressions; transcriptions of recorded jazz solos; and memorization of jazz standards and patterns. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.
JAZZ 225. Jazz Improvisation II. 2 Hours.
Study of advanced techniques in jazz improvisation, including third relationships, Coltrane changes, advanced reharmonization and altered pentatonic patterns and scales. Continuation of solo transcriptions, patterns and jazz standard memorization from Jazz Improvisation I. Prerequisite: JAZZ 224 or JAZZ 624 or permission of instructor. ACT.

JAZZ 230. Introduction to Jazz Piano. 2 Hours.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 305. Jazz Theory. 2 Hours.
An introduction to jazz harmony: Scales, modes, chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines. Prerequisite: MTHC 105 or consent of instructor. ACT.

JAZZ 409. Jazz Combo. 0-1 Hours.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.

JAZZ 499. Jazz Arranging. 2 Hours.
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections. Prerequisite: JAZZ 105 or JAZZ 305 and JAZZ 230 or permission of instructor. ACT.

JAZZ 505. Jazz Theory and Performance I. 3 Hours.
First of four classes covering concepts in jazz improvisation, theory, and performance. Focuses on the basics of melodic line creation, harmonic and melodic dictation (jazz ear training), an introduction to diatonic harmony (up to but not including secondary dominants) and basic major scale analysis (modes and chords.) Prerequisite: MTHC 105. ACT.

JAZZ 506. Jazz Theory and Performance II. 3 Hours.
Second of four classes covering intermediate concepts in jazz improvisation, theory, and performance. Focuses on original and traditional melodic line creation, melodic and harmonic embellishment, harmonic and melodic dictation (jazz ear training), and diatonic harmony including secondary dominant, tri-tone substitution and modulation as well as an in-depth study of the 7 modes of melodic minor. Prerequisite: JAZZ 505. ACT.

JAZZ 605. Jazz Theory and Performance III. 3 Hours.
Third of four classes covering concepts in jazz improvisation, theory, and performance. Deals with chord scale theory, synthetic scales (creation, analysis and harmonization), advanced poly-rhythm, transcription (analysis, deconstruction performance and utilization), Coltrane matrix (tri-tonic), and singing/ear training over chord progressions and standards. Prerequisite: JAZZ 506. ACT.

JAZZ 606. Jazz Theory and Performance IV. 3 Hours.
Last of four classes covering advanced concepts in jazz improvisation, theory, and performance. Focuses on the synthesis and integration of materials from the other classes while also dealing with the use of melodic and rhythmic motives, use of space and pacing, group interaction, performance preparation and success, and dealing with performance anxiety. Prerequisite: JAZZ 605. ACT.

JAZZ 608. Jazz Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. May be repeated for credit. ACT.

JAZZ 609. Jazz Combo. 0-1 Hours.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.

JAZZ 612. Vocal Jazz Ensemble. 0-1 Hours.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. For juniors, seniors, and graduate students. May be repeated for credit. ACT.

JAZZ 622. Studio Instruction. 2-4 Hours.
Studio instruction in jazz with emphasis placed on study and performance in jazz improvisation for juniors and seniors majoring in Jazz Studies BM. May be repeated for credit. Prerequisite: Majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

JAZZ 623. Senior Recital. 1 Hour.
Senior recital in Jazz for undergraduate performance majors pursuing the BM in Jazz Studies. Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: JAZZ 622. IND.

JAZZ 624. Jazz Improvisation I. 2 Hours.
Study of techniques involved in jazz improvisation, including application of chord/scale relationships to basic blues and II-V-I chord progressions; transcriptions of recorded jazz solos; and memorization of jazz standards and patterns. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. LAB.

JAZZ 625. Jazz Improvisation II. 2 Hours.
Study of advanced techniques in jazz improvisation, including third relationships, Coltrane changes, advanced reharmonization and altered pentatonic patterns and scales. Continuation of solo transcriptions, patterns and jazz standard memorization from Jazz Improvisation I. Prerequisite: JAZZ 224 or JAZZ 624 or permission of instructor. ACT.

JAZZ 630. Introduction to Jazz Piano. 2 Hours.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 635. Jazz Pedagogy. 2 Hours.
Information and techniques necessary to teach a full jazz studies curriculum in any settings, including the college level. Special emphasis is placed on the teaching of jazz improvisation/theory. LEC.

JAZZ 659. Jazz Arranging. 2 Hours.
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections. Prerequisite: JAZZ 105 or JAZZ 305 and JAZZ 230 or permission of instructor. ACT.

Courses

MEMT 111. Class Guitar for Nonmajors. 2 Hours.
Common chords, major and minor triads and major-minor sevenths, and fundamentals of music notation for guitar. Strumming and rudimentary finger picking. Performance of simple melodies on all six strings from standard notation. May be repeated for credit. IND.

MEMT 112. Performance Media: _____. 0.5-1 Hours.
Laboratory class lessons in pedagogy and performance. May be repeated for credit in different specific media. LAB.
MEMT 113. Performance Media: Brass. 1 Hour.
Knowledge and skills needed to teach brass instruments in music education settings. LAB.

MEMT 114. Performance Media: Woodwinds I. 1 Hour.
Knowledge and skills needed to teach flute and clarinet in music education settings. LAB.

MEMT 115. Performance Media: Percussion. 1 Hour.
Knowledge and skills needed to teach and use percussion instruments in music education settings. LAB.

MEMT 116. Performance Media: Computers, Synthesizers, and Electronics. 1 Hour.
Knowledge and skills needed to teach and use computers, synthesizers, and electronics. LAB.

MEMT 117. Performance Media: Voice. 1 Hour.
Knowledge and skills needed to teach and use voice functionally in music therapy settings. LAB.

MEMT 118. Performance Media: Strings. 1 Hour.
Knowledge and skills needed to teach string instruments in music education settings. LAB.

MEMT 119. Performance Media: Guitar. 1 Hour.
Knowledge and skills needed to teach and use guitar functionally in music education and music therapy settings. LAB.

MEMT 120. Vocal Performance in English. 0-1 Hours.
Fundamentals of solo vocal performance with an emphasis on English diction and communicating the English language. IND.

MEMT 150. Introduction to Music Therapy. 3 Hours.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

MEMT 160. Principles of Music Education. 1 Hour.
An overview of the music education field. History, philosophy, curricula, necessary skills and competencies for music educators, and alternative careers in music. LEC.

MEMT 161. Group Leadership Skills in Music Therapy. 2 Hours.
Music therapy group leadership skills: leading group singing, playing accompanying instruments, and developing effective delivery skills. Prerequisite: MEMT 150 Introduction to Music Therapy/MEMT 760 Principles of Music Therapy. LEC.

MEMT 229. Performance Clinic: ______. 1 Hour.
Designed to provide students with opportunities to sing and play instruments other than their principal instrument in ensembles. Materials chosen for suitability for secondary school ensembles. Techniques for care and maintenance of the voice and instruments. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

MEMT 230. Performance Clinic: Band. 1 Hour.
Continued development of the knowledge and skills needed to teach band in music education settings. Prerequisite: MEMT 113 and MEMT 114, or MEMT 113 and MEMT 115, or MEMT 114 and MEMT 115, or permission of the instructor. LAB.

MEMT 231. Performance Clinic: Choral. 1 Hour.
Continued development of the knowledge and skills needed to teach and use the singing voice in music education and music therapy settings. LAB.

MEMT 232. Performance Clinic: Orchestra. 1 Hour.
Continued development of the knowledge and skills needed to teach string instruments in music education settings. Prerequisite: MEMT 118 or permission of the instructor. LAB.

MEMT 246. Fundamentals of Conducting. 1 Hour.
This course deals with the techniques of the baton, with gestures, signs, and cures as generally used in conducting choral and instrumental organizations. It includes the essentials of conducting techniques in both the choral and instrumental types of ensemble performance. LAB.

MEMT 250. Human Musical Learning and Development. 2 Hours.
Music learning and development from infancy through adulthood.
Development of musical perception, cognition, performance skills, attitudes, and affective/aesthetic responses. Use of theoretical, knowledge-based rationale for building music instruction systems. LEC.

MEMT 251. Clinical Techniques for Children. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring/evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. Prerequisite: MEMT 250. Corequisite: SPED 326. LEC.

MEMT 296. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring/evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 311. Intermediate Class Guitar. 2 Hours.
Instruction in playing barre chords, blues and Latin strums, major and minor scales, position studies, and special effects such as the Travis pick, hammer on, and slurring techniques. Prerequisite: MEMT 116-Guitar; or MEMT 111; or permission of instructor. IND.

MEMT 314. Performance Media: Woodwinds II. 1 Hour.
Knowledge and skills needed to teach saxophone and double reed instruments in music education settings. Prerequisite: MEMT 114 Performance Media: Woodwinds I. LAB.

MEMT 329. Rehearsal/Conducting Clinic: ______. 1 Hour.
Rehearsing and conducting ensembles appropriate for music education and music therapy. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

MEMT 330. Rehearsal/Conducting Clinic: Band. 1 Hour GE22.
Knowledge and skills needed to rehearse and conduct band ensembles. Prerequisite: MEMT 230 and MEMT 246 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 331. Rehearsal/Conducting Clinic: Choral. 1 Hour GE22.
Knowledge and skills needed to rehearse and conduct choral ensembles. Prerequisite: MEMT 231 and MEMT 246 for Music Education majors or MEMT 231. Corequisite: MEMT 246 for Music Therapy majors or permission of the instructor. LAB.

MEMT 332. Rehearsal/Conducting Clinic: Orchestra. 1 Hour GE22.
Knowledge and skills needed to rehearse and conduct orchestral ensembles. Prerequisite: MEMT 232 and MEMT 246, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 333. Rehearsal/Conducting Clinic: Non-traditional Ensemble. 1 Hour.
Rehearsing and conducting non-traditional/ORFF ensemble appropriate for music education and music therapy. Prerequisite: Admission to the MEMT Professional Sequence or permission of the instructor. LAB.

MEMT 341. Instructional Strategies in Music for Elementary Classroom Teachers. 2 Hours.
Child growth and development in music. Materials as they relate to a sequential music education curriculum in the elementary school.
Prerequisite: Admission to the School of Education or the education division of the graduate school. LEC.

MEmT 349. Advanced Rehearsal/Conducting Clinic: _____. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct ensembles, including attention to more difficult literature with ensembles exhibiting increasing sophistication. May be repeated for credit.
Prerequisite: Admission into Music Education Professional Sequence and with permission of the MEmT division. LAB.

MEmT 350. Advanced Rehearsal/Conducting Clinic: Band. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct band ensembles, including attention to more difficult concert band literature with ensembles exhibiting increasing sophistication. Prerequisite: MEmT 330 and admission into the Music Education Professional Sequence; or with permission of the MEmT division. LAB.

MEmT 351. Advanced Rehearsal/Conducting Clinic: Choral. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct choral ensembles, including attention to more difficult choral literature with ensembles exhibiting increasing sophistication. Prerequisite: MEmT 331 and admission into the Music Education Professional Sequence; or with permission of the MEmT division. LAB.

MEmT 352. Advanced Rehearsal/Conducting Clinic: Orchestra. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct string orchestra ensembles, including attention to more difficult string orchestra literature with ensembles exhibiting increasing sophistication. Prerequisite: MEmT 332 and admission into Music Education Professional Sequence; or with permission of the MEmT division. LAB.

MEmT 366. Introduction to Research in Music Therapy and Music Education. 2 Hours.
Investigative techniques in music therapy and music education with emphasis on small group and case study design and analysis.
Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEmT division. LEC.

MEmT 367. Managing Behavior in the Musical Environment. 2 Hours.
Theories and techniques for managing the music classroom and clinic setting for best professional practice. Understanding the self and environment as management factors. Field practice of management techniques. Prerequisite: MEmT 250 and admission into the Music Education Professional Sequence or Music Therapy Professional Sequence; or with permission from the MEmT Division. LEC.

MEmT 396. Clinical Practicum. 1-3 Hours.
Supervised clinical practice in on-campus or other approved setting. May be repeated for credit. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEmT division. FLD.

MEmT 407. The Exceptional Child in Music Education. 2 Hours.
Skills and knowledge needed to facilitate appropriate and productive integration of exceptional children and youth into music classroom settings. Prerequisite: MEmT 367, SPED 326, and admission into the Music Education Professional Sequence; or with permission of the MEmT division. LEC.

MEmT 408. Vocal Pedagogy. 1 Hour.
Knowledge and skills needed to teach voice, with particular attention to lifespan voice anatomy, physiology, and acoustics, diagnosis and correction of vocal inefficiencies, teaching styles, repertoire choice, professional development, and acquaintance with current research in voice science and vocal pedagogy. Includes a voice teaching practicum. (Same as VOIC 408.) Prerequisite: MEmT 160, MEmT 231, MEmT 331 and admission into the Music Education Professional Sequence or the Music Therapy Professional Sequence; or with permission from the MEmT division. LEC.

MEmT 419. PreK-12 Music Curriculum. 1 Hour.
The design of PreK-12 general music curriculum that includes a statement of philosophy, a scope and sequence, music literature, a variety of methodologies, and technology integration for use in public school teaching. Prerequisite: MEmT 367 and admission into the Music Education Professional Sequence; or with permission of the MEmT division. LEC.

MEmT 420. Teaching Elementary and Secondary General Music. 3 Hours.
Methods and materials for teaching music through singing, playing instruments, moving, listening, and creative activities to students in early childhood through adulthood, including those with disabilities. The course will also deal with music in diverse cultures and integrating music into the general curriculum. Prerequisite: MEmT 367 and admission into the Music Education Professional Sequence; or with permission of the MEmT division. LEC.

MEmT 421. Advanced General Music Teaching. 1 Hour.
Enhanced methodology and pedagogy course for the general music classroom; advanced instruction in teaching children to improvise, sing, play classroom instruments, listen, move, and create music based on specific pedagogies; advanced instruction in assessment strategies. This course is for undergraduate music majors in their senior year. Prerequisite: MEmT 420 and admission to the Music Education Professional Sequence. LEC.

MEmT 431. Choral Diction for Music Educators. 1 Hour.
Knowledge and skills needed to teach choral diction in music education settings. Prerequisite: Admission into the Music Education Professional Sequence; or with permission of the MEmT division. LEC.

MEmT 432. Approaches to String Pedagogy. 1 Hour.
An examination of the concepts and skills associated with the most influential past and current pedagogical approaches to string education.
Prerequisite: Admission to the Music Education Professional Sequence. LEC.

MEmT 433. Jazz Techniques. 0-1 Hours.
Knowledge and skills needed to teach jazz techniques in music education settings. Prerequisite: Admission into the Music Education Professional Sequence. LEC.

MEmT 435. Marching Band Techniques. 1 Hour.
Knowledge and skills needed to teach and administer marching bands in music education settings. Prerequisite: Admission into the Music Education Professional Sequence; or with permission of the MEmT division. LEC.

MEmT 450. Teaching Choral Music. 2 Hours.
Application of research-based skills for curriculum development, content selection, and development of teaching strategies for choral music programs to students in early childhood through adulthood including those with disabilities. Prerequisite: MEmT 331, MEmT 420, and admission into the Music Education Professional Sequence; or with permission of the MEmT division. LEC.

MEmT 451. Teaching Instrumental Music. 2 Hours.
Application of research-based skills for curriculum development, content selection, and development of teaching strategies for instrumental music programs to students in early childhood through adulthood including those with disabilities. Prerequisite: MEmT 330, MEmT 420, and admission into
A supervised teaching experience in an approved school setting, with MEMT 500. Student Teaching in: _____. 1-6 Hours.

or concurrent enrollment with MEMT 498. INT.

Admission into the Music Education Professional Sequence and either completion of minimum of eleven weeks full time experience. Prerequisite: Admission the remaining area not experienced in MEMT 498. This experience is a certification. The student assumes the total professional role as a teacher.

A supervised internship experience leading to initial music teacher certification. The student assumes the professional role as a teacher.

MEMT 463. The Influence of Music on Behavior I. 3 Hours.

A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission of the MEMT division. LEC.

MEMT 464. Music in Therapy. 3 Hours.

Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission of the MEMT division. LEC.

MEMT 472. Music Education and Music Therapy Research Project. 1-3 Hours.

Clinical, laboratory, field, or historical research in music education or music therapy. May be repeated for credit. Prerequisite: MEMT 366 or equivalent, and permission of instructor. RSH.

MEMT 497. Independent Study in: ____. 1-4 Hours.

Only one enrollment permitted each semester; a maximum of four hours will apply toward the bachelor's degree. May be repeated for credit. Prerequisite: Recommendation of advisor and consent of instructor. IND.

MEMT 498. Student Teaching. 2-4 Hours AE61.

A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. May be repeated for credit. Prerequisite: Admission to the Student Teaching program. INT.

MEMT 586. Seminar in Music Therapy Professional Development I. 1 Hour.

This seminar style course will focus on Internship Placement, Board Certification, and Professional Advocacy. Undergraduate Prerequisite: MEMT 463 and MEMT 464. Graduate Corequisite: MEMT 763 and MEMT 764. LEC.

MEMT 587. Seminar in Music Therapy Professional Development II. 1 Hour.

This seminar style course will focus on supervision, Ethics, and Professional Involvement in AMTA. Prerequisite: MEMT 586. LEC.

Successful completion of six months of full-time clinical experience (minimum of 1,040 hours) as a music therapy intern in an approved setting. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Completion of senior year in music therapy or its equivalent at the graduate level. INT.

MEMT 597. Individual Study in: ____. 1-15 Hours.

A special course of study to meet current needs of education students -- primarily for undergraduates. May be repeated for credit. LEC.

MEMT 616. Advanced Pedagogy and Materials: _____. 1 Hour.

(FL) Techniques and materials appropriate for instruction in musical media. May be repeated for credit in different specific media. LAB.

MEMT 651. Sociocultural Influences on Musical Behavior. 3 Hours.

Cultural and social determinants of musical behavior. Musical value systems in contemporary cultures. Prerequisite: MTHC 214 or MEMT 341 or permission of instructor. LEC.

MEMT 670. Acoustics of Music. 3 Hours.

Study of physical aspects of sound, stressing the production, reproduction, transmission, and reception of musical sounds. Acoustics of musical instruments and auditoria, systems of tuning, wave phenomena in musical environments, behavior of the ear, and electrical analysis, synthesis, and recording are included. Laboratory. LEC.

MEMT 695. Developing Theoretical Framework for Evidence-Based Practice. 3 Hours.

The purpose of this course is to provide music therapy majors with the tools to read, evaluate, understand, and facilitate research in order to develop a theoretical framework for decision making in evidence based clinical practice. Prerequisite: MEMT 464 Music in Therapy or MEMT 764 Music in Therapy and admission to the Music Therapy Professional Sequence. LEC.

MEMT 707. Mainstreaming/Inclusion in Music Education. 2 Hours.

Skills and knowledge needed to facilitate appropriate and productive integration of children and youth with disabilities into music classroom settings. Prerequisite: MEMT 500 and SPED 431. LEC.

MEMT 710. Professional Development. 1 Hour.

Participation in approved professional development conferences. Requires documentation of attendance, an annotated time log of activities, and a short paper. May be repeated for up to 3 credit hours. FLD.
MEMT 711. Emerging Technologies for Choral Teaching and Learning. 2-3 Hours.
Applications of current digital and electronic technologies to choral ensemble teaching and learning. LEC.

MEMT 713. Advanced Brass Techniques. 1.5 Hour.
Advanced instruction of brass-specific methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments. LEC.

MEMT 714. Advanced Woodwind Techniques. 1.5 Hour.
Advanced instruction of woodwind-specific methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments. LEC.

MEMT 715. Advanced Percussion Techniques. 1.5 Hour.
Advanced instruction of percussion-specific methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments. LEC.

MEMT 717. Advanced Low-String Techniques. 1.5 Hour.
Offers advanced methodologies, strategies, approaches, and materials specific to cello and bass instruction for the music education practitioner teaching in instrumental settings or clinical environments. LEC.

MEMT 718. Advanced High-String Techniques. 1.5 Hour.
Offers advanced methodologies, strategies, approaches, and materials specific to violin and viola instruction for the music education practitioner teaching in instrumental settings or clinical environments. LEC.

MEMT 735. Marching Band Technique. 1.5 Hour.
Offers advanced instruction of the methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments. LEC.

MEMT 750. Measurement in Music Education Professional Practice. 3 Hours.
Skills and knowledge needed by professional music educators to assess and evaluate students, learning, instruction, curriculum, and programs. Measurement and evaluation techniques for cognitive, affective, and psychomotor learning in music. Criterion and norm reference measures in formative and summative evaluation. Use of evaluation data for improving instruction, curriculum, and program. Standardized tests. Reporting and interpreting evaluation results. LEC.

MEMT 753. Psychology and Acoustics of Music. 5 Hours.
Psychological and acoustical bases of music and human musical behavior. Study of musical sound production, transmission, perception, cognition, response, and reproduction. Laboratory component and research project required. LEC.

MEMT 755. Psychology of Music for the Music Education Practitioner. 3 Hours.
Examines psychological aspects of music and human musical behavior as they pertain to music instruction. Study of musical development, motivation, practice, performance anxiety, and the acquisition of musical skill. LEC.

MEMT 760. Principles of Music Therapy. 3 Hours.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

MEMT 761. Clinical Techniques for Children. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 762. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 763. The Influence of Music on Behavior I. 3 Hours.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 764. Music in Therapy. 3 Hours.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, and evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 772. Music Education and Music Therapy Research Project. 1-3 Hours.
Clinical, laboratory, field, or historical research in music education or music therapy. May be repeated for credit. Prerequisite: MEMT 366 or equivalent, permission of instructor. IND.

MEMT 780. Internship in Teaching Music: ____. 1-15 Hours.
A supervised internship experience leading to initial music teacher certification. The student assumes the total professional role as a teacher of music in an approved school setting. INT.

MEMT 791. Music Education/Music Therapy Techniques: ____. 1-3 Hours.
Specific methodologies, strategies, approaches, and materials for music education/music therapy for specific populations, musical media, instructional settings, or clinical environments. May be repeated for credit. LEC.

MEMT 798. Special Course: ____. 1-5 Hours.
A special course of study to meet current needs of education professionals -- primarily for graduate students. May be repeated for credit. LEC.

MEMT 812. Research in Music Education and Music Therapy. 3 Hours.
Study of research in music education and music therapy. Required of all candidates for graduate degrees. Enrollment must precede or be concurrent with enrollment in thesis. LEC.

MEMT 813. History and Philosophy of Music Education. 3 Hours.
A study of music education with reference to its historical development and to educational psychology. Consideration of recent trends and the place of music in the school curriculum. Criteria for the evaluation of activities, courses, materials, and methods in a well-balanced program of music. LEC.

MEMT 814. Sociology of Music. 3 Hours.
A study of societal influence on musical thought and practice, both in historical perspective and in comparative study of contemporary societies. The relations between school and community music. The role of musical organizations, institutions, and agencies in American life. LEC.
MEMT 815. Musical Values and Aesthetics. 3 Hours.
Examination of musical values in the context of music's functions and uses. Diverse viewpoints are considered, with attention to philosophical and psychological aesthetics. Implications and applications of values systems for music education, music therapy, and other fields. LEC.

MEMT 816. Current Trends in Music Education. 3 Hours.
A comprehensive study of the elements that contribute to current practice and successful music programs (many of all of these may be anticipated dependent upon the class participants' needs): curriculum, standards, assessment, classroom management, pedagogy, leadership, organizational structure, budget and finance, scheduling, federal mandates, and administrative practices. LEC.

MEMT 817. Methodologies in Music Education. 3 Hours.
A survey of music methodologies (general, vocal, instrumental) used by teachers at the pre-school, elementary, middle/junior high, and high school levels. LEC.

MEMT 818. Behavior Management in Music. 3 Hours.
A study of behavioral theories and techniques as applied to classroom and clinical settings for music professionals. Emphasis on a conceptual framework for human behavior and the ameliorative aspects of music. LEC.

MEMT 819. Music in Early Childhood. 2 Hours.
Child development as related to musical development, including implications for participation in music from birth through age seven. Current trends in goals, objectives, materials, equipment, facilities, training and evaluation will be discussed. LEC.

MEMT 820. Advanced Choral Conducting and Rehearsal Techniques. 3 Hours.
Refinement of conducting and teaching skills in a choral setting. Focus on relationships between gesture and choral sound, rehearsal structure and optimal learning, and age-appropriate choral literature and development of musicality. (Same as COND 820.) LAB.

MEMT 821. 20th Century School Band & Orchestra. 3 Hours.
Examines instrumental music in the public school as a uniquely American phenomenon. A period-by-period approach to its development is taken, beginning with various precursors. LEC.

MEMT 823 Seminar in: _____. 1-3 Hours.
May be repeated for credit. LEC.

MEMT 825. Choral Diction. 3 Hours.
Study of methods to teach and learn diction in choral music contexts. Attention to International Phonetic Alphabet, acoustic implications of particular phonemes, and contributions of emerging technologies. Application of various languages, including English, Latin, Italian, French, German, and Spanish. (Same as CHOR 825.) LEC.

MEMT 826. Adolescent Changing Voices. 3 Hours.
Scientific approaches to the pedagogy of adolescent male and female voices during voice change. (Same as CHOR 826.) LEC.

MEMT 827. Children's Voices. 3 Hours.
Scientific approaches to understanding and working with unchanged children's voices. (Same as CHOR 827.) LEC.

MEMT 828. Science-based Voice Education. 3-6 Hours.
Comprehensive examination of vocal anatomy, respiration, phonation, resonance, articulation, and voice development, with particular attention to research-based vocal/choral pedagogies for working with child through senior adult voices. (Same as CHOR 828.) Prerequisite: Permission of instructor. LEC.

MEMT 830. Leadership and Program Development in Music Education. 2-3 Hours.
A comprehensive study of the elements of management, leadership, organizational structure, budget and finance, federal mandates, and administrative practices. LEC.

MEMT 835. Practical Applications of Advanced Methodology in the Music Classroom. 2-3 Hours.
A comprehensive study and application of the elements that contribute to current practice in methodology and pedagogy in the music classroom, encompassing elementary general, choral, orchestral, and band music. LEC.

MEMT 838. Orff Applications in Music Education and Music Therapy. 2 Hours.
The use of the Orff-Shulwerk approach in music education and music therapy. Course includes historical background, philosophical approach and practical application of the process. Prerequisite: Admission to professional sequence or permission from MEMT division. LEC.

MEMT 840. Development and Application of Improvisational Skills. 2-3 Hours.
Development of individual and group improvisation skills and their applications in professional practice. LEC.

MEMT 845. Curriculum Development in Music Education. 3 Hours.
Developing a practical and useful music curriculum that aligns theoretical/philosophical position, program goals, course objectives, instructional materials, learning activities, and assessments. LEC.

MEMT 850. Measurement of Musical Behavior. 3 Hours.
Measurement theory applied to the development and administration of measures of musical ability, achievement, attitude, and performance for the use in individual and program evaluation. Classical and innovative methods for establishing reliability and validity. Each student will develop and evaluate a measure of some type of musical behavior appropriate for an educational or therapeutic setting. LEC.

MEMT 854. Music Therapy in Pediatrics. 2 Hours.
The use of music therapy in individual and group pediatric settings. Course includes an overview of childhood illnesses, associated medical terminology, and therapy techniques used as contextual and procedural support. Prerequisite: Admission to professional sequence or permission from MEMT division. LEC.

MEMT 855. Music Therapy in Hospice and Bereavement. 2 Hours.
The use of music therapy for hospice patients and their families, as well as clients who are grieving due to death of a loved one. Course includes historical, theoretical and practical perspectives. Prerequisite: Admission to professional sequence or permission from MEMT division. LEC.

MEMT 856. Neurologic Music Therapy. 2 Hours.
The scientific basis for the neurological influence of music on behaviors in physical functioning and cognitive functioning will be explored in rehabilitation and learning models. Clinical experience will be included. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor. FLD.

MEMT 857. Music Therapy in Gerontology. 2 Hours.
The theories and clinical applications of music therapy across the life span of older adults, including the young old, the middle old, and the old old. Special considerations will be given to persons with debilitating conditions including dementia, and to older persons' professional and family caregivers. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor. FLD.
MEMT 858. Music Therapy in Medical Care and Wellness of Adult Persons. 2 Hours.
The theories and practice of music therapy as enhancement to health and wellness and to medical interventions for adults will include applications within the medical setting and in the home setting. Interventions will include, among others, approaches for stress management, medical procedural support, pre-operative and post-operative support, follow-up care in catastrophic illness, interventions in post-traumatic stress disorder, and others. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor. FLD.

MEMT 860. Assessment in Music Therapy Professional Practice. 2 Hours.
Skills and knowledge needed to assess and evaluate clients, goals, treatments and their effectiveness, program outcomes, program quality, and quality of care. LEC.

MEMT 861. Current Trends in Music Therapy. 2 Hours.
A comprehensive study of the elements that contribute to current practice in music therapy, but not limited to, professional competencies, code of ethics, assessment and implementation of interventions, leadership, organizational structure, budget and finance, scheduling and management of contracts, grant writing, and other administrative practices. FLD.

MEMT 863. The Influence of Music on Behavior II. 2 Hours.
A laboratory and research course to accompany or follow MEMT 763. LAB.

MEMT 864. Philosophy and Theory of Music Therapy. 3 Hours.
Concentrated, interdisciplinary study of conceptual foundations for music therapy. LEC.

MEMT 890. Practicum in Music Therapy. 1-16 Hours.
Advanced music therapy practice including clinical work with a population of the student's choice which incorporates music therapy program design, implementation, and evaluation. The student will work in consultation with qualified Music Therapy staff. May be repeated for credit. FLD.

MEMT 891. Advanced Clinical Techniques. 3 Hours.
The student will articulate, test and refine music therapy clinical practice protocol(s) with a clientele(s) of choice. Students will work in consultation with qualified Music Therapy staff. FLD.

MEMT 892. Supervision in Music Therapy I. 3 Hours.
Study and application of theoretical models and supervisory roles applicable to music therapy clinical supervision. Students will review developmental levels for supervisors and practicum students. Supervision of music therapy clinical practicum students will be required. LEC.

MEMT 893. Supervision in Music Therapy II. 3 Hours.
A model of practicum supervision will be applied in music therapy clinical practicum supervision. Video and/or tape recordings of supervision conferences with practicum students will be reviewed in consultation with qualified music therapy staff. LEC.

MEMT 895. Master's Project. 1-3 Hours.
May be repeated for credit. RSH.

MEMT 897. Independent Study:_____. 1-4 Hours.
May be repeated for credit. Prerequisite: Consent of advisor and instructor. RSH.

MEMT 898. Comprehensive Examination. 1 Hour.
An independent course in preparation for the non-thesis M.M.E. degree final examination. Prerequisite: Permission of the instructor. IND.

MEMT 899. Master's Thesis. 1-6 Hours.
May be repeated for credit. THE.

MEMT 900. Learning Theories and Music Education. 3 Hours.
(V) A broad survey of formal learning theories and other approaches to the teaching-learning situation, accenting implications for, applications to, and research needs in music education. LEC.

MEMT 912. Administration of Music Education Programs. 3 Hours.
A study of the administration of music education programs at all school levels; topics will include personnel, finance, curriculum, supervision, and articulation of the music program with other segments of the school and community. LEC.

MEMT 915. Teaching Music in Higher Education. 3 Hours.
Knowledge, skills, and dispositions for graduate students in music who are preparing to teach at the college level. This course is directed toward the end of developing competencies and understandings that will contribute to one's becoming an effective college/university teacher. LEC.

MEMT 920. Doctoral Seminar in Music Education and Music Therapy. 0-1 Hours.
This course will emphasize strategies and skills for successful completion of the doctoral program, as well as strategies and skills to prepare doctoral students to contribute to the profession as college teachers, researchers, master teachers, and arts administrators. Course may be repeated for zero credit. LEC.

MEMT 923. Seminar in_____. 1-3 Hours.
May be repeated for credit. LEC.

MEMT 935. Advanced Acoustical and Psychological Aspects of Musical Behavior. 3 Hours.
Study and experimental investigation of acoustical, psychoacoustical, and psychological phenomena as they influence music. Attention will be given to physical parameters; estimation of pitch, loudness, and timbre; magnitude estimation; theories of consonance; experimental aesthetics; and measurement and prediction of musical ability. Each student will be expected to complete an experiment or quasi-experiment related to human musical behavior. (Same as PSYC 853.) Prerequisite: MEMT 453 or equivalent, or permission of instructor. LEC.

MEMT 965. Advanced Methods in Experimental and Descriptive Research in Music. 3 Hours.
An advanced study of experimental and descriptive research techniques with careful investigation of research design, experimental control, analysis and manuscript composition. Consideration of recent trends in research methods and their place in the scholarly schemata will be reviewed. Prerequisite: MEMT 812 or permission of instructor. LEC.

MEMT 972. Research in Music Education. 2-5 Hours.
For students who are sufficiently qualified to conduct original investigations in this field. Consent of instructor necessary. May be repeated for credit. IND.

MEMT 980. Advanced Topics:_____. 1-3 Hours.
A special course of study to meet current needs of education professionals -- primarily for post-master's level students. May be repeated for credit. IND.

MEMT 995. Field Experience in:_____. 1-5 Hours.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. May be repeated for credit. FLD.
MEMT 996. Practicum in College Teaching. 1-3 Hours.
College teaching experience, guided by a major professor in the department. Open only to doctoral aspirants or candidates. FLD.

MEMT 997. Individual Study: _____. 1-4 Hours.
May be repeated for credit. Prerequisite: Prior graduate course work in the area of study and consent of Instructor. IND.

MEMT 998. Seminar in: _____. 1-4 Hours.
May be repeated for credit. LEC.

MEMT 999. Doctoral Dissertation. 1-15 Hours.
May be repeated for credit. THE.

Courses

MTHC 99. Fundamentals of Music. 1 Hour.
Tutoring for music majors as required based on fundamentals exam given in MTHC 105, Theory I. LEC.

MTHC 105. Theory I. 3 Hours.
The first semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music. Must be taken concurrently with MTHC 106. Prerequisite: Music major or consent of instructor. LEC.

MTHC 106. Aural Skills I. 1 Hour.
The first semester of a one-year aural skills course that trains students to hear and sing the melodies, rhythms, and harmonies associated with common-practice tonal music. Must be taken concurrently with MTHC 105. Prerequisite: Music 106. LEC.

MTHC 115. Theory II. 3 Hours GE11.
The second semester of an integrated two-year theory sequence that examines the harmonic, rhythmic, and formal organization of music. MTHC 105 and must be taken concurrently with MTHC 116. Satisfies: Goal 1 Outcome 1 (GE11). Prerequisite: MTHC 105. LEC.

MTHC 116. Aural Skills II. 1 Hour.
The second semester of a one-year aural skills course that trains students to hear and sing the melodies, rhythms, and harmonies associated with common-practice tonal music. Must be taken concurrently with MTHC 115. Prerequisite: MTHC 106. LEC.

MTHC 150. Introduction to Music Theory: Reading, Listening, Composing. 3 Hours.
An introductory course for non-music majors, emphasizing western art and vernacular styles of music. Students will participate in and interact with various parameters of music through the acquisition of basic musical skills. For freshmen and sophomores. LEC.

MTHC 205. Theory III. 4 Hours GE11.
The third semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Prerequisite: MTHC 115 and MTHC 116. LEC.

MTHC 252. Introduction to Composition. 2 Hours.
Fundamentals of musical composition, including melody, rhythm, harmony, notation, and instrumentation. Students will create new works for performance. Prerequisite: MTHC 115 and MTHC 116 or permission of instructor. LEC.

MTHC 253. Composition. 2 Hours.
For music theory and composition majors. Creative writing using basic concepts in harmony, melody, and form. May be repeated for credit. Prerequisite: MTHC 115 and MTHC 116 and MTHC 252 or permission of instructor. IND.

MTHC 301. Music Videos. 3 Hours GE3H.
The analysis of music videos from 1981-present. LEC.

MTHC 315. Theory IV. 4 Hours.
The fourth semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Includes study of musical forms from the common practice period and analytical techniques for post-tonal music. Prerequisite: MTHC 205. LEC.

MTHC 316. Tonal Form and Post-Tonal Techniques. 4 Hours.
A study of musical forms from the common practice period through the present day and analytical techniques for post-tonal music. The class is designed for music education and music therapy majors. Prerequisite: MTHC 205, music education, or music therapy major. LEC.

MTHC 350. Introduction to Music Theory: Reading, Listening, Composing. 3 Hours.
An introductory course for non-music majors, emphasizing western art and vernacular styles of music. Students will participate in and interact with various parameters of music through the acquisition of basic musical skills. For juniors and seniors. LEC.

MTHC 355. Readings in Music Theory: _____. 1-4 Hours.
Investigation of a subject by means of directed readings using primary scholarly sources. May be repeated for credit. Prerequisite: Consent of instructor. LEC.

MTHC 400. Graduate Review: Written Theory. 1 Hour.
A review of basic harmonic and voice-leading principles relevant to the common-practice period. For graduate students deficient in undergraduate harmonic theory. LEC.

MTHC 402. Graduate Review: Aural Skills. 1 Hour.
A review of aural and sight-reading skills relevant to the common-practice period. For graduate students deficient in undergraduate aural theory. LEC.

MTHC 404. Graduate Review: Form. 1 Hour.
A review of basic forms relevant to the common-practice period. For graduate students deficient in undergraduate form. LEC.

MTHC 406. Graduate Review: Post-Tonal Music. 1 Hour.
A review of basic theories and techniques relevant for understanding post-tonal music. For graduate students deficient in undergraduate post-tonal theory. LEC.

MTHC 410. Form and Analysis. 3 Hours.
Analysis of the formal designs of movement-length forms from the Baroque to the present day with an emphasis on performance and interpretation. Prerequisite: MTHC 315. LEC.

MTHC 432. Introduction to the Analysis Contemporary Music. 3 Hours.
Introductory course in the sequence, presenting the basic tools of post-tonal and 20th century composition, including, serial techniques, set theory, extended tertian harmony, minimalist techniques, contemporary tonality and other trends. Exploration of form and complex rhythmic structures as well as aural skills appropriate to the subject matter. Prerequisite: MTHC 315. LEC.

MTHC 433. Advanced Analysis of Contemporary Music. 3 Hours.
Analysis seminar, emphasizing intense study of larger contemporary works, using techniques learned in the first course (MTHC 732). Further content will vary according to the instructor. Includes aural skills work appropriate to the subject matter. Prerequisite: MTHC 432. LEC.
MTHC 459. Scoring for Field Band. 2 Hours.
Primary voicings and textural possibilities for wind and percussion instruments will be stressed as these resources relate to the arranging of music for marching and pep bands at the secondary level. (Same as BAND 459.) Prerequisite: MTHC 205. LEC.

MTHC 485. Composing and Arranging for Educational Ensembles. 2 Hours.
For music majors interested in learning to write for primary and secondary educational performing groups. Emphasizes conventional tonal practices and idiomatic, accessible writing for young players. Prerequisite: MTHC 205, MTHC 484, and MTHC 459. IND.

MTHC 486. Undergraduate Recital. 1 Hour AE61.
Composition recital for undergraduate music composition majors. Prerequisite: Permission of instructor. IND.

MTHC 499. Senior Research Project. 1-4 Hours AE61.
For seniors majoring in music theory who will normally enroll for two credits in each of the last two semesters. Students will write a scholarly paper on an approved topic. May be repeated for credit. IND.

MTHC 541. Eighteenth-Century Counterpoint. 3 Hours.
A study of eighteenth century style with analysis and original work. Prerequisite: MTHC 205. LEC.

MTHC 542. Sixteenth-Century Counterpoint. 3 Hours.
A study of sixteenth-century style with analysis and original work. Prerequisite: MTHC 205. LEC.

MTHC 559. Scoring for Concert Band. 2 Hours.
Curriculum includes idiomatic writing, tonal balance, scoring for large percussion sections, and analysis of wind colors and instrumental combinations found in music of Holst, Vaughan Williams, Grainger, Stravinsky, Hindemith, and C. Williams. (Same as BAND 559.) Prerequisite: MTHC 205 and MTHC 459. IND.

MTHC 563. Survey in Jazz Composition and Arranging. 3 Hours.
Analysis of jazz composition and orchestration, beginning with early procedures (Louis Armstrong through the "Big Band Era") and culminating with analysis of scores by Gil Evans and Bob Brookmeyer. Prerequisite: Permission of instructor required. LEC.

MTHC 583. Composition. 2 Hours.
Advanced composition including larger forms in a variety of media. Composition majors will present a public recital of original works during the fourth semester of enrollment. May be repeated for credit. Prerequisite: MTHC 253 or consent of instructor. IND.

MTHC 610. Tonal Forms. 3 Hours.
Phrase structure and formal design in common-practice tonal music. Structural analysis of binary, ternary, rondo, sonata, variations and contrapuntal, multi-movement forms. LEC.

MTHC 643. Contemporary Repertoire. 3 Hours.
Comprehensive overview of major composers and works of the past beginning in the mid 20th Century, but focusing on music written in the last 40 years, major contemporary ensembles and granting organizations. Prerequisite: Graduate standing in MTHC or permission of instructor. LEC.

MTHC 655. Readings in Music Theory: ____. 1-4 Hours.
Investigation of a subject by means of directed readings of primary scholarly sources. May be repeated for credit. Prerequisite: MTHC 410 and consent of instructor. IND.

MTHC 670. Seminar in New Art Song. 3 Hours.
Collaborative workshop for composers, singers, and collaborative pianists. Collaborative performance and analysis of recent art song. Collaborative composition and performance of new art song. Prerequisite: Consent of instructor. LEC.

MTHC 674. Orchestration I. 3 Hours.
A study of the four families of orchestral instruments (woodwinds, brass, percussion, and strings) concentrating on ranges, transpositions, timbres, and techniques of the various instruments. Scoring projects concentrate on voicing and balance within the individual choirs of the orchestra. Prerequisite: MTHC 205. LEC.

MTHC 676. Orchestration II. 3 Hours.
A continuation of MTHC 674. Emphasis on scoring for full symphony orchestra and the large wind ensemble. Prerequisite: MTHC 674. LEC.

MTHC 678. Electro-Acoustic Composition I. 3 Hours.
Survey of concepts and practices of electronic sound synthesis. Required of music theory and composition majors, and open to other music majors by consent of department. Prerequisite: MTHC 315 or MTHC 316. LEC.

MTHC 680. Electro-Acoustic Composition II. 3 Hours.
Basic concepts and techniques of electronic composition. For majors in music theory and composition. Prerequisite: MTHC 678 and consent of division. LEC.

MTHC 701. Music Videos. 3 Hours.
The analysis of music videos from 1981-present. LEC.

MTHC 732. Introduction to the Analysis of Contemporary Music. 3 Hours.
Introductory course in the sequence, presenting the basic tools of post-tonal and 20th century composition, including, serial techniques, set theory, extended t tertian harmony, minimalist techniques, contemporary tonality and other trends. Exploration of form and complex rhythm structures as well as aural skills appropriate to the subject matter. Prerequisite: MTHC 315 or MTHC 316. LEC.

MTHC 733. Advanced Analysis of Contemporary Music. 3 Hours.
Analytical seminar, emphasizing intense study of larger contemporary works, using techniques learned in the first course (MTHC 732). Further content will vary according to the instructor. Includes aural skills work appropriate to the subject matter. Prerequisite: MTHC 315 or MTHC 316. LEC.

MTHC 741. Canon and Fugue. 3 Hours.
A study of strict imitation and fugal writing. Practical work in two, three, and four parts in various media. Prerequisite: MTHC 541. LEC.

MTHC 778. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. (Same as MUSC 778.) LEC.

MTHC 789. Seminar on Selected Topics: _____. 0.5-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

MTHC 801. Advanced Analysis I. 3 Hours.
A bibliographic survey intended to explore aspects of both structure (rhythm, texture and timber) and methodology (semiotics, gesture and cognition) that variously complement the pitch-based approaches to musical interpretation associated with Schenkerian tonal analysis and pitch-class theory. Prerequisite: MTHC 732 Introduction to the Analysis of Contemporary Music or permission of instructor. LEC.

MTHC 802. Advanced Analysis II. 3 Hours.
A bibliographic survey intended to explore in depth the pitch grammars developed by composers of Western Art Music since circa 1910, and the various methodologies assembled to codify them. Prerequisite: MTHC 732 Introduction to the Analysis of Contemporary Music or permission of instructor. LEC.
MTHC 810. Advanced Form. 3 Hours.
An investigation of formal types, processes and functions in the music of the seventeenth through the twentieth centuries, focusing on instrumental genres. Prerequisite: Permission of instructor. LEC.

MTHC 820. Seminar in Schenkerian Analysis. 3 Hours.
A study of the theories and analytical methodologies developed by the Austrian theorist Heinrich Schenker. Prerequisite: MTHC 410 or permission of the instructor. LEC.

MTHC 825. Computers in Music and Music Research. 3 Hours.
A seminar designed to develop and explore the use and programming of microcomputers as an aid in research and the production of music. Topics will include composition and production tools for music, structured program design, data representation, and basic computer-assisted instruction models. Prerequisite: EECS 138 or equivalent or permission of the instructor. LEC.

MTHC 830. Pedagogy of Music Theory. 1-3 Hours.
Procedures for teaching theoretical concepts and skills. Survey of available texts and related materials. Three credits when offered during a full academic term; one-two credits when offered as a short-term institute. Prerequisite: MTHC 315 or MTHC 316 or permission of instructor. LEC.

MTHC 840. Pedagogy of Music Composition. 3 Hours.
This course provides an overview of pedagogical philosophies in music composition and is designed to prepare students for a teaching position in higher education. The course emphasizes broad critical understanding of historic, aesthetic, and theoretical perspectives pertinent to the field of composition pedagogy. Teaching methodologies are explored for one-on-one studio instruction, group lesson instruction, masterclass, and classroom instruction. Prerequisite: Consent of instructor. LEC.

MTHC 853. Advanced Composition. 1-6 Hours.
Essentially for theory and composition majors on the master's level. May be repeated for credit. Summer session limit one to three hours. RSH.

MTHC 887. Advanced Orchestration. 3 Hours.
Prerequisite: MTHC 676, or consent of department. May be repeated for credit. RSH.

MTHC 889. Seminar on Selected Topics: ____. 0.5-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

MUS 100. Directed Study: ____. 1-4 Hours.
This is an all-purpose fill in the blank course for freshmen and sophomores. It can be used when need arises. May be repeated for credit. IND.

MUS 140. Encounter with Music and Musicians. 3 Hours H.
A study of concert and recital music as it relates to the performer and listener. Students will have interaction with professional musicians through live performances and discussions with the performers. Music performed on the concert and chamber music series and on concerts of music department faculty will be carefully examined. Baroque through modern music, jazz, and music of other cultures are the basic units in the course. Written research projects and reviews of performances are required. LEC.

A team-taught, performance-based survey for wind and string students of musical styles from the Baroque to present. Students will examine music from their perspective literature from several different perspectives including: historical, theoretical, technical, and expressive. The integration of these perspectives into the students' performance is the ultimate goal of the course. May be repeated for credit. Prerequisite: Approval of applied instrumental instructor. IND.

MUS 300. Directed Studies: ____. 1-4 Hours.
This is an all-purpose fill in the blank course for juniors and seniors. It can be used when need arises. May be repeated for credit. IND.

MUS 340. Encounter with Music and Musicians. 3 Hours H.
A study of concert and recital music as it relates to the performer and listener. Students will have interaction with professional musicians through live performances and discussions with the performers. Music performed on the concert and chamber music series and on concerts of music department faculty will be carefully examined. Baroque through modern music, jazz, and music of other cultures are the basic units in the course. Written research projects and reviews of performances are required. LEC.

MUS 388. Curriculum and Pedagogy in: ____. 1 Hour.
Independent study. Prerequisite: Permission of Instructor. IND.

A team-taught, performance-based survey for wind and string students of musical styles from the Baroque to present. Students will examine music from their perspective literature from several different perspectives including: historical, theoretical, technical, and expressive. The integration of these perspectives into the students' performance is the ultimate goal of the course. May be repeated for credit. Prerequisite: Approval of applied instrumental instructor. IND.

MUS 586. The Business of Music. 3 Hours.
A course covering commercial aspects of the music business, including publishing, copyright law, recording, live performance, the motion picture and radio business, composition, teaching, and music merchandising. Prerequisite: Consent of the instructor. LEC.

MUS 587. Entrepreneurship and Outreach. 3 Hours.
An expansion of knowledge of current entrepreneurship trends and approaches to arts management. Prerequisite: MUS 586. Open only to junior, senior, and graduate students. LEC.

MUS 588. Arts Management. 3 Hours.
A comprehensive overview of the arts management field. Prerequisite: MUS 586. Open only to junior, senior, and graduate students. LEC.
MUSC 135. Masterworks of Music. 3 Hours.
Honors version of MUSC 136/MUSC 336. Open only to students in the University Honors Program or by permission of instructor. Designed to aid non-music majors in developing skills needed for listening to music. Emphasis on masterworks of Western music. A student may receive credit for only one of the four courses numbers: MUSC 135, MUSC 335, MUSC 136, MUSC 336. LEC.

MUSC 136. Masterworks of Music. 3 Hours HT GE3H / H.
Designed to aid non-music majors in developing the skills needed for listening to music. Emphasis on masterworks of Western music. Open only to freshman and sophomore non-music majors. A student may receive credit in either MUSC 136 or MUSC 336, but not both. LEC.

MUSC 139. Introduction to Music in World Cultures. 3 Hours NW AE42.
Addresses music as a social and cultural phenomenon shaping broader patterns of human activity. It examines the ideas, behaviors and beliefs people have about their music based on selected case studies of traditional and popular music from North America, Africa, Asia, and Latin America. The main goal of this course is to understand why people from different parts of the world do the way they do. LEC.

MUSC 245. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as CHOR 254.) Prerequisite: Permission of instructor. ACT.

MUSC 256. Collegium Musicum, Instrumental. 0-1 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. ACT.

MUSC 298. Introduction to Jazz. 3 Hours HT AE41 / H/W.
A survey of the history of jazz from its beginnings in the early twentieth century to the present. Open to music and non-music majors. LEC.

MUSC 299. American Popular Song. 3 Hours H.
A survey of the American popular song in the twentieth century, with an emphasis on the composer's lyricists, and performers who made them popular. LEC.

MUSC 300. Jazz Styles, 1920-1980. 3 Hours H.
A detailed study of the major styles of jazz that developed between 1920 and 1980, with an emphasis on aural recognition of their characteristics. LEC.

MUSC 301. Great Innovators of Jazz. 3 Hours H.
A detailed study of the most innovative and influential figures in the history of jazz. LEC.

MUSC 302. The Broadway Musical. 3 Hours AE41/GE3H / H.
A survey of the Broadway Musical from the early twentieth century to the present. LEC.

MUSC 303. The Film Musical. 3 Hours.
A survey of the film musical from the 1920s through the 1980s. LEC.

MUSC 305. Music of Latin America. 3 Hours AE42 / H.
Designed for non-music majors, the course surveys the geographical and ethno-linguistic sources of the many forms of music in Latin America. The various forms of music will be examined from historical, cultural, and stylistic perspectives. LEC.

MUSC 306. Introduction to Contemporary Music. 3 Hours H.
A survey of concert music in Europe and the United States in the twentieth century. Not open to music majors. LEC.

MUSC 307. Music of Africa and the Middle East. 3 Hours.
Survey of the many musical traditions of Black Africa and the Middle East, emphasizing their cultural and social context. Open to both majors and non-majors. LEC.

MUSC 308. Music in East Asia. 3 Hours AE42.
Study of musical cultures in China, Korea, and Mongolia, with a special focus on court music, musical theater, popular music, and the influence of East Asian music on the Western art music and vice-versa. (Same as EALC 308.) LEC.

MUSC 309. History of Rock and Roll. 3 Hours GE3H / H.
Survey of the history of rock and roll, starting with its origins in rhythm and blues and continuing to the present day. Open to both majors and non-majors. LEC.

MUSC 310. History of Film Music. 3 Hours HT GE3H.
A survey course for non-majors on the history of film music from silent films to the present. Students will use written texts, website materials such as streaming video and audio, and regular screenings in an auditorium setting for assignments and papers. LEC.

MUSC 311. History of African American Music. 3 Hours.
This course examines the richness and diversity of African American music and its influence on the entire American musical landscape. Beginning with African retentions in African American music, the course will trace the history and development of both written and oral traditions from 1700 to the present day. LEC.

MUSC 312. Music in the Andes. 3 Hours AE42.
This course examines the history, culture, and musical traditions of the Andean region: Peru, Ecuador, Bolivia, Chile, Columbia, and Venezuela. It focuses on a selection of indigenous rituals and popular music of mestizo and African American origin. By the end of the semester students will be acquainted with particular genres, instruments, and the social contexts with which they are associated. LEC.

MUSC 313. Music in Mexico and the Caribbean. 3 Hours AE42.
This course examines the history, culture, and musical traditions of Mexico and the Caribbean. It focuses on a selection of rituals and traditional and popular music of the region. By the end of the semester students will be acquainted with various musical genres, instruments, and the social contexts with which they are associated. LEC.

MUSC 315. History of Country Music. 3 Hours GE3H.
Study of country music in the U.S. from the early 1920’s to the present, including performers, styles, historical context, and technology. LEC.
MUSC 320. Music History I. 3 Hours AE42.
Introduction to world music; and Western music to 1400. Prerequisite: One year of music theory. LEC.

MUSC 335. Masterworks of Music - Study Abroad. 3 Hours AE42 / GE3H.
A study abroad class in which students will develop skills in listening to music and placing that music into its cultural context with examples drawn from the Western repertories associated with the places where the class will travel during the winter interterm, returning just before the spring semester begins. Not open to students with credit in: MUSC 135, MUSC 136, or MUSC 336. LEC.

MUSC 336. Masterworks of Music. 3 Hours HT GE3H / H.
Designed to aid non-music majors in developing the skills needed for listening to music. Emphasis on masterworks of Western music and writing about music. Open only to junior and senior non-music majors. A student may receive credit for either MUSC 136 or MUSC 336, but not both. LEC.

MUSC 337. Selected Topic in Music: ____. 1-3 Hours HT / H.
A selected topic in music or an interdisciplinary topic in the fine arts. The course may be repeated for credit when topic varies. Open only to non-music majors. LEC.

MUSC 338. Selected Topic in Music: ____. 1-3 Hours.
The course may be repeated for credit when topic varies. Open only to music majors. Prerequisite: MUSC 320 or permission of instructor. LEC.

MUSC 339. Introduction to Music in World Cultures. 3 Hours NW AE42.
 Addresses music as a social and cultural phenomenon shaping broader patterns of human activity. It examines the ideas, behaviors and beliefs people have about their music based on selected case studies of traditional and popular music from North America, Africa, Asia, and Latin America. The main goal of this course is to understand why people from different parts of the world do music the way they do. LEC.

MUSC 340. Music History II. 3 Hours GE3H.
Western Music from 1400 to 1750. Prerequisite: MUSC 320. LEC.

MUSC 394. Readings in Jazz and American Popular Music. 1-3 Hours.
Investigation of a subject by means of directed study of primary sources. Prerequisite: A grade of "A" or "B" in MUSC 298, or equivalent, and permission of instructor. IND.

MUSC 440. Music History III. 3 Hours GE3H.
Western Music from 1750 to 1900. Prerequisite: MUSC 340. LEC.

MUSC 474. Graduate Review: Medieval. 1 Hour.
A review of the practice of Western art music composed between c. 437 and 1420. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 475. Graduate Review: Renaissance. 1 Hour.
A review of the practice of Western art music composed between c. 1420 and 1600. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 476. Graduate Review: Baroque. 1 Hour.
A review of the practice of Western art music composed between c. 1600 and 1750. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 477. Graduate Review: Classic. 1 Hour.
A review of the practice of Western art music composed between c. 1750 and 1815. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 478. Graduate Review: Romantic. 1 Hour.
A review of the practice of Western art music composed between c. 1815 and 1900. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 479. Graduate Review: 20th-21st Centuries. 1 Hour.
A review of the practice of Western art music composed between c. 1900 and the present day. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 480. Music History IV. 3 Hours AE41.
Western music since 1900, classical and vernacular. Prerequisite: MUSC 440. LEC.

MUSC 481. Music of the Middle Ages. 3 Hours.
A concentrated survey of Western music from about 500 to 1400. Prerequisite: MUSC 320. LEC.

MUSC 482. Music of the Renaissance. 3 Hours.
A concentrated survey of Western music from about 1400 to 1600. Prerequisite: MUSC 340. LEC.

MUSC 483. Music of the Baroque Era. 3 Hours.
A concentrated survey of Western music from about 1600 to 1750. Prerequisite: MUSC 340 and MUSC 440. LEC.

MUSC 484. Music of the Classical Era. 3 Hours.
A concentrated survey of Western music from about 1750 to 1815. Prerequisite: MUSC 440. LEC.

MUSC 485. Music of the Romantic Era. 3 Hours.
A concentrated survey of Western music from about 1815 to 1900. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 486. Music of the Twentieth Century. 3 Hours.
A concentrated survey of Western music during the twentieth century. Prerequisite: MUSC 480. LEC.

MUSC 487. Music in America. 3 Hours.
A concentrated survey of music in the United States. Prerequisite: One course in the field of musicology or permission of the instructor. LEC.

MUSC 488. History of Opera. 3 Hours.
A concentrated survey of the history of opera. Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 489. History of Chamber Music. 3 Hours.
A concentrated survey of the history of chamber music. Prerequisite: MUSC 440 and MUSC 480. LEC.
MUSC 490. History of the Concerto. 3 Hours.
A concentrated survey of the history of the concerto. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 491. History of the Symphony. 3 Hours.
A concentrated survey of the history of the symphony. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 492. History of Wind Band Music. 3 Hours.
A chronological survey of the development of the wind band/ensemble and its music, using standard musical works from each historical period. Prerequisite: MUSC 440 and MUSC 480 or permission of the instructor. LEC.

MUSC 493. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. Prerequisite: MUSC 240, MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 494. Readings in Musicology: ______. 1-3 Hours.
May be repeated for credit. Prerequisite: Minimum average of B in MUSC 320, MUSC 340, MUSC 440, MUSC 480 or equivalent, and permission of instructor. IND.

MUSC 499. Senior Thesis. 2 Hours AE61.
An original research project that will result in a scholarly paper of moderate size. May be repeated once for credit. IND.

MUSC 560. Music in World Cultures. 3 Hours NW AE42 / W.
An introduction to music as part of the cultural experience in India, Southeast Asia, the Orient, and Africa, with comparisons to Western traditions and influences on contemporary music. LEC.

MUSC 650. Selected Topics in Music: ______. 0.5-3 Hours.
Prerequisite: MUSC 320, MUSC 340, MUSC 440, and MUSC 480 or permission of instructor. LEC.

MUSC 654. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as CHOR 654.) Prerequisite: Permission of instructor. ACT.

MUSC 655. Readings in Music Theory: ______. 1-4 Hours.
Investigation of a subject by means of directed readings using primary scholarly sources. May be repeated for credit. Prerequisite: MTHC 410 and consent of instructor. LEC.

MUSC 656. Collegium Musicum, Instrumental. 0-1 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. ACT.

MUSC 744. Readings in Jazz and American Popular Music. 1-3 Hours.
Investigation of a subject by means of directed study of primary resources. Prerequisite: Permission of instructor. IND.

MUSC 752. Music of the Middle Ages. 3 Hours.
Prerequisite: MUSC 320. LEC.

MUSC 753. Music of the Renaissance. 3 Hours.
Prerequisite: MUSC 340. LEC.

MUSC 754. Music of the Baroque Era. 3 Hours.
Prerequisite: MUSC 340 and MUSC 440. LEC.

MUSC 755. Music of the Classical Era. 3 Hours.
Prerequisite: MUSC 440. LEC.

MUSC 756. Music of the Romantic Era. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 757. Music of the Twentieth Century. 3 Hours.
Prerequisite: MUSC 480. LEC.

MUSC 758. History of Musical Instruments. 3 Hours.
Prerequisite: MUSC 340 or MUSC 440 or permission of instructor. LEC.

MUSC 759. Music in America. 3 Hours.
A survey of historical developments from the Pilgrims to the present. (Same as AMS 737.) Prerequisite: One course in the field of music history or permission of the instructor. LEC.

MUSC 760. History of Opera. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 761. History of the Mass. 3 Hours.
Prerequisite: MUSC 340 and MUSC 440, or permission of instructor. LEC.

MUSC 765. History of Chamber Music. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 766. History of the Concerto. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 767. History of the Symphony. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 768. History of Wind Band Music. 3 Hours.
A chronological survey of the development of the wind band/ensemble and its music, using standard musical works from each historical period. Prerequisite: MUSC 440, MUSC 480, or permission of instructor. LEC.

MUSC 775. History of Keyboard Music. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 777. History of Solo Vocal Music. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 778. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. (Same as MTHC 778.) LEC.

MUSC 794. Readings in Musicology: ______. 1-3 Hours.
Investigation of a subject by means of directed reading of primary literary sources. May be repeated for credit. Prerequisite: A grade average of "B" in two musicology courses numbered 500 or above and consent of instructor. IND.

MUSC 801. Music Bibliography and Research. 3 Hours.
Bibliography, research methods, and scholarly writing in music for entering graduate students. Prerequisite: Permission of instructor. LEC.

MUSC 802. Advanced Music Bibliography and Research. 3 Hours.
Advanced bibliography and writing of research papers. Prerequisite: MUSC 801. LEC.

MUSC 899. Thesis. 1-6 Hours.
May be repeated for credit. THE.

MUSC 902. Seminar in Musicology. 3 Hours.
A research course designed primarily for doctoral students in musicology. Prerequisite: MUSC 801, or its equivalent. LEC.

MUSC 903. Seminar in Performance Practices. 3 Hours.
Primary and secondary sources in performance practices dealing mainly with the seventeenth through nineteenth centuries, with implications applicable to student’s performance medium. LEC.

MUSC 940. Seminar on Selected Topics in Musicology: ______. 3 Hours.
Each semester a topic (to be inserted in the blank) will be the basis for discussion, reports, and a research paper. May be repeated for credit provided no course duplication takes place. LEC.
MUSC 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

MUSC 999. Dissertation. 1-12 Hours.
May be repeated for credit. THE.

Courses

OBOE 100. Oboe. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

OBOE 101. Oboe Reed Making. 0-1 Hours.
The principles of oboe reed making, including tube cane selection, pre-gouging, gouging, shaping, tying and scraping reeds. Knife sharpening and tool maintenance will also be covered. Open only to freshmen and sophomores. May be repeated for credit. LAB.

OBOE 121. Oboe. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

OBOE 131. Baroque Oboe. 1-4 Hours.
One or two lessons per week. For freshmen and sophomores. May be repeated for credit. IND.

OBOE 221. Oboe. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

OBOE 300. Oboe. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

OBOE 301. Oboe Reed Making. 0-1 Hours.
The principles of oboe reed making, including tube cane selection, pre-gouging, gouging, shaping, tying and scraping reeds. Knife sharpening and tool maintenance will also be covered. Open only to juniors and seniors. May be repeated for credit. LAB.

OBOE 321. Oboe. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

OBOE 331. Baroque Oboe. 1-4 Hours.
One or two lessons per week. For juniors and seniors. May be repeated for credit. IND.

OBOE 421. Oboe. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

OBOE 422. Oboe. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

OBOE 622. Oboe. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

OBOE 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: OBOE 622. LEC.

OBOE 711. Oboe. 1-3 Hours.
For graduate students not majoring in oboe. Audition required. May be repeated for credit. IND.

OBOE 731. Baroque Oboe. 1-4 Hours.
May be repeated for credit. IND.

OBOE 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

OBOE 810. Elective Master’s Recital. 1 Hour.
Non-degree elective recital for Master’s students. Prerequisite: Concurrent enrollment in OBOE 811. IND.

OBOE 811. Oboe. 3-4 Hours.
For graduate students majoring in oboe. May be repeated for credit. Summer session limit three hours. IND.

OBOE 899. Master’s Recital. 1 Hour.
Master’s Degree Recital: The Master’s recital is the culminating event for the Master of Music degree and must be given before the Master’s Final Oral Exam. Prerequisite: Corequisite: OBOE 811. THE.

OBOE 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the baroque oboe during the seventeenth and eighteenth centuries. LEC.

OBOE 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the twentieth century. LEC.

OBOE 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in oboe. May be repeated for credit. Summer session limit three hours. IND.

OBOE 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

OBOE 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Summer session limit one to three credits. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student’s major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

ORCH 200. University Symphony Orchestra. 0-1 Hours.
For freshmen and sophomores. Four hours full rehearsal and one hour sectional (string only) rehearsal each week throughout the school year. An intensive study of the symphonic repertoire, instrumental and vocal accompaniments, and complete major opera. Two public concerts each semester and numerous out-of-town concerts, radio broadcasts, and local vespers performances. Acceptance for membership and playing positions is determined by tryout. May be repeated for credit. LAB.
ORCH 201. University Chamber Orchestra. 1 Hour.
Two hours of rehearsal per week. May be repeated for credit. Audition required. LAB.

ORCH 210. Repertory Orchestra. 1 Hour.
A reading orchestra, emphasizing standard orchestral works from Baroque through modern periods. Open to string, wind, and percussion instrument players of the community and university. (Does not count toward ensemble requirement for students with stringed instruments emphasis.) May be repeated for credit. LAB.

ORCH 600. University Symphony Orchestra. 0-1 Hours.
For juniors, seniors, and graduate students. May be repeated for credit. LAB.

ORCH 601. University Chamber Orchestra. 1 Hour.
Two hours rehearsal per week. May be repeated for credit. Audition required. LAB.

ORCH 701. Workshop in: _____. 0.5-3 Hours.
May be repeated for credit. LEC.

Courses

ORGN 100. Organ. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

ORGN 121. Organ. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

ORGN 221. Organ. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

ORGN 300. Organ. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

ORGN 320. Studio Class in Organ - Lab. 0 Hours.
Studio performance of works prepared under individual instruction. May be repeated. LAB.

ORGN 321. Organ. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

ORGN 421. Organ. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

ORGN 502. Master Class in Organ - Lab. 0 Hours.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated. LAB.

ORGN 603. Institute for Organ and Church Music. 1-2 Hours.
A one-week intensive study program in performance, practice, and literature, advanced pedagogy, and church music. Normally offered during the summer session. May be repeated for credit. Graded S (satisfactory) or U (unsatisfactory). IND.

ORGN 608. Organ Pedagogy. 2 Hours.
For seniors and graduate students majoring in organ or by permission of instructor. May be repeated for credit. Materials and methods of pedagogy. Lectures, discussion, demonstration teaching, planning, and evaluation. One beginning or lower level organ student assigned to each class member with teaching done under supervision of class instructor. LEC.

ORGN 622. Organ. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

ORGN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: ORGN 622. LEC.

ORGN 702. Master Class in Organ - Lab. 0 Hours.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated. LAB.

ORGN 711. Organ. 1-3 Hours.
For graduate students not majoring in organ. Audition required. May be repeated for credit. IND.

ORGN 720. Studio Class in Organ-Lab. 0 Hours.
Studio performance of works prepared under individual instruction. May be repeated for credit. IND.

ORGN 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

ORGN 800. Organ Building and Design. 3 Hours.
Acoustics; design, construction, and maintenance of organs; organ consulting, examination of organs. LEC.

ORGN 801. History of Organ Literature and Organ Design I. 3 Hours.
Organ literature and organ design from the Middle Ages, the Renaissance, and the Spanish, Italian, and English Baroque. LEC.

ORGN 802. History of Organ Literature and Organ Design II. 3 Hours.
Organ literature and organ design in the Dutch and German Baroque with special emphasis on J.S. Bach. Prerequisite: Permission of instructor. LEC.

ORGN 803. History of Organ Literature and Organ Design III. 3 Hours.
French organ literature and organ design from the 17th century to the present. LEC.

ORGN 804. History of Organ Literature and Organ Design IV. 3 Hours.
German, North American, British, Scandinavian and Eastern European organ literature and organ design from the Classic era to the present. Prerequisite: Permission of instructor. LEC.

ORGN 805. Selected Topics in Organ. 1-3 Hours.
An exploration of selected topics in organ design and literature. Topics change by semester. May be repeated for credit. LEC.

ORGN 806. Organ Pedagogy. 3 Hours.
Philosophy, methods, and materials of organ pedagogy. Prerequisite: Permission of instructor. LEC.

ORGN 807. Organ Study Tour. 1-3 Hours.
Study of European or North American organs through reading and site visits to instruments. LEC.
ORGN 811. Organ. 3-4 Hours.
For graduate students majoring in organ. May be repeated for credit. Summer session limit three hours. IND.

ORGN 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: ORGN 811. THE.

ORGN 921. Seminar in Performance: ______. 3 Hours.
A detailed study of organ repertoire, performance practice, the history of organ building as it affects the performance of a particular body of literature, liturgical or other extra-musical contexts, and other influences on musical style. May be repeated for credit when topics vary. LEC.

ORGN 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. program in organ. May be repeated for credit. Summer session limit three hours. IND.

ORGN 965. Doctoral Recitals. 0-1 Hours.
Maximum credit, seven hours. May be repeated for credit. THE.

ORGN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

PCUS 100. Percussion. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

PCUS 120. Drum Set Technique. 1 Hour.
One lesson per week. Small group instruction. For freshmen and sophomores. A course designed to develop drum set technique, with emphasis placed on understanding the various styles of music to perform on the set: swing, jazz, rock, ethnic, Broadway shows. May be repeated for credit. IND.

PCUS 121. Percussion. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

PCUS 221. Percussion. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

PCUS 300. Percussion. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

PCUS 320. Drum Set Technique. 1 Hour.
One lesson per week. Small group instruction. For juniors and seniors. A course designed to develop drum set technique, with emphasis placed on understanding the various styles of music to perform on the set: swing, jazz, rock, ethnic, Broadway shows. May be repeated for credit. IND.

PCUS 321. Percussion. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

PCUS 421. Percussion. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

PCUS 422. Percussion. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

PCUS 622. Percussion. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

PCUS 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: PCUS 622. LEC.

PCUS 711. Percussion. 1-3 Hours.
For graduate students not majoring in percussion. Audition required. May be repeated for credit. IND.

PCUS 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

PCUS 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in PCUS 811. IND.

PCUS 811. Percussion. 3-4 Hours.
For graduate students majoring in percussion. May be repeated for credit. Summer session limit three credits. IND.

PCUS 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: PCUS 811. THE.

PCUS 921. Seminar in Performance and Pedagogy. 3 Hours.
A study of the interpretive problems encountered in percussion music from the various historical periods, and a study of the performance practices in orchestral, band, chamber ensemble, and solo literature. LEC.

PCUS 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in percussion. May be repeated for credit. Summer session limit three hours. IND.

PCUS 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit. THE.

PCUS 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

PCUS 972. D.M.A. Document. 1-4 Hours.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.
Courses

PENS 252. Percussion Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of works for various percussion instrument combinations. May be repeated for credit. LAB.

PENS 652. Percussion Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of works for various percussion instrument combinations. May be repeated for credit. LAB.

Courses

PIAN 100. Piano. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

PIAN 111. Elementary Keyboard Musicianship. 2 Hours.
The development of keyboard skills in sightreading, transposition, harmonization, improvisation, score reading, and playing by ear. Open to all students not majoring in music who have little or no music training. IND.

PIAN 121. Piano. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

PIAN 125. Piano. 1-4 Hours.
Small group instruction for the development of performance abilities encouraging exploration of creative potentials and self-directed study. For freshmen and sophomores. May be repeated for credit. Prerequisite: Permission of instructor. IND.

PIAN 144. Elementary Keyboard Skills I. 1 Hour.
The development of keyboard skills in sightreading, transposition, harmonization, improvisation, score reading, and playing by ear. Open to all music majors with little or no piano background. IND.

PIAN 148. Elementary Keyboard Skills II. 1 Hour.
A continuation of PIAN 144. IND.

PIAN 216. Chamber Music for Pianists. 1-2 Hours.
For freshmen and sophomores majoring in piano. The study of chamber music literature for piano and various instrumental combinations. Development of rehearsal conducting techniques and leadership skills through collaboration with other musicians. May be repeated for credit. LEC.

PIAN 221. Piano. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

PIAN 227. Two-Piano and Four-Hand Literature. 2 Hours.
Instruction in two-piano and duet repertoire for performance and sight-reading by advanced keyboard performers. IND.

PIAN 229. Performance Class in Accompanying. 1 Hour.
A class in the performance of vocal and instrumental accompaniment. Prerequisite: May be repeated for credit. IND.

PIAN 230. Creative Jazz Piano I. 1 Hour.
Group instruction in techniques of playing jazz. Prerequisite: Permission of instructor. IND.

PIAN 237. Accompanying for Dance. 1-3 Hours.
Instruction in dance accompanying. Open to freshman and sophomore pianists with permission of instructor. IND.

PIAN 284. Intermediate Keyboard Skills I. 2 Hours.
Continuation of PIAN 148. Prerequisite: Permission of instructor. IND.

PIAN 288. Intermediate Keyboard Skills II. 2 Hours.
Continuation of PIAN 284. Prerequisite: Permission of instructor. IND.

PIAN 300. Piano. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

PIAN 310. Advanced Keyboard Skills. 2 Hours.
The development of functional keyboard skills in sight reading, transposition, harmonization, improvisation, score reading, and playing by ear. Prerequisite: MTHC 115 or permission of instructor. IND.

PIAN 320. Piano Performance Class. 1 Hour.
Performances, lectures, and discussions of all aspects of performance. May be repeated for credit. Prerequisite: Consent of instructor. LAB.

PIAN 321. Piano. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

PIAN 325. Piano. 1-4 Hours.
For juniors and seniors. Small group instruction for the development of performance abilities, encouraging exploration of creative potentials, and self-directed study. May be repeated for credit. Prerequisite: Permission of instructor. IND.

PIAN 336. Chamber Music for Pianists. 1-2 Hours.
For juniors and seniors majoring in piano. The study of chamber music literature for piano and various instrumental combinations. Development of rehearsal conducting techniques and leadership skills through collaboration with other musicians. May be repeated for credit. LEC.

PIAN 402. Master Class. 1 Hour.
A class in the performance of advanced piano repertoire. Enrollment by permission of the department. IND.

PIAN 421. Piano. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

PIAN 422. Piano. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

PIAN 429. Performance Class Accompanying. 1 Hour.
A class in the performance of vocal and instrumental accompaniment. May be repeated for credit. LEC.

PIAN 430. Creative Jazz Piano II. 1 Hour.
Group instruction in advanced techniques of jazz improvisation with emphasis on various styles and interpretation of leading jazz performers. Prerequisite: Permission of instructor. IND.

PIAN 437. Accompanying for Dance. 1-3 Hours.
Instruction in dance accompanying. Open to junior and senior pianists with permission of instructor. IND.

PIAN 522. Piano Technology I. 1 Hour.
An introduction to the principles of design, theory of operation, maintenance, and tuning of the piano. Lecture and laboratory. Open to junior, senior, and graduate students. LEC.
PIAN 523. Piano Technology II. 1 Hour.
A continuation of PIAN 522. Piano Technology I. Application of principles of design, theory of operation, maintenance, and tuning of the piano. Prerequisite: PIAN 522. LEC.

PIAN 540. Piano Pedagogy I. 2-3 Hours.
Observation and research of the techniques and materials relevant to piano instruction at the elementary to intermediate levels. Additional topics pertinent to music education to include child development, learning, communication, and group dynamics. Prerequisite: Permission of instructor. LEC.

PIAN 546. Piano Pedagogy II. 2-3 Hours.
Observation and research of the techniques and materials relevant to piano instruction at the elementary to intermediate levels. Additional topics pertinent to music education to include child development, learning, communication, and group dynamics. Prerequisite: PIAN 540 or permission of instructor. LEC.

PIAN 622. Piano. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

PIAN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: PIAN 622. LEC.

PIAN 624. Piano Workshop. 1-3 Hours.
A short term course covering a piano-related topic. May be repeated for credit. LEC.

PIAN 640. Piano Pedagogy III. 2 Hours.
Practicum in piano instruction at the elementary to intermediate levels. Students enrolled for this course are expected to participate in the Children's Piano Laboratory Program or the Campus Community Program. Prerequisite: PIAN 546 or permission of instructor. FLD.

PIAN 643. Piano Repertoire I. 3 Hours.
Study and analysis of keyboard repertoire from its beginning through the Romantic and Modern periods. LEC.

PIAN 644. Piano Repertoire II. 3 Hours.
Study and analysis of keyboard repertoire of the Romantic and Modern periods. LEC.

PIAN 646. Piano Pedagogy IV. 1-2 Hours.
Practicum in piano instruction at the elementary to intermediate levels. Prerequisite: PIAN 640 or permission of instructor. LEC.

PIAN 647. Contemporary Piano Literature. 3 Hours.
The study of piano literature focusing on music of mid-century modernists through the present day. Prerequisite: PIAN 643 and PIAN 644 or instructor permission. LEC.

PIAN 648. The Contemporary Pianist. 3 Hours.
Discover and perfect all of the tools required to become a successful pianist in the 21st Century by learning from the examples of the great pianists of yesterday and today. Prerequisite: PIAN 643 and PIAN 644 or instructor permission. LEC.

PIAN 711. Piano. 1-3 Hours.
For graduate students not majoring in piano. Audition required. May be repeated for credit. IND.

PIAN 720. Piano Performance Class. 1 Hour.
Performances, lectures, and discussion of all aspects of performance. May be repeated for credit. Prerequisite: Consent of instructor. IND.

PIAN 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

PIAN 802. Master Class. 1 Hour.
A class in the performance of advanced piano repertoire. Enrollment by permission of the department. Graded on satisfactory/unsatisfactory basis. IND.

PIAN 811. Piano. 3-4 Hours.
For graduate students majoring in piano. May be repeated for credit. Summer session limit three hours. IND.

PIAN 840. Advanced Piano Pedagogy I: Group and Class Instruction. 3 Hours.
The techniques and materials for the development of keyboard literacy at the elementary and intermediate levels. LEC.

PIAN 846. Advanced Piano Pedagogy II: Group and Class Instruction. 3 Hours.
The techniques and materials for the development of keyboard literacy at the elementary and intermediate levels. Prerequisite: PIAN 840. LEC.

PIAN 899. Master’s Recital. 1 Hour.
Master’s Degree Recital: The Master’s recital is the culminating event for the Master of Music degree and must be given before the Master’s Final Oral Exam. Prerequisite: Corequisite: PIAN 811. THE.

PIAN 921. Seminar in Performance and Pedagogy: ______ 3 Hours.
A detailed study of repertoire, performance practice, pedagogical, and stylistic problems relating to keyboard music. May be repeated for credit when topics vary. LEC.

PIAN 940. Special Projects in Piano Pedagogy. 3 Hours.
In-depth study of a student-selected topic in piano pedagogy. Prerequisite: PIAN 840 and PIAN 846. LEC.

PIAN 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in piano. May be repeated for credit. Summer session limit three hours. IND.

PIAN 965. Doctoral Recitals. 1-3 Hours.
Maximum credit, seven hours. May be repeated for credit. THE.

PIAN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

REC 100. Laboratory in Music Performance. 0 Hours.
This course deals with the performance of music. The goal is to increase the understanding of music and music performance through exposure to a wide variety of repertory and performance styles, mediums, techniques, and related issues. May be repeated. LAB.
Courses

RECO 119. Recorder. 1-4 Hours.
For freshmen and sophomores. Group instruction at the beginning level, two hours per week. Thirty minutes per day practice expected. May not be repeated for credit. Prerequisite: Student must read music and own an alto recorder. IND.

RECO 319. Recorder. 1-4 Hours.
For juniors and seniors. Group instruction at the beginning level, two hours per week. Thirty minutes per day practice expected. May not be repeated for credit. Prerequisite: Student must read music and own an alto recorder. IND.

SAXO 100. Saxophone. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

SAXO 121. Saxophone. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

SAXO 221. Saxophone. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

SAXO 300. Saxophone. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

SAXO 321. Saxophone. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

SAXO 421. Saxophone. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

SAXO 422. Saxophone. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

SAXO 622. Saxophone. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

SAXO 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: SAXO 622. LEC.

SAXO 711. Saxophone. 1-3 Hours.
For graduate students not majoring in saxophone. Audition required. May be repeated for credit. IND.

SAXO 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

SAXO 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in SAXO 811. IND.

SAXO 811. Saxophone. 3-4 Hours.
For graduate students majoring in saxophone. May be repeated for credit. Summer session limit three hours. IND.

SAXO 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: SAXO 811. THE.

SAXO 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance techniques from the saxophone's inception to 1950. LEC.

SAXO 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques from 1950 to the present. LEC.

SAXO 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in saxophone. May be repeated for credit. Summer session limit three hours. IND.

SAXO 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

SAXO 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to the candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

STRG 424. String Pedagogy: ____. 1 Hour.
Lectures, demonstrations, and discussions of such topics as physiological factors, style and interpretation, music editing, teaching materials and repertoire, planning, and evaluation. May be repeated for credit as instrument varies. IND.

STRG 701. String Pedagogy Workshop. 0.5-3 Hours.
A short-term intensive course in string pedagogy intended for school orchestra directors, private teachers, and advanced students. Normally offered during the summer session. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. IND.

STRG 921. Seminar in Performance and Pedagogy. 3 Hours.
Repertoire, performance practice, and pedagogical and stylistic problems relating to stringed instrument music before 1800. LEC.

STRG 922. Seminar in Performance and Pedagogy. 3 Hours.
Stringed instrument repertoire from 1800 to 1875. LEC.

STRG 923. Seminar in Performance and Pedagogy. 3 Hours.
Stringed instrument repertoire from 1875 to present. LEC.

STRG 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

TROM 100. Trombone. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

TROM 121. Trombone. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

TROM 221. Trombone. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 12 credits. IND.

TROM 252. Trombone Choir. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the trombone. May be repeated for credit. IND.

TROM 300. Trombone. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

TROM 321. Trombone. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

TROM 421. Trombone. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

TROM 422. Trombone. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

TROM 622. Trombone. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

TROM 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: TROM 622. LEC.

TROM 652. Trombone Choir. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the trombone. May be repeated for credit. IND.

TROM 711. Trombone. 1-3 Hours.
For graduate students not majoring in trombone. Audition required. May be repeated for credit. IND.

TROM 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

TROM 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in TROM 811. IND.

TROM 811. Trombone. 3-4 Hours.
For graduate students majoring in trombone. May be repeated for credit. Summer session limit three hours. IND.

TROM 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's Recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: TROM 811. THE.

TROM 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in trombone. May be repeated for credit. Summer session limit three hours. IND.

TROM 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit. THE.

TROM 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

TRUM 100. Trumpet. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

TRUM 121. Trumpet. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

TRUM 221. Trumpet. 1-4 Hours.
Applied music lessons for sophomores majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 12 credits. IND.

TRUM 252. Trumpet Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the trumpet. May be repeated for credit. IND.

TRUM 300. Trumpet. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

TRUM 321. Trumpet. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in trumpet. May be repeated for credit. Summer session limit three hours. IND.

TRUM 965. Doctoral Recitals. 1-3 Hours.
Maximum credit, seven hours. May be repeated for credit. THE.

TRUM 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a topic pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

TUBA 100. Tuba. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

TUBA 121. Tuba. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

TUBA 221. Tuba. 1-4 Hours.
Applied music lessons for sophomores majoring music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

TUBA 300. Tuba. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.
Courses

TUEU 252. Tuba-Euphonium Consort. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the tuba and euphonium. May be repeated for credit. IND.

TUEU 652. Tuba-Euphonium Consort. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the tuba and euphonium. May be repeated for credit. IND.

Courses

VIOA 100. Viola. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VIOA 120. Viola Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VIOA 121. Viola. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VIOA 221. Viola. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

VIOA 300. Viola. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

VIOA 320. Viola Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VIOA 321. Viola. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

VIOA 421. Viola. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VIOA 622. Viola. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

VIOA 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VIOA 622. LEC.

VIOA 711. Viola. 1-3 Hours.
For graduate students not majoring in viola. Audition required. May be repeated for credit. IND.

VIOA 720. Viola Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in viola (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

VIOA 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

VIOA 811. Viola. 3-4 Hours.
For graduate students majoring in viola. May be repeated for credit. Summer session limit three hours. IND.

VIOA 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VIOA 811. THE.

VIOA 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in viola. May be repeated for credit. Summer session limit three hours. IND.

VIOA 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit to a maximum of seven hours. THE.
VION 421. Violin. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VION 511. Workshop in Stringed Instrument Care and Repair. 2 Hours.
Students will perform repairs such as gluing cracks, applying tailpiece gut, setting and adjusting sound posts, and rehairing bows. Proper care and maintenance of the instrument will be stressed. Prerequisite: Junior standing with a background of stringed instrument study meriting departmental approval. LAB.

VION 622. Violin. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

VION 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in the semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VION 622. LEC.

VION 711. Violin. 1-3 Hours.
For graduate students not majoring in violin. Audition required. May be repeated for credit. IND.

VION 720. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VION 731. Baroque Violin. 1-4 Hours.
May be repeated for credit. IND.

VION 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

VION 811. Violin. 3-4 Hours.
For graduate students majoring in violin. May be repeated for credit. Summer session limit three hours. IND.

VION 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VION 811. THE.

VION 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violin. May be repeated for credit. Summer session limit three hours. IND.

VION 965. Doctoral Recitals. 1-3 Hours.
Maximum of seven hours credit. May be repeated for credit. THE.

Courses

VNCL 100. Violoncello. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VNCL 120. Cello Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VNCL 121. Violoncello. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VNCL 221. Violoncello. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

VNCL 300. Violoncello. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

VNCL 320. Cello Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VNCL 321. Violoncello. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

VNCL 421. Violoncello. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

VNCL 422. Violoncello. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VNCL 622. Violoncello. 2-4 Hours AE61.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 12 credits. IND.

VNCL 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VNCL 622. LEC.

VNCL 711. Violoncello. 1-3 Hours.
For graduate students not majoring in violoncello. Audition required. May be repeated for credit. IND.

VNCL 720. Cello Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VNCL 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

VNCL 811. Violoncello. 3-4 Hours.
For graduate students majoring in violoncello. May be repeated for credit. Summer session limit three hours. IND.
VNCL 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VNCL 811. THE.

VNCL 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violoncello. May be repeated for credit. Summer session limit three hours. IND.

VNCL 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit to a maximum of seven hours. THE.

Courses

VOIC 100. Voice. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VOIC 104. Class Voice. 1 Hour.
A study of the fundamentals of singing; performance of songs; an approach to voice instruction in a group situation. May be repeated for credit. IND.

VOIC 120. Vocal Performance in English. 1 Hour.
Fundamentals of solo vocal performance with an emphasis on English diction and communicating the English language. IND.

VOIC 121. Voice. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VOIC 221. Voice. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (6 for performance majors). IND.

VOIC 270. Lyric Diction for Singers: _____. 1 Hour.
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to voice and theatre/voice majors, and to others with approval of instructor. May be repeated for credit as language varies. LEC.

VOIC 300. Voice. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

VOIC 302. Repertoire for the High School Singer. 1 Hour.
Designed for future educators of young voices. Vocal literature and issues related to students aged thirteen to eighteen. May substitute for one semester of the studio voice requirements for Music Education majors with vocal/choral emphasis. Prerequisite: Four semesters of private voice. LEC.

VOIC 320. Vocal Performance Class II. 1 Hour.
Solo vocal performance in a class situation with emphasis including the preparation, planning of repertoire, and interpretive skills appropriate to a recital. Designed for junior/senior voice and theatre/voice majors. Prerequisite: Permission of instructor. Eligibility for VOIC 622. IND.

VOIC 321. Voice. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

VOIC 405. Vocal Literature I. 2 Hours.
A survey of English song. LEC.

VOIC 406. Vocal Literature II. 2 Hours.
A survey of German song. LEC.

VOIC 408. Vocal Pedagogy. 1 Hour.
Knowledge and skills needed to teach voice, with particular attention to lifespan voice anatomy, physiology, and acoustics, diagnosis and correction of vocal inefficiencies, teaching styles, repertoire choice, professional development, and acquaintance with current research in voice science and vocal pedagogy. Includes a voice teaching practicum. (Same as MEMT 408.) LEC.

VOIC 412. Vocal Pedagogy and Advanced Repertoire II. 1 Hour.
Continuation of VOIC 408. LEC.

VOIC 421. Voice. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VOIC 440. Vocal Performance. 1 Hour.
A class in the performance of vocal repertoire. IND.

VOIC 470. Lyric Diction for Singers: _____. 1 Hour.
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to voice and theatre/voice majors, and to others with approval of instructor. May be repeated for credit as language varies. LEC.

VOIC 490. Opera Workshop. 0-4 Hours.
The study of various aspects of opera, such as character development, aria, chorus, and opera scene study, staging, body movement, and audition techniques. May be repeated for credit. ACT.

VOIC 492. Opera Production. 1-4 Hours.
The preparation and performance of an opera role. May be repeated for credit. ACT.

VOIC 500. Directed Study in: _____. 1-3 Hours.
Investigation of a special topic or project. May be repeated for credit. Prerequisite: Consent of instructor. IND.

VOIC 520. Vocal Coaching. 1 Hour.
In-depth investigation of elements of vocal performance such as language, musical style, tradition, and dramatic content and the communication thereof in preparation for the senior recital. Open to undergraduates majoring in voice and theatre/voice in the senior year, with consent of instructor. May be repeated for credit. IND.

VOIC 622. Voice. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits at the 121/221 levels. IND.

VOIC 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VOIC 622. LEC.

VOIC 670. Advanced Lyric Diction for Singers: _____. 1 Hour.
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to graduate students in voice and opera performance, and to others with approval of instructor. May be repeated for credit as language varies. LEC.
VOIC 704. Vocal Repertoire: ____. 2 Hours.
A survey of selected topics in vocal repertoire to be chosen from categories such as: Italian, German, French, and English songs, oratorio literature, and art songs by women composers. The course may be repeated for credit when topic varies. LEC.

VOIC 705. Advanced Vocal Literature I. 3 Hours.
An investigation of the development of French melodie. The course will include directed readings, writing, and performance. LEC.

VOIC 706. Advanced Vocal Literature II. 3 Hours.
An investigation of the development of German lieder. The course will include directed readings, writing, and performance. LEC.

VOIC 707. Advanced Vocal Literature III. 3 Hours.
An investigation of the development of songs in English. The course will include directed readings, writing, and performance. LEC.

VOIC 711. Voice. 1-3 Hours.
For graduate students not majoring in voice. Audition required. May be repeated for credit. IND.

VOIC 720. Vocal Performance Class II. 1 Hour.
Solo vocal performance in a class situation with emphasis including the preparation, planning of repertoire, and interpretive skills appropriate to a recital. Advanced repertoire and appropriate level of vocal and musical comprehension shall be expected from the graduate student. Prerequisite: Consent of instructor. IND.

VOIC 740. Vocal Performance. 1 Hour.
A class in the performance of vocal repertoire. IND.

VOIC 770. Special Studies in Voice: English Lyric Diction for the Choral Singer and Soloist. 1 Hour.
A graduate level course designed for the choral director, public school music teacher and voice teacher. Techniques for achieving a distinct, unlabored English pronunciation will be studied. The International Phonetic Alphabet will be employed. IND.

VOIC 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

VOIC 808. Vocal Pedagogy. 1 Hour.
A course offering performers and beginning teachers of classical singing a basic overview of vocal production. The class will explore the empirical and scientific principles of breathing, resonance, timbre, and other vocal features. Discussions of repertoire choices, vocal health, teaching styles, career development and other topics pertaining to the training of singers will be included. Added emphasis will be placed on historical and contemporary pedagogues through original research. LEC.

VOIC 811. Voice. 3-4 Hours.
For graduate students majoring in voice. May be repeated for credit. Summer session limit three hours. IND.

VOIC 820. Vocal Coaching. 1-4 Hours.
In-depth investigation of elements of vocal performance such as: language, musical style, tradition, dramatic content and the communication thereof. Open to graduate voice majors with consent of instructor. May be repeated for credit. IND.

VOIC 890. Opera Workshop. 0-4 Hours.
The study of various aspects of opera, such as character development, aria, chorus, and opera scene study, staging, body movement, and audition techniques. May be repeated for credit. ACT.

VOIC 892. Opera Production. 1-4 Hours.
The preparation and performance of an opera role. May be repeated for credit. ACT.

VOIC 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VOIC 811. THE.

VOIC 900. Directed Study in: ____. 1-3 Hours.
Investigation of a special topic or project. May be repeated for credit. Prerequisite: Consent of instructor. LEC.

VOIC 921. Seminar in Performance: ____. 3 Hours.
A detailed study of vocal repertoire, performance practice, and stylistic problems on a selected topic from areas such as oratorio, cantata, song cycles, vocal chamber music, song, or opera of specific composers (i.e., Verdi, Wagner, Mozart, Debussy, Poulenc, Wolf, Strauss), or twentieth century song. May be repeated for credit. LEC.

VOIC 960. Vocal Pedagogy. 2 Hours.
A study of the problems encountered in the teaching of vocal technique, such as breathing, resonance, tone color, dynamic control, and diction, and including sessions of supervised teaching. LEC.

VOIC 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in voice. May be repeated for credit. Summer session limit three hours. IND.

VOIC 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

VOIC 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

W&P 125. Wind and Percussion Pedagogy. 1 Hour.
For freshmen and sophomores. Materials and concepts for teaching beginning and intermediate instrumental students; instrument repair, adjustments and modification; reed making and adjustment where appropriate; solo and ensemble repertoire. May be repeated for credit. Prerequisite: Corequisite: Applied instruction for the appropriate instrument. (e.g. FRHN 121, PCUS 221). IND.

W&P 130. Orchestral Repertoire. 1 Hour.
For freshmen and sophomores. Weekly reading sessions for wind, percussion and harp students with the objective of acquainting the student with important orchestral passages for his or her particular instrument. May be repeated for credit. Enrollment controlled by the instructor in charge. IND.

W&P 325. Wind and Percussion Pedagogy. 1 Hour.
For juniors and seniors. Continuation of WP 125. May be repeated for credit. Prerequisite: Corequisite: Applied instruction for the appropriate instrument. (e.g. FRHN 321, PCUS 622). IND.

W&P 630. Orchestral Repertoire. 1 Hour.
The study of orchestral literature for wind and percussion instruments. May be repeated for credit. Permission of instructor. IND.

W&P 655. Independent Study in: ____. 1-4 Hours.
May be repeated for credit. Prerequisite: Consent of advisor and instructor. IND.
W&P 702. Special Studies in Woodwind Instrument Pedagogy. 1-3 Hours.
Physiological factors of woodwind playing, teaching materials and techniques, practice methods, solo and chamber music repertoire, mouthpieces and reeds, discography, techniques of tone production, articulation, embouchure, and intonation. May be repeated for credit to a maximum of five hours. LEC.

W&P 704. Special Studies in Brass Instrumental Pedagogy. 1 Hour.
Physiological factors of brass playing, teaching materials and techniques, practice methods, solo and chamber music repertoire, mouthpieces, discography, techniques of tone production, articulation, embouchure, and intonation. May be repeated for credit to a maximum of five hours. LEC.

W&P 706. Advanced Pedagogy Workshops in Orchestral Instruments. 0.5 Hours.
Methods and materials of teaching fundamentals of the instruments. Lecture, class performance, class discussion, teaching demonstration, and library research. Summer session only. Prerequisite: Teaching experience or undergraduate instruction in the instrument, or permission of the instructor. LEC.

The study of percussion pedagogy of Membrane Percussion; Keyboard Percussion; and Jazz/Rock/Commercial Drum Set, Marching and World Percussion. Study will include but not limited to such areas as teaching materials and techniques, repertoire, performance practice, and discography. Course may concentrate on one of the three areas listed above, or be taught as a survey course covering all three topics. May be repeated for credit to maximum of five hours. LEC.

Courses

WENS 252. Wind Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of original works for various wind instrument combinations. May be repeated for credit. LAB.

WENS 652. Wind Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of original works for various wind instrument combinations. May be repeated for credit. LAB.
Bachelor of Arts in Fine Arts in Music

B.A. in Fine Arts in Music Degree Requirements

The B.A. in Fine Arts in Music is offered with a concentration in

- Jazz studies,
- Musicology,
- Music theory,
- Piano/organ/orchestral instruments, or
- Voice.

A total of 120 credit hours is required. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will gain knowledge in a variety of areas while pursuing the B.A. and may include any approved KU minor without adding extra credit hours to their degree program. Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities, as well as a senior performance recital.

With this degree, students will be well-rounded prospects for nearly any employer upon graduation. Students can also go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

B.A. in Fine Arts in Music Degree Requirements

The B.A. in Fine Arts in music is offered with a concentration in

- Jazz studies (p. 2341),
- Musicology (p. 2341),
• Music theory, (p. 2342)
• Piano/organ/orchestral instruments (p. 2342), or
• Voice (p. 2343).

A total of 120 credit hours is required. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work. **Click a concentration above to be taken to that degree plan.**

Bachelor of Fine Arts in
Theatre-Voice Program

Theatre and Voice

The Division of Voice offers 2 programs (Bachelor of Fine Arts and Bachelor of Music (p. 2360)) for singers interested in art song, opera, oratorio, concert, or other classical pieces or vocal teaching. Students receive training in vocal technique, languages and diction, vocal repertoire, acting and the theatrical arts. Performance opportunities range from workshops to fully staged productions, allowing students to develop their talents at the most beneficial pace.

The Bachelor of Fine Arts (B.F.A.) in Theatre and Voice degree requires 124 credits. Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the in-depth exploration of music as well as performing a junior recital and a senior recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for theatre/musical productions, or create their own path in music or music-related endeavors.

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the artistic skills and experiences of the university and regional cultural communities.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasn.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

Bachelor of Music

Each student who is a candidate for the Bachelor of Music degree must carry a major in

- Musicology,
- Music theory,
- Music composition,
- Music therapy, or
- Music performance, including Jazz.

A total of 120 to 129 credit hours is required and is designed to further the student's knowledge, practice, and experience in their chosen major. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors. Individuals who complete the music therapy program are eligible to take the national music therapy board certification examination. The music therapy major does not lead to licensure to teach music in public schools.

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor's, master's, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Bachelor of Music in Jazz

A total of 120 credit hours is required and is designed to further the student's knowledge, practice, and experience on their major instrument.

To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, or create their own paths in music or music-related endeavors.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions welcome/ for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's
undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement
The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

B.M. Degree Requirements for Musicology Majors
To graduate, the student must attain a minimum grade-point average of 3.0 in 12 credit hours chosen from MUSC 320, MUSC 340, MUSC 440, MUSC 480 and MUSC courses numbered 602-778. A minimum of 120 hours is required, distributed as follows:

Bachelor of Music in Music Theory and Composition

A total of 120 credit hours is required and is designed to further the
student’s knowledge, practice, and experience in music theory or music
composition. To graduate, a student must earn a minimum grade-point
average of 3.0 in all major courses and a minimum average of 2.0 in all
course work.

Students will be studying with faculty members who are nationally and
internationally recognized. Courses in music theory and musicology are
part of the exploration of music as are private instruction, ensemble and
chamber music opportunities. All students pursuing the B.M. degree will
perform a senior recital on their primary instrument/voice.

With this degree, students can go on to pursue graduate studies in music,
or create their own paths in music or music-related endeavors.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all
undergraduate (B.A. & B.M.) and M.M. students who enroll in any level
of studio instruction (excluding nonmajor levels) in band and orchestral
instruments must audition for and perform as assigned in a major
instrumental ensemble1 each semester in which they are enrolled. For
music majors, 1 ensemble taken for credit each semester is required
for graduation. Exceptions to this policy are allowed on a case-by-case
basis and only by the ensemble conductor in consultation with the faculty
member in the studio area or the faculty advisor in music therapy as
appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band,
Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may
transfer to the school from other institutions or from other KU schools
if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to
return to the college or university last attended in addition to completing
a successful audition. Other students can be admitted only with the
permission of the dean. Send applications to the Office of Admissions
(http://admissions.ku.edu/). Visit the Office of International Recruitment
and Undergraduate Admissions (http://admissions.ku.edu/international/
welcome/) for information about international admissions.

Students who wish to major in music must audition. All music students
academically approved for admission to the School of Music are admitted
contingent upon demonstration by audition of satisfactory level proficiency
in their areas of applied music. Music audition information and application
forms are available online (http://music.ku.edu/applyaudition/). There
is a limit of two times a prospective student may request an audition for
entrance into one of the School’s undergraduate degree programs. The
second request must be within 12 months of the first and may be as
early as 1 month following the first audition. The limitation also applies to
students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other
KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible
to return to the college or university last attended, and complete a
successful audition. Only grades of C or higher are accepted in transfer
credit toward degrees offered by the School of Music. Students who
wish to transfer performance credit from another institution toward
any music degree at KU must validate this credit by audition. Music
audition information and application forms are available online (http://
music.ku.edu/applyaudition/). There is a limit of two times a prospective
student may request an audition for entrance into one of the School’s
undergraduate degree programs. The second request must be within
12 months of the first and may be as early as 1 month following the
first audition. The limitation also applies to students within the School
auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate
transfer students who have not completed a 4-semester theory sequence
with an accredited NASM school. It is administered as announced on the
School of Music website (http://music.ku.edu/placement-exams/) each
semester.

Music Theory and Composition

To graduate, the student must maintain a minimum grade-point average
of 3.0 in music theory and composition courses on both the first- and
second-year and the junior/senior levels.

Students majoring in music theory (B.A. or B.M.) or music composition
(B.M.) must complete MTHC 105, MTHC 115, and MTHC 205 before
preparing a portfolio of their work for application to the professional
sequence. The earliest a student may submit a portfolio is the fourth
semester. Transfer students must be in residence for at least 1 semester
before they can submit a portfolio.

This portfolio must include recent work (scholarly papers for music theory
and musical compositions for composers), 2 letters of recommendation
(1 from the student’s major instrument instructor and 1 from a MTHC
professor who has had the student in a class), and a minimum grade-point
average of 3.0 in MTHC courses. The student may be asked to provide a
demonstration of musicality on his or her major instrument.

Portfolios are accepted once each semester for admission to the
professional sequence the following semester. The portfolio is assessed
by the MTHC faculty with one of 3 recommendations: admit, revise and
resubmit next semester, or denied. Students in music theory are not
allowed to enroll in MTHC 499 Senior Research Project. Students in
composition are not allowed to enroll in MTHC 583 Composition and
MTHC 498 Undergraduate Recital without a favorable recommendation
from the faculty.
### B.M. Degree Requirements for the Music Theory Major

A minimum of 120 hours is required for the degree in Music Theory, distributed as follows:

- Natural Science: any course that fulfills GE3N
- Social Science: any course that fulfills GE3S
- Ethics: any course that fulfills AE51 or AE52

**Total Hours:** 120-121

### B.M. Degree Requirements for the Composition Major

A total of 120 hours is required for the degree. Courses should be distributed as described for the major in music theory with the following exceptions:

- Students with a major in composition must offer in partial fulfillment of the degree requirements a recital of approximately 45 minutes duration consisting of original works in various media. This is MTHC 498, listed below.
- Pianists and organists take 16 credits of lessons and do not take the additional 8 credits of piano, organ and/or harpsichord lessons while all other instrumentalists or vocalists take only 8 credits of lessons and the additional 8 credits of piano, organ and/or harpsichord lessons.
- MTHC 499 is not required.

Total Hours 128

**Bachelor of Music in Music Therapy**

**Music Therapy**

The program helps students develop competence for entry into the music therapy profession. The interdisciplinary curriculum emphasizes understanding of human behavior, musical and otherwise. It includes extensive work in music, behavioral science, biological science, and liberal arts, in addition to specific academic, clinical, and research studies in music therapy.

**Music Therapy Program**

The undergraduate music therapy program provides full preparation for entry into the profession. It culminates in the degree of Bachelor of Music with a major in music therapy. Graduates are prepared for general music therapy practice in a variety of settings, which may include, but are not limited to hospitals, schools, community health programs, wellness centers, and private and group settings across the age span. The KU music therapy program is approved by the American Music Therapy Association. Individuals who complete the program are eligible to take the national music therapy board certification examination. The music therapy major does not lead to licensure to teach music in public schools.

**Advising**

Students admitted to music therapy will be assigned an appropriate faculty advisor to work with the student throughout his or her academic career. The undergraduate handbook is available online (http://music.ku.edu/BM/requirements/) and from the MEMT office, 448 Murphy Hall, and provides detailed procedures, suggestions, and specifications.

Regardless of applied performance medium, each entering student should be able to sing independently, in tune, and with acceptable tone quality.

Functional keyboard skills (accompanying, playing by ear, improvising, and transposing) are helpful. Experience working with others is helpful.

Well-developed interpersonal skills are an asset.

**Admission**

Students must meet or exceed the School of Music academic admission requirements and successfully complete a major performance medium audition to be admitted. Students should declare the B.M. in music therapy as the major on the KU application for admission. Music therapy majors are in plan MTPPS-BM in the School of Music.

Students pursuing the B.M. in music therapy degree should apply for admission to the professional sequence upon completion of the second semester of the sophomore year with 50 or more KU hours. Transfer students with more than 45 hours of transfer credit must complete this application the first semester of classes at KU. Students may not enroll in courses in the professional sequence before formal approval by the director of music therapy. Music therapy majors who have been admitted to the professional sequence are in plan MTPPPS-BM in the School of Music.

Students must be admitted to the music therapy professional sequence to enroll in upper-division music therapy courses. See the Music Therapy Undergraduate Program Handbook online (http://music.ku.edu/BM/requirements/) for details.

Candidates are reviewed for admission periodically. No student may be admitted to the professional sequence for a semester during which he or she will be on academic probation. Application forms for music therapy professional sequence admission are available online (http://music.ku.edu/memt/documents/#undergrad).

**Ensemble Policy**

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major
undergraduate students are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble director in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

The limitation also applies to students within the School auditioning from one program into another.

**Transfer Students**

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended, and complete at least 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Music Theory Placement**

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

**Requirements for the B.M. with a Major in Music Therapy**

The degree requires a minimum of 120 semester hours of credit appropriately distributed among general studies, the major, and supporting music areas and behavioral sciences. With careful planning, the program can be completed in about 4½ years. Four academic years of study and clinical work on campus are followed by a full-time, 6-month internship in an approved clinical institution.

The degree requires at least a 3.00 cumulative grade-point average in all course work and a minimum of 3.00 in all MERM courses. All music therapy majors must demonstrate proficiency in the major applied performance medium and in other performance areas.

All students must demonstrate functional vocal skills and ability to perform accompaniments on a portable chordal instrument, such as accordion, autoharp, guitar, or electric piano. These skills are assessed periodically throughout the program.

**General Education Requirements (31 hours)**

**Ensemble: Band, Orchestra, Chorus, etc.**

7 semesters of participation for 7 credits total, including experience in small ensembles. Five should be large ensembles.

**Piano Skills**
An audition is required. If skills are insufficient, remedial course work is necessary. Students with a major performance medium of piano or organ take only PIAN 310.

**Performance Techniques**
- MEMT 115 Performance Media: Percussion 1
- MEMT 119 Performance Media: Guitar 1
Only one of two required.
- MEMT 117 Performance Media: Voice 1
- MEMT 120 Vocal Performance in English 1

**Conducting/Rehearsing Skills**
- MEMT 246 Fundamentals of Conducting 1
- MEMT 338 Rehearsal/Conducting Clinic: Non-traditional Ensemble 1

**Music Electives (Level 300 and above needed to meet JR/SR graduation requirement.)**
- Music electives 4

### Music Therapy 4.5 Year Plan

Students with no prior piano experience should take the keyboard skills sequence (PIAN 144 - PIAN 288). Students whose major performance medium is piano or organ and those with appreciable prior piano experience should take PIAN 310 after completing 2 semesters of music theory.

- **F** = Fall only
- **S** = Spring only
- **B** = Both semesters

• Students must successfully complete the Clinical Musicianship Assessment before entering Clinical Practicum. This assessment is addressed across MEMT 251 and 296.

Professional Sequence

Professional Sequence Admission Requirements

Students should apply for admission to the Professional Sequence as early as possible and must be admitted before beginning the first semester of the junior year. Admission requirements:

1. Cumulative grade-point average of 3.00 or higher.
2. Grade-point average of 3.00 or higher in MEMT courses.
3. A grade of C or higher in each of the following courses:

<table>

Ensemble | 1 Behavioral science elective (6 credits total as directed by advisor) | 3
422 Studio lessons | 2 Music elective (4 credits total) | 2
PSYC 350 | 3

Total Hours 29

1 Students must achieve admission to the music therapy professional sequence prior to enrolling in these courses.

• All MEMT professional courses as noted on the undergraduate music therapy degree requirement check sheet must be completed with a C or higher prior to beginning internship.

• Students must pass all Clinical Musicianship and Internship Assessments and Musicianship Portfolio.

• Students must request a graduation check from the School of Music Student Services Office approximately 1 year before the estimated internship date. Graduation checks before that time should occur with the student’s MEMT advisor.

• Upon acceptance to an internship site students must complete and turn in the Music Therapy Internship Information sheet to the MEMT office.

• Students must do the following in the final semester before leaving for internship:
  • review degree requirement check sheet to see that they have met all graduation requirements
  • submit an application for graduation online through Enroll and Pay
  • successfully complete the major applied instrument (422 Senior Project Lesson) including the senior 1/2 recital

Year 5

Hours
MEMT 596 1 | 2

Total Hours 2

1 Students must achieve admission to the music therapy professional sequence prior to enrolling in these courses.

• Students must apply for their internship 1 year in advance of completion of academic work. Check the Music Therapy undergraduate handbook for information on this procedure. Students must complete the Internship Eligibility Application during MEMT 586.
Bachelor of Music in Music Performance: Piano

A total of 120 credit hours is required and is designed to further the student's knowledge, practice, and experience of piano. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

Bachelor of Music in Music Performance: Strings and Harp

A total of 120 credit hours is required and is designed to further the student's knowledge, practice, and experience in their major instrument in strings. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble\(^1\) each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1. KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

Bachelor of Music in Music Performance: Voice

The Division of Voice offers 2 programs (Bachelor of Music and Bachelor of Fine Arts) for singers interested in art song, opera, oratorio, concert, other classical pieces or vocal teaching. Students receive training in vocal technique, languages and diction, vocal repertoire, acting and the theatrical arts. Performance opportunities range from workshops to fully staged productions, allowing students to develop their talents at the most beneficial pace.

A total of 125 credit hours is required and is designed to further the student’s knowledge, practice, and experience in voice. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. Bachelor of Music in Music Performance: Winds and Percussion

A total of 120 credit hours is required and is designed to further the student’s knowledge, practice, and experience on their major instrument. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble¹ each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

¹ KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transcript Students

Music Education B.M.E. Program

Music Education

The program helps students develop specific skills in planning and delivering instruction in all types of music education classrooms. The curriculum emphasizes both the theoretical and practical elements of human behavior, musical and otherwise, and integrates with this core a variety of learning experiences that prepare the pre-service teacher for the classroom medium. Among these is a broad spectrum of learning experiences both at KU and in area classrooms. These include planning and delivering instruction, classroom management, conducting, assessment, and curriculum design. Within the curriculum, individual emphases are reflected in the choice of major performance medium and performance ensembles. The goal of the music education curriculum is to prepare the student for success in the profession.

Advising

Students admitted to music education will be assigned an appropriate academic faculty advisor to work with the student throughout his or her academic career. The undergraduate handbook is available online (http://music.ku.edu/BME/requirements/) and from the MEMT office, 448 Murphy Hall and provides detailed procedures, suggestions, and specifications.

Regardless of applied performance medium, each entering student should be able to sing independently, in tune, and with acceptable tone quality. Functional keyboard skills (accompanying, playing by ear, improvising, and transposing) are helpful. Experience working with others is also beneficial as well. Well-developed interpersonal skills are an asset.

Music Education Program

This program provides full preparation for entry into the profession. It leads to the Bachelor of Music Education and eligibility for licensure to teach vocal, instrumental, and general music in grades pre-K through 12 in the state of Kansas. The program typically requires eight semesters of full-time work, which includes a semester of student teaching and internship in the public schools.

Music Teacher Licensure Program

Teacher licensure in Kansas is a function of the Kansas State Board of Education. Individuals who complete an approved music teacher licensure program are recommended to the state for licensure in music for grades pre-K through 12. Students must meet additional state requirements, such as passing specified standardized tests, before licenses are granted. Contact the licensure officer, 211 J.R. Pearson Hall, 785-864-9602, for information.

Admission

Students must meet or exceed the School of Music academic admission requirements and successfully complete a major performance medium audition to be admitted. Students should declare the B.M.E. in music education as the major on the KU application for admission. Music education majors are in plan ME-BME in the School of Music.

Students pursuing the music education B.M.E. must apply for admission to the professional sequence by the first Monday in February of the sophomore year. Transfer students with more than 45 hours of transfer credit must complete this application the first semester of classes at KU. Students may not enroll in courses in the professional sequence before formal approval by the director of music education. Music education majors who have been admitted to the professional sequence are in plan MEPS-BME in the School of Music.

Students must be admitted to the music education professional sequence to enroll in upper-division music education courses. See the Music Education Undergraduate Program Handbook online (http://music.ku.edu/BME/requirements/) for details.

No student may be admitted to the music education professional sequence for a semester during which he or she is on academic probation. The application form for music education professional sequence admission is available on the MEMT website (http://music.ku.edu/memt/documents/).

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble 1 each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1  KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (http://admissions.ku.edu/international/welcome/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who
wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

The Music Education Teacher Licensure Curriculum

The B.M.E. degree requires a minimum of 120 semester credit hours distributed among general studies, the major, professional education class work, and student teaching and internship. The degree requires at least a 3.00 cumulative grade-point average in all course work. Each student must participate in appropriate performing ensembles and demonstrate proficiency in a major applied performance medium and in other performance areas.

Music Education 4 Year Plan

Music Education majors are strongly encouraged to adhere to this sequence of courses.

Students with no prior piano experience should take the keyboard skills sequence (PIAN 144-PIAN 288). Demonstration of skills is needed to pass or test out of PIAN 144-PIAN 288. Students whose major performance medium is piano or organ should take PIAN 310 after completing 2 semesters of music theory (this course is only taken once in the fall term of the sophomore year).

- F = Fall only
- S = Spring only
- B = Both semesters

Total Hours 69

1 Courses must be completed before admission to the music education professional sequence.

2 Music Theory I and II and Aural Skills I & II should be taken before Music History I or higher.

- Students must apply for admission to the music education professional sequence upon completion of the first semester of their sophomore year.

Professional Sequence

Professional Sequence Admission Requirements

1. Cumulative grade-point average of 3.00 or higher.
2. Grades of C or higher in MATH 101 and 6 hours of English as listed on the application.
3. Satisfactory completion of "Criteria for Admission" courses as shown in the Application for Music Education Professional Sequence Admission.
4. The student must write and attach a one-page essay (12-point font, double-spaced) to the application form that answers the following question: How will you advocate for school music programs in the community at large when you enter the classroom?

5. A fully completed application form and associated documents must be submitted to the MEMT office in 448 Murphy Hall.

6. The submitted copy must be single sided. Do not submit a copy with print on both sides of the page.

- Transfer students with more than 45 hours of transfer credit must complete the professional sequence application during the first semester of classes at KU.

Total Hours 22-28

![Table](http://nasm.arts-accredit.org/)

1 Students must achieve admission to the Music Education Professional Sequence prior to enrolling in these courses.

- Students must do the following during the final semester
  - register to take the PLT (Principles of Learning and Teaching) test
  - register to take the Praxis II Music Content test during the final semester
  - check their degree requirement check sheet to see that they have met all of the graduation requirements

- Students must do the following before graduation:
  - submit an application for graduation online through Enroll and Pay at the beginning of their last semester
  - successfully complete their major applied instrument (422) including the senior 1/2 recital

Minors in Music

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Requirements for the Minor in Music

Open to All KU Students

Students must first audition to be accepted as music minors, then may earn a minor in music by taking 24 hours in the courses listed below. At least 12 hours must be junior/senior-level courses, numbered 300
Undergraduate Certificate in Music Enterprise

and above (300+). A minimum grade-point average of 2.0 in the minor is required.

</tbody>
</table>

Nine junior/senior music credits numbered 300 and above to be chosen from:

Lessons on same instrument or voice at 300 level, ensembles, and/or music classes (MUS 586, Business of Music, and most MUSC - music history - courses are open to all KU students)

Undergraduate Certificate in Music Enterprise

The Music Enterprise Certificate is a program enhancement option for undergraduate and graduate music major students designed to provide foundational understanding and experiences in establishing, managing, promotion, and otherwise successfully operating business enterprises in the music industry. The intent of the certificate is not to provide comprehensive training in all non-performance aspects of the music business, but rather, to allow students to explore how to combine their own musical interests and priorities with the tools and concepts necessary to function creatively in the music industry of today, while also preparing to be adaptable for the changing landscape of music production and consumption in the future. Non-music major students may pursue the Music Enterprise Certificate by permission of the director of the program.

Music Majors: Undergraduate students who have completed a minimum of 60 credit hours, with a cumulative GPA of 3.0 or higher, may declare the Music Enterprise Certificate by completing the declaration in the School of Music Student Services office.

Non-music Majors: Undergraduate non-music majors must have completed a minimum of 60 credit hours, with a cumulative GPA of 3.0 or higher and interview with the director of the program who will determine whether the student has the necessary background.

12 credits required for completion of the certificate.

Master of Music

View requirements for:
- Master of Music in Conducting (p. 2369)
- Master of Music in Musicology (p. 2370)
- Master of Music in Music Theory or Composition (p. 2371)
- Master of Music in Music Performance: Brass and Percussion (p. 2372)
- Master of Music in Music Performance: Organ, Church Music, and Carillon (p. 2373)
- Master of Music in Music Performance: Piano (p. 2375)
- Master of Music in Music Performance: Strings (p. 2376)
- Master of Music in Music Performance: Voice and Opera (p. 2377)
- Master of Music in Music Performance: Woodwinds (p. 2379)

Master of Music in Conducting

Master of Music in Conducting Degree Programs

M.M. degree programs in conducting:
- Choral conducting
- Orchestral conducting
- Wind conducting

M.M. in Conducting Admission

Applicants are expected to have educational backgrounds equivalent to the B.M. or B.M.E. degree from KU. They should have one or two years of experience in conducting. Such experience may include work in public school, college, or with other amateur or professional ensembles. Applicants normally are expected to have a high level of performing ability on an instrument or in voice. Applicants must complete audition-interviews successfully before the divisional faculty and should provide a résumé of their conducting experience, including programs of public appearances.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (music education/music therapy), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:
- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (M.M.T.) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M. in Conducting Degree Requirements

Diagnostic Examinations

All incoming graduate students, except those in the MM-Opera program, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Master’s Recital

The conducting degree candidate must present a final concert-length recital consisting of a public choral or instrumental program. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option is still available to students and faculty members. Divisions must approve the recital content well in advance but no less than three weeks before the recital date. The Master’s recital must be given before the final oral exam can occur.
Final Oral Exam

Master's degree students must schedule and pass a final oral examination. The student's 3-member Graduate Advisory Committee consists of the student's major professor, one member from the student's major division and one musicology or music theory professor. This committee administers the final oral exam.

A program of study in band and orchestral conducting (minimum of 30 hours) is as follows:

Master of Music in Musicology

Master of Music in Musicology Degree Program

The Master of Music (M.M.) degree in musicology requires a minimum of 30 credits and is designed to further the student’s knowledge and indepth exploration of musicology (music history) at the post-baccalaureate level.

M.M. in Musicology Admission

Applicants are expected to have educational backgrounds equivalent to the B.A. or B.M. in musicology from KU. Applicants are expected to have a reading knowledge of German, French, Italian, or Spanish. A language deficiency may be satisfied after entrance into the program. Proficiency at the piano is encouraged. Applicants must submit samples of original scholarly writing. In addition to the required course work, students are encouraged to continue study of performance or composition.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

• Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
• Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.
M.M. in Musicology Degree Requirements

Final Oral Exam

Master's degree students must schedule and pass a final oral exam. For the Master's degree in musicology, the final oral exam is a defense of the student's thesis.

The musicology student's 3-member Graduate Advisory Committee consists of the student's major professor, one member from the student's major division and one music theory professor. This committee administers the final oral exam.

The course work for the M.M. degree in musicology (minimum of 30 credits) is as follows:

<table>
<thead>
<tr>
<th>Code</th>

Master of Music in Music Theory or Composition

Master of Music in Music Theory or Composition Degree Programs

The Master of Music (M.M.) degrees in theory or composition require a minimum of 30 credits and are designed to further the student's knowledge and in-depth exploration of music theory or composition at the post-baccalaureate level.

M.M. in Music Theory or Composition Admission

Applicants are expected to have educational backgrounds equivalent to the B.A., the B.M. in music theory, or the B.M. in composition from KU. Composition applicants should submit scores and recordings (if available) of original compositions; theory applicants should submit research papers in music theory. Applicants are expected to have a reading knowledge of German, French, Italian, or Spanish. A language deficiency may be satisfied after entrance into the program. In addition to the required course work, students are encouraged to continue study of performance and participate in ensembles on their major instruments.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Master of Music in Music Performance: Brass and Percussion

The master’s thesis in theory or composition shall consist of either a 20-minute work for large ensemble or a 30-minute chamber work, either of which may include electronic media. All thesis proposals must be approved by the MTHC faculty before the student begins work on the thesis.

M.M. in Performance Admission

The applicant must perform an audition before the faculty of the major performance division. In some cases, an audio recording may be submitted in lieu of a live performance. A complete list of repertoire studied should be submitted with the graduate application. A prescreening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Graduate Admission to the School of Music

A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M. in Performance Degree Requirements

Diagnostic Examinations

All incoming graduate students are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Master's Recital

A final solo recital is required for all master’s degrees in performance. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve recital content well in advance but no less than 3 weeks before the recital date. The candidate must file a copy of the final recital program with the School of Music before the final oral examination is scheduled. The audio recording of the recital will be placed in the School of Music archives.

Final Oral Examination

All Master's students in Music must schedule a Final Oral Exam during the semester the student plans to graduate. The Master's Recital must be performed before the Final Oral Exam can be taken. The Oral Exam is administered by the student's 3-member advisory committee. The committee is comprised of two faculty members from the student's major division and a Musicology or Music Theory faculty member.

Students in the Master of Music program who play band or orchestral instruments must enroll in a major ensemble for a minimum of 2 semesters.

- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**Diagnostic Examinations**

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

**Master’s Recital**

A final solo recital is required for all master’s degrees in performance. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve recital content well in advance but no less than 3 weeks before the recital date. The candidate must file a copy of the final recital program with the School of Music before the final oral examination is scheduled. The audio recording of the recital will be placed the School of Music archives.

**Final Oral Examination**

All Master's students in Music must schedule and pass a Final Oral Exam during the semester the student plans to graduate. The Master's Recital must be performed before the Final Oral Exam can be taken. The Oral Exam is administered by the student's 3-member advisory committee. The committee is comprised of the student's major professor, one member from the student’s major division, and one Musicology or Music Theory faculty member.

A program of study for students in cello, double bass, harp, viola, and violin (minimum of 30 credits) is as follows:

**Master of Music in Music Performance: Voice and Opera**

**Master of Music in Performance Degree Programs**

M.M. degree programs in music performance:

- Bassoon
- Carillon
- Cello
- Church music
- Clarinet
- Collaborative piano
- Double bass
- Euphonium
- Flute
- French horn
Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in a thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M. in Performance Degree Requirements

Diagnostic Examinations

All incoming graduate students, except those in the MM-Opera program, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Master’s Recital

A final solo recital is required for all master’s degrees in performance. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve recital content well in advance but no less than 3 weeks before the recital date. The candidate must file a copy of the final recital program with the School of Music before the final oral examination is scheduled. The audio recording of the recital will be placed the School of Music archives.

M.M. in Performance Admission

The applicant must perform an audition before at least two members of the faculty of the major performance division. In some cases, a video recording may be submitted in lieu of a live performance. A complete list of repertoire studied, including past recital programs, should be included with the graduate application. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Students in opera performance must take a minimum of 1 year each in French, German, and Italian before entering graduate studies or before completing the M.M. degree. For the master’s degree program in voice, the language requirement is 1 year of 2 of the following: French, German, or Italian. Both programs have prerequisites in French, German, and Italian diction. Students found deficient in a particular area of diction must enroll in the specific course in which they are deficient and pass it with a minimum grade of C or demonstrate proficiency by passing a diction diagnostic examination. A student whose transcript shows she or he has passed a particular language diction course normally is considered proficient in the diction of that language.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

- Harp
- Oboe
- Opera performance
- Organ
- Percussion
- Piano
- Saxophone
- Trumpet
- Trombone
- Tuba
- Viola
- Violin
- Voice

Master of Music Education in Music Education or Music Therapy

Master of Music Education

With a Major in Music Education or Music Therapy

The division’s graduate programs include advanced professional and scholarly study for music educators and music therapists, licensure/certification programs for those with baccalaureate degrees in other fields who plan to enter the music education or music therapy professions (these initial licensure/certification programs typically also require collateral undergraduate study), and advanced study for individuals in related disciplines. Areas of emphasis, curricula, examinations, and regulations and procedures are described in the MEMT Master’s Handbook available in the division office and online (http://music.ku.edu/MME/requirements/).

Music Education M.M.E. Program

Master of Music Education

With a Major in Music Education

The division’s graduate programs include advanced professional and scholarly study for music educators and music therapists, licensure/certification programs for those with baccalaureate degrees in other fields who plan to enter the music education or music therapy professions (these initial licensure/certification programs typically also require collateral undergraduate study), and advanced study for individuals in related disciplines. Areas of emphasis, curricula, examinations, and regulations and procedures are described in the MEMT Master’s Handbook available in the division office and online (http://music.ku.edu/MME/requirements/).

M.M.E. in Music Education or M.M.E. in Music Therapy Admission

Admission requirements are as follows:

1. Undergraduate grade-point average of 3.0 or higher on a 4.0 scale.
2. An appropriate baccalaureate degree to support the individual’s goals for master’s study. Students seeking entrance into the graduate initial certification program in music education or the graduate equivalency program in music therapy should have substantial backgrounds in music regardless of undergraduate major.
3. Scores on the Graduate Record Examination (verbal, quantitative, analytical writing).
4. 3 letters of recommendation regarding applicant’s qualifications for graduate study in their selected program.
5. Submission of a video recording appropriate to degree of application.
6. Other supporting materials are required.

Additional detailed admission requirements and information are found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/apply/audition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.
M.M.E. with a Major in Music Education

Course and Proficiency Requirements

The degree requires a minimum of 30 hours of graduate credit. At least one-half of the required credit hours must be in courses open only to graduate students. At least 20 of the hours must be in regularly scheduled classes excluding directed study, research, and thesis or comprehensive examination (as applicable). The work must be distributed as indicated in the categories shown on the appropriate Master's Degree Program Plan (http://music.ku.edu/MME/requirements/).

Course Distribution

• At least 17 hours in M.M.E. including MEMT 812 Research in Music Education and Music Therapy (3 hours), MEMT 899 Master’s Thesis (3-5 hours if thesis option) or MEMT 898 Comprehensive Examination (1 hour if nonthesis option), and additional hours to reach the minimum elected from 700- and 800-level MEMT courses, subject to the advisor’s approval. At least 2 courses must be at the 800 level.
• At least 10 graduate hours outside of MEMT, including:
  • at least 2 hours of applied music or conducting;
  • at least 3 hours in musicology, theory, or composition;
  • at least 3 hours in a supportive elective area; and
  • additional non-MEMT hours necessary to reach the minimum.

All of these selections are subject to the advisor’s approval.

Final Master’s Examination (Thesis)

The student must be enrolled at the time the final master’s exam is held. The exam will be scheduled for a period of 2 hours. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final thesis copy to each committee member 2 weeks in advance of the scheduled exam date.

The candidate will begin by giving a twenty-minute oral presentation on his or her thesis, but the exam is not confined to that topic. Thereafter, the candidate will address questions posed by the committee arising from the candidate’s presentation and the thesis document.

Final Master’s Examination (Non-Thesis)

The non-thesis option typically functions as a terminal degree and the work must be distributed as indicated in the categories shown on the appropriate Degree Program Plan. This option culminates with enrollment in a 1-credit hour comprehensive final examination (MEMT 898 Comprehensive Examination) and the subsequent portfolio and presentation.

The student must be enrolled at the time the final non-thesis master’s exam is held. The non-thesis master’s exam includes presenting a portfolio and will be scheduled for a period of 1 hour. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final portfolio to each committee member 2 weeks in advance of the scheduled examination date.

More information about the thesis or non-thesis option is available online (http://music.ku.edu/MME/requirements/) in the M.M.E. Graduate Handbook.

Plan of Study

The Master of Music Education with a major in music education program plan is available online (http://music.ku.edu/MME/requirements/).

Music Therapy M.M.E. Program

Master of Music Education

With a Major in Music Therapy

The division’s graduate programs include advanced professional and scholarly study for music educators and music therapists, licensure/ certification programs for those with baccalaureate degrees in other fields who plan to enter the music education or music therapy professions (these initial licensure/certification programs typically also require collateral undergraduate study), and advanced study for individuals in related disciplines. Areas of emphasis, curricula, examinations, and regulations and procedures are described in the M.M.E. Master’s Graduate Handbook available in the division office and online (http://music.ku.edu/MME/requirements/).

M.M.E. in Music Education or M.M.E. in Music Therapy Admission

Admission requirements are as follows:

1. Undergraduate grade-point average of 3.0 or higher on a 4.0 scale.
2. An appropriate baccalaureate degree to support the individual’s goals for master’s study. Students seeking entrance into the graduate initial certification program in music education or the graduate equivalency program in music therapy should have substantial backgrounds in music regardless of undergraduate major.
3. Scores on the Graduate Record Examination (verbal, quantitative, analytical writing).
4. 3 letters of recommendation regarding applicant’s qualifications for graduate study in their selected program.
5. Submission of a video recording appropriate to degree of application.
6. Other supporting materials are required.

Additional detailed admission requirements and information are found online (http://music.ku.edu/memt/documents/#graduate) in the M.M.E. Graduate Application Procedure document.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E.
programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

**Program Areas**

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**Diagnostic Examinations**

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor's or master's degree in music from the University of Kansas within the previous 4 years.

**M.M.E. with a Major in Music Therapy**

**Course and Proficiency Requirements**

The degree requires a minimum of 30 hours of graduate credit. At least one half of the required credit hours must be in courses open only to graduate students. At least 20 of the hours must be in regularly scheduled classes excluding directed study, research, and thesis or comprehensive examination (as applicable).

**Course Distribution**

- The program must include at least 17 hours of graduate work in the division, including MEMT 812 Research in Music Education and Music Therapy (3 hours), MEMT 864 Philosophy and Theory of Music Therapy (3 hours), MEMT 890 Practicum in Music Therapy (2 hours), MEMT 899 Master’s Thesis (3 hours if thesis option) or MEMT 898 Comprehensive Examination (1 hour if nonthesis option), and additional hours to reach the minimum elected from 700- and 800-level MEMT courses, subject to the advisor’s approval. At least 2 courses must be at the 800 level. At least 9 of these hours must be in regularly scheduled courses.
- At least 10 hours in supportive studies outside MEMT.
- Proficiency as a performing musician must be demonstrated before the degree may be awarded.

The work is distributed as indicated in the categories on the appropriate Degree Program Plan found online (http://music.ku.edu/MME/requirements/). All of these selections are subject to the advisor’s approval.

The M.M.E. with a major in music therapy may be earned only by individuals eligible to sit for the national examination offered by the Certification Board for Music Therapists (CBMT).

**Final Master's Examination (Thesis)**

The student must be enrolled at the time the final master’s exam is held. The exam will be scheduled for a period of 2 hours. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final thesis copy to each committee member 2 weeks in advance of the scheduled exam date.

The candidate will begin by giving a twenty-minute oral presentation on his or her thesis, but the exam is not confined to that topic. Thereafter, the candidate will address questions posed by the committee arising from the candidate’s presentation and the thesis document.

**Final Master's Examination (Non-Thesis)**

The non-thesis option typically functions as a terminal degree and the work must be distributed as indicated in the categories shown on the appropriate Degree Program Plan. This option culminates with enrollment in a 1-credit hour comprehensive final examination (MEMT 898 Comprehensive Examination) and the subsequent portfolio and presentation.

The student must be enrolled at the time the final non-thesis master’s exam is held. The non-thesis master’s exam includes presenting a portfolio and will be scheduled for a period of 1 hour. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final portfolio to each committee member 2 weeks in advance of the scheduled examination date.

More information about the thesis or non-thesis option is available online (http://music.ku.edu/MME/requirements/) in the MEMT Graduate Handbook.

**Plan of Study**

The Master of Music Education with a major in music therapy program plan is available online (http://music.ku.edu/MME/requirements/).
Doctor of Musical Arts

Programs

View requirements for:

- Doctor of Musical Arts in Composition (p. 2384)
- Doctor of Musical Arts in Conducting (p. 2385)
- Doctor of Musical Arts in Music Performance: Brass and Percussion (p. 2388)
- Doctor of Musical Arts in Music Performance: Organ and Church Music (p. 2389)
- Doctor of Musical Arts in Music Performance: Piano (p. 2392)
- Doctor of Musical Arts in Music Performance: Strings (p. 2393)
- Doctor of Musical Arts in Music Performance: Voice (p. 2395)
- Doctor of Musical Arts in Music Performance: Woodwinds (p. 2397)

Doctor of Musical Arts in Composition

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2522) section of the online catalog. Further admission requirements are listed below.

Composition

Applicants should submit at least 3 scores of original works (including master’s thesis), recordings if available, and lists of past performances.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the end of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remedial work must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.
Diagnostic Examinations

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each graduate student selects a faculty advisory committee, in consultation with the major advisor, subject to the consent of the faculty members involved, and approved by the associate dean. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations.

Recitals

Composition students must present a public program of original compositions approximately 45 minutes in length and participate in at least one work as either a performer or conductor. All recitals and public appearances required for the D.M.A. are graded by the performance members of the student’s graduate advisory committee. The student must achieve at least a grade of B on each recital for satisfactory completion of degree requirements.

Written and Oral Comprehensive Examinations

Composition doctoral students must take written qualifying examinations in composition, music theory and musicology when most of the course work has been completed and the research skills/responsible scholarship requirements have been fulfilled. All diagnostic deficiencies must be satisfied before taking the written qualifying and oral comprehensive exams. After successful completion of the written qualifying examinations, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee.

Large-Scale Composition

Candidates in composition must submit to the student’s graduate advisory committee a proposal for a large-scale composition at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. The composition proposal should outline a large-scale work for orchestra, with or without soloists, a work for chorus and orchestra, or an opera, and should include a preliminary analysis.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination. For students in composition, the examination is primarily a defense of the large-scale composition.

The student must receive at least a grade of B on the composition for satisfactory completion of degree requirements.

Examinations

At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

(Work for large ensemble, a major concerto, a work for chorus and orchestra or an opera, or a major work involving live performers and electronic media. A written analysis of the work must be included after the title page in the full score.)

Composition majors must present a public program of original compositions approximately 45 minutes in duration before being admitted to the comprehensive examination.

Doctor of Musical Arts in Conducting

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2522) section of the online catalog. Further admission requirements are listed below.

Conducting

Applicants are expected to have had experience in conducting that spans a period of not less than 2 years. This may include work in public school, college, or with other amateur or professional ensembles. Applicants normally are expected to have a high level of performing
ability on an instrument or in voice. Applicants are expected to submit preliminary audition materials that include a DVD recording of the applicant conducting in performance and in rehearsal, a CD recording of an ensemble trained and conducted by the applicant, and a prescribed formal analysis project. Details can be found at the band, choral, and orchestral links on the School of Music's website (http://music.ku.edu/).

An entrance interview-audition is required for admission. The audition is heard by a committee composed of the Graduate Faculty of the conducting divisions. Approval by a majority of the committee is required for acceptance into the program. The audition may include

1. Harmonic and melodic dictation and/or sight-singing;
2. Score identification;
3. Score reading at the keyboard; and
4. Conducting from a band, choral, or orchestral score to be selected by the examiners.

International students may submit a DVD. The Graduate Faculty in the ensemble divisions will review this recording.

Students applying to the D.M.A. program in choral conducting must display a working knowledge of 2 of the following 4 languages: French, German, Spanish, and Italian. A working knowledge normally implies at least 2 semesters of undergraduate study.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor's or master's degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full-time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Exams

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.
Recitals

All students in performance and in choral, orchestral, and wind conducting must perform a total of 3 doctoral recitals. This number does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Doctoral conducting students are expected to perform 3 public, concert-length recitals. Up to 2 recitals may consist of the combination of works conducted with various official university ensembles over the course of several semesters. The third recital must be a single program with a major ensemble assigned as part of course work or teaching duties and presented as a regular program in that ensemble’s performance schedule. The third recital may include a complete performance of an opera, ballet/dance, or musical. A student who wishes to use an ensemble other than an official university ensemble must obtain permission to do so from the directors of ensembles.

For the first 2 required recitals in the D.M.A. program in performance and conducting, a recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve the recital content well in advance but no less than 3 weeks before the recital date. Normally, there is no recital preview for the final recital.

Written and Oral Comprehensive Examinations

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations

At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

Cognate

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student’s advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Brass and Percussion

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2522) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance requires showing work studied, memorized, or ready for immediate performance.

D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801 Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of the following ways:

- Taking additional tests in piano literature given before the start of classes. A student may be admitted to the program after passing these tests.
- Satisfactory completion of degree requirements.

* Credits can be used to fulfill the optional Cognate credits

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average continues to fall below 3.0, the student is dismissed from the program. Students must also achieve at least a grade of B in the thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Doctor of Musical Arts in Music Performance: Brass and Percussion

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicoLOGY/musical theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/apply/graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.
two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee
Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study
A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals
All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student will remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. students and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Examinations
At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

Cognate
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Organ and Church Music

Doctor of Musical Arts
The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in
• Church music (organ or choral conducting emphasis),
• Composition,
• Conducting (choral, orchestral, or wind), and
• Areas of performance.

D.M.A. Admission
The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2522) section of the online catalog. Further admission requirements are listed below.

Performance
The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Graduate Admission to the School of Music
Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

• Music includes programs in composition, conducting, musicology, music theory, and areas of performance.

• Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations
All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements
Research Skills and Residency
Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Exams
All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Language Requirement
All organ and church music doctoral students must demonstrate competence in one foreign language. Approved languages include French and German for organ majors and French, German, or Latin for Church Music majors. Students may petition the organ faculty for approval of a language other than those stated.

Advisory Committee
Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members
from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study
A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals
All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Church Music with Choral Conducting emphasis must present 2 choral recitals and 1 organ or voice recital. Church Music with Organ emphasis must present 2 organ recitals and 1 choral recital.

Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations
At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Piano

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2522) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.
D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801 Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations

All incoming graduate students, except those in MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course. The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations

At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

Cognate

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).
Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except MM-Opera) are required to take diagnostic exams in musicology and music theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each graduate student, in consultation with the major advisor, selects a Graduate Advisory Committee subject to the consent of the faculty members involved, and approval of the School of Music Graduate office. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), 1 from the School of Music at large and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee.
Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

**Document or Lecture-Recital**
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

**Language and Diction**
Students in the D.M.A. program in voice must take or have taken a minimum of 1 year each of French, German, and Italian, and courses in English, French, Italian, and German diction before completing the D.M.A. program. If deficient in any language or diction coursework, as determined either through transcript evaluations or during the audition when selections from each language have been performed, the student must enroll in the specific course for that deficiency and pass with a grade of C or better. All deficiencies must be satisfied before the oral comprehensive exam can be scheduled.

**Examinations**
At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

**Cognate**
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee.

Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

**Voice Program**

**Doctor of Musical Arts in Music Performance: Woodwinds**

**Doctor of Musical Arts**
The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

**D.M.A. Admission**
The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2522) section of the online catalog. Further admission requirements are listed below.

**Performance**
The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

**Graduate Admission to the School of Music**
Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyadmission/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.
Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

Diagnostic Examinations
All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements
Research Skills and Residency
Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations
All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee
Each graduate student, in consultation with the major advisor, selects a Graduate Advisory Committee subject to the consent of the faculty members involved, and approval of the School of Music Graduate office. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), 1 from the School of Music at large and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study
A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals
All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations
At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

Cognate
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student’s advisory committee.

Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Philosophy

View requirements for:
- Doctor of Philosophy in Music (p. 2400)
- Doctor of Philosophy in Music Education (p. 2401)

Doctor of Philosophy in Music

Ph.D. in Music

The Ph.D. in Music is offered in Musicology or Music Theory.

Ph.D. in Music Admission

The Doctor of Philosophy degree in music is offered in musicology and music theory. The applicant is expected to hold a Master of Music degree with emphasis in musicology or music theory from KU or an equivalent master's degree from another accredited institution. In addition to the required transcripts, Graduate Record Examination scores, and letters of recommendation, the applicant for admission to the Ph.D. program should submit a resume or CV of professional training and experience and samples of original scholarly writing.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor's or master's degree in music from the University of Kansas within the previous 4 years.

Doctor of Philosophy in Music Degree Requirements

Foreign Language Requirements

Aspirants to the Ph.D. degree in music theory and musicology are expected to demonstrate reading knowledge of German and a Romance language chosen from French, Italian, Portuguese, or Spanish. Reading proficiency must be demonstrated before scheduling the oral comprehensive examination. The student also may be advised to develop reading proficiency in another language or languages in order to pursue research for the dissertation.

Course of Study

Specific course work for each student is arranged individually in consultation with the student’s advisor. The Ph.D. program normally requires 4 years of full-time study beyond the master’s degree, with the first 2 years devoted to course work. A minimum of 18 credit hours is devoted to the dissertation, an original contribution to knowledge in the student’s research area.

Students in musicology must complete at least 2 semesters of MUSC 654 or MUSC 656 Collegium Musicum, and 2 semesters of MUSC 940 Seminar on Selected Topics in Musicology. In addition, students must complete at least 3 more 3-credit-hour courses in advanced musicology and at least 3 more 3-credit-hour courses in advanced music theory.

Although the Ph.D. program does not include a minor area, students are encouraged to continue their study of performance and/or composition, and may be advised to take nonmusic courses that are directly applicable to their fields of research for the dissertation.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2522) section of the online catalog.

Research Skills and Responsible Scholarship

Doctoral students are required to have training in both responsible scholarship and research skills pertinent to the doctoral level of research in their field of study.

To satisfy both components, D.M.A. students in performance or composition and Ph.D. students in Musicology or Music Theory must
complete MUSC 801 Music Bibliography and Research (or its equivalent) and, if available, participate in advanced performance seminars.

**Scholarly Presentation**

Each candidate for the Ph.D. degree in musicology and music theory must make a public presentation of no less than 20 minutes on a scholarly topic. This requirement may be fulfilled by reading a paper at a national or regional meeting of a society in the student’s discipline or in a colloquium at KU.

**Written and Oral Comprehensive Examinations**

Students must take written examinations in music theory and musicology when most of the course work has been completed and research skills/ responsible scholarship requirements have been fulfilled. Some major divisions also may require a written examination in the major area. Upon successful completion of all written examinations, the student is eligible to schedule the oral comprehensive examination administered by the graduate advisory committee. With the satisfactory completion of both written and oral comprehensive examinations the aspirant is admitted to candidacy for the degree of Doctor of Philosophy.

**Dissertation Proposal**

No later than the end of the semester after successful completion of the written and oral comprehensive examinations, the candidate, in consultation with the faculty dissertation committee, must submit a dissertation proposal of several pages with a preliminary bibliography, outline, and description of the project and research plan.

**Final Oral Examination**

Following completion of the dissertation, a final oral examination is scheduled in which the candidate presents and defends the results of dissertation research and is expected to respond to questions from the faculty committee. A grade of at least B must be achieved on the dissertation for satisfactory completion of the degree requirements.

**Doctor of Philosophy in Music Education**

**Ph.D. in Music Education**

The Doctor of Philosophy with an emphasis in either music education or music therapy focuses on research and scholarship. It is often sought by those who aspire to careers in research and graduate-level teaching. The requirements help the student develop broad and profound understanding of musical behavior, sophisticated skill and extensive experience in pursuing new knowledge of such behavior, and a rational system for evaluating the relationships between the specialty and other areas of human understanding. The program culminates with completion of a substantial piece of original research.

Detailed information about admission processes in Music Education and Music Therapy can be found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

**Ph.D. in Music Education Admission Requirements for Regular Admission**

1. Master’s grade point average of at least 3.5 on a 4.0 scale.
2. Appropriate baccalaureate and master’s degrees to support the individual’s goals for doctoral study.
3. Scores on the Graduate Record Examination (verbal, quantitative, and analytical writing).
4. 3 letters of recommendation estimating the applicant’s potential for success in doctoral study.
5. Documentation of at least 3 years successful full time experience, or its equivalent, as a professional music educator if seeking a concentration in music education, or at least 5 years successful full-time experience as a professional music therapist, or its equivalent, if seeking a concentration in music therapy.
6. Submission of a video recording appropriate to the degree emphasis.
7. A reasoned statement of professional goals and research interests.
8. An interview with the appropriate faculty for area of emphasis.
9. Other supporting materials may be required.
10. Passing score on the music education and music therapy division diagnostic examination to be taken at the end of the first semester.

Additional detailed admission requirements and information are found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

**Graduate Admission to the School of Music**

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

**Program Areas**

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.
At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in their thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**Diagnostic Examinations**

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

**Ph.D. in Music Education Degree Requirements**

**Research Skills**

Doctoral students in music education and music therapy at KU must demonstrate research skills by completing 3 research projects suitable for publication. These may be developed and completed independently or in consultation with appropriate doctoral faculty members. There must be a project for three different types of research methodology, usually representing methods of descriptive, experimental, and historical (including the history and logic of ideas) research. If those methods are chosen the descriptive and experimental research articles should be presented in APA style. The historical research article may be presented in Turabian, MLA, or APA style. The student may propose other divergent methodologies if those fit his/her program of study more adequately.

It is up to the doctoral program planning committee to approve the methodologies each student utilizes.

Each completed project is reviewed by the student’s doctoral planning committee, which rules in the majority whether the project is of sufficient quality for publication in a national, refereed research journal in music education or music therapy. The committee chair will determine if the projects will be reviewed by additional faculty not a part of the program planning committee. Single-author studies that have been published or accepted for publication in such journals may be used to demonstrate these skills.

Completion of each of the 3 research projects must be certified by the student’s mentor/advisor in music education or music therapy on the MEMT Do-All form after the completion of each project.

Responsible scholarship requirements are met by satisfactory completion of courses MEMT 812 Research in Music Education and Music Therapy and MEMT 920 Doctoral Seminar in Music Education and Music Therapy.

**Preliminary and Comprehensive Examinations**

The student must pass a series of examinations, culminating with the comprehensive oral examination.

The music education and music therapy Ph.D. handbook is available online (http://music.ku.edu/PHD/requirements/) and in the MEMT office, and includes information about patterns of course work, the Ph.D. minor, examinations, and the dissertation.

**Plan of Study**

Course requirements for the doctoral degree are flexible. The Ph.D. program requires a minor. Each student’s program is planned specifically in light of his or her background and to meet the needs of the anticipated academic and professional career. However, each student is expected to achieve a broad understanding of human musical behavior and to become skilled in research. Professional competence, not hours of credit per se, is the underlying requisite for conferring the degree.

The student works with her or his faculty advisor to complete a Degree Requirement Program Plan. The advisor submits the completed program plan with the MEMT Do-All form.

**Graduate Certificate in Music Enterprise**

The Music Enterprise Certificate is a program enhancement option for undergraduate and graduate music major students designed to provide foundational understanding and experiences in establishing, managing, promoting, and otherwise successfully operating business enterprises in the music industry. The intent of the certificate is not to provide comprehensive training in all non-performance aspects of the music business, but rather, to allow students to explore how to combine their own musical interests and priorities with the tools and concepts necessary to function creatively in the music industry of today, while also preparing to be adaptable for the changing landscape of music production and consumption in the future. Non-music major students may pursue the Music Enterprise Certificate by permission of the Associate Dean for Academic Affairs in Music.

**Music Majors:** Graduate students in good standing (non-probationary) may declare for the Music Enterprise Certificate at any time during their course of study. There are no admission requirements for music majors.

**Non-Music Majors:** Non-music graduate students in good standing (non-probationary) who wish to be admitted to the Certificate program must interview with the Director of the Program who will determine whether the student has the necessary background.

12 credits are required to complete the certificate.

Graduate Certificate in Music Performance

The Graduate Certificate in Music Performance offers a one-year program providing an intensive period of post-baccalaureate study in music performance or conducting. It is intended for exceptionally gifted and accomplished performers and conductors seeking professional performing careers, but not wishing to engage in academic studies required for a graduate degree. Study is available in woodwinds, brass, percussion, strings, piano, voice, organ, church music, jazz, carillon and conducting (band, orchestra and choir).

Admission to Graduate Performer’s Certificate Program

Candidates for admission to the Graduate Certificate in Music Performance must provide proof of a bachelor’s degree in keeping with the Admission to Graduate Study policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applicants whose native language is not English must have a minimum TOEFL total score of 65 (Internet-based) to be considered for acceptance into the Graduate Certificate in Music Performance program.

Twelve (12) credit hours must be completed during one year of study to obtain the Graduate Certificate in Music Performance. An additional twelve (12) credit hours in music performance must be completed if continuing for a second year of study.*

Courses are in the following categories (credit hours are per year):

- Applied Studio Instruction (6)
- Large Ensemble (2)
- Chamber music/Jazz Combo/Accompanying/Coaching (2)
- Recital (1)
- Community Outreach Performance Project (1) or Elective (1)

*International Graduate Students

Federal regulations require F-1 international graduate students to maintain an enrollment of 9 credit hours per semester until their final semester of enrollment. Elective courses in the School of Music or courses in the AEC may be taken to reach this enrollment. Students enrolling in a combination of AEC and music courses will be issued a “pathway” I-20 instead of a Certificate I-20.

Applied Studio Instruction Courses

Students are required to enroll in 3 credit hours each semester in applied studio instruction ___711 with the appropriate faculty member.

Large Ensemble

Students are required to enroll in 1 credit hour each semester in a large ensemble specific to their area of instruction.

Chamber music/Jazz Combo/Accompanying/Coaching

Students are required to enroll in 1 credit hour each semester in a course specific to their area of instruction.

Recitals

Students are required to enroll in 1 credit hour of recital in the final semester of their course load.

MUS 799     Artist Certificate Recital

Community Outreach Performance Project

Students may enroll in 1 credit hour to satisfy the outreach project. All projects are overseen by the Associate Dean for Performance Activities. Students for whom this course is not appropriate will take an elective course (see Elective Courses).

MUS 800     Directed Study: Music Engagement and Outreach

Elective Courses

Students are strongly advised to consult with their primary professor to choose an elective course(s) that is consistent with their primary course of study. International Graduate Students who have a TOEFL score between 65 and 80 (Internet-based) must take a minimum of 3 credits through the Applied English Center (AEC) during their first semester of enrollment.
Nursing

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, students use the catalog of the year they entered KU (see advisor (http://www.advising.ku.edu/) for details). Other years’ catalogs (p. 39).

School of Nursing Degree Programs

Degrees (p. 2404)

Bachelor of Science in Nursing (p. 2424)
Master of Science in Nursing (p. 2431)
Doctor of Philosophy in Nursing (p. 2434)
Doctor of Nursing Practice (p. 2437)

Certificates (p. 2404)

Post-Master's Certificate Programs in Nursing (p. 2440)
Graduate Certificate - Adult-Gerontology Acute Care Nurse Practitioner (p. 2441)
Graduate Certificate - Adult-Gerontology Primary Care Nurse Practitioner (p. 2442)
Graduate Certificate - Family Nurse Practitioner (p. 2444)
Graduate Certificate - Health Professions Educator (p. 2448)
Graduate Certificate - Health Informatics (p. 2177)
Graduate Certificate - Nurse Midwifery (p. 2449)
Graduate Certificate - Psychiatric/Mental Health Nurse Practitioner (p. 2451)

Interprofessional Degree Programs

Master of Science in Health Informatics (p. 2174)
Doctor of Philosophy in Therapeutic Sciences (p. 782)

The School of Nursing

The School of Nursing is one of 3 schools at the University of Kansas Medical Center (http://www.kumc.edu/) in Kansas City, Kansas. Academic programs at KU Medical Center are offered through the Schools of Health Professions, Medicine, and Nursing. The Office of Graduate Studies at KUMC (http://www.kumc.edu/academic-affairs/graduate-studies.html) handles matters related to graduate programs in Health Professions, Medicine, and Nursing.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu) (http://www.aacn.nche.edu/). This organization is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master's, and D.N.P. programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org/). The Nurse-Midwifery Program is accredited by the Accreditation Commission for Midwifery Education (ACME), 8403 Colesville Road, Suite 1550, Silver Spring, MD, 20910, (240) 485-1802.

Undergraduate Programs

The Bachelor of Science in Nursing (BSN) program prepares baccalaureate generalist nurses for professional nursing practice. The American Association of Colleges of Nursing’s Essentials of Baccalaureate Education for Professional Nursing Practice provide the framework for this first step in professional nursing education (AACN. 2008). The roles of the baccalaureate generalist include: provider of care, designer/manager/coordinator of care, and member of a profession. Baccalaureate generalist education provides the foundation for all graduate nursing education.

High School Preparation

High school students planning to enter the baccalaureate program in nursing are encouraged to follow a general college preparatory course of study. Such a course usually emphasizes basic preparation in English, a foreign language, mathematics, natural science, and social sciences.

Graduate Programs

Basic admission requirements are listed in the Graduate Studies (p. 2522) section of the online catalog. Individual graduate programs may have additional specific requirements including prerequisite undergraduate courses. These are listed or referenced in program descriptions. Combined degree options are available.

The School of Nursing offers the following graduate programs:

- Master of Science (p. 2431)
- Doctor of Nursing Practice (p. 2437)
- Doctor of Philosophy (p. 2434)
- Nursing and Interprofessional Certificate Programs (p. 2440)

For online information about graduate programs, visit the school's website (http://nursing.kumc.edu/).

Undergraduate University Regulations

For information about university regulations, see Regulations (p. 14) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Academic Forgiveness

Academic forgiveness does not apply in the School of Nursing.

Change of School

To change from one school to another, you must submit a Change of School form in the dean’s office of the school you plan to enter. Follow the deadlines on the form.

Admission is competitive and occurs once each year for the traditional BSN program, in the fall semester. Applications are due by October 15 of the year before beginning classes.

Credit/No Credit

A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information,
visit the KU Policy Library (https://documents.ku.edu/policies/governance/USRR.htm#art2sec12).

**Warning:** Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

**Grading**

Courses in which grades of D and F are earned do not count toward graduation.

**Graduation with Distinction and Highest Distinction**

Students who rank in the upper 10 percent of their graduating class may graduate with distinction. The upper third of those awarded distinction may graduate with highest distinction. The list is compiled each spring and includes July, December, and May graduates.

**Honor Roll**

Students with grade-point averages of 3.5 who have completed at least 12 hours are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

**Honors Graduates**

For students who complete the school’s honors program, designation of honors appears on the transcript.

**Independent Study Through KU Continuing Education**

Students may complete up to 31 hours of Independent Study through KU Continuing Education, credit-by-examination, and/or extension courses.

**Probation**

**Probation**

Students whose grade-point averages fall below 2.0 for the semester are placed on probation. The associate dean of student affairs notifies the student by letter. It is the student’s responsibility to seek a conference with the student affairs advisor. The student and the student affairs advisor assess the situation jointly and make appropriate recommendations.

**Return to Good Standing**

A student remains on probation until completion of the next term in which the student is enrolled full time. (Full-time enrollment is 12 hours or more; full-time summer session enrollment is 6 hours or more.) To be removed from probation, a part-time student must maintain a 2.0 grade-point average in the next 12 semester hours of enrollment. Only courses required for the nursing major (junior/senior course work) apply toward the required grade-point average for removal from probation. If the student attains a grade-point average higher than 2.0 in the probationary semester, the student is removed from probation. A student may graduate with a nursing grade-point average lower than 2.0 but an overall grade-point average lower than 2.0.

**Dismissal**

If the student does not attain a grade-point average higher than 2.0 in the probationary semester, the student is dismissed for academic reasons.

One nursing course may be repeated one time only if necessary to earn the minimum grade of C or S. Failure to achieve a minimum grade of C or S in two nursing courses or one repeated nursing course results in the student’s dismissal.

**Repetition of Courses**

For admission to the school, grades in all courses taken and retaken are included in the grade-point average. All grades are considered for calculation of honors and awards.

**Transfer of Credit**

CredTran (http://credittransfer.ku.edu/) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Only transfer grades of C or higher apply toward graduation at KU.

**Graduate University Regulations**

For information about university regulations, see Regulations (p. 14). For Graduate Studies regulations, see Office of Graduate Studies, Medical Center Campus (p. 2554) section of this catalog.

**Academic Forgiveness**

Academic forgiveness does not apply in the School of Nursing.

**Credit/No Credit**

Graduate students may select the Credit/No Credit option for courses that do not fulfill a degree requirement, but this option may be limited in certain programs. Students should follow the policy outlined in the University Senate Rules and Regulations, Section 2, article 2.27, and contact the department or program for more information.

**Nursing (Graduate) Courses**

**IPHI 820. Program, Project, and Communication Planning. 2 Hours.**

Strategies to promote program, project, and communication planning are presented and applied by the student. Communication strategies for informing, guiding, and persuading clients, health care providers, payers, and other stakeholders to advance program and project development are discussed. The use of evolving information technologies to improve program, project and communication planning is emphasized. Prerequisites: Corequisite: NRSG 880, or consent of instructor, LEC.

**IPHI 850. Introduction to Health Informatics. 2-3 Hours.**

This course provides a broad survey of health informatics focused on five themes: health informatics foundations; clinical decision support; human factors/organization factors; public health informatics and current issues in health informatics including best practices. Students may register for either 2 or 3 credit hours. Students enrolled for 3 credit hours will develop and demonstrate a practical, innovative small-group health informatics project from one of a set of faculty recommended projects or from a student-proposed idea, in addition to course requirements expected within a 2 credit hour enrollment. LEC.

**IPHI 851. Transforming Health Care through Use of Information Systems and Technology. 3 Hours.**

Includes 2 credit hour lecture and 1 credit hour practicum. The application of the information system development life cycle in the design, selection, and implementation of health information technology applications will be examined. Human computer interactions and emerging technologies will
be explored for their impact on patient care and safety. The role of legal, regulatory, ethical and security issues will be discussed as they apply to clinical and consumer information technologies. Prerequisite: Consent of Instructor. LEC.

IPHI 852. Health Data: Theory and Practice. 3-4 Hours.
Includes 2 credit hour lecture and 1-2 credit hour practicum. Principles of database theory, modeling, design and manipulation will be introduced. Students will have experience using a relational database management system. Database manipulation will be explored using structured query language (SQL) to compose and execute query statements and critically evaluate the results. Prerequisite: None. LEC.

IPHI 853. Abstraction and Modeling of Healthcare Information. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The information system development life cycle process is presented with emphasis on determination and analysis of information system requirements and system design that meet the identified health care information requirements. Object-oriented techniques will be introduced, including Unified Modeling Language and Unified Modeling Methodology, to facilitate process analysis and design proposal development. Prerequisite: IPHI 820 and consent of instructor. LEC.

IPHI 854. Knowledge Management in Healthcare. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. Knowledge management is the creation, communication, and leveraging of a healthcare organization's knowledge assets. Defining knowledge, describing the knowledge creation cycle, and the identification of the knowledge worker and his/her impact on the organization are discussed. Information technology and communities of practice are presented in a balanced approach supporting a systematic viewpoint of the knowledge management process. Knowledge management theory is enhanced with the performance of a knowledge audit and the development of knowledge management tools. (Same as NRSG 854.) Prerequisite: IPHI 820 and consent of instructor. LEC.

IPHI 856. Health Informatics Practicum. 1-3 Hours.
In collaboration with healthcare information faculty, preceptors, students design an experience to facilitate application of theories and research related to health care informatics. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. Prerequisite: All Specialty Core, Leadership Core, IPHI 853, Abstraction and Modeling of Health Care Information, IPHI 852, Health Data: Theory Practice. Prerequisite or Co-requisite: IPHI 854, Knowledge Management in Healthcare, IPHI 851, Topics in Health Care Informatics, IPHI 860, Research Project in Nursing, or consent of instructor. LEC. LEC.

IPHI 860. Research Project. 2 Hours.
Students will conduct a health informatics research project. A research report, designed artifact, or other appropriate deliverable will be developed. Prerequisite: A research course and two informatics core courses, or consent of instructor. The research project must meet research guidelines for the MS Informatics program. LEC.

IPHI 957. Health Informatics, Human Factors, and Ergonomics as Applied to Patient Safety. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The use of information systems including medical devices is paramount in achieving patient safety. Students will attain an inclusive understanding of how human factors and ergonomic principles can be used to improve patient safety in the design, implementation, and evaluation of information systems and medical devices. Additionally, health care professionals will acquire skills to appropriately apply error reduction strategies developed in high reliability organizations. Prerequisite: Consent of instructor. LEC.

IPHI 958. Knowledge Representation and Interoperability. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The need to exchange clinical information consistently between health care providers, care settings, researchers and other requires syntactic and semantic interoperability. Requirements and approaches to meet interoperability will be explored. Standards for messaging, terminology, and knowledge representation will be investigated. Prerequisite: Consent of instructor. LEC.

Nursing (Graduate) Courses

NRSG 700. Analysis of Variance for Nursing Research. 2 Hours.
In this course, students will learn appropriate analytic approaches for experimental and quasi-experimental research designs. Basic statistical foundations such as distributional assumptions and hypothesis testing will be reviewed. Essential statistical concepts, including effect size, power and sample size, and error rates will be discussed in the context of experimental designs. The core focus of the course will be a general linear model approach to analysis of variance (ANOVA) methods including one-way ANOVA, contrasts and post hoc tests, factorial designs, analysis of covariance (ANCOVA), and repeated measures ANOVA. Applications of methods for nursing and healthcare research will be examined. Prerequisite: Graduate level introductory statistics course or consent of instructor. LEC.

NRSG 722. Scholarly Writing for the Health Professional. 3 Hours.
Development of scholarly writing skills is emphasized to promote professional communication and to enhance professional image. Students enrolled in this interdisciplinary course analyze their own and others' writing to improve their written communications. Writing skills are practiced and developed by critiquing published articles, and by preparing written memorandums, letters, abstracts, and a manuscript. Legal and ethical issues related to the publication process are explored. Prerequisite: Admission to the graduate program, or consent of instructor. LEC.

NRSG 731. Pharmacokinetics and Pharmacodynamics for Advanced Practice Nursing. 1 Hour.
General principles of pharmacology, including pharmacokinetics and pharmacodynamics, are discussed in preparation to prescribe. The principles for decision making about drug selection, use and monitoring are examined. Prerequisite: Corequisite: Admission to the graduate program, or consent of instructor. LEC.

NRSG 748. Theories for Practice and Research. 3 Hours.
Theory development and analysis techniques provide the framework for the study of concepts and theories from nursing and related disciplines. Particular emphasis will be placed on the relationship of theory and research in the development of nursing knowledge to support evidence-based practice. This course will enhance the decision-making skills for choosing and using concepts and theories that guide practice. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.

NRSG 754. Health Care Research. 3 Hours.
This course will enable the student to synthesize nursing knowledge and make recommendations to translate research findings into practice within diverse health care settings. Research methods, processes and findings for use in practice will be critically evaluated. Emphasis will be placed on formulating relevant research questions from theory and practice. Prerequisite: Admission to the graduate nursing program, Graduate Statistics, or consent of instructor. LEC.
NRSG 755. Professionalism in Advanced Nursing Practice. 3 Hours.
An analysis of economic, political, legal, ethical, professional, societal and cultural issues is conducted within the context of advanced nursing practice. Application of concepts essential to understanding, influencing and leading change in health care delivery specific to advanced nursing practice is emphasized. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.

NRSG 801. Advanced Health Assessment and Clinical Reasoning. 3 Hours.
The purpose of this course is to develop knowledge and skills for advanced clinical nursing practice, including comprehensive history and physical exam across lifespan. Content on special populations, communication with patients and care teams, cultural considerations, health promotion and prevention, and use of electronic health records will be discussed with opportunity for application. Prerequisite: Corequisite: NRSG 812: Advanced Pathophysiology, or permission of course faculty. LEC.

NRSG 802. Methods for Qualitative Research. 3 Hours.
The naturalistic paradigm and various qualitative research approaches such as ethnography, phenomenology/hermeneutics, historiography, grounded theory and/or others are explored. Emphasis is placed on the appropriateness of each approach for description and explanation of phenomena encountered in clinical, organizational, and educational settings. Experience is provided in problem formulation and development of qualitative research proposal. Prerequisite: NRSG 804 or NRSG 945, or consent of the instructor. LEC.

NRSG 803. Introduction to Clinical Research. 1 Hour.
This course will provide a comprehensive overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical research among the various institutional entities involved with clinical research at the University of Kansas Medical Center such as the Research Institute (RI), General Clinical Research Center (GCRC) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on how to apply for funding (grantsmanship), critical appraisal of research studies, and how to present research data. Prerequisite: Consent of instructor. LEC.

NRSG 804. Interpreting Research for Applied Science. 3 Hours.
Research relevant to therapeutic intervention comes from a variety of disciplines involving varied research designs and analysis strategies. Students in this course will examine selected research studies and gain skill in analyzing methods and results as well as in applying research findings to practical problems. Students also will design their own research project reflecting their area of interest. Prerequisite: Corequisite: NRSG 748, 754, and 755 or consent of instructor. RSC.

NRSG 805. Understanding Disability through Mass Media. 2 Hours.
This class is an overview of how mass media frames disability for the public. This course will focus on issues related to disability and the mass media representation including journalism, TV, film, advertising and the internet. Topics discussed will be the various models of media representation of disability, the impact of stigma in mass media imagery, the impact of cultural and media representations on the experiences of people with disabilities, content created by and for people with disabilities, news about disability rights in the US society, and "hidden" disabilities. Also considered will be the healthcare response to these images and to people with disabilities. The course will be offered online in a synchronous format. Prerequisite: Consent of instructor. LEC.

NRSG 806. Advanced Physiology. 3 Hours.
A course designed to lead to an advanced comprehension of the physiology of organ systems in the human in both cellular and organ processes. Physiology subject matter relevant to clinical health sciences include membrane transport, muscle, cardiovascular, respiratory, renal, gastrointestinal, neurological, and endocrine function. Cellular mechanisms include the structure and function of ion channels and pumps, mechanisms of calcium regulation, excitation-coupling processes. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NRSG 807. Genetics in Primary Care. 2 Hours.
This course is designed to give the primary care nurse practitioner and other graduate nursing students a foundation in medical genetics. The basics of genetics, common genetic disorders and genetic testing are discussed. The application of this knowledge to counsel individuals at risk for genetic disorders is emphasized through the use of case studies. Ethical, legal and clinical practice issues and perspectives of primary care counseling in genetics are addressed. Prerequisite: Admission to the Graduate Nursing Program or Consent of Instructor. LEC.

NRSG 808. The Social Context for Health Care Policy. 2 Hours.
Using a local/single clinical issue students examine ways to abstract this issue into a social policy context. Local exemplars are used throughout the course to demonstrate the leadership and structural systems required to effect change in policy. Strategies to identify constituencies and build coalitions are studied. Prerequisite: NRSG 755, or consent of instructor. LEC.

NRSG 809. Health Promotion and Complementary Therapeutics. 3 Hours.
Current trends in health promotion and clinical preventive care across the lifespan are examined. Specific guidelines for assisting clients to maintain/improve health and/or prevent illness are reviewed. Attention is given to the roles of the health care provider and care recipient in screening, communication, and counseling. The use of complementary (non-pharmacological) therapeutics in assisting clients to achieve goals of health promotion is examined. The recommendation and use of non-pharmacological interventions will be evaluated based on research findings related to selection of therapeutics and measurement of expected outcomes following use of a particular intervention. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.

NRSG 812. Advanced Pathophysiology. 3 Hours.
Course focus is the in-depth scientific knowledge base relevant to selected pathophysiological states confronted in advanced nursing practice. This information provides a foundation for clinical assessment and the formulation of decisions related to clinical diagnosis and the management of therapeutic regimens. Age specific and developmental alterations are correlated with clinical diagnosis and management. This information provides a foundation for clinical assessment and the formulation of decisions related to clinical diagnosis and management. Application of concepts essential to understanding, influencing and leading change in health care delivery specific to advanced nursing practice is emphasized. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NRSG 813. Advanced Pharmacology. 3 Hours.
The clinical application of specific categories of drugs, commonly encountered in primary care settings is discussed. The use of protocols, prescription writing, and the ethical/legal, and economic issues surrounding the advanced nurses' role in prescribing and monitoring pharmacologic therapies in the ambulatory setting are explained. Factors such as age-appropriate content related to pharmacokinetics, dosages, expected outcomes, and side effects of the drugs are discussed. First line versus second line drugs, alternate drugs, drug interactions, adjusting drug dosages, patient education, and compliance issues related to drug
therapy are addressed. The nurse's role and responsibility related to data collection, problem identification, and consultation with the physician is explored. Application is made through age-appropriate case studies. Prerequisite: NRSG 812 Advanced Pathophysiology or consent of instructor. LEC.

NRSG 820. Program, Project, and Communication Planning. 2 Hours. Strategies to promote program, project, and communication planning are presented and applied by the student. Communication strategies for informing, guiding, and persuading clients, health care providers, payers, and other stakeholders to advance program and project development are discussed. The use of evolving information technologies to improve program, project and communication planning is emphasized. Prerequisites: Corequisite: NRSG 880, or consent of instructor. LEC.

NRSG 821. Clinical Dynamics and Interventions in Diabetology. 3 Hours. A complexity science framework is used to discuss current and innovative concepts and trends in the care of person with diabetes. The disease process of diabetes, preventive measures, complications, pharmacologic, technologic, lifestyle interventions and self-management techniques based on current evidence are presented and analyzed in relations to care of persons with diabetes across age groups and in different settings. Consideration is given the complexity of the co-morbidities that accompany diabetes as well as the special approaches to age appropriate treatment and cultural diversity factors that influence care. External barriers that contribute to decrease in quality outcomes are analyzed and innovative solutions are proposed. Prerequisite: NRSG 801, NRSG 813, or Consent of Instructor. SEM.

NRSG 823. Research Clinical Trial Management: Pre-Study Activities. 3 Hours. This course is designed as an introduction to the research clinical trial manager role and provides in-depth knowledge of Pre-Clinical Trials Study activities. Regulatory, administrative, and ethical issues will be presented as well as the daily operational requirements (study design, financial aspects, protocols, hiring of personnel, subject recruitment, etc.) to begin a study. Included is the development of training skills for the Clinical Trial manager for critiquing sample protocols and for assessing adequate resources for implementation of protocol. Prerequisite: RN Licensure, graduate level, or consent of instructor. LEC.

NRSG 824. Research Clinical Trial Management: During Study Activities. 3 Hours. This course is designed as an introduction to the research clinical trial manager role and provides in-depth knowledge of During-Clinical Trial Study activities. The process of conducting the 'day-to-day' operations of a research study; subject recruitment, data collection forms and documenting subjects' responses to the interventions, audits, inspections, budget monitoring, ethical/liability situations that may occur during the study, etc. will be addressed. Included is the development of training skills for the Clinical Trial Manager that is involved in conducting the 'day-to-day' operations of the research study. Prerequisite: NRSG 823, or consent of instructor. LEC.

NRSG 825. Research Clinical Trial Management: Post-Study Activities and Practicum Experience. 3 Hours. This course provides an introduction to the research manager role and provides in-depth knowledge of Post-Clinical Trial Study activities. The process of conducting the 'day-to-day' operations of a research study, preparing for final sponsor and FDA visits, preparing final reports to the sponsor and IRB; evaluating sponsor, site and team members' performance; management of data and preparing summary reports, etc. will be addressed. The course provides the student with a Research Manager practicum experience in selected research setting. Opportunities are provided to utilize learned details related to the role of a Research Manager during key phases of a Clinical Trial Study; pre-study, during-study, and at the end-study activities. Prerequisite: NRSG 824, or consent of instructor. LEC.

NRSG 826. Global Perspective and Diversity in Healthcare. 2 Hours. Cultural receptivity is integrated into the collaboration, development, and implementation of health programs at the local, national, and international level. Frameworks that emphasize the meanings of health and healthcare; prevention and management; and related ethical, economic, and social justice concerns are introduced. Students partner with a community of interest to understand their health and illness beliefs, identify barriers to healthcare access, integrate the historical, social, political and economic forces that impact healthcare. Together they plan and implement appropriate strategies to influence positive community outcomes. Prerequisite: NRSG 880, or consent of instructor. LEC.

NRSG 827. Advanced Concepts Public Health Nursing. 2 Hours. Public health is addressed in terms of common values and interests as well as particular client populations (vulnerable and at risk groups) across the lifespan. Health promotion and disease prevention for whole communities and selected vulnerable and at risk aggregates are emphasized. Ethical and social justice concerns as well as public policy and legislative issues in population-focused health care are discussed. Selected models, concepts, theories, and research in public health provide the framework for identifying, exploring, prioritizing and planning interventions for public health concerns. Ultimately, a grant proposal is developed to support the action plan. Prerequisite: Corequisite: NRSG 754, NRSG 755, NRSG 809, NRSG 820, NRSG 880, NRSG 885, PRVM 800. Prerequisite/Corequisite: NRSG 808, NRSG 826 PRVM 830. Corequisite: NRSG 828, or consent of instructor. LEC.

NRSG 828. Public Health Nursing: Practicum I. 3 Hours. Students are provided with an opportunity to explore advanced practice roles within the context of public health needs. Based on each student's goals and interests, health related needs of an identified population are assessed, analyzed, and synthesized; and a plan of action proposed. Prerequisite: Corequisite: NRSG 827, or consent of instructor. LEC.

NRSG 829. Public Health Practicum. 3 Hours. Students will complete an intensive practicum in a community/public health setting. Prerequisite: NRSG 827, NRSG 828 or Consent of Instructor. LEC.

NRSG 833. Managing Clinical Research Projects. 3 Hours. This course is designed to help nurses develop in-depth knowledge of good clinical practices and federal regulations, as well as to develop a strong foundation for the management of clinical research program. Regulatory, administrative, and ethical issues will be presented as well as the daily operational requirements of managing a clinical research office. Completion of this course prepares one for clinical research professional national certification. Prerequisite: NRSG 825 or Consent of Instructor. LEC.

NRSG 839. Global Perspectives and Diversity in Healthcare: Practicum. 2 Hours. Students will have the opportunity to integrate concepts and theories of global health and diversity by direct program planning, delivery, and evaluation of care activities with a vulnerable population. Students will partner with a community of interest to provide directed advanced nursing care and leadership activities via individual/population/organizational assessment, intervention, and evaluation. Emphasis will be placed on building cultural competence with an understanding of the historical, social, political, and economic forces of health within a specific community setting or geographic area. The worldview of the individual/population/
organization will be respected and integrated into all aspects of health care delivery. Prerequisite: NRSG 826 or consent of instructor. PRA.

NRSG 841. Reproductive Endocrinology. 2 Hours.
In-depth examination of the anatomy and physiologic processes of reproduction are studied, and will include normal growth and development, as well as clinical genetics. Essential information will be focused on understanding of the reproductive hormones and regulation of the menstrual cycle. With a complete understanding of menstrual hormone regulation, students will be better prepared to apply concepts to alterations that are encountered with maturation/development, puberty, pregnancy, lactation, menopause, and management of common gynecological needs (such as contraception). Prerequisite: NRSG 812 or Consent of Instructor. LEC.

NRSG 842. Topics in Mental Health Nursing. 1-5 Hours.
Investigation of issues and psychiatric mental health problems relevant to a selected population in mental health nursing. Prerequisite: Consent of instructor. LEC.

NRSG 844. Advanced Psychiatric Assessment. 3 Hours.
Advanced psychiatric assessment of children, adults and the elderly will be covered, including conducting patient-centered, culturally competent interviews in simulated situations. Epidemiology of psychiatric disorder is addressed. Assessment for psychiatric diagnoses of substance abuse, mood and anxiety disturbances, psychosis, dementia and disorders arising in childhood and adolescence are emphasized. Assessment of dangerous behaviors and crisis intervention is covered. Prerequisite: Corequisite: NRSG 801, or consent of instructor. LEC.

NRSG 850. Mental Health Assessment of Infants, Children and Adolescents. 3 Hours.
This is an advanced course in infant, child and adolescent mental health assessment development for those individuals who desire to gain greater knowledge and understanding of complex mental health issues in children, adolescents and their families. The course focus is to identify deviations between normal and abnormal development. Identification of environmental and social determinates will be examined. Recognition of pre-birth risk factors affecting children and protective measure that promote positive growth and development will be discussed. Assessment tools and strategies for effective assessment will be reviewed. Emphasis on the legal and ethical issues regarding safety and well-being of children and families will be addressed. Prerequisite: NRSG 748, or consent of instructor. LEC.

NRSG 851. Psychopharmacology for Advanced Nursing Practice. 3 Hours.
Understanding of the neuron, neurotransmitter and receptor functioning as the basis for psychopharmacotherapy is emphasized in developing the knowledge for prescribing and monitoring psychotropic medications for clients diagnosed with psychiatric disorders. The major classes of psychotherapeutic drugs, their mechanism of action, metabolism, interaction, adverse and side effects are discussed. Drug development is reviewed and ethical and legal issues involved in prescribing across the lifespan are covered. Knowledge is applied to case studies that include differentiating drugs, dosages and response to clients’ internal environment, racial/ethnic background, and age. Prerequisite: NRSG 844 or equivalent; or consent of instructor. LEC.

NRSG 853. Abstraction and Modeling of Healthcare Information. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The information system development life cycle process is presented with emphasis on determination and analysis of information system requirements and system design that meet the identified health care information requirements. Object-oriented techniques will be introduced, including Unified Modeling Language and Unified Modeling Methodology, to facilitate process analysis and design proposal development. Prerequisite: NRSG 820 or Consent of Instructor. LEC.

NRSG 854. Knowledge Management in Healthcare. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. Knowledge management is the creation, communication, and leveraging of a healthcare organization’s knowledge assets. Defining knowledge, describing the knowledge creation cycle, and the identification of the knowledge worker and his/her impact on the organization are discussed. Information technology and communities of practice are presented in a balanced approach supporting a systematic viewpoint of the knowledge management process. Knowledge management theory is enhanced with the performance of a knowledge audit and the development of knowledge management tools. (Same as IPHI 854.) Prerequisite: NRSG 820 or consent of instructor. LEC.

NRSG 856. Health Informatics Practicum. 1-3 Hours.
In collaboration with healthcare information faculty and preceptors, students design an experience to facilitate application of theories and research related to health care informatics. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. Prerequisite: All Common Core, Leadership Core, NRSG 853, NRSG 858. Prerequisite/Corequisite: NRSG 854, NRSG 855, NRSG 898, or consent of instructor. LEC.

NRSG 857. Transforming Health Care through Use of Information Systems and Technology. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The application of the information system development life cycle in the design, selection, and implementation of health information technology applications will be examined. Human computer interactions and emerging technologies will be explored for their impact on patient care and safety. The role of legal, regulatory, ethical and security issues will be discussed as they apply to clinical and consumer information technologies. Prerequisite: Consent of Instructor. LEC.

NRSG 858. Health Data: Theory and Practice. 3-4 Hours.
Includes 2 credit hour lecture and 1-2 credit hour practicum. Principles of database theory, modeling, design and manipulation will be introduced. Students will have experience using a relational database management system. Database manipulation will be explored using structured query language (SQL) to compose and execute query statements and critically evaluate the results. Prerequisite: None. LEC.

NRSG 859. Introduction to Health Informatics. 2-3 Hours.
This course provides a broad survey of health informatics focused on five themes: health informatics foundations; clinical decision support; human factors/organization factors; public health informatics and current issues in health informatics including best practices. Students may register for either 2 credit hours or 3 credit hours. Students enrolled for 3 credit hours will develop and demonstrate a practical, innovative small-group health informatics project from one of a set of faculty recommended projects or from a student-proposed idea, in addition to course requirements expected with a 2 credit hour enrollment. Prerequisite: Consent of Instructor. LEC.

NRSG 870. Designing a Student Learning Environment. 3 Hours.
The roles of both the educator and student in designing a learning environment provide the framework for analyzing pedagogical philosophies, theories, ethical/legal issues, and research related to teaching strategies and education. The interprofessional focus is on best practices and research-based strategies to promote various learning styles and create an active learning environment that increases learning.
student retention and learning success for diverse, multicultural student populations. Attention will be given to the relationship between the setting, methodologies of clinical teaching, and the assessment of competencies. Prerequisite: NRSG 748, NRSG 754, or consent of instructor. LEC.

NRSG 871. Curriculum/Program Planning and Evaluation. 3 Hours. Philosophies, methods, and processes of curriculum and instruction in health professions’ education provide the framework for discussing curricular and program planning theories/models, resources for decision making, research, and evaluation methods that create a learner-centered environment. Attention is given to frameworks for program evaluation, methods of data collection, and the ethics and standards of evaluation practice. The influence of societal trends, and current health professions issues relevant to curriculum planning are addressed. Emphasis is on strategies for anticipating future societal needs and developing educational curriculum to meet those needs. Matters of diversity, inclusion, interprofessional practice, workforce development, and ethics/legal issues in curriculum planning and education also are included. Prerequisite: NRSG 748, NRSG 754, or consent of instructor. LEC.

NRSG 872. Topics in Nursing Education. 1-5 Hours. Investigation of special issues or problems relevant to appropriate client systems (client, family, and student or health care professional) in Nursing Education. Prerequisite: Consent of instructor. LEC.

NRSG 873. Teaching with Technologies. 3 Hours. Theories and trends that support the use of merging and emerging technologies for the enhancement of teaching and learning in the health professions are explored. The focus is on assisting educators to gain skills in choosing appropriate instructional technologies to enhance learning. Learning variables, including the environment context, interprofessional education, finance, policy, and the influence of those variables on technologies are examined. The evaluation and impact of current technology on the delivery of education are examined along with strategies for considering/anticipating future technologies to meet educational needs. Prerequisite: NRSG 748, NRSG 754 or Consent of Instructor. LEC.

NRSG 874. Health Professions Educator Preceptorship. 3 Hours. The role components of the health professions educator are implemented with a preceptor in selected educational settings. Opportunities are provided to utilize teaching and learning strategies, research findings, and evaluation methods with diverse students. Professional issues, educational trends, changing role of the educator, and self-assessment are incorporated in accompanying modules. Prerequisite: NRSG 870, NRSG 871, NRSG 873. LEC.

NRSG 877. Foundations in Education and Learning. 3 Hours. Foundations and applications of education and evaluation strategies for teaching and learning in academic, clinical, research, and organizational settings are explored. Scholarly evidence from a variety of sources is used to develop educational processes, products, and evaluation strategies. Students acquire knowledge to support professional development and employ research skills as educators in diverse teaching environments with diverse learners. Prerequisite: Admission to the Doctoral Program, or Consent of Instructor. LEC.

NRSG 878. Clinical Radiology for the Advanced Practice Nurse. 2 Hours. A complexity science framework is used to present the basic and advanced technical aspects of radiological tests used in the care of adult and pediatric patients in the diagnostic work up of the etiology of the health problem. The science that forms the basis for all plain (cathode) films as well as computerized scanning and magnetic resonance imaging tests is covered in the course. The emphasis is on the appropriate choice of radiological tests in the work-up of the patient’s health problem. Also, advanced practice nurses will learn a framework for evaluating the findings of the radiological test, and the clinical implications of the findings. Prerequisite: Corequisite: NRSG 818, or NRSG 868, or NRSG 869, or NRSG 849, or NRSG 840, or consent of instructor. SEM.

NRSG 880. Organizational Foundations for Leading Change. 3 Hours. Self-discovery as a foundation for professional development while exploring the concepts of leader, manager and follower is emphasized. Analysis and prediction of an organization's stages of development and its capacity for linear and social change are introduced through the lens of complexity science. Political, legal, ethical and other issues that constrain and destabilize organizations and strategies to restore equilibrium are explored. (Same as HPM 840.) Prerequisite: NRSG 748, or consent of instructor. Prerequisite/Corequisite: NRSG 755. LEC.

NRSG 881. Applied Budgeting and Finance. 3 Hours. Leaders apply basic principles associated with program, project and service-line fiscal management, price setting, budget preparation, cost-benefit/break-even analysis, managed-care contracting, and interpreting financial ratios while concurrently acquiring a financial vocabulary to communicate with various stakeholders. Financial reports such as balance sheets, budget forms and expense reports are studied and formulated related to government agencies, small clinical operations, grant-funded projects, and start-up programs. Staffing models and the staffing-quality equation are analyzed for the purpose of projecting human resource requirements. Prerequisite: NRSG 880, HPM 822, or Consent of Instructor. LEC.

NRSG 882. Introduction to Operations. 3 Hours. Examines performance of health care organizations, sources of variation, methods of measurement, and strategies for improving performance. Considers several approaches to performance improvement and examines tools widely used in operations management. Incorporates lecture, discussion, and fieldwork. (Same as HPM 850.) Prerequisite: NRSG 754 or NRSG 880 or equivalent course; or consent of instructor. LEC.

NRSG 883. Complexity Science Approaches to Improve Organizational Effectiveness. 3 Hours. This course introduces complexity science principles with the aim of improving the quality and effectiveness of healthcare organizations. Traditional approaches to quality improvement will be contrasted with tools and metrics that can be applied in complex organizations. Principles that relate to embeddedness, diversity, distributed control, co-existence of order and disorder, nonlinearity, inability to predict, emergence, and functioning at the edge of chaos will be introduced. Prerequisite: NRSG 880, or consent of instructor. LEC.

NRSG 884. Topics in Organizational Leadership. 3 Hours. Investigation of current and futuristic issues and trends relevant to organizational leadership. LEC.

NRSG 885. Evaluation and Analysis for Healthcare Effectiveness. 2 Hours. Systematic approaches for analyzing and evaluation processes of care delivery and their impact on client populations, organizational processes, and communities are considered. Research concepts and methods are used in a systems context. Program evaluation, performance improvement, and other methods of measuring outcomes are examined for their utility within the health care setting. Linkages between program evaluation and regulatory policy are studied. Prerequisite: NRSG 754. Prerequisite/Corequisite: NRSG 880 or Consent of Instructor. LEC.

NRSG 886. Organizational Leadership Practicum. 1-3 Hours. The knowledge, skills, and abilities learned throughout the course of study are integrated in this practicum experience designed to develop
NRSG 889. Grant Writing. 3 Hours.
All aspects of preparing grant applications are covered. This includes writing an actual grant application containing all the usual elements of grants--budgets, biosketches, resources, and scientific text. In addition, different funding agencies, building research teams, the review process, responding to reviewers, and resubmitting grants will be covered.
Prerequisite: Appropriate research methods and statistics courses in the student's current graduate program (at least 2 statistics courses, one including content of multiple regression), and permission of instructor. For students in the Outcomes Management and Research Concentration: prerequisites: HPM 821 or PRVM 800. Same as ANAT 869 and HPM 788. LEC.

NRSG 890. Independent Study in Nursing. 1-5 Hours.
Intensive study in an area of interest with experiences selected according to the student's written purposes, conceptual framework, objectives and evaluation (1-5 credit hours). Appropriate prerequisite courses, as determined by the Independent Study faculty advisor, must be completed. LEC.

NRSG 891. Human Resources and Workforce Development. 3 Hours.
The focus of this course is to understand the leadership functions of human resource management in organizations to create a competitive edge through employee empowerment. Core human resource concepts are introduced and applied to optimize human capital within a variety of healthcare settings, including compensation and benefits, employee recognition, and employee/labor relations. National, regional and local strategies and workforce trends are discussed related to best practices for the selection, retention, and management as a healthcare employer of choice. Prerequisite: All Leadership Core Courses, or consent of instructor. Same as HPM 854. LEC.

NRSG 892. Independent Study in Nursing Practicum. 1-5 Hours.
Intensive practicum in a specified area of interest with experiences selected according to aims that are mutually agreed upon by faculty and student. Prerequisite: None IND.

NRSG 893. Preparing for Healthcare Practice in Rural Communities. 2 Hours.
Establishing and maintaining healthy rural communities is dependent on preparation of the rural healthcare workforce. This includes professionals living and working in rural communities as well as distant providers who contribute services and/or support through telehealth. Students will explore broad patterns of health and illness in rural communities, evaluate resources and develop advanced strategies to meet the diverse needs of rural communities. Prerequisite: Prerequisites: NRSG 748, NRSG 754, NRSG 809, or Consent of Instructor. LEC.

NRSG 895. Grant Writing for Nursing Science. 1 Hour.
All aspects of preparing grant applications are reviewed including developing the purpose, aims, approach, methods, budget, biosketch, and resources and facilities. In addition, the importance of building a research team and identifying suitable funding agencies will be covered. Prerequisite: Prerequisite: None. Corequisite: NRSG 896. LEC.

NRSG 896. Grant Writing Application. 2 Hours.
The student will work with their faculty research mentor to develop a federal level grant application (NIH, HRSA, AHRQ, or foundation) in preparation for submission. The funding proposal will be developed in conjunction with the NRSG 895 Grant Writing for Nursing Science course that provides information related to grant application structure and key issues. The mentor will provide content expertise and will work with the student to develop the specific content for a grant application. The final product will be a grant proposal suitable for submission. Prerequisite: Current enrollment in the PhD in Nursing program, or Consent of Instructor. Corequisites: NRSG 895. LEC.

NRSG 898. Research Project in Nursing. 2 Hours.
Portions of the research process in an area of nursing are implemented. Emphasis is placed on experiential knowledge of the actual conduct of research. The student selects one of several research activities and reports on the project. Prerequisite: NRSG 754 plus either one advanced practice or one administration track course, or consent of instructor. LEC.

NRSG 899. Thesis. 1-6 Hours.
Prerequisite: NRSG 754, and one core track course. THE.

NRSG 901. Primary Care I: Adult-Gerontology Health. 3 Hours.
The first of two core specialty courses using a systems approach that emphasizes a multi-dimensional and interprofessional approach to assessment, differential diagnosis and treatment formulation for the health care needs of adults across the life span in multiple care settings. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis and management of common episodic, chronic, and complex conditions affecting health. Students develop skills in critical thinking, analysis and synthesis of data from a variety of sources, and use of evidence-based practice guidelines in diagnosing and managing health care needs. In addition to cultural spiritual diversity, students learn how patient preferences in health care decision making are incorporated in a focus on person-centered care. Prerequisite: NRSG 801, NRSG 812, and NRSG 813. LEC.

NRSG 902. Primary Care II: Adult-Gerontology Health. 3 Hours.
The second of two core specialty courses using a systems approach that emphasizes a multi-dimensional and interprofessional approach to assessment, differential diagnosis and treatment formulation for the health care needs of adults across the life span in multiple care settings. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis and management of common episodic, chronic, and complex conditions affecting health. Students develop skills in critical thinking, analysis and synthesis of data from a variety of sources, and use of evidence-based practice guidelines in diagnosing and managing health care needs. In addition to cultural spiritual diversity, students learn how patient preferences in health care decision making are incorporated in a focus on person-centered care. Prerequisite: NRSG 901 or consent of instructor. LEC.

NRSG 903. Primary Care Practicum I: Adult/Gerontology - Nurse Practitioner. 2 Hours.
This is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the adult-gerontology primary care nurse practitioner as a provider of direct health care services. The patient population of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Within this role, the adult-gerontology primary care nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health
protection, disease prevention, and management focus of the adult-gerontology primary care nurse practitioner practice. Prerequisite: NRSG 902, or Consent of Instructor. PRA.

NRSG 904. Primary Care Practicum II: Adult/Gerontology - Nurse Practitioner. 4 Hours.
This is the second practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the adult-gerontology primary care nurse practitioner as a provider of direct health care services. The patient population of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Within this role, the adult-gerontology primary care nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the adult-gerontology primary care nurse practitioner practice. Prerequisite: NRSG 903 or Consent of Instructor. PRA.

NRSG 905. Primary Care Practicum III: Adult/Gerontology - Nurse Practitioner. 4 Hours.
This is the final practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the adult-gerontology primary care nurse practitioner as a provider of direct health care services. The patient population of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Within this role, the adult-gerontology primary care nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the adult-gerontology primary care nurse practitioner practice. Prerequisite: NRSG 904 or Consent of Instructor. PRA.

NRSG 906. Primary Care Practicum I: Adult/Gerontology - Clinical Nurse Specialist. 2 Hours.
This is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as a clinical nurse specialist. The focus of this course is an introduction to the CNS role that includes the competencies of direct care, consultation, systems leadership, collaboration, coaching, research, and ethical decision-making related to patients, families, and patient populations. The patient population of the adult-gerontology CNS learner includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). The three spheres of CNS influence are reviewed: patient, nurse/nursing, and organization/system. Clinical activities include designing, implementing and evaluating evidence-based advanced nursing practice interventions along with measurement of outcomes; promoting and facilitating change and innovation in practice; project management; and program evaluation. Clinical practice will include comprehensive interprofessional coordination of the acute and chronic health care needs for culturally diverse populations of adults from adolescence through elder adulthood with specific systems dysfunctions. Licensure, accreditation, certification; CNS job descriptions and performance appraisals; credentialing; negotiating; place within the organization; working with the boss; role orientation; credibility; over/under commitment; finding a mentor; legislative and legal issues; and practical advice/tips from current CNSs are highlighted in this course. Prerequisite: NRSG 907 or Consent of Instructor. PRA.

NRSG 907. Primary Care Practicum II: Adult/Gerontology - Clinical Nurse Specialist. 4 Hours.
This is the second practicum course in a series of three practicum courses that prepares the student for entry into practice as a clinical nurse specialist. The focus of this course is ongoing acquisition of CNS competencies: direct care, consultation, systems leadership, collaboration, coaching, research, and ethical decision-making related to patients, families, and patient populations. The patient population of the adult-gerontology CNS learner includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Clinical activities include designing, implementing and evaluating evidence-based advanced nursing practice interventions along with measurement of outcomes; promoting and facilitating change and innovation in practice; project management; and program evaluation. Clinical practice will include comprehensive interprofessional coordination of the acute and chronic health care needs for culturally diverse populations of adults from adolescence through elder adulthood with specific systems dysfunctions. Effective communication, leading groups, difficult patient and staff situations, research, CNS practice settings, the business of CNS practice, professional development, and networking are covered in this course. Prerequisite: NRSG 906 or Consent of Instructor. PRA.

NRSG 908. Primary Care Practicum III: Adult/Gerontology - Clinical Nurse Specialist. 4 Hours.
This is the final practicum course in a series of three practicum courses that prepares the student for entry into practice as a clinical nurse specialist. The focus of this course is maximizing acquisition of CNS competencies: direct care, consultation, systems leadership, collaboration, coaching, research, and ethical decision-making related to patients, families, and patient populations. The patient population of the adult-gerontology CNS learner includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Clinical activities include designing, implementing and evaluating evidence-based advanced nursing practice interventions along with measurement of outcomes; promoting and facilitating change and innovation in practice; project management; and program evaluation. Clinical practice will include comprehensive interprofessional coordination of the acute and chronic health care needs for culturally diverse populations of adults from adolescence through elder adulthood with specific systems dysfunctions. Licensure, accreditation, certification; CNS job descriptions and performance appraisals; credentialing; negotiating; place within the organization; working with the boss; role orientation; credibility; over/under commitment; finding a mentor; legislative and legal issues; and practical advice/tips from current CNSs are highlighted in this course. Prerequisite: NRSG 907 or Consent of Instructor. PRA.

NRSG 911. Tools for Practice Doctorate Scholarship. 3 Hours.
Foundations and applications of tools and methods to develop advanced practice project proposals across diverse settings are explored. Scholarly evidence from a variety of sources is used to develop project proposals that enhance patient care, staff development, and organizational leadership. Relevant practice theories such as quality improvement and evaluation models serve as project proposal guides. Students acquire knowledge and skills to support professional development, to write advanced practice project proposals, and to advance doctoral scholarship. Prerequisite: NRSG 804, or consent of instructor. LEC.

NRSG 913. Business Strategies for Healthcare Leaders. 3 Hours.
The learner will develop advanced leadership skills focusing on business strategies in a variety of healthcare and industry settings in the private and public sector. Through application, analysis, synthesis and evaluation methods, using a variety of approaches to modern day business
challenges, the learner is positioned to gain a high-level, mind-raising attitude about how to think differently in addressing organizational and business problems, and supporting organizational success. Prerequisite: NRSG: 808, 820, 880, 881, 882 or 883, 885, 891 HPM 822, or Consent of Instructor. LEC.

NRSG 914. Primary Care I: Family Health. 3 Hours.
The first of two core specialty courses using a systems approach that emphasizes a multi-dimensional interprofessional approach to assessment, differential diagnosis and treatment formulation for the primary care needs of individuals and families across the lifespan. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis, and management of common episodic, chronic, and complex conditions affecting health. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing primary care needs. In addition to cultural and spiritual diversity, students learn patient preferences in health care decision making with a focus on person centered care. Prerequisite: NRSG 801, NRSG 812, and NRSG 813. LEC.

NRSG 915. Primary Care II: Family Health. 3 Hours.
The second of two core specialty courses using a systems approach that emphasizes a multi-dimensional interprofessional approach to assessment, differential diagnosis and treatment formulation for the primary care needs of individuals and families across the lifespan. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis, and management of common episodic, chronic, and complex conditions affecting health. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing primary care needs. In addition to cultural and spiritual diversity, students learn patient preferences in health care decision making with a focus on person centered care. Prerequisite: NRSG 914 or consent of instructor. LEC.

NRSG 916. Primary Care Practicum I: Family Nurse Practitioner. 2-4 Hours.
This is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the family nurse practitioner student as a provider of direct health care services. The patient population of the family provider includes individuals and families across the lifespan. Within this role, the family nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the family nurse practitioner practice. Prerequisite: NRSG 915 or Consent of Instructor. PRA.

NRSG 918. Primary Care Practicum III: Family Nurse Practitioner. 2-4 Hours.
This is the final practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the family nurse practitioner student as a provider of direct health care services. The patient population of the family provider includes individuals and families across the lifespan. Within this role, the family nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the family nurse practitioner practice. Prerequisite: NRSG 916 or Consent of Instructor. PRA.

NRSG 919. Foundations for Leading and Communicating in Organizations. 3 Hours.
Theoretical foundations in organizational decision making and communication will enhance students’ development of expertise in assessing organizations, identifying systems issues, and facilitating organization- and system-wide improvements in healthcare. Traditional approaches to organizing and communicating are contrasted with emerging approaches that promote sensitivity to diverse organizational cultures and populations. Through examination of theoretical perspectives, the student will develop an ability to integrate the contributions of different points of view and ways of thinking crucial to accurately assess, design and lead high performing healthcare organizations in a dynamic world. Prerequisite: NRSG 829 or 833 or 856 or 886 (Practicum respective to specialty) and NRSG 941, or consent of instructor. LEC.

NRSG 920. Microsystems in Health Care Operations. 3 Hours.
Competencies necessary for studying clinical microsystems and examining their influence on patient safety, satisfaction, and other clinical outcomes are developed in this course. Microsystems will be determined, deconstructed, analyzed for best practice, and re-constituted for the purpose of improved organizational performance. The roots of quality improvement are traced and quality improvement application within a microsystem environment is explored. Key topics include: assessment tools and models, continuous quality improvement theory, evidence-based practice, performance improvement methods (measurement, statistics, problem identification and analysis, control charts) and the development of team-based problem solving and resolution. Students examine productivity and cost indicators, strategic and operational planning, healthcare finance, relationship-building, collaboration techniques, and leadership principles. Prerequisite: Completion of graduate program in organization leadership or nursing administration, or consent of instructor. LEC.

NRSG 921. Primary Care of Women Across the Lifespan. 2 Hours.
The knowledge and skills necessary to promote health, prevent illness, and manage the primary care needs of women across the lifespan will be provided. Theory- and research-based therapeutic management of acute, episodic and chronic conditions that occur in women across the lifespan will be explored. Professional values including standards of practice, cultural, legal and ethical issues and professional roles will be addressed. The health care delivery system will be analyzed for cost effectiveness and sensitivity to women. Prerequisite: NRSG 801, NRSG 809, NRSG 812, NRSG 813, NRSG 841, or Consent of Instructor. LEC.
NRSG 922. Care of Women in the Antepartal Period. 3 Hours.
Care during the antepartal period in healthy pregnant women is presented and analyzed. Strategies focusing on risk reduction and early identification of deviation from normal during pregnancy are examined. Biopsychosocial and cultural aspects of pregnancy within the family structure are presented. Concepts of research, ethics, legal and political issues, nutrition, genetics, pharmacotherapeutics, health promotion, and selected deviations from normal are included. Prerequisite: NRSG 801, NRSG 809, NRSG 812, NRSG 813, NRSG 921, or consent of instructor. LEC.

NRSG 923. Nurse Midwifery in the Postpartum and Newborn Period. 2 Hours.
Synthesis of the nurse-midwifery philosophy for postpartum and newborn periods is conceptualized. Health maintenance for mothers and infants is explored. Research, ethics, legal and political issues, nutrition, pharmacotherapeutics, health promotion, and selected deviations from normal are included. The nurse-midwifery role in consultation, collaboration, and referral are addressed. Prerequisite: NRSG 922, or Consent of Instructor. Corequisite: NRSG 924. LEC.

NRSG 924. Nurse Midwifery in the Intrapartum Period. 3 Hours.
Nurse-midwifery care of uncomplicated women in the intrapartum period is presented and analyzed. Intrapartum and immediate postpartum complications and emergency events are addressed. Concepts of research, ethics, legal and political issues, nutrition, pharmacotherapeutics, health promotion, and selected deviations from normal are included. Prerequisite: NRSG 922 or Consent of Instructor. Corequisite: NRSG 923. LEC.

NRSG 925. Care of Women in The Antepartal Period Practicum. 2 Hours.
This clinical practicum focuses on competencies for management of pregnant women in various health care environments. Health promotion and risk reduction in pregnant women are emphasized. Management experiences in the advanced practice role include antepartal risk-assessment, consultation, collaboration, and referral when medically necessary. Prerequisite: NRSG 841, NRSG 922 or Consent of Instructor. Corequisite: NRSG 926 or Consent of Instructor. PRA.

NRSG 926. Primary Care of Women Across the Lifespan Practicum. 2 Hours.
This practicum focuses on clinical competencies for the advanced practice nurse providing primary care and gynecologic management of women throughout the lifespan. Health promotion, complementary therapies, and evidence-based models of health care delivery are incorporated in the care of women. Clinical management experiences in the advanced practice role include but are not limited to: family planning, gynecologic health, and primary care for women from adolescence through menopause. Clinical experiences will include consultation, collaboration, and/or referral when medically necessary. Prerequisite: NRSG 841, NRSG 921 or Consent of Instructor. Corequisite: NRSG 925 or Consent of Instructor. PRA.

NRSG 927. Childbearing Family Practicum: Intrapartum, Postpartum, and Newborn. 3 Hours.
Competencies for nurse-midwifery management according to national standards of practice for the care of healthy women during labor, birth, and postpartum are demonstrated; additionally, competencies for nurse-midwifery management according to national standards of practice for the care of newborns are demonstrated. The development of a skill base for intrapartum, postpartum, and newborn emergencies is addressed. Nurse-midwifery management practice provides experience in the role of care provider during normal labor, delivery, postpartum, and newborn periods. This care may include consultation, collaboration, and referral when medically necessary. Prerequisite: NRSG 923, NRSG 924. Completion of Intermediate or Advanced Fetal Heart Monitoring Course within past 3 years. Up-to-date Neonatal Resuscitation Program (NRP) certification. PRA.

NRSG 928. Nurse-Midwifery Integration Practicum. 4 Hours.
The theoretical, clinical and role components of care as delivered by the advanced nurse-midwife student are implemented through an intensive supervised clinical practicum. Advanced professional clinical skills and evidence-based practice in the assessment, management and care of women and newborns are applied. Emphasis is on increased independence and decision-making embracing the function, scope and practice of nurse-midwifery practice. Prerequisite: NRSG 925, NRSG 926, NRSG 927 or Consent of Instructor. PRA.

NRSG 929. Psychotherapeutic Interventions I: Psychiatric Mental Health Nurse Practitioner. 3 Hours.
Focus is placed on assessing vulnerabilities, social determinants and resilience as they relate to health promotion, disease prevention, symptom management, and behavior change. Mental health and common psychiatric disorders such as depression and anxiety throughout the life span are discussed. Evidence-based brief psychotherapeutic intervention frameworks including psychotherapy are applied to individuals, groups and families across the life span. Professional issues that commonly occur in implementing the advanced practice role in psychiatry and mental health care are emphasized. Prerequisite: NRSG 748, NRSG 754, NRSG 755, NRSG 801, NRSG 809, NRSG 812, NRSG 813, NRSG 844, NRSG 850, or Consent of Instructor. Prerequisite/Corequisite: NRSG 851. LEC.

NRSG 930. Psychotherapeutic Interventions II: Psychiatric Mental Health Nurse Practitioner. 3 Hours.
This theory course focuses on recovery-oriented, person-centered approaches for individuals, families, and populations with complex and persistent alterations in mental health functioning. Factors that affect mental health functioning will be explored with a focus on interventions that facilitate recovery including psychopharmacology. In addition, policies and socioeconomic factors that influence the delivery of mental health services will be analyzed. Emphasis is placed on identifying the unique role of the psychiatric mental health nurse practitioner (PMHNP) within an integrated, client-centered delivery system. Prerequisite: NRSG 929 or consent of instructor. LEC.

NRSG 931. Psychotherapeutics Practicum I: Psychiatric Mental Health Nurse Practitioner. 2 Hours.
This course is the first of three practicum courses. The focus of this clinical course is to apply theories and evidence-based findings in a clinical setting serving culturally diverse individuals, groups, and families. Students will have opportunities to conduct comprehensive psychiatric assessments, formulate diagnoses, and conduct therapy in conjunction with an interdisciplinary team. Prerequisite: NRSG 930, or Consent of Instructor. PRA.

NRSG 932. Psychotherapeutics Practicum II: Psychiatric Mental Health Nurse Practitioner. 4 Hours.
In this second of three practicum courses, students will apply recovery oriented, evidence-based frameworks such as biobehavioral, pharmacologic and psychoeducational to individuals and groups across the lifespan with complex alterations in functioning. The psychiatric mental health nurse practitioner in collaboration with interdisciplinary team members and families coordinates person-centered culturally sensitive care. Ethical principles and legal issues are identified and integrated into care. Prerequisite: NRSG 931 or Consent of Instructor. PRA.
NRSG 933. Psychotherapeutics Practicum III: Psychiatric Mental Health Nurse Practitioner. 3-4 Hours.
In this third of three clinical practicum courses, students will demonstrate integration of knowledge from previous courses in implementing the psychiatric mental health nurse practitioner role. This includes using diagnostic reasoning, evidence-based therapy, biobehavioral, and psychoeducational interventions with culturally diverse clients from different age groups. Students will implement care within interdisciplinary teams using consultation and referral as needed to deliver person-centered culturally sensitive care. Students will work with age groups needed to meet the role of psychiatric nurse practitioner across the lifespan. Prerequisite: NRSG 932, or Consent of Instructor. PRA.

NRSG 934. Foundations of Data Science. 3 Hours.
The course is designed to provide students with foundational knowledge about data science and big data. Students will learn the skills to participate on and lead interprofessional teams analyzing health and other related data to build knowledge and apply findings to practice. Topics to be examined will include diverse types and sources of data, data management techniques, exploratory data analysis approaches, and data visualization. Prerequisite: Admission to the SON PhD program, Graduate level research course (NSRG 754 or equivalent), or Consent of Instructor. LEC.

NRSG 935. Professionalism and Scholarship Workshop. 2 Hours.
Building a foundation for advanced study is explored in the context of professionalism and scholarship. Strategies for promoting professional development while preparing for future roles as nurse scholars and nurse scientists are examined. Students are introduced to a model of scholarship that includes discovery, integration, application, and teaching. Issues associated with scientific integrity in academics, research and services are identified and examined. Students are introduced to methods for conducting and synthesizing literature that is essential to the doctoral level student. Prerequisite: Admission to the Doctoral Program or Consent of Instructor. LEC.

NRSG 936. Philosophy of Nursing Science. 2 Hours.
This course examines the origins and development of western philosophy and science. Students will explore nursing knowledge from diverse philosophical perspectives as well as the natural and human sciences. Different conceptions of broad topics such as knowledge, personhood, the body, and technology will be examined for the investigation of nursing phenomena. Prerequisite: Admission to the PhD program, graduate level nursing theory course, or Consent of Instructor. LEC.

NRSG 937. Innovative Theories and Models for Nursing Science. 3 Hours.
This course explores innovative models and theories to guide nursing science. Historical foundations of theory are traced to current trends and future possibilities in theory development, application, and evaluation. Strategies for using existing theoretical knowledge for nursing science and to foster new knowledge are also examined. Prerequisite: NRSG 936 or Consent of Instructor. LEC.

NRSG 938. Informatics and Technology Applications. 2 Hours.
The field of nursing informatics and the role of the nurse to support research and evidence-based practice inquiry in a variety of organizational settings is introduced. The current state of the science in naming nursing phenomena and how these phenomena are represented in information systems is explored. The use of technology as an adjunct to doctoral-level inquiry and how it supports clinical and professional decision-making is explained and demonstrated. Prerequisite: Corequisite: NRSG 935, or consent of instructor. LEC.

NRSG 939. Precision Health. 3 Hours.
This course focuses on precision health as an emerging approach for health promotion, disease prevention and treatment that considers individual variability in genes, environment, and lifestyle (also known as the determinants of health). Students will learn to more accurately predict prevention and treatment strategies for various populations. This course will assist students in understanding the National Institute of Nursing Research (NINR) pathway to precision science that focuses on personalized strategies to prevent and manage symptoms across diverse populations and settings. Students will also learn about the vision reflected in the Precision Medicine Initiative to accelerate discoveries that can provide nurse scientists with new tools, knowledge, and therapies for individuals and populations. Prerequisite: Admission to Doctoral Program or consent of instructor. LEC.

NRSG 940. Knowledge and Theory Development in Nursing Science. 3 Hours.
The philosophical, ethical, socio-cultural, economic, and political forces that shaped the historical course of nursing science are examined. Philosophical and scientific foundations of knowledge development in nursing science are explored. Conceptual and grand theoretical development and analysis strategies are practiced. Integration of theory, research, and practice knowledge development in nursing science is emphasized. Prerequisite: NRSG 938, or consent of instructor. LEC.

NRSG 941. Preparing for Doctoral Leadership. 3 Hours.
Skills in leading, managing, and following as the doctoral graduate assumes critical roles within academia, the healthcare system, or other business entities are developed and strengthened. Through developmental exercises, theoretical and practical explorations of organizational structures and settings, and career trajectory planning, the student is poised to optimize the doctoral experience to influence social change. Prerequisite: Admission to a School of Nursing Doctoral Program or consent of instructor. LEC.

NRSG 942. Theory Application in Nursing Science. 3 Hours.
The development of middle-range theoretical structures and processes in nursing science is examined. Historical foundations of middle-range theory are traced to current trends and future possibilities in theory development, application, testing, and evaluation. Examples from nursing science and related health and social sciences are used to illustrate middle-range theory development, application, testing, and evaluation. Strategies for using existing theoretical knowledge to guide practice in diverse settings and to foster ongoing development of new knowledge are explored. Prerequisite: NRSG 940, or consent of instructor. LEC.

NRSG 943. Methods for Quantitative Research. 3 Hours.
Quantitative research methods are studied as they relate to investigation of phenomena in nursing and health care. Focus is on understanding the issues involved in generating research questions and hypotheses, designing and implementing studies to answer specific questions or test hypotheses, the logic and application of statistical inference, and the strengths and weaknesses of different approaches to quantitative methods. Prerequisite: NRSG 945, BIOS 730, BIOS 740 or equivalent, or Consent of Instructor. LEC.

NRSG 944. Quantitative Research Application. 2 Hours.
This practicum provides a research application experience in quantitative methods and seminar discussions of quantitative research issues such as scientific integrity, research implementation and management, and interpretations of statistical analyses. Students identify a research problem/question/hypothesis that may be analyzed using existing data, plan and execute appropriate analyses to answer the question or test the hypothesis, and write a formal report including a description of what was
done, why it was done, and an interpretation of the findings. Prerequisite: NRSG 943 or consent of instructor. SEM.

**NRSG 945. Synthesis Workshop I. 1 Hour.**
Leadership development and technologic applications are integrated with theoretical, statistical, and research methods. Doctoral leadership skills are refined and tested through case study simulations of theory and research applications in diverse practice settings. A qualifying examination concludes the Workshop consisting of a written and oral case study simulation. Prerequisite: BIOS 730 and BIOS 740 or equivalent, NRSG 941, NRSG 942, NRSG 946, or Consent of Instructor. Prerequisite/Corequisite: NRSG 877. LEC.

**NRSG 946. Measurement Principles and Practice. 3 Hours.**
Classical measurement theory and related measurement concepts are the focus of this course. Various approaches to instrumentation are examined. Students use existing data to evaluate selected measures, with emphasis on reliability and validity. They also critically analyze published reports of instrumentation for research. Basic knowledge of concept analysis is expected prior to enrollment. Prerequisite: NRSG 940, or consent of instructor. LEC.

**NRSG 947. Qualitative Research Application. 3 Hours.**
Students conduct fieldwork to implement a qualitative research proposal. Emphasis is placed on advanced application of various qualitative methods. Extended experience in qualitative data collection and analysis is provided. Prerequisite: NRSG 802, NRSG 945, or Consent of Instructor. LEC.

**NRSG 948. Advancing Organizational and Clinical Quality. 2 Hours.**
The roles of nursing leaders in the design, measurement, and evaluation of the discipline within a variety of organizational settings are analyzed. The nuances of measurement and statistics are compared and related to the quality science paradigm, applying incremental measurement techniques to foster continuous improvement. Process design, standards development and adaptation, regulatory requirements, and consumer expectations for quality are integrated into a quality plan that aligns with the student's career trajectory. Prerequisite: NRSG 804 or either NRSG 944 or NRSG 947, or Consent of Instructor. LEC.

**NRSG 949. Synthesis Workshop II. 1 Hour.**
Content from the full range of doctoral courses including theory, research, statistics and professional development is integrated and synthesized. Strategies for using these content areas to meet program objectives and students' professional objectives are explored. A qualifying examination, consisting of a written and oral case study simulation, concludes the Workshop. Prerequisites: Completion of all doctoral course work. Prerequisite: Corequisite: NRSG 948, NRSG 970. LEC.

**NRSG 950. Symptom Science in Nursing. 3 Hours.**
In this course, students will determine personalized strategies to identify, prevent, and treat the adverse symptoms of acute and chronic illness across diverse populations and settings. Biological and behavioral dynamics of symptoms (e.g., dyspnea, fatigue, impaired sleep/insomnia, pain, depression) that can change the trajectory of chronic illnesses, and how the dynamics can be optimized and maintained to prevent symptom relapse, will be discussed. Various innovative care delivery models (e.g. interdisciplinary, family-based), research methods (e.g. community engaged research, pragmatic trials) and technologies (e.g. eHealth) will be reviewed that can be used to improve symptom management and change the chronic illness trajectory especially among individuals who experience disparate health outcomes. Prerequisite: Admission to Doctoral Program or consent of instructor. LEC.

**NRSG 951. Biomarkers. 3 Hours.**
This course builds a foundation for doctoral students to understand how biomarkers can be used as targets for therapeutic and clinical interventions. Students will describe potential biomarkers for measures of normal biological processes, pathogenic processes, or pharmacologic responses. Biological elements ("biomarkers") associated with symptoms and symptom experiences across populations and conditions will be explored. Students are introduced to direct and indirect biomarkers and the various methods for sampling. Issues associated with sensitivity and specificity of particular biomarkers are examined. Prerequisite: Admission to Doctoral Program or consent of instructor. LEC.

**NRSG 952. Qualitative Research Methods and Application. 4 Hours.**
Qualitative methodologies, such as ethnography, phenomenology/hermeneutics, grounded theory, and their epistemological origins are explored. Emphasis is placed on the appropriateness of each approach in diverse settings. Students are guided in formulating qualitative research questions and developing component parts of a qualitative research proposal. Students complete simulated qualitative research activities to gain experience in data collection and analysis. Prerequisite: NRSG 754 Health Care Research, or admission to the doctoral program. LEC.

**NRSG 953. Quantitative Research Methods and Application. 4 Hours.**
The course is designed to provide students with knowledge and research application experience in quantitative research methods. Students will learn how research questions lead to different study designs, data collection procedures, and analyses in nursing and health care. The course focuses on content on methodological techniques and issues involved in generating research questions and hypotheses, designing and implementing quantitative studies, and analyzing and interpreting results. The course includes a quantitative research application experience provided through the exercise in planning, conducting, and interpreting analyses with existing data. Prerequisite: NRSG 946 Measurement Principles and Practice, NRSG 934 Foundations of Data Science, BIOS 730 Applied Linear Regression, or consent of instructor. LEC.

**NRSG 957. Health Informatics, Human Factors, and Ergonomics as Applied to Patient Safety. 3 Hours.**
Includes 2 credit hour lecture and 1 credit hour practicum. The use of information systems including medical devices is paramount in achieving patient safety. Students will attain an inclusive understanding of how human factors and ergonomic principles can be used to improve patient safety in the design, implementation, and evaluation of information systems and medical devices. Additionally, health care professionals will acquire skills to appropriately apply error reduction strategies developed in high reliability organizations. Prerequisite: Admission to a doctoral program in nursing, NRSG 857 or consent of instructor. LEC.

**NRSG 958. Knowledge Representation and Interoperability. 3 Hours.**
Includes 2 credit hour lecture and 1 credit hour practicum. The need to exchange clinical information consistently between health care providers, care settings, researchers and other requires syntactic and semantic interoperability. Requirements and approaches to meet interoperability will be explored. Standards for messaging, terminology, and knowledge representation will be investigated. Prerequisite: Admission to a doctoral program in nursing, NRSG 853 or consent of instructor. LEC.

**NRSG 959. Research Experience. 2 Hours.**
This practicum is an intensive research experience with a specific faculty mentor. It involves working on part of the faculty mentor's current research or on a subject closely related to the mentor's work. The student submits a proposal for this research experience to the faculty mentor. Once the project is complete, the student presents the research orally in a structured forum and, if appropriate, develops a publishable manuscript. Prerequisite: Consent of instructor. FLD.
NRSG 963. Advanced Leadership Residency. 1-9 Hours.
The advanced leadership residency is designed to expand the DNP student's breadth and depth of leadership knowledge and skills in an area of practice at the aggregate/systems/organization level. Students will have the opportunity to enhance their existing advanced leadership skills in one or more of the following areas: organizational and systems leadership for enhancing healthcare outcomes; quality improvement strategies to support decision-making; prediction and evaluation of practice outcomes; patient safety initiatives; health care policy; creating and sustaining change at organizational and policy levels; or ethics related to healthcare systems; information technology; knowledge management; or population health. Prerequisite: Corequisite: NRSG 919 and NRSG 941, or consent of instructor. PRA.

NRSG 964. Advanced Clinical Residency. 1-9 Hours.
The advanced clinical residency is designed to expand the DNP student's breadth and/or depth of clinical knowledge and skills in an area of practice. The focus can be either on the delivery of sub-specialty care services or full spectrum primary care services. Students will have the opportunity to enhance their existing advanced practice skills in one or more of the following areas: the diagnosis and management of ambulatory patients with complex diagnoses and comorbid conditions in the context of family, community and culture; the diagnosis and management of patients with complex diagnoses and/or comorbid conditions who present with acute changes in health status requiring interventions available only in an acute care setting; and the diagnosis and management of patients who are unable to function independently due to age related alteration in mental and physical status, developmental, perceptual and physical disability and chronic, degenerative illness. Students will synthesize clinical knowledge and use evidence-based decision making to construct symptom-based assessments, advanced differential diagnoses, independent therapeutic interventions, and outcome evaluation of the care of clients. Prerequisites: Corequisite: Post-BSN students: NRSG 918, or NRSG 908, or NRSG 905, or NRSG 933, or NRSG 928, or consent of instructor. Post-Master's students: A minimum of 1000 clinical hours in your current or previous work following graduation from an accredited Master's in Nursing program; National certification in your area of expertise (e.g. family, adult, psych, pediatric, CNM, etc.) CLN.

NRSG 970. Synthesis of Minor Area of Study. 1-2 Hours.
This course provides an opportunity for the PhD student to synthesize work in their selected minor. After completion of minor coursework, students will focus on synthesizing content across these minor courses. The synthesis experience culminates in a written synthesis paper in the minor area to assure the student's competency in the minor area of study. Typically, the minor coursework and the minor synthesis paper contribute directly to the student's dissertation. Prerequisite: Completion of Minor Coursework (at least 10 credit hours) and NRSG 945, or consent of instructor. LEC.

NRSG 971. Special Considerations for the Acute Care Nurse Practitioner. 1 Hour.
This course will focus on the preparation and scope of practice of the adult-gerontology acute care nurse practitioner. Concepts of the advanced practice role, primary vs. acute care, transitions of care, and age-related considerations of the adult-gerontology patient will be reviewed. Prerequisite: Consent of Instructor. LEC.

NRSG 972. Advanced Pharmacology for the Acute Care Setting. 2 Hours.
This course for acute care settings is complementary to any advanced pharmacology course for advanced practice nursing. The clinical application of specific categories of drugs commonly encountered in acute care settings is discussed. First line versus second line drugs, alternate drugs, drug interactions, adjusting drug dosages, patient education, and compliance issues related to drug therapy are addressed. The nurse's role and responsibility related to data collection, problem identification, and consultation with the physician is explored. Application is made through age appropriate studies. Prerequisite: NRSG 801, NRSG 812, NRSG 813 or Consent of Instructor. LEC.

NRSG 973. Acute Care I: Adult-Gero NP. 3 Hours.
The first of two core specialty courses using a systems approach that emphasizes a multi-dimensional and interprofessional approach to assessment, differential diagnosis, and treatment formulation for the care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRSG 971, NRSG 972, or Consent of Instructor. LEC.

NRSG 974. Acute Care II: Adult-Gero NP. 3 Hours.
The second of two core specialty courses using a systems approach that emphasizes a multi-dimensional and interprofessional approach to assessment, differential diagnosis, and treatment formulation for the care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRSG 973 or Consent of Instructor. LEC.

NRSG 975. Acute Care Practicum I: Adult-Gero NP. 4 Hours.
This is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as an acute care provider. This course is designed to prepare the adult-gerontology acute care nurse practitioner as a provider of direct health care services. The patient populations of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, and old-old adults). Within this role, the adult-gerontology acute care nurse practitioner will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states, including care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. The competencies of this course incorporate health promotion, disease prevention, and management focus of the adult-gerontology acute care nurse practitioner practice. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: Pre or Co-Req: NRSG 973 or Consent of Instructor. PRA.

NRSG 976. Acute Care Practicum II: Adult-Gero NP. 2-4 Hours.
This is the second practicum course in a series of three practicum courses that prepares the student for entry into practice as an acute care provider. This course is designed to prepare the adult-gerontology acute care nurse practitioner as a provider of direct health care services. The patient populations of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, and old-old adults). Within this role, the adult-gerontology acute care nurse practitioner will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states, including care needs of...
the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. The competencies of this course incorporate health promotion, disease prevention, and management focus of the adult-gerontology acute care nurse practitioner. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRS 975 Acute Care Practicum I: Adult-Gero NP or Consent of Instructor. Co-Req: NRS 974 Acute Care Practicum II: Adult-Gero NP. PRA.

NRS 977. Acute Care Practicum III: Adult-Gero NP. 2-4 Hours. This is the final practicum course in a series of three practicum courses that prepares the student for entry into practice as an acute care provider. This course is designed to prepare the adult-gerontology acute care nurse practitioner as a provider of direct healthcare services. The patient populations of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, and old-old adults). Within this role, the adult-gerontology acute care nurse practitioner will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states, including care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. The competencies of this course incorporate health promotion, disease prevention, and management focus of the adult-gerontology acute care nurse practitioner practice. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRS 977 Acute Care Practicum II: Adult-Gero NP or Consent of Instructor. PRA.

NRS 980. Doctor of Nursing Practice Project. 1-6 Hours. The Doctor of Nursing Practice (DNP) project is an amalgamation of the student's field of inquiry in his/her doctoral course of study. As such, the DNP project requires that a practice-focused problem be identified and examined in depth. For most students the DNP project will include application of an evidence-based intervention suitable to their area of focus (e.g. organizational leadership, clinical practice, education, etc.) that involves the appropriate metric (or sets of metrics) evaluation, and dissemination of the project findings to a targeted audience. The DNP project must meet DNP Project guidelines for the DNP program. Prerequisite: NRS 911 and completion of 2 doctoral level specialty courses, or consent of instructor. FLD.

NRS 990. Doctoral Research. 1-12 Hours. Original and independent investigation approved by and conducted under the supervision of the student's advisor or advisory committee and in partial fulfillment of the requirements for the Ph.D. degree. Prerequisite: Consent of Advisor. RSH.

NRS 997. Independent Study. 1-4 Hours. Having chosen an appropriate mentor, the student selects an area of advanced study. Specific objectives and credit hours are jointly determined by the student and selected faculty member. Prerequisite: Prior graduate course work in the area of study and consent of instructor. IND.

NRS 999. Dissertation. 1-12 Hours. Preparation of the dissertation based upon original research and in partial fulfillment of the requirements for the Ph.D. degree. Credit is given only after the dissertation proposal has been accepted by the student's dissertation committee. Prerequisite: Consent of Instructor. THE.

Nursing Courses

NURS 320. Pathophysiology for the Practicing Nurse. 3 Hours. This course is designed to provide students with a basic understanding of pathophysiological changes that occur within the internal environment of the individual. Understanding these alterations is basic to providing quality nursing care. System variations across the lifespan are addressed. Prerequisites: Admission to the School of Nursing and RN to BSN program or consent of instructor. LEC.

NURS 326. Pharmacology for the Practicing Nurse. 3 Hours. Pharmacodynamics and pharmacokinetics of drug therapy are discussed in order to provide a basic understanding of the client's reaction to a drug, both therapeutically and adversely, and to predict potential drug interactions. Internal and external environmental factors affecting drug therapy are assessed in order to provide a comprehensive database for therapeutic nursing interventions. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, side effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drug effects, and client system education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 327. Communicating and Managing Healthcare Information. 3 Hours. Basic theories of interpersonal communication and information technologies are explored. Use of these skills and technologies to develop therapeutic relationships with patients and the interdisciplinary healthcare team is emphasized. Legal and ethical issues related to health information technology and health information exchanges will be examined. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 331, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 328. Professional Development I: Introduction to the Profession. 2 Hours. Students are introduced to the evolution of the profession of nursing. Concepts of caring, professional identity and scholarship are examined. Students will have opportunities to investigate personal and professional boundaries, examine their own beliefs and values, and explore the value of scholarship on nursing practice. Students will examine how their lived experience will impact their professional practice. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 329, NURS 330, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 329. Alterations in Physiological Functioning I. 2 Hours. Basic mechanisms underlying illness and disease are stressed as a basis for the understanding of health promotion and disease prevention in this first of two sequential courses. Pathophysiological changes that occur within the environments of individuals in the presence of dysfunction or disease of selected systems are presented as a rationale for nursing diagnoses and therapeutic interventions. System variations across the lifespan (fetuses, children, pregnant women, adults, and older adults) are addressed. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 328, NURS 330, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 330. Pharmacology I. 2 Hours. Pharmacodynamics and pharmacokinetics of drug therapy across the lifespan are discussed in order to provide a basic understanding of the patient's reaction to a drug both therapeutically and adversely, and to
predict potential drug interactions. Personal, genetic, and environmental factors affecting drug therapy are assessed in order to provide a comprehensive data base for therapeutic nursing interventions. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, adverse effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drug effects, and patient education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 328, NURS 329, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 331. Basic Assessment and Therapeutic Interventions. 3 Hours.
Skills necessary to perform basic patient assessment and therapeutic interventions are discussed and demonstrated. Opportunities are provided in a laboratory setting for students to demonstrate cognitive and psychomotor competencies of therapeutic interventions and assessment of the individual patient across the life span. The emphasis is on interviewing techniques, physical examination, and psychomotor skills. Developmental factors and risk factors, including genetic and environmental, that affect the patient's health will be explored. Case studies and simulation are used to apply the concepts of safe quality care. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 328, NURS 329, NURS 330 or consent of instructor. LEC.

NURS 332. Health and Illness: Foundations of Nursing. 3 Hours.
Concepts basic to the art and science of nursing are introduced as a foundation for safe, quality patient care. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Evidence-based principles of nursing and health promotion are integrated to prepare the student to meet the health-related needs of a patient. The nurse's role as a member of the interdisciplinary team will be examined. Principles of information management and communication are integrated into the care of the patient with health care needs. Prerequisite: NURS 331, or consent of instructor. Corequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 333, or consent of instructor. LEC.

NURS 333. Health and Illness: Foundations of Nursing Practicum. 1 Hour.
Evidence-based clinical reasoning is applied in the care of individual patients with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 331, or consent of instructor. Corequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, or consent of instructor. LEC.

NURS 334. Professional Development II: Image, Roles, and Ethics. 3 Hours.
Ethical principles are applied to care of persons in diverse settings. Team building and group process skills are explored to facilitate students working within teams. The role of the nurse as a member of the interprofessional team is examined using concepts of ethics, advocacy, group process, and team building. The professional responsibilities and role of the advocate will be explored. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. LEC.

NURS 335. Quality Improvement. 2 Hours.
Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. LEC.

NURS 336. Alterations in Physiological Functioning II. 3 Hours.
Building on NURS 331, this course expands knowledge of pathophysiological changes that occur within the environments of the individual in the presence of dysfunction or disease. The most common alterations in selected physiological systems are presented as a framework for clinical reasoning. Relevant risk factors, epidemiology, pathophysiologic mechanisms, and clinical manifestations across the life span (fetuses, children, pregnant women, adults, and older adults) are discussed. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 337, NURS 338, or consent of instructor. LEC.

NURS 337. Pharmacology II. 2 Hours.
In this second sequential course, students continue their study of pharmacology across the lifespan. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, adverse effects and nursing implications of drugs. The nurse’s role in drug administration, assessment of drugs’ effects, and patient education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. LEC.

NURS 338. Health and Illness: Nursing Across the Lifespan. 3 Hours.
A greater sophistication of clinical reasoning is developed to achieve safe and quality outcomes using multiple ways of knowing including nursing knowledge. Emphasis is placed on managing the care of patients experiencing acute and chronic illnesses and promoting health across the lifespan. Strategies to empower and engage patients/designees in all aspects of the health care process are examined. Evidence-based therapeutic nursing interventions that meet a patient's holistic health needs will be expanded. Perspectives of other health care members will be recognized in order to collaborate and work effectively as a team to provide interdisciplinary care. Technology and communication skills are integrated as methods to support safe processes of care. Prerequisite: NURS 331, NURS 332, NURS 333, NURS 337, NURS 327, NURS 328, NURS 329, NURS 330, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. LEC.

NURS 339. Health and Illness: Nursing Across the Lifespan Practicum. 3 Hours.
Students engage patients in active partnerships to manage acute and chronic illness and promote health across the lifespan. Multiple sources of evidence are incorporated into the planning, implementation and evaluation of nursing care including nurse sensitive quality indicators. Coordination, integration and continuity of care for multiple patients will be applied in the healthcare microenvironment. Emphasis is placed on interdisciplinary collaboration to ensure safe and quality outcomes. Technology and information management tools are utilized to support safe processes of care. Prerequisite: NURS 331, NURS 332, NURS 333, NURS 327, NURS 328, NURS 329, NURS 330, or consent of instructor.
Corequisite: NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, or consent of instructor. LEC.

NURS 345. Nursing of Children: Practicum. 2 Hours.
Evidenced based clinical reasoning is applied in the care of children with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 333, NURS 339, or consent of instructor. CLN.

NURS 346. Nursing of Adults: Practicum. 2 Hours.
Evidenced based clinical reasoning is applied in the care of adults with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 333, NURS 339, or consent of instructor. CLN.

NURS 352. Client Assessment for the Practicing Nurse. 3 Hours.
Opportunities are provided, in a laboratory setting and with simulations, to demonstrate competencies in assessment of the individual client system across the life span. Historical data collection and psychological and physical assessment are reviewed. Interviewing techniques and the four basic methods of physical examination (inspection, percussion, palpation, and auscultation) are presented. Critical thinking is emphasized to cluster data to select and support nursing diagnoses. Prerequisite: Admission to the School of Nursing and RN licensure, or consent of instructor. LEC.

NURS 356. Using Technology and Informatics to Improve Patient Safety. 3 Hours.
Beginning theory and practical applications of various uses and results of computer technologies, including electronic health records, are explored in order to provide the basic skills and current infrastructure for information management in healthcare delivery. These concepts and skills are essential for curriculum related activities, as well as for providing therapeutically focused nursing interventions and communications with faculty, client systems, and other healthcare participants. Built-in safeguards, and legal and ethical issues related to electronic communications and health records are emphasized using 21st century tools of communication and collaboration. Knowledge and skills presented in this course will be expanded in future nursing courses related to the baccalaureate completion program. Prerequisite: Admission to the School of Nursing or consent of instructor. Satisfactory completion of a statistics course. LEC.

NURS 357. Introduction to the Baccalaureate Nurse Role. 3 Hours.
Contemporary issues confronting the nursing profession are discussed. Personal accountability, professional boundaries, and group process skills are explored to facilitate students working within interprofessional health care teams. Students will examine their own beliefs and values, establish personal and professional boundaries, and develop their personal philosophy of nursing. Students will explore how their lived experience will impact their professional practice. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 382. Honors Seminar. 1 Hour.
This seminar provides the Honors nursing student the opportunity to explore topics of interest and begin reviewing the current research literature on a given topic. Emphasis is placed on interaction with active nurse researchers to enable the student to identify available research opportunities in ongoing studies. Students are introduced to the application of various methods used to address nursing questions. Prerequisite: Admission to the Nursing Honors Program. LEC.

NURS 401. Basic Spanish for Nurses. 2 Hours.
This is an entry level Medical Spanish course for students with minimal or no Spanish language education. Students will develop working language skills, learning techniques for optimal communication, phonetics, morphology, grammar, understanding sentence structure, conjugation and cultural aspects applicable to the current health care environment. The goal is to achieve proficiency and confidence when using the Spanish language with Hispanic patients. Prerequisite: None or Consent of Instructor. LEC.

NURS 402. Health Care of the Older Adult. 2-3 Hours.
Students will explore concepts and theories to increase their knowledge base of the complex challenges that face older adults and their families. Emphasis will be on promotion, maintenance and restoration of health and wellness, and the prevention of disease. Internal and external environmental factors will be assessed including biophysical, psychological, behavioral, sociocultural, economic and political. Students will utilize case examples and discussion to practice integrating communication and clinical skills into the role of the nurse as a client advocate and professional health team member. A clinical experience option for one-credit hour is offered for students to provide direct care to older adults in a variety of settings. Prerequisite: NURS 360, NURS 420, NURS 434 or consent of instructor. LEC.

NURS 411. Population-Based Nursing. 3 Hours.
Concepts and theories related to providing health care to complex systems and aggregates in the community, state, nation and world are explored. Emphasis is placed on the promotion, maintenance and restoration of health and wellness, and the prevention of disease. Environmental components including historical, political, social, cultural, and economic factors are presented. The role of the health care provider in identifying, prioritizing and meeting the health and life participation needs of populations is discussed. Prerequisite: Admission to the School of Nursing. LEC.

NURS 412. Nursing in Healthcare Microsystems. 3 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in micro-environments of health care delivery. The microsystem is the structural unit responsible for delivering care to specific patient populations or the frontline places where patients, families, and care teams meet. This environment is where the nurse participates in a broad mixture of direct and indirect care patient care delivery. Findings of current research related to nursing leadership are discussed. Professional, organizational, historical, and social factors that affect health care delivery within a clinical micro system are considered. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 413. Teamwork and Collaboration in Healthcare. 3 Hours.
Ethical principles of patient care are applied. Team building and group process skills are explored to facilitate working within the interprofessional healthcare team. The role of the nurse as a member of the healthcare team is examined using concepts and theories of communication, group process, team building, and advocacy. Skills to continue professional growth and support excellence in nursing practice are investigated. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 414. Organizational Influences on Nursing Practice. 3 Hours.
The impact that nursing departments and organizational decision making has on the achievement of quality patient outcomes will be explored. Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the meso-environment.
of health care delivery. The role of the nurse as leader in achieving organizational goals addressing socio-cultural, economic, legal, and political environmental factors is examined. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 415. Improving Healthcare Quality. 3 Hours.
Skills of inquiry and information literacy are developed to locate and evaluate information to improve healthcare quality. Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: Admission to the School of Nursing or consent of instructor. Satisfactory completion of a statistics course. LEC.

NURS 416. Evidence-Based Nursing Practice. 3 Hours.
Searching, critiquing and synthesizing sources of evidence as it applies to the nurse's clinical practice will be emphasized. Fundamental principles of the research process and models for applying evidence to clinical practice will be explored. Strategies for implementation of evidence into clinical practice will be discussed. Prerequisite: Admission to the School of Nursing or consent of instructor. Satisfactory completion of a Statistics course. LEC.

NURS 417. Influences of the Healthcare Macro-System on Nursing Practice. 3 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the macro-environment of health care delivery. The role of the nurse as a provider of direct and indirect care is expanded to include local, state, national and international regulatory, legal, and professional association's interactions that impact the ability of the nurse to deliver patient care. Prerequisite: Admission to the School of Nursing. LEC.

NURS 418. Senior Nursing Project. 3 Hours.
Synthesis of knowledge for professional practice will guide development of a small test of change project to meet an identified need in an area of interest. The student will select an area associated with a patient safety initiative, patient education need or agency educational need for project implementation. Prerequisite: NURS 353, NURS 354, NURS 355, NURS 356, NURS 357, NURS 411, NURS 412, NURS 413, NURS 414, NURS 415, NURS 416, NURS 417, or consent of instructor. LEC.

NURS 441. Evidence Based Practice in Nursing. 3 Hours.
Searching, critiquing and synthesizing sources of evidence as it applies to the nurse's clinical practice will be emphasized. Fundamental principles of the research process and models for applying evidence to clinical practice will be explored. Strategies for implementation of evidence into clinical practice will be discussed. Prerequisite: Admission to the School of Nursing or consent of instructor. Satisfactory completion of a Statistics course. LEC.

This course is designed to enlighten students to new cultures, provide the opportunity to see how these cultures deal with health care, and assess the clients' internal and external environment that impact health care. Various roles and responsibilities of nurses participating in international health are examined. A short term immersion experience provides an opportunity to incorporate the nursing process in clinic and community settings and to function as members of a health care team. Prerequisite: NURS 333, NURS 339, or consent of instructor. LEC.

NURS 446. Population Based Health Care for the Practicing Nurse. 3 Hours.
Concepts and theories important to providing health care to aggregates, communities, and populations are explored. Health promotion and prevention of disease and injury as essential elements of baccalaureate nursing practice are emphasized. Determinants of health are identified to allow students to construct methodologies that address health care disparities. The role of individuals within the interprofessional healthcare team is examined to determine the contributions of each to the achievement of healthy populations. Prerequisite: Admission to the RN to BSN program. LEC.

NURS 447. Nursing Practice within the Clinical Health Care Micro System. 3 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in micro-environments of health care delivery. The microsystem is the structural unit responsible for delivering care to specific patient populations or the frontline places where patients, families, and care teams meet (2008 AACN Essentials, p. 38). This environment is where the nurse participates in a broad mixture of direct and indirect care patient care delivery. Findings of current research related to nursing leadership are discussed. Professional, organizational, historical, and social factors that affect health care delivery within a clinical micro system are considered. Prerequisite: Admission to the RN to BSN program. LEC.

NURS 448. Scholarly Inquiry for Quality Improvement. 3 Hours.
Skills of inquiry and information literacy are developed to locate and evaluate information to improve healthcare quality. Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: Admission to the RN to BSN program LEC.

NURS 449. Nursing Practice within the Healthcare Organization. 3 Hours.
The impact that nursing departments and organizational decision making has on the achievement of quality patient outcomes will be explored. Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the meso-environment of health care delivery. The role of the nurse as leader in achieving organizational goals addressing socio-cultural, economic, legal, and
of complex settings is analyzed. Prerequisite: Admission to the RN to BSN program LEC.

NURS 451. Navigating the Influences of the Health Care Macro-Environment. 3 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the macro-environment of health care delivery. The role of the nurse as a provider of direct and indirect care is expanded to include local, state, national and international regulatory, legal, and professional association interactions that impact the ability of the nurse to deliver patient care. Prerequisite: Admission to the RN to BSN program LEC.

NURS 469. Independent Study in Nursing. 1-5 Hours.
Intensive study in an area of interest with experiences selected according to the student’s written purposes, conceptual framework, objectives and evaluation. Appropriate prerequisite courses, as determined by the Independent Study faculty advisor, must be completed. IND.

NURS 471. Development of a Microsystem Leader. 4 Hours.
The microsystem is the structural unit responsible for delivering care to specific patient populations or the frontline places where patients, families, and care teams meet (2008 AACN Essentials, p. 38). This environment is where the nurse participates in a broad mixture of direct and indirect care patient care delivery. Students will be given the opportunity to apply principles of leadership and management to recognize how changing delivery patterns, organizational, regulatory, care, and association processes impact the care provided to specific patient populations. Prerequisite: NURS 327, NURS 329, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339 or consent of instructor. Corequisite: NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor. LEC.

NURS 472. Evidence-Based Practice: Translating Research to Practice. 2 Hours.
Concepts of evidence-based practice (EBP) and healthcare research are explored. Methods to critically appraise healthcare research will be applied. Critical appraisal of evidence will be employed to inform the delivery of safe and quality nursing care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. Corequisite: NURS 471, NURS 473, NURS 474, NURS 475, or consent of instructor. LEC.

NURS 473. Professional Development III: Navigating the Profession. 2 Hours.
Contemporary issues confronting the nursing profession are discussed and methods to advocate for persons and the profession are investigated. The dynamic and ever present evolution of healthcare will be explored. Professional skills, such as job interviewing, portfolio development, and examination of advanced roles in nursing, will be emphasized. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or Consent of Instructor. Corequisite: NURS 471, NURS 472, NURS 474, NURS 475, or Consent of Instructor. LEC.

NURS 474. Health and Illness: Nursing with Diverse Populations. 4 Hours.
Comprehensive and focused evidence-based care of patients in diverse populations with complex health conditions will be examined. The nurse’s role in assuring coordination, integration, and continuity of care is investigated. Integration of the physical, behavioral, psychological, spiritual, socioeconomic and environmental factors that influence patient centered care is explored. Collaboration with other health care team members to provide safe and quality care for diverse patients in a variety of complex settings is analyzed. Information management tools to monitor outcomes of care are evaluated. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 336, NURS 337, NURS338, NURS 339, or consent of instructor. Corequisite: NURS 471, NURS 472, NURS 473, NURS 475, or consent of instructor. LEC.

NURS 475. Health and Illness: Nursing with Diverse Populations Practicum. 3 Hours.
Coordination, integration, and continuity of care for diverse patients with multiple/complex problems will be applied in the dynamic microenvironments such as: maternity, pediatrics, mental health, and critical care. Patients/designees are engaged in active partnerships that promote health, safety, well-being, and self-care management. Synthesis of evidence and collaboration with other members of the health care team are used to plan, implement, and evaluate safe and quality care for patients. Technologies that support clinical decision-making, error prevention, and care coordination are emphasized. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. Corequisite: NURS 471, NURS 472, NURS 473, NURS 474, or consent of instructor. LEC.

NURS 476. Nursing in an Evolving Healthcare System. 4 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges presented to the nurse. The role of the nurse as provider of direct and indirect patient care is expanded to include the external influences of the health care organization, the regulatory environment, and the professional association. The development of the nurse as a member of a profession is expected. Inherent is a developing knowledge and appreciation for the diversity of opinions and organizations that exist to provide assistance in the delivery of direct patient care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 477, NURS 478, NURS 479, NURS 480, or consent of instructor. LEC.

NURS 477. Capstone. 3 Hours.
A preceptor model of learning professional nursing practice provides opportunities to synthesize and integrate previous learning experiences. Emphasis is placed on the roles of the nurse as provider of indirect and direct care; designer, manager and coordinator of care; and member of the profession. The focus is on individual transition to the professional nursing role, recognizing the organizational, social, political, economic, ethical, and legal context in which interdisciplinary health care is delivered in a selected clinical setting. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 472, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 476, NURS 478, NURS 479, NURS 480, or consent of instructor. LEC.

NURS 478. Integration Seminar. 1 Hour.
The seminar provides students with an opportunity to apply concepts discussed in the classroom with observations from the clinical setting to enhance knowledge of how nurses meet multiple responsibilities. Through the use of small group guided discussion, students begin building a skill set that shows knowledge of and appreciation for the roles of direct care provider, designer, manager and coordinator of care; and member of profession. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 476, NURS 477, NURS 479, NURS 480, or consent of instructor. LEC.
NURS 480. Population Based Healthcare Practicum. 2 Hours.
Concepts and theories from Population Based Healthcare are applied to the health care of multiple patients; individuals, groups, communities and populations in the community. There is a concentrated focus on health promotion and disease prevention that provides safe, effective, and efficient care. Students are provided opportunities for inter-professional collaboration in the planning of health care and promotion of quality outcomes for culturally diverse populations. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 476, NURS 478, NURS 479, or consent of instructor. LEC.

NURS 481. Honors Evidence-Based Practice: Translating Research to Practice. 2 Hours.
Concepts of evidence-based practice (EBP) and health care research are explored to inform the delivery of safe and quality nursing care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 382, or consent of instructor. Corequisite: NURS 471, NURS 473, NURS 474, NURS 475, or consent of instructor. This course is for Honors students only. LEC.

NURS 482. Honors Practicum I. 2 Hours.
Under the mentorship of an active nurse researcher the student designs and conducts a research project and participates as a member of a research project team. Students apply principles of research learned in NURS 460 to design and critique their own research project while providing feedback to peers. Through seminar activities they critically analyze the issues, rewards, and challenges of conducting research. LEC.

NURS 483. Honors Practicum II. 2 Hours.
Under the mentorship of an active nurse researcher the student designs and conducts a research project and participates as a member of a research project team. Students apply principles of research learned in NURS 460 to design and critique their own research project while providing feedback to peers. Through seminar activities they critically analyze the issues, rewards, and challenges of conducting research. LEC.

NURS 485. Populations Based Healthcare I. 1 Hour.
Concepts and theories related to improving health of entire populations are explored. Focus is placed on risk reduction, protective and predictive factors within the environments which influence the health of individuals, families, aggregates, and entire populations, and the identification of core public health functions and essential of service that impacts population health. Considering the multiple determinants of health, students will learn methods to facilitate collaboration to provide quality and safe health interventions for populations. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339 LEC.

NURS 486. Populations Based Healthcare II. 2 Hours.
Building upon the concepts and theories taught in Population Based Healthcare I, emphasis is placed on behavioral change techniques to promote health and manage disease that influence the health of individuals, families, communities, and entire populations. Considering the multiple determinants of health, students will learn methods to facilitate collaboration to provide quality and safe population health interventions through program planning to meet the needs of aggregate populations. Principles of disaster management and emergency preparedness will be explored at the individual, community, and population level. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 336, NURS 337, NURS 338, NURS 471, NURS 472, NURS 473, NURS 474, NURS 475, NURS 485. Corequisites: NURS 476, NURS 477, NURS 478, NURS 480. LEC.

NURS 492. Senior Project. 2-3 Hours.
Synthesis of knowledge for professional practice will guide development of a project to meet an identified need in an area of interest. The student will select one of three areas (management, clinical practice, education for patients and families, staff, or agency personnel) for project implementation. Prerequisite: NURS 320, NURS 352, NURS 433, NURS 434, NURS 435, and NURS 437. Corequisite: NURS 326, NURS 439, and NURS 441. LEC.
Bachelor of Science in Nursing

With a Bachelor of Science in Nursing (BSN) from the University of Kansas School of Nursing, graduates are prepared for success in any health care setting. KU graduates are ready to work in hospitals, community health agencies, industrial or long-term care facilities, as travel nurses, flight nurses, as well as in other clinical settings.

Graduates of the KU School of Nursing baccalaureate program, begun in 1929, go on to become charge nurses and move into other leadership positions in Kansas and across the country. They are well-prepared for continuing their education through master’s and doctoral programs in nursing.

School of Nursing alumni are hired by hospitals of great renown, including Johns Hopkins and Mayo Clinic and excellent hospital systems closer to home at The University of Kansas Health System and Children’s Mercy Hospitals and Clinics.

The KU School of Nursing’s baccalaureate, master’s, and doctor of nursing practice programs are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/). This organization is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master’s, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org/). The Nurse Midwifery Program is accredited by the Accreditation Division of the American College of Nurse-Midwives (http://www.midwife.org/), 8403 Colesville Rd., Suite 1550, Silver Spring, MD 20910, (240) 485-1800.

Undergraduate Admission to the School of Nursing

The School of Nursing offers three undergraduate nursing programs: Pre-licensure BSN, RN to BSN, and Community College Nursing Partnership (CCNP). Each program is described below.

Pre-licensure BSN Program

Students enter the Pre-Licensure BSN program after taking 62 semester credit hours of prerequisite work in an accredited college or university. Admission to the school is competitive. A minimum grade-point average of 2.5 is required to apply.

Pre-Nursing Advising

A pre-nursing advisor is available by appointment during the fall and spring semesters in the Undergraduate Advising Center (http://advising.ku.edu/), Summerfield Hall, on the Lawrence campus and year-round on the Kansas University Medical Center campus in Kansas City. The advisor provides students with information about the nursing profession, help with course selection in preparation for nursing application, and guidance in the admission process. For an appointment, current Lawrence campus students can call (785) 864-2834. All other students can call (913) 588-1619 for an appointment in Kansas City.

Admission Procedure

Applications for the pre-licensure BSN program are accepted from July 1st to October 1st for admission the following fall semester. Applications are accepted through the KU Medical Center online application (https://www.applyweb.com/kumc/) site.

Admission Criteria

The school endeavors to meet the changing needs of society by selecting applicants who, in the judgment of the Student Admission and Progression Committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for the successful study and practice of nursing, and who will best meet the needs of the citizenry. Students are selected based on college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, and genetic information in the university’s programs and activities.

Locations

The School of Nursing has two campuses: one on the University of Kansas Medical Center campus in Kansas City, KS, about one hour east of the Lawrence Campus, and one on the University of Kansas Medical Center campus in Salina, KS, about two hours west of the Lawrence campus.

Course Requirements

Within the 62 hours required for admission to the basic BSN program, the following must be included:

Humanities and Social Sciences

Courses in English composition and literature, public speech, general sociology, general psychology, theories of child or human development, global awareness, and humanities are required. Students who complete these general education requirements through the Lawrence Campus meet these requirements by taking the following courses:

<table>
<thead>

Students are selected on the basis of college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, and genetic information in the university’s programs and activities.

Course Requirements

Within the 60 hours required for admission to the RN to BSN program, the following must be included:

Humanities and Social Sciences

Courses in English composition and literature, speech or interpersonal communication, general sociology, general psychology, theories of child or human development, global perspectives, and humanities are required. Students who complete these general education requirements through the KU College of Liberal Arts and Sciences meet these requirements by taking the following courses:

<table>
<thead>
<tr>
<th>Code</th>

</tbody>
</table>

Electives

Electives can be chosen according to the student’s interests or needs. Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, physics, mathematics, political science, western civilization, biological sciences, economics, etc. A maximum of 4 performance-based credit hours can be accepted in the 62 credit hours required for admission. These 4 credit hours may be in physical education courses, and technique courses in art, music, and dance.

RN to BSN Program

Students complete an associate degree in nursing from an ACEN accredited community college, including 60 credit hours of prerequisite liberal arts and science courses. Following RN licensure, students complete 30-35 credit hours of nursing courses online through KU Medical Center. A minimum grade-point average of 2.5 is required to apply.

Admission Procedure

The application for the RN to BSN program is open at all times, with the following deadline dates: April 1st for summer semester, July 1st for fall semester, and November 1st for spring semester. Applications are accepted through the KU Medical Center online application (https://www.applyweb.com/kumc/) site.
general education requirements through the Lawrence Campus meet these requirements by taking the following courses:

**Electives**

Electives can be chosen according to the student’s interests or needs. Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, oral communication, physics, mathematics, political science, western civilization, biological sciences, economics, etc. A maximum of 8 performance-based credit hours can be accepted in the 60 credit hours required for admission. These 8 credit hours may be in physical education courses, and technique courses in art, music, and dance.

**Community College Nursing Partnership Program (CCNP)**

Students first complete 60 credit hours of prerequisite liberal arts and science courses, and then simultaneously complete the associate degree in nursing at a partner community college and 30 credit hours of BSN courses online through KU Medical Center. A minimum grade-point average of 2.5 is required to apply.

**Admission Procedure**

Applicants must first be admitted to a participating community college’s Associate Degree in Nursing (A.D.N./A.S.N.) program. Following admission to the A.D.N./A.S.N., students may apply to the Partnership Program. Applications are accepted through the KU Medical Center online application (https://www.applyweb.com/kumc/) site.

**Admission Criteria**

The school endeavors to meet the changing needs of society by selecting applicants who, in the judgment of the student admission and progression committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for the successful study and practice of nursing, and who will best meet the needs of the citizenry. Students are selected on the basis of college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, and genetic information in the university’s programs and activities.

**Course Requirements**

Within the 60 hours required for admission to the CCNP program, the following must be included:

**Humanities and Social Sciences**

Courses in English composition and literature, speech or interpersonal communication, general sociology, general psychology, theories of child or human development, global perspectives, and humanities are required. Students who complete these general education requirements through the KU College of Liberal Arts and Sciences meet these requirements by taking the following courses:

<table>

PSYC 210 Statistics in Psychological Research 3
or MATH 365 Elementary Statistics

Electives
Electives can be chosen according to the student’s interests or needs. Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, oral communication, physics, mathematics, political science, western civilization, biological sciences, economics, etc. A maximum of 8 performance-based credit hours can be accepted in the 60 credit hours required for admission. These 8 credit hours may be in physical education courses, and technique courses in art, music, and dance.

Additional Requirements
Students from certain community colleges will be required to take Pathophysiology and/or Pharmacology as prerequisite courses. See the KU School of Nursing website for detailed requirements for each specific school.

Degree Requirements
The BSN degree is granted to candidates recommended by the School of Nursing as having successfully fulfilled all prescribed requirements, including the courses listed below. A total of 124 credit hours is required for the pre-licensure BSN degree, and a total of 120 credit hours is required for the RN to BSN degree, with a cumulative grade-point average of at least 2.0. Only courses in which a grade of C or higher is earned count toward graduation. The last 30 hours completed for the degree must have been taken in residence at KU. A portion of total hours applied toward graduation may be earned through credit by examination. An applicant who receives a failing grade of D or F in the semester prior to the admission decision (ex. Fall 2018 for Fall 2019 entry) will be removed from consideration.

Pre-Licensure BSN Program
The professional portion of the BSN program can be completed in 2 academic years of full-time study.

RN–BSN Program
The RN to BSN program provides registered nurses a way to complete the baccalaureate degree in a flexible online format. The program can be completed in as little as one calendar year of full-time study or up to five years of part-time study. A total of 120 semester credit hours are required for the degree, comprised of 60 credit hours of liberal arts prerequisite courses and 60 credit hours of nursing courses and evidence of RN licensure. NURS 320, NURS 326, and NURS 352 are eligible for credit by portfolio or transfer from the approved associate degree programs. The last 30 hours completed for the degree must be taken at KU.

Community College Nursing Partnership Program (CCNP)

Students first complete 60 credit hours of prerequisite liberal arts and science courses, and then simultaneously complete the associate degree in nursing at a community college and 30 credit hours of BSN courses online through KU Medical Center. NURS 320, NURS 326, and NURS 352 are eligible for credit by portfolio or transfer from the approved associate degree programs. This program is currently offered to students at Butler Community College, Fort Scott Community College, Hutchinson Community College, Johnson County Community College, Kansas City Kansas Community College, and Neosho County Community College.

University Honors Program

The School of Nursing encourages all qualified on-campus BSN undergraduates to participate in the University Honors Program (http://www.honors.ku.edu/).

Departmental Honors Program

The School of Nursing’s Departmental Honors Program offers enhanced educational opportunities for the most academically talented, promising, and motivated baccalaureate students while providing a foundation for leadership development and articulation into graduate education.

Students in the School of Nursing Honors Program develop and complete a research project under the guidance of a faculty research mentor. Students must make formal application and be admitted to the Honors Program to take honors courses. Once admitted to the program, students may use departmental honors courses to help meet the requirements of the University Honors Program.

Selection criteria for the Nursing Honors Program are as follows:

- Enrollment in the pre-licensure BSN program
- Full-time status
- Completion of Nursing Honors Program application - available during the first semester of nursing school
- Overall grade-point average of 3.25 or higher and contingent upon earning a nursing grade-point average of 3.5 or higher at the end of the fall semester (exceptions are considered on an individual basis)
Academic progression through the honors curriculum is evaluated on an individual basis. However, to graduate with departmental honors from the School of Nursing, the student must attain an overall grade-point average of 3.25 with a nursing grade-point average of 3.5 and satisfactory grades in all clinical practicum courses, complete all required courses in the Nursing Honors Program, and have their oral and written reports of research findings certified.

The honors curriculum comprises the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>NURS 382</td>
<td>Honors Seminar (spring of junior year)</td>

<td>Honors Practicum I (fall of senior year)</td>
<td>2</td>
</tr>
<tr>
<td>NURS 483</td>
<td>Honors Practicum II (spring of senior year)</td>
<td>2</td>
</tr>
</tbody>
</table>

Students who successfully complete the Nursing Honors Program are recognized in the following ways:

- The notation of Departmental Honors on the official university transcript
- An official certificate indicating graduation with BSN Honors
- Listing in the School of Nursing Recognition Ceremony program
- Formal recognition at the School of Nursing Recognition Ceremony
- Listing in the University of Kansas Commencement Program
- Formal recognition at the Cordring Ceremony on the Lawrence campus for students also completing the University Honors Program

For more information, contact the School of Nursing Office of Student Affairs and Enrollment Management.

TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision
of reasonable accommodations will be considered in an attempt to
assist these individuals in meeting these required technical standards.
Applicants whose response indicates that they cannot meet one or more
of the expectations will be reviewed further by the University’s Office for
Academic Accommodations, with applicant and faculty input, to determine
if any reasonable accommodations are possible to facilitate successful
completion of the nursing curriculum and preparation for the national
registry examination.

It is important to give persons interested in enrolling in nursing a realistic
view of the vigorous demands of the School of Nursing’s theoretical and
practicum curriculum while at the same time investigating reasonable
accommodations. Whether or not a requested accommodation is
reasonable will be determined on a case by case basis. Interested
individuals may schedule an orientation visit to the nursing skills
laboratory and actual sites of the University of Kansas Hospital and/or
University of Kansas Medical Center. These orientation visits enable
persons to assess their interest and ability to function in the actual clinical
areas and in learning and demonstrating manual skills.

Revised: May 9, 2014
Master of Science in Nursing

The Nursing Master of Science degree program enlarges the focus of nursing, using as its foundation the basic baccalaureate nursing program. The master’s program curriculum includes the following components: Common Core, Leadership Core, Research Core, and Functional Specialty Core. Leadership specializations include organizational leadership, public health nursing, and health informatics.

The KU School of Nursing’s baccalaureate, master’s, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/), 655 K Street NW, Suite 750, Washington, DC 20001, (202) 887-6791. This organization is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master’s, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org/).

The Interprofessional Masters in Health Informatics degree program prepares graduates for entry and mid-level positions in a variety of health care organizations. In addition to a foundation in applied health informatics, the curriculum focuses on special skills in organizational change, project management, and impact evaluation.

Applications to the Nursing and Interprofessional Master of Science degree programs are accepted twice a year. April 1st and September 1st are the respective deadlines for fall and spring semesters.

Nursing application eligibility requirements are:

1. Bachelor of Science in Nursing (BSN) from a nationally accredited program (NLNAC or CCNE)
2. Current registered nurse licensure in at least one state in the United States
3. Minimum of one year of clinical work experience as a registered nurse is recommended
4. Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
5. Potential for leadership and application of scholarship in nursing
6. Potential to provide expert service and leadership in functional area
7. Completion of a graduate-level statistics course either prior to admission or during first semester of graduate study
8. Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

Interprofessional application eligibility are located in the Master of Science in Health Informatics admission requirements (p. 2174).

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

See also Admissions (p. 2554) in the Graduate Studies section of the online catalog.

Interprofessional Master of Science Degree

Professionals in applied Health Informatics have skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. Graduates will be prepared for entry and mid-level positions with hospital or clinic informatics departments, electronic health record (EHR) vendors, public health organizations, and as consultants and/or staff in organizations that specialize in knowledge management. Graduates also have the skills to enter the growing field of health information exchange, which includes regional health information organizations and the emerging personal health records. In addition to a foundation in applied health informatics, special skills will be acquired in organizational change, project management and impact evaluation.

Joint Degree Program

Students who wish to earn master's degrees in both Nursing (organizational leadership specialty) and Health Services Administration may elect the joint degree option. By combining some course work, the two degrees may be completed in a shorter time frame. Students in the MS/MHSA joint degree program must complete a total of 62 graduate credit hours: 33 credit hours in Health Policy & Management, and 29 hours in the School of Nursing. If completed separately, the MS in nursing requires 37 credit hours, and the MHSA degree requires 52-54 credit hours.

Master of Science (Organizational Leadership, specialty) (MS) (p. 2431) (p. 2431)
Master of Health Services Administration (MHSA) (p. 2224)

TECHNICAL STANDARDS FOR ADMISSION

University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences,
including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Revised: May 9, 2014
Doctor of Philosophy in Nursing

The PhD program prepares graduates to function in faculty positions in college and university settings; conduct independent research and scholarly endeavors in nursing; generate and expand the theoretical, empirical, and philosophical bases for nursing practice; provide leadership to the profession; and interpret nursing to society. Students have opportunities to expand their theoretical knowledge and research skills in one of three emphasis areas (Health Systems, Symptom Science, or Education); develop expertise in nursing theory development; expand research skills; and gain a historical and philosophical perspective that broadens their professional orientation and provides a basis for understanding changing social expectations, cultural perspectives, and economic and political trends.

Nurses engaged in doctoral study are adult learners with unique perspectives gained from personal, professional, and educational experiences. These individuals tend to be self-directed, goal-oriented, highly motivated and capable of abstract, original thinking. Individual interests are explored through study in the selected emphasis area. Learning is achieved through independent study and research, as well as instructed courses.

The KU School of Nursing’s baccalaureate, master’s, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/) (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, (202) 887-6791. CCNE is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master’s, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org/). The Nurse-Midwifery Program is fully accredited by the Accreditation Commission for Midwifery Education (ACME), 8403 Colesville Rd., Suite 1550, Silver Spring, MD 20910, (240) 485-1802.

Admission Criteria

New students are accepted to the PhD degree program once a year, for instruction that begins in June during the summer semester. The application deadline is December 1st for admission the following summer. Prospective students can apply using the KU Medical Center online application at: https://www.applyweb.com/apply/kumc/ (https://www.applyweb.com/kumc/)

1. Completion of a Bachelor of Science in Nursing (BSN) or Master of Science in nursing degree from a nationally accredited program (NLNAC or CCNE)
2. Current registered nurse licensure in at least one state in the United States. This requirement may be waived for international students who will not engage in patient care while in the program
3. Preference is given to applicants with a 3.5 GPA in a BSN program or 3.25 GPA in a master's program
4. Potential for leadership and scholarship in nursing
5. Prerequisite preparation must include a graduate-level statistical methods course and an Analysis of Variance (ANOVA) course
6. Graduate Record Examination (GRE) scores. Preferred scores are a minimum combined score of 297 on verbal and quantitative sections, and at least 4 on the analytical section
7. Satisfactory criminal background check (completed once an offer of admission has been extended to applicant); it may affect the student’s eligibility to enter the program

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

See also Admissions (p. 2554) in the Graduate Studies section of the online catalog.

Program Options

Students may apply to the doctoral program after completing a master’s degree in nursing or a baccalaureate degree with a major in nursing. The post-baccalaureate entry option is for exceptionally well-qualified BSN graduates whose career goals are research-oriented and who wish to progress as rapidly as possible toward the research doctorate in nursing.

Course Requirements

The PhD degree requires 65 credit hours; 50 coursework credit hours and 15 dissertation credit hours. Post-BSN students complete an additional 6 credit hours from the graduate nursing core. The PhD program is offered through a combination of formats, including:

- Three on-campus one-week summer intensives at the University of Kansas Medical Center in Kansas City, Kansas
- Online coursework throughout the year, including synchronous web-based conferencing on a regular basis
- On-campus and e-mentoring by faculty for research and career advisement and scholar development

Coursework includes three primary curriculum components.

Dissertation
Emphasis Area

The emphasis area includes 11 coursework credit hours in the student’s area of choice from among three options: Health Systems, Symptom Science, or Education. Emphasis area courses must support the student’s research interest area. Two of the 11 emphasis area credit hours are taken through enrollment in NRSG 970, which is taken after completion of the emphasis area coursework. That course requires completion of a scholarly paper synthesizing content taken throughout the emphasis area course sequence.

Support Courses

Regression Analysis (e.g. BIOS 730) - 3 credit hours
Advanced Research Method or Analysis Course - 3 credit hours

Dissertation

Each PhD student must complete a study that shows the planning, conduct, and results of original research. See Doctoral Degree Requirements, Ph.D., in the Graduate Studies section of the online catalog. The minimum number of post-comprehensive dissertation credit hours is 15. The program also requires satisfactory completion of the University’s research skills and responsible scholarship requirement, two qualifying examinations, a comprehensive oral exam, (i.e., the dissertation proposal defense), and a final oral examination, (i.e., the final dissertation defense).

TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/ evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.
III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Revised: May 9, 2014
Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) degree prepares graduates for nursing practice at the highest level. The DNP offers sophisticated, cutting-edge experiences that help nurses actively engage in a complex, dynamic and demanding health care field. Skills in collaboration, innovation, and evaluation — complemented by advanced nursing practice skills — prepare nurses to shape the future of health care. Graduates of the DNP program provide patient-centered care that is evidence-based, contribute to the development of evidence-based practice, and pursue leadership roles in a variety of health care and educational settings. All DNP graduates must have completed at least 1,000 hours of supervised, post-baccalaureate, practice experiences.

The KU School of Nursing’s baccalaureate, master’s, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/) (CCNE), 655 K Street NW, Suite 750, Washington, DC, 20001, (202) 887-6791. CCNE is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master’s, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org/). The Nurse Midwifery Program is fully accredited by the Accreditation Commission for Midwifery Education (http://www.midwife.org/Program-Accreditation/) (ACME), 8403 Colesville Rd., Suite 1550, Silver Spring, MD, 20910, (240) 485-1802.

DNP Admission

New students are accepted to the DNP degree program once a year, for study that begins during the summer semester. The application deadline is December 1st for admission the following summer (June). Prospective students can apply using the KU Medical Center online application at https://www.applyweb.com/apply/kumc/ (https://www.applyweb.com/kumc/)

DNP Program Admission Criteria

1. Completion of a Bachelor of Science in Nursing (BSN) degree (for BSN to DNP), or completion of a nursing Master of Science (MS) degree (for post-master’s DNP) from a nationally accredited program (NLNAC or CCNE)
2. Minimum cumulative undergraduate GPA of 3.0 for BSN-DNP application; for post-master’s DNP, preference is given to applicants with a 3.25 graduate GPA in the master’s program
3. Potential for leadership and application of scholarship in nursing
4. Potential to provide expert advanced clinical care or expert service in functional areas
5. New BSN graduates must obtain RN licensure prior to the first fall semester of enrollment
6. Minimum of one year of clinical work experience as a registered nurse is recommended
7. National certification in specialty area (post-master’s Advanced Practice DNP)
8. A graduate-level statistics course (may be completed prior to admission or during first semester of enrollment)
9. A background check and drug screen are required during the admission process and may affect the student’s eligibility to enter the program.

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

See also Admissions (p. 2554) in the Graduate Studies section of the online catalog.

Post-Baccalaureate DNP Degree Requirements

The post-baccalaureate DNP curriculum is designed for registered nurses who have completed a Bachelor of Science in Nursing (BSN) degree. The program for these students is divided into two components. The first consists of courses focusing on initial preparation for advanced practice clinical or leadership roles. The second component includes courses for doctoral level preparation for advanced practice clinical or leadership roles.

Advanced-Practice Major

The advanced-practice nursing major prepares nurses for nurse practitioner or nurse-midwife specialty areas.

- The nurse practitioner specialization prepares nurses to provide primary health care to clients and families across the life span. Family nurse practitioners, adult/gerontological nurse practitioner, and psychiatric/mental health nurse practitioner options are available. The nurse practitioner is prepared to provide primary health care in a variety of settings. (75-79 credit hours)
- The nurse-midwife specialization focuses on the support and management of well-women's primary and reproductive health care needs through the life span. (76 credit hours)

Leadership Major

The leadership major prepares nurses for leadership roles in nursing informatics (69 credit hours), organizational leadership (70 credit hours), or public health nursing (70 credit hours).

Curriculum

The post-baccalaureate DNP program requires the following:

- 28 credit hours of post-baccalaureate Common Core and DNP core courses
- A minimum of 6 credit hours of doctoral practice project
- 15-17 credit hours of Advanced-Practice or Leadership core
- 12-24 credit hours of specialization courses
- 2-8 credit hours of specialty area support and practicum courses
- Satisfactory completion of the DNP oral comprehensive exam
- Satisfactory completion of the University’s research skills and responsible scholarship requirement
Total required DNP program credit hours vary from 69 to 79, depending on the specialization. Although curricular changes may occur, examples of core courses include:

- **Common Core (Post-Baccalaureate):** NRSG 748 Theories for Practice and Research, NRSG 754 Health Care Research, NRSG 755 Professionalism in Advanced Nursing Practice
- **DNP Core (Post-Baccalaureate and Post-Masters):** PRVM 800 Principles of Epidemiology, NRSG 804 Interpreting Research for Applied Science, NRSG 808 Social Context for Health Care Policy, NRSG 911 Tools for Practice Doctorate Scholarship, NRSG 935 Professionalism & Scholarship Workshop, NRSG 938 Informatics & Technology Applications, NRSG 948 Advancing Organizational & Clinical Quality, NRSG 941 Preparing for Doctoral Leadership
- **Advanced Practice Core:** NRSG 801 Advanced Health Assessment and Clinical Reasoning, NRSG 806 Advanced Physiology, NRSG 809 Health Promotion and Complementary Therapeutics, NRSG 812 Advanced Pathophysiology, NRSG 813 Advanced Pharmacology
- **Adult/Gerontological Nurse Practitioner Specialty Core:** NRSG 901 Primary Care I: Adult-Gerontology Health, NRSG 902 Primary Care II: Adult-Gerontology Health, NRSG 903 Primary Care Practicum I: Adult/Gerontology - Nurse Practitioner, NRSG 904 Primary Care Practicum II: Adult/Gerontology - Nurse Practitioner, NRSG 905 Primary Care Practicum III: Adult/Gerontology - Nurse Practitioner
- **Family Nurse Practitioner Specialty Core:** NRSG 914 Primary Care I: Family Health, NRSG 915 Primary Care II: Family Health, NRSG 916 Primary Care Practicum I: Family Nurse, NRSG 917 Primary Care Practicum II: Family Nurse Practitioner, NRSG 918 Primary Care Practicum III: Family Nurse Practitioner
- **Nurse Midwifery Specialty Core:** NRSG 925 Care of Women in The Antepartal Period Practicum, NRSG 927 Childbearing Family Practicum: Intrapartum, Postpartum, and Newborn, NRSG 926 Primary Care of Women Across the Lifespan Practicum, NRSG 928 Nurse-Midwifery Integration Practicum, NRSG 841 Reproductive Endocrinology, NRSG 921 Primary Care of Women Across the Lifespan, NRSG 922 Care of Women in the Antepartal Period, NRSG 923 Nurse Midwifery in the Postpartum and Newborn Period, NRSG 924 Nurse Midwifery in the Intrapartum Period, NRSG 826 Global Perspectives and Diversity in Health Care
- **Psychiatric Mental Health Nurse Practitioner Specialty Core:** NRSG 844 Advanced Psychiatric Assessment, NRSG 850 Mental Health Assessment of Infants, Children and Adolescents, NRSG 851 Psychopharmacology for Advanced Nursing Practice, NRSG 929 Psychotherapeutic Interventions I: Psychiatric Mental Health Nurse Practitioner, NRSG 930 Psychotherapeutic Interventions II: Psychiatric Mental Health Nurse Practitioner, NRSG 931 Psychotherapeutics Practicum I: Psychiatric Mental Health Nurse Practitioner, NRSG 932 Psychotherapeutics Practicum II: Psychiatric Mental Health Nurse Practitioner, NRSG 933 Psychotherapeutics Practicum III: Psychiatric Mental Health Nurse Practitioner

- **Nursing Informatics Specialty Core:** NRSG 853 Abstraction and Modeling of Healthcare Information, NRSG 854 Knowledge Management in Healthcare, NRSG 856 Health Informatics Practicum, NRSG 857 Transforming Health Care through Use of Information Systems and Technology, NRSG 858 Health Data: Theory and Practice, NRSG 957 Health Informatics, Human Factors, & Ergo as Applied to Pt Safety, NRSG 958 Knowledge Representation and Interoperability

### Post-Master’s DNP Degree Requirements

The post-master’s DNP curriculum is designed for nurses who have already earned a nursing Master of Science degree. The DNP degree allows nurses to serve at a higher level as an advanced practice nurse or leader in their specialty. Two majors are offered in the post-master’s DNP program: 1) Advanced Practice and 2) Leadership. A minimum of 32 credit hours is required for the post-master’s DNP.

- 19 credit hours of post-master’s DNP core courses
- A minimum of 6 credit hours of doctoral research project
- 7 credit hours of specialty courses
- Satisfactory completion of the University’s Research Skills and Responsible Scholarship requirement

For further information, visit the Doctor of Nursing Practice section of the School’s website.

### TECHNICAL STANDARDS FOR ADMISSION

University of Kansas School of Nursing

#### I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

#### II. Standards

A. **Observation/Sensory-motor:** Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal
sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Revised: May 9, 2014
Nursing and Interprofessional Certificate Programs

The School of Nursing offers Post-Master's Nursing Certificate programs in Advanced Practice and Interprofessional Certificates in Health Informatics (post-masters) and Health Professions Educator (post-baccalaureate). Select the program link below for detailed information on admission and certificate requirements.

Advanced Practice Post-Master's Certificate Programs

The advanced practice clinical certificate programs require that applicants have completed an advanced practice registered nurse (APRN) educational program from a nationally accredited school of nursing. Applicants must also have completed the following advanced practice prerequisite courses, either as part of their previous graduate degree or as post-graduate study through an accredited university: advanced health assessment, advanced pathophysiology, advanced pharmacology, and health promotion.

The Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) Certificate (19 credit hours) is designed to provide APRNs who have a baseline preparation in primary care with an opportunity for additional training in acute care, as part of an interprofessional healthcare team. The curriculum includes core concepts of the advanced practice nursing role in acute care settings, expanded models of acute care, care transitions, and age-related considerations of the adult/gerontology patient in acute care. The role of the AGACNP may include episodic management of a patient in a clinical specialty unit, following a caseload of patients during a hospitalization, or caring for patients across the acute care continuum.

Required didactic courses are offered online. Practicum courses use on-campus, face-to-face clinical learning experiences, with clinical placement opportunities within the University of Kansas Health System. Simulation spaces on the KU Medical Center campus are used for skills training. Application deadline is April 1 for Summer semester.

The Adult-Gerontology Primary Care Nurse Practitioner Certificate (16 credit hours) focuses on the knowledge and skills required to educate advanced practice nurses to provide primary health care to a diverse population of adults. The Adult-Gerontology Primary Care nurse practitioner focuses on assessment and management of common acute and chronic health care problems of adult and older adult patients in primary care setting. A variety of practice settings are used: primary care or internal medicine clinics; occupational health clinics; home based care; long-term, assisted living or post-acute care; rural health clinics; and other sites serving adults and older adults.

Required didactic courses are offered online. Practicum courses NRSG 903, NRSG 904 and NRSG 905 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams. Application deadline is June 1 for Fall semester.

The Family Nurse Practitioner Certificate (16 credit hours) focuses on the knowledge and skills required to educate advanced practice nurses to provide primary health care to clients and families across the lifespan. Family Nurse Practitioners provide comprehensive health promotion services to ambulatory clients; evaluate presenting problems at the client’s initial contact with the primary care system; and continuing care to clients with acute and stable chronic illnesses.

Required didactic courses are offered online. Practicum courses NRSG 916, NRSG 917 and NRSG 918 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams. Application deadline is June 1 for Fall semester.

The Psychiatric/Mental Health Nurse Practitioner Certificate (24 credit hours) prepares advanced practice nurses to diagnose and treat common mental health conditions in general medical settings and to deliver effective psychiatric care in mental health settings. Students are prepared to apply knowledge and skills in interpersonal, psychotherapeutic, and psychopharmacologic interventions for individuals, groups, and families with psychiatric disorders. All courses are online and offered in sequence every other year. Spring 2020 will begin the next available course sequence. Cost information for this certificate is available through Title IV-Federal Student Financial Aid. The Occupational Information Network (O*NET) is a free online database that contains hundreds of occupational definitions to help students, job seekers, businesses and workforce development professionals to understand today's world of work in the United States. Click this O*Net link (https://www.onetonline.org/link/summary/29-1171.00?redir=29-1199.03) for information on Nurse Practitioner.

The Nurse-Midwifery Certificate (23 credit hours) prepares advanced practice nurses to focus on the care and management of well women's primary and reproductive health care needs throughout the life span. The program content is family-centered, respectful of individual and cultural variations, and promotes health through individual choice and participation. Courses are offered online and on the KU Medical Center campus. Cost information for this certificate is available through Title IV-Federal Student Financial Aid. The Occupational Information Network (O*NET) is a free online database that contains hundreds of occupational definitions to help students, job seekers, businesses and workforce development professionals to understand today's world of work in the United States. Click this O*Net link (https://www.onetonline.org/link/summary/29-1161.00?redir=29-2099.04) for information on Nurse Midwives. The next available sequence begins Fall 2020. The application deadline is June 1, 2020.

Interprofessional Certificate Programs

The Health Informatics Certificate (19-20 credit hours) is designed to prepare clinicians and health care managers with skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. The graduate will be prepared for entry and mid-level positions within IT departments, advanced clinical departments, and as consultants and/or staff in organizations specializing in computer operations and knowledge management. This certificate program is open to applicants with graduate degrees (or pursuing graduate degrees) in any health-related discipline. All classes are offered online.

The Health Professions Educator Certificate (12 credit hours) is an interprofessional program that affords broad opportunities and necessary skills to develop healthcare education expertise in various roles within academic and clinical settings. Students complete applied teaching projects in each educator course, including a final student teaching capstone. Students may complete the Health Professions Educator
Certificate as a post-baccalaureate student with a health-related degree, as a post-graduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All required courses are online.

**Adult-Gerontology Acute Care Nurse Practitioner Certificate**

The Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) Certificate (19 credit hours) is designed to provide APRNs who have a baseline preparation in primary care with an opportunity for additional training in acute care, as part of an interprofessional healthcare team. The curriculum includes core concepts of the advanced practice nursing role in acute care settings, expanded models of acute care, care transitions, and age-related considerations of the adult-gerontology patient in acute care. The role of the AGACNP may include episodic management of a patient in a clinical specialty unit, following a caseload of patients during a hospitalization, or caring for patients across the acute care continuum.

Required didactic courses are offered online. Practicum courses use on-campus, face-to-face clinical learning experiences, with clinical placement opportunities within the University of Kansas Health System. Simulation spaces on the KU Medical Center campus are used for skills training. Application deadline is April 1 for Summer semester.

Application for the Adult-Gerontology Acute Care Nurse Practitioner Graduate Certificate is an online process. This program is one of several certificate programs offered in the Advanced Practice (AP) area by the School of Nursing. Detailed instructions on how to apply are posted on the School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html). The courses are offered in sequence beginning with the Summer semester. Application deadline: April 1 for Summer semester.

**Admission requirements:**

- Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Official transcripts from all course work taken at any institution are required
- Current registered nurse licensure in at least one state in the United States
- Minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

**English Language Requirements:** All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2554) in the Graduate Studies section of the online catalog.

The A/G AC NP Certificate requires completion of at least 19 credit hours of required coursework, earning at least a 3.0 (i.e., B equivalent) on a 4.0 GPA scale.

**Required Courses:**

- NRSG 971 Special Considerations for the Acute Care Nurse Practitioner, 1 credit hour
- NRSG 972 Advanced Pharmacology for the Acute Care Setting, 2 credit hours
- NRSG 973 Acute Care I: Adult/Gero NP, 3 credit hours
- NRSG 974 Acute Care II: Adult/Gero NP, 3 credit hours
- NRSG 975 Acute Care Practicum I: Adult/Gero NP, 4 credit hours
- NRSG 976 Acute Care Practicum II: Adult/Gero NP, 4 credit hours
- NRSG 977 Acute Care Practicum III: Adult/Gero NP, 2 credit hours

**Typical Course Plan:**

See "AG AC NP Curriculum Calendar"

**TECHNICAL STANDARDS FOR ADMISSION**

University of Kansas School of Nursing

I. **Introduction**

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. **Standards**

A. **Observation/Sensory-motor:** Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. **Communication:** Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. **Psychomotor:** Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to
collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Revised: May 9, 2014

Adult-Gerontology Primary Care Nurse Practitioner Certificate

The Adult-Gerontology Primary Care Nurse Practitioner Certificate develops the knowledge and skills required for advanced practice nurses to provide primary health care to a culturally diverse population of adults. The Adult-Gerontology Primary Care nurse practitioner focuses upon assessment and management of common acute and chronic health care problems of adult and older adult patients in the primary care setting. A variety of practice settings are utilized: primary care or internal medicine clinics; occupational health clinics; home based care; long-term, assisted living or post-acute care; rural health clinics; and other adult and geriatric sites.

Required didactic courses are offered online. Practicum courses **NRSG 903, NRSG 904 and NRSG 905** require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams. The A/G Primary Care NP Certificate program requires that students have completed an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited school of nursing. Three separate, comprehensive graduate-level courses in advanced pathophysiology, advanced assessment, and advanced pharmacology are required.

The annual application deadline is June 1 for the Fall semester.

**Admission requirements:**

- Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Official transcripts from all course work taken at any institution are required
- Current registered nurse licensure in at least one state in the United States
- Minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

**English Language Requirements:** All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.
See also Admissions (p. 2554) in the Graduate Studies section of the online catalog.

Certificate requirements:

- Certificate requirements are normally completed within two years of admission to the program although a maximum of four years is allowed.
- Applicants must possess the cognitive and emotional health required to utilize their intellectual abilities fully, exercise good judgment, and function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients.

C. Psychomotor: Applicants should have sufficient motor function to proficiency in areas such as the administration of medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client's history, physical exam findings and diagnostic studies.

Applicants must be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

Applicants should have sufficient motor function to proficiency in areas such as the administration of medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client's history, physical exam findings and diagnostic studies.

Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families.

The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic integrity is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards.

Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful
Family Nurse Practitioner Certificate

The program prepares advanced practice nurses to add expertise in the role of family nurse practitioner (FNP), a clinician who provides primary care in collaboration with other professionals to support health care for individuals, families, and communities. Students acquire knowledge, skills, and competencies for FNP practice, to manage primary health care needs of clients and families throughout the life span. The certificate courses include primary care theory courses, practice-focused clinical courses, and an intensive preceptorship experience. Courses are offered online and on the KU Medical Center campus, with precepted experiences in various community-based settings.

Required didactic courses are offered online. Practicum courses NRSG 916, NRSG 917 and NRSG 918 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams.

The Family NP Certificate program requires that students have completed an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited school of nursing. Three separate, comprehensive graduate-level courses in advanced pathophysiology, advanced assessment, and advanced pharmacology are required.

The annual application deadline is June 1 for the Fall semester.

Admission requirements:

- Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Official transcripts from all course work taken at any institution are required
- Current registered nurse licensure in at least one state in the United States
- Minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale

Total: 16 credits, 640 clinical hours

TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/ evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to...
elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Revised: May 9, 2014
Health Informatics

Emerging technologies are fundamentally changing the way we manage and apply knowledge. In addition, healthcare organizations must meet the challenges of the HITECH Act and Meaningful Use, HIPAA changes, as well as regulatory influences such as The Joint Commission and IOM. As a result, the need for trained healthcare informaticians has increased dramatically over the last few years. In order to appropriately select and use technology to improve healthcare and to meet the requirements of regulating bodies, health informatics professionals need training in the use informatics concepts and methodologies.

The Health Informatics Post-Graduate Certificate program meets this need by preparing students to:

1. apply health informatics using theoretical, conceptual, and experiential knowledge base
2. articulate a vision of health informatics in an organization in the context of multidisciplinary practice and complex healthcare delivery systems
3. implement and evaluate information systems that support multi-professional clinical/administrative practice
4. facilitate the delivery of evidence-based practice at point of care, and
5. sit for national Nursing, MD or graduate level certification exam as an expert informatician, as appropriate.

The advantage of this certificate program is that it offers an interprofessional learning experience and is open to graduates in all fields. This is an interprofessional program administered by the Center for Health Informatics (http://www.kumc.edu/health-informatics.html) which is sponsored by the School of Nursing.

The application process for the Health Informatics Post-Graduate Certificate program is an online process. Detailed instructions on how to apply are posted on the Center for Health Informatics (http://www.kumc.edu/health-informatics/certificate.html) website. Students are admitted for the fall and spring semesters only. Applications for the fall semester must be received by April 1st and by September 1st for the spring semester.

Admission Requirements:

• A master's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended both pre- and post-baccalaureate are required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

• A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale.

• Applicants, who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://www.kumc.edu/Documents/graduate%20studies/Min%20Eng%20Prof%202016-Oct.pdf).

• A background check (http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%202016-Oct.pdf) is required during the admission process; it may affect the student’s eligibility to enter the program.

• Three letters of recommendation from individuals who can assess your academic and professional background and potential for success in a post-master's certificate program.

• A personal statement regarding applicant's career objectives and purpose.

• A current resume or curriculum vitae.

• A satisfactory phone or in-person interview.

Applicants will be assessed on the above criteria and selected applicants will in the judgment of the admissions committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for successful advancement. In addition, the committee looks for applicants who will contribute academic, nonacademic, and socioeconomic diversity to the class. The committee is interested in evidence of capacity for mature and independent scholarship.

After an applicant has been admitted, the program may defer an applicant’s admission for one year after which time the applicant must submit a new application. Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs«.

Certificate Program Information: (p. 2566)

No student may work toward a graduate certificate without being accepted as a graduate certificate student in a specific graduate certificate program. Graduate certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral.

Graduate credit from another institution may not be transferred to a graduate certificate program.

Health Informatics Certificate

Building on the health informatics core courses, the graduate certificate program focuses on the theory and application of informatics, computer technology, knowledge management, and evidence-based practice that supports healthcare informatics and clinical decision-making. The program culminates with a mentored practicum experience and project.

The Post-Graduate Certificate in Health Informatics prepares students to:

1. Apply healthcare informatics using theoretical, conceptual, and experiential knowledge base
2. Articulate a vision of healthcare informatics in an organization in the context of multidisciplinary practice and complex healthcare delivery systems.
3. Implement and evaluate information systems that support multi-professional clinical/administrative practice.
4. Facilitate the delivery of evidence-based practice at point of care, and
5. Sit for national Nursing, MD or graduate level certification exam as an expert informatician, as appropriate.

Certificate requirements:
- Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of four years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate certificate coursework.
- Enrollment in a minimum of one (1) credit hour the semester the program is completed. Graduate certificates may not be granted retroactively.
- Successful completion of a minimum of 19 credit hours.
- Successful completion of the following courses:

Typical Plan of Study

The Health Informatics Post-Graduate Certificate program consists of 19 credit hours. The 3-credit hour practicum (IPHI 856) requires a total of 200 clock hours and may be taken only after the majority of coursework is complete. This practicum may be taken over 1-3 consecutive semesters and must include the last semester in the program.

The Master of Science in Health Informatics degree and Post-Master Certificate signify that the holder is prepared for entry into the practice of applied health informatics. Therefore, it follows that graduates must have the knowledge and skills necessary to function in a broad range of situations. The following abilities and expectations must be met by all students with or without accommodations admitted to the program.

1. Observation: Students must be able to observe: lectures, demonstrations, online written and recorded audio/visual material, online meetings, and research and practice situations. Observation necessitates the functional use of the senses of vision and hearing.
2. Communication: Applicants also must be able to communicate effectively and efficiently in English with other students, faculty, staff and mentors/preceptors. Communication includes not only speech, but also listening, reading, and writing. Effective communication
includes the ability to comprehend conversation, presentations, assigned readings, and the ability to present information verbally and in writing.

3. **Motor:** A student must have sufficient motor function to attend classes, prepare assignments, use a computer keyboard, and make public presentations if required. Course requirements will also include fieldwork in a variety of health organizations.

4. **Intellectual, conceptual, integrative, quantitative, and problem solving abilities:** An applicant must be able to understand and learn factual information from readings and didactic presentations, gather information independently, analyze and synthesize learned material, and apply that information. In addition, an applicant must possess the ability to understand and work with measurements, carry out calculations and engage in reasoning, analysis and synthesis based on the calculations. An applicant must be able to draw on all these abilities to be an effective problem solver.

5. **Behavioral and social attributes:** Integrity, reliability, self-direction, motivation, and the ability to work with diverse groups are qualities necessary for effective preparation for and practice in this field. A student must have the emotional health required for the full use of his or her intellectual ability, exercise of sound judgment, and timely completion of all responsibilities attendant to the completion of academic responsibilities.

**NOTE:** Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.

## Health Professions Educator Certificate

The Health Professions Educator Graduate Certificate (12 credit hours) is an interprofessional program that affords broad opportunities and necessary skills to develop healthcare education expertise in various roles within academic and clinical settings. Students complete applied teaching projects in each educator course, including a final student teaching capstone.

Students may complete the Health Professions Educator Certificate as a post-baccalaureate student with a health-related degree, as a post-graduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All required courses are online.

**Approved as a Stackable Program:** To encourage career and academic progression, students who have completed the Health Professions Educator Certificate may apply the four certificate courses (NRSG 870, 871, 873, 874) towards degree requirements for the Master of Science in Nursing, Nursing Education specialty area.

Application for the Health Professions Educator Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html). Application deadlines: June 1 for Fall semester; April 1 for Summer semester; November 1 for Spring semester.

**Admission requirements:**

- Baccalaureate degree or higher in nursing or other health related discipline.
- Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

**English Language Requirements:** All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2554) in the Graduate Studies section of the online catalog.

**Certificate requirements:**

- Certificate requirements are normally completed within one to two years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
- Enrollment in a minimum of one credit hour the semester program is completed
- Graduate certificates may not be granted retroactively
- Successful completion of the following online courses:

**TECHNICAL STANDARDS FOR ADMISSION**

**University of Kansas School of Nursing**

**I. Introduction**

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/ evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or
II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Revised: May 9, 2014

Nurse-Midwifery Certificate

The Nurse-Midwifery Graduate Certificate program (23 credit hours) prepares advanced practice nurses to focus on the care and management of well women's primary and reproductive health care needs throughout the life span. The program content is family-centered, respectful of individual and cultural variations, and promotes health through individual choice and participation. Courses are offered online and on the KU Medical Center campus.

Cost information for this certificate is available through Title IV-Federal Student Financial Aid. The Occupational Information Network (O*NET) is a free online database that contains hundreds of occupational definitions to help students, job seekers, businesses and workforce development professionals to understand today's world of work in the United States. Click this O*Net link (https://www.onetonline.org/link/summary/29-1161.00?redir=29-2099.04) for information on Nurse-Midwifery (29-1161.00).

The next available sequence begins Fall 2020. The application deadline is June 1, 2020.

The application for the Nurse-Midwifery Graduate Certificate is an online process. This program is one of several certificate programs offered in the Advanced Practice (AP) area by the School of Nursing. Detailed instructions on how to apply are posted on School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-
apply.html). The courses are offered online in sequence beginning with the Fall semester. Application deadline: June 1 for Fall semester.

Admission requirements:

- Completion of an advanced practice registered nurse educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Current registered nurse licensure in at least one state in the United States
- Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
- Official transcripts from all course work taken at any institution are required
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2554) in the Graduate Studies section of the online catalog.

Certificate requirements:

- Certificate requirements are normally completed within two to three years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
- Enrollment in a minimum of one credit hour the semester program is completed
- Graduate certificates may not be granted retroactively
- Successful completion of the following courses:

TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/ evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of
E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University's Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing's theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Revised: May 9, 2014

Psychiatric/Mental Health Nurse Practitioner Certificate

The Psychiatric/Mental Health Nurse Practitioner Graduate Certificate program (24 credit hours) prepares advanced practice nurses to diagnose and treat common mental health conditions in general medical settings and to deliver effective psychiatric care in mental health settings. Students are prepared to apply knowledge and skills in interpersonal, psychotherapeutic, and psychopharmacologic interventions for individuals, groups, and families with psychiatric disorders. All courses are online and offered in sequence every other year. Spring 2020 will begin the next available course sequence.

Cost information for this certificate is available through Title IV-Federal Student Financial Aid. Additionally, the Occupational Information Network (O*NET) is a free online database that contains hundreds of occupational definitions to help students, job seekers, businesses and workforce development professionals to understand today's world of work in the United States. Click this O*Net link (https://www.onetonline.org/link/summary/29-1171.00) for information on Advanced Practice Psychiatric Nurses (29-1141.02).

Application for the Adult Psychiatric/Mental Health Nurse Practitioner Certificate is an online process. This program is one of several certificate programs offered in the Advanced Practice (AP) area by the School of Nursing. Detailed instructions on how to apply are posted on School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html).

Admission requirements:

• Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing
• Current registered nurse licensure in at least one state in the United States
• Official transcripts from all course work taken at any institution are required
• Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
• Potential to provide expert service and leadership in functional area
• Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2554) in the Graduate Studies section of the online catalog.

Certificate requirements:

• Certificate requirements are normally completed within two to three years of admission to the program although a maximum of four years is allowed
• Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
• Enrollment in a minimum of one credit hour the semester program is completed
• Graduate certificates may not be granted retroactively
• Successful completion of the following courses:
II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or
University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Revised: May 9, 2014
Master of Science in Health Informatics

Professionals in applied Health Informatics have skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. Graduates will be prepared for entry and mid-level positions with hospital or clinic informatics departments, electronic health record (EHR) vendors, public health organizations, and as consultants and/or staff in organizations that specialize in knowledge management. Graduates also have the skills to enter the growing field of health information exchange, which includes regional health information organizations and the emerging personal health records. In addition to a foundation in applied health informatics, special skills will be acquired in organizational change, project management and impact evaluation.

This is an interprofessional program administered by the Center for Health Informatics (http://www.kumc.edu/health-informatics.html) which is sponsored by the School of Nursing. The master's degree is conferred by the combination of all three KUMC schools: Health Professions, Medicine, and Nursing. The program is designed for health professionals who want a specialty focus in applied health informatics. The advisory council of this program reflects a commitment to interprofessional collaboration. Faculty with foundations in health policy and management, public health, nursing, and project management partner to offer courses for this master's degree in health informatics.

The M.S. in Health Informatics program (MSHI) endeavors to fulfill its responsibilities to the changing needs of society by selecting applicants who, in the judgment of the admissions committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for successful advancement. In addition, the committee looks for applicants who will contribute academic, nonacademic, and socioeconomic diversity to the class. The committee is interested in evidence of capacity for mature and independent scholarship.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Master of Science in Health Informatics (http://nursing.kumc.edu/academics/master-in-health-informatics.html) website.

Admission requirements:

- A bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://www.kumc.edu/Documents/graduate%20studies/Min%20Eng%20Prof%2016-Oct.pdf).
- A current resume or curriculum vitae.
- A personal essay outlining the applicant’s reasons for wanting to pursue graduate education in health informatics, career objectives, and any other information that would help the admissions committee get to know the applicant.
- Three letters of recommendation preferably from employers, instructors, or other persons who can assess the applicant’s academic and professional potential. Letters are submitted per instructions provided for the online application process.
- An informational interview with a Center for Health Informatics representative.
- A background check (http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%2016-Oct.pdf) is required during the admission process; it may affect the student’s eligibility to enter the program.
- A graduate level statistics course (may be completed prior to admission or during the first semester of enrollment.)

Applicants not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

International Students

Due to the number of required online courses for this degree, the Health Informatics Program at KUMC does not meet the U.S. student visa requirements at this time. Therefore, we are unable to accept individuals who are on student visas. If you received your university education outside of the U.S. or are in the U.S. on another type of visa, please contact HealthInformatics@kumc.edu for additional application requirements.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs-.pdf.

The Master's in Health Informatics curriculum is divided into three cores: informatics, leadership, and research along with a discipline-specific emphasis track. A strength of the program is the close relationship between the students and their informatics advisers. The student and advisor will develop a plan of study that meets the career goals of the student.

Degree requirements:

- Degree requirements can be completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 4 years of admission to the program.
- Completion of a minimum of 40 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of a general examination (http://www.kumc.edu/Documents/graduate%20studies/Masters%20Exam-Defense%2016-Oct.pdf) the semester the student will graduate.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of the Health Informatics Core (minimum 17 credit hours.) These courses provide the core knowledge and skills essential to the practice of health informatics.

The Master of Science in Health Informatics degree and Post-Master Certificate signify that the holder is prepared for entry into the practice of applied health informatics. Therefore, it follows that graduates must have the knowledge and skills necessary to function in a broad range of situations. The following abilities and expectations must be met by all students **with or without accommodations** admitted to the program.

1. **Observation**: Students must be able to observe: lectures, demonstrations, online written and recorded audio/visual material, online meetings, and research and practice situations. Observation necessitates the functional use of the senses of vision and hearing.
2. **Communication**: Applicants also must be able to communicate effectively and efficiently in English with other students, faculty, staff and mentors/preceptors. Communication includes not only speech, but also listening, reading, and writing. Effective communication includes the ability to comprehend conversation, presentations, assigned readings, and the ability to present information verbally and in writing.

3. **Motor**: A student must have sufficient motor function to attend classes, prepare assignments, use a computer keyboard, and make public presentations if required. Course requirements will also include field work in a variety of health organizations.

4. **Intellectual, conceptual, integrative, quantitative, and problem solving abilities**: An applicant must be able to understand and learn factual information from readings and didactic presentations, gather information independently, analyze and synthesize learned material, and apply that information. In addition, an applicant must possess the ability to understand and work with measurements, carry out calculations and engage in reasoning, analysis and synthesis based on the calculations. An applicant must be able to draw on all these abilities to be an effective problem solver.

5. **Behavioral and social attributes**: Integrity, reliability, self-direction, motivation, and the ability to work with diverse groups are qualities necessary for effective preparation for and practice in this field. A student must have the emotional health required for the full use of his or her intellectual ability, exercise of sound judgment, and timely completion of all responsibilities attendant to the completion of academic responsibilities.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University's Office for Academic Accommodations.
Accreditation Council for Pharmacy Education (accredit.org, the official accrediting body for American schools of pharmacy.

Professional Program

The School of Pharmacy offers a 6-year Doctor of Pharmacy (p. 2475) program. The 2-year pre-pharmacy portion of the program may be taken at any accredited 2- or 4-year college.

After acceptance into the School of Pharmacy students complete the first 2 years of the Doctor of Pharmacy professional degree program (3rd and 4th year of college) are then awarded a Bachelor of Science in Pharmaceutical Studies (BSPS). Students must then go on to complete the remaining 5th and 6th professional years to be awarded the Doctor of Pharmacy (Pharm.D.) degree, which makes them eligible to sit for licensure examinations (NAPLEX and MPJE). These degree programs are available to students on both the Lawrence and Wichita campuses.

University Honors Program

The school encourages qualified students entering KU as freshman to participate in the University Honors Program (http://www.honors.ku.edu/).

Graduate Programs

The School of Pharmacy offers graduate programs through the departments of

- Medicinal Chemistry (p. 2478),
- Pharmaceutical Chemistry (p. 2485),
- Pharmacology and Toxicology (p. 2492), and
- Pharmacy Practice (p. 2498).

The Department of Pharmacy Practice offers the Master of Science in Pharmacy degree. The other 3 departments offer both the M.S. and the Ph.D. with majors in their respective disciplines. Programs in Neurosciences (p. 2482) are offered in cooperation with KU Medical Center.

Requirements for admission and baccalaureate preparation vary with each department and are discussed separately. Address inquiries and correspondence about graduate studies to the program or department of interest.

Undergraduate Scholarships and Financial Aid

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/), located at the KU Visitor Center at 1502 Iowa St, Lawrence, KS 66045-7518, 785-864-4700, financialaid@ku.edu, administers grants, loans, and other need-based financial aid. In recent years, about $29 million has been processed annually through the office, including about $2 million annually in short-term loans. Prospective students should contact Financial Aid and Scholarships. Some financial aid programs have application deadlines as early as January 15. The earlier an application is received and the student’s file is completed, the better the chance of obtaining financial aid.

For information about scholarships from KU and various outside agencies based on academic merit, diversity, major, and residence, visit Scholarship Information for KU Students (http://affordability.ku.edu/cs/index.shtml/).
School of Pharmacy Financial Aid
The School of Pharmacy, in cooperation with Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/), offers financial assistance to pharmacy students. Applications are received in the dean’s office according to an announced schedule each year. Awards are based on merit and need. Assistance is available for both entering and continuing students.

Graduate Fellowships and Assistantships
For information about graduate assistantships, contact the School of Pharmacy (http://pharmacy.ku.edu/). Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU. Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/) administers grants, loans, and need-based financial aid.

Undergraduate University Regulations
For information about university regulations, see Regulations (p. 14) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Academic Misconduct
Instructors detecting academic misconduct must act in accordance with the School of Pharmacy (http://policy.ku.edu/pharmacy/academic-professional-scholarly-conduct/) and Faculty Senate Rules and Regulations (http://policy.ku.edu/governance/USRR/).

Students experiencing difficulties or problems with a particular course or having complaints or grievances about a particular instructor are urged to discuss the problem in a timely fashion with the instructor. If the student feels awkward or uncomfortable doing this, he or she should see the chair of the instructor’s department, or if necessary, an associate dean. The chair or dean brings the matter to the instructor’s attention, preserving the student’s anonymity, if so requested.

Credit/No Credit
A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one pre-pharmacy course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (https://documents.ku.edu/policies/governance/USRR.htm#art2sec2u/). All professional coursework is graded. Warning: Undesirable consequences regarding admission may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Exemptions and Petitions
A student may gain an exemption or academic credit from introductory pre-pharmacy courses by successfully completing the Advanced Placement or College Level Examination Program examinations or by other recognized means. A total of 208 credit hours of college-level course work is still required for the PharmD degree. In meritorious cases, the department offering a specific course may waive course prerequisites. Students whose educational goals would be better served by courses other than those prescribed in the normal curriculum may petition the admissions and/or curriculum committee(s) for permission to make appropriate course substitutions.

Graduation with Distinction and Highest Distinction
Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. Grade-point averages are determined on the basis of credit hours taken while enrolled in the School of Pharmacy. The list is compiled each spring and includes July, December, and May graduates.

Health Insurance and Immunizations
The School of Pharmacy requires students to provide proof of health insurance and professional insurance coverage and immunizations for MMR, hepatitis B, varicella, and tetanus, and a current TB skin test.

Honor Roll
Students with grade-point averages of 3.5 who have completed at least 12 professional hours are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

Maximum Community College Credit Allowed
The School of Pharmacy allows a maximum of 68 credit hours from any accredited college or university toward completion of the PharmD degree prerequisites. All professional coursework must be completed at a college or school of pharmacy that is accredited by ACPE. To graduate from KU School of Pharmacy, all P3 and P4 coursework and rotations (APPEs) must be completed at KU.

Prerequisites and Corequisites
In meritorious cases, course prerequisites may be waived by the department offering the course. Waiver is not granted if the prerequisite course was taken and failed.

Probation
Probation
A student will be placed on academic probation if they:

1. fail to attain a 2.5 grade point average of professional coursework in any semester, or whose overall professional course grade-point average falls below 2.5.
   a. A student falling below the minimum grade point average of 2.5 will be required to develop and submit an individualized remediation plan to their Academic Faculty Advisor and the Chair of the Academic Standings committee.

2. fail an introductory or advanced pharmacy practice experience.
   a. A student failing either an IPPE or APPE will be required to develop an individualized remediation plan with the Assistant Dean for Experiential Education and the Associate Deans for Administration and Academic Affairs.

3. fails two or more milestone exams within the six-semester pharmacy skills laboratory curriculum.

4. fails to comply with programmatic requirements in a timely manner (see the pharmacy student handbook (http://policy.ku.edu/pharmacy/student-handbook/)).
Suspension
A student who fails or does not make timely progress in a course or courses while a student in the School of Pharmacy may be placed on suspension. Additionally, a student who fails to comply with the School conduct policy, or academic and/or programmatic requirements may be placed on suspension.

Dismissal
Students will be dismissed from school if they:

1. fail to attain a 2.5 grade-point-average in all courses or in professional courses for any semester while on probation.
2. receive a grade of “F” in 40 percent or more of the credit hours taken during any semester (including semesters in which they are enrolled in only one course).
3. fail an individual course twice.
4. fail two advanced pharmacy practice experiences (APPEs).
5. they fail a milestone exam within the six-semester pharmacy skills laboratory curriculum while on probation as a result of prior milestone failure or academic poor performance (i.e. professional GPA < 2.5)
6. are placed on probation or suspended for a second academic semester for failure to comply with programmatic requirements.

Petitions
Students dismissed for poor scholarship may file a written petition with the academic standing committee for reinstatement. The committee’s decision is final. The committee normally takes one of the following actions:

1. The student is allowed to enroll, often with specific recommendations regarding strategies for restoring good academic standing.
2. The committee may deny the petition.

Courses Taken Outside the School
Students on probation or in nondegree-student status may take courses outside the School of Pharmacy, or at other institutions, to improve the grade-point average. Prior approval is required, and in general, only courses that count toward graduation are honored. All professional coursework must be completed at a college or school of pharmacy that is accredited by ACPE.

Return to Good Standing
Students will return to good standing when the overall pharmacy grade point average reaches 2.5. Students are required to be in good standing (i.e. GPA of 2.5 or higher) to be eligible to enroll and participate in advanced pharmacy practice experiences. If a student who was placed on academic probation due to milestone exam failure passes all the milestone exams during the subsequent semester they will be removed from probation (only if their professional GPA is also at or above 2.5).

1. Students with professional GPAs at or above 2.5 who are on academic probation due to milestone failure(s) at the end of their P3 spring will be required to complete a remediation rotation with a faculty member, preferably in a practice setting similar to the milestone failure. These students will need to pass the remediation rotation in order to start in their required 9 APPE rotations.
2. Courses taken outside the School: Only courses completed within an ACPE accredited institution may be used to increase a student’s professional GPA. Authorization to complete or use non-KU School of Pharmacy professional coursework requires prior Curriculum Committee approval. Credit for coursework completed as part of a dual degree (e.g. MBA, MSCR, etc), academic minors (e.g. business, etc), or other coursework outside the School of Pharmacy are not included in GPA calculations to determine a student’s academic standing or eligibility for progression to the P4 year.

Required Work in Residence
To be eligible for the Doctor of Pharmacy degree, all P3 and P4 coursework and rotations (APPEs) must be completed in residence at the KU School of Pharmacy

Terminal-Year Courses
A student cannot enroll in the principal terminal-year pharmacy practice experiential rotations unless he or she has a grade-point average in professional courses of at least 2.5 and has completed all didactic coursework required for the degree and expected programmatic requirements as outlined in the student handbook.

Graduate University Regulations
For information about university regulations, see Regulations (p. 14) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Academic Forgiveness
The school does not participate in academic forgiveness.

Academic Misconduct
Students experiencing difficulties or problems with a particular course or having complaints or grievances about a particular instructor are urged to discuss the problem in a timely fashion with the instructor. If the student feels awkward or uncomfortable doing this, he or she should see the chair of the instructor's department, or if necessary, the dean. The chair or dean brings the matter to the instructor's attention, preserving the student's anonymity, if so requested.

Instructors detecting academic misconduct must act in accordance with the School of Pharmacy (http://policy.ku.edu/pharmacy/academic-professional-scholarly-conduct/) and Faculty Senate Rules and Regulations (http://www.policy.ku.edu/).

Credit/No Credit
The Credit/No Credit option is not authorized for graduate students’ enrollments, including, but not limited to, courses taken to fulfill the research skills requirements, undergraduate deficiencies, etc.

Graduation with Distinction and Highest Distinction
Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. Grade-point averages are determined on the basis of credit hours taken while enrolled in the School of Pharmacy. The list is compiled each spring and includes July, December, and May graduates.
Health Insurance and Immunizations

The School of Pharmacy requires students to provide proof of health insurance and professional insurance coverage and immunizations for MMR, hepatitis B, varicella, and tetanus, and a current TB skin test.

Requirements to Practice Pharmacy in Kansas

A license is required to practice pharmacy. State boards of pharmacy grant licenses to students who successfully pass board examinations. In all states, eligibility to take board examinations requires graduation from an accredited school of pharmacy and completion of required experiential training. The Kansas State Board of Pharmacy (http://www.kansas.gov/pharmacy/) requires graduates of schools of pharmacy to indicate any current, pending, or previous convictions, fines, violations, or disciplinary action that may affect their eligibility to take the licensing examination. Pharmacists generally may transfer their licenses from a state in which they completed the entire examination to another state, provided the 2 states had similar practical experience requirements at the time the pharmacist was licensed by examination. Most pharmacists find it useful to maintain a license in the state where they were licensed by examination. By doing so, they can preserve their eligibility to transfer to another state.

Pharmacists in Kansas must renew their licenses biennially by paying the required fee and providing proof that they have completed the required 30 clock hours of continuing education.

The Kansas Board of Pharmacy requires completion of an appropriate degree from an accredited school of pharmacy plus 1,500 hours of practical experience in pharmacy. At the conclusion of the program, students are certified to the Kansas State Board of Pharmacy as having completed the entire externship requirement (1,500 hours) and are therefore eligible to take the Kansas licensure examination. Students must register as interns with the board at matriculation in the School of Pharmacy. Students desiring to compile an official record of pharmacy experience obtained on their own initiative may do so by submitting this information to the Kansas State Board of Pharmacy. Practical experience above and beyond the 1,500 required hours may be gained by working as a licensed pharmacy student intern in Kansas, then transferring the hours to another state.

Medicinal Chemistry Courses

MDCM 601. Medicinal Biochemistry I. 3 Hours.
A study of the biochemical principles of macromolecular structure and function, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. LEC.

MDCM 603. Medicinal Biochemistry II. 3 Hours.
A study of the biochemical principles of macromolecular structure and function, biosynthesis, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. Prerequisite: MDCM 601. LEC.

MDCM 606. Phytochemical Agents. 1 Hour.
This course will acquaint the pharmacy students with the current status of botanical use in the United States. A basic foundation will be provided so that the pharmacist can properly assess the appropriateness and usefulness of various phytomedicines and combinations in managing certain ailments with regard to efficacy, safety, potential toxicity, and potential herb-drug interactions. Prerequisite: MDCM 601 or instructor permission. LEC.

MDCM 607. Clinical Pharmacognosy. 1 Hour.
The course will provide a technical background for understanding the scientific basis underlying the use of herbal medicines. This will be followed by practical information about the pharmacological and chemical properties as well as clinical uses of herbal medicines. Active student participation in discussing the properties of these non-prescription medicinals is expected. Prerequisite: MDCM 601 or instructor consent. LEC.

MDCM 625. Medicinal Chemistry I: Neuroeffector and Cardiovascular Agents. 4 Hours.
A study, from the molecular viewpoint, of the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action; this course emphasizes drugs affecting the cardiovascular and central nervous systems. Prerequisite: CHEM 626 and MDCM 601. LEC.

MDCM 626. Medicinal Chemistry II: Homeostatic Agents. 4 Hours.
A continuation of MDCM 625 with special emphasis on anticancer, antiviral, antibacterial, antifungal, antidiabetic, anticholesterol, and steroidal drugs. Prerequisite: MDCM 625. LEC.

MDCM 690. Undergraduate Research. 1-5 Hours.
Research in medicinal chemistry. Students will be assigned to a laboratory research project. Prerequisite: Consent of instructor. IND.

MDCM 692. Problems in Medicinal Chemistry. 1-5 Hours.
This course encompasses original work on a laboratory problem of limited scope, honors reading assignments from medicinal chemistry literature, or in-depth discussions of assigned topics. Prerequisite: Consent of instructor. IND.

MDCM 701. Advanced Medicinal Biochemistry I. 3 Hours.
A study of the principles of macromolecular structure and function, biosignaling, bioenergetics and metabolism, with an emphasis on the relationship between biochemistry and medicine. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 703. Advanced Medicinal Biochemistry II. 3 Hours.
A study of the principles of basic enzymology, including chemical reactions, biosynthesis, and metabolism. In addition, the course will cover lipids, hormones, vitamins, and minerals. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 710. Chemistry of Drug Action I. 4 Hours.
This course provides an overview of topics central to the understanding and practice of contemporary medicinal chemistry. It illustrates the interplay of anatomy and physiology with the organic-, bio- and analytical chemistry of drugs in the body. Topics covered include physiological mechanisms and disease processes; cell structure and function; basic intermediary metabolism; basic principles underlying drug action including the physicochemical properties of drugs and how these affect the interaction of drugs with living systems; chemical and biological manipulation of the absorption, distribution, metabolism and excretion of drugs and prodrugs; kinetics and inhibition of enzymes and transporters; quantitation and molecular modeling of drug binding to targets. Prerequisite: One year of organic chemistry, one semester of biochemistry, and one college-level course in biology. LEC.

MDCM 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation
and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: Consent of instructor. LEC.

MDCM 785. Natural Products of Medicinal Significance. 2 Hours. A discussion of bioassay-directed screening, the isolation, structure determination, biosynthesis, partial synthesis and total chemical synthesis of organic natural products of medicinal significance. Examples of the classes of compounds to be considered include steroid hormones, cardiac glycosides, alkaloids, antibiotics, terpenes, and the like. Prerequisite: Graduate standing or consent of instructor. LEC.

MDCM 790. Chemistry of Drug Action II. 3 Hours. A discussion of the principles of contemporary drug design with specific examples chosen from the original literature. This course covers the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action. Prerequisite: Graduate standing or completion of MDCM 625 and MDCM 626. LEC.

MDCM 798. Master's Literature Seminar in Medicinal Chemistry. 1 Hour. Literature seminar for graduate students in Spring of their 2nd year. Prerequisite: Graduate students in 2nd year of program. LEC.

MDCM 799. Research Seminar in Medicinal Chemistry. 1 Hour. Reports by research students and discussions of developments in the field not covered in formal courses. LEC.

MDCM 801. Issues in Scientific Integrity. 1 Hour. Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientists in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801, PHCH 801 and PHCH 802.) LEC.

MDCM 816. Careers in the Biomedical Sciences. 1 Hour. Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816, and PHCH 816.) Prerequisite: Permission of instructor. SEM.

MDCM 860. Principles and Practice of Chemical Biology. 3 Hours. A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.

MDCM 895. Research in Medicinal Chemistry. 1-12 Hours. Hours and credit to be arranged. RSH.

MDCM 899. Master's Thesis. 1-12 Hours. Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Consent of instructor. THE.

MDCM 950. Advanced Topics in Medicinal Chemistry: ____. 1-3 Hours. An in-depth discussion of topics of current interest to medicinal chemists. Prerequisite: Consent of instructor. LEC.

MDCM 980. Proposal Preparation and Seminar. 3 Hours. Presentation of a literature seminar and writing an original NIH-style research proposal concerning contemporary problems in medicinal chemistry. Prerequisite: Consent of instructor. LEC.

MDCM 999. Doctoral Dissertation. 1-12 Hours. Hours and credit to be arranged. Original chemical research in the synthesis and development of medicinal agents, elucidation of the chemical mechanisms of drug action, drug metabolism, and drug toxicities. THE.

Neuroscience Courses

NURO 710. Advanced Neurobiology. 3 Hours. The course will build an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics will include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor. LEC.

NURO 775. Chemistry of the Nervous System. 3 Hours. A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, MDCM 775, PTX 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent. LEC.

NURO 799. Neuroscience Seminar Series. 2 Hours. Presentations of research papers by faculty, post-doctoral research associates, and graduate students. All graduate students in the Neuroscience program participate in this seminar series throughout their period of training. Each student has to present a seminar once every semester. Presentations by students are evaluated by other graduate students and faculty at the end of each seminar. (Same as NEUS 799.) Prerequisite: Graduate standing in the Neuroscience program. LEC.

NURO 800. Neuroscience Teaching Principles. 2 Hours. This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in Neuroscience. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with faculty whom he or she is assisting in preparation of presentation materials and tests. Each student will be evaluated by the faculty mentor and by the students in the class taught. Prerequisite: Graduate standing in Neuroscience. LEC.

NURO 801. Issues in Scientific Integrity. 1 Hour. Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, PTX
801, PHCH 801 and PHCH 802.) Prerequisite: Graduate standing in the Neuroscience program. LEC.

**NURO 825. Research in Neuroscience. 1-10 Hours.**
Original investigations at an advanced level in the areas of neuroscience. The research by each student will be performed in the laboratory of one of the faculty mentors of the graduate program in Neuroscience. Prerequisite: Graduate standing in the Neuroscience program. LEC.

**NURO 844. Neurophysiology. 3 Hours.**
Somatosensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as NEUS 844 and PHSL 844.) Prerequisite: PHSL 846 or equivalent and consent of instructor. LEC.

**NURO 846. Advanced Neuroscience. 5 Hours.**
Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHCL 846, PHSL 846 and NEUS 846.) Prerequisite: Permission of the course director. LEC.

**NURO 847. Developmental Neurobiology. 2 Hours.**
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847, PHSL 847, and NEUS 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor. LEC.

**NURO 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.**
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer's, Parkinson's, Huntington's, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down's syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, PHCL 848, PHSL 848, and NEUS 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor. LEC.

**NURO 899. Neuroscience Master's Thesis. 1-11 Hours.**
Hours and credit for this course to be arranged with the mentor. Independent investigation of a research problem in neuroscience, but of limited scope. Prerequisite: Graduate standing in the Neuroscience program and consent of mentor/instructor. THE.

**NURO 999. Neuroscience Doctoral Dissertation. 1-11 Hours.**
Hours and credit for this course to be arranged with the mentor. Conduct of original investigation in neurosciences. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor. THE.

**Pharmacology and Toxicology Courses**

**P&TX 630. Pharmacology I. 4 Hours.**
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in P&TX 630 include, general principles of pharmacokinetics and pharmacodynamics, molecular biology, pharmacogenomics, and pharmacology of the nervous system. Prerequisite: BIOL 646 or equivalent. LEC.

**P&TX 631. Pharmacology II. 3 Hours.**
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: PTX 630 and BIOL 400 or equivalent. LEC.

**P&TX 632. Pharmacology III. 3 Hours.**
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: PTX 630 and PTX 631. LEC.

**P&TX 633. Pharmacology IV. 3 Hours.**
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in PTX 633 include cardiovascular and renal pharmacology. Prerequisite: PTX 630, PTX 631 and PTX 632. LEC.

**P&TX 640. Toxicology. 2 Hours.**
General principles of toxicology, treatment, and management of accidental poisoning, and current topics of interest. Prerequisite: PTX 630, PTX 631, and PTX 632. LEC.

**P&TX 642. Obesity, Diabetes, and Metabolic Syndrome: Current Concepts. 1 Hour.**
The objective of this course is to provide students with an opportunity to read, examine, and report on a broad array of topics relevant to diabetes and obesity. Students will be given broad latitude to propose topics of interest to them within the area of diabetes and obesity. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them in the field of diabetes and obesity, prepare a 30 min presentation and deliver it to the class for discussion. Prerequisite: PTX 630. LEC.

**P&TX 643. Current Concepts of Neurodegenerative Disease. 1 Hour.**
Neurodegenerative diseases, such as Alzheimer’s and Parkinson’s diseases, are associated with older age and/or enhanced oxidative stress. The possible causes for the development and progression of these diseases with relation to current research in the field will be discussed. Additionally, a summary of available and suggested future treatments will be given. Prerequisite: PTX 630. LEC.

**P&TX 644. Adverse Drug Events. 1 Hour.**
The objective of this course is to alert students to common and preventable adverse drug events. This course will provide students with an opportunity to read, examine, and report on a broad array of topics relevant to adverse drug events. Students will be given broad latitude to propose topics of interest to them within the area of adverse drug events. In addition, students can report on common and preventable food-drug, herb-drug, and disease-drug interactions. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them among a list of provided topics, prepare a 30 minute presentation and deliver it to the class for discussion. Prerequisite: 3rd, 4th, or 5th professional year standing in the School of Pharmacy. LEC.

**P&TX 645. Neurobiological Basis of Addiction: Physiological, Biochemical, Pharmacological & Treatment Concepts. 1 Hour.**
Several addictions will be discussed including addictions to alcohol, cocaine, methamphetamine, gambling, and others as time permits. The physiology, biochemistry, pharmacology and available treatments
for these addictions will be reviewed. The role of pharmacotherapies will be discussed, particularly as they relate to the molecular basis of addiction. Behavioral and psychological approaches also will be examined. Prerequisite: Completion of PTX 632 or special permission from faculty. LEC.

P&TX 646. Current Concepts of Psychotropic Medication. 1 Hour. This course provides information regarding commonly used psychotropic medications, or any drug that affects brain activities associated with mental processes and behavior. This includes, but are not limited to, the categories of antipsychotics, mood stabilizers, anti-anxiety (anxiolytics), antidepressants, and stimulants. The range of topics from basic biology to drug-drug interactions will be explored in the course. Groups of three students will identify a topic of interest to them in the field of psychotropic drugs and affect, mood, or behavior, prepare a 30 min presentation, and deliver it to the class for discussion. Prerequisite: PTX 630. LEC.

P&TX 694. Undergraduate Laboratory: Research in Pharmacology and Toxicology. 1-5 Hours. Original research on a laboratory problem of limited scope. This course cannot count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: Consent of instructor. IND.

P&TX 698. Library Problems in Pharmacology and Toxicology. 1-5 Hours. Original library review of a limited special topic in pharmacology and toxicology. The student will write a review in his or her report. This course may count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: PTX 635 and consent of instructor. IND.

P&TX 700. Professional Issues in the Biomedical Sciences. 2 Hours. A course designed to assist doctoral students in the biomedical sciences in their professional development by providing presentations, discussions, and practical experiences related to career planning. Topics include diverse career opportunities and expectations of each, preparation of vitae/resumes and other elements of a successful job search, writing scientific papers and dealing with editors, developing programmatic research programs, balancing professional obligations, advancing through promotions, and related topics. Prerequisite: Graduate standing in pharmacology and toxicology. LEC.

P&TX 730. Advanced Pharmacology I - CNS and ANS. 2 Hours. A detailed study of the fundamentals of autonomic nervous system, central nervous system, and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 731. Advanced Pharmacology II - Cardiovascular and Renal System. 2 Hours. A detailed study of the fundamentals of cardiovascular system, renal system and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 732. Advanced Pharmacology III - Immunology and Inflammatory Diseases. 2 Hours. A detailed study of the fundamentals of immunology and inflammation and their pharmacology. The student will attend PTX 631 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 733. Advanced Pharmacology IV - Endocrinology. 2 Hours. A detailed study of the fundamentals of endocrinology and associated pharmacology. The student will attend PTX 633 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 740. Advanced Biotechnology. 3 Hours. An examination of basic principles of molecular biology, immunology, and protein chemistry as they apply to the identification, production, stability, delivery, and monitoring of new therapeutic agents provided by the expanding biotechnology industry. Students will attend lectures in PTX 633 and meet separately with faculty for additional discussions of more advanced material on these topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology. LAB.

P&TX 741. Biomedical Statistics. 3 Hours. This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: PTX graduate student status in good academic standing. LEC.

P&TX 742. Experimental Pharmacology. 4 Hours. Experimental approaches to understanding mechanism of drug action. Use of drugs as tools to understand functioning of biological systems will also be stressed. Historically important experiments will be discussed along with experiments which are currently used to define drug mechanisms. Topics will include: dose-response, drug receptors, drug metabolism, chemotherapy as well as autonomic CNS, cardiovascular and renal pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 747. Molecular Toxicology. 2 Hours. A detailed study of the fundamentals of the experimental methods used in a modern toxicology laboratory. The student will attend PTX 640 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 750. Pharmacology I- Introduction to Pharmacology and Biotechnology. 3 Hours. An introduction to the basic principles of biochemistry and molecular biology as well as pharmacokinetics and pharmacodynamics of drug action. Additional lectures will introduce students to principles of genomics, transgenic technologies and microscopy. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 751. Pharmacology II - Endocrine Pharmacology. 2 Hours. A detailed study of the fundamental concepts of endocrinology with an emphasis on the pathophysiological details of diabetes and the pharmacology of treatment. Brief discussions on hypothalamic/pituitary, reproductive, thyroid and adrenal endocrinology and pharmacology will be presented. Prerequisite: Graduate standing in the Distance M.S. Program
Pharmacology and Toxicology, and completion of PTX 750 and PTX 785. LEC.

**PTX 752. Pharmacology III- Central Nervous System and Autonomic Nervous System. 3 Hours.**
A detailed study of the fundamental concepts of the autonomic nervous system, central nervous system, and select diseases of the CNS and their pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

**PTX 753. Pharmacology IV- Cardiovascular and Renal System. 2 Hours.**
A detailed study of the fundamental principles of the cardiovascular system, renal system and their associated pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 752. LEC.

**PTX 754. Pharmacology V - Immunopharmacology, Infectious Diseases and Gastrointestinal Pharmacology. 2 Hours.**
This course is a detailed study of the fundamental concepts of immunology, inflammatory-related diseases and immunopharmacology, infectious diseases and gastrointestinal pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

**PTX 755. Molecular Toxicology. 2 Hours.**
A detailed study of the fundamentals of the toxicology, drug transformations and the mode of toxicity of various drug classes. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

**PTX 757. Biomedical Statistics. 3 Hours.**
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. LEC.

**PTX 775. Chemistry of the Nervous System. 3 Hours.**
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, MDCM 775, NURO 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent. LEC.

**PTX 785. Research Proposal. 2 Hours.**
To satisfy the research requirement for the on-line distance M.S. program in Pharmacology and Toxicology, the aspiring student must define a research project and prepare a written proposal describing the nature and goals of the project. It is suggested that the student in conjunction with their distance research mentor collaborate in the selection of and the definition of the proposed research. The proposal should be 4 pages (0.5 in margins, 11-12 point Arial, Times Roman or Calibri font) that states the overall goal of the project, the hypothesis to be tested, 2-3 specific aims, a statement of significance and impact of the research and research approach. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750. RSH.

**PTX 799. Pharmacology and Toxicology Seminar. 1-2 Hours.**
A review of current literature and research in pharmacology and toxicology. Required of all graduate students in the department every fall and spring semester. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PTX. LEC.

**PTX 800. Pharmacology and Toxicology Teaching Principles. 2 Hours.**
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in pharmacology and toxicology. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with the faculty whom he or she is assisting. Prerequisite: Graduate standing in pharmacology and toxicology program. RSH.

**PTX 801. Issues in Scientific Integrity. 1-3 Hours.**
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PHCH 801 and PHCH 802.) LEC.

**PTX 803. Pharmacology Literature Review I. 1 Hour.**
This course is designed for graduate students and will fulfill the first written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a six page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

**PTX 805. Pharmacology Literature Review II. 1 Hour.**
This course is designed for graduate students and will fulfill the second written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a twelve page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

**PTX 825. Research in Pharmacology and Toxicology. 1-10 Hours.**
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration with a faculty member. Prerequisite: Graduate standing and consent of instructor. RSH.

**PTX 826. Online Research in Pharmacology and Toxicology. 8 Hours.**
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and consent of KU Pharmacology and Toxicology Faculty Mentor. RSH.

**PTX 885. Distance Master's Research in Pharmacology and Toxicology. 1-12 Hours.**
Original investigations at an advanced level in areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and completion of PTX 785. RSH.

**PTX 889. Distance Master's Thesis. 2 Hours.**
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master's Degree thesis. Prerequisite:
Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and completion of 12 credits in PTX 885. RSH.

**P&TX 890. Distance M.S. Thesis. 2 Hours.**
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the On-line M.S. Program in Pharmacology and Toxicology. THE.

**P&TX 898. Online Master's Thesis. 3 Hours.**
Independent investigation of a research problem of limited scope leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. THE.

**P&TX 899. Master's Thesis. 1-11 Hours.**
Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Graduate standing in PTX and consent of instructor. THE.

**P&TX 990. Postdoctoral Research. 1-11 Hours.**
Advanced level research in collaboration with a faculty member in the department. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Doctoral degree or equivalent in an appropriate related area, and consent of instructor. RSH.

**P&TX 999. Doctoral Dissertation. 1-11 Hours.**
Hours and credit to be arranged. Original investigation in pharmacology and toxicology. Prerequisite: Consent of instructor. THE.

### Pharmacy Courses

**PHAR 500. Introduction to Pharmacy. 1 Hour.**
This course is designed to introduce pharmacy students to the profession of pharmacy, potential career pathways, and available academic and post-doctoral educational opportunities. Additionally, topics such as professionalism, leadership, professional advocacy, empathy, cultural competency, self-directed learning, interprofessional education, and professional communication will be discussed. Students will receive instruction and fulfill the prerequisites for their Introductory Pharmacy Practice Experiences (IPPE) occurring in the summer semesters of the PharmD program. LEC.

**PHAR 509. History of Pharmacy Elective. 1 Hour.**
This course is comprised of a survey of historical highlights of the development of Pharmacy as a discipline. The course will cover early antecedents of pharmacy, development of the discipline in Europe and the United States, the development of professional organizations, standards, education, and literature, economic development, and the pharmacists' contributions to community service, science, and the industry. There will be a mix of some lectures, discussion, assigned readings, and short papers. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

**PHAR 510. Pharmacy Skills Laboratory I-A. 1 Hour.**
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. LAB.

**PHAR 512. Pharmacy Skills Laboratory II-B. 1 Hour.**
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. LAB.

**PHAR 514. Scientific Writing for the Health Professional. 2 Hours.**
Communicating research plans and experimental finding is a critical skill for health care professionals working in a research environment, and successful communication depends on clarity of thought and careful use of language. This course is intended for 3rd professional (P3) year students who are seeking residency and will need to write research proposals and abstracts, as well as prepare effective posters and presentations. It is an intensive course with multiple writing assignments. Students are expected to participate fully, and individual feedback and guidance on writing will provided by the instructor. Graded on a satisfactory/fail basis. Prerequisite: 3rd professional (P3) year students who plan to complete post-doctoral residency training. LEC.

**PHAR 515. Pharmacy Skills Laboratory II-A. 1 Hour.**
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. LAB.

**PHAR 516. Oral Presentations for the Health Professional. 1 Hour.**
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and a successful oral presentation depends on clear thinking and careful slide design to tell a story. This course is intended for 3rd year professional (P3) pharmacy students who are seeking residency and will need to prepare effective presentations. It is an intensive course with successive
slide drafts and presentations. Students are expected to participate fully, and individual feedback and guidance on presentations will be provided by the other students and by the instructor. Graded on a satisfactory/fail basis. Prerequisite: PHAR 514. LEC.

PHAR 517. Pharmacy Skills Laboratory II-B. 1 Hour. The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy-related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care-related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. LAB.

PHAR 520. Pharmacy Skills Laboratory III. 1 Hour. Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. LAB.

PHAR 525. Pharmacy Skills Laboratory IV. 1 Hour AE61. Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. LAB.

PHAR 530. Pharmacy Skills Laboratory V. 1 Hour. Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. LAB.

PHAR 535. Pharmacy Skills Laboratory VI. 1 Hour. Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. LAB.

PHAR 550. Introductory Pharmacy Practice Experience - Community. 4 Hours AE52. A required four credit hour experiential course involving 160 hours of on-site experiential education. The course is designed to provide the student pharmacist with exposure to the practice of pharmacy in either an independent community or chain pharmacy in either a rural or urban setting within the state of Kansas. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Completion of PHAR 500 or instructor consent. FLD.

PHAR 560. Introductory Pharmacy Practice Experience - Institutional. 4 Hours. A required four credit hour experiential course years involving 160 hours of on-site experiential education. The course is designed to provide the student pharmacist with exposure to the practice of pharmacy in an institutional health-system (hospital) environment in either a rural or urban setting within the state of Kansas. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Completion of PHAR 502 or instructor consent. FLD.

PHAR 599. Advanced Infectious Disease - Translational Case Studies. 2 Hours. This course is an interdepartmental elective focusing on advanced clinical decision-making within the field of infectious diseases. Utilizing clinical infectious disease cases based on cases of real-life patients, students will assess and make therapeutic recommendations via team-based active-learning exercises. These activities aim to prepare students for advanced pharmacy practice and residency experiences in acute care settings with complicated and challenging patients, by providing students hands-on instruction in reviewing and assessing patient data including laboratory values and radiology reports, following patient progress over multiple days and adjusting patient care plans based on new unforeseen data, writing infectious diseases-specific SOAP notes, orally presenting patients using presentation styles expected for 4th year APPE rotations and residency rotations, and using basic scientific principles when determining appropriate courses of patient care. Additional professional preparation in "soft skills" will be provided. Prerequisite: P3 standing in the School of Pharmacy. LEC.

PHAR 600. Hospital and Health-System Pharmacy. 1 Hour. Introduction to pharmacy services within health-system pharmacies with an emphasis on medication distribution systems, parenteral and sterile products, clinical pharmacy practice and other services. Prerequisite: Must be accepted to the Pharmacy program. LEC.

Pharmaceutical Chemistry Courses

PHCH 510. Emerging Trends in Pharmaceutical Chemistry I. 1 Hour. This elective class will explore emerging areas of research currently impacting the pharmaceutical industry. Potential topics include: biologicals as therapeutics, drug targeting, prodrugs, nanotechnology, biological barriers, gene therapy, transporters, vaccines, intracellular drug trafficking, controlled release drug delivery, cancer therapy, analytical biotechnology and many others. The class will be team taught by PHCH faculty and guest speakers. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHCH 512. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour. This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is a 2-hour class that meets 8 times during the semester. Prerequisite: 1st, 2nd or 3rd professional year standing in the School of Pharmacy. LEC.

PHCH 514. Scientific Writing for the Health Professional. 2 Hours. Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and successful communication depends on clarity of thought and careful use of language. This course is intended for 3rd professional (P3) year students who are seeking residency and will need to write research proposals and abstracts, as well as prepare effective posters and presentations. It is an intensive course with multiple writing assignments. Students are expected to participate fully, and individual feedback and guidance on writing will be provided by the instructor. Graded on a satisfactory/fail. Prerequisite: 3rd professional (P3) year students who plan to complete post-doctoral residency training. LEC.
PHCH 515. Oral Presentations for the Health Professional. 1 Hour.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and a successful oral presentation depends on clear thinking and careful slide design to tell a story. This course is intended for 3rd year professional (P3) pharmacy students who are seeking residency and will need to prepare effective presentations. It is an intensive course with successive slide drafts and presentations. Students are expected to participate fully, and individual feedback and guidance on presentations will be provided by the other students and by the instructor. Graded on a satisfactory/fail basis. Prerequisite: PHCH 514. LEC.

PHCH 517. Pharmacy Calculations. 2 Hours.
An introduction to the mathematics involved in filling prescriptions and in manufacturing pharmaceuticals. Includes an introduction to standard prescription notation and familiarization with pharmaceutical weights and measures. LEC.

PHCH 518. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: PHCH 517. LEC.

PHCH 605. Vaccines. 1 Hour.
Vaccines are currently the most powerful therapeutic approach available for infectious disease and promise to become of increasing importance for a wide variety of other pathologies including cancer. This course discusses the immunological basis of vaccinology, types of vaccines currently available and in development and the process by which vaccines are made from the basic research stage through their pharmaceutical development and marketing. Ethical aspects of vaccine use will also be considered. LEC.

PHCH 625. Pharmacokinetics. 3 Hours.
A discussion of the basic concepts, and some clinical applications, of pharmacokinetics, clearance concepts, extravascular dosing, and the use of pharmacokinetics in dosage regimen design and adjustment. Prerequisite: PHCH 517 and PHCH 518. LEC.

PHCH 626. Biopharmaceutics and Drug Delivery. 3 Hours.
A study of biological barriers to drug delivery, conventional dosage forms, and new and future drug delivery strategies. Prerequisite: PHCH 517, PHCH 518, and PHCH 625. LEC.

PHCH 667. Introduction to Clinical Chemistry. 2 Hours.
A lecture-discussion course concerned with identification of the contents of physiological fluids, changes in physiological fluid content induced by disease and drugs, and therapeutic drug monitoring: case studies are presented. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHCH 690. Undergraduate Research in Pharmaceutical Chemistry. 1-5 Hours.
Student will be assigned a suitable research project in the area of pharmaceutical analysis or pharmaceutics. This course is offered regularly by the Department of Pharmaceutical Chemistry to meet the special needs of selected students, usually for one of the following two situations: (1) This course may be taken when a student has a special interest in a problem or area of limited scope and desires to pursue that study in depth under supervision of a member of the faculty. (2) This course is sometimes used as a remedial class to provide a mechanism of intensive review and study in an area of weakness. Prerequisite: Consent of instructor. IND.

PHCH 694. Problems in Pharmaceutical Chemistry. 1-5 Hours.
A student will be assigned a suitable research project in an area of pharmaceutical analysis or pharmaceutics. This course is offered regularly by the Department of Pharmaceutical Chemistry to meet the special needs of selected students, usually for one of the following two situations: (1) This course may be taken when a student has a special interest in a problem or area of limited scope and desires to pursue that study in depth under supervision of a member of the faculty. (2) This course is sometimes used as a remedial class to provide a mechanism of intensive review and study in an area of weakness. Prerequisite: Consent of instructor. IND.

PHCH 700. Experimental Methods in Pharmaceutical Chemistry. 1-5 Hours.
Discussions, lectures, and laboratory work designed to acquaint and provide hands on experiences to advanced undergraduate and graduate students with experimental design, methods, and approaches relevant to modern research in pharmaceutical chemistry. Prerequisite: Consent of instructor. LEC.

PHCH 705. Writing and Communicating Science for Graduate Students. 3 Hours.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 706. Writing and Communicating Science for Graduate Students. 3 Hours.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: This course is only open to distance education students. LEC.

PHCH 712. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is two-hour class that meets 8 times during the semester. Prerequisite: Graduate standing in Pharmaceutical Chemistry or a trainee of the NIH Biotech Training Grant. LEC.

PHCH 715. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: Master's or PhD candidate in Engineering, Chemistry,
Medicinal Chemistry, or Pharmaceutical Chemistry (by appointment for seniors or graduate students in departments not listed). LEC.

PHCH 716. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: This course is only open to distance education students. LEC.

PHCH 718. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energies, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: Graduate standing. LEC.

PHCH 719. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energies, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to distance education students. Prerequisite: Graduate standing. LEC.

PHCH 725. Molecular Cell Biology. 3 Hours.
Fundamentals and advanced concepts in cell biology and the molecular interactions responsible for cell functions, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. (Same as CPE 725.) Prerequisite: Graduate standing or consent of instructor. LEC.

PHCH 730. Biopharmaceutics and Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. LEC.

PHCH 731. Biopharmaceutics and Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course open only to distance education students. LEC.

PHCH 744. Organic Chemistry for Pharmaceutical Scientists. 3 Hours.
A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include functional group chemistry: electronic structure, acid/base properties: molecular structure and properties (dipole, strain, and steric effects, inductive and resonance effects); dynamics of reactions (the major organic reaction mechanism, kinetics, energy profiles, isotope effects, linear free energy relationships), solvent effects, stereochemistry and conformation, an introduction to orbital symmetry control; basic thermodynamic and kinetic concepts; and an overview of important classes of mechanisms. This course is only open to distance education students. Prerequisite: CHEM 624 and CHEM 626. LEC.

PHCH 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as PTX 775, BIOL 775, CHEM 775, MDCM 775 and NURO 775.) Prerequisite: BIOL 600 or equivalent. LEC.

PHCH 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801 and PHCH 802.) LEC.

PHCH 802. Issues of Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. This course is open only to distance education students. (Same as PHCH 801, MDCM 801, NURO 801, and PTX 801.) LEC.

PHCH 816. Careers in the Biomedical Sciences. 1 Hour.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816 and MDCM 816.) Prerequisite: Permission of instructor. SEM.

PHCH 826. Molecular Cell Biology. 3 Hours.
Fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell function, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. This course is only open to distance education students. LEC.

PHCH 850. Solid State Stability and Formulation. 2 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 851. Solid State Stability and Formulation. 2 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. This course is open only to distance education students. Prerequisite: Graduate standing in Pharmaceutical Chemistry or consent of the instructor. LEC.

PHCH 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and MDCM 860.) Prerequisite: Permission of instructor. LEC.
PHCH 862. Physical Chemistry of Solutions, Solids and Surfaces. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. LEC.

PHCH 863. Physical Chemistry of Solutions, Solids and Surfaces. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. This course is open only to distance education students. LEC.

PHCH 864. Pharmaceutical Analysis. 4 Hours.
This course is intended to be a comprehensive treatment of contemporary techniques used to validate analytical methods for the determination of drugs in the bulk form, pharmaceutical formulations, biological samples and other relevant media. The emphasis will be on chromatographic techniques reflecting the preeminent position that those techniques occupy in the field of pharmaceutical and biomedical analysis. Prerequisite: Previous or concurrent enrollment in PHCH 684. LEC.

PHCH 865. Pharmaceutical Analysis. 4 Hours.
Advanced course on pharmaceutical analysis. This course is only open to distance education students. LEC.

PHCH 870. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 871. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. This course is only open to distance education students. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 895. Research in Pharmaceutical Chemistry. 1-11 Hours.
Advanced level research in collaboration with a faculty member in pharmaceutical chemistry or related areas. This course is limited to students who are doing research, but not necessarily working toward either a master's or a doctoral degree. RSH.

PHCH 898. Master's Thesis. 1-10 Hours.
Master's Thesis. This course is open only to distance education students. THE.

PHCH 899. Master's Thesis. 1-11 Hours.
Graded on a Satisfactory/Fail basis. THE.

PHCH 920. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. LEC.

PHCH 921. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. This course is only open to distance education students. LEC.

PHCH 972. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. LEC.

PHCH 973. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. This course is only open to distance education students. LEC.

PHCH 974. Advanced Special Topics in Pharmaceutical Chemistry. 1-3 Hours.
Various topics pertinent to the area of pharmaceutical chemistry will be explored. Graded on a satisfactor/unsatisfactory basis. LEC.

PHCH 978. Pharmaceutical Chemistry Seminar. 1 Hour.
A seminar on the chemistry of pharmaceutical systems. LEC.

This course is open only to distance education students. THE.

THE.

Pharmacy Practice Courses

PHPR 506. Precision Medicine. 1 Hour.
This course will address the role of precision medicine in pharmacy practice and is designed to extend the students' understanding of the basis for interindividual variation in drug response and the evolving role of the pharmacist. The course will include required readings, lectures, cases and in-class discussions that focus on the evidence and practicality of precision medicine in pharmacy practice. Using selected examples, students will learn about patient factors that drive variability in drug response and how these factors drive drug selection and dosing. With the current focus on the use of genomic data to drive individualized therapy, students will learn about current pharmagenomic-based practice guidelines and clinical practice references. Students will prepare a 2-page writing assignment and an in-class presentation on the impact of precision medicine on pharmacy practice. Prerequisite: Must be admitted to the School of Pharmacy. LEC.

PHPR 507. Advanced Community Practice. 1 Hour.
The objective of this course is to prepare pharmacy students to practice as advanced pharmacists in a community setting. The course will cover patient care as well as the business and insurance aspects surrounding community pharmacy practice. We will cover a variety of topics including reimbursement, legal issues, Medication Therapy Management (MTM), communication, ethics, and the future of Community Pharmacy practice.
Prerequisite: 3rd professional year standing in the School of Pharmacy. LEC.

**PHPR 508. Oncology Elective. 1 Hour.**
This course is designed to extend the students' understanding of Oncology diseases and treatments beyond what is covered in the Pharmacotherapy series in the School of Pharmacy. Prerequisite: PHPR 646. LEC.

**PHPR 509. Medicare Part D. 1 Hour.**
This elective course will focus on the understanding and active enrollment of patients into Medicare prescription drug benefit (Part D). Students will mainly focus on the understanding of Medicare eligibility, benefits, formulary requirements, and the administration of benefits. Students will also participate in community outreach which may focus on underserved patients. Prerequisite: 2nd or 3rd professional year standing in the School of Pharmacy. LEC.

**PHPR 510. Medical Terminology Elective. 1 Hour.**
This course provides the fundamentals for developing a medical vocabulary. The student will develop the ability to understand, define and utilize medical terminology and abbreviations used in patient care. LEC.

**PHPR 511. Service-Learning Elective. 1 Hour.**
Students will work at a health-related community center and participate in structured learning exercises. The objectives are to: 1) enable students to learn appropriate strategies to communicate and provide services to people with varying languages, cultures, social, and economic backgrounds, disabilities, illnesses, or impairments, 2) increase social interaction and citizenship, 3) heighten social awareness and understanding of ethical issues, and 4) acknowledge social responsibility and realize personal values. FLD.

**PHPR 512. Nuclear Pharmacy. 1 Hour.**
This course is designed for students interested in learning about nuclear pharmacy practice as a specialty practice in pharmacy. Students will learn about the application of radiopharmaceuticals used in the diagnosis of various diseases or identifying patient therapeutic issues. The course will cover principles of radiation, radiation safety, preparation of and handling of radiopharmaceuticals, their appropriate use, and the training requirements for a nuclear pharmacist. At the conclusion of the course the student will have an insight into this specialty practice in nuclear pharmacy as a potential career. Prerequisite: Students must be admitted to the School of Pharmacy. LEC.

**PHPR 513. Chemical Dependency Elective. 1 Hour.**
This elective course will enhance the pharmacy student's knowledge and understanding of the current theories behind the addiction process, frequently abused drugs and/or chemicals and the treatment and recovery process. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

**PHPR 514. Communication and Counseling. 1 Hour.**
An elective course designed to help students improve professional communication skills. Prerequisite: PHAR 500. LEC.

**PHPR 515. The Aging Patient. 1 Hour.**
This elective course is designed for the learner to explore many of the clinical considerations employed when caring for the aging patient within our health care system. The course will be devoted to exploring generational perceptions, learning how the aging process can impact patient care, and identifying the role of the pharmacist in enhancing this care. Prerequisite: 4th or 5th professional year (P2 or P3) standing in the School of Pharmacy. LEC.

**PHPR 516. Pharmacy in Public Health. 1 Hour.**
Public health is more than providing treatment for an illness; it is a concern for the health of an entire population. The ideal is to ensure the health of all. This course will focus on providing students with a solid foundational understanding of what public health is and how pharmacists play a role as a public health provider. The course will cover the concepts and tools used in public health including issues such as: determining health, cultural competence, health promotion, disease prevention, epidemiology and disease, describing populations and community health. Lastly, the course will provide students with specific pharmacist models of public health. Successful models include tobacco cessation programs, community vaccination programs, obesity prevention, tuberculosis monitoring, emergency preparedness and domestic violence. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

**PHPR 517. Medication Safety and Error Prevention. 1 Hour.**
This course introduces the student to medication safety and the technology as well as the tools used in error prevention. The student will also learn about adverse drug events including both medication errors and adverse drug reactions in hospital and retail pharmacy settings. Prerequisite: 4th or 5th professional year (P2 or P3) standing in the School of Pharmacy. LEC.

**PHPR 518. Cultural Competency in Pharmacy Practice. 1 Hour.**
The United States becomes more culturally diverse every year. This course is designed to help student pharmacists excel in today's multicultural environment by improving their cultural competency skills. Students will explore their own culture and those belonging to other diverse cultures. Students are expected to learn of the beliefs, needs and tendencies of those with cultures much different than themselves. Prerequisite: Must be admitted to the School of Pharmacy. LEC.

**PHPR 519. Business Planning for Pharmacy. 1 Hour.**
This course is designed for students interested in developing a business plan. Most pharmacists will have an opportunity to develop a new service, product line or even start a new business venture in their careers. Students need to know how to create a formal business plan and how to present the plan to decision makers. The course will cover the basic components and rationale of creating a formal a business plan. When finished students will be expected to have created a written business plan and will present their creation to the class. In this manner, students will gain experience in developing an idea into a plan. Prerequisite: Students must be admitted to the School of Pharmacy. LEC.

**PHPR 520. Specialty Pharmacy. 1 Hour.**
This course will review a variety of diseases including: multiple sclerosis, hepatitis C and autoimmune conditions (psoriasis, ulcerative colitis, etc) and the specialty medications used to treat these conditions. Specialty pharmacy accreditation standards as well as topic discussions reviewing many issues facing the specialty pharmacy industry will be discussed. Guest speakers from different specialty pharmacies in the greater Kansas City area will also present information on their career experiences. Prerequisite: Limited to P2s and P3s. LEC.

**PHPR 521. Practical Pediatrics. 1 Hour.**
This course will expose students to conditions frequently encountered in pediatric care. Students will further develop knowledge and skills necessary to provide appropriate pediatric care in institutional, ambulatory, and community practice settings. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year. LEC.

**PHPR 522. Pharmacy-Based Travel Health Services. 1 Hour.**
This course reviews pertinent problems traveling entails and services pharmacists can provide for traveling patients. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Following the
completion of this course, students should be able to recognize the need to establish travel health services, the role of pharmacists in these services, identify the commonly encountered disease states and problems for travelers, and what components comprise travel health by utilizing comprehensive knowledge, skills and resources necessary to establish and deliver successful travel health service. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 2nd or 3rd professional year. Students must have successfully completed the APhA Pharmacy-Based Immunization Delivery program. LEC.

PHPR 523. Critical Care Problem-Based Learning. 1 Hour.
This is an elective course focusing on advanced clinical decision making within the field of critical care. Using clinical critical care cases, student will work as a team to assess and make therapeutic recommendations through problem-based learning exercises. These activities aim to prepare students for advanced pharmacy practice and residency experiences in acute care settings by providing instruction in application of primary literature to patient cases, following patient progress through emergency department and intensive care settings, and oral presentation of evidence-based patients cases. Additionally, students will participate in an acute care interprofessional simulation. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year. LEC.

PHPR 524. Medication-Related Issues and the Social Determinants of Health for Underserved Patients. 1 Hour.
This course will review a variety of topics related to the social determinants of health with a focus on barriers and solutions around pharmacy and medication-related issues. A focus of the course will be on the under-served patient population of Wyandotte County in Kansas City, KS which is the county with the worst health outcomes and statistics in the state. The main teaching method used in the course will be experiential learning. Students will complete two half-days (approximately 4 hours/session) at Riverview Health Services in Kansas City, KS. During the two half-days students will actively observe medication intake/reconciliation appointments to enroll patients in medication assistance programs to obtain their medications for free. Students will be incorporated and play an active role in the workflow during the second session. Finally, students will present a 15-minute presentation to Riverview staff about a medication related topic for their professional development. Additionally, the entire class will meet during 4 sessions in Lawrence where students enrolled in the elective will meet to review pertinent topics (a few guest speakers), work on and peer-review upcoming presentations and debrief their experiences. This is a unique and immersive learning opportunity to expose you to issues of caring for under-served patient populations and sharpen your verbal presentation skills for a professional audience. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Limited to P2 students in the PharmD program. LEC.

PHPR 541. Foundations of Interprofessional Collaboration I. 0 Hours.
This TeamSTEPPS Level 1 experience will introduce interprofessional students to the basic concepts of interprofessional collaboration including values and ethics, roles and responsibilities of healthcare team members, and interprofessional communication tools using the evidence-based national curriculum of TeamSTEPPS. Upon completion of this training experience students will be able to 1) demonstrate a work ethic with individuals of other professions to maintain a climate of mutual respect and shared values; 2) define the role of health professions (including your own) within the healthcare system; 3) identify opportunities to seek expertise of health professionals to improve communication and healthcare; and 4) acquire basic TeamSTEPPS communication tools to effectively use with healthcare teams. Graded on a satisfactory/unsatisfactory basis. Prerequisite: P1 standing. LEC.

PHPR 542. Foundations of Interprofessional Collaboration II. 0 Hours.
This TeamSTEPPS Level 2 experience will provide interprofessional students opportunities to apply key knowledge and skills gained in FIPC I, through role-play and case-based learning. Students will apply their knowledge of roles and responsibilities of healthcare team members and interprofessional communication tools and continue learning with, from, and about students from other professions. Upon completion of this training experience students will be able to: 1) engage diverse healthcare professionals who complement one's own professional expertise, as well as associated resources, to develop strategies to meet specific patient care needs; 2) choose effective communication tools and techniques, including information systems and communication technologies, to facilitate discussions and interactions that enhance team function; and 3) engage other health professionals appropriate to the specific care situation—in shared patient-centered problem-solving. Graded on a satisfactory/unsatisfactory basis. Prerequisite: P2 standing. LEC.

PHPR 543. Foundations of Interprofessional Collaboration III. 0 Hours.
This TeamSTEPPS Level 3 experience will provide interprofessional students opportunities to demonstrate key knowledge and skills gained in FIPC I and II, through simulation. Students will demonstrate their interprofessional communication skills, including specific opportunities to utilize TeamSTEPPS tools. Students will also demonstrate their teamwork abilities by working with interprofessional students during the simulation. Upon completion of this training experience students will be able to: 1) demonstrate communicating effectively with other health professionals about a patient case; 2) exhibit teamwork skills with an interprofessional healthcare team; and 3) utilize key TeamSTEPPS tools with an interprofessional healthcare team. Graded on a satisfactory/unsatisfactory basis. Prerequisite: P3 standing. LEC.

PHPR 599. Clinical Application of Basic Science. 1 Hour.
This course is an inter-departmental, team-based, technology-centric elective course. Concomitantly, instructors from the basic and clinical science departments within the school of pharmacy will promote deeper student understanding of the path a drug takes from discovery, development and ultimately clinical use. Instructors will collaborate in course content development to integrate basic and clinical science concepts. The course will utilize a blended learning method, incorporating out of class podcasts, online group collaborative projects, and readiness quizzes and exams. Prerequisite: 4th or 5th professional year standing (P2/P3) in the school of pharmacy and concomitant enrollment in either PTX 599, MDCM 599, or PHCH 599 is required. LEC.

PHPR 601. Advanced Pharmacy Practice Experience I. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an "Excellent", "Satisfactory", or "Unsatisfactory" grading basis. FLD.
PHPR 602. Advanced Pharmacy Practice Experience 2. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

PHPR 603. Advanced Pharmacy Practice Experience 3. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

PHPR 604. Advanced Pharmacy Practice Experience 4. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

PHPR 605. Advanced Pharmacy Practice Experience 5. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

PHPR 606. Advanced Pharmacy Practice Experience 6. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

PHPR 607. Advanced Pharmacy Practice Experience 7. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

PHPR 608. Advanced Pharmacy Practice Experience 8. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

PHPR 609. Advanced Pharmacy Practice Experience 9. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.
PHPR 610. Advanced Pharmacy Practice Experience 10. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in nine pharmacy practice experience rotations (PHPR 601-609). PHPR 610 is reserved for students requiring a remedial experiential rotation. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

PHPR 613. Pharmacoeconomics and Health Outcomes. 2 Hours.
A course to foster an understanding of economic, financial and outcome principles that drive the demand and supply of medical care in the US. Economic logic behind decisions made by patients, physicians, hospitals, managed care organizations, and governments will be covered. Students completing this course should be able to identify the drivers of the health economy, identify different types of pharmaceutical economic evaluations, critically analyze pharmacoeconomic and outcome literature, and apply economic principles to pharmaceutical care. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this class. LEC.

PHPR 614. Pharmacy Management. 3 Hours.
A course designed to provide knowledge and skills to effect efficient and effective pharmacy management. This will include foundations in financial management, inventory control, purchasing, cost-effective drug utilization, quality management, pharmacoeconomics, and human resource management. LEC.

PHPR 615. Nuclear Pharmacy Practice. 2 Hours.
This introductory course in nuclear pharmacy practice provides a basic understanding of radiation, radiation dosimetry, radiopharmaceuticals, and clinical application of radiopharmaceuticals in diagnosis and treatment. The course includes both didactic material as well as laboratory experience. LEC.

PHPR 619. Health Care Systems and Informatics. 3 Hours.
This course is an introduction to the organization, financing, and delivery of health care services with a focus on the U.S. health care system. Course content addresses the following questions: how do we evaluate the health care sector, where is health care provided, how is health care financed, what are the characteristics of health care providers (individuals and institutions), what influences the performance of the health care sector, and what lies in the future for health care delivery. The purpose of the course is to prepare pharmacy students for non-clinical aspects of their practice sites. Enrollment limited to pharmacy majors. LEC.

PHPR 620. Ethical, Legal, and Cultural Issues in Patient Care. 2 Hours.
This course provides an introduction to the fundamentals of law and ethics as they apply to the practice of pharmacy. Course sessions will focus on ethical expectations of the profession, principles and issues in medical and pharmacy ethics, and laws that govern medication dispensing. LEC.

PHPR 621. Pharmacy Law. 2 Hours.
A course developed to increase students’ knowledge and understanding of laws that regulate the pharmacy profession. Prerequisite: Fifth year standing (P3 student). LEC.

PHPR 624. Pharmacoepidemiology and Public Health. 2 Hours.
Pharmacy profession has a unique and critical opportunity and responsibility to contribute to the improvement of population health. Public health is a broader discipline that encompasses population health with a variety of other areas, including but not limited to epidemiology, cultural competence, health promotion, disease prevention, and drug safety. Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects. Considerations are centered on providing beneficial or adverse effects of medication use in large populations and making relevant inferences from essential analytical research designs used in public health. Using population-based-care approach, students will adopt and fulfill public health roles and activities. This course provides a broad introduction to the principles of pharmacoepidemiology and public health with a focus on applications in the field of pharmacy. Prerequisite: Third professional year standing in the School of Pharmacy. LEC.

PHPR 629. Research Design and Biostatistics. 2 Hours.
This course reviews study designs and statistical methods commonly used in primary medical literature. In collaboration with other courses in the curriculum, this course prepares students to interpret and apply primary literature during patient care, collect and analyze data, and maintain clinical competency throughout their professional career in pharmacy. Following completion of this course, students should be able to identify or select appropriate research methods and study designs; collect, summarize and interpret research data; understand basic statistical concepts; identify or select appropriate statistical tests for hypothesis testing; conduct and interpret the results of statistical tests; and evaluate the validity and reliability of published research studies. LEC.

PHPR 630. Drug Information and Literature Evaluation. 1 Hour.
This course will review the fundamental tools used to identify drug information in primary, secondary and tertiary resources. In addition, students will learn to assess published literature, utilize electronic resources, and learn to formulate a response to drug information questions. Following completion of this course, students will be able to understand the strengths and weaknesses of the drug information resources and to apply drug information skills to clinical practice relevant to patient care. Prerequisite: Successful completion of PHPR 629. LEC.

PHPR 635. Problems in Pharmacy Practice. 1-5 Hours.
A course designed for the study of special topics in pharmacy practice. A research paper will be required. Prerequisite: Consent of instructor. IND.

PHPR 661. Pharmacotherapy I. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Drug interactions and patient counseling techniques will be covered. Over-the-counter medications and herbalals will also be a significant portion of the course. Prerequisite: First year professional standing in the School of Pharmacy. LEC.

PHPR 662. Pharmacotherapy II. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Second year professional standing in the School of Pharmacy and successful completion of Pharmacotherapy I, PHPR 661. LEC.

PHPR 663. Pharmacotherapy III. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Second professional year standing in the School of Pharmacy and successful completion of Pharmacotherapy II, PHPR 662. LEC.

PHPR 664. Pharmacotherapy IV. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Third professional year standing in the School of Pharmacy and successful completion of Pharmacotherapy III, PHPR 663. LEC.

PHPR 665. Pharmacotherapy V. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisites: Third
Professional year standing in the School of Pharmacy and successful completion of Pharmacotherapy IV, PHPR 664. LEC.

PHPR 670. Clinical Assessment. 2 Hours.
This laboratory course will allow students to develop clinical assessment skills necessary in the provision of pharmaceutical care to patients with a variety of disease states. Students will combine physical assessment skills, patient counseling skills, and pharmaceutical knowledge and apply this information to patient care related activities in various clinical settings. Students will apply their skills using various practice models that include medication therapy management, collaborative drug therapy management, and interprofessional healthcare teams. The lab component will require students to meet between 1:00 to 5:00 PM on either Monday, Tuesday, or Wednesdays. In addition, there is a required Thursday discussion section. A detailed schedule of lab meeting dates and times will be provided in the syllabus. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. Students must pass PHPR 664 to be eligible to complete PHPR 670. LAB.

PHPR 690. Research in Pharmacy Practice. 1-5 Hours.
Students will conduct original research in a laboratory, educational, or clinical research setting under the supervision of department faculty. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. RSH.

PHPR 845. Professional Communications and Leadership. 2 Hours.
A course designed to give the graduate student a practical experience in areas of professional communications such as administrative proposals, grants, letters, memos, poster presentations, and written papers. The course focuses on the different kinds of communications required to relate to other health care professionals. Prerequisite: Consent of instructor. LEC.

PHPR 850. Introduction to Pharmacoepidemiology. 3 Hours.
Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects on health. Evaluating a drug’s effects commences when a chemical entity becomes a drug candidate, intensifies through clinical trials, and continues after products reach the market. These studies are critical for supporting the proper use of medications in terms of efficacy, effectiveness, and cost-effectiveness. This course provides a broad introduction to the principles of pharmacoepidemiology with a focus on applications in the medical literature. LEC.

PHPR 855. Economic Evaluation of Health Care Programs and Services. 3 Hours.
The course will provide students with an overview and appraisal of the “state-of-the-art” in the evaluation of health care programs and services (with a special emphasis on pharmaceutical programs, services, and products). The purpose of the course is to provide the student with the tools to conduct economic rather than general evaluation of health care programs and services. There will be some discussion of theoretical concepts, but the major emphasis will be on practical methodological issues in economic evaluation of pharmaceutical programs. The course integrates the perspectives of pharmaceutical and health care technology assessment, managed care, outcomes research, and public health. The main topics covered in the course include: cost, cost-minimization, cost-effectiveness, cost-utility, and cost-benefit analyses. LEC.

PHPR 860. Seminar in Pharmacy Practice. 1 Hour.
Research reports, reviews, and/or presentations on the current status of various aspects of pharmacy practice. Prerequisite: Consent of instructor. LEC.

PHPR 865. Advanced Institutional Pharmacy Services I. 1.5 Hour.
Advanced Institutional Pharmacy Services (I) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: business management, pharmacy financial management and operations management. Prerequisite: Consent of instructor. LEC.

PHPR 866. Advanced Institutional Pharmacy Services II. 1.5 Hour.
Advanced Institutional Pharmacy Services (II) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: human resource management, clinical services management, specialty pharmacy services and technology management. Prerequisite: Consent of Instructor. LEC.

PHPR 875. Health Care Delivery Systems. 3 Hours.
A continuation of PHPR 865 dealing with the current status of health care delivery systems and the impact of changes in this area on pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 885. Human Resource Management in Institutional Pharmacy Practice. 3 Hours.
A course dealing with recruitment, training, motivation, monitoring of performance, and disciplining of personnel. Seminars, case studies, and role playing are used to apply the information to specific human resource management situations in institutional pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 899. Research in Pharmacy Practice. 1-6 Hours.
Original investigation in the area of pharmacy practice. Prerequisite: Consent of instructor. RSH.
Doctor of Pharmacy

The School of Pharmacy

Since its founding in 1885, the University of Kansas School of Pharmacy (http://pharmacy.ku.edu/) has been a leader in pharmacy education. Since 1996, the school has offered only the Doctor of Pharmacy degree as the entry-level practice degree. The curriculum gives the student the knowledge, skills, and ability required of the pharmacy practitioner; it is comprehensive and produces a highly competent general practitioner.

About 60 full-time faculty members teach in the professional Doctor of Pharmacy program and in the graduate programs. 3 departments (Pharmacology and Toxicology, Medicinal Chemistry, and Pharmaceutical Chemistry) offer Master of Science and Doctor of Philosophy degrees. Pharmacy Practice offers the master’s degree.

Both the undergraduate and graduate divisions have outstanding national and international reputations based on the excellence and productivity of the faculty. KU is consistently ranked in the top 5 among colleges/schools of pharmacy that receive National Institutes of Health research funding.

The School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (https://www.acpe-accredit.org/), 190 S. LaSalle St, Suite 2850, Chicago, IL 60603-4810, (312) 664-3575, info@acpe-accredit.org, the official accrediting body for American schools of pharmacy.

Advising

On admission to the school, students are assigned faculty members as advisors. The advisor serves continuously during the student's tenure in the school. Students are expected to meet with their advisors at least once each semester and are encouraged to meet more often to discuss academic issues and career and professional development.

Undergraduate Admission to KU

Prospective students must be eligible for admission to the University of Kansas as an undergraduate student. See the Office of Admissions (http://admissions.ku.edu/), KU Visitor Center, 1502 Iowa St., Lawrence, KS 66044-7576, 785-864-3911, adm@ku.edu for information regarding requirements. Prospective pharmacy students should declare pre-pharmacy as the major field of study. Visit the Office of International Support Services (http://iss.ku.edu/) for information about international admissions.

Pre-pharmacy students are advised by faculty members from the College of Liberal Arts and Sciences while they complete their pre-pharmacy course work. All pre-pharmacy students are strongly encouraged to make appointments in the Deans office of the School of Pharmacy, 2010 Becker Drive, Room 2050, for co-consulting services and when they have questions concerning specific course requirements or appropriate electives or any other concerns about their preparation for pharmacy admission. Pre-pharmacy students are also encouraged to participate in the pre-pharmacy club. Email pharmacy@ku.edu to request to be added to the club's e-mail distribution list.

Undergraduate Admission to the School of Pharmacy

Students should apply to the School of Pharmacy during the application period (October 1 through February 1) for admission the following fall semester. When they apply, they should have completed, or be about to complete, the 68 credit hours of required pre-pharmacy courses. The required pre-pharmacy curriculum may be completed at accredited schools other than KU. KU students should submit a change of school form. Students transferring from other schools should submit an application for transfer student undergraduate admission.

Requirements

Applying students should meet the following requirements:

• Complete the required pre-pharmacy courses (http://pharmacy.ku.edu/academics/) and provide the required transcripts as documentation of the course work. One official copy of your transcript should be sent to the Office of Admissions.

• Take the Pharmacy College Admissions Test (http://www.pearsonassessments.com/haiweb/Cultures/en-US/site/Community/PostSecondary/Products/pcat/pcathome.htm), preferably in October or November. January test results also are accepted and considered. Have the results of the PCAT sent to KU.

• Complete and return the Applicant Profile Form (http://pharmacy.ku.edu/supplemental-application-forms/) to the School of Pharmacy with a $90 nonrefundable application fee.

• Maintain a grade-point average of 2.5 or higher overall and in the sciences. This is the minimum grade-point average acceptable for admission; the average is generally much higher.

• Arrange for 3 letters of recommendation, including the school's standard reference forms, to be sent to the School of Pharmacy by the persons serving as your references.

• An interview is held with selected applicants.

Procedures

The School of Pharmacy admissions committee, consisting of at least 2 faculty members from each department and representation from the Deans office, determines admissions. A file consisting of the required documentation is created for each applicant when the application is received. Consideration is given to a student’s grade-point average overall and in all science courses in the pre-pharmacy curriculum. The average grade point of previous entering classes has been 3.5 or higher.

Good scholarship is considered a predictor of success in the pharmacy curriculum. However, good communication skills, emotional maturity, leadership ability, professional attitude, an understanding of the pharmacy profession, work experience in a pharmacy, and interest in service to the community are also important. These additional skills may outweigh very high grades or choice of pre-pharmacy courses. Applicant PCAT scores also are considered in the admission process. Admission is competitive and depends on the number of applications received and the qualifications of the applicants.

The admissions committee begins to consider applications in January each year. The preferred application deadline is December 31st however the school will accept applications as late as February 1, and most decisions are made by March. As a condition of matriculation into the KU School of Pharmacy, all admitted students must successfully clear an investigative criminal background check and successfully obtain pharmacy intern status (http://www.pharmacy.ks.gov/licensing-
registration/pharmacy-interns/) with the Kansas Board of Pharmacy. Successful clearance of the background check and attainment of pharmacy intern status with the Board of Pharmacy is required to enroll in the School of Pharmacy and to participate in curricular and extracurricular curricular activities including interacting with patients. Instructions for completing the background check are provided with the letter of acceptance.

**Doctor of Pharmacy Degree Requirements**

**Prepharmacy Requirements**

The Doctor of Pharmacy degree requires completion of all of the required pre-pharmacy and professional courses and a total of 208 credit hours with an overall and professional grade-point average of at least 2.5.

The pre-pharmacy requirements of 68 credit hours include a year each of English, general chemistry, and organic chemistry. Other required courses include calculus, interpersonal communication, molecular and cellular biology, microbiology, human anatomy, physiology, statistics, physics; and 12 credit hours of general studies that satisfy the following KU Core Curriculum requirements: goal 3 humanities; goal 3 social science; goal 4 outcome 1; and goal 4 outcome 2. The KU Core Curriculum goals 1 through 4 must be satisfied during the completion of the pre-pharmacy curriculum requirements. KU Core goals 5 and 6 are satisfied during the professional curriculum.

Students are expected to have or to develop basic competence with personal computers, including word processing and spreadsheet software. All students are required to personally own electronic devices that are capable of running software to complete some class assignments, assessments, as well as for professional work assignments. Information regarding this technology requirement will be provided to matriculating students.

Courses in other professional schools (e.g., engineering, education) may not be counted toward the degree unless the student can show that such courses are directly relevant to pharmacy. For example, a course in business law taken in the business school may count (consult with the office of the dean in the school of pharmacy).

| Total Hours | 16 |

**Professional Requirements**

The Doctor of Pharmacy degree requires completion of all the required prepharmacy and professional courses and a total of 208 credit hours with an overall and professional grade-point averages of 2.5.

The curriculum includes instruction in the 3 basic sciences: medicinal chemistry, pharmaceutical chemistry, and pharmacology and toxicology. It also includes courses in the various aspects of pharmacy practice, including the health care system, law, and emerging roles for pharmacy practitioners. The curriculum integrates course material among departments. Assignments within the curriculum foster development of independent learning, communication skills, problem solving, and professional motivation. The professional curriculum includes a requirement that each student must complete a minimum of 4 elective credit hours within School of Pharmacy. One credit hour must be completed from the pharmacy practice department, 1 credit hour must be completed from a basic science department (either medicinal chemistry, pharmaceutical chemistry, and pharmacology and toxicology) and the remaining two credit hours are left to the students discretion.

Students enroll in introductory pharmacy practice experiences during the summer following the first and second years. These experiences are located throughout the state of Kansas and vary in the type of professional setting.

The final year of the curriculum consists of nine 4-week advanced pharmacy practice experiences with preceptors at pharmacy practice sites throughout Kansas. Students must have their own transportation to reach their assigned sites. Housing at these sites is also the student’s responsibility.

**Professional Program**

*The following curriculum is applicable to the graduating class of 2019 (matriculating in the fall of 2015) and later. See http://pharmacy.ku.edu/academics (http://pharmacy.ku.edu/academics/) for the curriculum for the graduating classes of 2016, 2017, and 2018.*

Total Hours 141

* Bachelors of Science in Pharmaceutical Studies (BSPS) awarded to students who complete all required coursework (at a GPA of 2.0 or higher) through the spring of professional year 2.

**Fourth Year**

The fourth year is composed of 36 credit hours of advanced pharmacy practice experiences (nine 4-week long rotations). The required experiential rotations include advanced hospital, advanced community, ambulatory care, and acute care/inpatient general medicine. The remaining 5 required rotations are flexible regarding their location/practice site. Assignments are made on the basis of the student’s preference, and site availability. The five 4-week rotations of the fall semester begin in July and conclude at the end of November. The four 4-week spring semester rotations begin in January and conclude in April.
Medicinal Chemistry

Medicinal Chemistry Graduate Programs

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic chemistry, biochemistry, natural product chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department's research activities encompass many areas of modern medicinal chemistry.

Currently, the department has 10 full-time faculty members, about 25 graduate students, more than 20 postdoctoral associates, numerous undergraduate researchers, and an outstanding technical staff. The department is recognized nationally and internationally, and most graduates have gone on to successful careers in the pharmaceutical industry and in academia. Medicinal chemistry faculty members are directors of two Centers for Biomedical Research Excellence (COBRE) — Protein Structure and Function (http://psf.cobre.ku.edu/) — as well as the Center for Chemical Biology of Infectious Diseases (http://cbid.cobre.ku.edu/), both funded by the National Institutes of Health.

Facilities

The department is well equipped for both chemical and biochemical research and has research facilities for about 60 graduate students, postdoctoral associates, and research technicians. Malott Hall, where part of the medicinal chemistry laboratories are located, also houses the department of Pharmacology and Toxicology (http://www.pharmtox.pharm.ku.edu/). Anschutz Library is adjacent to the building. Much of the laboratory space in the department has undergone renovation and provides research laboratories for chemical synthesis and biochemical research. Faculty are also housed in several modern research buildings on west campus (Shankel Structural Biology Center) and main campus (Integrated Science Building). The department has an excellent complement of modern spectroscopic, biochemical, and chromatographic instrumentation, and other specialized research instrumentation is available through cooperative arrangements with other departments.

Advanced instrumentation and facilities are available through KU's Molecular Structures Group (http://msg.dept.ku.edu/webs/msg/) (MSG). MSG laboratories include the Biochemical Research Service Laboratory (BRSL), the Mass Spectrometry Laboratory, the Nuclear Magnetic Resonance Laboratory, the Molecular Graphics and Modeling Laboratory, the X-ray Crystallography Laboratory, and the Protein Structure Laboratory (dedicated to macromolecular X-ray crystallography) with more than $10 million in instrumentation.

The Shankel Structural Biology Center (SBC) offers new research opportunities for medicinal chemists interested in protein and nucleic acid structure and combinatorial synthesis; it also houses a 800-MHz NMR. The Analytical Proteomics Laboratory, which combines activities of the Mass Spectrometry Lab and BRSL to create a collaborative environment for protein handling, protein mass spectrometry, and bioinformatics, is in SBC. In the same building, the High Throughput Screening Laboratory (http://www.hts.ku.edu/) has integrated and automated robotics equipment for carrying out biochemical and cell-based assays and a chemical library of more than 100,000 compounds with diverse structures and drug-like properties for biological screening. The service laboratories have professional staff that provides training in specialized research techniques in addition to their service functions.

Courses

MDCM 601. Medicinal Biochemistry I. 3 Hours.
A study of the biochemical principles of macromolecular structure and function, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. LEC.

MDCM 603. Medicinal Biochemistry II. 3 Hours.
A study of the biochemical principles of macromolecular structure and function, biosynthesis, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. Prerequisite: MDCM 601. LEC.

MDCM 606. Phytomedicinal Agents. 1 Hour.
This course will acquaint the pharmacy students with the current status of botanical use in the United States. A basic foundation will be provided so that the pharmacist can properly assess the appropriateness and usefulness of various phytomedicines and combinations in managing certain ailments with regard to efficacy, safety, potential toxicity, and potential herb-drug interactions. Prerequisite: MDCM 601 or instructor permission. LEC.

MDCM 607. Clinical Pharmacognosy. 1 Hour.
The course will provide a technical background for understanding the scientific basis underlying the use of herbal medicines. This will be followed by practical information about the pharmacological and chemical properties as well as clinical uses of herbal medicines. Active student participation in discussing the properties of these non-prescription medicinals is expected. Prerequisite: MDCM 601 or instructor consent. LEC.

MDCM 625. Medicinal Chemistry I: Neuroeffector and Cardiovascular Agents. 4 Hours.
A study, from the molecular viewpoint, of the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action; this course emphasizes drugs affecting the cardiovascular and central nervous systems. Prerequisite: CHEM 626 and MDCM 601. LEC.

MDCM 626. Medicinal Chemistry II: Homeostatic Agents. 4 Hours.
A continuation of MDCM 625 with special emphasis on anticancer, antiviral, antibacterial, antifungal, antidiabetic, anticholesterol, and steroidal drugs. Prerequisite: MDCM 625. LEC.
MDCM 690. Undergraduate Research. 1-5 Hours.
Research in medicinal chemistry. Students will be assigned to a laboratory research problem. Prerequisite: Consent of instructor. IND.

MDCM 692. Problems in Medicinal Chemistry. 1-5 Hours.
This course encompasses original work on a laboratory problem of limited scope, honors reading assignments from medicinal chemistry literature, or in-depth discussions of assigned topics. Prerequisite: Consent of instructor. IND.

MDCM 701. Advanced Medicinal Biochemistry I. 3 Hours.
A study of the principles of macromolecular structure and function, biosignaling, bioenergetics and metabolism, with an emphasis on the relationship between biochemistry and medicine. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 703. Advanced Medicinal Biochemistry II. 3 Hours.
A study of the principles of basic enzymology, including chemical reactions, biosynthesis, and metabolism. In addition, the course will cover lipids, hormones, vitamins, and minerals. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 710. Chemistry of Drug Action I. 4 Hours.
This course provides an overview of topics central to the understanding and practice of contemporary medicinal chemistry. It illustrates the interplay of anatomy and physiology with the organic-, bio- and analytical chemistry of drugs in the body. Topics covered include physiological mechanisms and disease processes; cell structure and function; basic intermediary metabolism; basic principles underlying drug action including the physicochemical properties of drugs and how these affect the interaction of drugs with living systems; chemical and biological manipulation of the absorption, distribution, metabolism and excretion of drugs and prodrugs; kinetics and inhibition of enzymes and transporters; quantitation and molecular modeling of drug binding to targets. Prerequisite: One year of organic chemistry, one semester of biochemistry, and one college-level course in biology. LEC.

MDCM 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: Consent of instructor. LEC.

MDCM 785. Natural Products of Medicinal Significance. 2 Hours.
A discussion of bioassy-directed screening, the isolation, structure determination, biosynthesis, partial synthesis and total chemical synthesis of organic natural products of medicinal significance. Examples of the classes of compounds to be considered include steroid hormones, cardiac glycosides, alkaloids, antibiotics, terpenes, and the like. Prerequisite: Graduate standing or consent of instructor. LEC.

MDCM 790. Chemistry of Drug Action II. 3 Hours.
A discussion of the principles of contemporary drug design with specific examples chosen from the original literature. This course covers the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action. Prerequisite: Graduate standing or completion of MDCM 625 and MDCM 626. LEC.

MDCM 796. Master’s Literature Seminar in Medicinal Chemistry. 1 Hour.
Literature seminar for graduate students in Spring of their 2nd year. Prerequisite: Graduate students in 2nd year of program. LEC.

MDCM 799. Research Seminar in Medicinal Chemistry. 1 Hour.
Reports by research students and discussions of developments in the field not covered in formal courses. LEC.

MDCM 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientists in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801, PHCH 801 and PHCH 802.) LEC.

MDCM 816. Careers in the Biomedical Sciences. 1 Hour.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816, and PHCH 816.) Prerequisite: Permission of instructor. SEM.

MDCM 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.

MDCM 895. Research in Medicinal Chemistry. 1-12 Hours.
Hours and credit to be arranged. RSH.

MDCM 899. Master’s Thesis. 1-12 Hours.
Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Consent of instructor. THE.

MDCM 950. Advanced Topics in Medicinal Chemistry: _____ 1-3 Hours.
An in-depth discussion of topics of current interest to medicinal chemists. Prerequisite: Consent of instructor. LEC.

MDCM 980. Proposal Preparation and Seminar. 3 Hours.
Presentation of a literature seminar and writing an original NIH-style research proposal concerning contemporary problems in medicinal chemistry. Prerequisite: Consent of instructor. LEC.

MDCM 999. Doctoral Dissertation. 1-12 Hours.
Hours and credit to be arranged. Original chemical research in the synthesis and development of medicinal agents, elucidation of the chemical mechanisms of drug action, drug metabolism, and drug toxicities. THE.

Master of Science in Medicinal Chemistry

Medicinal Chemistry Graduate Programs

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic chemistry, biochemistry, natural product chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with
the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department’s research activities encompass many areas of modern medicinal chemistry.

Currently, the department has 10 full-time faculty members, about 25 graduate students, more than 20 postdoctoral associates, numerous undergraduate researchers, and an outstanding technical staff. The department is recognized nationally and internationally, and most graduates have gone on to successful careers in the pharmaceutical industry and in academia. Medicinal chemistry faculty members are directors of two Centers for Biomedical Research Excellence (COBRE) — Protein Structure and Function (http://psf.cobre.ku.edu/) as well as the Center for Chemical Biology of Infectious Diseases (http://cbid.cobre.ku.edu/) both funded by the National Institutes of Health.

Graduate Admission

Graduate students are primarily admitted to the department to pursue the Ph.D. degree. The M.S. degree and postdoctoral training are also available. An applicant wishing to enter the graduate program must have earned a bachelor’s or master’s degree in pharmacy, medicinal chemistry, chemistry, biochemistry, or a closely related field, and must have completed 1 year of organic chemistry with laboratory (equivalent to CHEM 330, CHEM 331, CHEM 335, and CHEM 336). In all cases, general admission requirements must be met.

Applications are evaluated by the graduate selection committee. Applications must be supported by 1 copy of official transcripts of all previous college and university work, both undergraduate and graduate. In addition, a resume, a statement of purpose, and 3 letters of recommendation from current or former teachers, advisors, or employers must be submitted. Students from non-English-speaking countries also must furnish proof of proficiency in English. Graduate Record Examination (GRE) general test scores are required, and applicants are strongly encouraged to take the subject test in chemistry as well.

The graduate selection committee makes admission decisions based on grade-point averages for previous college work (particularly in the relevant science areas), letters of recommendation, previous research or employment experience relevant to the graduate training being sought, GRE scores, etc. The number of applicants who can be admitted at any time varies, depending on the availability of laboratory space, research facilities, and financial support for research activities, but it is usually about 10 a year.

Graduate applications (http://www.graduate.ku.edu/) and all other requested application materials (transcripts, résumé, statement of purpose, recommendation letters, etc.) must be submitted online:

The University of Kansas
Department of Medicinal Chemistry
Malott Hall
1251 Wescoe Hall Drive, Room 4070
Lawrence, KS 66045

M.S. Degree Requirements

Candidates for this degree must satisfy general requirements as well as those of 1 of the following options:

- Students who are proceeding toward the Ph.D. degree at KU receive the master’s degree after satisfactorily completing the course work requirement for the Ph.D. and passing a comprehensive oral examination.
- Students who wish to earn only the M.S. degree must complete a prescribed subset of the course work requirements for the Ph.D. degree and a thesis representing at least 10 credit hours of research and pass a thesis defense.

Doctor of Philosophy in Medicinal Chemistry

Medicinal Chemistry Graduate Programs

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic chemistry, biochemistry, natural product chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department’s research activities encompass many areas of modern medicinal chemistry.

facilities, and financial support for research activities, but it is usually about 10 a year.

Graduate applications (http://www.graduate.ku.edu/) and all other requested application materials (transcripts, résumé, statement of purpose, recommendation letters, etc.) must be submitted online:

The University of Kansas
Department of Medicinal Chemistry
Malott Hall
1251 Wescoe Hall Drive, Room 4070
Lawrence, KS 66045

Ph.D. Degree Requirements

If credit has not already been obtained in the courses below or their equivalents, students must complete the following courses as early as is practical in the graduate program: 1 semester of Physical Chemistry, and Biochemistry. Satisfactory completion of qualifying American Chemical Society (ACS) examinations in organic chemistry and biochemistry also is required.

A comprehensive written examination is used to assess students’ knowledge of medicinal chemistry, organic chemistry, and biochemistry. This examination is administered immediately at the end of year 1 in the summer. After completing the comprehensive examination, the major part of the course work, and other requirements, the student takes an oral comprehensive examination. After completing this examination, the student prepares an original research proposal for presentation to the faculty. The final requirement for the Ph.D. is the preparation and defense of a dissertation based on original laboratory research conducted by the candidate.

**Note:** Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

General requirements, such as those related to the comprehensive oral examination, the dissertation, and the dissertation defense, are listed in the Graduate Studies (p. 2522) section of the online catalog.
Neurosciences

Neurosciences Graduate Programs

The graduate program in neurosciences at the University of Kansas is a degree-granting program. Students are admitted directly into the program. The program is coordinated by the Lawrence campus of the University - with strengths in the behavioral, biological, chemical, and pharmaceutical sciences - and the Medical Center campus in Kansas City - with strengths in all the biomedical and clinical sciences. Each student is asked to indicate the campus on which he or she would like to be considered for admission. Students in this program should expect to be admitted to and receive a Ph.D. degree in neurosciences.

The program appeals to students who want to teach and/or do research in a university or do research in a pharmaceutical/biotechnology company or government laboratory. Students who are interested in this field wish to work out individual programs spanning a great breadth from molecular and cellular neurobiology to organism-based neurophysiology, behavioral neurobiology, and cognitive neuroscience. Students take advantage of the many research and training opportunities available at two campuses of a major research university. Our students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. If this type of program fits your professional training expectations, we invite you to join us.

M.S. Degree Requirements

The M.S. is offered in rare cases where attainment of the Ph.D. is inappropriate. A student may earn the M.S. by completing these minimum requirements:

- The courses in the curriculum of the first year of the Ph.D. training program.
- The course in advanced neuroscience.
- A thesis based on either original research or library research.
- The total credit hours of graduate-level courses required for the M.S. degree.

Doctor of Philosophy in Neurosciences

Students take advantage of the many research and training opportunities available at two campuses of a major research university. Our students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. If this type of program fits your professional training expectations, we invite you to join us.

Applications and Program Administration

The administrative offices for the interdisciplinary neuroscience program are in the School of Pharmacy in Lawrence and at the Hemenway Life Sciences Innovation Center in Kansas City.

All application materials are reviewed by faculty committees on the Lawrence and Kansas City campuses. Students should have B.A. or B.S. degrees in one of the following fields: anthropology, behavioral sciences (psychology, human development), biology, chemistry, engineering, neuroscience, or pharmacology. Preference is given to students who have completed courses in introductory biology and at least one course in
advanced biology topics such as biochemistry, physiology, microbiology, molecular biology, and courses in introductory and organic chemistry or in calculus and physics. The graduate curriculum requires background knowledge in these fields. Students who do not have sufficient training will be asked to complete the appropriate courses before being admitted. The program requires submission of the standard GRE scores with all applications, three letters of recommendation, and an essay by the applicant about his or her career goals, i.e. why he or she wishes to become a neuroscientist. Selection of graduate students is based on grade-point average, Graduate Record Examination scores, letters of recommendation, and evidence of previous experience in research. The minimum standard acceptable for admission to the graduate program is a grade-point average of 3.0. Inquiries and applications are welcome at any time. Most students enter the program in August. Full consideration for August admission can be assured for all applications received by the 2nd Friday of January.

The University of Kansas accepts only on-line applications. The fees are: Domestic student on-line application fee: $65 International student on-line application fee: $85

The deadline for receipt of application materials to the Neuroscience Graduate Program is the 2nd Friday of January in consideration for admission to the Fall semester. Institution Code: 6871 / Neuroscience Program Code: 0213

Ph.D. Degree Requirements

The neuroscience curriculum is subdivided into core courses that all students must complete and electives representing the 2 major specializations,

- Cell and Molecular Neuroscience and
- Cognitive and Systems Neuroscience.

There is considerable flexibility in the curriculum to accommodate specific interests of the students and course availability. Course choices should be done by consulting your mentor and the Director of the Neuroscience Program prior to establishing a graduate committee. A 5-member faculty advisory committee including at least 3 members of the neuroscience program should be in place at the beginning of the second year of study to help the student choose electives if needed but more so to provide guidance on the research progress. Students should meet with the committee in the Fall of their second year of study and present their research progress to the committee and an outline of their thoughts for preparing a 6 page proposal for their oral defense in the spring/summer of the second year.

Continued enrollment in the neuroscience seminar is required and students are expected to present a yearly seminar. This can constitute a literature review for first year students and subsequent presentations are typically on research progress.

Students also receive training in the responsible conduct of research and teaching in the neurosciences. For the Ph.D., the student completes the core curriculum as well as research skills training, comprehensive oral examination, preparation of a dissertation, and final oral examination and defense of the dissertation.

All students must complete a research skill. Commonly used areas are radiation biology and radiation safety, cell culture methodology, techniques of electron and confocal microscopy, molecular biology laboratory training, computer science training, statistics, and training in electronics and instrumentation.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

An example of a standard progression through the curriculum is provided below.

Pharmaceutical Chemistry

Pharmaceutical Chemistry Graduate Programs

Pharmaceutical Chemistry is a broad discipline that integrates diverse areas of science ranging from biological to chemical sciences. Students in the program will become familiar with aspects of physical, organic and analytical chemistry, chemical kinetics, biopharmaceutics and pharmacokinetics, and biotechnology including vaccines. To address these needs, the department offers a series of eight (8) core courses designed to hone the student’s skills in these topical areas, which are considered essential in understanding problems of biological, biophysical and chemical processes at the molecular level. Refer to the website (http://pharmchem.ku.edu/academics-overview) then consult the links Coursework Research Overview and Department Graduate Student Handbook for details. Every student entering the program is expected to complete the core courses during the first three semesters of graduate study. Students can choose from a variety of elective courses that allow them to gain knowledge and skills in areas specific to individual research project interests. The department places emphasis on excellence in research making every effort to ensure that students can maximize efforts on their research projects toward earning the Ph.D. degree in a timely fashion.

Currently, the department has 16 faculty members, about 35 graduate students, and a similar number of postdoctoral fellows and research scientists. The department is recognized nationally and internationally, with most graduates and researchers going on to successful careers in the pharmaceutical industry, government positions and academia. The department serves as the home department for the long-standing NIH training grant in pharmaceutical biotechnology.

Facilities

The department is located on KU’s west campus in the Simons Biosciences Research Laboratories and the Multidisciplinary Research Building (MRB). Recently renovated and expanded, Simons is a modern, well-equipped research facility. MRB houses researchers from the pharmaceutical chemistry and a variety of other disciplines, thus encouraging interdisciplinary interaction and collaboration. The department is well equipped for biochemical, biophysical and chemical research, having state-of-the-art spectroscopic, physical characterization, chromatographic and mass spectrometry instrumentation. Within the department there are facilities for cell culture, several advanced fluorescence microscopes, and numerous components and software for proteomic analysis. Furthermore, the faculty has established the Macromolecule and Vaccine Stabilization Center (MVSC) and Kansas Vaccine Institute (KVI), which contain an extensive array of instrumentation for the characterization of both small and macromolecules. Examples of analytical instrumentation include circular dichroism spectrophotometers, FTIR, capillary LCQ-Tof mass spectrometry, and particulate analysis. Additionally the university offers state of the art equipment and service facilities to assist with many aspects of research. For example, the Molecular Structures Group (MSG) is a campus-wide facility encompassing NMR, MS, X-ray Crystallography, Protein Production, Fragment-based Drug Discovery, and Molecular Graphics and Modeling Laboratories available to all campus members for a nominal fee. Near the Simons building, the structural biology wing of the MSG houses an 800-mHz NMR along with many other instruments and services.

Courses

This elective class will explore emerging areas of research currently impacting the pharmaceutical industry. Potential topics include; biologicals as therapeutics, drug targeting, produgs, nanotechnology, biological barriers, gene therapy, transporters, vaccines, intracellular drug trafficking, controlled release drug delivery, cancer therapy, analytical biotechnology and many others. The class will be team taught by PHCH faculty and guest speakers. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHCH 512. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is two-hour class that meets 8 times during the semester. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHCH 514. Scientific Writing for the Health Professional. 2 Hours.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and successful communication depends on clarity of thought and careful use of language. This course is intended for 3rd professional (P3) year students who are seeking residency and will need to write research proposals and abstracts, as well as prepare effective posters and presentations. It is an intensive course with multiple writing assignments. Students are expected to participate fully, and individual feedback and guidance on writing will be provided by the instructor. Graded on a satisfactory/fail. Prerequisite: 3rd professional (P3) year students who plan to complete post-doctoral residency training. LEC.

The University of Kansas
PHCH 515. Oral Presentations for the Health Professional. 1 Hour.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and a successful oral presentation depends on clear thinking and careful slide design to tell a story. This course is intended for 3rd year professional (P3) pharmacy students who are seeking residency and will need to prepare effective presentations. It is an intensive course with successive slide drafts and presentations. Students are expected to participate fully, and individual feedback and guidance on presentations will be provided by the other students and by the instructor. Graded on a satisfactory/fail basis. Prerequisite: PHCH 514. LEC.

PHCH 517. Pharmacy Calculations. 2 Hours.
An introduction to the mathematics involved in filling prescriptions and in manufacturing pharmaceuticals. Includes an introduction to standard prescription notation and familiarization with pharmaceutical weights and measures. LEC.

PHCH 518. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: PHCH 517. LEC.

PHCH 605. Vaccines. 1 Hour.
Vaccines are currently the most powerful therapeutic approach available for infectious disease and promise to become of increasing importance for a wide variety of other pathologies including cancer. This course discusses the immunological basis of vaccinology, types of vaccines currently available and in development and the process by which vaccines are made from the basic research stage through their pharmaceutical development and marketing. Ethical aspects of vaccine use will also be considered. LEC.

PHCH 625. Pharmacokinetics. 3 Hours.
A discussion of the basic concepts, and some clinical applications, of pharmacokinetics, clearance concepts, extravascular dosing, and the use of pharmacokinetics in dosage regimen design and adjustment. Prerequisite: PHCH 517 and PHCH 518. LEC.

PHCH 626. Biopharmaceutics and Drug Delivery. 3 Hours.
A study of biological barriers to drug delivery, conventional dosage forms, and new and future drug delivery strategies. Prerequisite: PHCH 517, PHCH 518, and PHCH 625. LEC.

PHCH 667. Introduction to Clinical Chemistry. 2 Hours.
A lecture-discussion course concerned with identification of the contents of physiological fluids, changes in physiological fluid content induced by disease and drugs, and therapeutic drug monitoring: case studies are presented. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHCH 690. Undergraduate Research in Pharmaceutical Chemistry. 1-5 Hours.
Student will be assigned a suitable research project in the area of pharmaceutical analysis or pharmaceutics. Prerequisite: Consent of instructor. IND.

PHCH 693. Clinical Pharmacokinetics. 2 Hours.
This course presents discussions on physiological and disease state variables in pharmacokinetics for selected drugs and drug classes, and instructs students in the use of physiological and disease state pharmacokinetic information to develop individualized therapeutic regimens. Prerequisite: PHCH 625 and PHCH 626. LEC.

PHCH 694. Problems in Pharmaceutical Chemistry. 1-5 Hours.
A student will be assigned a suitable research project in an area of pharmaceutical analysis or pharmaceutics. This course is offered regularly by the Department of Pharmaceutical Chemistry to meet the special needs of selected students, usually for one of the following two situations: (1) This course may be taken when a student has a special interest in a problem or area of limited scope and desires to pursue that study in depth under supervision of a member of the faculty. (2) This course is sometimes used as a remedial class to provide a mechanism of intensive review and study in an area of weakness. Prerequisite: Consent of instructor. IND.

PHCH 700. Experimental Methods in Pharmaceutical Chemistry. 1-5 Hours.
Discussions, lectures, and laboratory work designed to acquaint and provide hands on experiences to advanced undergraduate and graduate students with experimental design, methods, and approaches relevant to modern research in pharmaceutical chemistry. Prerequisite: Consent of instructor. LEC.

PHCH 705. Writing and Communicating Science for Graduate Students. 3 Hours.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 706. Writing and Communicating Science for Graduate Students. 3 Hours.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: This course is only open to distance education students. LEC.

PHCH 712. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is a two-hour class that meets 8 times during the semester. Prerequisite: Graduate standing in Pharmaceutical Chemistry or a trainee of the NIH Biotech Training Grant. LEC.

PHCH 715. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: Master's or PhD candidate in Engineering, Chemistry,
Medicinal Chemistry, or Pharmaceutical Chemistry (by appointment for seniors or graduate students in departments not listed). LEC.

PHCH 716. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: This course is only open to distance education students. LEC.

PHCH 718. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: Graduate standing. LEC.

PHCH 719. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to distance education students. Prerequisite: Graduate standing. LEC.

PHCH 725. Molecular Cell Biology. 3 Hours.
Fundamentals and advanced concepts in cell biology and the molecular interactions responsible for cell functions, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. (Same as CPE 725.) Prerequisite: Fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell functions, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. (Same as CPE 725.) Prerequisite: Graduate standing or consent of instructor. LEC.

PHCH 730. Biopharmaceutics and Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. LEC.

PHCH 731. Biopharmaceutics and Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course open only to distance education students. LEC.

PHCH 744. Organic Chemistry for Pharmaceutical Scientists. 3 Hours.
A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include functional group chemistry: electronic structure, acid/base properties: molecular structure and properties (dipole, strain, and steric effects, inductive and resonance effects); dynamics of reactions (the major organic reaction mechanism, kinetics, energy profiles, isotope effects, linear free energy relationships), solvent effects, stereochemistry and conformation, an introduction to orbital symmetry control; basic thermodynamic and kinetic concepts; and an overview of important classes of mechanisms. This course is only open to distance education students. Prerequisite: CHEM 624 and CHEM 626. LEC.

PHCH 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as PTX 775, BIOL 775, CHEM 775, MDCM 775 and NURO 775.) Prerequisite: BIOL 600 or equivalent. LEC.

PHCH 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801 and PHCH 802.) LEC.

PHCH 802. Issues of Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. This course is open only to distance education students. (Same as PHCH 801, MDCM 801, NURO 801, and PTX 801.) LEC.

PHCH 816. Careers in the Biomedical Sciences. 1 Hour.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816 and MDCM 816.) Prerequisite: Permission of instructor. SEM.

PHCH 826. Molecular Cell Biology. 3 Hours.
Fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell function, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. This course is only open to distance education students. LEC.

PHCH 850. Solid State Stability and Formulation. 2 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 851. Solid State Stability and Formulation. 2 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. This course is open only to distance education students. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and MDCM 860.) Prerequisite: Permission of instructor. LEC.
PHCH 862. Physical Chemistry of Solutions, Solids and Surfaces. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. LEC.

PHCH 863. Physical Chemistry of Solutions, Solids and Surfaces. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. This course is open only to distance education students. LEC.

PHCH 864. Pharmaceutical Analysis. 4 Hours.
This course is intended to be a comprehensive treatment of contemporary techniques used to validate analytical methods for the determination of drugs in the bulk form, pharmaceutical formulations, biological samples and other relevant media. The emphasis will be on chromatographic techniques reflecting the preeminent position that those techniques occupy in the field of pharmaceutical and biomedical analysis. Prerequisite: Previous or concurrent enrollment in PHCH 684. LEC.

PHCH 865. Pharmaceutical Analysis. 4 Hours.
Advanced course on pharmaceutical analysis. This course is only open to distance education students. LEC.

PHCH 870. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 871. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. This course is only open to distance education students. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 895. Research in Pharmaceutical Chemistry. 1-11 Hours.
Advanced level research in collaboration with a faculty member in pharmaceutical chemistry or related areas. This course is limited to students who are doing research, but not necessarily working toward either a master's or a doctoral degree. RSH.

PHCH 898. Master's Thesis. 1-10 Hours.
Master's Thesis. This course is open only to distance education students. THE.

PHCH 899. Master's Thesis. 1-11 Hours.
Graded on a Satisfactory/Fail basis. THE.

PHCH 920. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. LEC.

PHCH 921. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. This course is only open to distance education students. LEC.

PHCH 972. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. LEC.

PHCH 973. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. This course is only open to distance education students. LEC.

PHCH 974. Advanced Special Topics in Pharmaceutical Chemistry. 1-3 Hours.
Various topics pertinent to the area of pharmaceutical chemistry will be explored. Graded on a satisfactory/unsatisfactory basis. LEC.

PHCH 978. Pharmaceutical Chemistry Seminar. 1 Hour.
A seminar on the chemistry of pharmaceutical systems. LEC.

This course is open only to distance education students. THE.

THE.

Master of Science in Pharmaceutical Chemistry

Pharmaceutical Chemistry Graduate Programs

Pharmaceutical Chemistry is a broad discipline that integrates diverse areas of science ranging from biological to chemical sciences. Students in the program will become familiar with aspects of physical, organic and analytical chemistry, chemical kinetics, biopharmaceutics and pharmacokinetics, and biotechnology including vaccines. To address these needs, the department offers a series of eight (8) core courses designed to hone the student’s skills in these topical areas, which are considered essential in understanding problems of biological, biophysical and chemical processes at the molecular level. Every student entering the program is expected to complete the core courses during the first three semesters of graduate study. Refer to the website (http://pharmchem.ku.edu/academics-overview) then consult the links Coursework Research Overview and Department Graduate Student Handbook for details. Students can choose from a variety of elective courses that allow them to gain knowledge and skills in areas specific to
individual research project interests. The department places emphasis
on excellence in research making every effort to ensure that students
can maximize efforts on their research projects toward earning the Ph.D.
degree in a timely fashion.

Students are primarily admitted to the department to pursue the Ph.D.
degree, however students may opt to terminate graduate studies with
the M.S. degree. For external students seeking an advanced degree, the
department offers the distance M.S. and Ph.D. degrees. To be eligible for
the distance programs, the students must be employed in the private or
government sectors, meeting the same requirements as on-site students,
have access to laboratory facilities and the availability of an appropriately
trained scientific advisor at the remote site. The distance Ph.D. program
is only available to students who have completed the distance M.S. degree
with a highly meritorious performance.

Graduate Admission

Students with a bachelor level degree or a master’s degree in chemistry,
pharmacy, the biological sciences, material sciences, chemical
engineering or related disciplines are encouraged to seek admission
to our program. Except under unusual circumstances, we review and
accept candidates for admission into the fall semester only. All information
must be delivered to us before we can begin to consider your application.
Entering students are expected to be competent in basic principles of
organic chemistry, physical chemistry and two semesters of calculus
equivalent to KU MATH 121/122.

Refer to the website (http://pharmchem.ku.edu/academics-overview
(http://pharmchem.ku.edu/academics-overview)) then consult the
link Admissions and Requirements, then the sub-link Admissions
Requirements for details. Although the department does not have a
formal application deadline, the faculty begins evaluations of applications
around January 15 each year. To ensure full consideration, it is highly
recommended that complete applications be in the department far in
advance of January 15.

Admitted students receive a competitive stipend, tuition, and basic health
insurance. Students also can be selected to participate in the Takeru
Higuchi and Nigel Manning Ph.D. Intersearch Program, allowing them to
conduct a portion of their research at the Victorian College of Pharmacy
(http://www.vcp.monash.edu.au (https://www.monash.edu/pharm/)) at
Monash University in Melbourne, Australia. In addition, students are
encouraged to participate in other industrial and/or academic internship
programs the department offers.

A number of fellowship awards are offered to recognize academic
superiority and to assist meritorious students in the timely completion of
their degree programs. The number of fellowships awarded each year
depends upon available funds. For a description of funding opportunities
for KU graduate students, visit the Graduate Studies website (https://
graduate.ku.edu/funding (https://graduate.ku.edu/funding/)). Students with
particularly outstanding undergraduate records may be eligible for special
awards. The Department of Pharmaceutical Chemistry is a Madison and
Lila Self Graduate Fellowship Program (http://selfgraduate.ku.edu (http://
selfgraduate.ku.edu/)) partner at KU. The program provides a generous
stipend and tuition to outstanding students for 4 years of graduate study.
At the department level, the Higuchi, Lindenbaum, Ryting, Stella, and
Waugh Fellowships are awarded each year to incoming graduate students
with high promise.

Any materials sent directly to the department should be directed to:

M.S. Degree Requirements

Except under unusual circumstances, the Department of Pharmaceutical
Chemistry does not recruit students seeking the M.S. degree; however
after admission to the Ph.D. program, the student may select to terminate
with the M.S. degree. For this option, the student must have satisfactorily
completed most of the core courses and sufficient research to support
an M.S. thesis and oral defense. Alternatively, provision may be made
for the preparation of an extensive research report based on laboratory
investigations, which is presented in an oral examination.

Distance Master’s Degree Program

The department also offers a distance master’s program. See the
website (http://pharmchem.ku.edu/admissions-requirements-ms (http://
pharmchem.ku.edu/admissions-requirements-ms/)) for details. To be
eligible for the M.S. distance program, the student must be employed in
the private or government sectors, meeting the same requirements as on-
site students, have access to laboratory facilities and the availability of an
appropriately trained scientific advisor at the remote site. This program
features the same high-quality lectures and courses offered in the on-
campus M.S./Ph.D. program but allow students to complete the degree
while working at a remote location. Students typically take 1 course a
semester. All courses offered by the department can be taken this way.
For questions, contact the director of the distance master’s program, John
Stobaugh, 785-864-3996, stobaugh@ku.edu.

Doctor of Philosophy in
Pharmaceutical Chemistry

Pharmaceutical Chemistry Graduate Programs

Pharmaceutical Chemistry is a broad discipline that integrates diverse
areas of science ranging from biological to chemical sciences. Students
in the program will become familiar with aspects of physical, organic
and analytical chemistry, chemical kinetics, biopharmaceutics and
pharmacokinetics, and biotechnology including vaccines. To address
these needs, the department offers a series of core courses (refer to
the graduate student handbook http://www.pharmchem.ku.edu (http://
www.pharmchem.ku.edu/)) designed to hone the student’s skills in these
topical areas, which are considered essential in understanding problems
of biological, biophysical and chemical processes at the molecular level.
Every student entering the program is expected to complete the core
courses during the first three semesters of graduate study. Students
可以选择 from a variety of elective courses that allow them to gain
knowledge and skills in areas specific to individual research project
interests. The department places emphasis on excellence in research
making every effort to ensure that students can maximize efforts on their research projects toward earning the Ph.D. degree in a timely fashion.

Admitted students receive a competitive stipend, tuition, and basic health insurance. Students also can be selected to participate in the Takeru Higuchi and Nigel Manning Ph.D. Intersearch Program, allowing them to conduct a portion of their research at the Victorian College of Pharmacy (http://www.vcp.monash.edu.au (https://www.monash.edu/pharm/)) at Monash University in Melbourne, Australia. In addition, students are encouraged to participate in other industrial and/or academic internship programs the department offers.

**Graduate Admission**

Students with a bachelor level degree or a master’s degree in chemistry, pharmacy, the biological sciences, materials sciences, chemical engineering or related disciplines are encouraged to seek admission to our program. Except under unusual circumstances, we review and accept candidates for admission into the fall semester only. All information must be delivered to us before we can begin to consider your application. Entering students are expected to be competent in basic principles of organic chemistry, physical chemistry and two semesters of calculus equivalent to KU MATH 121/122.

Refer to the website (http://pharmchem.ku.edu/academics-overview (http://pharmchem.ku.edu/academics-overview/)) then consult the link Admissions and Requirements, then the sub-link Admissions Requirements for details. Although the department does not have a formal application deadline, the faculty begins evaluations of applications around January 15 each year. To ensure full consideration, it is highly recommended that complete applications be in the department far in advance of January 15.

Admitted students receive a competitive stipend, tuition, and basic health insurance. Students also can be selected to participate in the Takeru Higuchi and Nigel Manning Ph.D. Intersearch Program, allowing them to conduct a portion of their research at the Victorian College of Pharmacy (http://www.vcp.monash.edu.au (https://www.monash.edu/pharm/)) at Monash University in Melbourne, Australia. In addition, students are encouraged to participate in other industrial and/or academic internship programs the department offers.

A number of fellowship awards are offered to recognize academic superiority and to assist meritorious students in the timely completion of their degree programs. The number of fellowships awarded each year depends upon available funds. Any materials sent directly to the department should be directed to:

The University of Kansas  
Department of Pharmaceutical Chemistry  
Attn: Michelle Huslig  
Simons Labs

2095 Constant Ave., Room 182  
Lawrence, KS 66047  
Telephone: 785-864-4822, fax: 785-864-5736, mhuslig@ku.edu

**Ph.D. Degree Requirements**

**Entering Background**

Students entering the program are expected to be competent in basic principles of physical/organic chemistry and mathematics. These requirements are typically satisfied by most degrees in the basic or pharmaceutical sciences. One year of organic chemistry for majors, a physical chemistry course that includes classical thermodynamics, and two semesters of calculus equivalent to KU MATH 121/122.

**Core Courses and Foundation Exam**

All students participating in the Pharmaceutical Chemistry Ph.D. program are required to take eight (8) core courses, which are designed to ensure that graduates maintain the department’s long-standing reputation for strength in the physical-chemical sciences as they relate to modern research in Pharmaceutical Chemistry (Pharmaceutics). After satisfactory completion of the eight (8) core courses the student is eligible to take the Foundation Exam.

**Research Skills (RS2) and Elective Requirements**

Graduate students must take one elective course in addition to core courses. This may be from the courses offered by the Department of Pharmaceutical Chemistry or from other science and engineering departments on campus with prior approval from the graduate director. This requirement must be completed prior to undertaking the comprehensive examination at the end of year 2.

**Comprehensive Examination for Ph.D. Students**

The student will be eligible for the comprehensive examination subsequent a satisfactory performance on the Foundation Exam and the completion of RS2 requirements. The exam will be based on a series of oral questions based upon an oral presentation of a research proposal focused on their research. For addition details refer to the website (http://pharmchem.ku.edu/academics-overview (http://pharmchem.ku.edu/academics-overview/)) then consult the link Department Graduate Student Handbook. Upon passing the comprehensive examination, students continuing on to the Ph.D. degree will receive a non-thesis M.S. degree.

**Dissertation**

Each Ph.D. candidate must submit and defend a dissertation resulting from research of sufficient originality and quality for publication in peer-reviewed scientific journals. The research is conducted under the supervision and guidance of the student’s advisor, with input from the dissertation committee as needed. The median time for students to complete the Ph.D. degree is 5.3 years.

**Distance Ph.D. Degree Program**

The department also offers a distance Ph.D. program. Admittance is offered to a limited number of highly qualified students who excelled while completing the Distance M.S. degree program. Interested students should inquire with their M.S. advisor, onsite advisor and the graduate
director for details. This program features the same didactic coursework and research requirements as in the onsite Ph.D. program but allows students to complete the degree while working at a remote location. For questions, contact the graduate director, John Stobaugh, 785-864-3996, stobaugh@ku.edu.
Pharmacology and Toxicology

Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology — especially in neurodegeneration, psychiatric disorders, and addiction — and the effects of diabetes on the nervous system. The research program is founded on strong Ph.D. and M.S. graduate programs.

Doctoral students are prepared to teach and do research in a university, pharmaceutical, biotechnology, or government laboratory setting. New Ph.D. students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. The department recruits 4 to 5 Ph.D. students each year and offers stipends and tuition coverage.

The major aim of the MS degree program is to provide qualified graduates to institutions in academia, industry, and government. The Master of Science in Pharmacology and Toxicology program emphasizes student’s research skills in molecular and neuro-pharmacology and toxicology. In addition to the didactic component of our training, we view hands-on training in laboratory research critical to the master’s thesis experience.

The Distance Master of Science degree in Pharmacology and Toxicology is a program designed to train individuals in molecular, cellular and organ systems pharmacology and toxicology. The program provides advanced scientific knowledge in pharmacology and toxicology and is designed for individuals who are seeking additional academic qualifications that will facilitate their advancement at their place of employment, or will increase their competitiveness for admission to other graduate or professional degree programs.

The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences.

Facilities

Research facilities offer a range of modern instrumentation and many research support services. Major instruments include tissue culture rooms, ultracentrifuges, scintillation counters, high-pressure liquid chromatography systems, a patch-clamp electrophysiology system with Nikon fluorescent microscope, microprocessor-controlled spectrophotometers and fluorometers including a dual excitation wavelength instrument for intracellular measurements and a time-resolved luminescence and fluorescence microparticle reader with dual dispensing capabilities, a Seahorse Extracellular Flux Analyzer for measuring cell metabolism and major energy-producing pathways of the cell, a dark room with a film processor, and real-time PCR equipment.

University research support facilities also contribute to the high quality of research and training for graduate students. These facilities are fully staffed by professionals and include the Electron Microscopy Lab with transmission and scanning scopes; the Biochemical Research Services Lab for Illumina RNAseq, protein and DNA sequencing, amino acid analysis, and oligonucleotide and peptide syntheses; a High Throughput Laboratory for screening compounds as potential tools and drug development, and the Molecular Graphics and Modeling Lab with VAX computers, extensive databases for protein structures, and multiple molecular modeling programs an NMR facility; an X-ray Crystallography Laboratory; a Mass Spectrometry Laboratory; and an Instrumentation Design Laboratory. All labs have current computer technology, including hardware and extensive software for imaging, data analysis, data reduction, protein and gene analysis, and statistical tests.

Courses

P&TX 630. Pharmacology I. 4 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in PTX 630 include, general principles of pharmacokinetics and pharmacodynamics, molecular biology, pharmacogenomics, and pharmacology of the nervous system. Prerequisite: BIOL 646 or equivalent. LEC.

P&TX 631. Pharmacology II. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: PTX 630 and BIOL 400 or equivalent. LEC.

P&TX 632. Pharmacology III. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: PTX 630 and PTX 631. LEC.

P&TX 633. Pharmacology IV. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in PTX 633 include cardiovascular and renal pharmacology. Prerequisite: PTX 630, PTX 631 and PTX 632. LEC.

P&TX 640. Toxicology. 2 Hours.
General principles of toxicology, treatment, and management of accidental poisoning, and current topics of interest. Prerequisite: PTX 630, PTX 631, and PTX 632. LEC.

P&TX 642. Obesity, Diabetes, and Metabolic Syndrome: Current Concepts. 1 Hour.
The objective of this course is to provide students with an opportunity to read, examine, and report on a broad array of topics relevant to diabetes and obesity. Students will be given broad latitude to propose topics of interest to them within the area of diabetes and obesity. The format of the
course will be group presentations. Groups of 3 students will identify a topic of interest to them in the field of diabetes and obesity, prepare a 30 min presentation and deliver it to the class for discussion. Prerequisite: PTX 630. LEC.

P&TX 643. Current Concepts of Neurodegenerative Disease. 1 Hour.
Neurodegenerative diseases, such as Alzheimer's and Parkinson's diseases, are associated with older age and/or enhanced oxidative stress. The possible causes for the development and progression of these diseases with relation to current research in the field will be discussed. Additionally, a summary of available and suggested future treatments will be given. Prerequisite: PTX 630. LEC.

P&TX 644. Adverse Drug Events. 1 Hour.
The objective of this course is to alerts students to common and preventable adverse drug events. This course will provide students with an opportunity to read, examine, and report on a broad array of topics relevant to adverse drug events. Students will be given broad latitude to propose topics of interest to them within the area of adverse drug events. In addition students can report on common and preventable food-drug, herb-drug, and disease-drug interactions. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them among a list of provided topics, prepare a 30 minute presentation and deliver it to the class for discussion. Prerequisite: 3rd, 4th, or 5th professional year standing in the School of Pharmacy. LEC.

P&TX 645. Neurobiological Basis of Addiction: Physiological, Biochemical, Pharmacological & Treatment Concepts. 1 Hour.
Several addictions will be discussed including addictions to alcohol, cocaine, methamphetamine, gambling, and others as time permits. The physiology, biochemistry, pharmacology and available treatments for these addictions will be reviewed. The role of pharmacotherapies will be discussed, particularly as they relate to the molecular basis of addiction. Behavioral and psychological approaches also will be examined. Prerequisite: Completion of PTX 632 or special permission from faculty. LEC.

P&TX 646. Current Concepts of Psychotopic Medication. 1 Hour.
This course provides information regarding commonly used psychotropic medications, or any drug that affects brain activities associated with mental processes and behavior. This includes, but are not limited to, the categories of antipsychotics, mood stabilizers, anti-anxiety (anxiolytics), antidepressants, and stimulants. The range of topics from basic biology to drug-drug interactions will be explored in the course. Groups of three students will identify a topic of interest to them in the field of psychotropic drugs and affect, mood, or behavior, prepare a 30 min presentation, and deliver it to the class for discussion. Prerequisite: PTX 630. LEC.

P&TX 694. Undergraduate Laboratory: Research in Pharmacology and Toxicology. 1-5 Hours.
Original research on a laboratory problem of limited scope. This course cannot count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: Consent of instructor. IND.

P&TX 698. Library Problems in Pharmacology and Toxicology. 1-5 Hours.
Original library review of a limited special topic in pharmacology and toxicology. The student will write a review in his or her report. This course may count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: PTX 635 and consent of instructor. IND.

P&TX 700. Professional Issues in the Biomedical Sciences. 2 Hours.
A course designed to assist doctoral students in the biomedical sciences in their professional development by providing presentations, discussions, and practical experiences related to career planning. Topics include diverse career opportunities and expectations of each, preparation of vitae/resumes and other elements of a successful job search, writing scientific papers and dealing with editors, developing programmatic research programs, balancing professional obligations, advancing through promotions, and related topics. Prerequisite: Graduate standing in pharmacology and toxicology. LEC.

P&TX 730. Advanced Pharmacology I - CNS and ANS. 2 Hours.
A detailed study of the fundamentals of autonomic nervous system, central nervous system, and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 731. Advanced Pharmacology II - Cardiovascular and Renal System. 2 Hours.
A detailed study of the fundamentals of cardiovascular system, renal system and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 732. Advanced Pharmacology III - Immunology and Inflammatory Diseases. 2 Hours.
A detailed study of the fundamentals of immunology and inflammation and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 733. Advanced Pharmacology IV - Endocrinology. 2 Hours.
A detailed study of the fundamentals of endocrinology and associated pharmacology. The student will attend PTX 633 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 740. Advanced Biotechnology. 3 Hours.
An examination of basic principles of molecular biology, immunology, and protein chemistry as they apply to the identification, production, stability, delivery, and monitoring of new therapeutic agents provided by the expanding biotechnology industry. Students will attend lectures in PTX 633 and meet separately with faculty for additional discussions of more advanced material on these topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 741. Biomedical Statistics. 3 Hours.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: PTX graduate student status in good academic standing. LEC.

P&TX 742. Experimental Pharmacology. 4 Hours.
Experimental approaches to understanding mechanism of drug action. Use of drugs as tools to understand functioning of biological systems will also be stressed. Historically important experiments will
The student will research and write a twelve page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 750. Pharmacology I- Introduction to Pharmacology and Biotechnology. 3 Hours.
An introduction to the basic principles of biochemistry and molecular biology as well as pharmacokinetics and pharmacodynamics of drug action. Additional lectures will introduce students to principles of genomics, transgenic technologies and microscopy. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 751. Pharmacology II - Endocrine Pharmacology. 2 Hours.
A detailed study of the fundamental concepts of endocrinology with an emphasis on the pathophysiologic details of diabetes and the pharmacology of treatment. Brief discussions on hypothalamic/pituitary, reproductive, thyroid and adrenal endocrinology and pharmacology will be presented. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750 and PTX 785. LEC.

P&TX 752. Pharmacology III- Central Nervous System and Autonomic Nervous System. 3 Hours.
A detailed study of the fundamental concepts of the autonomic nervous system, central nervous system, and select diseases of the CNS and their pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

P&TX 753. Pharmacology IV- Cardiovascular and Renal System. 2 Hours.
A detailed study of the fundamental principles of the cardiovascular system, renal system and their associated pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785, PTX 751 and PTX 752. LEC.

P&TX 754. Pharmacology V - Immunopharmacology, Infectious Diseases and Gastrointestinal Pharmacology. 2 Hours.
This course is a detailed study of the fundamental concepts of immunology, inflammatory-related diseases and immunopharmacology, infectious diseases and gastrointestinal pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

P&TX 755. Molecular Toxicology. 2 Hours.
A detailed study of the fundamentals of the toxicology, drug transformations and the mode of toxicity of various drug classes. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

P&TX 757. Biomedical Statistics. 3 Hours.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, MDCM 775, NURO 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent. LEC.

P&TX 785. Research Proposal. 2 Hours.
To satisfy the research requirement for the on-line distance M.S. program in Pharmacology and Toxicology, the aspiring student must define a research project and prepare a written proposal describing the nature and goals of the project. It is suggested that the student in conjunction with their distance research mentor collaborate in the selection of and the definition of the proposed research. The proposal should be 4 pages (0.5 in margins, 11-12 point Arial, Times Roman or Calibri font) that states the overall goal of the project, the hypothesis to be tested, 2-3 specific aims, a statement of significance and impact of the research and research approach. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750. RSH.

P&TX 799. Pharmacology and Toxicology Seminar. 1-2 Hours.
A review of current literature and research in pharmacology and toxicology. Required of all graduate students in the department every fall and spring semester. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PTX. LEC.

P&TX 800. Pharmacology and Toxicology Teaching Principles. 2 Hours.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in pharmacology and toxicology. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with the faculty whom he or she is assisting. Prerequisite: Graduate standing in pharmacology and toxicology program. RSH.

P&TX 801. Issues in Scientific Integrity. 1-3 Hours.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PHCH 801 and PHCH 802.) LEC.

P&TX 803. Pharmacology Literature Review I. 1 Hour.
This course is designed for graduate students and will fulfill the first written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a six page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 805. Pharmacology Literature Review II. 1 Hour.
This course is designed for graduate students and will fulfill the second written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a twelve page literature review by
choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 825. Research in Pharmacology and Toxicology. 1-10 Hours.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration with a faculty member. Prerequisite: Graduate standing and consent of instructor. RSH.

P&TX 826. Online Research in Pharmacology and Toxicology. 8 Hours.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and consent of KU Pharmacology and Toxicology Faculty Mentor. RSH.

P&TX 885. Distance Master’s Research in Pharmacology and Toxicology. 1-12 Hours.
Original investigations at an advanced level in areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and completion of PTX 785. RSH.

P&TX 889. Distance Master’s Thesis. 2 Hours.
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master’s Degree thesis. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and completion of 12 credits in PTX 885. RSH.

P&TX 890. Distance M.S. Thesis. 2 Hours.
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master’s Degree thesis. Prerequisite: Graduate standing in the On-line M.S. Program in Pharmacology and Toxicology. THE.

P&TX 898. Online Master’s Thesis. 3 Hours.
Independent investigation of a research problem of limited scope leading to the preparation of a written Master’s Degree thesis. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. THE.

P&TX 899. Master’s Thesis. 1-11 Hours.
Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Graduate standing in PTX and consent of instructor. THE.

P&TX 990. Postdoctoral Research. 1-11 Hours.
Advanced level research in collaboration with a faculty member in the department. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Doctoral degree or equivalent in an appropriate related area, and consent of instructor. RSH.

P&TX 999. Doctoral Dissertation. 1-11 Hours.
Hours and credit to be arranged. Original investigation in pharmacology and toxicology. Prerequisite: Consent of instructor. THE.

Master of Science in Pharmacology and Toxicology

Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology — especially in neurodegeneration, mood disorders, and addiction — and the effects of diabetes on the nervous system. The research program is founded on a strong graduate program. The major aim of this Master of Science (MS) degree program is to provide qualified graduates to institutions in academia, industry, and government. The Master of Science in Pharmacology and Toxicology program emphasizes student’s research skills in molecular and neuro-pharmacology. In addition to the didactic component of our training, we view hands-on training in laboratory research critical to the master’s thesis experience. The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences.

Distance Master’s Degree Program

The department also offers a distance master’s program. Please see the website (http://pharmtox.ku.edu/online-master-science-degree-pharmacology-and-toxicology/) for details. The program features the same high-quality lectures and courses offered in the Ph.D. program. The program allows the industrial scientist or student to remain at their respective institutions and earn the M.S. degree under a collaborative academic environment. Students will typically take 1 course a semester and the program is designed for individuals who are seeking additional academic qualifications that will facilitate their professional advancement or increase their competitiveness for admission to other advanced degree programs. For questions, contact our Administrative Assistant Ms. Sarah Hoadley, 785-864-4001, pharmtox@ku.edu or the Director of the Distance Master’s Program, Rick T. Dobrowsky, Ph.D., 785-864-3531, dobrowsky@ku.edu

Graduate Admission

Admission is based on the student’s undergraduate record in a relevant field, Graduate Record Examination scores, and 3 letters of recommendation. A minimum grade-point average of 3.0 on a 4.0 scale is required. Applications from non-English-speaking countries must include a copy of the Test of English as a Foreign Language score. Acceptance depends on the availability of space and faculty commitment.

Students are expected to have bachelor’s degrees in pharmacy, chemistry, biology, pharmacology, toxicology, or other physical science related disciplines. Submit your graduate application online (http://www.graduate.ku.edu/). Send transcripts of all completed college and university course work and all other requested application materials to the department:

The University of Kansas
Department of Pharmacology and Toxicology
Malott Hall
1251 Wescoe Hall Drive, Room 5064
Lawrence, KS 66045

M.S. Degree Requirements

Course Work

Students must earn 18 credit hours in the following courses or their equivalents:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>P&amp;TX 730</td>
<td>Advanced Pharmacology I - CNS and ANS</td>
<td>2</td>
</tr>
<tr>
<td>P&amp;TX 731</td>
<td>Advanced Pharmacology II - Cardiovascular and Renal System</td>
<td>2</td>
</tr>
</tbody>
</table>
Research Skills Requirement

Each MS degree student is required to take credit hours of Research in Pharmacology and Toxicology (P&TX 825) and Masters Thesis (P&TX 899). Enrollment in either course must continue until a total of 12 credit hours are earned, such that when taken together with didactic coursework, research, and thesis, totals 30 hours of graduate coursework.

Students need to maintain continuous enrollment in the program until completion. It is expected that students usually will complete the requirements and graduate in two years.

Each MS degree student is required to submit and defend a thesis resulting from research of sufficient originality and quality for publication in peer reviewed scientific journals. The research is conducted under the supervision and guidance from the student’s advisor, with input from the thesis committee as needed.

Top graduates, if interested, may transfer into a Ph.D. program in Pharmacology and Toxicology offered in the department.

Doctor of Philosophy in Pharmacology and Toxicology

Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology — especially in neurodegeneration, mood disorders, and addiction — and the effects of diabetes on the nervous system. The research program is founded on a strong Ph.D. graduate program. Doctoral students are prepared to teach and do research in a university, pharmaceutical, biotechnology, or government laboratory setting.

New Ph.D. students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. The department recruits about 4 Ph.D. students each year and offers stipends and tuition coverage. The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences.

Graduate Admission

Admission is based on the student’s undergraduate record in a relevant field, Graduate Record Examination scores, and 3 letters of recommendation. A minimum grade-point average of 3.0 on a 4.0 scale is required. Applications from non-English-speaking countries must include a copy of the Test of English as a Foreign Language score. Ph.D. Degree Requirements

Course Work

Incoming students should have completed 4 semesters of Chemistry and 4 semesters of Biology, including a course in Cell Biology and one in Biochemistry. Prerequisites can be completed during the first year. The core courses in Pharmacology and Toxicology that all students are required to take are listed below. Prerequisite for all courses is graduate standing in the Pharmacology and Toxicology Program.

Research Advisory Committee members for Ph. D degree aspirants should be identified by the end of the second year in the program. The committee is composed of at least three members, and the research director serves as chairman. The final Dissertation Defense Committee should consist of the original Advisory Committee (3 members) plus two
(2) other members of the Graduate Faculty. At least one member of the final Dissertation Committee must be from outside the Department.

**Comprehensive Exam Requirements for Ph. D. Students**

The comprehensive examination is composed of 3 parts:

1. Written Comprehensive Examination: Each student must complete two written examinations to complete P&TX 803 and P&TX 805.

2. Preparation of an NIH-style research proposal: After successful completion of the second written comprehensive exam, the student should begin working on their NIH grant proposal. These serve as the basis for the Oral Comprehensive Exam.

3. Oral Comprehensive Examination: After approval of the research proposal by the student’s advisory committee, each student, in consultation with the advisor, takes an oral examination covering the student’s major field.

**Dissertation Research**

The student, with the advisor’s assistance, develops a dissertation project. After the oral comprehensive examination, the student presents the dissertation research project to the advisory committee and receives periodic advice from this committee throughout the project. Upon acceptance of the dissertation by the advisory committee, the candidate must pass a final oral examination, including a defense of the dissertation before the dissertation committee and any other interested members of the Graduate Faculty.
Pharmacy Practice

Pharmacy Practice Graduate Program

The Department of Pharmacy Practice furthers the mission of the School of Pharmacy by striving for excellence in teaching, research, scholarly activity, service, and patient care.

The faculty provide professional educational opportunities for undergraduate, graduate, and postgraduate students and practitioners to enable them to practice pharmaceutical care, adapt to changing professional roles, use new technologies, assume leadership roles in a dynamic health-care environment, and contribute new knowledge to the profession.

Facilities

Facilities of the pharmacy department at the University of Kansas Medical Center (http://www.kumc.edu/) in Kansas City are used in the residency portion of the program.

Courses

PHPR 506. Precision Medicine. 1 Hour.
This course will address the role of precision medicine in pharmacy practice and is designed to extend the students' understanding of the basis for interindividual variation in drug response and the evolving role of the pharmacist. The course will include required readings, lectures, cases and in-class discussions that focus on the evidence and practicality of precision medicine in pharmacy practice. Using selected examples, students will learn about patient factors that drive variability in drug response and how these factors drive drug selection and dosing. With the current focus on the use of genomic data to drive individualized therapy, students will learn about current pharmacogenomic-based practice guidelines and clinical practice references. Students will prepare a 2-page writing assignment and an in-class presentation on the impact of precision medicine on pharmacy practice. Prerequisite: Must be admitted to the School of Pharmacy. LEC.

PHPR 507. Advanced Community Practice. 1 Hour.
The objective of this course is to prepare pharmacy students to practice as advanced pharmacists in a community setting. The course will cover patient care as well as the business and insurance aspects surrounding community pharmacy practice. We will cover a variety of topics including reimbursement, legal issues, Medication Therapy Management (MTM), communication, ethics, and the future of Community Pharmacy practice. Prerequisite: 3rd professional year standing in the School of Pharmacy. LEC.

PHPR 508. Oncology Elective. 1 Hour.
This course is designed to extend the students' understanding of Oncology diseases and treatments beyond what is covered in the Pharmacotherapy series in the School of Pharmacy. Prerequisite: PHPR 646. LEC.

PHPR 509. Medicare Part D. 1 Hour.
This elective course will focus on the understanding and active enrollment of patients into Medicare prescription drug benefit (Part D). Students will mainly focus on the understanding of Medicare eligibility, benefits, formulary requirements, and the administration of benefits. Students will also participate in community outreach which may focus on underserved patients. Prerequisite: 2nd or 3rd professional year standing in the School of Pharmacy. LEC.

PHPR 510. Medical Terminology Elective. 1 Hour.
This course provides the fundamentals for developing a medical vocabulary. The student will develop the ability to understand, define and utilize medical terminology and abbreviations used in patient care. LEC.

PHPR 511. Service-Learning Elective. 1 Hour.
Students will work at a health-related community center and participate in structured learning exercises. The objectives are to: 1) enable students to learn appropriate strategies to communicate and provide services to people with varying languages, cultures, social, and economic backgrounds, disabilities, illnesses, or impairments, 2) increase social interaction and citizenship, 3) heighten social awareness and understanding of ethical issues, and 4) acknowledge social responsibility and realize personal values. FLD.

PHPR 512. Nuclear Pharmacy. 1 Hour.
This course is designed for students interested in learning about nuclear pharmacy practice as a specialty practice in pharmacy. Students will learn about the application of radiopharmaceuticals used in the diagnosis of various diseases or identifying patient therapeutic issues. The course will cover principles of radiation, radiation safety, preparation of and handling of radiopharmaceuticals, their appropriate use, and the training requirements for a nuclear pharmacist. At the conclusion of the course the student will have an insight into this specialty practice in nuclear pharmacy as a potential career. Prerequisite: Students must be admitted to the School of Pharmacy. LEC.

PHPR 513. Chemical Dependency Elective. 1 Hour.
This elective course will enhance the pharmacy student's knowledge and understanding of the current theories behind the addiction process, frequently abused drugs and/or chemicals and the treatment and recovery process. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHPR 514. Communication and Counseling. 1 Hour.
An elective course designed to help students improve professional communication skills. Prerequisite: PHAR 500. LEC.

PHPR 515. The Aging Patient. 1 Hour.
This elective course is designed for the learner to explore many of the clinical considerations employed when caring for the aging patient within our health care system. The course will be devoted to exploring generational perceptions, learning how the aging process can impact patient care, and identifying the role of the pharmacist in enhancing this
care. Prerequisite: 4th or 5th professional year (P2 or P3) standing in the School of Pharmacy. LEC.

**PHPR 516. Pharmacy in Public Health. 1 Hour.**
Public health is more than providing treatment for an illness; it is a concern for the health of an entire population. The ideal is to ensure the health of all. This course will focus on providing students with a solid foundational understanding of what public health is and how pharmacists play a role as a public health provider. The course will cover the concepts and tools used in public health including issues such as: determining health, cultural competence, health promotion, disease prevention, epidemiology and disease, describing populations and community health. Lastly, the course will provide students with specific pharmacist models of public health. Successful models include tobacco cessation programs, community vaccination programs, obesity prevention, tuberculosis monitoring, emergency preparedness and domestic violence. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

**PHPR 517. Medication Safety and Error Prevention. 1 Hour.**
This course introduces the student to medication safety and the technology as well as the tools used in error prevention. The student will also learn about adverse drug events including both medication errors and adverse drug reactions in hospital and retail pharmacy settings. Prerequisite: 4th or 5th professional year (P2 or P3) standing in the School of Pharmacy. LEC.

**PHPR 518. Cultural Competency in Pharmacy Practice. 1 Hour.**
The United States becomes more culturally diverse every year. This course is designed to help student pharmacists excel in today's multicultural environment by improving their cultural competency skills. Students will explore their own culture and those belonging to other diverse cultures. Students are expected to learn the beliefs, needs and tendencies of those with cultures much different than themselves. Prerequisite: Must be admitted to the School of Pharmacy. LEC.

**PHPR 519. Business Planning for Pharmacy. 1 Hour.**
This course is designed for students interested in developing a business plan. Most pharmacists will have an opportunity to develop a new service, product line or even start a new business venture in their careers. Students need to know how to create a formal business plan and how to present the plan to decision makers. The course will cover the basic components and rationale of creating a formal a business plan. When finished students will be expected to have created a written business plan and will present their creation to the class. In this manner, students will gain experience in developing an idea into a plan. Prerequisite: Students must be admitted to the school of Pharmacy. LEC.

**PHPR 520. Specialty Pharmacy. 1 Hour.**
This course will review a variety of diseases including: multiple sclerosis, hepatitis C and autoimmune conditions (psoriasis, ulcerative colitis, etc) and the specialty medications used to treat these conditions. Specialty pharmacy accreditation standards as well as topic discussions reviewing many issues facing the specialty pharmacy industry will be discussed. Guest speakers from different specialty pharmacies in the greater Kansas City area will also present information on their career experiences. Prerequisite: Limited to P2s and P3s. LEC.

**PHPR 521. Practical Pediatrics. 1 Hour.**
This course will expose students to conditions frequently encountered in pediatric care. Students will further develop knowledge and skills necessary to provide appropriate pediatric care in institutional, ambulatory, and community practice settings. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year. LEC.

**PHPR 522. Pharmacy-Based Travel Health Services. 1 Hour.**
This course reviews pertinent problems traveling entails and services pharmacists can provide for traveling patients. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Following the completion of this course, students should be able to recognize the need to establish travel health services, the role of pharmacists in these services, identify the commonly encountered disease states and problems for travelers, and what components comprise travel health by utilizing comprehensive knowledge, skills and resources necessary to establish and deliver successful travel health service. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 2nd or 3rd professional year. Students must have successfully completed the APhA Pharmacy-Based Immunization Delivery program. LEC.

**PHPR 523. Critical Care Problem-Based Learning. 1 Hour.**
This is an elective course focusing on advanced clinical decision making within the field of critical care. Using clinical critical care cases, student will work as a team to assess and make therapeutic recommendations through problem-based learning exercises. These activities aim to prepare students for advanced pharmacy practice and residency experiences in acute care settings by providing instruction in application of primary literature to patient cases, following patient progress through emergency department and intensive care settings, and oral presentation of evidence-based patients cases. Additionally, students will participate in an acute care interprofessional simulation. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year. LEC.

**PHPR 524. Medication-Related Issues and the Social Determinants of Health for Underserved Patients. 1 Hour.**
This course will review a variety of topics related to the social determinants of health with a focus on barriers and solutions around pharmacy and medication-related issues. A focus of the course will be on the under-served patient population of Wyandotte County in Kansas City, KS which is the county with the worst health outcomes and statistics in the state. The main teaching method used in the course will be experiential learning. Students will complete two half-days (approximately 4 hours/session) at Riverview Health Services in Kansas City, KS. During the two half-days students will actively observe medication intake/reconciliation appointments to enroll patients in medication assistance programs to obtain their medications for free. Students will be incorporated and play an active role in the workflow during the second session. Finally, students will present a 15-minute presentation to Riverview staff about a medication related topic for their professional development. Additionally, the entire class will meet during 4 sessions in Lawrence where students enrolled in the elective will meet to review pertinent topics (a few guest speakers), work on and peer-review upcoming presentations and debrief their experiences. This is a unique and immersive learning opportunity to expose you to issues of caring for under-served patient populations and sharpen your verbal presentation skills for a professional audience. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Limited to P2 students in the PharmD program. LEC.

**PHPR 541. Foundations of Interprofessional Collaboration I. 0 Hours.**
This TeamSTEPPS Level 1 experience will introduce interprofessional students to the basic concepts of interprofessional collaboration including values and ethics, roles and responsibilities of healthcare team members, and interprofessional communication tools using the evidence-based national curriculum of TeamSTEPPS. Upon completion of this training experience students will be able to 1) demonstrate a work ethic with
individuals of other professions to maintain a climate of mutual respect and shared values; 2) define the role of health professions (including your own) within the healthcare system; 3) identify opportunities to seek expertise of health professionals to improve communication and healthcare; and 4) acquire basic TeamSTEPPS communication tools to effectively use with healthcare teams. Graded on a satisfactory/unsatisfactory basis. Prerequisite: P1 standing. LEC.

**PHPR 542. Foundations of Interprofessional Collaboration II. 0 Hours.**

This TeamSTEPPS Level 2 experience will provide interprofessional students opportunities to apply key knowledge and skills gained in FIPC I, through role-play and case-based learning. Students will apply their knowledge of roles and responsibilities of healthcare team members and interprofessional communication tools and continue learning with, from, and about students from other professions. Upon completion of this training experience students will be able to: 1) engage diverse healthcare professionals who complement one’s own professional expertise, as well as associated resources, to develop strategies to meet specific patient care needs; 2) choose effective communication tools and techniques, including information systems and communication technologies, to facilitate discussions and interactions that enhance team function; and 3) engage other health professionals appropriate to the specific care situation—in shared patient-centered problem-solving. Graded on a satisfactory/unsatisfactory basis. Prerequisite: P2 standing. LEC.

**PHPR 543. Foundations of Interprofessional Collaboration III. 0 Hours.**

This TeamSTEPPS Level 3 experience will provide interprofessional students opportunities to demonstrate key knowledge and skills gained in FIPC I and II, through simulation. Students will demonstrate their interprofessional communication skills, including specific opportunities to utilize TeamSTEPPS tools. Students will also demonstrate their teamwork abilities by working with interprofessional students during the simulation. Upon completion of this training experience students will be able to: 1) demonstrate communicating effectively with other health professionals about a patient case; 2) exhibit teamwork skills with an interprofessional healthcare team; and 3) utilize key TeamSTEPPS tools with an interprofessional healthcare team. Graded on a satisfactory/unsatisfactory basis. Prerequisite: P3 standing. LEC.

**PHPR 599. Clinical Application of Basic Science. 1 Hour.**

This course is an inter-departmental, team-based, technology-centric elective course. Concomitantly, instructors from the basic and clinical science departments within the school of pharmacy will promote deeper student understanding of the path a drug takes from discovery, development and ultimately clinical use. Instructors will collaborate in course content development to integrate basic and clinical science concepts. The course will utilize a blended learning method, incorporating out of class podcasts, online group collaborative projects, and readiness quizzes and exams. Prerequisite: 4th or 5th professional year standing (P2/P3) in the school of pharmacy and concomitant enrollment in either PTX 599, MDCM 599, or PHCH 599 is required. LEC.

**PHPR 601. Advanced Pharmacy Practice Experience 1. 4 Hours.**

The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 602. Advanced Pharmacy Practice Experience 2. 4 Hours.**

The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 603. Advanced Pharmacy Practice Experience 3. 4 Hours.**

The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 604. Advanced Pharmacy Practice Experience 4. 4 Hours.**

The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 605. Advanced Pharmacy Practice Experience 5. 4 Hours.**

The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.
as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 606. Advanced Pharmacy Practice Experience 6. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 607. Advanced Pharmacy Practice Experience 7. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 608. Advanced Pharmacy Practice Experience 8. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 609. Advanced Pharmacy Practice Experience 9. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 610. Advanced Pharmacy Practice Experience 10. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in nine pharmacy practice experience rotations (PHPR 601-609). PHPR 610 is reserved for students requiring a remedial experiential rotation. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 613. Pharmacoconomics and Health Outcomes. 2 Hours.**
A course to foster an understanding of economic, financial and outcome principles that drive the demand and supply of medical care in the US. Economic logic behind decisions made by patients, physicians, hospitals, managed care organizations, and governments will be covered. Students completing this course should be able to identify the drivers of the health economy, identify different types of pharmacoeconomic evaluations, critically analyze pharmacoeconomic and outcome literature, and apply economic principles to pharmaceutical care. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this class. LEC.

**PHPR 614. Pharmacy Management. 3 Hours.**
A course designed to provide knowledge and skills to effect efficient and effective pharmacy management. This will include foundations in financial management, inventory control, purchasing, cost-effective drug utilization, quality management, pharmacoconomics, and human resource management. LEC.

**PHPR 615. Nuclear Pharmacy Practice. 2 Hours.**
This introductory course in nuclear pharmacy practice provides a basic understanding of radiation, radiation dosimetry, radiopharmaceuticals, and clinical application of radiopharmaceuticals in diagnosis and treatment. The course includes both didactic material as well as laboratory experience. LEC.

**PHPR 619. Health Care Systems and Informatics. 3 Hours.**
This course is an introduction to the organization, financing, and delivery of health care services with a focus on the U.S. health care system. Course content addresses the following questions: how do we evaluate the health care sector, where is health care provided, how is health care financed, what are the characteristics of health care providers (individuals and institutions), what influences the performance of the health care sector, and what lies in the future for health care delivery. The purpose of the course is to prepare pharmacy students for non-clinical aspects of their practice sites. Enrollment limited to pharmacy majors. LEC.

**PHPR 620. Ethical, Legal, and Cultural Issues in Patient Care. 2 Hours.**
This course provides an introduction to the fundamentals of law and ethics as they apply to the practice of pharmacy. Course sessions will focus on ethical expectations of the profession, principles and issues in medical and pharmacy ethics, and laws that govern medication dispensing. LEC.

**PHPR 621. Pharmacy Law. 2 Hours.**
A course developed to increase students’ knowledge and understanding of laws that regulate the pharmacy profession. Prerequisite: Fifth year standing (P3 student). LEC.

**PHPR 624. Pharmacoepidemiology and Public Health. 2 Hours.**
Pharmacy profession has a unique and critical opportunity and responsibility to contribute to the improvement of population health. Public health is a broader discipline that encompasses population health with a variety of other areas, including but not limited to epidemiology, cultural competence, health promotion, disease prevention, and drug
safety. Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects. Considerations are centered on providing beneficial or adverse effects of medication use in large populations and making relevant inferences from essential analytical research designs used in public health. Using population-based-care approach, students will adopt and fulfill public health roles and activities. This course provides a broad introduction to the principles of pharmacoepidemiology and public health with a focus on applications in the field of pharmacy. Prerequisite: Third professional year standing in the School of Pharmacy. LEC.

PHPR 629. Research Design and Biostatistics. 2 Hours.
This course reviews study designs and statistical methods commonly used in primary medical literature. In collaboration with other courses in the curriculum, this course prepares students to interpret and apply primary literature during patient care, collect and analyze data, and maintain clinical competency throughout their professional career in pharmacy. Following completion of this course, students should be able to identify or select appropriate research methods and study designs; collect, summarize and interpret research data; understand basic statistical concepts; identify or select appropriate statistical tests for hypothesis testing; conduct and interpret the results of statistical tests; and evaluate the validity and reliability of published research studies. LEC.

PHPR 630. Drug Information and Literature Evaluation. 1 Hour.
This course will review the fundamental tools used to identify drug information in primary, secondary and tertiary resources. In addition, students will learn to assess published literature, utilize electronic resources, and learn to formulate a response to drug information questions. Following completion of this course, students will be able to understand the strengths and weaknesses of the drug information resources and to apply drug information skills to clinical practice relevant to patient care. Prerequisite: Successful completion of PHPR 629. LEC.

PHPR 635. Problems in Pharmacy Practice. 1-5 Hours.
A course designed for the study of special topics in pharmacy practice. A research paper will be required. Prerequisite: Consent of instructor. IND.

PHPR 661. Pharmacotherapy I. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Drug interactions and patient counseling techniques will be covered. Over-the-counter medications and herbals will also be a significant portion of the course. Prerequisite: First year professional standing in the School of Pharmacy. LEC.

PHPR 662. Pharmacotherapy II. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Second year professional standing in the School of Pharmacy and successful completion of Pharmacotherapy I, PHPR 661. LEC.

PHPR 663. Pharmacotherapy III. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Second professional year standing in the School of Pharmacy and successful completion of Pharmacotherapy II, PHPR 662. LEC.

PHPR 664. Pharmacotherapy IV. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Third professional year standing in the School of Pharmacy and successful completion of Pharmacotherapy III, PHPR 663. LEC.

PHPR 665. Pharmacotherapy V. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Third professional year standing in the School of Pharmacy and successful completion of Pharmacotherapy IV, PHPR 664. LEC.

PHPR 670. Clinical Assessment. 2 Hours.
This laboratory course will allow students to develop clinical assessment skills necessary in the provision of pharmaceutical care to patients with a variety of disease states. Students will combine physical assessment skills, patient counseling skills, and pharmacotherapy knowledge and apply this information to patient care related activities in various clinical settings. Students will apply their skills using various practice models that include medication therapy management, collaborative drug therapy management, and interprofessional healthcare teams. The lab component will require students to meet between 1:00 to 5:00 PM on either Monday, Tuesday, or Wednesdays. In addition, there is a required Thursday discussion section. A detailed schedule of lab meeting dates and times will be provided in the syllabus. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. Students must pass PHPR 664 to be eligible to complete PHPR 670. LAB.

PHPR 690. Research in Pharmacy Practice. 1-5 Hours.
Students will conduct original research in a laboratory, educational, or clinical research setting under the supervision of department faculty. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. RSH.

PHPR 845. Professional Communications and Leadership. 2 Hours.
A course designed to give the graduate student a practical experience in areas of professional communications such as administrative proposals, grants, letters, memos, poster presentations, and written papers. The course focuses on the different kinds of communications required to relate to other health care professionals. Prerequisite: Consent of instructor. LEC.

PHPR 850. Introduction to Pharmacoepidemiology. 3 Hours.
Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects on health. Evaluating a drug's effects commences when a chemical entity becomes a drug candidate, intensifies through clinical trials, and continues after products reach the market. These studies are critical for supporting the proper use of medications in terms of efficacy, effectiveness, and cost-effectiveness. This course provides a broad introduction to the principles of pharmacoepidemiology with a focus on applications in the medical literature. LEC.

PHPR 855. Economic Evaluation of Health Care Programs and Services. 3 Hours.
The course will provide students with an overview and appraisal of the "state-of-the-art" in the evaluation of health care programs and services (with a special emphasis on pharmaceutical programs, services, and products). The purpose of the course is to provide the student with the tools to conduct economic rather than general evaluation of health care programs and services. There will be some discussion of theoretical concepts, but the major emphasis will be on practical methodological issues in economic evaluation of pharmaceutical programs. The course integrates the perspectives of pharmaceutical and health care technology assessment, managed care, outcomes research, and public health. The main topics covered in the course include: cost, cost-minimization, cost-effectiveness, cost-utility, and cost-benefit analyses. LEC.
PHPR 860. Seminar in Pharmacy Practice. 1 Hour.
Research reports, reviews, and/or presentations on the current status of various aspects of pharmacy practice. Prerequisite: Consent of instructor. LEC.

PHPR 865. Advanced Institutional Pharmacy Services I. 1.5 Hour.
Advanced Institutional Pharmacy Services (I) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: human resource management, pharmacy financial management and operations management. Prerequisite: Consent of instructor. LEC.

PHPR 866. Advanced Institutional Pharmacy Services II. 1.5 Hour.
Advanced Institutional Pharmacy Services (II) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: human resource management, clinical services management, specialty pharmacy services and technology management. Prerequisite: Consent of Instructor. LEC.

PHPR 875. Health Care Delivery Systems. 3 Hours.
A continuation of PHPR 865 dealing with the current status of health care delivery systems and the impact of changes in this area on pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 885. Human Resource Management in Institutional Pharmacy Practice. 3 Hours.
A course dealing with recruitment, training, motivation, monitoring of performance, and disciplining of personnel. Seminars, case studies, and role playing are used to apply the information to specific human resource management situations in institutional pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 889. Research in Pharmacy Practice. 1-6 Hours.
Original investigation in the area of pharmacy practice. Prerequisite: Consent of instructor. RSH.

Master of Science in Pharmacy Practice

Pharmacy Practice Graduate Program

The Department of Pharmacy practice furthers the mission of the School of Pharmacy by striving for excellence in teaching, research, scholarly activity, service, and patient care.

The faculty provide professional educational opportunities for undergraduate, graduate, and postgraduate students and practitioners to enable them to practice pharmaceutical care, adapt to changing professional roles, use new technologies, assume leadership roles in a dynamic health-care environment, and contribute new knowledge to the profession.

Graduate Admission

In addition to meeting the general requirements for admission to graduate programs, applicants are considered for admission if they are graduates of a school of pharmacy accredited by the Accreditation Council for Pharmaceutical Education (ACPE) (https://www.acpe-accredit.org/) and are eligible for licensure as registered pharmacists by the Kansas State Board of Pharmacy (http://pharmacy.ks.gov/). A Bachelor of Science degree or a Doctor of Pharmacy (Pharm.D.) degree with a major in pharmacy is required.

Submit your graduate application online (http://www.graduate.ku.edu/). Send transcripts of all completed college and university course work and all other requested application materials to the department:

The University of Kansas
Department of Pharmacy Practice
2010 Becker Drive, Room 2001
Lawrence, KS 66047

M.S. Degree Requirements

A minimum of 30 credit hours, with a majority of hours in pharmacy, is required for the degree. These courses may be selected from related fields after approval by the department. Examples are health-system pharmacy, clinical pharmacy, nuclear pharmacy, computer science, business administration, health policy and management, and related fields. An approved project, representing 6 to 9 credit hours of original research, is required. It may be in pharmaceutical sciences, clinical pharmacy, pharmacy practice, pharmacotherapy, or health-system pharmacy.

An accredited PGY1/PGY2 residency in Health-Systems Pharmacy Administration in an approved hospital is required of each student. Requirements for the residency program include eligibility for licensure as a pharmacist in Kansas. The student must complete the residency concurrently with the academic portion of the program. Upon satisfactory completion of the residency, the student receives a certificate of residency from the cooperating hospital. The length of the program is 2 years. For students who have previously completed a residency accredited by the American Society of Health-System Pharmacists (http://www.ashp.org/), this part of the program may be waived on approval of the department.
Social Welfare

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor ([http://www.advising.ku.edu/](http://www.advising.ku.edu/)) for details). Other years’ catalogs (p. 39).»

Bachelor of Social Work (p. 2512)
Master of Social Work (p. 2516)
Doctor of Philosophy in Social Work (p. 2520)

The School of Social Welfare

The University of Kansas School of Social Welfare offers the only comprehensive program in social work in Kansas: the professional degrees of

- Doctor of Philosophy in Social Work (p. 2520),
- Master of Social Work (p. 2516), and
- Bachelor of Social Work (p. 2512).

KU’s School of Social Welfare is an excellent place to pursue your interests in professional social work education. It is the oldest school of social welfare in the state and the only one to offer degree preparation from undergraduate through doctoral degrees in social work.

Social work education began at KU in 1937. The Master of Social Work program, established in Lawrence and at the KU Medical Center in Kansas City in 1946, has been continuously accredited since 1948. The Bachelor of Social Work degree has been awarded since 1971. In 1974, the B.S.W. program became one of the first in the nation to receive accredited status. The Council on Social Work Education ([http://www.cswe.org/](http://www.cswe.org/)), the accrediting body for social work education, most recently reaccredited the B.S.W. and M.S.W. programs in 2010. The doctoral program admitted its first students in 1981.

KU’s Master of Social Work program consistently ranks among the top U.S. national public universities, according to U.S. News & World Report’s “America’s Best Graduate Schools”. The School of Social Welfare is recognized internationally as an innovator in social work theory development and in research that makes positive contributions to our communities.

The school is housed on KU’s Lawrence campus in Twente Hall, named for nationally renowned social work educator Esther Twente, who chaired the social work department from 1946 to 1957. The school offers the M.S.W. program in Lawrence, at the KU Edwards Campus in Overland Park, a suburb of Kansas City, and in western Kansas in collaboration with Fort Hays State University and Garden City Community College. The B.S.W. program is offered in Lawrence and at the KU Edwards campus.

Mission and Themes

Mission

The University of Kansas School of Social Welfare, rooted in the Strengths Perspective, aims to transform lives and social contexts and promote social, economic, and environmental justice in Kansas, the nation and the world. We do so by educating students to practice with integrity and competence; advancing the science and knowledge base of social work through scholarship and research; and participating in community-engaged service.

Guiding Principles and Themes

The work of the KU School of Social Welfare is guided and driven by a set of principles and values that inform our teaching, research endeavors, and service to community at various levels. These include:

- Relationship Building: We engage in relationship building that fosters creativity, collaboration, and mutual learning. Relationship building is essential across practice, scholarship, education and service. We take a strengths approach as we serve our local, state, national, and global communities.
- Diversity, Equity and Inclusion: We embrace the inherent worth of all people. By taking the position of cultural humility and applying the lens of intersectionality, we seek to develop and promote modes of anti-oppressive social work and dismantle structures of exclusion.
- Practice with Integrity: We demonstrate our integrity and trustworthiness as scholars, educators, practitioners, and community members by promoting social work values, ethical practice, and the process of critical reflection.
- Multisystem Competency: We recognize that social, economic, and environmental injustices are the root causes of inequalities and multiple strategies are necessary to address these. Our work integrates micro/macro social work and builds collaboration across systems and disciplines to create multi-level change.
- Critical Perspective: We engage in deliberate and continuing examination of social conditions and solutions. We use critical inquiry to analyze and challenge existing structures and systems in order to advance the field and promote social, economic, and environmental justice.
- Empirically Informed Social Work: We rigorously advance empirical research that impacts the social work knowledge base. By translating and applying evidence, we continually transform practice and policy across multiple systems.

The Programs

At the University of Kansas, students have the opportunity to prepare for professional careers in social work at the bachelor’s, master’s, and doctoral levels. The curriculum brings students from the introductory level through advanced study in clinical social work practice or social work macro practice. Under the umbrella of a practice orientation, the programs are structured to support the guiding principles and themes of the School.

Classroom work is one component of professional preparation; field placements comprise the other. Placements in social service agencies offer students the opportunity to apply skills learned in the classroom. B.S.W. and M.S.W. students spend time in practicum settings throughout the region. Our students provide more than 250,000 hours of service to underserved populations through practicum experiences.

The goal of the doctoral program in social welfare is to prepare students to become leaders nationally and internationally in advancing social work practice and policy through research, teaching, and scholarship. Our students graduate from the program with the critical knowledge and skills they need to become innovative stewards of the discipline who generate and disseminate knowledge as researcher, scholars, and educators.
Learn more about the School of Social Welfare programs (http://socwel.ku.edu/degrees/).

**Student Profile**

The School of Social Welfare currently has more than 500 students, approximately 150 in the B.S.W. program, 350 in the master’s program, and 30 in the Ph.D. program. More than 350 students are enrolled in field practicum settings that reflect the range of practice of professional social work. Many students enter social work as a second career after an extended period away from school.

**Student Handbook**

During orientation, students who are admitted to degree-seeking status are directed to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/), which contains full descriptions of policies and other details.

**The Profession**

The mission of the social work profession is rooted in a set of core values. These core values, embraced by social workers throughout the profession’s history, are the foundation of social work’s unique purpose and perspective:

- Service
- Social justice
- Dignity and worth of the person
- Importance of human relationships
- Integrity
- Competence

**NASW Code of Ethics**

As a guide to professional conduct, the Code of Ethics of the National Association of Social Workers (http://www.socialworkers.org/) represents the fundamental values of the profession. The National Association of Social Workers is the largest organization of professional social workers in the world, with a membership of 130,000.

View the entire Code of Ethics (https://www.socialworkers.org/About/Ethics/Code-of-Ethics/) or request a copy.

**Resources**

**Research Office**

The School supports research and scholarship designed to impact social service delivery and policy at the local, national and international levels. Based on the Strengths Perspective and with strong ties to the Grand Challenges for Social Work, we have designed Research Clusters to work towards advancing the science and knowledge base of social work through collaboration, curriculum, scholarship and research. Learn more at https://socwel.ku.edu/research-home (https://socwel.ku.edu/research-home/).

**Faculty**

The faculty’s scholarly interests, as reflected in teaching, research, and publications, span a wide range, including health, mental health, child welfare, adult and juvenile justice, gerontology, multiculturalism, women’s issues, history of social work, public policy analysis, homelessness, gender equity, poverty reduction and asset building, and macro social work including community practice and social work administration.

School of Social Welfare faculty members hold doctoral degrees in social work, social welfare, and other fields. In addition, outstanding social work practitioners serve as part-time classroom instructors, and 280 social work practitioners serve as practicum instructors.

Faculty members serve the public interest and the profession of social work as consultants and board members in professional and citizens’ organizations.

**Undergraduate Programs**

The undergraduate program (http://socwel.ku.edu/academics/degrees/bsw/bsw/overview/) prepares graduates for generalist social work practice. The program defines generalist practice as maintaining focus on the interface between systems — individuals, families, groups, organizations, and communities. The program is offered on both the Lawrence and Edwards campus.

**University Honors Program**

The school encourages qualified undergraduates to participate in the University Honors Program (https://honors.ku.edu/).

**Graduate Programs**

The Master of Social Work program (http://socwel.ku.edu/academics/degrees/msw/reg/us/regular/overview/), established in Lawrence and at the KU Medical Center in Kansas City in 1946, has been continuously accredited since 1948. KU’s M.S.W. program ranked 21st among U.S. national public universities, according to U.S. News & World Report’s “America’s Best Graduate Schools” rankings for 2018.

The doctoral program (http://socwel.ku.edu/academics/degrees/phd/overview/) admitted its first students in 1981. It prepares students to be leaders of the profession through advanced research, scholarship, and teaching.

**Financial Aid**

To be eligible for financial aid, applicants should complete the Free Application for Federal Student Aid (FAFSA) by February 15, even before receiving information about acceptance. FAFSA materials can be obtained from all college or university financial aid offices or submitted online (http://www.fafsa.ed.gov/). The School of Social Welfare uses the FAFSA need determination level in making awards. For more information regarding financial aid visit the KU Office of Financial Aid & Scholarship (http://affordability.ku.edu/). (http://affordability.ku.edu/)

For Ph.D. students (http://socwel.ku.edu/academics/degrees/phd/financialsupport/), financial assistance, including tuition and significant salary, is available from the school through teaching and research assistantships in research and training areas such as adult and children’s mental health, aging, child welfare, corrections, social policy, spiritual diversity, or other areas of faculty grants and interests.

**Scholarships and Awards**

The School of Social Welfare has several sources of financial assistance available to students who meet the various criteria. Awards are made on an annual basis and are applied directly towards tuition and fees in most instances. All students interested in applying are required to submit a Free Application for Federal Student Aid by March 1. All recipients are
expected to maintain a minimum grade point average of 3.0. Students must renew their applications each year they wish to be considered.

**Undergraduate University Regulations**

For information about university regulations, see Regulations (p. 14) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

For information about school regulations refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/).

**Graduation with Distinction**

The top 10 percent of the graduates of the B.S.W. program each year receive degrees with distinction.

**Honor Roll (Dean’s List)**

Students who have been accepted into the B.S.W. program, enrolled in a minimum of 9 credit hours during the semester, and earned a semester grade-point average in the top 20 percent of their class qualify for the KU School of Social Welfare B.S.W. Dean’s List.

**Guidelines for Conduct**

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/) for specific information.

**Required Work in Residence**

No baccalaureate degree is granted to an undergraduate who has not completed at least 30 semester credit hours of residence courses at KU. No exceptions are granted.

To earn a bachelor's degree from KU, you must complete the last 30 hours of credit for the degree by resident study. You may petition the B.S.W. program director for a waiver. Up to 6 hours of work taken at another institution may be accepted as part of the last 30 hours, if the hours are not in required social work courses.

**Student Advancement Policy**

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/) for specific information.

**Advising**

Once a student is admitted to the School of Social Welfare, an academic adviser will be assigned to assist students in the enrollment process and with other academic program requirements. Students consult with their academic adviser before enrollment each semester and have their advising hold removed by the B.S.W. program office. In addition, a member of the School’s faculty is assigned as a professional/career adviser. Current students can view their advisers on the Kyov portal (https://my.ku.edu/uPortal/f/u5621011s4/normal/render.uP). (https://my.ku.edu/uPortal/f/u5621011s4/normal/render.uP)

**Transfer of Credit**

CredTran is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Transfer of credit allows specific course work from other accredited colleges or universities to count toward the B.S.W. degree. Decisions to accept prior credits are made by KU’s transcript evaluator during the admission process. Exceptions must be petitioned through the B.S.W. Director. Petitions must be accompanied by a catalog description and a syllabus of the course and submitted at the time of application. Community college equivalents to KU courses are available from the school or through community college counselors. A maximum of 64 credit hours from a community college may be transferred toward the B.S.W. degree.

**Prior Work Experience**

In accordance with national curriculum policy, prior employment and life experience may not be credited toward classroom course work or practicum requirements.

**Leave of Absence and Withdrawal**

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/) for specific information.

**Graduate University Regulations**

For information about university regulations, see Regulations (p. 14) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

For information about school regulations refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/).

**Guidelines for Conduct**

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/) for specific information.

**Student Advancement Policy**

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/) for specific information.

**Leave of Absence and Withdrawal**

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/) for specific information.

**Employment Opportunities**

Some employment opportunities (http://socwel.ku.edu/academics/degrees/bsw/bsw/careerspotlight/) for social workers include:

- Practice in health care systems and settings.
- Child protection, foster care, and adoption services.
- Service in community centers, juvenile courts, and residential treatment centers.
- Women’s counseling and shelter facilities.
- Family services, substance abuse, illness, and unemployment services.
- Community services for people with mental illness.
• Services for the elderly in home care, nursing homes, and senior centers.
• Community practice and social change.
• Services for offenders and their families in community corrections programs.
• Leadership in human service organizations and policy settings.

Courses

SW 177. First Year Seminar: __. 3 Hours GE11.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in social work. Course is designed to meet the critical thinking learning outcome of the KU Core. Prerequisite: First-time freshman status. LEC.

SW 210. Contemporary Social Topics: __. 1-3 Hours.
This course provides the opportunity for experimentation with innovative course content and unique learning strategies in accordance with guidelines established by faculty. Subjects offered as topics include Training for Diversity, Organizing in Underserved Communities, etc. LEC.

SW 220. Social Work, Social Welfare and U.S. Society. 3 Hours SF GE3S / S.
An introduction to the field of social welfare and its relationship to the social work profession, charged with carrying out its primary missions. Specific social welfare policies will be analyzed, particularly as those policies affect individuals and families in need. LEC.

SW 303. Human Sexuality in Everyday Life. 3 Hours GE3S.
An introductory course which focuses on assisting students to understand their own and others' sexual development and expression, as found in attitudes, beliefs, and behaviors. Physiological, psychological, and social/cultural aspects of human sexuality will be reviewed. The format of the course will include: lectures, discussion, value clarification exercises, and the use of explicit audio-visual materials. LEC.

SW 310. Managing Stress: Principles and Techniques for Coping, Prevention, and Wellness. 3 Hours.
Covers major stress-management techniques, helping others cope with stress, and promoting wellness. Concepts, theories, and models of stress, psychological basis for stress, relationship between personality and stress, family and social stress, job stress, dissatisfaction, and burnout are discussed. LEC.

SW 410. Professional Writing Skills in Social Work. 3 Hours.
Students learn the principles of organizing, developing, writing and revising documentation for different professional social work settings. Students will master basic writing skills and become proficient in several types of social work writing styles. LEC.

SW 420. Social Work in Urban Settings. 3 Hours.
Students gain knowledge about the historical and current relationships between the definition of social problems, the development of social welfare policies, and the delivery of social services in urban settings. Students will learn to access current policies and practices as they impact local communities in the Kansas City area. LEC.

SW 455. Topics in Social Welfare: __. 1-3 Hours.
This course covers a variety of topics on a rotating basis and provides the opportunity for experimentation with innovated course content in accordance with guidelines established by faculty. These topics may include, but are not limited to, globalization and poverty, special topics in child welfare, mental health, juvenile justice, etc. LEC.

SW 490. Directed Readings. 1-3 Hours.
Individual and supervised readings in selected areas of social welfare. Prerequisite: Consent of instructor and approval by dean's office. IND.

SW 510. Fundamentals of Social Work Practice. 3 Hours.
Introduces the basic concepts of social work practice including the focus and context of practice, the nature of a social work relationship; basic skills and techniques common to practice such as interviewing, engagement, information gathering, etc. Introduction to problem solving and social work roles. Prerequisite: MATH 101, Grade of B or better in SW 220, SW 530, SW 540, and SW 555. LEC.

SW 530. Human Behavior in the Social Environment. 3 Hours AE61.
A study of theoretical frameworks for understanding human behavior. The theories include the developmental stages across the life cycle, abnormal behavior compared to normal, analysis of family and societal processes and their effects on the individual, and individual behavior in relation to social class, ethnicity, and cultural background. Junior social work classification required. Prerequisite: MATH 101, Grade of B or better in SW 220. LEC.

SW 532. Community and Organizational Dynamics and Human Behavior. 3 Hours AE61.
An analysis of community and organizational life with emphasis on human behavior dynamics. Systems operation and change are considered and related to social functioning, especially as it impinges on social welfare objectives. Junior social work classification required. Prerequisite: MATH 101, Grade of B or better in SW 220, SW 530, SW 540, SW 555. LEC.

SW 540. Fundamentals of Social Work Research. 3 Hours AE61.
An examination of the basic concepts and principles of scientific inquiry as applied to the social work profession's quest for and utilization of knowledge. Positivistic and naturalistic methods of inquiry are covered. Other content includes conceptualization, operationalization, sample design, ethics, and culturally sensitive research practice. Junior social work classification required. Prerequisite: MATH 101, Grade of B or better in SW 220. LEC.

SW 541. Social Work Research Seminar. 3 Hours AE61.
Focus is on applying material learned in SW 540 to the critique of empirical work in the social work arena and to the development of a proposal for a practice-based research project. Emphasis on assessing relevance of research to special populations. Content on the interpretation of graphs, tables, and statistical measures provided. Prerequisite: MATH 101, Grade of B or better in SW 220, SW 540, SW 530, SW 555. LEC.

This course will provide the conceptual, theoretical and empirical knowledge base related to difference, oppression, social justice and empowerment. This knowledge is necessary for culturally competent social work practice in a multicultural society. Junior social work classification required. Prerequisite: MATH 101, Grade of B or better in SW 220. LEC.

SW 556. Diversity, Oppression and Social Justice. 3 Hours AE41.
This course offers non-social work majors the opportunity to explore conceptual, theoretical, and empirical knowledge related to differences based upon race, class, gender, and sexual orientation. The course explores the interplay of social and cultural identities, societal power relations, and other societal forces as they impact human functioning. Assignments and lectures in this course are geared toward helping students develop an informed world view of human diversity and its impact on our own lives and the lives of others. LEC.

SW 560. Study Abroad Topics: __. 3 Hours.
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, Ireland, Italy, and South Korea. Junior Social Work classification required. LEC.
SW 601. Field Practicum. 6 Hours AE61.
Students are assigned to social service agencies that provide generalist practice opportunities under the supervision of a qualified field instructor. This provides students with the opportunity to apply and test social work knowledge, values, and skills within an approved practice setting in order to gain competency as beginning social workers. This course is taken for two semesters (fall-spring), with credit being given only after completion of the second semester. Enrollment in this course must be concurrent with enrollment in SW 610 and SW 612. FLD.

SW 610. Social Work Practice Seminar I. 3 Hours.
Focuses on learning and implementing the problem-solving and interaction models of practice to be applied to individuals, families, and small groups. Concurrent with SW 601, practicum; students bring issues with clients to class for discussion. Open only to BSW seniors. Prerequisite: SW 510. LEC.

SW 612. Social Work Practice Seminar II. 3 Hours.
Second of two-course sequence extends the work begun in SW 610. Examines interventive strategies applicable to practice with larger systems. Models of community organization and community development are presented. Concurrent with SW 601, practicum; students work on individualized, agency-related projects. Prerequisite: SW 610. LEC.

SW 620. Social Policies and Program Analysis. 3 Hours.
Conceptual models for the analysis of social welfare problems and policies are developed. The frameworks are applied to the problem of poverty and major policies and programs developed to cope with that problem. In addition the model is used to examine social welfare problems/needs being addressed in the students' practicum agencies. The focus throughout is on the understanding and application of analytic framework. Open only to BSW seniors. LEC.

SW 621. Social Policy Analysis and Advocacy. 3 Hours.
The course builds on SW 620 using the conceptual models to examine a range of social welfare problems/needs, policies and programs. Emphasis is on advancing student's understanding and skills for using the analytic framework and building policy advocacy skills. Attention given to the role of social workers in the legislative process for shaping social welfare policies. Prerequisite: SW 620. LEC.

SW 623. Seminar in Professional Issues. 3 Hours AE51.
Seminar in the philosophy, values, and issues in contemporary social work and social welfare. Seminar will address areas such as conception of professional and professionalism, ethics and values, standards, licensing, and professional regulation, accountability and professional responsibility. Senior social work classification is required. LEC.

SW 630. Topics in Social Work Practice: Antisocial, Aggressive Behavior in Childhood and Early Adolescence. 1.5 Hour.
This course explores the theories and methods related to practice with children whose behavior is disruptive, oppositional, aggressive, or otherwise antisocial. Emphasis is placed on using protective and risk factors to design appropriate interventions. Open only to BSW seniors. LEC.

SW 631. Topics in Social Work Practice: Intimate Partner Violence. 1.5 Hour.
This course provides students with a beginning understanding of intimate partner violence including definitions, prevalence, theoretical frameworks, dynamics, and consequences for the individual, the family, the community and society. Students will develop skills required to assess, intervene, and prevent domestic violence cases. Open only to BSW seniors. LEC.

SW 632. Topics in Social Work Practice: Substance Abuse and Social Work Practice. 1.5 Hour.
This course will offer BSW students a very basic understanding of concepts associated with social work practice with people who confront challenges with alcohol and other drugs. Students will learn about substance abuse problems currently prevalent, recognize behavior related to substance abuse disorders and applicability of generalist social work practice models in developing interventions. Open only to BSW seniors LEC.

SW 633. Topics in Social Work Practice: Crisis Intervention. 1.5 Hour.
This course will provide undergraduate social work students with a basic introduction to crisis intervention, including theoretical models, the evolution and use of crisis theory and the design of interventions across a broad range of crisis situations. Open only to BSW seniors. LEC.

SW 634. Topics in Social Work Practice: Child Welfare - Protecting Children, Strengthening Families. 1.5 Hour.
This course will introduce undergraduate students to child welfare covering services to support the safety, permanency and well-being of children and their families. Students will learn about prevention, therapeutic intervention, family support and preservation, foster care, independent living, adoption, and post-adoption. LEC.

SW 690. Professional Education Topics in Social Welfare: ______. 0.5-3 Hours.
Current topics supplementing general social work knowledge of professionals in the field. Subjects offered as topics include: Addictions and Professional Enabling, Dynamics of Change, Computer Skills for Social Services Budgeting, Short Term Social Work Interaction. LEC.

SW 701. Basic Field Practicum. 4 Hours.
Students are assigned to social service agencies that provide generalist practice opportunities that prepare students for entry into the advanced level of either clinical social work practice or macro practice. All students work under the supervision of a qualified field instructor where they have the opportunity to apply and test social work knowledge, values, and skills. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to first-level M.S.W. students. Enrollment must be concurrent with enrollment in SW 702 and SW 710 or SW 711. FLD.

SW 702. Basic Field Practicum. 3 Hours.
Students are assigned to social service agencies that provide generalist practice opportunities that prepare students for entry into the advanced level of either clinical social work practice or macro practice. All students work under the supervision of a qualified field instructor where they have the opportunity to apply and test social work knowledge, values, and skills. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to first-level M.S.W. students. Enrollment must be concurrent with enrollment in SW 701 and SW 710 or SW 711. FLD.

SW 710. Social Work Practice I. 3 Hours.
The first of two-course sequence prepares students to begin to translate theory into strategies of intervention that cut across social work practice with systems of all sizes. Presents an integrating framework of generalist social work based on a strengths perspective and a person-in-environment frame of reference. Course taken concurrently with SW 701 and SW 702 which provides students an opportunity to integrate theory and practice in work with clients. LEC.

SW 711. Social Work Practice II. 3 Hours.
Second of two-course sequence and extends the work begun in SW 710. Focus in the second course is on mastery of the basics of helping
relationships and the development of intervention skills for the middle and ending phases of intervention. Content is structured to prepare students to enter the advanced level of the M.S.W. program. Course taken concurrent with SW 701 and SW 702. Prerequisite: SW 710. LEC.

SW 712. Social Work Practice Seminar. 3 Hours. Introduces advanced standing students to the themes of the school. Special emphasis is given to the Strengths Perspective, a multicultural approach to practice, and developing the skills to critically and reflectively think about one's own practice. Advanced standing status required. LEC.

SW 713. Community and Organizational Practice. 3 Hours. Social workers provide the leadership necessary to facilitate and coordinate community improvement and organizational effectiveness. This course introduces students to community and organizational knowledge and skills for social work practice. An advocacy perspective will act as the course's unifying theme with client and community well-being acting as the driving force behind social work practice in community and organizational settings. LEC.

SW 720. Social Policy and Program Analysis. 3 Hours. Social welfare policy provides the foundation for social work practice, so it is critical for social workers to know how to analyze policies and programs. Students learn policy analysis knowledge and skills, with an emphasis on understanding public and private funding sources for social work services that support basic human needs. Policies designed to reduce poverty and increase social justice serve as exemplars for developing conceptual abilities in this course. LEC.

SW 730. Human Behavior in the Social Environment. 3 Hours. Course provides foundation knowledge about bio-psycho-social aspects of individual and family behavior. Theoretical perspectives on well being dysfunction, and developmental processes are critically analyzed, especially concerning applicability to social work practice that supports client strengths, diversity, and social justice. A holistic conceptual framework is used to integrate these micro-system perspectives with larger environmental socio-political concerns. LEC.

SW 740. Social Work Research. 3 Hours. Social work practice is guided by research. Developing best practices for helping clients and communities depends on studies designed to build a deep and nuanced understanding and/or test cause and effect relationships. This course covers the nature of science, scientific inquiry, theories for research, research methods and designs. Students learn to analyze the rigor of both qualitative and quantitative studies, and are introduced to quantitative and qualitative data analysis. LEC.

SW 755. Studies: ______. 1-3 Hours. This course provides the opportunity for experimentation with innovative course content in accordance with guidelines established by faculty. LEC.

SW 801. Advanced Field Practicum-Clinical Practice. 4 Hours. Students are assigned to social service agencies that provide opportunities for advanced level clinical social work practice. All students work under the supervision of a qualified field instructor where they have the opportunity to integrate theory and practice and develop beginning competence in clinical social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Enrollment must be concurrent with enrollment in SW 801 and SW 810 or SW 811. Prerequisite: Completion of all foundation requirements. LFD.

SW 802. Advanced Field Practicum-Clinical Practice. 3 Hours. Students are assigned to social service agencies that provide opportunities for advanced level clinical social work practice. All students work under the supervision of a qualified field instructor where they have the opportunity to integrate theory and practice and develop beginning competence in clinical social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Enrollment must be concurrent with SW 801 and SW 810 or SW 811. Prerequisite: Completion of all foundation requirements. LFD.

SW 803. Advanced Field Practicum-Clinical Practice. 2-6 Hours. Students are assigned to social service agencies that provide opportunities for advanced level clinical social work practice. All students work under the supervision of a qualified field instructor where they have the opportunity to integrate theory and practice and develop beginning competence in clinical social work practice. This course is generally taken for three semesters, with credit being given only after completion of the third semester. Open only to Advanced-level M.S.W. students with an approved modified practicum plan. Enrollment must be concurrent with SW 810 or SW 811. Prerequisite: Completion of all foundation requirements. LFD.

SW 804. Advanced Field Practicum-Macro Practice. 4 Hours. Students are assigned to social service agencies that provide practice opportunities in community practice, advocacy and/or social work administration. All students work under the supervision of a qualified field instructor where they have the opportunity to develop beginning competence in macro social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Prerequisite: Completion of all foundation requirements. LFD.

SW 805. Advanced Field Practicum-Macro Practice. 3 Hours. Students are assigned to social service agencies that provide practice opportunities in community practice, advocacy and/or social work administration. All students work under the supervision of a qualified field instructor where they have the opportunity to develop beginning competence in macro social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Prerequisite: Completion of all foundation requirements. LFD.

SW 806. Advanced Field Practicum-Macro Practice. 2-6 Hours. Students are assigned to social service agencies that provide practice opportunities in community practice, advocacy and/or social work administration. All students work under the supervision of a qualified field instructor where they have the opportunity to develop beginning competence in macro social work practice. This course is generally taken for three semesters, with credit being given only after completion of the third semester. Open only to Advanced-level M.S.W. students with an approved modified practicum plan. Prerequisite: Completion of all foundation requirements. LFD.

SW 810. Clinical Social Work Practice. 3 Hours. Clinical social work practice occurs in a variety of settings, from large public and private agencies and institutions through many types of individual and group private practice situations. This course is designed to teach advanced knowledge and skills that transcend contextual factors in order to produce a variety of positive client outcomes in a range of practice situations. In addition, this course focuses on the commitment of social work practitioners to provide services to those groups who, by reason of class, race, sex, or other characteristics, are not ordinarily well served by the many institutions in this society. Course taken concurrently with SW 801 and SW 802 or SW 803 which provides an opportunity to integrate theory and practice in work with clients. Prerequisite: Completion of all foundation requirements. LEC.

SW 811. Topics in Advanced Clinical Social Work: ______. 3 Hours. The organizing theme of the advanced clinical elective emphasizes application of advanced theoretical and practice principles to client
systems. This advanced selective provides students with the opportunity to critically consider the themes of the school as they relate to the need for assessment, diagnostic, and process evaluations with a variety of client systems. Every student will engage in activities designed to solidify their professional identity as clinical practitioners as they enter the workforce. Topics offered may include solution-focused brief therapy; family therapy, and cognitive behavioral therapy. Course is taken concurrently with SW 801 and SW 802 or SW 803. Prerequisite: Completion of SW 810. LEC.

SW 830. Social Work in Child and Family Settings. 3 Hours.
An in-depth examination of social work in child and family settings. Students demonstrate the capacity to integrate research, policy, direct practice, and human behavior in considering the issues central to this area of practice. Students will also be able to explain how diversity issues manifest themselves at both the policy and direct practice levels. Prerequisite: Completion of all foundation requirements. LEC.

SW 832. Social Work in Health Care and Mental Health Settings. 3 Hours.
Content as in SW 830 focused on health care and mental health. LEC.

SW 833. Social Work and Aging. 3 Hours.
Content as in SW 830 focused on aging. LEC.

SW 834. Social Work in Schools. 3 Hours.
Content as in SW 830 focused on schools. LEC.

SW 840. Program Design and Grant Writing. 3 Hours.
In this course, advanced social work students learn to design social service and community development programs and write grant proposals to fund those programs. Topics include program design, grant writing, fundraising, and public/private sector resource development for programs to meet basic human needs and enhance social well-being. Prerequisite: Completion of social welfare foundation level requirements. LEC.

SW 841. Advanced Policy and Programs. 3 Hours.
The focus is on the development of skills to stay abreast of and knowledgeable about critical federal and state policies, regulations, and funding structures and streams in students' chosen field of practice. Students will also learn how to research the literature on best practice and effective programs. All of these skills and consequential knowledge will be used to inform program design, resource acquisition, financial management, personnel management, outcome management, and other administrative functions. Prerequisite: Completion of all foundation requirements. LEC.

SW 842. Assessing and Managing Outcomes. 3 Hours.
How do social work administrators know if their agencies and programs are making a positive difference in the lives of clients and communities? This course focuses student learning on how to gather and use information to improve human service program performance, and client and community outcomes by extension. Prerequisite: Completion of all foundation requirements. LEC.

SW 843. Program Management and Supervision. 3 Hours.
Social workers who help direct human service and community practice settings must be able to stay abreast of new knowledge and build new skills in managing programs and supervising people. This course focuses on the tasks, roles, and functions of managers including effective employee supervision and human resource management as well as the development of a diverse workforce. Prerequisite: Completion of all foundation requirements. LEC.

SW 846. Advanced Community and Advocacy Practice. 3 Hours.
This course is designed to build on the content of the foundation course on community and organizational practice by further developing the theories, methods, and skills of community and advocacy practice. The course will help students build advanced analytical and empirical skills needed to effectively manage and advocate with and on behalf of different human service communities. Prerequisite: Completion of all foundation requirements. LEC.

SW 849. Managing Financial Resources. 3 Hours.
Budgeting and financial management are critical to social workers who lead social service organizations. Focus is on budgeting techniques and their application; use of budgets for decision making, allocation and reallocation of resources to best meet client and community needs. Prerequisite: Completion of all foundation requirements. LEC.

SW 852. Social Work with Groups. 3 Hours.
Theory and practice of social work in the wide range of groups in which social workers participate as workers and co-workers. Focus on the social worker’s tasks and behaviors in establishing group services and in facilitating work in the group from the time of its formation to its termination as a service entity. Prerequisite: Completion of foundation requirements. LEC.

SW 855. Study Abroad Topics: _____. 3 Hours.
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, Ireland, Italy and South Korea. LEC.

SW 860. Loss and Grief. 3 Hours.
Examines the multiple faces of loss and grief throughout the human life cycle. Examines personal and societal attitudes toward death and dying and the processes of dying and grieving. Course includes exploration of assessment and interventions that enable individuals and their families to cope with loss. Prerequisite: Completion of all foundation requirements. LEC.

SW 861. Intimate Partner Violence. 1.5 Hour.
This advanced practice course addresses the seriousness and extent of the problem, contributing factors, consequences for the individual, the family, the community, and society. Prevention and intervention practice models will be discussed within a clinical and strengths framework with a focus on developing skills for assessment, intervention, and prevention of violence with individuals and families. Concurrent enrollment in SW 862. LEC.

SW 862. Intrafamilial Sexual Abuse. 1.5 Hour.
This course will focus on sexual misuse that occurs within the family system. Students will obtain a comprehensive understanding of sexual misuse that occurs within the family system and develop assessment and helping skills needed when working with abusive families. Theoretical, assessment, and helping aspects of intrafamilial sexual abuse will be examined. Concurrent enrollment in SW 861. Prerequisite: Completion of all foundation requirements. LEC.

SW 863. Mental Health and Psychopathology. 3 Hours.
Theories of mental health and psychopathology are compared concerning etiology, classification, assessment, and treatment of distress and mental disorders. Theories and practices are evaluated critically for their usefulness in a strengths approach to social work in mental health settings. Prerequisite: Completion of all foundation requirements. LEC.

SW 866. Social Work Practice with Children and Adolescents. 3 Hours.
Developmental norms and processes in childhood and adolescence and related implications for assessment and intervention methods in work with children and adolescents. Topics include countertransference issues in work with children, working with parents and children, intervention tools, stress in childhood, special issues, and concerns in adolescence, sexual
abuse of children. Prerequisite: Completion of all foundation requirements. LEC.

**SW 868. Crisis Intervention and Suicide Risk Reduction. 3 Hours.**
Principles of planned short term intervention generally and of crisis intervention specifically are addressed. The use of and application of crisis theory, crisis intervention, and suicide risk reduction are examined. Evidence based practices regarding the effects of crises including disasters on individual, family, and community well-being are considered. Prerequisite: Completion of all foundation requirements. LEC.

**SW 869. Social Work with Clients with Alcohol and Drug-Related Problems. 3 Hours.**
Focus is on developing value consciousness and multidimensional understandings in relation to drug use and abuse. Patterns of drug use, sociocultural attitudes toward drug use and definitional issues in the drug field will be examined. Explanatory theories and contemporary interventions, including the applicability of generalist social work practice models are presented and critically assessed. Prerequisite: Completion of all foundation requirements. LEC.

**SW 870. Spiritual Diversity in Social Work Practice. 3 Hours.**
This course provides a framework of knowledge, values, and skills for spiritually-sensitive social work practice. In order to prepare students to respond competently and ethically to diverse spiritual perspectives, a comparative, critically reflective approach to content is employed. The role of religion and spirituality in supporting or impeding individual strengths and social justice is considered. Prerequisite: Completion of all foundation requirements. LEC.

**SW 872. Cultural Diversity in Social Work Practice. 3 Hours.**
Provides students with a framework of knowledge, values, and practice methodology for culturally competent social work practice. Emphasizes themes of oppression and empowerment, culture-specific strengths and resources, and multicultural/transcultural perspectives. Prerequisite: Completion of all foundation requirements. LEC.

**SW 873. Social Work with Gay, Lesbian, Transgender and Bisexual Clients. 3 Hours.**
The purpose of this course is to introduce students to the basic knowledge, values, and skills needed to work effectively with people who are gay, lesbian, and bisexual. The course will reflect a person-environment perspective, focusing on strategies that empower lesbians, gay men, and bisexuals to develop personal and environmental resources from a strengths perspective. Throughout the course, attention will be given to issues of diversity within the lesbian and gay population. Prerequisite: Completion of all foundation requirements. LEC.

**SW 874. Social Work Practice with Women. 3 Hours.**
Expands knowledge and practice skills in working with women in diverse social work practice settings. Critical examination of traditional and feminist practice approaches to problems that frequently confront women. Prerequisite: Completion of foundation requirements. LEC.

**SW 875. Readings and Investigations: _____ 1-3 Hours.**
Opportunity for scholarly investigation in an area of special interest. Students pursue independent study in an area of social work practice through the guidance of a selected faculty member. RSH.

**SW 876. Social Work with African American Families. 3 Hours.**
The purpose of this course is to introduce students to the basic knowledge, values, and skills needed to work effectively with African American clients and their families. Critical examination of issues such as racism, oppression, and the historical context and their impact on African American families. Prerequisite: Completion of all foundation requirements. LEC.

**SW 890. Current Issues in Professional Social Work Education: _____ 0.5-3 Hours.**
Course provides opportunity for innovative course content designed for the social work professional. Subjects offered include: Psychopathology: A Biopsychosocial Approach, Ethics and the Social Worker, Mediation, Solution Focused Practice, Strengths-based Management, Outcome-based Measurement of Practice. LEC.

**SW 911. PhD Seminar I. 1 Hour.**
Students will discuss critical issues related to both substantive and professional issues related to doctoral education, the education of social workers, research and methodological procedures and practices, transitioning from student to academic scholar, and social work ethics in all realms of scholarship. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Student must be admitted to the School of Social Welfare PhD program. LEC.

**SW 912. PhD Seminar II. 1 Hour.**
Building on the first year of the doctoral program and SW 911 - PhD Seminar I, students will continue to discuss critical issues related to both substantive and professional issues related to doctoral education, the education of social workers, research and methodological procedures and practices, transitioning from student to academic scholar, and social work ethics in all realms of scholarship. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Student must be admitted to the School of Social Welfare PhD program. Successful completion of SW 911. LEC.

**SW 955. Study Abroad Topics: _____ 3 Hours.**
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, Ireland, Italy, and South Korea. LEC.

**SW 978. Research Design and Methods. 3 Hours.**
This class is an in-depth introduction to the process of conducting research. This introduction provides the essential context for the qualitative, quantitative, and mixed methods research courses. LEC.

**SW 979. Methods of Qualitative Inquiry I. 3 Hours.**
This course is the first in a sequence of two courses on qualitative inquiry required for students in the social work Ph.D. program. It provides a detailed overview of knowledge and skills for designing qualitative inquiry. It examines issues in the philosophy of science, paradigms for qualitative inquiry in social work, and a diverse range of methods that flow from these paradigms. It emphasizes principles and procedures for qualitative inquiry design, including an introduction to data collection, analysis, and criteria for establishing methodological rigor (i.e. trustworthiness). Prerequisite: SW 985 and SW 978. LEC.

**SW 980. History and Philosophy of Social Work. 3 Hours.**
This course is designed to provide students with opportunities to examine the underlying conceptual frameworks of social work practice-their history and present manifestations. This course rests on the definition of social work practice that includes the interaction of knowledge, value, and skill around professional purpose and in the context of professional sanction. LEC.

**SW 981. Advanced Quantitative Research Methods I. 3 Hours.**
This course, which includes a lab, focuses on quantitative research methodology and related inferential statistics, emphasizing mastery of specific methodological and statistical knowledge and skills. The course will address the following topics: the framing of research questions; the selection of appropriate research methods and designs; the selection of appropriate statistics for data analysis; the principles of analysis; interpretation of findings; and the presentation of results. LEC.
SW 982. Social Welfare Policy. 3 Hours.
This seminar helps doctoral students learn to analyze social welfare policies and programs. After comparing and contrasting various policy analysis frameworks, students learn to analyze the ways in which social conditions, values, and ideologies shape the definitions of social problems as well as the development, implementation, and evaluation of social welfare policies that impact those problems. LEC.

SW 983. Advanced Quantitative Research Methods II. 3 Hours.
The purpose of this advanced research methods course is to help equip professionals to design and carry out research with direct implications for social work practice and social welfare policy. Building on the experience in SW 978 and SW 981, this course will focus on more advanced topics in research design and both experimental and correlational statistical analyses. LEC.

SW 984. Social Work Practice: Identifying and Improving "Best Practices. 3 Hours.
The main focus of this seminar is on developing skills for conduction multi-dimensional, value critical inquiry about "best practices" relevant to social work practice, and applying the results of that inquiry toward extending and improving current "best practices". LEC.

SW 985. Theory for Research: , 3 Hours.
This course provides an introduction to interdisciplinary theory for applied social research, focusing on: (1) the roles and uses of theory in social inquiry (2) theory building and theory testing (3) induction and deduction (4) the articulation of common or related theoretical traditions in various social science disciplines. LEC.

SW 987. Teaching Social Work: Philosophy and Methods. 3 Hours.
The purpose of the course is to prepare doctoral students for effective teaching of Social Work courses at all levels of higher education. Doctoral students need practical skills, a theoretical base, experience, and confidence in order to improve their teaching performance. LEC.

SW 988. Mixed Methods in Social Science Research. 3 Hours.
The purpose of this course is to provide an overview of mixed methods research, consisting of the history and philosophy of mixed methods research, the emerging literature on it, purposes and characteristics of mixed methods research, types of research problems addressed, the specification of mixed methods purpose statements and research questions, types of major mixed methods designs, data collection and analysis strategies, and reporting and evaluating results. LEC.

SW 989. Methods of Qualitative Inquiry II. 3 Hours.
This course is the second in a sequence of two courses on qualitative inquiry required for students in the social work Ph.D. program. It provides in-depth methodological knowledge and skills for implementing qualitative inquiry and writing research reports. It examines implementation issues related to a diverse range of methods that flow from the paradigms addressed in SW 979. It provides guidance for implementation of research designs for projects developed in SW 979, including application of methods for data collection, analysis, supporting criteria for methodological rigor (i.e., trustworthiness), and writing up findings and implications. Prerequisite: SW 979. LEC.

SW 990. Graduate Research. 1-9 Hours.
Individual research preparatory to defense of dissertation prospectus. (By arrangement with doctoral chair.) Graded on a satisfactory progress/limited progress/no progress basis. RSH.

SW 998. Doctoral Applied Research and Education Studies. 1 Hour.
This course provides the opportunity for doctoral students to learn about research or teaching through direct application of research or teaching skills under the mentorship of faculty. RSH.

SW 999. Dissertation. 1-12 Hours.
Graded on a satisfactory progress/limited progress/no progress basis. THE.

Bachelor of Social Work

Bachelor of Social Work Program

The School of Social Welfare provides the education and experience necessary for a career in social work. By helping shape students' capacity for caring, the school prepares social workers to carry out the unique purposes of the profession — to develop human potential, to promote individual well-being, and to bring about a more just society.

Social work is a major professional discipline in the broad institution of social welfare. The term social welfare denotes the dimensions of society concerned with human needs: health, education, economic security, housing, and mental health.

The undergraduate program of the KU School of Social Welfare prepares graduates for beginning generalist social work practice. The program defines generalist practice as maintaining focus on the interface between systems (i.e., individual, family, groups, organizations, and communities), with particular emphasis on

- The strengths inherent in these systems.
- The need to understand the role of gender, age, race/ethnicity, class, religious beliefs, sexual orientation, disability, and culture in all phases of the social work process.
- The promotion of social and economic justice for those disenfranchised on the basis of the attributes listed above.
- The assumption of a critical perspective regarding different ways of knowing.

Beginning generalist practice uses multilevel methodology, depending on the needs of the client system, and incorporates a knowledge, value, and skill base that is transferable between and among diverse contexts and locations.

The B.S.W. program is offered on the Lawrence and Edwards campuses.

Advising

Once a student is admitted to the School of Social Welfare, an academic adviser will be assigned to assist students in the enrollment process and with other academic program requirements. Students consult with their academic adviser before enrollment each semester and have their advising hold removed by the B.S.W. program office. In addition, a member of the School’s faculty is assigned as a professional/career adviser. Current students can view their advisers on Jayhawk GPS.

For more information on B.S.W. advising, review the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/).

Beginning in the fall semester, (4) semesters are necessary to complete professional social work courses required for the B.S.W. degree.

Transfer Students

For undergraduates who plan to transfer to KU but currently attend another college, advising is available by phone or email. The school works closely with counselors from all Kansas colleges.
Degree Progress Report

The Degree Progress Report (DPR) is a computerized advising and degree-audit system, used to assist students and advisers in tracking progress toward completion of general education degree and major requirements. Students should review their DPR each semester and be prepared to review and discuss information contained in the DPR at all advising appointments. The DPR can be accessed through the student's account in the myKU portal (https://my.ku.edu/uPortal/f/welcome/normal/render.up) under the Advising tab. Although the DPR provides a list of courses taken and grades earned, it is not an official transcript and can be used only for internal advising.

Certificate Programs

Certificate in Child Welfare

The School of Social Welfare's Certificate in Child Welfare (http://socwel.ku.edu/academics/degrees/bsw/bsw/certificateprograms/) provides seniors in the B.S.W. program with specialized knowledge and skills to prepare them for a career in the field of child welfare. The certificate offers specialized training in social work practice with children and families who are involved with the child welfare system and provides a child welfare practicum as part of the experience.

Undergraduate Experiential Learning Certificate Programs

The university offers several experiential learning certificate programs that work well with the undergraduate social work major. Students who complete an engaged learning certificate program receive a notation of it on their transcripts. Learn more about KU certificate programs (https://advising.ku.edu/special-programs-certificates/). (https://experience.ku.edu/)

Undergraduate Admission to KU

Students are directly admitted to the School of Social Welfare as new freshmen and transfer students. Visit the Office of Admissions (http://admissions.ku.edu/) for information about admission to KU. Visit the Office of International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Current KU students changing from another major to Social Welfare should complete a Change of School form and must meet the advancement requirements.

Undergraduate Advancement Review for the School of Social Welfare

Advancement Requirements

For students to advance into 500 and 600 level Social Welfare coursework, they must complete the B.S.W. Advancement Review (http://socwel.ku.edu/academics/degrees/bsw/bsw/admission/) by June 15 preceding the fall semester in which they intend to begin 500 level classes. The Advancement Review includes the following:

- Completion of a personal essay answering three specific questions.
- Three letters of reference; one from a faculty member or instructor; one from a work or volunteer supervisor; one from any one of the previously listed. Personal or character references are not acceptable.
- Professional resume.
- Documented (50) hours of volunteer or paid work in a social service setting.*
- Earned grade of B or higher in SW 220.
- Minimum cumulative GPA of 2.50.
- Completion of ENGL 101, ENGL 102, Math 101, SW 220, and at least (36) hours of General Education coursework.

*The (20) volunteer hours required for SW 220 will count towards the total (50) volunteer hours. In addition, any volunteer hours in social service agencies completed through experiential learning courses (Service Learning Certificate courses or Alternative Break experiences) at KU or other institutions of higher learning will count as well. Social service agencies are defined as agencies that serve high risk human populations.

*Students must complete all general education requirements including electives prior to the start of 600 level course work and practicum.

Grade-Point Average

A student must maintain a minimum cumulative grade-point average of 2.5 and a 2.5 in social work required courses. Evaluation of transcripts submitted as part of the application for admission includes computation of grade-point average for all work completed. This admission grade-point average is adjusted to include only courses that transfer to KU. Both transferable credits and all work taken at KU count in the grade-point average when advancement requirements are reviewed.

Bachelor of Social Work Degree Requirements

Primary responsibility for meeting graduation requirements rests with the student.

- A minimum of 120 credit hours of course work, including 12 credit hours of field practicum. At least 30 hours must be taken in residence.
- A 2.5 minimum grade-point average for all classroom work.
- A 2.5 minimum grade-point average in required social work courses.
- Successful completion of field practicum.
- Recommendation by the faculty of the school to the chancellor and the Kansas Board of Regents that the degree be granted.

Curriculum

<td>3</td>
</tr>
</tbody>
</table>

Students prepare for the responsibilities of social work, involving professional functioning, knowledge and use of professional ethics, values, attitudes, and skills. Students analyze their values critically to develop a unified personal and professional framework. Students develop their professional commitment to a code of ethics and understanding of social work to govern their professional behavior.

Human Behavior and the Social Environment

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td>SW 530</td>
<td>Human Behavior in the Social Environment</td>
<td>3</td>
</tr>
</tbody>
</table>
SW 532  Community and Organizational Dynamics and Human Behavior  3

Students acquire a knowledge and understanding of individual, group, community, institutional, and cultural dynamics and behavior. Students become familiar with concepts, theories, and empirical findings that enable them to practice effectively as professional social workers.

Research

SW 540  Fundamentals of Social Work Research  3
SW 541  Social Work Research Seminar  3

Students achieve a command of fundamental social work research. A knowledge of the scientific method is acquired and applied to current research. Students learn to apply critical thinking to the professional literature.

Social Work Practice

SW 510  Fundamentals of Social Work Practice  3
SW 555  Diversity, Oppression, and Social Justice: Culturally Competent Social Work  3
SW 560  Study Abroad Topics: _____  3
SW 610  Social Work Practice Seminar I  3
SW 612  Social Work Practice Seminar II  3
SW 630  Topics in Social Work Practice: Antisocial, Aggressive Behavior in Childhood and Early Adolescence  1.5
SW 631  Topics in Social Work Practice: Intimate Partner Violence  1.5
SW 632  Topics in Social Work Practice: Substance Abuse and Social Work Practice  1.5
SW 633  Topics in Social Work Practice: Crisis Intervention  1.5
SW 634  Topics in Social Work Practice: Child Welfare - Protecting Children, Strengthening Families  1.5

Students acquire knowledge and skills needed for effective social work practice. The accumulated knowledge and understanding of the social work curriculum come together in the practice courses.

Social Policy

SW 620  Social Policies and Program Analysis  3
SW 621  Social Policy Analysis and Advocacy  3

Students develop the capacity for critical analysis of social problems, policies, and programs. Students analyze social work practice to understand the effect of policy on direct service. Basic policy analysis skills acquired in the first course are applied in specified areas of practice, applying analytical skills to problems, policies, and programs.

Study Abroad

SW 560  Study Abroad Topics: _____  3

Students get exposure to international aspects of social welfare in countries such as Costa Rica, South Korea, India, and Ireland. An elective course that meets general education credit hour requirements.

Field Practicum (SW 601)

The field education office works with community agencies throughout Kansas and western Missouri to provide field practicum opportunities for students. Students are placed in these agencies through a collaborative process among the field education office, the student, and the agency. The field education office is responsible for ensuring that all field placements are able to provide the appropriate learning opportunities for students and that qualified field instructors will be available to the student.

Learn more about field education (http://socwel.ku.edu/academics/degrees/bsw/bsw-fe/fieldeducation/).

Required Hours for Field Practicum

Students with 9 or more remaining elective or general education requirement credit hours in the fall of the senior year must complete these hours before beginning field placement. Students who are completing these hours may take SW 620, SW 621, and the mini-courses, but they cannot enroll in SW 610, SW 612, or SW 623.

Liberal Arts Prerequisites for a broad base of understanding

Learn more about the B.S.W. curriculum (http://socwel.ku.edu/academics/degrees/bsw/bsw/curriculum/) and liberal arts prerequisites.

Total Hours 48
Undergraduate Certificate in Child Welfare

Certificate Description

The KU School of Social Welfare's Certificate in Child Welfare provides seniors in the B.S.W. Program with specialized knowledge and skills to prepare them for a career in the field of child welfare. The Certificate in Child Welfare offers specialized training in social work practice with children and families who are involved with the child welfare system and provides a child welfare practicum as part of the experience.

Requirements for the Certificate in Child Welfare are as follows:

- Field Practicum with an agency that is working with children and families as part of the child welfare system in the student's final year (SW 601) - 12 hours
- Undergraduate mini-course: SW 634 - Child Welfare: Protecting Children, Strengthening Families - 1.5 hours
- One additional mini-course: SW 630 - Antisocial, Aggressive Behavior in Childhood & Early Adolescence; SW 631 - Intimate Partner Violence; SW 632 Substance Abuse & Social Work Practice; OR SW 633 Crisis Intervention. - 1.5 hours
- SW 610 - Social Work Practice Seminar I - 3 hours
- SW 612 - Social Work Practice Seminar II - 3 hours
- Applied Behavioral Science (ABSC 160) - 3 hours
- Psychology (PSYC 104) - 3 hours

Master of Social Work

Master of Social Work

Built upon the commitment to a strengths perspective of social work practice, the Master of Social Work program (http://socwel.ku.edu/academics/degrees/msw/regular/overview/) offers educational opportunities for those who wish to expand their skills in helping individuals and communities develop their capacities to support and enhance the quality of life for all people. The school recognizes that individuals with a natural skill in helping come from all backgrounds and encourages them to apply.

The Master of Social Work degree prepares graduates for advanced social work practice in 1 of 2 broad areas — clinical social work practice with individuals, families, and groups or macro practice. The first level of the master’s curriculum is a generalist foundation required of all students. The foundation consists of 6 classroom courses and a 2-semester practicum that reflects the generalist intent.

At the advanced level, students choose a concentration in clinical social work practice with a focus in a particular field of practice — child and family, health/mental health, aging — or macro practice. The advanced-level practicum implements students' choice of concentration.

Full-time students complete the social work degree program in two years. Students admitted for part-time study may extend the program for up to four years (see Completion Plans (http://socwel.ku.edu/sites/socwel.ku.edu/files/docs/Academics/msw/MSW%20Completion%20Plans%202016.pdf)). The regular M.S.W. program is offered on the main KU campus in Lawrence at the Edwards Campus in Overland Park, KS, and in alternating years in the western Kansas program (http://socwel.ku.edu/academics/degrees/msw/westernks/overview/).

The Advanced-Standing program (http://socwel.ku.edu/academics/degrees/msw/advancedstanding/overview/) admits individuals with B.S.W. degrees and strong academic records. Applicants generally have relevant post-degree work experience.

Social Work & Law

Joint Degree in Social Work and Law

The Juris Doctor/Master of Social Work (http://socwel.drupal.ku.edu/academics/degrees/msw/mswjd/overview/) joint degree program combines into 4 years of study the 3-year Juris Doctor program offered by the School of Law and the 2-year M.S.W. degree offered by the School of Social Welfare. The social work practitioner gains an understanding of the legal environment in which he or she works and its impact on social problems. The legal practitioner learns how social problems shape the law. Applicants must apply to and meet the criteria for admission to both schools. Contact each school for separate admission information.

Master of Social Work

Regular M.S.W. Program - 2-Year Full-Time or Part-Time

Applicants must have bachelor’s degrees from accredited universities before beginning the M.S.W. course and field work. Applicants’ undergraduate studies must reflect the successful completion of liberal arts courses, including those in the social sciences and humanities which focus on the development of knowledge in communication; social, biological, and behavioral sciences; history; philosophy and the ways in which knowledge is gained and applied; and the value of a multicultural and diverse society.

Advanced-Standing Program

The Advanced-Standing Program requires a bachelor’s degree from a CSWE-accredited social work program with a grade-point average of at least 3.0. A higher grade-point average is desirable. Applicants who earned their social work bachelor’s degrees within the 2 years before applying to the M.S.W. program must submit a copy of their practicum evaluation as well as a letter of recommendation for graduate studies completed by one of their practice instructors. In addition, all applicants who have been employed in a social work setting should submit a letter of recommendation from at least one supervisor who can address the applicant’s knowledge, skill, and readiness for graduate education.

Admission decisions take into account the applicants’ amount and types of social service experience, letters of recommendation, narrative statement, writing skills, and undergraduate grade-point averages and courses completed.

The Advanced-Standing Program is a full-time 1-year program or part-time 2-year program. To be considered for advanced standing, current seniors should submit transcripts that document their fall semester grades and their successful practicum experience. All applications to either the regular M.S.W. or the Advanced-Standing Program become the property of the University of Kansas.

Learn more about the M.S.W. programs (http://socwel.ku.edu/academics/degrees/msw/regular/overview/).
Admission to the M.S.W. Program

M.S.W. Admission Requirements

- Bachelor's degree from an accredited university (Regular M.S.W.). Bachelor's of social work degree from a CSWE-accredited social work program (Advanced Standing).
- Undergraduate grade-point average of 3.0 or above preferred. The admissions committee takes into account special circumstances such as improvement of grades in upper-division or graduate courses. We look for evidence of an applicant’s commitment to the well-being of people and communities; a well-developed sense of self; emotional maturity and the ability to think clearly, creatively, and independently.
- Online application including three electronic reference forms and student-issued transcripts from all previously attended schools regardless of degree status.
- All applicants who have been employed in a social work setting should submit an electronic M.S.W. reference form from at least one supervisor who can address the applicant’s knowledge, skill and readiness for graduate social work education as one of the three references.
- Non-refundable application fee of $65 for domestic students and $85 for international students.
- Graduate Record Examination scores are not required. Applicants are evaluated on undergraduate grade-point average, graduate course work (if any), volunteer and work experience especially related to social work, and evidence of potential for a social work career in the application narrative and references.

Deadlines

The deadline for the Advanced-Standing Program is January 15. The deadline for applications to the regular M.S.W. program (full time or part time) is February 15. Early application is encouraged.

Admission Process for All Programs

M.S.W. degree program students are admitted for fall semester only. Applications may be submitted anytime between Oct. 1 and January 15 (Advanced Standing M.S.W.) or Feb. 15 (Regular M.S.W.). All fully completed applications are reviewed upon receipt. Admission decisions are made in the spring of each year. Advanced-Standing M.S.W. students begin in June; all other M.S.W. students (full time and part time) begin in August.

Learn more about the application process (http://socwel.ku.edu/academics/degrees/msw/regular/admission/).

International Students

International students and students who indicated English as a second language, are required to show proof of English proficiency for admission purposes and must check-in at the Applied English Center (http://www.aec.ku.edu/) (AEC) upon arrival on campus for orientation. This process serves to confirm each student’s level of English proficiency and determine whether English courses will be included as a requirement of the student’s academic program. Note: Students who demonstrate English proficiency at the waiver level or who have earned a degree from one of the specified English-speaking countries listed in the policy (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/) are not required to check in at the AEC (see eligibility requirements on the Graduate Studies website (https://graduate.ku.edu/english-proficiency-requirements/)).

Note: The need to take English courses may delay your start in or extend the length of the M.S.W. program.

If you are admitted to the M.S.W. program, your admission to the School of Social Welfare is provisional. You must visit the KU International Support Services (http://www.iss.ku.edu/) Office, iss@ku.edu, for your I-20 documentation.

You must also visit the Applied English Center (http://www.aec.ku.edu/), aec@ku.edu.

The International Conference on Social Welfare recommends that before seeking professional education for social work in the United States, a student should complete comparable study available in his or her own country and acquire a minimum of 2 years of social work experience there.

International students also must submit

1. Original bank statements showing evidence of your and/or your sponsor’s financial ability to pay for your educational and living expenses. Adequate health insurance coverage also is required.
2. Evidence of having taken the Test of English as a Foreign Language (TOEFL) examination within the past 2 years. Minimum scores are subject to change. Please visit the application area of our website for the latest minimum scores.
3. 1 official, original-language copy of your academic records with a certified English translation.

Planning Your Commitment

Students are admitted on either a full- or a part-time basis. In making decisions about full- or part-time study, students should consider that each class requires several hours of preparation each week. The program is demanding; students can expect reading assignments and paper preparation and should be prepared to fulfill practicum commitments averaging 2½ to 3 days a week.

Students admitted part-time take 6 credit hours each semester the first year and the additional 10 hours, including practicum, the second year. Full-time students enroll in 16 credit hours each semester.

M.S.W. Degree Requirements

The School of Social Welfare requires a total of 64 credit hours for the M.S.W. degree, consisting of

- 36 credit hours of classroom work maintaining a grade-point average of 3.0 (B) — a total of 108 grade points on a 4.0 grading scale.¹
- 28 credit hours of field practicum with an S grade for satisfactory performance.
- 2 sequential semesters of 10-credit-hour enrollments are necessary to meet residence requirements.
- Recommendation of the faculty of the School of Social Welfare to the University Registrar that the master’s degree be granted.

¹ Students who maintain grade-point averages of at least 3.0 in the foundation courses are eligible to take additional courses beyond the minimum requirement.
M.S.W. Foundation Curriculum

Social Work Practice (SW 710, SW 711). Based on the school’s unique strengths perspective, courses provide core knowledge and skills essential for working with individuals, families, and groups.

Community and Organizational Practice (SW 713). This practice class gives students an understanding of the core elements of practice in organizations and communities.

Social Policy and Program Analysis (SW 720). Course emphasizes the effect of social problems, policies, and programs on people and gives students the skills to analyze the effectiveness of policies and programs.

Human Behavior in the Social Environment (SW 730). Theoretical underpinnings essential for effective social work practice and for understanding the behavior of individuals, families, groups, and communities.

Social Work Research (SW 740). Course offers students the opportunity to become informed consumers of social-work-relevant research and to develop skill in evaluating the effectiveness of their own work with clients and the effectiveness of the programs in which they work.

Field Practicum (SW 701 and SW 702). Community agencies throughout Kansas and western Missouri offer practicum opportunities for the application of knowledge, values, and skills learned in the classroom. Field experiences for foundation-level students extend the curriculum goal of generalist social work and are designed so that students acquire fundamental competencies and practice skills across multiple social systems.

Foundation Courses

The following courses (http://socwel.drupal.ku.edu/academics/degrees/msw/regular/curriculum/) are required (32 credit hours):

<table>

</table>

M.S.W. Advanced-Level Curriculum

Students at the advanced level (http://socwel.drupal.ku.edu/academics/degrees/msw/regular/curriculum/) select a concentration in either clinical social work practice or macro practice. This selection is based on their goals of working directly with individuals, families, and groups or at the macro-level of practice. With the exception of study abroad courses offered by the School of Social Welfare, students may not enroll in advanced-level classes before completing foundation requirements.

All students completing the M.S.W. degree are eligible to apply for licensure in the State of Kansas as Licensed Master Social Workers (LMSW). Students who anticipate working towards meeting the requirements for the Licensed Specialist Clinical Social Worker (LSCSW) examination should enroll in the clinical social work practice concentration.

Clinical Social Work Concentration

This 32-credit-hour concentration prepares students for social work practice with individuals, families, and small groups. The focus of the student’s academic preparation is twofold: on developing the assessment skills needed to identify client’s personal, interpersonal, environmental and/or systems needs; and on selecting, in concert with the client, appropriate interventions that are evidence-based and supported as best practices. Students are exposed to social work theories and methods applicable to the range of practice settings in which clinical social work services are provided; they simultaneously have the opportunity to apply this developing knowledge in the field education component of their graduate programs. Students who anticipate taking the Licensed Specialist Clinical Social Worker (LSCSW) examination should enroll in the clinical social work practice concentration.

The following courses must be taken in the clinical concentration (32 credit hours):

<table>

Non-Clinical Electives: 3

These courses are macro-oriented and do not have significant clinical content.

SW 846  Advanced Community and Advocacy Practice
SW 855  Study Abroad Topics: _____
SW 875  Readings and Investigations: _____

(For students expecting to sit for the LSCSW license in the future, at least one of the clinical electives must meet the BSRB requirement for diagnosis and treatment. Those interested in school social work should take SW 834 as one of their elective courses.)

Note: Earning an M.S.W. in the clinical social work concentration requires 15 credit hours of course work which has clinical content covering issues of diagnosis and treatment. These courses include SW 810, SW 811, SW 863, integrative seminars, and clinical electives. Study Abroad courses do not contain clinical content and may be used toward the diversity selective requirement or as an elective. If a student enrolls in Study Abroad for the diversity selective requirement, the elective course must contain clinical social work content.

Social Work Macro Practice

The 32-credit-hour macro practice curriculum prepares graduates for management or advocacy positions in public and voluntary human services organizations. The concentration helps students achieve competence in managerial and advocacy practice grounded in the knowledge and values of social work. Knowledge and skill areas include program design, managing information, managing people, managing resources, community advocacy, and program evaluation. This concentration prepares students to be program managers, supervisors, agency administrators, program monitors, advocates and evaluators, and social planners with voluntary health and welfare planning agencies; federal, state, and local planning bodies; and advocacy and self-help organizations. Students graduating from the macro practice concentration are eligible for licensure at the LMSW level in the state of Kansas.

The following courses must be taken in the Macro concentration (32 credit hours):

M.S.W. Advanced-Standing Program

The Advanced-Standing program (http://socwel.drupal.ku.edu/academics/degrees/msw/advancedstanding/curriculum/) requires an enrollment of 38 credit hours, as follows:

- A summer enrollment in 2 classes:
  - SW 712, a social work practice class organized around the school’s major curriculum themes. Students must earn a minimum grade of B in SW 712 to continue matriculating.
  - An elective course selected by the student to broaden the base of knowledge. Electives are offered in various locations.

- The advanced level of the M.S.W. program (32 credit hours):
  - 18 credit hours of classroom work maintaining a grade-point average of 3.0 (B)
  - 14 credit hours of field practicum with an S grade for satisfactory performance

No credit is given for courses taken before admission. The advanced level of this program may be taken full time or extended up to 2 years. Two sequential semesters of 10-credit-hour enrollments are necessary to meet residence requirements.

Field Practicum

The field education office works with community agencies throughout Kansas and western Missouri to provide field practicum opportunities for students. Students are placed in these agencies through a collaborative process among the field education office, the student, and the agency. The field education office is responsible for ensuring that all field placements are able to provide the appropriate learning opportunities for students and that qualified field instructors will be available to the student.

Learn more about field education (http://socwel.ku.edu/academics/degrees/msw/advancedstanding/curriculum/).

Prior Work Experience

In accordance with national curriculum policy, prior employment and life experience may not be credited toward classroom course work or practicum requirements.

School Social Work

The Kansas Department of Education no longer certifies school social workers. However, the School of Social Welfare strongly recommends that students interested in practicing in a school setting take the following:

- A practicum experience at the advanced level in a public school setting under the direct supervision of a school social worker.
- Clinical social work concentration.
- SW 830 Social Work in Child and Family Settings.
- SW 834 Social Work in Schools as 1 clinical elective.
- SPED 725 is highly recommended as an elective choice for students planning a future in school social work.
Doctor of Philosophy in Social Work

Doctor of Philosophy in Social Work

The goal of the University of Kansas School of Social Welfare doctoral program is to prepare students to become leaders nationally and internationally in advancing social work practice and policy through research, teaching, and scholarship. Our students graduate from the program with the critical knowledge and skills they need to become innovative stewards of the discipline who generate and disseminate knowledge as researchers, scholars and educators. The school is known nationally and internationally as a prime innovator in the Strengths Perspective for social work practice. Doctoral students have played a key role in advancing this work to its 21st century applications.

Program Highlights

- Creative, critical thinking about social work practice, social policy, and guiding theoretical frames
- Advanced quantitative and qualitative research skills
- Opportunities for innovative scholarship and for the development of teaching skills
- Student-centered educational approach
- Financial support and mentoring for students
- Appreciation for human diversity and the development of a global perspective
- Social, economic, and environmental justice focus
- Study Abroad opportunities

Doctoral students are immersed in the excitement and creativity in the profession — how professionals come to know what they know, how they put that knowledge into practice, and how it affects consumers.

Consider Our Program

The Ph.D. program (http://socwel.ku.edu/academics/degrees/phd/overview/) offers effective options for building knowledge by initiating systematic inquiry into methods, forms, and outcomes of social work practice and social welfare policy. We are dedicated to educating scholars who desire to build knowledge for the profession through quantitative, qualitative, theoretical, or conceptual analyses, and historiographic investigations. Demand for our Ph.D. graduates is high. Our alumni are engaged in teaching, research, and administrative endeavors and are found in faculty positions at premier research universities and at smaller colleges and universities throughout the United States and abroad.

Curriculum

Doctoral courses (http://socwel.ku.edu/academics/degrees/phd/curriculum/) prepare students as scholars with conceptual and methodological sophistication.

- The history and philosophy course focuses on the intellectual history, current status, and innovation of social work ideas, ideologies, and theories.
- In the research sequence, students learn both qualitative and quantitative methodologies, designs, advanced modes of analysis, theory for research, and appropriate applications.
- The policy/practice courses provide the opportunity to analyze policies of interest to the student and discover “best” practices as they affect certain population. Students develop and apply a critical perspective when considering human problems, strengths, and strategies for change and transformation.
- Qualifying papers and electives help students develop deep understanding in areas of special interest.
- A required course as well as teaching seminars for GTAs prepare students to be effective educators.
- The dissertation involves advanced and focused research into a topic selected by the student, based on quantitative, qualitative, historical, or other methods of inquiry.

GTA & GRA

Teaching and Research Opportunities

Our Ph.D. program contributes significantly to the model of strengths and community-based research, service, and education developed by the school. Under the direction of faculty members, many Ph.D. students help with research projects and serve as teaching assistants. For example, doctoral research assistants work in such areas as aging, asset-building, child welfare, criminal justice, diversity issues, domestic violence, health and disability, child and adult mental health, poverty, social policy, and spirituality.

It is part of the school’s mission to focus on teaching, inquiry, and practice that benefit populations who experience oppression of all kinds. The school is committed to diversity and multicultural perspectives. Many of the faculty are involved in research and service projects which are committed to direct and positive impact on people of color, status minorities, and oppressed peoples, individually, collectively, and internationally. Doctoral students work with faculty to bring the projects to life.

Responsible Scholarship

Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Admission Criteria & Requirements

Criteria used in judging applications include the applicant’s potential for excellence in academic performance, professional practice experience, and potential for contributions to knowledge-building for social work.

Required

- Master’s degree in social work or related field.
- Graduate grade-point average of 3.5 or higher.
- Personal statement.
- Three letters of reference.
- Completion of the Graduate Record Examination’s (GRE) Quantitative and Verbal tests within the past 5 years. The GRE Writing/Analytic test is not required.
- Completion of a basic statistics course within the past two years with a grade of B or higher. The applicant must include a written statement showing how this requirement has been met or how it will be met before entering the program.
- Completion of the online graduate application (https://graduate.ku.edu/application-process/).
- Students whose native language is not English must follow the policy for English Proficiency Requirements for Admission to Graduate

Doctor of Philosophy in Social Work
Study. (http://policy.ku.edu/graduate-studies/english-proficiency-international-students?num1.5/)

Preferred

- GRE scores in at least the 50th percentile on the Quantitative and Verbal tests.
- Undergraduate grade-point average of 3.0 or higher preferred.
- M.S.W. degree preferred. Applicants with master’s degrees related to social work and affiliation with social work activities and values are considered.
- Two years of social work or related practice; two years of post-master’s professional social work experience preferred.
- Personal interview (telephone or email contacts with the chair of the program are recommended before submitting application).

Application Timeline and Procedure

Applications are not reviewed until all materials are received. The deadline is January 15. Applicants are strongly encouraged to take the Graduate Record Examination well in advance of the January 15 deadline. Late applications are considered only on a space-available basis.

Learn more about the admission process (http://socwel.ku.edu/academics/degrees/phd/admission/).

International Students

International students from all regions of the world are encouraged to apply. For more information about international student applications and resources and regulations contact International Support Services (http://www.iss.ku.edu/) and the Applied English Center (http://www.aec.ku.edu/).

Ph.D. Degree Requirements

The program requires a minimum of 64 credit hours, as follows:

- 42 credit hours of required coursework.
- 15 credit hours of electives.
- A qualifying paper.
- A comprehensive examination process.
- Completion of a dissertation.

In fulfilling the elective hours, students may take graduate-level courses in any substantive area or research skills necessary for successful completion of their goals. Students can take electives in social science or other relevant graduate disciplines. They may also complete Independent Study under faculty direction and/or choose from one of several study abroad courses offered by the School.

Beyond course work, students complete one qualifying paper under the guidance of a faculty committee. This demonstrates their ability to integrate knowledge and skills across the three curriculum areas in relation to a theme of inquiry developed by the student in his or her chosen specialization. After the qualifying paper is completed, students complete an oral comprehensive exam (dissertation proposal defense) and then undertake and complete an approved research project, and write and defend the doctoral dissertation.

Required course work (http://socwel.ku.edu/academics/degrees/phd/curriculum/) can be completed in 2 years. Additional time is needed to complete the qualifying papers and dissertation. The program can be completed in 4 years of focused work. Students may start on a part-time basis but eventually must spend 1 year in residence, which entails 2 semesters of full-time course work (9 hours) and may include one summer session (6 hours); or a combination of 6 hours of course work and halftime appointment as a teaching or research assistant for 2 semesters.
Office of Graduate Studies, Lawrence and Edwards Campus Students

Graduate Studies

Graduate Studies (http://www.gsu.ku.edu/) at the University of Kansas is the administrative unit responsible for graduate education for the Lawrence and Edwards Campuses.

Graduate Studies (http://www.ku.edu/graduate-studies.html) on the KU Medical Center campus (a unit of the Office of Academic Affairs) is responsible for graduate programs in the Schools of Health Professions, Medicine, and Nursing. Please see the online catalog section for the KU Medical Center - Office of Graduate Studies (http://catalog.ku.edu/graduate-studies/kumc/) for more information.

Graduate degrees are conferred by the professional schools and the College of Liberal Arts and Sciences with the exception of the Health Informatics master's degree, which is conferred by the KUMC Office of Graduate Studies upon recommendation by the Health Informatics Advisory Council. Appointments to the Graduate Faculty are authorized by the schools and the College, or by the individual academic units on the Medical Center campus, and administered by the appropriate Graduate Studies office.

KU offers the Master of Arts degree, the Master of Science degree, specific professional master’s degrees, the professional degree of Specialist in Education, and the Doctor of Philosophy degree, as well as professional doctorates of Audiology, Education, Engineering, Musical Arts, and Speech-Language Pathology. KU also offers graduate certificate programs and currently enrolls more than 5,000 graduate students.

Goals of Graduate Study

The traditional goals of graduate study are independent scholarship, competence in research or other creative work, and the cultivation of skill and commitment in teaching. Having acquired a broad education as an undergraduate, the student is expected to master a specific field, to learn the methods of investigation employed therein, and to proceed toward making an original contribution to knowledge. Since many of those who earn advanced degrees find careers in higher education, the acquisition of skill in teaching and in directing research are also essential parts of graduate education.

Emerging societal interests and changing market demands continue to underscore the importance of the traditional goals of graduate study. At the same time, they emphasize the need for flexibility in programs and accommodation in career objectives. Graduates in many fields continue to pursue increasingly diverse careers and, as they do, they demonstrate the value of graduate study and research to society, government, business, industry, the diverse professions, and the arts. Nevertheless, incoming students must realize that a change in employment patterns for graduates is underway in many fields where the major, if not the sole, employment opportunity after graduation was once to be found in a teaching career.

Graduate Military Programs

The Office of Graduate Military Programs (GMP) (http://gmp.ku.edu/) facilitates collaboration between the university and the US Armed Forces for the development of academic programs and research initiatives that support the needs of the Department of Defense (DOD). GMP develops and maintains programs for select officers attending the Command and General Staff College at nearby Fort Leavenworth, instructors at the United States military academies, foreign area officers, logisticians, and other DOD personnel requiring the advanced degrees necessary to teach and conduct research at the highest level. The office assists principal investigators throughout the university to find well-matched research grant opportunities, prepare proposals, and coordinate with the appropriate DOD entities. GMP also collaborates with the Student Veteran Center and serves as a voice for all educational issues related to student veterans. GMP is committed to creating and maintaining a positive learning environment for military veterans attending our university.

Research

Research is an integral part of the university’s educational mission and approach to graduate study. The National Science Foundation classifies KU as a major university receiving substantial research support. The Carnegie Classification of Institutions of Higher Education classifies KU as a doctorate-granting R1 Research University with the Highest Research Activity, and KU has been a member of the Association of American Universities since 1909. The university has a long and successful record of research collaboration through independent, multidisciplinary research centers that focus on common themes. KU is home to university research centers and institutes, affiliated centers, core service labs, the Kansas Geological Survey, and the Kansas Biological Survey. In addition, a number of research centers exist in individual departments and academic units throughout the university. For more information about research on the Lawrence campus, visit the Research (http://www.ku.edu/research/) page or the Office of Research (http://www.research.ku.edu/).

Fellowships and Scholarships

Visit the Graduate Studies website (http://graduate.ku.edu/funding/) for information about funding opportunities for KU graduate students.

Admission to Graduate Study

Persons whose records indicate their ability to succeed in advanced work may be admitted to the University of Kansas for graduate study in one of the professional schools or in the College of Liberal Arts and Sciences. These policies constitute university minima. Departments and programs may be more selective.

Applicants can apply to be degree-seeking, non-degree-seeking, or certificate-seeking students. Applicants pursuing an identifiable degree program are degree-seeking; those applicants pursuing a certificate program are certificate-seeking, those who are not pursuing an identified degree or certificate program should be admitted under the non-degree-seeking category. No student may work toward a graduate degree without being accepted as a degree-seeking student in a specific graduate program. (View the current policies on Graduate admission (http://policy.ku.edu/graduate-studies/admission-to-graduate-studies/) for more information.)

The University of Kansas notifies each applicant in writing of the admission decision. In situations requiring a previously enrolled student to re-apply for graduate admission, the previous admission does not guarantee re-admission.
English Proficiency:
In accordance with the policy on English Proficiency Requirements for Admission to Graduate Study (https://documents.ku.edu/policies/Graduate_Studies/EnglishProficiencyIntlStudents.htm?num1.5/), international applicants must demonstrate English proficiency, even if they indicate that English is their first language. Domestic applicants who indicate that English is not their first language must demonstrate English proficiency as described in the policy.

Degree- and Certificate-Seeking Admission
Students who apply to a graduate degree or certificate program may be offered admission with a status of regular or provisional. In some circumstances, students may be offered regular admission and also be required to complete mandatory English Language Training alongside the academic degree program.

Degree-seeking graduate students who wish to pursue a certificate within their own department do not need to apply separately for admission to the certificate program unless the department requires a separate application. Degree-seeking graduate students who wish to pursue a certificate outside of their home department must apply to the certificate program. Degree-seeking graduate students must be in good standing in their degree program in order to be admitted to a certificate program, whether in the same or a different department.

If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree-seeking students, applicable courses taken for the graduate certificate program may be counted toward the degree with the approval of the degree-granting program. While the courses comprising a graduate certificate may be used as evidence in support of a student's application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program.

Regular Admission
Regular admission requires evidence* of a bachelor's degree from a regionally-accredited university or from a foreign university with substantially equivalent bachelor's, master's, or doctoral degree requirements. The bachelor's degree is not acceptable if it contains credit awarded for work experience that was not directly supervised by faculty members (e.g. life experience) or if the work was not evaluated in units that identify the academic content (e.g., if the work was graded on a P/F or S/U basis). In exceptional cases, persons not holding bachelor's degrees may be admitted if they are academically well prepared. In these cases, the Dean of Graduate Studies reviews the student's academic background before the student is admitted.

Except as otherwise provided by university policies, applicants must demonstrate a grade-point average (GPA) of at least a 3.0 (on a 4.0 scale) in a completed* degree program at KU, at another regionally-accredited institution, or at a foreign university with substantially equivalent bachelor's, master's, or doctoral degree requirements. For more information about what constitutes evidence of a completed bachelor's degree and about procedures used to provide and evaluate transcripts, see the procedures governing Graduate Admission (https://graduate.ku.edu/non-degree-seeking/).

*Students may be admitted based on their cumulative GPA in the last term of an active degree program, but these students must provide evidence of a completed bachelor's degree (as described above) before they will be allowed to enroll in a second term of graduate study at KU.

Provisional Admission
Applicants who meet the minimum bachelor's degree requirement outlined above, but who have one or more deficiencies in grade-point average, prerequisite course work, or other areas as determined by the department or program, but who meet all other admission standards, may be admitted on a provisional basis. Students granted provisional admission shall not be considered in academic good standing until the department and graduate division recognize that the student has met the requirements for regular admission as described below.

If an applicant is admitted provisionally, it is expected that the student's department and the student's school or College will review the student's progress immediately following the first semester of graduate study. This review will determine whether the student has met the requirements for regular admission.

If the student meets the requirements for regular admission, the department or program in which the student is enrolled will request that Graduate Studies move the student from provisional to regular status. If the student does not meet the requirements for regular admission by the time of review, the student may be continued on provisional status or dismissed immediately.

A student with provisional status may be dismissed at the conclusion of any semester if the student fails to earn a 3.0 GPA or to meet other requirements for regular admission. If, after the first semester, provisional continuation is recommended by the department or program and approved by the graduate division, the student may remain on provisional status until the student meets the requirements for regular admission.

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the graduate division of the school or College that will accept the student. The Dean of Graduate Studies must review the petition to determine final action.

Achieving good academic standing in a degree- or certificate-seeking program at KU demonstrates evidence of preparedness for graduate study. Therefore, a graduate student who was originally admitted provisionally on the basis of an undergraduate GPA below 3.0, but who maintains good academic standing in the graduate program, may be granted regular admission to subsequent degree or certificate programs at the department's discretion, even when the first graduate program is not yet complete. Students who were originally granted provisional admission to a KU graduate program and subsequently discontinued their graduate program while in good academic standing may be granted regular admission to a later degree or certificate program at the admitting program's discretion.

Non-Degree-Seeking Admission
A non-degree-seeking applicant applies to a specific department, program, professional school, or the College for admission as a non-degree-seeking student. A non-degree-seeking applicant must fulfill the English proficiency requirements for admission to graduate study at KU (http://documents.ku.edu/policies/Graduate_Studies/EnglishProficiencyIntlStudents.htm?num1.5/) and must provide evidence* of a bachelor's degree from a regionally-accredited university or from a foreign university with substantially equivalent bachelor's, master's, or doctoral degree requirements. A bachelor's degree that contains credit
awarded for work experience that was not directly supervised by faculty members (e.g., life experience) or work which was not evaluated in units that identify the academic content (e.g., if the work was graded on a P/F or an S/U basis) may be acceptable for non-degree-seeking admission. In exceptional cases, persons not holding bachelor's degrees may be admitted if they are academically well prepared. In these cases, the Dean of Graduate Studies reviews the student's academic background before the student is admitted.

A non-degree-seeking applicant is not required to meet the other requirements for regular admission.

Non-degree-seeking admission is not intended to bypass regular admission into a graduate certificate or degree program. However, if a non-degree-seeking student later applies for admission and is accepted as a regular degree- or certificate-seeking student, the student may transfer up to nine (9) credit hours earned as a non-degree-seeking student toward a graduate certificate or degree, or up to six (6) credit hours in the case of a nine-hour certificate. Students who withdraw from a degree program and subsequently seek admission to a certificate program are subject to these same transfer limits (i.e., nine (9) credit hours, or six (6) toward a nine-hour certificate). For more information, see the procedures governing Graduate Admission (http://graduate.ku.edu/non-degree-seeking/).

* Non-degree-seeking students may not be admitted without proof of a completed bachelor's degree. For more information about what constitutes a completed bachelor's degree and about procedures used to provide and evaluate transcripts, see the procedures governing Graduate Admission (https://graduate.ku.edu/non-degree-seeking/).

Easy Admit

An applicant to graduate study who wishes only to attend institutes or workshops that require graduate admitted status may be admitted under the easy admit process. This process allows any person, with evidence of a bachelor's degree from an accredited institution, to take one course per semester without needing to meet the additional requirements of provisional admission.

The easy admit process is limited to certain Lawrence-campus programs that tend to have a high volume of applicants who enroll in institutes or workshops for continuing education purposes. An applicant should verify that the easy admit option is available for the course in which the student is interested before pursuing this option.

Offers of Admission

Offers of admission are valid for one year from the term of admission, as long as the admitting program approves deferral to a future term. If individuals offered admission are not in attendance at the University of Kansas after one year from the term of admission, all application materials are destroyed and the admission is rescinded. If this occurs, the prospective graduate student must submit a new application, application fee, official transcripts, and other required materials. Previous acceptance into a graduate program does not guarantee an admission offer for a future application.

Application Fees

Nonrefundable application fees payable to the University of Kansas are required. Rates are subject to change. Some departments and programs require deposits from admitted students to be fully credited against required fees upon enrollment.

| Degree-seeking domestic application | $65 |
| Degree-seeking international application | $85 |
| Certificate seeking application | $30 |
| Non-degree-seeking application (domestic and international) | $30 |
| Reenrollment application | $20 |
| Easy Admit | $10 |

View the current Lawrence and Edwards Campus application fees (https://documents.ku.edu/policies/Graduate_Studies/ApplicationFeesGraduate.htm).

English Proficiency Requirements for Admission to Graduate Study

The following are acceptable means for verifying English proficiency for purposes of admitting international applicants and domestic applicants who are non-native English speakers:

- Graduation with a baccalaureate degree (or higher) earned in residence from an accredited English-medium U.S. college or university or a college or university in the United Kingdom, Australia, New Zealand, Ireland, English-speaking province of Canada, or an English-speaking Caribbean country, with instruction conducted in English. Degrees earned online may not be used to verify English proficiency.

- Official scores from an English proficiency standardized test (e.g., TOEFL, IELTS-Academic, or PTE), sent by the testing agency to the University of Kansas. Official scores must be less than two years old.

- In exceptional cases, a department, with written support from the appropriate School or College, may petition the Dean of Graduate Studies to consider alternative documentation of English proficiency. In consultation with the Director of the Applied English Center, the Dean of Graduate Studies will determine whether the alternative documentation demonstrates English proficiency at the level expected for regular admission to graduate study at KU.

Note: Graduate Teaching Assistants (GTAs) have additional English proficiency requirements indicated in the policy on Spoken English Language Competency of Faculty and Graduate Teaching Assistants (http://policy.ku.edu/KBOR/spoken-english-competency-BOR-policy/).

Regular Admission Minima for Campus-Based Programs*

| TOEFL (paper) | All part scores at least 53 |
| TOEFL (iBT) | Reading, Listening, and Writing part scores at least 20 |
| IELTS-Academic | Minimum overall score 6.0 with no part score below 5.5 |
| PTE | Minimum overall score 55 with no part score below 50 |

<td>Overall score below 43 or any part score below 36</td>
</tr>
</tbody>
</table>

* The Applied English Center (AEC) maintains a check-in process for international students and non-native speakers of English. This process serves to confirm each student’s level of English proficiency and determine whether English courses will be included as a requirement of the student’s academic program. In order to graduate, students who are required to complete AEC courses must meet KU’s English proficiency standards as demonstrated by their performance in AEC coursework and evaluations.

- Students who demonstrate English proficiency at the waiver level or who have earned a degree from one of the specified English-speaking countries listed above are not required to check in at the AEC.
- All other non-native speakers of English who gain admission to campus-based programs are required to check in at the AEC upon arrival on campus.

## Transcripts

Applications must be accompanied by one copy of official transcripts from the institution where the applicant earned the bachelor’s degree (or equivalent). This official transcript will be used to verify the completion (or intended completion) of a baccalaureate degree (or equivalent).

If the applicant has completed any graduate work, official transcripts from the graduate institution(s) must be included as well. Letters of recommendation and test scores may also be required. Applicants should check with the program(s) to which they are applying for more information.

In order to be considered official, transcripts and test scores must be sent through secure means (e.g., a sealed envelope, electronic transmission) directly from the degree-granting institution or testing service to the University of Kansas. Transcripts and test scores provided through unofficial means will not be considered to be official documents for the purpose of admission.
Degrees

Degrees are awarded three times each year, in August, December, and May. Degrees for each academic year are conferred formally at the annual commencement ceremony in May. Degree candidates are not eligible to graduate if the graduate grade-point average (GPA) is lower than 3.0 in all courses acceptable for graduate credit.

Doctoral candidates who have fulfilled all of their degree requirements by the deadline dates for graduation in August 2018, December 2018, and May 2019 are allowed to participate in the May 2019 doctoral hooding ceremony. In addition, doctoral candidates who expect to complete all of their degree requirements by the deadline date for graduation in August 2019 may elect to participate in the May 2019 doctoral hooding ceremony. Summer 2019 graduates should contact the Office of Graduate Studies early in the spring 2019 semester in order to participate in hooding.

Students who are working toward two degrees must complete the requirements for each degree. Course work may not count toward fulfilling degree requirements for more than one degree.

Graduate students may not be awarded an additional KU degree with the same name and degree code as a previously awarded degree from KU. This applies to the completion of different degree tracks, concentrations, and subspecialties within a given degree. This does not prohibit students from earning additional master's or doctoral degrees in another discipline.

View the current list of all master's and doctoral degrees on the Graduate Academics page (http://www.graduate.ku.edu/find-graduate-program/). View the current Lawrence and Edwards Campus policy on graduate degrees (http://policy.ku.edu/graduate-studies/degrees/).

Master's Degree Programs

KU grants traditional Master of Arts and Master of Science degrees, as well as professional master's degrees that have developed out of these traditional arts and science degrees. A Master of Arts or a Master of Science degree requires at least one year of graduate work or its equivalent. Stated in terms of hours of credit, the standard master's program requires 30 hours though some degrees, especially in professional areas, may require as many as 36 or 40 or more. With permission from the department (or in the case of interdepartmental programs, permission from the joint program committee) and of the Graduate Division, it is sometimes possible to complete a 30-hour master's degree with as few as 24 hours if the student enters the program especially well prepared and maintains a superior GPA. Work for a master's degree is concentrated in the major area, with only a minimal amount of work (usually no more than 6 credit hours) that is completed at KU permitted outside the major department. Each master's program must contain a research component, represented either by a thesis (usually for 6 hours of credit) or by an equivalent enrollment in research, independent investigation, or seminars. Within these requirements and well-founded practices, departmental master's programs may be flexible enough to meet the particular needs of individual students. View the current Lawrence and Edwards Campus policy on master's degrees (http://policy.ku.edu/graduate-studies/ma-ms-degrees/).

Master of Arts and Master of Science

Historically, most of the master's degrees granted at KU have been the Master of Arts and Master of Science degrees. This fact conforms to the traditional liberal arts background out of which most U.S. graduate schools developed.

Professional Master’s Degrees

KU grants a number of professional master’s degrees, most of which are offered through the professional schools. Students should consult the appropriate college or school section of the online catalog for detailed descriptions of professional master’s programs.

Specialist in Education

The degree of Specialist in Education (http://catalog.dept.ku.edu/201314/schools/educ/departments/pre/programs/eds/requirements/) is offered through the School of Education and may be earned as a concentration on the basis of two years of graduate work (which can include an appropriate master’s degree or equivalent). Information on this degree, including the concentration in which it may be earned, can be found in the School of Education section of the online catalog.

Jointly Administered Degrees

In a few cases, a degree is offered through two schools and administered by a joint committee from the two faculties. The master of arts degree in Speech-Language Pathology and the master of arts degree in Audiology are administered by an intercampus committee drawn from the Department of Speech-Language-Hearing: Sciences and Disorders in Lawrence and from the Department of Hearing and Speech of the School of Health Professions in Kansas City.

Master’s Degree Requirements

This section of the online catalog, maintained by the Office of Graduate Studies, provides general and common requirements for master's degrees at the University of Kansas. Specific requirements for each individual degree program are outlined in the catalog section maintained by the school or college offering that degree.

Master’s Enrollment Requirements

All graduate students enrolled in master’s programs must be enrolled the semester they complete master’s degree requirements. Master’s students who complete degree requirements during the first week of summer session or within the first two weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester.

View the current Lawrence and Edwards Campus policy on master’s enrollment requirements (http://policy.ku.edu/graduate-studies/ma-enrollment-requirements/).

Master’s Program Time Constraints

Normal expectations are that most master's degrees (excluding some professional terminal degrees) should be completed in two years of full-time study. However, master's degree students are allowed seven years for completion of all degree requirements.

In cases in which compelling reasons or circumstances recommend a one-year extension, the Graduate Division, on recommendation of the department/committee, has authority to grant the extension. In cases where more than eight years are requested, the appropriate appeals body of the school considers petitions for further extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant them.

Some departments may have more stringent rulings about time restrictions. Students should ask about the policy in effect in the department in which they plan to study. View the current Lawrence and
Master's Final Examinations

A final general examination or defense of the thesis or culminating master’s project in the major subject is required of all candidates for the Master of Arts or Master of Science. The degree program and the Graduate Division should ascertain that the graduate student is in good academic standing (3.0 or higher grade-point average) before scheduling the final general examination or thesis defense.

At the option of the department, the examination may be oral or written, or partly oral and partly written. In some departments, passing a written examination is a necessary preliminary to taking the oral examination by which success or failure is judged.

Master’s examinations are administered by a committee of at least three members of the Graduate Faculty. Exam attendance is governed by the Graduate Student Oral Exam Attendance (http://policy.ku.edu/graduate-studies/oral-exam-attendance/) policy.

The examination is held during the semester of the student’s final enrollment in course work. The thesis defense should be held when the thesis has been substantially completed.

The department’s request to schedule the general examination must be made on or before the date set by the Graduate Division, normally a minimum of two weeks before the examination date.

Students earning a master’s thesis degree must have completed at least one hour of thesis enrollment before the master’s degree may be awarded. See the Graduate Studies website (http://www.graduate.ku.edu/electronic-thesis-and-dissertation/) for information and requirements related to submitting the thesis electronically.

View the current Lawrence and Edwards Campus policy on master's final examinations (http://policy.ku.edu/graduate-studies/masters-final-exams/).

Master’s Student Oral Exam Committee Composition

When the master’s student final examination is partly or entirely oral (i.e., thesis defense), the oral portion of the examination must be conducted by a committee which meets the following conditions.

1. Master’s committees are composed of at least three voting members.
2. The majority of committee members serving on a master’s student oral examination committee must be tenured/tenure-track faculty holding regular or dissertation graduate faculty status in the candidate’s department/program of study. Tenured/tenure-track faculty who are appointed as courtesy faculty within the program/department are considered (for the purposes of committee composition) to be faculty of that program/department.
3. Beyond the majority requirement, additional members may hold any graduate faculty status, including regular, dissertation, or special status. This third member can be, but need not be, a member of the candidate’s department/program.
4. For approved professional master’s degree programs, the committee may be composed as described above, or any number of the committee members may be professors of the practice, clinical faculty, or research faculty in the department/program. For the approved professional master’s degree programs, the committee chair can hold any graduate faculty status.

As long as the conditions above are met, the committee may include more than three members.

The master’s committee chair must hold regular or dissertation status. While master’s committees are not required to have a co-chair, the student or the committee members may decide to select a co-chair. The co-chair can hold any graduate faculty status.

Substitutions of the committee chair (and/or co-chair) are prohibited after the committee has been approved by the Graduate Division of the school or college. If a committee chair (and/or co-chair) needs to be replaced, the revised committee must be approved by the Graduate Division of the school or college in advance of the exam.

Substitutions of the committee members are permitted as long as the new members hold regular or dissertation graduate faculty status. Special members can be added after the committee has been approved by the Graduate Division of the school or college, but these additions must be approved by the Graduate Division of the school or college in advance of the exam.

Committee Composition for Approved Professional Degree Programs

The following master’s programs are approved to utilize professors of the practice, clinical faculty, and/or research faculty to compose committees, as outlined elsewhere in this page:

- Master of Science in Engineering Management
- Master of Arts in Speech-Language Pathology
- Master of Science in Geology
- Master of Construction Management
- Master of Civil Engineering
- Master of Science in Civil Engineering
- Master of Science in Architectural Engineering

View the current Lawrence and Edwards Campus policy on Master’s Student Oral Exam Committee Composition (https://policy.ku.edu/graduate-studies/masters-oral-exam-committee-composition/).

Master's Thesis Submission

When the master’s candidate has passed the final oral examination and the members of the committee have signed the thesis, a title page and acceptance page with original signatures must be delivered to the Graduate Division of the school in which the student’s program resides so that completion of degree requirements may be officially certified.

As a requirement of graduation, the candidate must publish the thesis electronically and pay all applicable fees. Learn more about the electronic submission and publication process here (http://www.graduate.ku.edu/electronic-thesis-and-dissertation/).

Theses will be made available through UMI/Proquest and KU ScholarWorks, unless there is an embargo in place or special circumstances pertain as outlined in the KU Embargo policy (http://policy.ku.edu/graduate-studies/embargo-policy/).

The student must be the author of the thesis, and every publication from it must indicate that authorship. Practices vary among disciplines — and even among scholars in a given field — as to whether the mentor’s name may appear as a co-author, and whether as senior or junior co-
author, on subsequent publication of the thesis (usually revised), or on articles prepared from it. It is expected that clear understandings in individual cases will be established during the apprenticeship period, when ethical practices in publication are addressed within the professional development training of the program.

Students from the following program are permitted to request a permanent embargo of their thesis: Master of Fine Arts (MFA) in Creative Writing offered by the Department of English. View the current Lawrence and Edwards Campus policy on master's thesis submission (http://policy.ku.edu/graduate-studies/ma-thesis/).

**Doctoral Degree Programs**

KU offers the following doctoral degrees:

- Doctor of Philosophy (Ph.D.),
- Doctor of Audiology (Au.D.),
- Doctor of Education (Ed.D.),
- Doctor of Engineering (D.E.), and
- Doctor of Musical Arts (D.M.A.)

The programs offering these degrees are administered by the schools and colleges through their departments and graduate divisions, from admission through final recommendation for degree award.

This section of the catalog provides succinct, general descriptions of each of these five doctoral degrees in order to facilitate convenient comparison of the degrees. It also lists regulations common to the administration of all doctoral programs. The particular application, interpretation, or method of implementation of these common elements is, in certain cases, left to the faculty of each department or degree program (e.g., Research Skills). Detailed information about requirements for each degree, as it is offered in a specific discipline, should be obtained from the appropriate college, school, or department listing in the online catalog. The requirements there are in addition to the general requirements listed here.

The School of Law (http://catalog.ku.edu/law/) offers the Juris Doctor (J.D.) and Doctor of Juridical Science (S.J.D.) degrees.

The School of Medicine (http://catalog.ku.edu/medicine-doctorate/) offers the Doctor of Medicine (M.D.) degree. The KU Medical Center campus (http://catalog.ku.edu/graduate-studies/kumc/#programstext) offers additional doctoral degrees, such as the Clinical Doctorate in Speech-Language Pathology (S.L.P.D.), the Doctor of Nursing Practice (D.N.P.), the Doctor of Occupational Therapy (O.T.D.), and the Doctor of Physical Therapy (D.P.T.).

**Doctor of Philosophy**

The degree of Doctor of Philosophy (Ph.D.) is the highest degree offered by the university. It is awarded for mastering a field of scholarship, for learning the methods of investigation appropriate to that field, and for completing a substantial piece of original research. In addition to preparing research specialists, the process of earning a Ph.D. shares certain goals with liberal education:

- putting order into human experience;
- fostering a love of learning for its own sake;
- instilling respect for human values;
- integrating various human powers into a process of creation; and
- making vital, in many fields at least, a sense of history.

Although the courses and research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The Ph.D. aspirant is expected to be a well-educated person with a broad base of general knowledge, not only as preparation for more advanced work but also as a means of knowing how the chosen specialty is related to other fields of human thought.

To give depth and breadth to their doctoral programs, many departments require some work in a minor field or at least an articulated selection of extra-departmental courses. Because of the diversity of the fields in which the Ph.D. is offered, and the variety of needs and interests of individual students, the degree does not have a specific requirement for a minor. However, the Ph.D. aspirant is encouraged to plan an integrated program, under departmental direction, that includes courses outside the major field.

View the current Lawrence and Edwards Campus policy on the Doctor of Philosophy degree. (https://documents.ku.edu/policies/Graduate_Studies/docophilosophy.htm)

**Other Doctoral Degrees**

**Doctor of Audiology**

The Doctor of Audiology (Au.D.) degree program prepares the student to enter clinical practice as an audiologist. Offered by the KU School of Health Professions, the program produces professionals skilled in providing diagnostic, rehabilitative, and related services in the fields of sound, balance, and hearing sciences. There is an emphasis on the clinical learning experience, although research is also a significant component of the program. A baccalaureate degree is required for admission. Degree requirements are listed under Communicative Disorders: Intercampus Program (http://catalog.ku.edu/health-professions/audiology-speech-language-pathology/) in the online catalog.

**Doctor of Education**

The degree of Doctor of Education (Ed.D.) is a professional degree designed primarily for practitioners in the field of education. Applicants must present evidence of successful experience in professional education. While many of the requirements for the degree closely parallel those for the Ph.D., the degree program—particularly the dissertation—focuses on research concerned with application of existing knowledge rather than on basic research. Specific degree requirements are listed in the School of Education (http://catalog.ku.edu/education/) section of the online catalog.

**Doctor of Engineering**

The degree of Doctor of Engineering (D.E.) is directed toward the practice of engineering and includes the entire process of technology from planning to product. Candidates for the degree are intimately associated throughout their tenure with technology project teams, generally composed of master’s degree candidates and undergraduates. Specific degree requirements are listed in the School of Engineering (p. 423) section of the online catalog.

**Doctor of Musical Arts**

The degree of Doctor of Musical Arts (D.M.A.) is intended as recognition of high professional attainment. Since only exceptionally well-qualified candidates are admitted to the program, students are expected to devote their doctoral studies primarily to developing professional qualifications for teaching at the college level. The degree of Doctor of Musical Arts is offered in the specific fields of bassoon; church music (organ or choral conducting emphasis); clarinet; composition; conducting (band,
Doctoral Degree Requirements

In most programs, doctoral education is divided into two phases. Upon admission to a doctoral program, the student is known as an aspirant for the degree and remains so designated until successful completion of the comprehensive oral examination. After passing that examination, the student is designated a candidate for the degree until successful defense and submission of the finished dissertation.

When a department or program requests its Graduate Division to schedule a comprehensive oral examination or a final oral examination for a student, it must report on the student’s completion of both the general requirements and the specific requirements of the degree program, department, and school. The degree program and Graduate Division should ascertain that the graduate student is in good academic standing (3.0 or higher grade-point average) before scheduling a comprehensive oral examination or a final oral examination.

Doctoral students completing all their degree requirements within the first week of summer session or within the first two weeks of the fall or spring semester are not required to be enrolled for that term. View the current Lawrence and Edwards Campus policy on enrollment at KU.

As outlined in USRR 2.2.7.6, no course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

Research Skills and Responsible Scholarship

All doctoral students must meet the Research Skills requirement before proceeding to comprehensive exams. The requirement must include at least two components:

1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.
2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).

Procedure

For both of these requirements, it is the responsibility of the department to report when the student completed the requirement and how the requirement was met via the Progress-to-Degree form. Meeting this requirement is determined by the program or department according to the department’s approved research skills requirement plan.

All doctoral programs must have a research skills requirement plan approved by the school or college and the Office of Graduate Studies.

As outlined in USRR 2.2.7.6, no course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

View the current Lawrence and Edwards Campus policy on doctoral research skills and responsible scholarship.

Comprehensive Oral Examination

When a doctoral aspirant has completed the major portion of the course work at a level satisfactory to the graduate degree program and school and has met all other program, school, and general requirements prerequisite to the comprehensive oral examination, including the research skills requirement as appropriately applied and established for the student’s particular program, the degree program must request that the Graduate Division of its school or college schedule the comprehensive oral examination. The examination may be scheduled provided that at least 5 months have elapsed from the time of the aspirant’s first enrollment at KU. Before scheduling the examination, it should be determined that the student is in good academic standing (3.0 or higher grade-point average). The examination request must be submitted in advance of the examination date by at least the period specified by the graduate division, normally a minimum of two weeks. The Graduate Division ascerts whether all pertinent requirements have been satisfied and whether reports of any previously scheduled comprehensive oral examinations have been properly submitted and recorded.

The committee for the comprehensive oral examination must consist of at least five members, all of whom must be members of the Graduate Faculty. Its members are appointed by the Graduate Division of the school or college on the basis of nominations submitted by the graduate degree program. At least one member must be from a department other than the aspirant’s major department. This member represents Graduate Studies and must be a regular member of the Graduate Faculty. The Graduate Studies representative is a voting member of the committee and has full right to participate in the examination. In the case of any unsatisfactory or irregular aspects of the exam or violation of Graduate Studies policy, the Graduate Studies representative shall provide a written report to the Dean of Graduate Studies for consideration of further action.

The comprehensive oral examination covers the major field and any extra departmental work for which the program wishes to hold the aspirant responsible. For every scheduled examination, the degree program reports a grade of Honors, Satisfactory, or Unsatisfactory. If the aspirant receives a grade of Unsatisfactory on the comprehensive oral examination, it may be repeated on the recommendation of the degree program, but under no circumstances may it be taken more than three times. In any case, departments, schools, and the College will determine appropriate minimum intervals between attempts.

Doctoral Candidacy

Dissertation Committee

Upon passing the comprehensive oral examination, the aspirant becomes a candidate for the doctorate. If it has not begun before, the traditional, close student-mentor apprenticeship relationship comes into being. The student is expected to learn by both precept and example of the mentor and, often, in collaboration. The chosen field of scholarship is explored using acquired research tools. The principles and customs of academic inquiry and the codes of ethics traditional to the various disciplines and professional fields become part of the student’s thinking and working.

When the student passes the comprehensive oral examination, the Graduate Division of the appropriate school designates the candidate’s dissertation committee based on the recommendations of the candidate’s major department. The dissertation committee must consist of at least five members and may include members from other departments and divisions or, on occasion, members from outside the university.

All members of the committee must be chosen from the Graduate Faculty and, in addition, the committee chair must be authorized to chair
doctoral dissertations. (In other words, the committee chair must hold dissertation status (https://documents.ku.edu/policies/Graduate_Studies/gradfacdissertationstatus.htm) on the Graduate Faculty.) A prospective member of the committee from outside the university must have gained appointment as a Special (https://documents.ku.edu/policies/Graduate_Studies/gradfacspecialmemberstatus.htm) member of the Graduate Faculty before appointment to the committee.

**Post-Comprehensive Enrollment**

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled each fall and spring semester in one or more hours of dissertation or programatically-equivalent coursework (for example, document hours for DMA students) that both moves the student towards degree completion and reflects, as accurately as possible, the candidate's demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours each semester.

Post-comprehensive enrollment may include enrollment during the semester or summer session in which the comprehensive oral examination has been passed. If after 18 hours of post-comprehensive enrollment the degree is not completed, the candidate must continue to enroll each semester until all degree requirements have been met. The number of hours of each enrollment must be determined by the candidate’s advisor and must reflect, as accurately as possible, the candidate's demands on faculty time and university facilities.

View the current Lawrence and Edwards Campus policy on doctoral candidacy (http://policy.ku.edu/graduate-studies/doctoral-candidacy/) are listed in the KU Policy Library.

**Doctoral Dissertation**

The doctoral candidate must present a dissertation showing the planning, conduct, and results of original research and/or scholarly creativity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities and to demonstrate an intensive focus on a problem or research area. The dissertation itself should be an evident product of the candidate’s growth and attainment of the ability to identify significant problems; organize, analyze, and communicate scholarly results; and bring to bear on an area of scholarly or scientific interest a variety of research skills and scholarly or creative processes. The dissertation must show some original accomplishment, but it should also demonstrate without doubt the candidate's potential to make future contributions to knowledge and understanding.

The dissertation is to be a coherent scholarly work, not a collage of separate, distinct pieces. Its unity of theme and treatment may still accommodate several subtopics by demonstrating their relationships and interactions. If previously published material by other authors is included in the dissertation, it must be quoted and documented. Final acceptance of the dissertation is subject to the approval of the dissertation committee. It should be noted that prior publication does not guarantee acceptance of the dissertation by the dissertation committee. The dissertation—or one or more substantial portions of it, often rewritten—is expected to be publishable and, indeed, to be published.

Both the dissertation research and the dissertation itself are to be completed under the guidance and direction of the committee appointed as described in the Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/) policy. Instructions about the proper form of the dissertation may be obtained from the KU Graduate Studies website (http://www.graduate.ku.edu/formatting/), or from the Graduate Division of each school or college. Candidates and faculty members are reminded that the dissertation is to be a coherent, logically-organized, scholarly document. Because the demands and practices of different disciplines are varied, the format is somewhat flexibly described, and moderate departures from the norm are allowed when justified by the nature of the work or the circumstances of presentation. Any substantial divergences must be approved in advance as prescribed by the instructions and candidates and faculty members are urged to seek early approval to avoid last-minute disappointments over unacceptable format or reproduction.

View the current Lawrence and Edwards Campus policy on doctoral dissertations (http://policy.ku.edu/graduate-studies/doctoral-dissertation/).

**Final Oral Examination**

Completion of the dissertation is the final academic phase of a doctoral program, culminating in the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the dissertation is followed promptly by the final oral examination. When the completed dissertation, in final draft form, has been accepted by the committee and all other degree requirements have been satisfied, the chair of the committee requests that the Graduate Division schedule the final oral examination. This request must be made in advance of the desired examination by at least the period specified by the Graduate Division (normally three weeks). Upon receipt of a request to schedule a final oral examination, the Graduate Division ascertain whether all other degree requirements have been met and whether reports of any previously scheduled final oral examinations have been submitted and recorded. Upon approval of the request, the final oral examination is scheduled at the time and place designated by the Graduate Division. The final oral examination may be held no earlier than 1 month after the successful completion of the comprehensive oral examination.

Departments, programs, schools, or the College may require a longer minimum interval between the oral comprehensive exam and the final dissertation defense.

Doctoral dissertation defenses are considered public events. Therefore, the submission of a request to schedule a final oral examination must allow sufficient time to publicize the examination so that interested members of the university community may attend. Exam date and location information must be published in a news medium as prescribed by the Graduate Faculty. Interested members of the university community are encouraged to attend these examinations.

As described in the Doctoral Student Oral Exam committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/) policy, the committee for the final oral examination must consist of at least 5 members. These include members of the dissertation committee plus other members of the Graduate Faculty as recommended by the committee chair and the department and as appointed by the Graduate Division. At least 1 member must be from a department other than the major department. This member represents the Graduate Studies and must be a regular member of the Graduate Faculty. Before the examination, the Graduate Division provides a list of responsibilities to the Graduate Studies representative. The Graduate Studies representative is a voting member of the committee and has full right to participate in the examination. In the case of any unsatisfactory or irregular aspects of the exam or violation of Graduate
Studies policy, the Graduate Studies representative shall provide a written report to the Dean of Graduate Studies for consideration of further action.

For every scheduled final oral examination, the department reports to the Graduate Division a grade of Honors, Satisfactory, or Unsatisfactory for the candidate’s performance. If an Unsatisfactory grade is reported, the candidate may be allowed to repeat the examination on the recommendation of the department.

View the current Lawrence and Edwards Campus policy on doctoral final oral examinations (http://policy.ku.edu/graduate-studies/final-oral-exams/).

Dissertation Submission and Publication

When the candidate has passed the final oral examination and the members of the dissertation committee have signed the dissertation, a title page and acceptance page with original signatures are to be delivered to the Graduate Division of the school or college in which the student’s program resides so that completion of degree requirements may be officially certified. As a requirement of graduation, the candidate must arrange for electronic publication of the dissertation and payment of all applicable fees. Information about the electronic submission and publication process is found on the KU Graduate Studies website (http://www.graduate.ku.edu/formatting/).

Dissertations will be made available through UMI/ProQuest and KU ScholarWorks, unless there is an embargo in place or special circumstances pertain as outlined in the KU Embargo policy (http://policy.ku.edu/graduate-studies/embargo-policy/).

The student must be the author of the dissertation, and every publication deriving from it must indicate that authorship. Practices vary among disciplines — and even among scholars in a given field — as to whether the mentor’s name may appear as a co-author, and whether as senior or junior co-author, on subsequent publication of the dissertation (usually revised), or on articles prepared from it. It is expected that clear understandings in individual cases will be established during the apprenticeship period, when ethical practices in publication are addressed within the professional development training of the program.

Students pursuing a PhD in English: Literature and Creative Writing track are allowed to request a permanent embargo of their dissertation. View the current Lawrence and Edwards Campus policy (http://policy.ku.edu/graduate-studies/embargo-policy/).

Doctoral Program Time Constraints

Overall Time to Degree

Minimum Tenure

The student must spend 3 full academic years, or the bona fide equivalent thereof, in resident study at this or some other approved university, including the time spent in attaining the master’s degree. Resident study at less than full time requires a correspondingly longer period, but the requirement is not measured merely in hours of enrollment. Because a minimum number of hours for the degree is not prescribed, no transfer of credit is appropriate. However, doctoral degree programs take relevant prior graduate work into consideration in setting up programs of study leading to the doctorate.

Maximum Tenure

After being admitted to doctoral programs at KU, students must complete all degree requirements in 8 years. In cases in which compelling circumstances recommend a 1-year extension, the Graduate Division has authority to grant the extension on the written advice of the department and dissertation committee. Students who complete the master’s degree at KU and subsequently begin doctoral studies have a maximum total enrolled time of 10 years to complete both degrees. Normal expectations, however, are that most master’s degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study, and both master’s and doctorate degrees in 6 years of full-time study. Some graduate degree programs may have more stringent time restrictions. Students should inquire about the policy in effect in the department in which they plan to study.

During any phase of doctoral education, a student in any of the above categories may petition the Graduate Division, through the department, for a leave of absence to pursue full-time professional activities related to the doctoral program and long-range professional goals. Leaves of absence also may be granted because of illness or other emergency. Ordinarily a leave of absence is granted for 1 year, with the possibility of extension upon request. After an absence of 5 years, however, a doctoral aspirant or candidate loses status as such and must apply for readmission to the program and the Graduate Division. Please see the Leave of Absence (https://documents.ku.edu/policies/Graduate_Studies/leaveofabsence.htm?num2.6/) policy for more information.

View the current Lawrence and Edwards Campus policies on doctoral program time constraints (http://policy.ku.edu/graduate-studies/doctoral-program-time-contraints/).

Residence Requirement

2 semesters, which may include 1 summer session, must be spent in resident study at KU. During this period, the student must be involved full time in academic or professional pursuits, which may include an appointment for teaching or research if it is directed specifically toward degree objectives. Enrollment in approved distance-learning courses offered through KU cannot be used to meet the doctoral residence requirement. The student must be enrolled in a minimum of 6 credit hours a semester, and the increased research involvement must be fully supported and documented by the dissertation supervisor as contributing to the student’s dissertation or program objectives. Research must be performed under the direct supervision of the major advisor if on campus, or with adequate liaison if off campus.

Note: These are minimum residence requirements. Students should check with the Graduate Division of their school or college for additional requirements.

Doctoral Comprehensive Exam Time Constraints

Under normal circumstances, the doctoral candidacy period between passage of the oral comprehensive examination and the final dissertation defense must last no longer than 5 years. If a student took the oral comprehensive examination more than 5 years prior to the dissertation defense, a re-evaluation of the student’s candidacy status is necessary. Re-evaluation of the student’s candidacy status can include retaking the comprehensive oral examination.

View the current Lawrence and Edwards Campus policy on doctoral comprehensive oral examinations (http://policy.ku.edu/graduate-studies/doctoral-oral-exams/).
Doctoral Examinations

Doctoral Student Oral Exam Committee Composition

Doctoral student oral examinations include the doctoral comprehensive oral exam and the doctoral final oral exam (i.e., dissertation defense) and must adhere to the following requirements:

1. Doctoral committees are composed of at least 5 voting members;
2. The majority of committee members serving on a doctoral student oral examination committee must be tenured/tenure-track faculty holding Regular or Dissertation graduate faculty status in the candidate’s department/program of study. Tenured/tenure-track faculty who are appointed as courtesy faculty within the program/department are considered (for the purposes of committee composition) to be faculty of that program/department;
3. One member must meet the requirements for serving as the Graduate Studies representative. A faculty member from a different department with a courtesy appointment in the student’s department may serve as the Graduate Studies representative or in fulfillment of the committee majority, but cannot serve in both roles at the same time. (For more information on the Graduate Studies representative, see the policy listed in the Policy Library here (https://policy.ku.edu/graduate-studies/graduate-faculty-appointments/)); and
4. Beyond the majority requirement, the additional member may hold any graduate faculty status, including Regular, Dissertation, or Special status. This fifth member can be, but need not be, a member of the candidate’s department/program. For more information, see the policy on Graduate Faculty appointments (http://policy.ku.edu/graduate-studies/graduate-faculty-appointments/).

As long as the conditions above are met, the committee may include more than 5 members. Exam attendance is governed by the Graduate Student Oral Exam Attendance (http://policy.ku.edu/graduate-studies/oral-exam-attendance/) policy.

The doctoral committee chair must hold Dissertation status on the Graduate Faculty. While committees are not required to have a co-chair, the student or the committee members may decide to select a co-chair. The co-chair can hold any graduate faculty status.

Substitutions of the committee chair (and/or co-chair) are prohibited after the committee has been approved by the Graduate Division of the school or college. If a committee chair (and/or co-chair) needs to be replaced, the revised committee must be approved by the Graduate Division in advance of the exam.

Substitutions of the committee members are permitted as long as the new members hold Regular or Dissertation graduate faculty status. Special members can be added after the committee has been approved by the Graduate Division of the school/college, but these additions must be approved by the Graduate Division in advance of the exam.

View the current policy on Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/).

Graduate Studies Representative on Doctoral Exam Committees

The Graduate Studies representative must be a member of the Graduate Faculty with Regular or Dissertation status granted by a department other than the aspirant’s major department.

A faculty member from a different department who holds a courtesy appointment in the student’s department may serve as the Graduate Studies representative or in fulfillment of the committee majority pursuant to the Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/) policy, but cannot serve in both roles at the same time.

The role of the Graduate Studies representative is designed to assure the appropriate standard of fairness, professionalism, judgment, and skill are applied throughout the examination process for the benefit of the institution and in the best interest of the student. As an independent participant observer, this member should have no personal or professional duality or conflict of interest with other members of the committee or the student that would prevent the representative from the unbiased fulfillment of these responsibilities.

The Graduate Studies representative is a voting member of the committee and has full rights to participate in the examination. In the case of any unsatisfactory or irregular aspects of the exam or violation of Graduate Studies policy, the Graduate Studies representative shall provide a written report to the Dean of Graduate Studies for consideration of further action.

Before the examination, the Graduate Division should provide a list of responsibilities to the Graduate Studies representative. A list of these responsibilities is provided below. In addition, the Dean’s Letter to the Graduate Studies Representative (http://graduate.ku.edu/sites/graduate.ku.edu/files/docs/excon/Dean-letter-to-Graduate-Studies-Rep_COGAedits.pdf) is always available. The Graduate Studies representative should observe and report on whether:

1. The examination was conducted in compliance with the policies and by-laws of Graduate Studies and the program's Graduate Division.
2. The examination was held in a manner that was free and open to the public.
3. The representative was accorded full participatory rights in the examination.
4. The representative was accorded full voting rights as a member of the committee.
5. The examination was free from irregularities or unfairness to the student.
6. The examination was free from irregularities or unfairness among faculty members.
7. The examination, if repeated, occurred at least 90 days after the last unsuccessful attempt.

View the current policy concerning the Graduate Studies Representative on Doctoral Exam Committees (https://policy.ku.edu/graduate-studies/graduate-studies-representative-on-doctoral-exam-committees/).

Dual-Title Doctor of Philosophy Degrees

Definition

A dual-title Ph.D. is a single degree with significant scholarship in two fields. At the completion of a dual-title degree program, the graduate will
receive one diploma with two program names. Students enrolled in a dual-title degree program work concurrently in both areas of study.

Students are admitted initially into the major Ph.D. program. Upon being approved to pursue a dual-title Ph.D., students will be admitted into the dual-title Ph.D. program.

**Guidelines:**

Only existing programs approved to grant Doctor of Philosophy degrees may collaborate in creating a dual-title degree.

A dual-title degree is a single degree from KU. University-wide degree count reports will record a single Ph.D. in the major Ph.D. program discipline area. During the program proposal phase, doctoral programs must determine which program will be credited with the degree count. This department will also be responsible for reviewing the program during Board of Regents' program review cycle.

All program requirements for both areas must be met as determined by the faculty in each program. The governing structure for dual-title Ph.D. programs is overseen by the Directors of Graduate Study in each participating Ph.D. program. Dual-title Ph.D.s are conferred by the dean of the student’s major Ph.D. program.

A student applies for a dual-title degree only after being admitted and enrolled at KU. This is an internal application procedure for students already admitted and enrolled in an existing graduate doctoral program, as described below.

**Admissions Procedures and Plan of Study for Dual-Title Ph.D. Programs**

**Admissions Procedures for a Dual-Title Ph.D.**

1. The student applies and is admitted to the major Ph.D. program. The student must enroll in the major Ph.D. program for at least one semester and be in good academic standing before applying to the dual-title Ph.D. program.
2. The student may then apply and be admitted to the dual-title Ph.D. program. This is an internal application procedure for students already admitted and enrolled at KU.

**Plan of Study for Dual-Title Ph.D.**

1. The student completes coursework in the major Ph.D. program and any additional coursework in the dual-title Ph.D. program. In many cases, the dual-title field coursework is integrated with the disciplinary field coursework. For example, PSYC 691 (Psychology of Aging) might meet the requirements for the dual-title degree in Psychology and Gerontology.
2. The two participating Ph.D. programs of the dual-title program develop sections in their graduate student handbooks that outline the nature of the dual-title degree, stipulate the array of courses typically taken, and detail other structural and practical requirements of a dual-title degree.

Each participating program oversees its own dual-title students and signs off on a curricular plan for its own program.

3. Ideally, the student’s advisor is a member of the major Ph.D. program and the dual-title program. If this is not possible, the student must have a co-chair from each of the two fields. This ensures integration of the two areas in the coursework, examinations, and the dissertation.

4. The candidacy examination committee for the dual-title degree-seeking student must be composed of faculty from the major Ph.D. program as well as at least one faculty member from the dual-title Ph.D. program. The comprehensive exam requirements of both programs must be met.

5. The dissertation topic should integrate both fields and be defended before a committee of graduate faculty from both programs.

The dean of the school for the major Ph.D. program confers the dual-title degree. The student’s diploma carries the name of both programs; for example: Doctor of Philosophy in Psychology and Gerontology. One Classification of Instructional Programs (CIP) code is assigned for the dual title degree

**M.A., M.S., and Ph.D. with a Major in Interdisciplinary Studies**

Only superior students admitted and enrolled in a graduate program at KU whose proposed studies require direction not available in any single department are considered for admission to an Interdisciplinary Studies program. Before seeking acceptance, an applicant must assemble a graduate faculty advisory committee headed by a faculty member authorized to direct master’s research (for M.A. or M.S. in Interdisciplinary Studies) or doctoral research and dissertations (for Ph.D. in Interdisciplinary Studies). The applicant, in conjunction with the committee, must prepare a proposal for the course of study. The proposal must provide a rationale for the particular mix of disciplines, demonstrating how each contributes to a central theme or focus. It must also show that the proposed program cannot be achieved through an established master’s or doctoral program at KU.

The student seeking to enter the Interdisciplinary Studies program must have an outstanding academic record (a grade-point average of 3.75 or higher on a 4.0 scale for graduate courses or a grade-point average of 3.5 or higher on a 4.0 scale for undergraduate courses if no graduate courses have been taken) and must be admitted to and enrolled in a graduate program at KU at the time of application. A graduate student who has failed to maintain the required grade-point average is not eligible for the Interdisciplinary Studies program. A student is not eligible for this program if the student has tried and failed to achieve candidacy in a regular graduate department or program at KU.

The student is expected to assume the initiative in determining his or her potential eligibility through consultation with graduate advisors and, if deemed eligible, in forming an advisory committee and preparing documentation to support the application.

**Preadmission Procedures**

To enter the program, a student should:

1. Determine that KU offers courses and research in the areas appropriate to the student’s interest(s).
2. Prepare a tentative study plan based on those offerings to serve as a basis for initial discussion.
3. Approach a professor whose interests are comparable to those of the student and request that the professor act as an advisor. Normally this professor is a faculty member of the program of principal interest to the student. To grant an M.A. or M.S. in Interdisciplinary Studies, it is essential that the school has the authority to grant master’s degrees. To grant a Ph.D. in Interdisciplinary Studies, it is essential that the school has the authority to grant Doctor of Philosophy degrees. The
selected professor must be a full member of the graduate faculty and authorized to chair doctoral dissertation committees for Ph.D. in Interdisciplinary Studies.

4. After a professor agrees to serve as an advisor, the student should assemble an advisory committee of at least three additional professors representing the disciplines covered in the Interdisciplinary program. At least two disciplines or departments must be represented.

5. In conjunction with the advisor and the committee, the student should prepare a proposal for study, including:
   - A statement, with supporting documentation, that the proposed Interdisciplinary Studies program cannot be accomplished through established programs.
   - A statement of the interdisciplinary or transdisciplinary nature of the proposed area of study.
   - A definition of the field of study incorporating, in a consistent way, a description of how each included discipline contributes to the broader field.
   - An outline of the course of study, indicating substantive work in the fields represented. Readings courses and independent study do not substitute for regular courses.
   - A description of the method for satisfying research skills and responsible scholarship requirements.
   - A description of the comprehensive examination procedures for the Ph.D. (nature of the examinations and possible examining committee) or final examination for the M.A./M.S.
   - A description, to the extent possible, of the nature of the field in which a dissertation or master’s thesis might be written, indicating the respective contributions of the selected disciplines to the final product.
   - Attach the following:
     i. complete transcripts of all previous work,
     ii. a cover sheet, signed by committee members, indicating their support of the proposal,
     iii. letters of recommendation and other appropriate supporting documents.

Note: The diploma indicates the degree awarded as "M.A. in Interdisciplinary Studies," "M.S. in Interdisciplinary Studies," or "Ph.D. in Interdisciplinary Studies," and does not specify the area of specialization. The transcript notes the area of specialization as determined by the admissions committee.

Approved Program Implementation

Upon acceptance of the proposal and admission to the Interdisciplinary Studies program, the student is admitted to the school of the major advisor to facilitate record keeping and to provide a central administrative office. The Associate Dean or the Director of Graduate Studies of that school must enroll the student and monitor the program. Along with the major advisor, s/he must make annual reports to Graduate Studies on the student’s progress. These reports are distributed to the directors of other involved programs along with a request to supply any additional information regarding the student’s performance. Proposals for major deviations from the approved course of study must be submitted for review by Graduate Studies and by the graduate studies office of the school in which the student resides. It is understood that no additional requirements unique to traditional graduate programs of the school(s) or departments may be imposed unless stated explicitly in the approved study plan.

Once approved, changes to the program plan must be approved by a Graduate Studies committee, appointed by the Dean of Graduate Studies. Significant curricular changes may require a new proposal and admissions process.

All basic rules and requirements for the Master of Arts, Master of Science, and Doctor of Philosophy degrees apply to Interdisciplinary Studies programs. These include program time constraints, residence requirement, post-comprehensive enrollment, final examinations, research skills and responsible scholarship requirements, dissertation submission and publication, grade-point average, etc. (See Master’s Degree Requirements and Doctoral Degree Requirements in this section of the online catalog.)

View the current Lawrence and Edwards Campus policy on interdisciplinary studies (http://policy.ku.edu/graduate-studies/ma-ms-phd-interdisciplinary-studies/).

Combined Degrees

Combined degrees are granted in programs meeting the requirements of the graduate master’s or doctoral degree and the professional post-baccalaureate degree. View the current list of all master’s and doctoral degrees on the Graduate Studies Academics page (http://www.granduate.ku.edu/find-graduate-program/). View the current Lawrence and Edwards Campus policy on graduate degrees (http://policy.ku.edu/graduate-studies/degrees/).

Distance Education

The University of Kansas offers online and hybrid courses and certificate and degree programs. For more information about specific online course and degree program options, students should contact their academic department of study. Similar to regular courses, the availability of online courses varies by semester and year.

Online or Hybrid Graduate Programs

View KU’s current online or hybrid programs (https://online.ku.edu/programs/) or contact the KU Center for Online and Distance Learning (http://www.independentstudy.ku.edu/index.shtml/) for more information on online and hybrid courses.

Independent Study

Independent study is a research experience or directed readings independently pursued through an academic department. Students
Eligibility Criteria

Eligibility and admission to graduate certificates is governed by the policy on Admission to Graduate Study. (http://policy.ku.edu/graduate-studies/admission-to-graduate-study?num1_1=)

Graduate credit from another institution may not be transferred to a KU graduate certificate program. A current list of all certificate programs is available on the KU Academics page (http://www.ku.edu/academics/+).

Policies and Processes for Graduate Certificate Programs

A graduate certificate is a focused collection of courses that, when completed, affords the student some record of coherent academic accomplishment in a given discipline or set of related disciplines. Students may be awarded these certificates upon completion of a well-defined program of course work. The didactic material comprised within a graduate certificate program may represent a more practice-oriented subset of an existing graduate discipline.

A graduate certificate program will comprise no less than 9 and generally no more than 18 credit hours of course work in a particular discipline or related disciplines of study.

All proposals for graduate certificate programs will be adopted for a seven-year time period. The certificate program will expire at the end of that period. The program may request renewal of the certificate program by sending an updated program proposal, endorsed by the department and the school or college, to the Executive Council of Graduate Faculty. The proposal will be evaluated for an additional seven-year period. The office of Graduate Studies will remind the graduate certificate program about its renewal one year before the graduate certificate program is scheduled to expire. If a program expires or is discontinued, no new students may be enrolled in the program and those students currently in the program will continue until completion.

Student Records Criteria

• It is the responsibility of the degree program that houses the graduate certificate program to maintain all student records of the graduate certificate program. These records should include, but are not limited to, the number of students that apply to the program, the number accepted and denied into the program, the number of students enrolled in the program by semester, and the number of students who complete the program by semester.
• The courses taken in the graduate certificate program will be listed on the student’s transcript and recognition of the earned certificate will also be posted on the transcript.
• The awarding of graduate certificates will coincide with the August, December and May graduations at the University of Kansas. The certificate-awarding department will forward its list of certificate recipients to the Graduate Division of the school or college that holds the certificate program. The Graduate Division will forward names of the students completing graduate certificates in a given semester to the Graduate Studies office. The same degree-granting deadline dates will apply to the awarding of graduate certificates.
• Graduate Studies will be responsible for providing the University Registrar’s office with the names of certificate recipients along with the corresponding names of the completed certificate programs.
• Each semester, Graduate Studies will provide departments with authorized Graduate Certificates for students who successfully complete all certificate program requirements. The department will be responsible for completing the certificates and presenting them to the students.

Graduate certificates will not be recognized by any Graduate Studies official graduation ceremony.

View the current graduate certificate policies and processes (http://policy.ku.edu/graduate-studies/certificate-programs/+).

The Graduate Faculty

The Graduate Faculty consists of members of the university faculty and other persons qualified by training and experience who are duly nominated and appointed. Only members of the Graduate Faculty may teach courses for graduate credit, supervise master’s programs and theses, or serve on doctoral committees. There are four types of appointment to the Graduate Faculty:

• Regular Status (http://policy.ku.edu/graduate-studies/grad-faculty-status/)
• Dissertation Status (http://policy.ku.edu/graduate-studies/grad-faculty-dissertation-status/) (Dissertation Chair Status)
• Emeritus/Emerita status (https://policy.ku.edu/graduate-studies/emeritus-graduate-faculty/+)
• Special Member Status (http://policy.ku.edu/graduate-studies/grad-fac-special-members-status/+)

For a side-by-side comparison of these Graduate Faculty appointment types, view the current policy on Graduate Faculty Appointments (http://policy.ku.edu/graduate-studies/graduate-faculty-appointments/+).

Appointment Instructions for Degree Programs

To appoint a faculty member to either Dissertation or Special Member status, departments or programs should submit the Graduate Studies Recommendation for Appointment to the Graduate Faculty form through the Progress to Degree (PtD) system. Departments should send the appointment request to the appropriate Graduate Division along with a current vita that includes a list of graduate courses the appointee has taught and a list of graduate students’ committees on which the appointee has served. Once approved by the Graduate Division, the form proceeds to the Office of Graduate Studies for final approval. For more information, see PtD Forms (http://www.graduate.ku.edu/progress-degree-forms/+).

Regular Graduate Faculty Status

Any faculty member who is appointed to a tenured or tenure-track position automatically receives Regular status on the Graduate Faculty. These members of the Graduate Faculty may:

• teach courses for graduate credit;
• supervise the master’s programs and thesis students;
• serve on master’s and doctoral committees; and
• chair master’s committees.
When appropriate, a qualified member of the regular Graduate Faculty may be nominated to serve as co-chair of a specific dissertation committee if a faculty member with dissertation chair status serves as co-chair of the committee and agrees to ensure that all requirements are met. However, this does not apply to circumstances where a regular member of the Graduate Faculty had dissertation chair status removed.

Present or newly appointed faculty members in tenured/tenure-track appointments with the rank of assistant professor or above in departments or programs with approved graduate programs are granted regular membership in the Graduate Faculty; provided they have received the terminal degree in their field of specialization or have acquired equivalent training and/or professional experience as determined by the appropriate Graduate Division.

In special cases where faculty members who hold regular membership in the Graduate Faculty enroll in a KU graduate program as part of their professional development, they may be permitted to retain their Graduate Faculty status. They may not supervise or serve as the instructor of record for students that are peers in the graduate program in which they are enrolled.

To hold regular membership in the Graduate Faculty, a faculty member must continue to show evidence of a pattern of productive professional activity demonstrating the ability to contribute to high-quality graduate education. The form that productive professional activity may take varies across disciplines. Conventional evidence of such activity includes such things as:

- effective teaching;
- scholarly publication;
- participation in professional societies; and
- other scholarly activity.

Graduate degree programs are responsible for monitoring faculty with regular membership in the Graduate Faculty. View the current policies on Regular Graduate Faculty status (http://policy.ku.edu/graduate-studies/grad-faculty-status/).

**Dissertation Status**

To qualify for the privilege of chairing doctoral dissertation committees, a regular member of the Graduate Faculty must demonstrate continuing activity commensurate with being an established scholar in the faculty member's field and involvement in the graduate education program as evidenced by:

- teaching graduate courses;
- advising and mentoring graduate students and serving on thesis and dissertation committees; and
- maintaining an ongoing program of scholarly activity which includes a record of scholarship, publication, and other contributions to the field.

It is the graduate program's responsibility to nominate members of the Graduate Faculty for authorization to chair doctoral committees and to provide evidence of scholarship and involvement in the graduate education program.

View the current policy on Dissertation Graduate Faculty status (http://policy.ku.edu/graduate-studies/grad-faculty-dissertation-status/).

**Emeritus/Emerita Status**

When the University of Kansas awards a faculty member emeritus/emerita faculty status, the Office of Graduate Studies will automatically extend the faculty member's Graduate Faculty privileges for three years post-retirement. These faculty members will hold Emeritus/Emerita status on the Graduate Faculty. A department may petition to extend Emeritus/Emerita Graduate Faculty status beyond the initial three-year period. To do so, an individual must demonstrate recent research activity and scholarly engagement with both the home department at KU and the wider field. Extensions may be granted for up to three years at a time.

Emeritus/Emerita Graduate Faculty status is intended to facilitate committee continuity for students already working with a retiring faculty member. During the first three-year period post-retirement, Emeritus/Emerita Graduate Faculty status provides for an extension of the Graduate Faculty privileges held at the time of retirement.

During this period, an emeritus/emerita faculty member who held Dissertation status on the Graduate Faculty at the time of retirement may:

- Continue serving as a doctoral student's sole committee chair.
- Serve as the Graduate Studies Representative on doctoral committees outside the emeritus/emerita faculty member's home department.
- Chair master's committees.
- Teach graduate courses (assuming the emeritus/emerita faculty member meets all Human Resource requirements for doing so).

During this period, an emeritus/emerita faculty member who held Regular status on the Graduate Faculty at the time of retirement may:

- Co-chair doctoral committees with a faculty member who holds current Dissertation status.*
- Chair master's committees.
- Teach graduate courses (assuming the emeritus/emerita faculty member meets all Human Resource requirements for doing so).

After the initial three-year period, the department may request that any emeritus/emerita faculty member's Graduate Faculty status be extended. All extensions will confer the privileges granted to faculty who held Regular status on the Graduate Faculty at the time of retirement.

In the event a department does not request an extension of Emeritus/Emerita status on the Graduate Faculty, the individual's status will automatically convert to Special status.

Committee members with Emeritus/Emerita status on the Graduate Faculty may count as internal members, at the department's discretion.

View the current policy on Emeritus/Emerita Faculty status (https://policy.ku.edu/graduate-studies/emeritus-graduate-faculty/).

**Special Member Status**

Special membership on the Graduate Faculty may be granted to employees of the university and its affiliates who do not have tenured or tenure-track faculty appointments in a department which grants graduate degrees. It may also be granted to individuals who are not employed by the university or its affiliates but who are uniquely qualified by training or
experience and otherwise meet the established criteria for membership in
the Graduate Faculty.

Such membership is for the purpose of:

• teaching a graduate course or courses;
• having graduate courses cross-listed as KU courses if they are part
  of a cooperative graduate program between KU and the appointee’s
  home institution; and/or
• serving on the thesis, dissertation, or examination committee of a
  particular student or students.

Special memberships may be requested for up to a maximum period
of five calendar years for teaching purposes or for the duration of the
specified committee assignment. Special memberships are renewable
based on the same criteria as the initial appointment.

All nominations for special membership must state clearly the specific
purposes for which the nomination is being sought and, when it can be
known in advance, the length of time for which it is being requested.

Special appointments are reviewed by the appointing graduate
department, the appropriate Graduate Division, and the Dean of Graduate
Studies and continued as appropriate.

Serving on a master’s or dissertation committee:

Graduate Faculty with special status are not authorized to chair
master’s or doctoral committees. When appropriate, Graduate Studies
may authorize a qualified committee member with special status to
serve as co-chair of a specific thesis or dissertation committee. While
committees are not required to have a co-chair, the student or the
committee members may decide to select a co-chair. The chair must have
dissertation status, while the co-chair can hold any status.

Graduate faculty with special status in a student’s department may not
serve as the Graduate Studies representative or in fulfillment of the
committee majority pursuant to the doctoral committee composition policy.

Graduate faculty with special status in a student’s department may not
serve as the Graduate Studies representative or in fulfillment of the
committee majority pursuant to the doctoral committee composition policy.

Non-reappointment, Graduate Faculty
Eligibility, and Procedures When
Graduate Faculty Are Given Terminal
Contracts

Faculty members given a notice of non-reappointment are not eligible
to hold Graduate Faculty status. The Provost’s Office will provide
Graduate Studies with a written list of faculty who receive a notice of non-
reappointment. Graduate Studies will remove Graduate Faculty status for
these faculty, beginning with the appointment period for which the terminal
notice is effective.

Upon non-reappointment the faculty member is no longer eligible for
Graduate Faculty status. The named faculty member will no longer be
allowed to teach future courses for graduate credit or to serve on graduate
students’ committees.

The appropriate dean of the school or college may request, in writing, that
the Dean of Graduate Studies grant an exception to this policy. In granting
such an exception, the Dean of Graduate Studies may give the faculty
member permission to serve on a graduate student’s committee if the
graduate student will meet all degree requirements within the semester
that the terminal notice takes effect. The faculty member in question will
be given a copy of the initial letter, sent to the Dean of Graduate studies,
which requested and defined the exception.

View the current policy on non-reappointment (http://policy.ku.edu/
grant-grad-faculty-terminal) for procedures that apply when
Graduate Faculty are given terminal contracts.

University Faculty and Advanced Degrees

Members of the university faculty who have tenure, are eligible for tenure,
or who hold any rank above that of instructor will not be granted degrees
or certificates. Because of the variety of appointments covered by such
terms as Lecturer, Associate, or the like, every case must be considered
individually. A department or program that wishes to accept a faculty
member as a student must make a recommendation to Graduate Studies
before a faculty member begins a graduate degree or certificate program.
Similarly, a department or program that wishes to hire a student already in
a graduate program must make a recommendation to Graduate Studies
before a faculty appointment is made. Although appointing departments
are expected to bring this rule to the attention of prospective appointees
who plan to seek degrees or certificates, the responsibility for initiating
a request for waiver of the rule lies with the student. Waivers may be
granted in rare cases where the student and the department demonstrate
satisfactorily that circumstances and conditions assure freedom from
conflict of interest and undue influence.

View the current policy on university faculty and advanced degrees (http://
policy.ku.edu/graduate-studies/university-faculty-advanced-degrees/).

Graduate Research Assistants, Graduate
Teaching Assistants, and Graduate
Assistants

Appointment Types

Graduate Research Assistantships

Graduate research assistantships may be available to graduate students.
For further information, applicants should write directly to the chair or
graduate advisor of the major department.

Graduate Teaching Assistantships

Graduate teaching assistantships may be available to graduate students
through graduate departments. Graduate students should apply directly to
the department for GTA appointments. Graduate teaching assistantships
in Lawrence are governed by a Memorandum of Agreement between
KU, the Kansas Board of Regents, and the American Federation of
Teachers, which represents KU GTAs in Lawrence. The Memorandum
of Agreement, with additional information on tuition and fee payment,
appointments, wages, benefits, and other topics of interest to GTAs, is
available on the Graduate Studies website (http://www.grad.graduate.ku.edu/).

Graduate Assistantships

Graduate assistantships may be available to graduate students. For
further information, applicants should write directly to the chair or graduate
advisor of the major department.

Statement

The following premises and eligibility requirements govern all Graduate
Assistantships (GRA), Graduate Teaching Assistant (GTA), and
Graduate Assistant (GA) appointments at the University of Kansas, Lawrence:

**Principles:**

1. Individuals who enroll in graduate educational programs at the University of Kansas do so in order to attain specific educational goals. It is the University’s responsibility to help ensure that graduate students attain their academic goals in a reasonable amount of time and move on to the next stage in their careers, whether to another advanced degree program or to professional employment.

2. When departments and schools offer GRA, GTA, or GA appointments, the assistantships must contribute to the training experience of the graduate student.

3. GRA, GTA, and GA responsibilities should be in balance with the student’s responsibilities to the graduate program. For salaried appointments of 50% (0.50 FTE), the expectation is that the assigned duties will average no more than 20 hours per week during the semester. For hourly appointments at 50% (0.50 FTE), assigned duties should require 20 hours per week during the semester. For appointments at other percentages, the number of hours per week must be proportional to the appointment percentage.

**Appointment Limits:**

During the fall and spring semesters, GTA appointments shall not normally exceed 50% (0.50 FTE). GTA appointments in excess of 50% (0.50 FTE) must be approved by the Graduate Studies or by the Dean’s Office of the College of Liberal Arts & Sciences in advance of an appointment offer and will be approved only in extraordinary circumstances. See the Memorandum of Agreement (http://humanresources.ku.edu/sites/humanresources.ku.edu/files/docs/gta_moa_2014.pdf) between The University of Kansas and the Board of Regents and the American Federation of Teachers - Kansas (representing graduate teaching assistants at the University of Kansas, Lawrence).

During the fall and spring semesters, GRA appointments may be made up to 72.5% (0.725 FTE).

During the fall and spring semesters, GA appointments shall not normally exceed 50% (0.50 FTE). GA appointments in excess of 50% (0.50 FTE) must be approved by the Office of Graduate Studies in advance of an appointment offer and will be approved only in special circumstances.

Although GRA, GTA, and GA appointments in excess of 50% (0.50 FTE) have the undesirable potential to extend time towards degree, GRA appointments contribute directly to students’ research agendas. Therefore, during the fall and spring semesters, GTA appointments and combined GRA/GTA or GRA/GA appointments of up to 72.5% (0.725 FTE) may be approved so long as the GTA or GA component of the appointment does not exceed 50% (0.50 FTE). During the fall and spring semesters, GTA, GRA, or GA appointments above 72.5% (0.725 FTE), or combined appointments above 72.5% (0.725 FTE), must additionally be authorized by the appropriate dean(s) or vice provost(s) in accordance with the policy on Student Employee Eligibility Requirements and Appointment Limits (http://policy.ku.edu/human-resources/student-employee-eligibility-acca/). Exceptions for GTA appointment limits must comply with the provisions of the GTA Memorandum of Agreement (http://www.humanresources.ku.edu/files/documents/gta_moa.pdf).

Departments are expected to monitor appointments in excess of 50% (0.50 FTE) to ensure that graduate students’ assistantship assignments enhance their academic preparation and do not interfere with progress towards degree.

During the summer term(s), GTAs, GRAs, and GAs may be appointed up to 100% effort (1.0 FTE), at the hiring unit's discretion. Hiring units should be advised of the potential legal and fiscal implications posed by appointments that exceed 72.5% (0.725 FTE), including changes to insurance eligibility under the Affordable Care Act. For more information about these implications, hiring units should consult with Human Resources Management. Departments, research centers, schools, and the College may adopt more stringent limitations as appropriate to their needs.

**GRA, GTA, and GA Eligibility (Lawrence campus)**

**GRA Eligibility**

The following eligibility requirements govern all Graduate Research Assistant (GRA) appointments at the University of Kansas, Lawrence:

Graduate Research Assistants are salaried student employees who perform research that is in their fields (or a closely related field) of study and is integral to the student’s education (e.g., dissertation topic). The duties performed are under the direct supervision of faculty or research professionals. The duties do not involve classroom instruction. GRA appointments must be approved by the Office of the Vice Chancellor for Research (for all funds under Research and KUCR), the Budget Office (for the professional schools’ state- and endowment-funded GRA positions), or the College of Liberal Arts and Sciences (for state- and endowment-funded GRA positions in CLAS).

In order to be eligible for a GRA appointment, a graduate student must meet all of the following conditions:

1. During the term of appointment, the person is admitted to and enrolled in a graduate degree program offered by the University of Kansas; and
2. During the fall or spring semester, the student is enrolled in no fewer than 6 credit hours required for the student's graduate degree.

   a. Enrollment and Post Comps: Upon successful completion of the doctoral comprehensive examination and all other Graduate Studies and departmental requirements for candidacy to the doctoral degree and upon completion of 18 post-comprehensive credit hours, the student may enroll in 1 or more dissertation, thesis, or equivalent credit hours as approved by the student's department, the student's school or College, and the Office of Graduate Studies to qualify for a graduate research assistantship appointment. [Note: Candidates for professional doctoral degrees may enroll in dissertation-equivalent hours as approved by Graduate Studies. More detailed information about post-comprehensive enrollment can be found under “Regulations” in the Graduate Studies section of the catalog.]

3. During the term of appointment, the GRA must be in academic good standing and be making satisfactory progress toward a graduate degree, as determined by the Office of Graduate Studies and the department in which the student is enrolled. [Note: Students who are admitted to a degree program on provisional status are not considered to be in academic good standing for the purpose of GRA appointments. Exceptions may be granted by the Dean of Graduate Studies under extraordinary circumstances.] A graduate student must maintain a cumulative grade point average (GPA) of 3.0 to remain in academic good standing. However, if a department judges that a graduate student whose GPA falls below 3.0 after the first semester...
Enrollment Exceptions for GRAs

Doctoral Candidates: In accordance with Graduate Studies requirements, after passing the comprehensive oral examination for a doctoral degree, the candidate must be continuously enrolled each fall and spring semester until all requirements for the degree are completed. Each enrollment must reflect, as accurately as possible, the candidate’s demand on faculty time and University facilities. Until 18 post-comprehensive hours are completed, the candidate must enroll in a minimum of 6 hours each semester. Doctoral candidates may be enrolled in fewer than 6 post-comprehensive hours in the fall and spring semesters if all of the criteria described in 2.a. (above) are met.

In certain master’s degree programs, students who are in the final semester may be able to complete the course and hours requirements for the degree while enrolling in fewer than 6 hours. Such students may enroll in fewer than 6 hours and still retain eligibility to hold a position as a Graduate Research Assistant (GRA), provided that the student will not be continuing in a doctoral program at the University of Kansas. The option of enrolling in fewer than 6 hours during the final semester is available only to master’s students with GRA appointments. It is not available to master’s students with GTA or GA appointments.

Note: Different enrollment criteria may be used in determining eligibility for student financial aid and student loan deferments. GRAs are advised to consult with Financial Aid and Scholarships (http://affordability.ku.edu/) to determine student financial aid eligibility.

Enrollment Exception Process

In order to certify that a GRA is eligible to enroll in fewer than 6 credit hours, campus departments must submit the Certification of Eligibility to Enroll in Fewer than Six Hours Form (https://policy.ku.edu/graduate-studies/doctoral-GTA-eligibility-fewer-six-hours/) for doctoral candidates - GTAs, GRAs, and GAs), or the Certification of Eligibility form for Master’s Level Graduate Research Assistants (https://policy.ku.edu/graduate-studies/GRA-enroll-masters-under-six-hours/).

View the current policy on GRA appointment eligibility (http://policy.ku.edu/graduate-studies/GR Appointment-eligibility/).

GA Eligibility

The following eligibility requirements govern all Graduate Assistant (GA) appointments at the University of Kansas, Lawrence:

Graduate Assistants are active student employees (either salaried or hourly, as determined by Human Resource Management) who hold a position that furthers the professional and/or academic development of the graduate student. The duties performed are professional in nature and under the direct supervision of faculty, academic professionals, or administrators. While the duties may involve classroom instruction or research integral to the student’s degree program or dissertation, those activities are not the primary focus of the job. The Graduate Assistant’s job duties should not include grading student work, developing course content, or taking responsibility for a course or section as Instructor of Record. Graduate Assistants who engage in classroom instruction should spend no more than 10% of their work time doing so. The Graduate Assistant’s responsibilities may include, but are not limited to, administrative and professional internships. The Dean of Graduate Studies must approve GA appointments. [Note: Graduate Assistant positions are a distinct category of graduate student support. This category does not include Graduate Research Assistants, Graduate Teaching Assistants, or student-hourly positions held by graduate students.]

In order to be eligible for a GA appointment, a graduate student must meet all of the following criteria:

1. During the term of appointment, the person is admitted to and enrolled in a graduate degree program offered by the University of Kansas;
2. During the fall and/or spring semesters in which the graduate student holds a GA appointment, the student must be enrolled in no fewer than 6 credit hours required for the student’s graduate degree. GAs on summer session appointments may enroll but are not required to do so.
3. During the term of appointment, the GA must be in academic good standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. Students who are admitted to a degree program on provisional status are not considered to be in academic good standing for the purpose of GA appointments. Exceptions may be granted by the Dean of Graduate Studies under extraordinary circumstances. A graduate student must maintain a cumulative grade point average (GPA) of 3.0 to remain in academic good standing. However, if a department judges that a graduate student whose GPA falls below 3.0 after the first semester at KU is nonetheless making satisfactory progress, the department may recommend to the Dean of Graduate Studies that the student be allowed to keep the GA position for 1 additional semester.
4. The person must successfully pass a background check established by the University.
5. A student who has earned a graduate degree may not continue in a GA appointment after the graduation date unless the student has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.
must be continuously enrolled each fall and spring semester until all requirements for the degree are completed. Each enrollment must reflect, as accurately as possible, the candidate’s demand on faculty time and University facilities. Until 18 post-comprehensive hours are completed, the candidate must enroll in a minimum of 6 hours each semester. Doctoral candidates may be enrolled in fewer than 6 post-comprehensive hours in the fall and spring semesters if all of the conditions described in 2.a. (above) are met.

**Note:** Different enrollment criteria may be used in determining eligibility for student financial aid and student loan deferments. GAs are advised to consult with Financial Aid and Scholarships (http://affordability.ku.edu/) to determine student financial aid eligibility.

### Enrollment Exception Process

In order to certify that a GA is eligible to enroll in fewer than 6 credit hours, campus departments must submit the Certification of Eligibility to Enroll in Fewer than Six Hours Form (https://policy.drupal.ku.edu/graduate-studies/doctoral-GTA-eligibility-fewer-six-hours/) for doctoral students.

View the current policy on GA appointment eligibility (http://policy.ku.edu/graduate-studies/GA-appointment-eligibility/).

### GTA Eligibility

The following eligibility requirements govern all Graduate Teaching Assistant (GTA) appointments at the University of Kansas, Lawrence:

Graduate Teaching Assistants are salaries student employees whose job duties consist primarily of direct involvement in classroom or laboratory instruction. The duties are performed under the supervision of faculty. The University also requires that a GTA’s teaching assignment be in his or her own field of study or one that is closely related. Out-of-field appointments require consultation with the student’s home academic unit and the explicit approval of the Office of Graduate Studies or College of Liberal Arts and Sciences.

In accordance with the Memorandum of Agreement (MOA) (http://humanresources.ku.edu/documents/gta-moa/) between the University of Kansas, the Kansas Board of Regents, and the Graduate Teaching Assistants’ Coalition, American Federation of Teachers – Kansas (GTAC), in order to be eligible for a GTA appointment, a graduate student must meet all of the following conditions:

1. During the term of appointment, the person is admitted to and enrolled in a graduate degree program offered by the University of Kansas;  
2. During the term of appointment, the person is enrolled in no fewer than 6 graduate credit hours per semester or other credit hours as required for the student’s graduate degree and as approved by Graduate Studies or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate. [Note: GTAs on summer session appointments may enroll but are not required to do so.]  
   a. Enrollment and Medical Leave: Should the student be unable to enroll in 6 graduate or other approved hours for reasons of medical condition or other hardship, that person may, with supporting documentation and the approval of the department of employment (and the department of study in cases in which the two are different), petition the Office of Graduate Studies or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate that this requirement be waived. Final approval rests with the Office of Graduate Studies or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate.  
   b. Enrollment and Post Comps: Upon successful completion of the doctoral comprehensive examination and all other Graduate Studies and departmental requirements for candidacy to the doctoral degree and upon completion of 18 post-comprehensive credit hours, the student may enroll in 1 or more dissertation, thesis, or equivalent credit hours as approved by the student’s department, the student’s school or College, and the Office of Graduate Studies to qualify for a Graduate Teaching Assistant appointment. [Note: Candidates for professional doctoral degrees may enroll in dissertation-equivalent hours as approved by Graduate Studies. More detailed information about post-comprehensive enrollment can be found under “Regulations” in the Graduate Studies section of the catalog.]
   c. Short Course Appointments: During the term of appointment for short courses between the Fall and Spring semesters, including summer sessions, the person must be active in a graduate degree program and must have been enrolled in at least one hour during the Fall semester or Spring semester.

3. During the term of appointment, the GTA must be in academic good standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: Students who are admitted to a degree program on probationary or provisional status are not considered to be in academic good standing for the purpose of GTA appointments. Exceptions may be granted by the Dean of Graduate Studies under extraordinary circumstances. No exceptions are granted in cases where a provisionally admitted student does not meet English proficiency criteria.] A graduate student must maintain a cumulative grade point average (GPA) of 3.0 to remain in academic good standing. However, if a department judges that a graduate student whose GPA falls below 3.0 after the first semester at KU is nonetheless making satisfactory progress, the department may recommend to the Dean of Graduate Studies or the Dean of the College of Liberal Arts and Sciences that the student be allowed to keep his or her GTA position for 1 additional semester.

4. The graduate student must satisfy any and all English proficiency criteria established by the Regents and/or the University. [Note: Prior to finalization of a GTA appointment, every prospective GTA must be interviewed and have to certify the student's spoken English competency. Interview must be conducted by no fewer than 3 institutional personnel, at least 1 of whom should be a student. Non-native speakers of English must achieve a minimum score of 50 on the SPEAK (Speaking Proficiency English Assessment Kit), a score of 22 on the iBT (Internet-based TOEFL), or an 8 on the IELTS (International English Language Testing System). No exceptions are granted in cases where a student does not meet English proficiency criteria.]  

5. During the term of the appointment, the GTA’s assigned responsibilities consist primarily of direct involvement in classroom or laboratory instruction.

6. The GTA has satisfactorily completed all of the components of the orientation and training as specified in section 7 of the MOA within the timeframes established by the University.

7. The department may require a graduate teaching assistant to be on campus to assume employment responsibilities up to five weekdays (excluding weekend days) prior to the first day of classes each semester [Note: In accordance with Article 5, Section 1, of the MOA, “Individuals who are being reappointed as GTAs, regardless of whether the appointment is for an academic year or a shorter period, shall begin work on the first day of classes of each semester for which they are appointed, unless notified by the GTA’s department of earlier
required assignments. Attendance at GTA orientation prior to the start of the semester is required as a condition of employment for any person who has not previously served as a GTA at the University of Kansas or for any returning GTA who has been identified as needing to attend GTA orientation."

8. The student must successfully pass a background check established by the University.

In addition to the conditions of appointment set forth in the MOA, the University has established the following condition:

A student who has earned a graduate degree may not continue in a GTA appointment after the graduation date unless the student has just completed a master's degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

Enrollment Exceptions for GTAs who are Doctoral Candidates

In accordance with Graduate Studies requirements, after passing the comprehensive oral examination for a doctoral degree, the candidate must be continuously enrolled each fall and spring semester until all requirements for the degree are completed, and each enrollment must reflect, as accurately as possible, the candidate’s demand on faculty time and University facilities. Until 18 post-comprehensive hours are completed, the candidate must enroll in a minimum of 6 hours each semester. Doctoral candidates may be enrolled in fewer than 6 post-comprehensive hours in the fall and spring semesters if all of the conditions described in 2.b (above) are met.

Note: Different enrollment criteria may be used in determining eligibility for student financial aid and student loan deferments. GTAs are advised to consult with Financial Aid and Scholarships (http://affordability.ku.edu/) to determine student financial aid eligibility.

Enrollment Exception Process

In order to certify that a GTA is eligible to enroll in fewer than 6 credit hours, campus departments must submit the Certification of Eligibility to Enroll in Fewer than Six Hours Form (https://policy.drupal.ku.edu/graduate-studies/doctoral-GTA-eligibility-fewer-six-hours/) for doctoral students.

View the current policy on GTA appointment eligibility (http://policy.ku.edu/graduate-studies/GTA-appointment-eligibility/).

Time Limits on Appointments of Graduate Teaching Assistants

The University of Kansas, Lawrence, has established limits on appointments to graduate teaching assistantships as specified below (summer appointments are excluded from the count). Departments may establish shorter limits if appropriate to their programs. In determining whether a person has met the limit described here, all semesters served as a GTA within any department of the university shall be counted.

- A student who is admitted to a graduate degree program to obtain only a master's degree is limited to 6 semesters of GTA appointments.
- A student who is admitted to a graduate degree program to obtain only a doctorate is limited to 10 semesters of GTA appointments.
- A student who is admitted to a graduate program to obtain both a master's and a doctorate is limited to 12 semesters of GTA appointments.

- In no case may a student exceed the GTA appointment limits indicated here. No GTA may be appointed in excess of 12 semesters.

In accordance with the provisions of the Memorandum of Agreement (http://humanresources.ku.edu/sites/humanresources.ku.edu/files/docs/gta_moa_2014.pdf) (MOA) between the University of Kansas, the Kansas Board of Regents, and the Graduate Teaching Assistants' Coalition, American Federation of Teachers - Kansas (GTAC), a GTA who has exhausted the semester limits may be considered for appointment as a lecturer.

Note: This policy does not apply to summer session GTA appointments. Semesters in which a student's sole appointment was as a graduate research assistant (GRA) do not count against the GTA semester limit. All GTA appointments are made pursuant to the provisions of the MOA.

Out-Of-Field GTA Appointments

General Policy on GTA Appointments, Training, and Mentoring

University policy (http://policy.ku.edu/graduate-studies/GTA-appointment-eligibility/) stipulates that a Graduate Teaching Assistantship (GTA) must be an integral part of a graduate student's academic endeavor, serving as a logical complement to the graduate student's program of study. While the GTA experience is often part of a student's preparation to assume a full-time role in a specific field in academia, the GTA experience also provides valuable training in the science and art of teaching. Accordingly, departments or schools are expected to offer quality teaching-related experiences for GTAs and to designate faculty who will work closely with GTAs to advise them and help them improve their teaching skills. Teaching-related training is integral to the GTA experience.

Guidelines and Criteria for Out-Of-Field Appointments

It is assumed that the majority of GTAs have appointments within their home departments. However, undergraduate teaching needs frequently arise in departments and programs that do not have a specific and circumscribed pool of graduate students from which GTAs can be drawn. Recognizing that graduate students can make significant contributions to the undergraduate teaching mission of the University by teaching out of their field and that there is great value in this teaching experience as they learn the science and art of teaching undergraduate students, the University will allow out-of-field GTA appointments with the following stipulations:

- A request for an out-of-field appointment has to be approved by the student's home department or program as well as by the department or program offering the teaching appointment.
- The out-of-field appointment has to be approved by the school or College of the home department or program as well as the school or College of the department or program offering the teaching appointment.
- Because it is University policy (http://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs/) to waive some or all of the differential tuition for GTAs who are enrolled in schools that charge differential tuition, a unit wishing to extend an out-of-field GTA appointment to a graduate student who is enrolled in a school or College that charges differential tuition must notify the dean of the school or college in which the student is enrolled and obtain that dean's approval of the out-of-field appointment.
• The schools and the College must, annually, send a list of all out-of-field appointments to the Office of Graduate Studies.
• The student's home department or program must certify, at the time they approve the out-of-field appointment, that the student is making acceptable progress toward completion of her or his terminal degree.
• Any out-of-field GTA appointments must include a pedagogical and/or mentoring component offered by the hiring department, with assigned faculty supervisors or mentors. When the hiring department offers courses or seminars that are required of home department GTAs, out-of-field GTAs will be required to enroll in such courses or seminars.
• Students pursuing graduate degrees that are not generally intended to prepare a student for a career that involves teaching cannot be appointed as out-of-field GTAs. These students should be appointed as lecturers if their service as teachers is desired.

Procedures for Requesting Out-Of-Field GTA Appointments
Individual schools or the College will review all requests for out-of-field GTA appointments. Units requesting an out-of-field appointment must provide documentation that the student has been admitted to graduate study and is in good academic standing. No offer of an out-of-field GTA appointment, either written or verbal, may be made until the school or College has completed its review.

A department that wishes to offer a GTA appointment to a graduate student in another academic unit must consult with the student's home department to develop a rationale describing how the appointment is consistent with the guidelines stated here and how it will benefit the student's educational program. The rationale should include information about the student's background and qualifications to teach the course(s) in question and how the experience gained will contribute to the student's graduate training. An out-of-field appointment will not be approved without the explicit endorsement of the student's home department.

Timeline: Requests for out-of-field GTA placements normally should be submitted to the school or College involved as soon as possible and at least four weeks before the department expects to make an appointment offer. The four-week requirement may be waived when a proposed appointment is related to a staffing emergency such as the late resignation of a GTA or the unanticipated illness of a faculty member who was scheduled to teach a course.

GRA, GTA, and GA Benefits - Lawrence and Edwards Campuses

The University is authorized by Kansas statutes and administrative regulations to provide Graduate Research Assistants (GRAs), Graduate Teaching Assistants (GTAs), and Graduate Assistants (GAs) with certain benefits that are not available to other student employees. The Memorandum of Agreement (MOA) (http://www.humanresources.ku.edu/files/documents/gta_moa.pdf) between the University of Kansas, the Kansas Board of Regents, and the Graduate Teaching Assistants’ Coalition, American Federation of Teachers - Kansas (GTAC; representing Graduate Teaching Assistants at the University of Kansas, Lawrence), provides further information about benefits available to GTAs. This summary is provided for informational purposes only. For information about specific benefits, contact the Office of Graduate Studies.

1. Staff Rates
Graduate students with GRA, GTA, or GA appointments of 40% (0.40 FTE) or more are eligible for staff (resident) rates for tuition, as are individuals who hold concurrent GRA, GTA, and GA appointments totaling 40% (0.40 FTE) or more as stipulated in the Staff and Staff Dependent Tuition Rates (http://policy.drupal.ku.edu/registrar/staff-tuition-rates/#GTA) policy.

2. Payment of Tuition
GRAs and GTAs are eligible to have all or some of their tuition paid, including any differential tuition assessed, according to the provisions below.

Graduate Research Assistants:
Graduate Research Assistants with an appointment of 40% (0.40 FTE) or more will have their tuition provided by the same funding source as their salary. The full cost of tuition for GRAs must be included in all proposals, renewals, and contracts as part of the proposal budget when permissible by the granting agency or funding source. When not permitted by the funding source, the payment of tuition may be granted by the Graduate Tuition Assistance Pool. Further information about this program is available in the Graduate Research Assistant Tuition Assistance Policy (http://policy.drupal.ku.edu/graduate-studies/GRA-tuition-assistance-policy/).

Graduate Teaching Assistants:
Depending on the level of appointment, the University pays all or some of a GTA’s tuition, including any course fees for GTAs who are enrolled in schools or programs that charge such fees. If the student is eligible for staff rates, these will be assessed before applying the tuition waiver. Course fees include all school course fees and the Edwards Campus Program Fee as listed in section 1.1 of the Comprehensive Fee Schedule (http://registrar.ku.edu/tuition-and-fees/) published annually by the Office of the University Registrar.

GTAs with appointments of less than 40% (0.40 FTE) will have a portion of their basic tuition and course fees paid in accordance with the table that appears in Article 7, Section 3, of the MOA and is reproduced here:

Appointment Percentage and Percentage of Tuition paid by University

<table>
<thead>
<tr>
<th>Appointment Percentage</th>
<th>Percentage of Tuition paid by University</th>
</tr>
</thead>
<tbody>
<tr>
<td>40% FTE or more</td>
<td>100% paid</td>
</tr>
<tr>
<td>30% FTE but less than 40%</td>
<td>75% paid</td>
</tr>
<tr>
<td>20% FTE but less than 30%</td>
<td>50% paid</td>
</tr>
<tr>
<td>10% FTE but less than 20%</td>
<td>25% paid</td>
</tr>
</tbody>
</table>

Summer appointment percentages and tuition may vary from those shown here because of the reduced term of the appointment. Students should consult with their departmental hiring manager for more information on summer term tuition benefits.

3. Payment of Required Campus Fees
For GTAs, the University pays required campus fees for 3 credit hours per semester in accordance with the table and restrictions set forth below.

Appointment Percentage and Percentage of Campus Fees paid by University

<table>
<thead>
<tr>
<th>Appointment Percentage</th>
<th>Percentage of Campus Fees paid by University</th>
</tr>
</thead>
<tbody>
<tr>
<td>40% FTE or more</td>
<td>100% paid</td>
</tr>
<tr>
<td>30% FTE but less than 40%</td>
<td>75% paid</td>
</tr>
</tbody>
</table>
GRAs or GAs with a medical condition that necessitates an absence of more than a week from assigned responsibilities shall request unpaid leave with appropriate medical documentation. If a GRA or GA wants such an unpaid leave of absence, the GRA or GA or a representative shall submit a request in writing to the department, who will then submit it to the appropriate school or College. The request shall be submitted in advance of taking the leave unless the illness or injury precludes advance notice. The request for leave without pay or to have a leave of absence approved according to this provision shall result in the placement of the GTA on leave without pay or the termination of the GTA’s appointment.

Please note that the approval of a medical leave of absence from a GRA, GTA, or GA position does not affect the academic status of a graduate student. A student who wishes to reduce their enrollment level due to a medical condition must consult with their department and the appropriate school or College. Doctoral students who wish to take a leave of absence from graduate study because of a medical condition must request a leave from the department.

10. Other Benefit Programs
GRAs, GTAs, and GAs also can participate in voluntary benefit programs. Additional information is located on the Temporary & Student Employee Voluntary Benefits page (https://humanresources.ku.edu/temporary-student-employee-voluntary-benefits/).

View current policies on GTA/GRA/GA Benefits (http://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs/). Further information about tuition (http://affordability.ku.edu/cs/index.shtml) and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu/tuition-and-fees/).

Graduate Tuition Assistance Pool (TAP)
1. Payment of Tuition
The appointing KU unit is expected to fund the full cost of a Graduate Research Assistant’s (GRA’s) tuition, consistent with the Benefits for GTA/GRA/GAs (https://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs/) policy.

The full cost of tuition for Graduate Research Assistants must be included in all proposals, renewals, and contracts as part of the budget proposal when such support is permitted by the granting agency or source of funding.
2. Eligibility for the Graduate Tuition Assistance Pool (TAP)

When not permitted by the funding source, GRA tuition support may be granted by the TAP. Eligibility for the TAP is determined by the availability of tuition support from the funding source, the source of salary support, the availability of TAP funds, enrollment requirements, and the student eligibility requirements listed below. In order to be eligible for the TAP, the GRA must meet all of the following requirements:

1. be enrolled in a doctoral degree program;
2. meets the requirements for holding a GRA appointment;
3. and have at least one of the following:
   • at least a 40% (0.40 FTE) GRA appointment;
   • a combined GTA/GRA or GA/GRA appointment of 40% (0.40 FTE) or above; or
   • an externally-funded fellowship, as defined in the external funding section (http://policy.ku.edu/graduate-studies/graduate-tuition-assistance-pool/#external) of the Graduate Tuition Assistance Pool (TAP) (http://policy.ku.edu/graduate-studies/graduate-tuition-assistance-pool) policy.

Tuition support from the TAP may not exceed 9 credit hours in a given semester or 6 credit hours in the summer term. Students are limited to a maximum of 10 semesters of support from the TAP. Students who have completed the required 18 credit hours of post-comprehensive enrollment, and are therefore eligible to enroll in only 1 dissertation or dissertation-equivalent credit hour, are limited to 1 credit hour per semester of tuition support from the TAP.

External Funding

Externally-funded tuition support is defined as any circumstances in which the source of the salary for a GRA is from a research project funded by an agency external to the University of Kansas. External funding agencies may include, but are not limited to, the National Institutions of Health (NIH), the National Science Foundation (NSF), and the Department of Education (DOE).

It is expected that externally-funded graduate research assistantships and fellowships will provide tuition support. The source of the GRA or fellowship salary is one determinant for TAP eligibility.

Tuition support from the TAP is available to externally-funded GRAs in the following circumstances:

1. the funding agency does not provide tuition support;
2. the funding agency provides only partial tuition support;
3. the GRA position is funded entirely from Kansas state dollars budgeted for GRAs in the Tertiary Oil Recovery Project (TORP), the Biodiversity Institute (KUBI/Bi), the Institute for Policy and Social Research (IPSR), or the Kansas Geological Survey (KGS); or
4. the student is appointed as a GRA in the Center for Research Methods and Data Analysis (CRMDA), and conditions (1) or (2) apply.

If a GRA salary is supported from an externally-funded government grant that supports tuition but does not cover tuition rate increases over the duration of the grant, the TAP will cover the difference in tuition between past and current tuition rates.

For research training grants from the NIH and NSF in National Research Service Awards (NRSA), Integrative Graduate Education and Research Training (IGERT), or Graduate Stem Fellows in K-12 Education (GK-12), assistance from the TAP will be only for that amount of the tuition not covered by the training grant.

A GRA is not eligible for support from the TAP if external funding for tuition is available from the grant that is supporting the student, or permitted by the granting agency that is supporting the student’s work, and would cover tuition and campus fees up to full-time enrollment. If a GRA receives compensation from such an externally-funded grant and the student salary or tuition was not originally budgeted in the grant, the University requires that the grant be re-budgeted or that the tuition support be identified from alternative sources.

Internal KU Funding

If the GRA salary is funded entirely from a KU General Research Fund award (either a competitive or new faculty award), then the GRA is eligible for TAP support.

Students who have a salary or stipend at least equivalent to the minimum GTA salary (as determined by the GTA Memorandum of Agreement (http://humanresources.ku.edu/sites/humanresources.ku.edu/files/docs/ gta_moa_2014.pdf) for a 50% (0.50 FTE) appointment) from a national or international fellowship that supports either no tuition or only partial tuition are eligible for the TAP to cover their full tuition or the difference between the tuition portion covered by the fellowship and their actual tuition costs.

Ineligibility for the TAP

The following circumstances describe when a GRA position is not eligible for tuition support from the TAP:

• Commercial Entities
  A GRA position funded by industry, business, or commercial partnerships is not eligible for TAP support and is expected to have tuition funded by the awarding entity.

• State Dollars
  A GRA position paid entirely from startup funds, release funds, shrinkage, or other departmental funds (funds originally budgeted for another purpose) is not eligible for TAP support.

• KUEA Funds
  A GRA paid entirely through KU Endowment Association (KUEA) is not eligible for TAP support and the KUEA funding must include the cost of tuition.

• Overhead Support
  A GRA position paid entirely from returned overhead funds is not eligible for TAP support.

Split-Funded GRA Appointments

GRAs who are paid from split funds that are both eligible and ineligible for tuition assistance are eligible to have that proportion of their tuition paid from the TAP that represents the proportion of funding support they are receiving from a TAP-eligible funding source. Graduate students who have a split appointment as a GTA/GRA are similarly eligible for a proportional amount of tuition support from the TAP.

KU Medical Center GRAs

Students who are enrolled in a KU Lawrence Campus (KULC) doctoral program and who are employed as a GRA on the KU Medical Center (KUMC) campus are eligible for the TAP. The student’s KULC academic department should submit the TAP request and include proof of the GRA appointment on the KUMC campus.
Application Deadline
Requests for graduate tuition assistance from the TAP are preferably submitted 60 calendar days prior to the first day of classes for each semester. The final deadline for submission of TAP requests is 30 calendar days after the first published class day of each semester.

GTAs Who Are Non-Native Speakers of English
All prospective graduate teaching assistants of the state universities shall have their English competency assessed prior to being considered for any employment having classroom or laboratory instructional responsibility and/or direct tutorial responsibilities. The following shall be used to implement this policy:

1. All prospective graduate teaching assistants, whose first language is not English, must be interviewed by and have their competency in spoken English assessed by no fewer than 3 institutional personnel, 1 of which should be a student. An oral interview shall be conducted either face-to-face or by mediated means.

2. To be eligible for an appointment without spoken English language remediation conditions, all prospective graduate teaching assistants, whose first language is not English, shall be required to achieve a minimum score of 50 on the Test of Spoken English (TSE) or the Speaking Proficiency English Assessment Kit (SPEAK), or equivalent, or a minimum score, set by Board staff in consultation with the Academic Affairs Standing Committee, on the Speaking section of the Test of English as a Foreign Language internet Based Test (TOEFL iBT).

3. All prospective graduate teaching assistants who do not meet the above requirements shall not be assigned teaching responsibilities nor other tasks requiring direct instructional contact with students.

4. An exception will be made for courses taught in sign language.

5. A report detailing the process for interviewing graduate teaching assistants, whose first language is not English, including the composition of the interview team and scores from the TSE or SPEAK for each candidate, will be submitted to the President/CEO every other year.

View the current policy on Spoken English Language Competency of Faculty and Graduate Teaching Assistants (Kansas Board of Regents Policy) (https://policy.drupal.ku.edu/provost/spoken-english-competency-BOR-policy/).

Grading Calendar
The Graduate Studies graduation calendar is available online (http://graduate.ku.edu/graduation/).

Course Numbering System
Generally, graduate courses are numbered according to the following scheme:

- **Courses numbered 500-699** are designed for juniors and seniors, but are also taken by some graduate students who have fewer than 30 hours of graduate credit.
- **Courses numbered 700-799** are designed for graduate students who have fewer than 30 hours of graduate credit, but they are also taken by some undergraduates.
- **Courses numbered 800-899** are designed for graduate students who have fewer than 30 hours of graduate credit.
- **Courses numbered 900-999** are designed for graduate students who have 30 or more hours of graduate credit.

Courses that contain a mixture of undergraduate and graduate students should set requirements for graduate credit beyond or different from the requirements for undergraduate credit. No course, regardless of its number, can give graduate credit unless it has been approved for graduate credit by the appropriate Graduate Division and is taught by a person holding a current appointment to the Graduate Faculty. See the graduate credit section of the catalog (below) for more information.

Grading
**General Guidelines**
Grading scales are assigned on a course-by-course basis. The grading scale selected for a course must be appropriate to the course type and to the students and programs that the course serves. It is expected that designated thesis, dissertation, and their approved equivalent courses will be graded using either the A, B, C, D, F, P scale or the SP, LP, NP scale. (Use of the P grade is restricted in some divisions: please see the Exclusions and Special Circumstances of the Grading policy (http://policy.ku.edu/graduate-studies/grading?num=2.4) for more details.) Other research and non-research courses for degree- and certificate-seeking students will be graded using the A, B, C, D, F scale, with or without the use of the I grade at the department's discretion.

Once a grading scale for a particular course has been recommended by the department and approved by the Graduate Division, it must be applied to the entire student enrollment in the course or section. This applies to all graduate-level courses.

The individual schools and the College have the option of using or not using the +/-, according to the policy adopted by the particular school.

In courses that adopt the letter-grade scales, C- is not considered a passing grade. C-, D, and F work does not count toward fulfilling degree requirements. Overall, students must earn at least a B average (i.e., 3.0 GPA) on course work counted toward any master's, specialist, or doctoral degree at KU, and only courses graded A, B, or C (excluding C-) may be so counted. The student's graduate GPA calculation will include any degree- or certificate-seeking graduate course work completed at KU. Courses graded P, SP, LP, NP, S, U, CR, NC, or I are excluded from the computation of the GPA.

The I Grade: Incomplete Work
The I grade indicates course work that has been of passing quality but which is partially unfinished for good reason. Use of the I grade is optional in some grading scales but is not permitted by others (see below). Generally, the I grade is an appropriate option for enrollments other than thesis, dissertation, research, or the first semester of a two-semester sequence course.

As stated in the University Senate Rules and Regulations, Article II, Section 2.2.3.2 (http://policy.ku.edu/governance/USRR/#art2sect2): **“A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade...”**
This grading scales is established in Grading Scale: SP, LP, NP characterizes the quality of the final product. For departments that use this scale, a letter grade (A, B, C, D, or F) must be assigned for a student's final semester of enrollment in thesis, dissertation, or research course work. The SP indicates that the final product was of satisfactory quality to earn the degree.

Milestone Examinations

Honors, Satisfactory, Unsatisfactory

Performance on milestone examinations may be graded Honors, Satisfactory, or Unsatisfactory. These outcome grades are appropriate to the following milestone examinations:

• the general examination for the master's degree;
• the general examination for the degree of specialist;
• the comprehensive oral examination for the doctorate;
• the final examination for the doctorate.

Use of the Honors designation is at the department's discretion.

Other Grading Scales

Grading Scale: S, U, (I)

The grades of S and U designate satisfactory (S) and unsatisfactory (U) performance. This grading scale is appropriate to three types of course:

• continuing education courses;
• workshop courses;
• institute courses.

No more than 6 hours total of graduate course work graded S may count toward a degree. The S, U, (I) grading scale may be adopted at the department's discretion (see above for discussion of the I grade).

In courses numbered 800 or above, and for which specific authorization has been given, an instructor may report a grade of S for students who have satisfactorily attended the course but for whom it has not been possible to evaluate the quality of performance.

Grading Scale: CR, NC

The Credit (CR) or No Credit (NC) option is authorized for graduate students: a grade of CR will reflect work earning a C or better and the grade of NC will reflect work earning a C- or below.

As outlined in USRR 2.2.7.6 (http://policy.ku.edu/governance/USRR/#art2sect2), no course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree or a graduate certificate. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement. Please refer to the policy governing Research Skills and Responsible Scholarship (https://policy.drupal.ku.edu/graduate-studies/research-skills-responsible-scholarship/) for more information.

Graduate Credit

Three conditions must be met for a student to receive graduate credit for work satisfactorily completed at KU:

1. The student must have gained graduate admission.
2. The course must be numbered 500-level or above and have been approved for graduate credit by the appropriate school or College.
3. The instructor must hold a current appointment to the Graduate Faculty.

Non-degree-seeking students admitted to a particular program, school, or College will earn graduate credit for courses taken even though they are not working toward a credential. General non-degree-seeking students
Graduate courses taken as a degree-seeking student may count toward both a graduate degree and a graduate certificate as long as the student is admitted and enrolled in the intended program prior to completion of the last required course.

Graduate credit earned while certificate-seeking may also be applied toward a master's program with the approval of the master's program, provided the student is enrolled as degree-seeking in the master's program prior to the last semester of coursework in the program.

At the discretion of the certificate-granting or degree-granting program and the Graduate Division, up to 9 credit hours of graduate credit earned as a non-degree-seeking student may be allowed to count toward a certificate or degree program. In the case of a 9-hour graduate certificate, a maximum of 6 credit hours is allowed.

Grades of C- and below do not count toward fulfilling degree requirements and cannot be counted toward degree. Course credit by examination is not accepted toward graduate degrees.

### Cumulative Graduate GPA

For degree- and certificate-seeking graduate students, all graduate-level courses will be included in the calculation of the cumulative graduate GPA. Undergraduate courses, even when the student enrolls as part of their graduate career, will not count toward the cumulative graduate GPA. For students in Accelerated Master's (e.g., 4+1 or 3+3) programs, only courses taken after full admission as a graduate student will factor into the cumulative graduate GPA. Graduate courses counted as part of the undergraduate degree will not be counted in the cumulative graduate GPA.

For non-degree-seeking students, all undergraduate and graduate courses will count toward the student's cumulative graduate GPA while the student maintains their non-degree-seeking status. However, if a non-degree-seeking student applies, is admitted, and begins work on a degree- or certificate-seeking program, any undergraduate coursework they took as a non-degree-seeking graduate student will be removed from the calculation of their cumulative graduate GPA. Graduate courses taken while a non-degree-seeking student will continue to be included in the GPA calculation.

Grades of C- and below will affect the calculation of the cumulative graduate GPA. The grades of P, S, SP, LP, NP, U, and I, for which no numerical equivalents are defined, are excluded from the GPA calculation.

### Transfer Credit

At the discretion of the major department and the Graduate Division, up to 9 hours of graduate credit taken at a regionally-accredited graduate school may be transferred and applied to a KU master's degree plan if the credits were taken before the final semester of enrollment at KU.

Only work graded B (3.0 on a 4.0 scale) or higher may be transferred. KU does not accept transfer credit for courses that have been graded B- or below. KU also does not accept transfer for institutes, workshops, or for life/work experience. Credit will not transfer for courses that were previously counted toward the completion of an undergraduate or graduate degree.

A minimum of 15 credits toward a master's degree must be earned in KU coursework. As described in the M.A. & M.S. Degrees (https://documents.ku.edu/policies/Graduate_Studies/mamsdegrees.htm) policy, a 30-hour master's degree may be reduced to as few as 24 hours for students who are "exceptionally well-prepared." If coursework is transferred to KU, the same coursework cannot also be utilized to establish a student as "exceptionally well-prepared."

No graduate credit may be transferred toward a doctoral degree, but departments may take relevant prior graduate work into consideration in setting up programs of study.

Graduate credit from another institution may not be transferred to a KU graduate certificate program.

In order to transfer credits, the appropriate paperwork must be initiated by the student's department. The department/program and Graduate Division retain the discretion to deny a student's request to have transfer credit and/or non-degree-seeking credit count toward a degree or certificate. View the current policy on graduate credit (http://policy.ku.edu/graduate-studies/graduate-credit/).

### Graduate Course Work Expiration Dates

Courses completed at the University of Kansas, or transfer credits from another university, cannot be used to fulfill graduate degree requirements if these courses were completed more than 10 years prior to the final defense for doctoral candidates or graduation for master's students.

Faculty members retain the responsibility for determining the validity of courses that count toward the degree. Any decision to make an exception to the policy outlined above must be approved by the Graduate Division of the school or College in which the student's program resides. View the current policy on Graduate Coursework Expiration Dates (https://documents.ku.edu/policies/Graduate_Studies/Graduate_Coursework_Expiration_Dates.htm).

### Good Academic Standing

Evaluation of graduate student academic standing includes, but is not limited to, consideration of performance in and progress through a graduate program according to program expectations.

### Performance

Graduate students must maintain an expected level of performance throughout their program. Criteria for evaluating satisfactory performance include, but are not limited to:

1. For degree- and certificate-seeking students, a minimum cumulative grade point average (GPA) of 3.0 or higher and, for non-degree-seekers, a cumulative graduate GPA of 2.0 or higher.
2. Academic and scholarly integrity;
3. Compliance with academic policies at the university, school, and departmental level; and
4. For degree- and certificate-seeking students, satisfactory progress toward completion of the degree or certificate, as determined by the program. Graduate programs are responsible for evaluating students at least annually to assess progress toward a degree. Progress may be determined by factors including:
   a. Completion of coursework, milestones, exams, or other program components on a specified timeframe; and
   b. Official time to degree and total time in program.
Graduate programs may have additional measures of progress. Failure to maintain an expected level of performance will result in a student not being in good academic standing.

Lack of good academic standing will result in the graduate program placing the student on probation or in dismissal from the program (for more information, please see the policies on academic probation (http://policy.ku.edu/graduate-studies/academic-probation/) and dismissed enrollment (http://policy.ku.edu/graduate-studies/dismissed-enrollment?num2.2/)).

It is expected that graduate programs will evaluate students pursuing more than one degree program based on their progress in each program individually.

**Academic Probation**

Upon falling below a cumulative graduate grade-point average of 3.0, computed with the inclusion of grades earned at KU for all courses acceptable for graduate credit, the student is placed on probation by the graduate division of the school/college. The grades of P, S, U, and I, for which no numerical equivalents are defined, are excluded from the computation. If the student’s overall graduate average has been raised to 3.0 by the end of the next semester of enrollment after being placed on probation, the student may be returned to good academic standing. If not, the student is not permitted to re-enroll and will be dismissed unless the graduate division of the school/college acts favorably on a departmental recommendation for the student to continue study.

If admitted provisionally due to deficiencies in grade-point average, a student must earn an overall graduate average of at least 3.0 during the first semester of enrollment to be permitted to re-enroll, in which case the student is considered to have achieved good academic standing. A student admitted provisionally who fails to earn a 3.0 average in the first semester of enrollment may be dismissed immediately. If provisional continuation is recommended by the department or program and approved by the Graduate Division, the student may remain on provisional status for one additional semester.

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the Graduate Division that will accept the student. The petition must be approved by the Dean of Graduate Studies.

View the current policy on academic probation (http://policy.ku.edu/graduate-studies/academic-probation/).

**Progress to Degree Forms**

The Progress to Degree forms are the official forms, recognized by Graduate Studies, used to track and monitor graduate student progress at the University of Kansas. The forms should be used to report every aspect of academia, including, but not limited to, change in degree plans within the same department, changes in academic status, time limit extensions, leaves of absence, master’s-degree transfer credit, completion of comprehensive and oral exams, completion of certificate programs, and fulfillment of FLORS requirements.

The forms are available on the Graduate Studies website and should follow the workflow indicated for the individual function required.

**Enrollment**

**Graduate Student Enrollment**

All graduate students are expected to fit into one of the following enrollment categories at all times while completing the credits required for the fulfillment of their degrees.

- Full-time Enrollment
- Leave of Absence
- Discontinued
- Dismissed
- Post-comp Enrollment for Doctoral Candidates

Graduate students are not normally permitted to enroll for more than 16 hours each semester or more than 8 hours in the summer session.

Under some circumstances, undergraduate students may enroll in graduate courses.

- Undergraduate Enrollment in Graduate-Level Courses for Undergraduate Credit
- Co-enrollment (Seniors and Graduate Study)

View the current Lawrence and Edwards Campus policy on enrollment (http://policy.ku.edu/graduate-studies/enrollment?num2.3/).

**Full-Time Enrollment for Graduate Students**

Full-time and half-time enrollment consists of the following:

**Full-time enrollment for Fall and Spring semesters**

- Enrollment in 9 credit hours;
- Enrollment in 6 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 6 credit hours for graduate students using the Montgomery GI Bill – Active Duty (MGIB-AD) and Post-9/11 GI Bill – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s). (Please see the current policy on Doctoral post-comprehensive enrollment (http://policy.ku.edu/graduate-studies/doctoral-candidacy/).

**Full-time Enrollment for Summer Semesters**

- Enrollment in 6 credit hours;
- Enrollment in 3 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill – Active Duty (MGIB-AD) and Post-9/11 GI Bill – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s). (Please see the current policy on Doctoral post-comprehensive enrollment (http://policy.ku.edu/graduate-studies/doctoral-candidacy/).

**3/4-time Enrollment for Fall and Spring Semesters**

- Enrollment in 7 credit hours;
- Enrollment in 4.5 credit hours plus a GRA appointment, regardless of percentage of appointment. (Only master’s students in their final semester of study are eligible for the 3/4-time and half-time enrollment exception while holding a GRA appointment. For more information, please see the current policy on Graduate Research Assistant
3/4-time Enrollment for Summer Semesters

- Enrollment in 4.5 credit hours;
- Enrollment in 3 credit hours plus a GRA appointment, regardless of percentage of appointment. (Only master's students in their final semester of study are eligible for the 3/4-time and half-time enrollment exception while holding a GRA appointment. For more information, please see the current policy on Graduate Research Assistant Appointment Eligibility (http://policy.ku.edu/graduate-studies/GRA-appointment-eligibility/).

Half-time Enrollment for Fall and Spring Semesters

- Enrollment in 5 credit hours;
- Enrollment in 3 credit hours plus a GRA appointment, regardless of percentage of appointment. (Only master's students in their final semester of study are eligible for the 3/4-time and half-time enrollment exception while holding a GRA appointment. For more information, please see the current policy on Graduate Research Assistant Appointment Eligibility (http://policy.ku.edu/graduate-studies/GRA-appointment-eligibility/).

Half-time Enrollment for Summer Semesters

- Enrollment in 3 credit hours;
- Enrollment in 1 credit hour plus a GRA appointment, regardless of percentage of appointment. (Only master's students in their final semester of study are eligible for the 3/4-time and half-time enrollment exception while holding a GRA appointment. For more information, please see the current policy on Graduate Research Assistant Appointment Eligibility (http://policy.ku.edu/graduate-studies/GRA-appointment-eligibility/).

Students enrolled in fewer hours than defined as half-time enrollment are considered part-time.

All students should check with their graduate degree program's and the Office of Graduate Studies' policies to determine whether additional enrollment requirements exist (including any requirements for summer). View the current Lawrence and Edwards Campus policy on full-time enrollment for Graduate students (http://policy.ku.edu/graduate-studies/fulltime-enrollment/).

Note: A few internship programs have been approved by the Dean of Graduate Studies to count as full-time enrollment. Students enrolled in these internship programs will be counted as full-time students. Students should contact their programs to verify that an internship program qualifies.

International Students

International students in F-1 and J-1 status must also comply with Federal immigration requirements by pursuing a full course of study each semester to maintain their legal status. All international students must conform to residence requirements, even though immigration regulatory requirements may be lower.

Leave of Absence

A Leave of Absence may be granted upon request to the graduate program in advance of leave. A leave of absence may be granted in extraordinary circumstances (e.g. cases of illness, emergency, financial hardship, military leave), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals.

Appropriate documentation related to these extraordinary circumstances may be requested from the student directly. Evidence of progress toward degree will also be a determining factor in the decision to grant an exception.

The time taken for a leave of absence does not count against the student’s time to degree. However, if the total time for the leave extends more than five years, the student will lose the student's place in the program and must reapply for admission.

To request a leave of absence, the department or program must complete a Progress to Degree form. For more information, please contact Graduate Studies or view the current policy on Leave of Absence (https://documents.ku.edu/policies/Graduate_Studies/leaveofabsence.htm?num2.6/).

Dismissed Enrollment (Dismissal)

Graduate programs are responsible for evaluating the students in their programs to ensure that they are making satisfactory progress toward a degree. If a graduate program finds that a student is not making satisfactory progress, the program may recommend to the school or College that the student be dismissed from the program. Dismissal is requested by the graduate program through the Progress to Degree form.

Indicators of failure to make satisfactory progress toward a degree may include, but are not limited to, the following:

- Running out of allowable time to degree;
- Neither enrolling nor receiving approval for a leave of absence for two consecutive semesters;
- Committing Academic Misconduct;

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the Graduate Division of the school or College that will accept the student. The petition must be approved by the Dean of Graduate Studies.

Discontinued Enrollment

Students may voluntarily resign from their programs of study by requesting discontinuance. Once this request is granted, the student resigns their place in the program. In order to return to their studies at a later date, voluntarily discontinued students must reapply for admission. Departments or programs must request discontinuance through the Progress to Degree form. View the current Lawrence and Edwards Campus policy on discontinued enrollment (http://policy.ku.edu/graduate-studies/discontinued-enrollment?num2.1/).

Permit to Re-Enroll

A student who has been actively enrolled in a degree-, certificate-, or non-degree-seeking graduate program, but who has not been enrolled for
one academic year (three consecutive semesters, including the summer semester) or less, may be eligible to use the permit to re-enroll form with the consent of the student’s department or program.

A student who has been actively enrolled in a degree-, certificate-, or non-degree-seeking program, but who has not enrolled for four or more consecutive semesters without an approved leave of absence, is not eligible to use the permit to re-enroll form and must re-apply for graduate admission.

The permit to re-enroll form is not available to a student who:

- was dismissed from a program at KU;
- was voluntarily discontinued (formally withdrew) from a graduate program;
- completed the graduate program; or
- most recently enrolled as a non-degree-seeking graduate student.

Before completing the permit to re-enroll form, students should contact their graduate programs directly to confirm availability of the permit to re-enroll.

Students returning from an approved leave of absence will be returned from leave by their department; such students are not required to use the permit to re-enroll form.

Please review the current policy (http://policy.ku.edu/graduate-studies/permit-to-reenroll/) and the explanatory chart (http://graduate.ku.edu/sites/graduate.ku.edu/files/images/general/resources/Permit%20to%20Reenroll%20chart.pdf) for more information about the permit to re-enroll.

Seniors and Graduate Study (Co-enrollment)

Seniors at KU who will complete the requirements for a baccalaureate degree in a given semester may be allowed to enroll in graduate course work during their final semester. These seniors must have very strong academic records (grade-point average higher than 3.0 on a 4.0 scale), must apply and be admitted provisionally as degree-seeking graduate students, and must request the permission of the appropriate Graduate Division. Seniors requesting the privilege of co-enrollment must make formal application through the graduate affairs office of the appropriate school or College.

Procedure

To meet the criteria of co-enrollment, the student must earn undergraduate credit for at least 1 class during the co-enrollment semester. Continuing education courses may be used to satisfy this requirement. If, after the co-enrollment semester, the baccalaureate degree is completed, the student will not be permitted to enroll in courses for graduate credit until the baccalaureate degree has been conferred. After 1 semester, students are not eligible for co-enrollment and the graduate admission will be retracted.

Students who are eligible to co-enroll receive an email from the Registrar’s Office before enrollment with instructions on how to enroll in more than 1 career (ex. LAW, GRDL-Graduate, UGDL-Undergraduate). Students will have separate appointment times to enroll for each career and must enroll only in the courses that will count correctly toward the career in which they are enrolling during each appointment time. When enrollment is complete for each career, students must check the grading option for each course to ensure the class will be counted correctly.

View the current policy on co-enrollment (http://policy.ku.edu/graduate-studies/seniors-and-grad-study?num2.8/).

Undergraduate Student Enrollment in Graduate-Level Courses

Well-qualified undergraduate students may be permitted to enroll in 800- or 900-level courses for undergraduate credit with the approval of the instructor, the student’s advisor, and the Graduate Division. The student must bring a Count Towards Degree form signed by the instructor, a letter of explanation and recommendation from the advisor, and current academic record to the Graduate Division for approval. If approved, the Graduate Division signs the Count Towards Degree form, which the student must present to the staff in the Student Records Center to enroll in the courses. Courses taken for undergraduate credit may not be transferred to graduate credit.

View the current policy on undergraduate student enrollment in graduate-level courses (http://policy.ku.edu/graduate-studies/undergrad-student-enroll-grad-course/).

Embargo of Theses and Dissertations

When an exception to the immediate release of a thesis or dissertation is necessary, an embargo temporarily delays public release of the work. Embargo periods may last 6 months, 1 year, or 2 years. While embargoes are not intended to be permanent, renewals of the original embargo period are permissible. Considerations that may warrant an embargo include, but are not limited to:

- Patentable rights or other issues contained in the work, the disclosure of which may be detrimental to the rights or interests of the author.
- The need to prevent disclosure of government information about persons, institutions, technologies, etc. contained in the work.
- An academic or commercial press’ express interest in acquiring the rights to publish the work as a book that may require an embargo.
- Prior submission of the content to a peer-reviewed journal that may require an embargo.
- Prior approval for delay granted by the KU Restricted Research Committee.

Requests for an extension of the embargo should be directed to the Office of Graduate Studies and must be received at least one month prior to the expiration of the current embargo to ensure sufficient time to process the request. A request for an embargo submitted to the University of Kansas affects only the publication of the thesis or dissertation in KU ScholarWorks. It is the graduate student’s responsibility to request an extension from both the University of Kansas for the copy in KU ScholarWorks and separately through ProQuest/UMI for the copy housed there.

While there is no limit to the number of times a student can request an embargo extension, embargoes that have been allowed to expire without a request for an extension will result in the thesis or dissertation being made publicly available.

The embargo period will begin at the end of the semester in which the student graduates, with the specific dates being: December 31st, May 31st, and August 31st.
Steps necessary for embargoing a thesis or dissertation:

Theses and dissertations at the University of Kansas are made available in two electronic databases: KU ScholarWorks and ProQuest/UMI Dissertations and Theses. Items in KU ScholarWorks are publicly accessible on the world-wide web and can be indexed by search engines.

Students who do not wish to have their theses or dissertations made public in these two venues must receive permission from the director of graduate studies in their departments, their committee chairs, their department chairs, or the dean of the pertinent school or College to embargo their theses or dissertations. These students must document this permission using the Electronic Thesis and Dissertation (ETD) Release Form. The University of Kansas will accept the electronic submission of a thesis or dissertation—thereby completing all degree requirements—only if the student signs this release form. Likewise, the University of Kansas will only entertain requests for an embargo submitted using this release form.

Once the student has obtained the requisite signatures, the student must take two additional steps before graduation to ensure that their work is properly embargoed.

- First, the student must submit the Electronic Thesis and Dissertation (ETD) Release Form to the school or College. If an embargo has been approved, this form will ensure that the work is temporarily restricted in KU ScholarWorks.
- Second, during the electronic submission process to ProQuest/UMI, the student must select the embargo option under the publishing restrictions section. If an embargo has been approved, this step will ensure that public view of the work is temporarily restricted in the ProQuest/UMI Dissertations and Theses database. (Please view the Embargo (http://policy.ku.edu/graduate-studies/embargo-policy/) policy for more information.

Note: If a student does not receive permission for an embargo and/or does not submit the required documentation requesting such an embargo to the Office of Graduate Studies prior to graduation, the work will be made publicly available through KU ScholarWorks, and search engines will find and index the work. For this reason, once a work is released publicly, it is impossible to deploy an embargo in its entirety because copies of a released work are likely to be stored on the web even if the KU ScholarWorks and ProQuest/UMI copies are retracted. Therefore, it is crucial for students who desire the embargo option to request it prior to graduation and to request extensions, if needed, prior to the work being exposed to search engines.

Dissertation defenses are open to the public. In the event that an embargo is deemed necessary for a dissertation, the committee should consider holding an additional question period for the defense that is closed to the public. Any sensitive data may be discussed in the closed session.

Students from the following programs are permitted to request a permanent embargo of their theses and dissertations:

- Master of Fine Arts (MFA) in Creative Writing;
- Ph.D. in English: Literature and Creative Writing track;

View the current policy on embargo of theses and dissertations (http://policy.ku.edu/graduate-studies/embargo-policy/).

Graduate Student Oral Exam Attendance

Ideally, all members of the committee are physically present at graduate student oral examinations, which include the master’s final oral exam (i.e. thesis defense), the doctoral comprehensive oral exam, and the doctoral final oral exam (i.e. dissertation defense).

A majority of committee members must be physically present for an examination to commence; for doctoral oral examinations this requirement is 3 of the 5 members, for master's oral examinations the requirement is 2 of the 3 members.

In addition, it is required that the student being examined, the chair of the committee, and the Graduate Studies Representative all be physically present at the examination or defense. Mediated attendance by the student, chair, and Graduate Studies Representative is prohibited.

When a situation arises in which one or more committee members cannot be physically present, attendance via mediated means (video-conferencing) is acceptable at the discretion of the student and the committee chair. All members of the examining committee must be aware of what transpires during the examination. All committee members must be able to participate fully in the discussion with the student and each other. Any material presented during the examination, orally or in writing, shall be seen and heard by all members.

In cases where the student prefers an examination in which all committee members are physically present, the student's preference shall be honored.

In the case of technology failure during the examination, all physically-present members of the committee must concur that the examination was substantially complete in order to move to an outcome vote. If any member of the committee dissents, the examination is considered canceled and must be rescheduled. If the exam is judged complete, the committee members at remote locations must be contacted to submit their assessment before the exam results are recorded.

Graduate Studies will manage exceptions to the policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the graduate division of the governing school or College for endorsement, then submitted to the Dean of Graduate Studies for consideration. When possible, petitions for exception should be submitted to the Dean of Graduate Studies at least one week in advance of the exam. If exceptions are granted, Graduate Studies may request that a member of the departmental leadership (the Chair or Director of Graduate Studies) be present at the examination.

View the current policy on Graduate Student Oral Exam Attendance (https://documents.ku.edu/policies/Graduate_Studies/GGraduate_Student_Oral_Exam_Attendance.htm).

Grievance Policy for Graduate Students

Graduate students who believe themselves to be unfairly or unlawfully treated in an academic matter may present a grievance to the academic department or program chair. Each academic unit and all Graduate Divisions have established grievance policies and procedures. Appeal of a grievance heard at one of these levels is made to the Judicial Board. The Office of Graduate Studies has established a set of guidelines for graduate student petitions in certain categories that may not be under the jurisdiction of other hearing bodies. The Executive Council of Graduate
Faculty has identified two categories as the purview of the Office of Graduate Studies:

1. Cases involving the Graduate Divisions of two or more schools and/or the College;

2. Cases involving the interpretation of Graduate Studies policy as it pertains to the Graduate Division of a school or the College.

For disputes involving alleged academic misconduct or alleged violations of student rights, the initial hearing normally is held at the unit level. There is an option to hold an initial hearing at the Judicial Board level if both parties agree, or if either party petitions the Judicial Board chair to hold the hearing at the Judicial Board level and the petition is granted. The petition must state why a fair hearing cannot be obtained at the unit level; the opposing party has an opportunity to respond to the petition.

Procedures for Graduate Student Grievances

Pursuant to Article XII of the University Senate Code and Articles V and VI of the University Senate Rules and Regulations of the University of Kansas, Lawrence, the Office of Graduate Studies establishes the following procedures to hear the individual grievances of graduate students. Except as provided in USRR 6.5.4, no person shall be disciplined for using the grievance procedure or assisting another in using the grievance procedure. The Office of Graduate Studies shall provide a copy of this procedure to anyone who requests it.

A sub-committee of the Executive Council of Graduate Faculty is charged to establish policies governing the handling of individual grievances of graduate students brought to the attention of the Office of Graduate Studies, to carry out or delegate the investigation of individual grievances presented to the Office of Graduate Studies, and to make and report final recommendations to the Dean of Graduate Studies with respect to individual grievances. Since the sub-committee has the responsibility to adjudicate and hence to hear grievances, it cannot function to develop evidence on behalf of either complainant or respondent. However, it is appropriate for the Office of Graduate Studies, in its administrative capacity, to look into complaints prior to scheduling a grievance hearing, to interview parties, to secure documents, and to seek a conciliatory solution. Before pursuing formal grievance procedures, a grievant should ordinarily attempt to resolve the matter informally through direct or indirect consultation with the other party, through discussions with supervisory personnel, or through informal mediation. If the problem is not solved in this fashion the Dean shall refer the complainant to the sub-committee or, if appropriate, to another appropriate unit charged with jurisdiction to resolve the dispute. If it is referred to the sub-committee, the Office of Graduate Studies shall make available to the committee what it has learned that bears on the complaint. This shall not be construed, however, to deny the right of a student to file a complaint directly with the committee.

1. To start the grievance process, the complainant must submit a written grievance to the Office of Graduate Studies. The complaint shall contain a statement of the facts underlying the complaint and specify the provision(s) of the Faculty Code of Conduct, University Senate Code, the University Senate Rules and Regulations, the Code of Student Rights and Responsibilities, or other applicable rule, policy, regulation, or law allegedly violated. The complaint shall also indicate the witnesses or other evidence relied on by the complaining party, and copies of any documents relevant to the complaint shall be attached to the complaint.

2. At the time the complaint is submitted to the Office of Graduate Studies, the complaining party shall provide a copy of the complaint, with accompanying documents, to the respondent(s).

3. Upon receipt of the complaint, the Office of Graduate Studies shall contact the respondent to verify that the respondent has received a copy of the complaint and to provide the respondent with a copy of these procedures.

4. Pursuant to University Senate Code Article XII, Section 2.VI (http://policy.ku.edu/governance/university-senate-code/#ArtXII), a respondent has the privilege of remaining silent and refusing to give evidence in response to a complaint. The respondent also has the right to respond and give evidence in response to the complaint.

5. The respondent shall submit a written response to the Office of Graduate Studies within 14 calendar days of receiving the complaint. The response shall contain the respondent’s statement of the facts underlying the dispute as well as any other defenses to the allegations in the complaint. The response shall also identify the witnesses or other evidence relied on by the respondent and shall include copies of any documents relevant to the response. The respondent shall provide a complete copy of the response to the complaining party.

6. Upon receipt of the response, the Office of Graduate Studies shall contact the complaining party to verify that a copy of the response has been provided.

7. Upon receiving the complaint and response, or if the respondent fails to respond within the 14-day time period, the Office of Graduate Studies shall appoint a committee to consider the complaint. Normally, a complaint shall be heard by a sub-committee of the Executive Council of Graduate Faculty from among the members of the committee. The sub-committee members shall be disinterested parties who have not had previous involvement in the specific situation forming the basis of the complaint. In the summer, if the complainant requests a hearing before the full committee the complainant must waive the right to timely hearing (see 11 below) and a hearing date will be scheduled early in the fall.

8. Pursuant to USRR 6.8.4.2 (http://policy.ku.edu/governance/USRR/#art6sect8), the chair of the sub-committee may contact other hearing bodies within the University to determine whether a grievance or complaint involving the underlying occurrence or events is currently pending before or has been decided by any other hearing body.

9. Time limits. To use this procedure, the complainant must file the written complaint with the Office of Graduate Studies within 6 months from the action or event that forms the basis of the complaint. The 6-month time period shall be calculated using calendar days (including weekends and days during which classes are not in session).

10. Upon receiving the complaint, if the chair of the sub-committee determines that any of the following grounds exist, the sub-committee chair may recommend to the Dean that the complaint be dismissed without further proceedings. The grounds for such dismissal are:
   a. the grievance or another grievance involving substantially the same underlying occurrence or events has already been, or is being, adjudicated by proper University procedures;
   b. the grievance has not been filed in a timely fashion;
   c. the Office of Graduate Studies lacks jurisdiction over the subject matter or any of the parties;
   d. the grievance fails to allege a violation of a University rule;
   e. the party filing the grievance lacks standing because the complainant has not suffered a distinct injury as a result of the challenged conduct and has not been empowered to bring the complaint on behalf of the University;
f. the party filing the grievance has been denied the right to file grievances pursuant to USRR 6.5.4. (http://policy.ku.edu/governance/USRR/#art6sect5)

11. If the chair of the sub-committee determines that a grievance on its face properly should be heard by another body, the chair will recommend that the Dean send the grievance to the appropriate hearing body without further proceedings in the Office of Graduate Studies. The Dean will send a copy of the referral to the complainant(s) and any responding parties.

12. If not previously attempted, prior to scheduling a hearing, the parties shall participate in mediation of the dispute unless either party waives mediation. Mediation shall be governed by USRR 6.2.3. (http://policy.ku.edu/governance/USRR/#art6sect2)

13. If mediation is successful, the mediator will forward to the Dean, the sub-committee chair, and all parties a letter describing the outcome of the mediation and the terms upon which the parties have agreed to resolve the dispute. This letter shall be a recommendation to the Dean. The Dean will notify the mediator, the sub-committee chair, and the parties that the recommendation has been accepted, modified, or rejected.

14. If mediation is not successful, the mediator will notify the Dean, the sub-committee chair, and the parties that mediation has terminated. If mediation is not successful, or if it is waived by either party, the grievance sub-committee will schedule a hearing no later than 30 calendar days from the written submission of the complaint. The 30-day period may be extended for good cause as determined by the chair of the sub-committee. The 30-day period shall be suspended during the mediation process. The hearing will be closed unless all parties agree that it shall be public.

15. All parties may represent themselves or be represented by an advisor or counsel of their choice.

16. Each party has the right to introduce all relevant testimony and documents if the documents have been provided with the complaint or response.

17. Each party shall be entitled to question the other party’s witnesses. The committee may question all witnesses.

18. Witnesses other than parties shall leave the hearing room when they are not testifying.

19. The chair of the sub-committee shall have the right to place reasonable time limits on each party’s presentation.

20. The chair of the sub-committee shall have the authority and responsibility to keep order, rule on questions of evidence and relevance, and shall possess other reasonable powers necessary for a fair and orderly hearing.

21. The hearing shall not be governed by the rules of evidence, but the chair of the sub-committee may exclude information the chair deems irrelevant, unnecessary, or duplicative. Statements or admissions made as part of the mediation process are not admissible.

22. The sub-committee will make an audiotape of the hearing but not of the deliberations of the sub-committee. The audiotape will be available to the parties, their authorized representatives, the sub-committee and the Dean. If a party desires a copy of the audiotape or a transcript of the tape, that party will pay for the cost of such copy or transcript. In the event of an appeal, the audiotape will be provided to the appellate body as part of the record of the case.

23. After the presentation of evidence and arguments, the sub-committee will excuse the parties and deliberate. The sub-committee’s decision shall base its recommendations solely upon the information presented at the hearing.

24. The sub-committee will send its written recommendation to the Dean and the parties as soon possible and no later than 14 calendar days after the end of the hearing.

25. Within 14 calendar days of receiving the sub-committee recommendation, the Dean will notify the parties of the acceptance, modification, or rejection of the recommendation. The Dean will advise the parties of the procedures available to appeal the decision.

View the current policy on Grievance Procedure for Graduate Studies (http://policy.ku.edu/graduate-studies/grievance/).

Student Responsibilities

All graduate students are responsible for informing themselves of the Office of Graduate Studies’ requirements and policies. Students should visit the Graduate Studies website (http://www.graduate.ku.edu/) for the most up-to-date requirements and policies. Graduate students are also expected to be familiar with the regulations and requirements of their Graduate Divisions and of their home academic departments and programs. Members of the Graduate Faculty and staff members in the Graduate Divisions are expected to be ready to answer questions and offer counsel.

It is each graduate student’s responsibility to know and observe all regulations and procedures relating to the graduate degree program the student is pursuing. In no case will a regulation be waived or an exception be granted because students plead ignorance of, or contend that they were not informed of, requirements, regulations, procedures, and deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

The University of Kansas

2553
Office of Graduate Studies, Medical Center Campus Students

The Office of Graduate Studies (a unit of the Office of Academic and Student Affairs (http://www.kumc.edu/academic-affairs.html)) on the KU Medical Center campus (http://www.kumc.edu/) is the administrative unit responsible for graduate education on that campus. A variety of graduate programs are offered through the Medical Center’s Schools of Health Professions (p. 630), Medicine (p. 2180), and Nursing (p. 2404).

Graduate degrees on the Medical Center campus are conferred by the Schools of Health Professions, Medicine, and Nursing. Appointments to the Graduate Faculty are recommended by the individual academic units offering graduate programs. The appointment process is administered by the Graduate Studies office with approval for graduate appointments granted by the Dean of Graduate Studies.

Goals of Graduate Study

Independent scholarship, competence in research or other creative work, and the cultivation of teaching commitment and skill are the traditional goals of graduate study. Having acquired a broad education as an undergraduate, the student is expected to master a special field, to learn the methods of investigation employed therein, and to proceed toward making an original contribution to knowledge. Since many of those who earn advanced degrees find careers in higher education, the acquisition of skill in teaching and in directing research is also an essential part of graduate education.

These traditional goals gain renewed significance in changing times, while newly emerging societal interests and needs and new demands of the marketplace both underscore their importance and emphasize the necessity for flexibility in programs and accommodation in career objectives.

Research

Research is an integral part of the university’s educational mission. The National Science Foundation classifies KU as a major university receiving substantial research support. KU is also a Carnegie Doctoral/Research Extensive University and has been a member of the Association of American Universities since 1909. The university has a long and successful record of research collaboration through independent, multidisciplinary research centers that focus on common themes. For more information about research on the Medical Center campus, visit the University of Kansas Medical Center Research Institute (http://www.kumc.edu/kumcri.html) website page.

This catalog is not itself a source of policy and does not create a contract between the University of Kansas and its students. University policy is the binding agent in the event an inconsistency is noted between the catalog and official University policy. Whenever possible the catalog provides information from the latest policies at the time of publication.

- Admission Notification (p. 2556)
- Admission Procedure (p. 2556)
- Application Fees (p. 2556)
- Background Check (p. 2556)
- Degree Seeking Admission (p. 2554)
- Graduate Certificate Admission (p. 2555)
- Minimum English Proficiency Requirement (p. 2555)
- Non-degree Seeking Admission (p. 2555)
- Reactivation (p. 2556)

Admission to Graduate Studies

Persons whose records indicate their ability to succeed with advanced work may be admitted for graduate study. Applicants may apply as degree seeking, non-degree seeking, or to a Graduate Certificate program. Applicants seeking an identifiable degree program are degree seeking, while those applicants who do not have an identified degree program should be admitted under the non-degree seeking category. No student may work toward a graduate degree without being accepted as a degree seeking student in a specific graduate program.

Degree Seeking Admission

Students who wish to work toward a specific graduate degree should be considered for admission under the degree seeking category.

Regular Admission

Regular admission status requires a bachelor’s degree and a cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale, from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements. The bachelor’s degree is not acceptable if it contains credit awarded for work experience that was not directly supervised by faculty members (life experience) of an accredited university or not evaluated in units that identify the academic content (e.g., P/F, S/U). Applicants who are not native speakers of English must demonstrate they meet the Minimum English Proficiency Requirements as described below.

Applicants must meet these minimum admission requirements to qualify for regular admission. Individual academic programs may have additional admission requirements that the applicant must also meet to be eligible for regular admission status to that program.

In exceptional cases, persons not holding bachelor’s degrees may be admitted if they are academically well prepared. In these cases, the Dean of Graduate Studies reviews the student’s academic background and a letter of petition from the program director and determines if the student will be admitted for graduate study.

Regular Admission, Special B

The Special B Admission category is available only to degree seeking graduate students applying to the Interdisciplinary Graduate Program in Biomedical Sciences (p. 2274) (IGPBS)
offered by the School of Medicine. A student meeting the minimum admissions requirements described under Regular Admission and the academic standards of the basic science departments is admitted to graduate study in IGPBS.

After completion of the IGPBS program, the student seeks admission directly into a specific graduate discipline in one of the basic science departments. When the department accepts an IGPBS student, the department submits a Progress to Degree form to formally change the individual student's academic program from IGPBS to the specific basic science doctoral program.

Non-degree Seeking Admission

A non-degree seeking applicant applies to the university for admission as a non-degree seeking student and may be processed by a specific department or program. Admission requires a bachelor's degree from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements. Applicants who are not native speakers of English must demonstrate they meet the Minimum English Proficiency Requirements as described below. The applicant is not required to meet the other admission standards of regular admission.

Non-degree seeking admission is not intended to bypass regular admission into a graduate degree program. However, if a non-degree seeking student later applies for admission as a regular degree seeking student, and is accepted by an academic program, the total transfer credits toward a graduate degree may not exceed six hours, or eight hours if the student holds a baccalaureate degree from KU (this total includes credit from other accredited graduate programs as well as non-degree credit earned at KU).

Graduate Certificate Admission

An application is required to pursue a graduate certificate. A graduate certificate program must adhere to the same minimum admission standards required for degree seeking admission as described in the section above.

No student may work toward a graduate certificate without being accepted in a specific graduate certificate program. Graduate certificates are not granted retroactively. Graduate credit from another institution may not be transferred to a KU graduate certificate program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral of the certificate.

Applicants apply directly to a graduate certificate program for admission unless the applicant is a current graduate degree seeking student. To admit a current degree seeking graduate student to a certificate program, the student must be in good standing (3.0 or higher grade-point average) with their degree program. If pursuing a graduate certificate offered by another department, the student must inform the graduate director, advisor, or coordinator in the home department, the student must then make application directly to the graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the program to the Office of Graduate Studies and within general guidelines, be approved by the Dean of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program.

Minimum English Proficiency Requirement for Admission to a Graduate Program

Academic programs must verify that all applicants, whether domestic or international, who are not native speakers of English, meet the minimum English proficiency requirement to be admitted for graduate study as degree seeking, non-degree seeking, or certificate program students. Verification may come in any one of the following forms:

- Official transcript showing the applicant graduated with a baccalaureate degree (or higher) earned in residence from an accredited U.S. institution of higher education.
- Official transcript showing the applicant graduated with a baccalaureate degree (or higher) from an institution whose medium of instruction is English. This does not apply to degrees earned online. The verification may be from a catalog or program description brochure or an official letter from a department chair, dean, or other university official stipulating English as the language of instruction. Verification of English instruction from the institution must be included unless the degree is from one of the countries on the "TOEFL/IELTS Exemption List" posted on the Office of International Programs (http://www.kumc.edu/international-programs/academic-english-requirements.html) website. The program considering admission should also conduct a phone interview with the prospective student.
- Receipt of an official copy (not student's copy) of applicant's TOEFL or IELTS scores achieved not more than two years before the semester of admission. Below are the minimum scores required on the TOEFL or IELTS to satisfy the minimum English proficiency requirement for admission. Individual programs may opt for a more restrictive policy regarding English proficiency for the students they recommend to Graduate Studies for admission.

**TOEFL scores (paper)**
- 57 overall minimum
- 5.0 minimum on essay

**TOEFL scores (iBT)**
- 23 minimum Reading and Listening
- 19 minimum on Writing

**IELTS scores**
- The overall band score should be at least 6.5 with no component band score below 6

If a student does not meet the minimum requirement for admission, the academic program may petition the Dean of Graduate Studies for
an exception. The petition will include a justification for admitting the specific student, including a description of the interview process, and a plan for the student to achieve academic success. The petition should also describe the metrics that the program proposes for evaluating the academic success of the student and the timeline that will be followed for the plan.

Additional Spoken English Proficiency Requirements for Graduate Teaching Assistant, Medical Center Campus

The Kansas Board of Regents (http://www.kansasregents.org/) requires that in order to be appointed as a Graduate Teaching Assistant (GTA), students must first attain a minimum score of 50 on the TSE or SPEAK tests, a minimum iBT speaking score of 24, or a minimum IELTS speaking score of 8. The SPEAK test is administered free of charge by appointment in the Office of International Programs (http://www.kumc.edu/international-programs/academic-english-requirements/speak-test-faq.html). SPEAK scores from other institutions will not be accepted.

Admission Procedure — Medical Center Campus

The Office of Admissions (http://www.kumc.edu/student-services/office-of-admissions.html) facilitates the application process for all graduate programs through the KUMC online application (https://www.applyweb.com/apply/kumc/). To ensure adequate time for review, the applicant should check with each individual degree program for its application deadline date.

Graduate Studies requires official transcripts from the baccalaureate granting institution that show a bachelor's degree was conferred, plus any transcripts from institutions attended post-baccalaureate. International applicants must provide English proficiency test scores as described in the Minimum English Proficiency Requirement above. Programs may request transcripts for all college courses taken and other application materials. Applicants should check with the program to which they are applying for information on required, program-specific application materials.

Background Check

A background check is required during the admission process; it may affect the student's eligibility to enter the program. In the case of students involved in direct patient contact, additional checks maintained by various health care disciplines may be required. Prospective students should check with their individual academic programs regarding these requirements.

All domestic students, as well as any international students who have been in the United States for more than 30 days prior to admission*, must submit to at least a standard background check through Validity Screening Solutions. In the case of students involved in direct patient contact, additional checks of Employment Disqualified Listings maintained by various health care disciplines may be required by specific programs. Prospective students should check with their individual department or program to determine the process and appropriate institutional or program code number to be provided to Validity Screening Solutions for the transmittal of the background check results.

Background check results will be considered on a case-by-case basis, but in general, the following may be considered as disqualifying findings and therefore prevent admission or matriculation. Future licensing requirements can determine admission.

- Felony convictions
- Misdemeanor convictions or felony deferred adjudications involving crimes against persons (physical or sexual assault or abuse)
- Misdemeanor convictions related to moral turpitude (e.g., prostitution, public lewdness, etc.)
- Felony deferred adjudications for the sale, possession, distribution or transfer of narcotic drugs or other controlled substances
- Registered sex offender status
- Medicare, Medicaid or other healthcare fraud or misuse

Should you have any questions concerning this requirement for admission to Medical Center campus programs, please contact your specific program or department.

*International students admitted on valid visas and who have not resided in the United States for more than 30 days may be excused from this requirement due to the background checks conducted as part of their visa screening process.

Application Fees

Nonrefundable application fees payable to the University of Kansas are required. Rates are subject to change. Some departments and programs require deposits from admitted students to be fully credited against tuition upon enrollment.

Admission Notification

Each applicant is notified of the admission decision by email. The admission decision letter from the Dean of Graduate Studies includes the admission classification (degree-seeking, Special B, non-degree seeking or certificate-seeking). For all admission categories, enrollment in specific courses may be subject to fulfillment of program course prerequisites and/or consent of the instructor.

After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission to graduate studies does not imply admission to candidacy for a higher degree. Requirements for an advanced degree must be regarded as minimum requirements. Additional requirements depend on the student's undergraduate preparation and the particular field of graduate work chosen.

Reactivation

Students who are not continuously enrolled should check with their academic program to see if they will be required to re-apply for admission or if they may be reactivated without re-applying. If permission is granted...
by the program to re-activate, the student completes the Reactivation Form (http://www.kumc.edu/reactivationform/) posted on the Registrar’s website. Individual programs make the determination about when a student is required to re-apply. However, after an absence of 5 years, Graduate Studies requires the student to re-apply for admission to their graduate program.

Limitations on Admission

Because of limitations of space, faculty, or general resources for research and instruction, some programs must restrict the number of applicants they admit. Questions should be directed to the program to which the prospective student wishes to apply.

- Awarding of Degrees (p. 2557)
- Combined Degrees (p. 2566)
- Dissertation Committee for Ph.D. (p. 2563)

- Master's Degree Requirements (p. 2557)
- Master's General Examination, Thesis Defense or Project Defense (p. 2558)
- Oral Comprehensive Exam for Ph.D. (p. 2562)
- Post-Comprehensive Enrollment for Ph.D. (p. 2563)
- Research Skills and Responsible Scholarship for doctoral students (p. 2560)
- Thesis Submission and Publication for master's students (p. 2558)

Awarding of Degrees

Degrees are awarded three times each year, in August, December, and May. Degrees are conferred formally at the annual commencement held in May each year. Degree candidates are not eligible to graduate if the graduate cumulative grade-point average is lower than 3.0 in all courses taken for graduate credit.

Students who are working toward two degrees must complete requirements for each degree. Course work may not count toward fulfilling degree requirements for more than one degree.

Graduate students may not earn an additional KU degree with the same name and degree code as a previously awarded degree from KU. This applies to the completion of different degree tracks, concentrations, and subspecialties within a given degree. This does not prohibit students from earning additional master’s or doctoral degrees in another discipline.

Master's Degree Programs

Master of Arts (M.A.) and Master of Science (M.S.)

Historically, most of the master’s degrees granted have been the Master of Arts (M.A.) and Master of Science (M.S.). This fact conforms with the traditional liberal arts background out of which most U.S. graduate schools developed. The degree requirements for the M.A. and M.S. are generally concentrated in one area or major discipline. The KU Medical Center campus, with oversight from the Office of Graduate Studies, offers Master of Science degrees in several disciplines through the Schools of Health Professions (p. 630), Medicine (p. 2180), and Nursing (p. 2404).

Professional Master’s Degrees

In more recent years, professional master’s degree programs have been developed for entry level or advancement in specific professions. On the Medical Center campus, this includes health services administration (M.H.S.A.) (p. 2224), occupational therapy (M.O.T. (p. 753)), and public health (M.P.H.). (p. 2268)

Master’s Degree Requirements

This section gives the general and common requirements for all master’s degree programs offered. The program sections of the online catalog give specific requirements for the degrees they offer.

Master’s Program Time Constraints

Normal expectations are that most master’s degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study. However, master’s degree students are allowed 7 years for completion of all degree requirements. In cases in which compelling reasons or circumstances recommend a 1-year extension, the Office of Graduate Studies, on recommendation of the academic program, has authority to grant the extension.

In cases where more than 8 years are requested, the Office of Graduate Studies considers petitions for further extensions. These may be granted provided evidence of continuous progress, currency of knowledge, and other reasons are compelling. Some academic programs may have more stringent rulings about time restrictions. Students should ask about the policy in effect in the academic program in which they plan to study.

Master’s Enrollment Requirement

All graduate students enrolled in master’s graduate programs must be enrolled the semester they complete master’s degree requirements. Master’s students who complete degree requirements during the first week of summer session or within the first 2 weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester. See the current Graduate Studies Calendar (http://www.kumc.edu/academic-affairs/graduate-studies/calendars.html) for deadlines for specific semesters.

M.A. and M.S. Specific Degree Requirements

A Master of Arts (M.A.) or a Master of Science (M.S.) degree requires at least 1 year of graduate work or its equivalent. Stated in terms of hours of credit, the standard master’s program requires 30 hours. With permission of the academic program (or in the case of interdepartmental programs, permission of the joint program committee) and of the Office of Graduate Studies, it is sometimes possible to complete a 30-hour master’s degree with as few as 24 hours if the student enters the program especially well prepared
and maintains a superior grade-point average. Work for a master’s degree is concentrated in the major area, with only a minimal amount of work (usually no more than 6 hours) that is completed at KU permitted outside the major department. Each master’s program must contain a research component, represented either by a thesis (usually for 6 hours of credit) or by an equivalent enrollment in research, independent investigation, or seminars. Within these requirements, departmental master’s programs may be flexible enough to meet the particular needs of individual students.

In a few cases, the degree is offered through two schools and administered by joint committees with faculty representation from both schools. The Master of Arts degree in speech-language pathology and the Master of Arts degree in audiology are administered by an intercampus committee drawn from the Department of Speech-Language-Hearing: Sciences and Disorders in Lawrence and from the Department of Hearing and Speech in the School of Health Professions in Kansas City.

M.A. and M.S. Final General Examination, Thesis Defense or Project Defense

Completion of a final general examination, defense of a thesis, or defense of a project in the major subject, is the culminating academic phase of the M.A. and M.S. degree programs and is required of all candidates for these two degrees. At the option of the academic program, the final general examination may be oral or written, or partly oral and partly written. In some departments, passing a written examination is a necessary preliminary to taking the oral examination by which success or failure is judged. For students defending a master’s thesis, the student must be enrolled in a minimum of one hour of master thesis the semester the thesis is defended.

The committee for the administration of the general exam or the defense of a thesis or project, must consist of at least 3 members, all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2567) section of this catalog. The majority of committee members serving on a graduate student oral examination committee in most cases are in the candidate's department/program of study.

The examination is held during the semester of the student’s final enrollment in course work. The thesis defense should be held when the thesis has been substantially completed and is held normally during the student's final semester of enrollment. If defending a thesis, the student must be enrolled in a minimum of one hour of theses the semester the student defends the thesis.

When a M.A. or M.S. student is in their final semester, the degree program requests the Office of Graduate Studies approve the scheduling of the final general exam, thesis, or project defense via the Progress to Degree system. The degree program should ascertain that the student is in good academic standing (3.0 or higher cumulative grade-point average) before scheduling the examination or defense. The Progress to Degree request must be submitted at least two weeks prior to the examination date. The Office of Graduate Studies verifies that criteria described in the preceding paragraphs has been met upon receiving a Progress to Degree form requesting the scheduling of the general exam, thesis defense, or project defense. If the criteria has been met, Graduate Studies approves the request to proceed.

For every scheduled examination, thesis defense or project defense, the degree program reports on the Progress to Degree form an examination result of Honors, Satisfactory, or Unsatisfactory. Use of the Honors designation is at the program's discretion. If the aspirant receives a result of Unsatisfactory, it may be repeated upon the recommendation from the program/department.

Ideally, all members of the committee are physically present for the final general exam, thesis defense, or project defense. A majority of committee members must be physically present for the examination or defense to commence; for master’s oral examinations the requirement is 2 of the 3 members.

In addition, it is required that the student being examined and the chair of the committee be physically present at the examination or defense. Mediated attendance by the student or chair is prohibited. When a situation arises in which a member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair. In cases where the student prefers an examination in which all committee members are physically present, the student's preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the exam policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

M.A. and M.S. Thesis Submission

When the thesis defense has been passed and the thesis title page has been signed by the members of the committee, the title page with original signatures is delivered to the Office of Graduate Studies. When all requested changes have been made to thesis, the student arranges for the thesis committee chair to review the changes and then sign and date the acceptance page. The acceptance page with original signature is also delivered to the Office of Graduate Studies as verification the thesis is approved for publishing.

The student is then required to arrange publication of the thesis through ProQuest (https://www.proquest.com/products-services/dissertations/) and payment of all associated fees (including copyright fee if applicable), through the electronic submission process (http://www.prograduate.ku.edu/electronic-thesis-and-dissertation/) detailed on the Graduate Studies website. Formatting requirements and instructions for the proper format of the thesis are included on the website. The student must be the author of the
thesis, and every publication from it must indicate that authorship. Practices vary among disciplines, and even among scholars in a given field, as to whether the mentor’s name may appear as a co-author and whether as senior or junior, on subsequent publication of the thesis (usually revised), or on articles prepared from it. Clear understandings in individual cases are expected to be established during the apprenticeship period, when the ethical practices in publication are addressed within the program’s professional development training.

A form regarding publication permissions and embargo preferences is one of the required documents that is submitted to the Office of Graduate Studies following successful defense of the thesis. Theses will be made available through ProQuest (http://www.proquest.com/products-services/dissertations/) and KU ScholarWorks (https://kuscholarworks.ku.edu/) unless there is an embargo in place or special circumstances pertain as outlined in the Embargo of Theses and Dissertations (https://catalog.ku.edu/graduate-studies/kumc/#regulationstext) policy in the Regulations section of this catalog.

**Doctoral Degree Programs**

KU Medical Center campus with oversight from the Office of Graduate Studies offers the Doctor of Philosophy (Ph.D.) in several specific disciplines and offers seven clinical doctorate degree programs. General descriptions for each of the doctoral degrees offered are given here in succinct form to provide convenient comparison of the degrees. Detailed information about requirements for each degree as it is offered in specific disciplines should be obtained from the appropriate academic program pages in this catalog. Note: The School of Medicine also offers the Doctor of Medicine (p. 2288) (M.D.) (p. 2288) degree which is administered by the School of Medicine.

**Doctor of Philosophy (Ph.D)**

The degree of Doctor of Philosophy (Ph.D.) is the highest degree offered by the university. It is awarded for mastering a field of scholarship, for learning the methods of investigation appropriate to that field, and for completing a substantial piece of original research. In addition to preparing research specialists, the process of earning a Ph.D. shares certain goals with liberal education: putting order into human experience; fostering a love of learning for its own sake; instilling respect for human values; integrating various human powers into a process of creation; and making vital, in many fields at least, a sense of history.

Although the courses and research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The Ph.D. aspirant is expected to be a well-educated person with a broad base of general knowledge, not only as preparation for more advanced work but also as a means of knowing how the chosen specialty is related to other fields of human thought.

To give depth and breadth to their doctoral programs, many departments require some work in a minor field or at least an articulated selection of courses. Because of the diversity of the fields in which the Ph.D. is offered, and the variety of needs and interests of individual students, the degree does not have a specific requirement for a minor. However, the Ph.D. aspirant is encouraged to plan an integrated program, under departmental direction, that includes courses outside the major field.

Doctor of Philosophy (Ph.D.) is offered by programs in specific disciplines by the Schools of Health Professions (p. 630), Medicine (p. 2180), and Nursing (p. 2404). Admission and degree requirements are listed under the individual programs in each school of this online catalog.

**Clinical Doctorates:**

**Clinical Doctorate in Speech-Language Pathology (S.L.P.D.)**

The Clinical Doctorate in Speech-Language Pathology (S.L.P.D.) program is intended for individuals who have completed a Master of Speech-Language Pathology degree and have entered clinical practice. The program prepares the student at the doctoral level to meet the demands of complex clinical practice. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed under Communicative Disorders: Intercampus Program (p. 669) of this online catalog.

**Doctorate in Clinical Laboratory Sciences (D.C.L.S.)**

The Doctorate in Clinical Laboratory Science is an advanced-practice degree for actively practicing, currently ASCP-certified, medical laboratory scientists. It is designed for those interested in increasing practical and theoretical knowledge of clinical laboratory science, advancing in the profession, and positively impacting the current health care system. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed in the Doctorate in Clinical Laboratory Sciences (p. 695) section of this online catalog.

**Doctor of Audiology (Au.D.)**

The Doctor of Audiology (Au.D.) program prepares the student to enter clinical practice as an audiologist. The program produces professionals skilled in providing diagnostic, rehabilitative, and related services in the fields of sound, balance, and hearing sciences. There is an emphasis on the clinical learning experience, although research is also a significant component of the program. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed under Communicative Disorders: Intercampus Program (p. 669) of this online catalog.

**Doctor of Nurse Anesthesia Practice (D.N.A.P.)**

The Doctor of Nurse Anesthesia Practice (D.N.A.P.) degree program prepares the registered nurse to become a nurse anesthesia practitioner with the capability to deliver competent nurse anesthesia services, engage in research, and assume leadership roles in the profession. Students receive extensive education in both the academic and clinical components of nurse anesthesia. Students learn to administer anesthesia to all patient populations in a variety of clinical settings using all current anesthesia techniques. Graduates are prepared to take the national certification examination required to become Certified Registered Nurse Anesthetists. This degree program is offered by the KU School of Health Professions. Admission
and degree requirements are listed in the Doctor of Nurse Anesthesia Practice (p. 740) section of this online catalog.

**Doctor of Nursing Practice (D.N.P.)**
The Doctor of Nursing Practice (D.N.P.) prepares advanced practice nurses at the highest level of nursing practice. The D.N.P. offers sophisticated, cutting-edge experiences that help nurses actively engage in a complex, dynamic, and demanding health care field. Skills in collaboration, innovation, and evaluation, complemented by advanced practice skills, prepare nurses to share the future of health care. Students preparing for advanced practice roles learn to provide patient-centered care that is evidence-based, and contribute to the development of the highest level of evidence-based practice. Students preparing for indirect care roles learn to provide the highest level of leadership in a variety of care and educational settings. This degree program is offered by the KU School of Nursing. Admission and degree requirements are listed in the Doctor of Nursing Practice (p. 2437) section of this online catalog.

**Doctor of Occupational Therapy (O.T.D.)**
The Doctor of Occupational Therapy (O.T.D.) program of study is intended for occupational therapists who have either a bachelor's degree or a Master of Occupational Therapy degree and wish to upgrade their knowledge and skills to the doctoral level to meet the increasing demands of complex practice issues. There are two tracks of the O.T.D., which are entry-level and post-professional. This degree program is offered by the KU School of Health Professions. Admission and degree requirements for the two tracks are listed in the Occupational Therapy (p. 745) section of this online catalog.

**Doctor of Physical Therapy (D.P.T.)**
The Doctor of Physical Therapy (D.P.T.) degree program is designed for individuals pursuing careers in physical therapy. The program prepares a physical therapy practitioner with the skills for lifelong professional development. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed in the Doctor of Physical Therapy (p. 769) section of this online catalog.

**Clinical Doctorate Degree Requirements**
The following sections list the general and common requirements for doctoral degrees. Specific degree requirements, including requirements for the clinical doctoral degrees, set by specific departments, programs, and schools appear in the sections of the catalog devoted to those units.

**Maximum Tenure for Doctoral Programs**
After being admitted to doctoral programs at KU, students complete all degree requirements in 8 years. The Office of Graduate Studies has authority to grant a 1-year extension based on a program's written recommendation, which should include compelling circumstances for the extension. Students who complete the master's degree at KU and subsequently begin doctoral studies have a maximum total enrolled time of 10 years to complete both degrees. Normal expectations, however, are that most master's degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study, and both master's and doctorate in 6 years of full-time study. Some graduate degree programs may have more stringent time restrictions. Students should inquire about the policy in effect in the department in which they plan to study.

**Doctoral Enrollment Requirement**
All graduate students enrolled in doctoral graduate programs must be enrolled the semester they complete doctoral degree requirements. Doctoral students who complete degree requirements during the first week of summer session or within the first 2 weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester. See the current Graduate Studies Calendar (http://www.kumc.edu/academic-affairs/graduate-studies/calendars.html) for deadlines for specific semesters.

**Research Skills and Responsible Scholarship**
All doctoral students must meet this requirement before proceeding to comprehensive exams. The requirement must include at least 2 components:

1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.
2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).

**Procedure**
All doctoral programs must have a research skills and responsible scholarship requirement plan approved by the Office of Graduate Studies. Students meet this requirement as determined by the approved plan for their program. It is the responsibility of the program to report when the student completed the requirement and how the requirement was met.

No course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

It is the purview of the department or program to determine the necessary topics in training doctoral students in the areas of responsible scholarship. Such topics may include:

- Protection of human subjects
- Welfare of laboratory animals
- Conflicts of interest
- Data management
- Mentor/student responsibilities
- Collaborative research
- Authorship, publication, plagiarism, copyright
- Peer review
- Professional practices
- Maintenance of confidentiality
- Appropriate research conduct and research misconduct
It is also the purview of the department or program to determine the research skills necessary to perform doctoral level research. Research skills **may** include:

- Knowledge of language(s) significant to the field
- Research methodology
- Methods of qualitative and quantitative data analysis
- Computer programming necessary for the field
- Laboratory skills and techniques necessary for the discipline

**Note:** These lists serve as guides; additional appropriate topics may exist.

**Doctor of Philosophy (Ph.D.) Degree Requirements**

This section lists KU regulations common to the administration of all doctoral Ph.D. programs. The particular application, interpretation, or method of implementation of such a common element for individual degree programs and departments is, in certain cases, left to the faculty of the department or the degree program (e.g., Research Skills and Responsible Scholarship requirement). Additional requirements specific to each degree, along with variations permitting each student to achieve particular academic goals, are listed in the section of this catalog for the school through which the degree program is offered.

1. **Admission**

   Upon admission to a Ph.D. program, the student is known as an aspirant for the degree and remains so designated until successful completion of the comprehensive oral examination. After passing that examination, the student is designated a candidate for the degree until successful defense and submission of the finished dissertation.

2. **Program Time Constraints**

   **Minimum Tenure**

   The student must spend 3 full academic years, or the bona fide equivalent thereof, in resident study at this or some other approved university, including the time spent in attaining the master’s degree. Resident study at less than full time requires a correspondingly longer period, but the requirement is not measured merely in hours of enrollment. Because a minimum number of hours for the degree is not prescribed, no transfer of credit is appropriate. However, graduate degree programs take relevant prior graduate work into consideration in setting up programs of study leading to the doctorate.

   **Residence Requirement**

   Two semesters, which may include one summer session, must be spent in resident study at KU. For the two specific semesters counted towards meeting this requirement, the student must be involved full time in academic or professional pursuits, such as a GTA or GRA appointment for teaching or research if it is directed specifically toward degree objectives. Enrollment in approved distance-learning courses offered through KU cannot be used to meet the doctoral residence requirement.

   Full-time enrollment for a graduate student is 9 hours for fall or spring semesters and 6 hours for the summer semester. For semesters in which a student holds a GTA or GRA appointment, full-time enrollment is 6 hours for fall or spring semesters and 3 hours for the summer semester. The residence requirement must be met prior to the semester the Comprehensive Oral Examination is scheduled. It is the responsibility of the academic program to report the two semesters that will satisfy the residency requirement via the Progress to Degree form requesting approval to schedule the Comprehensive Oral Examination.

   **Note:** Those noted above are minimum residence requirements. Please check with the individual program for any additional requirements.

3. **Research Skills and Responsible Scholarship**

   All doctoral students must meet this requirement before proceeding to comprehensive exams. The requirement must include at least 2 components:

   1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.
   2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).

   **Procedure**

   All doctoral programs must have a research skills and responsible scholarship requirement plan approved by the Graduate Studies Office. Students meet this requirement as determined by the approved plan for their program. The
approved plan for meeting this requirement is included in
the Degree Requirements section of this catalog for each
Ph.D. program offered. It is the responsibility of the program
to report when the student completed the requirement and
how the requirement was met via the Progress to Degree
form requesting approval to schedule the Comprehensive Oral
Examination.

No course graded CR or NC can count toward the satisfaction
of the requirements for a graduate degree. This prohibition
includes any courses taken to meet the Research Skills and
Responsible Scholarship requirement.

It is the purview of the department or program to determine the
necessary topics in training doctoral students in the areas of
responsible scholarship. Such topics may include:

- Protection of human subjects
- Welfare of laboratory animals
- Conflicts of interest
- Data management
- Mentor/student responsibilities
- Collaborative research
- Authorship, publication, plagiarism, copyright
- Peer review
- Professional practices
- Maintenance of confidentiality
- Appropriate research conduct and research misconduct

It is also the purview of the department or program to
determine the research skills necessary to perform doctoral
level research. Research skills may include:

- Knowledge of language(s) significant to the field
- Research methodology
- Methods of qualitative and quantitative data analysis
- Computer programming necessary for the field
- Laboratory skills and techniques necessary for the
discipline

Note: These lists serve only as guides; additional appropriate
topics may exist.

4. Comprehensive Oral Examination

The comprehensive oral examination covers the major field and
any extra departmental work for which the program wishes to hold
the aspirant responsible. When a doctoral aspirant has completed
the major portion of the course work at a level satisfactory to the
graduate degree program and met all other program and general
requirements prerequisite to the comprehensive oral examination,
including the residence requirement and the research skills and
responsible research requirement as appropriately applied and
established for the student’s particular program, the degree
program requests the Office of Graduate Studies approve the
scheduling of the comprehensive oral examination via the Progress
to Degree system. The degree program should ascertain that the
student is in good academic standing (3.0 or higher grade-point
average) before scheduling the examination. The examination
may be scheduled provided that at least 5 months have elapsed
from the time of the aspirant’s first enrollment at KU and at least
90 days have elapsed since any unsuccessful attempt. The
examination request must be submitted at least two weeks prior to
the examination date.

The committee for the comprehensive oral examination must consist
of at least five members, all of whom must be members of the
Graduate Faculty as described in the Graduate Faculty (p. 2567)
section of this catalog. The majority of committee members serving
on a graduate student oral examination committee in most cases
are in the candidate’s department/program of study. The chair
of the committee must hold dissertation status. If the committee
has co-chairs, at least one of the co-chairs must hold dissertation
status. At least one member of the committee must be from a
department other than the aspirant’s major department. This outside
committee member represents the Office of Graduate Studies and
must hold either regular or dissertation graduate faculty status
in a department outside the major department to be eligible to
serve in this capacity. Before the examination, Graduate Studies
provides the outside committee member a list of responsibilities
as the Graduate Studies representative. The Graduate Studies
representative is a voting member of the committee, has full right
to participate in the examination, and reports any unsatisfactory
or irregular aspects of the examination to the Office of Graduate
Studies and its Dean.

The Office of Graduate Studies verifies that all criteria described in
the preceding paragraphs has been met upon receiving a Progress
to Degree form requesting the scheduling of the oral comprehensive
exam. If the criteria has been met, Graduate Studies approves the
request to proceed with the exam.

For every scheduled examination, the degree program reports
on the Progress to Degree form an examination result of Honors,
Satisfactory, or Unsatisfactory. Use of the Honors designation
is at the program’s discretion. If the aspirant receives a result of
Unsatisfactory on the comprehensive oral examination, it may be
repeated on the recommendation of the program, but under no
circumstances may it be taken more than 3 times. In any case,
the examination may not be repeated until at least 90 days have
elapsed since the last unsuccessful attempt.

Ideally, all members of the committee are physically present
for the examination. A majority of committee members must be
physically present for an examination to commence; for doctoral oral
examinations, the requirement is 3 of the 5 members.

In addition, it is required that the student being examined, the
chair (or co-chairs) of the committee, and the outside committee
member all be physically present at the examination or defense.
Mediated attendance by the student or chair is prohibited. When a
situation arises in which a committee member cannot be physically
present, attendance via mediated means (tele/video-conferencing)
is acceptable at the discretion of the committee chair (or co-chairs).
In cases where the student prefers an examination in which all
committee members are physically present, the student's preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the exam policy outlined above. Requests for exceptions to this policy shall be submitted as a petition to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

5. Candidacy

Dissertation Committee

Upon passing the comprehensive oral examination, the aspirant becomes a candidate for the doctorate. If it has not begun before, the traditional, close student-mentor apprenticeship relationship comes into being. The student is expected to learn by both precept and example of the mentor, and often in collaboration. The chosen field of scholarship is explored using acquired research tools. The principles and customs of academic inquiry and the codes of ethics traditional to the various disciplines and professional fields become part of the student’s thinking and working.

Post-Comprehensive Enrollment

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled in one or more hours that both moves the student towards degree completion and reflects, as accurately as possible, the candidate’s demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester and 3 hours a summer session.

Post-comprehensive enrollment may include enrollment during the semester in which the comprehensive oral examination has been passed. If after 18 hours of post-comprehensive enrollment the degree is not completed, the candidate must continue to enroll each semester until all degree requirements have been met. The number of hours at this stage may be as little as one hour a semester. The number of hours of enrollment is determined by the candidate’s advisor and must reflect as accurately as possible the candidate’s demands on faculty time and university facilities.

6. Dissertation

The candidate must present a dissertation showing the planning, conduct, and results of original research and scholarly creativity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities as well as to demonstrate an intensive focus on a problem or research area. The dissertation itself should be an evident product of the candidate’s growth and attainment of the ability to identify significant problems; organize, analyze, and communicate scholarly results; and bring to bear on a useful area of interest a variety of research skills and scholarly or creative processes. It must show some original accomplishment, but it should also demonstrate without doubt the candidate’s potential to make future contributions to knowledge and understanding.

The dissertation is to be a coherent scholarly work, not a collage of separate, distinct pieces. Its unity of theme and treatment may still accommodate several subtopics by demonstrating their relationships and interactions. If previously published material by other authors is included in the dissertation, it must be quoted and documented appropriately. It should be noted that prior publication does not guarantee acceptance of the dissertation by the dissertation committee. Final acceptance of the dissertation is subject to the approval of the dissertation committee. The dissertation—or one or more substantial portions of it, often rewritten—is expected to be publishable and indeed to be published (see the Dissertation Submission and Publication section).

Both the dissertation research and the dissertation itself are to be completed under the guidance and direction of the dissertation committee. Formatting requirements and instructions (http://graduate.ku.edu/etd-formatting-and-working-multimedia-files/) for the proper format of the dissertation are available on the Graduate Studies website. Candidates and faculty members are reminded that the dissertation is to be a coherent, logically organized scholarly document. Because the demands and practices of different disciplines are varied, the format is somewhat flexibly described, and moderate departures from the norm are allowed when justified by the nature of the work or the circumstances of presentation. Any substantial divergences must be approved in advance as prescribed by the instructions, and candidates and faculty members are urged to seek early approval to avoid last-minute disappointments over unacceptable format or reproduction.

7. Final Oral Examination (dissertation defense)

Completion of the dissertation is the culminating academic phase of a doctoral program. This phase is comprised of the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the dissertation is followed promptly by the final oral examination (dissertation defense). When the completed dissertation has been accepted by the committee in final draft form, and all other degree requirements have been satisfied as outlined in the program’s degree requirements section of this catalog, the candidate’s program requests that Graduate Studies approve the scheduling of the final oral examination via the Progress to Degree form. This request must be made at least 3 weeks prior to the desired examination to allow sufficient time to publicize the examination so that interested members of the university community may attend.
At least 5 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination. Under normal circumstances, the doctoral candidacy period between passage of the oral comprehensive examination and the final dissertation defense must last no longer than 5 years. If a student took the oral comprehensive examination more than 5 years prior to the dissertation defense, a re-evaluation of the student’s candidacy status is necessary. Re-evaluation of the student’s candidacy status could include retaking the comprehensive oral examination.

The committee for the final oral examination must consist of at least five members, all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2567) section of this catalog. In most cases, the majority of committee members serving on a graduate student oral examination committee are in the candidate’s department/program of study. The chair of the committee must hold dissertation status. If the committee has co-chairs, at least one of the co-chairs must hold dissertation status. At least one member of the committee must be from a department other than the aspirant’s major department. This outside committee member represents the Office of Graduate Studies and must hold either regular or dissertation graduate faculty status in a department outside the major department to be eligible to serve in this capacity. Before the examination, Graduate Studies provides the outside committee member a list of responsibilities as the Graduate Studies representative. The Graduate Studies representative is a voting member of the committee, has full right to participate in the examination, and reports any unsatisfactory or irregular aspects of the examination to the Dean of Graduate Studies.

The dissertation defense should be held when the dissertation has been substantially completed and is held normally during the student’s final semester of enrollment. The student must be enrolled in a minimum of 1 hour of dissertation the semester the student defends the dissertation. Doctoral students who complete degree requirements during the first week of summer session are not eligible to defend the dissertation. The student must be enrolled in at least 1 hour of dissertation the semester the student defends the dissertation. The student must be enrolled in a minimum of 1 hour of dissertation the semester the student defends the dissertation. The student must be enrolled in at least 1 hour of dissertation the semester the student defends the dissertation.

In addition, it is required that the student being examined, the chair (or co-chairs) of the committee, and the outside committee member all be physically present at the examination or defense. Mediated attendance by the student or chair (or co-chairs) is prohibited. When a situation arises in which a member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair (or co-chairs). In cases where the student prefers an examination in which all committee members are physically present, the student’s preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the exam policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

8. Dissertation Submission and Publication

When the student passes the final oral examination and the dissertation title page has been signed by the members of the committee, the title page with original signatures is delivered to the Office of Graduate Studies. When all requested changes have been made to the dissertation, the student arranges for the dissertation committee chair (or co-chairs) to review changes, then sign and date the acceptance page, verifying the dissertation is approved for publishing. The acceptance page with original signature(s) is also delivered to the Office of Graduate Studies.

The student is then required to arrange publication with ProQuest (https://www.proquest.com/products-services/dissertations/) of the dissertation and payment of all associated fees (including copyright fee, if applicable), through the electronic submission process (http://www.proquest.com/products-services/dissertations/) detailed on the Graduate Studies website. The student must be the author of the dissertation, and every publication from it naturally must indicate that authorship. However, practices vary among disciplines, and even among scholars in a given field, as to whether the mentor’s name may appear as a co-author and whether as senior or junior, on subsequent publication of the dissertation (usually revised), or on articles prepared from it. Clear understandings in individual cases are expected to be established during the apprenticeship phase, when the ethical practices in publication are addressed within the program’s professional development training.

A form regarding publication permissions and embargo preferences is one of the required documents that is submitted to the Office of Graduate Studies following successful defense of the dissertation.
Interdisciplinary Studies

M.A., M.S., and Ph.D. with a Major in Interdisciplinary Studies

Only superior students admitted and enrolled in a graduate program at KU whose proposed studies require direction not available in any single department are considered for admission to an Interdisciplinary Studies program. Before seeking acceptance, an applicant must assemble a graduate faculty advisory committee headed by a faculty member authorized to direct master’s research (for M.A. or M.S. in Interdisciplinary Studies), doctoral research and dissertations (for Ph.D. in Interdisciplinary Studies). The applicant, in conjunction with the committee, must prepare a proposal for the course of study. The proposal must provide a rationale for the particular mix of disciplines, demonstrating how each contributes to a central theme or focus. It must also show that the proposed program cannot be achieved through an established master’s or doctoral program at KU.

The student seeking to enter the Interdisciplinary Studies program must have an outstanding academic record (a grade-point average of 3.75 or higher on a 4.0 scale for graduate courses or a grade-point average of 3.5 or higher on a 4.0 scale for undergraduate courses if no graduate courses have been taken) and must be admitted to and enrolled in a graduate program at KU at the time of application. A graduate student who has failed to maintain the required grade-point average is not eligible for the Interdisciplinary Studies program. A student is not eligible for this program if he or she has tried and failed to achieve candidacy in a regular graduate department or program at KU.

The student is expected to assume the initiative in determining his or her potential eligibility through consultation with graduate advisors, and if deemed eligible, in forming an advisory committee and preparing documentation to support the application.

Preadmission Procedures

To enter the program, a student should

1. Determine that KU offers courses and research in the areas appropriate to the their interest(s).
2. Prepare a tentative study plan based on those offerings to serve as a basis for initial discussion.
3. Approach a professor whose interests are comparable to those of the student and request that he or she acts as advisor. Normally this professor is a faculty member of the program of principal interest to the student. To grant an M.A. or M.S. in Interdisciplinary Studies, it is essential that the school has the authority to grant master’s degrees. To grant a Ph.D. in Interdisciplinary Studies, it is essential that the school has the authority to grant doctoral degrees. The selected professor must be a full member of the graduate faculty and authorized to chair doctoral dissertation committees for Ph.D. in Interdisciplinary Studies.

4. After a professor agrees to serve as an advisor, the student should assemble an advisory committee of at least 3 additional professors representing the disciplines covered in the Interdisciplinary program. At least 2 disciplines or departments must be represented.

5. In conjunction with the advisor and the committee, the student prepares a proposal for study, including

- A statement, with supporting documentation, that the proposed Interdisciplinary Studies program cannot be accomplished through established programs.
- A statement of the interdisciplinary or transdisciplinary nature of the proposed area of study.
- A definition of the field of study incorporating, including consistent descriptions of the contribution each discipline makes to the broader field.
- An outline of the course of study, indicating substantive work in the fields represented. Readings courses and independent study do not substitute for regular courses.
- A description of the method for satisfying research skills and responsible scholarship requirements.
- A description of the comprehensive examination procedures for the Ph.D. (nature of the examinations and possible examining committee) or final examination for the M.A./M.S.
- A description, to the extent possible, of the nature of the field in which a dissertation or master’s thesis might be written, indicating the respective contributions of the selected disciplines to the final product.

- The following attachments:
  i. complete transcripts of all previous work.
  ii. a cover sheet, signed by committee members, indicating their support of the proposal.
  iii. letters of recommendation and other appropriate supporting documents.

Note: The diploma indicates the degree awarded as “M.A. in Interdisciplinary Studies,” “M.S. in Interdisciplinary Studies,” or “Ph.D. in Interdisciplinary Studies,” and does not specify the area of specialization. The transcript notes the area of specialization as determined by the admissions committee.

Admission and Review Procedure

Upon completion of the above, the student must submit the application for admission into the Interdisciplinary Studies program to the Dean of Graduate Studies. The Dean of Graduate Studies appoints an admission committee consisting of (a) the associate dean’s designate for the school most involved in the interdisciplinary undertaking (the school in which the major advisor resides), (b) 2 or more doctoral chairing faculty members from unrelated fields, including at least 1 member of the Graduate Council, and (c) the chair or the graduate director of the department in which the student resides at the time of application. The Dean of Graduate Studies serves as ex-officio chair of the Interdisciplinary
Combination of Medicine and Master's Degrees

Combined Medical and Master's Degrees

Graduate students in the basic medical science departments in the School of Medicine are primarily enrolled in graduate programs. Outstanding medical students, however, are allowed to participate in work leading jointly to the M.D. degree and a graduate degree. A student admitted to both academic programs may enroll concurrently in courses in the respective programs, provided the regular medical course load is reduced to compensate for the added graduate work. The student should discuss concurrent enrollment with the department chair or graduate advisor of the master's degree program; departmental policies vary. All requirements for the degrees must be met, but within these limitations, superior students may be able to complete the joint degree program in less time than the total required for the 2 degrees to be earned separately. For the master's degree, a student must complete graduate work equivalent to at least 1 academic year in addition to the time spent on the medical curriculum.

Combined Medical and Doctoral Degrees

Outstanding students who are accepted into the M.D.-Ph.D. Physician Scientist Training Program will work toward the completion of the M.D. and the Ph.D. degrees. All the requirements for the respective degrees must be met. The joint degree requirements and application information for the joint M.D.-Ph.D. Physician Scientist Training Program (https://catalog.ku.edu/medicine/combined-md-phd/) are described in that program's section of this catalog.

Policies and Processes for Graduate Certificate Programs

The graduate certificate is a focused collection of courses that when completed, affords the student some record of coherent academic accomplishment in a given discipline or set of related disciplines. Students may be awarded these certificates upon completion of a well-defined program of course work. The didactic material comprised within a graduate certificate program may represent a more practice-oriented subset of an existing graduate discipline.

The KU Medical Center campus with oversight from the Office of Graduate Studies offers graduate certificate programs in several disciplines through the Schools of Health Professions, Medicine, and Nursing. Specific information about the certificate programs offered can be found in the Schools of Health Professions (p. 630), Medicine (p. 2180), and Nursing (p. 2404) sections of this catalog.

Eligibility and Admission Criteria

See Graduate Certificate Admission (p. 2554) section of this catalog for admission criteria on the Medical Center campus.

Number of Credits

A graduate certificate program will comprise no less than 9 and generally no more than 18 credit hours of course work in a particular discipline or related disciplines of study.

Expiration of Program

All proposals for graduate certificate programs will be adopted for a 7-year time period. The certificate program will expire at the end of that period. The program may request renewal of the certificate program by sending an updated program proposal, endorsed by the department and School to the Graduate Council on the Medical Center campus. The proposal will be evaluated for an additional 7-year period. The Office of Graduate Studies will remind the graduate certificate program about its renewal one year before the graduate certificate program is scheduled to expire. If a program expires or is discontinued, no new students may be enrolled in the program and those students currently in the program will continue until completion.

Student Records Criteria

- It is the responsibility of the degree program that houses the graduate certificate program to maintain all student records of the graduate certificate program. These records should include, but are not limited to, the number of students that apply to the program, the number accepted and denied into the program, the number of students enrolled in the program by semester, and the number of students who complete the program by semester.
- The courses taken in the graduate certificate program will be listed on the student's transcript and recognition of the earned certificate will also be posted on the transcript.
The University of Kansas

Curriculum Criteria
For Academic and Student Affairs.

• The awarding of graduate certificates will coincide with the August, December, and May graduations at the University of Kansas. The certificate awarding program will instruct students to submit an “Application for Degree” (AFD) the semester the student will complete certificate requirements. The same degree granting deadlines for filing the AFD will apply to the awarding of graduate certificates.

• The Registrar’s Office will provide Graduate Certificates for students who successfully complete all certificate program requirements each semester using the same timeline as the one established for diplomas.

• Graduate certificates will not be recognized by any Graduate Studies official graduation ceremony.

Process of Approval for New Graduate Certificate Programs

Approval Process
Proposals for new graduate certificate programs may be created and submitted by graduate faculty in the same manner as proposals for new graduate degree programs, with the exception that all approvals are made internally at the University of Kansas. The proposal must be approved by the Vice Chancellor for Academic and Student Affairs and accompanied by endorsement from the department chairperson, the dean of the school in which the contributing course work is administered, and the Dean of Graduate Studies.

After a proposal has been endorsed by the sponsoring department and school, the proposal must go to the Graduate Council, and if approved, will be forwarded by the Dean of Graduate Studies to the Vice Chancellor for Academic and Student Affairs.

Curriculum Criteria

• All certificate programs must be linked to a specific KU degree program(s), such that they provide a specific set of skills or knowledge base within a defined body of knowledge of the particular discipline. Certificate programs are encouraged where they might provide value-added benefits to students in existing graduate degree programs or provide a needed educational initiative for post-baccalaureate students in an area not currently addressed by a graduate degree program. These programs are not encouraged where they might detract from existing graduate programs.

• The proposed sequence of course work must offer a clear and appropriate educational objective at the post-baccalaureate level.

• The proposed certificate program must achieve its educational objective in an efficient and well-defined manner.

• A statement of the proposed course sequence associated with the certificate, including course titles, number of graduate credit hours, and course descriptions both for existing courses and any new courses that may be developed.

• Graduate certificate programs may be at the post-baccalaureate, the post-master’s, or post-doctoral level.

• Graduate certificate programs must be proposed for current KU graduate students or new KU students seeking a post-baccalaureate certificate.

• The certificate program must include an appropriate number of credit hours. In general, certificate programs should be no less than 9 credit hours. All proposals must have a maximum time to completion of no more than 4 full academic years.

• The proposal will identify the extent to which the curriculum overlaps with the curriculum of existing degree programs.

• The proposal will identify requirements of the program that are supplemented to the course work, including but not limited to laboratories, practicum, internships, and projects.

Faculty Criteria
Instructors in graduate certificate programs must have gained appointment to the Graduate Faculty.

Materials Required for New Certificate Proposal
Proposals for a graduate certificate program at KU must include the following materials:

• A statement of the educational objectives of the program.

• A statement of the proposed course sequence associated with the certificate, including course titles, number of graduate credit hours, and course descriptions both for existing courses and any new graduate courses that may be developed.

• A statement identifying the important academic objectives of the proposed certificate program, including the range of skills and knowledge future graduates will possess. Proposals should show how the graduate certificate program complements existing courses and does not detract from existing programs.

• A statement of how the proposed course sequence associated with the certificate will meet the stated educational objectives.

• A statement of the need for the proposed program and the basis for such need, supported by either external or internal derived data.

• A list of the names of the faculty associated with or contributing to the certificate program, either by teaching the courses or advising the students within the program. An up-to-date curriculum vitae for each faculty member listed needs to be included.

• The name and curriculum vitae of the faculty member who will be designated as the coordinator of the program.

• A planned date of implementation.

The Graduate Faculty

The Graduate Faculty consists of members of the university faculty and other persons qualified by training and experience who are duly nominated by a graduate department and appointed by the Office of Graduate Studies. Only members of the Graduate Faculty may teach courses for graduate credit, supervise master’s programs, serve on master’s examination and defense committees, or serve on doctoral examination committees.

There are three types of appointment to the Graduate Faculty:

• Regular Status
• Dissertation Status (Dissertation Chair Status)
• Special Member Status

The following sections describe each type of status.

Regular Graduate Faculty Status

Any faculty member who is appointed to a tenure-track position in a graduate degree granting department on the Medical Center campus is eligible for regular graduate status. Present or newly appointed faculty members in tenure-track appointments with the rank of assistant professor or above in departments or programs with approved graduate programs are granted regular membership in the Graduate Faculty, provided they have received the terminal degree in their field of specialization or have
acquired equivalent training and/or professional experience as determined by the Office of Graduate Studies.

Members of the Graduate Faculty with Regular status may:

- teach courses for graduate credit;
- supervise the master’s programs and thesis students;
- serve on master’s and doctoral examination and defense committees;
- chair master’s committees; and/or
- co-chair dissertation committees.

When appropriate, a qualified member of the Regular Graduate Faculty may be nominated to serve as co-chair of a specific dissertation committee if a faculty member with Dissertation status serves as co-chair of the committee and agrees to ensure that all requirements are met. However, if the regular member of the Graduate Faculty has lost dissertation status, this does not apply.

In special cases where faculty members who hold regular membership in the graduate faculty enroll in a KU graduate program as part of their professional development, they may be permitted to retain their Graduate Faculty status. They may not supervise or serve as the instructor of record for students who are peers in the graduate program in which they are enrolled.

To hold regular membership in the Graduate Faculty, a faculty member must continue to show evidence of a pattern of productive professional activity demonstrating the ability to contribute to high-quality graduate education. The form that productive professional activity may take varies across disciplines. Conventional evidence of such activity includes such things as effective teaching, scholarly publication, participation in professional societies, and other scholarly activity. Graduate degree programs are responsible for monitoring faculty with regular membership in the Graduate Faculty.

Dissertation Graduate Faculty Status

To qualify for the privilege of chairing dissertation committees, a regular member of the Graduate Faculty must demonstrate continuing activity commensurate with being an established scholar in his or her field and involvement in the graduate education program as evidenced by:

- teaching graduate courses;
- advising and mentoring graduate students and serving on thesis and dissertation committees; and/or
- maintaining an ongoing program of scholarly activity including a record of scholarship, publication and other contributions to the field.

It is the graduate program’s responsibility to nominate members of the Graduate Faculty for authorization to chair doctoral committees and to provide evidence of scholarship and involvement in the graduate education program. Authorization to chair dissertation committees is reviewed as part of each graduate program review.

Special Graduate Faculty Status

Special membership may be granted to any university employee or non-employee who is uniquely qualified by training or experience for membership in the Graduate Faculty for the purposes of:

- serving on the thesis, dissertation, or examination committee of a particular student or students;
- chairing master’s thesis committees of a particular student or students; and/or
- co-chairing dissertation committees of a particular student or students.

When appropriate, a qualified member with Special status may be nominated to serve as co-chair of a specific dissertation committee if a faculty member with Dissertation status serves as co-chair of the committee and agrees to ensure that all requirements are met.

Special status memberships are limited to a maximum period of 5 calendar years for teaching purposes or for the duration of the specified committee assignment. Special memberships are renewable.

All nominations for special membership must state clearly the specific purposes for which the nomination is being sought, and when it can be known in advance, the length of time for which it is being requested. Special appointments are reviewed by the appointing graduate department when the term ends and recommended to the Dean of Graduate Studies for renewal as appropriate. The request to renew includes the purpose to be fulfilled by the renewal of the appointment.

Graduate Faculty Appointment Chart

This chart summarizes the organization and privileges of the various types of Graduate Faculty appointments.

<table>
<thead>

1 The term “doctoral committee” refers to both oral comprehensive and dissertation defense committees.
2 A faculty member with the appropriate status may chair a degree committee alone or co-chair a degree committee with another faculty member (i.e., both co-chairs have equal status). Degree committees cannot have both a chair and a co-chair.
A current list of Graduate Faculty on the Medical Center campus is posted on the Graduate Studies website (http://www.kumc.edu/academic-affairs/graduate-studies/graduate-faculty.html).

Appointment Process
To appoint a faculty member to the Graduate Faculty or to renew a Special status, the graduate director for the department submits a "Graduate Faculty Status Application" through the SharePoint link on the Graduate Studies website (http://www.kumc.edu/academic-affairs/graduate-studies/graduate-faculty.html). A current curriculum vitae is attached to the application that includes a list of graduate courses the appointee has taught and a list of graduate student committees on which the appointee has served. The Dean of Graduate Studies reviews the applications and determines if appointment is approved or not.

Notice of Non-reappointment and Graduate Faculty Eligibility
Faculty members given a notice of non-reappointment are not eligible to hold Graduate faculty status. The Office of Faculty Affairs (http://www.kumc.edu/kumc-academic-affairs/kumc-faculty-affairs-and-interprofessional-development.html) on the Medical Center campus will provide the Office of Graduate Studies with a written list of faculty who receive a notice of non-reappointment. The Office of Graduate Studies will remove graduate faculty status for these non-reappointed faculty for the appointment period for which the terminal notice is effective.

Upon non-reappointment, the faculty member is no longer eligible for Graduate Faculty status. The named faculty member will no longer be allowed to teach future courses for graduate credit or to serve on graduate students' committees.

The appropriate department chairperson for the faculty member receiving the terminal notice may request, in writing, an exception to the policy from the Dean of Graduate Studies. Permission may be given to the faculty member to serve on a graduate student's committee if the graduate student will meet all degree requirements within the semester. The faculty member will be given a copy of the letter defining an exception approved by the Dean.

Outside Graduate Faculty Member for Ph.D. Examination Committees
The outside member of a Ph.D. committee must be a member of the Graduate Faculty with Regular or Dissertation status granted by a department other than the aspirant's major department. The outside member serves as the Graduate Studies representative on the committee.

The presence of the Graduate Studies representative is designed to ensure the appropriate standards of fairness, professionalism, judgment, and skill are applied throughout the examination process for the benefit of the institution and in the best interest of the student.

The Graduate Studies representative is a voting member of the committee and has full rights to participate in the examination. In the case of any unsatisfactory or irregular aspects of the examination or violation of Graduate Studies policy, the Graduate Studies representative shall provide a written report to the Dean of Graduate Studies for consideration of further action.

Before the examination, Graduate Studies provides a list of responsibilities to the Graduate Studies representative. By accepting the role, the outside faculty member attests there is not conflict/duality of interest that would preclude service as an objective participant observer on behalf of Graduate Studies. Following are the specific Graduate Studies guidelines the Graduate Studies representative is verifying:

1. The examination or defense was conducted in compliance with Graduate Studies policies regarding committee composition and attendance at the examination as stated in the Doctoral Degree Requirements (p. 2557) section of this catalog.
2. The examination or defense was held in a manner that was free and open to the public.
3. S/he was accorded full participatory rights in the examination or defense.
4. S/he was accorded full voting rights as a member of the committee.
5. The examination or defense was free from irregularities, unfairness, or perceived conflicts of interest to the student.
6. The examination or defense was free from irregularities, unfairness, or perceived conflict of interest among faculty members.

• Graduate Teaching Assistantships (GTA) (p. 2570)
  GTA Eligibility (p. 2570)
  GTA Tuition Benefit (p. 2570)
• GTA Health Insurance Benefit (p. 2570)
• Graduate Research Assistantships (GRA) (p. 2571)
  GRA Eligibility (p. 2571)
  GRA Tuition Benefit (p. 2571)
• GRA Health Insurance Benefit (p. 2571)

Appointment Types
The Medical Center Campus through their academic departments offers a limited number of Graduate Teaching Assistantships and Graduate Research Assistantships. Only degree-seeking graduate students are eligible for these appointments. Graduate students interested in an assistantship should inquire directly to their academic program/department about GTA and GRA appointment opportunities.

The assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies.

Principles Guiding Assistantships
The following principles govern all graduate teaching assistant (GTA) and graduate research assistant (GRA) appointments on the Medical Center campus:

1. Individuals who enroll in graduate educational programs at the University of Kansas do so in order to attain specific educational goals. It is the University's responsibility to help ensure that graduate students attain their academic goals in a reasonable amount of time and move on to the next stage in their careers, whether to another advanced degree program or to professional employment.
2. When academic programs/departments offer GTA or GRA appointments, the assistantships must contribute to the training experience of the graduate student.
3. The responsibilities required of the GTA or GRA should be in balance with their responsibilities as a student in the graduate program. For appointments of .50 FTE, the expectation is that the assigned duties will average no more than 20 hours per week during the semester.
For appointments at other percentages, the number of hours per week must be proportional to the appointment percentage.

Appointment Limits
Appointments shall not normally exceed .50 FTE. Appointments in excess of .50 FTE but not exceeding .725 FTE for all University employment combined must be approved by the academic program and the Dean of Graduate Studies in advance of an appointment offer and will be approved only in special circumstances. Departments are expected to monitor appointments in excess of .50 FTE to ensure that the graduate students' assistantships assignments enhance their academic preparation and do not interfere with progress towards degree.

Graduate Teaching Assistantships (GTA)
Graduate Teaching Assistants are paid as salaried student employees whose job duties consist primarily of direct involvement in classroom or laboratory instruction. The duties are performed under the supervision of faculty. The University also requires that a GTA's teaching assignment be in his/her own field of study or one that is closely related.

A limited number of Graduate Teaching Assistantships are available. Graduate students should inquire directly to their academic program/department about GTA appointment opportunities. Graduate Teaching Assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies. [Note: Graduate Teaching Assistantships on the Lawrence campus differ in that they are governed by a memorandum of agreement between the University of Kansas, the Kansas Board of Regents, and the Graduate Teaching Assistants' Coalition, American Federation of Teachers - Kansas (GTAC), which represents KU GTAs in Lawrence only.]

GTA Eligibility
The following eligibility requirements govern all Graduate Teaching Assistant (GTA) appointments at the Medical Center campus:

1. During the semester of appointment, the GTA is admitted to and enrolled in a graduate degree program offered by the Medical Center campus.
2. During the semester of appointment, the GTA is enrolled in no fewer than 6 graduate credit hours per fall and spring semester. See "Enrollment Exceptions" in section following this list.
3. During the semester of appointment, the GTA must be in good academic standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: A graduate student must maintain a cumulative grade point average of 3.0 to remain in good academic standing. However, if a program judges that a graduate student whose GPA falls below 3.0 is nonetheless making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be allowed to continue with the GTA appointment.]
4. The GTA must satisfy the English proficiency criteria established by the Board of Regents for GTAs - see Minimum English Requirement for GTAs in section immediately following this list.
5. A student completing their graduate degree may not continue in a GTA appointment after the graduation date unless the student has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

Minimum English Requirement for GTAs
All applicants for graduate teaching assistantships whose first language is not English, including international students and U.S. residents or citizens, must meet one of the following criteria:

1. Score a minimum of 22 on the spoken English portion of the TOEFL iBT.
2. Score a minimum of 8 on the spoken English portion of the IELTS.
3. Score a minimum of 50 on the SPEAK administered by the Office of International Programs (http://www.kumc.edu/international-programs/academic-english-requirements/speak-test-faq.html) on the Medical Center campus.

Enrollment Exceptions
A Ph.D. student appointed as a GTA, who has successfully completed the doctoral comprehensive examination and 18 post-comprehensive credit hours, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies.

A clinical doctoral (Au.D., D.C.L.S., D.N.A.P., D.P.T., O.T.D., S.P.L.D.) student appointed as a GTA, who is in his or her final semester, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not his or her final semester after all.

A master's student appointed as a GTA, who is in his or her final semester, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not the student's final semester after all.

GTA Tuition Benefit
The Medical Center campus pays the tuition of graduate students who receive appointments as Graduate Teaching Assistants as defined below for the semester of appointment:

<table>
<thead>
<tr>
<th>Appointment Percentage</th>
<th>Tuition Coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>.40 FTE or more</td>
<td>100% of tuition</td>
</tr>
<tr>
<td>.30 FTE but less than .40 FTE</td>
<td>75% of tuition</td>
</tr>
<tr>
<td>.20 FTE but less than .30 FTE</td>
<td>50% of tuition</td>
</tr>
<tr>
<td>.10 FTE but less than .20 FTE</td>
<td>25% of tuition</td>
</tr>
</tbody>
</table>

A graduate student who has a GTA appointment or a combination of a GTA and GRA appointment of at least .40 FTE is eligible for in-state (resident) tuition rates for the semester of appointment. The tuition payment program covers only tuition. If the student is
eligible for in-state rates, these will be assessed before applying the tuition waiver. The tuition payment program is not applicable for campus fees, course fees, any applicable off-campus areas service fees (e.g., KU Edwards Campus construction fee, Union fee, and required fee); mediated course fees; optional fees; housing costs; or other specialized fees.

**GTA Health Insurance Benefit**
A graduate student who has a GTA appointment or combination GTA and GRA appointment of at least .50 FTE for a given semester is eligible to participate in a health care benefits plan for that semester for which the University provides a contribution. The health care benefits plan is the same plan that is available to all students, but a portion of the premium is paid by the University if the student appointed as a .50 FTE GTA/GRA selects the GTA-GRA plan. The health insurance information is available from the Student Health Insurance Office (http://www.kumc.edu/student-affairs/student-health-insurance.html) in Student Affairs.

**Resignation or Termination**
If a GTA resigns or abandons the position or the appointment is terminated before working a minimum of 8 pay-periods during the semester, the student must pay full tuition for that semester and will lose eligibility for in-state (resident) tuition rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

**Graduate Research Assistantships (GRA)**
Graduate Research Assistants are salaried student employees who perform research that is in their fields (or a closely related field) of study and is integral to the student’s education (e.g., dissertation topic). The duties performed are under the direct supervision of faculty or research professionals. A limited number of Graduate Research Assistantships (GRA) are available. Graduate students should inquire directly to their academic program/department about GRA appointment opportunities. Graduate Research Assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies.

**GRA Eligibility**
The following eligibility requirements govern all Graduate Research Assistant (GRA) appointments at the Medical Center campus:

1. During the semester of appointment, the GRA is admitted to and enrolled in a graduate degree program offered by the Medical Center campus. Graduate students enrolled in a graduate degree program offered by the Lawrence or Edwards campuses may be approved by petition to the Dean of Graduate Studies to be appointed as a GRA on the Medical Center campus if they will perform research that is in their fields (or a closely related field) of study and is integral to the student’s education (e.g., dissertation topic).
2. During the semester of appointment, the GRA is enrolled in no fewer than 6 graduate credit hours per fall and spring semester. See “Enrollment Exceptions” in section following this list.
3. During the semester of appointment, the GRA must be in good academic standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: A graduate student must maintain a cumulative grade point average of 3.0 to remain in good academic standing. However, if a program judges that a graduate student whose GPA falls below 3.0 is nonetheless making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be allowed to continue with the GRA appointment.]
4. A student completing their graduate degree may not continue in a GRA appointment after the graduation date unless the student has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

**Enrollment Exceptions for GRAs**
A Ph.D. student appointed as a GRA, who has successfully completed the doctoral comprehensive examination and 18 post-comprehensive credit hours, may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies.

A clinical doctoral (Au.D., D.C.L.S., D.N.A.P., D.N.P., D.P.T., O.T.D., S.P.L.D.) student appointed as a GRA, who is in his or her final semester, may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not the student's final semester after all.

A master's student who is an appointed GRA and in his or her final semester may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not his or her final semester after all.

**GRA Tuition Benefit**
A graduate student who has a GRA appointment or combination of a GRA and GTA appointment of at least .40 FTE is eligible for in-state (resident) tuition rates for the semester of appointment.

**GRA Health Insurance Benefit**
A graduate student who has a GRA appointment or combination GRA and GTA appointment of at least .50 FTE for a given semester is eligible to participate in a health care benefits plan for that semester, for which the University provides a contribution. The health care benefits plan is the same plan that is available to all students, but a portion of the premium is paid by the University if the student appointed as a .50 FTE GTA/GRA selects the GTA-GRA plan. The health insurance information is available from the Student Health Insurance Office (http://www.kumc.edu/student-affairs/student-health-insurance.html) in Student Affairs.

**Resignation or Termination**
If a GRA resigns or abandons the position or the appointment is terminated before working a minimum of 6 pay-periods during the semester, the student will lose eligibility for in-state (resident) tuition
rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

Academic Calendar

The Academic Calendar (http://www.kumc.edu/student-services/office-of-the-registrar/current-students/academic-calendar.html) with the official university calendar dates is maintained by the Office of the Registrar and is available online. Many of the Medical Center campus programs have different starting and ending dates, so check with your academic program for more detailed information.

The Graduate Studies Calendar (http://www.kumc.edu/academic-affairs/graduate-studies/calendars.html) indicates graduation deadlines related to master's and doctoral examination dates and the submission of theses and dissertations. The calendar is maintained by Graduate Studies and is available online.

Academic Misconduct

Guidelines for Alleged Misconduct

The following information shall serve as guidelines for dealing with situations where inappropriate deviations from these accepted standards of conduct by a graduate student are alleged to have occurred. All questions concerning these guidelines should be directed to the Dean of Graduate Studies or his/her designee.

I. Expectations for Conduct by a Graduate Student

One goal shared by the graduate programs at the University of Kansas Medical Center is to provide a seminal educational environment in which a student can master a special field of knowledge and strive to develop competence in independent scholarship and research to make original contributions to knowledge. In achieving that goal, there is an expectation by the University of Kansas Medical Center that the graduate faculty and their students will conduct themselves with high integrity and professional ethics. Such conduct by a graduate student must include adherence to the written and observed or taught guidelines for ethical standards of the profession for which the student is seeking to enter. A graduate student is responsible for informing himself/herself about these requirements and expectations of conduct as well as seeking answers to his/her own questions about what constitutes misconduct. Potential sources for this information include the:

A. Director of the Graduate Program and the faculty members of the department in which the graduate student has entered;
B. Student Handbook or a similar document prepared by the student's academic program, department, and/or school;
C. the University of Kansas Medical Center "Behavioral Standards in Patient Care."

Academic Misconduct

Academic misconduct by a student shall include but not be limited to: cheating on examinations whether by a student on his/her own behalf or by giving to another student or receiving from another student unauthorized aid on examinations; giving or receiving of unauthorized aid in the preparation of notebooks, themes, reports, or other types of assignments, or in the preparation of master's theses and/or doctoral dissertations; or knowingly misrepresenting the source of any academic work, falsification of research results, plagiarizing of another's work, violation of regulations, ethical or professional codes for the treatment of humans and animals, or otherwise acting dishonestly.

II. Decisions by a Faculty Member Relative to Academic Misconduct

A. Not to Make a Recommendation for an Investigative Hearing: A faculty member (acting as an instructor or assistant in a course, or a graduate student's advisor or mentor for his/her research and/or academic program, etc.) may decide not to recommend an investigative hearing, as outlined in these guidelines, for what he/she believes is academic misconduct by a student. The faculty member thus may treat as unsatisfactory any student work which he/she believes is a product of academic misconduct and impose a sanction(s) appropriate to the traditionally accepted realm
III. Procedural Information for and Investigative Guidelines

A. Definitions of Terms Hereafter Applied in these Guidelines:

1. “The Faculty Member” is the faculty member initiating an allegation of academic misconduct by a student.

2. “The Student” is the graduate student identified by the Faculty Member as the subject of the alleged act(s) of academic misconduct.

3. The “Involved Department” is the department, center, or functional unit in which the act(s) of academic misconduct allegedly occurred by the student.

4. The “Chairperson” is the Chairperson of the involved department in which the act(s) of academic misconduct allegedly occurred by the student and is the next higher administrative officer to whom the Faculty Member sends the initial report about an allegation of academic misconduct.

a. “Dean of the School of Nursing” replaces the designation of “Chairperson” hereafter throughout these Guidelines for Dealing With Alleged Misconduct by a Graduate Student as the appropriate administrative officer to whom faculty members in the School of Nursing shall forward any report or recommendation, if the alleged act occurred in this School.

b. Possible Conflicts of Interest:

i. If the Faculty Member perceives (relative to Section III. B., above) that there may be a conflict of interest involved in this issue between the Student and the Chairperson, or if the Chairperson is the Faculty Member initiating the allegation of misconduct, then the Faculty Member’s inquiry report of the alleged incident(s) (see Section IV. B., below) shall be forwarded to the Dean of the Faculty Member’s or Chairperson’s, respectively, School or the next higher administrative officer, as appropriate, who thereafter will assume the responsibilities of “the Chairperson” identified throughout these Guidelines for Dealing With Alleged Misconduct by a Graduate Student.

ii. For Other Situations when questions arise about conflict of interest, the questions shall be directed to the Dean of Graduate Studies.

B. Make a Recommendation for an Investigative Hearing:
The Faculty Member may decide to recommend to his/her Chairperson (also see Section IV. A. 4, and Section IV. B., below):

1. that an investigative hearing be held for the alleged occurrence of academic misconduct, and/or

2. imposing a sanction that is outside of the traditionally accepted realm of authority or jurisdiction of the Faculty Member (e.g., see Section VI. D. below). Hence, the Faculty Member initiates the procedures in Section IV.

III. Procedural Information for and Investigative Hearing Process

A. Definitions of Terms Hereafter Applied in these Guidelines

1. "The Faculty Member" is the faculty member initiating an allegation of academic misconduct by a student.

2. "The Student" is the graduate student identified by the Faculty Member as the subject of the alleged act(s) of academic misconduct.

3. The "Involved Department" is the department, center, or functional unit in which the act(s) of academic misconduct allegedly occurred by the student.

4. The "Chairperson" is the Chairperson of the involved department in which the act(s) of academic misconduct allegedly occurred by the student and is the next higher administrative officer to whom the Faculty Member sends the initial report about an allegation of academic misconduct.

a. "Dean of the School of Nursing" replaces the designation of "Chairperson" hereafter throughout these Guidelines for Dealing With Alleged Misconduct by a Graduate Student as the appropriate administrative officer to whom faculty members in the School of Nursing shall forward any report or recommendation, if the alleged act occurred in this School.

b. Possible Conflicts of Interest:

i. If the Faculty Member perceives (relative to Section III. B., above) that there may be a conflict of interest involved in this issue between the Student and the Chairperson, or if the Chairperson is the Faculty Member initiating the allegation of misconduct, then the Faculty Member's inquiry report of the alleged incident(s) (see Section IV. B., below) shall be forwarded to the Dean of the Faculty Member's or Chairperson's, respectively, School or the next higher administrative officer, as appropriate, who

B. Inquiry Report by the Faculty Member is Sent to the Chairperson: Following the decision by the Faculty Member in Section III. B., above, and with due notice to the Student, the Faculty Member shall submit a detailed written report about the allegation (hereafter called the Inquiry Report) to the Chairperson. The Inquiry Report shall be submitted within twenty (20) days of the discovery of the alleged occurrence of misconduct. The Chairperson shall, within fifteen (15) days of receiving the Inquiry Report, review the report and attempt to resolve the allegation through consultation and mediation with the involved persons. If the Chairperson determines that the allegation should be resolved through the investigative hearing process, then the Chairperson shall continue the procedure outlined hereafter in these guidelines. Written notice shall be sent to the Student (see Section IV. D., below) and to the Faculty Member (including a request for the Faculty Member to respond, within ten (10) days of receipt of the notice, with

5. The Official Record of the Hearing Process: The Dean of Graduate Studies shall initiate and maintain in the Office of Graduate Studies an Official Record (i.e., file) of the entire hearing process. All subsequent original written communications, documents, audio tape recordings (see Section V. 3., below), and recommendations that relate to the alleged misconduct and the hearing shall be sent on a timely basis by the Chairperson and/or the Hearing Officer (see Section IV. E., below) to the Dean of Graduate Studies for inclusion in the official record. If the final conclusion of the hearing process is that academic misconduct has not occurred, then only the Dean's official record of the entire hearing process shall be saved as the permanent record; all other faculty, Departmental, and School copies of a "record/file" for the hearing process must be destroyed (see Section V. B. 2. a., below).

6. The Time Periods for the Hearing Process:
Throughout these guidelines, MAXIMUM LIMITS are specified for the length of time allowed for certain stages of the overall hearing process to take place. Unless specified otherwise, all lengths of time shall be in terms of the traditionally considered “working days” of any given week (recognized holidays that occur on otherwise traditional working days are not to be counted in these time frames). Any request for an extension of a time limit shall be made expeditiously, and before the expiration of the limit, to either the Chairperson or the Hearing Officer or the Dean of Graduate Studies, as appropriate, (or, in their absence, their designates), who shall decide and notify within three (3) days if there is good cause for the extension, and if so, for what period of time. Notification shall be to all involved parties of the hearing process and may be done first by telephone if deemed appropriate, and then shall be followed by written notification.

B. Inquiry Report by the Faculty Member is Sent to the Chairperson: Following the decision by the Faculty Member in Section III. B., above, and with due notice to the Student, the Faculty Member shall submit a detailed written report about the allegation (hereafter called the Inquiry Report) to the Chairperson. The Inquiry Report shall be submitted within twenty (20) days of the discovery of the alleged occurrence of misconduct. The Chairperson shall, within fifteen (15) days of receiving the Inquiry Report, review the report and attempt to resolve the allegation through consultation and mediation with the involved persons. If the Chairperson determines that the allegation should be resolved through the investigative hearing process, then the Chairperson shall continue the procedure outlined hereafter in these guidelines. Written notice shall be sent to the Student (see Section IV. D., below) and to the Faculty Member (including a request for the Faculty Member to respond, within ten (10) days of receipt of the notice, with
Office of Graduate Studies, Medical Center Campus Students

his/her selection of a faculty member to serve on the Hearing Panel; see Section IV. E. 2., below).

C. Notification of the Dean of Graduate Studies: The Chairperson shall send a written notification to the Dean of Graduate Studies that an investigative hearing process for alleged academic misconduct by the Student is going to be initiated. The Chairperson's notification shall include copies of the Faculty Member's Inquiry Report of the alleged misconduct and all written communications up to this time with the Student.

D. Notification About the Allegation to the Student: A written notification of the specific allegation shall be sent (certified or registered letter with return receipt requested indicating the date of receipt) to the Student by the Chairperson within fifteen (15) days after the time the Chairperson receives the Faculty Member's Inquiry Report. A copy of this notification shall be sent to the Dean of Graduate Studies. The notice shall include:

1. a statement of the specific allegation(s) with sufficient explanatory information to enable the Student to understand the nature and extent of the allegation(s);
2. an invitation for the student to provide, to the Chairperson, within ten (10) days after receiving the notification letter: a. a written response to the allegation(s); and b. the name of a faculty member whom the Student selects to serve on the Hearing Panel (see Section IV. E. 2., below), and a statement indicating that this faculty member told the Student that he/she agreed to serve;
3. a statement indicating that the Student has the right to continue attending class as scheduled until such time as the Dean of Graduate Studies has reached his/her final decision UNLESS there is a question of unsafe and/or disruptive behavior and/or offense against other persons (including patients of or visitors to) and/or property of the University of Kansas;
4. a copy of these "Guidelines for Dealing With Alleged Academic Misconduct by a Graduate Student," so that the student is aware of the procedural process and possible actions.

E. Selection of Members for the Hearing Panel: The Hearing Panel shall be composed of four (4) members of the graduate faculty (voting members of the Panel), excluding the Faculty Member initiating the allegation of misconduct (See Section IV. A. 4., above) and excluding the chairperson of the department in which the Student named in the allegation is a graduate student member, and one (1) graduate student (voting member of the Panel), excluding the Student who is the subject of the allegation. One of the graduate faculty members of the Panel will be designated by the Chairperson as the "Hearing Officer" in charge of the Hearing Panel. Any member of the Hearing Panel who perceives that there is any irregularity in the proceedings of the Hearing process has the responsibility of PROMPTLY reporting this to the Dean of Graduate Studies. Selection of the Hearing Panel shall include at least one but no more than two faculty members from the Involved Department in the allegation and shall be done as follows:

1. the graduate student member:
   - shall be selected by the officers of the Graduate Student Council at an on-need basis;
   - shall not be a graduate student member of the same department as the Student named in the allegation; and
   - must be currently classified as a regular graduate student in the category of degree seeking students and in good academic standing (not on probation);
2. one faculty member from inside or outside the Involved department may be selected by the Student named in the allegation;
3. one faculty member from inside or outside the Involved department may be selected by the Faculty Member initiating the allegation; and
4. two faculty members selected by the Chairperson. The Chairperson's selections shall assure that the composition of the Panel includes at least one but no more than two members from the Involved Department in the event that the student and/or the Faculty Member do not select such a member. Additionally, if the Student and/or the Faculty Member decline(s) to select a Panel member or fail to respond to the Chairperson within ten (10) days of the request (see Section IV. B. and IV. D. 2., above), then the Chairperson will also select that member or members, likewise with due consideration for the basic composition of the Panel as defined above.

F. Scheduling the Hearing: The Hearing Officer shall, within five (5) days of the selection of members of the Hearing Panel, (1) schedule the day, time, and place for the Hearing to occur (which shall be sometime between twenty [20] and thirty [30] days after the selection of the Hearing Panel), and (2) provide written notice of this schedule to the Faculty Member, the Student, the Chairperson, and the Dean of Graduate Studies. Both the Student and the Faculty Member shall be informed with this scheduling notification that during the Hearing each:

1. will be given the opportunity to present his/her own viewpoint of the situation(s) that directly led to the allegation(s); and/or
2. may have witnesses speak or have witnesses' affidavits read on his/her behalf.

G. Documents, Representatives, and Witnesses for the Hearing: All information cited below shall be promptly sent to (see time deadlines indicated in this Section) or collected by the Hearing Officer, who shall promptly distribute copies of the information to the Student, the Faculty Member, and the rest of the Hearing Panel members.

1. The Faculty Member's Inquiry Report sent to The Chairperson (see Section IV. B.);
2. The Chairperson's Notification of Allegation letter sent to the Student (see Section IV. D.);
3. The Hearing Officer’s letter to the Student and the Faculty Member stating the day, time, and place for the hearing (see Section IV. F.1);

4. The Student’s written Response to the allegation(s), if such was sent to the Chairperson (see Section IV. D. 2. a.);

5. Any documents provided by the Student and/or the Faculty Member for presentation as evidence to the Hearing Panel (sent at least by five (5) days before the Hearing);

6. Names of Representatives:

   Each party to the Hearing should be present for the Hearing unless the Chairperson agrees that another person may appear as a substitute representative. A Hearing may be held even if the Student and/or the Faculty Member fail to appear for the Hearing. Neither the Student nor the Faculty Member is compelled to appear or testify at the Hearing, and no inference may be drawn by the Hearing Panel against the Student or the Faculty Member due to his/her failure or refusal to testify or appear.

   The use of legal counsel is discouraged;

7. Names of Witnesses: The Student and the Faculty Member shall provide a list of intended witnesses, if any, to the Hearing Officer at least ten (10) days before the Hearing is to occur. The Hearing Officer shall provide these names, reciprocally, to the Faculty Member and the Student at least five (5) days before the Hearing;

8. All materials (including the audio recording tapes identified in Section IV. H. 3., below) concerning the alleged violation of misconduct should be treated as CONFIDENTIAL documents. The Hearing Panel members will return all materials received for the Hearing to the Hearing Officer at the end of the scheduled Hearing. The Hearing Officer will forward ALL ORIGINAL AND PHOTOCOPIED AND AUDIO TAPE RECORDED MATERIALS to the Dean of Graduate Studies (see Section IV. A. 5., above).

H. Conducting the Hearing: The Hearing Officer of the Hearing Panel may establish procedures in addition to those listed, however, the basic requirements of the Hearing procedure as listed here may not be altered by the Hearing Officer. The Hearing shall be conducted in a closed session and witnesses shall be excluded from the Hearing except when actually testifying.

1. The Hearing Officer shall have the authority to keep order, rule on questions of relevance and evidence, and shall possess other powers normal and necessary for a fair and orderly Hearing. Rules of Evidence that govern courtroom proceedings shall not apply.

2. There shall be only a single audio tape recording made of the proceedings to provide an accurate record of the Hearing for possible review by the Hearing Panel (Section IV. I. 1) and/or Dean of Graduate Studies (Section IV. I. 4.).

3. The Hearing Officer shall introduce the Hearing Panel members, the Faculty Member, the Student, and their representatives, if any.

4. The Hearing Officer shall explain the Hearing Procedures as outlined herein.

5. The Hearing Officer shall announce that the Faculty Member initiating the allegation has the responsibility to persuade the Hearing Panel by a preponderance of evidence that academic misconduct has occurred.

6. The Hearing Officer shall orally review the allegation(s) of misconduct which led to the Hearing, and the possible sanction(s).

7. The Hearing Officer shall allow the Faculty Member to state the allegation and explain the incident. The Faculty Member may choose to remain silent (see Section IV. G. 6. a.).

8. The Hearing Officer shall allow the Student to reply and explain the incident. The Student, if present, may choose to remain silent (see Section IV. G. 6. a.).

9. Hearing Panel members may direct questions to the Faculty Member (if present), the Student (if present), and any witnesses and/or representatives.

10. Through the procedural process of the Hearing, the Student and the Faculty Member may question one another and any witnesses appearing. One witness at a time may be called by either the Faculty Member or the Student. No witness will be permitted to participate in the Hearing if his/her name was not previously given to the Hearing Officer in accord with Section IV. G. 7., above. IN EXCEPTIONAL CIRCUMSTANCES, this provision may be modified by decision of the Hearing Officer, and if it is, the Student and the Faculty Member will be given sufficient opportunity to collect information to respond to whatever the witness presents.

11. The Hearing Officer shall state that the Hearing Panel will make a recommendation to the Dean of Graduate Studies within seven (7) days after the Hearing.

I. Findings of the Hearing Panel and Recommendation Carried Forward:

1. At the conclusion of the Hearing, the Panel members, alone and in closed session, shall deliberate and decide by a majority vote (anonymous written ballot counted by the Hearing Officer and verified by the graduate student member) if “academic misconduct,” as alleged by the Faculty Member and only based upon all evidence presented to and heard by the Hearing Panel, “ has occurred” or “has not occurred.”

2. If the Panel’s decision is that “academic misconduct has occurred,” then the Panel members shall deliberate and determine (by majority vote) their
recommendation(s) for specific disciplinary action and/or sanction(s), if any.

3. The Hearing Officer shall compile comments, rationale, findings, voting results, and recommendations in writing and forward them within seven (7) days after the Hearing to the Dean of Graduate Studies. The Hearing Panel recommendation(s) shall not be binding upon the Dean of Graduate Studies.

4. The Dean of Graduate Studies shall consider the recommendation(s) and report of the Hearing Officer and any relevant information and take action.

J. Notifications Consequent to the Hearing Process:

1. The Dean of Graduate Studies shall, within seven (7) days of receipt of the summary final report of the Hearing Officer, send written notification of his/her action(s) to the Faculty Member, the Student (notification by certified or registered mail with return receipt requesting delivery date), and the Hearing Officer.

2. If this final action of the Hearing process concludes that academic misconduct by the Student has NOT occurred, then the Dean of Graduate Studies also shall, in writing, instruct the chairperson(s) of the involved department(s) that: a. all materials appended to any and all departmental files, including a possible so-called permanent file on the Student, that would not have been in these files if an allegation of misconduct had not been made shall be removed (also see Section IV. A. 5., above) b. conscientious efforts are to be made by the involved department(s) not to subject the student to unwarranted bias or action by the department(s) consequent to the hearing process.

IV. Sanctions that may be Imposed for Academic Misconduct:

A. Censure: A written reprimand for actions which constitute academic misconduct. Censure may include a written warning that subsequent actions of academic misconduct may be the cause for a more severe disciplinary sanction.

B. Unsatisfactory Work: Treating as unsatisfactory any work which is a product of academic misconduct. This may include reduction of a pending or existing grade (including the awarding of a Failing grade) for the work and/or a grade in the course.

C. Suspension: Exclusion from classes and other specified privileges or activities for a definite period not in excess of two years.

D. Expulsion: Termination of graduate student status for an indefinite period. The conditions of readmission, if any, shall be stated in the order of expulsion. Approved by Graduate Studies Committee. University of Kansas Medical Center, April 4, 1991.

Academic Probation

The cumulative grade point average is computed at the end of each semester with the inclusion of grades earned at KU for all courses taken for graduate credit. If the cumulative graduate grade point average falls below 3.0 (B average), the student is placed on probation by Graduate Studies and the student and program are both notified in writing by the Dean of Graduate Studies.

The grades of P, S, U, CR, NC, and I for which no numerical equivalents are defined, are excluded from the cumulative grade point average computation. If the student’s overall graduate average has been raised to a 3.0 by the end of the next semester of enrollment after being placed on probation, the student may be returned to good academic standing. If not, the student may not be permitted to enroll and will be dismissed unless the Dean of Graduate Studies acts favorably on a program recommendation for the student to continue study.

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the graduate program that will accept the student. The petition must be approved by the Dean of Graduate Studies on the appropriate campus (Medical Center or Lawrence).

Academic Standing

Evaluation of graduate student academic standing includes, but is not limited to, consideration of performance in and progress through a graduate program according to program expectations. Graduate students must maintain an expected level of performance throughout their program. The evaluation of satisfactory performance is based, but not limited to, the following factors:

1. A minimum cumulative grade-point average (GPA) of 3.0 or higher.
   Graduate programs may have more stringent GPA requirements;
2. Academic and scholarly integrity;
3. Compliance with academic policies at the university, school, and departmental level; and
4. Satisfactory progress toward completion of the degree or certificate as determined by the program. Graduate programs are responsible for evaluating students at least annually to assess progress toward a degree. Progress may be determined by factors including:
   a. Completion of coursework, milestones, exams, or other program components on a specified timeframe;
   b. Official time to degree; and
   c. Total time in program.

Graduate programs may have additional measures of progress. Failure to maintain an expected level of performance and progress will result in a student not being in good academic standing. Lack of good academic standing will result in the graduate program placing the student on academic probation or recommending to the Dean of Graduate Studies dismissal from the program.

It is expected that graduate programs will evaluate students pursuing more than one degree program based on their progress in each program individually.

Childbirth Accommodation

The University of Kansas Medical Center acknowledges that the years spent in graduate and professional degree programs can be prime childbearing years for students. KUMC asserts itself as an institution that values family-friendly policies for students, faculty, and staff by adopting this student-specific childbirth accommodation policy. This policy
illustrates a commitment by KUMC to diversity and inclusion which will allow the institution to recruit and retain the highest quality students.

The University of Kansas Medical Center grants students up to a six-week accommodation period for welcoming a child under the following conditions: the birth of a child, the adoption of a child, or the placement of a child for adoption or foster care. The six-week accommodation period can be granted as a leave, a revised academic, research, or clinical schedule, or a combination of the above.

Eligibility

This policy applies to all enrolled students regardless of gender or marital status. Other situations related to family life continue to be covered by general leave of absence. Depending on their academic program, timing of birth/adoptive leave, and level of support they will receive in caring for a newborn, a student may find it more advantageous both academically and personally to take a leave of absence rather than utilizing the childbirth accommodation policy.

Academic Accommodations

A student should fill out the Application for an Academic Accommodation Period (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/policies-and-regulations.html) (form located on the Office of Graduate Studies website) to initiate discussions with their advisor(s) and departmental or school administrators as soon as possible, but no later than four months prior to the anticipated delivery date. If a child is being welcomed through adoption or foster care, the student should fill out an Application for an Academic Accommodation Period form as soon as possible, depending on the situation. Individual programs and departments will review the student’s requests and, along with the student and other necessary parties (i.e., advisors, instructors), determine the accommodations that will be provided. These discussions should also detail the type of academic engagement, and progress expected from the student while on leave or a revised academic schedule. If a program decides that due to academic requirements, a leave of absence is more appropriate, a request may be denied. The denial of the request must be made in writing with adequate justification. If an accommodation period of less than six weeks is proposed, this decision must also be justified. Upon approval of a student’s request, a plan will be submitted to the Dean of the student’s School. The plan will outline the specific accommodations being provided for a student, as well as any expectations from the academic program. Students may appeal decisions regarding accommodations. The appeal of the decision must be made in writing and submitted to the Dean of the student’s School. The Dean of the student’s School will have final decision-making authority.

All academic programs and departments are expected to work with their students and make a good-faith effort to provide reasonable accommodations so that their students can remain in good academic standing and continue progress towards their degree while also balancing the demands of caring for a new child. It is also encouraged that advisors, academic staff, and departmental leaders work with sensitivity and imagination to provide more than these minimum standards put forth by KUMC when circumstances allow for further accommodations. Students should be proactive in speaking with advisors, instructors, and academic deans when they are planning a family or expecting a child to devise the best personal and academic plan.

Student Status

Students retain their full-time student status if approved for an academic accommodation period. Additionally, for students who decide to take a leave of absence, they have the option to pay student fees if they wish to have continued access to campus resources.

Financial Support (applicable to those funded by GTAs, GRAs, or Fellowships)

For students who currently receive stipends through a graduate teaching assistantship (GTA) or graduate research assistantship (GRA), they remain fully funded for a six-week period. Students who do not receive stipends at the time of application are not eligible for financial support. Any continuation of support past six weeks will be determined on an individual basis. Students remain funded by their current stipend source for the first two weeks and then will be funded by a Childbirth Accommodation Fund through the Office of Graduate Studies for up to four additional weeks. Students in the MD/PhD program continue to receive their stipends from their current source during the MD phase and from current stipend source for two weeks and then the Childbirth Accommodation Fund for up to four additional weeks during the PhD phase. If a student is on a grant or fellowship that allows them to receive stipends during maternity/paternity leaves, then they continue to be paid by their current funding source for the entire six-week period. If funding is not allowed by the outside grant or fellowship, then the student receives six weeks of support from the Childbirth Accommodation Fund.

While not covered under this childbirth accommodation policy, students who experience medically necessary absences during pregnancy or due to conditions related to pregnancy should refer to the federal Title IX policy to educate themselves about their rights regarding their education. If the student feels they are experiencing discrimination due to pregnancy or related conditions, they are to contact the Office of Institutional Opportunity and Access (IOA@ku.edu).

Course Numbering System

Courses that may give graduate credit are numbered according to the following scheme:

- **Courses numbered 500-699** are designed primarily for juniors and seniors, but are also taken by some graduate students who have fewer than 30 hours of graduate credit.
- **Courses numbered 700-799** are designed primarily for graduate students who have fewer than 30 hours of graduate credit, but they are also taken by some undergraduates.
- **Courses numbered 800-899** are designed primarily for graduate students who have fewer than 30 hours of graduate credit.
- **Courses numbered 900-999** are designed primarily for graduate students who have 30 or more hours of graduate credit.

Courses that contain a mixture of undergraduate and graduate students should set requirements for graduate credit beyond or different from the requirements for undergraduate credit. No course, regardless of its number, can give graduate credit unless it has been approved for graduate credit by the appropriate Graduate Studies Office (Medical
Center or Lawrence) and is taught by a person holding a current appointment to the Graduate Faculty. See the graduate credit section below for more information.

Co-enrollment for Seniors in Graduate Level Courses
Seniors at KU who will complete the requirements for a baccalaureate degree in a given semester, and who have very strong academic records (grade-point average higher than 3.0 on a 4.0 scale), may be allowed to enroll in graduate course work during their final undergraduate semester. Seniors requesting the privilege of co-enrollment must make formal application through the online graduate application process and be admitted as degree seeking before the student may proceed with enrollment in a graduate course.

Procedure
To meet the criteria of co-enrollment, the student must earn undergraduate credit for at least one class during the co-enrollment semester. Continuing education courses may be used to satisfy this requirement. If after the co-enrollment semester the baccalaureate degree is not completed, the student will not be permitted to enroll in courses for graduate credit until the baccalaureate degree has been conferred.

Students who are eligible to co-enroll receive an email from the Registrar’s Office before enrollment with instructions on how to enroll in more than one career (ex. LAW, GRDL-Graduate, GRDK-Graduate, UGDL-Undergraduate). Students will have separate appointment times to enroll for each career and must enroll only in the courses that will count correctly toward the career in which they are enrolling during each appointment time. When enrollment is complete for each career, students must check the grading option for each course to ensure the class will be counted correctly.

Discontinuance
A student may voluntarily resign from their program of study by submitting an online “Official Severance Form” located on the Registrar’s website (http://www.kumc.edu/student-services/office-of-the-registrar/current-students/dropping-and-withdrawing-from-classes.html).

Dismissal
Graduate programs are responsible for evaluating the students in their programs to ensure that they are making satisfactory progress toward a degree. If the graduate program finds that a student is not meeting performance standards and/or not making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be dismissed from the program. Dismissal is requested by the graduate program through submission of the dismissal form in the Progress to Degree system.

A dismissal recommendation may be based, but not limited to, the following:

- Continuation on academic probation (cumulative grade-point average continues below 3.0);
- Failure to maintain good academic standing as defined under Academic Standing heading in this same section of the catalog;
- Running out of allowable time to degree as defined in degree requirements in the Degree Programs (https://catalog.ku.edu/graduate-studies/kumc/#programtext) section of this catalog;
- Neither enrolling nor receiving approval for a leave of absence for two consecutive semesters;
- Committing Academic Misconduct as defined in this same section of the catalog;

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the graduate program that will accept the student. The petition must be approved by the Dean of Graduate Studies.

Embargo of Theses and Dissertations
When an exception to the immediate release of a thesis or dissertation is necessary, an embargo provides a temporary, delayed public release of the work. Embargo periods of six months, one year, or two years are available. While embargoes are not intended to be permanent, renewals of the original embargo period are permissible. Considerations that may be deemed reasonable for granting permission for an embargo include, but are not limited to:

- Patentable rights or other issues are contained in the work the disclosure of which may be detrimental to the rights or interests of the author.
- There is a need to prevent disclosure of government information about persons, institutions, technologies, etc. that is contained in the work.
- An academic or commercial press has expressed interest in acquiring the rights to publish the work as a book that may require an embargo.
- The work contains content that has already been submitted to a peer-reviewed journal that may require an embargo.
- Approval for delay has been granted by the KU Restricted Research Committee.

Requests for an extension of the embargo should be directed to the Office of Graduate Studies on the appropriate campus (Medical Center or Lawrence) and must be received at least one month prior to the expiration of the current embargo to ensure sufficient time to process the request. A request for an embargo submitted to the University of Kansas affects only the publication of the thesis or dissertation in KU ScholarWorks. It is the graduate student’s responsibility to additionally request an extension through ProQuest for the copy published by them.

While there is no limit to the number of times a student can request an embargo extension, embargoes that have been allowed to expire without a request for an extension will result in the thesis or dissertation being made publicly available.

The embargo period will be calculated beginning at the end of the semester in which the student graduates with the specific dates being: December 31st, May 31st, and August 31st.

Steps necessary for embargoing a thesis or dissertation:
Theses and dissertations at the University of Kansas are made available in two electronic databases: KU ScholarWorks and ProQuest Dissertations and Theses. Items in KU ScholarWorks are publicly accessible on the world-wide web and can be indexed by search engines.

Students who do not not wish to have their theses or dissertation made public in these two venues must receive permission from their committee chair, department graduate director or department chair to embargo their theses or dissertations. The student
must document this permission with the Electronic Thesis and Dissertation (ETD) Release Form. Once the student has obtained the requisite signatures on this form, the student must take two additional steps before graduation to ensure that their work is properly embargoed.

- First, the student must submit the Electronic Thesis and Dissertation (ETD) Release Form to the Office of Graduate Studies on the appropriate campus (Medical Center or Lawrence). If an embargo has been approved, this form will ensure that the work is temporarily restricted in KU ScholarWorks.
- Second, during the electronic submission process to ProQuest, the student must select the embargo option under the publishing restrictions section. If an embargo has been approved, this step will ensure that public view of the work is temporarily restricted in the ProQuest Dissertations and Theses database.

Note: If a student does not receive permission for an embargo and/or does not submit the required documentation requesting such an embargo to the Office of Graduate Studies prior to graduation, the work will be made publicly available through KU ScholarWorks, and search engines will find and index the work. For this reason, once a work is released publicly, it is impossible to deploy an embargo in its entirety, because copies of a released work are likely to be stored on the web even if the KU ScholarWorks and ProQuest copies are retracted. Therefore it is crucial for students who desire the embargo option to request it prior to graduation and to request extensions, if needed, prior to the work being exposed to public search engines.

Dissertation defenses are open to the public. In the event that an embargo is deemed necessary for a dissertation, the committee should consider holding an additional question period for the defense that is closed to the public. Any sensitive data may be discussed in the closed session.

Enrollment Definitions (Full-Time, 3/4-Time, Half-Time, and Part-Time)

Full-time enrollment for fall and spring semester
- Enrollment in 9 credit hours;
- Enrollment in 6 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 6 credit hours for graduate students using the Montgomery GI Bill™ – Active Duty (MGIB-AD) and Post-9/11 GI Bill™ – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s). *See doctoral candidates below.

Full-time enrollment for summer semesters
- Enrollment in 3 credit hours;
- Enrollment in 3 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill™ – Active Duty (MGIB-AD) and Post-9/11 GI Bill™ – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s). *See doctoral candidates below.

3/4-time Enrollment for Fall and Spring Semesters
- Enrollment in 7 credit hours;
- Enrollment in 4.5 credit hours plus a GRA appointment, regardless of percentage of appointment.

3/4-time Enrollment for Summer Semesters
- Enrollment in 4.5 credit hours;
- Enrollment in 2 credit hours plus a GRA appointment, regardless of percentage of appointment.

Half-time enrollment for fall and spring semesters
- Enrollment in 5 credit hours;
- Enrollment in 3 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill™ – Active Duty (MGIB-AD) and Post-9/11 GI Bill™ – Active Duty.

Half-time enrollment for summer semesters
- Enrollment in 3 credit hours;
- Enrollment in 1 credit hour plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 1 credit hour for graduate students using the Montgomery GI Bill™ – Active Duty (MGIB-AD) and Post-9/11 GI Bill™ – Active Duty.

Part-time enrollment
- Students enrolled in fewer hours than defined by half-time enrollment are considered part-time.

* A doctoral candidate is defined as a doctoral student who has successfully passed the Comprehensive Oral Examination for the Ph.D. and is enrolled in post-comprehensive hours. See the Post-Comprehensive Enrollment (https://catalog.ku.edu/graduate-studies/kumc/#programstext) policy in the degree requirements section of this catalog.

All students should check with their graduate degree programs and Office of Graduate Studies' policies to determine if additional enrollment requirements or summer enrollment requirements exist.

Note: A few internship programs have been approved by Graduate Studies to count as full-time enrollment. Students enrolled in these internship programs will be counted as full-time students. Students should contact their programs to verify that an internship program qualifies.

International Student Enrollment
International students in F-1 and J-1 status must also comply with Federal immigration requirements of pursuing a full course of study each semester to maintain their legal status. All international students must conform to residence requirements, even though immigration regulatory requirements may be lower.

Enrollment Policy
All graduate students are expected either to be enrolled or to be on approved Leave of Absence at all times while completing the credit
hours required for the fulfillment of their degrees unless they have been dismissed from the program or discontinued (voluntarily resigned) from the program.

Graduate students are not normally permitted to enroll for more than 16 hours a semester or more than 8 hours in summer session.

Under some circumstances, undergraduate students may enroll in graduate courses. See these policies in this section of the catalog:

- Undergraduate Student Enrollment in Graduate Level Course for Undergraduate Credit
- Co-enrollment for Seniors in Graduate Level Courses

**Grading**

**General Guidelines**

Grading scales are assigned on a course-by-course basis. The grading scale selected for a course must be appropriate to the course type and to the students and programs that the course serves. It is expected that designated thesis, dissertation, capstone courses, and their approved equivalent courses will be graded using the A, B, C, D, F, P scale. The I grade is not appropriate for enrollment in thesis, dissertation, capstone projects, or research courses and is not allowed.

Once a grading scale for a particular course has been recommended by the department/program and approved by Graduate Studies, it must be applied to the entire student enrollment in the course or section. This applies to all graduate-level courses.

The individual schools have the option of using or not using the +/-, according to the policy adopted by the particular school.

In courses with the letter-grade scales, the grade of C- is not considered a passing grade. Students receiving a grade of C-, D, and F in a course may not count that course toward fulfilling degree requirements.

**Cumulative GPA**

Overall, students must earn at least a B average (i.e., 3.0 GPA) on course work counted toward any master's or doctoral degree at KU. All graduate-level courses will be included in the calculation of the cumulative graduate GPA. Undergraduate courses, even when the student enrolls as part of their graduate career, will not count toward the cumulative graduate GPA. Graduate courses counted as part of the undergraduate degree will not be counted in the cumulative graduate GPA. The student's graduate GPA calculation will include any degree or certificate graduate course work completed at KU. Courses graded P, S, U, CR, NC, or I are excluded from the computation of the GPA.

**The I Grade: Incomplete Work**

The I grade indicates course work that has been of passing quality but which is partially unfinished for good reason. Use of the I grade is optional in some grading scales but is not permitted by other scales (see below). Generally, the I grade is an appropriate option for enrollments other than thesis, dissertation, research, capstone, or the first semester of a two-semester sequence course.

As stated in the University Senate Rules and Regulations, Article II, Section 2.2.3.2 (http://policy.ku.edu/governance/USRR/#art2sect2):

*A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade assigned by the course instructor, and shall be indicated on the student's record."

**Grading Scale for Regular Courses (two options)**

**Grading Scale: A, B, C, D, F**

The basic system is an A, B, C, D, F scale, where:

- A designates above-average graduate work;
- B designates average graduate work;
- C designates passing but not average graduate work;
- C-, D and F designate failing graduate work.

**Grading Scale: A, B, C, D, F, I**

The basic system is an A, B, C, D, F, I scale, where:

- A designates above-average graduate work;
- B designates average graduate work;
- C designates passing but not average graduate work;
- C-, D and F designate failing graduate work;
- I designates incomplete work per definition earlier in this section.

**Grading Scale for Research Courses including thesis and dissertation**

**Grading Scale: A, B, C, D, F, P**

Departments/programs use this scale to grade their thesis, dissertation, capstone project, and approved thesis- or dissertation-equivalent courses. Other research courses are also graded using the A, B, C, D, F, P scale. The I grade is not appropriate for enrollment in thesis, dissertation, capstone project, or research courses and is not allowed by this grading scale.

In this grading scale the letter P indicates participation in coursework where evidence of performance may not be available. This grading scale is appropriate in two types of situations:

- In designated thesis, dissertation, approved thesis- or dissertation-equivalent, capstone, or research courses;
- In the first semester of two-semester sequence courses.

In any semester, an instructor has the option to assign a letter grade of A, B, C, D, or F, instead of P, when evidence about performance is available. Upon completion of thesis, dissertation, or research hours leading to a master's or doctoral degree, the P remains on the final transcript in all semesters for which it was recorded.

For departments/programs that use this scale, a letter grade (A, B, C, D, or F) must be assigned for a student's final
semester of enrollment in thesis, dissertation, capstone, or research course work. The letter grade assigned characterizes the quality of the final product.

**Result Choices for Milestone Examinations**

**Honors, Satisfactory, Unsatisfactory**

Performance on milestone examinations may be graded Honors, Satisfactory, or Unsatisfactory.

These outcome grades are appropriate to the following milestone examinations:

- the general examination for the master’s degree;
- the project defense for the master’s degree;
- the thesis defense for the master’s degree;
- the comprehensive oral examination for the Doctor of Nursing Practice (D.N.P.);
- the comprehensive oral examination for the Ph.D.; and
- the final examination for the Ph.D.

Use of the Honors designation is at the department’s discretion.

**Other Grading Scales**

**Grading Scale: S, U, I**

The grades of S and U designate satisfactory (S) and unsatisfactory (U) performance. This grading scale is appropriate to three types of course: continuing education courses; workshop courses; and institute courses.

No more than 6 hours total of graduate course work graded S may count toward a degree. The S, U, I grading scale may be adopted at the department/program’s discretion per the Incomplete grade definition earlier in this section.

In courses numbered 800 or above, and for which specific authorization has been given, an instructor may report a grade of S for students who have satisfactorily attended the course but for whom it has not been possible to evaluate the quality of performance.

The S and U grades are not used in computing the grade-point average.

**Grading Scale: CR, NC**

The Credit (CR) or No Credit (NC) option is authorized for graduate students: a grade of CR will reflect work earning a C or better and the grade of NC will reflect work earning a C- or below. However, as outlined in USRR 2.2.8.6 (http://policy.ku.edu/governance/USRR/#art2sect2), no course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree or a graduate certificate. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement. Please refer to the policy governing Research Skills and Responsible Scholarship (https://catalog.ku.edu/graduate-studies/kumc/#programtext) for more information.

**Graduate Credit**

**Criteria for Offering Graduate Credit**

The following three conditions must be met for a student to receive graduate credit for work satisfactorily completed at KU:

1. The student must have gained graduate admission.
2. The course must be numbered 500 level or above and have been approved for graduate credit by the appropriate school and the Graduate Council on the Medical Center campus.
3. The instructor must hold a current appointment to the Graduate Faculty.

**Minimum Grade for Graduate Credit**

A minimum grade of C is required for a course completed at KU to count for graduate credit. Grades of C- and below do not count toward fulfilling requirements and the course cannot be counted toward a degree or certificate.

**Credit by Examination**

Credit by examination is not accepted toward graduate degree or certificate programs.

**Graduate Course Work Expiration Dates**

Courses completed at KU, or transfer credits from another university, cannot be used to fulfill graduate degree requirements if these courses were completed more than ten (10) years prior to the final defense for doctoral candidates or graduation for master’s students. A request to make an exception to this policy must be approved by the program and the Dean of Graduate Studies.

**Transfer Credit**

Up to six hours of graduate credit taken at a regionally accredited graduate school may be transferred and applied to a master’s degree at KU if the credits were taken before the final semester of enrollment at KU and have the approval of the program. Eight hours may be approved for transfer if the student holds a baccalaureate degree from KU. Graduate credit will not transfer for courses that were previously counted toward the requirements for an undergraduate or graduate degree, whether completed at KU or another institution.

No credit is actually transferred toward the doctoral degree, but programs may take relevant prior graduate work into consideration in setting up programs of study.

Graduate credit from another institution may not be transferred to a KU graduate certificate program.

Only work graded B (3.0 on a 4.0 scale) or higher may be transferred. KU does not accept transfer credit for courses that have been graded B- or below. KU also does not accept transfer for institutes, workshops, or life/work experience. Any exceptions to this policy must be approved by the department/program and the Dean of Graduate Studies.

In order to initiate the actual transfer of credits meeting the transfer credit guidelines, the transfer credit form in the Progress to Degree system must be submitted to Graduate Studies by the student’s department/program.
Graduate Student Oral Exams Attendance

Attendance
Ideally, all members of the committee are physically present at graduate student oral examinations. For M.S. students this includes the final general exam, project defense, capstone, or thesis defense. For Ph.D. students this includes the comprehensive oral examination, and the final oral examination (dissertation defense).

A majority of committee members must be physically present for an examination to commence; for doctoral oral examinations this requirement is 3 of the 5 members, for master’s oral examinations the requirement is 2 of the 3 members.

In addition, it is required that the student being examined, the chair (or co-chairs) of the committee, and the outside committee member (Ph.D. examinations) all be physically present at the examination or defense. Mediated attendance by the student, chair (or co-chairs) and outside member is prohibited. When a situation arises in which a member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair (or co-chairs). In cases where the student prefers an examination in which all committee members are physically present, the student’s preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

Graduate Student Oral Exams Committee Composition
The majority of committee members serving on a graduate student oral examination committee in most cases are in the candidate’s department/program of study.

Ph.D. Committees
Ph.D. doctoral committees are composed of at least five voting members all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2567) section of this catalog. The committee structure must adhere to the following requirements:

1. The chair of the committee must hold dissertation status. If the committee has co-chairs, at least one of the co-chairs must hold dissertation status.

2. One member must meet the requirements for serving as an outside member: i.e., be a KU faculty member holding regular or dissertation graduate faculty status and is not a faculty member holding graduate status in the candidate’s department/program. The outside member represents Graduate Studies and is a voting member of the committee, has full rights to participate in the examination, and reports any unsatisfactory or irregular aspects of the examination.

Master’s Committees
Master’s committees are composed of at least three voting members all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2567) section of this catalog.

Grievance Policy and Procedures for Graduate Students
A graduate student who believes herself or himself unfairly or unlawfully treated in an academic matter may present a grievance to the academic department or appropriate program chairperson. Each academic unit has established grievance policies and procedures. Concerns regarding illegal discrimination or harassment should be reported to the Equal Opportunity Office. For academic misconduct issues, see the Academic Misconduct policy in this section of the catalog.

The grievance procedure may not be used as an appeal for a grade. Grades should be appealed at the department or program level. Committees established at the department, program or school level to hear grievances proceed in accordance with their own specific procedures and make recommendations to the appropriate administrative officers as provided in those procedures. Appeals from the decision of a department or program or school must be made to the Dean of Graduate Studies.

The appellate process is designed to ensure that due process has been afforded an individual in the initial hearing. The Dean of Graduate Studies will appoint the committee chair from the membership of the KUMC Graduate Council. Two other members will be selected by the chair from the Graduate Council and one other graduate faculty member selected by the student complainant and a second graduate faculty member selected by the accused. The selection of these faculty members shall be acceptable to both parties. A student member will be selected by the President of the Graduate Student Council. Care should be taken to ensure that none of the members has a conflict of interest in this case. This committee will examine all pertinent documents including student records and interview the parties directly involved in the complaint as well as other parties deemed necessary. Minutes of testimony will be made available to both the complainant and accused parties after the hearing is completed. It is essential that all parties retain confidentiality of information gained through the hearing process. Both parties will be provided an opportunity to respond to the minutes in writing before the committee’s final recommendation is forwarded to the Dean of Graduate Studies who will make the final determination. The documents provided to the grievance committee will be retained in the Office of Graduate Studies for a period of three years, after which time they will be destroyed. There is no further appeal.

Intellectual Property Policy
All enrolled students are subject to the Board of Regents and KU Intellectual Property Policies. The ownership of student works submitted in fulfillment of academic requirements is retained by the creator(s). By enrolling, the student gives the institution a nonexclusive royalty-free
license to mark on, modify, retain the work in the process of instruction, or otherwise handle the work, as set out in the institution’s Intellectual Property Policy or in the course syllabus. The institution does not have the right to use the work in any other manner without the written consent of the creator(s).

Leave of Absence

The Office of Graduate Studies may grant a leave of absence (LOA) from an academic program for up to one academic year, with the possibility of extension. The student must complete the official Leave of Absence Checklist. A leave of absence may be granted in extraordinary circumstances (e.g. cases of illness, emergency, financial hardship, military leave, pregnancy/childbirth), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals. The LOA request must be submitted at the beginning of the semester. Evidence of progress toward degree will also be a determining factor in the decision to grant a leave. If the leave of absence is approved at the program level, the program forwards the student’s request along with the program’s recommendation to the Dean of Graduate Studies for approval. If approved by the Dean of Graduate Studies, the time on leave from the academic program will not be counted toward the maximum time granted to complete a degree (doctoral, 8 years; master’s, 7 years).

All steps to complete a leave request are outlined on the Leave of Absence Checklist. First, students discuss the leave with their mentor/advisor and/or their Program Director. If those administrators believe that the leave is the best path forward for the student, the student completes the official Leave of Absence Checklist. Second, students meet with individuals in the Registrar’s Office and Financial Aid to verify understanding of how the leave could impact their enrollment, access to campus resources, health insurance, and/or loans. Third, the student completes the section of the form asking for details about their leave and how they can be contacted. Fourth, the student returns the form to their Program Director for a second signature that acknowledges the student completed all steps. The form is then forwarded to the Dean of Graduate Studies for a final approval. After the Dean of Graduate Studies approves the Leave of Absence form, the form is forwarded to the Office of the Registrar to be recorded in the student’s academic record.

When a student is ready to return from an LOA, the student must complete the Request for Return from Leave of Absence Checklist. The form requires the student to complete information about when they will return as well as a signature from the Program Director. After the Program Director approves the Return LOA Checklist, the Program Director will send the form to the Office of Graduate Studies. The Office of Graduate Studies will review and respond with an approval via email. Then, the Office of Graduate Studies will send the form to the Office of the Registrar to reactive the student in Enroll and Pay.

The Requests for Leave of Absence Checklist and for Return from Leave of Absence checklists are on the Graduate Studies Policies and Regulations page (http://www.kum.edu/academic-and-student-affairs/opages/graduate-studies/policies-and-regulations.html) of their department website.

Post-Comprehensive Enrollment for Doctoral Candidates

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled in one or more hours of dissertation that both moves the student towards degree completion and reflect, as accurately as possible, the candidate’s demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester and 3 hours a summer session.

Post-comprehensive enrollment may include enrollment during the semester or summer session in which the comprehensive oral examination has been passed. If after 18 hours of post-comprehensive enrollment the degree is not completed, the candidate must continue to enroll each semester and each summer session until all degree requirements have been met. The number of hours of each enrollment are determined by the candidate’s advisor and must reflect as accurately as possible the candidate’s demands on faculty time and university facilities.

Posthumous Degrees

In order to recognize the achievement of students who have died, the University of Kansas may grant undergraduate, graduate and professional degrees posthumously. This policy applies to deceased students who were in good academic standing at the time of death and enrolled for their final semester at the University of Kansas, as determined by the dean of the school. Requests for posthumous degrees must be initiated by the student’s academic department and approved by the dean of the school conferring the degree. Each case will be determined on its own merits.

The dean of the school posthumously conferring the degree should contact the Office of the University Registrar to confirm the correct information for the degree to be conferred, notify the Vice Provost for Academic Affairs, and coordinate with the Office of the Chancellor for notification to the family. Posthumous degrees are conferred during the semester in which the student was expected to graduate. The Chancellor informs the student’s family in writing of the posthumous award of the degree.

Progress to Degree Policy

The Progress to Degree system is used by Graduate Studies to track and monitor graduate student progress. The forms should be used to report items such as change in degree plan within the same department, transfer credit towards a master’s degree, dismissal from the program, master’s general exam, master’s thesis, capstone defense, project defense, or oral comprehensive, and final exam (dissertation defense) for PhD students. This system is used by designated faculty or staff to request Graduate Studies approval for the various functions indicated. The Registrar’s Office receives notification when forms approved and enters relevant information in the student record system.

Research Compliance

There are certain types of research or activities that may not be pursued unless specific prior approval and/or training has been obtained. Students should refer to KUMC Office of Compliance (http://www.kum.edu/compliance.html) policies.

Student Responsibilities

All graduate students are responsible for informing themselves of requirements and policies of the Office of Graduate Studies. They are also expected to be familiar with the regulations and requirements of their departments and of their graduate programs. Program Graduate Directors and the Office of Graduate Studies staff are ready to answer questions and offer counsel. It is each graduate student’s responsibility to know and observe all regulations and procedures relating to the graduate
degree program the student is pursuing. In no case will a regulation be waived or an exception be granted because students plead ignorance of, or contend that they were not informed of, requirements, regulations, procedures, and deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

Undergraduate Student Enrollment in Graduate Level Courses for Undergraduate Credit
Well-qualified undergraduate students may be permitted to enroll in 800- or 900-level courses for undergraduate credit with the approval of the instructor and the student’s advisor. For graduate courses offered by the KUMC campus, the student must bring a Count Towards Degree form signed by the instructor, a letter of explanation and recommendation from the advisor, and current academic record to the Office of Graduate Studies for approval. If approved, the Office of Graduate Studies signs the Count Towards Degree form, which the student must then present to the staff in the KUMC Registrar’s Office if currently enrolled as a KUMC undergraduate or to the Student Records Center in Lawrence if currently enrolled as Lawrence undergraduate. The appropriate office staff (KUMC Registrar’s Office or Student Records Center) will enroll the student in the course(s). Courses taken for undergraduate credit may not be transferred to graduate credit.
Applied English

Applied English Center

Applied English Center courses provide English language instruction to non-native speakers of English. All students whose native language is not English, including international students and residents or citizens of the United States, are required by the Faculty Senate Rules and Regulations (http://www.policy.ku.edu/) to enroll in the English language courses, if any, specified for them by the AEC before enrolling in any academic work.

Admission to KU does not constitute a waiver of the University of Kansas English proficiency requirement. Students may be required to take the English Proficiency Exam and may be required to take courses with the Applied English Center.

Courses labeled 140 and above and AECT 101 are available for credit toward an undergraduate degree. To receive a grade of Credit, students must receive a grade of A, B, or C in the course. Transcripts show No Credit for these courses in which students receive a grade of D or F.

A maximum of 9 hours of credit may count toward undergraduate degrees in the College of Liberal Arts and Sciences and the School of Business. A maximum of 6 hours of credit may count toward undergraduate degrees in the School of Architecture, Design and Planning. Consult an advisor in the College or school for details.

Courses

AEC 1. Level 1 Support Course. 2 Hours.
In this class, learners will look at vocabulary in authentic contexts. Students examine vocabulary for depth, considering the types of word knowledge needed to know, to understand, and to use words correctly. Examples of this data include collocations, synonyms, antonyms, and word parts (prefixes, roots, and suffixes). This course also focuses on increasing the breadth of learner vocabulary. Prerequisite: Placement by the Applied English Center, LEC.

AEC 2. Level 2 Support Course. 2 Hours.
Verbs enable language users to convey multi-dimensional messages, allowing them to travel precisely back and forth in time and indicate what is possible, permissible and polite. Yet many students see and use verbs in a one-dimensional way, focusing on the definition of the verb but disregarding the time message of tense and the nuance of modals. This class will address that discrepancy. Although students will practice verb forms, the class concentration will be on the recognition and accurate use of the functional message of verb tenses and modals. Specifically, students will analyze the forms and functions of targeted verb tenses, select appropriate verb tenses in written and oral activities and expand control of sentence-level grammar. Prerequisite: Placement by the Applied English Center, LEC.

AEC 3. Level 3 Support Course. 2 Hours.
This course supports the Level 3 core courses by emphasizing and targeting reading skills in an effort to further improve their reading comprehension, increase their reading fluency and develop their vocabulary as demonstrated in their writing and speaking. Reading selections target comprehension and critical thinking skills while timed word and reading selections are used to promote reading speed and fluency. Vocabulary development is targeted through morphemic analysis of roots and affixes and study of context clues. Prerequisite: Placement in this course by Applied English Center, LEC.

AEC 4. Elective: Special Topics in: ____. 2 Hours.
Skill-based or content-based special topics for upper level students enrolled in at least one Applied English Center core course. Prerequisite: Placement in this course by the Applied English Center, LEC.

AEC 5. Short Term Program with Applied English Center Course Enrollment: _____. 0-16 Hours U.
Skill-based special topics at appropriate level(s) for short term program students attending core AEC courses for a partial term. Prerequisite: Placement in this course by the Applied English Center, LEC.

AEC 6. Anticipated Future Applied English Center Credit Hours. 1-16 Hours U.
This course is a placeholder for future anticipated Applied English Center credit hour enrollment. Prerequisite: Placement in this course by the Applied English Center, LEC.

AEC 7. Short Term Programs Self-Contained Enrollment: _____. 0-16 Hours U.
Specialized English language courses for short term program students. Courses focus on the use of English in particular fields of study or employment based on program objectives. Prerequisite: Placement in this course by the Applied English Center, LEC.

AEC 8. Classroom Communication for International Teaching Assistants. 3-4 Hours U.
Practice of communication skills: pronunciation, fluency and vocabulary development, question and answer techniques, paraphrasing and discussion; video-recorded practice teaching mini-lectures or demonstrations with feedback by instructor in tutorial sessions and by other native speakers during presentations. Open only to graduate students or seniors near graduation. Four credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Students must have completed all AEC courses except AECG 151 or AECR 151, have a score of at least 35 on the SPEAK test; and have written permission from the Applied English Center, LEC.

AEC 90. English Proficiency Test. 0 Hours U.
Final proficiency test. Required of all students enrolled in one or more Applied English Center courses, except AEC 82. Graded satisfactory/unsatisfactory, LEC.

Courses

Basic English is a fully-integrated English as a Second Language course designed for students at the lowest level of English proficiency. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, speaking, listening, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at a beginning to middle A1 CEFR proficiency level. Specifically, students will be able to understand and use familiar everyday expressions and very basic phrases in both speech and writing. Students will also be able to interact in a simple way provided the other person talks slowly and clearly, LEC.
Courses

**AECL 13. Listening, Speaking and Grammar for Academic Purposes 1. 3-8 Hours U.**

Students in Level 1 Listening/Speaking/Grammar are at the beginning of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the A2 CEFR proficiency level. Specifically, students will be able to communicate and understand simple, foundational English relevant to academic study. Prerequisite: Placement in this course by the Applied English Center. LEC.

**AECL 20. Listening, Speaking and Grammar for Academic Purposes 2. 3-8 Hours U.**

Students in Level 2 Listening/Speaking/Grammar are at a high-beginning/low-intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B1 CEFR proficiency level. Specifically, students will be able to understand the main points of clear standard input regularly encountered in academic study and can produce simple connected speech on relevant topics. Prerequisite: Placement in this course by the Applied English Center. LEC.

**AECL 30. Listening, Speaking and Grammar for Academic Purposes 3. 3-8 Hours U.**

Students in Level 3 Listening/Speaking/Grammar are at an intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2 CEFR proficiency level. Specifically, students will be able to understand the main ideas of lectures on both concrete and abstract topics and will be able to interact with a degree of fluency and spontaneity that makes regular interaction with native speakers possible. Prerequisite: Placement in this course by the Applied English Center. LEC.

**AECL 140. Listening, Speaking and Grammar for Academic Purposes 4. 3-8 Hours U.**

Students in Level 4 Listening/Speaking/Grammar are at a low-advanced level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2/C1 CEFR proficiency level. Specifically, students will be able to understand the main ideas and begin to recognize implicit meaning in lectures on both concrete and abstract topics, and will be able to begin to express themselves fluently and spontaneously for academic purposes. Prerequisite: Placement in this course by the Applied English Center. LEC.

**AECL 151. Listening, Speaking and Grammar for Academic Purposes 5. 3-7 Hours U.**

Students in Level 5 Listening/Speaking/Grammar are at an advanced and final level of English for Academic Purposes study. The purpose of this course is to help students strengthen and refine their English skills in listening, speaking, grammar and vocabulary. By the end of this course, students will be able to produce language at the C1 CEFR proficiency level. Specifically, students will be able to understand a wide range of demanding, longer speech and recognize implicit meaning in lectures on both concrete and abstract topics. Students will also be able to express themselves fluently and spontaneously and use language flexibly and effectively for academic purposes. Prerequisite: Placement in this course by the Applied English Center. LEC.

**Courses**

**AECO 21. University Life in the U.S. 1. 1 Hour.**

This is the first course in a two-course series whose purpose is to introduce and acclimate students to U.S. university life and culture. In this first course, students will learn about the U.S. university system, be introduced to campus culture in the U.S., discover what resources and support are available for students at U.S. universities, and explore different aspects of student life. While language development is not the primary objective of this course, students will be able to self-assess their language skills through their ability to complete course activities. Additionally, students will take a language assessment at the end of the course that will give them an idea of their English proficiency and where they would potentially begin their study should they choose to attend the University of Kansas. LEC.

**AECO 22. University Life in the U.S. 2. 1 Hour.**

This is the second course in a two-course series whose purpose is to introduce and acclimate students to U.S. university life and culture. In this second course, students will become familiar with U.S. academic culture and expectations, discover and utilize learning strategies that will be particularly helpful in U.S. classrooms, understand what technology skills are needed to succeed and learn about how to apply to U.S. universities. While language development is not the primary objective of this course, students will be able to self-assess their language skills through their ability to complete course activities. Additionally, students will take a language assessment at the end of the course that will give them an idea of their English proficiency and where they would potentially begin their study should they choose to attend the University of Kansas. LEC.

**AECO 81. Staying Current: Professional Development for EFL Teachers. 2 Hours.**

This practical and project-oriented course is for current EFL teachers who want to enhance their professional knowledge and skills. The course has two foundational modules: Enhancing Planning and Engaging the EFL learner. Enhancing Planning builds on foundations of lesson planning through analyzing strong lesson planning features, addressing areas of weakness in plan development, applying new strategies in lesson sequence, and aligning courses with intended outcomes. Engaging the EFL learner is a multifaceted approach to creating a dynamic classroom through cultivating classroom management, using technology and authentic materials, and adapting materials and lessons. Course participants will also participate in two specialized modules: pedagogical grammar and pronunciation. Pedagogical grammar and pronunciation will focus on considerations and best practices in various teaching contexts. Participants will apply what they have learned by developing activities and strategies ready to be used in a classroom setting. LEC.
foundational English relevant to academic study. Prerequisite: Placement in this course by the Applied English Center. LEC.

**AECR 20. Reading, Writing and Grammar for Academic Purposes 2. 3-8 Hours U.**

Students in Level 2 Reading/Writing/Grammar are at a high-beginning/low-intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B1 CEFR proficiency level. Specifically, students will be able to understand the main points of clear standard input regularly encountered in academic study and produce simple connected text on relevant topics. Prerequisite: Placement in this course by the Applied English Center. LEC.

**AECR 30. Reading, Writing and Grammar for Academic Purposes 3. 3-8 Hours U.**

Students in Level 3 Reading/Writing/Grammar are at an intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2 CEFR proficiency level. Specifically, students will be able to understand the main ideas of complex text on both concrete and abstract topics and will be able to produce clear, detailed text on a wide range of subjects. Prerequisite: Placement in this course by the Applied English Center. LEC.

**AECR 140. Reading, Writing and Grammar for Academic Purposes 4. 3-8 Hours U.**

Students in Level 4 Reading/Writing/Grammar are at a low advanced level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2/C1 CEFR proficiency level. Specifically, students will be able to understand the main ideas of complex text on both concrete and abstract topics and begin to recognize implicit meaning. Students will also be able to produce clear, detailed text on a wide range of subjects and begin to demonstrate control of organizational patterns, connectors and cohesive devices. Prerequisite: Placement in this course by the Applied English Center. LEC.

**AECR 151. Reading, Writing and Grammar for Academic Purposes 5. 3-7 Hours U.**

Students in Level 5 Reading/Writing/Grammar are at an advanced and final level of English for Academic Purposes study. The purpose of this course is to help students strengthen and refine their English skills in reading, writing, grammar and vocabulary. By the end of this course, students will be able to produce language at the C1 CEFR proficiency level. Specifically, students will be able to understand a wide range of demanding, longer texts, and recognize implicit meaning and will be able to use language flexibly and effectively for academic purposes. Students will also be able to produce clear, well-structured detailed texts showing controlled used of organizational patterns, connectors and cohesive devices. Prerequisite: Placement in this course by the Applied English Center. LEC.

**Courses**

**AECT 1. Special Enrollment in English as a Second Language Non-Credit Tutorial: _____. 1-16 Hours U.**

Individualized schedule of instruction in one or more language skills at appropriate level(s) for students enrolling in level 1, 2, or 3 AEC courses.

**AECT 82. Tutorial in Classroom Communication for International Teaching Assistants: _____. 2-4 Hours U.**

Improve English communication skills: work on pronunciation and grammatical accuracy and fluency using speech recognition software and by presenting mini-lectures that are video recorded for review. Receive individual feedback and prioritization of tasks in weekly tutorial. Special emphasis is placed on classroom communication strategies. Open only to graduate students or seniors near graduation. Variable hour enrollment dependent on student need. Prerequisite: Students must have completed all AEC courses except AECG 151 or AECR 151, have a score of at least 35 on the SPEAK test, and have written permission from the Applied English Center. LEC.

**AECT 101. Special Enrollment in English as a Second Language For-Credit Tutorial: _____. 1-16 Hours U.**

Individualized schedule of instruction in one or more language skills at appropriate level(s) for students enrolling in level 4 or 5 AEC courses. Prerequisite: Placement in this course by the Applied English Center. LEC.

**Courses**

**AESP 1. Applied English Center Special Topics: _____. 1-3 Hours.**

This course is designed by the Applied English Center to meet the needs of international students of varying majors, whose first language is not English. These courses are available in several different areas and topics. LEC.

**AESP 160. Applied English Center Special Topics: _____. 0-3 Hours.**

This course is designed by the Applied English Center to meet the needs of international students of varying majors, whose first language is not English. These courses are available in several different areas and topics. LEC.

**Courses**

**EAP 101. English for Academic Purposes I. 6 Hours U.**

A general introduction to academic English for students in term one of the AAP3 track of the KU Academic Accelerator Program (KU AAP). The course utilizes materials from textbooks and short lectures appropriate for use in courses in the humanities, social sciences, and sciences. The focus is on the use of English and academic strategies necessary to access, understand, recreate, and critically discuss disciplinary content typical of lower division academic courses. Students read textbook chapters, listen to short academic lectures, take tests, write papers, and give oral presentations on topics from various disciplines. This course is paired with EAP 111 and instructors collaborate to teach students how to write a research paper. Prerequisite: Placement in this course is by the Undergraduate Accelerator Program. Students must be concurrently enrolled in or have previously taken EAP 111. LEC.

**EAP 102. English for Academic Purposes II. 3 Hours U.**

An advanced academic English course that helps KU AAP students expand their ability to use English to access, understand, re-create, and critically discuss disciplinary content for American Studies 100, a lower division academic class. EAP 102 emphasizes academic strategies and the use of vocabulary, collocations, grammar, and larger pieces of discourse to express ideas and relationships among the concepts central to AMS 100. Students will demonstrate knowledge of academic English based on content from the American Studies course through class discussions and activities, oral presentations, and academic papers. Prerequisite: Completion of EAP 101 with A, B, or C; or placement
upon arrival testing. Students must be concurrently enrolled in or have
previously taken AMS 100. LEC.

**EAP 111. Information Literacy. 1 Hour U.**
An advanced academic English course focusing on introducing the
concepts and best practices of information literacy including the critical
thinking skills essential to identifying information to be researched,
deciding where to search for information, gathering and evaluating
sources, avoiding plagiarism by citing sources appropriately, and
presenting information effectively. The course emphasizes the process of
researching a topic related to concepts taught in EAP 101. Prerequisite:
Placement in this course is by the Undergraduate Accelerator Program.
LEC.

**EAP 121. English Grammar for Academic Purposes I. 2 Hours U.**
A two-credit, high-intermediate grammar course designed to introduce
key vocabulary and major grammatical structures used in Environmental
Studies 170 (EVRN 170). Students are introduced to a range of
vocabulary and grammar structures typically used to define, explain,
and illustrate key concepts central to the content taught in EVRN 170.
The focus is on organization, grammatical accuracy, word choice, and
general comprehensibility. Prerequisite: Placement in this course is by
the Undergraduate Accelerator Program. Students must be concurrently
enrolled in or have previously taken EVRN 170. LEC.

**EAP 122. English Grammar for Academic Purposes II. 1 Hour U.**
A one-credit, advanced grammar course that focuses on the lexical and
grammatical expression of key concepts in Environmental Studies 171
(EVRN 171). Students explore the vocabulary, phrases, and grammatical
options necessary for accurate and direct responses to prompts and
short-answer questions central to the content taught in EVRN 171. There
is an intense focus on overall comprehensibility, lexical choice, and
grammatical accuracy. Prerequisite: Completion of EAP 121 with A, B,
or C. Students must be concurrently enrolled in or have previously taken
EVRN 171. LEC.

**EAP 123. Integrated English Grammar for Academic Purposes. 1 Hour.**
EAP 123 is a one-credit advanced grammar course that focuses on the lexical and grammatical expression of key concepts in EVRN 170 and 171. It is intended for KUAAP students entering the first semester of the AAP 2 program. Students explore the vocabulary, phrases, and grammatical structures necessary for accurate and direct responses to prompts and short-answer questions that reflect the content of EVRN 170 and 171. There is an intense focus on overall comprehensibility, lexical choice, and grammatical accuracy, as demonstrated in writing assignments and other tasks. Prerequisite: Placement in this course is by the Undergraduate Accelerator Program. Students must be concurrently enrolled in or have previously taken the corresponding EVRN course for this grammar course. LEC.

**EAP 601. English for Professional Purposes. 4 Hours.**
An advanced English preparatory course that helps students expand
their ability to use English to access, understand, re-create, and critically
discuss disciplinary content for graduate level academic classes. The
class emphasizes academic strategies and the use of vocabulary,
collocations, grammar, and larger pieces of discourse to express ideas
and relationships among the concepts central to these courses. Students
will write papers and give oral presentations based on content from the
disciplines. Prerequisite: Participation in the KU MAP program. LEC.

**EAP 602. English for Specific Purposes. 2 Hours.**
An advanced grammar course that focuses on building fluency through an
applied approach that reinforces the specific language skills necessary to
work in a particular field. Content will include the lexical and grammatical
expression of key concepts in graduate courses in term 1 of the MAP2

**Courses**

**GSP 707. Professional Presentations in the American Academy. 2 Hours.**
A course that provides illustrative models and examples, practice, and
feedback to allow mastery of professional, informative, and engaging
professional and disciplinary presentations. Students will learn the major
creative components and organizational structures for professional and
conference presentations including: introductions, poster sessions, short
lectures or research presentations, and meetings. Students will practice
using appropriate delivery modes and skills and develop visual aids for
presentations. (Same as GS 707.) Prerequisite: Participation in the KU
MAP program. LEC.

**GSP 751. Introduction to Graduate Writing in US Institutions. 2 Hours.**
A course that prepares students to meet the challenges of advanced
academic writing in their chosen field or major by expanding their
repertoire of research-related vocabulary, structures, and rhetorical
patterns. Students will become familiarized with professional and research
writings. Emphasis is placed on citing and quoting primary materials,
organizational strategies, and grammar, editing, and usage. (Same as GS
751.) Prerequisite: Participation in the KU MAP program. LEC.
Reserve Officers Training Corps

The University of Kansas is one of only 37 U.S. universities with a full offering of Army, Air Force, and Naval ROTC programs. These programs are integrated into the mainstream of campus activities. All ROTC programs offer scholarships that pay tuition and fees, furnish books and uniforms, and provide a monthly living allowance.

Students in ROTC pursue regular courses toward a degree and augment their studies with courses from the Departments of Military Science, Aerospace Studies, or Naval Science. These courses may be cross-listed with a professional school or reviewed on an individual basis by the Assembly of the College of Liberal Arts and Sciences (http://clas.ku.edu/) for accreditation toward degree requirements.

On successful completion of requirements and graduation from KU, Army and Air Force ROTC cadets are commissioned into their respective service as Second Lieutenants. Naval ROTC midshipmen commission as Ensigns in the Navy, or Marine Corps Second Lieutenants.

Programs

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu/) for details). Other years’ catalogs

Army - Army: Department of Military Science

Air Force - Air Force: Department of Aerospace Studies

Navy - Navy: Department of Naval Science

Army: Department of Military Science

The Program

The Department of Military Science administers the Army Reserve Officers Training Corps program at KU. The military science curriculum provides a student with unique leadership and management training, along with practical experience. It develops qualities basic to success in the Army and in the civilian sector. It also offers the student the opportunity to earn an officer’s commission in the Army.

Eligible students enrolled at KU may register for a 100- or 200-level military science course or for ARMY 303 or ARMY 450. These students receive credit if the course they are enrolled in has been approved for degree credit in the College of Liberal Arts and Sciences (http://clas.ku.edu/). The credit does not count toward the required 100 hours in the College for students earning a baccalaureate degree in the College of Liberal Arts and Sciences.

Students who want to receive a commission in the Army through the ROTC program must meet the eligibility requirements of Section 2103, Title 10, U.S. Code, and current Department of Defense and Department of the Army guidelines.

4-Year Program

The 4-year Army ROTC program is made up of a basic course and an advanced course.

Basic Course

The basic course is taken during the first 2 years of college. It covers subjects such as organizational behavior, leadership, management, ethics, writing, public speaking, military affairs, and tactics. All necessary textbooks, classroom materials, uniforms, and other equipment are furnished at no cost. Students who have completed the basic course; have met academic, physical, and medical standards; and have the potential to serve as officers may enter the advanced course.

The basic course is composed of a total of 4 courses. A student may enter the basic course at one of 3 points (if eligible).

Advanced Course

The advanced course normally is taken during the final 2 years of college. It offers instruction in military organization, tactics, military law, Army administration, and leadership. All necessary books, classroom supplies, uniforms, and other equipment are issued to students at no cost. During the summer between the junior and senior years of college, students must attend the Leadership Development and Assessment Camp, a fully paid, five-week training and evaluation course. LDAC gives each student the chance to practice for an extended period of time what they have learned in the classroom. All students contracted in the advanced course receive stipends from the government of up to $5,000 a year.

The advanced course is composed of a total of 4 courses.

2-Year Program

Students can receive credit for the basic course in 3 ways other than taking the 4 courses associated with the basic course. Students who complete the basic course by 1 of these alternate means can enroll in basic course classes but cannot enroll in the advanced course until they are academic juniors. Any upper-level student, junior through graduate, may earn a commission through the 2-year program. The 3 alternate ways to receive basic course credit are

1. Successfully completing the basic enlisted training offered by any of the armed services.
2. Successfully completing the ROTC Leadership Training Course held each summer (prerequisite to ARMY 301).
3. Successfully completing at least 4 years of high school Junior ROTC.

Professional Military Education Course

The following course is required for commissioning:

Military History. Gain an understanding of the evolution of warfare, military theory, the military profession, and the place of military institutions in American society. The requirement can be met by successfully completing a history course focusing on either a major war or on military history in general. ROTC courses also meet this requirement.

Scholarships and Financial Assistance

Army ROTC offers 2-, 3-, and 4-year scholarships to qualified students. Scholarships are awarded on a competitive basis to students with outstanding academic and leadership abilities. These scholarships pay for all tuition, required fees, $1,200 a year for books and other supplies, and a stipend of up to $5,000 a year. Special consideration is given to students who major in nursing, engineering, or the sciences. The Kansas Army National Guard offers numerous educational benefits such as the Board of Regents Scholarship.

Army National Guard and Army Reserve Students

Students who are members of the Army National Guard or the Army Reserve may enroll in Army ROTC classes and be members of their units at the same time. Once students enter a contractual agreement as early as their sophomore year, they can remain members of their units under the Simultaneous Membership Program. These students are still eligible for all military benefits they have earned under enlisted contract such as Tuition Assistance, GI Bill, and drill pay; additionally, they may compete for guaranteed reserve forces designated ROTC scholarships if they commit to commissioning to the Army Reserve or Army National Guard.

Courses

ARMY 10. Leadership Laboratory. 0 Hours U.
Required of all Army Cadets. A study of Army customs and courtesies, drill and ceremony, career opportunities in the Army, and the life and work of a junior Army officer. Cadets develop leadership potential through practical supervised training. Course must be taken in conjunction with Army 101, 102, 201, 202, 301, 302, 401, and 402. Course not approved for credit in the College of Liberal Arts and Sciences. LAB.

ARMY 101. Introduction to Military Science I. 1 Hour U.
Required introductory course for the Army military science program. Course is comprised of one hour of lecture and one hour of laboratory per week. Introduces the military science program as an element of the reserve forces and includes an examination of major legislation, the Army organization structure, and military leadership techniques. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

ARMY 102. Introduction to Military Science II. 1 Hour U.
Course comprised of one hour of lecture and one hour of leadership laboratory per week. A general study and appreciation of the American military system from colonial times to the present. The course identifies factors present in the American society and national policy in each particular historical period which influenced the development of American military systems. The relationship between the military establishment and the larger American society is examined in each historical period. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 101 or department approval. LEC.

ARMY 201. Basic Military Science I. 1 Hour U.
Course comprised of one hour of lecture and one hour of laboratory per week. Analyzes the principles of war and military leadership at small unit level, and introduces principles of military writing. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 102 or department approval. LEC.

ARMY 202. Basic Military Science II. 1 Hour U.
Course is comprised of one hour of lecture and one hour of leadership laboratory per week. Curriculum consists of the fundamentals of topographic map reading and their application in a field environment. Includes instruction in various types of maps, marginal information,
topographic symbols and colors, scale, distance, direction and use of the magnetic compass. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 201 or department approval. LEC.

ARMY 301. Theory and Dynamics of Tactical Operations I. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. A comprehensive study of conventional tactical operations. Emphasizes the fundamentals of land warfare and the qualities necessary to conduct fluid, non-linear operations. Introduces the student to the tenets of Air-Land Battle, the underlying structure of modern warfare, the dynamics of combat power, and the application of classical principles of war to a contemporary battlefield. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 301 or department approval. LEC.

ARMY 302. Theory and Dynamics of Tactical Operations II. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. Expands on the application of conventional tactical operations in the low, medium, and high intensity conflict spectrum. Examines the three-dimensional nature of modern warfare and the unified battlefield. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 301 or department approval. LEC.

ARMY 303. Military Conditioning. 1 Hour U.
Introduction to the theoretical and practical aspects of developing physical fitness programs for all Army personnel from the commander or supervisor's perspective. Provides an overview of total fitness, defines physical fitness, outlines the phases of fitness, discusses various types of fitness programs, and presents evaluation criteria. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

ARMY 401. Concepts of Military Management. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. An introduction to the military management system with special attention to the functions, organizations, and operations of military training, logistics and administration. The use of standardized staff formats in the development of plans and orders is emphasized from the standpoint of the leader with limited resources. Extensive use of standard staff procedures is emphasized in problem solving scenarios. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 302 or department approval. LEC.

ARMY 402. The Military Profession. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. A seminar on the military profession as an object of social inquiry. Focus is on the internal structure of the profession, current problems, and interaction with the larger American society. Seminar topics include but are not limited to the following: a historical perspective on the military profession; civil-military relations; social and political impact of military activities; military justice; professionalism versus careerism. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 401 or department approval. LEC.

ARMY 450. Military Analysis. 1 Hour U.
A study of present and future military operations; emphasis placed on analysis of problem. The student will defend his/her analysis through written and oral presentations. Prerequisite: Permission of department chairperson. LEC.

Reserve Officers Training Corps - Air Force

The Program
The Air Force Reserve Officer Training Corps (AFROTC) program provides education and training to prepare men and women to become Air Force officers while completing their college degree. To accomplish this, the Air Force, with the approval of the University of Kansas, has established a curriculum that allows a student to commission as an officer in either 3- or 4-years.

Air Force: Department of Air & Space Studies

Detachment 280, Military Science Building
1520 Summerfield Hall Drive, Room 109
Lawrence, KS 66045-7554
785-864-4676
http://www.afrotc.ku.edu/

Lieutenant Colonel Nicole Phelan, Chair
785-864-4676

The Program
The 3- and 4-year Air Force ROTC programs are divided into the General Military Course (GMC) and Professional Officer Course (POC).

General Military Course (GMC)
The GMC is offered during the first two years of college and constitutes an introduction to the present day Air Force. The emphasis is on the role of military forces in world affairs, customs and courtesies, being an officer, professionalism, the mission and organization of the Air Force, and the history of air power. All necessary textbooks, classroom material, uniforms, and other equipment are furnished at no cost. Students who have completed the GMC, have met academic, physical and medical standards, and have successfully completed 4 weeks of Field Training may enter the Professional Officer Course (POC).

The GMC is composed of a total of 4 courses. A student may enter the GMC at one of three points (if eligible).

1. Entering First Semester – First Year Students (Freshmen Year)
First Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 144 - Foundations of the USAF - 1 credit

Second Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 148 - Foundations of the USAF - 1 credit

Third Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 284 - Airpower History - 1 credit
Fourth Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 288 - Airpower History - 1 credit

2. Entering Second Semester – First Year Students (Freshmen Year)
First Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 148 - Foundations of the USAF - 1 credit

Second Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 144 - Foundations of the USAF - 1 credit
AIR 284 - Airpower History - 1 credit

Third Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 288 - Airpower History - 1 credit

3. Entering Third Semester – Second Year Students (Sophomore Year)
First Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 148 - Foundations of the USAF - 1 credit
AIR 284 - Airpower History - 1 credit

Second Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 144 - Foundations of the USAF - 1 credit
AIR 288 - Airpower History - 1 credit

Professional Officer Course (POC)
The POC normally is taken during the final 2 years of college. The emphasis is on leadership and management, organizational patterns, technologies, military policies and procedures and provides in-depth study of national security affairs. Cadets also learn and practice communication, leadership and management skills. POC cadets receive a non-taxable subsistence allowance. All necessary textbooks, classroom material, uniforms, and other equipment are furnished at no cost.

The POC is composed of a total of 4 courses.

First Year (Junior Year)
First Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 344 - Leadership Studies - 3 credits

Second Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 348 - Leadership Studies - 3 credits

Second Year (Senior Year)
First Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 404 - National Security Affairs - 3 credits

Second Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 408 - National Security Affairs - 3 credits

Scholarships
High school seniors may apply for Air Force ROTC scholarships covering the 4-year college period. Some technical majors, such as engineering, are regularly approved for five-year scholarship support. Students should apply no later than December 1 of the senior year of high school. Online applications are available beginning 1 June of the junior year.

Qualified college students can compete for 2- and 3- year scholarship opportunities. These are awarded competitively and students automatically qualify to compete if they meet designated standards.

Scholarships generally cover tuition, laboratory and incidental fees, $600 a year for books, and the non-taxable subsistence allowance. Visit the afrotc.com for more information and to apply online for a high school scholarship.

Courses
AIR 100. Leadership Laboratory. 0 Hours U.
The AS 100 and AS 200 Leadership Laboratory courses (LLABs) include a study of Air Force customs and courtesies, drill and ceremonies, and military commands. The LLAB also includes studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. The AS 300 and AS 400 LLABs consist of activities classified as leadership and management experiences. They involve the planning and controlling of military activities of the cadet corps and the preparation and presentation of briefings and other oral and written communications. LLABs also include interviews, guidance, and information which will increase the understanding, motivation, and performance of other cadets. LAB.

AIR 144. Foundations of the USAF. 1 Hour U.
Survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officer and professionalism, military customs and courtesies, Air Force officer opportunities, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.

AIR 148. Foundations of the USAF. 1 Hour U.
Survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officer and professionalism, military customs and courtesies, Air Force officer opportunities, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.

AIR 284. Airpower History. 1 Hour U.
A course designed to examine general aspects of air and space power through an historical perspective ranging from the first balloons and dirigibles to space-age satellite systems and the Global War on Terrorism. Leaders, pivotal situations in peace and war, successes and failures are provided to extrapolate the development of Air Force capabilities (competencies), and missions (functions) in shaping today’s USAF air and space power. In addition, the students will continue to discuss the importance of the Air Force Core Values with the use of operational examples and historical Air Force leaders and will continue to develop their communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.
AIR 288. Airpower History. 1 Hour U.
A course designed to examine general aspects of air and space power through an historical perspective ranging from the first balloons and dirigibles to space-age satellite systems and the Global War on Terrorism. Leaders, pivotal situations in peace and war, successes and failures are provided to extrapolate the development of Air Force capabilities (competencies), and missions (functions) in shaping today's USAF air and space power. In addition, the students will continue to discuss the importance of the Air Force Core Values with the use of operational examples and historical Air Force leaders and will continue to develop their communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.

AIR 344. Leadership Studies. 3 Hours U.
A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as means of demonstrating and exercising practical application of the concepts being studied. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course. LEC.

AIR 348. Leadership Studies. 3 Hours U.
A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as means of demonstrating and exercising practical application of the concepts being studied. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course. LEC.

AIR 404. National Security Affairs. 3 Hours U.
Course examines the national security process (from a military standpoint) from its birth with the Founding Fathers and the US Constitution to the joint warfare scenarios of today. It looks at the Constitutionally established roles of the legislative and executive branches of government in dealing with defense issues during war or peacetime. It examines the current command and control structure within the Department of Defense and outlines the global responsibilities of the military, specifically of the US Air Force. This course also examines the development of National Security policy and the interrelationship between the Air Force, sister services and the Air Reserve Component. Multiple classroom hours on formal military communications skills (writing and briefing) are included. The course culminates with a look at current political trends and U.S. defense policy decisions in some of the world's major geographical areas. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences giving students the opportunity to apply leadership principles in a dynamic setting. LEC.

AIR 408. National Security Affairs. 3 Hours U.
Course examines U.S. National Security Policy as it relates to major geographical regions and political issues across the world. It also covers multiple legal, social and policy structures/procedures that Air Force officers and commanders face day-to-day. Air Force communications techniques, formal writing and speaking, are covered in detail. The latter part of the course addresses situations that new officers will encounter in their first few assignments. LEC.

Navy: Department of Naval Science

The Program

Courses in naval science include both practical and theoretical instruction in subjects pertaining to the Navy and the Marine Corps. The Navy-option student receives 23 credit hours of naval science instruction over a period of 4 years. The Marine-option student receives 17 credit hours of instruction.

Additionally, naval science laboratory meets every semester for 4 years. Laboratory sessions integrate and apply knowledge gained from naval science courses through practical application during tactical planning exercises, leadership training, and professional development. They also include classroom instruction on issues relating to naval careers and policies and some close-order drill.

Navy: Department of Naval Science

Military Science Building
1520 Summerfield Hall Drive. Room 115
Lawrence, KS 66045-7554
785-864-3161

4-Year Scholarship NROTC Students

Students may begin applying for scholarships as early as their second semester of their high school junior year (preceding the year in which the scholarship is desired). This scholarship is rolling, and therefore students will be selected periodically until the deadline (which typically occurs between December and January). Selection is based on high school grades, SAT/ACT test results, physical ability, citizenship, and aptitude for naval service.

If selected, students are appointed as midshipmen and granted compensation and benefits specified by law. These benefits include tuition, required fees, laboratory equipment, a $750-a-year book stipend, and subsistence pay of $250 a month for first-year students. Subsistence pay increases to $300 a month for sophomores, $350 for juniors, and $400 for seniors.

Scholarship students participate in 3 required summer training cruises. Scholarship students assume an obligation to serve at least 5 years on active duty after commissioning as Ensign, U.S. Navy, or 4 years as Second Lieutenant, U.S. Marine Corps.

Students with 30 or more college credits are not eligible to apply for this scholarship. More information can be found at www.nrotc.navy.mil (http://catalog.ku.edu/rotc/nvy/www.nrotc.navy.mil).

4-Year College Program NROTC Students

These NROTC students have the status of civilians who have entered into an agreement with the Navy. They are not entitled to the benefits and compensation given to scholarship NROTC students, but are entitled to uniform issue. A subsistence allowance of $350 a month for juniors and $400 for seniors is paid in the final two years of training if they are selected for scholarship.
These students participate in one summer cruise between their junior and senior years. College program students agree to accept commissions in the Navy or Marine Corps.

Upon proven superior performance in the college program, students will apply for a 3- or 2-year scholarship with the same requirements and benefits as 4-year scholarship students. Students must be selected for a scholarship by the end of their junior year to complete training. Admission into this program is through the KU NROTC Recruiting Officer.

**3- and 2-Year Programs (Side-load Scholarship)**

Entrance into the 3- or 2-year scholarship, or “side load scholarship”, program is offered to qualified students with 3 or 2 years remaining to complete their undergraduate degrees. Students applying for these scholarships are encouraged to have completed 1 year of differential and integral calculus of 1 real variable (MATH 115 and MATH 116, or MATH 121 and MATH 122) and must have attained a minimum grade of C.

Applications for these programs must be completed by date released via message to the Naval ROTC at University of Kansas. For more information contact the KU NROTC Recruiting Officer.

**Naval Science Students**

Any student enrolled at KU may enroll in a naval science course for KU credit after obtaining consent of the Naval Science Instructor. Such students are not considered to be in the NROTC program and are not entitled to receive any compensation, benefits, or a commission.

**4-Year Program Requirements**

Both Navy- and Marine-option students must take professional Navy and Marine courses as part of the NROTC program. The normal sequence of courses is:

**Navy Students**

**MCOR 380** Evolution of Warfare 3
**MCOR 384** Fundamentals of Maneuver Warfare 3
**NAVY 402** Seminar in Military Leadership and Management (Leadership and Management II) 3

The above courses are approved by the College of Liberal Arts and Sciences (http://clas.ku.edu/) and count as elective credit but do not count toward the required 100 hours in the College for students earning a baccalaureate degree in the College of Liberal Arts and Sciences.

**Navy Option**

**Navy scholarship students** must take the following courses in the College of Liberal Arts and Sciences:

**Code** | **Title** | **Hours**
|--------|------------|--------|
| MATH 115 | Calculus I | 3
| MATH 116 | Calculus II | 3
| --- | --- | --- |
| MATH 121 | Calculus I | 5
| MATH 122 | Calculus II | 5
| PHSX 211 | General Physics I | 4
| PHSX 216 | General Physics I Laboratory | 1
| PHSX 212 | General Physics II | 3
| PHSX 236 | General Physics II Laboratory | 1

(MATH 122 is a prerequisite for PHSX 212.)  

**Plus courses in the following areas**

- English: 6
- American History/National Security Policy: 3
- World Cultural/Regional Studies: 3

**Navy-option college program students** must take the following courses in the College of Liberal Arts and Sciences. While not required, Calculus and Physics are highly encouraged in order to be competitive for a scholarship:

**Code** | **Title** | **Hours**
|--------|------------|--------|
| MATH 101 | College Algebra | 3
| Any math course greater than MATH 101 (must have at least 6 credit hours total) | 3
| Physical Sciences | 6

**Marine Corps Option**

**All Marine-option students** must take the following courses in the College of Liberal Arts and Sciences:

**Code** | **Title** | **Hours**
|--------|------------|--------|
| English | 6
| American History/National Security Policy | 3
Courses

MCOR 380. Evolution of Warfare. 3 Hours U.
A study of the art, science, concepts, and evolution of warfare as one instrument of government policy throughout history. The study of selected battles and campaigns serves as a vehicle to emphasize the application of the classical principles of warfare, the influence of leadership, and the advancement of technology of the art and science of war. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of twenty-five hours accepted from other schools and divisions. LEC.

MCOR 384. Fundamentals of Maneuver Warfare. 3 Hours U.
Broad aspects of warfare and their interactions with maneuver warfare doctrine. Focus on the United States Marine Corps as the premier maneuver warfare fighting institution. Historical influences on current tactical, operational, and strategic implications of maneuver warfare practices. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

Courses

NAVY 100. Naval Science Laboratory. 0 Hours U.
Designed for and required annually of all NROTC midshipmen, Sailors and Marines in order to provide increased knowledge in the areas of close-order drill, ceremonial functions, and general military training. Also applies knowledge learned from other accredited naval science courses. Highly educated, well known, professional guest lecturers appear frequently and make presentations on topics which apply to naval science courses, increase the educational awareness of future Navy and Marine Corps officers, and further develop the leadership and decision making of the officer candidates. Graded on a satisfactory/unsatisfactory basis. LAB.

NAVY 101. Introduction to Naval Science. 2 Hours U.
An introduction to the Department of the Navy (U.S. Navy and U.S. Marine Corps) emphasizing its mission, organization, operation, and relationship to other U.S. federal and military institutions. Through historical overview, the development of the current Department of the Navy mission, organization and operation, both at sea and ashore, including customs, traditions, regulations, and professional/technical vocabulary is examined. Educational opportunities and specializations for naval officers are also detailed. Approved for degree credit in the College of Liberal Arts and Sciences effective spring 1982. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 180. Introduction to Naval Ships Systems I. 3 Hours U.
A course designed to familiarize students with the types, structures, and purpose of naval ships. Ship compartmentation, propulsion systems, auxiliary power systems, electrical systems, interior communications, and control are included. Elements of ship design to achieve safe operations, damage control, and ship stability characteristics are examined. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 184. Introduction to Naval Ships Systems II. 3 Hours U.
The concept of weapons systems and the systems approach are explored. The techniques of linear analysis of ballistics and weapons are introduced. The dynamics of the basic components of weapons control systems are investigated. This course provides the tools for the future development in the student's understanding of the basic principles that underlie all modern naval weapons systems. To understand the evolving domain of cyber warfare, this course introduces topics in information systems. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 200. Seapower and Maritime Affairs. 3 Hours U.
A survey of U.S. naval history. Explores the historical evolution of sea power and its effect on world history. Presents naval aspects of U.S. conflicts from the American Revolution to the global war on terror. Introduces prominent U.S. Navy and Marine Corps leaders and their contributions. Examines the influence of technological innovation, domestic politics, and foreign policy on the development and execution of naval doctrine and tactics. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 300. Navigation and Operations I. 3 Hours U.
A comprehensive study of the theory, principles, and procedures of ship navigation in coastal and open ocean environment. Includes piloting, triangulation, ocean and tidal currents, International and U.S. inland rules of the road for navigation, sight reduction, publications, and logs; an introduction to electronic navigation, including theory of wave propagation, hyperbolic and azimuthal systems, doppler, inertial, and satellite systems. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 304. Navigation and Operations II. 3 Hours U.
A study of the laws for the prevention of collisions at sea; tactical formations and dispositions, relative motion, and the maneuvering board. A portion of the semester is devoted to an analysis of naval operations utilizing formal decision making theory, particularly as applied to command and control. Numerous case studies are used to examine the application of the above topics. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: MATH 101 or higher and NAVY 300. LEC.

NAVY 401. Principles of Naval Organization and Management. 3 Hours U.
An introduction of management functions as they apply to routine daily military activities. The concepts of planning, organizing, staffing, directing, controlling, and coordinating are introduced and examined using lecture, seminar, and case study methods. The course includes discussions on responsibility and accountability, power and influence, managerial theories, decision making, personnel appraisal, organizational structure, and communications. Emphasis is placed on management of personnel and physical resources. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 402. Seminar in Military Leadership and Management. 3 Hours U.
A study of military leadership and management which investigates techniques and concepts of task accomplishment in the absence of a normative business environment. The course includes an examination of military law, ethical leadership, personal responsibility, authority, and bureaucracy. The focus of discussion is on those aspects of leadership and management not normally present in civilian enterprise such as operating in the presence of hostility and morale management. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.
Pre-Majors

If you’re planning an undergraduate degree in a KU school that doesn't admit first-year students, you'll start out in the College of Liberal Arts and Sciences, complete your prerequisites, and then apply for admission to the KU school you want.

Meanwhile, you’ll be classified in one of the following ways:

- Prebusiness (p. 106)
- Preclinical laboratory science (p. 690)
- Predentistry (p. 1880)²
- Pre-education (p. 174)
- Pre-education (elementary) (p. 236)
- Pre-education (secondary) (p. 236)
- Pre-education (sport science/community health) (p. 350)
- Pre-education (p.e./health teacher education) (p. 350)
- Pre-engineering (p. 423)
- Prehealth information management (p. 726)
- Prehealth professions (p. 630)
- Prejournalism (p. 788)
- Prelaw (p. 1879)¹
- Premedicine (p. 1880)¹
- Prenursing (p. 2404)
- Pre-occupational therapy (p. 745)¹
- Pre-optometry (p. 1880)²
- Prepharmacy (p. 2457)
- Prephysical therapy (p. 361)¹
- Prephysician’s assistant (p. 1880)²
- Prerespiratory care (p. 777)
- Presocial welfare (p. 2504)
- Preveterinary medicine (p. 1880)²

¹ These are graduate programs at KU. If you’re interested in these programs, please consult your academic advisor for more information.
² KU doesn’t offer these degree programs. Students may indicate interest in these areas as preparation for programs at other colleges and universities.

Curriculum | 2288
Curriculum and Teaching .......................................................... 236

D
Design ...................................................................................... 81
Diagnostic Ultrasound Technology (General and Vascular) ......... 702
Dietetic Internship Graduate Certificate .................................... 710
Dietetics and Integrative Medicine Graduate Certificate ............ 713
Dietetics and Nutrition ............................................................. 705
Distribution of the 12 Units ...................................................... 13
Doctor of Audiology ............................................................... 677
Doctor of Audiology in Curriculum and Instruction ................... 2004
Doctor of Education in Educational Leadership and Policy Studies 322
Doctor of Education in Special Education ................................... 417
Doctor of Engineering in Aerospace Engineering ...................... 488
Doctor of Juridical Science Program ......................................... 834
Doctor of Medicine (M.D.) ....................................................... 2288
Doctor of Musical Arts ............................................................ 2384
Doctor of Musical Arts in Composition ...................................... 2384
Doctor of Musical Arts in Conducting ...................................... 2385
Doctor of Musical Arts in Music Performance: Brass and Percussion 2388
Doctor of Musical Arts in Music Performance: Organ and Church Music 2389
Doctor of Musical Arts in Music Performance: Piano .................. 2392
Doctor of Musical Arts in Music Performance: Strings ............... 2393
Doctor of Musical Arts in Music Performance: Voice ................. 2395
Doctor of Musical Arts in Music Performance: Woodwinds ......... 2397
Doctor of Nurse Anesthesia Practice ........................................ 740
Doctor of Nursing Practice ...................................................... 2437
Doctor of Occupational Therapy - Entry-Level ......................... 759
Doctor of Occupational Therapy - Post-Professional ................. 757
Doctor of Pharmacy .................................................................. 2475
Doctor of Philosophy ............................................................... 2400
Doctor of Philosophy in Aerospace Engineering ....................... 491
Doctor of Philosophy in American Studies ................................ 1213
Doctor of Philosophy in Anthropology ..................................... 1235
Doctor of Philosophy in Architecture ....................................... 78
Doctor of Philosophy in Behavioral Psychology ....................... 1273
Doctor of Philosophy in Biochemistry and Molecular Biology .... 2190
Doctor of Philosophy in Bioengineering .................................... 499
Doctor of Philosophy in Biostatistics ......................................... 2202
Doctor of Philosophy in Business ............................................. 169
Doctor of Philosophy in Cell Biology and Anatomy .................... 2184
Doctor of Philosophy in Chemical and Petroleum Engineering ..... 518
Doctor of Philosophy in Chemistry .......................................... 1345
Doctor of Philosophy in Child Language ................................... 1345
Doctor of Philosophy in Civil Engineering, Environmental Engineering, and Environmental Science ......................... 564
Doctor of Philosophy in Clinical Child Psychology .................... 1369
Doctor of Philosophy in Communication Studies ....................... 1384
Doctor of Philosophy in Computational Biology ....................... 1388
Doctor of Philosophy in Computer Science ................................ 590
Doctor of Philosophy in Counseling Psychology ....................... 339
Doctor of Philosophy in Curriculum and Instruction ................... 304
Doctor of Philosophy in Ecology and Evolutionary Biology, Botany, or Entomology ................................................ 1437
Doctor of Philosophy in Economics ........................................ 1455
Doctor of Philosophy in Educational Leadership and Policy Studies 325
Doctor of Philosophy in Educational Psychology and Research .... 343
Doctor of Philosophy in Electrical Engineering ......................... 592
Doctor of Philosophy in English .............................................. 1495
Doctor of Philosophy in Film and Media Studies ....................... 2079
Doctor of Philosophy in French and Francophone Studies .......... 1535
Doctor of Philosophy in Geography .......................................... 1567
Doctor of Philosophy in Geology ............................................. 1598
Doctor of Philosophy in Germanic Languages and Literatures ...... 1612
Doctor of Philosophy in Gerontology ....................................... 1614
Doctor of Philosophy in Health Policy and Management ............ 2226
Doctor of Philosophy in Health, Sport, and Exercise Science ....... 396
Doctor of Philosophy in History .............................................. 1672
Doctor of Philosophy in History of Art ...................................... 1694
Doctor of Philosophy in Journalism ......................................... 807
Doctor of Philosophy in Linguistics ......................................... 1770
Doctor of Philosophy in Mathematics ...................................... 1788
Doctor of Philosophy in Mechanical Engineering ..................... 623
Doctor of Philosophy in Medical Nutrition Science ................... 722
Doctor of Philosophy in Medicinal Chemistry ......................... 2480
Doctor of Philosophy in Microbiology ..................................... 2233
Doctor of Philosophy in Molecular and Integrative Physiology ..... 2240

Graduate Certificate in Geographic Information Science ............. 1568
Graduate Certificate in Global and International Studies .............. 1635
Graduate Certificate in Health Psychology .................................... 1912
Graduate Certificate in Homeland Security: Law and Policy ........ 837
Graduate Certificate in Indigenous Studies ................................... 1715
Graduate Certificate in Latin American and Caribbean Studies ..... 1748
Graduate Certificate in Leadership in Special and Inclusive Education 420
Graduate Certificate in Leadership Studies .................................... 1722
Graduate Certificate in Medieval and Early Modern Studies .......... 1537
### Graduate Certificate Programs

- **Graduate Certificate in Museum Studies** ........................................ 1815
- **Graduate Certificate in Music Enterprise** .................................... 2402
- **Graduate Certificate in Music Performance** .................................. 2403
- **Graduate Certificate in Peace & Conflict Studies** ........................ 1709
- **Graduate Certificate in Performance Management** ......................... 2157
- **Graduate Certificate in Petroleum Management** ............................ 521
- **Graduate Certificate in Professional Workplace Communication** .... 1386
- **Graduate Certificate in Reading** .................................................. 306
- **Graduate Certificate in Religious Studies** .................................... 1926
- **Graduate Certificate in RF Systems Engineering** ............................ 589
- **Graduate Certificate in Russian, East European and Eurasian Studies** 1935
- **Graduate Certificate in Science Management** ................................ 1517
- **Graduate Certificate in Second Language Studies** ......................... 2138
- **Graduate Certificate in Social Media Strategy** ............................... 807
- **Graduate Certificate in Software Engineering and Management** ...... 589
- **Graduate Certificate in Structural Analysis** ................................... 544
- **Graduate Certificate in Structural Design** ..................................... 544
- **Graduate Certificate in Studies in Equity and Social Diversity in the U.S.** 1755
- **Graduate Certificate in Teaching English to Speakers of Other Languages** 307
- **Graduate Certificate in Transition** .............................................. 421
- **Graduate Certificate in Water Resources** ...................................... 545
- **Graduate Certificate in Women, Gender, and Sexuality Studies** ...... 2031
- **Graduate Certificate of Public Interest Design** ............................. 80

### Indigenous Studies

- **Indigenous Studies Minor** ...................................................... 1711
- **Institute for Leadership Studies** ............................................... 1717
- **Interdisciplinary Graduate Program in Biomedical Sciences** ............ 2274
- **Interdisciplinary Programs** ....................................................... 103
- **Interdisciplinary Studies** ....................................................... 1724

### J

- **Jewish Studies** ............................................................................. 1725
- **Joint Degree Program in Law and East Asian Languages and Culture** 1415
- **Joint Degree: MA in Museum Studies and African and African-American Studies** 1196
- **Joint Degree: MA in Museum Studies and African and African-American Studies** 1814
- **Joint Degree: Ph.D. in Behavioral Psychology and Master of Public Health** 1276
- **Journalism & Mass Communications** .......................................... 788
- **Juris Doctor and Master of Arts in Philosophy** ............................ 1827
- **Juris Doctor Program** ................................................................. 828

### K

- **Kansas City Clinical Required Courses** ...................................... 2291
- **Kansas City Electives** .............................................................. 2294
- **KU Core** .................................................................................. 13

### L

- **Latin American & Caribbean Studies** ......................................... 1735
- **Law** ........................................................................................... 809
- **Liberal Arts & Sciences** .............................................................. 838
- **Liberal Arts and Sciences** .......................................................... 1750
- **Linguistics** ................................................................................ 1757

### M

- **M.A. in Biochemistry & Biophysics; Microbiology; or Molecular, Cellular, & Developmental Biology** 1805
- **M.A.-J.D. Degree Program** ......................................................... 1455
- **M.D.-Ph.D. Combined Degrees** ................................................. 2285
- **Major in Russian, East European, and Eurasian Studies** ............... 1931
- **Master of Accounting** ............................................................... 166
- **Master of Architecture (3-year)** ................................................ 74
- **Master of Architecture (5-year)** ................................................ 65
- **Master of Arts in African and African-American Studies** ............ 1195
- **Master of Arts in American Studies** ........................................... 1212
- **Master of Arts in Anthropology** ................................................ 1234
- **Master of Arts in Applied Behavioral Science** ............................ 1272
- **Master of Arts in Architecture** ................................................ 77
- **Master of Arts in Classics** ......................................................... 1365
- **Master of Arts in Communication Studies** ................................ 1383
